Sammael, a demon among the modern Jews, commonly styled the Angel of Death. The rabbis allege that the demonology of those who die in the land of Israel is assigned to Gabriel, whom they call an Angel of Mercy, while those who die in other countries are despatched by the hand of Sammael, the prince of demons. Several of the rabbis confirmingly assert that the latter has no power over the dead; that he himself is represented to him, "The world is in thy power except this people. I have given thee authority to root out the idolaters; but over this people I have given thee no power."

Sammans (SCHAMANS). See SHAMANS.

Samnim. See SPICK.

Samnus (Σαμνός τ. Σαμνός), a corrupt Greek form (1 Esdr. ix. 45) of the name Shema (q. v.) of the Heb. text (Neh. viii. 4).

Samoa (or Navagio's) Islands, a group of nine inhabited islands, with some islets, in the Pacific Ocean, lying north of the Friendly Islands; population in 1869, 35,107. The soil, formed chiefly by the decomposition of volcanic rock, is rich, and the climate is moist. Among the Polynesian Islands, the inhabitants of the Samoan group rank, in personal appearance, second only to the Tongans. They are well formed, and easy and graceful in their movements. Polygamy is customary, but two wives seldom live in the same house. Women are considered the equals of men, and both sexes join in the family labor. The ancient religion of the islanders acknowledged one great God, but lesser worship was preserved by them in honor of some of their war-gods. They had, besides, a god of earthquakes, a god who upheld the earth, and gods of hurricanes, rain, and lightning, and also many inferior gods, who guarded certain localities. They also worshipped certain chiefs, to whose memory they erected carved blocks of wood and stone. The first missionaries landed in Savaii in 1850 from the Society Islands, and, in 1856, were joined by others from England. The first Roman Catholic missionary arrived in 1846. The inhabitants are all now nominally Christians. There are schools and a church in every village. The children can generally read in their own language at the age of seven years, and are taught to read in the English language. The population in 1869 was 35,107.

The Bible has been translated and printed, and as have hymn-books and other works, at the missionary printing-office. In 1869, the population was divided, denominationally, as follows: Independents and Presbyterians, 27,021; Wesleyans, 5092; Roman Catholics, 3004.

Samoan Version. The Samoan belongs to the Polynesian or Malayan languages, and is spoken in Savaii, or Navigator's Islands. The translation of the Scriptures into that language appears to have been undertaken, in the first place, by the Rev. John Williams, assisted by other missionaries of the London Missionary Society, who, after the death of Williams, continued and completed it. In 1842 the Gospel of John was published, followed, in 1845, by the Gospel of Luke, translated by Macdonald, and the Epistle to the Romans, translated by Heath. In 1846, the entire New Testament, including a revised translation of the Gospel of Matthew, was completed at press. In 1848, the missionaries sent a revised version of the New Testament, and an edition of 15,000 copies was printed by the British and Foreign Bible Society. In the year 1855, the translation of the Old Testament was completed and printed; and as to the particulars concerning this great work, we will quote the words of the Report (1856, p. cixv): "Previous to the completion of the New Testament, some progress had been made in the translation of the Old Testament, and, in 1856, an edition of 10,000 copies of the book of Psalms was completed at press, both the Old and New Testaments were also printed in 7000 copies each. The Pentateuch was then bound in one volume. In 1853, editions of 5000 each of the books from Joshua to 2 Samuel inclusive were printed, and in 1854 the remainder of the historical books; and the whole were bound in one volume, forming the second volume of the historical books.

In the same year, editions of 3000 each of the books of Solomon, the Lamentations, and the minor prophets were printed, and in 1854 the remainder was completed and printed. The book of Job, with those of Solomon and the Prophets, will, besides the book of Psalms, form the third volume of the Old Testament.

"The plan adopted in translation has been to assign to individuals separate books or portions for careful translation. These portions have been further submitted to the criticism of the other members of our mission, and finally revised for the press by a committee of not less than five, including the translators, and then printed in every respect according to the decision of the committee.

"In the Old Testament, our translations have been made from the Hebrew text sent out to us by the British and Foreign Bible Society, and executed according to the standards of the Society. Our English Authorized Version has been constantly before our eyes, and adhered to wherever possible. Our chief reference has been made to the Septuagint and Vulgate, and the best use made of the various Polyglot editions. With regard to the lexicography, criticism, and renderings of the sacred text, we have availed ourselves of the labors of Rosenmüller, Gesenius, Lee, A. Kidder, Blayney, Henderson, Lowth, Dods, Patric, Good, etc.

"These translations and revisions have cost the members of our Mission many years of patient thought and labor; and it is a cause of great and most devout thankfulness to God that some of us who commenced the work on the Samoan Bible Society have lived to see the completion of its labor. We shall never forget the imperative sense we have had a part in the translating of the Sacred Word into its languages, and the satisfaction we feel in being engaged in its completion. To the Great Head of the Church, who has enabled us to put this invaluable boon into the hands of the Samoan people, we all assign praise." Since that time new revised editions have been published. The last edition of the entire Bible left the press at London in 1873, under the editorship of the Rev. Dr. Turner. (B. P.)

Samogitian Version. The Samogitian is a dialect of the Lithuanian language, spoken in three districts of Lithuania—namely, Telcha, Snaul, and Rosina. The Samogitian Missionary Society, about 1810, commenced the work of translating the Bible, and are, with few exceptions, of the Roman Catholic persuasion, whence it is also called the "Catholic dialect." In 1814, the New Testament had been for the first time translated into this dialect by prince Gedroitz, bishop of Samogitia, who designed to print one thousand copies at Wilna at his own expense. In 1816, a second edition left the press, and in 1818 a third one, printed by the monks in the monastery of St. Cazemir at Wilna. Of the Old Testament, nothing has as yet been translated into this dialect. Comp. Dalton, Das Gebet des Herrn in den Sprachen Rußlands, p. 41, 79; The Bible of Every Land, p. 915. (B. P.)

Samoide (or Samoyed) Mythology. The religious beliefs of the Samoidea or Arctic tribes which persist in heathenism, despite repeated efforts to convert them to Christianity. Their supreme being, who is regarded as the creator and director of the universe, is called Num. Innumerable subordinate spirits or gods, called Tutuik, are acknowledged, who combine both good and evil qualities, and are spirits of the elements. They govern the elements, operate the health and welfare of the men of the tribes, perform ceremonies in connection with births, marriages, and deaths. The Samoide build temples, but do not set up representations of Num in them, as he is held to be invisible. The only images are those of subordinate deities.

Samokrestsschentschins. See SAMOKRiSHCHINA.
Samokrischchina, a sect of Russian dissenters, whose name signifies "self-baptizers," and expresses the peculiarity by which they are distinguished from other Raskolniks.

Samonas, archbishop of Gaza, flourished about 1056. His known work is Discourse with Achemon concerning the Real Presence of Christ's Body and Blood in the Sacrament, found in Bibl. Max. Patr. xviii, 577; Gr. and Lat. in Bibl. Patr. Guillaund, xiv, 225.

Samos (Σάμος, distinguished), a noted island in the Aegean Sea, near the coast of Lydia, in Asia Minor, and separated only by a narrow strait from the promontory which terminates in Cape Troglydium. This strait, in the narrowest part, is not quite a mile in width (Pliney, Hist. Nat. v, 34; Strabo, xiv, 634; comp. Leake, Map of Asia Minor). For its history, from the time when it was a powerful member of the Ionian confederacy to its recent struggles against Turkey during the war of independence, and since, we must refer to Smith's Dict. of Gr. and Rom. Geog. s.v. Samos is a very lofty and commanding island; the word, in fact, denotes a height, especially by the sea-shore; hence, also, the name of Samothrace, or "the Thracian Samos," for another similar island. Samos was illustrious at a period of remote antiquity, and was at one time mistress of the sea, but its greatness was of no long duration. Tradition ascribes the birth of Pythagoras to this island, and Cresphoils, said to be the in-law of Homer, and himself a poet of no mean pretensions, was also a Samian. The period during which Samos enjoyed the greatest prosperity was that occupied by the government of the Polycrets, who made himself master of many among the surrounding islands. The island fell subsequently under the Athenian dominion, and was considered as one of the most valuable dependencies of Athens. The people of Samos were especially worshipers of Juno or Hera, and her temple, called the Heraeum, was enriched by some of the finest works of art known in Greece, particularly statues by Myron, Polykleitus, and Praxiteles. The chief manufacture carried on by the inhabitants was that of pottery, the Samian ware being celebrated all over the civilized world. It was made of a fine smooth clay of a deep red color, and many specimens of it remain to adorn the cabinets of archaeologists. It must be borne in mind, however, that the term Samian ware was soon applied to all of a similar character, wherever fabricated, just as at the present time all por-

Coin of Samos.

Samos is briefly referred to in two places in Scripture. The Romans wrote to the governor in favor of the Jews, in the time of Simon Maccabeus (1 Macc. xv, 23), and Paul touched there when going to Jerusalem, on his return from his third missionary journey (Acts xx, 15). He had been at Chios, and was about to proceed to Miletus, having passed by Ephesus without touching there. The topographical notices given incidentally by Luke are most exact. The night was spent at the anchorage of Troglydium, in the narrow strait between Samos and the extremity of the mainland ridge of Mycale. This spot is famous both for the great battle of the old Greeks against the Persians in B.C. 479, and also for a gallant action of the modern Greeks against the Turks in 1824. Here, however, it is more natural (especially since we know, as above from 1 Macc. xv, 23, that Jews resided
here) to allude to the meeting of Herod the Great with Marcus Agrippa in Samos, whence resulted many privileges to the Jews (Josephus, Ant. xvi, 2, 2, 4). At that time, when the town was there called "Phasis," it was the Phasis city in the province of Asia (q. v.). See Conybeare and Howson, St. Paul, ii, 18; Lewin, St. Paul, ii, 87 sq.; See Paul.

Samosatenses, or Samosatenians, the followers of Paul of Samosata (q. v.).

Samostrogolischtachchina, a sect of Russian dissenters, whose name signifies "self-ordinaries," and expresses the peculiarity by which they are distinguished from other Raskolnikis.

Samothracia, or Samothrace (Σαμοθράκη), a famous island in the north-eastern part of the Egean Sea, above the Hellepont, with a city of the same name. It was anciently called Dardania, Lycemia, and also Samos; and to distinguish it from the other Samos (q. v.), the name of Thrace was added, from its vicinity to that country. Hence, Samos of Thrace, Σάμος Θράκης, and by contraction Σάμος Θράκης, Samothrace. Samothrace is about twenty miles in circumference, and about twenty miles from the coast of Thrace. The island was celebrated for the mysteries of Ceres and Proserpine, and was a sacred asylum (Didot, Sic. iii, 83; v, 47; and Pliny, Hist. Nat. iv, 39). In ancient times it was the resort of numerous pilgrims, who regarded it as invested with peculiar sanctity. It was the seat of the worship and mysteries of the Cabiri—mysteries in which persons of the highest rank and consideration deemed it an especial honor to be initiated, and which have been a favorite subject for investigation among modern students. Samothrace is mountainous, and the central peak is the highest point in the northern part of the Egean, and inferior only to Mount Athos on the mainland. Homer places upon its throne of Neptune; it towers high over Imброс, and the plains of Troy are distinctly visible from its summit. Homer describes Jupiter as watching from hence the progress of the Trojan war. The traditions of Samothrace extend to the remotest antiquity; they refer to a period when the Hellepont, the Propontis, and the Bosphorus were but a series of inland lakes, and the Euxine was entirely shut away from the Egean. It is the opinion of Niebuhr (Ancient Ethnography and Geography, i, 182) that Samothrace was the centre of the Pelasgian religion. Persicus took refuge here after his defeat by the Romans at Pydna. In later times Samothrace had, according to Pliny, the privileges of a small free state, though it was doubtless considered a dependency of the province of Macedonia. The island is now called Samothraki, frequently corrupted into Samundaychi (ικ τω μυκητίς). It is but thinly peopled, principally by fishermen, and in many parts is covered with forests. It contains only a single village. The mountain is described in the Missionary Herald for 1826, p. 246; comp. Richter, Walfisch, p. 330 sq.; Smith, Dict. of Class. Geog. s. v.; Conze, Reise auf d. Inseln d. Thrakischen Meers (Berlin 1869).

Coin of Samothrace.

The mention of this island in the account of Paul's first voyage to Europe (Acts xvi, 11) is, for two reasons, worthy of careful notice. In the first place, being a very lofty and conspicuous island, it is an excellent landmark for sailors, and must have been full in view, if the weather was clear, throughout that voyage from Troas to Neapolis. From the shore at Troas, Samothrace is seen towering over Imброс (Homer, Il. xiii, 12, 15; Kinglake, Ethön, p. 64), and it is similarly a marked object in the view from the hills between Neapolis and Philippoi (Clarke, Travels, ch. xiii). These allusions tend to give vividness to one of the most important voyages that ever took place. Secondly, this voyage was made with a fair wind. Not only are we told that it occupied only parts of two days, whereas on a subsequent return voyage (Acts xx, 6) the time spent at sea was five; but the technical word here used (εἰσαγωγήτροπος) implies that they ran before the wind. Now the position of Samothrace is exactly such as to correspond with these notices, and thus incidentally to confirm the accuracy of a most artless narrative. Paul and his companions anchored for the night off Samothrace. The ancient city, and therefore probably the usual anchorage, was on the north side, which would be sufficiently sheltered from a south-east wind. It may be added, as a further practical consideration not to be overlooked, that such a wind would be favorable for overcoming the opposing current, which sets south-west after leaving the Dardanelles, and easterly between Samothrace and the mainland. See Conybeare and Howson, Life and Ep. of St. Paul, i, 282 sq.; Lewin, St. Paul, i, 290.

Sampsamēs (Σαμπσαμής, Busta Samas; Vulg. Languscos, Samasmen), a name which occurs in the list of those to whom the Romans are said to have sent letters in favor of the Jews (1 Mac. xv, 23). The name is probably not that of a sovereign (as it appears to be taken in the A. V.), but of a place, which Grivson identifies with Samora, on the coast of the Black Sea, between Sinope and Trebizond.

Sampson, Ezra, a Congregational minister, was born at Middleborough, Mass., Feb. 12, 1749. He graduated at Yale College, 1773, and became pastor of the Congregational Church at Plympton, Mass., Feb., 1775. He also officiated as chaplain in the Revolutionary army, and was settled at Hudson, N. Y., 1796. While there he became associated with Rev. Harry Crosswell in the editorship of The Balance, one of the first literary journals in the United States (1801-4). He served for a year (1804-5) the Connecticut Courant and became judge of Columbia County in 1814. He died in New York City, Dec. 12, 1823. He was the author of Beauties of the Bible (1802)—Sham Patriot Unmask'd (1803)—The Historical Dictionary (1804)—The Brief Remark on the Ways of Men (1817, 1855). See Sprague, Annals of the American Pulpit, ii, 122.

Sampson, Francis S., D.D., an eminent Presbyterian divine, was born near Dover Mills, Goshenland Co.
SAMSON

Va., in Nov., 1814. At the age of sixteen he was placed in the family of his uncle, the Rev. Thornton Rogers, of Albemarle. Finding himself now in a religious atmosphere, he was induced to seek earnestly the salvation of his soul, made a profession of religion, and became a member of the Church in Charlottesville, Aug. 13, 1816. He graduated at the University of Virginia in 1836; subsequently studied theology at the Union Theological Seminary of Virginia; and, on the resignation of Prof. Ballantine, in the spring of 1838, was appointed teacher of Hebrew, and from that time continued to perform other duties of the Oriental department; was licensed as the East Hanover Presbytery in Oct., 1839, and ordained as an evangelist by the same presbytery in Oct., 1841. In the summer of 1848 he visited Europe, spending his time chiefly at the universities of Halle and Berlin in the prosecution of his Oriental studies, and returned in August, 1849. In Oct., 1848, he was elected professor of Oriental literature and languages in the Union Theological Seminary, Virginia, and in 1849 received the degree of D.D. from Hampden Sidney College. He died April 9, 1854.

In 1851 Dr. Sampson delivered, at the University of Virginia, a lecture on "The Authority of the Sacred Canon, and the Integrity of the Sacred Text," which was afterward published in connection with the series of which it formed a part; and in 1856 there appeared, under the editorial supervision of his successor, Dr. Dabney, A Critical Commentary on the Epistle to the Hebrews. One of Dr. Sampson's most striking and valuable traits was his methodical industry. "That whatever is worth doing is worth doing well; that each task must be done with one's might in just so much time as is needed to do it perfectly, and no more; that no task is to be left till all is perfected which can be done to advantage—these were the rules of working which he carried with him from the time of his boyhood to the school, the university, the study, and the lecture-room." He was eminently conscious of this. Everything in his way was, in his house, no hurried, unmeaning form. The whole air and tone of the exercise showed deep, conscientious sincerity and earnestness. As an instructor, Dr. Robert L. Dabney says of him, "I hesitate not to say that, as a master of the art of communicating knowledge, he was, in my view, unrivaled;" and again, "One of the foundation-stones of his success was his indissoluble scholarship. No man ever passed through one of his classes without a profound and admiring conviction of this." See Sprague, Annals of the American Pulpit, iv, 795; Allibone, Dict. of British and American Authors, s. v. (J. L. S.)

Sampson, Henry, a Nonconformist divine, was born in Northampton, and studied at Leyden and Padua. He was ejected at the Reformation, and subsequently became an eminent London physician. He died in 1705. He published an edition of Porter on Divine Grace, and prepared materials for a history of Nonconformists.

Sampson, Richard, I.L.L., Bishop of Chichester in 1536. He was transferred to Coventry and Lichfield, 1542, and removed to Ewellshall, 1554. He is the author of Commentary on Romes, etc. (Lond. 1546, 8vo) — Regni Sacelli (Atto).

Sampson, Thomas, a Puritan divine, was born (according to Stryve) at Playford, in Suffolk, 1517, and educated at Oxford. He was ordained by archbishop Cranmer and Ridley; was chaplain in the army of Lord Russell. In 1551 he was preferred to the rectory of Allihows, London, and, in 1554, to the deanery of Chichester. During the reign of Mary he resided in Strasburg. Returning home on the accession of Elizabeth, he refused the bishopric of Norwich, because dissatisfied with the nature of the office. In Sept., 1560, he was made prebendary of Durham, and in Michaelmas term, 1561, he was installed dean of Christ Church, Oxford. So open and zealous was he against clerical habits that in 1564 he was deprived of his deanery, and for some time imprisoned. notwithstanding his nonconformity, he was presented, in 1568, with the mastership of Wiston College at Leicester, and had, according to Wood, a prebend in St. Paul's. He resided at Leicester until his death, April 9, 1569. He married bishop Latimer's niece, by whom he had two sons, John and Nathaniel. Besides editing two Sermons of John Bradfords (1550, 8vo), a translation into English of a Sermon of St. Chrysostom (1550, 8vo), he published several Letters, and a Brief Collection of the Church and Ceremonies thereof (1592, 16mo).

S'amson (Heb. Shim'amon, y'sh'môn, shining; Sept. and N. T. Σμῶν, and so Josephus, Ant. v, 8, 4, according to whom, however, the word means "strong"; if the root s̱mṉesh has the signification of "awe," which Gesenius ascribes to it, the name S'amson would seem naturally to allude to the "awe" and "astonishment" with which the father and mother looked upon the angel who announced Samson's birth [see Judg, xiii, 6, 18-20], the name of the celebrated champion, deliverer, and judge of Israel, equally remarkable for his supernatural bodily prowess, his moral character, his piety, and his infirmities, and his tragic end (B.C. 1185-65). His career is one of romantic interest, and affords valuable lessons in the relations and condition of the Hebrew people. 1. Birth—S'amson was the son of Manoah, of the tribe of Dan. He was born at Zorah, B.C. 1252, son of a mother whose name is nowhere given in the Scriptures. The circumstances under which his birth was announced by a heavenly messenger gave distinct presage of an extraordinary character, whose endowments were to be of a nature suited to the providential exigencies in which he was raised up. The burden of the oracle to his mother, who had long been barren, was that the child with which she was pregnant was to be a son, who should be a Nazarene from his birth, upon whose head no razor was to come, and who was to prove a signal deliverer to his people. She was directed, accordingly, to conform her own regimen to the tenor of the Nazarite law, and strictly abstain from wine and all intoxicating liquor, and from every species of impure food. According to the "prophecy going before upon him," Samson was born in the following year; and his destination to great achievements began to evince itself at a very early age by the illusions of superhuman strength which came from time to time upon him.

As the position of the tribe of Dan—bordering upon the territory of the Philistines—exposed them especially to the predatory incursions of this people, it was plainly the design of Heaven to raise up a deliverer in that region where he was most needed. The Philistines, therefore, became very naturally the objects of that retributive course of proceedings in which Samson was to be the principal actor, and upon which he could only enter by seeking some occasion of exciting hostilities that would bring the two peoples into direct collision. Such an occasion was afforded by his meeting with one of the daughters of the Philistines at Timnath, whom he besought his parents to give him in marriage, assigning as a reason that she "pleased him well"—Heb. נַעֲשֵׂה הָאָדָם שׁוּךָ מְאֹד, She is right in mine eyes; not beautiful, engaging, attractive, but right relative to an end, purpose, or object (see Gossée, Lexicon, s. v. נַעֲשֵׂה, and comp. 2 Sam. xvii, 4; 1 Kings ix, 12; 2 Chron. xii, 30; Numb. xxviii, 27). That he entertained a genuine affection for the woman, notwithstanding the policy by which he was prompted, we may, doubtless, admit; but that he intended, at the same time, to make the marriage subservient to the great purpose of delivering his country from oppression, and that in this he was acting under the secret control of Providence, would seem to be clear from the words immediately following, when, in reference to the objection of his parents to such a union, it is said that
they "knew not that it was of the Lord that he sought an occasion against the Philistines." It is here worthy of note that the Hebrew, instead of "against the Philistines," has "of or from the Philistines," apparently implying that the occasion sought should be one that originated on the side of the Philistines. This occasion he sought out for him, without previous much ado. More than this, he shared his uprightness, "hip and thigh, with a great slaughter" (Judg. xv, 1-8). The original, strictly rendered, runs, "he smote them leg upon thigh"—apparently a proverbial expression, and implying, according to Gesenius, that he cut them to pieces so that their limbs—their legs and thighs—were divided, and he and his men together: equivalent to saying that he smote and destroyed them wholly, entirely. Mr. Taylor, in his edition of Calmet, recognises in these words an allusion to some kind of wrestling combat, in which, perhaps, the slaughter on this occasion may have commenced. (4.) Having subsequently taken up his residence in the rock Etam, he was there disdained by consenting to a pussilanimous arrangement on the part of his own countrymen, by which he agreed to surrender himself in bonds, provided they would not themselves fall upon him and kill him. He probably gave in to this measure from a strong inward assurance that the issue of it was bound against him in the court of God. But he was not the less exigent upon his foes. Being brought, in this apparently helpless condition, to a place called, from the event, Lehi, a jiste, his preternatural potency suddenly put itself forth; and, snapping the cords asunder, and snatching up the jawbone of an ass, he dealt so effectually about him that a thousand men were slain on the spot. That this was altogether the work, not of man, but of God, was soon demonstrated. Weary with his exertions, the illustrious Danite became faint from thirst; and, as there was no water in the place, he prayed that a fountain might be opened. His prayer was heard: God caused a stream to gush from a hollow rock hard by; and Samson, in gratitude, gave it the name of En- hukker, a word that signifies "the well of him that prayed," and which continued to be the designation of the fountain ever after. The place received its name from the circumstance of its having then so effectually wielded the jawbone (יָדֵבָה, Lehi) (Judg. xv, 15 sq.; see Bauer, Heb. Myth., ii, 65; A uführung. Erklä. des W., ii, 57; comp. Judg. iii, 91; 2 Sam. xxiii, 8, 18). The springing up of an ass' jawbone in the land of Judah, in 198 B.C., great trouble to the interpreters; and some would remove the passage from the text, or give it a very different meaning. The most common is to render lechi, יֵלֶה, not jawbone, but Lehi, the name of a place in which the fountain sprang up; and maktekh, מַכְתֵּב, not the socket of the tooth, but the rift of the rock from which the water came. So the Targum, and Josephus (Ant. v, 8, 9; comp. Clericus in loc.; Ortolb, De Fonte Simeonis prope Massiliam [Leips. 1707]); Deleying, Observation. Sucr. i, 113 sq.; Bising, in the Biblioth. Hayyua, ii, 556 sq.; Herder, Geist der sbr. Poesie, ii, 235, 255; Rosenmüller, Schol. in loc.). It would seem that Lehi refers back to verse 15, and the rendering of maktekh is assumed. It would be easier, with Studier, to take Lehi for the name of a wall of rock, an opening in which was called maktekh, tooth-cavity. Yet it seems to be doubtful whether maktekh alone could have this meaning. (See in general Gesenius, Thesaur., ii, 752.) Heine (Disertat. Sacr. p. 241 sq.) opposes another exegetical attempt on this passage, and clings to the entire miracle. Comp. Bocchus, Mieras, i, 171 sq.). See Lehi. (5.) The Philistines were made desperate from the time held in such contempt by their victor that he went openly into the city of Gaza, where he seems to have suffered himself weakly to be drawn into the company of a woman of loose character, the yielding to whose enticements exposed him to the most imminent peril (Judg. xvi, 1-3). His presence being soon noise abroad, an attempt was made during the night forcibly to detain him by close-
ing the gates of the city, and making them fast; but
Samson, apprised of it, rose at midnight, and, breaking
away bolts, bars, and hinges, departed, carrying the gates
upon his shoulders to the top of a neighboring hill that
looks towards Hebron (עָרְבָּת הַבָּרוֹן: Sept. וּבֵית הָרֹם, facing Hebron). The common ren-
dering, "before Hebron," is less appropriate, as the dis-
tance between the two cities is at least twenty miles.
The hill lay, doubtless, somewhere between the cities,
and in full view of both. See GAZA.
(6.) After this his enemies strove to entrap him by
guile and stratagems, and they were too suc-
cessful in the end. Falling in love with a woman of
Sorek, named Delilah, he became so infatuated by his
passion that not his bodily strength could equal his
mental weakness. (But see Oeder, De Simeone Cas-
to [Onoel. 1718].) The princes of the Philistines, aware
of Samson's infirmity, determined by means of it to get
possession, if possible, of his person. For this purpose
they propose a tempting bribe to Delilah, and she en-
ters at once into the treacherous compact. She em-
ployed all her art and blandishments to worm from him
the secret of his prodigious strength. Having for some
time amused her with fictions, he, at last, in a moment
of weakness, consented to show her the means by which
he lay in his hair, which, if it were shaved, would leave him a mere
common man. Not that his strength really lay in his
hair; for this, in fact, had no natural influence upon it
one way or the other. His strength arose from his re-
lation to God as a Nazarite; and the preservation of his
hair unshorn was the mark or sign of his Nazaritehship,
and a pledge, on the part of God, of the continuance of
his miraculous physical powers. If he lost this sign,
the badge of his consecration, he broke his vow, and
consequently forfeited the thing signified. God aban-
donked him; and he was thenceforward no more, in this
respect, a Nazarite than a Christian pard
mour seized the first opportunity of putting his decla-
ration to the test. She shaved his head while he lay
sleeping in her lap; and, at a concerted signal, he was
instantly arrested by his enemies lying in wait. Be-
cause of his grand endowment, and forsaken of God,
the champion of Israel could now well adopt the words of
Solomon: "I find more bitter than death the woman
whose heart is snares and nets, and whose hand is bands;
whose pleaseth God shall escape from her; but the sinner
shall be taken by her." Having so long presumptuous-
ly played with his ruin, Heaven leaves him to him-
self, as a punishment for his former guilty indulgence.
His heart, indeed, had swerved, and the hands of his relentless foes.
His punishment was indeed severe, though he amply revenged it, as well
as redeemed, in a measure, his own honor, by the manner
in which he met his death. The Philistines, having
deprived him of sight, at first immured him in a prison,
and made him grind at the mill like a slave (Judg. xvvi.
4-21). As this was an employment which, in the East,
usually devolves on women, to assign it to such a man
as Samson was virtually to reduce him to the lowest
state of degradation and shame. To grind corn for others was, even for a woman, a proverbial term expressive
of the most menial and oppressed condition. How much more so for the man of God, who set to have been made
grinder-general for the prison-house! (See Lehmann, De Simeone Molitore [Viteb. 1711].)
(7.) In process of time, while remaining in this
confinement, his hair recovered its growth, and with it such
a profound repentance seems to have wrought in his heart, that his charac-
ter, as far as his physical powers were concerned, was
sensibly altered. At least, his hair, which before had so culpably lost. Of this fact
his enemies were not aware. Still exulting in their possession of the great scourge of their nation, they
kept him, like a wild beast, for mockery and insult.
On one of these occasions, when an immense multitude,
including the princes and nobility of the Philistines,
were convened in a large amphitheatre to celebrate a
of the Philistines in their relation to Israel. Secondly, there is the remarkable coincidence of both Samson and Samuel being Nazarites (Judg. xiii., 5; xvi., 17; comp. 1 Sam. i., 11). It looks as if the great exploits of the young Danite Nazarite had suggested to Hannah the consecration of her son in like manner, or, at all events, as if xvii. 1 could be reason for a similar vow in that time prevalent. No other mention of Nazarites occurs in the Scripture history till Amos ii., 11, 12; and even there the allusion seems to be to Samuel and Samson. Thirdly, there is a similar notice of the house of Dagon in Judg. xvi., 23 and 1 Sam. v., 2. Fourthly, the lords of the Philistines are mentioned in a similar way in 1 Sam. vii., 7. The effect of Samson’s prowess must have been more of a preparatory kind, by arousing the bowed spirit of his people, and shaking the insolent security of the Philistines, than in the way of decisive victory or deliverance. There is no allusion whatever to other parts of Israel during Samson’s judgeship, except the single fact of the men of the border tribe of Judah, three thousand in number, fetching him from the rock Etam to deliver him up to the Philistines (Judg. xv., 9-13). The whole narrative is entirely local, and, like the following story concerning Micah (Judg. xvii., xviii.), seems to be taken from the annals of the tribe of Dan. Still it does not follow that there were contemporaneous judges in other parts of the land. See Judges.

(2) As a Nazirite, Samson exhibits the law in Numb. vii. in full practice. The eminence of such Nazarites as Samson and Samuel would tend to give that dignity to the profession which is alluded to in Lam. iv., 7. See Nazirite.

(3) As an inspired person, Samson is one of those who are distinctly spoken of in Scripture as endowed with supernatural power by the Spirit of the Lord. These specimens of extraordinary prowess, of which even the slaying of the lion at Timnath without weapon in hand in one, were doubtless the result of that special influence of the Most High which is referred to in Judg. xiii., 25—“And the Spirit of the Lord began to move him at times in the camp of Dan, between Zorah and Eshtaol.” The import of the original word (מלט) for moved is peculiar. As מלחך, the radical form, signifies as and the metaphor is probably drawn from the repeated and somewhat violent strokes of a workman with his hammer. It implies, therefore, a peculiar urgency, an inspelling influence, which he could not well resist in himself, nor others in him. But we do not know that this was the case with Samson. It is, however, to see how upon his arms became as fleet as a burning fire; “The Spirit of the Lord came upon him, and he went down to Ashkelon, and slew thirty men of them. But, on the other hand, after his locks were cut, and his strength was gone from him, it is said “He went not that the Lord was departed from him” (Judg. xiii., 25; xiv., 6; 19; xv., 12, 20). The phrase “the Spirit of the Lord came upon him” is common to him with Othniel and Gideon (Judg. iii., 10; vi., 34); but the connection of supernatural power with the integrity of the Nazarite vow, and the particular gift of great strength of body, as seen in terrors in pieces a lion, breaking his bonds asunder, carrying the gates of the city upon his back, and throwing down the pillars which supported the house of Dagon, are quite peculiar to Samson. Indeed, his whole character and history have no exact parallel in the book of Samuel. It is, however, to see how forcibly the Israelites would be taught by such an example that their national strength lay in their complete separation from idolatry and consecration to the true God; and that he could give them power to subdue their mightiest enemies, if only they were true to his service (comp. 1 Sam. ii., 10). (See the Ecclesiastic Review, Nov. 1861.)

(4) As to Mythological Coincidences.—The narrative of Samson’s deeds has often been compared with the mythical story of the Greek Hercules. (See especially Vogel, in the Hult. Eucop., ii., vi., 8 sq.; Risauf, Die Simonsmage u.d. Herakles-Mythos [Leips. 1861].) Thus, his combat with the lion is compared with the conquest of the Nemean lion by that; 1, 5, 7; Diod. Sic. iv., 13; another fearful lion on Mt. Citheron (Apollod. ii., 4, 9); his capture of the jackals with the capture of the stag of Diana (Diod. Sic. iv., 13; Apollod. ii., 5, 3), and of the Cretan bull (Apollod. ii., 5, 7; Diod. Sic. iv., 13); his slaughter of his pararmymphs’ friends with the overthrow of the Muses’ image at Ephesus (Apollod. ii., 5, 4); by Hercules, in a narrow pass (Apollod. ii., 4, 11, mentioned, too, by Herod. ii., 45); his carrying-off the gates of Gaza with the carrying-away of the Cretan bull (Diod. Sic. iv., 13); but, above all, the destruction of Samson by his beloved Delilah has been compared with the overcoming of Hercules through Omphale (Diod. Sic. iv., 31; Apollod. ii., 6, 8; comp. Seneca, Helv. p. 318 sq.); in fine, Samson’s wonderful birth (Judg. xiii.), with that of Hercules (see Bauer, Hebr. Myth., ii., 88 sq.). Those, however, have far less ground who identify Samson with the Phoenician Hercules, the sun-god. Basing the view on the etymology of the name (see Vatke, Bibl. Theol. i., 968 sq.; Hübner, Die Bildung von Samson as a myth, to explain the details by the course and operation of the sun (Borkhausen, in the Coburg, Annal, d. Theol., 1883, iii., 2, 3; iv., 1; comp. Jerome, Ep. ad Phil. vii., 762). There are many other striking parallels in the Greek mythology—e.g. in the Crotom Milo and other strong men (Pliny, vii., 19); in the deeds of Theseus, especially the destruction of the wild boar at Crommyon (Diod. Sic. iv., 59), and the carrying-away of a living bull to Athens (Bauer, I. c., p. 91 sq.); of king Nius in Megara, who lost his kingdom at the same time with his hair (Ovid, Met., viii., 8, 84, 84; Virgil, E. C. 120 sq.; Hyg. F. B. 198); of the fountain Ainanipe, which sprang from the footstep of Pegasus, etc. But there is no reason for rejecting the historical existence of Samson; and his character and deeds accord well with the state of the Israelites in the time of the Judges. Yet the opinion is widely held that the traditions out of which the book of Judges is compiled have degenerated and exaggerated (see v., 1. 21; Myth., ii., 69 sq.; Hebr. Myth., ii., 88 sq.). Hence some have undertaken to explain the account from natural causes and commonplace events mostly fruitlessly (Hahnberg, in the Brem. u. Ver. Biblioth. ii., 302 sq.; Bern, in the Semler’s Hall. Samml. ii., iv., 1 sq.; Hezel, Schriften, ii., 635 sq. in Eichhorn, Law, vi., 1 sq., also in his Verso, Abh. h., 146 sq.; Diederich, Zur Gesch. Simm. [Gott. 1778]; Herder, Gesch. d. ebr. Verr. ii., 235 sq., 252 sq.). Yet more trifling is the hypothesis of Kaiser (Comment on Priora Gen., p. 188 sq.) that Samson was striving to mimic and mock the Philistine heros. Once more: “Hercules once went to Egypt, and there the inhabitants took him, and, putting a chaplet on his head, led him out in solemn procession, intending to offer him in sacrifice to Jupiter. For a while he submitted quietly; but when they led him up to the altar and began the ceremonies, he put forth his strength and slew them all” (Rawlinson, Herod. ii., 45).

The passage from Lycochoron, with the scholiion, quoted by Bochart (Hieros, var. ii., lib. v., cap. xii), where Hercules is said to have been three nights in the belly of the sea-monster, and to have come out with the loss of all his hair, is also curious, and seems to be a complication of the story of Samson, in which he may be added the connection between Samson, considered as derived from Semneeh, the sun,” and the designation of Mow, the Egyptian Hercules, as “Son of the Sun,” worshipped also under the name Sem, which Sir G. Wilkinson compares with Samson. The Tyrian Herocles (whose temple at Tyre is described by Herod. ii., 44), he also tells us, “was originally the sun, and the
same as Baal" (Rawlinson, Herod. ii, 44, note 7). The connection between the Phoenician Baal (called Baal Shem, Baal Shemesh, and Baal Hamman) and Heracles is well known. Genevius (Thesaur. s. v. Ἡρακλῆς) tells us that in certain Phoenician inscriptions, which are accompanied by a Greek translation, Baal is rendered Heracles, and that "the Tyrian Hercules" is the constant Greek designation of the Baal of Tyre. He also gives several Carmotic inscriptions to Baal Hamman, which he renders Baal Sauliris; and also a sculpture in which Baal Hamman's head is surrounded with rays, and which has an image of the sun on the upper part of the monument (Mon. Phæn. i, 171; ii, tab. 21). Another evidence of the identity of the Phoenician Baal and Hercules may be found in Bætis, near Baiae, a place sacred to Hercules (locus Herculis, Serv.), but evidently so called from Baal. Thirlwall (Hist. of Greece) ascribes to the numerous temples built by the Phoenicians in honor of Baal in their different settlements the Greek fables of the labors and journeys of Heracles. Bochart thinks the custom described by Ovid (Fast. liv.) of tying a lighted torch between two foxes in the circulation of the flames, and allowing the hares to pass through the inner one by a fox with burning hay and straw tied to it, was derived from the Phoenicians, and is clearly to be traced to the history of Samson (Hieroz. pars i, lib. iii, cap. xiii). From all this, however, arises little probability that the Greek and Latin conception of Heracles was derived from that of the Phoenician stories and reminiscences of the great Hebrew hero Samson. Some learned men connect the name Herac·les with Samson etymologically (see Wilkinson's note in Rawlinson's Herod. ii, 48; Patrick, On Judg. xxxi, 30; Cornel. a Lapide, etc.); but none of these etymologies are very convincing. Nevertheless, the following description of Heracles, given by C. O. Müller (Dorians, bk. ii, ch. xii), might almost have been written for Samson: "The highest degree of human suffering and courage is attributed to Heracles: his character is as noble as could be conceived in those rude and early times; but he is by no means represented as free from the blemishes of human nature; on the contrary, he is frequently subject to wild, ungovernable passions, when the noble indignation and anger of the suffering hero degenerate into frenzy. Every crime, however, is atoned for by some new suffering; but nothing breaks his invincible courage until, purified from earthly corruption, he ascends Mount Olympus." Again: "Heracles was a jovial guest, and not backward in enjoying himself. . . . It was Heracles, above all other heroes, whom mythology placed in ludicrous situations, and sometimes made the butt of the buffoonery of others. The Cercopes are represented as alternately amusing and annoying the hero. In works of art they are often represented as satyrs who rob the hero of his quiver, bow, and club. Heracles, annoyed at their insults, binds two of them to a pole, and marches off with his prize. . . . It also seems that mirth and buffoonery were often combined with the festivals of Heracles: thus at Athens there was a society of sixty men, who, on the festival of the Dionysian Hercules, attacked and amused themselves and others with sallies of wit." The commentary of Adam Clarke presents us with the results of De L'Ourv, an ingenious French writer, on this subject, from which it will be seen that the coincidences are extremely striking, and such as would, perhaps, afford to most minds, an additional proof of how much the ancient mythologies were a distorted reflection of the Scripture narrative. Phoenician traders, it is imagined, might easily have carried stories concerning the Hebrew hero to the different countries where they traded, especially Greece and Italy; and such stories would have been moulded according to the taste or imagination of those who heard them. Whatever is thought, however, of such coincidences, it is certain that the history of Samson is a historical, and not an allegorical, narrative. It has also a distinctly supernatural element which cannot be explained away. The history, as we now have it, must have been written several centuries after Samson's death (Judg. xv, 19, 20; xvi, 1, 30; xx, 1), though probably taken from the annals of the tribe of Dan. Josephus has given it pretty fully, but with alterations and embellishments of his own, after his manner. The older writers on Samson contribute nothing to the interpretation of the history (e. g. Mazzac, in his Dissert. Philol. Exeper. p. 178 sq.). The efforts to rid the story of its popularity already in Stockhouse (Bibl. Hist. illi, 776 sq.). The Wolfenbuttel Fragments (according to the specimens in Bayle and others) would simply degrade Samson; and Niemann (Charuk. iii, 254 sq.) accomplishes nothing beyond showing that this wilful and rough hero of the old time, judged by the moral law, is unworthy of comparison with Christ (see Hauke, De Simoia Typo- Christi [Alt. 1740]). Samson was earnest and patriotic; to him his Nazarite consecration was not a mere religious veil, but a living impulse, and no one can properly deny him the dignity of a prophet, or judge (Bertheau, Buch der Richter, p. 14, Einleitung), unless he understands the spirit of the times. The moral significance of Samson's life has been first set forth by Ewald (Gesch. Isr. ii, 401 sq.), but he seems to have idealized his hero too much (comp. the excellent remarks of Bertheau, op. cit. p. 168 sq.). The only mention of Samson in the New Testament confirms his historical character. He is spoken of in Phil. 3:18 as a type of the Saviour, and the story is told with Gideon, Barak, and Jephthah, and of one of those who "through faith waxed valiant in fight, and turned to flight the armies of the aliens." For other monographs on Samson, see Darling, Cyclopaedia Bibliographica, col. 285.

Samson, Bernhardus, a Franciscan monk, who applied the traffic in indulgences in Switzerland at the time of the Reformation in Saxony, who died at St. Gall, 1524, but the dates of his birth and death are not known. He is described by his contemporaries as an eloquent, in- solent monk. He was employed in the indulgence traffic by cardinal Forli, to whom Leo X had furred the territory of Switzerland. He entered Switzerland in August, 1516, and passed from canton to canton with great success, assuming great state, and giving great offence to the local clergy. Meantime Zwingli was called as priest to Zurich. He had already raised his voice against the traffic, but now he was summoned by bishop Hugo to make a direct attack upon Samson. Others also were likewise summoned. As Samson had not duly sent his credentials to the bishop, the latter ordered his whole diocese to exclude him from their churches. Samson retired into Baden, and met with great success. In his zeal in urging the indulgences upon the people, he represented the souls thereby rescued from purgatory as flying to heaven by swarms: "Ecce volant! Ecce pluviant!" In Feb., 1519, he went to Bremgarten, but Henry Bullinger, the priest of the place, refused to admit him into his church. Thereupon Samson pronounced the ban against him, and threatened to complain against him to the government at Zurich. On reaching Zurich, however, he was peremptorily required to absolve Bullinger, and to quit the country. In answer to a complaint of the Swiss authorities, pope Leo X announced (April 30, 1519) that he had already recalled Samson, and that in case their complaints were found corroborated, he should punish him. After Samson's retiring to Italy, all trace of him is lost. See articles cited in Heradg, Real-Enzyklop. xiii, 392-394. (J. P. L.)

Samuel (Heb. Shemuel, סֵם-עֹמֵל [on the signification, see below]). Sept. and New Test. S¥mốn, the last of those extraordinary regents that presided over the Hebrew commonwealth under the title of judges (q. v.), and the first of the line of the prophets (q. v.) specially so called (Acts xiii, 20). As such he possesses peculiar
interested in the history of the chosen people. See Samuel.

I. Name.—Of this different derivations have been given: (1) מָאָמֵר, "name of God," so apparently Origen (Euseb. Hist. L. vi. 26), and Jerome (Ad Nun.). (2) מָאָמֵר, "freed of God" (1 Sam. i. 20). Josephus (who gives this interpretation, Κυριωτάτης, Ant. x, 3) ingeniously makes it connect to the well-known Greek name Θεόσφαιρος. (4) מָאָמֵר, "heard of God." This, which is the most obvious, may have the same meaning as the previous derivation, which is supported by the sacred text (1 Sam. i, 20).

II. History.—I. Private Life.—The circumstances of his birth were ominous of his future career. He was the son of Elkanah, an Ephraimite or Ephronite, and Hannah or Anna. His father is one of the few private citizens in whose household we find polygamy. It may possibly have arisen from the irregularity of the period, or more probably from the sterility of his wife Hannah, whom, as she is always named first, and is known to have been the favorite, he probably married first. The usual effect of polygamy was felt in Elkanah's household. The sterility of Hannah brought upon her the taunts and ridicule of her conjugal rival, who "promised her sore, to make her fret, because the Lord had shut up her womb" (1 Sam. i, 6). The jealousy of Peninnah was excited also by the superior affection which was shown to Hannah by her husband. "To Hannah he gave a worthy portion; for he loved Hannah" (ver. 5). More especially at the period of the sacred festivals did the childless solitude of Hannah create within her the most poignant regrets, when she saw her husband give portions to all the sons and daughters of Peninnah, who, exulting in maternal pride and fondness, took advantage of these seasons to subject the favorite wife to a natural feminine retaliation. Hannah's life was embittered, "she wept and did not eat" (ver. 7). See Hannah.

The descent of Samuel's father, Elkanah, is involved in great obscurity. In 1 Sam. i, 1 he is described as an Ephronite. In 1 Chron. vi, 22, 23 he is made a descendant of Korah the Levite (see the table below). Hengstenberg (on Psa. lxviii, 1) and Ewald (ii, 433) explain this by supposing that the Levites were occasionally incorporated into the tribes among whom they dwelt. The question, however, is of no practical importance, because, even if Samuel were a Levite, he certainly would not have been selected by destiny to hold his semi-sacerdotal line of Levites, and especially by the authority of his office as a prophet, he hesitated not to perform priestly functions, like Elijah and others.

The opinion was, nevertheless, in former times very current that Samuel was a priest—no, some imagine that he succeeded to the priestly dignity. Most of the fathers inclined to this notion, but Jerome affirms (Advers. Josue), "Samuel prophetis ficta, Judex ficta, Levita ficta, non pontificem, ne sacerdos quidem." (Ortol., "Samuel Judex et Propheta, non Pont. aut Sacerd. Sacrificans," in the Thesaurus Novae Theol. Philol. Hasse i. 357; Selden, De Success. ad Pontif. lib. i, c. 4). The American translator of De Wette's Introduction to the Old Testament (ii, 21) says he was a priest, though not of Levitical descent, alighting the information of Chronicles, and pronouncing Samuel at the same time to be only a mythical character.

Samuel's birthplace is one of the vexed questions of sacred geography, as his descent is of sacred genealogy. See Ramah—Zophim. All that appears with certainty from the accounts is that it was in the hills of Ephraim, and (as may be inferred from its name) a double height, used for the purpose of beacons or outlookers (1 Kings vi, 1). At the time of Samuel (xix, 22), on the brow of its two summits was the city. It never lost its hold on Samuel, who in later life made it his fixed abode.

The combined family must have been large. Peninnah had several children, and Hannah had, besides Samuel, three sons and two daughters. But of these nothing is known, unless the names of the sons are those enumerated in 1 Chron. vi, 26, 27. It is on the mother of Samuel that our chief attention is fixed in the account of his birth. She is described as a woman of a high religious mission. Almost a Nazirite by practice (1 Sam. i, 16), and a prophetess in her gifts (ii, 1), she sought from God the gift of the child for which she longed with a passionate devotion of silent prayer, of which there is no other example in the Old Test.; and when the son was granted, the name which he bore, and thus first introduced into the world, expressed her sense of the urgency of her entreaty—Samuel, "the asked, or in the heart of God." Living in the great age of vows, she had before his birth dedicated him to the office of a Nazirite. As soon as he was weaned, she herself, with her husband, brought him to the tabernacle at Shiloh, where she had received the first intimation of his birth, and there solemnly consecrated him. The form of consecration was similar to that with which the irregular priesthood of Jeroboam was set apart in later times (2 Chron. xiii, 9)—a bullock of three years (Sept.), loaves (Sept.), an ephah of flour, and a skin of wine (1 Sam. i, 24). First took place the usual sacrifices (Sept.) by Elkanah himself; then, after the introduction of the child, the special sacrifice of the bullock. Then his mother made him over to Eli (vers. 25, 28), and (according to the Heb. text, but not the Sept.) the child himself performed an act of worship. The hymn which followed on this consecration is the first of the kind in the sacred volume. It is possible that, like many of the psalms, it may have been enlarged by later times to suit great occasions of victory and the like. But ver. 5 specially applies to this event, and vers. 7, 8 may well express the sense entertained by the prophet of the coming revolution in the fortunes of her son and of her country.

From the time the child is shut up in the tabernacle. The priests furnished him with a sacred garment, an ephod, made, like their own, of white linen, though of inferior quality, and his mother every year, apparently at the time only of their meeting, gave him a little mantie reaching down to his feet, such as was worn only by high personages, or women, over the other dress, and
such as he retained, as his badge, till the latest times of his life. He seems to have slept near the holy place (1 Sam. iii, 3), and his special duty was to put out, as it would seem, the sacred candlestick, and to open the doors at sunrise.

2. Samuel's Call.—In this way his childhood was passed. It was while thus sleeping in the tabernacle that the Lord called Samuel in the night, and he spoke in a stately voice, the childlike misconception, the venerable Eli, the contrast between the terrible doom and the gentle creature who has to announce it, give to this portion of the narrative a universal interest. It is this side of Samuel's career that has been well caught in the well-known picture of Sir J. Reynolds. The emergency of the time was extreme. The tribes seem to have administered their affairs as independent republics; the national confederacy was weak and disunited; and the spirit of public patriotic enterprise had been worn out by constant turmoil and invasion. The theocratic influence was also scarcely felt, its peculiar ministers being withdrawn, and its ordinary manifestations, except in the routine of the Levitical ritual, having ceased. The "word of the Lord was precious in those days; there was no open vision" (1 Sam. iii, 1). The young devotee, "the child Samuel," was selected by Jehovah to receive the deliverance of his oracles. According to Josephus (Ant. v, 10, 4), he was at this time twelve years old. As he reclined in his chamber adorning the sacred edifice, the Lord, by means adapted to his juvenile capacity, made known to him his first and fearful communication—the doom of Eli's apostate house. Other revelations speedily followed this. The frequency of God's messages to the young prophet established his fame, and the exact fulfilment of them secured his reputation. The oracle of Shiloh became vocal again through the youthful hierarch (1 Sam. iii, 19–21). From this moment the prophetic character of Samuel was established. His words were treasured up, and Shiloh became the resort of those who came to hear him (iii, 19–21). The fearful fate pronounced on the head and family of the pontificate was soon executed. Eli had indulgently tolerated, or leniently palliated, the rapacity and profanity of his sons. Through their extortion and impiyty "men abhorred the offering of the Lord, and Jehovah's wrath was on his people" (iv, 18). They became the victims of their own folly, for when the Philistines invaded the land an unworthy superposition among the Hebrews clambered for the ark to be brought into the camp and into the field of battle. Hophni and Phinehas, Eli's sons, indulging this vain and puerile fancy, accompanied it, and "the terribler was the more terrible slaughter which ensued. Their father, whose sin seems to have been his casiness of disposition, his passive and quiescent temper, sat on a sacerdotal throne by the wayside, to gather the earliest news of the battle, for his "heart trembled for the ark of God;" and as a fugitive from the scene of conflict reported to him the sad disaster, dwelling with natural climax on its melancholy particulars—Israel routed and fleeing in panic, Hophni and Phinehas both slain, and the ark of God taken—this last and overpowering intelligence so shocked him that he fainted and fell from his seat, and in his fall, from the unbecoming corpulence of age, "broke his neck" and died (v, 1). In the sanctuary we hear not what became of Samuel. According to the Musulman tradition, Samuel's birth was granted in answer to the prayers of the nation on the overthrow of the sanctuary and loss of the ark (D'Herbelot, s.v. Aschmuily). This, though false in the letter, is true to the spirit of Samuel's life, over which office of "repositories of the ark," where he is thus reckoned with Jerubbaal, Bedan, and Jephthah, and Eclus. xlii, 15–18). From an incendial allusion (1 Sam. vii, 14), we learn, too, that about this time the Amorites, the Eastern foes of Israel, were also at peace with them—another triumph of a gov-
The presidency of Samuel appears to have been emi-
nently successful. Its length is nowhere given in the
Scriptures; but, from a statement of Josephus (Ant. vi,
13, 5), it appears to have lasted twelve years (B.C. 1105
-1093), up to the time of Saul's inauguration. See
Curtius, viii, 16. It was a very important period in
the history of his public life, we infer that the administra-
tion of justice occupied no little share of his time and at-
tention. He visited, in discharge of his duties as ruler,
the three chief sanctuaries (Sept. in τὰν τόις ἱγαμ-
μινοις τοιούτως) on the west of the Jordan—Bethel, Gil-
a, and Mizpeh. It is not improbable that the change from
a republican to a royal form of government displeased
Samuel for various reasons. Besides its be-
ing a departure from the first political institute, and so
far an infringement on the rights of the divine head of
the theocracy, it was regarded by the regent as a virtu-
al charge against himself, and might appear to him as
one of those petty degradations of the people which
is the habitual theocracy, it was regarded by the regent as a virtu-
al charge against himself, and might appear to him as
one of those petty degradations of the people which
is the habitual theocracy, it was regarded by the regent as a virtu-
al charge against himself, and might appear to him as

in the Old Test. of a great character reconciling himself to a changed order of things, and of the divine sanction resting on his acquiescence. For this reason it is that Athanasius is by Basil called the Samuel of the Church (Basil, Ep. 82). See MONARCHY.

6. Residue of Samuel's Life.—His subsequent relations with Saul are of a mixed kind. The two institutions which they respectively represented ran on side by side. Samuel was still, by courtesy at least, judge. He judged Israel "all the days of his life" (1 Sam. vii, 15), and from time to time came across the king's path. But these interventions are chiefly in another capacity, which are unfriendly to the royal government. The assertion may mean that even after Saul's coronation Samuel's power, though formally abdicated, was yet actually felt and exercised in the direction of state affairs (Hävernick, Einl. in das A. T. § 166). No enterprise could be undertaken without Samuel's concurrence. His was an authority higher than the king's. We find Saul, having mustered his forces, about to march against the Philistines, yet delaying to do so till Samuel consecrated the undertaking. He came not at the time appointed, as Saul thought, and the impatient monarch proceeded to offer sacrifice—a fearful violation of the national law. The prophet was present; the religious services were concluded; and rebuking Saul for his presumption, distinctly hinted at the short continuance of his kingdom. Again, we find Samuel charging Saul with the extirpation of the Amalekites. The royal warrior proceeded on the expedition, but obeyed not the mandate of Jehovah. His apologies, somewhat cattily framed for his inconsistences, availed him not with the prophet; and he was by the indignant seer virtually dethroned. He had forfeited his crown by disobedience to God. Yet Samuel mourned for him. His heart seems to have been set on the bold athletic soldier. But the breach was irreconcilable, and they must separate. The parting was not without tears on the part of dear friends. The king throws himself on the prophet with all his force; not without a vehement effort (Josephus, Ant. vi, 7, 5) the prophet tears himself away. The long mantle by which he was always known is rent in the struggle; and, like Ahijah after him, Samuel saw in this the omen of the coming rent in the monarchy. They parted, each to his house, to meet no more. But a long shadow of grief fell over the prophet. "Samuel mourned for Saul." "It grieved Samuel for Saul." "How long wilt thou mourn for Saul?" (1 Sam. xv, 11, 35; xvi, 1). See PROPHECY. But now the Lord directed him to make provision for the future government of the country (xv, 15). The inspired seer, and his counsels were necessary, in the circumstances, that the second king should be appointed ere the first sovereign's demise. Samuel went to Bethlehem and set apart the youngest of the sons of Jesse, "and came to see Saul no more till the day of his death." Yet Saul and he came near meeting once again at Nahor, in Ramah (xix, 24), when the king was pursuing David. As on a former occasion, the spirit of God came upon him as he approached the company of the prophets with Samuel presiding over them, and "he prophesied and lay down naked all that day and all that night. A religious excitement seized him; the continuing influence of the music and rhapsody fell upon his nervous, susceptible temperament and overpowered him. See SAUL.

The remaining scriptural notices of Samuel are in connection with David's history. See DAVID.

6. Decease and Traditions.—The death of Samuel is described as taking place in the year of the close of David's reign. It is said with peculiar emphasis, as if to mark the loss, that "all the Israelites"—all, with a universality never specified before—"were gathered together" from all parts of this hitherto divided country, and "lamented him," and "buried him," not in any consecrated place, nor outside the walls of his city, but within his own house, thus in a manner consecrated by being turned into his tomb (1 Sam. xxxv, 1). His relics were translated "from Judea" (the place is not specified), A.D. 406, to Constantinople, and thence conveyed to a church near the palace of Hebdomon (see Acta Synodorum, Aug. 30).

The death of Samuel, as has been observed, is uncertain. But the place long pointed out as his tomb is the height, most conspicuous of all in the neighborhood of Jerusalem, immediately above the town of Gibon, known to the Crusaders as "Montjoye," as the spot from whence they first saw Jerusalem, now called Nebi Samuel. (The tradition can be traced back as far as the 7th century, when it is spoken of as the monastery of St. Samuel (Robinson, Bib. Res., ii, 142). See ZORAH. A cave is still shown underneath the floor of the mosque. "He built the tomb in his lifetime," is the account of the Mussulman guardian of the mosque; "but was not buried here till after the expulsion of the Greeks." It is the only spot in Palestine which claims any direct connection with the first great prophet who was born within its limits; and its commanding situation well agrees with the importance assigned to him in the sacred history. See MOUNT SAMUEL.

His descendants were subsisting at the same place till the time of David. Heman, his grandson, was one of the chief singers in the Levitical choir (1 Chron. vi, 33; xv, 17; xxxv, 5).

The apportion of Samuel at Endor (1 Sam. xxviii, 14; Esclus. xlv, 20) belongs to the history of Saul. We here follow the inspired narrative, and merely note that Saul strangely wished to see Samuel recalled from the dead, that Samuel himself made his appearance suddenly, and, to the greatest terror of the necromancer, heard the mournful complaint of Saul, and pronounced his speedy death on an ignoble field of loss and massacre (Hengstenberg, On Divine Inspiration, p. 185; Hales, Chronology, ii, 323; Scott, On the Existence of Evil Spirits, etc., p. 292).

It has been supposed that Samuel wrote a life of David (of course of his earlier years) which was still accessible to one of the authors of the book of Chronicles (1 Chron. xxix, 29); but this appears doubtful. Various other books of the Old Test. have been ascribed to him by the Jewish tradition—the Judges, Ruth, the two books of Samuel (the latter, it is alleged, being written in the spirit of prophecy). He is regarded by the Samaritans as a magician and an infidel (Hottinguer, Hist. Orient., p. 52).

The tradition fixes his life in the time of Kai-ki-Kobad, second king of Persia, with whom he is said to have conversed (D'Herbelot, Bibliothe, Orient, s. v. "Kai-Kobad").

III. Samuel's Character.—So important a position did he hold in Jewish history as to have given his name to the sacred book, now divided into two, which covers the whole period of the first establishment of the kingdom, corresponding to the manner in which the name of Moses has been assigned to the sacred book, now divided into five, which covers the period of the foundation of the Jewish Church itself. In fact, no character of equal magnitude had arisen since the death of the great lawgiver.

1. Samuel's character presents itself to us as one of uncommon dignity and patriotism. His chief concern was his country's weal. Grotius compares him to Aristides, and Saul to Alcibiades (Opera Theol. i, 119). To preserve the worship of the one Jehovah, the God of Israel, and to see the Israelites of the remnant, to secure them from hostile invasion and internal disunion, was the grand motive of his life. His patriotism was not a Roman love of conquest or empire. The subjugation of other people was only sought when they disturbed the peace of his country. He was loath, indeed, to change the form of government, yet he did it without commissurate policy. First of all, he resolved to
the divine mode of appeal to the Omniscent Ruler—a solemn sortilege—and brought Saul so chosen before the prophet Samuel, but not his own thoughts. His being thus in his form and aspect. Then, waiting till Saul should distinguish himself by some victorious enterprise, and receiving him fresh from the slaughter of the Ammonites, he again confirmed him in his kingdom, while the national enthusiasm, kindled by his triumph, made him the popular idol. Samuel thus, for the sake of future peace, took means to abate Saul with both chosen of God and yet virtually elected by the people. This procedure, so cautious and so generous, proves how little foundation there is for the remarks which have been made against Samuel by some writers, such as Schiller (Vene Thalia, ix, 94), Vatke (Bibl. Theol. p. 360), and the infamous Wolfenbüttel Fragmentist (p. 208, ed. Schmidt).

But there are two other points which more especially placed him at the head of the prophetic order as it afterwards appeared. The first is brought out in his relation with Saul, the second in his relation with David.

2. He represents the independence of the moral law, of the Divine Will, as distinct from regal or sacerdotal enactments, which is so remarkable a characteristic of all the later prophets. As we have seen, he was, if a Levite, yet certainly not a priest; and all the attempts to identify his position with Saul with a hierarchical interest are founded on a complete misconception of the facts of the case. From the time of the overthrow of Shiloh, he never appears in the remotest connection with the priestly order. Among all the places included in his personal or administrative visits, neither Shiloh, nor Nob, nor Gibeon (the seats of the sacerdotal caste) is ever mentioned. When he counsels Saul, it is not as the priest, but as the prophet; when he sacrifices or blesses the sacrifice, it is not as the priest, but either as an individual Israelite of eminence, or as a ruler, like Saul himself. Saul's sin in both cases where he came into collision with Samuel was not simply that of intruding into sacerdotal functions, but of disobedience to the prophetic voice. The first was that of not waiting for Samuel's arrival, according to the sign given by Samuel at his original meeting at Ramah (1 Sam. x, 8; xiii, 8); the second was that of not carrying out the stern prophetic injunction for the destruction of the Amalekites. We perceive the prophetic prince, called the captive prince before him, and with his own hands hacked him limb from limb in retribution for the desolation he had brought into the homes of Israel, and thus offered up his mangled remains almost as a human sacrifice ("before the Lord in Gilgal"), we see the representative of the older part of the Jewish history, the true prophet of theocratic religion. But it is the true prophetic utterance such as breathes through the psalmists and prophets when he says to Saul in words which, from their poetical form, must have become fixed in the national memory, "To obey is better than sacrifice, and to hearken than the fat of rams."

3. Samuel is the first of the regular succession of prophets: "All the prophets from Samuel and those that follow after" (Acts iii, 24); "Ex quo sanctus Samuel propheta copius, et deinceps donec populus Israel in Babyloniam captivus vehetur, ... tum est tempus prophetarum" (Augustine, C. vet. xxvii, 1). Moses, Miriam, and Deborah, perhaps Euhod, had been prophets. But it was only from Samuel that the continuous succession was unbroken. This may have been merely from the coincidence of his appearance with the beginning of the new order of things, of which the prophetic office was the manifestation. Sometimes another cause may have been in his own family and bounds of his mother, as we have seen, though not expressly so called, was, in fact, a prophetess; the word Zephim, as the affix of Ramahthaim, has been explained, not unreasonably, to mean "seers," and Elkanah, his father, is, by the Chaldee paraphrase on 1 Sam. i, 1, said to be "a disciple of the prophets." But the connection of the continuity of the office with Samuel appears to be still more direct, from his position in his form and aspect. Then, waiting till Saul should distinguish himself by some victorious enterprise, and receiving him fresh from the slaughter of the Ammonites, he again confirmed him in his kingdom, while the national enthusiasm, kindled by his triumph, made him the popular idol. Samuel thus, for the sake of future peace, took means to abate Saul with both chosen of God and yet virtually elected by the people. This procedure, so cautious and so generous, proves how little foundation there is for the remarks which have been made against Samuel by some writers, such as Schiller (Vene Thalia, ix, 94), Vatke (Bibl. Theol. p. 360), and the infamous Wolfenbüttel Fragmentist (p. 208, ed. Schmidt).

But there are two other points which more especially placed him at the head of the prophetic order as it afterwards appeared. The first is brought out in his relation with Saul, the second in his relation with David.

But it is the true prophetic utterance such as breathes through the psalmists and prophets when he says to Saul in words which, from their poetical form, must have become fixed in the national memory, "To obey is better than sacrifice, and to hearken than the fat of rams."

3. Samuel is the first of the regular succession of prophets: "All the prophets from Samuel and those that follow after" (Acts iii, 24); "Ex quo sanctus Samuel propheta copius, et deinceps donec populus Israel in Babyloniam captivus vehetur, ... tum est tempus prophetarum" (Augustine, C. vet. xxvii, 1). Moses, Miriam, and Deborah, perhaps Euhod, had been prophets. But it was only from Samuel that the continuous succession was unbroken. This may have been merely from the coincidence of his appearance with the beginning of the new order of things, of which the prophetic office was the manifestation. Sometimes another cause may have been in his own family and bounds of his mother, as we have seen, though not expressly so called, was, in fact, a prophetess; the word Zephim, as the affix of Ramahthaim, has been explained, not unreasonably, to mean "seers," and Elkanah, his father, is, by the Chaldee paraphrase on 1 Sam. i, 1, said to be "a
know that he was such from his earliest years. It is this continuity of his own life and character that makes him so fit an instrument for conducting his nation through so great a change.

Accordingly, Samuel is called emphatically "the Prophet" (Acts iii, 24; xiii, 20). To a certain extent this was in consequence of the gift which he shared in common with others of his time. He was especially known in his own age as "Samuel the Seer" (1 Chron. ii. 22; xx. 28; xxix. 22); but in the sense in which divine communications were then made, "by dreams, Urim and Thummim, and prophets," the first was that by which the divine will was made known to Samuel (i. 1, 2; Josephus, Ant. v, 10, 4). "The Lord uncovered his ear" to whisper into it in the stillness of the night the messages that were to be delivered. It is the first distinct intimation of the idea of "Revelation" to a human being (see Gesenius, in loc. p. 732). He was consulted far and near on the small affairs of life; loaves of "bread," or "the fourth part of a shekel of silver," were gratuitously offered for the answers (1 Sam. i. 7, 8). See 1 Sam. iv. 11. But the Syrian, with his office of ruler, an aweful reverence grew up round him. No sacrificial feast was thought complete without his blessing (1 Sam. i. 13). When he appeared suddenly elsewhere for the same purpose, the villagers "trembled" at his approach (xiv. 4, 5). A peculiar virtue was believed to reside in his intercession. He was conspicuous in later times among those that "call upon the name of the Lord" (Ps. xcix. 6: 1 Sam. xii. 18), and was placed with Moses as "standing" for prayer, in a special sense, "before the Lord" (Jer. xxv. 1). It was the last consolation he left in his parting address that he would "pray to the Lord" for the people (1 Sam. xii. 25). There was something peculiar in the long-sustained cry or shout of supplication, which seemed to draw down as by force the divine answer (vi. 8, 9). All night long, in agitated moments, "he cried unto the Lord" (xiv. 11). The power of Samuel with God, as an intercessor for the people, continued in the Maccabees (1 Macc. vii. 6). See Plutarch, Life of Samuel (London, 1843, 18mo); Anon. Life and Times of Samuel (Ibidi 1868, 12mo).

SAMUEL, FIRST AND SECOND BOOKS OF. These two historical portions of Scripture, in all the editions of the original and versions, immediately precede the books of Kings, and are intimately connected with them. In the present article we freely use the dictionaries of Kittto, Smith, and Fairbairn, particularly the last.

1. Name and Division.—The books so called received this name (which is now customarily attached to them in Hebrew printed texts) subsequently to the completion of the Sept., in which their present name is בַּנֶּאֶלֶיָּהָו פִּיהְרָה, בְּנֵאֶלֶיָּהוֹלָה דָּוֶּרֶפֶּר (First and Second of Kings); and similarly in the Vulg. They are entitled in the English version "The First [or Second] Book of Samuel, otherwise called the First [or Second] Book of the Kings." The name may in some measure be explained and justified on the ground that the early part of the first book is chiefly concerned about Samuel, and that the two kings Saul and David, whose reigns occupy all the rest of the books, were both anointed by Samuel to their office.

In Hebrew MSS, the work is one, and not two. The present division was first made in the Sept., and was thence adopted into the Vulg. But Origen, as quoted by Eusebius (Hist. Eccles, vi, 25), expressly states that they formed only one book among the Hebrews. Jerome (Proefitio in I libros Samuel et Malachim) implies the same statement; and in the Talmud (Baba Bathra, fol. 14, c. 2), wherein the authorship is attributed to Samuel, they are designated by the name of his book, in the singular number (יִשְׂרָאֵל). After the invention of printing they were published as one book in the first edition of the whole Bible printed at Soncino in A.D. 1488, and likewise in the Completusian Polygot printed at Alcalá, A.D. 1502–1517; and it was not till the year 1518 that the division of the Sept. was adopted in Hebrew. The text of the Bible printed by the Bombergers at Venice. The work constitutes a separate and independent whole, and is not to be joined either with the book of Judges or with that of Kings, from which it differs by many important characteristics.

II. Contents.—The statements of the books of Samuel belong to an interesting period of Jewish history. The preceding book of Judges refers to the affairs of the republic as they were administered after the conquest, when the nation was a congeries of independent cantons, sometimes partially united for a season under an extraordinary dictator. As, however, the mode of government of the people was changed, and remained monarchial till the overthrow of the kingdom, it was of national importance to note the time, method, and means of the alteration. This change happening under the regency of the wisest and best of their sages, his life became a topic of interest. The first book of Samuel gives an account of his birth and elevation to the dignity of Eli's pontificate; describes the low and degraded condition of the people, oppressed by foreign enemies; proceeds to narrate the election of Samuel as judge; his prosperous regency; the degeneracy of his sons; the clamour for a change in the civil constitution; the installation of Saul; his rash and reckless character; his neglect of, or opposition to, the theocratic elements of the government. Then the historian goes on to relate God's choice of David as king; his endurance of long and harassing persecution from the reigning sovereign; the melancholy defeat and death of Saul on the field of Gilboa; the gradual elevation of the man "according to God's own heart" to universal dominion; his earnest efforts to obey and follow out the principles of theocracy; his formal establishment of religious worship at Jerusalem, now the capital of the nation; and his series of victories over all the enemies of Judea that followed. His reigns and their results are from this point onward David's aberrations from the path of duty; the unnatural rebellion of his son Absalom, and its suppression; his carrying into effect a census of his dominions, and the divine punishment which this act incurred; and concludes with a few characteristic sketches of his military staff, and book of Samuel, while it relates the last words of David, yet stops short of his death. As David was the real founder of the monarchy and arranger of the religious economy; the great hero, strategist, and poet of his country; as his dynasty maintained itself on the throne of Judah till the Babylonian invasion, it is not a matter of wonder that the description of his life and government occupies so large a portion of early Jewish history. The books of Samuel thus consist of three interlaced biographies—those of Samuel, Saul, and David. The following are the details:

1. Israel under Samuel (1 Sam. i–iii; 1 Cor. 11:29–30).—The parentage, birth, and consecration of Samuel (ch. i); Hannah's prayer (ii, 1–10); the evil practices of the sons of Eli; a man of God predicts the troubles which shall befall Eli (iii, 10–33); God calls Samuel in the night, and reveals to him the judgment of the house of Eli, to whom Samuel declares it (iii, 1–18); Samuel is established to be prophet to Israel (ch. iii, 19–1, 4); a battle of the Philistines with the Israelites between Azekah and Eben-ezer; the Israelites, being defeated, send for the ark from Shiloh; another battle ensues, in which Israel is again smitten, the ark is taken, and the two sons of Eli slain: the news is carried
to Eli, who dies; Ichabod is born (ch. iv.); penalties inflicted on the Philistines on account of the ark of God; it is sent back with presents to Israel, first to Beth-shemesh, and then to Kirjath-jearim; the inscription under Samuel and the national assembly at Mizpeh (vii, 2-6); the Philistines again invade Israel, but at the cry of Samuel the Lord discomfits them with thunder, and they are smitten before Israel; their conquests restored to Israel from Ekron to Gath, and peace ensues; Gibeon is given to Joshua, a circuit of four cities yearly (vii, 15-17); becoming old, he makes his sons judges over Israel, but their conduct is bad (viii, 1-3); the elders of Israel come to Samuel at Ramah and demand a king; Samuel protests, but by divine direction yields at length (viii, 4-22); Saul, son of Kish, seeking the lost asses of his father, visits Samuel, who, forewarned by God of his coming, entertains him with honor, and on parting anoints him to be king, and gives him signs in confirmation, which come to pass; Samuel then calls an assembly at Mizpeh, and there Saul is publicly designated by lot to be king over Israel, but not acknowledged by all the people (ch. ix, x); great array; Israel is greatly distressed; Saul and Samuel at Gilgal, where Samuel renews the kingdom (ch. xi); there Samuel addresses the people, vindicates his own conduct, and exhorts them to be obedient to God and the king; he explains the miracle of thunder and rain at wheat-harvest (ch. xii).

2. Israel under King Saul (1 Sam. xiii-xxvi) B.C. 1099-1058.—Saul forms an army of two thousand men under his own command at Michmash, and one thousand under Jonathan at Geba; Jonathan smites the Philistine garrison at Geba, and the Philistines gather a great army; Israel is greatly distressed; Saul awaits Samuel at Gilgal, but begins to offer sacrifice before his arrival, for which act of disobedience he is rejected of God (xii, 1-14); in the extremity of the times Jonathan and his armor-bearer discomfit the Philistines at Michmash; in the general pursuit Jonathan tastes honey contrary to the command of Saul; his life is spared at the demand of the people (xiii, 14-45); Saul's successes in war against the neighboring tribes; his children and relatives named (xiv, 46-52); Saul, commanded to exterminate Amalek, only partially obeys, and Samuel declares to him his rejection from the kingdom; Jonathan enters into the scene (ch. xv); this is a repetition sent to Bethlehem to anoint David, son of Jesse, to be king (xvi, 13); in consequence of Saul's malady, David is sent for to cheer him with music (xvi, 14-23); the Philistines and the Israelites arrayed for battle in the valley of Elah; Goliath challenges Israel, and is killed by David (ch. xvii); Jonathan and David make a covenant of friendship; Saul retains David near him, and sets him over his men of war; the women-singers give greater honor to David than to Saul, who is displeased, and seeks to destroy David (ch. xviii); Jonathan takes David's part and Michal also; David flees to Samuel at Ramah; they go together to Naioth; Saul stabs Jonathan and his armor-bearer; they all prophesy (ch. xix); David visits Jonathan; they renew their covenant; Jonathan makes known to David by the device of the arrows Saul's determination to kill him; their parting (ch. xx); David flees to Nob, where he obtains the shewbread, and proceeds to Achish, king of Gath, and feigns madness; thus to the cave of Adullam, to Mizpeh of Moab, and to Hareth; Saul kills Ahimelech and the priests by the hand of Doeg the Edomite (ch. xx., xxi); David saves Keilah from the Philistines, but leaves it on the approach of Saul, and abides in the wilderness of Ziph, where Jonathan visits him; Saul is recalled from the pursuit of David by an immediately subsequent and the greater danger in the wilderness of Engedi spares Saul's life (ch. xxiv); Samuel's death and burial; the narrative of Nabal and his wife Abigail (ch. xxv); David again spares the life of Saul at Hazoril; he goes with six hundred men to Achish, king of Gath, who gives him Ziklag to dwell in; the Philistines come up against Israel; Saul in vain seeks counsel from God, and then he refers the matter to the witch of Endor; the princes of the Philistines refuse David's aid in battle (ch. xxvi-xxix); David returns to Ziklag and finds it desolated; he pursues the Amalekites and recovers the spoil (ch. xxx); the battle of Gibeon; Saul and his three sons die (ch. xxxi); the news of Saul's death reaches David at Ziklag, and calls forth his touching dirge or lamentation over Saul and Jonathan (2 Sam. i).

3. The Unsettled Succession.—Ishbosheth king of Israel, David of Judah (2 Sam. ii-v; 3 B.C. 1053-1046).—David is anointed king of Judah at Hebron; Ishbosheth is made king of Israel; the flight between the followers of David and of Ishbosheth by the pool of Gibbon (ch. ii); David's power increases in Hebron; six sons born to him there; Abner forswakes Ishbosheth, and makes terms with David to transfer the kingdom of Israel to him; is slain by Joab; David's lamentation over him (ch. iii); the head of Ishbosheth is brought by Rechab and Benhadad; David makes himself king over all Israel (ch. iv); the tribe of Benjamin and the tribe of Judah and the tribe of Levi do not forsake the house of Saul, but support the house of David in the conflict (ch. iv); the tribes of Israel make David their king (v, 1-3).

4. Israel under King David (2 Sam. v, 4-xxiv; B.C. 1016-1015).—David, after being king of Judah for seven years and a half, reigns thirty-three years in Jerusalem; he establishes the house and the throne of his kingdom, and brings the ark from the Jebusite, forms a friendship with Hiram king of Tyre, defeats the Philistines at Baal-perazim, and again from Gaba unto Gazer (ch. v); David brings up the ark of the Lord; the breach of Uzzah; the house of Obad-edom is blessed; the ark brought to Jerusalem; Michael dies; David fornicates before Ahinoam (ch. vi); David is forbidden to build a house for the Lord in a message brought to him by Nathan the prophet, who announces the establishment of his dynasty; David's prayer (ch. vii); his victories over the Philistines, Moabites, Edomites, etc., recited (ch. viii); his kindness to Mephibosheth (ch. ix); his victory over Bene-ammon (ch. x); his sin with Bathsheba and Uriah; Nathan's parable; punishment denounced: David's penitence; the child dies; Solomon is born; David captures Rabba of Bene-ammon (ch. xi, xii); the affair of Amnon and Tamar; Absalom's revenge and flight to Geshur; Joab artfully procures his return after three years' absence; he reigns seven years; the flight of David; the ark, the priests, and Hushai went back to Jerusalem; the treachery of Ziba; the reviling of Shimei; conflicting advice given by Hushai and Ahitophel to Absalom, and Ahitophel's suicide (ch. xv-xvii); the battle in the forest of Ephraim; Absalom's death; David's great grief (ch. xviii); David's return to Jerusalem; the conduct of Shimea, Mephibosheth, and Barzillai; the rivalry between Judah and Israel in bringing back the king (ch. xix); the rebellion of Sheba; Joab slays Amasa; Sheba's head given to Joab at Abel (ch. xx); the three years' famine, and the appeasement of the Gibeonites; the burial of the bones of Saul and his family; the gracious words of the Lord to David and David's servants (ch. xx); David's song (Ps. xxxvi) (ch. xxii); the last words of David; the names and exploits of his heroes (ch. xxiii); the numbering of the people and the pestilence (ch. xxiv).

III. Origins and Structure.—It is evident that Samuel could not be the author of the whole of these books, since his death is recorded in the 25th chapter of the first book, and the history continues after his death down to nearly the end of the reign of David, a period of perhaps forty-five years. There is a somewhat common opinion that the first twenty-four chapters were written by Samuel and the rest by Gad and Nathan—"an opinion not supported by the facts in all the acts of David the king, first and last, are not written in the book of Samuel the seer, and in the book of Nathan the prophet, and in the book of Gad the seer?"
There is much in the general structure of the books, and in the relation of the several parts to each other, to render it probable that the books, written at different times, were concerned in their production, notwithstanding the degree of uniformity which the style and language exhibit. The most reasonable supposition is that they were the work of one compiler, who used historical records of various sources. This opinion, though not new, is not, as was supposed by Houbigant and Keil, not new, as Diodorus of Tar- sus, Theodorot, St. Athanasius, and St. Gregory observed that the four books of Kings were historical abridgments of several books or memoirs of the proph- ets which are cited in them. The grounds on which this view of the origin of these books is based have, however, been too frequently and too much exaggerated. Warning the reader against attaching undue importance to the evidence which has been adduced in proof of this position, his attention may nevertheless be directed to the following points:

1. There is considerable difference in the manner of the writers; some portions contrasting in their brief, fragmentary, chronological character with others which are more full and copious, and (in one part at least) minutely biographical (comp. 1 Sam. v. 1-16; viii; xx; 15-22; xxii, 8-29, with 2 Sam. xi-xv).

2. In several places there may be perceived the consolidation of historical documents or the additional matter has been attached, yet without being so joined as to appear like a natural continuation. In some places the compiler has placed together what he found narrated by different writers respecting the persons whose histories they wrote, without having so worked them up into one narrative as to harmonize all their parts (1 Sam. vii, 13-17; xiv, 47-52; 2 Sam. viii, 15-19; xx, 20-26).

3. Of some events there appear to be double accounts recorded, and occasionally these accounts are different, and sometimes, apparently at least, inconsistent; as, for instance, how Saul became king (1 Sam. ix-x, 16, and x, 17-27); how and why Saul was rejected (xiii, 8-14, and xv, 10-26); how David became known to Saul (xvi, 14-21, and xvii, 55-xxvii, 2); how David spared Saul's life (ch. xxiv and xxvii); how David went over to the Philistines (xxix, 10-15, and xxxv, 1-4); how the proverb "Is Saul also among the prophets?" arose (x, 9-13, and xix, 22-24). It should here be remarked that these alleged discrepancies pass without any more. Whatever more have added, need to be explained, whatever opinion may be held respecting the authorship of these books. As, for instance, the statement that Samuel (xvii, 15-17) is all his life long judge over Israel, but according to vii, 1-5, and viii, 4, 5, and xi, 1-2, 12; the two accounts of Goliath (xvii, 49, and xix, 1-10, and 2 Sam. xx, 19); the double record of Samuel's death (1 Sam. xxv, 1 and xxvii, 3); the two descriptions of the manner of Saul's death (xxv, 1-6 and 2 Sam. 1, 10); the twofold account of the battle with the Philistines (2 Sam. vii, 12); the difference, though not therefore discordant, portions of the work may probably be best explained on the assumption that the books consist of materials brought together from various sources. This opinion may be granted, however, without admitting that there is any inconsistency or contradiction among the materials so joined together; just as the Gospels, which are sometimes given the title of the Gospel, which is constituted by the separate narratives of four different, but not therefore discordant, writers, is not the object of this article to explain the alleged inconsistences, however completely that might be done. They are here mentioned only as they bear upon the question of authorship, on which it seems to the author that it is to be supposed as authors to make the choice of a variety of materials by the author or compiler of these books.

4. The relation between the books of Chronicles and the books of Samuel is thought to point to the same conclusion. It can scarcely be maintained that the author of the Chronicles has derived from the books of Samuel materials for his narrative which are common to both works. There are so many variations between the history as related by the chronicler and as related in Samuel as to render it probable, not that the chronicler derived everything from Samuel, but that he had access to the sources used also by the compiler of Samuel. This may be explained by a comparison of 2 Sam. v, 1-10 and xxii, 8-29 with 1 Chron. xi, xii. The chronicler has placed in continuous narrative Dav- id's anointing as king of Israel at Hebron, the capture of Jerusalem, the building of the city of David, and the list of David's heroes, with their deeds, probably as they are found connected in the documents which he used; while in Samuel these events have been more expanded. Warning the reader against attaching undue importance to the evidence which has been adduced in proof of this position, his attention may nevertheless be directed to the following points:

5. The result of a compiler is thought to be perceptible in certain detached observations here and there occurring in the course of the history, in the way of explanation of some portion drawn from the documents; as for example, in 1 Sam. ix, 9, the expression נַעַר הָאָדָמָה is explained: For "the prophet" of to-day was called formerly "the seer." 1 Sam. xvi, 14, 15, is regarded as an instance of the remark, to connect this history with the account given to the previous chapter of the family of Jesse.

IV. The Sources.—Should these books then appear to be a compilation from several original documents, the interesting question arises, How far may it be possible to trace the whole work into its constituent parts, so as to obtain some idea of the nature of these sources, on which the strata were derived? Thelius has attempted to solve this difficult problem in the following way. On internal grounds he distinguishes five principal sources:

(a) A History of Samuel, contained in 1 Sam. i-vii, which seems to conclude naturally as a separate and independent narrative, in which Samuel is altogether the principal person.

(b) A History of Saul, comprised in the following portions: 1 Sam. vii, 17-27; xi; xii; xv; xxvii, viii; xvi; xxvi; xxviii, 3-25; xxxi. The materials derived from this source are interwoven with others derived from a third source, viz.:

(c) A History of David, from which have been derived the following portions: 1 Sam. xiv, 52; xvii; xxviii, x, in part; xix; xx, x, in part; xxii; xxiii; xxiv; xxv; xxvii; xxxii, 1; 2; xxix; xxx; 2 Sam. i-v; vii; viii.

(d) Another History of Saul, from which 1 Sam. ix, x-16; xiii; and xiv have been drawn. This is regarded as an older and more strictly historical document than b, that being considered as of much later origin, and as founded on tradition.

(e) Lastly, a Biography of David, embracing full details of the last half of his life and recounting his family history (2 Sam. xi, xii, 1-25; xiii-xx). The relation of 2 Sam. xxi-xxxii to the preceding portions seems to be that of a supplement or appendix of matters not related in chronological order, nor having any close connection with each other.

This view has been much criticized in this account of Thelius. So far as authorities or sources are quoted in the books themselves, the matter is much more simple. To only one work is direct reference made, viz. to the book of the uprigh (Jasher). נַעַר הָאָדָמָה (2 Sam. i, 18), elsewhere also quoted only once (Josh. x, 13), and, as both the quotations are in verse, the work is thought to have been a book of poems. See JASHER, BOOK OF.
There are, however, certain parts of the books of Samuel which must have been derived either from verbal tradition or from some written documents, such, for instance, as the following poetical pieces: the song of Hannah in 1 Sam. i, 10; David's lament over Saul and Jonathan (2 Sam. i, 19-27); David's lament over Abner (iii, 33, 34); Nathan's parable (xii, 1-4); a song or psalm of David (xxii, 2-5 [Psalm xviii]); the last words of David (xxxii, 1-8). To these must be added the lists of names and genealogies, etc.

It is in these parts that the acts of David the king, first and last, behold, they are written in the book of Samuel the seer, and in the book of Nathan the prophet, and in the book of God the seer. The old opinion as to the authorship of Samuel, to which we have already alluded, was founded on this quotation. The prophets were wont to write a history of their own times. That Samuel did so in reference to the great events of his life is evident from the statement that he wrote the manner of the kingdom in a book, and laid it up before the Lord (1 Sam. x, 25). The phrase אֶלָּל, "words of Samuel," may not refer to our present Samuel, which is not so comprehensive as this collection seems to have been. It does not, like the treatise to which the author of Chronicles refers, include the acts of David, first and last. The annals which these three seers compiled were those of the national life in succession (Kings, p. 38). The absence of contemporary events written by three inspired men. The portion written by Samuel might include his own life, and the greater part of Saul's history, as well as the earlier portion of David's career. Gad was a contemporary of David, and is termed his seer. Probably also he was one of his associates in his various wanderings (1 Sam. xxii, 5). In the latter part of David's reign Nathan was a prominent counsellor, and assisted at the coronation of Solomon. We have, therefore, prophetic materia...
mendes in place of it in the books of Samuel, Kings, or Chronicles, or in the history of the Bible. Nor is it named in the Apocrypha or in Josephus. The work is generally attributed to some competent historian, who availed himself of authentic documents in preparing it. Some writers, as Ababanel and Grotius, ascribe it to Jeremiah, some to Ezra, and some to Isaiah. There is not nearly so much probability that Jeremiah compiled the books of Samuel (as is argued at some length by Hitzig, De Psalm., p. 48-85) as there is that he was the writer of the books of Kings. There is much greater dissimilarity of language, style, and spirit between Samuel and Jeremiah than between Kings and Jeremiah. The great number of words and forms of words peculiar to the one and not occurring at all or very seldom in the other, and the difference in the age, and it would seem most likely that it was compiled in an early period after the death of David, and previously to the rending of the kingdom under Rehoboam; unless the opinion which has widely prevailed in the Christian Church should be finally adopted, that the work began by Samuel was carried on and finished before the death of David by Nathan and Gad, or that it was the work of some member of the school of the prophets who had personal knowledge of the events which he narrates. If, however, this theory cannot be maintained, and there should be grounds for supposing that the compiler lived not earlier than the time of the division of the kingdom, and perhaps not even till the time of the oppressed and debased monarchy, still it must be acknowledged that the materials which he used were of earlier date, and must for the most part have been written by persons who were contemporaneous with the events. It appears certain that memoirs were written by Samuel, Nathan, and Gad (see 2 Chron. xxvi, 29), and perhaps also by other members of the schools of the prophets, although it may not be equally certain that those memoirs are identical with the present books of Samuel. The fact that a recorder or remembrancer (ןֵבֶּן), whose office it was to prepare memoirs or annals of passing events, is mentioned early among the household of David, is not without an important bearing on this question. It is clear that the authors of the original documents, if not of the work itself, must have occupied such positions of honor and influence as gave them ample opportunity of knowing the events of the times in which they wrote. Such minutes of detail are found in the history of David, belonging rather to his private than to his public life—the story of Bathsheba, of David's behavior on the death of her child, of Amnon and Tamar, of the secret sending to the priests from Mahanim, etc.—bepeak perfectly well instructed writers, who had access to the best informers and informers.

Stihelin (Einheit, § 25, etc.) conjectures that a large portion of Samuel was written by the author of the Pentateuch and of the books of Joshua and Judges. But continuity of history in the same form does not prove identity of authorship, nor are the similar phrases found in these books sufficient in number or character to support the theory. Nay, it is far from the so-called Chaldaisms of Judges and the archaisms of the Pentateuch. The peculiar theory of Jahnn, on the other hand, is that the four books of Samuel and Kings were written by the same person, and at a date so recent as the 30th year of the Babylonian captivity. But such arguments, drawn from the resemblance of style and diction, as those of Eischhorn (Einheit, § 468), and Herbst (Einheit, ii, 1-139), who hold a similar view, are more ingenious than solid (introduction, § 46). The fact of all the four treatises being named "Books of Kings" is insisted on as a proof that they were originally undivided and formed a single work, a mere hypothesis, since the similarity of their content and diction, as well as the title itself, long before the more ancient apellation for the first two was The Books of Samuel. Great stress is laid on the uniformity of method in all the books. But this uniformity by no means amounts to any proof of identity of authorship. It is nothing more than the same Hebrew historical style, and the same narrative features, so far from being similar, are very different. Nay, the books of Samuel and Kings may be contrasted in many of those peculiarities which mark a different writer: (a) In Kings there occur not a few references to the laws of Moses; in Samuel not one of these is to be found. (b) The books of Kings repeatedly cite authorities, to which appeal is made, and the reader is directed to the "Acts of Solomon," the book of the Chronicles of Kings of Israel," or "Judah." But in the books of Samuel there is no formal allusion to any such sources of information. (c) The nature of the history in the two works is very different. The plan of the books of Samuel is not that of the books of Kings. The books of Samuel are more of a biographical character, and are more limited and personal in their view. (d) There are in the books of Kings many later forms of language. For a collection of some of these the reader is referred to De Wette (Einheit, in das A. T. § 185, note c). Scarcely any of those more recent or Cha’dais forms occur in Samuel. Besides, some peculiarities of form are noted by De Wette (§ 180), but they are not so numerous or distinctive as to give a general character to the treatise (Hitzel, De Chaldaismi Bibl. Orientali, § 27). Many modes of expression common in Kings are absent from Samuel (Kell, Einheit, § 55). See Kings, Books of.

The concluding chapters of the second book of Samuel are in the form of an appendix to the work—a proof of its completeness. The connection between Samuel and Kings is thus interrupted. It appears, then, that Samuel claims a distinct authorship from the books of Kings. Stihelin, indeed, supposes that the present division between the two treatises has not been correctly made, and that the two commencing chapters of 1 Kings really belong to 2 Samuel. This he argues on philological grounds, because the terms נֵבֶּן (1 Kings i, 98, 105, i, 12), and רֵעֶה (1 Kings i, 29) are found nowhere in Kings but in the first two chapters, while they occur once again in Samuel. There is certainly something peculiar in this affinity, though it may be accounted for on the principle that the author of the pieces or sketches which form the basis of the initial portions of 1 Kings, and which are opposed those which form the conclusion of Samuel, but also supervised or published the whole work which is now called by the prophet's name.

Thus the books of Samuel have an authorship of their own—an authorship belonging to a very early period. While their tone and style are very different from the later records of Chronicles, they are also dissimilar to the books of Kings. They bear the impress of a hoary age in their language, allusions, and mode of composition. The insertion of odes and snatches of poetry, to enliven and verify the narrative, is common to them with the Pentateuch. They abound in minor sketches and vivid touches. As if the chapters had been extracted from a diary, some portions are more fully detailed and warmly colored than others, according as the original observer was himself impressed. Many of the incidents, in their artless and striking delineation, would form a fine study for the pastime of a hunter.

VII. The Object.—So far as the compiler of these books might be conscious of a direct aim in his work, producing it, as doubtless he did, under the impulse and guidance of the Holy Spirit, it might be his endeavor to continue the history of the chosen people, and especially to record the remarkable change which was effected in the method of government, when the God of Israel ceased to rule the people by judges, and permitted them to be governed by kings, as were the other nations of the earth. In pursuing this object the writer took care to point out the important distinction which
was to be maintained between the kings of Israel and those of other nations, in the separation of the civil from the religious rights, and the secular from its religious authority; and also to describe the origin and influence of the prophetical order in relation both to the monarchy and to the people. The books of Kings are a history of the nation as a theocracy; those of Chronicles have special reference to the form and ministry of the religion of the nation; in the blessing which rested on the house of Obed-Edom; in the curse which fell on the Bethshemites and Uzah and Saul for intrusive interference with holy things.

VIII.—Particular Relation to the Books of Chronicles.

—That portion of the history which is common to the books of Samuel and of Chronicles is found in 2 Sam. i-xvii, and 1 Chron. x-xvi, beginning with the account of the death of Saul and ending with the story of the pestilence. Between these two narrations of the same period of history the following differences may be pointed out.

1. The book of Samuel contains, but that of Chronicles omits:

1. The story of David's kindness to Mephibosheth, 2 Sam. ix.
2. Of Bathsheba and Uriah, 2 Sam. xi, 2-xii, 25.
3. The rebellion of Absalom, 2 Sam. xiii, etc.
4. The surrender of seven of the sons of Saul to the Gibeonites, 2 Sam. xxiv, 14.
5. A war with the Philistines, 2 Sam. xxii, 15-17.
6. David's song (Psa. cviii), 2 Sam. xxvii.
7. The last words of David, 2 Sam. xxviii.

2. The book of Samuel omits, but that of Chronicles contains:

1. A list of David's adherents.
2. A list of those who chose David to be king at Hebron.
3. David's preparation for building the Temple.
4. The arrangement of the Levites and priests for Temple service.
5. David's officers and heroes, etc.

3. The two works present several portions of the history in a different order, such as the following:

2 Sam. v, 11-25 = 1 Chron. xiv.
2 Sam. vi, 1-10 = 1 Chron. i, 1-9.
2 Sam. vi, 5-11 = 1 Chron. ii, 5.
2 Sam. vii, 12-29 = 1 Chron. xvi.
2 Sam. xxii, 8-10 = 1 Chron. x, 10-47.

4. The differences of verbal and grammatical forms in the narration of the same events in these two works are occasionally so great as to indicate the iniquity of the books of Samuel. Nearly all the points in which Chronicles differ from Samuel may be distinctly explained by the more recent origin of the former. They are too numerous and minute to be here mentioned.

5. Many of the numbers in Samuel and Chronicles differ:

2 Sam. x, 13, 18, 24, and 1 Chron. xiv, 12, 18, 25.
2 Sam. xxii, 8, "1 Chron. xi, 11.
2 Sam. xxiv, 9, 13, "1 Chron. xxii, 5, 12.

These discrepancies are doubtless to be accounted for on the ground of emotional expressions. Whether the numbers in Samuel are generally right, and those in Chronicles generally wrong, which is the common (but perhaps usually incorrect) opinion, or whether errors exist in both, cannot be determined until more careful attention shall have been given to the subject, and a more correct and literal Hebrew text shall have been prepared.

See CHRONICLES, Books of.

IX. Chronology.—One of the most striking points of difference between the books of Samuel and of Kings is the more sparing use of dates in the former. The means of determining the periods of time in which the various events occur in Hebrew history have been exceedingly scanty. The most helpful are found in other parts of Scripture. Thus, in Acts xiii we find that Saul was king "by the space of forty years." We know already that David reigned over Judah and all Israel forty years, and we have also calculated that Samuel must have lived about 110 years. If, then, Samuel died about five years before Saul, we find that the history covers a period of 155 years, except that brief portion of the life of David not contained in Samuel. These numbers agree with the usual dates assigned to the commencement of the sojournment and restoration of the books of Samuel. See CHRONOLOGY.

X. Canonicity, etc.—The historical credibility and canonicity of these books need not be fully discussed in this place. The internal evidence of their truthfulness and the external evidence of their canonical authority are both beyond question. The style in which they are written is simple, natural, and bold. Places, times, and other minute details are freely and artlessly given. The course and connection of the history carry with them the proof of their truthfulness. The characters and events are in accordance with the times in which they are placed. Attempts to establish contradictory and discrepancy have not succeeded. The history contained in these books fits in and accords with the preceding and subsequent portions of the history of the Israelitish people, although the several portions were composed at long intervals and by different authors. Portions of them are quoted in the New Test. (2 Sam. vii, 14, in Heb. iv, 1; I Sam. vi, 17, Acts xiii, 22). They are found to occur in other sections of Scripture, especially in the Psalms, to which they often afford historic illustration. The old objections of Hobbes, Spinoza, Simon, and Le Clerc are well disposed of by Carpzov (Introductio, p. 215). Some of these supposed contradictions we have already referred to, and for a solution of others we refer to Davidson's Sacred Hermeneutics, p. 544, etc. Some of the objections of Vatke, in his Bibl. Theol., "cujus mentio est refutatio"—are summarily disposed of by Hengstenberg (Die Authentik des Pentateucht, ii, 115). See, in addition to the ordinary Introductions to the Old Testament—such as those of Horne, Hvernick, Keil, D. Wette—the following later works: Bleek, Einleitung in das Alte Testament (Berl. 1860), p. 355-368; Stähelin, Speciale Einleitung in die kirchlichen Bücher des Alten Testaments (Elberfeld, 1862), p. 88-105; Davidson, Introduction to the Old Testament (Lond. and Edinb. 1862), p. 491-508.

XI. Commentaries.—The exegetical helps on the entire books of Samuel alone have not been numerous: Origen, Selecta (in Opp. ii, 479; also in Gallandii Bibl. Patrum, xiv); Ephrem Syrus, Explanatio (in Opp. iv, 381); Theodoret, Questions (in Opp. i, 1); Gregory, Expositio (in Opp. III, ii, 1); Jerome, Questions (in Opp. [Spec.], i, 1); Eucherius, Expositio (in Bibl. Max. Patr. viii); Procopius, Scholia [incl. other hist. books] (in Meursii Opp. viii, i); Isidore, Commentарii (in Opp.); Bahe, Expositio, etc. (in various forms, in Opp.); Angelomus, Emorgraphiae (in Bibl. Max. Patr. xv); Hildebert, Versio Metrica (in Opp. p. 1191); Raban, Commentarius (in Opp.); Rüpert, Commentarius (in Opp. i, 345); Hugo Victor, Annotationes (in Opp. i); Abraham, Commentarius [incl. other hist. books] (l. c. et a. Pesaro, 1852); Heber, Translationes (translat. in Bibl. Max. Patr.); Bañolas, ἔλευθρα (Letia, 1449, fol.; also in the Rabbinic Bibles); Bugenburg, Adnotationes [incl. Deut.] (Basil. 1524; Argent. 1525, 8vo); Menius, Commentarius [in Sam.] (Vitenebm. 1582, 8vo); Brentius, Commentarius (in Opp. ii); Lambert, Commentarius (Argent. 1526; Francof. 1539, fol.); Caesius (R. C.), Dissertations (Paris, 1556, fol.; Colon. 1552, 4to); Weller, Commentarius (incl. 1 Kings) (Francof. 1555, 2 vols. 8vo); Peter Martyr, Commentarius (Tigur. 1567, fol.); Strigel, Commentarius (incl. Kings and Chronicles) (Lips. 1569, 1583, fol.; Neuerburg, 1591, 8vo); Borrasus, Commentarius [incl. other hist. books] (Basil. 1577, 4to); Alcubich, Ἀναλογίας Απόλογος (Cracow, 1595, fol., and later); Ascheich,
It will be seen that the remark of Dr. Ginsburg, in Kitto's Cyclop. s. v. "Synagoge" (p. 306, note), is not justified either by the statement of Epiphanius or that of the Jewish historian Gratt. See Gratt., Jud. iv. 434; Durenb. Histoire de la Palestine, p. 344–346; Schurer, Lehrbuch der neutestamentlichen Zeitgesch. p. 502. (B. P.)

Samuel MAROCCANUS. See MOROCCO, SAMUEL OF.

Samuel ben-Meir. See RASHIHAM.

Samuel YERETS, an Armenian historian, was born at Ani (Armenia Major), and lived in the 12th century. He was a disciple of George Melrig, and, invited by Gregory IV, patriarch of Armenia, to prepare a chronic or universal history, which work he published under the title Samuelis, Fresh. Anienses, temporum usque ad samb Rato. It is divided into two parts, commencing with the creation of the world and ending with the year 1173. It is mainly an abridgment of the chronicles of Eusebius increased by matter found in the History of Armenia by Moses of Choren, and in earlier writings now lost. The Latin translation was prepared by Dr. Zorab and Angelo May.

Samus, in Greek mythology, is an ancestral hero of the Samians, from whom both people and the island Samos derived their names. Ancestor of the Lelges, and Sama, daughter of Meander. His brothers were Perleus, Eneus, and Alcathres, and Parthenope was his sister.

Sanabas'sar (Σαναβάσσαρος v. r. Σαναμάσσαρος, 1 Esdr. ii. 12, 15), or Sanabas'sar (Σαναβάσσαρος v. r. Σαναμάσσαρος, 1 Esdr. vii. 18, 20), the Greek form of the word that underlies SHISHABAZA, and the corresponding passages (Ezra i. 8, 11; v. 14, 16).

Sanadon, Nohé-ÊtëNë, a celebrated Jewit, was born at Rouen, Feb. 16, 1676. At the early age of twelve he was admitted to the Order of Jesuits, and carried on his studies at Caen, where he afterwards taught rhetoric. His first literary attempt was a Latin poem entitled Nocem Mortem. He subsequently wrote and translated many Latin poems, one of which was a translation of Horace, is considered his best work. In 1712 Sanadon was elected professor of rhetoric in the College of Louis the Great, and in 1728 he became librarian of the same institution. He died at Paris, Sept. 21, 1738.

Sanagen, in Hindi mythology, is a raja of the children of the moon, the father of Danamunwasa and grandfather of Kandikayia.

Sanakadi Sampradâya, one of the Vaishnava sects among the Hindus. They worship Krishna and Radha conjointly, and are distinguished from other sects by a circular black mark in the centre of the ordinary double streak of white earth, and also by the use of the necklace and rosary on the stem of the tulasi. The members of this sect are scattered throughout the whole of Upper India. They are very numerous about Mathura, and they are also among the most numerous of the Vaishnava sects in Bengal.

Sanarkûmaun, in Hindi mythology, is one of the four priests in addition to Bhrigu in order to recreate the destroyed human race: but as the priest off-spring did not achieve that object, the evil spirit became the prevailing power in coition.

San'asib (Sansâsîb), v. r. Sansâbîch, 'Anâsîb), a head of the priests, "the sons of Jedda, the son of Jesus," who are said to have returned, to the number of 972, with Zecharubael from the captivity (1 Esdr. v. 24); evidently the "children appointed to the house of Jesus," in the Heb. texts (Ezra ii. 36; Neh. vii. 39), the name Sanâsib having been repeated for the "Senaah" (Esdras, "Annah") of the preceding verse.

Sanat, in Finnish mythology, means songs of magical power which are chanted by the priests of the hear-
then Finns for the purpose of producing storms, curing the sick, causing favorable weather, bewitching cattle, etc.

Sanballat (Heb. Sanballat', סַנְבָּלָטָא, a name of which the latter part is of uncertain etymology, but the first syllable is probably the Sanscrit sama [Greek σαμα], indicative of strength; Sept. סַנְבָּלָטָא, Josephus, Σαν-βαλλαττά), a Horonite (qu. v.), i.e. probably a native of Horonaim in Moab (Neh. ii, 10, 19; xiii, 28). There are two very different accounts of him.

All that we know from Scripture is that he had apparently some civil or military command in Samaria, in the service of Artaxerxes (Neh. iv, 2), and that, from the moment of Nehemiah's arrival in Judea, he set himself to oppose every measure for the welfare of Jerusalem, and was a constant adversary to the Tirshatha. B.C. 445. His companions in this hostility were Tobiah the Ammonite and Geshem the Arabian (ii, 19; iv, 7). For the details of their opposition, see Neh. vi, where the enmity between Sanballat and the Jews is brought out in the strongest colors. The only other incident in his life is his alliance with the high-priest's family by the marriage of his daughter with one of the descendants of Eliashib, which, from the similar connection formed by Tobiah the Ammonite (xiii, 4), appears to have been part of a settled policy concerted between Eliashib and the Samaritan faction. The expulsion from the priesthood of the guilty son of Joiada by Nehemiah must have still further widened the breach between him and Sanballat, and between the two parties in the Jewish state. Here, however, the scriptural narrative ends—owing, probably, to Nehemiah's return to Persia—and with it likewise our knowledge of Sanballat. See NEHEMIAH.

But on turning to the pages of Josephus a wholly new set of actions and of a different date is brought before us in connection with Sanballat, while his name is entirely omitted in the account there given of the government of Nehemiah, which is placed in the reign of Xerxes. Josephus, after interposing the whole reign of Artaxerxes Longimanus between the death of Nehemiah and the transactions in which Sanballat took part, and utterly ignoring the very existence of Darius Nothus, Artaxerxes Meseon, Ochus, etc., jumps at once to the reign of "Darius the last king," and tells us (Ant. xi, 7, 2) that Sanballat was his officer in Samaria, that he was a Cuthæan (i.e. a Samaritan) by birth, and that he gave his daughter Nicaea in marriage to Manasseh, the brother of the high-priest Jachin, and consequently the fourth in descent from Eliashib, who was high-priest in the time of Nehemiah. He then relates that on the threat of his brother Jaddua and the other Jews to expel him from the priesthood unless he divorced his wife, Manasseh stated the case to Sanballat, who thereupon promised to use his influence with king Darius, not only to give him Sanballat's government, but to sanction the building of a rival temple on Mount Gerizim of which Manasseh should be the high-priest. Manasseh, on this, agreed to retain his wife and join Sanballat's faction, which was further strengthened by the accession of all those priests and Levites (and they were many) who knew of him from Scripture. But just at this time happened the invasion of Alexander the Great; and Sanballat, with seven thousand men, joined him and renounced his allegiance to Darius (Ant. xi, 8, 4). Being favorably received by the conqueror, he took the opportunity of speaking to him in behalf of Manasseh and his party, and with his interest to divide the strength of the Jewish nation, and how many there were who wished for a temple in Samaria; and so obtained Alexander's permission to build the temple on Mount Gerizim, and make Manasseh the hereditary high-priest. Shortly after this, Sanballat died of a disease (Ant. xi, 9, 1, 2), and the Shechemites, as they were called, continued also as a permanent schism, which was continually fed by all the lawless and disaffected Jews. Such is Josephus's account. If there is any truth in it, of course the Sanballat of whom he speaks is a different person from the Sanballat of Nehemiah, who flourished fully one hundred years earlier; but while he puts together Josephus's silence concerning a Sanballat in Nehemiah's time, and the many coincidences in the lives of the Sanballat of Nehemiah and that of Josephus, together with the inconsistences in Josephus's narrative (pointed out by Prideaux, Connect, i, 288, 290, 365, 460), and its disagreement with what Eusebius tells of the relations of Alexander with Samaria (who says that Alexander appointed Andromachus governor of Judea and the neighboring districts; that the Samaritans murdered him; and that Alexander, on his return, took Samaria in revenge, and settled a colony of Macedonians in it, and the inhabitants of Samaria retired to Sichem [Chron. Con. p. 346]), and remember how apt Josephus is to follow any narrative, no matter how anachronistic and inconsistent with Scripture, we shall have no difficulty in concluding that his account of Sanballat is not historical. It is doubtless taken from some apocryphal romance, now lost, in which the writer, living under the empire of the Greeks, and at a time when the enmity of the Jews against the Gentiles was at its height, and the downfall of the Persian empire for the epoch, and Sanballat for the ideal instrument, of the consolidation of the Samaritan Church and the erection of the temple on Gerizim. To borrow events from some Scripture narrative and introduce some scriptural personage, without any regard to chronology or other propriety, was the regular method of such apocryphal books. (See 1 Esdras, apocryphal Esther, apocryphal additions to the book of Daniel, and the articles on them, and the story inserted by the Sept. after 2 Kings xii, 24, etc.). To receive as historical Josephus's narrative of the building of the Samaritan temple by Sanballat, circumstantial as it is in its parts, was Manasseh's, Sanballat's, and Josephus's purpose, and not the least mischief is to transmute it, as Prideaux does, to the time of Darius Nothus (B.C. 409), seems scarcely compatible with sound criticism. See SAMARITAN.

San Benito, the garment worn by the victims of the Inquisition on the occasion of the auto-da-fé. It was a yellow frock, with a cross on the breast and on the back, devils and flames also being painted upon it. Those who were to be burned alive had the flames pointing upward, while those who had escaped this horrible fate had them pointing downward.

Sanborn, E. C., a minister of the Methodist Episcopal Church, was born in Bath, N. H., June 12, 1794. Early impressed that it was his duty to preach, he hesitated for some time. At length a portion of his hands became maimed for life; that hand, while yet bleeding, he held towards heaven, and promised God that he would no longer resist his convictions of duty. In 1833 he joined the Genesee Conference, and continued in effective work until 1844, when, through failing health, he was led to discontinue his active labors. He died at the residence of his son, Hon. L. R. Sanborn, Norwich County, N. Y., April 20, 1867. He entertained a high appreciation of the varied duties of the ministry, was a firm believer in the doctrines of his Church, and an ardent admirer of her polity. See Minutes of Annual Conf. 1867, p. 244.

Sanborn, Jacob, a minister of the Methodist Episcopal Church, was born in the town of Unity, N. H., May 16, 1788. His pious parents deeply impressed the mind of their son by their religious instructions, prayers, and holy life. At the age of seventeen years (1805), he was awakened, and found peace. Although of Baptist parentage, he united (Jan. 18, 1806) with the Methodist Church. At the age of eighteen, he became impressed that it was his duty to preach, and on Aug. 14, 1811, he went to preach as a licentiate.
SANBUKI CODEX

on the Landaff Circuit, N. H. In June, 1812, he united on trial with the New England Conference, and from this time onward until 1850, with the exception of one year’s location (1839-40), he performed effective labor. In 1850 he took a superannuated relation, which he retained until his death. He nevertheless continued to preach until May 10, 1863, when he delivered his last sermon in Pembroke. He died March 16, 1867.

Mr. Sanford was a more than ordinary writer. According to Richard Simon (Biblioth. Critic, i. 367), the name Sanbuki (Sandurku) is derived from the owner of the MS, a Hungarian family. According to Hottinger (in Bibliothecario Quadripartito, p. 128, ed. Turic.), the name ought to be Sanbuki (Sanbiurk), which is equivalent to Zadukki, or Sadducee. For other conjectures, see Wolf (Bibl. Hebr. ii. 292, 293; iv. 79) and Tyoczen (Tentamen, p. 249, 250). As to the codex itself, several different glosses are given in the margin of some MSS., as in Cod. Kennic, 415; Cod. Kennic. B. (Bibl. Bodl. Hunting. 60; comp. Brunsvius, Ad Kenn. Diss. Gen. p. 345).

Besides, this codex is quoted three times by Menachem in his commentary Or Thora, as on Gen. ix. 14, 15 (fol. 2 b, in ed. Amstel): 

Heb. בָּשָׁהְקָנָא הָרָגָא אֵל הָרָגָא לָא קִנּת פָּרָע לָא מְלַע שְׁלִינָא עַל לְבָנָא הִלָל הָה, e. i. e. in the Codex Hillel, the nun has only the sheva (†), but in the Codex Sanbuki the sheva with the patach; Lev. xxiii, 20 (fol. 14 b), מְלַע שְׁלִינָא עַל לְבָנָא הִלָל הָה, i. e. in the Codex Sanbuki the ב is written with the patach; Lev. xxvi, 36 (fol. 15 b), מְלַע שְׁלִינָא עַל לְבָנָא הִלָל הָה, i. e. in Spanish and German MSS. there is a gaya (i. e. a metheg) under ר, but not so in the Codex Hillel, Jerusalem, and Sanbuki. See Strack, Prolegomena Critica in Vetus Test. Hebr. (Lips. 1873), p. 22. See Manuscripts, Biblical (B. P.).

Sanchez, Gaspar, a learned Jesuit, was born at Cifuentes, in New Castile, about 1552. He was appointed to teach the learned languages and belles-lettres at the Jesuit college at Oropesa, Madrid, and other places, and was at last chosen professor of divinity at Alcalá. Here he spent thirteen years in commenting on the Scriptures, the result of which he published in various volumes in folio. He died in 1628.

Sanchez, Pedro Antonio, a learned Spanish ecclesiast, was born at Vigo, in Galicia, in 1746. He entered the Church, obtained a canonry in the Cathedral of St. James, and was likewise appointed professor of divinity in that city. His fame procured for him admission into many learned societies. He was celebrated as a preacher and admired for his benevolence, spending his income to aid the poor, so that, at his death in 1806, he left no more than was barely sufficient to defray the expenses of his funeral. Among his works are Summa Theologica Sacra (Madrid, 1789, 4 vols. 4to);: Annales Sacrae (ibid. 1784, 2 vols. 8vo);: Hist. of the Church of Africa (ibid. 1784, 8vo);: A Treatise on Toleration, etc. (ibid. 1785, 3 vols. 4to), and others.

Sanchez, Thomas, a celebrated Roman casuist, was born at Cordova in 1557. Enticed to Rome by his father, he joined the Jesuits in his sixteenth year. He studied philosophy, law, and theology with great success; was punctual in the fulfillment of all Church duties; and, at an early age, enjoyed a high reputation throughout Spain and Italy. His fame as a casuist was so great that he was often personally applied to for the solution of specific cases. He died at Granada in 1610. His work De argomento opus in omnium (Genova, 1592, 3 vols.) occupies a high place in Jesuitical casuistry. It treats of every variety of obscure and immoral questions, and is justly regarded as indirectly contributive to the very immorality which it formally condemns. Pope Clement VIII used the work in preparing a solution of a specific case, and pronounced upon it the highest praise. But others have vigorously assailed it, even in the Roman Church. Arnauld of St. Cyr attacked it in his Vindiciae Censurae Facultatis Parisiensiæ (see Bayle, Dictionnaire [art. "Sanchez"], iv. 134). After Sanchez’s death appeared Opera Moralia in Proceps De Tomaso I (Venet. 1614) — Consilia seu Opuscula Moralia — in 6 vols. It is complete and printed in Venice in 1740, in 7 vols. See Wuttke, Christian Ethics (N. Y. 1873). 255-272; Herzog, Real-Encykl. xiii, 413. (J. P. L.)

Sanchez de Arévalo, Rodrigo, generally known as Rodrigo de Sancto, a Spanish prelate, was born at Santa María de Nieva, in the diocese of Segovia, in 1404. After receiving his classical education at the University of Salamanca, and obtaining the degree of doctor, he entered the Church, and was made successively archdeacon of Treviño (in the diocese of Burgos), dean of Leon, and dean of Sevilla. About 1440 John II of Castile sent him as ambassador to Frederick III, and he was afterwards sent by Henry IV of Castile to congratulate pope Calixtus III upon his accession. On the death of that pope, in 1458, Sanchez, Cardinal of Seville, was vested by his predecessor to settle at Rome, was appointed by pope governor of the Church of St. Angela and keeper of the jewels and treasures of the Roman Church, and in course of time promoted to the bishopric of Zamora, Calahorra, and Palencia. He died at Rome Oct. 10, 1470, and was interred in the Church of Santiago dei Spagnuoli. He wrote the following works: Speculum Vitae Humane (Rome, 1468, fol.): Epistolae de Erupimatione, etc. (fol.): Compendiosa Historia Hispanica (Rome, 1470, 4to; Frankfort, 1608): Liber de Origine ac Differentia Principatus (Rome, 1521). Many other works are in the Vatican Library. See Chalmers, Biog. Dict. v.; Hoefer, Nouv. Biog. Générale, s. v.

Sanchonaito, the supposed author of a Phoenician history of Phoenicia and Egypt, called Φωκονάτος, has been the subject of much discussion involving his place of birth, his works, and, indeed, his very existence. Our principal information respecting him is derived from Philo Byblius, a Greek writer at the beginning of the 2d century A.D. According to him, Sanchonaito lived during the reign of Semiramis, and dedicated his book to Abluis, king of Berytus. The general nature of the work is in itself sufficient to prove it to be a forgery; yet the question remains whether the name Sanchonaito was a pure invention of Philo or not. Movers supposes that it was the name of the sacred books of the Phoenicians, and that its original form was San-Chon-ith, which might be represented in the Hebrew characters by כָּן-יוֹת, that is, "the entire law of Chon." On this etymology we offer no opinion. According to Suidas, he also wrote a book on the theology of the Egyptians.

Sancroft, William, D.D., an English prelate, was born at Fresingsfield, Suffolk, Jan. 13, 1616, and educated at the grammar-school of Bury St. Edmunds, and at Emanuel College, Cambridge. In 1642 Sancroft was elected a fellow of his college, but in the following year he was deprived of his fellowship by the Puritans for refusing to subscribe to the famous "Engagement;" after which he went abroad. On the restoration of Charles II, 1660, he was appointed chaplain to Cosin, bishop of Durham. After several preferments he was (1698) made archdeacon of Canterbury, and in 1677
archbishop of Canterbury. When James II issued his declaration for liberty of conscience and required the clergy to sign it, Sanctor refused. With six other bishops who joined him in his refusal, he was sent to the Tower (1689). He refused to take the oath to William and Mary, and was deposed by an act of Parliament, Aug. 1, 1689; but his actual departure from Lambeth did not take place until June 23, 1691. He then retired to his native village, where he died, Nov. 24, 1698. He published some Sermons, and Letters to Mr. North. His Modern Polities and Practices from Machiaveli and others, was published in 1757.

Sancta Sanctis. See THIRASAGON.

Sancte-bell. SANCTUS-BELL, SAINTS'-BELL, MASSES-BELL (old English forms, Staring-bell, Saunce-bell), a small bell used in the Roman Catholic Church to call attention to the more solemn parts of the service of the Mass, as at the conclusion of the ordinary, when the words "Sanctus, Sanctus, Sanctus Deus Sabaoth" are pronounced by the priest; and on the elevation of the host and chalice for consecration. It is now usually, if not always, a small hand-bell carried by an attendant, and was generally of this kind in England previous to the Reformation, made sometimes of silver; but in some instances a larger bell was used, and was suspended on the outside of the church in a small turret, made to re- ceive the rope as the churchwarden led the nave into the chancel, and rung by a rope from within. Many of these turrets still exist, as at Asham, Rothwell, and Desborough, Northamptonshire; Boston, Lincolnshire; Bloxham, Brize-norton, Swalecliffe, and Coombe, Oxfordshire, etc.; a few still retain the bell, as at Long Compton, Warwickshire. Occasionally, also, a number of little bells were hung in the middle of the church, which the pulling of one wheel made all to ring, which was done at the elevation of the host.

Sancti, Sanctissimi. usual epithets of the bishops, signifying holy, most holy. Other epithets were "beati, beatissimi," blessed, most blessed; "Deo carissimi," dearly beloved by God.

Sanctification. Separation from ordinary use to a sacred purpose. The Hebrew word עֵネֶכֶה and the Greek word ἐντυπωσίας rendered "hallowed," "sanctified," and "sanctified," are applied to certain times which were hallowed—as the Sabbath and the Hebrew festivals (Gen. ii, 3; Exod. xx. 8, 11; Lev. xxii. 37; 2 Kings x, 20); to the things said to be hallowed, as the sacred incense or perfume (Exod. xxx. 36; Matt. vii, 6), the sacred vestments (Exod. xxviii., 2, 4), the sacred utensils (Exod. xxx. 29; 1 Chron. xxii. 10; 2 Tim. ii. 21), the holy bread (Lev. xxii. 1; 1 Sam. xxii. 5), the altar (Exod. xxviii., 37; xxx. 10; Matt. xxviii. 19), and portions of the sacrifices (Lev. ii. 3, 10). So, also, of places said to be hallowed (Exod. iii. 5; Acts xvii. 33), as the holy city, i.e. Jerusalem (Neh. xi. 1; Isa. xxiv. 2; Matt. iv. 5; Luke iv. 23; Acts x. 35), the holy mountain, i.e. Zion (Psa. lii. 6), the Temple (Numb. xxvii. 10), the Temple (Psa. lxxxvii. 2), the most holy place, the oracle (Exod. xxxvii. 38; xxxviii. 43; Heb. ix. 2, 3, 12; 1 Kings vi. 16; viii. 6; Ezek. xli. 23). So, also, men are said to be hallowed, as Aaron and his sons (1 Chron. xxiii. 13; xvii. 5; Isa. xxiv. 28), the first-born (Exod. xiii. 2), and the Levites (Num. x. 14; Dan. xii). Also, the pious Hebrews, the "saints" (Deut. xxxii. 3, 13, 25; Psa. xxxvi. 3, Dan. vii. 9, 18), like the word ἁγιος, rendered "saint" (Psa. xxx. 4, xxxix. 23; xxxix. 28; i. 5, lii. 3, lxix. 2; xvii. 10), and "godly" (Psa. iv. 3).

The terms are also used of those who were ceremonially purified under the Mosaic law (Num. vii. 1; Lev. xi. 32; Heb. ix. 13). But, though the external purifications of the Hebrews, when any one had transgressed, had to do with restoration to civil and national privileges, they did not necessarily induce moral and spiritual holiness. They, however, reminded the sincere Hebrew that he was uncleap in the sight of God; and that the ceremonial cleansings, by which he had been restored to his civil and political rights, were tokens of those "good things that were to come"—spiritual and eternal salvation—which should accrue through the sprinkling of the blood of Christ and the gift of the Holy Spirit. He was thus assured that "without holiness no man shall see the Lord" (Heb. ix. 14, xii. 14). Hence, sanctification is to be understood as the state of mind induced by the indwelling of the Holy Spirit, thus producing internal and external holiness (John iii, 5; 1 Cor. vi. 11; Eph. v. 26; 1 Thess. v, 4, 7). It is true, sanctification is sometimes spoken of as the work of man himself (Exod. xix. 22; Lev. xi. 44; xx. 7, 8; I Pet. iii. 15). When a person solemnly and unrestrainedly gives himself to God, he may be said to sanctify himself. He is then enabled to believe in Christ with his heart unto righteousness, and God instantly, by the communication of his Holy Spirit, sanctifies the believer. Thus the believer gives himself to God, and God, in return, gives himself to the believer (Ezek. xxxvi. 25—27; Jer. iii. 10, 16, 15; vii. 19; 1 Cor. vi. 19; Eph. ii. 22). This sanctification, which is received by faith, is the work of God within us.

In a general sense, "sanctification" comprehends the whole Christian life (Gal. v. 22, 23; 1 Pet. i. 5, 16, 21; Heb. xii. 10; James iv. 8). In 1 Thess. v. 23, the apostle prays for the sanctification of the entire Church in all its various departments. In 1 Cor. viii. 14, it is said, the unbelieving husband, or wife, is "sanctified"—that is, to be regarded not as unclean, but as specially claiming the attention of the Christian community. The term "sanctified" is also used in the sense of expiration (Heb. x. 14, 15, 29). See Hagenbach, Hist. of Doctrines, i. 281, 288, 505; Osterreicher, Christian Dogmatics. See HOLINESS.

SANCIFICATION, ENTIRE. One of the most interesting, and practically one of the most important, questions connected with the divine plan of salvation is, What degree of deliverance from sin is it scriptural for the believer to expect in this life?

1. Preliminary Concessions and Distinctions. There are several points upon which all schools of theology agree.

1. That one is the complete sanctification of believers, their perfect deliverance from sin in every sense of the term, is an integral part of the great plan of redemption. Different schools may regard this as to be accomplished, it shall be accomplished, they unite in pronouncing sin a thing to be abhorred, a defilement from the last touch or taint of which God's people are at some period to be delivered.

2. Again, all Christians agree that the true followers of Christ hate sin, loathe it, and struggle, and are bound ever to struggle, for complete deliverance from it. Whether continuous victory or daily defeat attend the content, that war must go on.

3. All writers agree, also, in the conviction that no Christian in this life attains absolute perfection. Some, indeed, hold that the ground through which the believer may attain what the Scriptures call perfection: consequently, the word itself is not to be condemned, seeing that it is employed by those who "speak not in the words which man's wisdom teacheth, but which the Holy Ghost teacheth." Nevertheless, the term perfection is applicable only in a restricted sense to any part of the Church. In the holiness described, it is absolute right, in word and deed, in thought and intention, in all obedience, love, and devotion. It requires payment of the debt, not only to "the uttermost farthing," but in coin in which there is no trace of alloy.

But such service as this can be rendered only where there is perfect knowledge, not only of the law, but of its practical application to the endlessly diversified and complicated events and circumstances of
duty. No mere man since the fall ever possessed such knowledge. The holiest of men are conscious that they are often at a loss to know what God and duty require at their hands, and that there are times when their uncertainty in matters of importance burdens and distresses them. Right and wrong sometimes seem to shade into each other, like the prismatic colors; and the sharpest eye cannot tell where the one ends or the other begins. The tenderest conscience takes alarm the soonest, and the better taught is the less liable to err; but the writer and the most conscientious have occasion to pause now and then, waiting for clearer light, and, perhaps, wait in vain. When Paul and Barnabas at Antioch were planning a tour among the churches, Barnabas had a very positive desire that "John whose surname was Mark" should accompany them. Paul had an equally decided conviction that Mark ought not to go, seeing that he had "departed from them from Pamphylia, and went not with them to the work." Neither Paul nor Barnabas would yield; and "the contention was so sharp between them that they departed asunder, one from the other." Here one or both of them failed of the absolute right. Either Paul or Barnabas was in error in the matter of a fellow worker, disciple, or Barnabas, in his ignorance, was ready to imperil the work of the Lord by calling Mark to a position which he was not qualified to fill. Perhaps, in the sharp contention, παραχωρομενοι; they were unjust to each other, and thus another feature of wrong was introduced. If the contention had been a contest of action in which the holiest of men are counselling in regard to the holiest of causes, what may we expect of those who are immersed in the interests, prejudices, and collisions of common life?

Service may also be defective in degree. Justice, truth, and love are due to our fellow-men; but a still higher and nobler duty is required at our hands. We are invited to the fellowship of our Lord Jesus Christ, and God the Father, and the communion of the Holy Ghost; and called to love and serve "in holiness and righteousness before him all the days of our life." And who that ever by faith caught a glimpse of the glory of God, the great, the holy, and the good, "the Lord, the Lord God, merciful and gracious, long-suffering, and abundant in goodness and truth," did not bow down in lowest self-abasement, in view of the poor service which he renders? The Christian never feels in this world that his service is all that he would have it. There are many poor ragged, broken-hearted, unloved, forgotten, nor love grow cold, nor devotion die, yet the most obedient, faithful, and devoted child of God will humble himself in the very dust at the remembrance of his infinite obligations to his Creator and Redeemer and the poor returns which he is daily making. Thus, if we assume that the intent is wholly right and the purpose all-controlling, the service rendered will be imperfect in character, marred by lack of knowledge and errors of judgment, and deficient in degree, and sinful obedience, in the absolute sense of the term, is utterly impossible.

4. Still another point needs recognition. As long as we live in this world, however deep, fervent, and thorough our religious life, there are sources of danger within. There inheres in our nature as essential elements of it, at least in this present life, appetites, passions, and affections, without which man would be unfit for this present state of existence and would cease to be man. These are what it is plain in themselves are such reasoning impulses over which we need to keep constant watch and ward, ruling them by reason, conscience, and divine grace, else they lead to sin and death. By these "sin entered into the world, and death by sin." When Eve, in Eden, "saw that the tree was good for food, and pleasant to the eyes, and the tree was desirable to make one wise," the temptation was a skilful appeal to elements in her nature which were pure from the hand of the Creator. The desire for pleasant food is not sin; nor is the higher taste which finds enjoyment in contemplating beautiful forms and colors. Nor can we condemn the still more elevated instinct that leads to delights in mental activity and the acquisition of knowledge. If these appetites and instincts had not existed in original human nature, the temptation of Satan would have had no power.

"The thief adder hears not the voice of the charmer, charm he never so wisely."

Consequently, in the work of sanctification, the various appetites and instincts of original human nature do not need to be rooted out, but to be restrained, chastened, disciplined, made to obey reason and the voice of God. The due enjoyment of pleasant food is not the gluttony which the wise man condemns. A father may provide for his children by a wise foresight which is by no means the "covetousness which is idolatry." When foul outrage is done to the innocent and the defenceless, we may feel our souls flame with fiery indignation, and "be angry and sin not." God "settest the solitary in families" by the affections with which He endowed man at the beginning; and nothing is more beautiful than the relations which grow out of them, where the divine interest is of the first importance. There is nothing more debaseing and destructive than their abuse.

These elements of our nature survive the deepest work of grace. When the wondrous change has come to the penitent believer and he has "put on the new man which, after God is created in righteousness and true holiness," he may thus lose his appetites and instincts of original man. The world appeals to him, Satan assails him, and in himself is the tinder which the glowing sparks of temptation tend to kindle. "There is no discharge in that war." Till life itself is done, some form of peril will remain. Youth may be tempted by fleshly lusts, manhood may become ambitious and proud, and old age may become immoral and avaricious. The innocent appetite to which, in Eden, the forbidden fruit appealed may be perverted into the despotic thirst of the inebriate; Eve's delight in beauty may be the germ from which shall spring a life given up to frivolity and empty show; and the nobler hunger for knowledge may break away from all authority and make man labor to reason and to be the creator of his own creation. Nevertheless, these possibilities of evil do not prove that God's children cannot in this world be saved from moral depravity, nor that the continuous commission of wilful sin must stain the lives of the holiest of them till the very hour of death. They are not the inevitable end of any life. The acknowledgment, and that it behoves every man, whatever progress he may have made in divine things, to "keep his body under, lest that by any means he should be a castaway."

5. One more point needs to be stated. Discussion on this subject has often been rendered incoherent and unsatisfactory by the misuse of terms. The Westminster Confession, as explained by the Exposition published by the Presbyterian Board of Publication, makes "original sin" include three wholly different things: (1) the guilt of Adam's sin; (2) the inherited depravity of soul; (3) the damage done the body. Wesley also uses the term sin in three different senses: (1) the deprivation inherited from Adam; (2) the transgression of known law; (3) involuntary infractions of the divine law. Owing to this confusion of terms, there have been hot controversies where there was little real difference of opinion; whole octavos have been wasted in refuting what nobody holds, and proving what nobody denies. By "fall" is simply meant to fight imaginary foes, and are happy in imaginary victories. If matters not really belonging to the question of entire sanctification are ruled out, we shall find that just two points need investigation: (a) What scriptural ground is there for the belief that the Christian life is a delay in the recovery and the achievement which he inherited as a member of a fallen race? (b) How far and in what sense may the believer be kept in this life, through grace, from the commission of sin?
II. Different Ecclesiastical Views on the Subject.—

1. The Romanist Theory.—The Council of Trent teaches that the sacrament of baptism, rightly administered, washes away guilt and depravity of every kind. It pronounces anathema against those who presume to think or dare to assert "that, although sin is forgiven in baptism, it is not entirely removed or totally eradicated; it is cut away in such a manner as to leave its roots still firmly fixed in the soul." The Council, however, declares that concupiscence, or the fuel of sin, remains. "Concupiscence is the effect of sin, and is nothing more than an appetite of the soul, in itself repugnant to reason. If unaccompanied with the consent of the will or unattended with neglect on our part, it is not sin.

The Catechism of the Council of Trent teaches also that "the commandments of God are not difficult of observance." "As God is ever ready by his divine assistance to sustain our weakness, especially since the death of Christ the Lord, by which the prince of this world was cast out, there is no reason why we should be disheartened by the difficulty of the undertaking. To him who loves nothing is difficult."

2. The Calvinistic Theory.—The Westminster Confession of Faith has the following chapter on sanctification:

"They who are effectually called and regenerated, having a new heart created within them, receive the Holy Spirit of adoption, by virtue of the sovereign grace of God, whereby they become fully sanctified, really and personally, through the virtue of Christ's death and resurrection, by his word and spirit dwelling in them. This sanctification is the dominion of the Holy Spirit in the heart, bringing in a depravity of or against the flesh. Although the remaining corruption may be overcome, yet these are not entirely removed, nor is there any perfect holiness of life, which does not manifest some filthiness of body, and some falling short of the perfect will of God and of a complete conformity to his image in Christ Jesus."

In respect to the possibility of keeping the law, the following declarations of the Confession and the Larger Catechism of the Presbyterian Church are sufficiently explicit:

"No man is able, either by himself or by any grace received, to live a perfectly holy life, or to perform any of the commandments of God, but doth daily break them in thought, word, and deed."—Confession.

Thus the Calvinistic standards answer the two questions by saying, in reply to the first, that as long as a man lives on the earth "there abide still some remains of corruption in every part" of his nature; and, in reply to the second, that every man, notwithstanding all the grace received, "doth daily break the law of God in thought, word, and deed."—Catechism.

The sin of nature, during this life, doth remain in those that are regenerated: and although it be through Christ pardoned and mortified, yet both itself and the motions thereof are truly and properly sin."—Confession, ch. vi.

This last item in the statement of Wesley's views, as well as those numbered 1 and 2, is accepted by all classes of Methodist thinkers, and therefore need not be referred to again.

(3.) The Theory of the English Wesleyans.—It is presumable that the Compendium of Theology, recently published by the Rev. Dr. Pope, theological tutor in the Didsbury College, a school established by the Wesleyans for the education of those young men who are to enter their travelling ministry, may be taken as a standard of the general sentiment of the Wesleyan body at the present time. In several important points he differs from Wesley. He pronounces sanctification always a gradual work. "It must be remembered that this final and decisive sanctification of the Spirit is the sequel upon a previous and continuous work. The processes may be hastened, or condensed into a small space; they must be passed through." Instead of lying within the reach of any novice, to be attained at any moment, "Christian perfection is the exceeding great reward of perseverance in the practice of all things for God; in the exercise of love to God, as shown in the passive submission to his will, and in the strenuous obedience of all his commandments." He intimates that the time when the work is completed is "known only to God;" or, "if revealed in the trembling consciousness of the believer, a secret that he knows not how to utter;" con-
SANCTIFICATION 334

SANCTUARY

7. Not a few of God's faithful servants are named and described in the Scripture: Abel as righteous, Enoch as walking with God, Job as perfect, Zacharias and Elisabeth as righteous before God, walking in all the commandments and ordinances of the Lord blameless; and there is not a word in the history to compel us to take this description of them in any other than the exact, literal sense of the language employed.

IV. Literature.—Many books have been published on the subject of entire sanctification and Christian perfection, but most of them are devotional and practical manuals, rather than theological treatises. The following discuss the doctrine: Wesley, Plain Account of Christian Perfection; Pope, Compendium of Theology; Peck, A Treatise on Christian Perfection; Pelham, Christian Perfection; Peck (J. T.), The Central Idea of Christianity; Boardman (H. A.), The 'Higher-Life' Doctrine of Sanctification; Steele, Love Enthroned; Franklin, A Critical Review of Wesleyan Perfection; Huntington, What is it to be Holy? or the Theory of Entire Sanctification; Endean and others in our Holy Church; and a series of essays; Cranmer, Holiness the Birthright of all God's Children; also, article in the Meth. Quar. Rev. Oct. 1878, on Christian Perfection and the Higher Life; Boardman (W. E.), The Higher Christian Life; See, The Rest of Faith; Atwater, The Higher Life and Christian Perfection (article in the Prov. Quart. and Princeton Rev. July, 1857); Palmer, Perfection, &c., v. 'Perfection, Christian,' p. 704. (J. T. C.)

Sanctimoniales, a name given in early times to nouns on account of their profession of sacredness. They are also called Virgines Dei, Virginis Christi, Ancilia Dei, Sorores Ecclesiae, et cetera. They must not be confounded with the ancient deaconesses.

Sanction

See Pragmatic Sanction.

Sanctuary is the occasional rendering, in the A. V., of two Heb. and one Greek term. A general term is ἱερός, ἱερόν ("sanctuary"); Exod. xxx. 13, 24; xxxvi. 1, 3, 4, 6; xxviii. 25, 26, 27; Lev. iv. 6; v. 15; x. 4; xxvii. 3, 20; Num. iii. 28, 31, 47, 50; iv. 12, 15; vii. 9, 13, 18, 35, 37, 43, 49, 59, 61, 67, 73, 78, 80, 86; viii. 19; xxx. 6, 10; I Chron. ix. 29; Psa. xx. 2; lixxi. 2; lxviii. 24; lixiv. 3; lixvii. 18; cxiv. 2; cl. 1; Isa. xiiii. 28; Lam. iv. 1; Ezek. xlii. 21, 23; xlii. 20; xliv. 27; xlv. 2; Dan. viii. 13, 14; ix. 26; Zeph. iii. 4), which properly means holiness (often so rendered, frequently as an attribute, and perhaps to be regarded as a component of the sacred edifice), or the "holy place" (as very often rendered). The more specific term is ἱερός, μικτός (invariably rendered "sanctuary," except Amos vii. 13, "chapel," and twice in the plur. "holy place" [Psa. lxviii. 35; Ezek. xxi. 2], which is from the same root, and signifies the local shrine. In the New Test. we have the corresponding ἱερος ("sanctuary"); Heb. vii. 2; ix. 1, 2; xii. 11; elsewhere "holy place" or "holiest of all" (e.g. the seat of the anointing), or the "holy of holies," a general term for anything holy. See HOLY PLACE: TABERNACLE: TEMPLE.

SANCTUARY. In popish times the privilege of sanctuary was common in Scotland. Innes says: "In several English churches there was a stone seat beside the altar, where those fleeing to the peace of the Church were held guarded by all its sanctity. One of these still remains at St. Asaph, another at the foot of the frithotol (the seat of peace), or of the frete (the shrine of relics behind the altar), was not, like other offences, to be compensated by a pecuniary penalty: it was hid-les, beyond compensation. That the Church thus protected fugitives among ourselves is evident from the same ancient canons; and the present councils, where, among the list of misdeeds against which the Church enjoined excommunication, after the laying of violent hands upon parents and priests, is denounced 'the open taking of thieves out of the protection of the Church.' The most celebrated, and probably the most
ancient, of these sanctuaries was that of the church of Wedâla, a parish which is now called by the name of its village, the Sow. This is a very ancient tradition that king Arthur brought with him from Jerusalem an image of the Virgin, 'fragments of which,' says a writer in the 11th century, 'are still preserved at Wedâla in great veneration.' About the beginning of his reign, king William issued a precept to the ministers of the church of Wedâla, and to the guardians of its 'peace,' urging them 'not to detain the men of the abbot of Kelson, who had taken refuge there, nor their goods, inasmuch as the abbot was willing to do to them, and for them, all reason and justice.' See Asylum; Church.

SANCTUARY, a name for the presbytery, or eastern part of the choir of a church, in which the altar is placed.

Sanctus, Sr., is said to have been a physician, and a native of Oriculium (or Oriculum), a city of Central Italy. He was put to death with great cruelty in the reign of M. Aurelius Antoninus, A.D. about 150, and his memory is celebrated on June 26.

Sancus, in Old-Italian mythology (in its complete form Semo Sancus, commensurable with Fidius), was an immigrant god who came from the Sabines to Rome and obtained a sanctuary on the Quirinal Hill. He was subsequently compared with Hercules, and called Hercules Sabinus.

Sancy, Achille Harley de, a French diplomat and prelate, was born in 1581. In early life he gave himself to study, and, having taken orders, was in a short time made bishop of Lavau. But in 1601 he gave up his ecclesiastical life and entered the army. After taking part in several campaigns, he was made ambassador to Turkey. Here his conduct was such as to bring upon him the displeasure of the Turkish government; and he was banished. This closed his diplomatic career, and, returning to France, he devoted himself and his fortune to the cardinal Richelieu. Subsequently he went to England and was in favor with queen Henrietta. He died Nov. 20, 1646. He was a man of great learning, and is said to be the author of several unimportant works in his native language, and collected many Oriental manuscripts which are now in the Richelieu Library.

Sand, οἶχλος, from its tendency to slide or roll; ὄμορος. A similitude taken from the aggregate sand of the sea is often used to express a very great multitude or a very great weight; or from a single sand, something very mean and trifling. God promises Abraham and Jacob to multiply their seed as the stars of heaven and as the sand of the sea (Gen. xxii, 17; xxxii, 12). Job (vi, 3) compares the weight of his misfortunes to that of the sand of the sea. Solomon says (Prov. xxvii, 8) that though sand and gravel are very heavy things, yet the anger of a fool is much heavier. Ecclesiastics says that a fool is more insupportable than the weight of sand, lead, or iron (Eccles. xxii, 15). The prophets magnify the omnipotence of God, who has fixed the sand of the shore for the boundaries of the sea, and has said to it, "Hitherto shalt thou come; but here thou shalt break thy foaming waves, and shalt pass no farther" (Jer. v, 22). Our Saviour tells us (Matt. vii, 26) that a fool lays the foundation of his house on the sand; whereas a wise man founds his house on a rock. Ecclesiastics says (xviii, 8) that the years of the longest life of man are but as a drop of water or as a grain of sand. Wisdom says (vii, 9) that all the gold in the world, compared to wisdom, is but as the smallest grain of sand. See Dust.

Sand, CHRISTOPH VON DEN (LATEL. SANDUS), a German theologian, was born at Königsberg Oct. 12, 1614. On account of his Socinian sentiments, and unwillingness to participate in the Lutheran services, he was exiled, and went to Holland, where he spent the greater part of his life. In later years his religious views seem to have changed, as he became a firm Arminian. He died at Amsterdam Nov. 30, 1680. His principal works are: Nucleus Historiae Ecclesiasticae, etc.; Interpretationes Paradoxe IV Evangeliorum; — Confession de Foy conformément à l'Écriture; — Scriptura Trinitatis Revelatric: — Bibliotheca Anti-Trinitariumarum. Sand also left a manuscript work, Auctarium Operis Vossiani de Historia Lutitiae, and two shorter ones which prove his Arminian sentiments.

Sandacus, in Greek mythology, was a son of Atenyus and grandson of Phaethon, who came from Syria to Cilicia, and there founded the town of Celenderis. He married Pharnace, the daughter of Megessares, and by her had a son whom he named Cinyras.

Sandal occurs in the A. V. only, for the same Greek word σαρδαλιον, Mark vi, 9; Acts xii, 8; but it more properly represents the Heb. סִנְדָל, níhal; Sept. and New Test. πεζίνημα; rendered "shoe" in the English Bible. There is, however, little reason to think that the Jews really wore shoes, and the expressions which Carpzov (Appar. p. 781, 782) quotes to prove that they did (viz. "put the blood in his shoe," "the men go over in shoes," Isa. xi, 10), are equally adapted to the sandal—the first signifying that the blood was sprinkled on the thong of the sandal, the second that men should cross the river on foot instead of in boats. The shoes found in Egypt probably belonged to Greeks (Wilkinson, ii, 330). The sandal appears to have been the article ordinarily used by the Hebrews for protecting the feet. It was usually a sole of hide, leather, or wood, bound to the foot by thongs; but it may sometimes denote such shoes and buskins as eventually came into use. The above Hebrew term níhal implies a simple sandal, its proper sense being that of confining or shutting in the foot with thongs; we have also express notice of the thong (πεζίνημα; Isa. v, "shoe hatchet") in several passages (Gen. xiv, 23; Isa. v, 7; Mark i, 7). The Greek term πεζίνημα properly applies to the sandal exclusively, as it means what is bound under the foot; but no stress can be laid on the use of the term by the Alexandrine writers, as it was applied to any covering of the foot, even to the Roman cælata, or shoe, covering the whole foot. Josephus (War, vi, 1-8) so uses it of the clothed, the thick nailed shoes of the Roman soldiers. This word occurs in the New Test. (Matt. iii, 11; x, 10; Mark i, 7; Luke iii, 16; x, 4; John i, 27; Acts vii, 33; xiii, 25), and is also frequently used by the Sept. as a translation of the Hebrew term; but it appears in most places to denote a sandal. Similar observations apply to ταρακλαων, which is used in a general, and not in its strictly classical sense, and was adopted in a Hebraized term by the Talmudists. We have no description of the sandal in the Bible itself, but the deficiency can be supplied from collateral sources. Thus we learn from the Talmudists that the materials employed in the construction of the sole were either leather, felt, cloth, of wood (Mishna, Jeboum, xii, 1, 2), and that it was occasionally shod with iron (Sabb. vi, 2). In Egypt various fibrous substances, such as palm-
leaves and papyrus stalks, were used in addition to leather (Herod. ii, 37: Wilkinson, ii, 382, 383), while in Assyria wood or leather was employed (Layard, Nin. ii, 229, 232). In Egypt the sandals were usually turned up at the toe like our skates, though other forms, rounded and pointed, are also exhibited. In Assyria the heel and the side of the foot were encased, and sometimes the sandal consisted of little else than this. This does not appear to have been the case in Palestine, for a heel-stump was essential to a proper sandal (Jerem. xii, 1). Ladies' sandals were made of the skin of an animal named tuchash (Ezek. xvi, 10), whether a hyena or a seal (A. V. "badger") is doubtful; the skins of a fish (a species of Halicore) are used for this purpose in the peninsula of Sinai (Robinson, Bibl. Res. i, 116). Ladies of rank especially appear to have paid great attention to the beauty of their sandals (Cant. vii, 1); though if the bride in that book was an Egyptian princess, as most think, the exclamation, "How beautiful are thy feet with sandals, O prince's daughter!" may imply admiration of a luxury properly Egyptian, as the ladies of that country were noted for their summptuous sandals (Wilkinson, Assy. Egypt. iii, 364). But this taste was probably general; for at the present day the dress slippers of ladies of rank are among the richest articles of their attire, being elaborately embroidered with flowers and other figures wrought in silk, silver, and gold. See Dress. The thongs, those at least in Hebrew times, were handsomely embroidered (Judith x, 4; xvi, 9), as were those of the Greek ladies (Smith, Dict. of Antiq.).

Ancient Greek and Roman Sandals.

Sandal. Sandals were worn by all classes of society in Palestine, even by the very poor (Amos viii, 6), and both the sandal and the thong or shoe-latchet were so cheap and common that they passed into a proverb for the most insignificant thing (Gen. xiv, 23; Exclus. xvi, 19). They were not, however, worn at all periods; they were dispensed with indoors, and were only put on by persons about to undertake some business away from their homes, such as a military expedition (Isa. v, 27; Eph. vi, 15), or a journey (Exod. xii, 11; Josh. ix, 5, 13; Acts xii, 8); on such occasions persons carried an extra pair, a practice which our Lord objected to as far as the apostles were concerned (Matt. x, 10; comp. Mark vii, 5; and the expression in Luke x, 4, "do not carry," which harmonizes the passages). An extra pair might in certain cases be needed, as the soles were liable to be soon worn out (Josh. ix, 5), or the thongs to be broken (Isa. v, 27). During meal-times the feet were undoubtedly uncovered, as implied in Luke vii, 38; John xii, 5, 6, and in the exceptions specially made in reference to the paschal feast (Exod. xii, 11); the same custom prevailed wherever reclining at meals was practised (comp. Plato, Symposium. p. 218). It was a mark of reverence to cast off the shoes in approaching a place or person of eminent sanctity: hence the command to Moses at the bush (Exod. iii, 5) and to Joshua in the presence of the angel (Josh. v, 15). In deference to national injunctions the priests are said to have conducted their ministrations in the Temple barefoot (Theodoret, ad Ez. iii, quest. 7), and the Talmudists even forbade any person to pass through the Temple with shoes on (Mishna, Berach. 9, § 5). This reverential act was not peculiar to the Jews; in ancient times we have instances of it in the worship of Cybele at Rome (Prudent. Peri. 154), in the worship of Isis as represented in a picture at Herculeanum (Ant. d'Ercole ii, 320), and in the practice of the Egyptian priests, according to Stil. Ital. (iii, 28). In modern times we may compare the similar practice of the Mohammedans of Palestine before entering a mosque (Robinson, Bibl. Res. ii, 36), or in the case of any person entering the Kaaba at Mecca (Burckhardt, Arabis. i, 270); of the Yazidis of Mesopotamia before entering the tomb of their patron saint (Layard, Nin. i, 282); and of the Samaritans as they tread the summit of Mount Gerizim (Robinson, ii, 278). The practice of the modern Egyptians, who take off their shoes before stepping on the carpeted floors, appears to be dictated by a feeling of reverence rather than cleanliness, that spot being devoted to prayer (Lane, i, 35). It was also an indication of violent emotion, or of mourning; if a person appeared barefoot in public (2 Sam. xv, 30; Isa. xx, 2; Ezek. xxiv, 17, 28). This, again, was held in common with other nations, as instances of Augustus's abasement and on the occasion of the solemn processions which derived their name of Nudipedaliia from this feature (Tertull. Apol. 40). To carry or to unbose a person's sandal was a menial office, betokening great inferiority on the part of the person performing it; it was hence selected by John the Baptist to express his relation to the Messiah (Matt. iii, 11; Mark i, 7; John i, 27; Acts xiii, 25). The expression in Psal. lx, 8; cviii, 9, "over Edom will I cast out my shoe," evidently signifies the subjection of that country; but the exact point of the comparison is obscure, for it may refer either to the custom of casting the sandal to a slave, or to that of claiming possession of a property by planting the foot on it, or of acquiring it by the symbolical action of casting the shoe; or, again, Edom may be regarded in the still more subordinate position of a shelf on which the sandals were rested while their owner bathed his feet. The use of the shoe in the transfer of property is noticed in Ruth iv, 7, 8, and a similar significance was attached to the act in connection with the repudiation of a Levirate marriage (Deut. xxv, 9). Shoe-making, or rather strap-making (i.e. making the straps for the sandals), was a recognised trade among the Jews (Mishna, Peuchen. 4, § 6). See Shoe.

Sandal, as insignia of office. They consisted of a sole so attached to the foot as to leave the upper part bare. Without these no priest was permitted to celebrate mass (Gen. iv, 25). The 27th and 88th Psalms and them expressly mentioned as an episcopal badge, distinct from that of the priests. They were supposed to indicate firmness in God's law and the duty of lifting up the weak.

Sandal-tree (Santalum album), a tree which yields an aromatic wood, much used in the pegs for purposes of fumigation, and which is, therefore, an important article of commerce. The Hindus also grind it to a fine powder, which they dilute with water taken
from the Ganges until it becomes a thin paste, with which they mark the forehead and breast each day, after bathing, in accordance with the particular worship they profess.

Sandal-wood. See ALCUM.

Sandalam, in Hindû mythology, is one of the five trees which sprang from the bosom of the milk-sea when the mountain Gânta was turned in order to the preparing of the Amrita, and which bore the fruits of prosperity and abundance.

Sandalen, in Hindû mythology, was a celebrated king of the Middle Kingdom, friend to Siva, and ancestor of the Kurus and Pandus. He fell in love with Gangâ, the wife of Siva, and was punished by being turned into an ape.

Sandanigen, in Hindû mythology, was one of the five sons born by Drowadei, the wife of the five Pandus, to her husbands.

Sandeman, ROBERT, the founder of the Sandemanians (q.v.), was born at Perth, Scotland, in 1718. He studied two years at the University of Edinburgh, and then entered into business. He adopted Mr. Glas's views in opposition to all National Church establishments: and, taking up his residence in Edinburgh, he married one of Mr. Glas's daughters, joined the Glasites, and became an elder in the church that was formed in that city. In 1760 he removed to London, where he preached in various places, attracting much notice. He formed a congregation there in 1762, and in 1764 removed to the American colonies, where he continued till his death. His sympathy with the mother-country rendered him obnoxious to the colonists, and his prospects for usefulness were in a great measure blighted. After collecting a few small societies, he died at Danbury, Conn., 1771. He wrote, Letters on Theron and Aspasio (Edinb. 1757, 1803, 2 vols. 12mos.): —Correspondence with Mr. Pike: — Thoughts on Christianity: —Sign of the Prophet Jonah: —Honor of Marriage, etc.: —On Solomon's Song, etc.

Sandemanians, the followers of Robert Sandeman (q.v.). The leading doctrine of this sect is thus expressed in the epitaph on Mr. Sandeman's tomb in Danbury: "Here lies until the resurrection the body of Robert Sandeman, who, in the face of continual opposition from all sorts of men, long and boldly contended for the truth of Jesus Christ, both in the barrenness of personal life, without a deed or thought on the part of man, is sufficient to present the chief of sinners spotless before God." He describes justifying faith as nothing more nor less than "the bare belief of the bare truth" witnessed concerning the person and work of Christ. This, however, could only be entertained through divine teaching or illumination (see 1 Cor. ii, 14). The chief opinions and practices in which this sect differs from other Christians are their weekly administration of the Lord's supper; their love-feasts, of which every member is not only allowed, but required, to partake, and which consists in their dining together at each other's houses immediately after the morning and afternoon services; their kiss of charity, used on the occasion of the admission of a new member, and at other times when they deem it necessary and proper; their weekly collection before the Lord's supper for the support of the poor, and paying their expenses; mutual exhortations; abstinence from blood and things strangled; washing each other's feet, when, as a deed of mercy, it might be an expression of love (the precept concerning which, as well as other precepts, they understand literally); community of goods, so far as that every one is to consider all that he has in his possession and power liable to the calls of the poor and the Church; and the unlawfulness of laying up treasures upon earth, by setting them apart for any distant, future, and uncertain use. They allow of public and private diversions, so far as they are unconnected with circumstances really sinful; but, apprehending a lot to be sacred, disapprove of lotteries, playing at cards, dice, etc. They maintain a plurality of elders, pastors, or bishops in each church, and the necessity of the presence of two elders in every act of discipline and the administration of the Lord's supper. In the choice of these elders, association, and engagement in trade are no sufficient objection, if qualified according to the instructions given to Timothy and Titus; but second marriages disqualify for the office, and they are ordained by prayer and fasting, imposition of hands, and giving the right hand of fellowship. In their discipline they are strict and severe, and think themselves obliged to separate from the communion and worship of all such religious societies as appear to them not to profess the simple truth for their only ground of hope, and who do not walk in obedience to it. We shall only add that in every transaction they esteem unanimity to be absolutely necessary. This sect in England has considerably diminished, so that in 1854 only six congregations were reported as belonging to the body, each having a very small attendance. They probably number less than 2000 throughout the world. See Glas, Testimony of the King of Martyrs; Sandeman, Letters on the Apostasy (Letter 11); Backus, Discourse on Faith and its Influence, p. 7; Adams, View of Religions; Bellamy, Nature and Glory of the Gospel (Lond. ed. notes), i, 65–125; Fuller, Letters on Sandemannianism; Hagenbach, Hist. of Doctrines, ii, 430, 431.

Sander, Antony, a Flemish ecclesiastic, was born at Antwerp in 1585, and died in 1664. He was the author of several theologic and historical works in Latin:

Sander, Immanuel Friedrich Emil, Ph.D., a German divine, was born in 1797 at Schaffhut. For a time he preached in the University Church at Leipzig; then at Wichlinghausen, in Westphalia; and finally he was pastor at Elberfeld, where he died in 1861. Besides a great many sermons, he published, Der Kampf der evangelischen Kirche gegen die Revolutionsbearbeitung der Wittenberger Theologie, (1830) — Theologisches Gutachten über die Preußische Gesetz in 1836; — Der Romanismus, seine Tendenzen u. seine Methodik (Essen, 1843); — Das Papstthum in seiner heutigen Gestalt, etc. (Elberfeld, 1846); — Die Abendmahlsliturgie zwischen Lutherischen u. Reformierten (1859). See Zuchovits, Bibliotheca Thes. ii, 1113 sq.; Winer, Handbuch der Kirchenliteratur, p. 747; Fürst, Bibl. Judaica, iii, 243. (B. P.)

Sandercock, Edward, an English dissenting minister, was born in 1703. He was pastor of an independent congregation in Spittal Square, London, in 1727, at Bartholomew Close in 1730, and at Rotherhithe in 1738. He retired to York about 1765, where he died in 1770. He published, Sermons (Lond. 1780).

Sanderson, Billington McCarter, a Baptist minister, was born in Columbia County, Ga., Dec. 2, 1789; graduated at the South Carolina College Dec. 4, 1809; and about 1811 or 1812 was rector of the Columbia County Academy. He was for one year a member of the State Legislature, and afterwards for several years a deacon of the State College. Finally he turned his attention to the ministry, and was ordained Jan. 5, 1825. After preaching for a time at Williams Creek and at Pine Grove, he became in 1826 pastor of the Union Church in Warren County. In Dec. 1832, he commenced, by the desire of the Georgia Baptist Convention, to the foundation of the Mercer Institute, afterwards the Mercer University of which he was appointed the first president. He resigned this office in 1839, after having conducted the institution successfully through the six years of its academic minority and the first year of its collegiate career. He occupied highly honorable positions in divers societies. He was for several years clerk of the Georgia Senate, and for nine years its moderator. For six years he was president of the Georgia Baptist Convention, and for a much longer time a member of its executive board. He
was often a delegate to the General Triennial Convention, and, after the separation, was several times a delegate to the Baptist Convention, and also editor for a year the Christian Instructor, and was an ardent supporter of temperance, foreign and domestic missions, Bible societies, and all kinds of forms of Christian beneficence. He died March 12, 1854. See Sprague, Annals of the Amer. Pulpit, vi, 740.

Sanders, Daniel Clarke, D.D., a Unitarian Congregational minister, was born in Sturbridge, Mass., May 3, 1768. He was prepared for college by Rev. Samuel West, admitted at Harvard in 1784, and graduated in 1788. After his graduation he engaged in teaching. He was licensed to preach by the Denham Association, and was ordained and installed pastor of the Congregational Church in Vergennes, Vt., June 12, 1794. He continued in this charge about six years, when he became president of the University of Vermont, which position he held fourteen years. He was installed as pastor at Medfield, Mass, May 24, 1815. He was a member of the convention that revised the constitution of Massachusetts in 1820—21. He retired from his pastoral charge in 1829. He died at Medfield, Oct. 18, 1850. His published works consist of his History of the Indian Wars, etc. (Montpelier, Vt., 1812, 8vo), besides more than thirty Sermons. See Sprague, Annals of the Amer. Pulpit, vii, 226 sq.

Sanders, Edward, a minister of the Methodist Episcopal Church, was a native of Maryland, and grew up to manhood without religious influences. In early manhood, however, he was brought to see his condition, and found peace in believing. He entered the itinerant ministry as a member of the Philadelphia Conference in 1834, and continued in that Conference until the New Jersey Conference was set off. The remainder of his effective ministry was passed in the latter Conference. While in charge of the River Church, his health failed, and, after temporary relief, he settled in Muscatine, Iowa, and then in Penninton, N. J., where he died, Dec. 31, 1859. His life was a rebuke to infidelity and a comfort to Christians. Minutes of Annual Conf. 1860, p. 39.

Sanders, Nicholas, a prominent Roman Catholic writer of the 16th century. He was born at Charlewood, in Surrey, about 1527, and educated at Winchester school, whence he removed to New College, Oxford. Here he was elected a fellow of his college in 1550, and in 1551 or 1552 took the degree of bachelor of laws. He defined the office of Latin secretary to queen Mary for the sake of study. In 1557 he was one of the professors of canon law, and delivered the Straggling Lectures (lectures not endorsed) until the accession of queen Eliza- beth, when most of his pupils induced him to leave England. He arrived at Rome in 1560, studied theology, became doctor of divinity, and was ordained priest by Dr. Thomas Goldwell, bishop of St. Asaph. Soon after cardinal Ho- sius made him a member of his family, using him as as- sistant in the Council of Trent. Returning to Flanders, he was settled at Louvain for twelve years, and in 1579 he arrived in Ireland as papal nuncio. He died in 1580 or 1581. Among his works are, Supper of Our Lord (Louvain, 1566—67, 4to);—Treatise on the Images of Christ, etc. (ibid, 1567, 8vo);—The Rock of the Church (ibid. 1566—67, 8vo);—Treatise on Usury (1566)—and others.

Sanderson, Robert, D.D., an English presbyter, was born at Rotherham, Yorkshire, Sept. 19, 1587. Studied at Lincoln College, Oxford, became a fellow in 1606, and reader in logic in 1608; ordained deacon and priest in 1611. He was subrector in Lincoln College in 1613, 1614, and 1616; proctor of Oxford in 1616; bachelor of divinity in 1617; rector of Wilberton, Lincolnshire, in 1618, and of Boothby Pannell for more than forty years from 1619; prebendary of Lincoln in 1629; chaplain to Charles I in 1631; rector of Muston, Leicestershire, eight years from 1633; doctor of divinity in 1636. In 1642 he was prebendary of Southwell and of Oxford, and regius professor of divinity, with the canonry of Christ Church. He was unable to enter the pro- fessorship until 1646; was ejected from the last two ap- pointments in 1648, but restored in 1650—54—by the con- ciliated bishop of Lincoln the same year. He died Jan. 29, 1662. The following are his principal works: Logico- Artis Compendium (1615, 8vo; new ed. Lond. 1841, 12mo)—Judicium Universitatis Oxoniensis (ibid. 1648):—Obligationes Conciliacionis (1647, 1660, 8vo; it has been through several latter editions—the last at Cambridge [1856, 8vo]). Besides other dissertations, he printed numbers of his Sermons, which were collected and published, together with his Life by Isaac Walton (Lond. 1698, 4to). See Cattermole, Lit. of the Ch. of England, ii, 10—34.

Sandes, in Persian mythology, was a fabled Persian hero, supposed to be identical with Jamshid, and by his deeds a counterpart of Hercules.

Sandford, Daniel, D.D., a Scotch prelate, was born at Delville, near Dublin, in 1766, and was educated at Christ Church, Oxford, where he won the prize for Latin composition in 1787. At Edinburg, in 1792, he became minister of an Episcopal congregation for whom Charlotte Chapel was built in 1797. He joined the Episcopal Church of Scotland in 1803, and was or- dained to the presbytery in 1804. He was consecrated Bishop of the newly erected Chapel of St. John in 1818. Bishop Sandford died in 1880. He published, Lectures on Passion Week (Edinb. 1797, 8vo; 1821, 12mo; 1826, 12mo)—Sermons preached in St. John's Chapel (ibid. 1819, 4vo)—Remains and Sermons, etc. (ibid. 1830, 2 vols. 8vo).

Sandford, David, an American Congregational minister, was born in New Milford, Conn., Dec. 11, 1777, and graduated at Yale College in 1755. Influenced by the wish of his father, he began the study of theology, but realizing that he had not the spiritual qualifications for the ministry, he relinquished his purpose in that direction. He settled upon a farm, where he remained a number of years, when, experiencing a change of life, he resumed the study of theology, and was ordained pastor of the church at Medway, Mass., April 14, 1773. Mr. Sandford served a short time as chaplain in the army. In 1807 he suffered severely from a stroke of paralysis, and never resumed his public labors. He died April 7, 1810. His only printed production is The Discourse delivered at the Dedication of the New Court House of the town of Medway, Jan. 13, 1809, with an Admonition to the Law given to Adam, etc., the other on The Scene of Christ in the Garden, etc. See Sprague, Annals of the Amer. Pulpit, ii, 48.

Sandford, Peter P., D.D., a Methodist Episcopal minister, was born in respectable parents in Lodi, N. J., Feb. 28, 1781. At eighteen years of age he was converted, and still earlier had begun to hold religious services among his neighbors. In 1807 he entered the Philadelphia Conference, and in 1810 he was transferred to the New York Conference, in which he held some of the most important appointments till his death, Jan. 14, 1857. He "was a thorough divine, an able preacher, a judicious administrator of discipline, and an eminently honest Christian." See Minutes of Annual Conference, as restated in 1829.

Sandasev, in Hindo mythology, was a daughter of Brahma, to whom he gave birth from his own person, after having assumed a human form of extraordinary attractiveness, in order that he might people the world with gods.

Sandini, Anthony, an Italian ecclesiastical histori- an, was born June 31, 1692, and became, by the inter- est of his bishop, cardinal Rezzonico (who was afterwards pope Clement XIII), librarian and professor of ecclesiastical history at Padua, where he died, Feb. 23, 1751. He is known principally by his Vita Pontificum Romanorum (Ferrara, 1748; reprinted under the title of Vita Historiae Ecclesiasticae). He also wrote Historia
SANDOMIR AGREEMENT

Sandomir (also Sandomir) Agreement (Concordia Sandomiriana), an accommodation reached by the Protestant churches of Poland in 1570, at a synod held at Sandomir, now the capital of the government of Radom, by which existing differences were composed and a fraternal union was established.

The Protestantism of Poland was of three types: 1, the Lutheran, introduced from Germany, and taking root chiefly in what is now Prussia; 2, the Swiss, or Reformed, dating its introduction nearly to the same period as the Lutheran, and prevailing chiefly in Cracow and the surrounding country; and 3, the Bohemian, brought in by refugees from the persecutions which raged in their native land. The language and customs of these refugees resembled those of the country in which they sought a home, and their Church possessed further advantages in its compact organization, thorough government, and rich hymnology, by which it was enabled to make rapid advances. These successes gave rise to the first disagreements with which the Church was confronted. Evidence of that cleavage was established by evidence of a wide division between the Lutherans and the Bohemian churches, the former charging the Bohemian Brethren with erroneous teaching, particularly in respect to the doctrines of justification and the Lord's supper, and with intentional neglect of scientific culture; and the latter retorting with reflections upon the absence of Church discipline and of moral restraints among their opponents. The progress of the Reformation in Strasburg in the meantime furnished the Brethren with an opportunity to enter into relations with other Protestant churches; and a delegation from Bohemia, appointed in 1540 for that purpose, having been favored with a friendly reception, and other Reformers, served to establish an intimacy of friendship between the respective leaders which was carefully cherished by the Bohemian Church.

The necessity of conciliating the opposing parties was apparent. The machinations of Romanism threatened them with a common danger; and it became important, after 1551, to check the progress of the antitrinitarian movement headed by Lælius Socinus; and the efficient organization of the Bohemian congregations, together with the fact that many of the foremost personages in the state were at least their friends and patrons, indicated that the Lutheran Church could contend for the stability and required for the defence of the Reformation. The earliest attempt of which we have authentic information was made by Felix Cruciger, a supporter of the Swiss Confession and evangelical superintendent in Little Poland, through the medium of discussions on the state of the Church with representatives of Bohemian. A compromise was ultimately effected at the general Synod of Kozmínek in 1555, by which the Bohemian Confession was adopted, the liturgy of the Bohemians to be introduced, and their consent to be obtained to any undertaking. This agreement secured the appointment of many theologians of the implanted confessions in other lands, and of such men as Paul Vergerius and Brenz among the Lutherans. But the provisions of Kozmínek were not executed with energy. John à Lasko, the eminent Reformer, whose high birth and former services gave him an assured influence, returned from exile (December, 1556) and discouraged further movement. A synod at Cracow (March, 1557) was in close of the year, 1557, opinions adverse to the proposed union were received from Calvin, Bullinger, Viret, and others of the Swiss Reformers, the compromise fell to the ground, having effected nothing that was expected from it, and leaving behind it the additional complication of excited feelings between the Reformed and the Bohemian parties.

To remedy this failure, Lasko now proposed that a colloquy be held in Moravia for the purpose of discussing the objections raised against the Bohemian Confession, and the Brethren readily agreed. Leipnik was chosen as the place of meeting. Fifteen points were presented for discussion, bearing chiefly against the view of the Lord's supper taught by the Bohemian Church, and against the constitution of the Church itself, the latter presenting the more difficult problem to be solved. The constitution of the Bohemian Brotherhood had adopted the Romish principle of a clerocracy. The government of the churches was placed wholly in the hands of a regularly ordained and graded officiary; and if the Brethren were requested to provide for their clergy to support in part, or in the secular occupations, this was counterbalanced by the imposition of celibacy on the priesthood, thus securing to persons of that class not only a distinctive character, but also an appearance of superior sanctity. To change the constitution of the Church in this respect was impossible without giving up the principle of an organization to which the Brotherhood owed its preservation in the most trying times of persecution. The requirement of celibacy from their priests was explained away as a prudential measure dictated by the greater liability of the clergy to infection. Hence, the laity from the government of the Church admitted of no explanation satisfactory to a people whose nobles had been leaders in the Reformation and guides in the subsequent progress of the Church. The Conference of Leipnik closed without having effected any material result; and when a renewed effort to secure the approval of the Bohemian Confession by the Swiss theologians, Calvin and Musculus in particular, had failed, it was evident that all but hope was lost. The Synod of Xions (September, 1560), at which the Evangelical Church of Poland was constituted, did something, however, to keep that hope alive by admitting delegates from the Reformed in Poland, and, by adopting ecclesiastical terms peculiar to that Church, such as senior and consensor, into the new constitution.

In Great Poland, where Lutheranism predominated, the Melanchthonian party, headed by the brothers Erasmus and Nicholas Gliczer, put forth earnest efforts in behalf of Protestant fraternity. A synod at Posen (1560), composed of representatives from the Evangelical and Bohemian churches, as well as of Lutherans, developed a plan of union which subsequently became the basis of the Sandomir Agreement. In the following year a discussion of doctrinal differences took place at Bezzenin, in which the Lutherans were assisted by the presence of J. H. Hus, and other Reformers, served to establish an intimacy of friendship between the respective leaders which was carefully cherished by the Bohemian Church.

The pact of union which subsequently became the basis of the Sandomir Agreement. In the following year a discussion of doctrinal differences took place at Bezzenin, in which the Lutherans were assisted by the presence of J. H. Hus, and other Reformers, served to establish an intimacy of friendship between the respective leaders which was carefully cherished by the Bohemian Church.
SANDOVAL

their part—been referred to the University of Wittenberg, a reply adverse to their purposes was received (Feb. 1568), which rendered futile further opposition. The nobles of the land, alarmed by the successes of Romanism, now urged the cessation of strife between the factions of Protestantism. Edicts from the throne, then occupying the ducal palace of Sigismund Augustus, had pointed out the real unity of belief held by the conflicting parties by exempting them from a proscription decreed against sectaries; and when the diet of Lublin (1569), at which the union of Poland and Lithuania came to pass, convened, the evangelical nobles present declared that the union should be the first step to prepare the way for establishing a national Evangelical Church. After a number of preliminary conferences had been held, the synod assembled at Sandomir, April 9, 1570, and continued its session until April 15. Various attempts to establish the confessions of one party as the common faith were made and set aside, until a compromise was effected by which each party was pledged to maintain fraternal relations with the others, while guarding its own confession and independent Church life.

The Sandomir Agreement was not a measure designed to secure identity of doctrinal teaching, but a provision to effect a practical comity of intercourse between separate bodies. It recognises the independence of the several churches, but removes the principal source of the doctrine of the Lord's supper—from the central position given to it by Lutheran polemics by emphasizing the agreement of the different confessions with respect to the leading doctrines of the faith. It provides that the ministry of either Church might conduct the worship and administer the sacraments in congregations of the other churches, though under restrictions intended to guard the usages and discipline of such congregations. It binds the contracting parties to avoid controversy and strife, and to make common cause against Romanism, sectarianism, and all other forces hostile to the Gospel; and it provides, in conclusion, that all important matters affecting the churches in Poland, Lithuania, and Samogitia should be regulated in common, and that deputies from all the churches should attend the general synod held by any one of them. A synod subsequently held (May 29, 1570), at Poznań, and extended, took measures to secure the practical operation of the Consensus Sandomirienensis; and the course of events from that time has proved that agreement as constituting the most important fact in the history of the evangelical churches in Poland. Some opposition to the compromise was manifested, unless uneasiness had been betrayed from the first time; but the action of the general synod at Thorn, in 1595, in re-enacting the Sandomir resolutions, brought the dispute to a final settlement.

SANDOWAL, FRAY PRUDENCIO DE, a Spanish prelate and historian, was born at Valladolid about 1560. He was a Benedictine monk, and was appointed historiographer to Philip III, who employed him to continue the general history of Ambrosio Morales, which appeared under the title of Historia de los Reyes de Castilla y de Leon. Among his other works are a Historia de la Vida y Hechos del Emperador Carlos V, which is esteemed a standard work and has been translated into English, and a Cronica del Emperador de España, Don Alonso VII. Sandoval was made bishop of Tuy in 1608, and of Pamplona in 1612. He died at Pamplona, March 17, 1627, a very learned man. His works include: a Life of St. Augustus; and an Oration on the Resurrection, 1608. In 1612, he published a History of the Conquest of Portugal. He died in Brussels, Nov. 26, 1626. See Minutes of Annual Conferences, 1609, p. 93.

SANDUSKY, JOHN, a minister of the Methodist Episcopal Church, South, was born in Jefferson (now Marion) County, Ky., Jan. 11, 1798. His connection with the ministry extended over a period of nearly, if not quite, fifty years, and embraced a time of arduous labor and little compensation. His death took place Oct. 12, 1862, at his house of his daughter, Mrs. B. M. Logan, at which time Mr. Sandusky was a member of the Kentucky Conference. He was a man of marked character—brave, unselfish, just, and generous. He was master of the system of theology of the Church to which he belonged, clear and forcible in preaching; and greatly gifted in the exercise of his office. See Minutes of Annual Conferences, M. E. Ch., South, 1875, p. 229.

Sandwich Islands, or Hawaiian Islands, the most northerly cluster of the Polynesian Archipelago, containing twelve islands. The chain extends about 860 miles from south-east to north-west, and lies in the Pacific Ocean between lat. 18° 55' and 22° 20' N., and long. 154° 55' and 160° 13' W. The largest island is Hawaii, containing 4040 square miles, but Cavite is central and having a good harbor, is the seat of government and the commercial centre. The population of the islands was estimated by Cook at 400,000—doubtless an exaggeration. In 1862 the official census gave 130,313, in 1860, 84,165; in 1860, 68,800; and in 1872, 66,890. This decrease is due to many causes, of which the most influential measures the contact with the whites. "Before missionary operations commenced, the people were, if not in the lowest state of barbarism in which men are ever found, yet certainly in a very low state of intellectual, social, and moral degradation. With no written language; with no common form of government; with no family constituted under a system, unmitigated liceousness universal, and every wild passion indulged without restraint; the people were 'a nation of drunkards,' with no laws or courts of justice. The people of all ranks were much under the influence of superstitious fears, and their religion, in connection with the cruel rites of idol-worship, was in a great measure a tabu system—i.e. a system of religious prohibitions and consecrations, which had extended itself very widely, and had become exceedingly burdensome under the direction of kings and priests who use the system to accomplish their own purposes" (Newcomb). Vancouver, who arrived with Cook in 1778, and returned in 1792, and again in 1794, made sincere attempts to enlighten the natives. His instructions were not forgotten, and, by a spontaneous movement, the whole nation rose up to destroy their idols and temples (1819-1820). The first missionaries to these islands were from America—Hiram Bingham and others, of the First Church of Andover, Massachusetts. They arrived at Kailua, April 4, 1820, only a short time after the decisive battle had been fought which had subdued the party supporting idolatry. In 1822 the language was reduced to writing, since which time more than 200 works, mostly educational and religious, have been published in Hawaiian. The total number of Protestant missionaries sent to the islands, clerical
league of Rev. John Shaw, South Bridgwater, where he spent the rest of his days. He received the degree of D.D. from Brown University in 1867. He died, after a short illness, Nov. 17, 1880. His published works are five Ordination Sermons (1792-1812). See Sprague, Annals of the Amer. Pulpit, viii, 99.

Sangha, an assembly or chapter of Buddhist priests, was born in Tuscany, and flourished during the earlier part of the 16th century. He was one of the pupils of Raphel, who esteemed him very highly for the softness of his coloring and the beautiful paintings in wax with which he ornamented the façades of several palaces. The work of Rome is the only work of Signor Vanessa known, and the work done for San-Gimignano, having lost almost all his works and designs. He lived only a short time after this misfortune. His works are very rare, one being in the Museum at Dresden—a Madonna with the Infant Jesus and St. John.

San-Giorgio, GIANANTONIO DI, an Italian painter, was born at Milan in 1499. Having completed his studies at the University of Pavia, he opened a school of canonical law in that city, but at the end of six years returned to Milan. He became a member of the College of Jurists, afterwards provost of the basilica of St. Ambrose, and in 1479 was made bishop of Alexandria. In 1438 Alexander VI bestowed upon him the cardinal's hat, and transferred him in turn to Parma, Frascati, Albano, and Sabina. This prelate was employed by the popes in various negotiations, and was a man of prudence and great learning. He died at Rome, March 14, 1509. He published several works, as Commentaria super quarto Decretalium:—De Appellationibus:—De Ubius Feudorum:—Lectura super Decretalibus.

Sangra, in Hindu mythology, was a daughter of Wissakarma and wife of the Sun-god, who caused his long and shining hair to be clipped from his head by a cat who could not endure their brilliant light, might remain with him.

Sangrid, in Norse mythology, was one of the Walkures, or messengers of Odin, who elect the warriors to be slain in battle.

Sanhedrim (Hebraised [see Buxtorf, Lex. Chal. Text., s. v.]) Sanhedrin, סנהדרין, from the Greek Synedrion, συνέδριον, as in the New Test. [Matt. v. 22; xxvi, 59; Mark xiv, 55; xx, 1; Luke xii, 66; John xi, 47; Acts iv, 15; v, 21, 27, 34; vi, 12, 15; xxii, 30; xxiii, 1, 15, 20, 28; xxiv, 20], and Josephus [Lifre, xii; Ant. xiv, 9, 3], apocope of ἱσνᾶδριον, plural ἱσνᾶδρια, the supreme council of the Jewish nation in and before the time of Christ. In the Mishna it is also styled בָּתַר דִּין, Beth-Din, "house of judgment," and in the Apcrypha and New Test. the appellations yowrosia, senate, and πρῶτος πάσης, probyter, seem also to be applied to it (comp. 2 Macc. ii, 10; Acts v, 21; xxii, 11; 1 Macc. vii, 33; xvi, 55, etc.). As there were two kinds of Synedrion, viz. the supreme or metropolitan Sanhedrin, called מַעַשְׂרֵי לְיִשְׂרָאֵל, the Great Sanhedrin (Mishna, Sanhedrin, i, 5), and provincial councils called מַעַשְׂרֵי מַעַשְׂרֵי, the Small Sanhedrin (ibid.), differing in constitution and jurisdiction from each other—we shall describe their respective organizations and functions separately, and close with an account of their history, largely as contained in the treatise of the Talmod which is devoted to this subject.

1. The Great Sanhedrin, or Supreme Council.—1. Number of Members and their Classification.—The Great Sanhedrin, or the supreme court of Justice (יִשְׂרָאֵל as it is called (Mishna, Horojoth, i, 5; Sanhedrin, xi, 4), or כַּנְעָן, the court of Justice, the judgment-hall, because it was the highest ecclesiastical and civil tribunal, consisted of seventy-one members (Mishna, Sanhedrin, ii, 4; Shabuoth, ii, 2). This is the nearly unanimous opinion of the Jews as given in the Mishna (Sanhedrin, i, 6): "The Great Sanhedrin consisted of seventy-one judges. How is this proved? From Siml. xi, 16, where it is said, 'Gather unto me seventy men of the elders of Israel.' To these add Moses, and we have seventy-one. Nevertheless, R. Judah says there were seventy." The same difference made by the addition or exclusion of Moses appears in the works of Christian writers, which accounts for the variations in the books between seventy and seventy-one. Baroniuss, however (Ad Amm. 31, § 10), and many other Roman Catholic writers, together with not a few Protestant, as Drusius, Grotius, Pridexnen, John, Breitneder, etc., hold that the true number was seventy-two, on the ground that Ebad and Medad, on whom, it is expressly said the Spirit rested (Num. xi, 26), remained in the camp, and should be added to the seventy (see Hartmann, Verbindung des A. T. p. 182; Selden, De Synedr. lib. ii, cap. iv.).

These members represented three classes of the nation, viz. (a) The priests, who were represented by their chiefs, called in the Bible the chief priests (רַבֵּי הַנָּדָרִים), of whom there were most probably four-and-twenty (1 Chron. xxiv, 4, 6; with Matt. xxvii, i; John vii, 32; xi, 47; xii, 10). (b) The elders, רַבֵּי חוֹכָם = ῥαββίσθηροι (Matt. xvi, 21; xxviii, 3; xxv, 47, 57, 59; xxvii, i, 3, 12, 20, 41; xxviii, 12; Mark vi, 31; xii, 27; xiv, 45, 50; Luke ix, 22; x, 40; John vii, 3; xxii, 1, 23, 12; xxiii, 14; xxiv, 5, 15); also called the elders of the people (ἄρχοντες τοῦ λαοῦ, Acts iv, 8, with ver. 5), because they were the heads of the families and tribes of the people, for which reason ῥαββίσθηροι and ἀρχονται are also synecdochically used for Soudh and σύνεδρον (Luke xxvi, 18, 20; Acts iii, 17, etc.). These elders, who most probably were also twenty-four in number (Rev. iv, 4), were the representatives of the laity, or the people generally. (c) The scribes (q. v.) or lawyers (ῥαββί, ῥάββι) who, as the interpreters of the law in ecclesiastical and civil matters, represented that particular portion of the community which consisted of the literary laity, and most probably were twenty-two in number. As the chief priests, elders, and scribes constituted the supreme court, these three classes are also frequently used as a periphrasis for the word Sanhedrin (Matt. xxvi, 5, 57, 59; xxvii, 41; Mark viii, 31; xii, 27; xiv, 43, 53; xx, 1; Luke ix, 22; xx, 1, xxii, 66; Acts v, 21, vi, 12; xii, 30; xx, 15); while John, who does not at all mention the Soudhueses, uses the term Pharisees to denote the Sanhedrin (i, 24, iv, 1; viii, 3; xi, 46, etc.).

2. Qualifications and Recognition of Members.—The qualifications for membership were both very minute and very numerous. The applicant had to be morally and physically blameless. He had to be middle-aged, tall, good-looking, wealthy, learned (both in the divine law and in the sciences of the profane world, in science, mathematics, astronomy, magic, idolatry, etc.), in order that he might be able to judge in these matters. He was required to know several languages, so that the Sanhedrin might not be dependent upon an interpreter in case any foreigner or foreign question came before them (Menachoth, 65 a; Sanhedrin, 17 a; Minorantes, 16 a; Hecatos, 14 b). Very old persons, proselytes, eunuchs, and Nethinim were ineligible because of their idiosyncrasies; nor could such candidates be elected as had no children, because they could not sympathize with domestic affairs (Mishna, Horojoth, i, 4; Sanhedrin, 36 b); nor those who could not pronounce the legal formula of offering a priest, Levite, or Israelite, who played dice, lent money on usury, flew pigeons to entice others, or dealt in produce of the Sabbatical year (Mishna, Sanhedrin, iii, 9).
SANHEDRIM

In addition to all these qualifications, a candidate for the Great Sanhedrin was required, first of all, to have been a justice in his native town; to have been transferred from there to the Small Sanhedrin, which sat at the Temple mount or at its entrance (ירשנא וירשץ), hence again to have been advanced to the second Small Sanhedrin, which sat at the entrance of the Temple hall (ירשץ וירשץ), before he could be received as member of the seventy-one (Sanhedrin, 32 a, 88 b; Maimonides, Iad Ha-Chezaka, Hilkhot Sanhedrin, ii, 8).

The ordination took place when the candidate was first appointed judge in his native place. In olden times, every ordained judge continued in his disciples; afterwards, however, the sages conferred this honor upon Hillet I, B.C. 30; it then decreed that no one should be ordained without the permission of the president of the Sanhedrin (יושב ראש; that the president and the vice-president should not ordain in the absence of each other, but that both should be present; and that any other member may ordain with the permission of the president and the assistance of another non-ordained of at least three persons (Mishna, Sanhedrin, i, 8). The ordination was effected, not by the laying-on of hands on the head of the elder, but by their calling him rabbi, and saying to him, "Behold, thou art ordained, and hast authority to judge even cases which involve pecuniary fines" (Maimonides, ibid, i, 4-5).

The Sanhedrin was presided over by a president called Nasi (נשיא), præfectus, patriarch, and a vice-president styled נשב ראש, the father of the house of judgment. The power of electing these high officials was vested in the corporate assembly of members, who conferred these honors upon those of their number who were most distinguished for wisdom and piety. The king was the only one disqualified for the presidential throne, because according to the Jewish law it is forbidden to differ from him or to contradict his statement; but the high-priest might be elected patriarch provided he had the necessary qualifications (Sanhedrin, 18 b; Maimonides, Iad Ha-Chezaka, Hilkhot Sanhedrin, ii, 3). After the death of Hillel I, however, the presidency became hereditary in his family for thirteen generations. See Hillel I. The functions of the Nasi or the patriarch were more especially external. Being second in the order, the Nasi represented the civil and religious interests of the Jewish nation before the Roman government abroad, and before the different Jewish congregations at home; while in the Sanhedrin itself he was simply the reciting and first teacher. The vice-president, on the other hand, had his sphere of labor more especially within the Sanhedrin. It was his office to lead and control their discussions on disputed points; hence his appellation, "father of the house of judgment." Next to the vice-president, or the third in rank in the Sanhedrin, was the סנהדרין, sages, referre, whose office it was to hear and examine the pending subject in all its bearings, and then to bring it before the court for discussion. This dignitary we first meet with under the presidency of Gamaliel II, the teacher of the apostle Paul [see GÄMALIEL], and his son Simon II (Horovath, 13; Tosaphos Sanhedrin, cap. vii; Frankel, Monatsschrift, i, 348). Besides these high functionaries, there were sundry servants not members of the seventy-one, such as two judges' scribes (יושב וירשץ), or notaries, one of whom registered the reasons for acquittal, and the other the reasons for condemnation (Mishna, Sanhedrin, iv, 9); and other menial officials, denominated יושב וירשץ, יושב וירשץ, and יושב וירשץ, participate (Matt. v, 25; xxvi, 58; Mark xiv, 54, 65; Luke xii, 58; John vii, 42, 45; xviii, 3, 15, 18, 22; xix, 6; Acts v, 22, 26; xiii, 2, etc.).

3. Place, Time, and Order in which the Sessions were held. There seems not to have been any prescribed place for holding the sessions in the early part of the Sanhedrin's existence. In all probability they were held in some place adjoining the Temple, as the neighborhood of the sanctuary was deemed specially appropriate for the assembly of men assembled to decide upon the most momentous questions affecting life and death, time and eternity. It was Simon ben-Shetach (B.C. 110-65) who built the Hall of Squares (היכל מרובען), or, more briefly, the Gatzith (גצב), where both the Sanhedrin and the priests permanently held their meetings. This basilica, the floor of which was made of hewn stone squares—whence its name (웠א, 25 b)—was situated in the corner of the Temple mount surrounding the southern part extending to the court of the priests (היכל-) and the southern part to the court of the Israelites (היכל-); and it was thus lying between these two courts, and had doors into both of them (Mishna, Sanhedrin, xi, 2; Pou, iii, 6; Middoth, v, 3, 4; Herzfeld, Geschichte des Volkes Israel, i, 394 sq.; Jost, Geschichte des Judenstaates, i, 145, 275). See Temple. This hall henceforth became the prescribed court for the Sanhedrin assemblies, and when the Hall of Squares was burnt down by the Median king, it was the Sanhedrin in the high-priest's house was equal. Equally illegal was the assumption of the presidency by this sacerdotal functionary over this supreme court recorded in the New Test. (Matt. xxvi, 3: Acts v, 21, 27; xxvii, 3, 2), as Gamaliel I was then the legitimate president (Pesochim, Bed, b, 1). While this Gamaliel was at that time temporal and that the high-priest was the creature of the Romans, this priestly arrogation will not be matter of surprise. "Forty years before the destruction of the Temple [i.e. while the Saviour was teaching in Palestine], the sessions of the Sanhedrin were removed from the Hall of Squares to the House of Purchases" (Sanhedrin, 15 b; Aboda Zara, 8 b), on the east side of the Temple mount.

The Sanhedrin sat every day from the termination of the morning sacrifice till the daily evening sacrifice, with the exception of the Sabbath and festivals, when they retired to the synagogue on the Temple mount and delivered lectures from the Hall of Squares (Sanhedrin, 88 b; Maimonides, Iad Ha-Chezaka, Hilkhot Sanhedrin, iii, 1). The order in which they sat was as follows: the president (יושב ראש) sat in an elevated seat; on his right hand sat the vice-president (יושב וירשץ), and at his left the chakam (כען), or referre; while the members, seated on low cushions, with their knees bent and crossed in the Oriental fashion, were arranged, according to their age and learning, in a semicircle, so that they could see each other, and all of them be seen by the president and vice-president. The two notaries stood before them, one to the right and the other to the left. Before them sat three rows of disciples (נשב וירשץ), in places appropriate to their respective attainments. From the first of these rows the ranks of the judges were always filled up. When those of the second row took their seat in the first, those of the third took the seats of the second, while members of the congregation generally were selected to fill the lowest places vacated in the third row (Mishna, Sanhedrin, iii, 3, 4; Maimonides, ibid, i, 3). Under ordinary circumstances all the seventy-one members were not required to be present in their seats, so that most of them could attend to their business, since twenty-three members formed a quorum. Less than that number during any session was illegal; hence before one could go out he was obliged to look round in order to ascertain that there was the legal quorum without him (Sanhedrin, 88 b; Tosaphos Shekalim, at the end: Maimonides, Hilkhot Sanhedrin, iii, 2).

4. Jurisdiction of the Sanhedrin. In using both legislative and administrative powers, the functions of the Sanhedrin in the theocracy extended to the institution of-
dinances and the definition of disputed points in ecclesiastical matters, as well as to the adjudication of ecclesiastical and secular questions, including even political matters. The tribunal had, in the first place, to interpret the divine law, and to determine the extension or limitation of its sundry enactments, inasmuch as the members of the Sanhedrim were not only the most skilled in the written word of God, but were the bearers of the oral law which was transmitted to them by their predecessors, and which they again in succession handed down to the other members of this body. Thus the Sanhedrim had (a) to watch over the purity and legality of the priests who ministered in holy things. For this purpose they appointed trustworthy persons to keep family registers (גנאותוקגנאות, genealogies) of the priests in Egypt, Babylon, and in all places where the Jews resided, stating the names, and giving all the particulars both of the head of the family and all his male descendants, and to supply every priest with such a document attested by the Sanhedrin, inasmuch as those priests who could not prove that they were not the issue of proscribed marriages were disqualified for ministering in holy things, and were ordered to divest themselves of their sacerdotal robes and put on mourning (Mishna, Sanhedrin, i, 5; Middoth, v, 4; Bechoroth, 45 a; Josephus Chagiga, cap. ii; Josephus, Cont. Apion, i, 7). (b) To try cases of unchastity on the part of priests' daughters, and married women who were accused by their husbands of infidelity, which were questions of life and death (Mishna, Sota, i, 4; Sanhedrin, 52 a). (c) To watch over the religious life of the nation, and to try any tribe which was accused of having departed from the living God to serve idols (ibid, i, 5). (d) To bring to trial false prophets or any heretic who promulgated doctrines contrary to the tenets of the scribes or the Sanhedrim (מְלֹאךְ). Such a one is not to be executed by the tribunal of his native place, nor by the tribunal at Jaffo, but by the supreme court of Jerusalem; he is to be kept till the forthcoming festival, and to be executed on the festival, as it is written (Deut. xvii, 13), "and all the people shall hear and fear, and do no more presumptuously" (Mishna, Sanhedrin, xi, 3, 4; comp. also Matt. xxvi, 65; xxvii, 63; John xix, 7; Acts iv, 2, v, 26, vi, 10). In accordance with this is the remark of our Saviour, "It cannot be that a prophet perish out of Jerusalem" (Luke xxi, 33, with Josephus, Ant. xiv, 9, 3). (e) To see that neither the king nor the high-priest should act contrary to the law of God. Thus the Talmud tells us that Alexander Janneus was summoned before the Sanhedrim to witness the trial of his servant, who had committed murder (B.C. 80), under the presidency of Simon ben-Shetach (Sanhedrin, 19 a), and we know that Herod had to appear before this tribunal to answer for his conduct (Josephus, Ant. xiv, 9, 4). (f) To determine whether a war with any nation contemplated by the king is to be waged, and to give the sovereign permission to do so (Sanhedrin, i, 8; ii, 4). (g) To decide whether the boundaries of the holy city or the precincts of the Temple are to be enlarged, inasmuch as it was only by the decision of the Sanhedrin that these additions could be included in the consecrated ground (ibid, i, 5; Shebuth, 14 a). (h) To appoint the provincial Sanhedrin, or courts of justice (Sanhedrin, i, 5; Gemara, ibid. 68 b; Tosephtha Sanhedrin, cap. viii; ibid. Chagiga, cap. ii; Jerusalem Sanhedrin, i, 19 b). (i) To regulate the calendar and harmonize the solar with the lunar year by appointing intercalary days (Sanhedrin, 10 b). This jurisdiction of the Sanhedrin was recognized by all the Jews both in Palestine and in foreign lands (Acts ix, 29; xxvi, 10; with Mishna, Manoth, vi, 10; Tosephtha Sanhedrin, cap. vii; Chagiga, cap. ii). Thereby this supreme court secured unity of faith and uniformity of practice.

5. Mode of Conducting Trials, Punishments, etc.—The humane and benevolent feelings of the rulers towards the people whom they represented were especially seen in their administration of the law. They always acted upon the principle that the accused was innocent till he could be proved guilty. Hence they always manifested an anxiety, in their mode of conducting the trial, to clear the arraigned rather than secure his condemnation, es-
SANHEDRIM

especially in matters of life and death. Their axiom was that "the Sanhedrin is to save, not to destroy life" (Sanhedrin, 42 b). Hence no condemnation in absence (John vii, 51); and when the accused was brought before the tribunal, the president of the Sanhedrin at the very outset of the trial solemnly admonished the witnesses, pointing out to them the preciousness of human life, and earnestly beseeching them carefully and calmly to reflect whether they had not overlooked, not any more give their votes for his condemnation at the end of the trial. The taking of the votes always began from the junior member and gradually went on to the senior, in order that the lowest members might not be influenced by the opinion of the highest (ibid, 32 a). In capital offences, it required a majority of at least two to condemn the accused; and when the trial was before a quorum of twenty-three, or before the Small Sanhedrin, which consisted of this number, thirteen members had to declare for the guilt (Mishna, Sanhedrin, iv, 1; Gemara, ibid. 2 a, 40 a). In trials of capital offences, the verdict of acquittal could be given on the same day, but that of guilty had to be reserved for the following day, for such a condemned could not commence on the day preceding the Sabbath or a festival. No criminal trial could be carried through in the night (Mishna, ibid. iv, 1; Gemara, ibid. 52). The judges who condemned a criminal to death had to fast all day (Sanhedrin, 63 a). The condemned was not executed on the same day on which the sentence was passed, but the votes pro and con having been taken by the two notaries, the members of the Sanhedrin assembled together on the following day to examine the discussion, and to see whether there was any contradiction on the part of the judges (Mishna, Sanhedrin, iv, 1; Gemara, ibid. 39 a). If on the way to execution the criminal remembered that he had something fresh to adduce in his favor, he was led back to the tribunal, and the validity of his statement was examined. If he himself could say nothing more, a herald preceded him as he was led to the place of execution, and a decree of death pronounced. If a son of a scribe was condemned to death, because he committed such and such a crime according to the testimony of C and D; if any one knows anything to clear him, let him come forward and declare it" (Mishna, ibid. vi, 1). Clemency and humanity, however, were manifested towards him even when his criminal conduct was beyond the scope of the law, and when the law had to take its final course. Before his execution, a stupefying beverage was administered to the condemned by pious women to deprive him of consciousness and lessen the pain (Sanhedrin, 43 a, with Matt. xxvii, 48; Mark xv, 28, 36; Luke xxiii, 38, John xix, 29, 30). The property of the executed was confiscated, but passed over to the heirs (Sanhedrin, 48 b). The only exception to this leniency was one who gave himself out as the Messiah, or who led the people astray from the doctrines of their fathers (בְּנֵי םֶרֶךְ רֹדֵךְ; Matt. xxvii, 63; Luke xii, 33; Acts iv, 2; v, 28). Such a one had to endure all the rigors of the law without any mitigation (Sanhedrin, 36 b, 67 a). He could even be tried and condemned the same day or in the night (Josephina Sanhedrin, x; Matt. xxvii, 1, 2). As to the grossest punishments which the Sanhedrin had the power to inflict, though they were commensurate with the severity of the offences which fell within their jurisdiction to try, and embraced both corporal (Acts iv, 30; Mishna, Manoth, iii, 1-5) and capital punishments, yet even this supreme court was restricted to four modes of taking life—viz. by stoning, burning, beheading, and strangling (יְטָרִים). These four modes of execution were the only legal ones among the Jews from time immemorial (Mishna, Sanhedrin, vii, 1), and could be inflicted either by the Great Sanhedrin or by the Procurator of Judaea. According to the Gospel of John, however, the Jews declare (יוֹתָלֵנִי יְסָלְנִי עַסְקְנִי אֲדֹנָי), "It is not lawful for us to put any man to death" (xviii, 31), which agrees with the remark in the Jerusalem Talmud that "forty years before the destruction of the Temple the power of inflicting capital punishment was taken away from the Sanhedrin" (Sanhedrin, 1, beginning; vii, 2, p. 24). But this simply means that without the confirmation of the sentence on the part of the Roman procurator, the Jews had not the power to carry the sentence of the Sanhedrin into execution. This is not only confirmed by Josephus, who tells us that the Pharisees complained to the procurator that the assumption to execute capital punishment on the part of the Sadducean high-priest (Ant. xx, 9, 91), but by the appeal of Paul to the chief captain (Acts xxii, 25-30), and especially by the whole manner in which the trial of Jesus was conducted. The stoning of Stephen (vii, 54, etc.) was ordered by a judgment of an act of the Great Sanhedrin (Josephus (Ant. xx, 9, 1) expressly declares the execution of the apostle James during the absence of the procurator to have been.

II. The Small Sanhedrin.—1. Members, Constitution, etc.—This judicial court consisted of twenty-three members, who were appointed by the Great Sanhedrin (Mishna, Sanhedrin, i, 5, 6), and a president (—he), excellency) as their head (ibid. i, 6; Horajoth, 4 b). They had the power not only to judge civil cases, but also such capital offences as did not come within the jurisdiction of the supreme court (Mishna, Sanhedrin, 4; iv, 1). Such provincial courts were appointed in every town or village which had no less than 120 representative men (יְרָשָׁה).—i.e. twenty-three judges, three ranks of disciples of twenty-three persons each (=sixty-nine in all). The constant attendants in the synagogue are the two judges' notaries, the one to write down the arguments for and the other the arguments against the accused's innocence; two court servants to administer the forty stripes save one, and to wait upon the judges; two judges, two witnesses, two witnesses to gainay the counter-witnesses, two almoners, and one additional to distribute the alms, one physician, one scribe (וַאֲשֹׁר), and one schoolmaster for children—in all 120 (Sanhedrin, 17 b; Ma'ainmodim, Iad Ba-Hecesaku, Hilchoth Sanhedrin, i, 10).

2. Place, Time, and Order in which the Sessions were Held.—In the provinces these courts of justice were at first held in the market-place, but afterwards in a room adjoining the synagogue (Jerusalem Sanhedrin, i, 1; Baba Metzia, ii, 8), for the same reason which made the Great Sanhedrin hold their sittings in the Hall of Squares, in the inner court of the Temple. They sat every Monday and Thursday, being market-days (Baba Rama, 82 a; Kathuboth, 3 a), from the termination of morning prayer till the sixth hour (Ma'ainmodim, Hilchoth Sanhedrin, iii, 1). The order in which they were ranged was the same as that of the Great Sanhedrin. There were two of these lesser courts of justice in Jerusalem itself; one sat at the entrance to the Temple mount, and the other at the entrance to the Temple hall (Mishna, Sanhedrin, ix, 2), which on special occasions met together with the Great Sanhedrin (Sanhedrin, 88 b). It by no means appears that there was a separate court of the Sanhedrin against the decision of this lesser Sanhedrin. Only when the opinion of the judges was divided did they themselves consult with the supreme court. The stripes to which offenders were sentenced were given in the synagogue by the officer already mentioned (Mark iii, 19, with Matt. x, 7; xxvii, 34), and it is evidently to
SANHEDRIM

such a local Sanhedrin that reference is made in Matt. x: 22, 24; Mark xiii: 9.

Besides these two courts, there was also one consisting of three judges. Within the jurisdiction of this court came suits for debts, robbery, bodily injuries, compensation for damages; thefts which involved a twofold, fourfold, or fivefold value to the proprietor (Exod. xxii, 1—9); rapes, seduction, slander, and all minor offenses (Mishna, Sanhedrin, i, 1—3; iii, 1). There were in Jerusalem alone 390 such Sanhedrim.

III. Origin, Development, and Extinction of the Sanhedrin.—According to the most ancient Jewish tradition, the Sanhedrin was instituted by Moses, when he appointed, according to the command of God, seventy elders to make atonement for the crimes of the Israelites, and to act as magistrates and judges (Numb. xi, 16—24), thus constituting the first Sanhedrin with its seventy-one members (Mishna, Sanhedrin, i, 6; Gemara, ibid. 2). Hence the so-called Jerusalem Targum paraphrases Exod. xv, 27, "And they came to Elim, and there were there twelve fountains of water, answering to the twelve tribes of Israel; and seventy palm-trees, answering to the seventy elders of the Sanhedrin of Israel," while the other Chaldee versions express the judicial courts and colleges of the remotest antiquity by the name Sanhedrin (comp. Targum, Isa. xxviii, 6; Ruth iii, 11; iv, 1; Ps. cxv, 10; Eccles. xii, 12). Hence, too, the officers of provincial judicatures are called judges (Mishna, Sanhedrin, vii, 5), and the right to judge is called in the Talmud (Jerusalem Gemara, Bava Kamma, x, 10). In the time of the kings, we are assured, Saul was president of the Sanhedrin in his reign, and his son Jonathan was vice-president (Moed Katan, 26 a); and these two functions continued during the time of the later prophets (Psa. 2, 2 b; Naasr, 56 b; Ezra, 7, 14; 4, 9). The Chaldee paraphrase on the Song of Songs tells us that the Sanhedrin existed even in the Babylonian captivity, and that it was reorganized by Ezra immediately after the return from the exile (comp. Song of Songs vi, 1). But though this view has also been entertained by some of the most learned Christian scholars (e.g. Selden, Leusden, Grothus, Buhler), and though allusion is made in the Talmud (xxvi, 8, 16) to the several distinct classes which we afterwards find constituting the Sanhedrin, while Ezekiel (viii, 11, etc.) actually mentions the existence of seventy elders in his time, yet there seems to be little doubt that this supreme court, as it existed during the second Temple, was a national and not a provincial institution in the Holy Land.

Livy expressly states (xiv, 32), "Pruntuam nodum quod statum Macedoniam pertinebat, senatores, quos synedros vocant, legendos esse, quorum consilium republica administratur." If the γαβρια τον ἰουδαϊων in 2 Macc. i, 10; iv, 44; xi, 27, designates the Sanhedrin, as is the case, this is the earliest historical trace of its existence. The Macedonian origin of the Sanhedrin is corroborated by the following reasons: (a) The historical books of the Bible are perfectly silent about the existence of such a tribunal. (b) The prophets, who again and again manifest such zeal for justice and righteous judgment, never mention this court of justice. (c) Josephus refers to the administration of the law to the ruling monarch and the magnates of the land, thus showing that this central administration belongs to the period of the second Temple. (d) The name αγρια τον ἰουδαϊων, by which it has come down to us, points to the fact that this synod originated during the Macedonian supremacy in Palestine. It is clear that Josephus does not mention the Sanhedrin before the conquest of Judea by Pompey (B.C. 63); but the very fact that it had such power in the time of Hyrcanus II as to summon Herod to answer for his unjust conduct (Josephus, Ant. xiv, 3, 4) shows that it must then have been a very old institution to have acquired such developed authority. Hence marks, "Upon more minute examination, we find that the chronicler gives a pretty plain sketch of the Great Sanhedrin, as he mentions the existence in Jerusalem of a supreme court consisting of priests, Levites, and heads of families, with the high-priest as president (2 Chron. xxv, 13). Now the chronicler, as Zeux has shown (Grottienseitliche Vorträge, p. 32), lived as early as the beginning of the 2d century of the Seleucid era, so that at that time the Sanhedrin did already exist, and its beginning is to be placed at the period in which Asia was conquered by Alexander and his successors of the Ptolemaic and Seleucidic dynasties. Palestine, too, felt deeply the consequences of these great convulsions, and to preserve its internal religious independence it required a thoroughly organized body to watch over both its dogmas and rights. This body manifested itself in the Sanhedrin, at the head of which was the high-priest, as is seen from Eccles. iv, 4, 5, and 2 Chron. xxv, 12, 11. The Sanhedrin seems to have been dissolved in the time of the Maccabean revolt in consequence of the unworthy high-priests (comp. 2 Macc.), but it was reconstructed after the overthrow of the Syrian yoke. As the people, however, were unwilling to leave the whole power in the hands of the Maccabees, who were already princes and high-priests, they henceforth placed at the head of the Sanhedrin a president and a vice-president (Der persichtliche Beweis, p. 68, note). This is, moreover, corroborated by the traditional chain of presidents and vice-presidents which is uninterruptedly traced from Jose ben-Joeser (B.C. 170), as well as by the statement that with Simon the Just terminated the line of presidents and presidents from which the Sanhedrin developed itself. The transition from the Great Synagogue to the Great Sanhedrin is perfectly natural. "The Macedonian conquerer," as Frankel justly states (Programm, p. 6, 1834), "with all his clemency towards Palestine, which resisted him so long and so obstinately, restored to the internal government of the people, and dissolved the Great Synagogue, which to a certain extent conferred independence and a republican constitution upon the land. The people, however, valued highly their old institutions, and would not relinquish them. Hence most probably in the confusions which broke out after Alexander's death, when the attention of the fighting chiefs could not be directed towards Palestine, the supreme court was formed anew, assuming the name Synhedron, which was a common appellation among the Greeks for a senate." It was this development of the Great Sanhedrin from the Great Synagogue which accounts for the similarity of the two names (סנהדרין, סנהדרין).

After the destruction of Jerusalem, when the holy city was no longer adapted to be the centre of religious administration, R. Johanan ben-Zakai transferred the seat of the Sanhedrin to Jabne and Jamnia (A.D. 68—80); it was thence transferred to Usha (Kethuboth, 49; Sabboth, 15; Rosh Ha-Shana, 15 b), under the presidency of Gamaliel II, ben-Simon II (A.D. 80—116); conveyed back to Jabne and again to Usha; to Shaffar, under the presidency of Simon III, ben-Gamaliel II (A.D. 140—163); to Beth-Shearrim and Sepphoris, under the presidency of Jehuda I the Holy, ben-Simon III (A.D. 163—193; comp. Kethuboth, 103 b; Nida, 27 a); and finally to Tiberias, under the presidency of Gamaliel III, ben-Jehuda I (A.D. 193—220), where it came more of a consistory, but still retained under the presidency of Gamaliel III, ben-Simon III (A.D. 220—270), the power of excommunication in case any Israelite refused to abide by its decisions; while under the presidency of Gamaliel IV, ben-Jehuda II (A.D. 270—300), it dropped the appellation Sanhedrin, and the authoritative decisions were issued under the name Beth Ha-Midrash (תתא הדרא). Gamaliel VI (A.D. 400—450) was the last president. With the death of this patriarch, who was executed by the Theodosian emperors for creating new synagogues contrary to the imperial inhibition, the title of Nasi, the last remains of the ancient Sanhedrin, became wholly extinct in the year 425.

It was with reference to this Supreme Court that
Christ chose seventy disciples (Luke x, 1), answering to the seventy senators composing the Sanhedrim, just as he chose twelve apostles with reference to the twelve tribes of Israel (Matt. xxi, 28; Luke xxii, 30), to indicate that the authority of their supreme religious court was now taken away and was vested in the seventy of his own choice, and over which he himself was the president and supreme Lord.

IV. Literature.—Mishna, Sanhedrin, and the Gemara on this tractate; excerpt from the Gemara tractate Sanhedrin have been translated into Latin with elaborate notes by John Coeh (Amst. 1629); the monographs of Vorstius and Witeius, in Ugelino’s Theocerus, vol. xxv; Maimonides, De Sanhedrini et Penini (ed. Houting, Amst. 1695); Selden, De Synagogen et Procurator’s Jurisdiction Veterum Ebrorum (Lond. 1660); Zunz, Die gottheitsnsten Vorträge der Juden, p. 87 sqq. (Berlin, 1832); Islamic and Arabic Ammians, i, 108, 131 sqq. (Frankfort-on-the-Main, 1889); Frankel, Der geschichtliche Bezweck nach mosaik-talmudischem Rechte, p. 68 sqq. (Berlin, 1846); Rapaport, Ezech Millin, p. 2 (Prague, 1852); Frankel, Monatschrift für Geschichte und Wissenschaft des Judenthums, i, 944 sqq. (Levy, 1856); Frankel, De Sanhedrini et Penini, p. 94 sqq. (Dusseldorf, 1859); Herzfeld, Geschichte des Volkes Israel, ii, 380 sqq. (Nordhausen, 1855); Krochmal, in the Hebrew essays and reviews entitled He-Chalut, iii, 118 sqq. (Lemberg, 1866); Jost, Geschichte des Judenthums und seiner Secten, i, 123 sqq., 270 sqq. (Leips. 1857); Gritz, Geschichte der Juden, p. 95 sqq. (2d ed. Leips. 1865); Hasak, Geschichte der Volkskin, i, 119 sqq. (2d ed. Berlin, 1867); Neumark, Der jüdische Bund in der Neuzeit (Hamb. 1831). Comp. also School, where all the presidents and vice-presidents of the Sanhedrin will be given in chronological order; and SYNAGOGUE, THE GREAT, where the development of the Sanhedrin from this institution will be traced. For monographs on the civil powers of the Sanhedrin in our Lord’s time, see VOLBERTING, Index Programmatum, p. 58. See COUNCIL.

San-Jasius, one of the three classes of Jogins, which latter are Brahmanic anchorites. They affect great abstinence, and refrain from marriage, betel, and, indeed, pleasure in general. They are allowed to make but one meal a day, and to live on alms, carrying with them a cup of earthenware only. Their clothes are dyed with red earth, and they have a long bamboo cane, which they are not to touch, either gold or silver, much less to carry about them. They are not allowed to have any fixed residence, nor to lie two nights together in the same place, once a year excepted, when they are allowed to continue two months in the same place: they then select a seat in the holy temple, it is thought to be under the mercy of God, and then they may remain for life if they wish. They are bound to be always ready to oppose six enemies, viz., Cama, but; Croota, anger; Lopa, aversion; Mada, pride; the love of things of this world; and Mataara, thirst for revenge.

Sankara, or Sankaracharya, the name of one of the most renowned theologians of India. The time in which he flourished is unknown, tradition placing him at about B.c. 723. He is said to have died in the 8th or 9th century after Christ. Most accounts agree in making him a native of Kerala or Malabar, and a member of the caste of the Nambr Brahmans. In Malabar he is said to have divided the four original castes into seventy-two, or eighteen subdivisions each. Towards the close of his life he repaired to Cashmera, and finally to Kanyakumari, in the Himalayas, where he died at the early age of thirty-two years. In the course of his career he founded the sects of the Dasamandini. His principal works, which are of considerable merit, and exercised a great influence on the religious history of India, are his commentaries on the Vedanta Sutras, the Bhagavad-gita, and the principal Upanishadas. A number of works are current in the south of India relating to his life, among them the Sankara-dig-niyoga, or the conquest of the world by Sankara. See Wilson, Sketch of Religious Sects of the Hindus.

Sankhkar, an evil spirit mentioned in the Jewish Talmud as having taken possession of the throne of Solomon.

Sankhyya (Sanskrit, synthetic reasoning), the name of one of the three great systems of orthodox Hindû philosophy. Like the other systems, it professes to teach the means by which eternal beatitude, or the complete and perpetual extinction of suffering, or ill, may be attained. This means is the discriminative acquaintance with tattva, or the true principles of all existence. Such principles are, according to the Sankhyya system, twenty-five in number, as follows: (1) Prakriti or Pradhana, substance or nature; it is the universal and material cause, eternal, productive, but unproduced. Its first production is (2) Mahat (literally the great), or Buddha (literally intellect). From it devolves (3) Ahankara (literally the assertion of "I"), the function of which consists in referring the objects of the world to one's self. It produces (4–8) five tanmatras, or subtle elements, which produce the five gross elements (8–24). These successive produc
tes (9–13) five instruments of sensation, viz., the eye, ear, nose, tongue, and skin; (14–18) five instruments of action, viz., the organ of speech, the hands, the feet, the excretory termination of the intestines, and the organ of generation; lastly (19), mam, or the organ of the mouth, and (20), the olfactory termination of the nose; (21–24) produce (20–24) the five gross elements, viz., akasa, space or ether, derived from the nammur or tanmtra; air, derived from the aerial tanmtra; fire, from the igneous tanmtra; water, from the aqueous tanmtra; earth, derived from the terrestrial tanmtra. The 25th principle is Prayusha, or soul, which is neither produced nor productive; it is multitudinous, individual, sensitive, eternal, unalterable, and immaterial.

Creation results from the union of Prakriti (1) and Purusha (20), and is either material or intellectual. Besides the twenty-five principles, the Sankhyya also teaches that nature has three essential gunas, or qualities, viz., sattva, the quality of goodness or purity; rajas (literally coloredness), the quality of passion; and, tamas, the quality of sin or darkness; and it classifies accordingly material and intellectual creation. From the foregoing it will be seen that the doctrine of Sankhyya produces does not teach the existence of a Supreme Being, by whom nature and soul were created, and by whom the world is ruled. Its opponents have therefore accused it of being atheistical; and it is the special object of the Yoga system to remove this reproach by asserting its existence and defining its essence. Its final object is not absorption in God, whether personal or impersonal, but "Moksha," delivery of the soul from all pain and illusion, and recovery by the soul of its true nature. The Sankhyya system underwent a mythological development in the Purinas (q.v.); thus Prakriti, or nature, is identified with Maya, or the en
erg of Brahma; and the Maya-Purusha affirms that the Brahma, or the intellectual principle, through the three qualities goodness, passion, and sin, becomes the three-gods—Brahma, Vishnu, and Siva. The most important development, however, of the Sankhyya is that by the Buddhistic doctrine, which is mainly based on it.

The Sankhyya is the philosophy is supposed to date from a period anterior to the 8th century B.C., and its reaction against Brahmanism became a popular movement in the 6th century in the Buddhist reformation of Sankhystemu, who taught the Yoga system with little change, and named its "delight in existing in the earth, in the state of bliss, in the niche of bliss, the Nirvana. The reputed author of the actual Sankhyya is Kapila (literally terny), who is asserted to have been a son of Brahma; by others an incarnation of Vishnu. He taught his system in Su-
træ (q.v.), which, distributed in six lectures, bears the name of Sankhya-Pravachana. The oldest commentary on this work is that by Aniruddha; another is that by Vijñānabhinīkhu. They owe their preservation to Ishwara Krishna, who reduced them to writing, edited by H. H. Wilson. See Fitzedward Hall, Preface to his ed. of Sankhya-Pravacana; H. T. Colebrooke, Mocell, Essai (London, 1887), i, 327 sq.; Max Muller, Chippa From a German Work.

Sankranthana, in Hindī mythology, is "the variable one," a surname of Indra, the god of the heavens and of the air.

Sanks, James, a minister of the Methodist Episcopal Church, was born in Anne Arundel County, Md., June 12, 1806, and early removed to Virginia. In 1826 he was received on trial in the Baltimore Conference, where he labored until 1828, when he was transferred to the East Baltimore Conference and placed in charge of the Bellefonte district. In 1862 he was appointed to York, Pa., but soon sunk under the influence of disease, and died in the borough of York, Pa., June 4, 1862. See Minutes of Annual Conferences, 1863, p. 11.

Sankuman, in Hindī mythology, is a wise and pious king, who secured the welfare of his realm and the benefit of his people. He received from Viṣṇu the promise that the god would become incarnate in his family, which was fulfilled in his being born as Rama.

Sannāțī. See Kirjath-Sannāțī.

Sanngetal, in Norse mythology, is a surname of Odin.

Sannūwardi, in Hindī mythology, is one of the eight playmates of Ganga.

Sanquhar Declaration. After Hall of Haughead had been killed at Queensferry, June 3, 1680, an unsigned paper was found in his possession, which was never recovered by the members of the Covenant. But on June 22, 1680, a party of twenty-one armed men boldly entered the little burg of Sanquhar, and marched to the market cross, where they read and posted up a paper, throwing off all allegiance to the government, and proclaiming themselves in defiance of rebellion. The Sanquhar paper was as follows: "It is not among the smallest of the Lord's mercies to this poor land that there have been always some who have given their testimony against every course of defection that many are guilty of, which is a token for good that he doth not as yet intend to cast us off altogether, but that he will leave a remnant in whom he will be glorious, if they, through his grace, keep themselves clean still, and walk in his way and method, as it has been walked in and owned by him in our predecessors of truly worthy memory, in their carrying-on of our noble work of reformation in the several steps thereof, from popery, prelacy, and likewise Erastian supremacy, so much usurped by him who (it is true, so far as we know) is descended from the race of our kings; yet he hath so far departed from what he ought to have been, by his perjury and usurpation in Church matters, and tyranny in matters civil, as is known by the whole land, that we have just reason to account it one of the Lord's great controversies against us, which we have not disowned him and the men of his practices (whether inferior magistrates or any other) as enemies to our Lord and his crown, and the true Protestant and Presbyterian interest in these lands, our Lord's espoused bride and Church. Therefore, although we be for government and governors, such as the Word of God and our covenant allow, yet we for ourselves, with all our representatives of the true Presbyterian kirk and covenanted nation of Scotland, considering the great hazard of lying under such a sin any longer, do by these present disown Charles Stuart, that has been reigning (or rather tyrannizing, as we may say) on the throne of Britain these years by-gone, by having any right, title to, or interest in the said crown of Scotland for government, as forfeit to ed several years since by his perjury and breach of covenant both to God and his kirk, and usurpation of his crown and royal prerogatives therein, and many other breaches in matters ecclesiastic, and by his tyranny and breach of the very leges regnandi in matters civil. For which reason, we declare that several years since he should have been demuned of being king, ruler, or magistrate, or of being in any power to, or to be obeyed as such. As also, we being under the standard of our Lord Jesus Christ, Captain of salvation, do declare a war with such a tyrant and usurper, and all the men of his practices, as enemies to our Lord Jesus Christ and his cause and covenants; and against all such as have strengthened him, sided with, or anywise acknowledged him in his tyranny, civil or ecclesiastic—yea, against all such as shall strengthen, side with, or anywise acknowledge any other in the like usurpation and tyranny—far more against such as would betray or deliver up our free reformed mother-kirk unto the bondage of antichrist, the pope of Rome. And by this we homologate that testimony given at Rutherfurd, May 29, 1673, and all the faithful testimonies of those who have gone before, as also of those who have suffered of late. And we do disclaim that declaration published at Hamilton, June, 1697, chiefly because it takes in the king's interest. He is a general sinner since loosed from, because of the forenamed reasons, and others which may after this (if the Lord will) be published. As also we disown, and by this present, the reception of the duke of York, that professed papist, as repugnant to our principles and vows to the most high God, and as that which is the great, though not alone, just reproach of our kirk and nation. We do also by this protest against his acceding to the crown; and whatever has been done, or any are essaying to do in this land (given to the Lord) in prejudice to our work of reformation. And, to conclude, we hope after this none will blame us for, or offend at our rewarding these that are against us, as they have done. We, for the Lord's good cause, are not to exclude any that have declined, if they be willing to give satisfaction according to the degree of their offence. Given at Sanquhar, June 22, 1680." See Queenberry Declaration.

Sasan'nah (Heb. Sasanamä', παρμαναῦη; Sept. Σασαναναὰ ν. τ. Σεσαννοῦ, a town in the southern part of the territory of Judah (Josh. xv, 31). The corresponding lists of Simeon (Josh. xix, 9; 1 Chron, iv, 25), and of Judah (Num. xxxvii, 16), and Hazor (Deut. xii, 32), which is identified by Schwarz with the village of Saimos, on a river of the same name, north-east of Gaza—a position which he acknowledges, however, to be rather in the lowlands than in the south of Judah (Palest. p. 101, 122); but the boundary-line can easily be accommodated to this location. See Jedah, Tribe of. Wilson would identify it with the Ḥadd el-Din mentioned by Robinson (Bib. Res. i, 299, 300), not far south of Gaza, which he supposes to have been the first resting-place for horses after leaving Gaza on the way to Egypt; and he thinks a confirmation is found for this in the circumstance that various travellers, in passing northward, are noticeable by the notice they take with horses about that locality (Negev, p. 210). Lietz, Conder thinks (Tent-Work in Palestine, ii, 389) that it was at Beit-susin, east of the valley of Sorek; but this could not possibly have been within the territory of Simeon.

Sandsbury (Sandbury, or Sanbury), John, a native of London, born St. John's, Oxford, in 1598, aged seventeen; vicar of the Church at St. George, Oxford, in 1607; bachelor of divinity in 1608; buried in Jan., 1609. He wrote, Liwat in Italiam:—Oxoniad ad Protectionem Regis sui Omnium Optimi Filii, etc. (Oxon. 1608, 16mo).

Sancara, or Sanskara (Sanscrit, completing), the name of one of the ten essential rites or ceremonies of the Hindis of the first three castes. They are the
cere monies to be performed before and at the birth of a child; of naming the child on the tenth, eleventh, or one hundred-and-first day; of carrying the child out to see the moon on the third lunar day of the third light fortnight; of seeing the sun in the third or fourth month; of feeding him in the sixth or eighth month (or at other stated periods); of the ceremony of the tonsure in the second or third year; of investiture with the string in the fifth, eighth, or sixteenth year, when he is handed to a guru to become a religious student; and the ceremony of marriage, after he has completed his studies and is fit to perform the sacrifices ordained by the sacred writings.

**Sanskrit Versions.** A translation of the New Test. into the Sanscrit, the ancient and classical language of India, was commenced in the year 1803 and finished at the press in 1806. The man who had immortalized his name by this translation was the well-known Dr. Carey (q. v.). He had also commenced a translation of the Old Test., when the disastrous fire at Serampore in 1812 interrupted his labors, destroying not only a dictionary of the Sanscrit and various Indian dialects, but also his MSS. of the second book of Samuel and the first book of Kings. In 1815 Dr. Carey received an associate in Dr. Yates, and both carried on the work. The old Old Test., which was originally completed in 1822. In 1820 a second edition of the New Test. was undertaken at Serampore, the former edition, consisting of only 600 copies, having been completely exhausted. In 1827 a second edition of the Old Test. was in press, but various circumstances retarded its completion, and in 1834 the impression had been struck off only as far as the first book of Kings. As the first attempt of translating could only be defective, especially when undertaken at a period when the language had been little studied by Europeans, and no printed copies of the standard works were in existence, a statement as to the desirability of a new and a more polished translation was laid before the committee of the Society for the Promotion of Christian Knowledge in 1834. The committee entered into communication on the subject with the bishop of Calcutta, and the new translation was undertaken by Dr. Yates, formerly the associate of Dr. Carey, upon whom the mantle of the venerable translator had by this time fallen. He had begun the work in 1840 by the publication of the Psalms: in 1844 the Gospels were completed; and in 1846 the Proverbs and the New Test. were in the press. While prosecuting his work, Dr. Yates was overtaken by death in 1845. On examining the state of the version, it was found that the books of Genesis, Psalms, and Proverbs, and the last half of the Pentateuch, and the books of Job, Ecclesiastes, Canticles, and Daniel, had been prepared in MS. The work was now committed to the Rev. Mr. Wenger, the translator into the Bengalee, and in 1852 the second volume of the Old Test., containing the historical books from Judges to Esther inclusive, was completed. In 1858 a third volume, bringing the translation up to the Song of Solomon, was finished; in 1863 the translation was continued as far as the end of Isaiah; and in 1873 the translation of the whole Bible was announced as completed. Besides the translation into Sanscrit proper, there exist versions in that language: viz. Genesis (first published in 1835; 2d ed. 1860), Psalms (1858), Proverbs (1855), St. Luke (1850).

**Sanskrit Dictionaries.** With the Sanscrit character, the Report of the British and Foreign Bible Society for 1857 states that "the Calcutta University has largely adopted this as the language and character that it has thought desirable to print not only the book of Psalms, but also the book of Proverbs and the New Testament." Only the Psalms have as yet been printed.

**Sanskrit Dictionaries.** In this character the same parts as under have been published.

See the Bible of Every Land, p. 86, and the Annual Reports of the Brit. and For. Bible Society. (B.F.)

**Santali Version.** Santali is the language spoken by the Santals of North-western Bengal. In this lan-
de Cuma have never been published. See Hoefler, Novo. Rer. Gent., s. v.

Sanuto, Minhun, called Torello, an Italian chronicler, was born at Venice in the latter part of the 13th century. He was of an ancient family, which, under the name of Cudian, had for years occupied an important position in the republic. In early life he travelled extensively in the East, explored Cyprus, Rhodes, Armenia and other countries, and on his return wrote his Liber Secretorum Fidelium super Terrae Sanctae Recuperatione, in which he described the countries he had visited, and the various wars with the infidels. The book contained also four maps of the Mediterranean, the Holy Land, and Egypt. Having finished his task, Sanuto withdrew from Europe preserving a manuscript. All his efforts were in vain, as the attempt was abandoned the project. He died about 1380. The book and letters of Sanuto were published in 1611 by Bongars, in Gest. Dei per Francos.

Sanyasi, a Hindú ascetic of the most extreme kind, who assumes a state of silence, and gives up the use of fire, eats little, and asks but once in the day for food. He is often found in the temples of the God Mani, where the smoke of the kitchen fires has ceased, when the pestle lies motionless, when the burning charcoal is extinguished, when people have eaten, and when dishes are removed, let the Sanyasi bid for food." He feeds upon roots and fruits. In order to fit him for immortality, he endeavors to reach a state of indifference and relaxation from pain and distraction, which is called the power of every kind. He must never walk without keeping his eyes upon the ground for the sake of preserving minute animals, and, for fear of destroying insects, he must not drink water until it has been strained. The only occupation suitable to his situation is meditation.

Saco, in Greek mythology, was the son of Jupiter and a nymph, or of Mercury and Rhene, who is credited with having gathered the inhabitants of Samothrace into towns and villages, and with having divided them into five tribes named after his sons, besides giving them laws.

Sachtis, in Greek mythology, was the preserver. 1. A surname of Jupiter, applied to him in Thespis. A monstrous dragon devoured the monster each year. When the lot fell on Cleothra, his friend Menestraus caused a brazen coat of mail to be studded with barbed hooks and points, in which the victim went out to meet his fate. He lost his life, but so did the dragon, and the monster erected a bronze image to its deliverer Jupiter. 2. A surname of Bucephalus, under which he was worshipped at Trezene and about Lerna.

Sapondomad, in Persian mythology, was the genius of the earth, a female angel of the highest perfection, who, as one of the Amshaspends created by Ormuzd, is engaged in an incessant warfare with Amsad, one of the demons of Ahirmad.

Saphe (Heb. ṣaph, a threshold, or dish, as often; Sept. סָפָה מ, סָפָה), a Philistine giant of the race of Rapha, slain by Sibbecai the Hushathite (2 Sam. xxii. 18). B.C. cir. 1050. In 1 Chron. xx. 4 he is called Sipphal.

Sa'phat (ספרות), Saphatias (ספרתיה), and Sa'pheth (סַפְחֶת) (Saphatis, סַפַּה מ), Greek forms (respectively 1 Esdr. v. 9, viii. 94; and v. 9, vii. 59). See also Sa'phatias (ספרתיה), and Sa'pheth (סַפְחֶת). (In the corresponding Heb. lists (respectively Ezech. ii. 8; viii. 8; and ii. 57).

Sa'phir (Heb. שָׁפִיר, "שָׁפִיר", "שָׁפִיר", "שָׁפִיר"); Sept. translates as adverb, καλάς. A place in the kingdom of Judah, named only in Mic. i. 11. By Eusebius and Jerome (Onomast. s. v. "Saphir") it is described as "in the mountain district between Eleutheropolis and Ascalon." But in this description Dr. Robinson thinks that the Omo-
masticum incorrectly takes it for one of the Hazors of Josh. xv, 25, in the south of Judah (Bibl. Rev. i, 370). On the way from Jerusalem to Gaza, at Kuratiyeh, Robinson saw a place called by the Arabs es-Sawfegh, near Damascus, to be a village called Sa'aph (comp. Gesenius, Theaeum, s.v. "םשף"). Es-Sawafir lies seven or eight miles to the north-east of Ascalon, and about twelve west of Beit-Jibrin, to the right of the coast-road from Gaza (Van de Velde, Syr. and Pal. p. 159). Tobler prefers a village called Sabor, closer to Sa'aph, containing a copious and apparently very ancient well (Dritte Wanderung, p. 47). "In one important respect, however, the position of neither of these agrees with the notice of the Onomasticon, since it is not near the mountains, but on the open plain of the Shefelah. But as Beit-Jibrin, the ancient Eleutheropolis, stands on the western slopes of the mountains of Judah, it is difficult to understand how any place could be westward of it (i.e., between it and Ascalon), and yet be itself in the mountain district, unless that expression may refer to places which, though situated in the plain, were for some reason considered as belonging to the towns of the mountains. See Keilah; Nezib, etc.

Sapph, Sars, a minister of the Methodist Episcopal Church, was born in Mt. Vernon, O., Feb. 9, 1816. He was licensed to preach in 1837; and in 1838 he was admitted to the Michigan Conference, then embarking a part of Ohio. For more than thirty-four years Sapp served the Church, twenty-three of which were spent in the regular pastorate, and ten in the presiding episcopacy. His last sermon was preached at Alaskal, Mich., Jan. 12, 1873, and on May 5 he died, in holy triumph, at Grand Rapids. He was a laborious and able member of the General Conference held at Boston, Indianapolis, Buffalo, and Brooklyn. He was also active in the duties of the superintendent of his church. See Minutes of Annual Conf. 1873, p. 96.

Sapphira (Σαπφίρα, a sapphire stone, or beautiful), the wife of Ananias, and his accomplice in the sin for which he died (Acts v, 1-10). A.D. 50. Unaware of the judgment which had befallen her husband, she entered the place about three hours after, probably to look for him; and, being there interrogated by Peter, repeated and persisted in the "lie unto the Holy Ghost" which had destroyed her husband; on which the grieved apostle made known to her his doom, and pronounced her own—"Behold, the feet of them who have buried thy husband are at the door and shall carry thee out." On hearing these awful words, she fell dead at his feet. The guilt of Sapphira in answering as she did to the questions which were probably designed to awaken her conscience deepens the shade of the foul crime common to her and her husband, and has suggested to many the probability that the plot was of her devising, and that, like another Eve, she drew her husband into it. The sad story of Sapphira's ignorance of what had happened to her husband, and the predictive language of Peter towards her are decisive evidences as to the supernatural character of the whole transaction. The history of Sapphira's death thus supplies that of Ananias, while of the eight others it has been attributed to natural causes. See Ananias.

Sapphire (Σαφής, sahipp) [according to Gesenius, from its capacity for engraving; but according to Furst, from its brilliancy; Sept. and N. T. παιρής; Vulg. saffra, a precious stone, apparently of a bright-blue color; see Exod. xxv, 10; and safran, one of the precious stones that ornamented the king of Tyre (Ezek. xxviii, 18). The saffir was the second stone in the second row of the high-priest's breastplate (Exod. xxviii, 18); it was exactly his size (Job xxv, 16), and was a part of the precious stones that ornamented the king of Tyre (Ezek. xxviii, 18). In the Apocalyptic vision it formed the second foundation-wall of the New Jerusalem (Rev. xxi, 19). Notwithstanding the identity of name between our sapphire and the οἶνος ἀριστοῦς and saffrurus. The Greeks and Romans, it is generally agreed that the sapphire of the ancients was not another gem of that name, viz. the azure or indigo-blue crystalline variety of corundum, but our lapis-lazuli (ultramarine); for Pliny (N. H. xxxvii, 9) thus speaks of the sapphirus: "It is refugent with spots of gold, of an azure color sometimes, but not often purple. The best kind comes from Media; it is never transparent, and is not well suited for engraving upon when intersected with hard, crystalline particles." The account of Theophrastus is similar (De Lapid. 23). This description answers exactly to the character of the lapis-lazuli; the "crystalline particles" of Pliny are crystals of iron pyrites, which mineral occurs with it; but this, however, not so certain that the sapphir of the Hebrew Bible is identical with the lapis-lazuli; for the scriptural requirements demand transparency, great value, and good material for the engraver's art, all of which combined characters the lapis-lazuli does not possess in any great degree. Pliny calls it "inutilis sculpture." King (Antique Gens, p. 44) says that intagli and cameo of Roman times are frequent in the material, but rarely any works of much merit. Again, the sapphir was certainly pellicud: "same apud Judaeos," says Braun (De Vest. Sac. p. 689, ed. 1688), "sapphros pellicudus notas foisse manifestissimam est, adeo etiam ut pelletum dum ilorum philosophia dictare ΜΕΤΕΡΟΙ και saphir." Beckmann (Hist. of Invenl. i, 472) is of opinion that the sapphir of the Hebrews is the same as the lapis-lazuli; Rosenhuller and Braun argue in favor of its being our sapphire or precious corundum.

The Oriental sapphire is a plbbed gem, little inferior in hardness to the diamond. The best are found in Pegu, and some of the river valleys of India are very seldom found of a large size. Their color is blue, varying through all the intermediate shades down to colorless. The deep blue are called male sapphires; the lighter, water sapphires, or female sapphires. The sapphire has been sometimes found red, and has then been mistaken for ruby. There is a gem called sapphiro-rubinus, which is a sapphire part blue, part ruby-colored: it is called by the Indians nilacum. Precious stones were considered by the ancients to be emblematical of some faculty or virtue. Pope Innocent III sent to king John a present of four rings: the sapphire, denoting hope; the emerald, faith; the garnet, charity; and the topaz, prudence. She did not follow the work of the king, which, in the high-priest's breastplate, bore the name of Issachar. According to the Cabalists, the sapphire was fatal to serpents. The rabbins also have an absurd story about the engraving of the gem on the high-priest's breastplate by means of a singular worm (see the Talmud, Eruvin 56c and Gitai). The ancients as well as moderns had many other superstitions and speculations concerning this jewel. (See Gemmen, De Sapphiri [Alt. 1705].) See Gem. Sapphir Codex. See SHAPHIUR MANUSCRIBT.

Sa'ara (Σαρια, a Gerasianized form of the Heb. name Sarah (q. v.), applied to two women in the Apoecrypha and New Test. 1. The wife of Abraham (Heb. xi, 11; 1 Pet. iii, 6).
2. The daughter of Raguel and Edna, betrothed to her cousin Tobias, a native of Ecbatana in Media, in the apocryphal history of Tobit. As the story goes, she had been married to seven husbands, who were all slain on the wedding night by Asmodeus, the evil spirit, who loved her (Tob. iii, 7). This spirit the rabbins call Ashmedai, and say he was the incestuous offspring of Tubal-Cain by his elder sister Naamah, the mother of many devils; and that he was enamoured of the beauty of Sara as the angels were of the daughters of men (Gen. v). See ASMODAEUS. The breaking of the spell and the chasing-away of the evil spirit by the "fishy fume," when Sara was married to Tobias, with whom she afterwards lived in peace, are told in ch. vii. See Tobias.

Sarab. See BRIER.

Sarabaites, a vagrant class of monks among the Egyptians in the 4th century, designated Rembuth. They lived together in very small communities, chiefly in cities where they might command attention. They turned religion into an art, and made a gain by the exhibition of pretended miracles. Their dress was most disgusting and their conduct immoral (Jerome, Ep. 29 ad Eustoch.).

Sarab'is (Σαραβίας), a Greek form (1 Esdr. ix, 48), of the name SHEREBLIH (q.v.) in the Heb. text (Neh. viii. 7).

Saracens, originally the name of an Arab tribe, then applied to the Bedouin, and later to all the Moorish or Mohammedan people who invaded Europe, and against whom the Crusaders fought. The true derivation of the word was long a puzzle to philologers: Du Cange deduced it from Sarah, the wife of Abraham; Hottinger (Biblueh, Orient.) from the Arab sarac, to steal; Forster (Journey) from sahrah, a desert; others from the Hebrew sarah, poor. The opinion most generally prevalent is that the word was originally Shar-kayn (Arab. Eastern people), corrupted by the Greeks into Sarcaeoi, from which the Romans derived their word Saraceni. See CRUSADES; MOORS; SPAIN.

Sarath, the name of two women in the Old Test., whose Hebrew names, however, are different.

1. The wife of Abraham and mother of Isaac.

1. Her Name.—The Hebrew form of Sarah is ספירה, Sarah, which is the regular feminine of "סרס, sar, a prince, so often used and rendered (Sept., Josephus, and New Test. סָחָר, "Sara") in the A.V. of the N. T.). Her original name, however, was SARAI (q.v.), which is usually regarded as of kindred etymology. The change of her name from "Sarai" to "Sarai" was made at the same time that Abraham's name was changed to Abraham, on the establishment of the covenant of circumcision between him and God. That the name "Sarah" signifies "princess" is universally acknowledged. But the meaning of "Sarai" is still a subject of controversy. The older interpreters (as, for example, Jerome, in Quest. Hebr., and those who follow him) suppose it to mean "a young princess," and explain the change from Sarai to Sarah as that following the death of one family, but the royal ancestrship of "all families of the earth." They also suppose that the addition of the letter א, as taken from the sacred tetragrammaton Jehovah, to the names of Abram and Sarai, mystically signified their being received into covenant with the Lord. Among modern Hebraists there is great diversity of interpretation. One opinion, keeping to the same general idea that referred to above, explains "Sarai" as "noble," "nobility," etc., an explanation which, even more than the other, labors under the objection of giving little force to the change. Another opinion supposes Sarai to be a contracted form of סישראל (Seryah), and to signify "Jehovah is ruler." See SIRAIH.

But this gives no force whatever to the change, and, besides, introduces the element Jahu into a proper name too early in the history. A third (following Ewald, Heb. Gram. § 324) derives it from סער, a root which is found in Gen. xxxii, 28; Hosea xi, 4, in the sense of "to fight," and explains it as "strife, conflict" (streitsüchtig). This last seems to be etymologically, the most probable, and differs from the others in giving great force and dignity to the change of name (see Genesis, Theocrit. p. 1388 b; Pfeiffer, in the Stud. u. Krit. 1871, i, 145 sq.). See PROPER NAME.

2. Her Parentage.—She is first introduced in Gen. xi, 29 as follows: "Abram and Nahor took them wives: the name of Abram's wife was Sarai; and the name of Nahor's wife was Milcah, the daughter of Haran, the father of Milcah, and the father of Iscah." In Gen. xi, 12 Abraham speaks of her as his sister, the daughter of the same father, but not the daughter of the same mother. The common Jewish tradition, taken for granted by Josephus (Ant. i, 6, 6) and by Jerome (Comment. Hebr. ad Genes., iii, 339 [ed. Ben. 1715]) is that Sarai is the same as Iscah, the daughter of Haran and the sister of Lot, who is called Abraham's "brother" in Gen. xiv, 14, 15. Judging from the fact that Rebekah, the granddaughter of Nahor, was the wife of Isaac, the son of Abraham, there is reason to conjecture that Abraham was the youngest brother, so that his wife might not be viewed as improper to him. But this is certainly strange, if the tradition be true, that no direct mention of it is found in Gen. xi, 29. But it is not improbable in itself; it supplies the account of the descent of the mother of the chosen race, the omission of which in such a passage is most unlikely; and there is no other to set against it, except the assertion of Abraham himself that Sarai was his half-sister, "the daughter of my father, but not the daughter of my mother" (Gen. xx, 12); but this is held by many to mean no more than that Haran her father was his half-brother; for the collocation of the Hebrews in this matter makes it easy to understand that he might call a niece a sister, and a granddaughter a daughter. In general discourse, "daughter" comprised any and every female descendant, and "sister" any and every consanguineous relationship. (See Stempel, De Abrahamo Matrimonio Dissimulato [Viteb. 1714].) In that case Abraham was really her uncle as well as husband. See BROTHERS.

3. Her History.—This is substantially, of course, that of Abraham, with whom she went from Ur to Haran, from Haran to Canaan, and accompanied him in all the wanderings of his life. Her only independent action is the demand that Hagar and Ishmael should be cast out, far from all rivalry with her and Isaac; a demand symbolically applied in Gal. iv, 22-31 to the displacement of the servant by the covenant by the New Testament, in which she plays the most important part in the history. It is the times when Abraham was sojourning, first in Egypt, then in Gerar, in both which cases Sarah shared his dislike towards Pharaoh and towards Abimelech. On the first occasion, about the middle of her life, her personal beauty is dwelt upon as its cause (Gen. xi, 15-16); on the second, just before the birth of Isaac, at a time when she was old (thirty-seven years before her death), but when her vigor had been miraculously restored, the same cause is alluded to as supposed by Abraham, but not actually stated (xx, 9-11). In the former case the commendations which the princes of Pharaoh bestowed upon her as a mark of her beauty, and the lovely stranger whose eyes were not to be inordinately attracted by a fresh complexion. In both cases, especially the last, the truthfulness of the history is seen in the unfavorable contrast in which the conduct both of Abraham and Sarah stands to that of Pharaoh and Abimelech. She died at He-
bron at the age of one hundred and twenty-seven years, twenty-eight years before her husband, and was buried by him in the cave of Machpelah, B.C. 2027. Her burial-place, purchased of Ephron the Hittite, was the only possession of Abraham in the Land of Promise. It has remained, hallowed in the eyes of Jews, Christians, and Mohammedans alike, to the present day; and in it the “shrine of Sarah” is pointed out opposite to that of Abraham, with those of Isaac and Rebekah on the one side, and those of Jacob and Leah on the other (see Stanley’s Celtic on Jewish Church, app. ii, p. 484–490). See Abraham.

4. Her Character.—This is no ideal type of excellence, like that of Abraham, but one thoroughly natural and truly feminine, both in its excellences and its defects. Her natural motherly affection is seen in her from the beginning of Abraham's life, both from her kindness and in her unforgiving jealousy of that bondmaid when she became a mother; in her rejoicing over her son Isaac, and in the spirit which resented the slightest insult to him and forbade Ishmael to share his sonship. It makes her cruel to others as well as tender to her own. Her love for Abraham, which is natural feeling on the part of Abraham to God's command in the last case (Gen. xxi, 12). To the same character belong her ironical laughter at the promise of a child, long desired, but now beyond all hope; her trembling denial of that laughter, and her change of it to the laughter of thankful joy, which she commemo-rated in the birth of Isaac; her anxiety to take out of her bondmaid, and truly affectionate, but impulsive, jealous, and impetuous in its affection.

Sarah, however, is so rarely introduced directly to our notice that it is difficult to estimate her character justly for want of adequate materials. She is seen only when her presence is needed by Abraham; and then she appears with more of submission and of simplicity than of dignity, and manifests an unwise but not unusual promptitude in following her first thoughts, and in proceeding upon the impulse of her first emotions. Upon the whole, Sarah scarcely meets the idea the imagination would like to form of the life-companion of so eminent a person as Abraham. Nevertheless, we cannot fail to observe that she was a most attached and devoted wife. Her husband was the central object of all her thoughts; and he was not forgotten even in her first transports of joy at becoming a mother (Gen. xxiii, 7). This is her highest eulogy.

It is asked whether Sarah was aware of the intended sacrifice of Isaac, the son of her long-deferred hopes. The chronology is uncertain and does not decide whether this transaction occurred before or after her death. She was probably alive; and if so, we may understand from her influence employed by Abraham that she was not acquainted with the purpose of the journey to the land of Moriah, and, indeed, that it was the object of these precautions to keep from her knowledge a matter which must so deeply wound her heart. He could have the less difficulty in this if his faith was such as to enable him to believe that he should bring back in safety the son he was commanded to sacrifice (Gen. xii, 19). As, however, the account of her death immediately follows that of this sacrifice, some of the Jewish writers imagine that the intelligence killed her, and that Abraham found her dead on his return (Targ. Jonaith, and Jarchi on Gen. xxiii, 2; PARKER ELLIOT, E. 59). This seems to be no authority for such an inference.

Isaiah is the only prophet who names Sarah (II. 2). Paul alludes to her hope of becoming a mother (Rom. iv, 19); and afterwards cites the promise which she received (ix, 9); and Peter eulogizes her submission to her husband (I Pet. iii, 6).

2. (Heb. Sā'raḥ, שׁרָאָר, Sept. Saray, “Sarah,” Numb. xxi, 6; being there “in pause” Sāracha, שׁארָחא, the daughter of the patriarch Asher, elsewhere (Gen. xlii, 17; 1 Chron. vii, 80) more properly Anglicized Sērah (q. v.).

Sārā (Heb. Saray, שָׂרָא; Sept. Σαρά; Vulg. Sar-raith), the original name of Sarah, the wife of Abraham. It is always used in the history from Gen. xi, 29 to xxvii, 15, when it was changed to Sarah at the same time that the name of Abraham became Abraham, and the birth of Isaac was more distinctly foretold. The meaning of the name appears to be, as Ewald has suggested, “contentions.” See Sarah.

Sarah’s (Σαραία) v. r. [in No. 2] Σαραϊα), the Greek form of Sērah (q. v.), namely: (a) the high-priest (1 Esdr. v, 6); (b) the father of Ezra (1 Esdr. viii, 19; 2 Esdr. ii, 29). See Sarīmā, Sarāmēl (Σαρίμα, v. Σαρίμμα), the place where the assembly of the Jews was held at which the high-priesthood was conferred upon Simon Maccabæus (1 Macc. xiv, 28). The fact that the name is found only in this passage has led to the conjecture that it is an imperfect version of a word in the original Hebrew or Syriac from which the present Greek text of the Mac- cabees is a translation. Some (as Castellio) have treated it as a corruption of Jerusalem; but this is inadmissible, since it is inconceivable that so well-known a name should be corrupted. Other conjectures are enumerated by Grimm in the Kurszge, coeraetisches Handb. on the passage. A few only need be named here, but the whole of them are perfectly unsatisfactory. All agree in desiring to adopt the reading Asaramel. (1) Hos-heitar Millo, “the court of Millo,” Millo being not improbably the citadel of Jerusalem. See MILLO. This is the conjecture of Grotius, and has at least the merit of ingenuity. (2) Hos-heitar Am-El, “the court of the people of God,” that is, the great court of the Temple. This is due to Ewald (Gesch. iv, 387), who compares it with the well-known Sarbeth Sobanaï-El, given by Eusebius as the title of the Maccabean history. See MACCAEBEUS. (3) Hasheitar Am-El, “the gate of the people of God,” adopted by Winer (Realch.). (4) Hos-sar Am-El, “prince of the people of God,” as is not the name of a place, but the title of Simon, the “in” having been inserted by puzzled copyists. This is adopted by Grimm himself. It has in its favor the fact that without it Simon is here styled high-priest only, and his second title, “captain and governor of the Jews and priests” (ver. 47), has been omitted in the solemn official record of the very place where it ought to be found. It also seems to be conterminous with the Peshibo-Syriac version, which certainly omits the title of “high-priest,” but inserts Rabbbo de-Israel, “leader of Israel.” None of these explanations, however, can be regarded as entirely satisfactory.

Sarah, in Hindu mythology, is a superstitious bow belonging to Vishnu, whose arrows never fail to reach their mark and return of themselves to Vishnu. See SARANATI, in the Greek Church, are masses for the dead during forty days.

Sāraḥ. See SāRAPHIM; SERPENT.

Sārakh (Heb. Sarach, שׁרָאָך, burning; Sept. Saraph v. r. Σαραθία), named as one of the sons or descendants of Shelah the son of Judah (1 Chron. iv, 22), and he seems to have lived about the time of the Exode, as he is said to have had the dominion in Moab, B.C. cir. 1618. BURRINGTON (Geology, i, 179) makes Saraph a descendant from whom he regards as the third son of Shelah. In the Targum of Jarchi, Pharaoh and Saraph are identified with Mahlon and Chilion, “who married (בְּרִית) in Moab.”

SARASA, ALPHONSE ANTOINE DE, a Flemish Jesuit of the last century, was born at Nieuwpoort of Spanish parents. At the age of fifteen he entered the Society of Jesus, and afterwards taught in the College of Gaul. Later he gave himself to the study of mathematics,
which he had studied under the famous Gregory de St. Vincent, and passed the remainder of his life in retirement. He died at Avrua, July 5, 1567. He wrote a Catechism, translated into French under the title L'Art de se Trompiller dans les Evénements de la Vie. This work was held in high regard by Leibnitz, Wolf, and others of their school.

Saraswati (or Sarasvatî) is, in Hindû mythology, the name of the wife, or the female energy, of the god Brahman, the first of the Hindû Trimurti, or triad. She is also the goddess of music and eloquence, the patroness of music and the arts, and the inventor of the Sanscrit language and the Devanâgarî letters. She was induced to bestow these benefits on the human race by the sage Bharata, who, through his penance, caused her to descend from heaven, and to divulge her inventions. Hence she is called Bhârati. She is also very white, hence another of her names, Mahâdevatâ or Mahânâkî (from maha, great, and naka, white).—Chamber's Encyclopedia, n. v.

Saraswati is also the name of a stream which flows into the Ganges at Haridwar. According to the myth, the goddess, being pursued, hid herself under the earth, and in the character of a stream forced her way until she reached her lover with whom she was united. Another tradition makes Sarasvatī the daughter of Brahma, whose beauty captivated the god himself. As she concealed herself behind him, he assumed five heads in order to look for her; but Siva, becoming angry, cut off one of them. She is usually represented as seated by the side of Brahmat.

Saravia, Hadrian A., classed among the English divines, although of Spanish extraction, was born at Hisdín, in Artois, France, in 1531. In 1582 he became professor of divinity and preacher to the French Church at Leyden. Influenced, doubtless, by his preference for episcopal government, he went to England in 1587, where he was well received by the prelates and divines. He first settled in Jersey, where he taught school and preached to his exiled countrymen there; afterwards he was master of the free grammar-school at Southampton. He was successively promoted to a prebend in the churches of Gloucester (1591), Canterbury (1595), and Winchester (1597). He showed a decided leaning in favor of the episcopacy against Beza, when the latter recommended its abolition in Scotland. He died in 1613, and was interred in Canterbury Cathedral. A collective edition of all his works, which were in Latin, was published in 1611 (Lond. 1 vol. 4to), under the title of Diversi Tractatus Theologici: De Diversi Gratiosum Ministerii Evangelici. See Hagenbach, Hist. of Doctrine, ii, 168, 186.

Sarceius, Erasmus, an able practical theologian of the 16th century, was born at Annaberg, in Saxony, in 1501. He studied first at Leipzig, then at the feet of Luther and Melancthon in Wittenberg. In 1530 he left the university and became co-rector of a Latin school at Lubeck. Laboring here with some irruption into the Reformation, he was charged with heresy in Nassau. From 1538 he gave his attention exclusively to the work of reforming the Church of Nassau, presiding at synods, instructing the clergy, and furnishing them with written works on practice and doctrine. But, unwilling to sanction the Interim (1548), he resigned his position, retired to Annaberg, and in 1549 became a pastor in Leipzig. In 1553 he was called to be church superintendent in Eisleben. In 1559 he accepted a call as preacher at St. John's in Magdeburg; but the high Lutheran clergy scented heresy in his mild and genial sermons, and assailed him in pamphlets. Worn out with labor, he speedily succumbed. He died in 1563, in his sixty-eighth year. In character, Sarcceius was firm, conscientious, blameless. A stranger to flattery, he walked among princes as an equal, and never quailed before a foe. His works were highly esteemed and much studied. We mention only, Ameno- sung die heilige Schrift zu interpretiren (Baele, 1528);—A˙cseychylos, de Tractatu de Ratione Discendi Theologiae (1538);—Con- ciones Americanae (1544);—De Controversiis Veræ Ecclesiæ et S. Patrum;—a loci Communæ Theologiae (1542?);—Pastorale (1559). (J. P. L.)

Sarceius, Wilhelm, the only son of the preceding, was pastor at Eisleben, but lost his position because of holding the opinions of Fiacius (q. v.). He went thence to Mansfeld, where he died as court-preacher. He published a Lehrs, and was Wittenberg Professor of Theology, and held the Chair of Hebrew.—Gottliebes Herbarium; Feuchtw. Früh. Christi;—Hollischer Trauergesang. See Herzog's Real-Encyclopedia, xx, 682-686.

Sarcombenous (Σαρκομμόνος, v. t. Σαρκομμόν, Σαρκομμόν), a Graceved Tomb (Iob, i, 21) for the name of the Assyrian king Esar-Haddon (q. v.).

Sardes (Σάρδης, v. t. Σάρδης, Σαρδής), a corrupt Greek form (1 Esdr. ix, 28) of the name Assiz (q. v.) of the Heb. list (Ezra x, 27).

Sardessus, in Greek mythology, is an appellative of Jupiter, derived from the city of Sardesius, in Lydia.

Sardica, in Illyria. A council was held at this place in 347, by order of the emperors Constantius and Constans, whom Athanasius, persecuted by the Euse- bians, had petitioned to convene a council. Twenty canons were drawn up, and regulations made concerning Easter.

Sardine (σάρδις, apparently an adjectival from σαρδίων, which has the same signification), the name of a gem (Rev. iv, 8). See Sardius.

Sardis (Σάρδης, of uncertain etymology), a city of Asia Minor, the capital of the ancient kingdom of Lydia. It was situated about two miles to the south of the river Hermus, just below the range of Tmolus (Bos Dagh), on a spur of which its acropolis was built, in a fine plain watered by the river Pactolus (Herod. vii, 91; Xenophon, Cyrop. vii, 2-11; Pliny, Hist. Nat. iii, 225). It is in lat. 38° 30' N., long. 27° 57' E. Sardis was a great and ancient city, and, from its wealth and importance, was the object of much curiosity and of many sieges.

1. Ancient History.—The Lydians, or Ludim, whose metropolis Sardis was, were the descendants of Lud the son of Noah, and were not to be confounded with Ludim, the children of Lud the son of Misram the son of Ham, who dwelt and settled in Egypt. These latter were the nation alluded to by Jeremiah (xlix, 9) when he speaks of "the Lydians that handle the bow:" the distinction will appear the more clearly from the fact that the Lydians and the Libyans are mentioned together as embracing the same cause. The Semitic Ludim were a warlike, active, and energetic people, and established an empire extending as far east as the river Halys. The city of Sardis, although of more recent origin than the Trojan war (Strabo, xxiii, 625), was very ancient, being mentioned by Aschylus (Pers, 49); and Herodotus relates (i, 84) that it was founded by Grecian kings Meles, who (according to the Chron. of Eusebius) preceded Candaules. The city itself was, at least at first, built in a rude manner, and the houses were covered with dry reeds, in consequence of which it was repeatedly destroyed by fire; but the acropolis, which some of the ancient geographers identified with the Homeric Hyble (Strabo, xxiii, 626; comp. Pliny, v. 30; Eustath. ad Dion. Per. 880), was built upon an almost inaccessible rock. In the reign of Ardys, Sardis was taken by the Cimmerians, but they were unable to gain possession of the citadel. Over this realm a series of able princes ruled, the last of whom, Croesus, obtained a world-wide fame for his wealth, his misfortunes, and his philosophy. The earlier part of his reign was one of unusual glory; he extended his dominion over the
whole of Asia Minor with the exception of Lycia and Cilicia, and displayed as much ability as an administrator as he had done as a conqueror. But the rising power of Cyrus soon came into collision with his own, and, by the capture of Sardis, the Persian prince brought to a close the Lydian rule.

Cresus is said to have advised the victor to discourage the martial spirit of the Lydians by restraining them from all warlike occupations, and employing them in those arts only which minister to luxury and sensuality. Cyrus is reported to have taken the dissertation, and the result was that, from ranking among the bravest and hardest nations of antiquity, the Lydians became the most helpless and effeminate.

After its conquest, the Persians always kept a garrison in the citadel, on account of its natural strength, which induced Alexander the Great, when he was surrendered to him in the sequel of the battle of the Granicus, similarly to occupy it. Sardis recovered the privilege of municipal government (and, as was alleged several centuries afterwards, the right of a sanctuary) upon its surrender to Alexander the Great, but its fortunes for the next three hundred years are very obscure. It is not clear whether it had more than once in the course of time been the scene of severe contests between the dynasties which arose after the death of Alexander. In the year B.C. 214 it was taken and sacked by the army of Antiochus the Great, who besieged his cousin Achaeus in it for two years before succeeding, as he had done before through treachery, in obtaining possession of the person of the latter. After the ruin of Antiochus's fortresses, it passed, with the rest of Asia on that side of Taurus, under the dominion of the kings of Pergamus, whose interests led them to divert the course of traffic between Asia and Europe away from Sardis. Its productive soil must always have continued a source of wealth; but its importance as a central mart appears to have diminished from the time of the invasion of Asia by Alexander. After their victory over Antiochus it passed to the Romans, under whom it still more rapidly declined in rank and prosperity.

In the time of the emperor Tiberius, Sardis was desolated by an earthquake (Strabo, xii, p. 573), together with eleven, or, as Eusebius says, twelve other important cities of Asia. The whole face of the country is said to have been changed by this convulsion. In the case of Sardis the calamity was increased by a pestilential fever which followed; and so much compassion was in consequence excited for the city at Rome that in its ruin was found a five-year-old child, and it derived yearly from the public treasury a benefit from the privy purse of the emperor (Tacitus, Ann. ii, 47). This was in the year A.D. 17. Several years afterwards the Sardians are found among the competitors for the honor of erecting, as representatives of the Asiatic cities, a temple to their benefactor. See Smyrna. On this occasion they plead, not only their ancient services to Rome in the time of the Macedonian war, but their well-watered country, their climate, and the richness of the neighboring soil; there is no allusion, however, to the important manufactures and the commerce of the early times. In the time of Pliny it was included in the same enumeration with Philadelphia, with the Cadocii, a Macedonian colony in the neighborhood, with some settlements of the old Meconian population, and a few other towns of less note. These Meconians still continued to call Sardis by its ancient name, Hydée, which it bore in the time of Omphale.

2. Biblical Notice.—The inhabitants of Sardis bore an ill repute among the ancients for their voluptuous habits of life. Hence, perhaps, the point of the phrase in the Apocalyptic message to the city, "These are they who have not defiled their garments" (Rev. iii. 4). The place that Sardis holds in this message, as one of the "Seven Churches of Asia," is the source of the peculiar interest with which the Christian traveller regards it. From what is said, it appears that it had already declined in importance, although it still maintained the name and external aspect of a Christian Church, "having a name to live, while it was dead" (Rev. iii. 1).

3. Description and Modern Remains.—Sardis was in very early times, both from the extremely fertile character of the neighboring region and from its convenient position, a commercial mart of importance. Chestnuts were first produced in the neighborhood, which procured them the name of βάλανος Σαρδαίων. The art of dyeing wool is said by Pliny to have been invented there; and, at any rate, Sardis was the entrepôt of the dyed woollen manufactures of a peculiarly fine texture, which, called ϕολοστιφίκες, the ball through which the king of Persia passed from his state apartments to the gate where he mounted on his horse was laid with these, and no foot but that of the monarch was allowed to tread on them. In the description given of the habits of a young Cyprian exquisite for wealth and riches, he is represented as reposing upon a bed of which the feet were silver, and upon which these ϕολοστιφίκες Σαρδαίων were laid as a mattress. Sardis, too, was the place where the metal electrom was procured (Sophocles, Antig. 1087); and it was thither that the Spartans sent in the 6th century B.C. to purchase gold for the purpose of gilding the face of the Apollo at Amyclae. This was probably furnished by the auriferous sand of the Pactolus, a brook which came from Tmolus and ran through the agora of Sardis by the side of the great temple of Cybele. But, though its gold-washings may have been celebrated in early times, the greatness of Sardis in its best days was much more due to an inland commercial and speculative convenience as an entrepôt. This seems to follow from the statement that not only silver and gold coins were there first minted, but there also the class of κατάπλω (stationary traders, as contradistinguished from the μονοπωλοι, or travelling merchants) first arose. It was also, at any rate between the rise of the Lydian and that of the Persian dynasty, a slave-mart.

Successive earthquakes and the ravages of the Saracens and Turks have reduced this once flourishing city to a heap of ruins, presenting many remains of its former splendor. The habitats of the living are confined to a few miserable cottages, still fonnic Phrygian, with its flag, and a few other houses, such as the modern name of great was at Sardis is Bit-ı-Kale-i. Travellers describe the appearance of the locality as approaching it from the north-west as that of complete solitude. The Pactolus is a mere thread of water, all but evanescent in summer-time. The Wadis-tchai (Hermus), in the neighborhood of the town, is between fifty and sixty yards wide and nearly three feet deep; but its waters are turbid and disagreeable, and are not only avoided as unfit for drinking, but have the local reputation of generating the fever which is the scourge of the neighboring plains. A countless number of se-
pulchral hillocks, beyond the Hermus, heighten the desolation of a spot which the multitudes lying there once made busy by their living presence and pursuits. The acropolis seems well to define the site of the city. It is a marked object, being a tall distorted rock of soft sandstone, rent as if by an earthquake. The acropolis is very difficult of ascent; it has a few fragments of ruinous walls on the summit, but no remains are visible of the temple which Alexander built there in honor of the Olympian Jove. The almost perpendicular wall towards the south was considered impregnable, and Cressus therefore, in defending his capital against Cyrus, omitted to guard it; but a Persian soldier, seeing a Lydian descendant by a path of steps cut in the rock in order to regain his helmet, which had fallen down, watched his proceedings, and led a body of Persian troops into the acropolis itself.

Cockerell, "to surpass any specimen of the Ionic he had seen in perfection of design and execution." On the north side of the acropolis, overlooking the valley of the Hermus, is a theatre near four hundred feet in diameter, attached to a stadium of about one thousand. This probably was erected after the battle of Cares by Alexander. In the attack of Sardis by Antiochus, described by Polybius (vii, 15–18), it constituted one of the chief points on which, after entering the city, the assaulting force was directed. The temple belongs to the era of the Lydian dynasty, and is nearly contemporary with the Temple of Zeus Herophilus in Perga, and that of Heri in Samos. To the same date may be assigned the "Valley of Sweats" (γαλακτικὸς ἄγεων), a pleasure-ground, the fame of which Polybius endeavored to rival by the so-called Laura at Samos.

Asie en Apocal.; Richter, Wohltheilen, p. 511 sq.; Pfy0esch, Denkwurdeig, ii, 31 sq.

**Sardite** (Heb. *Sardi*), יָרָדִי, was used as a pluri. with the art. prefixed; Sept. *Ephoditi*, the patronymic title (Numm. xxvi, 26) of the descendants of Sered (q.v.), the son of Zebulon.

**Sardius** (Heb. יָרָדִי, o'dem; Sept. and New Test., ἁρπάζων), one of the precious stones in the breastplate of the high-priest (Exod. xxviii, 17; xxxix, 10). So also Josephus (War, v, 5, 7), who places Jos., ii, 6, makes it the sardonyx (σαρδόνυξ). Still, as this latter-named mineral is merely another variety of agate, to which also the sard or sardius belongs, there is no very great discrepancy in the statements of the Jewish historian. See SARDONYX. The o'dem is mentioned by Ezek. (xxviii, 13) as one of the ornaments of the king of Tyre. In Rev. iv, 3, John declares that he whom he saw sitting on the heavenly throne "was to look upon like a jasper and a sardine stone." The sixth foundation of the wall of the heavenly Jerusalem was a sardius (Rev. xii, 20). There can scarcely be a doubt that either the sard or the sardonyx is the stone denoted by o'dem. The authority of Josephus in all that relates to the high-priest's breastplate is of the greatest value; for, as Braun (De Vert. Scit. Heb. p. 635) has remarked, Josephus was not only a Jew, but a priest, who might have seen the breastplate with the whole sacerdotal vestments a hundred times, since in his time the Temple was standing. The Vulgate agrees with his nomenclature. In Jerome's time the breastplate was still to be inspected in the Temple of Concord; hence it will readily be acknowledged that this agreement of the two is of great weight. The sard, which is a superior variety of agate, has long been a favorite stone for the pugnator's art. "On this stone," says King (Jer. (came, p. 3), "all the finest works of the most celebrated artists are to be found; and this not without
Sardo, in Greek mythology, was the daughter of Sthenelus, whose name was given to the city of Sardis.

Sardonyx (σαρδόνυξ, from σαρδός, the sardius, and οῦρα, the ovis, the aurochs) is mentioned in the New Test, once only—in Rev. xx. 20—where it is listed among the stones which garrisoned the fifth foundation of the wall of the heavenly Jerusalem. "By sardonyx," says Pliny (N. H. xxxvii. 6), who describes several varieties, "was formerly understood, as its name implies, a sard with a white ground beneath it, like the flesh under the finger-nail." The sardonyx consists of a white opaque layer, superimposed upon a red transparent stratum of the true red sard (King, Ant. Gena, p. 9). It is, like the sard, merely a variety of agate, and is frequently employed by engravers for the purposes of a signet-ring. It is a species of onyx, distinguished from the common sard by its different colour, and more white, disposed in alternate bands. But there is another stone so called, whose tint is reddish yellow or orange, with sometimes a tinge of brown (Moore, Anc. Mineral. p. 158).

Sardus, in Greek mythology, was the son of Mecres, who was known as Hercules among the Libyans and Egyptians. He led a colony of Libyans to the island of Icchusa, where he settled there without driving away the original inhabitants. The Libyans subsequently sent a statue of Sardus as a votive offering to Delphos, and gave his name to the island, which thereafter was known as Sardinia.

Sar'ēēl (Vulg. ēl, for the Greek text is not extant), one of the five scribes "ready to write swiftly" whom Ezra commanded to take (2 Esdr. xiv. 24).

Sarepta (Σαρέπτα; Vulg. Sarepta; Syrian, Sarr'paḥ), the Greek form of the name which in the Hebrew text of the Old Test. appears as Zarephath (q. v.). The place is designated by the same formula on its single occurrence in the New Test. (Luke iv. 26) that it was first mentioned in the Sept. version of 1 Kings xvii. 9, "Sarepta of Sidonia."

Seresok, in Persian mythology, is a bulbous formed by Ormuzd out of the generative powers of the primitive ox which was slain by Ahraman. Seresok supplied the world with animals, and became one of the greatest benefactors of mankind.

Sargon (Heb. Sarg'wôn; סרגון), either prince of the sun [Gesenius] or firm king [Rawlinson]; Sept.'Aḇrāh. v. r. Naḇûḏi, a king of Assyria, whose general, Tartaš, in the time of Hezekiah, besieged Ashdod, the key of Egypt, whereafter the Egyptians were invading that country (Isa. xx. 1 sqq.). B.C. 715.

Sargon was one of the greatest of the Assyrian kings. His name is read in the native cuneiform inscriptions (q. v.) as Sarg'nušu (see Layard, Nin. and Bab. p. 148), while a town which he built and called after himself (now Khorsabad) was known as Sarg'nušu to the Arabian geographers. He is mentioned by name only once in Scripture (as above), and then not in a historical book, which formerly led historians and critics to suspect that he was not really a king distinct from those mentioned in Kings and Chronicles, but rather one of those kings under another name. (Spicileg. p. 125 sqq., Eichhorn, and Hufeldt (De Debus Assyriar. p. 51) identified him with Shalmaneser; Grotius, Lowth, and Keil (comp. also Schröer, Imper. Babyl. p. 152) with Sennacherib; Perizonius, Kalinsky, and Michaelis with Esarhaddon. All these conjectures are now shown to be wrong by the Assyrian inscriptions, which prove Sargon to have been distinct and different from the several monarchs named, and fixed his place in the list—where it had been already assigned by Paulus, Rosenmuller, Gesenius, Knobel, Ewald, and Winer—between Shalmaneser and Sennacherib. He was certainly Sennacherib's successor, and there is no reason to doubt that he was his immediate predecessor (see Jour. of Succ. Lit. July, 1854, p. 398 sqq.). He ascended the throne of Assyria, as we gather from his annals, in the same year that Merodach-Baladan ascended the throne of Babylon, which, according to Ptolemy's canon, was B.C. 721. This is Col. Rawlinson's date (Lond. Afternoon, Aug. 22, 1863, p. 245). But the synchronism with the Hebrew annals (see Hezekiah; Samaaria) would locate Sargon's accession in B.C. 720. G. Smith puts it in B.C. 722 (Hist. of Assyria, ch. x.), and so Prof. Rawlinson (Ancient Monarchies, ii. 141). He seems to have been a usurper and a not of royal birth; for in his inscriptions he carefully avoids all mention of his father. It has been conjectured that he took advantage of Shalmaneser's absence at the protracted siege of Samaaria (2 Kings xvii. 5) to effect a revolution at the seat of government, by which that king was deposed and he himself substituted in his room. See Shalmanezer.

It is reported that Sargon claims the conquest of Samaaria, which the narrative in Kings appears to assign to his predecessor. He places the event in his first year, before any of his other expeditions. Perhaps, therefore, he is the "king of Assyria" intended in 2 Kings xvii. 6 and xviii. 11, who is not said to be Shalmaneser. It is reported that Sargon claims the conquest of Samaaria, which in no other name being mentioned. Or perhaps he claimed the conquest as his own, though Shalmaneser really accomplished it, because the capture of the city occurred after he had been acknowledged king in the Assyrian capital. At any rate, to him belongs the settlement of the Samaarians (37,280 families, according to his own statement) in Halah and on the Habor (Khahlûr), the river of Gozan, and (at a later period, probably) in the cities of the Medea.

Sargon was undoubtedly a great and successful warrior. In his annals, which cover a space of fifteen years, he gives an account of his warlike expeditions against Babylonia and Susiana, on the south; Media, on the east; Armenia and Cappadocia, towards the north; Syria, Palæstine, Arabia, and Egypt, towards the west and south-west (see Records of the Past, vii. 25 sqq.). In Babylonia he deposed Merodach-Baladan and established a viceroy; he also captured and set a number of peoples, including the Atrekae, and the Greek people with captives from other quarters; in Armenia and the neighboring countries he gained many victories; while in the far west he reduced Philistia, penetrated deep into the Arabian peninsula, and forced Egypt to submit to his arms and consent to the payment of a tribute. In this last direction he seems to
have waged three wars—one in his second year, for the possession of Gaza; another in his sixth year, when Egypt itself was the object of attack; and a third in his ninth, when the special subject of contention was Ashdod, which Sargon took by one of his generals. This is the event which causes the mention of Sargon's name in Scripture. Isaiah was instructed at the time of this expedition to "put off his shoe, and go naked and barefoot," for a sign that "the king of Assyria should lead away the Egyptians prisoners, and the Ethiopians captives, young and old, naked and barefoot, to the shame of Egypt." (Isa. xx. 2-4.) We may gather from this either that Egyptians and Ethiopians formed part of the garrison of Ashdod, and were captured with the city, or that the attack on the Philistine town was accompanied by an invasion of Egypt itself, which was disastrous to the Egyptians. The year of the attack, it is thought, would fall into the reign of the first Ethiopian king, Sabaco I (Rawlinson, Herodotus, i, 386, note 7, 2d ed.), and it is in agreement with this Sargon speaks of Egypt as being at this time subject to Meroci. Besides these expeditions of Sargon, his monuments mention that he took Tyre, and received tribute from the Greeks of Cyprus, against whom there is some reason to think that he conducted an attack in person. The statue of Sargon, now in the Berlin Museum, was found at Ithulion in Cyprus. It is not very likely that the king's statue would have been set up unless he had made the expedition in person.

It is not as a warrior only that Sargon deserves special mention among the Assyrian kings. He was also the builder of useful works and of one of the most magnificent of the Assyrian palaces. He relates that he thoroughly repaired the walls of Nineveh, which he seems to have elevated from a provincial city of some importance to the first position in the empire; and adds, further, that in its neighborhood he constructed the palace and town which he made his principal residence. This was the city now known as "the French Nineveh," or "Khorassab," from which the valuable series of Assyrian monuments at present in the Louvre was derived almost entirely. Traces of Sargon's buildings have been found also at Nimrod and Koyunjik; and his time is marked by a considerable advance in the useful and ornamental arts, which seem to have profited by the connection that he established between Assyria and Egypt. He left the throne to his son, the celebrated Sennacherib (q. v.). The length of Sargon's reign is variously reckoned by Assyriologists as from fifteen to nineteen years. See ASSYRIOLGY. Comp., in addition to the above, the following monographs by Oppert: Les Fautes de Sargon (Paris, 1883); Les Inscriptions des Sargonides (ibid. sed.); also Strachey, Time of Sargon and Sennacherib (Lond. 1856). See ASSYRIA.

Sargon in his Chariot. (From the Sculptures at Khorsabad.)

Sar'd (Heb. Sur'id, סָרִיד, survivor, as often [Furst, place of refuge]; Sept. Surid v. r. Sarid'îcí, סֵדָאִיִּיכ, etc.), the point of departure on the southern boundary of Zebulon, lying west of Cheslloth Tabor, and south of Daberath and Japhia (Josh. xix., 10, 12). It was unknown to Josephus and Jerome. Justinus, v. r. "Sarith"); and the name has not been discovered by modern research. Knobel, holding the word to mean an "incision," thinks it designates merely the southern opening of the deep and narrow wady which comes down from the basin of Nazareth (q. v.), between two deep mountains (Seezeen, ii, 151 s.; Robinson, iii, 188). Keil more definitely suggests that it may be found in one of the two heaps of ruins on the south side of the modern "Mount of Precipitation," namely those near el-Mezrach, on the north-west. See Tribe; ZEBULON.

Sarganî. An Arabian sect of this name is mentioned by Asseman. He considers them to have been a branch of the Menemites (q. v.). They held the opinions of Paul of Samosata and of Arius, but were converted and admitted to Catholic communion by Maranames, metropolitan of Adiabenus, in the year 760. Some, however, were found a hundred years later in Babylon.

Sarmenlitii, one of the numerous opprobrious epithets with which the enemies of the early Christians accosted them. It is derived from the word sarmenta, sarmina, the piles of fagots around the stake to which the martyr was fastened.

Sar'ôn (ο Σαρών v. r. άσσαράν, i. e. Σαρών, the Sharon), the district in which Lydda stood (Acts ix, 35); the Greek form of the name SHARON (q. v.) of the Old Test. "The absence of the article from Lydda, and its presence before Saron, is noticeable, and shows that the name denotes a district—as in 'The Shefelah, and in our own 'The Weald,' 'The Downs,'"

Saron, in Greek mythology, was a king of Trozene, who was fond of the chase, and built a temple to Diana. While pursuing a deer he fell into the gulf which was from that time known as the Saronian Gulf. He was buried in the grove of Diana.

Saronia (Σαρωνια), a surname of Artemis at Trozene, where an annual festival was celebrated in her honor under the name of Sarothes. See SARONS.

Saro'thîi (Σαρωθĭι v. r. Σαρωθίι; Vulg. Curoneth), a person named (1 Esdr. v, 34) as one of the heads of the families of "Solomon's servants" who returned from Babylon with Zerubbabel; but see the Hebrew lists (Ezra ii, 57; Neh. vii, 99).

Sarpédon, in Greek mythology, was (1) a son of Jupiter and Europa, who quarrelled with his brother Minos and was compelled to leave Crete. He took possession of Lycaon, and was permitted by Jupiter to live the period of time allotted to three generations of men. (2) A son of Jupiter and Laodamia, the daughter of Bellerophon. His uncles were engaged in a protracted dispute for the possession of the crown of Lycaon, which was decided in favor of the former, but afterwards he was awarded to him who should shoot a ring from the breast of an uninjured child. Laodamia presented her son for this trial, and the generosity of the mother led to his being appointed king. When the Trojan war broke out, both parties sought his aid. He decided in favor of Triam, and inflicted great injury on the Greeks. But he died at the beginning of the earth-shock, Telpeomon (being at the same time severely wounded himself), led the fifth part of the army in the storming of the fortifications, mounted the wall, slew Alcaeus and opened the way for the advance of the Trojans, and
covered Hector when stricken down by Ajax, but ultimately fell by the hand of Patroclus. His horses and armor became the spoil of the Greeks, but his body was, by Jupiter’s command, borne to Lyacia for honorable interment by the hands of Sleep and Death.

(5.) A son of Neptune and brother of Polty, who lived in Thessaly, and was given to deeds of violence. He was slain by Hercules.

Sarpedonía (Σαρπεδώνια), a surname of Artemis, derived from Cape Sarpedon, in Cilicia, where she had a temple with an oracle (Strabo, xiv, p. 676).

Sarpédonius, a surname of Apollo in Cilicia.

Sarpí. See Paul (Father).

Sarón, in Roman mythology, was a god of husbandry whose province was the hoeing and cultivating of the growing crops.

Sarschim (Heb., שָׁרֶשֶּם, Sarschéem), probably prince of the eunuchs; Sept. [with great confusion] נאשׂוֹדָעֵר y. n. נאשׂוֹפָעָעֵר, etc.; Vulg. Sarachina, one of the generals of Nebuchadnezzar’s army at the taking of Jerusalem (Jer. xxxix, 6), B.C. 586. He appeareth to have held the office of chief eunuch, for Rab-saris (q. v.) is probably a title and not a proper name. In Jer. xxxix, 13, Nebushashan is called Rab-saris, “chief eunuch,” and the question arises whether Nebushashan and Sarschim may not be names of the same person. Gesenius conjectures (Thesaur. s. v.) that Sarschim and Rab-saris may be identical, and both titles of the same office. See SAMGAR-NEBO.

Sárta (Σέρτα), the name of a mountain on which the Jews annually lighted the beacon-fire (the one next to the Mount of Olives) to herald the new moon (Reland, Palest., p. 346). In one passage it is erroneously written Sartan, יְסָרֵת (Schwarz, Palest. p. 162). It is undoubtedly the present Kurn Surtubah (Horn of Sartaba), on the edge of the Ghôr, or Jordan valley, not far north of Jericho (Robinson, Bibl. Res. iii, 242, new ed.). The summit still retains traces of the platform erected for building the beacon-fires, which Liet. Conder of the English Engineers has mistaken for the remains of the memorial altar of Josiah. xxii, 10 (Quar. Report of “Pal. Explor. Fund.”, Oct. 1874, p. 241 sq.).

Sarto, Andrea Vannucci, called Del Sarto, an Italian painter, was born at Florence about 1488. Having shown a taste for drawing, he was placed with a goldsmith to learn his trade. Giovanni Barile, a painter, persuaded his father to intrust him to his care, and he remained with Barile three years; he was then placed by him with Pietro Cosimo. Leaving the school of Cosimo, he formed an intimacy with Francisco Bigio, with whom he executed some works in the public buildings of Florence, which gained him considerable reputation. We are told by Vasari that Sarto passed some time in Rome. After his return, he painted for the Monastery of the Salvi his admired pictures of the Descent of the Holy Ghost, the Birth of the Virgin, and the Last Supper. Francis I, king of France, desirous of procuring specimens of Italian art, Sarto was commissioned to paint a picture for his majesty, and sent in a Dead Christ, with the Virgin, St. John, and other figures, which are now among the chief ornaments of the Gallery of the Louvre. The king invited him to Paris, where he obtained employment from Francis and the nobility. His wife urging his return to Florence, he obtained leave of absence, and was intrusted with a considerable sum of money for the purchase of statues, pictures, etc. Having spent the king’s money, as well as his own, he sank into poverty, and died of the plague in 1530.

The churches, convents, and palaces of Florence contain many of his best works. In the National Gallery are two pictures by him, the Holy Family and his own portrait.

S attribution, one of the ablest, most fruitful, and genial theologians of modern orthodox Lutheranism, was born at Darmstadt, May 10, 1797, and died at Königsegg June 18, 1859. While studying at Göttingen (1815-18), he fell under the earnest religious influence of Panck. In 1819 he began his public lecturing in the University, and to the writing of those numerous genial writings which have induced some to call him the St. John of Lutheranism. The first that appeared was three essays—one on the Purpose of Jesus in Founding the Church; the second on the Origin of the Gospel (afterwards disavowed); and the third on the Doctrine of Grace and Faith in the Lutheran Church followed (1821) the Lutheran Doctrine of Human Ability, in which he opposed Schleiermacher. In 1821 he became professor of theology at Marburg. Here he issued two works, The Doctrine of Protestants as to the Respect due to the Civil Magistracy, and Religion Outside of the Limits of Mere Reason. In 1824 he received the doctorate and accepted a call to Dorpat. Here appeared successively his Contributions to Evangelical Orthodoxy, in which he opposed Rühr, Bretscheider, and Rationalism in general. In 1851 he issued his Discussion of the Person and Work of Christ, which speedily passed through seven editions, and was translated into other languages. Leaving two works attracted to him very general attention, as did also his contributions to Hengstenberg’s Church Journal, in which appeared from 1834 to 1836 his vigorous assaults upon Möhler’s Symbolik. After eleven years of academic labor at Dorpat, he was called to Prussia in 1835, and appointed to the position of superintendent-general of the province of Prussia and director of the royal consistory. He entered upon his duties with a sermon in the royal court-church at Königsberg in December. In 1840 he began his work on moral theology, Die Lehre von der heiligen Liebe, which, with its modifications and its revisions for new editions, occupied him until 1856, and which he justly regarded as his chief title to a place in the world of theology. The movements of the fanatical “Friends of Light” induced Sartorius to issue, in 1845, a work on the Necessity and Obligatoryness of the Creeds. In 1852 appeared his work on Primitive Worship, the Priesthood, and the Sacraments; in 1853 his Works of the Augsburg Confession; and in 1855 his Meditations of the Glorious Manifestations of God in his Church and the Presence of the Glorified Body of Christ in the Eucharist. After a ministry of twenty-four years, he died in the midst of his labors. The day before his decease he had labored upon a large polemical work against Romanism, published after his death by his disciple Giovanni Barile, a writer of ‘Deo Gloria! A Comparison of Lutheranism and Romanism in the Light of the Augsburg and the Tridentine Confessions, with Special Reference to Möhler’s Symbolik.’ Up to the end of his life he was a zealous contributor to Hengstenberg’s Church Journal. Some of his later papers were of a very severe polemical character. Only a few of his sermons have been printed. See Kurzt, Church History (Eng. transl.), ii, 372; Wuttke, Christian Ethics, i, 374; Herzog, Real-Encyclop. xiii, 426-428; Hagenbach, Hist. of Dogmatics, ii, 414, 406, 494. (J. P. L.)

Saíruch (Σαίρουχος), the Greek form (Luke iii, 95) of the name of the patriarch Seruq (q. v.), of the Syrian Reh. Saruk, Menachem, INS., an early Jewish scholar, was born at Basra, in Mesopotamia, in 860, and died about 970 at Cordova. He is the author of a Biblical dictionary called קסם פוני (Kesma Pinui), also קסם פוני also קסם פוני also קסם פוני, including the Aramaean of Daniel and Ezra, with explanations in Hebrew. A grammatical introduction precedes each letter (כומר מיקוד), and introductions relating to the preliminary grammatical studies, divided into ten chapters, supply in it the place of a grammar. Against this work Dunash ben-Labrat (q. v.) wrote a critique, which elicited a reply from Saruk. Saruk’s Leviya has been edited by Philipowski (Lond,1854). See First,
SARUM

Sarum, Use of. In former times each bishop had the power of making some improvements in the liturgy of his Church. In process of time different customs arose, and several became so established as to receive the names of their respective churches. The "use" or custom of Sarum derives its origin from Osmund, bishop of that see in A.D. 1078, and chancellor of England. Influenced by difficulties arising from an attempt to move away with the ancient Gregorian chanting, Osmund collected together the clergy, and composed a book for the regulation of ecclesiastical offices, which was entitled the Custom Book. The substance of this was probably incorporated into the missal and other ritual books of Sarum, and ere long almost the whole of England, Wales, and Ireland adopted it. When the archbishop of Canterbury celebrated the liturgy in presence of the bishops of his province, the bishop of Salisbury (probably in consequence of the general adoption of the "use" of Sarum) acted as precentor of the College of Bishops, a title which he still retains. See Use.

Sarvaguna, in Hindu mythology, is the all-seeing one, a surname of Siva.

Sarvastivāḍas, or Sarvastivādins (literally, those who maintain the reality of all existence), is the name of one of the four divisions of the Vaibhavika system of Buddhism. Its reputed father was Rāhula, the son of Buddha Sakyamuni. See Vaibhavika, Die Religion des Buddhismus (Berlin, 1857); Wassijew, Der Buddhismus und seine Dogmen (St. Petersburg, 1860).

Sarvātūla. See WORM.

Sassett, William Jeremiah, a minister of the Methodist Episcopal Church, South, was born in Hancock County, Ga., April 29, 1820, and graduated at Oglethorpe University in 1845. After graduation he studied law, but very early entered the ministry. His active work was soon interfered with by rheumatism. He then engaged in the work of education, and accepted, in 1849, the chair of English literature in Emory College, which he filled until 1858, when he became president of La Grange Female College. In Sept., 1858, he opened the Methodist College at Atlanta, Ga., which is still in existence, and at a very early day its halls were filled with young men, but the war coming on, so many of them entered the army that college exercises were necessarily suspended. Dr. Sassett retired to his farm in Georgia, where he remained until his death, Nov. 3, 1865. As a scholar, the attainments of Dr. Sassett were vast and extensive. As a preacher, his gifts were far from ordinary. Besides a large number of contributions to the periodical press, he published, Progress (1853):—Discussions in Literature (1860). See Minutes of Annual Conf. of Meth. Epis. Church, South, 1866, p. 574.

Sason, Aaron ben-Joseph. See Aaron ben-Joseph Sason.

Sasaortas, Jacob ben-Aaron, a Jewish writer, was born in Oran, North Africa. Very little is known about his early youth. In 1634 he became chief rabbi of six African communities, which position he held for two decades, when he was obliged to leave the country. In 1654 he arrived at Amsterdam, and a year later he was recalled by the emperor of Morocco, and charged with the ambassadorship to Spain. In 1668 he appeared as chief rabbi of London, which he left in 1672 for Hamburg. In the same year he was called to Amsterdam, and so likewise in 1680, where he went in 1698, to be gathered to his fathers in 1698. He is best known as the author of Hasid lekum, or index of Biblical passages which are explained in hagadaistic manner in the Jerusalem Talmud, being a supplement to the annotations of Ah. Pesaro (q. v.). He also wrote against the Pseudo-Messiah, Sabbatai Zebi (q. v.), in his *Habar olam belev ha-aretz* (Amst. 1737). See Fürst, Bib. Jud. iii, 251; Jost, Gesch. d. Judenth. u. s. Secten, iii, 168; Grätz, Gesch. d. Juden, x, p. 110 sq. (B. P.)

Sassanidae, the dynasty which succeeded that of the Arsacide on the throne of Persia (q. v.). See Müller, Chips from a German Workshop.

Sassi, Francesco Girolo, a noted monk, was born at Milan in 1678. He took orders in the brotherhood of the Oblates, and was made general of the order in 1700. He died at Milan, Nov. 2, 1721. He gave his life to religious instruction, and published several devotional works, among them Christi Laudes und Maria Laudes.

Satʹtan, the Scripture term for the chief of fallen spirits, and the arch-principle of evil. The doctrine of Satan and of satanic agency is to be made out from revelation, and from reflection in agreement with revelation. Suppose the subject need not deter us from a candid investigation of it.

I. Scripture Names or Titles of Satan.—Besides Satan, he is called the Devil, the Dragon, the Evil One, the Angel of the Bottomless Pit, the Prince of this World, the Prince of the Power of the Air, the God of this World, Apollyon, Apadon, Belial, Beelzebub. "Satan" and "devil" are terms by which he is distinguished from any other, the former being applied to him about forty times and the latter about fifty times. See each term.

Satan is the Hebrew word שֶׁטַּן, satan, transferred to the English. It is derived from the verb שָׁטַן, which means "to lie in wait," "to oppose," "to be an adversary;" hence, the noun denotes an adversary, or oppressor. The word in its generic sense occurs in 1 Kings xi, 14: "The Lord raised up an adversary (sidek; Sept. σαραίν) against Solomon," i.e. Hadad the Edomite. In the 23d verse the word occurs again, applied to Rezin. It is used in the same sense in 1 Sam. xxix, 4, where David is termed an adversary, and in Num. xii, 22, where the angel "stood in the way for an adversary (sidekin) to Balaam," i.e. to oppose him when he would go to Balak. It also occurs in Ps. lxxiv, 6, and the proverbial phrase "he that is an adversary (sidekin) to me is as my sword," Ps. lxxiv, 6, is the same as "he that is an adversary (sidekin) to me is as my sword." See also 2 Sam. xxix, 22, 1 Kings ii, 4, xi, 25, 1 Sam. ix, 6, where the Sept. has מֵעָרָיוֹן, מֶשֶׁכֵּשׁ, דַּבְּרֵי מְסֹלֹם, etc. In Ezch. iii, 1, the word occurs in its specific sense as a proper name. And he showed me Joshua the high-priest standing before the angel of the Lord, and Satan standing at his right hand to resist them. But the Lord said unto Satan, The Lord rebuke thee, O Satan. Here it is manifest, both from the context and the use of the article, that some particular adversary is denoted. In Job i, ii, the same use of the word with the article occurs several times. The events in which Satan is represented as the agent confirm this view. Here is a distinguished adversary and tempter. See also 1 Chron. xxvi, 1. In all these latter passages the Sept. has σαράϊν, and the Vulg. Sargan.

When we pass from the Old to the New Test., this doctrine of an invisible evil agent becomes more clear. With the advent of Christ and the opening of the Christian dispensation, the great opposer of that kingdom was Sion, and the work of his adversary and tempter, Saviour, would naturally become more active and more known. The antagonism of Satan and his kingdom to Christ and his kingdom runs through the whole of the New Test., as will appear from the following passages and their contexts: Matt. iv, 10; xii, 26; Mark iv, 15; Luke x, 18; xvii, 3; Acts xxviii, 18; Rom. xvii, 20; 2 Cor. xi, 14; Heb. ii, 13; xiii, 9. Peter is once called
Satan, because his spirit and conduct, at a certain time, were a direct imitation of the spirit and intent of Christ, and so much in the same line of direction with the workings of Satan. This is the only application of the word in the New Test. to any but the prince of the apostate angels. In the New Test. the word is αὐτάκις, followed by the Yulg. Satanas, except in 2 Cor. xii, 7, where σατάν is used. It is found in twenty-five places, all of them in the apostles' epistles, but all excepting the responding word οἱ δαίμονες in about the same number. The title οἱ δρόμοι τῶν κόσμων τούτων is used three times; οἱ σατανικοὶ is used certainly six times, probably more frequently, and οἱ παράδεισος twice.

Devil (δαίμονας) is the more frequent term of designation, as Satan to the New Test. Both "Satan" and "devil" are in several instances applied to the same being (Rev. xii, 9), "That old serpent, the devil and Satan." Christ, in the temptation (Matt. iv.), in his repulse of the tempter, calls him Satan; while the evangelists distinguish him by the term devil. Devil is the word δαίμονας transferred from the verb διαίμονας, "to thrust through," "to carry over," and, tropically, "to inform against," "to accuse." He is also called the accuser of the brethren (Rev. xii, 10). The Hebrew term Satan is more generic than the word devil, at least by its etymology. The former expresses his character as an opponent of all good; the latter denotes more particularly the relation which he bears to the saints, as their traducer and accuser. Δαίμονας is the uniform translation which the Sept. gives of the Hebrew Satan when used with the article. Farmer says that the term Satan is not appropriated to one particular person or spirit, but signifies an adversary, or opponent in general. This is to no purpose, since it is also applied to the devil as an adversary in particular. There are four instances in the New Test. in which the word "devil," diabolos, is applied to human beings. In three out of the four it is in the plural number, expressive of quality and not personality (1 Tim. iii, 11; 2 Tim. iii, 3; Titus ii, 15). In the fourth instance (John vi, 70), Jesus says to his disciples, "Have not I chosen you twelve, and one of you is a devil?" This is the only instance in the New Test. of its application to a human being in the singular number; and here Dr. Campbell thinks it should not be translated "devil." The translation is, however, of no consequence, since it is with the use of this word that the first and last of the great antitheses in the New Test. are introduced. It is the traditional name for the evil one, and indicates the obvious reasons for this application of δαίμονας to Judas, as an exception to the general rule, go to confirm the rule. The rule is that, in the New Test. usage, the word in the singular number denotes individuality, and is applied to Satan as a proper name. By the exception, it is applied to Judas, from his resemblance to the devil, as an accuser and betrayer of Christ, and from his contributing to aid him in his designs against Christ. With these exceptions, the unus quadam of the New Test. shows δαίμονας to be a proper name, applied to an extraordinary being, whose influence upon the human race is great and mischievous (Matt. iv, 1-11; Luke vii, 12. John v, 14. Acts xi, 19. Gal. iv. 11. 1 Pet. v, 8. 1 John iii, 8. Rev. xii, 9). See Devil.

The term "devil," which is in the New Test. the uniform translation of δαίμονας, is also frequently the translation of demon, δαιμων, and demonion, δαιμωνιον. Between these words and δαίμονας the English translators have made no distinction. The former are almost always used in the sense of angels, and are applied to the possessing spirits, but never to the prince of those spirits. On the other hand, δαίμονας is never applied to the demons, but only to their prince, thus showing that the one is used definitely as a proper name, while the others are used indefinitely as general terms. The sense which St. Augustine gives to δαίμονας, which in the English and most modern versions is lost, see Demon.

II. Personality of Satan.—We determine this point by the same criteria that we use in determining whether Cæsar and Napoleon were real, personal beings, or the personifications of abstract ideas. In the history concerning them, and the ascription of personal attributes to them. All the forms of personal agency are made use of by the sacred writers in setting forth the character and conduct of Satan. They describe him as having power and dominion, messengers and followers. He tempts and resists; he is held accountable, and is charged with having failed in his task of destroying the Jews in the Babylonian captivity and the Tribes of Israel. The punishment. On the supposition that it was the object of the sacred writers to teach the proper personality of Satan, they could have found no more express terms than those which they have actually used. To suppose that all thissemblance of a real, veritable, conscious moral agency is found in a tree; that the inspired penmen of the figure in such a way that, by no ascertained laws of language, it could be known that it was a figure—in such a way that it could not be taken to be a figure, without violence to all the rhetorical rules by which they on other occasions are known to have been guided. A personification protracted through such a book as the Bible, even should we suppose it to have been written by one person, is altogether anomalous and inadmissible. But to suppose that the several writers of the different books of the Bible, diverse in their style and intellectual habits, writing under widely differing circumstances, through a long period of nearly two thousand years, that Moses to John, fall into the use of the same personification, is to require men to believe that the inspired writers, who ought to have done the least violence to the common laws of language, have really done the most.

But there are other difficulties than these general ones by which the theory of personification is encumbered. This theory supposes the devil to be the principle of evil. Let it be applied in the interpretation of two or three passages of Scripture. "Then was Jesus led up of the Spirit into the wilderness to be tempted of the devil" (Matt. iv, 1-11). Was Jesus tempted by a real, personal being? or was it by the principle of evil? If by the latter, in whom or what did this principle reside? Was it in Jesus? Then it could not be true that in him was no sin. The very principle of sin was in him, which would have made him the tempter of himself. This is bad hermeneutics, producing worse theology. Let it also be remembered that this principle of evil is the modern term for the influence of some conscious moral being. Sin is evil only as it implies the state or action of some personal and accountable agent. Again: "He was a murderer from the beginning, and abode not in the truth, he is a liar and the father of it." (John vii, 44). With what propriety could these specific acts of guilt be charged upon an abstraction? An abstraction a murderer! a liar! Seriously to affirm such things of the mere abstraction of evil is a solemn fiction; while to assert them of a fallen angel, who beguiled Eve by falsehood, and brought death upon all the race of man, is an intelligible and affecting truth.

It would be a waste of time to prove that, in various degrees of clearness, the personal existence of a Spirit of Evil is revealed again and again in Scripture. Every quality, every action, which can indicate personality, is attributed to him in language which cannot be explained away. It is not difficult to see why it should be thus revealed. It is obvious that the fact of his existence is an article of faith. Herein lies the value of the case, that it could not be discovered, although it might be suspected, by human reason. It is in the power of that reason to test any supposed manifestations of supernatural power, and any asserted principles of divine action which fall within its sphere of experience. But the Spirit of Evil does not operate by such examination satisfy itself of the truth and divinity of a Person or a book; but, having done this, it must then accept and understand, without being able to test, or to explain, the disclosures of this divine authority upon
subjects beyond this world (the "heavenly things," of which it is said that none can see or disclose them, save the "Son of Man who is in heaven").

It is true that human thought can assert an a priori probability or improbability in such statements made, based on the perception of a greater or less degree of accordance in principle between what things are seen and the things believed; of the effectiveness of the inner powers and the causes, which are revealed from the regions of mystery. But even this power of weighing probability is applicable rather to the fact and tendency than to the method of supernatural action. This is true even of natural action beyond the sphere of human observation. The laws of the physical worlds, for example, it may be asserted without doubt that in all the orbs of the universe the divine power, wisdom, and goodness must be exercised; but the inference that the method of their exercise is found there, as here, in the creation of sentient and rational beings is one at best of but moderate probability. Still more is this the case in the spiritual world. Whatever supernatural orders of beings may exist, we can conclude that in their case, as in ours, the divine government must be carried on by the union of individual freedom of action with the overruling power of God, and must tend finally to that good which is his central attribute. But beyond this we can assert nothing beyond a certain, and by the deliberate action of other men. He can conclude with certainty that both series of causes must exist by the permission of God, and must finally be overruled to his will. But whether there exist any superhuman but subordinate cause of the circumstances, and whether there be any similar influence acting in the outer world, is a question which he cannot answer with certainty. Analogy, from the observation of the only ultimate cause which he can discover in the visible world—viz., the free action of a personal will—may lead him, and generally has led him, to conjecture the affirmative; but still the impression is produced by analogy alone.

The tendency of the mind in its inquiry is generally towards one or other of two extremes. The first is to consider evil as a negative imperfection arising, in some unknown and inexplicable way, from the nature of matter, or from some disturbing influences which limit the action of goodness on earth; in fact, to ignore as much of evil as possible, and to declare that the residuum to any positive cause at all. The other is the old Persian or Manichean hypothesis, which traces the existence of evil to a rival creator, not subordinate to the Creator of good, though perhaps inferior to him in power, and destined to be overcome by him at last. Between these two stands the intermediate view of various modifications of thought and countless forms of superstition. Each hypothesis had its arguments of probability against the other. The first labored under the difficulty of being insufficient as an account of the anomalous facts, and indeterminate in its account of the disturbing cause; the second stood against that belief in the unity of God and the natural supremacy of good incomprehensible to the deepest instincts of the heart. But both were laid in a sphere beyond human cognizance; neither could be proved or disproved with certainty.

The revelation of Scripture, speaking with authority, meets the truth and removes the error inherent in both these hypotheses. It asserts in the strongest terms the perfect supremacy of God, so that under his permission alone, and for his inscrutable purposes, evil is allowed to exist (see, for example, Prov. xvi, 4; Isa. xlv, 7; Amos iii, 6; comp. Rom. ix, 22, 23). It regards this evil as an anomaly and corruption, to be taken away by a new manifestation of his omnipotence and wisdom.

The conquest of it begun virtually in God's ordinance after the fall itself, was effected actually on the cross, and shall be perfected in its results at the judgment-day. Still Scripture recognises the existence of evil in the world, not only as felt in outward circumstances ("the world"), and as inborn in the soul of man ("the flesh"), but also as a principle of evil in the inner working of an evil spirit, exercising that mysterious power of free-will, which God's rational creatures possess, to rebel against him, and to draw others into the same rebellion ("the devil").

In accordance with the "economy" and progressive ness of God's revelation, the existence of Satan is but gradually revealed. In the first entrance of evil into the world, the temptation is referred only to the serpent. It is true that the whole narrative, and especially the spiritual nature of the temptation ("to be as gods"), which was united to the sensual motive, would force on any thoughtful reader the conclusion that something more than the mere perverted nature of the fallen angel was involved; but the time had not then come to reveal, what afterwards was revealed, that "he who sinneth is of the devil" (1 John iii, 8), and that "the old serpent" of Genesis was "called the devil and Satan, who deceiveth the whole world" (Rev. xii, 9; xx, 20).

Throughout the whole period of the patriarchal and Jewish dispensations, this vague and imperfect revelation of the source of evil alone was given. The Source of all Good is set forth in all his supreme and unapproachable majesty; evil is known negatively as the falling away from him; and the "vanity" of idols, rather than any positive evil influence, is represented as the opposite to his reality and goodness. The law gives the "knowledge of sin" in the soul, without referring to any external influence of evil to foster it; it denounces idolatry, without even hinting, what the New Test. declares plainly, that such evil implied a "power of Satan."

The book of Job stands, in any case, alone (whether we refer to his personal experience, or to the logical, literary, or analogous reasons), as a further instance of the basis of "natural religion," apart from the gradual and orderly evolutions of the Mosaic revelation. In it, for the first time, we find a distinct mention of Satan, the adversary of Job. But it is important to remark the emphatic stress laid on his subordinate position, on the absence of any power, or any influence, on the other hand, of the grander Spirit. He conceived among the "sons of God" to present himself before the Lord; his malice and envy are permitted to have scope, in accusation or in action, only for God's own purposes; and it is especially remarkable that no power of spiritual influence, but only a power over outward circumstances, is attributed to him. All this is widely different from the clear and terrible revelations of the New Test. The captivity brought the Israelites face to face with the great dualism of the Persian mythology, the conflict of Ormuzd with Ahriman, the co-ordinate spirit of evil. In the books written after the captivity we have again a picture of the struggle which is enacted in heaven, and is confessed by all that the Satan of Scripture bears no resemblance to the Persian Ahriman. His subordination and inferiority are as strongly marked as ever. In 1 Chron. xxi, 1, where the name occurs without the article ("an adversary," not "the adversary"), the comparison with 2 Sam. xxiv, 1 shows distinctly that, in the depiction of the "anger of the Lord," it is made clear that it worked out the "anger of the Lord" against Israel. In Zech. iii, i, 2, Satan is čadvaičov (as in 1 Pet. v, 8), the accuser of Joshua before the throne of God, rebuked and put to silence by him (comp. Psa. cix, 6). In the case, as of the good angels, so also of the evil one, the
presence of fable and idolatry gave cause to the manifestation of the truth. See Angel. It would have been impossible to guard the Israelites more distinctly from the fascination of the great dualistic theory of their conquerors.

It is perhaps not difficult to conjecture that the reason of this reserve as to the disclosure of the existence and nature of Satan is to be found in the invertebrate tendency of witchcraft (Exod. xxiii, 18; Deut. xviii, 10), and in the narrative of the possession of men by an "evil" or "lying spirit from the Lord." (1 Sam. vii, 14; 1 Kgs. xxii, 22). "Satan," therefore, is quite unusual, in great degree, on the supposed power of their false gods to inflict evil. The existence of evil spirits is suggested to them in the stern prohibition and punishment of witchcraft (Exod. xxiii, 18; Deut. xviii, 10), and in the narrative of the possession of men by an "evil" or "lying spirit from the Lord." (1 Sam. vii, 14; 1 Kgs. xxii, 22). "Satan," therefore, is quite unusual, in great degree, on the supposed power of their false gods to inflict evil. The existence of evil spirits is suggested to them in the stern prohibition and punishment of witchcraft (Exod. xxiii, 18; Deut. xviii, 10), and in the narrative of the possession of men by an "evil" or "lying spirit from the Lord." (1 Sam. vii, 14; 1 Kgs. xxii, 22).

But this tendency would have been increased tenfold by the revelation of the existence of the great enemy, concentrating round himself all the powers of evil and enmity against God. Therefore, it would seem, the revelation of the strong man armed was withheld until the stronger than he should be made manifest.

In the New Test. this reserve suddenly vanishes. In the interval between the Old and New Test. the Jewish mind had pondered on the scanty revelations already given of evil spiritual influence. But the Apocryphal books (as, for example, Tobit and Judith), while dwelling on the existence of the devil, have a name not of Satan. The same may be observed of Josephus. The only instance to the contrary is the reference already made to Wisd. ii, 24. It is to be noted also that the Targums often introduce the name of Satan into the descriptions of sin and temptation found in the Old Test., as, for example, in Exod. xxxii, 19, in connection with the worship of the golden calf (comp. the tradition as to the body of Moses, Deut. xxxiv, 5, 6; Judg. 9). See Michael.

But, while a mass of fable and superstition grew up on the general subject of evil spiritual influence, still the existence and nature of Satan remained in the background, felt, but not understood.

The New Test. first brings it plainly forward. From the beginning of the Gospel, when he appears as the personal tempter of our Lord, through all the Gospels, Epistles, and Apocalypse, it is asserted or implied, again and again, as a familiar and important truth. To refer this to mere "accommodation" of the language of the Old Testament concerning Satan is to substitute contradicts facts and evade the meaning of words. The subject is not one on which error could be tolerated as unimportant, but one important, practical, and even awful. The language used respecting it is either truth or falsehood; and unless we impute error or deceit to the writers of the New Test., we must receive the doctrine of the existence of Satan as a certain doctrine of revelation. Without dwelling on other passages, the plain, solemn, and unmetaphorical words of John viii, 44, must be sufficient: "Ye are of your father the devil. . . . He was a murderer from the beginning, and abides (ἐστὶν) not in the truth. . . . When he speaketh a lie, he speaketh of his own: for he is a liar and the father of it." See Demoniac.

III. Natural History.—1. Of the original nature and state of Satan, little is revealed in Scripture. Most of the common notions on the subject are drawn from mere tradition, popularized in England by Milton, but without any foundation in Scripture. The word Satan is spoken of as a "spirit" in Eph. ii, 2; as the prince or ruler of the demons (διάδοχος) in Matt. xxii, 24-26; and as having "angels" subject to him in Matt. xxv, 41; Rev. xii, 7, 9. The whole description of his person implies spiritual nature and spiritual influence. We conclude, therefore, that he was of angelic nature, a rational being, created free from sin, with knowledge, providence, wisdom, and energy; and not only so, but an archangel, one of the "princes" of heaven. See Angelchiel.

The class of beings to which Satan originally belonged, and which constituted a celestial hierarchy, is very numerous: "Ten thousand times ten thousand stood before him." (Dan. vii, 10). They were created independent (John i, 3). Analogy leads to the conclusion that there are different grades among the angels as among other races of beings. The Scriptures warrant the same. Michael is described as one of the chief princes (Dan. x, 13); as chief captain of the host of Jehovah (Jude, 9). Simon the Righteous is described as bearing the fallen angels (Col. ii, 15; Eph. vi, 12). It is also reasonable to suppose that they were created susceptible of improvement in all respects except moral purity, as they certainly were capable of apostasy.

2. As to the time when they were brought into being, the Bible is silent; and where it is silent, we should be silent, or speak with more caution. Some of the angels were called into existence after the creation of the world; among whom is Dr. John Dick. Others have supposed that they were created just anterior to the creation of man, and for purposes of a merciful ministration to him. It is more probable, however, that as they were the highest in rank among the creatures of God, so they were the first in the order of time; and that they may have continued for ages in obedience to their Maker, before the creation of man, or the fall of the apostate angels.

We cannot, of course, conceive that anything essentially original and finally lost was created by God. We find by experience that the will of a free agent is secure, by his permission, oppose his will; that the very conception of freedom implies capacity of temptation; and that every sin, unless arrested by God's fresh gift of grace, strengthens the hold of evil on the spirit till it may fall into the hopeless state of reprobation.

We can only conjecture, therefore, that Satan is a fallen angel, who once had a time of probation, but whose condemnation is now irrevocably fixed.

3. The Scriptures are explicit as to the apostasy of some, of whom Satan was the chief and leader. But of the time, cause, and manner of his fall, Scripture tells us scarcely anything. It limits its disclosures, as always, to that which we need to know. The passage on which all the fabric of tradition and poetry has been raised is Rev. xii, 7, 9, which speaks of "Michael and his angels" as "fighting against the dragon and his angels," till the "great dragon, called the devil and Satan," was "cast out into the earth, and his angels cast out with him." But never be the meaning of this passage, it is certain that it cannot refer to the original fall of Satan. The only other passage which refers to the fall of the angels is 2 Pet. ii, 4, "God spared not the angels, when they had sinned, but having cast them into hell, delivered them to chains of darkness (πτωτοῖς ἡμῶν ἄδεια ἀναγεννησίας θεοῦ ἀνθρώπου), reserved unto judgment," with the parallel passage in Jude 6, "Angels, who kept not their first estate (ἰπτὼν κατανεφελθήσαντο ἐμπροσθεν τοῦ θεοῦ), but left their own habitation, he hath reserved in everlasting chains under darkness unto the judgment of the great day." In these mysterious passages, however, there is some difficulty in considering Satan as one of the rest, for they are in chains and sentenced (1 Pet. i, 18; Matt. xxv, 41; Rev. xii, 7, 9). The relation marked here denotes the instrumentality which the devil may have exercised in inducing those called his angels to rebel against Jehovah and join themselves to his interests. Aside from these passages, we have still to consider the declaration of our Lord in Luke x, 18, "I beheld (διάδοχος) Satan as lightning out of heaven." The fall of this last fact of his original fall (although the use of the imperfect tense and the force of the context rather refer it figuratively to the triumph of the disciples over the
evil spirits); but, in any case, it tells nothing of its cause or method. There is also the passage already quoted (John vili, 44), in which our Lord declares of him, that “he was a murderer from the beginning,” that “he stands not {ἱστήκει} in the truth, because there is no truth in him,” that “he is a liar, and the father of it. But here it seems likely the words ἀεὶ ἑρμηνεύεται refer to the translation under which the passage was vouchsafed by the apostles; perhaps the allusion is to his temptation of Cain to be the first murderer— an allusion explicitly made in a similar passage in 1 John iii, 9—12. The word ἴστηκε (wrongly rendered “abode” in the A. V.) and the rest of the verse refer to present time. The passage therefore throws little or no light on the cause and method of his fall. People have always had a notion that there has been an “expiation” in 1 Tim. iii, 6, “lest being lifted up by pride he fall into the condemnation {κακία} of the devil.” It is concluded from this that pride was the cause of the devil’s condemnation. The inference is a probable one; it is strengthened by the only analogy within our reach, that of the fall of man, in which the spiritual temptation of pride, the desire “to be as gods,” was the subtlest and most deadly temptation. Still it is but an inference; it cannot be regarded as a matter of certain revelation.

How Satan and his followers, being created so high in excellence and holiness, became sinful and fell is a question which theologians have differed, but which they have not settled. The difficulty has seemed so great to Schleiermacher and others that they have denied the fact of such an apostasy. They have untied the knot by cutting it. Still the difficulty remains. The denial of mystery is not the removal of it. Even philosophy teaches us to believe sometimes where we cannot understand. It is here that the grave question of the introduction of evil first meets us. If we admit the fact of apostasy among the angels, as by a fair interpretation of Scripture we are constrained to do, the admission of such a fact in the case of human beings will follow more easily, they being the lower order of creatures, in whom defection would be less surprising.

4. In his physical nature, Satan is among those that are termed spiritual beings; not as excluding necessarily all idea of matter, but as opposed rather to the animal nature. The good angels are all ministering spirits, πνεύματα (Heb. i, 14). Satan is one of the angels that kept not their first principality. The fall produced no material or metaphorical corruption. Paul, in warning the Ephesians against the wiles of the devil, tells them (Eph. vi, 12) that they contended not against flesh and blood, mere human enemies, but against principalities and powers—against the rulers of the darkness of this world; against spiritual wickedness in high places. Cornelius' interest is better than human and even superhuman foes, the latter being spiritual natures, or spirits, in opposition to flesh and blood (Rosenmüller, ad loc.). Satan is immortal, but not eternal; neither omnipotent nor omnipresent, but raised high above the human race in knowledge and power. The Persian mythology in its early stage, and sub-sequently the Gnostics and Manicheans, ranked the evil principle as coeval and co-ordinate, or nearly so, with God, or the good principle. The doctrine of the Jewish Church always made him a dependent creature, subject to the control of the Almighty. By the modifications which Zoroaster subsequently introduced, the Persian angelology came nearer to resemble that of the Jews. Some have ascribed to Satan the power of working miracles, contending that there are two series of antagorical miracles running through the Bible. To the miracles of Moses were opposed those of the Egyptian magicians; and to those of Christ and his apostles, the signs and wonders of false prophets. The divine and the satanic. Olshausen maintains this view, as do some of the older commentators (Biblischen Commentar, i, 242). The evidence in support of such a belief has not been sufficient to procure for it general acceptance (see Rosenmüller and Calvin on Matt. xxiv, 24; 2 Thess. ii, 9; Hengstenberg, Egypt and the Books of Moses, ch. iii; also Rosenmüller and Bush on Exod., ch. viii). With a substantial presence in only one place at one time, yet, as the head of a spiritual kingdom, he is virtually present wherever his angels or servants are executing his will.

5. Scripture describes to us distinctly the moral character of Satan. This is no matter of barren speculation to those who, by yielding to evil, may become the “children of Satan” instead of “children of God.” The ideal of goodness is made up of the three great moral attributes of God—love, truth, and purity, or holiness—combined with that spirit which is the natural temper of a finite and dependent creature, the spirit of independence, or freedom, the spirit of pride. These qualities are dwelt upon as the characteristics of the devil. In John viii, 44, compared with 1 John iii, 10—15, we have hatred and falsehood; in the constant mention of the “unclean” spirits, of which he is the chief, we find impurity; from 1 Tim. iii, 6, and the narrative of the temptation, we trace the spirit of pride. These are especially the “sins of the devil;” in them we trace the essence of moral evil and the features of the prostrate mind. Add to this a spirit of restless activity, a power of craft, and an intense desire to spread corruption, and with it eternal death, and we have the portrait of the spirit of evil as Scripture has drawn it plainly before our eyes.

More particularly, Satan’s character is denoted by his titles, Satan, Adversary, Diabolos, False Accuser, Tempter, etc. All the representations of him in Scripture show him to have unfolded and confirmed evil as the basis of his character, exhibiting itself in respect to God in assuming to be his equal, and in wishing to transfer the homage and service which belong only to God to himself; and, in respect to men, in efforts to draw them away from God and attach them to his kingdom. The evil develops itself in all possible ways and by all possible means of opposition to God, and to those who are striving to establish and extend his dominion. The immutability of his evil character precludes the idea of repentance, and, therefore, the possibility of recovering grace. “He possesses an understanding which misapprehends exactly that which is most worthy to be known, to which the key fails without which nothing can be understood in its true relation and meaning in its depth; it may penetrate, however wide it may reach. He is thereby necessarily unblissful; torn away from the centre of life, yet without ever finding it in himself; from the sense of inward emptiness, continually driven to the exterior world, and yet with it, as with himself, in eternal contradiction; forever fleeing from God, yet, yet, ever laboring to frustrate his designs, yet always conscious of being obliged to promote them; instead of enjoyment in the contemplation of his excellence, the never satisfied desire after an object which it cannot attain; instead of hope, a perpetual wavering between doubts and despair; instead of power, a powerless hatred against God, against his fellow-beings, against himself” (Westcott).

IV. Satan’s Power and Action.—Both these points, being intimately connected with our own life and salvation, are treated with a distinctness and fulness remarkably contrasted with the obscurity of the previous subjects.

The agency of Satan extends to all that he does or causes to be done. To this agency the following restrictions have generally been supposed to exist: It is limited, first, by the direct power of God; he cannot transcend the power on which he is dependent for existence; secondly, by the finiteness of his own created faculties; thirdly, by the insufficiency of the creature and effect, or the laws of nature. The miracles, which he has been supposed to have the power of working, are denominated lying signs and wonders (2 Thess. ii, 9). With these restrictions, the devil goes about like a roaring lion.
SATAN

His agency is moral and physical. First, moral. He beguiled our first parents, and thus brought sin and death upon them and their posterity (Gen. iii.). He moved David to number the people (1 Chron. xxii. 1). He stirred up Judas to betray his master (Luke xxii. 3); instigated Ananias and Sapphira to lie to the Holy Ghost (Acts v. 3); and hindered Paul and Barnabas on their way to the Thessalonians (1 Thess. ii. 18). He is the spirit that now works in the children of disobedience (Eph. ii. 2); and he deceiveth the whole world (Rev. xii. 9).

The means which he uses are variously called wiles, darts, depths, snares, all deceivableness of unrighteousness. He darkens the understandings of men, to keep them in ignorance. He perverts their judgments, that he may lead them into error. He insinuates evil thoughts, and thereby awakens in them unholy desires. He excites them to pride, anger, and revenge; to discontent, repinings, and rebellion. He labors to prop up false systems of religion, and to corrupt and overturn the true one. He came into most direct and decided conflict with the Saviour (Mark xvi. 15). He is even now hoping to draw him from his allegiance to God, and procure homage for himself; but he failed in his purpose. Next, he instigated the Jews to put him to death, thinking thus to thwart his designs and frustrate his plans. Here, too, he failed, and was made to subservie the very ends which he most wished to prevent. Into a state of despair and most ignominious death, and with like ultimate success. God uses his temptations as the means of trial to his people, and of strength by trial; and points them out as a motive to watchfulness and prayer. Such are the nature and mode of his moral influence and agency.

His agency is also directed against the bodies of men, as well as against their souls. That the agency of Satan was concerned in producing physical diseases the Scriptures plainly teach (Job ii, 7; Luke xiii. 16). Peter says of Christ that he went about doing good and healing all that were oppressed of the devil (Acts x, 38). Hymenaeus and Alexander were delivered from Satan, that they might learn not to blaspheme (1 Tim. i. 20), where physical suffering by the agency of Satan, as a divine chastisement, is manifestly intended.

The power of Satan over the soul is represented as exercised either directly or by his instruments. His direct interference in the body of a person is some of a powerful and evil nature on those in whom lurks the germ of the same evil, differing from the influence exercised by a wicked man in degree rather than in kind; but it has the power of acting by suggestion of thoughts, without the medium of actions or words—a power which is only in a very slight degree exercised by men upon each other. This influence is spoken of in Scripture in the strongest terms as a real external influence, correlative to, but not to be confounded with, the existence of evil within. In the parable of the sower (Matt. xiii, 19), it is represented as a negative influence, taking away the action of the Word of God in souls; in the tares (ver. 28), as a positive influence for evil, introducing wickedness into the world. Paul does not hesitate to represent it as a power permitted to dispute the world with the power of God; for he declares to Agrippa that his mission was "to turn men from darkness to light, and from the power of the devil" (Acts xii. 23) of Satan unto God, and represents the communication, which cut men off from the grace of Christ in his Church, as a "delivery of them unto Satan" (1 Cor. v. 5; 1 Tim. i. 20).

The same truth is conveyed, though in a bolder and more startling form, in the epistles to the churches of the Apocalypse, where the body of the unbelieving Jews is called a "synagogue of Satan" (Rev. ii. 9; iii. 9), where the secrets of false doctrine are called "the depths of Satan" (ii, 24), and the "throne" and "habitation of Satan" are said to be set up in opposition to the Church of Christ. Another and even more remarkable expression of the same idea is found in the Epistle to the Hebrews, where the death of Christ is spoken of as intended to battle (xararpwiw) "him that hath the power (ro prophor) of death, that is, the devil," for death is evidently referred to here, he speaks of "the age" and "the power of death as inseparable from the power of corruption. Nor is this truth only expressed directly and formally; it meets us again and again in passages simply practical, taken for granted as already familiar (see Rom. vii. 20; 2 Cor. ii. 11; 1 Thess. ii. 18; 2 Thess. ii. 9; 1 Tim. v. 15). "Satan's seduction," says Dr. Shairies, "which thus pushes the face of satanic influence over the soul before us in plain and terrible certainty.

Yet, at the same time, it is to be observed that its language is very far from countenancing, even for a moment, the horrors of the Manichean theory. The influence of Satan is always spoken of as temporary and limited, subordinated to the divine counsel, and broken by the incarnate Son of God. It is brought out visibly, in the form of possession, in the earthly life of our Lord, only in order that it may give the opportunity of his triumph. As for himself, so for his redeemed ones, it is true that he "bristles up the hair of death," but we are never told that the "fire of, or seating of" Satan is permanent (Eph. vi. 12)."
are mostly spoken of in Scripture in reference to possession; but in Eph. vi, 12 they are described in various lights, as "principalties," (ἀρχῶν), "powers," (ἡγεμόνια), "rulers of the darkness of this world," and "spiritual powers of wickedness in heavenly places" (or "things") (τὰ πνευματικά τῆς ποιήσεως ἐν τοῖς ἑπωφορούσιν) and in all as "wrestling" against the soul of man. The same reference is made less explicitly in Rom. viii, 18 and Col. ii, 15. In Rev. xii, 7-9 they are spoken of as five on the one hand and as the Devil and Satan, against "Michael and his angels," and as cast out of heaven with their chiefs. Taking all these passages together, we find them sharing the enmity to God and man implied in the name and nature of Satan; but their power and action are but little dwelt upon in comparison with his. That there is against us a power of spiritual wickedness is a truth which we need to know, and a mystery which only revelation can disclose; but whether it is exercised by few or by many is a matter of comparative indifferance.

But the evil one is not only the "prince of the demons," but also he is called the "prince of this world" (ὁ διάρρηχος τοῦ κόσμου τούτου) in John xii, 31; xiv, 30; xvii, 11, and even the "god of this world" (ὁ θεὸς τοῦ αἰῶνος τούτον) in 2 Cor. iv, 4, the two expressions being used united in the words τοῦ κοσμοκράτορος τοῦ σκότους τοῦ αἰῶνος τούτον, used in Eph. vi, 12. (The word κόσμος, properly referring to the system of the universe, and so used in John xxi is generally applied in Scripture to human society as alienated from God, with a reference to the pomp and vanity which make it an idol [see, e.g., 1 John ii, 15] as ἀσώς refers to its transitory character, and is evidently used above to qualify the startling application of the word θεὸς, a "god of an age" being of course true of God at all. It is used with κόσμος in Eph. ii, 2.) This god of this world, however, set forth himself as a delegated authority in the inspiration of our Lord (Luke i, 6), and the temptation would have been unreal had he spoken altogether falsely. It implies another kind of indirect influence exercised through earthly instruments. There are indications in Scripture of the exercise of this power through inanimate instruments, of an influence over the powers of nature, and what men call the "chances" of life. Such a power is distinctly asserted in the case of Job, and probably implied in the case of the woman with a spirit of infirmity (in Luke xiii, 16), and of Paul's "thorn in the flesh" (2 Cor. xi, 30). There is a consistent use of such action to the angels of God (as in Exod. xiii, 23; 2 Sam. xxiv, 16; 2 Kings xix, 35; Acts xii, 23), and, in our ignorance of the method of connection of the second causes of nature with the supreme will of God, we cannot even say whether it has in it any antecedent improbability; but it is little dwelt upon in Scripture in comparison with the other exercise of this power through the hands of wicked men, who become "children of the devil," and accordingly "do the lusts of their father." (See John vii, 44; Acts xii, 10; 1 John iii, 8-10; and comp. John vii, 70.) In this sense the Scripture regards all sins as the "works of the devil," and traces to him, through the instrumentality of humans, both spiritual and physical, all the persecution and hindrances which oppose the Gospel (Rev. ii, 10; 1 Thess. ii, 18). Most of all is this indirect action of Satan manifested in those who deliberately mislead and tempt men, and who at last, independent of any interest of their own, come to take an unmanly pleasure in the sight of evil-doing in others (Rom. i, 32).

The method of his action is best discerned by an examination of the title by which he is designated in Scripture. He is called emphatically ὁ διάβολος, the "devil." The derivation of the word in itself implies only the endeavor to break the bonds between others and himself, and himself, and himself, (τῶν ἐνέργειν ἐν τῇ ἀνθρώπω) but common usage adds to this general sense the special idea of "setting at variance by slander." In the New Test. the word διάβολος is used three times as an epithet (1 Tim. iii, 11; 2 Tim. iii, 3; Tit. ii, 3), and in each case with something of the special meaning. In the application of the title to Satan both the general and the special senses should be kept in view. His general object is to break the bonds of communion between God and man, and the bonds of truth and love which bind men to each other—to set each soul at variance both with men and God, and so reduce it to that state of self-will and self-govemance which is the seed-seat of sin. One special means by which he seeks to do this is the slander of God to man and of man to God.

The slander of God to man is seen best in the words of Gen. iii, 5: "Ye shall surely die: for God doth know that in the day ye eat thereof your eyes shall be opened, and ye shall be as gods, knowing good and evil." These words contain the germ of the false notions which keep men from God, or reduce their service to him to a hard and compulsory slavery, and which the heathen so often adopted in all their hideousness, when they represented their gods as either careless of human woe and woe or "envious" of human excellence and happiness. They attributed selfishness and jealousy to the giver of all good. This is enough (even without the imputation of falsehood which is added) to pervert man's natural love of freedom till it rebels against that which is made to appear as a hard and arbitrary tyranny, and seeks to set up, as it thinks, a freer and nobler standard of good. Ye are the alien gods of man to man, by which Satan and his agents still strive against his reigning grace.

The slander of man to God is illustrated by the book of Job (Job i, 9-11; ii, 4, 5). In reference to it, Satan is called the "adversary" (ἀντίπαθος) of man in 1 Pet. v, 8, and represented in that character in Zech. iii, 1, 2; and more plainly still designated in Rev. xii, 10 as the "accuser of our brethren, who accused them before our God day and night." It is difficult for us to understand what can be the need of accusation, or the power of slander, under the all-searching eye of God. The mention of it is clearly an accommodation of God's judgment to the analogy of our human experience; but we understand by it a practical and awful truth, that every sin of life, and even the admixture of lower and evil motives which taints the best actions of man, will rise up against us at the judgment to claim the soul as their own, and fix forever that separation from God which, through the ages, is distributed to the race. The accusation of Satan shall in some way bear a leading part, pleading against man, with that worst of slanders which is based on perverted or isolated facts; and shall be overcome, not by any counter-claim of human merit, but "by the blood of the lamb," received in true and steadfast faith.

But these points, important as they are, are of less moment than the disclosure of the method of Satanic action upon the heart itself. It may be summed up in two words—temptation and possession.

The subject of temptation is illustrated, not only by abstract statements, but also by the record of the temptations of our Lord Jesus Christ (2 Cor. x, 10; 1 Tim. iv, 14, 15), and all the persecution and hindrances which oppose the Gospel (Rev. ii, 10; 1 Thess. ii, 18). Most of all is this indirect action of Satan manifested in those who deliberately mislead and tempt men, and who at last, independent of any interest of their own, come to take an unmanly pleasure in the sight of evil-doing in others (Rom. i, 32).

The method of his action is best discerned by an examination of the title by which he is designated in Scripture. He is called emphatically ὁ διάβολος, the "devil." The derivation of the word in itself implies only the endeavor to break the bonds between others and himself, and himself, and himself, (τῶν ἐνέργειν ἐν τῇ ἀνθρώπω) but common usage adds to this general sense the special idea of "setting at variance by slander." In the New Test. the word διάβολος is used three times as an epithet (1 Tim. iii, 11; 2 Tim. iii, 3; Tit. ii, 3), and in each case with something of the special meaning. In the application of the title to Satan both the general and the special senses should be kept in view. His general object is to break the bonds of communion between God and man, and the bonds of truth and love which bind men to each other—to set each soul at variance both with men and God, and so reduce it to that state of self-will and self-govemance which is the seed-seat of sin. One special means by which he seeks to do this is the slander of God to man and of man to God.
privilege; but there is over it the moral power of God's law, which, by the very fact of its truth and goodness, acknowledged as they are by the reason and the conscience, should regulate the human will. The need of the individual will, free through conviction, so as to be in harmony with the will of God, is a still severer trial, with the reward of still greater spiritual progress if we sustain it, with the punishment of a subtler and more dangerous fall if we succumb. In its struggle the spirit of man can only gain and sustain its ascendancy by that ceaseless grace of God, given through the communion of the Holy Spirit, which is the breath of spiritual life.

It is this tentability of man, even in his original nature, which is represented in Scripture as giving scope to the evil action of Satan. He is called the "tempter" (as in Mark iv, 1; 1 Thess. vi, 5). He has power, as the record of Gen. iii shows clearly, first, to present to the appetites or passions their objects in vivid and captivating forms, so as to induce man to seek these objects against the law of God "written in the heart:" and next, to act upon the false desire of the will for indecency. In a positive sense the devil is well known in practice, practically, judging and determining) "good and evil." It is a power which can be resisted, because it is under the control and overruling power of God, as emphatically laid down in 1 Cor. xiv, 13; James iv, 7, etc.; but it can be so resisted only by yielding to the grace of God, and by a struggle (sometimes an "agon") in reliance on it.

It is exercised both negatively and positively. Its negative exercise is referred to in the parable of the sower, as taking away the word, the "engrafted word" (James i, 21) of grace, i.e., as interposing itself, by consent of man, between him and the channels of God's grace. Its positive exercise is the setting forth of the gospel, of the qualities of the gospel, and the tares, represented as sowing actual seed of evil in the individual heart or the world generally; and it is to be noticed that the consideration of the true nature of the tares (Zek a'vat) leads to the conclusion, which is declared plainly in 2 Cor. xi, 14, viz., that evil is introduced into the heart mostly as the counterfeit of good.

This exercise of the tempter's power is possible, even against a sinless nature. We see this in the temptation of our Lord. The temptations presented to him appeal, first, to the natural desire and need of food; next, to the desire to be exalted. He is offered bread, and, for the sake of prayer, the throne of God and the blessed angels. In the midst of the temptations, in the midst of the temptation of the flesh, he was tempted by the power of Satan, and, as he was tempted, he yielded, he was conquered, and was overcome by the power of Satan, and was delivered, and was overthrown.

But in the temptation of a fallen nature Satan has a greater power. Every sin committed makes a man the "servant of sin" for the future (John viii, 34; Rom. vi, 16); it therefore creates in the spirit of man a positive tendency to evil, which sympathizes with, and aids the temptation of the evil one. This is a fact recognised by experience; the doctrine of Scripture, inscrutable mysteriously, but unmistakably declared, is that, since the fall, this evil tendency is born in man in capacity, prior to all actual sins, and capable of being brought out into active existence by such actual sins committed. It is that which Paul calls "a law," i.e., (according to his universal use of the word) an external power of "sin" over man, bringing the inner man (the νοῦς) into captivity (Rom. vii, 14-24). Its power is broken by the atonement and the gift of the Spirit, but yet not completely cast out; it still "lusts against the spirit" so that men "cannot do the things which they would" (Gal. vii, 17). It is to this spiritual power of evil, the tendency to false doctrine, unbelief, unbelief, independently of any benefit the Spirit could have derived from them, that Satan is said to appeal in tempting us. If his temptations were yielded to without repentance, it becomes the reprobate (αδελφοί) mind, which delights in evil for its own sake (Rom. i, 28, 32), and makes men emphatically "children of the devil" (John viii, 44; Acts xiii, 10; 1 John iii, 8, 10) and "accursed" (Matt. xxxv, 41), fit for "the fire prepared for the devil and his angels." If they be resisted, as by God's grace they may be resisted, then the evil power (the "flesh" or the "old man") is gradually "crucified" or "mournful" until the soul is prepared for that heaven where no evil can enter.

This twofold power of temptation is frequently referred to in Scripture as exercised chiefly by the suggestion of evil thoughts, but occasionally by the delegated power of Satan over outward circumstances. To this latter power is to be traced (as has been said) the loss of Joseph (Gen. xxxvii, 28), the death of Job (Job i, ii), the remarkable expression used by our Lord as to the woman with a "spirit of infirmity" (Luke xxi, 16), the "thorn in the flesh," which Paul calls the "messenger of Satan" to buffet him (2 Cor. xii, 7). Its language is plain, incapable of being explained as metaphor or poetical personification of an abstract principle. Its general statement is verified by examples of temptation. (See, besides those already mentioned, Luke xxiii, 5; John xxiii, 27; Judas); Luke xxii, 31; Peter; Acts v, 3 (Ananias and Sapphira); 1 Cor. vii, 5; 2 Cor. ii, 11; 1 Thess. iii, 5.) The subject itself is the most startling form of the mystery of evil; it is one on which, from our ignorance of the connection of the first cause with the second causes in nature, and of the process of origin of human thought, experience can hardly be held to be competent either to confirm or to oppose the testimony of Scripture.

It is of no avail that there are difficulties connected with the agency ascribed to Satan. Objections are of little weight when brought against well-authenticated facts. Any objections raised against the agency of Satan are equally valid against his existence. If he exists, he must act; and if he is evil, his agency must be evil. The fact of such an agency being revealed as it is, is every reason why we should act in the same way as Christ and the saints. Both good and bad agencies, as well as the existence and agency of good angels. Neither reason nor consciousness could itself establish such a fact; but all the testimony they are capable of adducing is in agreement with the Scripture representation on the subject.

On the subject of demonical possession (q. v.) it is sufficient here to remark that although widely different in form, yet it is of the same intrinsic character as the other power of Satan, including both that external and internal influence to which reference has been made above. It is disclosed to us only in connection with the revelation of that redemption from sin which destroys it—a revelation which has its counterpart manifested in itself at the atonement in its effects at the great day. Its end is seen in the Apocalypse, where Satan is first "bound for a thousand years," then set free for a time for the last conflict, and finally "cast into the lake of fire and brimstone . . . for ever and ever" (xx, 3, 7-10).

V. Traditions.—According to the Mohammedans, who have derived their account from Jewish traditions, Satan, or, as they sometimes call him, Eblis, was an angel whom God employed to destroy the Jinns or Genii, a race intermediate between men and angels, who tenanted the earth before the creation of Adam. In riches, power, and magnificence, the pre-Adamite sultans of the Jinns far surpass any height to which monarchs of the human race have attained; but the pride with which such gloriers inspired them filled them with impiety, and
SATAN, DEPTHS OF 386 SATISFACTION

Their use distinctive marks, and wear a double string of silk bound around the right wrist. They do not uniformly employ frontal lines, but some make a perpendicular streak with ashes of a burnt-offering to Hanuman. Their moral system approaches that of the Hindu Quietists or the Greek Stoics, consisting chiefly of a spirit of rigid indifference to the world, its pleasures and its pains, advantages and disadvantages: and a strict adherence to all ordinary social and religious duties, combined with the calm hope of final absorption into the one spirit which pervades all things.

Satanians, a branch of the Mæssalians, who appeared about A.D. 890. They derived their name from the theory which they are alleged to have held, that the power of Satan or evil men makes it right for them to pray that he will not exercise it to their harm. This opinion seems to be the same as that on which the worship of the Yezedes (q. v.) is grounded.

Satanian. Heretics of this name are mentioned by the author of Prædiconatissimum as having derived their name from Satanus, and as maintaining the opinion that the resurrection of the dead will be a restoration of bodies as exactly the same in all respects as which they exist during the present life. This seems to be the same heresy which is numbered the eightieth by Philaster and the sixty-seventh by Augustine, and to whose adherents the name Eternals is given by Danneus in his tract on Augustine's treatise on heresy.

Satanow, Isaac ha-Levi, a Jewish writer, was a native of Satanow, in Russian Poland, where he was born in the year 1732. In 1772 he came to Berlin, where he began to issue those works for which he had prepared himself in his native place, and which have secured him a lasting memorial in Hebrew literature and Biblical exegesis. His works are, a short Hebrew grammar, entitled ספר כהנים, The Joyful Lips (Berl. 1778):—רבי דוד, a Hebrew dictionary in the manner of Kimchi's ספר הזהב (ibid. 1787; Prague, 1804):—רבי דוד, a Hebrew dictionary, also called ידיעות, a Biblical lexicographer, also called ידיעות (Berl. 1787):—A Hebrew commentary on and German translation of Job (ibid. 1799). Besides these, Satanow has also written several works of gnomes and aphorisms in imitation of the Psalms and Proverbs, as well as grammatical treatises, on the high and difficult passages of the Old Testament, which have not as yet been published. Satanow died in 1802. See Forst, Bibl. Jud., iii. 251 sq.; Delitzsch, Zur Geschichte d. jüdischen Poetien, p. 115 sq.; Jost, Gesch. d. Judenth. u. s. Scent., iii, 598, etc.; Kitto, Cyclop. s. v.; Etheridge, Intro. to Hebrew Lit., p. 935; Grütz, Gesh. d. Juden, xi, 192 sq.; Steinhaeuser, Bibl.-biograph. Handbuch, p. 124; Catalogus Libi. Hebr., in Biblioth. Rodil, p. 2502. (B.P.)

Satervis, in Persian mythology, is a prince of the stars and good genius who protects the region of the west, and is a leader in the contest with Ahraman. He raises the water from the sea and spreads it over the land in the form of rain.

Sathrabunnas (Σαθραβούνας), a Graded form (1 Esdr. vi. 7, 27 [vii, 1]) of the Chaldee name (Ezra v, 3, 6; vi, 6, 13) Sthetar-Broznai (q. v.).

Satisfaction (expressed in Hebrew by סָטָר, to fill; סָטָר, to satiate; and בּעָר, to glut, in Greek [according to the A. V.] by less distinctive terms, γραφίζω, to folder, once [Col. ii, 28] κατιούγοντι, satiety), in general, signifies the act of giving complete or perfect pleasure. In the Christian system it denotes that which Christ did and suffered in order to satisfy divine justice, to secure the honors of the divine government, and thereby make an atonement for the sins of his people (Heb.
SATNIUS

389

SATURDAY

This use of the word satisfaction is taken from the sense of the word in the Roman law, viz., conferring a benefit on him who by some consideration consistent with a remission of the debt or offence for which the satisfaction is offered. The death of Christ as an expiatory sacrifice was the satisfaction for the sins of the world (1 John ii. 2; Rom. v. 11). Satisfaction is, in fact, propitiation and atonement. Christ's satisfaction is vicarious and expiatory, being made for us and instead of us, and not for our own meritorious acts or having ourselves in what he did to fulfill what the law demanded before man sinned, which was obedience. The satisfaction of Christ is to free us from misery, and the merit of Christ is to procure happiness for us. See Owen, On the Satisfaction of Christ; Gill, Body of Div. s. v.; Stillingfleet, On Satisfaction; Watts, Redeemer and Sustainer, p. 28, 32; Hervey, Theron and Aspasia; See Atonement; Propitiation.

SATISFACTION, ROMISH. The catechism of the Council of Trent defines "satisfaction" as "the compensation made by man to God by doing something in atonement for the sins which he has committed." The satisfaction which Christ makes on the cross, it is declared, is for man's actions both before and after God. "Cannonical satisfaction" is something—prayer, fasting, or alms-deeds—"which is imposed by the priest, and must be accompanied with a deliberate and firm purpose carefully to avoid sin for the future." This satisfaction is directed by the Council of Trent to be proportioned to the nature of the offence and the capability of the offender. It directly opposes the doctrine of justification by faith only, and is closely connected with the Romish notion of the merits of good works. See Penance.

Satnus, in Greek mythology, was a son of Eneus and the naid or nymph of the stream Satnioi. He was slain by Ajax, the son of Oileus.

Satrap (Heb. ochoasharpen, אֹכָשָׁפֶן; Sept. σατράπης and σατρατιγκ.; Vulg. satrapes; A. V. "ruler of provinces;" Esth. iii, 12; viii, 9; ix, 3; and with the Chal. text as Sarap in Dan. iii, 20, 22; 4, 18.). The genuine form of this name has been found in Indian inscriptions to be ksttrap, i.e. warrior of the host (see Benfey, in Gött. Gel. Anz. 1839, p. 805 sq.; Lassen, Zeitschrift f. d. Morgenl., iii, 161.), to which the Greek ἰχτράπης or ἰχτρατιγκος corresponds (Böckh, Corp. Inscur. No. 2891), from which the softer form satrapes gradually arose and passed into modern languages (Ge索尼us, Theaurus, s. v.). "These satraps are known in ancient history as the governors or viceroys of the provinces into which the Persian empire was divided. Strictly speaking, they had an extended civil jurisdiction over several smaller provinces, each of which had its own प्रधान, or governor. Thus Zerubbabel and Nehemiah were governors of Judah and the Chaldean territory (Ezra iv, 3, 6; Neh. ii, 9). The power and functions of the Persian satraps were not materially different from those of the modern Persian governors and Turkish pashas; and, indeed, the idea of provincial government by means of viceroy or intrusted with almost regal powers, is general juridical and, responsible only to the king, by whom they are appointed, has always been no prevalent in the East. The important peculiarity and distinction in the ancient Persian government, as admirably shown by Heeren (Researches, i. 489 sq.), was that the civil and military powers were carefully separated—the satrap being a very powerful civil and political chief, but having no command of the troops and garrisons, the commanders of which were responsible only to the king. The satraps, in their several provinces, employed themselves in the maintenance of order and the regulation of affairs; and they also collected and remitted to the court the stipulated tribute, clear of all charges for local government and for the maintenance of the troops (Xenoph. Cyrop. viii, 5, §3–8). In later times this prudent separation of powers became neglected by the governor of royal princes and other great persons (Xenoph. Anab. i, 1, §2), who were intrusted with the military as well as civil power in their governments—to which cause may be attributed the revolt of the younger Cyrus, and the other rebellions and civil wars, which, by weakening the empire, facilitated its ultimate subjugation by Alexander. See Persia.

Satrapes, in Greek mythology, is a name under which a bronze statue was set to Neptune, first at Samicum, and afterwards in Elis, which was constantly covered with a robe of woolen, another of linen, and a third of byssus.

Satchi, in Hindú mythology, was the wife of the sun-god Indra.

Satterlee, Alfred Brown, a Baptist missionary, was born at Sheldon, N. Y., Oct. 26, 1828, and was a graduate of Brown University, in the class of 1852. He pursued theological studies at the Rochester Theological Seminary, and received his appointment as a missionary of the American Baptist Missionary Union in 1853, and was set apart for the Arracan mission. He reached the field of his labors, Akyab, in Sept., 1855. He was not permitted to perform much service for his Master. At an early age of thirty-two he died of the cholera, July 1, 1856. (J. C. S.)

Satterpai, in Persian mythology, is the heaven of the fixed stars supposed to be situated below the heaven of the moon, and presided over by twelve genii of the twelve signs of the zodiac.

Sattiawoodi, in Hindú mythology, is a daughter of the king Dassarayen, who was first married to Parasen and afterwards to Sandanan.

Saturday (Saturn's day) was, next to the Lord's day, held by the ancient Christians in great veneration, and, especially in the Eastern parts, honored with all the public solemnities of religion. This observance of the day was, doubtless, out of respect to the feelings of the Jews, who were generally the first converts to the Christian faith, and who still retained great reverence for the Sabbath. The Western church regarded it as a fast, but the Greek Church observed it as a festival, in some Sabbath (Saturday) only excepted. This was called the Great Sabbath, between Good-Friday and Easter-day, when our Saviour lay buried, upon which account it was kept as a fast throughout the whole Church. Athanasius (Hom. de Semente, tom. i, p. 1060) tells us that they assembled on Saturdays—not that they were infected with Judaism, but only to worship Jesus Christ, the Lord of the Sabbath. So far as concerns public worship, Saturday was made in all things conformable to that of the Lord's day. The Scriptures were read, as on the Lord's day, sermons preached, and the communion administered. A preference, however, was given to the Lord's day, for there was no forbidding laws, pleadings, public shows, and games on that day. Nor were men obliged to abstain wholly from bodily labor, but, on the contrary, the Council of Laodicea (August. Ep. 118) has a canon forbidding Christians to Judeize, or rest on the Sabbath, any further than was necessary for public worship. The Pope, when speaking Saturday as a fast is given by pope Innocent in his epistle to the bishop of Eugubium: "If we commemorate Christ's resurrection not only at Easter, but every Lord's day, and fast upon Friday because it was the day of his passion, we ought not to pass by Saturday, which is the middle-time between the days of grief and joy." He therefore desires that Saturday ought to be kept as a fast (Innocent. Ep. ad Dian. Eugub. c. 4). This
was the general practice, and yet in Italy itself it was otherwise at Milan, where Saturdays were festival days. The Saturdays in Eastern churches are called "in XII Lectiones," from the six Gospels read both in Latin and Greek. See Bingham, Antiq. of the Chrst. Church, p. 1317 sq.; Riddle, Chrest. Antiq. p. 652 sq.; Wallcock, Sacred Arch. s. v.

Saturn, or Kronos, was a principal deity in Greek and Roman mythology. The old Italic Saturn, whose name indicates that he was a god of harvests, and the old Grecian Kronos, a thoroughly symbolic being, which, like his brothers, the Titans, is suggestive of the primitive and uniform forces of nature, and has a probable though partial connection with the Phoenician Moloch (q. v.), is a deity of two religious systems which often diverge from each other, and a modern learned mythology, which everywhere intermixes Greek and Roman elements, has met with but indifferent success in the endeavor to combine the two gods into one. Kronos, the son of Uranus and Gea, was the most cunning of the Titans. His mother had given birth to the Centaurs and the Cyclops, and Uranus had confined them in the underworld on account of their monstrous shapes and strength. Enraged by this action, Gea proposed to her younger children to avenge their brothers; but they all shrank from laying violent hands on their father, with the exception of Kronos, who hid himself, and at night encompassed Uranus and threw the generative organs down upon the earth, thereby frustrating it. Kronos then married the Titaness Rhea, from whom sprang the entire race of the gods who ruled the world. To avoid a prophecy by his parents which foretold that one of his children should dethrone him, he swallowed all his children immediately after their birth, excepting Jupiter, whom Rhea saved by giving Kronos a stone wrapped in cloths instead. The child grew rapidly, and attained in a single year to extraordinary size and strength. Metis (cunning) now gave him an emetic, which he administered to Kronos, with the result that he cast up all the children he had swallowed, together with the stone. The latter was placed for a memorial at the foot of Mount Parnassus, and Jupiter conspired with his brothers and sisters to dethrone their father, whom he mutilated as Uranus had been; but when he sought to secure the throne for himself the Titans resisted, with the result that after ten years' war Jupiter released the Centaurs and the Cyclops, and with their aid overcame the Titans. They then invested the earth, which was surrounded by a wall where the Cyclops had lain. The division of authority was then determined among the Kronides by lot, Pluto receiving the earth, Neptune the sea, and Jupiter the heavens and supreme authority over all. The dethroned Kronos or Saturn, it is said, now fled to Italy and inaugurated the golden age. Men lived, like the gods, without care, in uninterrupted happiness, health, and strength; they did not grow old; and to them death was a slumber which relieved them of their present nature and transformed them into deities. The earth yielded every kind of fruit, and gave up all its treasures without cultivation and labor. Undeterred by the misfortunes of Saturn men lived the life of paradise. To keep alive the recollection of this primitive life of innocence, freedom, and equality, the festival of the Saturnalia was instituted at Rome, which began on Dec. 17, and continued, first a single day, but afterwards for longer periods, until in the time of the emperors it extended over an entire week. During its continuance all business was interrupted; all distinctions between masters and slaves were laid aside, so that slaves sat at the sumptuous table and masters waited on them, and every form of recreation was allowed. In Greece Kronos or Saturn possessed temples of extreme antiquity. His temple stood at the foot of the Capitol, and served as an archive of the State and also as its treasury. The god is usually represented as bearing a sickle. The scythe, wings, and hourglass, which are likewise often introduced in such representations, are added notions of more recent date, and resulted from a change in the rite of conceiving of the god. The Persians gave this deity an almost wholly animal representation: the lower parts of the body resemble those of swine, a human body with arms is added, and an animal head with crown completes the figure.

Saturn, the planet, seems to be named as an object of worship in Amos v. 26, under the title Ky'ma, πολεμός, where it is said of the Israelites in the wilderness, "Ye have borne the tabernacle of your Moloch and Chi'n, your images," etc.; for a similar word is the name of this star in both Syriac and Arabic (comp. Aben-Ezra, ad loc.), and it is known that the ancient Arabsians strove to propitiate Saturn as a star of evil influence (see Pococke, Spec. Hist. Arab. p. 108, 120, ed. nov.; comp. Noberg, Onomast. Cod. NASCAR. p. 78 sq.; Ephrem Syr. Opp. ii. 458; Propert. iv. 1, 104; Lucan, i. 562; Juvenal, vi. 569). On account of its distance from the sun it was considered by the ancient astronomers as having a cold nature (Pliny, ii. 6, p. 75 ed. Harcl.), and they ascribed to it heavy storms of rain (ibid. i. 39; see Harduin, ad loc.; see also, on its evil influence, Macrob. Sat. i. 19, p. 96, 97 Bip.; see also Moloch). TheSept. has 'Pəpàdā; comp. Acts vii. 43, where the MSS. vary much (see Griesbach, ad loc.; comp. O. Muller, in the Bibl. Luecc. vii. 469 sq.), but the best read is 'Pəbədā. This is a Copitic word, as Kircher has shown from an Arabico-Coptic inscription (Comp. Ag. Ren. p. 61; Adj. Ep. i. 386 sq.). Seyfried would derive it from Pe, to make or be, and ovis, vizn, i. e. shining (comp. Tatius Iasg. in Aart'a Phen. c. 17). Jablonski, however (Remup. Aexyt. Deus [Frankfort and Leips. 1731], also in his Opusc. ii. 1 sq., and in Ugoline Theaur. xxiii.), would deny that this and the other names of planets associated with it in the inscription are Egyptian, and renders the word as Ethiopia, king of heaven, i.e. sun (comp. Oppusc. i. 230 sq.), for ro, king, and pheh, heaven. [Hence the true reading would be 'Pəpədā.] Then we must understand the passage in Amos to refer to the worship of Osiris. But there is little evidence for the reading with ū. Ign. Rosell (Dymol. Aegypt. [Rome, 1808] p. 170) explains 'Pəpədā as meaning inhabitant of heaven, from pheh, heaven, and rem, inhabitant (comp. Copitic version of 1 Cor. xv. 48 sq.). But this is not striking. More recently, Hengstenberg agrees with Jablonski in re-
jecting all glosses, and has returned to the old view that ἡ πρωταία is the mistake of a scribe for Κύης, or Ρηταί (A. and H. 116 sq.). The text is too hasty; and Kircher’s view is supported by some well acquainted with the Coptic, and is defended by Baur (Comment. ad loc.) and Winer, who considers the rendering of Hengstenberg (Geistes eurer Bilder, i. e. the frame or support of your images) as without force, though Hitzig and Ewald adopt it. Genesis (Theaur. ii. 269 sq.) recognizes the spiritus of Χωρος and Πρωταία as the spiritus of your idols, which is without good reason. (Comp., in gen., Braun, Selecta Sacra, p. 477 sq.; Maius and Schwab, in Ugelini Theaur. xxiii [but these are unimportant]; Schroder, De Tabernac. Mol. et Stella Des Remphta [Marb. 1745].) Rosenmuller denies that the Sept. renders Κύης by ἡ πρωταία, but refers it as a word of explanation to εἰκόνες, ἡ ἀλήθεια, your gods. But this is with little reason. An attempt has been made to connect Saturn with the Jewish Sabbath, as the day of Saturn. See, contra, Bahr, Symbol. ii, 584. Wolf’s Dia. l. de Chius et Rempht. (Leips. 1741) is unimportant. See CHION.

Saturnalia, the festival of Saturnus, to whom the people of Latin attributed the introduction of agriculture and civilized life. It was kept towards the end of December, as a sort of harvest-home, during which business was suspended; courts and schools were closed; no war was commenced or malefactor punished; slaves were relieved from ordinary labor, and, dressed in their masters’ clothes, were waited upon by them at the table. Saturnus being an ancient national god of Latin, the institution of the Saturnalia is lost in the most remote antiquity. One legend ascribes it to Janus, another (by Varro) to the Pelasgi, while a third tradition represented certain followers of Hercules, whom he had left behind on his return to Greece, as the authors of the festival. At first only one day was set apart for the sacred rites of Saturnus, but additions were gradually made until it occupied seven days. In reality, during the empire, three different festivals were celebrated. First came the Saturnalia proper, commencing on XVI Kal. Dec., followed by the Opalia, and then the Saturnalia, frequently coincident with the Bifuritia, so called from little earthware figures (εἰκίλια οὐκολία) exposed for sale at this season.

Saturn and Saturnalia, in Greek mythology, were appellatives of Juno and Jupiter, derived from their father Saturn. Saturninius, Saturnians, or Saturnines, an early sect of Syrian Gnostics, followers of Saturnus (q. v.) or Saturnus. The theories of Saturninus are only known through the work of Irenæus Against Heresies. In this he states that Saturninus, like Maneth, taught that there is one supreme Unknown, the Father (Ἡράρχης θεός). The Father, he taught, was without origin, bodiless and formless, and never in reality appeared to men; the God of the Jews was only an angel. A number of spiritual beings were created by him in successive generations, in the lowest of which came the spirits of the seven planets. These seven, of whom the God of the Jews was chief, created the world, man, and all things. They had not power to make man an erect being, and so he continued to crawl upon the earth like a worm until the Supreme sent forth a spark of life, which gave him an erect posture, compacted his joints, and made him to live. Man now for the first time became possessed of a soul, and the godlike germ is destined to unfold itself in those human natures where it has been implanted, to distinct personality, and to return after a determinate period to the original Fountain of Life. Saturninus taught that the Saviour, whom he calls Χριστός, would come to destroy the Demiurge, who was the God of the Jews; that he was without birth, without body, without figure, and only in appearance a man. He accounted for the existence of good and evil men by affirming that they were originally created of two kinds, the one good, whom Christ came to save, the other wicked, whom the devil succor, and whom Christ will destroy. The Saturninus considered marriage to be of Satan; they abstained from marriage, and taught that some prophecies came from the spirits who made the world, and some from Satan. Their doctrines led to a strict asceticism, and also to the celibacy of following times; they were based on dualism, and resembled those of the Docetists. As these heretics are not mentioned by St. Clement of Alexandria, it is probable that they were not much known out of Syria, and that they were few in number. See Blunt, Hist. of Sects, s. v.; Gardiner, Faiths of the World, s. v.; Ueberweg, Hist. of Philos. i, 280 sq.

Saturninus, a native of Antioch, in Syria, and a disciple of Manander. He was founder of a sect of Gnostics, called after him Saturninius (q. v.). He flourished A.D. 117-188.

Saturninus, a Christian martyr under Diocletian, was a priest of Albinita, in Africa, who, having been informed against for officiating in his clerical capacity, was apprehended and sent to Carthage to be examined before Amelius. On his examination, Saturninus vindicated the Christian religion with great eloquence. By command of the proconsul he was tortured and remanded to prison, where he died of starvation, about A.D. 305. See Fox, Book of Martyrs, p. 48.

Satur, the rendering in Isa. xiii, 21; xxxiv, 14, of the Heb. word שָׂעָר, which properly means hairy; hence a goat, especially a he-goat (comp. Lat. hircus, from hirsutus, hirtus), and is so rendered in Lev. iv, 24; 2 Chron. xxix, 23, and often. The Sept. has, in the passages in Isaiah, סֵאָר, demon; and so the Eng. A. V., in 2 Chron. xi, 15, “devil.” These beings are mentioned in Isaiah as the inhabitants of desert places, but particularly the ruin of Babylon and Petra, where they dance and call to each other. The Greeks probably derived their belief in the existence of beings half men and half goats from the Eastern nations, whose mythology abounds with such fabulous animals, but there is no reason to believe that they formed any part of the Jewish superstitions. Yet it has been supposed by some that Isaiah alludes to the spectral beings which the ancient Persians, the Jews, and the Mohammedans believe to haunt the ruins of Babylon. See SUPERSTITION. But in those passages where the prophet predicts the desolation of Babylon, there is probably no allusion to any species of goat, whether wild or tame. According to the old versions, and nearly all the commentators, our own translation is correct, and satyr— that is, demons of woods and desert places, half men and half goats—are intended. Comp. Jerome (Comment. ad Isaa. xiii.): “Seirim vel succubones vel satyros vel sylvestres quosdam homines quosnulli fatuos fercios vocant, aut demorsa generas intelligunt.” This explanation receives confirmation from a passage in Lev. xvii, 7, “They shall no more offer their sacrifices unto seirim,” and

Cynocephalus (from the Egyptian monuments).
from a similar one in 2 Chron. xi. 15. The Israelites, in all probability, had become acquainted with a form of goat-worship from the Egyptians (see Bochart, Hieroz. iii. 625; Jablonski, Pant. Aegypt. i. 273 sq.). The opinion held by Michaelis (Supp. p. 2942) and Lichtenstein (Commentat. de Simiaurum, etc. § 4, p. 50 sq.), that the seirim probably denote some species of ape, has been sanctioned by some modern scientists from a few passages in Pliny (Hist. Nat. v. 8; vii. 2; viii. 54). See Apes. That some species of cynocephalus (dog-faced baboon) was an animal that entered into the theology of the ancient Egyptians is evident from the monuments and from what Horapollo (i. 14–16) has told us. The other explanation, however, has the sanction of Gregory, Bocc., Rosenmüller, Parkhurst, Maurer, Furst, and others. As to the “dancing” satyrs, comp. Virgil, Ec. v. 73. See GOAT.

Satyrs, in Greek mythology, were demonic companions of Bacchus, who represented the unrestrained and luxurious life in the Bacchic circle. They are not mentioned in Homer, and Hesiod does not describe their form, though he speaks of them as a useless race having nothing to labor. Later writers furnish a description about as follows: Briskly hair, a short, thick, and turned-up nose, pointed ears, the neck often marked with small lumps resembling horns, a horse-tail, sometimes a goat-tail over the coccyx. The endowment of these beings with horns and goats' feet was a misconception of later days by which they were identified with pantheons. The satyrs were said to be sons of Mercury and Iphithme, or of the naiads. The oldest and most prominent of them was named Silemus, and the older satyrs are called Sileni collectively. Marsyas, too, was a satyr. In substance, the satyrs were companions of Bacchus; they were excessively fond of wine, and were accordingly represented as drinking, as reeling with the thyrsus, as overcome with sleep, as wine-pressers, or as playing on the flute or cymbal. Their attributes were the flute, the thyrsus staff, paned pipes, the shepherd's staff, drinking-vessels, and bottles. They were clothed in skins of beasts and crowned with vine-branches, ivy, and pine-twigs. They have frequently been the subject of artistic representation, and always in company with Bacchus. The Latin word satira (a satire), originality satyrus, has not the remotest connection with the Greek Satyris, and should not be in any way referred to them.

Sauce, a Coptic name, according to Jerome, given to the Canmites, as distinct from the Anchorets. The name is sometimes Anglicized Sauces. See Bingham, Antiq. of the Chris. Church, i. 243.

Sauces. See SAUCES.

Saukwinir, in Norse mythology, was one of the strongest jots, or giants. Odin slew his son, and at a subsequent visit to the jots narrated that he had killed the son of a giant and afterwards enjoyed the hospitality of the father, without having discovered his true character, only having excited the suspicions of his host.—Vollmer, Wörterb. d. Mythol. s. v.

Saumur, a Protestant theological seminary, located in a town of the same name, in the department of the Maine-et-Loire. It was suppressed in 1685, but during its continuance exerted considerable influence upon Protestant thought in France. Its tendency was towards Arminianism. See Hagenbach, Hist. of Doctrines, § 222, n. 15, 225, a. 267.

Saub (Heb. Shab,  שבע, desired; Sept. and New Test. Σαβαώ, of like form), the name of several persons in the Bible, but the three of whom are thus known in the A. V. For the others see SHUAL.

1. An early king of the Edomites, successor of Samlah at Rehoboth (Gen. xxxvi. 37, 38), elsewhere called “Shaul” (1 Chron. i. 48). B.C. post 1618.

2. The first king of Israel (B.C. 1058–1033). As such his career possesses a peculiar interest in the history and relations of the chosen people.

I. The Name.—This first becomes prominent here in the history of Israel, though found before in the Edomitic prince already mentioned, and in a son of Simeon (Gen. xlvii. 10; A. V. “Shaul”). It also occurs among the Kohathites in the genealogy of Samuel (1 Chron. vi. 34, “Shaul”), and in Saul, like the king of the tribe of Benjamin, better known as the apostle Paul (see below). Josephus (War, ii. 18, 4) mentions a Saul, father of one Simon who distinguished himself at Scythopolis in the early part of the Jewish war. The name in its application to the present character seems almost like a mockery of his history.

II. His Family.—On the following page is a general view of Saul's pedigree.

In this genealogy may be observed—1. The repetition in two generations of the names of Kish and Ner, of Naddab and Abi-nadab, and of Mephibosheth. 2. The occurrence of the name of Baal in three successive generations; possibly in four, as there were two Mephibosheths. 3. The constant shifting of the names of God, as incorporated in the proper names: (a) Abi-el = Je-hiel; (b) Malchi-shan = Je-shua; (c) Esh-baal = Ish-bosheth; (d) Mephi-(or Mer-) baal = Mephi-bosheth. 4. The long continuance of the family down to the times of Ezra. 5. Is it possible that Zimri (1 Chron. x. 3), who was a son of Rehoboam of the line of Judah, is the same as the Zimri of 1 Kings xvi.—if so, the last attempt of the house of Saul to regain its ascendancy? The time would agree.

There is a disagreement between the pedigree in 1 Sam. ix. 1 and xiv. 51, which represents Saul and Abner as the grandsons of Abiel, and 1 Chron. viii. 33 and ix. 39, which represents them as his great-grandsons. If we adopt the more elaborate pedigree in the Chronicles, we must suppose either that a link has been dropped between Abiel and Kish, in 1 Sam. ix. 1, or that the elder Kish, the son of Abiel (1 Chron. ix. 36), has been confounded with the younger Kish, the son of Ner (1 Chron. ix. 38). The pedigree in 1 Chron. viii. is not free from confusion, as it omits among the sons of Abiel, Ner, who in 1 Chron. ix. 36 is the fifth son, and who in both is made the father of Kish. See ABIEL.

Saul's more particular genealogy and lineage (so far as given) is as follows:

III. Saul's History.—1. Up to his Coronation.—The birthplace of Saul is not expressly mentioned; but as Zelah was the place of Kish's sepulchre (2 Sam. xxii.), it was probably his native village. There is no warrant for saying that it was Gibeah, though, from its subsequent connection with him, it is called often "Gib-

eah of Saul." See Gibealh. (When Abiel, or Jehiel [1 Chron. viii, 29; ix, 35], is called the father of "Gibon," it probably means founder of Gibealh.)

His father, Kiss, was a powerful and wealthy chief, though the family to which he belonged was of little importance (1 Sam. ix, 1, 21). A portion of his property consisted of a drove of asses. In search of these asses, gone astray on the mountains, he sent his son Saul, accompanied by a servant ("Z?) who acted also as a guide and assistant of the young man (ver. 3-10). After a three days' journey (ver. 20), which it has hitherto proved impossible to track with certainty [see Ramah], through Ephraim and Benjamin [see Shalim; Sha-lina; Zuph], they arrived at the foot of a hill surrounded by a town, when Saul proposed to return home, but was deterred by the advice of the servant, who suggested that before doing so they should consult "a man of God," "a seer," as to the fate of the asses, securing his oracle by a present (bockhith) of a quarter of a silver shekel. They were instructed by the maidens at the well outside the city to catch the seer as he came out of the city to ascend to a sacred eminence, where a sacrificial feast was waiting for his benediction (1 Sam. ix, 11-15). At the gate they met the seer for the first time—it was Samuel. A divine intimation had indicated to him the approach and the future destiny of the youthful Benjaminite. Surprised at his language, but still obeying his call, they ascended to the high place, and in the inn or caravansary at the top (Sept. το καραβάμα, ver. 27) found thirty or (Sept. and Josephus, Ant. vi, 4, 1) seventy guests assembled, among whom they took the chief place. In anticipation of some distinguished stranger, Samuel had bidden the cook reserve a boiled shoulder, from which Saul, as the chief guest, was bidden to tear off the first morsel (Sept. 1 Sam. ix, 22-24). They then descended to the city, and a bed was prepared for Saul on the house top. At daylight Samuel roused him. They descended again to the skirts of the town, and there (the servant having left them) Samuel poured over Saul's head the consecrated oil, and with a kiss of salutation announced to him that he was to be the ruler and (Sept.) deliverer of the nation (ix, 26-8, 1). From that moment, as he turned on Samuel the huge shoulder which towered above all the rest (Sept. x, 9), a new life dawned upon him. He returned by a route which, like that of his search, is impossible to make out distinctly; and at every step homeward it was confirmed by the incidents which, according to Samuel's prediction, awaited him (x, 9, 10). At Rachel's sepulchre he met two men, who announced to him the recovery of the asses—his lower cares were to cease. At the oak of Tabor [see Plain: Tabor] he met three men carrying gifts of kids and bread and a skin of wine, as an offering to Bethel. Two of the loaves were offered to him as if to indicate his new dignity. At "the hill of God" (whatever may be meant thereby, possibly his own city, Gibealh) he met a band of prophets descending with musical instruments, and he caught the inspiration from them as a sign of his new life (Ewald, iii, 28-30).

This is what may be called the private, inner view of his call. The outer call, which is related independently of the other, was as follows. An assembly was convened by Samuel at Mizpeh, and lots (so often practised at that time, see Aristotle, Polit. vi, 1; Virgil, Aen. ii) were cast to find the tribe and the family which was
to produce the king. Saul was named, and, by a
divine intimation, found hidden in the circle of baggage
which surrounded the encampment (1 Sam. x, 17–24).
His stature at once conciliated the public feeling, and
for a time the fact that he was of a vast multitude, directly ruled, was
often repeated in modern times. "Long live the king!"
(ver. 23, 24) and he returned to his own Gibeah,
accompanied by the fighting part (ךֵּרָה), of the people,
of whom he was now to be the special head. The
murmurs of the worthless part of the community who
refused to salute him with the accustomed presents
were soon dispelled by an occasion arising to justify
the selection of Saul. The words which close 1 Sam.
27 are, in the Hebrew text, "he was as though he
were deaf;" in Josephus, Ant. vi. 5, 1, and the Sept.
(followed by Ewald), "and it came to pass after a month that . . ."
The corrupt administration of justice by Samuel's
son embarrassed an occasion to the Hebrews for rejecting
that theocracy of which they neither appreciated the
value, nor, through their unfaithfulness to it, enjoyed
the full advantages (1 Sam. viii.). The prospect of the
event related below seems also to have conspired with
the cause just mentioned and with a love of novelty in
promising the demand for a king (xii, 19)—an officer
especially of the genius of the monarchy, though
not contemplated as a historical certainty, and provided
for by the Jewish lawyer (ver. 17–20; Deut. xvii,
14–20; on which see Grotius's note; also De Juris Belli,
etc., i, 4, 6, with the remarks of Gronovius, who [as Puffendorf also does] contempts the views of Grotius).
An explanation of the nature of this request, as not
only an instance of ingratitude to Samuel, but of rebellion
against Jehovah, and the delineation of the manner
in which their kings—notwithstanding the restrictions
prescribed in the law—might be expected to conduct
themselves (ךֵּרָה יַנְעֵּם, Sept. דִּקֵּאֹב תִּוְיָּו אַבָּלָלֵת; 1 Sam. viii., xi; x, 25), failed to move the people from their resolution. See SAUL. Both previous
to that election (ver. 16), and subsequently,
when insulted by the worthless portion of the Israelites,
he showed that modesty, humility, and forbearance
which seem to have characterized him till corrupted
by the possession of power. The person thus set apart
to discharge the royal function possessed, at least, those
corporal advantages which most ancient nations deidated
in their sovereigns—what Euripides calls the
sneer of flowing locks. His personal appearance
and宮manding, and he soon showed that his courage was
not inferior to his strength (ix, 1; x, 23). His belonging
to Benjamin also, the smallest of the tribes, though
distinguished bravery, prevented the mutual jealousy
with which either of the two great tribes, Judah and Ephraim,
would have regarded a king chosen from the other.
2. Confirmation of Saul's Appointment. — He was
(having, apparently, returned to his private life) on his
way home, driving his herd of oxen, when he heard
one of those wild lamentations in the city of Gibeah,
shouting "Alas for the towns! alas for the towns of a
calamity. It was the tidings of the threat issued by
Nahash, king of Ammon, against Jabesh-gilead. See AMMON.
For, in the meantime, the Ammonites, whose
invasion had hastened the appointment of a king, having
besieged Jabesh in Gilead, and Nahash their king
having proposed insulting conditions to them, the
elders of that town, apparently not aware of Saul's election
(1 Sam. xi, 3), sent messengers through the land imploring help.
The inhabitants of Jabesh were connected with Benjamin by the old adventure recorded in Judges xxii. It was as if this one spark was needed to
awaken the dormant spirit of the King. The Spirit
of the Lord came upon him," as on the ancient
judges. The shy, retiring nature which we have observed
vanished never to return. In this emergency, he
had recourse to the expedient of the earlier days
by the message of the flesh of two of the oxen from
the herd which he was driving. Saul thus acted with
wisdom and promptitude, summoning the people, en-
masse, to meet him at Bethel; and having, at the head of
a vast multitude, totally routed the Ammonites (ver.
11) and obtained a higher glory by exhibiting a new
instance of clemency, whether dictated by principle or
policy—"Novum imperium ineohnotius utiles clemente
fama" (Tacitus, Hist, iv, 68). "For lowliness is young
ambition's ladder"—he and the people bestowed them-
seves, under the direction of Samuel, to Gigal, there
with solemn sacrifices to reinstall the victorious leader
in his kingdom (1 Sam. xi). If the number set down in
the Hebrew text of those who followed Saul (ver. 8)
can be depended on (the Sept. more than double them,
and Josephus outgoes even the Sept.), it would appear
that the tribe of Judah was disinterested in the election,
for the soldiers furnished by the other tribes
were 300,000, while Judah sent only 30,000; whereas
the population of the former, compared with that of
Judah, appears, from other passages, to have been as
about five to three (2 Kings xxiv, 9). Yet it is strange
that this reminiscence is neither mentioned (1 Sam. xi, 7)
or noted. At Gigal Saul was publicly anointed and
solemnly installed in the kingdom by Samuel, who took
occasion to vindicate the purity of his own administra-
tion—which he virtually transferred to Saul—to censure
the people for their ingratitude and impiety, and to warn both them and Saul of the danger of disobedience
to God. The reign of Jehovah extended even beyond
the limits of this military success was instantaneous on the people;
the punishment of the murmurers was demanded,
but refused by Saul, and the monarchy was inaugurated
(16, 1–10). It should be observed, however, that,
according to 1 Sam. xii, 12, the affair of Nahash
preceded and occasioned the election of Saul. He be-
came king of Israel. But he still so far resembles the
earlier judges as to be virtually king only of his own
tribe, Benjamin, or of the immediate neighborhood.
Almost all his exploits are confined to this circle of ter-
ritory or associations.
These were the principal transactions that occurred
during the first decade of Saul's reign (which we venture
to assign as the meaning of the first clause of ch.
xiii.—"the son of a year was Saul in his reigning:" the
emendation of Origen, "Saul was thirty years old," be-
ing required by the chronology, for he seems, at the next
event, to have been forty years old; and the subse-
quent event consequent upon the first decade, which may
be the meaning of the latter clause.
3. Saul's First Trial and Transgression. — Samuel,
who had up to this time been still named as ruler with
Saul (1 Sam. xi, 7, 12, 14), now withdrew, and Saul be-
came the acknowledged chief. The restrictions on
which he held the sovereignty had (x, 25) been fully
explained as well to Saul as to the people, so that he
was not ignorant of his true position as merely the lieute-
nant of Jehovah, king of Israel, who not only gave all
the laws, but whose will, in the execution of them, was
constantly to be consulted and compiled with. The
fact of this first occurrence to the towns of a great
calamity was put to the test brought out those defects in
his character which showed his unfitness for his high
office, and incurred a threat of that rejection which his
subsequent conduct confirmed (xiii, 13). Saul could
not understand his proper position, as only the servant
of Jehovah speaking through his ministers, or confiding
himself to it. It did not occur to him. David
with many individual and private faults and crimes
was—a man after God's own heart, a king faithful to the
principles of the theocracy.
In the twentieth year of his reign (as the age of
Jonathan evidently requires; the text being corrupt
see Kues ad loc.) Saul began to make a determined
effort to shake off the Philistine yoke which pressed on his
country; not least on his own tribe, where a Philistine
officer had long been stationed even in his own field (1}
Samuel, 5; xiiii, 3). Having collected a small standing army, part of which, under Jonathan, had taken a fort (or city) and the court (of David) of the Philistines,conspired against the people to withdraw the forces which their oppressors, now alarmed for their dominion, would, upon this signal, naturally assemble. But so numerous a host came against Saul that the people, panic-stricken, fled to rocks and caverns for safety—years of servitude having extinguished their courage, which the want of arms, of which the policy of the Philistines had deprived them, still further diminished. The number of chariots, 30,000, seems a mistake; unless we suppose, with Le Clerc, that they were not war-chariots, but baggage-wagons (an improbabl estimate), so that 3000 may be the true number. Apparently reduced to extreme necessity, and the fourth day having come, but not being ended, the expiration of which Samuel had enjoined him to wait, Saul at least ordered sacrifices to be offered—for the expression (ver. 9) does not necessarily imply that he intruded into the priest’s office (2 Sam, vi, 13; 1 Kings iii, 2-4), though that is the most obvious meaning of the text. Whether that which Saul now disregarded was the injunction referred to (1 Sam, x, 8) or one subsequently addressed to him, this is evident, that Saul acted in the full knowledge that he sinned (xiii, 12); and his guilt, in that act of conscious disobedience, was probably increased by its clearly involving the ruin of himself and his family, according to his own judgment and will. But just after the sacrifice was completed Samuel arrived and pronounced the first curse on his impetuous zeal (ver. 5-14). Samuel, having denounced the displeasure of Jehovah and its consequences, left him, and Saul returned to Gibeah (the addition made to the text of the Sept. ver. 15, where, after “from Gilgal,” the clause, “and the rest of the people went up after Saul to meet the enemy from Gilgal to Gibeah,” etc., being required apparently by the sense, which, probably, has been the only authority for its insertion). Left to himself, Saul’s errors multiplied upon him. Meanwhile the adventurous exploit of his son brought on the crisis which ultimately drove the Philistines back to their own territory. Jonathan, having assaulted a garrison of the Philistines (apparently at Michmash [1 Sam, xiv, 31]), which therefore must have been situated near Ephraim (2 Sam, vi, 1 [ver. 1]), and invited the Philistines in (ibid. xiv, 15), Saul aided by a panic of the enemy, an earthquake, and the co-operation of his fugitive soldiers, effected a great slaughter; but by a rash and foolish declaration, he (1) impeded his success (ver. 90), (2) involved the people in a violation of the law (ver. 83), and (3), unless prevented by the more enlightened conscience of David (ver. 28), brought a curse on Jonathan and his issue to death for an act which, being done in total ignorance, could involve no guilt. See Jonathan. This campaign was signalized by two remarkable incidents in the life of Saul. One was the first appearance of his madness in the above rash vow which all but cost the life of his son (ver. 24, ff). The other was the erection of his first altar, built either to celebrate the victory, or to expiate the savage feast of the famished people (ver. 33). This success against the Philistines was followed, not only by their retirement for a time within their own territory, but by other considerable successes against the other enemies of his country—Moab, Ammon, Edom, the kings of Zobah, the Amalekites, and the Philistines—all of whom he harassed, but did not subdue. These wars may have occupied two or three years, about the middle of Saul’s reign (B.C. 1073-71).

4. Saul’s Second Transgression. The expulsion of the Philistines (although not entirely completed [1 Sam, xiv, 52]) at once placed Saul in a position higher than that of any previous ruler of Israel. Probably from this time was formed the organization of royal state, which contained in germ some of the future institutions of the monarchy. The host of 3000 has been already mentioned (xxii; xxiv, 2; xxvii, 2; comp. 1 Chron, xxii, 29). Of this Abner became captain (1 Sam, xiv, 50), and David’s body-guard officer (1 Chron, xiii, 19). Already Benjaminites (Josephus, Ant. vi, 6; vii, 14) was also formed of runners and messengers (see 1 Sam, xvi, 15, 17; xxiv, 14, 17; xxvi, 22). Of this David was afterwards made the chief. These two were the principal officers of the court, and sat with Jonathan at the king’s table (xx, 25). The former officer is incidentally mentioned—the keeper of the royal mulesthe comes stabulis, the “constable” of the king—such as appears in the later monarchy (1 Chron, xxvii, 30). He is the first instance of a foreigner employed about the court—being an Edomite or (Sept.) Syrian, of the name of Doeg (1 Sam, xxi, 7; xxii, 9). According to Jewish tradition (Jerome, Qu. Hebr. 9), Doeg came from Judah to pini Saul in his pursuit of his father’s asses—who counselled him to send for David (1 Sam, ix, xvi), and whose son ultimately killed him (2 Sam, i, 10). The high-priest of the house of Ithamar (Ahiimelech or Ahijah) was in attendance upon him with the ephod, when he desired it (1 Sam, xiv, 3), and felt himself bound to assist his secret commissioners (xxi, 1-9; xxii, 14). The king himself was distinguished by a state not before marked in the rulers. He had a tall spear of the same kind as that described in the hand of Goliath, and the same that now marks the Bedouin sheik. This never left his hand (xxv, 4), and he carried it in the hand eaten meals (xx, 38), at rest (xxvi, 11), in battle (2 Sam, i, 6). In battle he wore a diadem on his head and a bracelet on his arm (i, 10). He sat at meals on a seat of his own facing his son (1 Sam, xx, 25; Sept.). He was received on his return from battle by the songs of the Israelitish women (xxvii, 6), among whom he was on such occasions specially known as bringing back from the enemy scarlet robes, and golden ornaments for their apparel (2 Sam, i, 24).

The warlike character of his reign naturally still predominated, and he was now able not merely, like his temporary predecessors, to act on the defensive but to attack the neighboring tribes of Moab, Ammon, Edom, Zobah, and finally Amalek (1 Sam, xiv, 47). The war with Amalek is twice related, first briefly (ver. 48), and then at length (xxv, 1-9). Its chief connection with Saul’s history lies in the disobedience to the prophetic command in the former story, and in the conflict with Amalek, and the retention of the spoil (B.C. 1070). In this event another trial was afforded Saul before his final rejection—namely, by the command to extirpate the Amalekites, whose hostility to the people of God was inveterate (Deut. xxx, 18; Exod. xvii, 8-16; Numb. xiv, 42-45; Judg. iii, 18; vi, 1), and who had not by repentance or averted their hostility (Judg. ii, 9) been annihilated (1 Sam, xiv, 48). The extermination of Amalek and the subsequent execution of Agag belong to the general question of the moral code of the Old Test. See Agag. There is no reason to suppose that Saul spared the king for any other reason than that for which he retained the spoil—namely, to make a more splendid show at the sacrificial thanksgiving (xxv, 21). Such was the Jewish tradition preserved by Josephus (Ant. vii, 2), who expressly says that Agag was spared for his stature and beauty, and such is the general impression left by the description of the celebration of the victory. Saul rules to the southern Carmel in a chariot (Sept.), but is hurried elsewhere, and sets up a monument there (1 Heb. "a hand" [2 Sam, xviii, 18]), which in the Jewish traditions (Jerome, Qu. Hebr. ad loc.) was a triumphal arch of olives, myrtles, and palms. In allusion to his crowning triumph, Saul applies to God the phrase, "The victory (Vulg. triumphus) of Israel is thy reign" (1 Sam, xvii, 29; and comp. 1 Chron, xxix, 11). The apparent cruelty of this commission was not the reason why it was not fully executed, as Saul himself confessed when Samuel upbraided him, "I feared the people and obeyed their voice" (1 Sam, xv, 24). This stubbornness in persisting to rebel against the direc-
tions of Jehovah was now visited by that final rejection of his family from succeeding him on the throne which had before been threatened (xiii, 18, 14; xiv, 29), and which was now significantly represented, or mystically predicted, by the rending of the prophet's mantle. The struggle between Samuel and Saul in their final parting is also indicated, as he tears himself away from Saul's grasp (I Sam. xiv, 7, 5), and expresses by the long mourning of Samuel for the separation—"Samuel mourned for Saul." "How long wilt thou mourn for Saul?" (I Sam. xiv, 35; xvi, 1). After this second and flagrant disregard, accordingly, Saul received no more public countenance from the venerable prophet, to his own horror, and to his punishment; "nevertheless the Lord repented that he had made Saul king" (xxv, 35). See SAMUEL.

5. Saul's Conduct towards David.—The rest of Saul's life is one long tragedy. The frenzy which had given indications of itself before now at times took almost entire possession of him. It is described in mixed phrases as "an evil spirit of God" (much as we might speak of "religious madness"), which, when it came upon him, almost choked or strangled him from its violence (I Sam. xvi, 14; Sept.; Josephus, Ant. vi, 8, 2). The denunciations of Samuel sank into the heart of Saul, and produced a deep melancholy, which either really was, or which his physicians (I Sam. xvi, 14, 15; comp. Gen. 1, 2) told him was, occasioned by a supernatural influence; unless we understand the phrase מָרָא אֶלֶף, an evil spirit, subjectively, as denoting the condition itself of Saul as a man, and not the case of that condition (Jas. xxix, 10; Num. v, 14; Rom. xi, 8). We can conceive that music might affect Saul's feelings, might cheer his despondency, or divert his melancholy; but how it should have the power to chase away a spiritual messenger whom the Lord had sent to chasten the monarch for his transgressions is not so easily understood. Saul's case must probably be judged of by the same principles as that of the demons mentioned in the New Test. See DEMONIAC. In this crisis David was recommended to him by one of the young men of his guard (in the Jewish tradition groundlessly supposed to be Doeg (Jerome, Quo. Herb. ad loc.) on account of his skill as a musician (I Sam. xvi, 16-23). But the manner of his approach to Saul, as on this occasion, by分明 Goliath, Saul's ignorance of David's person after he had been his attendant and armor-bearer, with various other circumstances in the narrative (xvi, 14-23; xxvii; xviii, 1-4), present difficulties which neither the arbitrary omisions in the Sept. nor the ingenuity of subsequent commentators has succeeded in doing away, and which have led many scholars to suppose the existence of extensive dislocations in this part of the Old Test. The change proposed by Hales and others seems to be the most ready, which would place the passage xvi, 14-29 after xvii, 9; yet why should Saul's attendants need to describe so minutely a person whom he and all Israel knew so well already? Also, how can we conceive that Saul should love so much (xvi, 21) a person against whom his jealousy and hatred had been so powerfully excited as his probable successor in the kingdom? (xviii, 9). Besides, David had occupied already a much higher position (ver. 9); and, therefore, his being made Saul's armor-bearer must have been the very opposite of promotion, which the text (xvi, 21) supposes it was. The most rational solution of the difficulty appears to be the supposition that David had in the interim grown so much that the monarch did not now recognise him.

See DAVID.

Though not acquainted with theunction of David, yet having received intimation that the kingdom should be given to another, Saul soon suspected, from his accomplishments, heroism, wisdom, and popularity, that David was his destined successor; and, instead of concluding that his resistance to the divine purpose would only accelerate his own ruin, Saul, in the spirit of jealousy and rage, commenced a series of murderous attempts on the life of his rival that must have lost him the respect and sympathy of his people, which they secured for the object of his malice and envy, whose noble qualities also they both exercised and rendered more conspicuous. He attempted twice to assassinate him with his own hand (I Sam. xviii, 10, 11; xix, 10); he sent him to a deeper trial; and he sent him to his death (xvii, 17); he proposed that David should marry first his elder daughter, whom yet he gave to another, and then his younger, that the procuring of the dowry might prove fatal to David; and then he sought to make his daughter an instrument of her husband's destruction; and it seems, with these various preliminaries, that he would have imbrued his hands in the blood of the venerable Samuel himself (xix, 18), while the text seems to intimate (xx, 38) that even the life of Jonathan was not safe from his fury, though the subsequent context may warrant a doubt whether Jonathan was the party aimed at by Saul. The slaughter of Ahimelech the priest (xxi), under pretence of his being a partisan of David, and of eighty-five other priests of the house of Eli, to whom nothing could be imputed, as well as the whole inhabitants of Nob, was an atrocity perhaps never exceeded; and yet the wickedness of the act was not greater than its infatuation, for it must have inspired his subjects with a spirit which abhorred him as an inhuman tyrant, but with horror of him as an impious and sacrilegious monster. This crime of Saul put David in possession of the sacred lot, which Abiathar, the only surviving member of Eli's priestly family, brought with him, and by which he was enabled to obtain offices directing him in his critical affairs (xxi, 21-28; xxiii, 1, 2).

Having compelled David to assume the position of an outlaw, around whom gathered a number of turbulent and desperate characters, Saul might persuade himself that he was justified in.bestowing the hand of David's wife on another, and in making expiatory to approach and destroy him. A portion of the people were base enough to minister to the evil passions of Saul (1 Sam. xxiii, 19; xxvi, 1), and others, perhaps, might color their fear by the pretence of conscience (xxiii, 12). But his spacing Saul's life twice, when he was completely in his power, must have destroyed all color of right or reason in the case of Saul, which Saul confidently by David's wantonness. David's love for Saul did in his own conscience (xxviii, 3-7; xxviii), which two passages, though presenting many points of similarity, cannot be referred to the same occasion without denying to the narrative all historic accuracy and trustworthiness. Though thus degraded and paralyzed by the influence of Saul, David was satisfied with vigorous in repelling the enemies of his country, and in other affairs wherein his jealousy of David was not concerned (xxiii, 27, 28). In Saul's better moments, also, he never lost the strong affection which he had contracted for David. "He loved him greatly" (xxvi, 21). "Saul would let him go no more home to his father's house" (xxviii, 2). "Wherefore cometh the son of Jesse to mourn?" (xxvii, 27). "Is this thy voice, my son David? ... Return, my son David; blessed be thou, my son David" (xxiv, 16; xxvii, 23). Occasionally, too, his prophetic gift returned, blended with his madness. He "prophesied" or "raved" in the midst of his house—"he prophesied and lay down naked all day and all night" at Ramah (xxiv, 24). But his acts of fierce, wild zeal increased. The massacre of the priests, with all their families—the massacre, perhaps at the same time, of the Gibeonites (2 Sam. xxi, 1), and the violent extirpation of the necromancers (1 Sam. xxviii, 9, 9), are all ascribed to him.

6. Saul's Last Offence and Death.—At length the monarchy itself, which he had raised up, broke down under the weakness of its head. ThePhilistines entered the country, and with their chariots and horses occupied the plain of Estraelon. Their camp was pitched on the southern slope of the range now called
Little Hermon, by Shunem. On the opposite side, on Mount Gilboa, was the Philistine army, clanging, as usual, to the heights which were their camp, near the spring of Gideon's encampment, hence called the spring of Harod, or "trembling;" and now the name assumed an evil omen, and the heart of the king as he pitched his camp there "trebled exceedingly" (1 Sam. xxviii, 5). The measure of Saul's iniquity, now almost fully attested, was the shedding of the blood of a saint. Jehovah the God of Israel (Exod. xxi, 18; Lev. xix, 31; xx, 27; Deut. xviii, 10, 11). Saul, probably in a fit of zeal and perhaps as some atonement for his disobedience in other respects, had executed the penalty of the law on those who practised necromancy and divination (Lev. xix, 29; Deut. xiii, 2). Now, however, in the loss of all the usual means of consulting the divine will, he determined, with that wayward mixture of superstition and religion which marked his whole career, to apply to one of the necromancers who had escaped his persecution. Forsaken of God, who gave him no oracles, and rendered, by a course of wickedness, both desperate and infatuated, he requested his attendants to seek him a woman who had a familiar spirit (which is the loose rendering in the English Bible of the expression occurring twice in ver. 7. רָקָה הָרָעָה, a woman a mistress of Oth; Sept. εὐγαστρίστως, i. e. a ventriloquist; Vulg. habens Pythomonem, i. e. a Pythson [see NECROMANCY]), that he might obtain from her that direction which Jehovah refused to afford him. She was a woman living at Endor, on the other side of Little Hermon. According to the Hebrew tradition mentioned by Jerome, she was the mother of Abner, and hence her escape from the general massacre of the necromancers (see Leo Allatius, De Exegetarum usu, cap. 6 in Criticis Sacri, vol. ii). Volumes have been written on the question whether in the scene that follows we are to understand an imposture or a real apparition of Samuel. Eustathius and most of the fathers take the former view (representing it, however, as a sign of the devil); Origen, the latter view. Augustine wavered (ibid. ut supra, p. 1062—1114). The Sept. of 1 Sam. xxviii, 7 (by the above translation) and the A. V. (by its omission of "herself") in xxviii, 14, and insertion of "when" in ver. 15) lean to the former. Josephus (who pronounces a glowing eulogy on the woman, Ant. vi, 14, 2, 3) and the Sept. of 1 Chron. x, 13, to the latter. At this distance of time it is impossible to determine the relative amount of fraud or of reality, though the obvious meaning of the narrative itself tends to the hypothesis of some kind of apparition. She recognises the dissimulation of the apparition, and, illuminated seemingly from his threatening aspect or tone as towards his enemy. Saul apparently saw nothing, but listened to her description of a godlike figure of an aged man wrapped round with the royal or sacred robe. On hearing the denunciation which the apparition conveyed, Saul fell the whole length of his gigantic stature, whose invasion had tempted him to try this unhallowed expedition—all announced to him by that same authority which had foretold his possession of the kingdom, and whose words had never been falsified—Saul, in a state of dejection which could not promise success to his followers (comp. Thomson, Land and Book, ii, 199), prepared as for battle to meet the enemy in person, on the extremity of the great plain of Edronel (on the localities of this battle, etc., see Hackett, Illustrations of Script., p. 178 sqq.).

The next day the battle came on, and, according to Josephus (Ant. vi, 14, 7), perhaps according to the spirit of the sacred narrative, his courage and self-devotion returned. The Israelites were driven up the side of Gilboa. The three sons of Saul were slain (1 Sam. xxxi, 2). Saul himself with his armor-bearer was pursued by the archers and the charioteers of the enemy (ver. 5; 2 Sam. i, 6). He was wounded in the stomach (1 Sam. xxxi, 5). His shield was cast away (2 Sam. i, 21). In his extremity, having in vain solicited death from the hand of his armor-bearer (Deog the Edomite), he resolved, "against the remembrance of his master's crimes and now of his punishment," Saul perished at last by his own sword (1 Sam. xxxi, 4). According to another account (less trustworthy, or, perhaps, to be reconciled with the former by supposing that it describes a later incident), an Amalekite came up at the moment of Saul's death, "renewing from himself the enemy," and found him "fallen" but leaning on his spear (2 Sam. i, 6, 10). The dizziness of death was gathered over him (ver. 9), but he was still alive; and he, at his own request, put out of his pain by the Amalekite, who took off his royal diadem and bracelet and carried the head away to David, till then, according to Josephus (Ant. vi, 14, 7), did the faithful armor-bearer fall on his sword and die with him (1 Sam. xxxi, 5). The body, on being found by the Philistines on the morrow, was stripped and decapitated. The armor was sent into the Philistine cities, and was kept for the spoil after the spoliations were finally deposited in the temple of Astarte, apparently in the neighboring Canaanish city of Bethshan; and over the walls of the same city was hung the naked, headless corpse with those of his three sons (ver. 9, 10). The head was deposited (probably at Ashdod) in the temple of Dagon (1 Chron. x, 10). The corpse was removed from Bethshan by the inhabitants of Jabesh-gilead, who came over the Jordan by night, carried off the bodies, burned them, and buried them under the tamarisk at Jabesh (1 Sam. xxxi, 13). It is pleasing to think that even the worst men have left behind them those in whom gratitude and affection are duties. Saul had those who mourned on, as many on whose hand was found to have straw flowers on the newly made grave of Nero. After the lapse of several years, his ashes and those of Jonathan were removed by David to their ancestral sepulchre at Zelah in Benjamin (2 Sam. xxvii, 15). "Saul's Character.—There is not in the sacred history, or in any other, a character more melancholy to contemplate than that of Saul. Naturally humble and modest, though of strong passions, he might have adorned a private station. In circumstances which did not expose him to strong temptation, he would probably have acted wisely. But, supported, as it were, by some power, beyond his control or his responsibility, neither by a powerful understanding nor a scrupulous conscience; and the obligations of duty and the ties of gratitude, always felt by him too slightly, were totally disregarded when ambition, envy, and jealousy had taken possession of his mind. The diabolical nature of these passions is seen in the selfishness, in Saul, whom their indulgence transformed into an unnatural and bloodthirsty monster, who constantly exhibited the moral infatuation, so common among those who have abandoned themselves to sin, of thinking that the punishment of one crime may be escaped by the perpetration of another. In him, also, is seen that moral anomaly or contradiction, which we can hardly be incredible did we not so often witness it, of an individual pursuing habitually a course which his better nature pronounces not only flagitious, but insane (1 Sam. xxiv, 16, 22). Saul knew that that person should be king whom yet he persisted in seeking to destroy, and so accelerated Saul's ruin: For who could have doubted that the distractions and disaffection occasioned by Saul's persecution of David produced that weakness in his government which encouraged the Philistines to make the invasion in which himself and his sons perished.  "I gave thee a king in mine anger, and took him away in my wrath" (Hos. vii, 11)."
the prolonged troubles and disastrous termination of this first reign, the Hebrews were vividly shown how vain was their favorite remedy for the mischiefs of foreign invasion and intestine discord.

Saul's character is in part illustrated by the fierce, wayward, fiftful nature of the tribe [see Benjamin], and in part accounted for by the struggle between the old and new systems in which he found himself involved. To this we must add a taint of madness, which broke out in violent frenzy at times, leaving him with long lucid intervals. His affections were strong, as appears in his love both for David and his son Jonathan, but he was not without a will which could overcome his excessive zeal or insanity which ultimately led to his ruin. He was, like the earlier Judges, of whom in one sense he may be counted as the successor, remarkable for his strength and activity (2 Sam. i, 23); and he was, like the Homeric heroes, of gigantic stature, taller by head and shoulders than the rest of the people, and of that kind of beauty denoted by the Hebrew word "good" (1 Sam. ix, 2), and which caused him to be compared to the gazelle—"the gazelle of Israel." It was probably these external qualities which led to the epithet which is frequently attached to his name, "chosen"—"whom the Lord did choose."—"See ye (i. e. Look at) him whom the Lord hath chosen!" (1 Sam. ix, 17; s. 24; 2 Sam. xxii, 6).

V. Literature.—See the treatises referred to in Darling, Cyclop. Bibliograph. col. 290-302; Stanley, Jewish Ch. ii, lect. xxii; Ewald, Hist. of Israel, i, 15 sq.; Nie- meyer, Chorik., v, 75 sq.; Hasse, König Saul (Gries. 1854); Richardson, Saul, King of Israel (Edinb. 1858); Miller, Saul, First King of Israel (2d ed., Lond. 1866); Brooks, King Saul [a tragedy], N.Y. 1871;) and the monographs on his interview with the witch cited by First, Bibliotheca Judaica, iii, 236. See King.

3. The Jewish name of Paul (q. v.). This was the most distinguishing epithet which the general public gave to the tribe of Benjamin, to which the apostle felt some pride in belonging (Rom. xi, 1; Phil. iii, 5). He himself leads us to associate his name with that of the Jewish king by the market way in which he mentions Saul in his address at the Pisidian Antioch: "God gave unto them Saul the son of Cis, a man of the tribe of Benjamin" (Acts xiii, 21). These indications are in harmony with the intensely Jewish spirit of which the life of the apostle exhibits so many signs. The early ecclesiastical writers did not fail to notice the prominence thus given by Paul to his tribe. Tertullian (Adv. Marc. v, 1) applies to him the dying words of Jacob on Benjamin (Gen. xliii, 17), and his Epistles (Phil. iv, 8), alluding to the preservation of the six hundred men of Benjamin after the affair of Gibeon (Judg. xx, 40), speaks of them as "trecentos [sic] viros propter Apostolam reservatos." See Benjamin.

Nothing certain is known about the change of the apostle's name from Saul to Paul (Acts xiii, 9). Two chief conjectures prevail concerning the change.

(1) That of Jerome and Augustine, that the name was derived from Sergius Paulus, the first of his Gentile converts.

(2) That which appears due to Lightfoot, that Paulus was the apostle's Roman name as a citizen of Tarsus, naturally adopted into common use by his biographer when his labors among the heathen commenced. The former of these is adopted by Olsbahan and Meyer. It is also the view of Ewald (Gesch. vi, 419, 420), who seems to consider it self-evident, and looks on the absence of any explanation of the change as a proof that it was so understood by all the readers of the Acts. He means that if Saul be, after his baptism, definitively as the apostle to the Gentile world, his Jewish name is entirely dropped. Two divisions of his life are well marked by the use of the two names.

Saunders, William T., a minister of the Methodist Episcopal Church, was born, of Roman Catholic parents, in Dublin, Aug. 18, 1856. In his sixteenth year he emigrated to America, landing at New Orleans, April 18, 1875. In Sept., 1853, he was converted at a camp-meeting, and joined the Methodist Episcopal Church. He spent one term at Meadville College, but for five years after led an unsettled life. In 1859 he was admitted on trial in the South-eastern Indiana Conference and appointed to Vernon Circuit. He also served at New Washington, Belleville, chaplain of the Eighty-third Indiana Volunteers; Roberts and Trinity churches, Madison; Vevay; and Rising Sun. He continued to fill his pulpit until within four weeks of his death, which took place July 29, 1871. Mr. Saunders was a man of diligent study, careful preparation for the pulpit, faithful as a pastor, while his piety was of the healthy, fruit-bearing kind. See Minutes of Annual Conferences, 1871, p. 184.

Sauqua Behr (Soquaabez), in Norse mythology, was the stream of death, a place where Saga dwelt, and which Odin visited each day in order to become drunk on the precious mead which she possessed, and to enjoy her love.

Sauras, a Hindôt sect who worship only Suryapati, or the sun-god. They are few in number, and scarcely differ from the rest of the Hindús in their general law and creed. Their name and chief place of worship is made in a particular manner, with red sandalwood, and their necklace is of crystal. They eat one meal without salt every Sunday, and on every occasion of the sun's entrance into a sign of the zodiac; and they cannot eat till they have noticed the sun.

Saure, Conrad, a minister of the German Reformed Church, was born in Germany, and emigrated to this country in 1845. He studied theology privately, and commenced preaching in Cincinnati in 1856; two years later he was regularly ordained, and installed as pastor of the Salem church. His first sermon, it is said, was very dry. In 1873, his congregation numbered between seven- and eight hundred members. He was an acceptable and earnest preacher, and a faithful, laborious, and successful pastor. See the Ref. Ch. Mess. June 4, 1878. (D. Y. H.)

Saurin, Élie, a French Protestant theologian, was born Aug. 28, 1639, at Usseau, Dauphiny. He was the son of a village pastor, who conducted his education, and at last sent him to study theology at Geneva. Admitted to the ministry in 1661, he preached first at Venet- rot, and was called to the church at Embrun in the succeeding year. Having refused to uncover his head before a priest who was carrying the sacrament to a sick person, Saurin was banished from the country. He retired to Holland, where he took charge of a church at Delft, in 1665. He was employed to examine the religious opinions of the mystic Labadie, and offered to refute them publicly. So well did Saurin succeed that he procured the deposition of his opponent, and, in order that he should not be suspected of any personal interest in the affair, obtained for Labadie the church at Middle- burg. In 1671 Saurin accepted the place of Wochzgen at Utrecht, where he lived for two years during the French occupation, in continual agitation caused by his disputes with Jurieu. He began the contest by stating that some of the doctrines of Jurieu were heterodox and very dangerous. Efforts were made to reconcile the two pastors, and the synod of Leeuwarden forbade their writing against each other on pains of excommunication; but all to no effect. The last years of Saurin were devoted to the publication of theological works. He died at Utrecht, on Easter-Sunday, 1703. We have from his pen, Examen de Va Théologie de Jurieu:—Dé- fense de la Doctrine de l'Eglise Réformée, etc.:—Traité de l'Amour de Dieu:—Réflexions sur les Droits de la Conscience: and a posthumous work, Traité de l'Amour du Prochain.

Saurin, Jacques, the most eloquent preacher of French Protestantism, was born at Nimes Jan. 6, 1677.
In his eighth year his family, fleeing from the persecutions of Louis XIV, settled in Geneva. Quitting school at the age of sixteen, he joined a regiment of Savoyards in the general war against the French tyrant, and served nearly four years, till the Peace of Ryswick, in 1697. After his retirement he studied theology under Tronchin, Picquet, and Turrettin. It was only after many inner struggles that he conquered his frivolity and scepticism, and passed through the thorns of the new birth. Once clearly converted, his life and influence were radically changed. His subsequent renown for eloquence began to take form even before his graduation. At twenty years of age he was elected one of the most distinguished voices of the University, and attracted great attention. Entering the ministry in 1700, he took charge of a society of French Walloons in London, and preached with great success for four years. In 1705, while on a journey of recreation in Holland, he preached a few sermons and made such an impression as to occasion a call to labor in the Hague. This call he accepted; and here, for the remainder of his life—twenty-five years—he labored with equal fame and usefulness. He soon became known as "the great Saurin," the "Chrysostom of Protestantism." The large church in which he preached was constantly overcrowded. It was a great eloquence, his sermons were meagerious voice, which thus held and charmed for a quarter of a century all classes of society, but it was chiefly the weighty substance of what he said and the holy earnestness with which he said it. Learned men (Clericus) and cold critics often went to hear him with deep prejudice; but uniformly they came away glad and captivated. The celebrated Abbadie exclaimed, after first hearing him, "Is it a man, or is it an angel?" Saurin was not a mere preacher, but also an organizer. He founded schools and academies, and planned a grand scheme of missionary work throughout the Dutch colonies. He was also a systematic writer. In 1722 he issued an educational work, Adreje de la Théologie et de la Morale Chrétienne. In 1724 he issued his Catechisme, which enjoyed a long popularity in Holland and at Geneva. In 1725 appeared at the Hague L'Etat du Christianisme en France, a collection of letters in favor of his fellow-Protestants of France. A work which appeared between 1729 and 1728, Discours Historiques, Critiques, Théologiques et Moraux sur les Evénements les plus Mémorables du Vieux et du Nouveau Testament, though an able work in itself, had the unfortunate result of calling upon Saurin such a series of ominous criticisms from his brother-pastors as to embitter his last years and even to hasten his death. It is a memorable instance of the way known ordinances of God may be used by pretexts than a few unguarded expressions in regard to the so-called falsehood of necessity. But the posthumous fame of Saurin rests upon his Sermons. Of these he himself published (1707-25) five volumes. After his death, his son edited, from his papers, seven additional volumes. The whole twelve volumes have been several times reissued. The best edition is that of the Hague, in 1749; the most recent is that of Paris, in 1853. A good selection was published by Weiss, at Paris, in 1854, Sermons Choisis de Saurin, avec une Notice sur sa Vie. Most of these sermons are of great popularity in other languages. Five volumes of the Sermons were published in English by R. Robinson, in 1775. As to the form of Saurin's sermons, they are too systematic and scholastic for the taste of the present; they are encumbered with too much of learned citation. Much that they contain would be more appropriate in the professed pulpit. As compared with the great Catholic sermoners, Saurin lacks the exquisite polish of Bossuet; nor does he search the secret recesses of the heart with as sharp an eye as Bourdaloue; nor are his appeals as pathetic as those of Massillon; but he surpasses them all in this, that he preaches the whole Gospel of Christ, and that he is unconscious of dependence on any other external authority than the simple Word of God. In manner, Saurin was impetuous in the extreme; greater self-control would have given him greater power. He sometimes spent so much force of voice in his opening prayer and exordium as to be very much exhausted before the close. Sometimes his voice would almost fail. The effect in his manner was a certain lack of union. The understanding was convinced, the conscience was awakened, the will was aroused, but the heart was not fully subdued. After Saurin's death, his great work, Discours (2 vols. fol.), was continued by Roques and Beausobre, so that the whole consisted of six volumes. See Van Oosterzee, Jacques Saurin (Brus. 1699); Sayous, Hist. de la Littér. Franç. à l'Étr. ; Weiss, Hist. des Réf. Prot. de France ; Herzog, Real-Encycl., iii. 437-444. (J. P. L.)

**Saurus**, in Greek mythology, was a noted highway robber on the borders of Elis, who was killed by Hercules.

**Saussay, André de**, a French prelate, was born at Paris in 1589, and died Sept. 9, 1675, at Toul. His parents being poor, he was educated at the Hospital of the Holy Spirit, and on completing his studies took orders. He employed himself in preaching and controversy; he was in favor at the court; and became curé of Saint-Leu, apostolic prothonotary, amanuensis of the king, and grand vicar of the Church of Paris. Elected bishop of Toul in 1649, he did not take possession of his see until 1657, on account of ecclesiastical troubles in his chapter. He held this office till his death. Saussay was the author of several religious works in Latin, which show great learning, but little judgment or critical acumen—as *Généalogie des Hértiques Sacrementaires*, etc.—De Sacro Ritu Preferendii Cruceum, etc.

**Sauron** is the name of the second of the four great schools or systems of Buddhism, the three others being called Hinayana, Mahayana, and Vimalakirti. They recognize the authority of the Sūtras (q. v.), but reject that of the Abhidharma. See Köppen, Die Religion des Buddhā (Berlin, 1857); Wusseljew, Der Buddhismus, seine Dogmen, Geschichte und Literatur (St. Petersburg, 1860).

**Savagard** is the cap of an Armenian priest, made of cloth of gold, with an orb and cross on the top.

**Savage, Henry, D.D., an English divine, was born at Eidsfield, Worcestershire, in 1634. He entered Ba- liol College, Oxford, as a commenor in 1651; took the degree of B.A. in Nov., 1652; in 1658 was made probationer fellow; and in 1650 completed his master's degree. On the commencement of the Rebellion, he travelled into France with William (lord) Sandys, whose sister, lady Mary, he afterwards married. He obtained the mastership of his college Feb. 20, 1650, and took his degree of D.D. the next year. He was made prebendary of Gloucester in 1665, and rector of Bladen, in Ox- fordshire. He died, master of Balliol College, June 2, 1672, and was buried in the chapel. He published some pamphlets on infant baptism against John Tombs, and on Church Discipline against Cosin. He is best known by his *Bibliaenglus*; or, A Commentary upon the Foundation, Founders, and Affairs of Balliol College (Oxon. 1668, 4to).

**Savage, Isaac Aylsworth,** a minister of the Methodist Episcopal Church, was born in Edinburg, Saratoga County, N. Y., Dec. 28, 1814. He embraced religion at the age of sixteen, graduated at the Wesleyan University in Aug. 1841, and in August received on trial in the New England Conference, went immediately to South Boston. He was ordained deacon in 1848 and elder in 1845. He occupied appointments in Lowell, Springfield, Boston, and Holliston until 1854, when, after a protracted illness, he fell asleep on Feb. 16. Mr. Savage was an excellent scholar, an able and faith-ful minister, a devoted friend. See *Minutes of Annual Conf.*, 1854, p. 359.
Savages, John, D.D., an English divine of the last century, was a member of Emanuel College, Cambridge, where he took his degrees, and was D.D. of both universities. He was rector, first of Bygrave, then of Clot Hall, Herts, and lecturer of St. George's, Hanover Square, London. He held his presidential term in the famous club at Royston. He died March 24, 1747, from a fall. Besides a visitation and an assize sermon, there are attributed to him the following: The Turkish History (abridged from Knolles and Rycant [1701, 2 vols. 8vo]): —Collection of Letters of the Ancients, etc. (1708, 8vo).

Savage, John Adams, D.D., a Presbyterian divine, was born in Salem, Washington County, N. Y., Oct. 9, 1800. He prepared to teach in Salem Academy; graduated at Union College, Schenectady, N. Y., in 1822; studied theology privately; was licensed to preach by Washington Associate Reformed Presbytery in 1826, and ordained by the same presbytery in 1827. His first charge was at Fort Covington, Franklin County, N. Y., where he remained until 1829, when he was called to the church in Ogdenbury, N. Y. Here his labors were abundant and successful. He remained at Ogdenbury nearly twenty years, and probably no man ever exerted so wide and powerful an influence for religion and for Presbyterianism in Northern New York as he did. He was one of the earnest friends of Dr. W. H. Renoula, then corresponding secretary of the Board of Education, he went to Wisconsin, and took charge of Carroll College, at Waukeena, then in its infancy. Here he labored arduously in founding and building up a college in a new country. The charter had been obtained, and some little progress made in the enterprise before his arrival, but properly Dr. Savage is to be regarded as the founder of Carroll College. He died Dec. 18, 1864. Dr. Savage was a man of great sagacity, deep piety, and excellence of character; as a preacher, able and instructive; as a theologian, clear, sound, and scriptural, well meriting the honorary degree of D.D. conferred on him by his alma mater after his assumption of the presidency of the college. See Wilson, Presb. Hist. Almanac, 1866, p. 167. (J. L. S.)

Savage, Samuel Morton, D.D., a learned Independent minister, was born in London in 1721, and educated under Dr. Jennings. He became professor of divinity at Hoxton; assistant minister of St. Mary Axe, London, in 1764; and sole pastor in 1776. He died in 1791. He published Sermons on several evangelical and practical subjects (Taunton, 1796, 8vo).

Savage, Thomas, a Presbyterian minister, was born in Boston, Mass., Sept. 2, 1794. He pursued his preparatory studies at Phillips Academy, in Andover; graduated with honor at Harvard University, Cambridge; and studied theology at the divinity school connected with that institution. In 1815 he accepted an invitation to become a private tutor in Louisiana, in the vicinity of Baton Rouge, where he continued to teach and preach for nearly seven years. In 1824 he returned to Boston, and on July 5, 1826, was installed pastor of the church in Bedford, N. H., which pasture lasted forty years, in 1824; and sole pastor in 1776. He died in 1898. He possessed a truly symmetrical character. His ministry was in conformity with such a character. He was a practical and impressive preacher, and an accurate scholar—excelling perhaps in the classics, but familiar with the best models of his native tongue. See Wilson, Presb. Hist. Almanac, 1867, p. 196. (J. L. S.)

Sav’yan (Σαβ’γαν in v. r. Σαβ’γαν), an erroneous form (1 Mac. vi, 48) for AYARAN (q. v.), an epitaph of the Maccabees Eleazar (q. v.).

Savary, N., a French writer and traveller. In 1776 he visited Egypt, and studied the antiquities and manners of the country. On his return he visited the Archipelago, and in 1780 published his translation of the Egyptian Letters of the ancient Greek writer, by the title, "Egyptian Letters on Greece, and a Grammar of the Modern Arabic." He died in 1788.

Savastano, Francisco Eulalía, an Italian poet, was born in 1657 at Naples, where he died Oct. 28, 1717. He was a Jesuit, preached successfully, and taught rhetoric, philosophy, and theology in the college of Naples. He is the author of a Latin poem entitled Bonaventura Libertas.

Sav'vi (Σαββί), a corrupt Graecized form (1 Esdr. viii, 2) of the Heb. name Uzzi (q.v.), the ancestor of Ezra (Ezra vii, 4).

Savigni, Order of, a religious body connected with the Roman Church, founded in the 12th century by Vitalis de Mortain, a disciple of the famous Robert of Arbriselle, who instituted the Order of Fontevraud. The Order of Savigni, after continuing for a time, became extinct in 1793 with the Charter of the Constitution of the Kingdom of France. The title applied in Scripture, in its highest sense, to Jesus Christ, but in a subordinate way to earthly deliverers. We present a comparatively brief abstract of this very extensive subject. See Soteriology.

1. The Word itself—The term "Saviour," as applied to our Lord Jesus Christ, represents the Greek soter (σώτερ), which in turn represents certain derivatives from the Hebrew root yasha (יָשָׁה), particularly the participle of the Hiphil form mosha (מַשָּה), which is usually rendered "Saviour" in the A.V. (e.g. Isa. xlvi, 15; xlix, 26). In considering the true import of "Saviour," it is essential for us to examine the original terms answering to it, including in our view the use of soter in the Sept., whence it was more immediately derived by the writers of the New Test., and further noticing the cognate terms "to save" and "salvation," which express respectively the action and the results of the Saviour's office. See Jesus.

2. The term soter is of more frequent occurrence in the Sept. than the term "Saviour" in the A.V. of the Old Test. It represents not only the word mosha above mentioned, but also very frequently the nouns yasha (יָשָׁה) and yeshah (יְשָׁה), which, though properly expressive of the abstract notion "salvation," are yet sometimes used in a concrete sense for "Saviour." We may cite as an example Isa. lii, 11, "Behold, thy salvation cometh, his reward is with him," where evidently "salvation" = Saviour. So again in passages where these terms are connected immediately with the person of the Messiah, these are rendered in the A.V. "our Saviour" (A.V. "God of our salvation"). Not only in such cases as these, but in many others where the sense does not require it, the Sept. has soter where the A.V. has "salvation;" and thus the word "Saviour" was more familiar to the ear of the reader of the Old Test. in our Lord's age than it is to us.

3. The same observation holds good with regard to the verb παρασχέω, and the substantive σωτήριος, as used in the Sept. An examination of the passages in which they occur shows that they stand as equivalents for words conveying the notions of well-being, succor, peace, and the like. We have further to notice σωτήριος in the sense of reward (rendered in the A.V. 32), together with the etymological connection supposed to exist between the terms σωτήρ and σώμα, to which Paul evidently alludes in Eph. v. 23; Phil. iii, 20, 21.

3. If we turn to the Hebrew terms, we cannot fail to be struck with their comprehensiveness. Our verb "to save" implies, in its ordinary sense, the rescue of a person from actual or impending danger. This is undoubtedly included in the Hebrew root yasha, and may be said to be its ordinary sense, as testified by the frequent accompaniment of the preposition min (מִן; comp. the עַל־מִן which the angel gives in explanation of the name Jesus, Matt. 1, 21). But yasha, beyond this, expresses assistance and protection of every kind—assistance in physical danger, in mental distress, in heavy burdens, in moral and spiritual peril, in the common trials and duties of life. It conveys, in a secondary sense, the results of such assistance—victory, safety, prosperity, and happiness. We may
citate as an instance of the aggressive sense, Deut. xx, 4, "To fight for you against your enemies, to save you;" of protection against attack, Isa. xxvi, 1, "Salvation will God appoint for walls and bulwarks;" of victory, 2 Sam. vii, 8, "The Lord preserved David," i.e. gave him victory; of prosperity and happiness, Isa. lx, 18, "Shall you not fill me with the shadow of your wings;" Hos. xi, 10, "He clothed me with the garments of salvation." No better instance of this last sense can be adduced than the explanation "Hosanna," meaning, "Save, I beseech thee," which was uttered as a prayer for God's blessing on any joyous occasion (Psa. cxviii, 25), as at our Lord's entry into Jerusalem, when the eumlogal connection of the term Hosanna would most naturally call to the ear of the Hebrew (Matt. xxvi, 9, 15). It thus appears that the Hebrew and Greek terms had their positive as well as their negative side; in other words, that they expressed the presence of blessing as well as the absence of danger, actual security as well as the removal of insecurity. The Latin language possessed in the classical period no proper equivalent for the Greek σωτήρ. This appears from the introduction of the Greek word itself in a Latinized form, and from Cicero's remark (in Verg. Aen. ii, 63) that there was no one word which expressed the notion qui salvetem dedit. Tactus (4 a. d.) adds, "conservator (xxv. 5)." The term saluator appears appended as a title of Jupiter in an inscription of the age of Trajan (Gruter, p. 19, No. 5). This was adopted by Christian writers as the most adequate equivalent for σωτήρ, though objectiones were evidently raised against it (Augustine, Serm. 298, § 6). Another term, salvificator, was occasionally used by Tertullian (De Resurr. Cor., 47; De Carm. Chr., 14).

4. The historical personages to whom the terms are applied further illustrate this view. The judges are styled "saviours," as having rescued their country from a state of bondage (Judg. iii, 8, 15, A.V. "deliverer"); Neh. ix, 27; a "saviour" was subsequently raised up in the person of Jeroboam II to deliver Israel from the Syrians (2 Kings xiii, 5); and in the same sense Josephus styles the deliverance from Egypt a "salvation" (Ant. iii, 1, 1). Joshua, on the other hand, verified the promise contained in his name by his conquests over the Canaanites: the Lord was his Helper in an aggressive war; and, as the result, the office of the saviour was passed on to the next generation. The same was the case in obad. 21 to execute vengeance on Edom. The names Isaiah, Jeshua, Ith, Hosea, Hoshhe, and, lastly, Jesus, are all expressive of the general idea of assistance from the Lord. The Greek soter was in a similar manner applied in the double sense of a deliverer and a protector, as in the numerous instances where it was appended as the title of heathen deities.

5. There are many indications in the Old Testament that the idea of a spiritual salvation, to be effected by God alone, was by no means foreign to the mind of the pious Hebrew. In the Psalms there are numerous petitions to God to save from the effects of sin (e.g. xxxix, 8; lxxix, 9). Isaiah, in particular, appropriates the term "saviour" to Jehovah (xlii, 11), and connects it with the notions of justice and righteousness (xlv, 21; lx, 16, 17): he adds it as the special manner in which Jehovah reveals himself to man (xlv, 12); he hints at the knowledge of his people given to him over the saviors where he connects the term "saviour" with "redeemer" (god), as in xii, 14; xiii, 26; lx, 16, and again with "ransom," as in xiii, 8. Similar notices are scattered over the prophetic books (e.g. Zech. ix, 9; Hos. i, 7), and though in many instances these notices admitted of a reference to proximate events of a temporal nature, they evidently looked to higher things, and thus fostered in the mind of the Hebrew the idea of a "Saviour" who should far surpass in his achievements the "saviours" that had as yet appeared. The mere sound of the word would conjure up before his imagination visions of deliverance, security, peace, and prosperity.

II. The Work of the Saviour. — This we propose to trace as developed in the several portions of the New Testament.

1. The first three evangelists, as we know, agree in showing that Jesus unfolded his message to the disciples by degrees. He wrought the miracles that were to be the credentials of his mission. He laid down the great principles of the Gospel morality, until he had established in the minds of the Twelve the conviction that he was the Christ of God. Then, as the clouds of doom grew darker, and the malice of the Jews became more intense, he turned a new page in his teaching. Drawing from his disciples the confession of their faith in him as the Son of God, he passed on to them the truth that remained to be learned in the last few months of his ministry, that his work included suffering as well as teaching (Matt. xvi, 20, 21). He was instant in pressing this unpalatable doctrine home to his disciples from this time to the end. Four occasions when he prophesied his bitter death are on record, and they are probably only examples out of many more (ver. 21). We grant that in none of these places does the word "sacrifice" occur; and that the mode of speaking is somewhat obscure, as addressed to minds unprepared, even then, to bear the full weight of a doctrine so repugnant to the hearers' expectations as the inevitability (ver. 27) go against death; that the powers of sin and of the world are let loose against him for a time, so that he shall be betrayed to the Jews, rejected, delivered by them to the Gentiles, and by them be mocked and scourged, crucified, and slain; and that all this shall be done in order to accomplish a foreseen work, and accomplish all things written of him by the prophets—these we do certainly find. They invest the death of Jesus with a peculiar significance; they set the mind inquiring what the meaning can be of this hard necessity that is laid on him. For the answer we look to other places; but at least there is here no contradiction to the doctrine of sacrifice, though the Lord does not yet say, "I bear the wrath of God against your sins in your stead; I become a curse for you." Of the two sides of this mysterious doctrine—that Jesus dies for us willingly, and that he dies to bear a doom laid on him as of necessity, because some one must bear it—it is the latter side that is made prominent. In all the passages he pleads Jesus to speak, not of his desire to die, but of the burden laid on him, and the power given to others against him.

2. Had the doctrine been explained no further, there would have been much to wait for. But the series of announcements in these passages leads up to one more definite and complete. It cannot be denied that the words of Jesus in the course of his public ministry are distinctly of a sacrifice: "Drink ye all of this, for this is my blood of the new covenant;" or, to follow Luke, "the new covenant in my blood." We are carried back by these words to the first covenant, to the altar with twelve pillars, and the burnt-offerings and peace-offerings of oxen, and the blood of the victims sprinkled on the altar and on the people, and the words of Moses as he sprinkled it: "Behold the blood of the covenant which the Lord hath made with you concerning all these words" (Exod. xxiv). No interpreter has ever failed to draw from these passages the true meaning: "When my sacrifice is accomplished, every blood shall be sprinkled, and the same covenant is confirmed by it." The word "sacrifice" is wanting; but sacrifice, and nothing else, is described. And the words are no mere figure used for illustration, and laid aside when they have served that turn. "Do this in remembrance of me." They are the words in which the Church is to interpret the act of Jesus to the end of time. They are the words by Paul (1 Cor. xi, 25). Then, as now, Christians met together, and by a solemn act declared that they counted the blood of Jesus as a sacrifice wherein a new covenant was sealed: and of the blood of that sacrifice they partook by faith, professing themselves thereby willing to enter the covenant and be sprinkled with the blood.
3. So far we have examined the three "synoptic" Gospels. They follow a historical order. In the early chapters of all three the doctrine of our Lord's sacrifice is not found, because he will first answer the question about himself. "Who is this man?" before he shows them "What is his work." But at length this announcement is made, enforced, repeated; until, when the feet of the betrayer are ready for their wicked errand, a command is given which secures that the death of Jesus shall be described forever as a sacrifice and nothing else, sealing a new covenant and carrying good to many. Lastly the description of stoning also must be an after-thought, as, indeed, De Wette has tried to represent it, John preserves the conversation with Nicodemus, which took place early in the ministry; and there, under the figure of the brazen serpent lifted up, the stoning virtue of the Lord's death is fully set forth. "As Moses lifted up the serpent in the wilderness, even so must the Son of Man be lifted up; that whosoever believeth in him should not perish, but have eternal life" (John iii, 14, 15). As in this intercessory act the image of the deadly, hateful, and accursed (Gen. iii, 14, 15) reptile became by God's decree the means of health to all men, so the stoning of Jesus is the will of a form of sinful man, of a deceiver of the people (Matt. xxvii, 68), of Antichrist (xii, 24; John xviii, 35), of one accursed (Gal. iii, 13), becomes the means of our salvation; so that whoever fastens the earnest gaze of faith on him shall not perish, but have eternal life. There is even a significance in the words "lifed up;" the Lord used, probably, the word הָלַךְ, which, in older Hebrew, meant to "lift up" in the widest sense, but began in the Aramaic to have the restricted meaning of "lifed up for punishment." With Christ the lifting-up was a seeming disgrace, a true triumph and elevation. But the context in which these verses occur is as important as the verses themselves. Nicodemus comes as an inquirer; he is told that a man must be born again, and then he is directed to the death of Jesus as the means of that regeneration. The earnest gaze of the wounded soul is to be the condition of its cure; and that gaze is to be turned, not to Jesus on the mountain or in the temple, but on the cross. This, then, is no passing allusion, but it is the substance of the Christian teaching addressed to an earnest seeker after truth. Another passage claims a reverent attention—"If any man eat of this bread, he shall live forever: and the bread that I will give is my flesh, which I will give for the life of the world" (John vi, 51). He then took the bread and he will give the bread. If his presence on earth were the expected food, it was given already; but would he speak of "drinking his blood" (ver. 53), which can only refer to the dead? It is on the cross that he will afford this food to his disciples. We grant that this whole passage has occasioned as much disputing among Christian commentators as it did among the Jews who heard it; and for the same reason—for the harshness of the saying. But there stands the saying; and no candid person can refuse to see a reference in it to the death of him that speaks. A Saviour which has well been called the prayer of consecration offered by our High-priest, there is another passage which cannot be alleged as evidence to one who thinks that any word applied by Jesus to his disciples and himself must bear in both cases precisely the same sense, but which is really pertinent to this inquiry. "Saying in their hearts, this was the voice of a god" (John xvii, 18). As the breath comes from the world, even so have I also sent them into the world. And for their sakes I sanctify myself, that they also might be sanctified through the truth" (John xvi, 19). The word ἀγοραστήσας, "sanctify," "consecrate," is used in the Sept. for the offering of sacrifice (Lev. xxvii, 2) and for the dedication of a man to the divine service (Numb. xvi, 15). Here the present tense, "I consecrate," used in a discourse in which our Lord says he is "no more in the world," is conclusive against the interpretation "I dedicate my life to thee;" for life is over. No self-dedication, except that by death, can now be spoken of as present. "I dedicate myself to thee, in my death, that these may be a people consecrated to thee," such is the great thought. In this verse, which suits well with his other declaration that the blood of his sacrifice sprinkles them for a new covenant with God. To the great majority of expositors from Chrysostom and Cyril the doctrine of reconciliation through the death of Jesus is asserted in these verses. The Redeemer has described himself as the Good Shepherd who lays down his life for the sheep (John x, 11, 17, 18), taking care to distinguish his death from that of one who dies against his will in striving to compass some other aim—"Therefore doth my Father love me, because I lay down my life that I might take it again. No man taketh it from me, but I lay it down of myself. I have power to lay it down, and I have power to take it again." Other passages that relate to his death will occur to the memory of any Bible reader. The corn of wheat that dies in the ground to bear much fruit (John x, 24) is said to be elsewhere, where he says that he came "to minister, and to give his life a ransom for many" (Matt. xx, 28). 4. Thus, then, speaks Jesus of himself. What say his witnesses of him? "Behold the Lamb of God," says the Baptist, "which taketh away the sin of the world" (John i, 29). Commentators differ about the allusion implied in that name. But take any one of their opinions, and a sacrifice is implied. Is it the paschal lamb that is referred to? Is it the lamb of the daily sacrifice? Either way the death of the victim is brought before us. But the allusion, in all probability, is to the well-known prophecy of Isaiah (ch. liii.), to the Lamb brought to the slaughter, who bore our griefs and carried our sorrows. See this passage discussed fully in the notes of Meyer, Lange, (Bibelwerkerei), and Alford. The reference to the paschal lamb finds favor with Grotius and others; the reference to Isaiah is approved by Chrysostom and many others. The taking-away of sin (ἀφίέρων) of the Baptist, and the bearing it (ἐπίλειψεν, Sept.) of Isaiah, have one meaning and answer to the Hebrew word נָכַר. To take the sins on himself is to remove them from the sinners; and how can this be through his death except in the way of expiation by that death itself? 5. The gentle, after the resurrection, preach no moral system, but a belief in and love of Christ, the crucified and risen Lord, through whom, if they repent, men shall obtain salvation. This was Peter's preaching on the day of Pentecost (Acts ii); and he appealed boldly to the prophets on the ground of an expectation of a suffering Messiah (iii, 18). Philip traced out for the eunuch, in that picture of suffering holiness in the well-known chapter of Isaiah, the lineaments of Jesus of Nazareth (Acts viii; Isa. liii). The first sermon to a Gentile household proclaimed Christ slain and risen, and added "that through his name whosoever believeth shall receive remission of sins" (Acts ii, 36). Paul at Antioch preaches "a Saviour Jesus" (xiii, 23); "through this Man is preached unto you the forgiveness of sins, and by him all that believe are justified from all things from which ye could not be justified by the law of Moses" (ver. 38, 39). At Thessalonica all that they were taught was that "his death is the proof Sophronia Martha's text and it cannot be changed; that Christ must needs have suffered and risen again from the dead; and that this Jesus, whom I preach unto you, is Christ" (xvii, 8). Before Agrippa he declared that he had preached always "that Christ should suffer, and that he should be the first that should rise from the dead" (xxv, 23); and it was this declaration that convinced Agrippa. It now became evident that Agrippa had been teaching a doctrine which would have been sanctioned by the Church. The account of the first founding of the Church in the Acts of the Apostles is concise and fragmentary; and
sometimes we have hardly any means of judging what place the sufferings of Jesus held in the teaching of the apostles; but when we read that they "preached Jesus," or the like, it is only ordinary respect for the passages, or the sense that the cross of Christ was never concealed, whether Jews or Greeks or barbarians were the listeners. And this very pertinacity shows how much weight they attached to the facts of the life of our Lord. They did not merely repeat in each new place the pure morality of Jesus as he uttered it in the Mount; for these lessons we have no record. They took in their hands, as the strongest weapon, the fact that a certain Jew crucified afar off in Jerusalem was the Son of God, who had died to save men from their sins; and they offered to all alike an interest, through faith, in the resurrection from the dead of this outcast of his own people. No wonder that Jews and Greeks, judging in their worldly way, thought this strain of preaching came of folly or madness, and turned from what they thought meaningless jargon.

6. We are able to complete from the epistles our account of the teaching of the apostles on the doctrine of atonement. The Man Christ Jesus is the mediator between God and man, for in him the human nature, in its sinless purity, is lifted up into the divine, so that he, exempt from guilt, can plead for the guilty (1 Tim. ii, 5; 1 John ii, 1, 2; Heb. vii, 25). Thus is he the second Adam that shall redeem the sin of the first: the interests of men are bound up in him since he has polled the pain into himself (Eph. v, 25, 30; Rom. v, 12, 17; xii, 5; 1 Cor. xv, 22). This salvation was provided by the Father, to "reconcile us to himself" (2 Cor. v, 18), to whom the name of "Saviour" thus belongs (Luke i, 47); and our redemption is a signal proof of the love of God to us (1 John iv, 10). Not less is it a proof of the love of Jesus, the freely given gift, capable of purchasing all the lost (1 Tim. ii, 6; Tit. ii, 14; Eph. i, 7; comp. Matt. xx. 28). But there is another side of the truth more painful to our natural reason. How came this exhibition of divine love to be needed? Because wrath had already gone out against man. The clouds of God's anger gathered thick over the whole human race; they discharged themselves on Jesus only. God had made him to be sin for us who knew no sin (2 Cor. v, 21); he is made "a curse" (a thingaccursed) for us that the curse that hangs over us may be removed (Gal. iii, 19); he bore our sins in his own body on the tree (Is. lii, 7). He who is to see on the page of the Bible only the sunshine of the divine love; but the muttering thunders of divine wrath against sin are heard there also; and he who alone was child of wrath meets the shock of the thunder-storm, becomes a curse for us and a vessel of wrath; and the rays of love break out of that thunder-gloom and shine on the bowed head of him who hangs on the cross, dead for our sins.

7. We have spoken, and advisedly, as if the New Test. were, as to this doctrine, one book in harmony with itself. That there are in the New Test. different types of the true doctrine may be admitted without peril to the doctrine. The principal types are four in number.

(1.) In the Epistle of James there is a remarkable absence of all explanations of the doctrine of the atonement; but this admission does not amount to so much as may at first appear. True, the key-note of the epistle is: "Obstructive hate." This is a practical moral system in which man finds himself free to keep the divine law. But with him Christ is no mere lawgiver appointed to impart the Jewish system. He knows that Elias is a man like himself, but of the person of Christ he speaks in a different spirit. He describes his person in words such as: "The Lord of glory," and "Jesus Christ," who is "the Lord of glory." He speaks of the Word of Truth of which Jesus has been the utterer. He knows that faith in the Lord of glory is in consistent with time-serving and respect of persons (James i, 18; ii, 1). "There is one lawgiver," he says, "who is able to save and to destroy" (iv, 12); and this refers, not to Jesus, but to the power which holds us up as a motive to obedience (v, 7-9). These and like expressions remove this epistle far out of the sphere of Ebionitic teaching. The inspired writer sees the Saviour, in the Father's glory, preparing to return to judge the quick and the dead. He puts forth Christ as the perfect prophet and the truth, the image of the glory of the world; but the office of the priest he does not dwell on. Far be it from us to say that he knows it not. Something must have taken place before he could treat his hearers with confidence, as free creatures able to resist temptations, and even to meet temptations with joy. He treats "your faith" as something founded already, not to be prepared by this epistle (i, 2, 3, 21). His purpose is a purely practical one. There is no intention to unfold a Christology such as that which makes the Epistle to the Romans so valuable. Assuming that Jesus has manifested himself and begotten anew the human race, he seeks to make them pray with fervent love, and be constant and patient, and strive with lusta, for which they, and not God, are responsible; and bridle their tongues, and show their fruits by their works (see Neander, Pflanzenb. v, vi, c. 3; Schmid, Theologie des N. T. pt. ii; and Dorner, Christologie, i, 55).

(2.) In the teaching of Peter of the doctrine of the person of our Lord is connected strictly with that of his work as Saviour and Messiah. The frequent mention of his sufferings shows the prominent place he would give them; and he puts forward as the ground of his own right to teach that he was "a witness of the sufferings of Christ" (1 Pet. v, 1). The atoning virtue of those sufferings he dwells on with peculiar emphasis, and not less so on the purifying influence of the atonement on the hearts of believers. He repeats again and again that Christ died for us (i, 21; iii, 18, iv, 1); that he bare our sins in his own body on the tree (ii, 24). He bare them; and what does this phrase suggest but the goat that "shall bear" the iniquities of the people off into the land that was not inhabited? (Lev. xvi, 22), or else the feeling the consequences of sin, as the word is used elsewhere (xx, 17, 19)? We have to choose between the cognate ideas of sacrifice and substitution. Closely allied with these statements are those which connect moral reformation with the death of Jesus. He bore our sins; but he can also say: "His death is our life. We are not to be content with a self-satisfied contemplation of our redeemed state, but to live a life worthy of it (1 Pet. ii, 21-25; iii, 15-18). In these passages the whole Gospel is contained; we are justified by the death of Jesus, who bore our sins that we might be sanctified and renewed to a life of godliness. And from this apostle we hear again the name of "the lamb," as well as from John the Baptist; and the passage of Isaiah comes back upon us with unmissable clearness. We are redeemed "with the precious blood of Christ, as of a lamb without blemish and without spot," (i, 19, with Isa., ivii, 7). Every word carries us back to the Old Test., and secondly, to the New: the spotless victim, the release from sin by its blood (elsewhere [1 Pet. i, 2] by the sprinkling of its blood), are here; not the type and shadow, but the truth of them; not a ceremonial purgation, but an effectual reconciliation of man and God.

(3.) In the epistles of Paul the doctrine is more developed. The doctrine of John we are struck at once with the emphatic statements as to the divine and human natures of Christ. A right belief in the incarnation is the test of a Christian man (1 John iv, 2; John i, 14; 2 John 7); we must believe that Jesus Christ is come in the flesh, and that he is manifested to destroy the works of the devil (1 John iii, 8). John himself, if only by hand, he who has come in the flesh is the one who alone has been in the bosom of the Father, seen the things that human eyes have never seen, and has come to de-
clare them unto us (i. 2; iv. 14; John i. 14-18). This person, at once divine and human, is "the propitiation for our sins," our "advocate with the Father," sent into the world "that we might live through him" and the means was his laying down his life for us, which should make us ready to lay down our lives for the brethren (1 John i. 7; ii. 1, 2; iii. 18; iv. 9, 10; v. 6, 11-15; John xi. 51)." The effect of this proposition is the "blood of Jesus Christ cleanseth us from all sin" (1 John i. 7). The intimate connection between his work and our holiness is the main subject of his first epistle, "Whosoever is born of God does not commit sin (iii. 9). As with Peter, so with John; every point of the doctrine of atonement comes out in abundant clearness. The substitution of another, who can bear our sins, for us who cannot; the sufferings and death as the means of our redemption, our justification thereby, and our progress in holiness as the result of our justification.

(4.) To follow out as fully, in the more voluminous writings of Paul, the passages that speak of our salvation would far transgress the limits of our paper. Man, according to this apostle, is a transgressor of the law. His conscience tells him that he cannot act up to that law, which, the same conscience admits, is divine, and binding upon him. Through the old dispensations man received instruction. Even in the law of Moses he could not justify him: it only by its strict precepts held up a mirror to conscience that its frailness might be seen. Christ came, sent by the mercy of our Father who had never forgotten us; given to, not deserved by us. He came to reconcile men and God by dying on the cross for them, and bearing their punishment in their stead (2 Cor. v. 14-21; Rom. v. 3, 8). He is "a propitiation through faith in his blood" (iii. 25; comp. Lev. xvi. 15) (καταφυγή; means "victim for expiation")—words which most people will find unintelligible, except in reference to the Old Test and its sacrifices. He is the ransom, or price paid, for the redemption of man from all iniquity (Titus ii. 14). Still stronger is in 1 Tim. ii. 6, "ransom instead of" (αὐτίκνητος; also Eph. i. 7 (αὐτόκλητος); 1 Cor. vii. 20; viii. 23. The wrath of God was against man, but it did not fall on man. God made his Son "to be sin for us," though he knew no sin; and Jesus suffered, though men had nothing to suffer. But God reconciled (Rom. v. 10; 2 Cor. v. 18-20; Eph. ii. 16; Col. i. 21). On the side of man, trust and love and hope take the place of fear and of an evil conscience; on the side of God, that terrible wrath of his, which is revealed from heaven against all ungodliness and unrighteousness of men, is turned away (Rom. i. 18; v. 9; 1 Thess. i. 10)." The question now is, whether we are reconcile? God is also reconciled to us, might be discussed on deep metaphysical grounds; but we purposely leave that on one side, content to show that at all events the intention of God to punish man is averted by this "propitiation" and "reconciliation." See RECONCILIATION.

Different views are held about the authorship of the Epistle to the Hebrews by modern critics, but its numerous points of contact with the other epistles of Paul must be recognised. In both the incompleteness of Judaism is dwelt on; redemption from sin and guilt is what religion has to do for men, and this the law failed to secure. In both, reconciliation and forgiveness and a new moral power in the believers are the fruits of the work of Jesus. In the Epistle to the Romans, Paul shows that the law failed to justify, and that faith in the blood of Jesus must be the ground of justification. In the Epistle to the Hebrews the same result follows from an argument rather different: all that the Jewish system aimed to do is accomplished in Christ in a far more perfect manner. The Gospel has a better priest, more effectual sacrifices, a more profound peace. In the one epistle the law seems set aside wholly for the system of faith; in the other the law is exalted and glorified in its Gospel shape; but the aim is precisely the same—to show the weakness of the law and the effectual fruit of the Gospel.

8. We are now in a position to see how far the teaching of the New Test. on the effects of the death of Jesus is continuous and uniform. Are the declarations of our Lord about himself the same as those of James and Peter, John and Paul? and are those of the apostles concerning each other? What are the several points of this mysterious transaction may be thus roughly described:

(1) God sent his Son into the world to redeem lost and ruined men from sin and death, and the Son willingly took upon him the form of a servant for this purpose: and Jesus the Father and the Son manifested their love for us.

(2) God the Father laid upon his Son the weight of the sins of the whole world, so that he bare in his own body the wrath which men must else have borne, because there was no other way of escape for them; and thus the atonement was a manifestation of divine justice.

(3) The effect of the atonement thus wrought is that man is placed in a new position, freed from the dominion of sin, and able to follow holiness; and thus the doctrine of the atonement ought to work in all the hearers a sense of love, of obedience, and of self-sacrifice.

In shorter words, the sacrifice of the death of Christ is a symbol of the law of divine justice, and is for us a document of obedience.

Of the four great writers of the New Test., Peter, Paul, and John set forth every one of these points. Peter, the "witness of the sufferings of Christ," tells us that we are redeemed with the blood of Christ, as of a lamb without blemish and without spot: says that Christ bare our sins in his own body on the tree. If we are "hastened that the Lord is gracious" (1 Pet. ii. 3), we must not rest satisfied with a contemplation of our redeemed state, but must live a life worthy of it. No one can well doubt, who reads the two epistles, that the love of God and Christ, and the justice of God, and the duties thereby laid on us, all have their value in them; but the love is less dwelt on than the justice, while the most prominent idea of all is the moral and practical working of the cross of Christ upon the lives of men.

With John, again, all three points find place. That Jesus willingly laid down his life for us, and is an advocate for us, has been already considered. He is also the propitiator, the suffering sacrifice, for our sins; and that the blood of Jesus Christ cleanseth us from all sin, for that whoever is born of God doth not commit sin—all are put forward. The death of Christ is both justice and love, both a propitiation and an act of loving self-surrender; but the moral effect upon us is more prominent even than the justice.

In the epistles of Paul the three elements are all present. In such expressions as a ransom, a propitiation, who was "made for us, the wrath of God against sin, and the mode in which it was turned away, are presented to us. Yet not wrath alone. The love of God constrains us; because we thus judge that if one died for all, then were all dead: and that he died for all, that they which live should not henceforth live unto themselves, but unto him which died for them and rose again" (2 Cor. v. 14, 15). Love in him begets love in us, and in our reconciled state the holiness which we could not practice before becomes easy.

SNAVANAROLA

tread in his steps. They are his friends only if they keep his commands and follow his footsteps.

We must consider it proved that these three points or elements are the doctrine of the whole New Test. What is there about this teaching that has provoked in times past and present so much disputation? Not the hardness of the doctrine—for none of the theories put in its place are any easier—but its want of logical completeness. Sketch out for us in a few broad lines, it teaches the redemption of the human race; and when we do not always remember that the words that attempt this are trying to make a mystery into a theory, an infinite truth into a finite one, and to reduce the great things of God into the narrow limits of our little field of view. To whom was the ransom paid? What was Satan's share of the transaction? How can one suffer for another? How could the Redeemer be miserable when he was conscious that his work was one which could bring happiness to the whole human race? Yet this condition of indefiniteness is one which is imposed on us in the reception of every mystery. Prayer, the incarnation, the immortality of the soul, are all subjects that pass beyond our range of thought; and here we see how the wisdom of God in connecting so closely our redemption with our reformation. If the object were to give us a complete theory of salvation, no doubt there would be in the Bible much to seek. The theory is gathered by fragments out of many an exhortation and warning; nowhere does it stand out entire, and without logical flaw. But man has his spiritual eyes; and we see in the guidance of sinful hearts, we find a wonderful aptness for that particular end. Jesus is proclaimed as the sole of our fears, as the founder of our moral life, as the restorer of our lost relation with our Father. If he had a cross, there is a cross for us; if he pleased not himself, let us deny ourselves; if he suffered for sin, let us hate sin. And the question ought not to be, What do all these mysteries mean? but Are these thoughts really such as will serve to guide our life and to assure our hopes in the hour of death? The answer is twofold—one from history and one from experience. The preaching of the cross of the Lord even in this simple fashion converted the world. The same doctrine is now the ground of any definite hope that we find in ourselves of forgiveness of sins and of everlasting life. See Thomson, essay on the Death of Christ, in Aids to Faith.

Saviour, St., ORDER OF, a name applied to the Order of St. Bridget (q.v.), because it was pretended that our Saviour personally dictated to the founders the rules and constitution of the order.—Gardiner, Faiths of the World, n.s.

SNAVANAROLA, GIROLAMO, an Italian monk, reformer, and martyr, the leader of an inceptive reformation of the Church in the latter half of the 15th century, a man whose eventful life and tragic death have called forth the most contradictory judgments, and whose real character is even to this day a matter of dispute with certain historians. Savaranola was born of an honorable family at Ferrara, Sept. 21, 1452. His education was carefully conducted, and intended that he should make himself of natural and medical science, but his early religious development turned him into another course. He had fond of solitude, and avoided the public walks of the ducale palace. Impressed with terror at the wickedness which he saw about him, he finally, in his twenty-third year, fled from his home, and went to a monastic retreat in the cloister at Bologna. Two days after his arrival in Bologna he wrote to his parents, begging their forgiveness and blessing, and averring as his excuse that he was utterly unable to endure the spectacle of the wickedness of Italian society. He also declared that he had simply followed a divine impulse given him in prayer, and that he felt that he should be ready to suffer anything, even death, rather than disobey the voice of duty.

At first Savaranola desired to be simply a lay brother, and to perform the commonest menial services; but his superior saw his gifts, and charged him from the start with the teaching of what was then called philosophy and physiocracies, the chief authorities in this teaching were the great Dominican theologian Thomas Aquinas, the Church father St. Augustine, and, above all, the Holy Scriptures. The latter he knew almost by heart. He was particularly fond of the Old-Test. prophets and of the Apocalypse. It was in the study of these that he began to form his spiritual connection with St. Peter Martyr, an event of such an infinite vivisocial as to make it easy for him to assume to himself too much of the prophetic character. His first attempts at preaching were without special results. His voice was harsh, his gestures awkward, his language clumsy and scholastic. His audience was not attracted. But, while on a visit to Brescia, his power broke forth suddenly, as waters from a peeping fountain. The people flocked to him in great crowds to hear his imaginative exposition of the Apocalypse; and the impression was not lessened when he made definite inferences ("non per rivelazione, ma per ragione delle Scritture") as to calamities which were soon to fall upon Italy. But Henry VII (died 1509) followed his footsteps, and in his thirty-eighth year (1490), when he was appointed as lector in the Dominican cloister of San Marco, Florence. His two leading thoughts now were, reformation of the Church and emancipation of Italy. In carrying out these, he shook to its foundations the Florentine government, raised against himself the anathemas of the hierarchies of the Church, and for his salvation, he placed himself under the guidance of sinful hearts, he found a wonderful aptness for that particular end. Jesus is proclaimed as the solace of our fears, as the founder of our moral life, as the restorer of our lost relation with our Father. If he had a cross, there is a cross for us; if he pleased not himself, let us deny ourselves; if he suffered for sin, let us hate sin. And the question ought not to be, What do all these mysteries mean? but Are these thoughts really such as will serve to guide our life and to assure our hopes in the hour of death? The answer is twofold—one from history and one from experience. The preaching of the cross of the Lord even in this simple fashion converted the world. The same doctrine is now the ground of any definite hope that we find in ourselves of forgiveness of sins and of everlasting life. See Thomson, essay on the Death of Christ, in Aids to Faith.

Saviour, St., ORDER OF, a name applied to the Order of St. Bridget (q.v.), because it was pretended that our Saviour personally dictated to the founders the rules and constitution of the order.—Gardiner, Faiths of the World, n.s.

SNAVANAROLA, GIROLAMO, an Italian monk, reformer, and martyr, the leader of an inceptive reformation of the Church in the latter half of the 15th century, a man whose eventful life and tragic death have called forth the most contradictory judgments, and whose real character is even to this day a matter of dispute with certain historians. Savaranola was born of an honorable family at Ferrara, Sept. 21, 1452. His education was carefully conducted, and intended that he should make himself of natural and medical science, but his early religious development turned him into another course. He had fond of solitude, and avoided the public walks of the ducale palace. Impressed with terror at the wickedness which he saw about him, he finally, in his twenty-third year, fled from his home, and went to a monastic retreat in the cloister at Bologna. Two days after his arrival in Bologna he wrote to his parents, begging their forgiveness and blessing, and averring as his excuse that he was utterly unable to endure the spectacle of the wickedness of Italian society. He also declared that he had simply followed a divine impulse given him in prayer, and that he felt that he should be ready to suffer anything, even death, rather than disobey the voice of duty.

At first Savaranola desired to be simply a lay brother, and to perform the commonest menial services; but his superior saw his gifts, and charged him from the start with the teaching of what was then called philosophy and physiocracies, the chief authorities in this teaching were the great Dominican theologian Thomas Aquinas, the Church father St. Augustine, and, above all, the Holy Scriptures. The latter he knew almost by heart. He was particularly fond of the Old-Test. prophets and of the Apocalypse. It was in the study of these that he began to form his spiritual connection with St. Peter Martyr, an event of such an infinite vivisocial as to make it easy for him to assume to himself too much of the prophetic character. His first attempts at preaching were without special results. His voice was harsh, his gestures awkward, his language clumsy and scholastic. His audience was not attracted. But, while on a visit to Brescia, his power broke forth suddenly, as waters from a peeping fountain. The people flocked to him in great crowds to hear his imaginative exposition of the Apocalypse; and the impression was not lessened when he made definite inferences ("non per rivelazione, ma per ragione delle Scritture") as to calamities which were soon to fall upon Italy. But Henry VII (died 1509) followed his footsteps, and in his thirty-eighth year (1490), when he was appointed as lector in the Dominican cloister of San Marco, Florence. His two leading thoughts now were, reformation of the Church and emancipation of Italy. In carrying out these, he shook to its foundations the Florentine government, raised against himself the anathemas of the hierarchies of the Church, and for his salvation, he placed himself under the guidance of sinful hearts, he found a wonderful aptness for that particular end. Jesus is proclaimed as the solace of our fears, as the founder of our moral life, as the restorer of our lost relation with our Father. If he had a cross, there is a cross for us; if he pleased not himself, let us deny ourselves; if he suffered for sin, let us hate sin. And the question ought not to be, What do all these mysteries mean? but Are these thoughts really such as will serve to guide our life and to assure our hopes in the hour of death? The answer is twofold—one from history and one from experience. The preaching of the cross of the Lord even in this simple fashion converted the world. The same doctrine is now the ground of any definite hope that we find in ourselves of forgiveness of sins and of everlasting life. See Thomson, essay on the Death of Christ, in Aids to Faith.
SAVONAROLA

of the law than of the gentleness of the Gospel. One year after his arrival in Florence he was made prior of San Marco. Contrary to all precedent, Savonarola omitted to call and pay his respects to the civil ruler of the city, Lorenzo. This was all the more singular as Lorenzo had made large gifts to San Marco, and had always shown all respect to the priesthood. But Savonarola saw in him simply the incarnation of worldliness, and the robber of his country's liberties. He feared his friends would talk more than his hatred. Lorenzo resorted to all the arts of cunning and flattery, but in vain; he did not win the smiles of the stern preacher of righteousness. Lorenzo died April 8, 1492. On his death-bed he sent for Savonarola and desired absolution. Savonarola exacted three things: faith in Christ; the restoration of all the temporal dignities of the city's liberties. To the first two he cheerfully assented; to the latter he demurred. Thereupon the stern prior of San Marco departed. This third demand is not mentioned by Politian; it may be apocryphal.

The death of Lorenzo was the signal for the outburst of the storm. He was succeeded by his rash and arbitrary son, Pietro. The same year the cardinals of the papal court summoned the pope from Bologna to Rome. Pope Eugene IV was the pope whom Savonarola so often appears to have despised. After the death of Lorenzo the city of Florence was divided into two camps. On one side was the ascetic faction, and on the other, the party of the Medici. The latter wished to retain all political offices, and to re-establish the ascendancy of the city's liberties. To the first two he cheerfully assented; to the latter he demurred. Thereupon the stern prior of San Marco departed. This third demand is not mentioned by Politian; it may be apocryphal.

then more emphatically in October, forbidding all Christians to have any intercourse with him, and threatening the city with the interdict. Savonarola, encouraged by a favorable council which was elected Jan. 1, 1498, ascended the cathedral pulpit, denied the charge of heresy, declared null and void the excommunication, and attempted a total change of moral and ecclesiastical life. He had the assistance of all the schools of Italy, and of the Church. He also boldly summoned the crowned heads of all Christendom to unite in calling a general council, to depose this pretended pope, and to heal the wounds of the Church. And yet Savonarola plainly foresaw the fatal result to himself of the present contest. He knew that the Church could not at once overcome victory, and that he must yield to the inevitable "human sacrifice." And with characteristic step which Savonarola now took precipitated the end. From the balcony of San Marco he asked God to consume him with fire if he had acted from unchristian motives. A Franciscan monk offered to stand the ordeal of fire against him. Savonarola hesitated. An enthusiastic monk of San Marco offered to undergo the test in Savonarola's place; then the whole body of Dominicans declared themselves also ready. Savonarola consented. The issue in controversy was the righteousness of Savonarola and the invalidity of his excommunication. A monk was selected from each order. The two monks, one from each, were brought before the surgeon and prepared on the great square. The two orders of monks marched in song and banners through the immemorial multitude; but, just as the moment arrived for the test, a violent disagreement arose as to whether the parties standing the ordeal should bear the crucifix and host. The contest lasted until evening, when a violent rain put out the remnant of the fire. The people dispersed amid loud murmur2s, and the whole weight of their displeasure fell upon Savonarola. The fickle people now charged him with being an impostor and a coward, and it was due to his armed guards that he left the spot alive. On the next day—Palm-Sunday, 1498—his enemies besieged him in San Marco; he declined earthly weapons, and fell upon his face in prayer. As he was taken and conducted to judgment he was greeted with all manner of abuse. His adherents were expelled from the council, and a hastily trial was entered upon. On six successive days he was dragged forth and examined by the severest torture, bearing for four days of his imprisonment he wrote a beautiful exposition of the 51st Psalm, which Luther afterwards published as a tract. He was then examined again, by torture, before a clerical tribunal; it was but a mere form. He was sentenced to be hanged and burned. He was thus executed with and between his hands, May 23, 1498. At the foot of the scaffold at last administered the eucharist to himself and his two friends. "My Lord was pleased to die for my sins; why should not I be glad to give up my poor life out of love to him?" With such words he closed his eyes upon the world and yielded to the gibbet and the flames. The Dominican order endeavoured in later years to effect his canonization. Luther said that God had already canonized him. Though not a dogmatic reformer in the sense of Luther, Zwingli, or Calvin, Savonarola yet holds a most honorable place by the side of Wycliffe, Huss, and Wessel, as a forerunner of the great Reformation. Monuments were erected to Savonarola in San Marco, Florence, in 1873, and in Ferrara, May 23, 1875. Savonarola left numerous writings. In his Triumphant Crusade (Triunfo della Croce [1597]), he tries to turn the Church away from its modern corruptions to Christ as the centre of all moral power. In his De Divina Omnium Scientiarum opus, pagan and Christian, the fault from 1484 to 1485 his sermons (Prediche) were printed at Florence; also his poems (Poesie) in 1862. A portion of his works was published at Lyons, in six volumes, in 1838-40. His Life has been written by Carle (Paris, 1842); by Mabden (London, 1825); by Perrens (Paris, 1856, 2 vols.; 3d ed. 1865); by Villari (Florence, 1860-61, 2 vols.); of the latter, a French translation by G. Gruyer (1874, 2 vols.). His earlier biographers were: Burlamacchi (died 1519), G. F. Piccoloda Mirandola, and Bartoli. Excellent modern German biographers are: Rudelbach [A. G.], Savonarola (Hamb, 1833); Meier [F. K.], Savonarola (Berlin, 1836); Hase, Neue Propheten (Leips, 1851). See the historical works of Ugo Giardini, Nardi, Roscoe, Machiavelli, Simonelli, and especially Villari, History of Savonarola (from the Italian, by Horner [Lond, 1863, 2 vols.; 8vo]); Madden, Life of Savonarola (Lond, 1853, 2 vols.; 8vo); also the Brit. Quarterly, Oct. 1849; Eclectic Review, Dec. 1855; Christian Remembrancer, Oct., 1858; Prot. Episc. Review, Oct. 1853, 1854, 1856; Baptist Quarterly, Oct., 1878; London Quart. Rev., July, 1867: McClellan, The Schaff in Herzog, Real-Encyklop., xiiii, 444, 456. (J. P. L.)

**SAVAR** (usually **Sāvār**), a smell, a scent or smell, as elsewhere rendered; **ősār**, elsewhere "odor," but a perfume is Chad. **śāvār** , nihiāt, incense; **śvār**, and a stink is Heb. **šāvar**. Besides its literal sense, this word is used metaphorically to imply character or reputation, and also the degree of acceptance with which any person or thing is received (2 Cor. ii, 14, etc.). In Matt. xxvi, 23; Mark viii, 33, **poppār** , to think, is rendered "savoir," in the sense of being flavored with (or, as the ancient verb was used), in the last case in a entirely different: signification of being molded. In Bible Educator, iv, 208). So in Matt. v, 15, **poppār** , to come foolish, is applied to the loss of that sharp quality in salt by which it renders other bodies agreeable to the taste. See SALT.

**SAVORY MEAT** (Sāvarāmi, matamātamin, from Sāvar, to taste, Gen. xxvi, 4 sq.; and so Sāvarāt, matamamth, "dainties," Prov. xxxii, 3, 6). The patriarchal cookery, like that of the modern Arabs, appears to have been generally very simple, but in dressing the latter frequently use every variety of fruits and vegetables which they can procure. "Among the more common dishes," says Mr. Lane, "are the following: lamb or mutton, cut into small pieces, and stewed with various vegetables, and sometimes with peaches, apricots, or jujubes and sugar; cucumbers, etc., small gourds, or the fruit of the black or white egg-plant stuffed with rice and mince-meat, etc.; vine-leaves, or pieces of lettuce-leaf and cabbage-leaf, enclosing a similar composition; small morsels of lamb, or lamb and mutton, roasted on skewers, and called kiebab; fowls simply roasted or boiled with raisins, pistachio nuts, pine kernels, bread, and parsley, and various kinds of pastry and other sweets. The repast is frequently commenced with soup, and is generally ended with boiled rice mixed with a little butter and seasoned with salt and pepper; or after this is served a watermelon or other fruit, or a bowl of sweet drink composed of water with raisins, and sometimes other kinds of fruit, boiled in it, and then sugar, and with a little rose-water added to it when cool. The meat, having generally little fat, is cooked with clarified butter, and is so thoroughly done that it is easily divided with the fingers" (Mod. Egyptians, i, 214). See FOOD.

**SAVORY, CONFERENCE OF.** See CONFERENCE, SAVOY. **SAVORY, CONFESSION OF.** A declaration of faith and order on the part of the Independents, agreed upon at a meeting in the Savoy in 1638. Chapters i to xvi, the Savoy Confession correspond verbally to the Westminster Confession; but chapter xx. "Of the Gospel and the Extent of the Grace thereof," is additional: "in which chapter, what is dispersed and inserted by intimation in the Assembly's confession is here brought together, and more fully, unto the heart of the Church. xxvii and xxviii correspond to chapters xx to xxvi of the Westminster, with the following exceptions: Clause four of chapter xx, clauses five and six of chapter xxiv, and the third clause of chapter xxvi are omitted; the third clause of chapter xxiii is modified; and chapter xxv is materially altered, a clause being added relating to the expectations of the Church. Chapters xxx and xxxi are
omitted; but the remaining chapters correspond. The Westminster has thirty-three chapters; the Savoy thirty-two. See INDEPENDENCY.

Saw (םָאָבָא, megerdth, 2 Sam. xiii, 31; 1 Kings vii, 9; 1 Chron. xx, 3; וֹיָבָא, massōr, Isa. x, 15; elsewhere וֹיְבָא, gavīr, in the Pual: πινακον and πινακῖον). The Hebrews knew and used not only wood-saws, but stone-saws also (1 Kings vii, 9; comp. Pline, xxxvi, 29; xlv, 48), both being of great antiquity (Rosellini, Monum. ii, 85). Prisoners of war, especially leaders and princes, were sometimes executed with iron saws (2 Sam. xiii, 31; 1 Chron. xx, 3; comp. Heb. xi, 37; and Sept. in Amos i, 3), and according to a tradition in the Anabaticion Jes. (ed. Lawrence, v, 11-14), and in the Church fathers (Justin Martyr, Origen, Epiphanius, Lactantius), this fate befell the prophet Isaiah also, under King Manasses (comp. Gesen. Jevu. i, 13 sq.). This terrible punishment was also known in other ancient nations, e.g. the Egyptians (Herod. ii, 139), the Persians (Ctesias, Pers. 54; Rosenmüller, Morgenl. v, 96), the Thracians (Val. Max. ix, 2, extr. 4). There were even some instances of it under the Roman emperors (Sueton. Calig. 27), inflicted on Jews (Dio Cass. lxviii, 82). See CARPENTER.

Ancient Egyptian Saw. (From a bas-relief in the Great Temple at Thebes.)

Ancient Egyptian saws, so far as has yet been discovered, were single-handed, though Jerome has been thought to allude to circular saws. As is the case in modern Oriental saws, the teeth usually incline towards the handle instead of away from it, like ours. They have, in most cases, bronze blades apparently attached to the handles by leathern thongs, but some of those in the British Museum have their blades let into them like our knives. A double-handed iron saw has been found at Nimrud; and double saws strained with a cord, such as modern carpenters use, were in use among the Romans. In sawing wood, the Egyptians placed the wood perpendicularly in a sort of frame and cut it downwards. No evidence exists of the use of the saw applied to stone in Egypt, nor without the double-handed saw does it seem likely that this should be the case; but we read of sawn stones used in the Temple (1 Kings vii, 9; Gesen. Theaur. p. 303; Wilkinson, Ana. Egyp. ii, 114, 119; Brit. Mus. Egyp. Room, 602); (1 Chron. ii, v, 19; Jerome, Com. in Is. xxviii, 27). The saws "under" or "in" which David is said to have placed his captives were of iron. The expression in 2 Sam. xii, 31 does not necessarily imply torture, but the word "cut" in 1 Chron. xx, 5 can hardly be understood otherwise (Gesen. Theaur. p. 1826; Thenius on 2 Sam. xxii and 1 Chron. xxv). A case of sawing asunder, by placing the criminal between boards and then beginning at the head, is mentioned by Shaw, Trav. p. 254. See HANDICRAFT.

However simple the idea of such an instrument, it was not among the most ancient of inventions, doubtless because it was one of the few which required from the very first to be constructed with iron. For this reason it is not known among savages; nor were even the comparatively cultivated nations of South America, being without iron, acquainted with its use. Beckmann states that, "In early periods, the trunks of trees were split with wedges into as many and as thin pieces as possible; and if it was found necessary, they ... still thinner, they were heaved on both sides to the proper size." This simple but wasteful process has continued in use down to a rather recent period, even where the saw has been known, in countries (Norway and Northern Russia, for instance) where wood is abundant, under the correct impression that boards thus heven are much more durable, from having greater cohesion and solidity, than those which have had their fibres separated by the saw. Probably the jawbone of a fish suggested the first idea of a saw. So the Grecian fable states, in which the process of this invention is described. This fable, in its various versions, assigns the invention to the famous artist Dedalus, or rather to his nephew (called Talus by some, by others Perilx, while others leave him unnamed), who, having found the jawbone of a fish (or of a serpent according to others), was led to imitate it by filing teeth in iron, and thus forming a saw. The process is very probable; but there is nothing to say for the claim which the Greeks make to the honor of this invention. It does not appear to have been known to them in the time of Homer; for in the minute account of the proceedings of Ulysses in building his boat, there is not the least mention of a saw, although, if such an instrument had been then known, Calypso could as easily have supplied it as she did the axe, the adze, the auger, and whatever else he required. The Greeks, probably, in common with other neighboring nations, borrowed the saw from the Egyptians, to whom it was known at a very early period, as is proved by its appearance on their ancient sculptures. The ultimate improvement which
and moral beauty, and his ministry was eminently useful. See Minutes of Conferences, iv, 266. (J. L. S.)

Sawyer, Isaac, a Baptist minister, was born at Hoosick, N. Y., Nov. 22, 1770. He was left an orphan at the age of fourteen, and two years after bound himself out to a man who soon after removed to Monckton, Vt., where there was little or no religious influence. He was converted in 1783, and became a Baptist, serving in the capacity of deacon until he began to preach. In 1797 the Church called upon him to "exercise his gift," but he delayed a long time, because of a sense of his own unfitness. On June 29, 1799, a council was called, and Mr. Sawyer was ordained. He filled the following churches: Monckton, Vt., 1799-1812; Fairfield, Vt., March, 1812-13; Orwell, Vt., 1813-17; Brandon, Vt., 1818-25; Bethel, Vt., 1825-28; Westport, N. Y., 1828-34; Knowlesville, N. Y., 1834; and was for a short time at Stockton, N. Y., and Lewiston, N. Y. He died Sept. 30, 1847. He baptized during his ministry upwards of 1100 persons. He was the first president of the Vermont Baptist Convention, and a friend of education and temperance. See Sprague, Annals of the Amer. Pulpit, vi, 369.

Sawyer, James W., a minister of the Methodist Episcopal Church, was born in Palmyra, Me., Sept. 16, 1838. He removed when a child to Portland, where he was converted at the age of fifteen years. He was licensed to preach April 15, 1862, and was received on trial in the Maine Conference in April, 1864. His ministerial life was short, terminating with death, Dec. 23, 1869, Mr. Sawyer was a deeply pious man, and a good preacher. See Minutes of Annual Conference, 1870, p. 147.

Sawyer, John, D.D., an eminent Congregational minister, was born at Hebron, Conn., Oct. 9, 1755. In 1777 he entered the Revolutionary army, and, after serving for some years, entered Dartmouth College in 1781. He graduated in 1786, then devoted himself to theology, and commenced preaching within one year after leaving college. In October, 1787, he accepted a call to become pastor of the Church at Oxford, Coos County, N. H., on the condition of that Church relinquishing the practice of baptizing children on what was termed the Established Connexion (q. v.), and the tenant pastors became successively pastor of a Church in Boothbay, Me., in 1796; of New Castle in 1806, in which latter place he commenced travelling in all directions as a home missionary; of Bangor in 1813, where he acted both as preacher and as schoolmaster; and finally of Garland, where he remained until his death, Oct. 14, 1858. He was the supreme governing principle of his life, and for nearly eighty years he labored faithfully in bringing souls to God. See Amer. Cong. Year-book, 1859, p. 131.

Sawyer, Seymour B., a Methodist Episcopal minister, was born in North Carolina Dec. 8, 1808. He was converted Oct. 1, 1821, under the ministry of the Cumberland Presbyterian, to which body he attached himself. In 1827 he was licensed to preach among them; but, dissenting from some of their doctrines, he returned his license, and removed to Mississippi, where he joined the Methodist Episcopal Church, and in 1898 was licensed as a local preacher. In 1832 he was admitted on trial in the travelling connection, and stationed in Montgomery. He filled with zeal, acceptability and usefulness many of the most important charges, until his death, which occurred Sept. 23, 1843. Mr. Sawyer was a man of mild and gentle disposition. As a pastor, he was specially diligent and affectionate. His sermons were remarkable for their simplicity and spirituality. See Minutes of Conference, iii, 393.

Saxe, Alfred, a Methodist Episcopal minister, was...
born Sept. 5, 1814. He was converted in 1830, licensed to preach in 1832, and graduated at the Wesleyan University in 1838. The succeeding eighteen months he was principal of the Middletown Preparatory School, after which he became principal of the high-school in that city, where he remained until 1843, when he was received on trial by the New York Conference, transferred to the Troy Conference, and appointed to Ferry Street Station, Albany. In 1845 he was appointed to North White Creek, and in 1846, on account of declining health, was placed on the superannuated list. He died Oct. 8, 1846. Mr. Saxe was a sound and practical preacher, a diligent and laborious pastor, and a most affable man. In his last illness he enjoyed the consolations of religion, and appeared cheerful and happy even while passing through the vale of death. See Minutes of Conferences, iv, 181. (J. L. S.)

**Saxon**, in German mythology, was a god whose name occurs in the oath taken by the Saxons after their violent conversion to Christianity by Charlemagne, by which they renounced the worship of Thunar (Thor), Woden, and Saxnot. He is supposed to have been the god of war, since the word Sax (Sachs), from which the Saxons took their name, denoted a sword. Anglo-Saxon genealogies point to a Saxnot, who was Woden's son.

**Saxon Architecture.** The buildings of the Anglo-Saxons were usually of wood, rarely of stone until the 11th century, and consequently we must not expect to find any great number of remains. The only dated examples of this style are about the middle of the 11th century, as at Deerhurst, Gloucestershire; with the exception of some slight remains at the mouth of the Tyne, which are of an earlier and distinct character, and Brixworth, which is possibly Roman work restored. The style agrees in many respects with that of the 11th century on the Continent, where the work has not been ornamented with sculpture in the 12th, as has been very frequently the case. There are, however, some peculiarities about the buildings of this class which entitle them to the name of the Anglo-Saxon style, or, more correctly, perhaps, the primitive English style; for it has been observed that they are far more numerous in the Danelaw land, or the eastern counties, than in other parts of England. In the neighborhood of Lincoln and Gainsborough almost all the old country churches partake of this character. It has also been observed that the earlier examples are more like the work of carpenters than of masons. Such a tower as that of Earl's Barton, for instance, has all the appearance of being copied from a wooden tower, and this may very probably have been the case. Ordericus Vitalis, who lived in the 11th century, mentions that Siward, the cousin of Edward the Confessor, built a wooden church at Shrewsbury, which was used as the parish church. This is material evidence, considering that it was built by a royal prince in a town of so much importance. This church was existing in 1082, when a stone church was commenced by the father of Ordericus Vitalis, who records these facts. It is not improbable that these primitive English churches may be among the earliest stone churches of Western Europe after the time of the Romans. The Roman art of building had become extinct in all this part of Europe, and almost extinct in Rome itself, by the 10th century, and the most ready

---

Corhampton Church, Hampshire.

Saxon models which the English had to copy in the 11th century were their own wooden churches. It was just at that time that Canute ordered churches to be built of stone and lime in all the places where his father or himself had burned the wooden churches of the Anglo-Saxons.

The class of buildings referred to as being considered to belong to this style contain some rather unusual features. The execution is rude and coarse: the walls are built either of rag or rubble, sometimes partly of herring-bone work, without buttresses, and in many cases, if not always, have been plastered on the outside. The quoins are usually of hewn stones placed alternately flat and on end—a kind of construction to which the

Tower, Sompting, Sussex.
name "long and short" has been given; the walls are often ornamented externally with flat vertical strips of stone projecting slightly from the surface, resembling wooded framing, generally of the same "long and short" construction as the quoins. On towers there are sometimes several tiers of these, divided from each other by plain strings or bands. Semicircular arches and triangles formed of similar stone are also sometimes used as ornamental, and plain projecting blocks are frequently associated with these, either as imposts, or as bases for the vertical strips which often stand above them. The jambs of door-ways and other openings are very commonly of "long and short" work; and when impostcs are used, they generally are, they are usually rude, and often extremely massive, sometimes consisting of plain blocks and sometimes moulded. Round the arch there is very often a projecting course occupying the situation of a hood-moulding, which sometimes stops upon the impost, but more frequently runs down the jambs to the ground, forming a kind of pilaster on each side of the opening. It is usually flat, but is sometimes rounded and occasionally notched on the edges, as at Dunham Magna, Norfolk; in some instances the impost is arranged so as to form a capital to each of these projections on the jambs, and they are sometimes provided with bases either formed of plain blocks or rude mouldings. The arches are generally plain, but are occasionally worked with rude and massive mouldings, as the chancel-arch at Wittering Church, Northamptonshire; some arches are constructed with bricks (probably all of them taken from some Roman building, as at Brixworth) or thin stones, and these usually have a course of stones or bricks laid upon the top of the arch, as at Briford Church, Wiltshire: the arches are always semicircular, but some small openings, such as doors and windows, have pointed or triangular heads formed of two straight stones placed on end upon the impost, and resting against each other at the top, as at Barnack. The windows are not large, and, when spayed, have often nearly or quite as much splay externally as internally. In belfries and other situations where they do not require to be glazed, they are frequently of two or more lights, divided by small shafts or pillars, which are very usually made like balusters, and encircled with bands of rude mouldings. In the old portion of St. Alban's Abbey, erected in the latter half of the 11th century, specimens are seen. These generally have capitals, or impostes, formed of long stones reaching entirely through the wall; in some instances the balusters are oblong in plan, as in the tower of St. Michael's Church, Oxford, and in other instances placed together, one behind the other, in order to give better support to these long capitals.

Window, with ornaments on the Sill; and Shaft, with Section.

Details of the Tower, Sompting, Sussex.

The whole of these peculiarities are not to be met with in any one building, and in some churches in which several of them are to be found they are associated with other features, evidently original, which so clearly belong to the Norman style as to prove that these buildings are not of Saxonic date, as at the churches of Dunglington, Gloucestershire, and Syston, Lincolnshire. In other instances the lower parts of build-
married to the sun-god, and bore him Jana, the god of the underworld.

Sayer, Ezra, a minister of the Methodist Episcopal Church, was originally a member of the Troy Conference, and was transferred to the Missouri Conference in 1850. He preached at Shelbyville, Edina, Memphis, and Kirkville, but, in 1860, he took a superannuated relation. He took up his residence near Shelbyville, preaching in tents with fair success until the summer of 1864, when he died. Mr. Sayer was a preacher of no common abilities, fulfilling the duties of his station so as to win the confidence and respect of all with whom he came in contact. See Min. of Annual Conf. 1865, p. 7.

"Saying," a distinct or sustained monotonous in sacred music analogous to the old "saying without note," neither singing nor reading.

"Saying," traditional of Christ. There can be no doubt that, besides the words of Christ which are mentioned in the gospels, others of more or less significance were spoken by him (Mark xiii. 35; xxii. 25) says of the works of Christ, we may equally apply to his words. Paul mentions (Acts xx. 35) a saying of Christ, πασίν τινι ἐτών ἡ ἡμισέληνη (i.e., "It is more blessed to give than to receive"), which we look for in vain in the canonical gospels. The following examples of such sayings of Christ which the ancient Church has designated as "saying," and put them together, not because we ascribe them altogether to apocryphal authors, but because they have no canonical authority in their favor:

1. "On the same day, having seen one working on the Sabbath, he said to him, O man, if indeed thou knowest what thou doest, thou art blessed; but if thou knowest not, thou art cursed, and art a transgressor of the law." This very remarkable saying occurs in Cod. D and in Cod. Graece. 3 Rob. Stephani after Luke vi. 4. Whether or not these words were originally in Luke's Gospel, we cannot decide, but that they convey an evangelical meaning is certain (comp. Loll. Opusc. p. 20; Paulus Colominus, Observation. Sacr, p. 146).

2. "But ye seek to increase from little, and from greater to less. When ye go and are bidden to dinner (εσυνίζεσθε), sit not down in the highest seats, lest a more honorable man than thou cometh, and he that bade thee come and say unto thee, Take a lower seat, and you be ashamed. But when thou art bidden, go and sit down in the lowest seat; and a less honorable man than thou cometh, then he that bade thee will say unto thee, Go up higher, and this will be profitable to thee." This saying is also found in Cod. D or Cantabrig. and in some other codex, after Matt. xx. 29, 28 (comp. Graece. N. T. ad loc.; Tischendorf, N. T. ad loc.). This addition was well known may be seen from the fact that Juvencus (q. v.), in his Hist. Evang. 3. 613 sq., has given it in the following verses:

"At vos ex minime obsequi transscendere velitis, Et sit eum summis insepi compendium imos. Si vocum tuis non concurras coram me, Concurrebis in summis devitie ponere membra Quisque sapit, ventum forsae si nobiliis alter, Tene te sequi confut cedere curas. Quem tumor infatii cordis per summam locatam, Sin contentus erit mediocri preclare cenna Inferius deficiente ei maiori convivium.

Ad potiora pudens transibit stratus tororum."

3. "The Lord says in the Gospel, If ye keep not that which is small, who will give you that which is great? For I say unto you that he who is faithful in very little is faithful also in much." This is found by Clem. Rom. (Epist. I ad Corinth, 9; comp. Iren. A de Haer., ii. 64).

4. "And when the Pharisees and Herodians came to him, and in all manner of false necessity, For those that hunger, for them I said, I was sick; and for those that hunger, I suffered hunger: and for those that thirst, I suffered thirst." It is difficult to say whether this citation, which is found by Origen (Comment. in Matt. tom. xiiit (tom. iii., 563, ed. de La Rue)), can claim any originality or not (comp. Matt. xxxv, 55; 1 Cor. ix. 20, 24).

5. "Ask great things, and the small shall be added
unto you; ask heavenly things, and the earthy shall be added unto you." This saying, which is found in Clem. Alex. (Strom. I, i, 416 [ed. Pott, ii, 488]; Orig. De Orat. ii, 43 [Opp. i, 197, 219], seems not to be taken from any known source of gospel teaching: compare Grelot, Spiesley, i, 14), or from an interpolated codex (Fabricius, Cod. Apoc. N. T. i, 329), but has been freely cited from Matt. vi, 33. Such license is often used in common life, when quoting the sentence of another, which is not done verbatim, but with such words as the circumstances and the purpose of speech require.

6. "Show yourself to thieves, money-changers" (γίνεσθε τραπεζηταί δώρωσι.) This saying of Christ, which is found in Clement. Homil. ii, 51; iii, 50; xviii, 20; Eph. Ephes. xlvii, 2; Orig. Ad Joh. tom. xix, 8, 20, p. 298; Jerome, Epist. 119 (ed. Vallars. i, 815); Socrates, Hist. Eccl. ii, 16, is first cited without any authority (in the Apostol. Constit. ii, 36), then as a passage of Scripture by Clem. Alex. (Strom. I, i, 425), and also as an apostolical, but more especially Pauline, command (comp. Dionys. Alex. ap. Euseb. Hist. Eccl. vii, 7; Cyril. Alex. Ad Jes. ii, 56). Under these circumstances, it will be difficult to decide who the author of this saying is.

7. "Give to those who ask, and against those who strike you; do not sue or give bail to a creditor;" (οἴκετε τοις ζητοῦντις, καὶ κατὰ τοὺς που πυροδότησιν;), the Petrine passage in Matt. v, 44, is "imitated," quoted as the words of Christ by Barnabas (Epist. Catholica, 4); and ibid. 7 we read, "They who wish to see me and lay hold of my kingdom must receive me by affliction and suffering.

8. "If only one of Israel will repent, and believe in God, his sins will be forgiven. After twelve years go ye into the world, lest one should say, We have not heard." In Clem. Alex. (Strom., ed. Pott., vi, 762), Peter quotes these words as those of the Lord, and Eusebius (Hist. Eccl. v, 18) mentions this command of Christ, καὶ δύοκα ἔτοι μεν χωρὶς ἑαυτού τοις ζητοῦντις. In the same epistle (5), we read,

9. "The Lord saith, Ye shall be lambs in the midst of wolves. But Peter answered him, What, then, should the wolves tear in pieces the lambs? Jesus said to Peter, Let not the lambs fear the wolves after they are dead; and do you fear not those who kill you and can do no harm after you?" (οἴκετε τοὺς ζητοῦντις, καὶ κατὰ τοὺς που πυροδότησιν; οὐ γὰρ διέχεσθε τῶν μακρῶν τῶν, ἀλλὰ τῶν ἑκατέρων τῶν, θανατούντων;), this passage from Matt. x, 16; Luke xii, 4, 5, with the same manner of this conversation betrays too much its apocryphal origin.

10. "Keep the flesh pure and the soul unspotted, that ye may receive (ἀπολογίζετε; not as some read, ἀπολείψαμεν,) that we may receive) eternal life" (Epist. 8).

11. "Our Lord Jesus Christ said, In whatsoever I may find you, in this will I also judge you." This saying, which is found in Justin. Mart. (Did. c. Tryph. [ed. Maran.], p. 169), is ascribed by Clem. Alex. (Quis Divae Sacerdotii Principium Est, 16), and John Chrysost. (Hom. in Par. vii, 9, 22; Par. viii, 15, 20; and in the Vita B. Antonii, c. 15, in Vitae Patrum, p. 41) to the prophet Ezekiel (comp. Ezek. vii, 3; xxi, 30; xxiv, 14; xxxii, 20, with Fabricius, Cod. Apoc. i, 383). A comparison of the passages in Ezekiel will, however, prove that these parallels are insufficient, and some apocryphal gospel is probably the authority for this saying.

12. "The days will come in which vines shall spring up, each having ten thousand stocks, and on each stock ten thousand branches, and on each branch ten thousand shoots, and on each shoot ten thousand bunches, and on each bunch ten thousand grapes, and each grape when pressed shall give five-and-twenty measures of wine. When and any saint shall have seized one bunch, another shall cry, I am a better bunch; take me: through me bless the Lord. Likewise also he said that a grain of wheat shall produce ten thousand ears of corn, and each grain of wheat shall produce ten pounds of fine pure flour; and so all other fruits and seeds and each herb according to its proper nature. And that all animals which are not destroyed by the empire of worms from the first created, shall live in peace and concord with one another, subject to men with all submission. And when Judas the traitor believed not, and asked, How, then, shall such productions proceed from the Lord? the Lord said, They shall see who shall come to these times." This narrative of the millennium in the Apocalypse (Adv. Haer. viii, 39) describes the deliverance by John to Papias. Since, however, the tradition belongs to Papias, whom Eusebius (Hist. Eccl. iii, 39) describes as an ἀνδρα ἁμαρτών τῶν ἔρωτος, we must deny from the very beginning the authority of Christ as having uttered these words. Besides, the whole tenor of this narrative conflicts with the dignity contained in all the words of Christ, that, without the least shadow of a doubt, we can ascribe to it an apocryphal origin. The description of the millennium reminds us of the Rabbinitic representations of the same, especially as we find it in the Jallut Shemom (fol. 7, col. i, No. 20), and which is too trivial to be translated. A German transla- tion (1699, p. 275) quotes a mystical saying of the Lord: "Unless ye turn your right into the left and the left into the right, and that which is above into that which is below, and that which is before you into that which is behind, ye will not know the kingdom of God." (Adv. Haer. viii, 39.)

13. "The Lord being asked by Salome when his kingdom will come, said, When the two shall be one, and that which is without as that which is within, and the male with the female neither male nor female." This quotation, which is found in Clem. Rom. (Epist. ad Corinth. v, 12), is, according to Clem. Alex. (Strom., ed. Pott., i, 558), taken from the Gospel of the Egyptians. From the same gospel, Clem. (ibid. p. 522) has preserved the following conversation of Christ with Salome:

14. "When Salome asked the Lord, How long shall men die? he said, As long as women bear children. Then Salome answered, I have done well that I did not bear a son; but he replied, Thou mayest eat of every herb, but of that which has bitterness do not eat." And further on (p. 540) he states, "I am come to make an end to the works of the woman—of the woman, viz. the lust; to the works, viz. to the birth and death.

15. "He that wanders shall reign, and he that reigns shall rest." (Clem. Alex. Strom. i, 453), from the Hebrew Gospel.

16. "I came to put an end to sacrifices; and unless ye cease from sacrificing, God's anger will not cease from you" (Evang. Eikon. ap. Epiph. Heces, xxx, 16).

17. "My mystery is for me and for the sons of my house" (Cod. Apoc. i, 362).
your brother in love"—so from the Hebrew Gospel by Jerome (Comment. ad Ephes. v. 4).

**SAYUTSHIAM**, in Hindū mythology, is a degree of bliss more or less of a religious nature, which relieves man from the necessity of being born again on earth. It may be attained by solitude, virtue, and self-examination, and is at all times assured to such Brahmins as become Yogis, their state being so exalted as to make them more than equal to the gods and to exempt them from every form of trial.

**Szazma**, in Lamainism, is one of the two legal wives of Cos or Xaka, the second person in the trinity of Lamainism.

**Scab** (טב, garôb, Deut. xxviii, 27; elsewhere "scurvy," a diseased scurf on the skin; הַסְכָּה, mis-pâchath, Lev. xiii, 6, 7, 8; a harmless cutaneous eruption; חַסְכָּה, suppâchath, ver. 2; xiv, 56, the mange in the hair causing it to fall out; kindred with these last two is הַסְכָּה for סְכָּה, sapiachath, to "smite with a scab," Isa. iii, 17, i.e., premature baldness; יִלְלָפָה, yallapheth, Lev. xxii, 20; xxii, 22, an itching or tetter in the skin). See Disease; LEPROSY.

**Scabbard** (לֹעֵב, làár, Jer. xlvii, 6; elsewhere "sheath"). See Sword.

**Sceous**, in Greek mythology, was one of the twelve sons of Hippocoon, who expelled Icarus and Tyndareus from Lacedaemon, but were afterwards themselves overcome and slain by Hercules.

**Scaffold** (קִיָּר, kîyôr, 2 Chron. vi, 13; elsewhere used of the "laver" and "pans" for the sacred service), a platform or pulpit (q. v.) for public speaking; probably raised from the floor, but whether round (as the name would seem to denote) or square (as the dimensions would imply) is uncertain.

**Scala Santa** (Ital. for holy stairs), a celebrated staircase, consisting of twenty-eight white marble steps, in a little chapel of the Church of St. John Lateran at Rome. Romanists assert that this is the staircase which Christ several times ascended and descended when he appeared before Pilate, and that it was carried by angels from Jerusalem to Rome. Multitudes of pilgrims creep up the steps of the Scala Santa on their knees with roses in their hands, kissing each step as they ascend. On reaching the top, they repeat a prayer. The performance of this ceremony is regarded as being particularly meritorious, entitled the devout pilgrim to plenary indulgence. It was while thus ascending these holy stairs that Luther thought he heard the words "The just shall live by faith," and, mortified at the degradation to which his superstition had brought him, fled from the spot.

Certain churches in England had similar staircases, which enjoyed the privilege of affording composition for a visit to Rome—at Westminster Abbey, in 1604; St. Mary's Chapel, at Boston; St. Mary's Chapel in the Austin Canons' Church, Norwich: and at Windsor, with a college of ten priests, until 1504.

**Scale**: 1, of fishes (לָעֵב, káskeeth, Lev. xi, 9, 10, 12; Deut. xiv, 10; Ezek. xxxix, 4; so of the lamahe of a coat of "mail," 1 Sam. xvii, 5); similarly λαρίς (a mailed) of incrustations from the eyes (Acts ix, 18); but in 2 Cor. xi, 12 (Heb. 7) the scaly armor of the crocodile is figuratively denoted (לָעֵב, לָעֵב, strong ones of shield, A. V. "scales"); 2, of balances (לָעֵב, pêles, in the sing. only, "weight," Prov. xxvi, 11; "scales," Isa. xli, 12; always associated with לָעֵב, the balance proper); 3, as a verb, to scale the walls of a city (לָעֵב, Prov. xxii, 23, to go up, as elsewhere often). See LADIN.

Before the introduction of coins, balances were of the utmost importance for the weighing of gold and silver in every commercial transaction (Gen. xxiii, 16; xiii, 21; Isa. xiv, 6; Jer. xxxi, 9), so that a balance was required to be of exquisite delicacy. Allusions to this are found in Isa. xi, 15; Ecclus. xxviii, 29, "small dust of the balance," and all dishonesty in the treatment of the scales is sternly forbidden and denounced (Lev. xix, 35; Hos. xii, 7; Amos vii, 5; Mic. vi, 11; Prov. xi, 1; xvi, 11). Hence arose the Rabbinic rule that the scales should be made of marble which could not wear away. The above term לָעֵב, pêles (rendered "weight" Prov. xvi, 11 [Sept. pénîy], and "scales" Isa. xi, 12 [Sept. othâyûc]), is said by Kimchi (on Isa. xxxvi, 7) to be properly the beam of the balance. In his Lexicon he says it is the part in which the tongue moves, and which the weigher holds in his hand. Gesenius (Theor., s. v.) supposed it was a steelyard. That the steelyard was an invention known to the ancients is certain, for specimens of them, elaborately adorned, have been found at Pompeii and Herculaneum (Mus. Borbon., i, 55). Still it was probably not known until the Roman era, and indeed said to have been called Trutina Campana, from its invention in Campania (Smith, Dict. of Class. Ant., s. v. "Trutina").

No traces of its use have been found either in the tombs or temples of Egypt or Assyria, and this is a sufficient proof that the instrument was unknown in those countries. Hence there is no evidence that this instrument was known to the Hebrews. Of the material of which

**Trutina, or Steelyard.** (From the Museum of the Capitol at Rome.)

Architectural Scales. (From the sculptures at Khorsabad.)
the balance was made we have no information. See Balance.

It is thought that the Jews knew the constellation Libra as one of the signs of the zodiac (2 Kings xxiii, 5; Job xxxviii, 82). See Astronomy.

Scaliger, Joseph Justus, son of Julius Caesar Scaliger, a learned critic, and his rival in learning and arrogance, was born, in 1540, at Agen, and was educated at the college of Bordeaux, and, finally, by his father and Turnebus. Languages he acquired with wonderful ease, and is said to have been master of no less than thirteen. His friends denounced him "an ocean of science," and "the masterpiece of nature." He died in 1609, professor of belles-lettres at Leyden. His works, most of which are commentaries on the classics, are numerous. Of his other productions, one of the most valuable is the treatise De Emendatione Temporum.

Scall (иврієм פֶלֶק, פֶלֶק), the mange, or disease falling-out of the hair of the head or beard. Lev. xliii, 8 sq.]. See LEPROSY.

Scalp (יוֹלִית, yōlîth), Psa. lviii, 21; "pate," Psa. vii, 16; the crown of the head [as elsewhere rendered], so called from the parting of the hair at that spot.

Scamander, in Greek mythology, was (1) a son of Oceanus and Tethys, a river-god in Troas, originally named Xanthus. He married the nymph Idae, and became the father of Teucer and Glauce. Hector's older son, ordinarily called Astyanax, bore the appellative Scamandrus, derived from the name of this deity. (2) A nephew of the above, the son of Glauce and Deimachus.

Scamandroklée, in Greek mythology, was the name occasionally given to Calyee, the mother of Cyc- nus.

Scamilli, plain blocks or sublimings, placed under columns, statues, etc., to elevate them. They differ from ordinary pedestals in having no moldings about them, and in being usually of smaller size.

Scandinavia, a large peninsula in the north of Europe, bounded on the north by the Arctic Ocean; on the west by the Atlantic, North Sea, Scager Rack, Cat- tegat, and Sound; and on the south and east by the Baltic Sea, Gulf of Bothnia, and Finland, with which it is connected by an isthmus 930 miles wide. This peninsula includes the two kingdoms Norway (q. v.) and Swe- den (q. v.). The ancient Scandinavia, or Scandia, included Northern Denmark as well as the peninsula that still retains the name. It is first mentioned by Pliny, who, unaware that the peninsula was attached to Finland on the north, considered Scandinavia as an island.

Scandinavian Architecture. Many of the earlier Norwegian and Swedish cathedrals were built by English or French workmen. There were six basilicas in Norway, with towers at the end of the choir- aisles. In Denmark there are eight round churches and one octagonal. Roskilde, Ribe, and Thorsager are splendid; but the general characteristics of the Danish churches are square east ends and an immense south porch and parvis. The wooden churches of Nor- way are probably of Byzantine origin, the plans having been brought back by the Varangians.

Scandinavian Mythology. See Norse Mythology.

Scandinavian Versions.—1. The Norse or Ice- landic.—The first version into this language was made by Oddur Gotsbalksson, son of a bishop of Holm, in Iceland. He attended the lectures of Luther and Melanchton, and on his return to Iceland entered upon a translation of the Scriptures. To avoid persecution, he commenced his work in a small cell in a cow-house, and completed the New Test. in 1539. Finding it difficult, from the state of public opinion, to print it in Iceland, he sailed for Denmark, and published it at Copenhagen, under the patronage of Christian III. The translation, made from the Vulgate, corrected in some cases according to Luther, was published in 1549. At this time on, parts of the Old Test. were published, until at length, in 1584, the entire Bible was printed in Iceland at Holm. The work was conducted by Gud- brand Thorlaksson, bishop of Holm, and has been called "a faithful mirror of Luther's German version;" and, on account of its purity of its diction, it has been held in high esteem. In 1609 a revised edition of the New Test. was published by bishop Gubrand at Holm, with the title Thåd Nýja Testamentum, a Íslanda yfrafæld og lend eftir þeim ríttustu Úlægningum, sem til hafa fefnist (prented a Holm i Hialtalaði, anno MDCCIX). In 1644 a revised edition of the entire Bible was published by Theodoric Skulason, a grandson of Gudbrand, and his successor in the episcopate. In 1728 another edition was published, under the inspection of Stein Jonson, bishop of Holm. Following the Danish Bible too closely, this edition, on account of Danicisms, was found to be scarcely intelligible to the Icelanders, and hence never obtained much circulation. In 1744 a fourth edition, according to the text of 1644, was published at Copenhagen; a fifth in 1750; a sixth in 1807, chiefly at the expense of the British and Foreign Bible Society; and a seventh in 1813 by the same society, and often since. Since the year 1863 a revised edition of the Old and New Test. has been published for the British and Foreign Bible Society, and in 1867 the entire revised Bible, which is now in circulation, left the press at the expense of the same society.

2. Danish.—The earliest translation of any portion of the Scriptures into Danish is contained in a MS. preserved in the Royal Library of Copenhagen, supposed to have been written in the 13th or beginning of the 14th century. It proceeds no further than the second book of Kings. In 1515, Pedersen, who is said to have been the first Lutheran clergyman in Zealand, published at Paris a Danish version of the Gospels and Epistles appointed to be read in churches. It was reprinted at Leipsic in 1518. The whole New Test., Det Nye Testamente, was translated by Hans Mikkelsen, sometimes called John Michaelis, and published at Leipsic in 1524, and reprinted at Antwerp in 1529. This version was executed by the command and under the patronage of Christian II. An improved edition of Mikkelsen's New Test. was published by Pedersen, and in 1578 the whole and republished, with the Psalms, in 1531. In 1550 the whole Bible was published in Danish at Copenhagen. This translation was undertaken at the suggestion of Bugenhagen, the celebrated Reformer, who had been invited to the court of Copenhagen to assist in the cor- rection of the Danish translations. A revision of the entire version was undertaken in 1586 by the command of Frederick II, which was published in 1589, with Luther's notes, under the title Biblia det er den ganske heellige Skrift, pas Danse igen offerfaret og pretet efter salige og Høgfyllede Skuespillere, Kong Fredrich's den 11 Begyndelse. Met Register, etc. In 1624 Fink, For- taler, hans Udlegning i Broedden, og Viti Theodorii Sum- marier (prented i Kjøbenhavn aff Matz Vinagardt, anno 1589, fol.). In 1604 king Christian IV appointed Dr. Rosen, bishop of Zealand, to superintend a fresh revision of the Scriptures, which was published in 1607, with the title Biblia para Danneker. In 1644 an edition from the revised text of 1589 was published at Copenhagen—Biblia det er den ganske heellige Skrift, etc.—and in 1647 a revised edition from Rosen's Bible, designated "Swaning's Bible," so called after the cor- rector Hans Swaning; archbishop of Zealand, was pub- lished, which was again edited in 1724. The University of Missions was established at Copenhagen, which issued several editions of the Scriptures according to Swaning's text: one in 1717, a second in 1718, followed in 1722 by a third, and in 1728 by a fourth issue. In 1728 the mission press was destroyed by fire, and the
Orphan House then obtained the exclusive privilege of printing the Danish Bible; and several editions were published by that institution between the years 1752 and 1745. In the meantime efforts were made to obtain a more correct and faithful edition of the Scriptures, and in 1748 the committee appointed by royal authority published a revised New Test.; and since that time numerous other editions were printed before the foundation of the Danish Bible Society in 1814. In the year 1810 the British and Foreign Bible Society printed an edition of the Danish New Test., from the Copenhagen edition of 1799, the press being superintended by the Rev. W. F. Rosing, minister of the Danish church in London. A second edition was published in 1826, the foundations of another revision of the Bible were commenced at Copenhagen by royal authority. Bishop Muentzer, together with five learned professors, constituted the commission of revision; and in 1819 an edition of the New Test., as corrected and revised by them, was published, followed by a fourth edition of the entire Bible in 1824. The committee of the Danish Bible Society has been engaged for several years past in the task of revising the Danish Old Test., and in 1871 a thoroughly revised text of the Danish Bible was published, which has also been adopted by the British and Foreign Bible Society. The facilities for the circulation of the Protestant Bible in the kingdom of Denmark have greatly increased by an arrangement happily come to between the British and Foreign Bible Society of London and the Orphan Institution at Copenhagen, which latter body possesses by law the exclusive right to print the Scriptures within the Danish realm. Prior to 1850 all editions of the Scriptures produced at Copenhagen were accompanied by the Apocrypha and explanatory notes, and hence the Bible Society was by its rules precluded from taking any part in their circulation. In that year, however, at the instance of the London society, the directors of the Orphan House agreed to produce the New Test. free from all the Apocryphal references. The concession thus happily obtained was at once acted on, and an edition of 10,000 Danish New Testaments was produced for the London society under the auspices of the Copenhagen Orphan Institution, and passed into rapid circulation. In 1859 a subsequent edition of 5000 was found necessary to meet the demands made by the agency, which increased from year to year. As to the circulation of the entire Bible, without Apocrypha and explanatory notes, the society was prevented from doing so until 1872, when, after many negotiations, permission was obtained to circulate Bibles according to the rules laid down by the society, but this was not carried into effect. The references to parallel passages (with the exception of those which relate to the Apocryphal books) which are found in the editions of the Orphan House be also inserted in the editions published by the society in Denmark.

1. That the title-page of these editions be as follows: Bibelen eller de Heilige Skrift, indholdende det Gamle og det Nye Testamente Kanoniske Boger ("The Bible, or the Holy Scriptures, containing the Canonical Books of the Old and New Testaments").

2. The fee to be paid to the Orphan House is provisionally fixed at one mark for each copy. We have stated above that the revised Danish text which was published in 1824 was also by the Orphan House. This was done after those marginal renderings which savor of "note or comment" had been stricken out. The annual report of 1874 stated the fact that "the first edition of the revised Danish Bible has left the press, the proofs having been read by the Rev. J. Plehn. This is the first edition of the revised Bible printed by the Orphan House at Copenhagen directly for the society."

3. Norwegian.—Although the Norwegian and Danish Bibles were originally the same, yet the revisions of later times have made them different. Since about 1860 the Norwegian Bible, with slightly revised text, was published both by the Norwegian and the British Bible Society. A revision of the New Test. was begun about the year 1871, at the expense and by the authority of the Norwegian Bible Society, with the sanction of the chief of the Royal Church and Education departments. The changes introduced rarely touch the interpretation of the text, but are intended to express the sense as well, only in language more adapted to the requirements of modern usage. Of the Old Test., the Pentateuch, in a revised form, was published in 1876.

4. Swedish.—A version of the Scriptures into Swedish is said to have been made in the 14th century by order of St. Briget, or Bridget, who, about the year 1344, founded the famous monastery of Vadstena. Another revision of the Bible was commenced at Stockholm in 1555, and was published in 1601 and 1621; and in the course of subsequent years several editions of the Psalms were printed. At the commencement of the 17th century, Charles IX ordered Jonas Petri, bishop of Strognaeus, and other learned men, to collate Luther's editions of 1534 and 1545, noting such discrepancies as appeared to them of any importance, with the view of producing an improved edition of the Swedish translation. These notes, when completed, were called Observations Strogneæs; and it was decreed in the Synod of Stockholm, in 1692, that they should be incorporated with the old version in a new edition of the Bible. From various causes, this new edition was not published until 1818, when it was printed in folio at Stockholm, with the following title: Biblia det aure allæ Heliga Skrifft pån Sveneso. Efter fôrre Biblæns Test., oforvund medt Förägsk på den Bober ther förre inge woro, medh Summarier for Capitelen, Marginaler, òre Conciliander, samt myglihe färred, och synes att fylle hela foljen. Några åttond stenstormächtigaste hågborné Förstes och Herres, Herr Gustaff Adolfs, Sverikes Goteas och Wendes Komnuus, Befaling (tryckt i Stockholm, anno 1618). In 1622 not a copy of this edition remained on sale, and a reprint was therefore issued at Lubeck, followed by several others. In 1640 a new edition of the Bible (in 1636 and 1646) at Stockholm. In 1650 the Strognaeus Bible was printed under the care of bishop Mathia, which was executed very negligently. The edition of 1618 was also reprinted several times, but with many deviations from the text. A revised edition of the entire Bible was undertaken under the reign of Charles XII, which was published in 1708, with the title Biblia det är allæ Heliga Skrifft pån Sveneso, efter Konung Carl tEthofes Befaling (Stockholm, 1708). Another revised edition appeared in 1709 at the same place. The preparation for this edition was begun by John Gezel, bishop of Abo, who died in 1690, but the work was completed by his brother. In the course of the 18th century so many editions of the Danish Scriptures appeared that the country was generally considered well supplied with Bibles. When, however, in 1808, Dr. Paterson visited the country, the fact was ascertained that the poorer inhabitants, on account of the high price of Bibles, were already in want of a new edition. The consequence was the formation of the Evangelical Society, which issued several editions for the poor, aided by grants from the British and Foreign Bible Society. In 1815 the Swedish Bible Society was formed, which, with its numerous auxiliary societies, continues the im-
portant work of printing and disseminating the Scriptures. Till 1825 it received much assistance from the British and Foreign Bible Society, when the decision of the Apocryphal Question in London set the connec-
tion between the two societies. In order to maintain the circulation of Bibles in Sweden without the Apoc-
rypha, several editions of the Old and New Testaments have been issued by the British and Foreign Bible So-
ciety. Their first edition, which was stereotyped, was pub-
lished in 1828. The text adopted was that of the last edition of the Swedish Bible Society. Several edi-
tions from the same text have since been printed by the same society in London, and likewise at Stockholm. The total number of copies of Swedish Scriptures issued by the British and Foreign Bible Society up to March 31, 1877, amounted to 2,599,261, of which 452,879 were Bibles, 1,912,782 New Testaments and New Testaments with the Psalms, 218,650 portions of the Old Test., and 14,550 portions of the New Test.

3. Furore.—Into this dialekt only the Gospel of St. Matthew has been translated, about the year 1817, by the Rev. Mr. Schroeter, rector of one of the churches in the Faroe Islands. It was corrected by Mr. Lyngbye, of Jutland, who also superintended the printing of St. Matthew's Gospel, of which 1,500 copies were issued. This is the only book of the New Test. that has ever been translated into that dialect.

zung aus und ausgaben (Flensburg, 1777). (B. P.)

Scape-goat (Heb. יִתְנָא, Azazel) is the name given in the A. V. to one of the two goats used in the sin-offering for the entire community of Israel on the great day of atonement, the goat which was to be sent away into the wilderness. To determine which of the two goats was to be slain, and which sent alive into the wilderness, it was ordered that the priest should cast lots upon the two goats; one lot for the Lord (Je-
hovah), the other for the congregation; and the lot for the Lord fell upon the goat (Lev. xvi, 8), but literally for Azazel (עַזָּאֶל), a word nowhere else used. There can be no doubt that this has the appearance of being some sort of personage, or interest personified, standing over against Jehovah, or somehow contadistinguished from him. But opinions have from early times been divided on the subject.

1. The one followed by our translators, which regards it as a name for the goat itself, is of great antiquity, and has numbers on its side—Symmachus (τρίγος ἄπορος
μένος), Aquila (τρίγος ἄπορολιμφίως), the Vulgate (hircus emissarius), Luther, and many moderns, also recently Hoffmann. The term so understood is viewed as a compound of τῇ, goat, and ἐντός, to go away. The chief objections to it are that τῇ is never used precisely of a goat; in the plural it bears the sense of goats generally, but in the singular it designates only she-goat; and in Lev. xvi, 10 and 26, the goat and Azazel are express-
ly distinguished from each other, "the goat (עַזָּאֶל) for Azazel." These are fatal objections, and have led to the general abandonment of the view.

2. By others it has been taken as the name of a place, either some mountain in the desert (Psuedo-Jonathan, Aben-Ezra, Jarchi), or a lonely and desolate region (Bo-
chart, De Rossi), and has no such connotation as a place, but is a name, in accordance with the natural import of the statements, es-
pecially with the expression in ver. 10, "to let him go for Azazel into the wilderness," which would then mean, for the wilderness into the wilderness. Nor could Jehovah on the one side, and a place on the other, form a proper antithesis.

3. Others, again, have taken the word as a pejor-
form of the Arabic verb 572, to remove, formed by modi-
fication from 572, so that the meaning comes to be for a complete removing or dismissal (Tholuck, Steudel, Winer, Bähr). Grammatically, no objection can be urged against it, and it is in complete harmony well with the general import of this part of the rite. "The true expiation," to use the words of Bähr, "was affected by the blood of the first goat, which was set apart for Jehovah; on the other hand, the ceremony with the other goat appears as a mere addition made for special reasons, a kind of complement to the wiping-
away of the sin, which had already been effected by means of the sacrifice. . . . After the expiation had been accomplished by the sprinkling of the blood, the sin was still further to be carried away into the desert. What the first goat, which died as a sin-offering, was no longer in a condition to set forth was supplied by the second, which, as it were, one with the first, inasmuch as it carried the sin, which had been carried in the first, and that into the desert or desolate place, where it was quite forgotten; so that the idea of expiation, or the ex-
termination of sin, was rendered thereby absolutely per-
fect." (Mic. vii. 19). In this view of the matter, the cast-
ing of the lots had for its object the assigning of one goat to Jehovah, for an atonement, and the other for the service, and the other to complete removal or bearing away into the oblivion of the desert—namely, of the sin which had been atoned; an explanation which accords well with the general idea of the transaction, and does no violence to the language. The objection of Hengsten-
berg, that it gives a cold and empty appearance to the peculiar word, which was coined for this purpose, but rather to suppose it to have expressed only the comparatively common idea of complete removal, may perhaps be ob-
viated by conceiving this idea to have been for the oc-
casion invested with a kind of personified existence—
many as Shell, the region of departed spirits, became personified—the one the coverer or dark receptacle of people's lives, the other of their (forgiven) sins. Hence also, probably, the reason of the word being confined to this one occasion, there being no other in respect to which such utter personified oblivion could be predi-
cated.

But there is still another class of writers who are disposed to claim for the word a more distinctly person-
al existence, and who would refer it directly to Satan. This view is certainly of high antiquity, and is ex-
pressed in the reading of the Sept. αἵματος παραβατικοῦ, which means, not scape-goat, or sent away, but the turner away, the averter. The expression of this sense is somewhat dubious (Art. iii. 10, 8), but it seems also to favor the same view; and it was very common with the rabbins, as in later times it has the support of many authorities—Spenser, Ammon, Rosenberg, Gesenius, etc., who hold it to be equivalent to the Roman aerrumerum, or evil daemon, which was supposed to inhabit desert places, and who was considered to be propitiated, or adopted also through purged of this idolatrous connection, by Witsius, Meyer, Alting, Hengstenberg (in his Bücher Moses, transl. by Robbins, N. Y. 1843); also quite recently by Vaihinger (in Herzog and Kurtz, Sacrificial Worship of the Old Testament). These writers hold that the view in question best preserves the contrast between the two goats—one for Jehovah, and one for the great adversary Azazel—the latter a being as well as the former, and a being who (as demons generally) was supposed to have his peculiar dwelling in the desert. The goat, however, that was sent to this evil spirit—emphasis the re-
moved or separate one—was not an innocent animal, but a witness that the accepted sacrifice had been made. It proclaimed, as it were, "that the horrible wilderness, the abode of impure spirits, is alone the place to which the sins of the people, as originally foreign to human
nature and society, properly belong; that Azazel, the abominable, the sinner from the beginning (John viii, 44), is the one from whom they have proceeded, and to whom they must again with abhorrence be sent back, after the solemn abasement and absolute of the congregation have been accomplished" (Vaithinger). No doubt, as thus explained, the leading import of the transaction with this goat is in proper reference with the service of the day; but it cannot appear otherwise than strange that, in the most sacred rite of the old covenant, Satan should be so formally recognised as, according to this view, he must have been; that he should there be recognised under a name which suggests a quite different idea concerning him than that under which he is elsewhere presented to the believer, notoriety he was so publicly and so regularly associated with this name, it should never again be employed as a personal designation. Such peculiarities are rather startling, and dispose us, on the whole, to concur in the view which ranks third in the list of opinions now exhibited. See Azazel.

Scapular, or Scapulary (Lat. scapula, the shoul

der-blade), originally a small garment without sleeves, a part of the habit of several religious orders in the Church of Rome. The several fraternities are distinguished by the color, shape, and material of these holy badges. It was first introduced by St. Benedict in lieu of a heavy cowl for the shoulders. Beirit informs us that the badge which is called the scapular is made of two small pieces of woolen stuff, about the ex

tent of a hand, hanging by two little laces down from the neck upon both the breast and back of the devout person who wears it. The scapular usually has on it a picture of the Virgin Mary or the initials "I. H. S." on one piece, and "J. M. J." (for Jesus, Mary, and Joseph) on the other piece or the other. It appears to have been invented by an English Carmelitta friar named Simon Stock, in 1251. According to the Romish legend, he received the original scapular from the Virgin as a distinguishing badge of the Carmelita order. It is much worn by strict Romishists, in the belief that the devil dreads this terrible weapon. It is supposed to effectually preserve against death by drowning or by fire, and, indeed, against all that might injure either the soul or the body. Besides this "Scapular of Mount Carmel," there are three others, likewise made of two pieces of woolen cloth. The four scapulars may all be worn at once. In this case, each of the two parts is composed of four pieces, which are sewed together like the leaves of a book; and the two parts are joined together by two tape strings about eighteen inches long. Of these four leaves or pieces in each part, the "Scapular of Mount Carmel" is brown and about four inches square; the "Scapular of our Lady of the Seven Dolors" is black and somewhat smaller; the "Scapular of the Immaculate Conception" is blue and still smaller; the "Scapular of the Most Holy Trinity" is white and the smallest, with a cross of red and blue wool in the middle of it (Bar

num, Romanist as it is, p. 539). Many graces and in

dulgences are attached to the wearing of the scapulars by many papal bulls; one of these, the bull Sabbes

tina, secures to the wearer, by direct promise from the Virgin to pope John XXI, deliverance from purgatorial fire on the first Saturday after death.

Scarf, a piece of silk or other material, hanging from the neck, worn over the robe or surplice. It is not mentioned in the rubric of the English ritual, but is worn by our bishops and dignitaries of the Church. It has been used from the primitive ages by the clergy, when the prebendaries and bishops wore a scarf in the administration of the sacraments, and on some other occasions. According to Walcott (Sacred Archæology), it properly belonged to the doctors of divinity and dignitaries, is called talagá in Italy and Malta, and is worn by the doctors of theology.

Scarlat, ALESSANDRO, an Italian musical com

poser, was born in Naples in 1659. He received a good musical education, and, at the age of twenty-one, wrote his first opera. Little is known of his life except that he was master of the royal chapel under Christina of Sweden in 1680, and after her death filled the same of

cice in the church of Santa Maggiori in Rome. He also taught in various musical conservatories. He died Oct. 24, 1725. His principal works are thirty in number, chiefly upon secular subjects, but among them are several oratorios, one called The Sacrifice of Abraham; two renderings of The Stabat Mater;—and six Messe. See Petia, Bll. Univ. des Musiciens.

Scarlet often occurs in Scripture associated with purple and blue. The words so translated occur in the following forms: 1. הָעָלֶל, shapha' ; and צֶבֶן, zeben, alone, Gen. xxxviii, 28-30; Jos. ii, 18-21; 2 Sam. i, 24; Prov. xxxi, 21; Cant. iv, 8; Jer. iv, 80; Sept. cók

kow, Vulg. coecinam; Isa. i, 18, φωλιόκεος, coecinam. 2. רָבָט הָעָלֶל, toldath shapha'; Exod. xxv, 4; xxvi, 1, 81, 36; xxvii, 18; xxviii, 5, 6, 8, 15; xxx, 6, 25; xxix, 18; xxx, 8; Num. iv, 18; coecinam and κέκλωκαν with ἑπιλοώ, κεκλωμοίνων, κέκλων, διαερω-

μενον, Vulg. bis tintus, coccus bis tintus, and ver

miculus. 3. רָבָט הָעָלֶל, toldah, Lev. xiv, 4, 6, 49, 51, 52; Num. xix, 6, 9; Sept. cókko

mivón, and κεκλωτών; vermiculius, coccus, and with bis tintus; 4. רָבָט הָעָלֶל, tolá, alone, Isai. i, 18, κόκκον, vermiculus; Lam. iv, 5, Vulg. crocetas; Nah. ii, 3, coccus. In the New Test. Matt. xxviii, 22; Heb. ix, 19; Rev. xvii, 3, 4, xviii, 12, 16; κόκκος, coccus. The first of these words, shapha', is by some derived from shaknah, בַּשָנָה, "to repeat," and is thus interpreted to mean "double dyed," but which, Gesenius observes, is applicable only to the Tyrian purple (see Brannius, De Vast. i, 15, § 214, p. 237; Bochart, Hieros. i, 3, p. 525-527). Gesenius prefers an Arabic root meaning to shine, because scarlet garments were admired for their brightness; but Jerome asserts that the word means coccus (Epist. ad Fabiolam). It is certain that tolda denotes a worm, grub, or insect, as the Sept., and Vulg. plainly under

stood by it the coccus, from which the ancients procured a blood-red crimson dye, the Coccus ilicis of Linnaeus, class iv, Tetragnia, the kermes of the Arabs, whence used to be derived the French word cromain, and our coccus; but Kilian gives cardiniasium, because made from a worm which, in the Phoenician tongue, is called cormen. Haeckelius defines coccus as that from which the Phoenician dye is obtained. It was the female of this remarkable insect that was employed; and though supplemented by the cochineal (Coccus cacti), it is still used for the purpose in India and Persia. It attains the size and firth of a pea, is of a violet-black color, covered with a whitish powder, adhering to plants, chiefly various species of oak, and so closely resembling grains that its insect nature was not generally known for many centuries. According to Beckman, the epithet vermiculatus was applied to it during the Middle Ages, when this fact became generally understood, and that hence is derived the word verminata. The Latin words mean both the coccus itself, and the deep red or bright rich coccus which was derived from it (as in Cant. iv, 3, "thy lips are like a thread of scarlet"); and so the word "scarlet" signified in the time of our trans

lators, rather than the color now called by that name, and which was unknown in the time of James i. This
insect is widely distributed over many of the south-eastern countries of the ancient world. It occurs abundantly in Spain (Kirby and Spence, Introduction to Entomology [1823], p. 315, 320). It is found on the Quercus coccestera, or kermes oak, in Palestine (Kitto, Physical History, p. 219). Pliny speaks of the cocccus as a red color much esteemed, which he distinguishes from pur- ple (Hist. Nat. ix, 60), and describes as a gay, red, lively bright, approachable color (ibid. and xxi, 22). All the ancients concur in saying that this dye was made from a sort of little grains which were gathered from the holm-oak (Theophrast. Hist. Plant. iii, 16; Pliny, xvi, 12; Dioscorides, iv, 48; Pausan. x, 36). They not only call them grains, but speak of them as the greatest riches which the country possesses (Thasaur. p. 7); and Pliny (Hist. Nat. xvi, 12) calls them cusculea, from the Greek koskolein, which signifies “to cut little excrescences," because they cut or scrape off these small grains of the oak. Yet he was not entirely ignorant of their insect character, for he speaks of it by becom- ing a worm (xiv, 4). It seems, however, that the color thus obtained was not durable (xxii, 9). It was known at a very early period in Canaan (Gen. xxxviii, 28); it was one of the colors of the high-priest’s ephod (Exod. xxviii, 6), and of its girdle (ver. 9), of the breast-plate (ver. 15), and of cloths for sacred uses (Numb. iv, 8); it was used in cleansing the leper (Lev. xiv, 4), to indicate health, as that a healthy complex- ion was restored to him. It was the dress of females in the time of Saul (Sam. i, 24); of opulent persons in later times (Lam. iv, 5); of the Babylonian and Median soldiers, who also wore red shields (Nah. ii, 4; comp. “Scuta lectissimis coloribus distinguunt,” Tacitus, De Mor. Germ. c. 6, and Philostratus, Epist. de Lacedemoniis). Three mistranslations of the word occur in our version, “She is not afraid of the snow for her household: for all her household are clothed with scarlet” (Prov. xxxi, 21). Since there is no connection between the color and a defence from the cold, it would be better rendered, as in the margin, “double garments.” (Comp. Sept. יִשְׂכֵלָפִי וַתַּעֲפֹר יַעֲפֹר, Vulg. vestiti duplicibus.) The next verse of the Sept. begins דִּשָּׁם χλαίναι οἰστάζης τούτων τοῦ ἀνδρος αὐτῆς. She hath made double garments for her husband. In Isa. i, 18 and Jer. iv, 30 the word should be rendered “scarlet,” and not “crimson.” The final reference to scarlet is in regard to pagan Rome, which, like all other cities that have fallen under the influence of the拜占庭 states, wore scarlet in Rome, and especially during war, she is described as being arrayed in that color. In Exod. xxxix, 3, it is said, “They did beat gold into their plates, and cut into wires, to work in the blue, and in the purple, and in the scarlet, and in the fine linen,” which is the word that means—threads—now purple, scarlet, fine linen, and gold—were twisted into one thread; thus a thread of gold with six threads of blue, and so with the rest, after which they twisted all these threads into one (Brunius, i., 17, 26). It seems plain, from Exod. xxxv, 25, that the blue and purple and scarlet were spun by hand from wool already dyed of these colors. The ground color was invariably designated by the term “fine linen.” The cloth was thus in stripes or checks of different materials. Wilkinson remarks that the color was in like manner imparted by the Egyptians to the thread, etc.—that is, cloth was not dyed after being woven (Manners and Customs, iii, 125). It will have been understood that the primary attempt was the attempt to determine the precise distinctions of colors known to the ancients by the various preceding names. The only possible method whereby they could have conveyed them to our minds would have been by comparing them to the colors of natural objects, whose appearance was immutable and whose identity was be- yond question. The ground color was invariably designated by the term “fine linen.” We may illustrate the utility of these requisites by the color blue, which is defined to mean “the color produced or ex- posed to the view by the blowing away, or clearing away, or dispersing of the clouds” (Encyclop. Metropol.). But, as is well known, the shades of colour blue vary in different countries, and even in different altitudes of the same country; hence the word blue, if illustrated by this standard, would convey a different idea to the inhabitants of different regions. It is most likely that all our ideas of sensible impressions are liable to errors of association. It is, however, satisfactory to know that, like all other colors, these are of inferior im- portance. We add a further reference to Goguet, Ori- gin of Laws, Arts, and Sciences, ii, 95, etc. (Edinb. 1784). See Color.

The natural history of the κόκκος may be thus sum- med up. It is a genus of insects belonging to the or- der Homoptera. The females have a single pair of wings and an obsolete mouth; while the females have no wings, but a perfect mouth (rostrum) formed for piercing plants and sucking their juices. They live on trees and plants of various kinds. Upwards of thirty species are included in the catalogue of British insects; but of these many have probably been introduced on exotic plants. There are numerous species, many of which are known to yield rich dyes, and several have been employed in the arts. Up to the time of the dis- covery of America no one could connect these species with the spe- cies which infests the evergreen oaks (Coccus illicis); but that has been thrown into the shade by the superior pro-ductiveness, if not the superior color, of a Mexican species (C. cauc.) whence we obtain cochineal. The insect called ker- mes by the Arabs is abund- ant wherever the tree on which it lives is common. All over the south of Europe and throughout Western Asia this occurs in extensive forests. The hills of the south of Judah about Hebron, the sides of Carmel and of Tabor, the slopes of Gilead and Bashan, besides many other localities in Palestine, are dotted with trees covered with this insect. The oaks of the evergreen oaks, from which a copious harvest of coccss may be annually gathered. It is no wonder, then, that the dye was so early familiar to the people of Canaan. It is in that stage of the insect when the larva is about fully grown that it contains the coloring matter in greatest abun-dance. The little scales are picked from the tree and simply dried; when they yield their dye by infusion in water. To make this permanent, what is called a mord- ant is added—a substance which, having no coloring faculty in itself, acts chemically as a bond of union be- tween the dye and the textile material, and often modi- fies the tint. The ancients used an impure alum for this purpose. Philostratus tells us that thus was obtained from the κόκκος a color of the most brilliant character (Hist. Nat. ix, 65; xxi, 22). The hue now produced by the Kerne.s couscuss with alum is a rich blood-red; but if the same mordant be used as with cochineal—solution of tin—it yields a scarlet as brilliant as that rich Amaranthus dye, and perhaps more perma- nent (Bancroft, Perm. Col. i, 404). The far greater proportion of coloring matter to the bulk in the latter will always, however, prevent the kermes from regaining its commercial importance. See Crim- son.

Scattergood. Samuel, an English clergyman of the latter part of the 17th century, was a fellow of Trinity College, Oxford, vicar of Blackly, Worcestershire (1678), and died in 1696. A volume of his Ser- mons was published (Lond. 1728, 2 vols. 8vo; reprinted 1810).
SCAURUS, M. ELMILUS, a Roman governor of Syria in New-Test. times, was the eldest son of his father by the same name, and stepson of the dictator Sulla, whom his mother, Caecilia, married after the death of his father. In the third Mithridatic war, he served under Pompey as quaestor. The latter sent him to Damascus with an army, and from thence he marched into Judea, but was defeated by the Jews, and was captured by Hirus Hycanarus and Aristobulus. Both of them offered him large sums of money; but he decided for Aristobulus, probably because he bid the highest, B.C. 64. After driving Hycanarus out of Judea, Scaurus returned to Damascus. Upon Pompey's arrival at this city in the following year, he was brought before the council of the Jews having been bribed by Aristobulus; but, though Pompey reversed his decision and placed Hycanarus upon the throne, he took no notice of the charges, and left Scaurus in the command of Syria with two legions. Scaurus remained in Syria till B.C. 59, when he was succeeded by L. Marcius Philippus. During his government of Syria he made a predatory incursion into Arabia Petraea, but withdrew on the payment of three hundred talents by Aretas, the king of the country.

On his return to Rome he became a candidate for the curule aedilship, which he held in B.C. 58, the year in which C. Claudius was tribune. The extraordinary spoil that was brought with him from his campaign, surprised and absorbed the whole of the business of the Senate, and the Senate was in session for three days, during which no other business was transacted. Scaurus purchased the favor of the people in these shows rather too dearly. So costly were they that they not only absorbed all the property which his father had left him and the treasures which he had accumulated in the East, but compelled him to borrow money of the usurers in order to defray the expenses.

In B.C. 56 Scaurus was pretor, during which year he presided in the court in which P. Sestius was accused, who was defended by Cicero. In the following year he governed the province of Sardinia, which he plundered. He was afterwards on a journey to Egypt, in order to pay his debts and to purchase the consulship. On his return to Rome in B.C. 54, he became a candidate for the consulship; but before the consular elections took place his competitors, at the beginning of July, got P. Valerius Triarius and three others to accuse him of repetundae in Sardinia, thus hoping to get rid of a formidable opponent. His guilt was certain; there were numerous witnesses against him; and M. Cato, who presided as pretor, was not to be corrupted, and was favorable to Scaurus. Still, Scaurus did not despair. He was defended by Cicero and Hortensius, as well as by four other orators. Many of the most distinguished men at Rome, and amongst them nine persons of consular rank, pleaded on his behalf; while the tears of Scaurus himself, and his appeals to the splendor of his aedilship, produced a powerful effect upon the judges. Thus, notwithstanding his guilt, he was acquitted on the 2d of September, almost unanimously. Soon afterwards, and in the course of the same year, he was again accused by Triarius on a charge of ambitus (Cicero, Ad Att. iv. 16, 7; iv. 17, 2; Ad Q. Fr. iii. 2, 3). Drummann says that he was condemned in this year and went into exile. But this appears to be a mistake; for although it is evident from the preceding passages in Cicero's letters that Scaurus was accused of ambitus in B.C. 54, it is equally clear from the testimony of Appian (B. C. ii. 24) that he was condemned in the third consulsiphip of Pompey, B.C. 52. Hence it is probable that Scaurus was acquitted in B.C. 54, and accused again in B.C. 52 under Pompey's new law against ambitus. From this time the name of Scaurus does not occur again. He married Mucia, who had previously the wife of Pompey, and by her he had one son (Josephus, Ant. xiv. 9–3; War. i. 7; Appian: Syr. 51; Cicero, Pro Sext. 54; De Off. ii. 16; Pliny, H. N. xxxvi. 2; xxxvi, 15, s. 24, et alibi; Val. Max. ii. 4, 6; Cicero, Ad Q. Fr. ii. 15, 4; ii. 16, 3; iii. 1, 4, 5; iii. 2, 3; Ad Att. iv. 15, 7, 9; iii. 16, 7, 8; iv. 17, 2; De Off. i. 99; Ascon. Argum. in Scaur. 2 and the fragments of Cicero). The following coin was struck in the curule edileship of Scaurus and his colleague, P. Plautius Hypaeus. The subject of the obverse relates to Hypaeus, and that of the reverse to Scaurus. The former represents Jupiter in a quadriga, with P. HYPAEVS. AED. CIV. C. HYP. COS. PREV. CAPTV.; the latter part of the legend referring to the capture of Jerusalem by C. Plautius Hypaeus, in B.C. 341. On the obverse side is a camel, with Aretas kneeling by the side of the animal, and holding an olive-branch in his hand. The subject refers to the conquest of Aretas by Scaurus mentioned above. The legend is M. SCAUR. AED. CIV. EX. S. C.; the breve in Aretas (Eckhel, v. 191, 275). See Aretas.

Colo. of M. Emilii Scaurus, Jun.

Scenophysikes. See Cerrheliarchae.

Scenophytacium, the innermost part of the diascomium, or vestry of the church, and the repository of the sacred vessels and such anathemata or presents as were reputed among the chiefest treasures of the church. It was otherwise called Secretarium, because, as Du Cange remarks, the rector or consistory of the church was kept here. See Bingham, Antig. of the Christian Church, i. 311.

Sceprhus, in Greek mythology, was a son of Tegeates, king of Tegea. He had an interview with Apollo in the temple at Tegea, and his brother Limon, believing that its object was to lodge a complaint against himself, slew him. Limon was himself slain by an arrow from Diana's quiver; but a great dearth came to pass, nevertheless, and the oracle advised that mourning ceremonies be observed in memory of Scephus. Games were accordingly instituted in honor of Apollo and Diana, in which a priestess of the latter, armed with bow and arrow, was expected to pursue any individual, in imitation of the pursuit of Limon by Diana.

Scepticism (from Gr. axiōrōμα, I consider) strictly denotes that condition in which the mind is before it has arrived at conclusive opinions—when it is still in the act of investigating or reflecting. Scepticism is therefore the opposite of dogmatism. Disbelief is quite a secondary meaning of the term. The Sceptics (disciples of Pyrrho of Elis) aimed at an undisturbed tranquillity of mind, to be attained by a constant balancing of opposing arguments, thus reducing everything to a state of uncertainty and doubt. Popularly, the word is employed to signify the rejection of all religion—indefily.
SCEPTICS 401
SCHAATS

onstratation, the use of which, he said, made it unnecessary to attend to the arguments of opponents. (ii) The academic form, which originated with the Sophists, and which Bayle revived, the essence of which consists in opposing all the systems of speculative belief to each other. Academic doubt is ever seeking, for the avowed purpose of never finding; and perpetually reasoning, in order that it may never come to any conclusion. (iii) The absolute form, which strikes at the root of all opinions, and appears to found a system of universal doubt in the human understanding itself. Of this kind of scepticism the writings of Hume furnish the great and unrivaled example in modern times. (iv) Ridicule. This contains no philosophy, but is a mere series of doubting and jesting. Such was the scepticism of Voltaire. (v) The historical form: this is contained in a narrative relating to the times and circumstances with which religion is chiefly concerned; and while preserving an outward regard to morals, misrepresents with irony the miraculous history of the Bible, and takes care, without absolutely falsifying facts, to place it in an absurd and improbable point of view. The history of Gibbon, dealing much in insinuation and very little in argument, is, perhaps, the most dangerous production in this class which has yet appeared, because it least admits of a reply. For who, as Paley observes, "can refute a sneer?" (vi) Sentimental infidelity. Such was the unbelief of Rousseau. Other imbui\--
ded would destroy Christianity without having fixed on any other system to substitute in its place; but, if Rousseau has no system, he has abundance of "sentiments" and imaginations, and has a dim poetical deity of his own to worship, though he can assign no definite attributes to it, nor form any positive conception of his shadowy god.

The most modern form of scepticism is rationalism (q.v.), which strictly signifies that method of thought which, in matters of religion, not only allows the use of reason, but considers it indispensable. The term has now, however, acquired a wider meaning, and stands in opposition to supernaturalism (q.v.), or the belief in that which transcends, or, as others view it, contradicts both nature and reason—as, for example, miracles.

Sceptics. See Scepticism.

Sceptre (Heb. שְׁכֶבֶת, šchet), in its primary significations, like the equivalent σκέπτων (for the root of the Hebrew and Greek words seems identical; comp. also English shaft), denotes a staff of wood (Ezek. xix, 11), about the height of a man, which the ancient kings and chiefs bore as insignia of honor (Homer, Ilad, 1, 404, 245; ii, 185 sq. Amos i, 5; Zech. x, 11; Wind. x, 14; comp. Gen. xlix, 10; Numb. xxiv, 17; Isa. xiv, 5; sound Lev. xxviii, 32). As such it is thought by some to have originated in the shepherd's staff, since the first kings were mostly nomad princes (Strabo, xvi, 783; comp. Psa. xxix). There were, however, some nations among whom the agricultural life must have been the earliest known; and we should not among them expect to find the shepherd's staff advanced to symbolic honor. Accordingly, Diodorus Siculus (iii, 8) informs us that the sceptre of the Egyptian kings bore the shape of a plough. The symbols of dominion, as represented on the Egyptian monuments, are various. That of Osiris was a flail and crook (Wilkinson, Anc. Egypt, i, 257); that of the queens, besides the crown (q.v.), was two loose feathers on their head (ibid. i, 276). A carved ivory staff discovered at Nimrud is supposed to have been a sceptre (Layard, Nin. and Bab. p. 195). A golden sceptre—that is, perhaps, one washed or plated with gold—was mentioned in Ezek. iv, 11 (comp. Xenophon, Cyrop. viii, 7, 18; Hist. Hier., ii, 268; Odysse, xii, 91). Other decorations of Oriental sceptres are noticed by Strabo (xvi, 746). Inclining the sceptre was a mark of kingly favor (Ezra, iv, 11), and the kissing it a token of submission (v, 2). Saul appears to have carried his javelin as a mark of superiority (2 Sam. viii, 14; comp. 1 Sam. xv, 10; xxii, 6). The use of the staff as a symbol of authority was not confined to kings, it might be used by any leader, as instanced in Judg. v, 14, where for "pen of the writer," as in the A. V., we should read "sceptre of the leader." Indeed, no instance of the sceptre being actually handled by a Jewish king occurs in the Bible; the allusions to it are all of a metaphorical character, and describe it simply as one of the insignia of supreme power (Psa. xlv, 6; Bar. vii, 14). The term scepter is rendered in the A. V. "rod" in two passages where scepter is substantially meant, viz. in Psa. ii, 9, where "scepter of iron" is an expression for strong authority, and in Psa. cxxxi, 9; a use derived from the employment of the same word in an ordinary "rod" of correction (Exod. xxii, 10, and often), and even for beating out grain (Isa. xxxviii, 27). See Rod.

Sec'va (properly Σεκουα, Σεκουα, a Jew residing at Ephesus at the time of Paul's second visit to that city (Acts xix, 14-16), A.D. 62. He is described as a "high-priest" (ἀρχιερέας), either as having exercised the office at Jerusalem, or as being chief if one of the twenty-four classes. His seven sons attempted to excise orcs by using the name of Jesus, and on one occasion severe injury was inflicted by the demoniac on two of them (as implied in the term ἀπορρίπτω, the true reading in ver. 16 instead of ἀβραώ)....

Schaaf, Charles, a German Orientalist, was born at Huys, electorat of Cologne, in 1646. He was educated at Duisburg, and became professor of Oriental languages in that university in 1677. In 1679 he took the same position in the university at Leyden, where he continued until 1729, when he died of apoplexy. His works are, Opus Aryanum. (1686, 8vo):—Norum Testamentum Syriacum, cum Versione Latina (1708, 4to):—Epitome Grammaticis Hebraicae (1716, 8vo):—Sermo Academius de Linguarum Orientalium Scientia. In 1711 he prepared a catalogue of all the Hebrew, Chaldee, Syriac, and Samaritan books and MSS. of the Leyden University Library.

Schaats, Gideon, the second pastor of the Reformed Church in Albany, N. Y., was born in
Holland in 1597, and at first was a schoolmaster at Beest. Having been ordained by the Classis of Amsterdam, he was sent to this country with the Rev. Samuel Driscius, a man of great learning, who preached in Dutch, English, and French, and was one of the ministers of the Dutch Church in New York from 1632 to 1671, being college chaplain at the Hudson. Megapolensis had previously been pastor of a Reformed Dutch Church in London. In addition to preaching in New York, he used to go once a month to Staten Island to preach to the French Vaudois or Waldenses, who had fled to Holland from persecutions in Piedmont, and were by the liberality of the city of Amsterdam enabled to emigrate to the New Netherlands. Mr. Schaats was forty-five years old when he came to this country, and his ministry here extended over thirty years. One of his three children—his eldest son—was killed in the massacre and burning of Schenectady, Feb. 10, 1689. During his pastorate in Albany, the governor (Sir Edmund Andross) compelled dominie Schaats to receive a collection of the Rev. Nicholas van Ranselaer, a Church-of-England man, who was recommended to Andross by the duke of York, and who attempted to obtain a living by laying claim to the pulpit and also to the manse of Reusselaerwyck. Van Ranselaer officiated for about a year, when he died. The people refused to acknowledge him, as also did the Classis of Amsterdam. He was strongly suspected of being a papist in disguise. Mr. Schaats was aided in the controversy with Rev. William Van Nieuwenhuyzen of New York, who was sent to Albany for the purpose, and inured the governor's bitter enmity on this account. The latter part of Mr. Schaats's ministry was marked by congregational and domestic troubles. He died in 1674. See Rogers, Historical Discourse (1858); Corwin, Manual of Reformed Ch.; Murphy, Anthology of New Netherlands. (W. J. R. T.)

Schade, Georg, a Danish jurist in Altona, afterwards in Kiel, was born in 1711. He was the author of a deistical work, Die unendbaren und ewige Religion der abzissen Naturforser, etc. (Leips. 1760), in which he attempts an absolute demonstration of the chief tenets of the deistic system and the predetermination of all revelation. He even constructs a complete theory of the resurrection of the body and of the future life. Soon after this book appeared, a pretended refutation of it was published at Altona by a so-called professor R. Goise, with the evident design of simply calling attention to the first part of the magistrat's honor. The author of Schade's book with a public burning, and the king of Denmark deposed him from his office and banished him. It was only on the accession of Christian VII (1766) that he was recalled and restored to office. Thenceforth he devoted himself exclusively to his judicial duties, until his death in 1795. See Herzog, Real-Enzyklop. xx. 696-988. (J. P. L.)

Schade, Johann Caspar, an eminent Pietist, was born in 1666. He studied at Leipzig (1685-89), came into intimacy with Francke, and shared in the religious awakening of which Francke was subsequently a leader. In 1696 Schade was called to the Church of St. Nicolas, in Berlin. Spener had just previously begun his fruitful ministry in this church. The two other colleagues were also pietistically-minded. Here now began for Schade a very laborious and fruitful ministry. His zeal was seraphic, his temperament ascetic. He abstained from marriage that he might be more wholly devoted to Christ. Soon there arose differences between him and Spener. Schade knew no moderation in the purifying work, and he had no desire to disturb or voice against the abuses of private confession, and Spener refused him. After much agitation, a governmental decision of 1698 removed the excitation of private confession and absolution, and permitted a merely general public confession in its place. But Schade did not live to enjoy this release from what had been to him an oppressive duty. He died in July of the same year. See Evang. Kirchenzeitung, 1860, No. 489 sq.; Herzog, Real-Enzyklop. (J. P. L.)

Schadow, Friedrich Wilhelm von, a German painter, was born at Berlin, Sept. 6, 1789. His early studies in art were directed by his father, but in 1806 he abandoned them for the military service, in which he remained for four years. In Rome he afterwards studied under Cornelius and Overbeck, became a convert to Catholicism, and assisted his masters in the decoration of several villas and churches. In 1819 he became a member of the Academy of Fine Arts at Berlin, and in 1827 he was made director of the Academy at Dusseldorf. Here his peculiar religious views and mystical tendencies led to a break with his pupils, and his school was divided into opposing parties by heating. Schadow was made a nobleman in 1843. He published a pamphlet entitled Sur l'influence du Christianisme sur les Arts (Dusseldorf, 1843);—and Der moderne Vasari (Berlin, 1854). He died in 1862. Of his paintings in Rome, the most remarkable are A Holy Family, The Virgin Mary, and The Union of Poetry and Sculpture. In Berlin is his Four Evangelists, and at Frankfurt The Wise Virgins and The Foolish Virgins. See Uechtritz, Blüte in das Düsseldorfer Künstlerleben; Puttmann, Die Düsseldorfer Malerschule.

Schall, Johann Adam von, a Jesuit missionary to China, was born at Cologne in 1591. He entered the Jesuit order in 1611, and was selected, partly because of his knowledge of Chinese characters and astronomy, partly because of the mission to China in 1920. He not only formed a successful mission, but, on account of his learning, was invited to the imperial court at Pekin. Through his influence with the emperor, he obtained an edict authorizing the building of Catholic churches and liberty of preaching throughout the empire. In the space of fourteen years he sent out two missionaries and was said to have received 100,000 proselytes. Upon the death of the emperor the edict was revoked. Schall was thrown into prison and sentenced to death, was released, again imprisoned, and died Aug. 15, 1660. A large MS. collection of his remains in Chinese, amounting to fourteen volumes in 4to, is preserved in the Vatican Library. See Hoefer, Nouv. Dict. Générale, s. v.

Schalling, Martin, a Lutheran divine, was born at Strasburg, April 21, 1582. He studied at Wittenberg, and was pastor at Regensburg, Vilseck (in Upper Palatine), and Amberg. In the latter place he was deposed because he would not subscribe to the Formula Concordiae. He died at Nuremberg, being pastor of St. Mary's, Dec. 29, 1698. He was a pious man, of whose hymn, Herzlich huch hab ich dich, O Herr, in Schwaeder's Christ in Song, p. 609, "O Lord! I love thee from my heart!", Gellert said that it was "worth more than many volumes of new hymns, which have no merit other than that of a smoother language." The hymn which we have mentioned, and which is based on Ps. xviii and lixiii, was a psalm for the duchess of Orleans (daughter of Louis Philippe), and others. See Koch, Gesch. des deutschen Kirchenleides, ii, 282 sq.; viii, 265; Knapp, Evangel. Liederschatz, p. 1342, s. v.; Rittemeyer, Die evangelischen Kirchenleiderrichter des Elzas, in Jenae (1851), p. 26 sq. (B.P.)

Schamyl. See Shamil.

Schartauans, a recent sect in Sweden, named after Schartau, a clergyman, whom they profess to follow. When Schartau died, he left some skeletons of sermons and a large number of devious books. An idolatry of the man and his skeleton sermons commenced, and with it a new era of Christian development, especially in Southern Sweden. It is neither High-Church nor Low-Church nor Broad-Church, but a hard, stony stereotyped form—a certain way of preaching, talking, looking, and moving. The Schartauans dislike all lay activity—will join in no missionary work, in no Bible society.
—because that is to yoke with unbelievers; nor will they speak with any one on religious subjects unless he is an exclusive Schartauan. Another distinguishing feature is a great horror of the Moravians, founded on some unpleasant experience of Schartauan's own. Schartauanism crept into Gothenburg about twenty years ago.

Schedius, in Greek mythology, was (1) the son of Ixion, the son of Nausithous, who led the Phocians, in connection with his brother Epistrophus, to Troy. He fell by Hector's hand in the stead of Ajax. (2) A son of Perimedes, likewise leader of the Phocians, and killed by Hector.

Scheelestrate, Emmanuel de, a Belgian antiquarian and theologian, was born at Antwerp in 1649. In his youth he became much interested in ancient and early Christian history, and traveled in France and Italy for the purpose of meeting with the learned men of his day. His first work—on the pontifical prerogative—gained him a canonry and the position of chorister in the cathedral at Antwerp. Innocent XI called him to Rome, and made him librarian of the Vatican and canon of St. John Lateran. He died in Rome April 6, 1692. Scheelestrate was a great scholar and a most prolific writer, in most of his works maintaining the great dignity of the pope and endeavoring to extend his jurisdiction. Of his works we mention, Antiquitates Illustratae circa Conclavum, Sediarchiam, et Generalia, (Antwerp, 1685, 4to);—Ecclesia Africana sub Primate Cartaginensi (ibid. 1679, 4to), in which he endeavored to prove that this Church recognised the pope as patriarch.—Acta Constantissimae Concilii (ibid. 1685);—De Auctoritate Patriarchii et Metropolitae (ibid. 1687, 4to). SeeDupin, Autres Eclectici; Niédon, Memoirs.

Scheffer, Ary, a French painter, was born at Dordrecht in Holland, Feb. 18, 1796. His studies were carried on in Paris under Baron Guerin, and in 1812 his first picture appeared. His earlier pieces were in the line of historical and genre painting, and have become well known through engravings as The Death of St. Louis, The Sister of Charity, and The Soldier's Widow. In the romantic style which was so prevalent at the time, Scheffer did not succeed so well, and felt that his power lay in a different direction. The inspiration given to his pencil by the works of Goethe and Byron is shown by his pictures Guerri, Faust, and a series of others. In religious painting he has The Christ of the Garden, The Memnon, The Shepherdess Led by the Angel, Christ in the Garden, show a deep religious feeling, and are works of power and great beauty. One of his finest sentimental pieces in Francesco di Rimini and her Lover Meeting Dante and Virgil in Hell. As a portrait-painter he achieved great success, and the portraits of Lafayette, Lamartine, and others show his power. Scheffer worked incessantly, and his drawing is truthful and full of grace, his touch firm and well adapted to his style, and his color, though often wanting in mellowness, is still very beautiful. He was undoubtedly a great artist, and received the honor due to his talent. He was made commandant of the Legion of Honor in 1848, and died June 15, 1858.

Scheffer, Johann (Angelus Silesius), a Catholic mystic of Germany of great speculative power and poetic fervor, was born at Breslau in 1624, of Polish Protestant parents, and received his early schooling at the Elisabethanum of that city. In 1649 he went to Strasburg, but returned, and went to Holland, where he spent several years, partly at Leyden. Here he became interested in the writings of Jacob Böhme, which exerted a decided influence on his subsequent life. His religious studies did not, however, interrupt his professional preparation, and in 1647 he was ordained priest. He died at Silesia on July 9, 1648. Returning to Silesia, he served three years as family physician to a duke. Here it soon became evident that he could not content himself with the stiff Lutheranism of the day, and he soon became suspected by the local clergy. The court preacher, Freitag, forbade the publication of his poems because of their mystical tone. He found a patron, however, in Franckenberg, a Silesian nobleman, who was also attracted by Böhme's writings, which he published at Breslau in 1652. That of Franckenberg in 1652 seems to have brought him into trouble. Soon afterwards he left the service of the duke, and on June 12, 1658, entered the Catholic Church at Breslau, at the age of twenty-nine. His conversion raised no little outcry against him. His motives were assailed, and an attempt was made to publish at Olmütz, in 1658, his Fundamental Rennos for Quitting Lutheranism, in which he gave fifty-five reasons for regarding Lutheran doctrine as erroneous and eighty-three for accepting Catholicism. "In the while matter," said he, "I have acted simply as an honest, conscientious Christian. After his conversion he remained in Breslau, occupied with religious meditation and writing. In 1667 among the simultaneously his two chief works, Der chevonische Wandersmann and Geistliche Hirtenglieder. In 1661 he was consecrated to the priesthood, and thenceforth acted as an almost bigoted champion of Romanism. In 1664 he was made the intimate counsellor of the bishop of Breslau. After forty years of active life he was embittered in controversies with the Protestant Church. Among his assailants were Chemnitz of Jena and Albert of Leipsic. Abuse, caricature, and violence characterized both sides of the controversy. Many of these later writings he collected and published under the title Ezechieloga (Neisse and Glatz, 1677, fol.). His controversial activity seems to have rapidly consumed his strength, as he died at the early age of fifty-three. Of permanent results of his attacks upon Protestantism there is no trace. His writings soon fell into neglect, and it is only in quite recent times that they have met with full appreciation. They bear no stamp of deep conviction, and give evidence of wide acquiescence with the writings of the fathers and the mystics (see Grupp, Die römische Kirche [Dresden, 1840], and, on the Catholic side, Wittmann, Angelus Silesius [Angsburg, 1842]). But it is more as a poet than as a polemic that Scheffer holds a place in literature. His work Der chevonische Wandersmann consists of a collection of 1675 brief utterances, mostly in Alexandrine verses of two to four lines each, unconnected and without systematic sequence. The title explains itself from the fact that the book aims at pointing out the way whereby man, estranged from God by sin and buried in the love of the world, is to find his way back to God. The undertone of these brief verses is of a strongly mystical character, and is entirely free from confessional distinctions. That we can return to God only by profound contemplation of God; and that the more we gaze upon God with open face and submit ourselves to him in perfect resignation and patience. We see that we are essentially united to God and made possessors of all that is God's—such is the thought that constantly recurs under a thousand images, and spreads a fragrance over every page. The Christian element in this thought is found in the fact that Scheffer presents the incarna- tion and Redemption as the effective means of our approach to God; but he also insists, mystic-like, that the process of incarnation must in some degree repeat itself in us, so that we also may become sons of God like Christ. That some of Scheffer's utterances have a leaning towards pantheism (e.g., "I am as great as God, and he is as small as I," and "I seem to love him not as much as I then I give to him as much as he gives to me") is not to be denied. But this may be explained partly from the intensely aphoristic form of expression at which the author aims, and partly from actual inconsistency of thought. In his second edition he earnestly repudiates all pantheistic utterances that he does not explicitly imply the cessation of the creature character of man, but only that our regenerated nature may become so filled with grace as God shall be, to us, and all in all.
Scheid, Eyvhard, an eminent Dutch philologist, was born at Arnhem in 1742, and became professor of Oriental literature at Leyden. He died in 1795. Among his works are, An Arabic Grammar:—Dissertations on the Song of Hezehiah in Isaiah (Leyden, 1759):—Book of Genesis Revised:—Minerava, seu de Cousus Latian Lingua.

Schein, Johann Heigmann, was born Jan. 29, 1587, at Gruenhahn, near Zwickau. He studied philosophy and theology at Leipzig. Being, however, besides, an excellent musician, he was called in 1615 as precentor to the famous Thomas School at Leipzig, where he died Nov. 19, 1630. He is the author of the beautiful hymn Nacht mit Gott, nach deiner Liebe Engl. transl. "Deal with me, God, in mercy now," in the Choral Book: No. 191). See Koch, Gesch. des deutschen Kirchenliedes, i, 83 sq.; viii, 624; Knapp, Evangel. Liederchast. p. 1342, s. v. (B. P.)

Scheil, Levi, a Lutheran minister, was born Sept. 9, 1523, at Bern, Schaffaric County, N. Y. Having prepared for the ministry, he was licensed by the Seminary, he was licensed in 1553, and accepted a call as pastor of St. Thomas's Lutheran Church at Churchtown, N. Y., where he spent twelve years and a half, laboring with all the enthusiasm and intensity of his ardent nature. In 1866 he followed a call to the Clay and Cicero pastorate in Onondaga County, which he soon exchanged in 1867 with West Sandlacke, in Rensselaer County. Having spent six years at West Sandlacke, he accepted in 1873 a call to West Camp, where, however, his valuable and successful labors were interrupted in 1876 by sickness of so serious a character that he was compelled to discontinue preaching. In 1877 he again entered upon his pastoral labors, and in 1878, he was called to close his pastoral labors. He entertained the hope that he would again be enabled to resume his loved work of proclaiming the tidings of salvation, but his impaired constitution had finally to succumb, and he died Dec. 27, 1878, at the age of fifty-five years, and after twenty-five years of arduous and successful labor in the ministry of Jesus Christ. (B. P.)

Scheil, Friedrich Wilhelm Joseph von, one of the four (Kant, Fichte, Schelling, Hegel) great speculative philosophers of modern Germany, was born at Leonberg, near Stuttgart, in 1775. His father, though but a rural clergyman, was an eminent scholar in Oriental and therabbinical literature. Young Schelling showed early indications of his great powers. At fifteen he entered the University of Tbingen, intending to make theology his profession. He here formed an intimate friendship with the student (afterwards rival) Hegel who was five years his senior, as also with the unfortunate poet Hölderlin. Lessing, Herder, and Kant were the admired heroes of these young geniuses. Also they were enthusiastically carried away by the new political ideas of the overwhelming French Revolution.

Writings.—Schelling's first attempt at authorship was his essay for his master's degree in his eighteenth year, Antiquissimae de Prima Malorum Originem Philosopham explicandi Gen. iii Tentamen Criticam (1792). A year later he published a paper, Uber Mythen (On the Myth), which the young philosopher admired, and which introduced the religious ideas of the ancients were already occupying the young scholar. The year 1794, in which Fichte began his philosophical fame at Jena, was a turning point in the history of Schelling. Fichte's Wissenschaftslehre at once set into ferment the kindred speculative powers of Schelling, who, from thenceforth for two decades, sent forth a rapid succession of works which have assured him a place among the great speculatists of the race. Adopting Fichte's idealism, he spiritually defended it in the following papers: Uber die Moglichkeit einer Form der Philosophie (1794):—Von der philosophischen Begründung der Rechtswissenschaften (1794):—Beweis für Dogmatismus und Kriticismus (1795):—Neue Deduktion des Naturrechts (1795):—Allgemeine Übersicht der neuesten philosophischen Literatur (1795). These papers show a gradual advance towards independence of thought and towards the chief features of the author's subsequent peculiar positions. In 1796 Schelling went to Leipsic and gave special attention to the sciences of physics. Here he began to meditate that peculiar Philosophy of Nature which took so striking a form when he began to lecture at Jena in 1798. At first he taught side by side with Fichte; and when Fichte went to Berlin, in 1799, he remained the chief philosophical star at Jena. hardly could there be conceived a more favorable place for the young philosopher than Jena at this time was. It was the philosophical focus of Germany. Reinhold had there expounded Kant; Goethe's spirit hovered over the place; Schiller, Humboldt, and the Schlegels were closely related to the university. Circumstances combined to invest philosophy here with an atmosphere of poetry. Schelling's Philosophy of Nature, which was partly a creature and partly a creator of this atmosphere, was therefore very enthusiastically received. It was presented in a variety of writings: Ideen zu einer Philosophie der Natur (1797):—Von der Berke der Weltseele und der Naturlage der Geister (1800). While elaborating these works, Schelling also subjected the Fichtean philosophy of the Ego to a further development, positing the Ego as an antithesis to Nature (see his System des transcendenten Idealismus [1800]). But, unable to rest in this dualism, he attempted to conciliate the antithesis in a higher unity in his Identitäts- system (1801). This thought is the inspiration of a fresh series of works: Bruno, oder über das göttliche und das weltliche Prinzip der Dinge (1802):—Vorlesungen über die Methode des akademischen Studiums (1803):—Philosophie and Religion (1804):—Darlegung des wahren Verhältnisses der Naturphilosophie zur verbesserten Fichte- schen Philosophie (1805). How great Schelling's work in this period is vividly depicted in the pages of such men as Steffens, Schubert, and Schlosser. In 1803 Schelling was called by the Bavarian government to the University of Würzburg; here he wrought in the same spirit as at Jena. On account of political changes he left this post after two years, and returned to Munich, where, in 1807, he was made secretary of the Academy of Sciences. This is a transition period in the philosophy of Schelling. His greater originality and independence lie in his Jena period. He now begins to drift towards syncretism and a mystical theosophy. It is an effort to escape from the discipline of thought in order to find a system which shall express the truth of both. The works which give expression to this ten-
Schelling—they appear less frequently than previously—are: "Das Verhältnis der bildenden Künste zur Natur (1807):- Das Wesen der menschlichen Freiheit (1809):—
the harsh work against Jacobi, Denkmal der Schrift von den göttlichen Dingen (1812); and essays in the Al
gemen. Zeitschrift (Munich, 1913).

After the year 1815 there begins an almost uninterrupted silence of nearly forty years in Schelling's life. In 1820 he lectured for a brief period at Erlangen. In 1826 he was made professor of philosophy at the new University of Munich. His lectures here formed an epoch in the life of many rising young men. In 1841 he accepted a call to Berlin. The lectures here delivered - his synthesis in the dominant Hegeliansm, and are the best expression of his later system.

His last years were devoted to editing his later form of doctrine for the press. Death overtook him in Aug., 1854, while seeking relief at the baths of Ragaz, in Switzerland, at the age of seventy-nine. Soon after his death (1856) the publication of his collective works was begun by his son (a clergyman), K. F. A. Schelling.

They embrace a first division of ten volumes and a second of four volumes (Stuttgart and Augsburg, 1856 sq.).

Philosophy. — The philosophy of Schelling does not present a definite, self-consistent unity. It was in an almost constant state of self-modification. But it presents its crystallizations in its ex-points of his early pantheistic idealism and his later Christian theosophy.

Between these climax-points lies his long period of almost total retirement from public life. As a whole, however, the growth of his thoughts may be distributed under the following five phases:

1. Schelling as a disciple of Fichte.
2. His philosophy of nature and his transcendental idealism.
3. His system of identity.
4. His system of a transition period.
5. His theosophic approach to Christianity.

(1.) Schelling began his thought-system by absorbing and championing the reigning philosophy of the day—to wit, the system of Kant as modified by Fichte. By Fichte the idealism of Kant was emphasized into exclusive validity. According to Fichte, there is no other reality than the absolute activity of the Ego. It is true, this activity of the Ego is conditioned by an object—this Not-itself derived from any reality exterior to the Ego; that is, from any thing per se. On the contrary, the Not-me, the external world of thought and observation, is really an unconscious creation of the Ego, which the Ego then subsequently raises to an object of conscious contemplation. But in the absolute reality which is real, the Ego is as unconscious as or conscious as? If as unconscious, then God, the All, is unconscious; and the empirical conscious-ness of man is delusional and unreal, and is destined to vanish into unconsciousness. If as conscious, then God, the supreme reality, has no existence save in the transitional flux of vanishing, finite Egos: he is in external process of becoming and of passing away. Between these two consequences Schel's system constantly oscillated, tending at the one pole to self-annihilation, and at the other to self-deification. The latter tendency prevailed more in his earlier, and the former in his later, life. It was as an enthusiast for this rigid idealism of Fichte that Schelling made his philosophical-philosophical revolution.

With Fichte he denied self-consciousness and personality to the absolute being; and he insisted that for the idea of a divine revelation there can be no place, save in the mythological phraseology of the populace. The history of religions he regarded as only a "progressive, symbolic manifestation of the ideas of the absolute reason." The philosophies and religions of the ancient world present in an imperfect and, as it were, unconscious form that which modern thought has developed in full consciousness of its own processes. Perhaps the chief feature in which Schelling differed from Fichte was the very outset was that he found a deeper sig-

nicance in the different forms of religion than Fichte had done.

(2.) Schelling's second phase (1798-1800) sprang from his growing conviction that a mere subjective idealism could not do justice to the empirical objective world by which we are met on every hand. He did not mean by this to give up the results of his idealism; he only aimed to reach the results of the subject in the objective reason of the world of nature. Thereby he introduced a new stadium into his philosophy: constructive or cre-
avtive knowledge was put into the place of the previous critical knowledge. As previously the Ego had con-
centrated, so now the universe as a whole should do. It was to expand itself over the universe and find the laws of its own intuitions there reflected. Out of subjective idealism sprang, thus, an objective idealism. From the standpoint of this idealism the moral element loses its importance, and speculative knowledge is the one thing important. The intention of Schelling in his Philosophy of Nature was simply to supplement the idealism of Fichte; but in reality it grew into a direct antithesis to it. With Fichte, nature was merely a means for the development of the subject. With Schelling, it was a manifestation-form of the absolute Ego, and had essence and significance in itself. Nature was spiritualized and spiritualizable. This con-
ception seemed strikingly new and important. It was hailed with very great enthusiasm. Nature was to Schelling a perpetual movement of self-balancing force. By the various interaction of attraction and repulsion are produced the infinitely varied forms of organic life. Matter is balanced force. Nature, when rising above the antithesis of attraction and repulsion, becomes light. Light is, as it were, the soul, the thought of nature. Under the influence of light, matter evolves itself dyna-

mically in the phenomena of magnetism, electricity, chemistry. The antithesis of crude matter and light is harmonized in the higher stage of organic life. Here light takers in the objects; it is their vitality, their life. Matter becomes here a mere incident of the vitalizing principle. The stages of the dynamic process consti-

tute the great divisions of organic life. The preponder-
ance of objectivity or of subjectivity determines the characteristics of the three great kingdoms of organic nature, the vegetable, the animal, and the human or moral. Matter is the background upon which these three kingdoms stand out as higher stages of evolved being. Through it they stand related and are united into a unitary cosmos.

In his Philosophy of Nature Schelling emphasizes the objective character of the subjective as the movement from the crudest form of matter to the highest subjective; that is, from matter to moral freedom (so far as the latter exists). But, not content with this, he now reverses the process. He starts from the highest point reached by natural philos-

ophy—to wit, self-conscious man—and reconstructs the whole system of philosophy from a subjective stand-

point. In this—his Transcendental idealism—he traced, accordingly, the objective as rising from the subjective. He divides his subject-matter here into the theoretical, the practical, and (that which unites the two) the artistic. In the theoretical part Schelling considers the various stadia of knowledge in their relation to the vari-

ous stadia of man. Matter is extinct mind. The acts and phases of self-consciousness are rediscoverable in the forces of nature and in the stages of their develop-

ment. All the forces of the world are ultimately re-
ducible to powers of ideal representation. Organiza-
tion is necessary; for intelligence must view itself in its productive, subjective, real form. This it cannot do without making that succession per-
manent or representing it as at rest; and succession represented as at rest is organization. Intelligence is a never-ending effort at self-organization. Among the successive stages of organization there must be one which the subject is forced to regard as identical with
himself. It is only through the fact that there are other intelligences than myself that the world is made objective to me. It is only through commerce with other individuals that I can come to the consciousness of my freedom. The intercommunication of rational individuals through the medium of the objective world is the condition of freedom. But whether all free beings shall, or shall not, confine their action within such limits as leave free play to the freedom of each other is not left to chance, but is safeguarded by the higher law of justice. Justice rules in the interests of freedom with all the inviolability of a law of nature. All attempts to supplant the reign of absolute justice by an arbitrary, arbitrary, rule of every man for himself and for all others, are ruinous and abortive. The guarantee of a good constitution in each state must lie, in the last resort, in the subordination of all states to the common law of absolute righteousness. The gradual approach towards a realization of righteousness is the substance of history. History, as a whole, is a progressive realization and manifestation of the Absolute. It is only through history as a whole that the full proof of God's existence can become manifest. All single intelligences may be regarded as integrant parts of God or the moral order of the world. This divine order will fully exist as soon as individual intelligence reaches the height of the Absolute. History is constantly advancing in consequence of a pre-established harmony between the objective necessary and the subjective free. This harmony is conceivable only on the supposition of the existence of a higher element, superior to both, as being the ground of the identity of the absolutely subjective and the absolutely objective, the conscious and the unconscious, whose original separation took place simply in order to the phenomenal manifestation of free action. If the phenomenal manifestation of freedom is necessarily unending, then history itself is a never-completed revelation of the Absolute, which disrupts itself, in view of this manifestation, into the conscious and the unconscious; but which is, in the inaccessible light in which it dwells, the eternal identity of both and the eternal ground of their harmony. To this higher element of identity no predicates can be given. Hence it cannot be an object of knowledge, but only of practical postulation—that is, of faith or religion. If we turn our attention exclusively to the orderliness of the objective world, we fall into a system of fatalism. If, on the contrary, we regard only the subjective, we land in religious or anarchy. But if we rise to the thought of that higher identity of both we attain to a system of provisionality—that is, of religion in the true sense of the word. It is true, Schelling says, that no questions have ever proved fuller and more pertinent than how the higher Absolute to which no predicates can be assigned can be described as provident. How he would have met the question we leave undecided.

The transcendental idealism of Schelling had grown under his hands into a complete system of philosophy. It was therefore not only co-ordinate with his philosophy of nature, but also super-ordinate. But with this twofold presentation of his system from the two poles of the finite (Nature and the Ego) Schelling was not satisfied. He now felt that what he had found as the goal of his highest previous effort—to wit, the principle of absolute identity—should be laid as the beginning at the foundation. This brings us to the third stage of his philosophizing.

(5.) The epoch of his System of Identity. In this system everything is derived from the absolute reason, taken as the highest and subjective principle, and object. The highest law of this principle is its identity with itself (A = A). It is absolutely infinite and one. Whatever is, is this absolute itself. Single finite things exist only in reflection. As this absolute identity is everything, it is at the same time the totality of everything. It is not the source or the cause of everything, but it is itself everything. In his concept of this absolute identity, Schelling seems to involve himself in a shadow of self-contradiction. He makes it, on the one hand, an absolute indifferency; as such it is purely negative, and hence cannot be the basis of a positive universe. On the other hand, he makes it the identity of everything—that is, he makes it the most positive of all things. In this absolute identity, Schelling distinguishes essence and form. In respect to form, it is an infinite self-knowing; it can know itself, however, only as subject and object. But as this subject and object spring from identity, their only difference must be quantitative, not qualitative; that is, the absolute identity can differentiate and possess itself under a priori conditions. This is the general idea of the objective, but not under a form from which one of the elements is entirely absent. Any equation that can be contrasted with A = A must be simply equivalent to A = B. The whole conception may therefore be expressed under the form of an unending magnetic line with one indifference-point and two poles, at the one of which A preponderates, and at the other B, thus:

\[ A = B \]

\[ A + B \]

\[ A = A \]

At every point in this line all three elements are present. Every single object is therefore one of the forms of the essence of the absolute, and in each of these forms the absolute identity is entire, seeing that it is per se indivisible. The preponderance of the objective or real is nature. The first relative totality in nature is matter; and the ideal antithesis of matter is light; and from the combination of matter and light springs organic life. But it is only in an infinite self-knowing that the absolute identity is actu real, and hence only in the sphere of the subjective and ideal. This sphere Schelling identifies with the true, the good (religion), and the beautiful (art). The absolute identity is therefore the essence of nature simply in that it is the ground of its actual existence. Everything is nature which falls outside of absolute being. This differentiation of essence as, on the one hand, the actuality of things, and as, on the other, simply the ground of their actuality, was justly regarded by Schelling as one of the most important connecting links between his earlier and his later system.

The filling-up of the outlines of his system of identity Schelling left incomplete; he gave chiefly the objective phase. Of the subjective or spiritual phase we have only fragmentary sketches. As filled out in his oral lectures, this phase contained the germs of his later and more theistic system. Religion is presented, not as a production of human minds, but as a product of instruction from higher beings. But Christianity is regarded as inferior to the great religions of the Orient; and yet Schelling insists, as against illuminism and the subjective moralism of Kant, on the necessity of the chief theological ideas of the Bible. His thoughts are these: A universe differentiates itself, as real and ideal, into nature and history, so history itself is likewise divided. The Oriental and pagan world is the nature side of history; Christianity, on the contrary, is the ideal or moral side. The pagan religions are religions of nature; the gods are but forces of nature; the infinite is subordinated to the finite; hence the monotonousness of deities. But in Christianity the finite is subordinated to the one infinite; hence the unity of the divine nature. In Christianity mythology can only rise from deterioration and popular ignorance. In paganism mythology is primitive, taken as the fruits of an intellectual advance beyond the primitive elements. The stream of history rises through three stages. The stage of nature came to its climax in the religion and poetry of the Greeks; it was a time of unconscious identity with nature, and nature was regarded as a manifestation of eternal necessity. The period of catastrophe, or of conflict between natural necessity and moral freedom was
the tragic age of the decline of ancient civilization. The period of harmonization, or of providence, was inaugurated by Christianity. (This division corresponds in part with the one made by Croiset in his "Archéologie artistique".) It is only in Christ that God becomes truly objective. But this is an eternal process, and the incarnation is not a merely temporal, empirical act; Christ offers up in his own person the finite, and thereby renders possible the coming of the Spirit as the light of the mind of the age, of the new creation, of the new time, the finite back to God. From philosophic speculation Schelling looked for the new birth of essential, or ecstatic, Christianity, and the proclamation of the absolute Gospel.

Connected with these views is Schelling’s next speculation on "Religion and Philosophy" (1804). It is a self-defence against Eschenmayer. In it religion is presented as the "conclusion of the finite with God;" but the finite is regarded as per se fallen. "God is not the positively creative cause of the finite; the finite can only indirectly spring from the absolute, and it sustains to the absolute no direct relation." The finite is regarded simply as real, as delusive. The general background of this work is an idealistic mysticism, derived in part from Plato and Platonism, but also much resembling the transcendentalism of the Orient; it fails to do justice to the ideas of morality and freedom.

(4.) With this work on "Philosophy and Religion" Schelling reaches a new position in the history of idealism. All of his works subsequent to his System of Identity bear a more or less mystical coloring and become less and less rigidly systematic in form; at first the mysticism resembles that of the Eleusinian mysteries and of Neo-Platonism; subsequently it approaches Christian mysticism on the footsteps of Bahhia. But this appropriation of mystical views was entirely independent on the part of Schelling; he seems to have been forced into them by a growing feeling of incomplete satisfaction with his previous views. And it is to be regretted that he did not openly concede the erroneousness of his earlier system or systems, but constantly represented his later system as simply complementary of his previous ones.

But his change of view is very radical. It came to definite expression for the first time in 1809, in his discussion of the nature of human freedom. Here is to be found in embryo the very essence of his final system. Schelling writes: "In the whole world of experience there is no riddle of good and evil, and gives no play to creatural freedom. Idealism must be complemented by realism. Idealism is the soul of philosophy; realism is its vital body; it is only from the union of the two that a vital whole can result. A few of Schelling’s positions here are wide open; but among those that are fixed, he has so given the ground of his existence within himself. This ground of his existence is not God per se, but it is a nature in God; this nature is inseparable from God, but yet it is distinguishable; it is not actually, but only logically, antecedent to God. It is only from this nature in God that the diversity and multiplicity of finite things is explained. In order that these things be other than God, it must be that they have the ground of their existence in something which is not God; that is, in that in which God is not God himself. The further development of these thoughts brings us to

(5.) Schelling’s Later System. The thought here merited are unquestionably among the most brilliant and suggestive that are anywhere to be found in the field of the philosophy of religion. At the threshold of this system we meet with an examination of the implications of creatural freedom. Among the fruitful conclusions here reached is this, that purely rational, logical thought is incapable of leading us to a knowledge of the reality. This conclusion leads to a distribution of philosophy into negative and positive. By this distinction, Schelling comes into sharp antithesis to Hegel, who endeavored to comprehend the real by the processes of mere abstract thought. In the view of Schelling, this is impossible. Pure thought, pure reason, cannot a priori comprehend the existence of the objective world of reality. What a thing is and that it is (was et quae est) is clearly the same thing; but what the essence of a thing, may be expressed in thought, in ideas. But the knowledge that it exists is given by something outside of thought—wit, its existence itself. This knowledge comes to us from experience, and not from reason. Existence cannot, therefore, be demonstrated; it can only be experienced. It is only through this knowledge from experience that thought reaches to true knowledge. A negative or ideal philosophy has to do only with the possible. It is only a positive philosophy that can rise to contact with the real and with that which springs from the real—to wit, freedom and free action. But as the whole of the results of freedom is not yet complete, a positive philosophy cannot be presented in as rounded a systematic form as is possible with the negative. The highest attainment of negative philosophy is to show how the highest principle is in idea. The connecting link which leads over from the negative to the positive form of philosophy is the conviction, forced upon us by experience, that God must be more than mere idea—that is, that he is real. As negative philosophy is the a-prioriism of the empirical, so positive philosophy is the empiricism of the a-prioristic—that is, it is philosophical empiricism.

Positive philosophy can assume a starting-point almost anywhere—thus: "I will that which is higher than substance, to wit, the Lord of all being." From this initial proposition it then proceeds deductively, and the experience which results reacts as verification of the assumed starting-point. The world is the postiersis; the unconditioned principle is God. And the whole drama of human history is an accumulative proof that this posterior is from this praxis. It is only in the sphere of positive philosophy that we reach the field of religion—that is, of a real (not merely ideal) relation of man to God. The transition from a negative to a positive philosophy is like that from the law to the Gospel. For a purely rational science, the idea of an objective religion does not exist. Religion originates practically through a longing and desire of the spirit, which cannot be satisfied with the merely ideal God of speculation. This longing is not an expression of the practical reason, but a demand for its fulfillment, a longing for the essential reality of God; so he has the ground of his existence within himself. This ground of his existence is not God per se, but it is a nature in God; this nature is inseparable from God, but yet it is distinguishable; it is not actually, but only logically, antecedent to God. It is only from this nature in God that the diversity and multiplicity of finite things is explained. In order that these things be other than God, it must be that they have the ground of their existence in something which is not God; that is, in that in which God is not God himself. The further development of these thoughts brings us to

Having speculatively reached the ideal of the Absolute Being, and being forced by the heart to assume that this being must be the ultimate reality, the philosopher is now ready for the practical rule of this highest reality. This Being would not be perfect if he had not the liberty of positing himself outside of himself; but this is a liberty, and not a necessity. God is, before the world, master of the world; that is, he is able to posit it or not to posit it. The world is therefore a consequence, not of the divine nature but of the freedom of God. God does not posit himself into the world. God does not become real in consequence of creation; and yet he would not be real without the power of creation. Monothelism is true, but not in the sense of theos. Theism admits God as a personality; but this personality is an empty
undifferentiated infinity, and has within itself no potentiality, no basis for a world outside of God. God is per se a plurality of potencies, and he is the totality of these potencies. And the great error of pantheism is not that it holds that there is no being outside of God, and that all existence is God's existence, "for all hearts cheerfully and joyously concede this;" but it consists in ascribing to the universe of all things and all phenomena a fully realized unity and with whatsoever is. It is only from this idea of monothel- theism as distinguished from theism and pantheism that a transition to the truth of the trinity is possible. The entire God—that is, God as the totality of the divine potencies—is the Creator, the Father; and he is Father only in that he brings to possibility the possibility of what is begotten. This oneness is fully realized, not in the full actualization of creation. In the act of creation the absolute personality evolves its own self-existing essence out of itself. This act of creation is a generating, and the divine essence so evolved is the Son. A second evolution constitutes the Spirit. The fatherly potency furnishes the material of creative objects; the Son their form; the Spirit their perfection.

Revelation in the Old Test.ingerers under the forms of mythology. In the New Test. these forms are entirely dispensed with. The focus of the new religion is the person of Christ, not as teacher or legislator, but as compass. The person of Christ is both historical and pre-historical. The person of Christ is the person of the patriarchal history; as historical he laid aside his glory and identified himself with man in order to raise human nature into communion with God. Christ resumed the glory which he had laid aside only gradually and by moral process. This process began at his baptism. It is only on the complete victory of Christ, over death that he could send the Spirit as comforter. Schelling closes his philosophy of revelation with a glance at the history of the Church. He distinguishes here a prehistorical, a historical, and a post-historical Church. The latter will not appear in the present son. The condition of the prehistorical is that of a merely subjective (negative) unity; that of the historical is a state of division as preparatory to its transition to a state of free, positive unity. The historical stage of the Church begins at the point where Christianity attains to domination in the Roman empire. Here it had to face, under a new form, all the might of the once defeated paganism and inconstituting itself after Christ and the Church appeared at first as a mere realistic, material, formal unity; as such it was of a merely authori- tative legal character, and the more rigidly this legal character developed itself, so much the more was the ideal (spiritual) character driven into the background. But at a certain point the rational element came to open revolt with the realistic, and it then inaugurated a new phase of Church history. Both Christ and the apostles place the advance of the Church in a growth in knowledge; and the character of this new phase is, and will be, that mankind recognise more and more the supreme fact that Christianity is the highest statutory human science. The three conditions of the Church are typified in the three apostles—Peter, Paul, and John. Peter has the violent, aggressive nature that characterizes every beginning; Paul is steady and constructive; John has the gentle repose of maturity. The true Church is neither of these three, but the synthesis of all; its founda- tion is in the first, its body is in the second, its content was breathed into it by John. Even as God consists not simply of one person, so the Church is not embodied simply in one apostle. Peter is rather the apostle of the Father: he sees most deeply into the past. Paul is really the apostle of the Son: he is full of light. John is the apostle of the Spirit: he has the deep "words" of spiritual truth and warmth. As a whole, no system of modern philosophy has more fully allied itself with Christianity than that of Schell- ling; he, of all the great speculativists, has alone treated this religion as real history. To Schelling Chris- tianity is a higher, a supernatural stream of history flowing upon the bosom of the ocean of cosmic history. He treats this history, not atomistically, but genetically. This genetic method of theologizing has become the prevalent characteristic of modern theology. Schleier- macher, Nitzsch, Rothe, Lange, Martensen, have all practiced it. Its general trait is an earnest endeavor to co-ordinate the various and contradictory tendencies in religion, and to grasp the whole as a vital unity; and its stimulative relation to contemporary theological thought is an evident result of this its chief trait; and that in its details it may frequently be erroneous, or that many of its speculations are over-presumptuous, does not destroy its value as a whole.

Few thinkers have had more enthusiastic disciples than Schelling. G. M. Klein espoused his system of identity. J. J. Wagner defended the earlier Schelling against the so-called later. G. F. Ast applied his method to the study of Plato. T. A. Rixner became a fruitful student of the history of philosophy. L. Oken applied Schelling's thoughts to an elaborate philosophy of nature; Nees von Esenbeck applied them to the physiology of plants; B. H. Blasche, to pedagogics and religious philosophy; J. P. V. Troxler, to the science of cognition. A. K. A. Eschenmayer received here his fundamental inspiration. J. Görres adapted Schelling to Roman Catholic tendencies. G. H. Von Schubert reflected the ideas of the so-called post-Hegelianism. Burdach made large use of his philosophy of nature.

K. G. Carus represented him in psychology and craniology; H. C. Oersted, in physics; K. W. F. Solger, in aesthetics; H. Steffens, in general religious philosophy; J. E. Von Berger, in the philosophy of law. F. Von Bauder developed and retained Schelling's views into a very rich and elaborate system of Christian theo- logy. K. C. F. Krause applied Schelling's views to general literature and freemasonry. F. G. Stahl was largely influenced by the later Schelling in his philo- sphy of law and in his discussion of the relations of Church and State. Coleridge received much inspiration from the early Schelling, and through Coleridge this influence went over into the pantheistic views of Words- worth. Agassiz was inspired by Schelling's views of nature. And many of the brilliant hypotheses which have played so large a rôle in modern physics—such as the metabolism of plants, the homologies of the skeleton, the origin of species—are really found in germ in the early works of Schelling.

On Schelling, consult Herzog, Real-Encyclopedia, xxxiii, 503-551; Ueberweg, Hist. of Philosophy, vol. ii; Hagenbach, Hist. of Doctrine; Hurst, Hist. of Rationalism; Bowen, Modern Philosophy; and all works on modern German speculation. (J. P. L.)

Schelling, Joseph F., general superintendent at Maulbronn in Württemberg, was born in 1775, and died in 1812. Among his contributions to Biblical literature are the writings of Solomon translated into Latin, with notes (Stuttgart, 1806), and a Dissertation on the Use of the Arabic to a Thorough Knowledge of Hebrew (Stutt- gart, 1771).

Schenck, George, a (Dutch) Reformed minister, was born at Mattewan, N. Y., Jan. 27, 1816, and graduated at Yale College, August, 1837. During his boy- hood he was crippled for life by a severe fall while skating. He was ordained as a Reformed Church minister. He was helpless for three or four years, and was never able to walk without crutch or cane and a high boot. But this affliction was sanctified to his conversion during his collegiate life. He studied theology in the New Brunswick Seminary, and after graduation, in 1840, settled as a Reformed Church minister in New Jersey. He was a native of New Jersey and was ordained at Flemington, N. J. This was his only charge—a very large, intelligent, well-trained country congregation, which has enjoyed a long succession of able ministers. Mr. Schenck was distinguished as a preacher of unusual power in the exposition of Scripture and in the application of it to
the consciences of his hearers. He was at times brilliant, always earnest, and "never feared the face of clay." His fine social qualities, deep piety, and skill as a physician of souls, endeared him to his literary, scholarly, and energetic ministry. But everything was bent to his life-work as a minister. In the general affairs of the Church, in the temperament cause and educational movements, he was conspicuously for "seel with knowledge." His ministry was greatly blessed in conversions and revivals, and in the edification of the Church. He died in 1829, of disease which struck him down just after he came from a Sabbath afternoon lecture and a visit to a sick man. With characteristic modesty, he never but twice consented to frequent requests to appear in print. A Sermon on the Second Coming of Christ (1843) and an Address on the German, p. 11, "Who are these, like stars appear posted. See Memorial Sermon, by Dr. T. W. Chambers; Letter of Rev. H. D. Ganse; Sprague's Annals of the Amer. Pulpit. (W. J. R. T.)

Schenk, Hartmann, a Lutheran divine, was born April 7, 1834, at Ruhla, near Eisenach. He studied at Helmstadt and Jena, and was pastor at Bibra and Völkershausen. His motto was, "Mea Hiereditas Servator," and his claim to fame is that he was in 1831, a Lutheran divine, who not only prayed himself, but also taught others how to pray. He wrote some hymns, which are still in use in the German churches. See G. Ludovici, Vocabolarium, p. 37; Wezel, Hymnus-geographia (Hernstätt, 1724), III. 14; Koch, Gesch. des deutschen Kirchenleist, iii. 427; Knapp, Evangel. Liederschatz, p. 1843. (B. P.)

Schenk, Heinrich Theobald, a Lutheran hymn-writer, was born at Alsfeld, and became headmaster of the school at Giessen, and afterwards chief pastor there, where he died in 1727. He is the author of Wer sind die vor Gottes Throne (based on Rev. vii. 12-17), transl. into English by E. Cox, in Hymnus from the Church and determine the proper missionary fields. See Koch, Gesch. des deutschen Kirchenleist, iv. 585; Knapp, Evangel. Liederschatz, p. 1843. (B. P.)

Schermerhorn, John F., a (Dutch) Reformed minister, was born about 1785, graduated at Union College, 1809, and entered the ministry of the Congregational Church, which he left in 1815 for the Dutch Reformed Church. He was first settled at Middleburg, N. Y., in 1816, where he was pastor of a Dutch congregation. In 1817 he visited Scotland and Ireland, and in 1819 he went to Venice at an early age, where he gained a livelihood as a house-painter. In his leisure hours he studied the works of Giorgione and Titian. The latter artist, hearing of his poverty and seeing his ability, employed him, with Titoreto and others, in ornamenting the grand hall of the library of San Marco. His designs were good, but the drawing so defective as to render him unable to compete successfully with his rival Titoreto. It was only after his death that his works were appreciated. His life was miserable. He died in Venice in 1822. His principal works are, The Eternal Father Among the Saints, The Harlot, The Baptist in the Desert; The Visit of the Virgin to Elizabeth; The Death of Abel; and The Assumption of the Virgin. Etchings by him are found after his own compositions, and copies of Raphael and others.

Schiavone, Andrea Medula (or Medola), an Italian painter and engraver, was born at Sebenico, in Dalmatia, and was of oriental birth. He went to Venice at an early age, went to Venice at an early age, where he gained a livelihood as a house-painter. In his leisure hours he studied the works of Giorgione and Titian. The latter artist, hearing of his poverty and seeing his ability, employed him, with Titoreto and others, in ornamenting the grand hall of the library of San Marco. His designs were good, but the drawing so defective as to render him unable to compete successfully with his rival Titoreto. It was only after his death that his works were appreciated. His life was miserable. He died in Venice in 1822. His principal works are, The Eternal Father Among the Saints, The Harlot, The Baptist in the Desert; The Visit of the Virgin to Elizabeth; The Death of Abel; and The Assumption of the Virgin. Etchings by him are found after his own compositions, and copies of Raphael and others.

Schickard, Wilhelm, a learned German Orientalist and distinguished astronomer, was born at Herrenberg, near Tübingen, April 22, 1592. When he had finished his theological course he was for a while vicar in his native town, but in 1618 returned to Tübingen, and there gave lessons in Hebrew. In 1616 he was pastor at Nürtingen, continuing his studies in various languages. An acquaintance which sprang up between him and Kepler led to his turning his attention to mathematics, to which he afterwards gave much of his time.
To occupy his spare moments, he learned the art of engraving upon wood, and made use of this acquirement in constructing a celestial globe and astronomical charts. In 1564 he became Professor of History at Tübingen. He acquired a knowledge of languages by studying Syriac, Arabic, Chaldee, Turkish, and Persian, all without any teacher or instruction save what he gained himself. In 1628 he was made member of the College of Arts, and in 1629 was elected inspector of the schools at Stuttgart. He occupied in 1631 the chair of astronomy at Tübingen, without giving up his Hebrew pro-
fessorship. After the battle of Tübingen he retired to Austria, but returned later only to meet the plague, which bereft him of nearly his entire family, and finally terminated his own life, Oct. 25, 1635. His writings are numerous, all relating either to Oriental languages or astronomy. His most valuable is Relatio Hierosolimitana, especially in the edition of Carpzov (Leips. 1674). See Vita Schickardi; Baith. Vetus, Apologetis Schickardi; Fürst, Bibliotheca Judica, ii, 270 sq.; Steinschneider, Bibliographisches Handbuch, p. 125 sq.; Catalogus Librorum Hebr. in Bibl. Bodleiana, p. 2355; R. Simon, Hist. Critique, p. 474; Diestel, Gesch. des alten Testamentes, p. 522 sq., 384, 449, 501, 521; Hoefer, Nouv. Biog. Générale, s. v.

SCHINCKE, Johann Christian Gottfried, a German theologian, was born in 1782 at Querfurt, and died in 1839 at Wiesbaden, in Hesse-Cassel. He wrote, Metaphysische Beobachtungen über die preuss. Aegura (Halle, 1824)—Jesu Christus, ein Erbauerbuch (ibid. 1826)—Evangelische Geschichten und Reden in frommen Dichterübungen (ibid. 1826)—Biblische Alterthumskunde in alphabetischer Folge (Neustadt, 1837–40)—Science: and the inner Life of the Christian. (Halle, 1845). See Regenburger Real-Encyklop. s. v.; Zuchold, Bibl. Theol. ii, 1140. (B. P.)

SCHINDLER, Valentine, who died in 1604, is the author of the first polyglot lexicon, containing the Hebrew, Chaldee, Syriac, Talmudico-Rabbinic, and Arabic. It was first published at Hanau in 1612, and in a fourth edition in 1619. Besides, he also wrote, Tractatus de Accessibus Hebr. etc. (Wittenberg, 1586)—Compendium Grammaticae Hebraicae (ibid. 1602; 2d ed. 1618), and other lingustic treatises. See Fürst, Bibliotheca Judica, iii, 274; Steinschneider, Bibliographisches Handbuch, p. 127; Catalogus Librorum Hebr. in Bibl. Bodleiana, p. 2566 sq.: Gesenius, Geschichte der hebr. Sprache, § 34; Diestel, Gesch. des alten Testamentes, p. 447, 552. (B. P.)

SCHIMMERM, Johann Adolf, a Lutheran divine and doctor of divinity, was born in 1738 at Stettin. Having completed his studies, he was appointed in 1757 deacon at Iserlohn; in 1764 he was made archdeacon and professor of Oriental languages at Stettin; in 1774 he became pastor of the German congregation at Stockholm; and in 1778 he was appointed general superintendent at Greifswald. In 1779 he was called for the same office to Lubeck, where he died May 8, 1796. Besides his Lebenbeschreibungen der drei schwedischen Reformator, des Kunziera Lor. Andersen, Olaf Petersen und Lor. Petersen (Lubeck, 1783), he published Versuch einer vollständigen Geschichte der schwedischen Bibelüber- setzung mit Anzeige van der Heerhouding thres Werthes (Flensburg, 1777), the best work on the earlier Swedish Bible versions. (B. P.)

SCHINNERM, Matthew, a Romish bishop in Switzerland, and a cardinal just before the outbreak of the Refor-
mation, was born in 1470. He studied at Zurich and Como, and became early noted for shrewdness and scholar-
ship. In 1509 he was made bishop of Sion, and soon thereafter was called into diplomatic service by Leo X. In 1511 he received the cardinal's hat. He intrigued against the French in Italy, and was the agent for procuring an army of 20,000 Swiss by which, in 1512, the French were expelled from Lombardy. For this service the pope heaped titles and wealth upon Schinner, and gave to the Swiss for all time to come the appellation Defensores Ecclesiae Libertatis. Zugwill took part in the campaign, and depicted in bright colors the glory of the attempt. He now made his headquarters as papal legate at Milan. Fresh dangers from France arising again, he hastened to England (1514), and en-
deavored, by his Oratio Philippica ad extantos contra Galliam Britannos, to entangle Henry VIII in war with Francis I. On his return, he inspired the Swiss to re-
sist the English. When the Reformers now began in Switzerland, this cardinal-stateman gave it at first a warm greeting. Zugwill met him at Einsie-
deln and Zurich, and showed him from the Scriptures his reasons for rejecting the errors of popery, and the cardinal expressed himself as very desirous of co-oper-
ing in the work of renovation. When Luther's life was in danger in Germany, the cardinal joined with those who offered him safety and refuge. On reading Luther's works, he exclaimed, "Disputect Ecius quantum velit, Lutherus veritatem scribit!" But temporal in-
terests held him fast to the old Church. He was even induced actually to oppose the new doctrines. His last few years were spent in Rome. He died soon after as-

SCHINNS. See Sastic.

SCHIRER, Michael, a Lutheran minister, was born at Leipsic in 1606. In 1636 he was called as master of the Grayfriars' Grammar-school at Berlin, where he died May 4, 1673. On account of his many troubles, he was called "the Marian Job." When the Reformers began in Switzerland, this cardinal-stateman gave it at first a warm greeting. Zugwill met him at Einsie-
deln and Zurich, and showed him from the Scriptures his reasons for rejecting the errors of popery, and the cardinal expressed himself as very desirous of co-oper-
ing in the work of renovation. When Luther's life was in danger in Germany, the cardinal joined with those who offered him safety and refuge. On reading Luther's works, he exclaimed, "Disputect Ecius quantum velit, Lutherus veritatem scribit!" But temporal in-
terests held him fast to the old Church. He was even induced actually to oppose the new doctrines. His last few years were spent in Rome. He died soon after as-

Schism. See Hilecy.

Schism Bill, an act passed in the reign of queen Anne rendering Nonconformist teachers of schools liable to three months' imprisonment. It was also laid down as imperative upon every schoolmaster that he should receive the sacrament of the Church of England, take the oaths, and teach only the Church catechism. If he should not, he could be punished with a fine. He was also incapacitated for imprisonment. The queen, however, died on the very day that the act was to have received her signature, and consequently, though it had passed both houses, it fell to the ground.

Schism Overture, an overture which came before the Scottish General Assembly of 1766, and was produced by alarm at the rapid spread of secession. The overture affirms that a hundred and twenty meeting-
houses had been erected, and raised the question, What shall be done to remedy so great an evil? also, whether a committee might not be appointed to corre-
spend with presbytery and gentlemen of property and influence, and report? The overture was rejected by a vote of 19 to 85. The argument turned chiefly on the law of patronage.

Schisms. Various great schisms are found in the history of the Church. There was the great schism which divided the Eastern and Western churches. In the Western Church there were early schisms—(1) the schism of Hippolytus at Rome, A.D. 220–235 [see Ca
tiner, Hippolytus]; (2) the schism of Pelagians at Carthage, about A.D. 550, which was the first open oppo-
sition to the episcopal authority of Cyprian under the lead of Novatus [see Novatians]; (3) the schism of Norvatus, a presbyter at Rome, A.D. 251. There was also the schism of Melito's, The Popish Church was rent by a great schism in the 14th century. Seventy
years did the popes reside at Avignon, and after this one party chose Urban VI and another party Clement VII. France held by the last and England by the first, and for the next half century the rival popes claimed each to be the infallible head of the Church.

Schlatter, Michael, a Swiss missionary, was born at St. Gall, July 14, 1716. Educated at St. Gall, he became a clergyman, and in 1746 offered himself to the synods of North and South Holland as a missionary to the German Reformed emigrants in Pennsylvania. He was pastor of the Reformed churches of Philadelphia and Germantown from 1746 to 1751, and organized churches in Pennsylvania, New Jersey, Maryland, and Virginia. He effected the organization of the Synod of the German Reformed Church in America in Sept., 1747. He revisited Europe in 1751, and continued his labors for the church in the United States. In 1757 he acted as chaplain to an expedition to Nova Scotia against the French, and, espousing the cause of the colonists when the Revolution broke out, was imprisoned in 1777. He died near Philadelphia in October, 1790.

Schlegel, Johann Adolf, a German preacher and poet, was born at Meissen Sept. 18, 1721. His early studies were pursued at Pforta, and in 1741 he entered the University of Leipzig, where he became acquainted with Gellert, Rabeneck, Gaustner, and many other writers of talent. In 1744 he edited, in concert with several friends, Bremische Beiträge und Vernichse Schriften (1744 and 1757), which aided in purifying the German literary taste. In 1751 he was professor in the school at Pforta, but in 1754 left to teach theology at Zerbst. There his sermons gained for him a fine reputation for eloquence. He became pastor at Hanover in 1759, and in 1780 was promoted to the office of ecclesiastical superintendant. He died at Hanover Sept. 16, 1788. His poems have not been very highly esteemed, though some of his chants are yet sung in the Protestant churches of Germany. Besides these, he wrote, Stauung einiger Predigten (Leips. 1754-64): Predigten über die Leidensgeschichte Jesu Christi (ibid. 1774-75, 3 vols. 8vo). His two sons, August Wilhelm and Karl Wilhelm Friedrich (q. v.), acquired great celebrity. See Schlichtegroll, Nekrolog.

Schlegel, Karl Wilhelm Friedrich von, a German author, was born in Hanover, March 10, 1772. He studied at Göttingen and Leipsic. In 1808 he, together with his wife, embraced the Roman Catholic religion, and went to Vienna, where he was appointed imperial secretary at the headquarters of the archduke Charles. He accompanied the duke to the banks of the Rhine and was enthusiastic in his patriotic proclamations against Napoleon. He was afterwards secretary of the Austrian embassy till 1818. The rest of his life he spent in lecturing in Vienna and Dresden. He was especially remarkable as a critic and thinker of great originality; and his principal works are, Griechen und Römer (1797): Geschichte der Poesie der Griechen und Römer (1798): Über die Sprache und Weisheit der Indianer (1808): Vorlesungen über die neue Geschichte (1811): Philosophie des Lebens (1829): Philosophie der Geschichte (1829, 2 vols.): and Philosophie der Sprache (1830).

Schielemacher, Friedrich Daniel Ernst, was a theologian of the Reformed Church of Germany, who, standing on the borderland between the decline of rationalism and the birth of the new evangelical school of Germany, exerted an influence for good in all the higher fields of thought which has rarely been equalled by any mind in any age ("the greatest divine of the 19th century," says F. Schaff, Creeds, i, 451). He was born in Breslau, Nov. 15, 1779. His father was a humble army chaplain of Calvinistic faith, upright life, and rather cold and harsh temper. His mother (née Stubenrauch), a pastor's daughter, was sprightly, prudent, and pious. Young Schleiermacher's health was delicate. His education up to his fifteenth year was derived chiefly from his parents. In 1788 he was sent to the school of the Moravian Brethren at Niesky. Here he made rapid strides in knowledge; but he also began to be troubled with doubts. At about the age of fifteen he entered the higher school of the same brethren at Barby. Here he was brought face to face with a body of doctrine which, not being able to command his full assent, had the effect of forcing him to begin the construction of a system of his own. His first chief doubt related to the substitutional theories of atonement and the eternity of future punishment. The attempts of his teachers to remove these doubts had no other effect than to adden him, and to convince him that his religious life would have to be nurtured outside of Moravian circles. He was frank enough to open his heart and explain his doubts to his dry, traditional father. The father rudely answered him, "O foolish son, who has bewitched thee that thou obeyest not the truth and crucifiest the Saviour afresh?" Subsequent correspondence, however, brought the father into a more Christian frame of mind, and finally led each to esteem and respect the other in a far higher degree than before. With great difficulty having obtained his father's consent, he entered the University of Halle in the spring of 1787. While thus breaking his outward connection with the Moravians, he yet bore away with him from them a spirit of tender, subjective religiousness which he afterwards likened to a heavenly light which had been printed or spoken. In Halle he lived with an uncle, and studied and heard lectures just as he pleased. He was not very methodical. He heard the aged rationalist Semler, devoured the works of Wolf, Kant, and Jacobi, became familiar with modern languages, and pursued mathematics. At this time he wrote: "I am not sure that I can construct the whole field of knowledge into such a system that I can readily assign to every question its place and its solution; but I am sure that the nearest approach to it will be made by a candid hearing of the reasons on both sides, and by not settling upon anything with positiveness until this has previously been done." These words of the youth truly express the spirit that led him throughout life. While not in every case attaining to definitive results, he yet incessantly worked towards that goal; and his one life-aim was to ascertain as nearly as practicable the limits of attainable human knowledge. Leaving Halle in 1790, Schleiermacher's first theological work was published in Berlin, and, on the recommendation of F. S. G. Sack, became private instructor in the pious family of the count Dohna-Schlotten in East Prussia. Differing, ultimately, with the count on certain pedagogic principles, he returned to Berlin and taught, for a while, an orphan school (1794-97) as well as a course in moral philosophy. He became a professor at the University of Königsberg, in the chair of the history of philosophy and of the history of the church, in 1798; and in 1803 he became a professor at the University of Leipzig. He was invited to Italy, but the offer was not accepted. In 1804 he was appointed professor of ecclesiastical history at the University of Berlin, and, on the recommendation of F. S. G. Sack, became private instructor in the pious family of the count Dohna-Schlotten. In 1794 he was appointed professor of ecclesiastical history at the University of Berlin, and, on the recommendation of F. S. G. Sack, became private instructor in the pious family of the count Dohna-Schlotten. In 1804 he was appointed professor of ecclesiastical history at the University of Berlin, and, on the recommendation of F. S. G. Sack, became private instructor in the pious family of the count Dohna-Schlotten. In 1804 he was appointed professor of ecclesiastical history at the University of Berlin, and, on the recommendation of F. S. G. Sack, became private instructor in the pious family of the count Dohna-Schlotten. In 1804 he was appointed professor of ecclesiastical history at the University of Berlin, and, on the recommendation of F. S. G. Sack, became private instructor in the pious family of the count Dohna-Schlotten. In 1804 he was appointed professor of ecclesiastical history at the University of Berlin, and, on the recommendation of F. S. G. Sack, became private instructor in the pious family of the count Dohna-Schlotten.
with the steady maturing of his intellectual and theological powers. It was, perhaps, the richest development period (from his twenty-eighth to his thirty-second year) in his life. Hence it is to be explained that with so little previous literary experience (he had only helped Sack translate Blair's *Sermon*, and himself translated Fawcett's *Sermons*, and contributed a few essays to periodicals) he was able at once to electrify the new theological world as *Reden* (discourses on religion [1793]) and his *Monologen* (1800). Leaving behind him these earnest protests against the alienating spirit of irreligion, he now repaired (1802) to the post of court preacher at Stolpe, in East Pomerania. Here he passed two laborious years, and wrought upon his *Reden*, the *Psalmen*, of Platon. The first strictly philosophical work, *Kritik aller bisherigen Sittenlehren* (1803). In 1804 he was transferred to Halle and made professor extraordinary of theology. It was a trying change; his own system of theology was not yet matured in his mind; and nothing but the great practical wisdom and originality of a Schleiermacher would have succeeded under the circumstances. He began at once to lecture in a very original manner on New-Test, exegesis, dogmatics, and ethics. He also preached frequently, re-establishing the academic worship which had fallen into neglect. He was soon made professor in ordinary. Although he attracted general attention, yet he was not congenial to the members of the theological faculty. Only Niemeyer and Vater drew near to him; Knapp and Nissel did not appreciate him. His lectures and sermons made strange and contradictory impressions. Was he an arheist, a Spinozist, or a super-orthodox pietist? Some thought the one; some the other. At this period he produced his *Wechselschriften* (1806) and his commentary on *Timothy* (1807). The ravages of the French invasion interrupting now his labors at Halle, he returned to Berlin (autumn of 1807) and became pastor of Trinity Church (Dreifaltigkeitskirche). In 1808 he married the widow of his young friend, Von Willrich. In 1810 he was made professor in ordinary of the new University of Berlin and a member of two scientific associations. Here the most influential half of his life begins. He was of the small circle of great men who called the new university into being and gave it to fame. Here he passed from a rhapsodical to a dogmatic theological manner of religion, and became the exponent of the Word of God. It is not a revolution, however, but only a growth. Besides his scholastic labors, Schleiermacher took a lively part in the troubled politics of his country. In the darkest hours of Napoleon's oppression, he was unwearying in pupil labors, counselling patience and inspiring with hope. He gave also much thought to the Church agitation which afterwards culminated in the "Union" of the Lutherans and the Reformed. The most important production of his first ten years in Berlin was his *Glaubenslehre*. From 1818 to 1822 he labored with De Wette and Lücke in editing the *Theologische Zeitschrift*, which, ignoring the vulgar difference between rationalism and supernaturalism, represented a more general and a higher form of religious and philosophical science. Though not one of the founders of the *Studien und Kritiken* (1829), yet his contributions to its earlier numbers helped to give it its high character. But it was to his actual work of teaching that the strength of his life was given. He lectured from six to eleven days, first on Saturdays. His intercourse with the other members of the university—with Fichte, Savigny, and Hegel, with Buttmann, Böckh, and Lachmann, with De Wette, Marheineke, and Neander—was deeply beneficial on both sides. The subjects which he taught were: hermeneutics, dialectics, psychology, and philosophy, besides other incidental subjects. To his sermons he gave but a few moments on Saturdays, rarely throwing upon paper more than a few outlines. The majority of his published sermons arose from notes taken down by his auditors and then revised by himself. In society Schleiermacher took great delight, though not always himself the greatest talker, but not wanting, nor weary, but recreating him. To the students he was by far not so familiarly as Neander, but the time he gave to them left indelible impressions. In his domestic life he was peculiarly happy. Only the death of his sole son (1829) cast a shadow into his life from which he never recovered. He continued to strengthen his family, and to live in his offices and was busy with his pen to the very last. His oft-expressed wish that he might die in the full possession of his consciousness was graciously granted to him. Early in February, 1834, he was attacked with inflammation of the lungs, which closed his life on the 12th. of February, 1834. His death was a national sorrow. His name lives on as a Founder of the New Church, a friendly follower of Christ. His very last act and words were the administering of the eucharist to himself and his friends. From these outlines of Schleiermacher's outward life we pass to a brief notice of his chief literary and theological productions, following in the main the article (forty-four pages) by Gass in Herzog's *Real-Encyclop.*. He stood, as we have said, between the death and the birth of two ages. Combining the tendencies of the two—the rationalistic and the evangelical—in his own person, he helped to bury the one and to inaugurate the other. Yet he himself belonged to neither. He gave the death-blow to rationalism, cast away the rubbish of the foundations of the new evangelical edifice; but he did not fully build it. His intellectual history is the history of the Christian consciousness of his epoch. It is a growth. It has a dawning, a crystallizing period, and a philosophic maturity. It can be traced distinctly in the thirty-one volumes of his collective works as edited by his friend Jonas and others, from 1804 to 1864. His career was opened by his *Reden*, addresses to cultivated unbelievers (1800). This work made an epoch in the German nation. It called the cultivated circles away from their pride in a high-sounding philosophy and from their contempt of what they called religion. There is no incongruity, said the young prophet, between culture and religion. The culture that despises religion is but shallow presumption; the religion that despises culture is but a caricature. The foundations of religion are as deep as intuition and as broad as humanity. Each individual of the race is a vital member of both the universal church and the church itself. In every life there come moments when this dependence on the universe is thrust upon the consciousness and made the very life of the soul. Such moments are as a conception, a birth, of the Eternal and Absolute within the limits of the finite and dependent. Religion is art, taste, a consciousness of the All. In becoming conscious of the Infinite we have the sentiment of our immortality. Religion is not mere dogmas and systems. It is the deepest and truest life of humanity itself. Men may sneer at religion, but they cannot get away from religion. Smorser turn from dry dogmatics to living nature. But what do they return to? Culture? Not at all. Culture is not the bare superstructure of thought, but rather nature's orderly march, its adaptation of means to ends. But this is, after all, the very essence of religion; it is a sympathy with the eternal basis of all being. Religion is thus universal. We can escape it only by putting out our reason. It is not from wholeness, but only from partialness, that the culture separates. The first three of the discourses treat, thus, of the nature of religion in general. The last two give a survey of religion in its historical reality. As the essence of religion is communion of feeling with the Absolute, the One, so its tendency is to organize man into communities and to express itself in a universal consciousness of the infinite varieties of manifestation in nature, so the apprehension of the Infinite in the soul of man takes place under endless varieties. Hence the multiplicity of historical religions. But there are here points of greater
and of less approximation. Ancient Israel stood exceptionally close to the Infinite. In Jesus, Nazareth, the One who identified himself with the infinite manifestation. Such is the general drift of these celebrated Reden. They were accused of a tendency to pantheism, though Schleiermacher resented the imputation. They were certainly not positively Christian. But they tended toward Christianity, and they unquestionably produced an intellectual effect on the specific audience which they addressed than if they had been of more confessionally orthodox form. This effect was sudden and immense. In his preface to the third edition (1821) Schleiermacher had occasion playfully to remark that there was then really a greater call for discourses to the over-heathenized than the converted and intellectual science in cultivators than to unbelievers. The Monologe, with which Schleiermacher greeted the dawn of the 19th century, stand, as an ethical work, by the side of the religious tendency of the Reden. They are a self-scrutinizing and self-exhorting journey through the religious consciousness. Man should not be simply one of the monotonous members of the universe; but he should, by self-concentration and self-virtualization, develop himself into a rich and relatively independent individual. Means to this are reflection, meditation, retirement from too great absorption in dissipation, business, and external routine—in other words, the due consecration of life lived with the devotional element. As in the Reden an influence of Spinoza has been noticed, so in the Monologen some have found a trace of Fichte. These two works present their author in the first stadium of his development. The Christmas Celebration (Weihnachtsfeier [1808]) is a transition step towards positive theology. It is a charming dialogue, in the fashion of Plato, on the significance of the birth of Christ. The three speakers defend, each his peculiar view. Neither of them represents the author's exclusive views, but rather all of them in turn.

When we pass to Schleiermacher's critical treatment of the Bible, we meet with his least satisfactory works. And yet there was combined with his rather negative tendency very much which has enriched the results of exegetics. Ignoring the dogma of inspiration, he laid free hand upon the sacred book, just as upon the dialogues of Plato, or any other ancient documents. But he did not doubt the substantial genuineness of the Bible, but he was capable of drawing the line between the essential and the non-essential. His posthumously edited lectures on introduction to the New-Test. hermeneutics and criticism have not fully answered all expectations.

In his outline of theology (Kurze Darstellung des theologischen Studiums), which appeared first in 1810, and then, enriched with notes in 1830, Schleiermacher assumes very positive dogmatic ground. He bases himself upon the objective fact of the Protestant Christian consciousness. Theology is a positive science, the elements of which are evolved from the Christian consciousness and from the exigencies of Church government. It is not a branch of philosophical science, but a general. With philosophy it must neither interfere nor be dominated by its truth. Its ascertainment by historical criticism and by the comparative study of other religions. This forms the philosophical part. Its product is the historical, and out of the philosophical and historical results reasoneth the practical part. This little work is of great originality, and its influence has been widespread. Its classification, however, has not been extensively followed.

The richest product of Schleiermacher's life is his dogmatics (Der christliche Glaube nach den Grundsatzen der evangelischen Kirche), which was first published in 1821 and then revised and published in a second edition, in 1831. It is a monument of genius, and has been called the greatest theological product of the 19th century. Dogmatics here presented, not as a speculative science, but as the systematized contents of the Protestant Christian consciousness. The essence of this consciousness is not to know, but to feel, and a feeling differing from all the feeling of a direct consciousness of the absolute. More specifically, it is a feeling of absolute dependence. This feeling is for the first time clearly realized in Christian monotheism. The principal defect of this definition is that it makes no adequate room for creatural freedom. A second result is given of the practical and moral consciousness. Thus, qualitatively it is a transition from the moral condition of unhappiness into that of happiness; historically, it is an effect of the life of Christ. The two elements must stand in perfect union. This union gives the limits within which the healthy Christian life must be limited and kept within the shoes of all error and heresy. Redemption is infringed upon by any view of human ability which overlooks the absolute necessity of redemption. Christ is infringed upon by any view which makes him either too near to or too remote from the ordinary conditions of human life. Accordingly, we find, in fact, two opposite theological and two anthropological heresies—the Ebionite and the Docetic, the Pelagian and the Manichean. From this starting-point, and within these limits, the dogmatic theologian has free movement. It is his privilege to seize the historical results of the past, to shape them into self-consistency, and to impress upon them in turn the historical character of the present. Thus the body of Christian doctrines is at no point definitively complete, but is in constant process of maturing. The dogmatics of Schleiermacher made an epoch in theology. It superseded old modes of defending Christianity, and inaugurated new and better ones. It did not begin with dry proofs of the existence of God; it found God already given in the Christian consciousness. It did not make Christ simply a part of the Christian system; it made him its beginning, its middle, and its end. In the distribution of the subject-matter of his work, Schleiermacher studies (1) man as conscious of God prior to the experience of the antithesis of sin and grace; (2) the subject of sin, and (3) the subject of grace. Each of these divisions is subdivided in a threefold manner, describing respectively the condition of man, the attributes of God, and the constitution of the world, as related to the Christian consciousness. Thus Schleiermacher's method departs from all previous methods. While the schoolmen begin with God and his attributes, and then pass to man; while the reformers usually begin with the rule of faith, the Bible, and then, passing to the Deity, proceed in the scholastic manner, Schleiermacher, on the contrary, begins and ends with the human consciousness and its consciousness.

The development of this scheme showed clearly that the old form of rationalism was shallow and worthless. It emancipated religion from its entanglement with philosophical systems and placed it in the realm of feeling. It showed that spiritual insight—an awakened heart—is just as necessary to the appreciation of Christian theology as aesthetic insight is to the enjoyment of art. But with these healthful principles Schleiermacher associated consequences which were of damaging tendency. As he made the human intuitions the criterion of absolute appeal in art and morals, so he made the collective Christian consciousness the ultimate test of religious truth.

The value of the apologetic arguments of the religious consciousness generally rises, therefore, not from its being an absolute objective standard, but from its being the clearest existing expression of the Christian consciousness in the earliest and purest age. The Church existed before the New Testament. The New Testament appeals to the religious consciousness of the age in which it was produced, but the inspiration is not mere genius: it is the outgoing of the religious consciousness; it is but a higher degree of what is common to the pious intuitions of saintly men in all ages. The Bible is a record of religious truth, not its
formal organ. It is a reflection of the Christian consciousness of the apostolic age, but not a mechanical criterion for all ages. By such views as these Schleiermacher made himself absolutely dependent upon the utterances of the religious consciousness. Hence he is unable to adequately appreciate such points of doctrine as are not clearly given in this consciousness and is more ready than as guilt before God; redemption rather as sanctification than as justification; Christ's death as a simple incident in his life of self-sacrifice; atonement as the setting-forth of the union of God with man; the mode of attaining to salvation as a spiritual realization of this union through the embracing of the simple faith (vgl. Erk., p. 326, 327, 324; 247). The Holy Ghost is presented as simply the collective Spirit of the Church, as resulting from the union of human nature with the divine. With the exception of the doctrines of immortality, eternal life, and retribution, all the other opinions in regard to man's future are questions of mere hope and speculation. The doctrine of the Trinity is not a direct utterance of the religious consciousness, nor was it a separate article of the early Christian faith; hence it does not really possess the character of an independent dogma, which the Church afterwards gave to it. The Trinity is, in fact, not a designation of Deity, but rather the revelation of Deity. Schleiermacher's idea is the same as that of Hume, a belief in an unknown God. The scholastic idea of a tripersonal God is, in his view, an undogmatic philosophy, while the simpler old Protestant conception is a logical self-contradiction (see Theol. Zeitschrift, pt. iii [transl. in Bible Repos. Andover, vol. vi]). The reception which the public gave to Schleiermacher's dogmatics was very varying. Rationalism was displeased: the first volume was too speculative, the second too pietistic. Wegscheider regarded it as a pious representation of essential orthodoxy. The orthodox party warmly welcomed it, though without full approval. Brannis and Delbrück criticized it sharply. The latter declared it inconsistent with the foundations of Protestantism. But it speedily recovered from these shocks; and within a few years it numbered among its disciples such men as Twesten, Lütcke, Nitzsch, Ullmann, Baumgarten-Crusius, Schwarz, and Gass. These men studied it, elucidated it, wrote upon it. It came to honor in nearly all the German universities. In some of them it was made the basis of special courses of lectures. But it speedily became evident that the body of disciples might be divided into three chief groups. Some held more to the negative, critical elements; others to the evangelically positive; others to the middle course of the master. Among the more positively evangelically minded were Twesten, Lütcke, Nitzsch, Julius Müller, Hagenbach, Tholuck, Sack, Bleek, Usteri, Olaus, Hansen, Dornen, Erkbaum, Martensen, Liebner, Lange, Ebelard, Auéerlen, Roth, Schöberlein, Palmer, and a host of others.

In the field of ethics the influence of Schleiermacher was only less than in that of dogmatics; but he was not privileged to bring his thoughts to satisfactory completion and consistency. He began with a revolutionary and unhistorical criticism of previous systems in his Kritik aller bisherigen Sittenlehren in 1803. His personal views he began to elaborate in a series of essays in 1819. The substance of his lectures on ethics was edited by Schweitzer (Entwurf einer Sittenlehre, 1833), and also more briefly by Twesten (Grundriss der philosophischen Ethik) in 1841. His positively Christian ethics (Die christliche Sittc) was edited by Jonas in 1843. From these varied presentations it is difficult, if not impossible, to derive a single consistent view. The classification of his thought is very difficult. Schleiermacher himself is not consistently united in his utterances. The fruitfulness of Schleiermacher in this field was rather in furnishing impulses to other authors than as the creator of a finished system.

Next in importance stand his works on pedagogics (Erziehungskunde), edited by C. Plat in 1849, and his Practical Theology (Praktische Theologie), edited by Fricr. Of less worth are his lectures on Church history (Kirchengeschichte), edited by Bonnel in 1840. For the light thrown upon his inner religious life, none of Schleiemacher's writings are more interesting than his sermons. There are thus far published ten volumes. Of these four were revised by the author, and six have been prepared by Dr. Sydow. These sermons are from every period of his life, and of every class. The larger number, however, are not textual or exegetical, but synthetic, the regular development of a theme. In contents they stand midway between the instructive and the hortatory. The great preacher who placed himself for the first time by faith in Christ, while enriching their conception of Christianity, endeavored to inspire them to a fuller realization of it in their lives. The uniform central point of his utterance was Christ, the Redeemer. Dr. Schaff (see Creeds of Christendom, i, 880) ascribes this intense love of Christ in Schleiermacher to his early Moravian education. He says, "It is a remarkable fact that the great German theologian Schleiermacher was cradled in the Moravian community, and conceived there his love for Christ through personal and universal devotion to Christ, which guided him through the labyrinth of speculation and scepticism, and triumphed on his death-bed. He shook almost every one of the dogmatics of his time, and it was necessary to sacrifice all if he could only retain a perfect and sinless Saviour." He is inexhaustible in the variety and novelty of ways in which he impresses us with this vital point. This singleness of aim, however, does not imply monotonous; but is consistent with very wide variety of matter. There is scarcely a single point in the circle of Christian doctrine which is not the theme of some of these sermons; hence they are often read from a merely didactic point of view. They will long be esteemed among the richest fruits of the German pulpits.

Among the latest volumes edited from Schleiermacher's remains are his lectures on psychology (Psychologie), by George (1865) and his Life of Jesus (Leben Jesu), by Rutenik (1864). His correspondence with J. C. Gass was edited by W. Gass in 1852, and that with other friends appeared under the title Aus Schleiermacher's Leben (1858-62, 4 vols.). A brief autobiography, reaching only to 1794, was issued in Niedner's Zeitschrift in 1869.

For sources for Schleiermacher's life (besides his own writings and letters), see G. Bauer, Karakteristik, in Stud. u. Krit. 1859; Auéren, Ein Karakterbild (Basle, 1860); Kossa, Jugendleben (Elberfeld, 1861); K. Schwarz (Gottha, 1861); E. Maier (1863); Baxmann (Bonn, 1864); and W. Gass (1859-65). The critical studies and tracts, see Brannis, Uber Schleiermacher's Glaubenslehre (Berlin, 1872); F. Delbrück, Erörterungen (Bonn, 1872); C. Baur, Prima Rationalismus et Supranaturalismus Historia Capita Potiora (1827); Baumgarten-Crusius, Schleiermacher's Denkurt u. Vertraut (1884); Lütke, Erörterungen, in Stud. u. Krit. 1854; E. Ueber Schleiermacher's Glaubenslehre (Leips. 1855); Rosenkranz, Kritik (1886); Baur, Die christliche Gnosis (Tübingen, 1835); Weissenborn, Darstellung u. Kritik der Glaubenslehre (1849); Schaller, Vorlesungen über Schleiermacher (Halle, 1844). On his ethics, see Twesten's preface to his edition of Schleiermacher's Phil. Ethik; Vorländer, Schleiermacher's Sittenlehre (1851); Hebraeus in Stud. u. Krit. 1848; Reuter, in Stud. u. Krit. 1844. On his sermons, see Stud. u. Krit. 1831, 1848. See also Schmitter, Religionsbegriff (Leips. 1848); P. Schmidt, Spinoza u. Schleiermacher (Berlin, 1888); also Oppenhein, by Carl Beck (Rutlingen, 1869); F. Zachler (Breslau, 1869); and other similar works. For letters, see Schleiermacher in Hobsach (Berlin, 1868); also article in Christ. Exam. vol. iii; Westm. Rev. July, 1861; Meth. Quar. Rev. L.)
The object of the league—the guarantee of the liberty of religion to the Protestants—was subsequently effected by Maurice, now elector of Saxony, who, by a brilliant feat of diplomacy and generalship, compelled the emperor to grant the treaty of Passau (July 31, 1539), by which this freedom was secured.

**Schmaltz, Moritz Ferdinand, doctor of theology, born in 1785 at Stolpen, near Dresden, was first pastor in Wehlen. In 1816 he was called as evangelical minister and member of consistory to Vinsia, where he remained till 1819, when he was called to the pastorate in Neustadt, Dresden, which position he occupied until 1833, when he became pastor at St. Jacobi in Hamburg, where he died, Feb. 15, 1860. Schmaltz published a great many sermons, which make a library in themselves. See Zuchold, Bibl. Theol., ii, 1149 sq.; Winer, Handbuch der theol. Literatur, i, 75; Hagenbach, Hist. of Doctrines, ii, 210, 212. (B. P.)**

**Schmalzbrucker, Franz, a Jesuit, was born in 1685 at Griesbach. He first lectured on logic and moral theology at Ingolstadt, then on canon-law, and died in 1735. He wrote Index Ecclesiasticus (Ingol. 1712);—Judiciwm Ecclesiasticum (ibid. 1712);—Clerus Schola- ravus Et Regularis (ibid. 1714. 2 vols.);—Sponsalia Matrimoniwm (ibid. 1716);—Crimen Foe Ecclesiasticz (ibid. 1718, 2 vols.);—Ius Ecclesiasticum Universalum (ibid. 1719, 6 vols.; Rome, 1839, 45, 12 vols.);—Conseil e sau Responsa Judicature (ibid. 1722, 2 vols.). See Engelburger Real-Encyklop. u. v. (B. P.)**

**Schneidler, Johann C. Hermann, a Protestant divine, was born at Breslau, Aug. 28, 1807, where he also died Aug. 16, 1867, after having occupied some of the most important positions in his native city. He wrote: Der Untergang des Reiches Judaeum (Breslau);—Urkundliche Beiträge zur Geschichte der Haupt- und St. Maria St. Pauli in Breslau vor der Reformation (ibid. 1838);—Urkundliche Geschichte der evang. Haupt- und Pfarrkirche zu St. Barbarus in Breslau, etc. (ibid. 1853). See Zuchold, Bibl. Theol., ii, 1152; Winer, Handb. der theol. Literatur, i, 75. (B. P.)**

**Schmidt, Christian Friedrich, a professor of theology at Tübingen, was born at Biebelauge, 1794. He was ordained and Tübingen was the place of his lecture at the latter place in 1819. In 1820 he became professor in ordinarv, and labored as such till his death, in 1852. Not prolific as an author, he has yet exerted a very great and evangelical influence on the clergy of Württemberg. A supernaturalist from the start, he worked fruitfully by the side of the more negative Baur, defending vigorously the fundamentals of Christianity, and utilizing the better results of modern Christian speculation. Men like Dorner and Oehler have given public expression to their indebtedness to Schmidt. His labors embraced practical, exegetical, and moral theology. His lectures were models of systematic Christian thought. He was, however, simply a scientific theologian, but his influence was also deeply and positively Christian. His Biblische Theologische des neuen Test. appeared in 1854 (4th ed. by Dr. A. Heller, Gotha, 1868); it has enjoyed a wide popularity. His Christliche Moral, by the same editor, was published in 1861. See Erinnerung an C. F. Schmidt, by Palmer and others (Tübingen, 1852);—Stud. u. Krit. 1866; Wattle, Christian Ethics, i, 974; Hauck, Jahrbiicher, 1869; Herzog, Real-Encyklopaedia, xiii, 604-606. (J. P. L.)**

**Schmidt, Conrad, a coadjutor of Zwingli in the reformation of Switzerland, born in 1476; died (with Zwingli, on the battle-field of Cappel) October, 1531. After studying at Basle, he entered a monastery at Kussnacht, and in 1518 became its coadjutor. This same year Zwingli became preacher to Zurich, and with him Schmidt entered at once into close intimacy. In 1522 he threw aside Latin and preached at Zurich a
stirring sermon in "good German," in which he opposed the excessive claims of the pope and the abuses of image-worship. In a religious conference at Zurich, October, 1523, he acted as mediator between the violent iconoclasts and the conservatives. "Let the weak have the images," he said, "as a sort of light to lead upon until they have taken hold upon Christ; when they once have done this, they will let go the staff as being no longer needful." Also he blamed the coarse manner in which some spoke of the mass, as if it were a mere invention of the devil. At the close of his discourse on this occasion, he recommended to the civil authorities great moderation, and urged them to provide a thorough religious education of the masses. When Zwingli attended the conference with Luther at Marburg (Oct. 1529), Schmid filled his place as preacher in the cathedral of Zurich. He was an able and holy priest of God. See Pallinger, Reformationsgeschichte; Herzog, Real-Encyclop. a. v. (J. P.)

Schmid, Sebastian, D.D., a native of Alstät, was born Jan. 6, 1617, at Lampertheim, and died Jan. 9, 1696, at Strasbourg, where he was professor of theology and canonics. He was a voluminous writer. His principal Biblical works were his translation of the Bible: Biblia Sacra V. T.e N. ec Linguis Originalis, in Ling. Lat. translat. cum Notis et Annotationibus, 1678; New Testament, 1679; and by his commentary: On Genesis (Strassb. 1697).—Judges (ibid. 1684, 1691, 1706).—Ruth (ibid. 1696).—Kings (ibid. 1687).—Job (ibid. 1670, and often).—Colosseth (ibid. 1704).—Isaiah (Hamb. 1702).—Jeremiah (Strassb. 1685, 1687, 1706).—Minor Prophets (Leips. 1685, 1687, 1706).—Hosea (Frankf. 1687).—Romans, Galatians, and Ephesians, etc. (Hamb. 1704).—Ephesians (Strassb. 1684, 1699).—Hebrews (ibid. 1689).—Leips. 1693, 1727.1—John (Frankf. and Leips. 1687, 1707, 1726). Some of these were posthumous publications; they are all much valued for sound and learned exegesis.

Schmidt, Erasmus, a German scholar, was born in Detlitzsch, April 27, 1560. He became professor of Greek and mathematics at Wittenberg, and died in that city Sept. 22, 1637. His chief work is Concordantiae Norv. Text. (Vitemb. 1688, fol.). It was republished in Glasgow (2 vols. 8vo) and in London (1830, 48mo). He also published a highly improved edition of Beza's version of the New Test.

Schmidt, Johann Eusebius, a Lutheran minister, was born in 1689 at Hohenfels, in Thuringia. A friend and pupil of A. H. Franke, he lived from 1697 as pastor in Siebenlehn, near Gotha, until his death, in 1745. Schmidt was a fine hymn-writer, and some of his hymns belong to the best of German hymnology, as Ex ist vollbracht, so ruft am Kreuz (transl. into Eng. by Mills in his Hymn Germanicus, No. 161, "Tis finished! thus in tortures dying")—Fahre fort, fahre fort (Engl. transl. in Monthly Rel. Mag. 1666, xxxvi, 363, "Onward go, onward go"). See Koch, Geschichte des deutschen Kirchenleides, iv. 402 sq. vili. 141; Knapp, Evangel. Lieder schats; p. 1543. (B. F.)

Schmolck, Benjamin, a gifted German hymnologist, was born in Liegnitz, 1672. He studied theology at Leipsic, 1697, became assistant pastor to his father at Liegnitz in 1701, but the next year accepted a call to Schweinfurt as dean. Here he spent the rest of his life as a laborious pastor, exerting himself manfully to counteract the intrigues of the Jesuits and to preserve his people in their evangelical faith. In 1706 he was made archdeacon of a deanery, and in 1711 pastor of St. Michaelius. After a pastorate of thirty-five years, he entered into rest, 1737. By his hymns and songs, which appeared in various editions from 1704 and on, he has obtained an honorable place among the poets of his Church and nation. Their general tone is that of gentleness and simplicity; love to Christ. A love of the gifts of God; however, betray marks of carelessness in rhetoric and of lack of polish. A complete edition of his poems appeared at Tubingen in 1740. A selection was published by L. Grote at Leipzig in 1869. For his life, see this work of Grote and Herzog, Real-Encyklop. xxiii, 608, 609. (J. P. L.)

Schmucker, Peter, a minister of the Methodist Episcopal Church, was born in Michelstadt, grand duchy of Hesse-Darmstadt, Aug. 24, 1784. His parents were farmers, who lived in one of the most ancient, and settled in Virginia. He was converted in his eighteenth year, and entered the ministry of the Lutheran Church in 1814. We cannot specify the congregation he served, but his name is found in 1817 in the printed list of the members of the Evangelical Lutheran Synod of Virginia; and in 1831 he was one of the delegates who met at Hagerstown, Md., to form the General Synod of the Evangelical Lutheran Church of the United States. Still later we find him recorded as a member of the Evangelical Lutheran Synod of Western Pennsylvania. In 1832 he joined the Methodist Church, and in 1898 entered the Ohio Conference to take charge of the German Mission in Cincinnati. In 1840 he was appointed to Louisville, Ky., and in 1842 sent to New Orleans to begin work among the Germans there. He continued to labor in different parts of the United States until 1848, when ill-health disabled him. From this time he suffered greatly, until relieved by death, Dec. 9, 1860. See Minutes of Annual Conference, 1861, p. 165.

Schneckenburger, Matthias, an eminent mod. theologian, born Jan. 17, 1704; died June 13, 1848. He studied Latin at Tuttlingen, Wurtemberg. In 1792 he began the study of theology at Utrecht. In 1824 he entered upon more thorough studies at Tubingen. Here his teachers were Steudel, Schmidt, Baur, Haug, and others. Philosophical theology was his favorite study; and the book which delighted him most was Schleiermacher's Glaubenslehre. He reached his master's degree in the twentieth year, and was placed in a group of thirty-eight competitors. In 1826 he went to Berlin to continue his studies under Schleiermacher, Neander, Marheinecke, and Hegel. With Neander and Marheinecke he formed very close relations, as also with other eminent literary men, e. g. Chamisso and Gana. In 1827 he returned to Wurtemberg and began to lecture at Tubingen. Among his pupils were Strauss, Vischer, and Marcker. In 1831 he entered into the ministry as preacher at Herrenberg. Although a gifted speaker, he soon felt that not the pulpit, but the professor's chair was his place. In 1834 he accordingly entered the newly founded theological faculty at Berne. By his side stood Hundshagen, Lutz, and others. His field here was Church history, dogmatics, and exegesis; but it was especially in dogmatics that his greatest interest lay. Here his position was that of healthy union of practice and theory which was so characteristic of Zwingli. When theStrauss commotion broke out in Germany (1839), Schneckenburger composed a whole series of questions which it called forth, and began a course of lectures on the influence of philosophy upon theology and on the collisions between modern speculation and Christianity. His position was that of a positive thesis and an opponent of Hegel. Very fruitful among his labors in this field were his studies on the major works of the modern dogmatics. His general tendency was unioinistic. He did not confine himself to academic labors, but took also
an active part in the Church affairs of the canton of Bern. He was a character Schnellenburger was as simple and unassuming as a child. His great defect was a deficiency of self-assertion. In his wedded life he was very unfortunate. His relation to his childless wife was very similar to that of Salmasius to his dominieering "Juno." Seeking relief from his domestic unhappiness in a still greater forlornness, he retired to his hermitage and closed down the world. He died at the early age of forty-four. It was characteristic of his wife that his valuable papers were for a number of years kept under lock and key. It was only after she had fled from justice to America that they came into the hands of his colleague, Buhle, and Buhle, and Buhle, and Buhle... (Continued)

SCHNEIDER, Johann Jacob, was born Feb. 8, 1797, at Basle, where he also pursued his theological studies. In 1829 he was called to Grenzach, in Baisen, and since that time he has supplied the pulpit in different places until, in 1839, he was called to Bethberg, where he intended to remain. Bodily infirmities came over him and ended his life March 24, 1859. Besides a number of hymns which he composed, he published Die christlichen Sänger des 19. Jahrhunderts (Basle, 1847). See Zum Andenken an J. Schneider, Handschriftliche Berichte (Basle, 1859); Koch, Geschichte des deutschen Kirchenleides, viii, 367 sq.; Knapp, Evangel. Liederschatz, p. 1844; Zuchold, Bibliotheca Theol., ii, 1167. (B. P.)

SCHNEPF, Erhard, an assistant in the Lutheran Reformation, born of a noble family at Heilbronn, November, 1498. He studied first at Erfurt, then at Heidelberg. As soon as Luther appeared, Schnepf welcomed him and preached his doctrines. He was called to Pfalzthen (1528) to Wimpfen, where he married. In 1555 he was called by Philip II of Nassau to introduce the reformation at Weilburg. Here his familiarity with Scripture enabled him to triumph in a discussion over Dr. Tervich, of Treves. In 1558 Philip made him a professor at the university of Marburg, where he exerted a reformatory influence into Westphalia. He accompanied his patron to the diet of Spire in 1529, and to Augsburg in 1530. In 1534, at the request of Duke Ulrich of Württemberg, he united with Blauer in the reformation of this country. His seat of operation was Stuttgart, while that of Blauer was Tübingen. In 1544 he accepted a professorship in Tübingen, and represented the more rigid views of Luther in a Zwinglian community. Schnepf refused to accept the interim, and in 1548 gave up his position and fled to Heilbronn. At the suggestion of Johann Friedrich of Weimar, he became professor of Hebrew at Jena, and soon had more than sixty students. He here became, alongside of AsmPDF red and Strigel, one of the most eminent theologians in that region. Up to 1555 he had lived in peace with the syncretistic Melanchthonians at Wittenberg; but now he became involved in the rigid Lutheran party of Pliius, and he assumed a more positive position only when the duke of Saxony, Friedrich, came into the state. In the midst of labors abundant, he died at Jena, November, 1558. See Jo. Rose, De Vita Schneppi (Leips., 1562); Huy, Blauer, and Schnepf, in the Tüb. Zeitschrift, 1858; Herzog, Real-Enzyklop., xii, 618-620; Hagenbach, Hist. of Dogmatics, ii, 314. (J. P. L.)

SCHNURER, Christian Friedrich, an eminent Orientalist, professor and preacher at Tübingen, was born at Camnitz Oct. 28, 1742. He studied at Tübingen, Göttingen, Jena, and Leipzig. Among his teachers were Michaelis, Ernesti, Dathé, Semler, Teller, and Gellert. He visited England and France to extend his familiarity with Oriental MSS. On his return in 1770 he became professor at Tübingen, and began the success of the Old Testament. But when, in 1772, he was placed at the head of the theological training-school, he was in the place for which his talents and learning best fitted him. Here he labored with great success for thirty-two years. In 1806 he was made a prelate and brought into close connection with the government, and, on the death of Gart Nov. 10, 1822. Among the many writings of Schnurrer are, Bibliotheca Arabica (1799-1806, 7 parts):—Academic Addreses (in Latin [Tübb., 1829]):—Erläuterungen (historical [Tübb. 1798]). See Weber, Schnurrer's Leben (1823); Herzog, Real-Enzyklop., xx, 714-718. (J. P. L.)

SCHOOCK, Charles, a minister of the Methodist Episcopal Church, was born in Stuttgart, Germany,
July 1, 1812, and emigrated to Philadelphia, Pa., in 1829.
Removing to Wilmington, Del., he there united with the
Church of Christ and attended the Philadelphia
Conference in 1838. He became supernumerary
in 1855, and so remained until his death, which occurred
in Philadelphia, March 24, 1872. See Minutes of An-
nual Conferences, 1875, p. 18.

Scholastic Philosophy. See Scholasticism.

Scholastic Theology, a term used to designate
that peculiar phase of theological development which
lies between the patristic age and the age of the Refor-
mation. The apostolic age had founded Christianity as
a regenerative principle in human society; the patristic
age had crystallized the teachings of Christianity as
ecclesiastically sanctioned dogmas. The scholastic age
now developed and defended and harmonized the dog-
mas which already were authoritatively accepted and
taught by the Church.

The patristic age died away at about the close of the
6th century. The age from the 6th to the 11th cen-
tury is a period of transition from the patristic to the
scholastic age. The scholastic age proper extends from the
age of Anselm (died 1109) to the outbreak of the
Reformation. In the scholastic age we may readily distinguish three phases—the period of inception and youth; the period of greatest strength and glory; and the period of dissolution and decline.

On the threshold of scholastic theology stands un-
questionably the celebrated archbishop of Canterbury,
Anselm. He was the first to recognize distinctly the
central principle of scholastic theology and to reduce it
to masterly application. This principle is the unques-
tioning acceptance of the traditionally and officially
sanctioned body of orthodox doctrine, and the earnest
defense of the same by all the resources of logic and
reason. The scholastic theologians were therefore not
patres, generators, of dogmas, but only doctores, teach-
ers and defenders; and they were not doctores in gen-
eral, but only doctores ecclesiae. They taught not mere-
ly in the Church, but for the Church and in defence of
the Church. Their central task was to consolidate, or at
least to cast a bridge over the gulf which lies between
faith and knowledge. The instrument which they
chiefly used was formal logic—syllogistic argumenta-
tion. Anselm plainly sets before himself a twofold task—to lead towards knowledge from the
outward things of nature, so as to present an absolutely blind and irrational faith, and to reprove the presumption of a too haughty and self-confidence.

The first error—the too servilely traditionalist
—had characterized the period since the
decay of the patristic age. The second error was re-
presented by some of the early scholastic philosophers,
such as Roscelin. But in his attempt to find a sys-
tem midway between these extremes, Anselm does not
himself escape unconsciously vibrating, at times, into
one and then into the other. At one time he makes
himself positively dependent upon faith; at another
he goes so far as to assume that reason can of itself dem-
duce the absolute necessity of each and every dog-
ma of the whole faith of the Church. In this he uncon-
scionably accepts the very essence of rationalism; and
yet nothing is further from his main tendency than an
excessive reliance upon mere reason. On the con-
trary, he is so thoroughly in bondage to the merely
formal dogmas of orthodoxy that he is unable to reach
any independent appreciation of either the simple word
of Scripture or the direct intuitions of the moral con-
sciousness. As a general result his writings are charac-
terized largely by an unsatisfactory logical formalism.
Philosophically, Anselm is a Platonic realist.

The same antithesis between faith and knowledge
which we find in the patristic age is very evident in the scholastic age after his
time. But while with Anselm the traditional, philo-
sophical, and ethical elements were held in comparative
equipoise, with some of his successors the centre of grav-
ity was seriously lost. This is particularly the case with
Bernard of Clairvaux and Abelard. Of the two, Ber-
nard (died 1153) was by far the more churchly-minded.
He looked upon the speculations of Abelard as daring
innovations; he was a man of faith rather than of sci-
ence; he bowed with awe before the body of Christian
dogmas as held by the historical Church; and yet he
was not a mere unthinking traditionalist. But he en-
deavored to appropriate the traditional system with a
vital and lively faith. His spirit was, however, a mys-
tical rather than of a philosophical cast. The
intelect cannot take by storm the mysteries of salva-
tion; it is only by means of ecstatic contemplation that
distant glimpses of their meaning can be obtained.
What the soul sees in its mystic soorings are true fore-
sights to the what will be open before us in our state of
external life. This position of Bernard led him into
violent personal opposition to his great contemporary
Abelard.

Abelard (died 1142) had devoted himself at first to
dialectics, i.e., philosophy, and had adhered primarily
to the nominalists and subsequently to the realists; and
those opposite standpoints are frequently clearly recog-
nizable in his writings. Indeed, it is probable that
Abelard himself never came to a clear decision between
the two systems. His general position, however, seems
to have been that which held the universalia in re, and
which is best designated by the term conceptualism.

On developing further the theological system of the
whole series of dogmas to a vigorous philosophical
treatment, endeavoring to commend them to the under-
standing by a clear presentation of their harmony with
reason. He seriously complains of a failure to do this
on the part of his predecessors, and insists that the ex-
acting of faith in doctrines before the reasonableness of
the doctrines has been explained can only lead to cre-
dulity and superstition. Such a course also deprives
the Christian subject of the means of convincing the
doubter and of refuting the opponent. Moreover, it
rests upon an untrue rejecting of the benefits of world-
ly science growing out of an ungrounded fear of its
misuse. But Abelard is not a thorough rationalist; he
does not make intellectual processes the generator of
faith. He holds simply that philosophical arguments
may facilitate the acceptance of Christian doctrine,
while the final producer of converting faith is the in-
fluence of the Holy Spirit. He further holds that no
teen only of the true and canonical writings can be
true, as

on the contrary, regards the official doctrines as simply
a human development of what exists in germ in the
Holy Scriptures, while these Scriptures themselves, to-
gether with the primitive creeds, are the real source and
norm of all Christian truth. In his work De sc et Non,
Abelard presents a separate consideration of the
dogmas of the Church fathers, and the dogmas with this express purpose—to show
that the Church fathers are to be read, not cum credendi necessitate, sed cum judicandi libertate. He even gave
much offence by insisting that the Bible itself is not to
be fully appreciated without a discriminating exercise of
the understanding. His general tendency was to embrace the natural and the supernatural in a single
view, and to establish a bond of unity between all sys-
tems of religious faith. His standpoint was that of
a formal supernaturalism with a noticeable tendency
to material rationalism. The polemical conflicts in which
his life was involved prevented him from laying the
foundations of modern philosophy. They also led
him, in some cases, to aim rather at a momentary dis-
lectical triumph than at a solid development of
Christian truth.

The sharp antitheses of tendency between the mysti-
cism of Bertand and the dialectics of Abelard led to mediatory efforts. Prominent here is the school of the St. Victors. Hugo St. Victor (died cir. 1140) held to the Anselmic position that Scripture and tradition are the objective, and faith the subjective, non-logical element. He deviates from Anselm in making a broad distinction between alia ex ratione, alia secundum rationem, alia supra rationem, and alia contra rationem, i.e. between necessaria, probabilita, mirabilita, and incredibilia. What falls under the first and the fourth head is not an object of faith, but only what falls under the second and third as each lover of truth knows. The so-called doctrines of natural religion. Here faith is helped by reason (ratione adjutor), as also reason is perfected by faith (ratio fide perfitur). Under the third head fall the specifically Christian doctrines of Scripture and tradition. Here ratio does not help faith, because the object is beyond its range, though it may offer grounds for revering the faith which grasps that which is above it. Thus Hugo St. Victor rejects the endeavor of Anselm to demonstrate the rationabilis necessitas of the orthodox dogmas, and concedes only our philosophical ability to strengthen the probabilitas of the dicta of natural religion. And this is essentially the same as Pascal's pronouncements on the original acuteness of the human race. The motif of Hugo in thus restricting the role of reason was (1) to put a check to the subtle and fruitless freaks of dialectics, and (2) to assure room for full play for his own mystical system. His real position was this: insomuch as scholastic dialectics is unable to affirm the existence of the Father, Son, and Holy Spirit in the manner of immediate intuition whereby the absolute truth is directly laid hold upon with the certainty of actual vision. He further held that there are progressive degrees in which this truth is grasped, depending upon the progress of our subjective sanctification through personal communion with God. In carrying out his system he was successful in so far as he could, but the bounds he had set up for reason, for he subjects the official form of doctrine to no little free criticism; and he endeavors to make clear to reason the grounds of the revealed system of truth. This is simply what was to be expected; for Hugo was to some considerable degree a genius of really productive power. His mystical system as a whole had, however, more indirect than direct influence on his age; it served as a powerful check to the mad freaks of uncurbed dialectics. He has greater significance as the first systematizer of the whole body of Christian doctrine. In his Summa Sententiarum he treated successively of all the dogmas of the Church, sustained throughout the 13th century and throughout the 18th century, by the fathers, adding, then, the various objects of opponents, and finally deciding each case according to Scripture and tradition. His work De Sacramentis, though of more speculative power than the Summa, has been much less read. And though his Summa was subse- quently largely displaced by the Summa of Peter Lombard, yet the work of Hugo exerted a very important influence upon later scholastics, particularly upon Lombard himself and upon Thomas Aquinas, but very especially upon theologians of a mystical tendency, such as Bonaventura and Gerson.

The mystical or imaginative element of Hugo is carried much further by his pupil Richard St. Victor (died 1178). According to Richard there are six kinds of contemplation. "We know, 1. by the imagination (the sensible impressions made by creation); 2. by reason (perception of law and order in creation); 3. by reason according to imagination (symbolical knowledge of nature); 4. by reason according to reason (the internal referred to the internal without a sensible image); 5. above and not against reason (rational knowledge carried to a higher stage by revelation); 6. above and (apparently) against reason (as, e.g. the mystery of the Trinity). In discussing the Trinity, Richard makes large use of the trivis of power, wisdom, and love; but he lays greatest stress upon the latter, to which he ascribes the generation of the Son. There is nothing more perfect than love. But love (amor), in order to be charity (caritas), must have for its object not itself, but something else. Hence in order to change, the object must be changed. But love towards creatures is not sufficient, for God can only love that which is worthy of the highest love. Hence the divine love must have a divine object (the Son). But even this is not the highest love, for love is essentially social. The two who love each other must desire that a third party be fully loved by each of them; hence the desire for a third party. St. Francis and St. Peter of Alcantara agree in loving a third (the Spirit). And since this love to the third party, in order to be perfect, must have a perfect object, hence this third party is equal to the other two. Each is equally divine, and there is no superiority of the one to the other (see Hagenbach, Hist. of Doct. i, 420, 467). Richard agreed with Hugo in regarding theology as the central science, and as the mother of all other sciences.

But the drift of the age was averse to the deep and rich speculations of the St. Victors; it tended rather to concentrate all intellectual acumen upon the logical defence of the formal orthodoxy of the official Church. Hence it lent itself to the prevailing dogmatic tendencies of the dogmatical authorities (summa sententiarum). The first real collector of such "sentences," sententiarum, was Hugo St. Victor, though the germs and forerunners of them are found as far back as in Vincent of Lerinum (died cir. 430), Gennadius of Marseilles (died cir. 498), and in Isidore of Seville; but it is only when Hugo appears that the process becomes of a really scientific character. The one motive of these real sententiarum is to bring dialectics into close service to orthodoxy. Thus they are not mere slavish compilers of the dicta of the fathers, on the one hand, nor rash speculators, on the other; but they hold the midway between them. Chief among the foremost Hugo was Robert Fulquem, in his Sententiarum Libri Octo. He was arch-deacon of Rochester, teacher in Paris and Oxford, and finally cardinal (died 1150). His chief polemical endeavor was to counteract the too daring speculations of Abelard; but Robert was far surpassed by the great magister sententiarum, Peter Lombard (died 1164). Of his Sententiarum Libri Quattuor, Hase says, "It was not so much on account of the ingenuity and depth displayed in the work as because of the position of the author in the Church, and his success in harmonizing antagonisms, as also because of the remarkable perspicuity of his work, that it became the manual of the 13th century and the model of the 18th century. Many of his work are the Trinitas, creation, the incarnation, and the sacraments. As a whole, it is a synopsis of the whole movement of scholastic theology. "With it," says Baur, "really commences the systematization of scholasticism, the endless commenting upon the sentences of the masters." It initiated the movement of tiresome questioning and answering; of laying down theses and antitheses, arguments and counter-arguments; of dividing and splitting up the matter of doctrines ad infinitum. Lombard was very successful in keeping the mean way between the blind copyists of tradition (scrupulatores) and rash reasoners (praeclarissimi ratiores). He was in the greatest danger of removing the existing contradictions in Scripture and tradition. These differences he states very frankly, somewhat in the manner of Abelard's Sic et Non, but with a much more intense endeavor to reconcile them. He purposefully avoids all ambitious philosophizing, as this seemed to him to jeopardize the dignity of humanity and the dignity of the Church. He knew that the whole, therefore, the tendency of Lombard was towards the enslaving of speculation in the rut of formal tradition. This influence was felt even by writers of much greater originality, and such as had entirely broken with the whole method of the sententiarum, as e.g. Thomas Aquinas.

Close upon the steps of Lombard followed the gifted
Scholastic Theology 420

Dominican Albertus Magnus (died 1280). He made a much larger use of Aristotle. His commentaries on Aristotle and of LOMBARD, Duns SCOTUS, and Oecum. But the way opened by Lombard was not docilely followed in by all. Alanus de Rysel (died 1290), in his Ars Cath. Fidei, presents the successive doctrines of the Church as a series of logical steps, endeavoring to develop the one directly from the other. "Heretics and sectaries must be won over by citations of authorities, therefore we must urge upon them rational arguments." But he wisely adds: "He vero rationes si homines ad credendum inducunt, non tamen ad fidem capessandam pleniter sufficiunt." In this his position is related to that of Anselm. Lombard was also opposed for his use of Aristotelian logic. Walter St. Victor accuses his whole work from this secular fountain (uno spirito Aristotelico affatto). So also Joachim of Floris. A still more prominent voice against the great current of scholastic theology was that of John of Salisbury. He accused it of fruitlessness, absurdity, and presumption. It sacrificed the essence for the form, the truth for logic; but his critical ability was not supplemented by an adequate productive power. Hence he was unable materially to check the general drift towards scholastic subtleties. Scholastic theology reached its highest development in the 13th century. Many circumstances contributed to this, especially the more full access to the writings of Aristotle and of the commonwealth of Constantine of Constantinople (1204). These writings, falling into the hands of a number of well-trained men, served to give theology a much wider and richer scope than it had as yet taken. The whole series of fundamental questions was now elaborately examined afresh. Among the problems more specially, the sources of our knowledge, and their use in theology; the nature and necessity of revelation in contrast with reason and philosophy; the relation of faith to knowledge; whether theology is a science proper; whether it is a theoretical or a practical science; what is its proper object (materia de qua) in its contrast with philosophy; wherein Christianity perse differs from other religions, etc. The form which theology now assumed was partly that of commentaries upon the sentences of Lombard, and partly that of more original production. It is distinguished, on the one hand, for the immense increase of matter treated of (ethical and dogmatic, metaphysical and physical), and, on the other, by the growth of the scholastic method, according to which, on every successive point, the authorities and reasons are cited pro et contra and a resolutio or conclusio duly drawn. The whole is followed by a refutation in detail of all contrary views. Yet upon the basis of this uniformity there is manifested a large range of individual peculiarity. This sprang in part from the individual genius of the theologians, but also largely from their personal rivalry; and particularly from the rivalry and hostility that existed between the great monastic orders of Dominicans and Franciscans, and between the schools of the realists and the nominalists. Another characteristic of this climax period of scholasticism was that it for the first timetwigged the whole body of specifically Catholic doctrine to its complete formal expression. First in time, of the scholastic theologians of this period, is Alexander Hales (died 1245). He won the title of Doctor Infragenosita. His Summa Universa Theologiae. It also favors some of the strict inferences of Roman doctrine, such as the thesesur graecit and the mimaclata concepto passivi Virgini Maria, and it betrays an occasional Pelagianizing tendency. Hales is, in many respects, surpassed by the noted

Scholastic Theology.
of the relation of reason to faith. Reason cannot prove the articles of faith, for the latter spring from revelation, with which reason cannot deal. But rational truths cannot possibly be in conflict, for they both come from God—the one indirectly and the other directly. Yet they do not overlap each other; they stand in different spheres. The rational truths do not reach up to the theological (deficient ab ovo); they are only a preambula to the theology. Xantippe record ses, therefore, as a preparatory for faith; but Thomas Aquinas elsewhere where in his system robs reason of even this conceded service, for he really attributes the so-called truths of natural reason to former half-remembered revelations, and regards them as implicitly containing the whole series of Christian dogmas. Another service (so teaches Aquinas) which rational reasons seizes, therefore, to elucidate the doctrines of faith by means of natural analogies. The possibility of this rests on the fact that all natural objects retain a certain faint resemblance to their Author. Still another use of reason lies in convincing our adversaries. The singulara modus concindii adversarius is really ex auctoritate Scripturam distinitus confirmaita miracula. If the adversary concedes a part of the Christian system, his remaining errors may be removed by developing the implications of the partial truths which he does accept. If he rejects the whole, there remains no other resource than an indirect process of reasoning, involving the absurdities which are implied in his errors. The form which Aquinas thus impressed upon theology was of the greatest influence upon all subsequent theological thought. It retained its sway in German orthodoxy down to the time of Schleiermacher. In the rest of Christendom, Catholic and Protestant, it largely prevails even to the present. Its essential feature is the sharp distinction made between that religious knowledge which is attainable by reason and that which we owe to revelation, as also the designating of revealed truth as suprema sed non contra rationem. It is within the range of this narrow field that Aquinas usually confines his thoughts. At times, however, he breaks forth in what might have proved very fertile speculations but for the hampering effects of his self-imposed yoke. Occasionally, however, he makes a real sophistic's use of this yoke, calling in abruptly the help of mere ecclesiastical authority to veil the absurd consequences to which his system leads, even while pretending to lead. In philosophical respects Thomas Aquinas was equally attracted by the opposed systems of Aristotle and Plato. He seems to have oscillated not a little between the central differences of these systems—the realistic ideas of Plato and the universitas in re of Aristotle. Ubi praestantia, ubi minus, ubi hinc et aliud. That is the dominant rôle to natural reason (e.g., to demonstrate the existence of God), and at others he almost robs it of any power whatever (e.g., when he attributes the truths of natural religion to forgotten revelations). In his ontology Aquinas leans somewhat to the emanation of his master, Albertus Magnus. He does not clearly distinguish between will and nature definitions; and his system, as a whole, is deterministic in its implications. In form it is an ideal of artistic construction. It is, however, not merely its form, but also and chiefly the richness of its matter, which secured to it its long ascendancy over the theological activity of the Church.

Contemporary with Aquinas as the gifted and eloquent Bonaventura (died 1274). He is peculiar for the completeness with which he combined the scholastic element with the mystical. His masters were Aristotle and the St. Victor. Less speculatively original than Aquinas, he is distinguished by a moderation which preserves him from dogmatic extremes, and by a warm religious element which lends to his pages an enlivening attraction. This latter element saves him from the trivial subtleties into which his contemporaries so generally fell, and induces him to give great prominence to the simple practical elements of scriptural piety. Well did he merit the encomium of Gerson: "Reedit a curiis quantum potest, non insenissima positiones extra..." He was the leader of the scholastics in the second quarter of the thirteenth century, a period of more multorum, sed dum studet illuminationi intellectus, totum referat ad pistemat et ad religiosiatem affectus." Hence to Bonaventura theology, though speculative as to its object, is yet predominantly a merely practical science. As to his mysticism, it does not materially affect the form of his theology; rather it simplifies and amplifies and complements it, to supplement the inadequacy of the formally logical element. As a whole, his influence, though permanent, was not so immediately effective as that of Raymond Lull (died 1310). Lul's Ars Genera was a laudable endeavor to simplify and to render more practically effective the formal system of scholastic philosophy. The enthusiasm with which he undertook to frame a system which would absolutely annihilate the scepticism of the Averroists, and demonstrate Christiinity with the evidence of a simple syllogistic inference, is only to be compared with the kindred ambition of Wol in the 16th century. But the results did not justify his hopes. And though he had a long series of enthusiastic disciples, his logical rationalism failed to produce any long-lasting benefits. But the figure which stands as a worthy rival of Thomas Aquinas, and whose subtleties brought scholastic theology not only to its meridian of glory, but also to the conclusion that all later developments were developments of the fall of the key for its decline, is the Franciscan monk Duns Scotus (died 1308). Scotus was unquestionably an original, creative genius. He impressed upon the course of theological development a specifically new character. He was not merely a personal rival of Aquinas, but he was an independent master. He shared, with the other scholastics, the conviction of the absolute truth of the official orthodoxy of the Church. He differed from Aquinas in making a less impassable gulf between faith and knowledge. He reduced the claims of philosophy, and in the same measure enlarged the scope of theology. With him theology is the science of man in his relations to God, and of God in his relations to the universe. He came to a clearer conception and a larger use of man as an image of God than is previously met with. From the fact that man is in the likeness of God follows the consequence that man is able to know God, and that the intuitions of essential truth lie in the germ in the principle of reason itself. The question of man's likeness to God, Duns Scotus was led to a more clear distinguishing of will from nature in God than had previously been done, as also to the assigning to God's freedom a very large rôle. The creation of the universe was not a matter of pantheistic necessity, but was the result of divine efficac in the highest sense. They have made the world other than as it is, and he might have been given to man a different moral law. He might also have adopted a different plan of salvation. Thus, while teaching the great truth of the divine freedom and combating the determinism of Aquinas, Scotus did not guard the divine freedom against irrational arbitrariness by not interpreting it as finding its norm of action in the divine wisdom. This great defect in Scotus's system led directly to the defeat of the most earnest endeavor of his life—viz., to settle Christian science upon an absolutely solid foundation; for it sapped the rational ground of the universe, and thus planted in theology a germ of universal scepticism. The solution of all this failure lay not in a lack of ability in Scotus, but in the fundamental mistake of the whole body of scholastic theologians, viz., in the uncritical assumption of the absolute correctness of the formal dogmas of the official Church. This assumption shut them off at once from any adequate appreciation of the true value of all theology and philosophy, viz., Scripture and experience. It was by developing the consequences of the scholastic method to their dangerous extremities that Duns Scotus has the merit of having at the same time raised scholastic theology to its fullest glory and also given an
impulse towards its dissoluteness. Earliest among those who became conscious of the radical definitiveness of the whole scholastic method was Roger Bacon (died 1294). Bacon declared, in an almost Protestant spirit, against the enslavement of theology to human authorities, and pointed towards the Scriptures and experience as the real fountains of truth. But his influence towards the decline of scholasticism was less strong than the development of scholasticism itself.

Of this third stage in the scholastic movement we can mention but the most prominent features. First of note stands the acute and independent-minded Durand of St. Fourcin (died 1333). Durand held an expository and developed the unorthodox systems of Aquinas and Scotus. He was a nominalist like Scotus, but his nominalism had a realistic background. With Aquinas, he held that man is by nature incapable of knowing the laws of God. The intuitions and generalizations of the human mind have only subjective validity. The true knowledge of God can be derived only from the Scriptures, as officially interpreted by Rome. Theology aims not at the knowledge of the nature of God, but only at such a practical knowledge of God as leads to salvation. Theology relates to the will, and is hence a purely practical science. Faith cannot be begotten by arguments, but is a simple virtue; and its meritoriousness is in proportion to the thought that is engaged in it. And the light of the Spirit shows us the evidence of Gospel truth. This also would destroy the merit of faith. He agrees with Aquinas in exalting the transcendental position of God in regard to man, and with Scotus in giving arbitrary play to the divine will and grace. The outcome of his whole system was to discourage the activity of human reason, and to promote a spirit of unquestioning subserviency to the official Church. It denied all worth to philosophy, and reduced theology to a mere method of practice.

This attitude of theology was now more fully developed by Occam (died 1347). A disciple of Scotus, he yet varies from him in many points. He boldly opposed some of the claims of the popes, and substituted nominalism for the prevalent scholastic realism. This was a necessary logical outcome. Scholastic realism had utterly failed to resolve the truths of philosophy and theology into any unitary substratum of general knowledge. Hence, in order to attain to unity of thought was to give all effort at knowing things per se, and to reduce our highest intuitions and ideas to mere creations of our own subjectivity, destitute of subjective value. Our highest ideas are mere fictions, abstractions. This nominalism was so strong with Occam that it gave to the whole system a positive spirit of thoroughgoing nominalism.

The second phase of nominalism, which is the more significant sects of Protestantism. Whenever any Church begins to let the writings of any of its eminent ministers stand between it and a free and direct interpretation of the Scriptures in the light of intuition and experience, that moment it enters into its scholastic stage. Scholastic, Church Hist. vol. iv.; Hengsbach, Hist. of Doctrines; and especially Herzog, Real-Encyklop. (J. P. L.)

Scholasticism (Scholastic Philosophy—Philosophy of the Schoolmen), a notable phase of speculation which prevailed throughout the Middle Ages whenever any activity of thought was displayed, and which gave rise to the controversies, and to the whole intellectual habit of those centuries. Scholasticism especially denotes the peculiar mode of argumentation then practiced, and the spirit by which it was guided. The Scholastic Philosophy designates the whole body of diverse and often conflicting doctrine which was generated under the scholastic procedure. The Philosophy of the Schoolmen signifies the same thing, but directs attention particularly to the very remarkable succession of acute and profound inquirers who applied and developed the scholastic method. The schoolmen were the theologians, the metaphysicians, the dialecticians of the scholastics, the thinkers, and the teachers of the medieval period. The scholastic philosophy represented the ample and often bewildering, but always systematic, results of their labors, especially after their method had attained its curious but consummate perfection. Scholasticism was the peculiar process of investigation and demonstration pursued by the scholastics. It is a thoroughgoing but unvarying uniformity, for much more than half a millennium. The schoolmen have long fallen into disrepute; little more than their names are remembered by the majority even of educated persons. Their works are unread and lie mouldering and undisturbed on the
dustry shelves of ancient libraries. Their system has been for nearly three centuries the constant butt of ignorant censure and stolid pretension. Yet a system which endured so long, which engrossed so many minds of wide culture and of marvellous penetration, which attracted so much of contemporaneous regard, which enlisted such intense and general enthusiasm, which filled the court, the church, the school, as an admissible and almost “ruled the court, the camp, the grove,” in the persons of Aescolus and Occam and Abelard, cannot be dismissed with a sneer or safely repudiated with indifference. Hallam, following in the wake of Brucker, with whom he was probably unacquainted, has repeated the brusque dictum about the scholastics, through not having knowledge that he had read neither the works of the schoolmen themselves nor the historians of their philosophy (Middle Ages, ch. ix, pt. ii). But the second-hand censure of Hallam are rendered ridiculous by the measured commendations of Leibnitz, to which he inadequately refers, and by the candid admiration of Sir William Hamilton and other competent judges. Sir William, speaking of Reid’s repetition of the current abuse, observes: “This is the vulgar opinion in regard to the scholastic philosophy. The few are, however, now aware that the human mind, though partially, was never more powerfully developed than during the Middle Ages.” (Ed. Hamilton, p. 288.) Mr. (ib.) “comp. Hamilton, Divers, p. 54, note; 2d ed. St. Hilaire, De la Logique d’Aristote, prof. vol. i, p. v; Rémuésat, Abelard, ii, 282, 548.) St. Hilaire justly designates “La scholastique—berceau de l’intelligence moderne.”

The world cannot afford to disown any of the laborious services by which knowledge and civilization have been advanced, no matter how strange they may now appear. Nor can it wisely forget those who have labored long and earnestly in its behalf. It may always be presumed that whatever occupied the ardent endeavors of many generations had some serious meaning, whether this meaning does not in the open to dusty append- hensin; and that it solved some serious difficulties of the time and ministered to their removal from the on- ward path of humanity. It is certainly blindness and arrogance to reject, without careful examination, what we do not understand, because we do not understand it; and not to understand it, because unwilling to make an effort to understand it. There is much which is un- suited to modern habits of thought, much which is strange and bewildering under modern associations, and which is futile, perverse, or erroneous in the writings of the schoolmen; much that may be judiciously aban- doned as having served its turn and passing for philosophic intelligence. But, as Richard Baxter and Leibnitz—very dissimilar minds—both recognised, there will still remain much that is valuable and de- serving of sedulous appreciation. Indeed, to those who have sipped from the original fountains, who have pondered over the divisions of Aquinas or grappled with the distinctions of Duns Scotus, there will appear no ex- travagance in the question of a recent writer: “What doubts have since been mooted—what difficulties sug- gested in morals, religion, or politics during three cen- turies of unfettered religious inquiry which they, the schoolmen, have not anticipated and dissected with the calmness of scientific anatomists” (Brewer, Letters and Papers in the Reign of Henry VIII, vol. iii, p. cxcciii. Comp. Proudhon, Creation de l’Ordre dans l’Humanité, III, iii, 283.)

I. Origins of the Term Scholasticism.—The word “scholastic” (σχολαστικός) does not occur in classic Greek in the sense of a schoolman, but only in the meaning “pertaining to the philosophers of the Middle Ages.” Bayle (s. v.” Aristote”) says that it was not used in Aristotle’s time to “signify a scholar, a student, or a schoolman.” It occurs four times in Aristotle himself, always with the meaning of idle or disengaged—once in distinct opposition to practical. No distinct instance of its medieval usage is discoverable in Stephen’s Theaetetus. The ear-

liest approximation to it presents itself in Posidonius (Athen. Deipn. V, xlvii); but it still clings to its pri- mary meaning of unemployed, leisurely. It must be re- membered that “school” had originally the same import, and that its Latin name was ludus (play). Gradually “scholastic” came to mean “characteristic of the school,” particularly a school of rhetoric—the master of such a school, a school of rhetoric, an adjectives which, almost “ruled the court, the camp, the grove,” in the persons of Aescolus and Occam and Abelard, cannot be dismissed with a sneer or safely repudiated with indifference. Hallam, following in the wake of Brucker, with whom he was probably unacquainted, has repeated the brusque dictum about the scholastics, through not having knowledge that he had read neither the works of the schoolmen themselves nor the historians of their philosophy (Middle Ages, ch. ix, pt. ii). But the second-hand censure of Hallam are rendered ridiculous by the measured commendations of Leibnitz, to which he inadequately refers, and by the candid admiration of Sir William Hamilton and other competent judges. Sir William, speaking of Reid’s repetition of the current abuse, observes: “This is the vulgar opinion in regard to the scholastic philosophy. The few are, however, now aware that the human mind, though partially, was never more powerfully developed than during the Middle Ages.” (Ed. Hamilton, p. 288.) Mr. (ib.) “comp. Hamilton, Divers, p. 54, note; 2d ed. St. Hilaire, De la Logique d’Aristote, prof. vol. i, p. v; Rémuésat, Abelard, ii, 282, 548.) III. Origin of the Scholastic Mode of Philosophy.

—The notices of the origin of the name and of the nature of scholasticism furnish indications of the genetic development of that notable method of speculation. They do not contribute toward antiquating the term; but Ueberweg is almost dumb on this point. He says (Hist. Phil. i. 350), "Scholasticism was the reproduction of ancient philosophy under the control of ecclesiastical doctrine, with an accommodation, in cases of discrepancy between them, of the former to the latter." Then Abelard, who did not touch theology till an advanced period of his career, was not a scholastic during his brilliant course at Paris. Others, who never touched theology at all, were never scholastics. Occam, and those who rejected ecclesiastical authority in whole or in part, were not scholastics. Then Albertus Magnus and Thomas Aquinas and Duns Scotus ceased to be scholastics in their various senses. Aristotle; but became so, suddenly, when commenting on Peter Lombard and submitting their speculations to the discipline of the Church. Then Roger Bacon would not be a scholman. Evidently there is no such compendious definition of scholasticism as Ueberweg and many of his fellow-historians suppose. The application of the Aristotelian logic to the exposition of Christian doctrine, and the subordination of the logical deductions to the orthodox dogmas of the Church, characterized the most brilliant period of scholasticism, and constituted scholastic theology. See SCHOLASTIC THEOLOGY. But these characteristics did not belong to the whole period, nor to all the scholmen, nor to all the laboratories of theological scholasticism in any period. John Scotus Erigena with his Platonism, and Pico di Miranda with his Cabalism were scholmen as much as Bonaventura or Bradwardine. So also were essentially the Jews Maimonides and the Saracen Avicenna. It is necessary to remark the important import of scholasticism, to note its various use, and to trace the progress of the scholastic procedure, in order to obtain a full knowledge of its meaning, and to detect the grounds of its diverse, and particularly of its most familiar, application.

Scholasticism, so contemplated, will be found to have marked peculiarities. Its root is the logic of Aristotle, and the teacher of rhetoric, embracing all knowledge in his course, then the possession of such knowledge with the refinement which it was supposed to bestowed. As universal learning shrank up, even in the times of Cassiodorus, to the Trivium and Quadrivium, scholasticism suffered eclipse, but still claimed dominion over all the earlier part of the learning of the time. When rhetoric was supplanted by logic, scholasticism became the application of deductive reasoning to all departments of inquiry; and, at a later time, in accordance with the temper, associations, and necessities of what is regarded as distinctively the scholastic period, pre-eminently, though never exclusively, a method of the three sciences.

Scholasticism will thus be the employment of logic, not the Peripatetic philosophy as such, in all departments of learning, whether suited to them or not—the substitution of dialectics for investigation, of authority for facts. Lord Bacon did much, but very much less than his followers, to confirm the denial that Aristotle handled everything in subservience to the logical science which he had created. Such an error can never be entertained by any one who has read his Natural History, his Parts of Animals, his Politics, or even his Rhetoric or his Ethics. This exclusive application of logic to all subjects and on all occasions was alike the defect and the characteristic of the scholmen, practised, even when condemned and opposed, by Roger Bacon.

—There is a manifestation in Tertullian and other fathers of the early Church to treat religious topics in a manner analogous to that pursued a thousand years later by the most illustrious among the scholmen. Scholasticism was a natural growth, not an arbitrary invention. It may be deemed to have been inevitable that this mode of intellective thinking should be developed from the sealed religion, appealing exclusively to faith in the revelation, and whose fundamental tenets "came not by observation," was disseminated amid a highly cultivated but sceptical society, in antagonism to previously existing systems of religious belief, and to all the conclusions of its past thought and experience. Authority, divine authority, was the basis of the new truth, and furnished the premises for controversy and for apologetics alike. The inspired Scriptures were the expression of this divine authority, and were neither to be established by observation nor tested by experiment. In exegetics as well as in politics there was thus a necessity of proceeding from the maxims of faith to the consequences of such maxims, which could be reached only by deduction. The need of accommodating the arguments adduced to the hostile temperaments and adverse, habits of a pagan age would naturally soften and obscure the sharp precision and harsh regularities of dialectic procedure and scholasticism, and even the scholastic subtleties and quibblings, very soon appeared, and may be discerned in early patristic literature. When Christianity became prevalent and was established as the religion of the State, especially as there was a coincident decay of general culture and a peculiar progress of the metaphysics of Aristotle, the abstractions, its distinctions, its divisions, and its refinements, became predominant. This tendency is very pronounced in the Confessions of St. Augustine, in his other writings, and in the productions of his contemporaries and immediate successors. It is not without reason that Augustine has been signalized as one of the chief promoters of the scholastic method. As letters continued to shrink up, and as cultivation of intellectual graces and refinements became impossible or mistimed in the midst of social anarchy, barbarian incursion, and general wretchedness, the deductive method of argumentation and exposition would unavoidably prevail. The exertion of the practice and of such pursuits would be also greatly favored by the restriction of study to the ecclesiastical circle, and by the mighty task imposed upon the whole mediæval period of converting the pagan barbarians who had occupied the Western empire, and of civilizing them through the instrumentality of the Church. With them they were to be converted. Of course, as logic was the chief method of theological persuasion, the influence of Aristotle and of the Aristotelian spirit grew with the progress of time and with the progress of theological disputation, for there neither is nor ever can be any logic
but that of Aristotle. There does not seem to be any sufficient evidence of the total oblivion of Aristotle and of Aristotle's dialectics at any period of the Middle Ages. The testimony of Ingulph may be rejected as the result of a meagre acquaintance with Aristotelian logic through secondary channels; and it is admitted that the version of Porphyry's Introduction, by Boethius, was known at all times. After the conversion of the pagans in the new kingdoms, and the definite establishment of the ecclesiastical ascendancy of faith, it was the natural thing for the West to employ a fresh demand and a constant provocation for the in- 
tervention of scholastic procedure arose in the ever-multiplying and often pernicious heresies which occupied 
provincial councils, and engaged the most zealous and astute minds in their promulgation, their refutation, and their defence. A very considerable number of the 
leaders of the church, whose statement opens the several articles in the Summa of Aquinas, or of any similar 
summa, will show what a countless number and endless variety of dogmas required to be examined and settled for the 
establishment of the religious and ethical doctrine of the 
time. The reasons for the necessity of such a system of 
scholastic philosophy as was substituted in the long and 
agonizing period of the Middle Ages, in a society without other intellectual discipline or moral control, by the 
proposition, the ventilation, the discussion, the establishment, or the reprobation of the multitudinous perplexed problems in theology—often not merely of personal, but of 
political and social, and of ecclesiastical interests. It is 
not a question here whether the reasoning adopted, 
the arguments adduced, the conclusions drawn, or the 
decisions affirmed were correct or pernicious. The 
process was necessary, the task indispensable, for the 
effective development of European intelligence. The 
system does not accord with modern requirements, nor 
approve itself to modern modes of thought; but it is 
inaugurated those requirements and bred those modes. 
Feudalism had to be swept away to make room for the 
growth of society and its larger expansion; but feudalism 
was a blessing at a time when the imperative de- 
mand of society was for confirmed authority and grad- 
uated subordination. Any "good custom will corrupt 
the world," and no human custom is absolutely good 
or free from the taint of wrong and prospective mis-
chief. The errors and the defects of scholasticism are 
nowadays manifest to all, and are habitually exagger-
ated. The good, "that was buried with it," is not 
equal to modern standards. The best and the most 
skilful of the schoolmen, of their works, and of their times—a transference of thought from our cir-
cumstances and points of view to theirs, and dispassion-
ate reflection—to estimate their difficulties, their aims, 
and their achievements. One inestimable result of 
their labors is their inherent and powerful aid to the 
transmission of the terms of reasoning, metaphysics, and theology, and, as a consequence of their procedure, the 
enforcement of logical coherence of thought and of preci-
sion of language. These things were indispensable pre-
liminaries for the development of modern tongues, mod-
ern knowledge, modern enterprise, modern society, and modem government.

That this explanation of the rise and progress of scholasticism is correct is in some measure confirmed by the exhibition of the same tendencies, under analogous cir-
cumstances, in the contemporaneous speculation of the 
Jews and Arabs; for it is a mistake to regard scholasticism 
as either an ethical or a theological idiosyncrasy.

In the manner stated, and by steps which can be only 
obscurly traced, scholasticism gradually assumed that 
form in which it is usually contemplated by the histori-
ans of philosophy; and acquired the fulness, abundance, 
energy, precision, and predominance which character-
ized the scholastic philosophy in its most vigorous mani-
festation.

IV. Systematic Development of Scholasticism.—John 
Scotus Erigena, towards the close of the 9th century, is 
generally regarded as the first of those distinctively en-
titled schoolmen, though, as has been shown above, he 
should not be considered the earliest scholastic. The 
historians of philosophy have variously distributed the 
course of scholastic philosophy must be traced. Urban 
Wegg, who may be taken to represent the latest prevalent 
view, divides the scholastic age into two parts only: 1. From Scotus Erigena to Alamric, or from the 9th to 
the 13th century; 2. From the 13th century to the Re-
naissance. He thus omits both the preliminary tenden-
cies and the expiring efforts, important as the origin 
and the decadence of the system must be. Pinker 
Hamilton (Reid, Works, Appendix, note B, p. 815) notes 
John Major, of St. Andrew's (1469-1547), as "the last of 
the regular schoolmen;" but the spirit survived far 
into the next century. Brucker does not neglect the 
early manifestations of scholasticism, but observes that 
it was essential from the time of the 5th to the 8th; that the 9th and 10th were the time of 
its gestation and formation; that it was in the 11th; 
that it passed its boyhood and youth in the 12th; and 
that it attained full manhood in the 13th. He com-
ences the treatment of what he holds to be the scho-
lastic philosophy with the 13th century, and divides the 
history into three periods: 1. From Lanfranc, or Abelard and his disciple Peter Lom-
bard, to the middle of the 13th century, and to Albertus 
Magnus; 2. From 1220 to Durand of St. Pouyan; 3. 
From 1330 to Gabriel Biel and the close of the 15th 
century in the West. That a great change took place in the scholastic phi-
losophy at the opening of the second period, through 
the rivalry and energy of the recently instituted orders 
of the Dominicans and Franciscans, is proved by the 
character and career of the great schoolmen, and by 
Roger Bacon's curious vituperation of the "youngsters" 
who were teaching; and of Peter of Poitiers—"pa-
eri duorun ordinum studentium" (Compund, Studii, v)—
were Albertus Magnus, Thomas Aquinas, and their col-
leagues. The third period is rendered memorable by 
the names of Duns Scotus and William of Occam, and 
was marked by an excess of ingenuity, an extravagance 
of distinctions, and a perverse subtility which degener-
ated into vain and puerile captiousness in their succes-
sors. It is from the diseased state of scholasticism in 
its moribund age that the general estimate of the sys-
tem has been formed. But there is little justice in ap-
plying to the whole philosophy the reproaches merited 
by it in the course of its history, or attributed to its 
authors. For an acquaintance with the character and conse-
quences of the application of scholasticism to theology, 
for the peculiarities of the sects of the scholastics and 
of the leading schoolmen, for their rivalries and their 
antisocieties, reference should be made to the names 
of the schoolmen in this Cyclopaedia; to Nominalism, 
Realism, and Scholastic Theology.

V. Literature.—The literature of scholasticism is so 
extensive that it would be entirely impracticable and 
vain to undertake to give here any adequate enum-
ration of the principal works that have illustrated it. 
Among the chief sources of information are the ocular 
demonstrations of the gynaecologists of all the more notable schoolmen and their predecessors, from Joannes Damascenus to Gerson 
and Petrus Allianus, or even down to Philip Melancthon. 
Next in order would come all the chief historians of 
philosophy. Among works of more special and im-
mediate interest on the subject there are: 1. Coun-
trac, Fragments Philosophique et Phil. Stotiquoe (Paris, 
1840); Rouesmel, Etudes sur la Phil. dans le Moyen 
Age (ibid, 1840-42); Jourdain, Recherches Critiques sur 
Pape et l'Origine de Vhistoire des Lutins d'Arioste 
(Ibid, 1843); Caraman, Hist. des Rel. de la Phil. en 
France (ibid. 1845-48); Kaulich, Gesch. der scholast. 
Philosophie (Prague, 1853); Haureaux, La Philosophie 
Stotique (Paris, 1858); Hampden, The Scholastic Phi-
losophy, etc. (Oxford, 1862); Erdmann, Der Entwick-
lungsgang der Scholastik, in Zeitschrift fur wissenschaft.
Theologie (Halle, 1865), vol. viii; Michaud, Guillaume de Champaune et les Ecles des Pairs (Paris, 1867); De Cupely, Esprit de la Philosophie Scolastique (ibid. 1868). (G. F. H.)

Scholastics. See Scholastic Theology.

Scholefield, Arnold, a Methodist Episcopalian minister, was born in Nova Scotia; united himself with the Methodist Episcopal Church while quite a youth; was admitted on trial in May, 1810, from which time he travelled and labored in the work of the ministry with great success. He was made a deacon in 1818, and was united with a class of elders in 1827. Soon he broke off from Kant's abstract principles and endeavored, in his own way, to solve the problem of destiny and immortality. After a year at Königsberg he made an extensive journey, stopping a while at Greifswald and Rostock, and finally studying a whole year at the University of Jena. Here at Rinteln his system of theochemistry began to take shape. It was the first to be delivered with much pathos. See Minutes of Conferences, ii, 495; Bangs, Hist. of the M. E. Church, iii, 252.

Scholia, short notes on a grammatical or exegetical nature. Many scholia are found on the margin of manuscripts, or interlined, or placed at the end of a book. They have also been extracted and brought together, forming what is called Catena Patrum. See Commentary.

Scholiasts, writers of such brief notes on passages of Scripture. Many of the ancient Christian fathers wrote scholia (q. v.), which have come down to us, and show the views entertained of various portions of the sacred volume. Their value, of course, depends on the learning and critical acumen of the authors. Theology, poetry, prophecy, and Gnosis are among the best of them.

Schöinemann, Karl Traugott Gottlieb, from 1799 doctor of law and professor of philosophy at Göttingen, was born in 1766 at Eisleben, and died May 2, 1802. He is known as the editor of Epistulae Romanae Posthumae et quae ad eos Scripta sunt, à S. Clemente I usque ad Innocent. III, etc. (Göttingen, 1796). He also published Bibliotheca Hist.-Litter. Patrum Latinarum et Teutonicorum principis usque ad Gregorium Magnum et Isidor, Hispan. (Lips. 1792-94, 2 vols.). See Winer, Handbuch der theolog. Literatur, i, 694, 854; ii, 768. (B. P.)

Schröner, Johann Gottfried, a Lutheran minister, was born April 15, 1749, at Rithgeim, near Schweinfurt, where his father was the pastor of the place. He studied at Leipzic and Erlangen, and was deacon of St. Lawrence's at Leipzic. In 1779 he was taken sick, and died June 18, 1818. He was an excellent, pious man and pastor; and besides other hymns, he wrote the beautiful German hymn Himmelnur kimmeln, which has been translated by Mills, in his Nova Germanica, No. 130, "Heavenward, still heavenward." See Sonntagsbibliothek (Bielefeld), vi, 4; Koch, Geschichte d. deutschen Kirchendichtes, vi, 399 sq.; viii, 570; Knapp, Evangel. Liederschatz, p. 1344. (B. P.)

Schongauer, Martin, called Martin Schön, a German painter and engraver, was born about 1420, and died at Colmar Feb. 2, 1488. The paintings attributed to this artist are very numerous, but there are only a few which can be proved to be his work; among them is a panel in the church of St. Martin at Colmar. As an engraver his reputation was very high. His style is much more elevated than that of the other early German artists, and many of his heads are full of refined sentiment. His Carrying the Cross is a masterpiece; and the Temptation of St. Anthony is held in high esteem.

Schönherr, Johann Heinrich, a very remarkable and influential German theologian, was born at Memel November 30, 1770. At the age of fifteen he was sent to Königsberg to engage in trade. After a year of trial he concluded that he had not found his calling. By great self-denial he succeeded in en-
he obtained a place as preacher in Köpenick, where his intimacy with Schönherr was renewed. His preaching soon invited general attention. His manner was attractive, his language imaginative, and his chief themes (conversion and personal holiness) almost novel. Two by two the clerical authorities were impelled to call him to give account of his doctrines and of his relations to Schönherr. But no good reason could yet be seen for interfering with him. These failures to find aught against him, especially the last one, in 1814, contributed to give even greater influence and strength to the milder and more elastic views. In 1816 he attained to the most prominent place in the Church of the city. This prominence soon opened the way for the conversion of not a few eminent persons. Even professors of the university and noble dukes and ladies were brought into close intimacy with Schönherr. In the year 1819, however, a violent disagreement arose between Ebel and his master. Ebel had ripened into spiritual independence, and could no longer concede the infallibility to Schönherr which the whole circle had hitherto passively admitted. Besides, he could not admit the scripturalness of some of the later developments of his master's system. And what was not very clear outwardly of the system itself was, as a means of hastening on the kingdom of God, and endeavored to sanction it by Scripture texts, Ebel took direct issue with him, and ventured to intimate to him that, while starting well, he had stopped short and was yet entangled in the flesh. Thenceforth there were two systems of the Calvinistic rationalistic type. Ebel continued with his diminished circle just as before. In 1823 he made a journey to St. Petersburg, and the next year another to Berlin; but he made no permanent impression. In 1825 he fell upon the insane notion of constructing a ship which was to move without sail against wind and stream, and to serve as a place of refuge for his followers and the whole judgments that were soon to fall upon the world. He actually constructed it. On being launched, it went to pieces amid the derision of the witnessing multitude. This came near entirely breaking up his little band of followers; yet it did not in the least shake his faith in the truth of his system or in his divine call. But his career was now about run. Broken down in health by his self-mortifications and labors, he retired to Spittelhof, in the environs of Köpenick, and there died of consumption, Oct. 15, 1826, attended only by a single maid-servant, who was faithful to him to the last.

The system of Schönherr's system? He never fully reduced them to writing. Only two small tracts are all he ever published: Der Sieg der göttlichen Offenbarung, and Vom Sieg der göttlichen Offenbarung (both Köpenick, 1804). But these essays contain only the embryo of his system. In addition there were found among his posthumous papers some brief notes, mostly aphoristic in form. De la Chevalerie, a disciple, also published abstracts of some of his lectures (Köpenick, 1835). All these data were used in preparing the book Grundzüge (Leipzig, 1852). From these sources, and from the works of Ebel and Dietzel, Schönherr's most prominent disciples, the following is not very clear outwardly of the system itself was, as a means of hastening on the kingdom of God, and endeavored to sanction it by Scripture texts, Ebel took direct issue with him, and ventured to intimate to him that, while starting well, he had stopped short and was yet entangled in the flesh. Thenceforth there were two systems of the Calvinistic rationalistic type. Ebel continued with his diminished circle just as before. In 1823 he made a journey to St. Petersburg, and the next year another to Berlin; but he made no permanent impression. The universe and God. The fire poured its light upon the water, and thus became self-conscious. By the mutual action of the two a mutual effect was wrought—namely, the Word. The outer form of the Word is Day. The two first principles are the Male and Female. The stronger one is Jehovah; the weaker one is matter. From the absolute submissiveness of the latter to the former results the absolute harmony and order of the universe. To preserve and vitalize this harmony is the object of creation and providence. Creation is but the expression of the eternal desire of God to give one another more perfect form to the powers of the universe. From this arises the main basis of the theological views of the Jehovahian faith upon the creator principle. The Trinity is thus explained: the primitive essence of God is fire or light; this is the Spirit. The immanent power of God is the Father. The product of the essence and the power is consciousness, or the Word—that is, the Son of God. The contact of the Spirit with matter produced not only the Son of God, but also the whole series of spiritual beings. The kingdom of evil was produced by one of these highest beings turning away from light and alloying himself with matter. The origin of sin in man is explained in the most realistic manner. Man, tempted by Lucifer, took into his blood the destructive principle of evil of God. In every individual, the influence of the blood evil is propagated as depravity in all after-generations. The theory of redemption is also very realistically conceived. By the fall man disturbed the harmony of the two principles of being. By redemption this harmony is re-established. But how? By a process of gradual spiritualizing of the sin and depravity of man. The process of redemption, which will ultimately transfigure, and glorify, and introduce order into the whole field of darkness. As the spilling of the actual blood of Jesus upon the lap of nature is the means of regenerating the cosmos, so the right partaking of the blood of Christ in the eucharist is the means of regenerating the reality of humanity. The process of redemption is with the resurrection, the ascension, and the outpouring of the Holy Ghost. All are explained in a realistic and physical manner.

As to the proximate coming of the kingdom of God on earth, Schönherr had peculiar and very detailed views. How soon the state of perfection should break in depended largely on the use of human freedom. To freedom a very high röle is attributed. By freedom man, in some sense, takes the place of God. By freedom man intervenes with omnipotence and omniscience. How he will help to shape the future history of the universe is not absolutely foreknown even by God. It lies within the powers of God, no matter how great, to set up new possibilities, to inaugurate a new phase in the history of humanity. But there are two absolutely differing classes of men. There are central natures and subcentral natures. The latter revolve about the former as persons about the sun. Let a central nature only be faithful, and he carries all with him into the realm of light. As such a central nature Schönherr unquestionably regarded himself. Faith in himself was the very essence of his character. Nor did he ever waver in this. Hence his often-expressed anticipation of a speedy transformation of humanity. He would be faithful, and would carry his brethren with him over into the sphere of light.
whole system that the essential thing is not knowledge, but faithfulness. Upon this maxim Ebel proceeded. In the pulpit and before the multitude he preached only the common doctrines of the catechism; but in private he gathered about his own person an elect circle of the initiated. Among them were great lords and ladies, professors and students. Best known among them are pastor Dienstel and the commentator Olsanen. These were mostly "central natures," while the uninitiated masses were but subordinate natures. The two corresponded to the two primitive principles of being, the active and the passive. But the main leader of the circle was Ebel. As the circle drew closer around him, the personal confession of every secret sin was introduced as a special means of rapid advancement in holiness. This gave Ebel an almost papal power over the consciences of the circle. It proved the means of a violent outburst which took place in 1826. Many of the chiefs of the circle left it and at once began an assault upon Ebel. For a while Ebel was prostrated by sickness, and dropped from the public attention. In 1834 he came again before the public. But a fresh storm broke out, and very soon involved Ebel and Dienstel in one of the most notorious lawsuits of modern times. The two preachers were charged with unchurchly doctrines, immoral practices, and heresy. The trial lasted from 1835 to 1841, and resulted in deposing the accused from office, but in acquitting them of intentional immorality. The result was to entirely discredit the theology of Schönher. Thenceforth it has had no organic existence, though isolated theologians have, here and there, studied it with more or less admiration. See, besides the works already mentioned, Die Schutzwicr (Königsberg, 1884); Gegenwartige Liebe (ibid, 1864); Verstand und Vernunft im Brauche (Leipsic, 1837); Dienstel, Ein Zeugenverhör (ibid, 1838); Grundzüge (ibid 1852) from Schönher's papers; Comps de Route (Königsberg and Mohrungen, 1857), vol.1; Life of Rudolf Stier (N. Y., 1874), p. 141, 142; Herzog, Real-Encyclop. xiii, 620-647; Hahnenfeld, Die religiöse Bewegung zu Königsberg (Leipsic, 1858). (J. P. L.)

School occurs in the A. V. but once (Acts xix, 9) as the rendering of the Greek ἐπαύλη (from which the English word is derived), meaning originally leisure; hence, a place of tuition. See Tyranus.

School Brothers and Sisters, collective names of numerous associations in the Roman Catholic Church, devoted to the education of the young. The first (the Ursulines) were established at Brescia, 1587. See Ignatines.

I. School Brothers.—In the present article only those congregations are mentioned whose members are not priests. The most important school brotherhoods are: 1. The "Brethren of the Christian Schools," founded by Jean Baptiste de la Salle. 2. The "Christian Brothers," founded by Rev. E. Rice, at Waterford, Ireland. These have their central house and superior-general in Dublin, and numerous establishments in Great Britain, Ireland, and the British colonies. 3. The "Brothers Marists," or "Christian Brothers of the Society of Mary," founded at Bordeaux, France, in 1817, by abbe Guillaume Joseph Cheminade; approved by pope Gregory XVI in 1838. The society was introduced into the United States by archbishop Purcell in 1849, and had in 1874 25 establishments in Ohio, Illinois, New York, Pennsylvania, Maryland, Louisiana, and Texas. 4. The "Lamennaisian Brothers," or "Congregation of Christian Instruction," founded in Brittany, in 1828, by abbe Jean de la Mennais. They reckoned in 1872 about 800 members and 150 establishments in France. 5. The "Brothers of the Sacred Heart of Jesus and Mary," founded in 1821 at Le Puy, France, by abbe Coindon. They started in the United States at Mobile in 1847, and in 1874 had establishments in Mississippi, New Orleans, Kentucky, and Indiana. 6. The "Xaverian Brothers," founded at Bruges, Belgium, in 1839, by Theodore Jacques Ryken. They were especially intended to labor in the United States, and were introduced by archbishop Spaulding into Louisville in 1854. In 1875 they had six schools there, one in Baltimore, and the St. Mary's Industrial School for Boys near the city. 7. The "Brothers of Charity," founded in Belgium in 1805 by canon P. Triste, for the education of blind and deaf mute and training of orphans. In January, 1874, they took charge of the Industrial School of the Angel Guardian in Boston, Mass.

II. School Sisters.—The following are the most important of these congregations: 1. The "Ursulines" (q. v.). 2. The "Sisters of the Visitation of Our Lady," founded at Annecy, Savoy, in 1610, by St. Francis de Sales and St. Jeanne Françoise de Chantal. In 1641, at the death of the latter, the order numbered 87 establishments, and in 1700 160 establishments, with 6800 members. It had one establishment in the United States in Washington, in 1808; and in 1890 others in Maryland, Virginia, West Virginia, Kentucky, New York, Pennsylvania, Delaware, Wisconsin, and Minnesota. It was...
first approved by pope Urban VIII in 1626. 3. The "Sisters of Notre Dame." See Notre Dame, CONGREGATION OF. 4. "Sisters of Notre Dame de Namur," founded at Namur in 1849. Distinguished by the name of Joseph Dab, Superior; by their education for the religious life and teaching girls; and for their work among the poor and sick. 5. "Ladies of the Sacred Heart." See SACRED HEART, LADIES OF THE. These have as their primary object the teaching of young girls; others the care of orphans, visitation of sick and poor, and the direction of hospitals. Such are (1) the "Ladies of the Incarnate Word," founded in 1825 by Jeanne Marie Chésard de Matel, and approved by Urban VIII in 1828. They have many establishments in France, and eight in Texas. (2) The Poor Handmaids of Jesus Christ," founded Aug. 15, 1849, at Dernbach, Nassau, by Katharine Kaspar; approved by Pius IX in 1860, and confirmed in 1870. They first established themselves in this country at Falls City, Ky., in 1868, and numbered 45 sisters and five houses. (3) The "Sisters of Our Lady of Charity," or "Eudist Sisters," founded at Caen, Normandy, by abbe Jean Eudes in 1611. In 1835 they became known as the "House of the Good Shepherd." See SHEPHERD, HOUSE OF THE GOOD. 4. The "Presentation Nuns," founded at Cork, Ireland, in 1777, by Miss Nano Nagle, for visiting and teaching, but have since become strictly cloistered. Their first establishment in America was at St. John's, Newfoundland; and in the United States, in New York city, Sept. 8, 1874. (5) "Sisters of Mercy" (q.v.). (6) "Sisters of Charity." See CHARITY SISTERS OF. (7) The "Gray Nuns," or "Sisters of Charity of Montreal." See CHARITY, SISTERS OF. (8) "Sisters of St. Joseph" (q.v.). See Applele's Cyclopaedia, v. ii; Barnum, Romanism as it Is.

School, Sunday. See SUNDAY-SCHOOL.

Schoolmaster is the ineffectual rendering in Gal. iii, 24, 25 of παιδαγωγός ("instructor," 1 Cor. iv, 15), which does not signify a παιδαγωγός in the modern sense, but a person, usually a slave or freedman, to whose care the boys of a family were customarily committed at the age of six or seven years, who watched over their physical and moral training and accompanied them to the public schools and elsewhere, or provided them with teachers (παιδαγωγός, Quintilian, i, 11), but did not himself instruct them. See Smith, Dict. of Class. Antiq. s. v. "Pedagogue."

Schoolmen. See SCHOLASTICISM.

Schools, Alexandrian. See ALEXANDRIAN SCHOOLS.

Schools, Christian. At a very early period, schools were established in connection with the churches, and if no building was provided for this purpose, the schools were taught in the baptistery and the vestry. This is evident from the observation which Socrates makes upon the education of Julian the Apostate—"that in his youth he frequented the church, where, in those days, the schools were kept." He speaks of the schools of grammar and rhetoric, which, it seems, were then taught at Constantinople in some connection to the church. Catechetical and charity schools were also established, especially for instruction in scriptural knowledge. The second Council of Chalons, in 813, enacted that bishops should set up schools to teach ordinary literature and a knowledge of the Scriptures. The sixth General Council of Constantinople recommended the setting-up of charity schools in all the country churches. One of its canons is to this purpose: "that prelates should instruct country towns and villages should have schools to teach all such children as were sent to them, for which they should exact no reward nor take anything, except the parents of the children thought fit to make them any charitable present by way of voluntary obligation. Another of those canons speaks of schools in churches, and of the instruction of the subject to the bishop's care and direction; from which we may conclude that schools were anciently very common appendants, both of cathedral and country churches" (Bingham, Antiquity of the Christ, Church, i, 314). See PEDAGOGICS.

Schools, Hebrew. As this subject is intimately connected with the previous questions, it must be left out of our instruction, which cannot be well dealt with separately, we propose to discuss historically these three topics in the present article, which is grounded upon the Biblical notices and the later Talmudical references. See EDUCATION.

I. In the Patriarchal Period. We have no information of any place of public instruction in Scripture earlier than the Book of Samuel. But it is reasonable to suppose that, as the world became peopled, some measures were taken for the instruction of the young in all those parts of learning that were then known; and particularly among those persons who had the name of "the priests of the Most High God." Their anxiety on the subject of teaching, we are told, was so great that the seeds of religious learning should be timely sown in their children's minds, and that they should be instructed in everything appertaining to divine rites and worship, of which we have reason to believe that singing and sacred poetry formed a large part. The Jewish doctors, indeed, have given us decided assertions on the subject of primitive teaching. They say that Adam instructed his posterity, and that Noah succeeded him in the office. Enoch, we know, was a prophet (Jude 14); and in the later parts of the Old Testament we shall see that prophets were public instructors. The Arabsians have traditions of Enoch under the name of Edris; that he wrote thirty volumes of revelations; that he was the first who knew astronomy and arithmetic, and wrote with the pen. Eusebius says he was the first who taught the knowledge of the stars, in which he was instructed by the angels of God [see Enoch]. His translation of the human language was succeeded by Noah, a preacher, or teacher, of righteousness (2 Pet. ii, 5). The next great public instructor, according to the rabbins, was Abraham, concerning whom Josephus relates (Ant. i, 8) that he taught the Egyptians astronomy and arithmetic. The ancient historians of Berossus and Hecataeus commend his learning; and Epiphanius writes that "he was superior to all men in wisdom, and taught astronomy to the Phoenicians." The Targums also countenances the idea that Abraham taught in Haran. Jacob, according to the Jewish doctors, devoted himself to teaching instead of living the life of a hunter, like Esau; for (Gen. xxv, 27) "he was a plain man, dwelling in tents," is expressed by the Targums "he was a perfect man, a minister of the house of doctrine" (i.e., a school of instruction); but all this is mere fancy.

II. From the Exode to the Captivity. Under a theocracy, and engaged almost exclusively in pastoral and agricultural pursuits, the most part of the Hebrews, in the early stages of their existence, should educate their youth in a pre-eminently religious, practical, and simple manner. The parents, upon whom the education of the children at first devolved, were therefore strictly enjoined to instruct their offspring in the precepts of the law, in the Book of Deuteronomy (Deut. iv, 9; 10; xxxii, 13; xxxii, iv, 46), and in the symbols which represented the dealings of Providence with their nation in past days, and which were evidently designed to excite the curiosity of the children and to elicit inquiry, thus furnishing the parents with pictorial illustrations to fa-
culitate the education of those committed to their care (Exod. xii, 26, 27; xiii, 8, 14, 15; Deut. vi, 8, 9, 20, etc.). This work of education was not to be put off for certain occasions, but was to be prosecuted at all times; no opportunity was to be lost. The father was enjoined, in sitting down with his family at the table, at home, abroad, in his walks, in his business; in getting up in the morning, to train his children in the nurture and admonition of the Lord (ver. 7). The law of God powerfully supported the authority of parents in this task by the injunction of filial obedience contained in the decalogue, as well as by the heavy punishment inflicted upon refractory children (Exod. xx. 12; xxii. 15; Lev. xix. 27, 31). Still the command of parental authority was not to be the sole operative power in the education of children. Parents are reminded that their example may lead their children to happiness or misery (Exod. xx. 5, 6; Deut. iv. 10; v. 9; xxx. 19; xxiii. 46, 47). The force of example in the education of children is most beautifully described in the praise of a royal mother who, with "the love of love upon her tongue," instilled noble sentiments into the heart of her children (Prov. xxxi. 1-9, 25); and such loving words are represented as producing an indelible impression in the picture of a son who, with pious gratitude, dwells upon the wholesome lessons which his father imparted to him (Proverbs iv. 1, 8, etc.). Parents, moreover, were overadvised not to adopt the same indiscriminate process of teaching with all children, but to adapt their instruction to every youth (הנהו רבא) according to his age and inclination, so that he may abide thereby (xxiii. 6).

That reading and writing must have formed part of education from the very settlement in Palestine is evident from the fact that the Israelites were commanded to write the precepts of the law upon the door-posts and gates of their respective houses [see MEZUZAH], in order to be continually reminded of their obligations to their Creator (Deut. vi. 9; xx. 20). They were, moreover, enjoined to write the injunctions upon great stones (צֵלֶבַת) very plainly, immediately upon their crossing the Jordan (xxvii. 2, 8), so that they might easily be read by every Israelite. Now these admonitions unquestionably presuppose that the people at large could read plain writing; that the deciphering of these memorials was a religious duty; and that it must, therefore, have formed an essential part in the strictly religious education of children. Besides, the manner in which it is said of the sacred oracles written clearly indicates that the inspired writers reckoned upon the ability of the people to read. Thus the frequent play upon words, as, for instance, in Gen. vi. 8, where Noah found favor, "is obtained by a transposition of the letters in the name פֶּרֶשׁ into פֶּרֶשׁ; Gen. xxx. xviii. 7, where "Er . . . was wicked" is obtained by a transposition of the letters in the name פֶּרֶשׁ into פֹּרֶשׁ; the alphabetical portions of the letters in the name פֹּרֶשׁ into פֶּרֶשׁ; the alphabetical portions of the name פֶּרֶשׁ into פֹּרֶשׁ; the alphabetical portions of the name פֹּרֶשׁ into פֶּרֶשׁ; the alphabetical portions of the name פֶּרֶשׁ into פֹּרֶשׁ; and the alphabetical portions of the name פֹּרֶשׁ into פֶּרֶשׁ).

As for the so-called school of prophets, no such term occurs in the Old Test. The institution, however, is substantially referred to in several passages which speak of the "sons of the prophets" (1 Kings xx. 33; 2 Kings ii. 2, etc.), showing some kind of a college for the instruction of the young men who came from the time of Samuel onward. The intimations on the subject are, indeed, obscure, yet sufficiently clear to warrant the general belief in their existence. In later times they were doubtless merged in the regular synagogal schools referred to below. See PROPHETS, SONS OF.
immediately on their return to Jerusalem, to gather around him those who were skilled in the law, and with the assistance trained in number of public teachers. The less distinguished of these teachers went into the provincial towns of Judea, gathered disciples, and formed synagogues; while the more accomplished of them remained in Jerusalem, became members of the Great Synagogue, and collected large numbers of young men, whom they instructed in all things appertaining to the law, in the prophets, and in the sayings of the sages of old (Eccles. ii, 9–11; Mishna, Abot, i, 1).

Scrolls were given to children upon which were written passages of Scripture, such as Shema (i.e. Deut. vi, 4), or the Hallel (i.e. Psa. cxiv–cxviii, cxxxi–cxxxvi), the history of the creation to the death of Adam (Gen. i–viii, 1), or Lev. ii, 18 (comp. Jerusalem Talmud, Megilla, iii, 1; Gittin, 60 a; Sophersen, v, 9). The course of study pursued in the metropolis was more extensive (Prolog. to Eccles. and Eccles. xxxviii, 24, ecc.; xxxix, 1, etc.), that of provincial towns more limited, while the education of the small and more remote places or villages almost exclusively depended upon what the inhabitants learned when they went up to Jerusalem to celebrate the festivals, and was therefore very insignificant. Hence the phrase אוחרי שבת, country people, came to denote the uneducated, the illiterate; just as paganus, or pagan, a countryman or villager, is for a similar reason used for heathens; while urbani, urbanus, or an inhabitant of a city, denotes education.

The schools now began to increase in importance; and the intercourse of the Jews with the Babylonians, the Persians, and the Greeks widened their notions of education, and made them study foreign languages and literature and Hebraize their philosophy. The Essenes, who found it necessary to separate themselves from the nation because of their foreign innovations, also devoted themselves to the education of the children; but their instruction was confined to the divine law and to morals (Josephus, War, xi, 8, 12). See Essenes. Simon ben-Shetach (I.C. 80) has the merit of having introduced superior schools into every large provincial town, and ordained that all the youths from the age of sixteen should visit them (Jerusalem Kethuboth, viii, 11), introducing government education. So popular did their schools become that while in the pre-exilic period the very name of schools did not exist, we now find in a very short time no less than eleven different expressions for school, e.g. מחלוש, or מחלוש = דאוס, מחלוש אָבָט = דאוס (Midrash Coh. 91); מחלוש, or מחלוש = סקוליה (Midrash Shir Hashir, 15 a); מחלוש, or more frequently מחלושת (Yebam. 24 b; Abot, v, 14); מחלושת, house of learning (Jonath. on Ezod, xxxiii, 7); מחלושתה, the house of books (Midrash Echa, 70 b); מחלושות, the house of the teacher (ibid. 77 b); מחלושות, the house of the master (Mabba Ratham, 21 a); מחלושות, the house of instruction (Gittin, 58 a); מחלושות, the seat, i.e. where the disciples sat at the feet of their master; מחלושות, the vineyard (Rashi on Yebam. 42 b); and מחלושות, an array, where the disciples were arrayed according to their seniority and acquirements (ocholin, 173 b).

The etymologies of some of these words, and the signification of the others, give us in a very striking manner the progressive history of Jewish education, and tell us what foreign elements were introduced into Jewish pedagogy. Some idea may be formed of the deep root juvenile education has struck in the hearts of the Jews from the following declaration in the Talmud: “The world is preserved by the breath of the children in the schools;” “A town in which there is no school must perish;” “Jerusalem was destroyed because the education of children was neglected” (Sabbath, 119 a).

As the national education of this period is that which

the apostles and the first disciples of Christ received, and as this must be of the utmost importance and interest to Christians of the present day, we shall now briefly state what the Talmud and the Midrashim consider to constitute the proper education of a respectable Jew, and give their notions of schools and the mode of instruction. We must begin with the schools. A school or teacher was required for every twenty-five children; and when a certain number had been instructed only one master and an assistant (Raba Ratham, 21 a). Schools must neither be established in the most densely crowded parts of the town (Peschaisch, 112 a), nor near a river which has to be crossed by an insecure bridge (Raba Ratham, 21), so as not to endanger the health of the children. The age to which the children were to be instructed is six years (Kethuboth, 50 a); before that time the father must instruct his son. Thus it is related that R. Chija ben-Abba would never eat his breakfast before he had repeated with his son the lesson which he gave him on the previous day, and taught him at least one new verse (Kidushah, 60 a). About the age of five or six a boy had to study the Bible, at ten the Mishna, and at fifteen the Talmud (Abot, v, 21). Great care was taken that the books from which instruction was imparted should be correctly written (Peschaisch, 112 a), and that the lessons taught, especially from the Bible, should be in harmony with the ten commandments and the regulations of the children (Aboda Zara, 19 a; Berach. 68 b, on the practical [Kidushah, 40 b], few at a time, but weighty (Vinckera Rabba, axi., ii). The parents never ceased to watch that their children should be in the class at the proper time. We are told that Raba ben-Huna never parroqueted of his breakfast till he had taken his son to school (Kidushah, 60 a). Josephus, therefore, and not at all exaggerated when, writing against Apion, he said, “Our principal care of all is to educate our children” (Apion, i, 12). “If any of us is asked about our laws, he will more readily tell them all than he will tell his own name, and this in consequence of our having learned them as soon as ever we became sensible of anything, and of our having them, as it were, engraven on our souls. Our transgressors of them are but few, and it is impossible, when any do offend, to escape punishment” (ibid. ii, 19). In a similar manner Philo expresses himself: “The Jews looking upon their laws as oracles directly given to them by God himself, and having been instructed in this doctrine from their very earliest infancy, they bear in their souls the images of the commandments contained in these laws as sacred” (Legat. ad Caium, § 81, Mang. ii, 577). “They are taught, in a manner, from their very swaddling-clothes, by their parents and teachers, by instruction and by example, that they are governed by their holy laws, and also by the unwritten maxims and customs, to believe that there is but one God—their Father and the Creator of the world” (Ibid. § 16, Mang. ii. 502).

Of Timothy we are told that from a child he knew the Holy Scriptures (ap. Philo, Tert. de immortal. 18); and a similar statement we find in the Apocryphal book Susannah, ver. 3. From all this we can presume that the education and instruction of the children at first devoted upon the parents, who were the teachers, and who in their leisure hours, especially on Sabbaths and festivals, illustrated the many symbols, rites, and ceremonies which were used on different occasions. The importance of education having now become more and more realized, the foundation of schools became more and more a matter of necessity; and the man who immortalized his name by establishing elementary schools was Jesus of Glimo, who founded them in the city of Jerusalem. After that time children were not allowed to go to school from one city into another; the inhabitants of each city could be obliged to have a school and a teacher (Raba Ratham, 21 a), and it was even forbidden to live in a city where there was no school (Sanhedrin, 17 a). The number of schools now increased, and flourished throughout the length and breadth of the,
SCHOOLS, HEBREW

land; and though it seems exaggerated when the Talmud states that there were 400 elementary schools in Bechar, each having 400 teachers with 400 children each (Gittin, 58 b), and that there were 1000 pupils in the house of the father of Rabbah Simeon ben-Gamaliel who resided in the Temple area of the Greek (Baba Kama, 83 a), it is certain that the number of schools, teachers, and pupils must have been large in every great place. Maimonides thus describes the school: "The teacher sat at the head, and the pupils surrounded him, as the crown the head, so that every one heard the words and lessons. This teacher did not sit on a chair while the pupils sat on the ground, but all either sat on chairs or on the ground. Formerly it was customary for the teacher to sit and the pupil to stand; but shortly before the destruction of Jerusalem it was so arranged that both the teacher and scholar sat" (Jad Hashazaca H, 7, 7; ii, 30). No unmarried person could teach (Kiddush, 82 b), and no choloic person could be a teacher (Abodh, ii, 7). The teacher was to be respected by the pupil; yea, the latter was expected to show him greater respect than his own father, and to entertain for him a warmer attachment (Abodh, iv, 15; Pesachin, 22 b; Sabbath, 119 b; Horayyot, 10b; Gittin, 58 a). In the Talmud we find that the teacher was, both by word and example, to incite his pupils to everything good and noble; he was to endeavor to secure the confidence, the respect, and the affection, both of parents and children; the latter he was to treat rather with kindness than with rigor. As to the objects the teacher can see, he can see the nation in the nature of the people was the main object. As soon as the child could read, the teacher commenced reading Leviticus or Tophath Cohanim, and the reason why this was to be read first was because the little ones are innocent and pure, and the sacrifices symbolize purity, therefore "let the pure ones come and study the law of restoring purity by the sacrifice" (Yad Balshem Toda, 21 a). This curriculum in the study of the law being finished, that of the Mishnah began, to be followed by that of the Gemara; the latter, however, belonged to the higher schools. Besides the national literature, languages were also taught, especially the Greek. Thus we read of Rabbi, who said, "What is the use of the Syriac language in Palestine? Let any one study either the Hebrew or the Greek" (Gittin, 28 b; Sotah, 49 a; Baba Kama, 82 b). Besides the linguistic studies, they also studied astronomy, mathematics, and natural sciences. It seems that gymnastic exercises also originally belonged to the curriculum, but were afterwards introduced as leading to dangerous contact and association with heathen (Aboda Zara, 18 b). Beating, if necessary, with a strap, never with a rod, was to be the principal means of correction; and an instance is mentioned where a teacher was deposed for too great severity. The alphabet was taught by drawing the letters on a board till the children remembered them. In reality, as corrected books were to be used, and the child was to point to the words as he spelled them. The teacher was to make the lesson as plain as possible, and not to lose patience if it was not immediately understood. It was one of the principal duties of an instructor of youth to impress upon him the heart the warnings of the sacred morality and chastity. To acquire fluency, pupils were to read aloud, and certain mnemonic rules were devised to facilitate the committing to memory. The number of hours during which junior classes were to be kept in school was limited. As close as the air of the schoolroom might prove detrimental, the school hours of all boys were fixed between two and four in the afternoon. For similar reasons school-hours were limited to four hours a day during the period from the 17th Thammuz to the 9th Ab, and the teacher forbidden to chastise his pupils during these months. The paramount importance which public instruction had assumed in the life of the Jews can be seen from saying those above cited: "Jerusalem was destroyed because the instruction of the young was neglected" (Sabbath, 119 b); "The world is only saved by the breath of the school-children" (Ibid.); "A town in which there is no school must perish" (Ibid.). The higher schools, or "kallahs," met during certain months in the year only. Three weeks before the sabbath therector had to send in the number of the students for the lectures to be delivered by the rector; and so arduous became the task, as the number of the disciples increased, that in time no less than seven deans had to be appointed. Yet the mode of teaching was not that of our modern universities. The professors did not deliver lectures which the students, like the student in Faust, could "comfortably take home in black and white." Here all was life, movement, debate. Question was met by counter-question; answers were given wrapped up in allegories or parables; the inquirer was led to deduce the questionable point for himself by analogy—the nearest approach to the Socratic method. The New Testament furnishes many specimens of this method of instruction. The extent of instruction imparted in these schools embraced almost all sciences preserved in the Talmud. An important part of education, as we shall more particularly see below, was the learning of a trade. Thus we find among the most celebrated "doctors" tentmakers, saddlers, blacksmiths, and other handiworkers. Besides the elementary schools, which were chiefly intended for popular education, there were, as already intimated, also superior colleges, at first confined to Jerusalem, under the management of the presidents and vice-presidents of the Sanhedrim, the Sophurim (or "scribes") and "shochetim," and "students who ratted a call in the Synagogue Test," and members of the Sanhedrin, who made it one of their principal objects to train young men destined to become the teachers and judges of Israel, and the bearers of the "traditions of the fathers" (Abodh, i, 1). Gradually these academies were multiplicated in the metropolis, and spread over all the countries where the Jews resided. Akbara, Lydias, Babylon, Naphath-de-Canaan, Gilead, Babylonia, and Alexandria, in the process of time, became distinguished for their seats of learning. The following are the presidents and vice-presidents of the colleges which were the depositories of the traditions of the fathers and the supreme arbiters of the religious and educational, together with the most distinguished masters and disciples under each presidency, both in Palestine and Babylonia, to the close of the Talmud, in their chronological order (more briefly summarized in part under PSMBADITHA; SORA; etc.): The TANAIM EPOCH.

H.C.

Simon the Just of Pions.................. 300
Antigonus of Soho.................. 300-170
Jose ben-Joezer of Zereda, and
Josed b-Jochanan of Jerusalem, the first pair, 170-140
(a) Joe-Ben-Peraclia, and
(b) Natai of Arabelia.................. 140-110
(c) Simon ben-Shetach, their pupil, and
(d) Jehudah ben-Tala-dimensional.

Shemaja, and

Abtalion.................. 110-65

Hillel the Great, the Babylonian, in whose fame the presidency became hereditary for about fifteen generations (A.D. 10-415). He was first with Menachem and then with Shammash, who founded a separate school (a.d. 30-41). The former was designated the school of Hillel, which had eighty disciples, called the elders of the house of Hillel, among whom were Jonathan ben-Uziel the Targumian, Dossa ben-Harchonia, Jonathan his brother, and Jochnanan ben-Zakkai; while the latter was designated the school of Shammai, the distinguished disciple of Hillel; among these were Baba ben-Bata, Dossel of Stome, and Zenok, the originator of the Gelemites. The Ben-simoni, in a.d.

10-30

Gamaliel I, ben-Simoni I, called Hacohen the elder, the teacher of the apostle Paul, 50-90

Simon II, ben-Gamaliel I.................. 50-70

Jochnuan ben-Zakkai, founder of the school of Jabite or Jamnia, 65-90.
Simón II, ben-Gamaliel II, and R. Nathans, vice-president, author of the Mishna or Tosefta, which contains the Oral Law, and of a commentary on Abot. The distinguished men of this presidency are: R. Judah ben-Hasan; of Ushah; R. Jose ben-Chalilapa, of Sephoris, author of the history called Sefer Olam; R. Joacham, of Alexandria; R. Simon ben-Jachiel, of Galilee, the reputed originator of the Cabala and author of the famous Zohar.

140-185

Jehudah I, the Holy, Ha-Nasi, ben-Simon III, editor of the Mishna, and called Rabbi. He celebrated disciples, who also became heads of schools, were called semi-Tosafists, and perfected their master's work, the Mishna. These were R. Janai, whose school was at Akbara; R. Chi-ja-Achilah; Ushsh the elder, and Ahra the elder, the father of the Mishna, and Abba Araka, who was the founder of the school at Pumbeditha.

185-190

Gamaliel II, ben-Jedudah I, in whose presidency the college was transferred from Jabne to Tiberias.

190-220

Jehudah II, ben-Simom III, also called Rabbi, the teacher of Origen. The teachers of this period were: R. Chaninah, the most distinguished disciple of Jedudah, who founded a school at Sephoris; R. Simla, the celebrated Haggadist, who reduced the law of Moses to 613 commandments; R. Jose of Mon; R. Chaggar, and R. Judah ben-Nachman, etc.

220-270

Abba Araka, surnamed Rab, having returned to his native place a second time, founded a school at Sora, which maintained its celebrity for nearly 600 years, and which attracted 12000 students in the lifetime of its founder. He was the president of it twenty-eight years.

219-247

Samuel Jarchini, rector of the college at Nahardea, is elected rector-general of all the schools in Babylon.

247-297

R. Hana became rector-general. He had only 800 students, as, during his rectorate, R. Jehudah ben-Jeeshakel founded a school at Pumbeditha, and R. Chadda founded another school at Sora, which attracted many of his disciples. Nahardea is destroyed; the students emigrate into the neighboring schools.

297-327

IX. — E K

Tiberias.

Gamaliel IV, ben-Jedudah II. 270-300

Jedudah III, ben-Gamaliel IV. 300-309

Hillel II, ben-Jedudah III. 330-355

Hillel ben-Jedudah III. 330-355

Sora.

Chadda of Kaphri, founder of this school, is rector.

300-309

Rabba ben-Huna succeeded Chadda to the rectory, and when he died the college was without a rector for nearly fifty years.

300-350

Pumbeditha.

R. Jedudah ben-Jeeshakel, founder of the school at Pumbeditha, is elected rector-general of all the colleges, and officiates two years.

300-350

Chadda of Kaphri, founder of the school at Sora, is elected rector-general.

300-350

Rabba ben-Nachman, who succeeded Chadda, revived the college to such a degree that he obtained 1200 students.

300-350

Joseph ben-Chija, the blind. He translated the prophets of the Old Testament into Chaldee.

333-338

Abaji ben-Cajali, surnamed Nachman, the nephew of Rabba, succeeded R. Joseph the blind.

333-338

Rabba ben-Joseph, ben-Chama, who founded the school at Macha, was elected rector after Abaji.

333-338

Nachman ben-Isaac held the rectorate four years.

353-356
At first the organization of these schools or colleges was very simple. Besides the president or rector, who was the chief teacher, and an assistant, there were no offices or ranks. Gradually, however, superior and subordinate ranks involuntarily developed themselves, and ultimately assumed the following form: The college, which met during certain months of the year, and was generally called Methiba (מציחה), seat of learning, was presided over by the chief rabbi, who was called Rish-methiba (רishi מתיבה), and was elected by the school. Next to this Rish-methibah or rector came the Rish-kal la (שלכו ישראל), the chief of the assembly, whose office it was to expound or simplify to the students, during the first three weeks of the session, the theme upon which the rector had determined to lecture. In later times there were seven Rasha-koloth (רשבא קולות), such interpreters, composed of the associates (קרעים) and members of the Sanhedrim, varying in rank. The president or teacher occupied a raised seat, the interpreters sat next to the rector on lower seats, while the disciples sat below them at the feet of their teachers (Acts xii, 3).

The mode in which instruction was communicated was chiefly catechetical. After the master had delivered his dictum or theme, the disciples in turn asked different questions (Luke ii, 46), which he frequently answered by parables or counter-questions, a line of conduct also pursued by Christ in accordance with the custom of the time (comp. Matt. xxii, 17-22; Luke xx, 2-4, etc.). Sometimes the teacher introduced the subject by simply asking a question connected with the theme he proposed to propound; the replies given by the different disciples constituted the discussion, which the master at last terminated by declaring which of the answers was the most appropriate. Thus R. Jochanan ben-Zakkai (B.C. 30), on one occasion, wanted to inform his disciples what was the most desirable thing for man to get. He then asked them, "What is the best thing for man to possess?" One replied, "A kind nature:" another, "a good companion:" another, "a good neighbor:" another, "the power to foresee consequences:" while R. Eleazar said "a good heart." Whereupon R. Jochanan remarked, "I prefer R. Eleazar's answer to yours in all your answers are comprehended" (Abot iv, 15). Who is not reminded thereby of the questions the Saviour to his disciples in Mark viii, 27-30? Allegories, riddles, stories, etc., formed another key whereby instruction was communicated in these schools. The oppressive heat of the Eastern sun, which was especially felt in the crowded colleges as we have seen, twelve hundred disciples were sometimes present, tended to make the students drowsy, a hard subject was discussed. The wise teacher, therefore, when he perceived that the attention began to wane, at once introduced a merry anecdote or a moral story, or propounded a ludicrous riddle, which divertingly aroused the disciples and enabled the master to go on with his theme. Hence the abundance of sublime and ridiculous parables and stories that permeate throughout the Talmud and Midrashim which these lectures; and hence, also, the parabolic teaching adopted by our Saviour.

The extent of instruction, or what constituted instruction in these schools, can hardly be defined. A assed reader will see from a most cursory glance of the discussions recorded in the Talmud that a number of subjects were brought forward in these schools. Theology, philosophy, jurisprudence, astronomy, geography, botany, geography, arithmetic, music, were all themes which alternately occupied the attention of masters and disciples. In fact, the Talmud, which has preserved the topics discussed in the schools, is an encyclopedia of all the sciences of that time. It shows that in many departments of science the Jewish teachers had anticipated modern discoveries, would require far more space than the limits of a little article to quote instances in confirmation of this. We can therefore only refer the reader to the treatise Rambah, which remarks, "I prefer R. Eleazar's answer to yours in all your answers are comprehended" (Abot iv, 15).
Every one met in the street must be saluted (Aboth, iv, 10). Not to respond to a salutation is characterized as committing a robbery (Berach. 6 b). An ordinary man is to be saluted with the words, "Peace be with thee!" a king, "Peace be with thee, my king! peace!" (Gittin, 62 a). Salutations in the house of prayer are not allowed (Derek Erets, 10). One must rise before a learned man (Kethuboth, 103 b), and before the hoary head, even if he be a non-Israelite (Kethuboth, 71, 73; Shabbath, 51, 52; the superior is to walk in the middle (Erub. 54 b); the teacher must always be on the right of the pupil in walking (Yoma, 37 a). One must not leave a friend without asking his permission (Derek Erets, 2); when leaving one's teacher the disciple must say, "I am dismissed," whereas the response is, "Depart in peace!" (Berach. 64 a). Never enter a house suddenly and without notice (Kethuboth, 62 b); nor sit down before the superior has seated himself (Jerus. Kethuboth, 25); nor lean in the company of superiors (Derek Erets, § vi). "Seven things are seen in the conduct of an educated man, and seven are not seen in the conduct of an uneducated man. An educated man will be quiet in the presence of one more educated than himself; 2. Will not interrupt any one speaking; 3. Will not give a hasty reply; 4. Will ask appropriate questions; 5. Will give suitable answers; 6. Will answer the first thing first, and the last thing last; and 7. Will cautiously say when he does not know the answer, and give credit to those things which will be seen in the uneducated." (Aboth, v, 10).

Another most essential part of education was the learning of a trade. Thus R. Gamaliel declares, "Learning, no matter of what kind, if unaccompanied by a trade, ends in nothing and leads to sin" (Aboth, ii, 2); R. Judah ben Bava called "the removers of the first great sin" those who had a trade, and used to say, "labor honors the laborer" (Nedarim, 49 b). R. Ismael, the great astronomer and powerful opponent of Gamaliel II, was a needle-maker (Jerus. Berach. iv, 1); R. Jose ben-Chalapha, of Sepharis, was a tanner (Shabbath, 49 b). These rabbis, like the apostle Paul, gloated in the fact that they could maintain themselves and teach independently of patronage, and yet took a pride in their respective trades, which were attached to their names, viz., rabbi Joachanan, the shoemaker; rabbi Simon, the weaver; rabbi Joseph, the carpenter. This will account for the apparatus with which the apostle Paul, a thorough student, should have been a tent-maker.

Though female education was necessarily limited, owing to the position which women occupied in the East, yet it must not be supposed that it was altogether neglected. The fact that mothers had to take part in the education of their children would of itself show that their own education must have been attended to. We are, however, not confined to this inference. The 31st chapter of Proverbs gives us a description of what was the education of a woman and a housewife in the Old Testament. In the Talmud we find the daughters of R. Samuel were even first-rate students of the Malachu (Kethuboth, 10). It is not only the study of Greek as a necessary part of a man's education, but recommends it also for women as a desirable accomplishment (Jerus. Sota, s. f.). To show the desirability of uniting with Hebrew the study of Greek, this celebrated rabbi, in accordance with the ancient practice, illustrates it by a passage of Scripture (Gen. ix, 29): "Because the two sons of Noah, Shem and Japheth, unitedly covered the nakedness of their father with one garment; Shem (representing the Jews) obtained the fringed garment, the Talith; Japheth (representing the Greeks) got the philosopher's garment, the Phylacteries," which ought to be united again (Midrash Rabba [Gen. xxxix]). Hence R. Abbahu was not only himself a consummate Greek scholar, but had his daughter instructed in this classical language, since he regarded it as necessary to a good female education, and quoted R. Joachanan as an authority upon this subject (Jerus. Sotait, 111, s. f.; Sota, s. f.).

V. Literature.—The best works upon this subject are the Talmud and Midrashim; but as these are not generally accessible, we mention the margin works of Zunz, Die godsdienstlichen Vertreter der Juden (Berlin, 1832); Frankel, Der geistliche Bevölkert (ibid. 1840); Monatschrift, i, 509, etc.; Wunderbar, Biblioth.-talmudische Medicin (Riga and Leipzig, 1850–60); Lewyson, The Zeitschrift des Juden (Frankfort-on-the-Main, 1858); Gritz, Geschichte der Juden, vols. iii and iv; Rappaport, Chassidismus, i, 417, 460, 512, ii, 66, 167, 210, 258; iii, 589; Eidersheim, History of the Jewish Nation, p. 297 sq.; Schütte, Lehrbuch der neuestenzeitlichen Gesichtspunkte, p. 466 sq.; Hartmann, Die enge Verbindung des A. T. mit dem Neuen, p. 377–884; Gürner, Jahrhundert des Heils, i, 156–192; Van Gelder, Die Völkelschule des judischen Altherrn nach talmudischen und rabbinischen Quellen (Berlin 1872); Marcus, Zur Schol-Pädagogik des Talmud (ibid. 1866).

There are numerous monographs on the subject: Held, De Jud. Schol. (Norimb. 1664); Heineb, De Academia Hebrorn. (Vitent. 1788); Lund, De Scholasticis Hebraeorum. (Halle, 1770); Reinicke, De Schola Hebr. (Weissen, 1729); Semenova, De Literatur des Hebr. in his Heptas Exercit. (Vitent. 1657); Schambolla, De Acad. Jud. (Neap. 1708); Weissen, De Schole et Academia Hebr. (Heidelberg, 1782); Zorn, De Schola Jud. (Sedin, 1716); and others cited by Vollaud, Index Program, p. 198. On the Schools of the Prophets, see E. Tuch, Palustria orientalis (Leipzig, 1775); Rüdiger, Verdi, Lehrbuch des Ritus (1785); Silberroth, De Propheta Domini (Jena, 1710). See PROPHETS, SCHOOLS OF.

SCHOOLS, PARISH. See PARISH SCHOOLS.

SCHOOLS, SINGING. The highest estimation in which singers were held in the ancient Church appears from the institution of schools for their instruction and training, and the great attention which was paid to these schools and their presidents. Such schools were established as early as the 6th century, and became common in various parts of Europe, particularly in France and Germany. The most celebrated was that founded at Rome by Gregory the Great, which was the model of many others afterwards established. From these schools originated the Gregorian notation, a plain system of church music, which the choir and people sang in unison. The prior or principal of these schools was a man of considerable dignity and influence in the Church. The name of this officer at Rome was archiepiscopus eccles. Romanus, and elsewhere primicerius (or prior) scholae cantorum. See Colew, Christ. Ant. p. 124; Riddle, Christ. Ant. p. 125; SINGING.

Schoonmaker, Henricus, a (Dutch) Reformed minister, was born at Roechester, Ulsar Co., N. Y., in 1739. He was converted early in life under the ministry of the Rev. Henricus Freelinghenius, and studied theology with the Rev. John H. Goetschius, who became his father-in-law. Dr. Schoonmaker was one of the first ministers of the Reformed Church who were educated in Holland, independently of the Church in Holland. He was called immediately (1783) to the churches of Poughkeepsie and Fishkill. When the ministers arrived to ordain him, they found the church doors barred against them by the Conferentie party, and the service was conducted under the shade of a large tree in a wagon, in which upon his knees the candidate took his vows in presence of a large congregation. A ministry thus begun was not likely to be fruitless. His labors were greatly blessed, notwithstanding the opposition to which he was constantly exposed. In 1774 he removed to Acquacknock (now Passaic), N. J., and subsequently to Pharsalia, and the neighboring church of Teterow (now Paterson). In 1816 he resigned his charge, and died in 1829, having survived nearly all of his contemporaries. His grateful people continued his salary for life. He was the last
but one of the old Dutch clergy who preached only in the language of Holland. Dr. Livingston pronounced him the most eloquent preacher in that tongue whom he had ever heard in this country. He was always popular in the pulpit, and his style was nervous, eloquent, and powerful. His life was blameless, and his ministry of over half a century was full of good fruits. See Sprague, Annals of the Amer. Pulpit; Kip, Historical Discours (W. J. T.)

Schoonmaker, Jacob, D.D., a son of the foregoing, was born May 11, 1777, at Acquackonock (now Passaic), N. J. He graduated at Columbia College in 1799, and pursued his theological studies under Drs. Solomon Froehlich and John H. Livingston. He was licensed in 1801, and the next year became the pastor of the united churches of Jamaica and Newtown, L.I. This associate relation lasted until 1849, when the Newtown church became independent. He remained pastor at Jamaica one year longer, when on Aug. 6, 1850, he preached his farewell sermon, and then retired from the active ministry on account of age and infirmities. He died April 10, 1852, finishing his course with joy. Dr. Schoonmaker was a large, portly man, with a very benevolent countenance and a sweet savor of cheerful piety in his whole aspect and demeanor. He was dignified, courteous, discreet—a faithful preacher, a devout pastor, a sound evangelical theologian of the Calvinistic school—an active supporter of the educational institutions and benevolent institutions throughout the church, and a workman who needed not to be ashamed. He was a father among his people, and, while cherishing the most profound attachment to his own Church, was truly catholic in feeling towards all who love Christ. See Sprague, Annals of the Amer. Pulpit, vol. ix. (W. J. T.)

Schoonmaker, Martinus, a minister of the (Dutch Reformed) church, was born at Rochester, Ulster Co., N. Y., in 1787. He studied under Martinus, and was licensed to preach in 1765. His ministry was spent on Long Island, embracing the churches of Brooklyn, Flatbush, New Utrecht, Flatlands, Bushwick, and Gravesend. From 1765 to 1783 Harlem was also included in his extensive bishopric. All of these have long been separate and important churches. His labors were necessarily very arduous, but he bore them with unflagging zeal and energy down to his old age, which was so vigorous that at fourscore his sight, hearing, and other faculties were as perfect as in former years. He was universally beloved and revered, without an enemy, and yet he had his irritants. He resided at Flatbush, while the care of all the churches of Kings County came upon him daily. During the Revolutionary war he was an ardent patriot, and it is related that on his personal word and statement he secured from the Congress in session at Harlem the release of a person who was suspected and imprisoned as a Tory. He preached on Sunday in the Holland language. His memory is held in high esteem as one of the fathers of the church and a relic of the old race of venerable Dutch dominies. He died in 1824. See Corwin, Manual of the Reformed Church. (W. J. T.)

Schöpf, Joseph W., a Lutheran theologian, was born at Chemnitz, April 12, 1793, and died July 15, 1851, at Dresden. He published, Die symbolischen Bücher der evangelisch-lutherischen Kirche, deutsch mit Anmerkungen und Erklärungen, etc. (Leips. 1829, 2 vols):—Die Widerlegung der auszugsbischen Confession, etc. (ibid. 1830):—Der Geistliche und unsere Zeit (Dresden, 1851). See Zuchold, Bibliotheca Theol. ii, 1173; Winer, Handbuch der theolog. Literatur. (B. P.)

Schott, Christian Heinrich, a German doctor of philosophy, was born at Schneeberg in 1808, and died May 1, 1840, at Goritz, near Meissen, where he had been pastor since 1830. He published, Bäckische Rundschau—Züge aus dem Leben des Christian Heinrich Schott, der drei ersten Jahrhunderte (ibid. 1829):—Das Leben unseres Herrn u. Heilandes Jesu Christi (ibid. 1830):—Geschichte der deutschen Bibelübersetzung Martin Luthers (ibid. 1865). See Zuchold, Bibliotheca Theol. ii, 1174 sq.; Winer, Handbuch der theolog. Literatur, i, 764. (B. P.)

Schott, Heinrich August, an eminent German theologian of the so-called supernaturalist school, was born at Berlin, 1770, and died at Berlin, 1856. He began his university studies at the age of sixteen, and was soon distinguished for his fine Latin style and for his progress in theology. Among his teachers at Leipsic were Beck, Platner, Carms, and Reil. In 1801 he began to give lectures, and in 1803 he became one of the university inspectors. His edition of the New Testament of Dionysius of Halicarnassus (1804) gave him a place in the world of learning; still more so his edition of the New Testament with Latin translation (Leips. 1805). In 1809 he became professor of theology at Wittenberg, and lectured with great success on dogmatics, hermeneutics, and sacred eloquence. His Epitome Theologiae Christi (Leips. 1811) was an able work, but his fame was diminished by its complicated style. In 1812 he went to Jena, and there spent the rest of his fruitful life. The nucleus of a preacher's seminary which he there formed was richly endowed in 1817. His lectures were delivered in Latin. His work on eloquence, Die Theorie der Beredten Worte (Leips. 1829), is his best title to lasting fame; but his Inagoge Historico-criticus in Libros Novi Testamenti Sacros (Jen. 1839) is abundant in erudition, and still deserves study. In character Schott was upright, simple, and deeply pious. His motto expressed his life—"proving, believing, differing, suffering, and acknowledging trouble and suffering as a divine type." He died in 1836. See his Life by Danz (Leips. 1836); Herzog, Real-Encyklop. xiii, 698-701. (J. P. L.)

Schott, Leopold, a German rabbi, was born at Randegg, Baden, June 27, 1807. Having finished his rabbinical studies at Hechingen and Carlsruhe, in 1829 he went to Heidelberg to attend the lectures at the university, at the same time pursuing his rabbinical studies with Solomon Furst. In 1831, after having passed his examination, he was appointed religious instructor in his native place. In 1833 he was appointed for the rabbinate of his native city. He died Jan. 20, 1869, in Buhl, Baden. He contributed a number of essays to the Zeitung des Judenthums and the Orient, and published a number of Sermons. See Fürst, Bibli. Jud. iii, 286; Kayserling, Bibliothek jüd. Kennerzreihen, ii, 293 sq. (B. P.)

Schottin, Johann D. Fr., Dr., a German preacher, was born Jan. 4, 1759, at Heigendorf, in Weimar. He belonged to a Hugenot family, whose name was originally Claudien, which the father of Johann D. Fr. changed into Schottin. Having completed his studies at Jena, he was in 1814 appointed pastor at Kostritz, in Reuss, where he remained till his death, May 16, 1866. He was an excellent pupil orator, but the many calls which he received from Hamburg, Bremen, and Jena he refused. He is best known as one of the most recent German hymn-writers. Besides, he published a number of devotional works. See Zuchold, Bibliotheca Theol. iii,
SCHRADER, Johann Heinrich Ludolf, a Roman Catholic divine, was born July 12, 1806, at Gifhorn, in Lüneburg, a pupil and professor of classics, history, and Greek at Herborn; in 1707 he was made consistory and preacher at Dillenburg; in 1709 he was appointed professor of theology at Herborn; in 1721 he was called to Marburg, and in 1728 to Herborn, where he died, Jan. 29, 1735. He wrote Disserationes in Francisci Monaci, Francisci Monaci, et Priscici, Olaus, &c. Obtinent Messem suum Auspicacionem Judaeos eaque Mystero (Frankl, a. O. 1706);—Dissertatio de Holocoastis Judaeorum et Gentilium Casacquenia (Herborn);—Dissertatio de Mystero Holocostaurum (ibid.);—Dissertatio de Beata Arundaci ad Pass. XXVIII, 31 (ibid. 1719);—Dissertatio de Vindallis Setuum (ibid.);—etc. See Ernst, Bibl. Jud. iii, 297 sq.; Winer, Handbuch der theolog. Literatur, p. 765; supplement, p. 300. (B. P.)

SCHRACK, Johann Heinrich, doctor and professor of theology, was born March 20, 1767, at Gerkhausen, in Hesse, a pupil and professor of classics, history, and Greek at Herborn; in 1707 he was made consistory and preacher at Dillenburg; in 1709 he was appointed professor of theology at Herborn; in 1721 he was called to Marburg, and in 1728 to Herborn, where he died, Jan. 20, 1735. He wrote Dissertatio in Francisci Monaci, Francisci Monaci, et Priscici, Olaus, &c. Obtinent Messem suum Auspicacionem Judaeos eaque Mystero (Frankl, a. O. 1706);—Dissertatio de Holocoastis Judaeorum et Gentilium Casacquenia (Herborn);—Dissertatio de Mystero Holocostaurum (ibid.);—Dissertatio de Beata Arundaci ad Pass. XXVIII, 31 (ibid. 1719);—Dissertatio de Vindallis Setuum (ibid.);—etc. See Ernst, Bibl. Jud. iii, 297 sq.; Winer, Handbuch der theolog. Literatur, p. 765. (B. P.)

SCHREIBER, Heinrich, a Roman Catholic divine of Germany, was born July 14, 1758, at Freiburg, in Breisgau, where he also completed his studies. In 1816 he returned to Breisgau and became head of the gymnasium, and in 1826 he was appointed professor of moral theology at the university there. In 1831–34 he published his Manz Manual of Moral Theology (2 vols.), in which he protested against a life-long vow and celibacy. The archbishop ordered to make him promise to keep such views in future to himself, but against such a promise Schreiber publicly protested. He was obliged to resign his theological chair, but was given a chair in the faculty of philosophy. In 1845 he was appointed professor of philosophy, and in 1846 he received holy orders, and in 1848 he was made doctor of theology. In 1850 he was appointed professor of dogmatics in Louvain; in 1851 he was called to Rome as professor of introduction to the New Testament, where he afterwards also lectured on dogmatics; and in 1857 he was appointed to the Würzburg University. The office he was obliged to resign, as he would not subscribe in 1868 to the new laws of the state. Since then he lived mostly in Frankfort, and died at Pothier Feb. 22, 1875. He wrote Theses Theologicae and De Unitate Ecclesiae. In popular writings he explained the Syllabus, etc. See Literarischer Handweiser, 1875, p. 198. (B. P.)

SCHRÖCK, Johann Matthias, a Protestant theologian of Germany of eminent culture and extended usefulness in the department of historical learning, was born at Vienna July 26, 1733, and was early destined for the pulpit. His education was obtained chiefly at the Lutheran Gymnasium of Presburg, the Steinmetz School at Klosterbergen, near Magdeburg, and the University of Göttingen. Mosheim and J. D. Michaelis were then the heads of the faculty of the latter institution, and the influence over Schröck was such that his attention became predominantly fixed on history and the Oriental languages, and he was led to form habits of independent research, and to cultivate an attractive historical style—qualities which adhered to him through life. After his professorship at the Gymnasium at Richibuc, and at A. Bell, of Leipsic, in editing several learned periodicals; but he also found time to perfect his knowledge of Greek and Roman antiquities under the tuition of professors Christ and Ernesti. In 1766 he received the master's degree, and became a tutor in the university, and subsequently custodian of the library, and in 1761 he was made professor of extraneous languages. In 1767 he was made professor of history, and in 1770 of further preference in the University of Leipsic, and the unsatisfactory income which he derived from literary labors, now decided him to accept a call to the chair of poetry in the University of Wittenberg, which he held until 1775, when he was transferred to the chair of history, in the duties of which station he spent the remainder of his life. He projected a three years' course, in which he was accustomed to traverse not only the history of literature, the Church, the Reformation, theology, and Christian antiquities, but also that of European states, Germany and Saxony in particular, and also of culture and the arts; and, in addition, he issued numerous reviews, editions of works written by his friends, and independent works of more or less importance. His fidelity to his work was acknowledged by the government at Dresden, who transmitted to him a testimonial in writing and an honorary donation, together with the offer of a titular papacy of a high state, which latter he declined. He was married to Frederica Pitzschild, by whom he had four children, all of whom died in early childhood; and he died Aug. 2, 1808, in consequence of a fall experienced in his library, on the seventy-fifth anniversary of his birth.

As a gentleman, Schröck was highly qualified by his learning, impartial love of truth and devotion to morality, uniriting industry in the work of collection and research, and the clearness, simplicity, and logic of his style. He was deficient in the critical apprehension and philosophical penetration needed to discover the internal connection of events; and his style, as a whole, lacks the picturesque coloring and pungency of meaning which characterize a classical writer. He was not a master in the art of descriptive writing, but, nevertheless, a meritorious and successful author. His works were numerous, but have been superseded by more complete and thorough books of later origin. They include biographical notices of many of other persons eminent in the history of the world: textbooks and manuals of history, and other similar works, none of which possess permanent value. The Historia Religionis et Ecclesiae Christianae in Usus Leo-
tonus, published in a seventh edition by Marheinecke in 1829, is noticeable chiefly because of its wealth of material, its judicious references to sources and helps, the systematic arrangement of its contents, and its excellent Latin. The great work of his life, beyond question, is the *Auszührliche Geschichte der christlichen Kirche*, in 45 vols., the last two of which were completed by Prof. Tschirner after the author's death. The work covers eighteen centuries of the Christian Church, and is characterized by impartiality and completeness to a remarkable degree. No work has yet appeared which combines so great magnitude with so many advantages as does that of Schröder, though the earlier volumes, being intended simply to furnish a comprehensive course of reading in Church History, leave much to be desired on the part of cultured readers.

Schröder, Friedrich Wilhelm Julius, a Reformed theologian of Germany, who died Feb. 27, 1876, at Elberfeld, where he had already succeeded the celebrated Krummacher as pastor of the First Reformed Church, is the author of a *Commentary on Genesis* (Berlin, 1844):—Vesperklärungen (ibid. 1846, 2 vols.):—a Commentary on Deuteronomy (prepared for Lange's *Bibellwerk* [Elberfeld, 1866]):—a Commentary on Ezekiel (also prepared for Lange's work). Besides, he published a number of Essays, Sermons, etc. See Zuchold, *Bibl. Theol. ii*, 1182 sq.: *Theol. Jahrbuch*, 1877, p. 228. (B. P.)

Schrubert, Gottlieb Heinrich von, a German philosopher and mystic, who for more than half a century exerted a very extended and beneficent popular influence in almost every field of thought, was born in Saxony, April 26, 1714. His parents were pious and peculiar. In his fifth year he learned from his mother such a lesson on the death of Christ as remained a benediction to him to his latest hour. He studied at Greiz and Weimar, and at the latter place was taken into the house of Herder. He also came into contact with Goethe and Jean Paul. In 1759 he received his degree of Doctors of Theology, first at Jena, and later in 1761 in Leipsic, but in 1801 he changed theology for medicine, and went to Jena. Here he came under the personal and scientific influence of Schelling—an influence that lasted during life—as also under that of the naturalist William Ritter. In 1805 he married, and began the practice of medicine at Altenburg, supplementing his scanty fees by private lectures on Dante and other metaphysical authors. His main works were *Die Christliche and die Götter*. In 1805 he moved to Freiburg, where he began his great work *Abhandlungen einer allgemein gefühlten / Gesch., 1192 sq.: d. päpste*. He was made rector of a scientific school at Nuremberg. Here he wrote his *Symbolik des Traumes*, also *Altes und Neues aus dem Gebiet der innern Seelenkunde* (1813). This last work made a great sensation, and occasioned congratulations from Harms and Neander. Works in the same warmly religious vein are, *Erzählungen* (4 vols.):—*Biographien* (3 vols.):—*Der Erworb* (an autobiography, 3 vols.). His last work was *Erinnerungen der Tage einer Heiligen von Orleans*. Schubert left Nuremberg in 1816; in 1819 he returned to Erlangen; in 1827 he went to the new University of Munich. His latter years were passed in peace and affluence. He died July 1, 1860. See *Evangel. Kirchenzeitung*, 1860, No. 62; Herzog, *Real-Enzyklop.* (J. P. L.)

Scherderoff, Johann Georg Jonathan, a German Protestant minister, was born in 1706 at Gotha. In 1790 he was appointed minister at Drakendorf, near Jena; in 1797 succeeded Altenburg; in 1803 arch-deacon; in 1806 first pastor and superintendent at Ronneburg, and in 1824 member of consistory. In 1836 he retired from the ministry, and died in 1843. He wrote:—*Über die evangelischen Kirchen in der Mark Brandenburg* (1831), etc. See Zuchold, *Bibl. Theol. ii*, 1188; *Regensburger Real-Enzyklop.* (B. P.)

Schudt, Johann Jakob, a German Jewish writer, was born Jan. 14, 1664, at Frankfort-on-the-Main, where he also died, Feb. 14, 1722, as rector of the gymnasium. Schudt is well known as the author of the *Memorabilia de Vitiis et Judicis Literaturos* (Frankf. 1714–17, 4 pts.). This may be regarded as the most important of his works, which are enumerated by Furti in his *Bibl. Jud. iii*, 292 sq. See also Steinschneider, *Bibliog. Handbuch*, s. v.; Winer, *Handbuch der theol. Literatur*. (B. P.)
SCHULTENS, Albert, an eminent Dutch Orientalist, the father of modern Dutch grammar, was born at Groningen, 1686, and early destined to a theological career. He studied the original languages of the Bible—Chaldee, Syriac, and Rabbinic—and after a time Arabic. The earliest fruit of these studies was a public disputa
tion with Onthus, at the age of fourteen, in which he maintained that the study of Arabic is indispensa
tively necessary to a knowledge of Hebrew. After com
ting his studies, he visited Leyden and Utrecht, and became acquainted with Reland, through whom he published his first book, Animalis. Philolog. in J ohum (Utrecht, 1709). Having returned to his home, he be
came candidate in theology, and in the following year (July 4, 1709) received the degree of doctor in that science. He then returned to Leyden to make use of its library. In 1711 he assumed the pastorate of the Church at Wassenaer, but exchanged that post after two years for the chair of Oriental languages in the Academy of Franeker. In 1729 he was placed in charge of the Leyden Theological Seminary and made custodian of the Warner MSS. He served three years, doing the work of a professor without enjoying the title or re
cieving any remuneration, after which period a chair of Arabic was specially created for him, with which the addition of Hebrew, in accordance with the wishes of the Dean of the Faculty, was connected in 1740. He held these positions without in
terruption to the time of his death, Jan. 26, 1750.

The services which Schultens rendered to philological science are of great value. He was the first to overturn the notion that Hebrew is the original language given to man by God, by showing that that tongue is simply a branch of the Semitic family, and finds an essential and indispensable aid in the comparison of the Arabic. Besides defending this position in his early disputation with Gussetius, he enforced his claims in the work Origines Hebrew. This opened a new path to Hebrew gram
matical and exegesis, and also contributed ma
tially to the advancement of the study of Oriental lan
guages and the attainment of its subsequent independ
ten position. Numerous pupils helped to spread the knowledge of his views and methods, and founded the Dutch school of grammar and exegesis. The faults of Schultens are too great readiness in the tracing of analo
gies and the forming of combinations, and a lack of thorough criticism in the application of the Arabic.

Of the writings of Schultens, aside from the purely Arabic—such as editions of the Rudimenta (1738) and the Grammaticae (1748) of Erpenius—Vita Saladinii (Lugd. Bat. 1738, fol.)—Monum. Vetueriora Arab. (Leyd. 1740, 4to.), and Institutiones Aramaeae (Leyd. 1749) are the most prominent. They mention those which have reference to Hebrew gram
matical and Biblical literature: Origines Hebrew, etc. (Fran
erker, 1734–8, 2 vols. 4to.), and a preliminary work, De Defectibus Hodierum Lingua Hebr. (ibid. 1731, 4to; new ed. of both works, Leyd. 1761, 2 vols. 4to):—Institu
tiones ad Pandam. Lingue Hebr., etc. (Leyd. 1737, 1736, 4to):— Vetus et Recta Via Hebraizandi, etc. (Lugd. 1738), a rejoinder to his opponents, which he carries further in Excursus Primus ad Caput Primium Via Ve
teris et Regni Hebraizandi, etc., and Excursus Secundus et Tertius (Leyd. 1739, 4to):Is Instituiones Aramaeae (Leyd. 1749), and Inserites Syriae grammar, without preface or other guide to in
quiry, and probably interrupted by the author's death, as it is broken off in the middle. Of his exegetical works the chief are, Liber Jobi, Nova Versione ad Hebr. Fontem et Comment., etc. (Lugd. Bat. 1737, 2 vols. 4to):—Prosperitas Salomonis, etc. (ibid. 1746, 4to), an abridgment of a book published in 1695;—De Yaga (Halle, 1769, 8vo). Ten separately printed disserta
tions and addresses were published by his son in Opera Minora, etc. (Ludg. 1769, 4to), and also a number of dissertations read before him by his pupils, in Sylloge Diss. Philolog.-exexeg. (Leide et Leovard, pars i, 1772; pars ii, 1774, 4to). Schultens left also several commentari
ties and a Hebrew lexicon in MS. See also Sieniei,

Schultens, Heinrich Albert, an Orientalist, the son of Johann Jacob, and grandson of Albert Schultens (q. v.), was born at Herborn, Central Germany, Feb. 15, 1749. He began the study of Greek and Latin, under the direction of the most celebrated instructors of Leyden, at the age of seven years, and followed it with that of Oriental languages and antiquities. He also became acquainted with the English, French, and German among modern tongues. In 1772 he visited England to make use of the Bodleian Library; and on his return, though not yet twenty-four years of age, was made professor of Oriental languages. Then followed the appointment of Ambassador of Amsterdam, and in 1780 he was inducted into the chair previously occupied by his father and grandfather. His literary labors were expended chiefly on Arabic authors, and the continued effort required to prepare the Proverbs of Meidan un
dermine his health. He died of a slow fever, Aug. 12, 1793. Everard Scheid, his friend and successor, deliv
ered his eulogium. For his life, comp. Series Continuata Histor. Batav. per Wagenaer, pars i, p. 364–380; also the unimportant sketch by Rink, H. A. Schultens, etc. (Riga, 1794, 8vo).

Schultens, Johann Jacob, a theologian and Orientalist, the son of Albert Schultens (q. v.), was born at Franeker, in the Netherlands, in 1716, educated under the eye of his father, and appointed professor of theology and Oriental languages in the Academy of Herborn. He held that post during seven years, and followed it with the appointment of Professor of Oriental languages and theologian in the Academy of Leyden. In 1742 he held that post during seven years, and was then transferred to the academy of Leyden, and five months afterwards became the successor of his father in the theolog
al seminary. He died in 1778. The only writings published by him were his inaugural, Dissert. de Utilitate Dialect. ad turinm. Academiam (Leyd., 1742) (also in the Syll. Dissert., p. 231–439; see lit. art. "Albert Schultens")—De Fruct. in Theol. Redun

Schultetus. See SCULTEUS.

Schultessa, Johannes, Dr., the Swiss compre
dor of Paulus and Röhr in the advocacy of the older ra
tionalism, was born Sept. 28, 1763, and received a pre
dominantly philological training. His earliest labors were expended in behalf of reforms in the public schools (see Schweizer Schulfreund, 1812, etc.). His Kinder
texte (1816) and his Kinder
textele (1818) were highly esteemed as text-books. He be
came a professor of the Zurich gymnasium, and preb
dendary in 1818, and from that time devoted himself to the department of New-Test. exegesis. He endeavor
ted to ground his rationalism on the Bible itself, even at the cost of violence to the text. In 1824 he pub
dicated a commentary on the Epistle of St. James, and in 1822 he gave to the world his dogmatical views, in a pamphlet entitled Rationalism, u. Supranaturalism, Ka
non, Tradition u. Schriften, a work in which Orelli particip
ted. His Revision d. Kirchl. Lehrbegriff (1825–26) serves a similar purpose. He published an edition of the A mmanl founded by Wachher, Schwarz at Heidel
berg at the same time publishing a periodical in the interests of his peculiar theological views. In the re
vived conflict (1820 sq.) respecting the Lord's supper between the Lutheran and Reformed churches, he gave himself out as the defender of true Zwinglianism (comp. his Evangel. Lehre vom Leben, ed. by A. Vogel (Halle, 1769, 8vo). Ten separately printed disserta
tions and addresses were published by his son in Opera Minora, etc. (Ludg. 1769, 4to), and also a number of dissertations read before him by his pupils, in Sylloge Diss. Philolog.-exeget. (Leide et Leovard, pars i, 1772; pars ii, 1774, 4to). Schultens left also several commentari
ties and a Hebrew lexicon in MS. See also Sieniei.
intercourse he displayed, especially in his later years, a friendly, genial spirit, in which nothing of the controversialist was apparent. He also combined with his rationalism a simple piety whose centre was a firm faith in the all-controlling goodness of God. After the University of Zurich had been founded, in 1585, Schultes became docrinist in the city of Schaffhausen, and there he received the degree of doctor in theology from Jena, Nov., 1817. He died Nov. 10, 1836, leaving, as his most important legacy to theological science, an edition of the works of Zwingle which he had published in connection with Schuler. The clergymen trained by him generally entered into different paths from those in which he himself walked — the older ones through the influence of Schliciermacher, and the younger under the guidance of Nietzsche, Tholuck, Jul. Müller, etc. The most trustworthy source for his biography is the Denkschrift zur hundertjahr. Jubelfeier d. Schillers, Familienfonds, etc., by his son Johann (Zurich, 1829).

Schulting, Cornelius, a learned Dutch ecclesiastic, was born at Steen 1454. His family was distinguished and honorable. After studying at Cologne, he took the ecclesiastical habit, taught philosophy in the college at Laurentianum, and afterwards became its principal. He had charge of the faculty of arts at Cologne, and was canon of the cathedral. He died April 29, 1604. His writings were of a high order, and a great deal of reading. We mention, Bibliotheca Ecclesiastica, etc. (Cologne, 1599, 4 vols. fol.): —Ecclesiastica Disciplina, etc. (ibid. 1599, 8vo): —Bibliotheca Catholica (ibid. 1602, 2 vols. 4to): —Hierarchia Anacrisis (ibid. 1604, fol.). See Sweert, Athenae Belficae; Hartzheim, Bibli. Colon. 1608.

Schulz, David, a German rationalist, was born in Lower Silesia, Nov. 29, 1779, and after proscribed preliminary studies was admitted to the University of Halle in 1808, where he devoted himself largely to philological studies and became strongly interested in the lectures of Fr. A. Wolf. In 1806 he received the degree of Ph.D. and the position of docent in the philosophical faculty of his alma mater. Soon afterwards the university was suspended, and Schulz followed a call to Leipzig in 1807; but on the restoration of the University of Halle he returned and taught successful courses on the classical writers, the books of the New Test., and Roman antiquities. The government of Westphalia recognised his services in 1809 by conferring on him the position of ordinary professor of theology and philosophy; but having obtained, through the influence of Wolf and W. von Humboldt, an ordinary professorship of theology at Frankfort-on-the-Oder, he left Halle for that place. In 1810 he received the theological doctorate. In 1811 the university was transferred to Breslau, and from that period Schulz concentrated his energies wholly on the science of theology. His lectures extended over the greater portion of his field, and discussed encyclopaedia, New-Test. introduction, criticism, and hermeneutics, exegesis of nearly the entire New Test., Church history, introduction to systematic theology, dogmatics, and repeatedly, for students of the entire university, the nature of Christianity. He delivered the academical address in connection with the centenary of the Reformation in 1817, and that of June 25, 1830, in commemoration of the submission of the Augsburg Confession. In 1819 he was made consistorial councillor, and soon afterwards director of the continuation department of an educational institution for the pedagogical seminary for learned schools. In 1845 he imprudently signed a declaration against the efforts of "a small party in the Evangelical Church, which yet was powerful by reason of support from without," and in consequence was deprived of the position of royal consistorial councillor, though permitted to retain the title and emoluments of that office. His influence declined after 1848, as did also his physical energies. The loss of sight compelled his withdrawal from academical occupations during the last years of his life, and, after protracted sufferings, he died Feb. 17, 1854.

Schulz's theological attitude was that of ordinary rationalism. He considered his mission to be the uniting of Christianity and rationality by more clearly apprehending and presenting the fundamental truths of the former, etc. He was not a pioneer, but a conservative rationalist, and contributed greatly to protract the rule of the rationalist tendency. His exegetical writings are not without scientific value, but those of a polemical character are immediately insignificant. All of his writings suffer from diffuseness and repertory. A certain force of individuality must be conceded to him, since he was able to attract large numbers of students to his lectures, which were entirely without arrangement, and was able to exercise an almost intolerable domination over the entire Church of Silesia during a protracted period, so that the Lutheran separation in that province is often charged to his overbearing influence. His passionate nature could not brook opposition, and rendered it difficult for him to submit to the decrease of his party, which was apparent in his later years.

Schulz, Johann Christoph, a German doctor and professor of theology, was born May 18, 1747, at Wertheim. From 1783 he was professor at Giessen; in 1786 he was made first preacher and superintendent of the Alsfeld diocese, and died Jan. 25, 1806. He wrote, Scholia in Hebr. Vetus Testament. (Heftemb. 1797); —Additamenta Variationum Lectorum in Novum Testamentum et Gersoniana Sacri Codicis Editione Collectarum (ibid. 1798); —Conjectura Crit. in Illustrationen Psa. xxii, 13 (ibid. 1798). See Winer, Handbuch der theol. Literatur, ii, 709; Fürst, Bibl. Jud. iii, 295 sq.; Steinacher, Bibliograph. Handbuch, p. 130. (B. P.)

Schulze, Ernst August, a German professor of theology, was born Aug. 8, 1721, at Berlin, and died May 6, 1756, as pastor of the German Reformed Church at Frankfort-on-the-Oder. He wrote, Commentatio de Fic.
SCHULZE 441 SCHUREMAN

tis Hierosolymorum Privilegiis (Francof. 1756); — Dissertatio de Variis Judeorum Erroribus in Descripione Temp. (ibid. 1758); — Commentatio de Hebraeorum Antiquitatibus et Rhetorique (Francof. 1774); — Dissertatio de Juda Galilei et sibi Secta (Francof. 1761); — Dissertatio de Herodiana Puerorum Bethlehemitariorum Codex (ibid. 1765); — Compendium Archeologiae Hebraicae (Dresden, 1738). See Winer, Handbuch der theolog. Literatur, ii, 770; Fürst, Bibl. Judaica, iii, 296. (B. F.)

Schulze, Johann Ludwig, a German doctor and professor of theology, was born at Halie, Dec. 17, 1751, and died there, April 1, 1818 (Hague, 1774).—Dissertatio qua Mutations in Textu Cod. Alexandrinii et Graeco Factae cx Conjectura, ad Examem Revocantur (Halle, 1768); — Chaldaeorum Danielia et Ezra Copium Interpretatio Hebraica (ibid. 1782); — Dissertatio ad Collect. xii, 1-3 (ibid. 1788). He also edited Simony Lexione Morale et Altingii Synopsis Institutionum Chaldasorum. See Winer, Handbuch der theolog. Literatur, ii, 770; Fürst, Bibl. Judaica, iii, 297. (B. F.)

Schumann, Christian Heinrich, a German doctor of theology, was born at Neunkirchen Dec. 25, 1787. His first appointment was that of collaborator at Meissen. In 1815 he was made co-rector at Annaberg, in 1825 deacon, and in 1827 rector, until in 1832 he was appointed principal. He died at Dresden Dec. 11, 1858. He wrote, De Cultu Jesu (Annaberg, 1841).—Stimmen aus dem Hause des Herrn über Zeiteereignisse und Zeitbedürfnisse (ibid. 1849). See Winer, Handbuch der theolog. Literatur, Supplement, p. 301; Zuchold, Bibl. Theol. ii, 119. (B. F.)

Schumann, Gustav Adolph, a German theologian, was born at Weickelsdorf, near Zeritz, in 1803. In 1826 he became academical private teacher; in 1829 he was made professor extraordinary at Leipzig; and died at Meissen April 11, 1841. He wrote, Vita Mosiae: Part I, de Infantia Mosiae (Lips. 1826); — De Libertate Interpretia Dissertatio (Meissen, 1840); — Melanchthon bei der Bibel, etc. (Leipzig, 1837). See Winer, Handbuch der theolog. Literatur, ii, 770; Supplement, p. 301; Fürst, Bibl. Judaica, iii, 297; Zuchold, Bibl. Theol. ii, 119. (B. F.)

Schumann, Johannes, a distinguished clergyman of the (Dutch) Reformed Church, a medical practitioner of considerable skill, and a Revolutionary patriot whose services to his country were most vigorous and fearless, was born at Amersfoort, Dec. 11, of a German family. He went to the Netherlands in 1743, studied theology under Freilinghuyzen and Goetschius, and received and accepted a call to the united churches of Catskill and Cossackie, N. Y., upon condition that, at their expense, he should go to Holland to complete his education. This he did in 1752, and in 1758, after a rigid examination, he was licensed and ordained by the Classis of Amsterdam, and returned to take charge of the churches, in which he spent his entire ministry of forty-one years. His powerful voice, earnest manner, and burning fervor of piety, with uncompromising attachment to the principles of theology, his honest zeal, and indefatigable perseverance and industry, were the secrets of his success. He was a warm coetus man in the great controversy of his Church respecting independence of the mother Church in Holland. In the same spirit, his patriotism made him a famous leader of the people of the whole region of which Catskill is the centre against British rule. His Indians and Tories abounded in that country and around his own residence. Emissaries of George III were frequently passing through those river counties carrying messages between New York and Canada and stirring up the savages and the Tories to treacherous plots and deeds of cruelty. Of course he was the chief object of the British, and was correspondingly persevered from your pulpit. He rode undaunted to discharge his official duties in his church at Catskill, fifteen miles distant from Catskill and through a wilderness that exposed him to constant dangers from his country's foes. He

aided in organizing committees of safety and in the military defences. He went armed, but his chief trust was in God. Nothing daunted or depressed his lofty daring spirit. For liberty, for the protection of his native state, he fought in Orange, Greene, and Albany counties are full of traditions of his fame. He is the hero of a historical novel entitled The Dutch Dominion of the Catskills, by the late Rev. David Murdock, D.D., who was his successor at Catskill, 1842-51. His medical services were gratuitously rendered for the benefit of the people, "and even of persons." A few days before he died he preached at Catskill his last sermon, on the Saviour's words "It is finished;" and then he went home to finish his own work in the full assurance of peace, May 16, 1794. See Sprague, Annals of the Amer. Pulpit, vol. i. (J. W. R.)

Schupp, Johann Balthasar, a German pastor and critic, was born at Giessen in 1610. In his fifteenth year he entered the University of Giessen. At first he studied law, then theology. After a long journey among the German universities, he tarried at Rostock (1629-31) and took his master's degree. Then he visited Holland and heard Salmasius and Voss. On his return he acted as professor of history and oratory for ten years at Marburg. In 1643 he added to his duties that of a pastor. Desiring to give a new form to the ministry, he accepted the presidency of court preacher at Braubach in 1646. The landgrave of Hesse-Braubach commissioned him to take part in the negotiation of the Peace of Westphalia (1648). At Munster he had the honor of preaching the first sermon in commemoration of the peace. Here a call came to him to the place of chief pastor of St. James's, Hamburg. Contending upon his duties in 1649, he labored the remaining twelve years of his life with great zeal and popularity. He was thoroughly evangelical, preaching not exclusively Christ for us, but Christ in us, and insisting upon thorough heart-conversion. His manner was free and popular, and corresponded to the new method. His success turned his colleagues into spies and enemies. Bitter calumnies were invented against him. Satirical pamphlets flew on every hand. The magistracy interfered, and imposed silence on both sides. But the violence of the assaults broke down the health of the faithful man. He died in great joy, a truly can dida anima, in 1661. Schupp published, Volumen Orationum Solennium et Panegyricorum (1642); —Traktature über Staat, Kirche und Schule: —Morgen- und AbendLieder. His collective works were edited by his son (Hanna, 1663), and have had several editions. See In Schol., ii, 648-658; Herzog, Real-Encyclop. xx, 749-755. (J. P. L.)

Schureman, John D.D., a (Dutch) Reformed minister, son of Hoo, James Schureman, United States Senator from New Jersey, was born near New Brunswick, N.J., Oct. 19, 1778. Of pious lineage, he devoted himself to Christ in early youth. At seventeen he graduated from Queen's College (1795), and then studied theology with Dr. Livingston. He was licensed in 1800, settled at Bedminster, N. J., from 1801 to 1807, when he removed to the Church at Millstone, and in 1809 accepted a call to the Collegiate Dutch Reformed Church in New York at the same time with Dr. Jacob Brodhead. Here he sustained himself with satisfaction to his people, but, on account of feeble health, in 1811 he accepted the vice-presidency and chair of philosophy and belles-lettres in Queen's College at New Brunswick. For a short time, 1818, he was pastor of the Dutch Reformed Church in that city, but disease soon obliged him to desist. In 1815 the General Synod appointed him professor of ecclesiastical history and pastoral theology in the theological seminary under their care in New Brunswick. He labored in that capacity with profit to the institution and honor to himself. He died in 1818 of typhus fever. Dr. Schureman was blessed with a clear, vigorous, accurate, and well-disciplined mind, and with an uncommonly amiable temper.
which made him, like Daniel, "a man greatly beloved." His piety was tender, devout, and universally acknowledged by all who knew him. His preaching partook of these characteristics, and was always popular, but not strong or brilliant. He was judicious, solemn, calm, and full of union. His short career gave promise of usefulness and of power, but was blighted by early death, and yet makes his memory very precious among the departed worthies of the Reformed Church. See Lact. 

Memorial; Sprague, Annals of the Amer. Pulpit. De Witt, Historical Discourses. (W. J. R. T.)

Schürmann, Anna Maria von, a prominent disciple and supporter of Labadie (q. v.), was born at Cologne, Nov. 5, 1607, of Reformed parents. Persecution drove her parents in 1610 to the district of Juliers, whence the family removed to Franeker, and, after the death of her father, to Utrecht. Anna Maria was possessed of extraordinary intellectual qualities, which were further developed by careful training and instruction, so that she became familiarly acquainted with many ancient and modern languages—the Latin, Greek, Hebrew, Italian, Spanish, Arabic, Syriac, and Coptic—and was in them all sufficiently proficient in mathematics and history; and was no less celebrated for her skill in the more ornamental branches of music, drawing, painting, carving, wax-work, and embroidery. Her attainments won for her the title of the Tenth Muse, the Celebrated Maid of Utrecht. The serious, pious temper, and the love for the word of God which she had from her youth, and her charity toward the poor, gained her a far wider reputation than vanity; but the influence of Labadie, whom she encountered when more than fifty years of age, led to a thorough conversion. She recalled all her writings, associated herself with Labadie in his home and life, defended him and his followers with her pen and supported them with her purse. A peculiar mystical relationship subsisted between her and Labadie, but no charge of improper conduct has ever been raised against her. After Labadie's death she retired to Wieveert, in Friesland, where she died in 1678, after a protracted and painful illness. Her last work, entitled Eulxia, and containing a review of her life, its tendencies and results, was completed just before her end. See Giebel, Gesch. d. christl. Lebens, etc., p. 272-280. 789.

Schütz, Cornelius, a Flemish painter, was born at Antwerp in 1597. He was a pupil of Rubens; and when he had finished his studies in 1619, he worked with great success in churches and convents. His best painting is in the cupola of the Cathedral at Antwerp, the Assumption of the Virgin, and the Martyrdom of St. George in the museum of the same city shows his skill. Schütz possessed a brilliant imagination and great facility of execution, which, in a large measure, compensated for his feebleness of design. He is considered one of the best of Ruben's pupils.

Schütz, Johann Jacob, a German hymnist, was born Sept. 7, 1640, at Frankfort-on-the-Main, where he also died Nov. 5, 1690. He was very intimate with Spener and Joachim Neander. The only hymn which he wrote was ascribed to Hugo Grotius. It is an ornament of German hymnology, the well-known Sei Lob und Ehr dem höchsten Güt (Engl. trans. in Lyra Germanica, ii, 196, "All praise and thanks to God most high"). See Koch, Geschichte der deutsehen Kirchenlieder, iv, 359 sq.; Rambach, Anthologie christl. Gedichte, iii, 229; Wange- mann, Kirchenlied, p. 298; Theologisches Universal-Lexi-ikon, s. v. (B. P.)

Schwab, Johann Baptist, a Roman Catholic di- vine of Germany, born in 1811 at Hassfurt, was made priest in 1834 and doctor of theology in 1839. In 1840 he was appointed professor of Church history and canon law at Wurtzburg. In 1851 he was deposed on account of his heretical views, and died Dec. 29, 1875, at Wurtz-
fessed his faith in Christ. He now betook himself to the study of theology; went to Halle, where he attended the lectures of Gesenius, Tholuck, Erdmann, and Julius Müller, and afterwards to Berlin, where Neander, Hengstenberg, and Twesten were his teachers. Having completed his studies, he offered himself to the London Jews' Society, was ordained by the bishop of London, and appointed for Constantinople. On his way to the latter city, he went to Pesth, in Hungary, where he stayed for a year, in the meantime becoming acquainted with Dr. Duncan of Scotland. In Constantinople he only stayed one year, severed his connection with the London society, and entered the services of the Free Church of Scotland, which appointed him as a missionary to Berlin, where he labored from 1844 till 1848. From Berlin he went to Amsterdam, where he soon attracted the attention of Jews and Christians. The church which he built there soon became the nucleus of Christian life for the whole city, and the weekly, which he issued under the title De Heraut, soon spread all over the Netherlands. His labors in Amsterdam were greatly blessed—a circumstance which excited the hatred of the Jews, who boasted themselves being the descendants of those exiles who came from Spain and Portugal, and who, in their fanatical ignorance, could not endure that some of their brethren should leave Judaism and become Christians. With incredible fanaticism they persecuted all converts. It was on Sunday morning, Aug. 1, 1858, when Schwarz had entered the church, that a brick was thrown through a silent prayer he was stabbing in the side by a young Jew, who had followed the preacher without being seen. For a long time his life was endangered, but he finally recovered. He continued for six years longer in his work at Amsterdam, when, in 1864, he exchanged the scene of his long labors for London. Here a large field was opened to him, in which he also labored till Aug. 24, 1870, when he was called to his rest. To Jews and Gentiles, Schwarz preached in English, Dutch, and German, and of many of those whom he led to Christ are now ambassadors of the cross. See Friedensboten für Israel, 1871, p. 33 sq.; Staats auf Hoffnung, vii, 366; viii, 80; Missionblatt für Israel, 1874, p. 83 sq., 92 sq. (B. P.)

Schwarz, J. C. E., a German doctor and professor of theology, was born at Halle, June 20, 1802. After 1829 he labored at Jena, holding the highest ecclesiastical positions, and died there May 18, 1870. He published a number of Sermons, which are all enumerated in Zuchold, Bibliotheca Theologica, ii, 1205. See also Wurzel, Lexicon der theologischen Literatur, 1772; Literarische Nachrichten, 1870, p. 491. (B. P.)

Schwarz, Joseph, a German Jew, was born Oct. 22, 1804, at Floss, in Bavaria. When seventeen years of age he entered the University of Würzburg. In 1833 he arrived in Palestine, and died at Jerusalem Feb. 5, 1865. Schwarz is best known by his works on Palestine. Thus he published, Hebrewische Karte über Palæstina (Würzburg, 1829, and often); — on Astronomical and Physical Explanations of the Holy Land (Jerusalem, 1843); — on Geography of Palestine (ibid. 1845); — on Astronomic History of the Holy Land (ibid. 1845); — on History of Palestine till 1845 (ibid. 1845). Some of his works were translated into German. His Geography was translated into English by Isa. Leeser: A Descriptive Geography and Brief Historical Sketch of Palestine (Philadelphia, 1850). See Furst, Bibl. Jud, iii, 300 sq. (B. P.)

Schwarz, William, a minister of the Methodist Episcopal Church, was born in Oberachen, grand-duchy of Baden, Germany, Feb. 14, 1826. He was brought up a Roman Catholic, and attended the high-schools of Rastatt and Freiburg, intending to prepare for the priesthood. He came to America in 1845, and united with the Church in New York the next year. In December, 1846, he was licensed to preach, and in May, 1848, was received into the New York Conference. He was sent as missionary to Germany in 1858, and labored also in Switzerland, where he died Dec. 3, 1706. She wrote over four hundred hymns, among others the well-known Weisst wie weis nach mein Ende? ("Who knows how near my end may be?"") Lyra Germanica, ii, 267), which has been written on the occasion of the sudden death of duke George of Saxony-Eisenach while hunting. Her hymns have been published by Dr. Passig (Halle, 1858). Comp. also Koch, Gesch. d. deutsch. Kirchenleides, iv, 56 sq.

Ludmilla Elisabeth. One of her hymns, Zueck uns nach dir, so eden wir, is found in an Engl. transl. in the Monthly Religious Mag., xxxviii, 1867, p. 338. See Ludmilla. (B. P.)

Schwarzenberg, Johann von, a prominent German statesman, warrior, and author of works for the people in the days of the Reformation, was born Dec. 25, 1489, received his education in Paris, and was not less distinguished by herculean stature and physical strength than by courage and skill in the use of arms. A rebuke from his father determined him to avoid all frivolity and immorality of life, and with iron he persisted through life in attaining to a high moral character. He participated in the expedition to the Holy Land undertaken by the elector Frederick the Wise in 1493 (concerning which see Spaltin, Hist. Nachl., published by Neudecker and Pfreiler, i, 76), and after his return accompanied the emperor Maximilian in his German and Italian campaigns. But though he acquired the reputation of a brave and skilful soldier, he soon turned aside to the work of aiding to fit the State for the accomplishment of its great mission to promote peace and justice, and also the morality and prosperity of its subjects. His first field was in the episcopal principality of Bamberg, where he occupied the post of prime minister (Hofminister) at the beginning of the 16th century, under the bishops Herberstein and Geiss of Bamberg. One of his most notable works was the introduction of a reform in the execution of capital punishments, which subsequently became the law of the empire (the so-called Carolina of 1532).

While recognizing the need of reform in the State, Schwarzenberg was also convinced of the need of reform in the Church; and as he found opportunity to make himself felt for good in statesmanship, so he readily admitted the claims of duty on him from the side of religion and morality. He was thoroughly prepared for the beginning of the Reformation through zealous study of the Bible, which had, even before Luther appeared, been translated into the most useful languages in the interest of Christianity and the actual life of the Church. He was profoundly impressed with the conviction that the creature owes the most perfect obedience to the will of God as revealed in Scripture, and this conviction was the leading motive of his life; but he had likewise learned to know the weaknesses of human nature, and to hold on the doctrines of grace in the Bible with all his heart. He naturally threw the weight of his official station, the convincing power of his speech, the iron energies of his will, and the combining and constructive powers of his statesmanship into the scale in favor of the Reformation, and thus became a most powerful instrument for promoting its success. As its progress was rather promoted than hindered by the bishop George, Bamberg soon became a stronghold for the defense and also a cen-
tre from which to carry forward the extension of the evangelical cause. Schwarzenberg's influence was pow-
erty. For a time the Diet at Nuremberg was under the influence of his brother, Prince Martin, who had
resent his government on the occasion of the duke's marriage (see Spies, Brandenburgische Bevölkerungs-
and, and availed himself of the opportunity to plead the cause of the Reformation with King Sigismund of
and Poland and the bishop of Cracow. (Comp. Strobel, "Joh. von Schwarzenberg, zwee sehr merkwürdige Briefe"

Luther's *Theses* became known in 1517, and in the following year, April 25, Luther himself was at Heidelberg engaged in the famous disputation. Melanchthon, too, wrote frequently to Schwenbel from Wittenberg, and sent him extracts from his lectures on Matthew and Romans (Cont. Epist. p. 3), etc.

Luther attempted to prepare Schwenbel for his reformatory career. He laid aside the garb of his order, and in 1519 became an evangelical preacher in his native town, but was speedily expelled by the margrave Philip. He fled to Franz von Sickingen, and sought, from the asylum furnished by that stanch defender of the Reformation, protection in his cause by means of letters. Towards the close of 1522 he published a work entitled *Ermahnung zu den Questionieren, abzustellen überflüssige Kosten*, in which he censured the abuses connected with the collection of alms in the Romish Church, all intended to secure money to the clergy, from the pope to the lowest monk. He was permitted to return to Pforzheim, and on April 10, 1524, preached there on the theme of the "Good Shepherd." A small evangelical congregation was thus gathered, and was at this time placed under the pastoral care of Johann Unger, who had been tutor in the family of Melanchthon, and who remained his pastor until his death, in 1560 (see *Caroliniana* i. 444).

While Schwenbel was present in the Castle of Sickingen that nobleman introduced the celebration of the mass in the German tongue, and Schwenbel heartily approved of the innovation (Cont. Epist. p. 337). In 1524 he married, and, like other Reformers, was censured for that step, but defended himself in two treaties on marriage, and particularly the marriage of priests. Sickingen's unfortunate campaign against the elector of Treves and his allies (begun in September, 1522) necessitated the dismissal of his theological guests, and Schwenbel went to Zweibrücken, where he became court-preacher and superintendent of the churches of the elector. He secured the confidence of his patron, the count-palatine Louis II, and found powerful co-laborers in the persons of Jacob Schorr and Jerome Bock, who belonged to the train of that prince. In 1524 Schwenbel expounded Matthew, John, and Romans, though he afterwards preached usually on the pericope assigned to the day. His discourses were founded on the Epistle to the Romans. He taught that the chief elements of Christian doctrine are, (1) repentance (*penitentia*); (2) justification by faith; (3) love to God and our neighbor; (4) the doctrine of sufferings (crucis) as conservers of faith; (5) believing prayer in behalf of ourselves and others (Dreiserhöhung). Over and above these he added now and then a few words out of faith; man has free-will, but only to evil naturally, and only by grace to good (Teutsche Schriften, i. 81). He regards the sacraments as signs of the grace or the will of God towards us, and as symbols of love among Christians. The bread and wine in the supper become a spiritual food when received by faith.

Besides the German sermon, Schwenbel introduced catechetical instruction covering the Decalogue, the Apostles' Creed, the Lord's Prayer, and the words of institution in the sacramental service; and he substituted the singing of German for Latin hymns. In 1529 he prepared a form of Church government, which was approved by Bucer (Cont. Epist. p. 133), and continued, in connection with the evangelical clergy of that region, to give attention to this subject for many years (Teutsche Schriften, p. 317, 379, etc.). For ten years Schwenbel guided the Reformation in Zweibrücken alone. He was, however, prevailed on to resign his office, in which purpose he was strengthened by the troubles caused by an assistant named Georgius, who denied original sin and infant baptism, and disturbed the peace of the Church. He was, however, prevailed on to remain, and in that year 1534 he applied himself to his aid (comp. Croll, *Hut. Schuler Hornb.* p. 18, 19). Schwenbel was prohibited by his official position from attending any of the larger conferences in which religious and ecclesiastical matters were discussed, but he maintained a steady correspondence with most of the Reformers, particularly Melanchthon, Bucer, and Capito. His advice was sought with reference to the desired settlement of the sacramental difficulty, which was attempted in the Consensus of St. Augustine, but its success was not to be confirmed by the Wittenberg Concord. The latter document was signed by Schwenbel and his colleagues, but with the reservation implied in the words "Vidimus et legimus exemplar concordiae." He was essentially a man of peace, and not disposed to let usages and ceremonies cause divisions in the Church (see Cont. Epist. p. 297, 351). In few weeks, Schwenbel betook himself to dogmatics largely identical with that of Melanchthon as represented in the *Loci Commmunes* and the Latin edition of his *Articles of Visitation*; and in Church organization he held to the Reformed system of a presbyte- rial and synodal constitution emanating from the congregation. If such organization was left for the most part undetermined in his day, he had at least prepared the way for its ultimate consummation. He fell a victim to the plague when scarce fifty years of age, May 19, 1540, and his wife died two days later.

Schwenbel's printed works are: Opera Theologica (pt. ii. 1559. 4to); — Centuriae Epistolae (ibid. 1557, 8vo); — Scripta Theologica, etc., a mere reprint of the two previous works, with preface omitted (ibid. 1605, 8vo); — Teutsche Schriften (Zweibrücken. 1598); — Ermahnung zu d. Quest., abzustellen überflüssige Kosten (1522); — Sermon on the Good Shepherd (1534). Schwenbel, Johann (2), a supporter of the Reformation in Strasbourg, was born at Bischoffen, near Breisach, in 1499, and was for a time a Cistercian monk at Thannenbach. He left the convent in 1524, and, because of his familiarity with ancient languages, secured the position of teacher at Strasbourg, where he died in 1566. See Rührich, *Gesch. d. Ref.* im Elsass, i. 255; ii. 51; Herder, *Gesch. der bibl. Ref.* i. 129; Herzog, *Real-Encyklop. s. v.*

Schwedler, Johann Christian, a Lutheran minister of Germany, was born at Krobsdorf, Silesia, Dec. 21, 1672. He studied at Leipzig, and in 1697 was appointed assistant deacon in Niederweide, in Upper Lusatia. In 1701 he was appointed to the pastorate of that place, and died Jan. 15, 1780. He is the author of about 500 hymns, the best being five pieces of which is *Vollt thir wissen, was mein Preis*, translated into English in *Hymnologia Christiana*, No. 620; "Ask ye what great thing I know." See Wessel, *Hymn. iv*, 463 sq.; Otto, *Zeitik. oberlausitzer Schriftsteller*, iii. i. 240 sq.; Koch, *Gesch. d. deutsch. Kirchenlebens*, v. 232 sq.; Knapp, *Evang. Liederchensatz*, s. v. (R. P.)

Schwegler, Albert, a German rationalist, perhaps, after W. B. M., the leading representative of one of the modern Tübingen school. His father was pastor in the village of Michelbach, Wurttemberg, and there Albert was born, Feb. 10, 1819. His early instruction was directed by his father, and was supplemented by the schools of Schwäbisch-Hall and Schonenthal, so that he entered the evangelical seminary in Tübingen in 1836 with rare preparatory requirements. He immediately entered on the study of the Hegelian philosophy, and was so fascinated that he could find no pleasure in the study of Schleiermacher, which he had also undertaken, and considered the relation of that theologian to Christianity to be the barrier to his intellectual narrowness. Philosophical speculation was less suited to his mind, however, than historical inquiry. He was consequently mightily impressed on its appearance with Strauss's *Leben Jesu*, which he regarded as the culmination of the entire tendency in which the relation of theology to philosophy had been discussed. The measures taken by the authorities against Strauss served only to confirm that notoriety for that author. The longer he studied
that work, however, the more reason did he find for doubt. He believed that the text of the Gospels would afford a more solid historical basis than Strauss had found. His philosophical opinions, too, were becoming uncertain; he came to believe that the Hegelian system did not conduce sufficient importance to the factor of personal will, in which he felt he made a much greater difference in the progress of history. His change in religious belief was not due to the influence of any one teacher, but rather to the general process of intellectual development. The doctrine of the Church, he felt, was not an absolute truth, but was subject to change and development as society and human understanding changed. He came to believe in a more tolerant and flexible form of religion that would allow for individual differences and personal interpretations.

While in this state of uncertainty he became a disciple of F. Chr. Baur, in whom he imagined that he found what he was looking for. Baur greatly admired that theologian’s theory of the conditions of early Christianity, and subsequently elaborated it in various essays and treatises. While a student, he solved two problems set by the theological faculty—one of which concerned the relation of the ideal to the historical Christ, and the other the Montanist heresy—and obtained both prizes. A brilliant examination, supplemented by the reception of a first prize in homiletics and another in catechetics, brought his student life to a close in 1840. He remained at Tubingen, employed in literary labors, during nine months longer. In 1841 he published his prize essay on Montanism in an enlarged form, under the title ‘De Montanismo auctore Iacobo Maiore a.d. 2. Jahrhunderte,’ and afterwards travelled through Germany to Holland and Belgium, with the result that he was confirmed in the tendency he had begun to cultivate. On his return to Tubingen in 1842, he was obliged in order to assume charge of the affairs of the Church at the neighboring village of Bebenhausen; but he had determined on a literary and academic career, and continued in that relation less than a year. In the autumn of 1843 he qualified himself for a tutorship in the theological seminary by reading before the philosophical faculty an essay on the Symposium of Plato, but without obtaining the desired place. By this time he had a number of friends, founded the ‘Jahrbrüder der Gegenwart,’ and became the actual editor. His rejection from the theological seminary had the effect to intensify his devotion to the system of Baur, as appears from the work entitled Das nachchrist. Zeitalter (Tub., 1846). This work was finished in six months, and is far inferior to the earlier work on Montanism. Its fundamental proposition is, that primitive Christianity was simple Ebionitism. In 1847 Schwengler published the Clemen- tine Homilies, and in 1852 the Ecclesiastical History of Eusebius. All his subsequent works are outside the field of theology—Aristot. Metaphys. (1847)—Gesch. d. Röm. Kirche a.d. 3 d. Jahrhunderte (1848), of which volumes i and iii appeared in 1858, carrying the description forward to the Licinian laws. This volume is preceded by a life of the author, from which the data for this article are obtained. Schwengler had in 1848 been made extraordinary professor for Roman literature and antiquities, and afterwards obtained also the chair of ancient history. He died suddenly, Jan. 5, 1867.

Schwenkfeld, Hans Christoph von, a German hymnist, was born in 1645 at Rudesdorf, in the Silesian principality of Schwenkfield, and died in 1722. His hymn ‘Wird das nicht Freude sein,’ which he wrote at the death of his first wife, Theodora, has become one of the gems of the German hymn. It has also been translated into English, which version is entitled ‘Wilt that not grieve me?’ (Hymn Book from the Land of Luther, p. 9). See Otto, Lexikon sittenhafter Schriften (Göttingen, 1863); Koch, Gesch. des deutschen Kirchenlebens, iv, 34 sq.; Knapp, Evangel. Liederschatz, s. v. (B. P.)

Schwenkfeld, Lewis David von, Ph.D., an American clergyman and botanist, was born in Bethlehem, Pa., Feb. 13, 1780. He went to Germany in 1795, where he finished his education and remained till 1812, when he returned to America, and settled at Salem, N. C., as clergyman and superintendent of the financial affairs of the Moravian Church, South. He returned in 1821 to his native place—Bethlehem—and resided there until his death, Feb. 8, 1844. He was an enthusiastic scientist, making botany his special study. By his own researches he added more than 1400 new species to the catalogues of the American flora, the greater part being new genera. He was a most profound student of law, and the principal botanical works are the following: Conspectus Fungorum Lutetiae (Leips., 1805);—Synopsis Fungi- rum Carinolanae Superiors (edited by Dr. Schwengrich, 1818);—Specimen Florum America Septentrionalis Cryptogamica (1821);—Monograph of the Genus Viola (1821);—Monograph of the Genus Solanum (1823);—Monograph of the Genus Territoria by Suby (1824);—Monograph upon the American Species of the Genus Carex (1825);—and Synopsis Fungorum in America Borolati Mediae Degenium (1832).

Schwenkfeld, Kaspar von, founder of the religious sect named after him, Schwenkfeldians (q. v.). He was born in Ossig, Silesia, in 1490; was a nobleman of ancient lineage, councillor to the duke of Liegnitz, and an earnest advocate of the Reformation. While holding the chief Reformen position in the highest esteem, he differed from them on the following points: 1. Schwenkfeld inverted the words of Christ, ‘this is my body,’ and read ‘my body is this,’—i. e., such as this bread, which is broken and consumed; a true and real food, which nourisheth, satisfieth, and delighteth the soul. 2. He taught that the external Word is the power to enlighten and renew the mind, but ascribed this power to the internal Word, which, according to his notion, was Christ himself. 3. He would not allow Christ’s human nature, in its exalted state, to be called a creature or a created substance, as such a denomination appeared to him infinitely below its majestic dignity, united as it is in the divine nature. He died in Ulm about 1561. His character was never impugned by any of his opponents, and his numerous writings (including Bekenntniss und Reichenschaft von den Hauptsandten des christlichen Glaubens [1547], and nearly 100 treatises) are among the most valuable sources of the history of the Reformation.

Schwenkfeldians, or Schwenkfelders, a religious sect in the 16th century deriving its name from Kaspar Schwenkfeld (q. v.). He declared his unwillingness to form a separate sect, but after his death numbers who had embraced his views were subjected to severe persecution, especially from the Lutheran clergy. In 1719 the Jesuits endeavored to effect the conversion of this people, but, failing, they reduced them to the same state as that to which the Hanseatic lords of Saxe were reduced in early times. In 1742 they were all invited back to Silesia, with the promise of the return of their estates and the full enjoyment of toleration, none could ever be induced to return. They celebrated their arrival in Pennsylvania by a festival in grateful memory of all mercies and divine favors manifested to them by the Father of mercies. They still continue to celebrate the anniversary. Reference to the peculiarities of their creed is made in the article SCHWENKFIELD (q. v.). This sect has a service in reference to infants unknown among other religious bodies. As soon as a child is born, a preacher is called in to pray for its happiness and prosperity, exhorting the parents to bring it up in the fear of the Lord. A similar service is held in the church as soon as the mother is able to attend with the child. In their government they are Congregational, electing annually the minister, trustees, and other officers of their church. They choose their pastors by lot, instructing them in their duties if uneducated when chosen. They number about 300 families, from 800 to 1000 communicants 5 ministers, and as many churches. The language for social intercourse and private worship is German.
such as is still popular among pastoral tribes, probably corrupting it by an admixture of judicial astrology. See Astrology. The literature of the Hebrews was chiefly limited to ethics, religion, the history of their nation, and to natural history, on which Solomon wrote several treatises no longer extant. If the phenomena mentioned in Scripture were mentally incapable of being grounded in a physical science, they would have been unintelligible to the persons for whose use the sacred writings were originally designed. The most numerous references to Oriental science occur in the book of Job (see Schmidt, Bilderbuch Physikos [Zurich, 1781, 1784]).

In modern times, the appeal of rationalists and semi-skeptics has especially been to the discoveries of science, especially that of geology, as militating against the Bible; but in every instance a careful and candid comparison has shown their compatibility. See Interpretation, Biblical.

SCIENCE AND RELIGION. It is an undeniable fact that there is a controversy between scientists and theologians, but we propose to answer in this article the question, Is there any antagonism between science and revelation? It may be well to define the position which some of the most distinguished scientists take, and which they claim to be the alone entitled to be called scientific. The only knowledge is that knowledge which can be demonstrated, and which has one method of acquiring it; that is, whatever knowledge makes skepticism the highest of duties, blind faith the unparadorned sin. He describes all faith as "blind" which accepts anything on any kind of authority but that of scientific experience. He describes true religion as "worship, for the most part of the silent sort," at the altar of the Unknown and Unknowable, and proclaims "justification, not by faith, but by verification," as the gospel of modern science (Loy, Sermon, read at St. Martin's Hall, London, and published in the Fortnightly Review, Jan. 13, 1866). He states that "the improvement of natural knowledge absolutely refuses to acknowledge authority as such," and maintains that the method of the inductive sciences is the only method by which any human creature can arrive at any sort of truth. The natural conclusion is that such men find themselves opposed to revelation, which he assumes that man by searching cannot find all truth, and therefore teaches what is, otherwise, unknown and unknowable. Many scientists assert that their investigations prove the falsity of the statements and teachings of Scripture. That the conclusions of scientists may not harmonize with what they believe to be the teachings of Scripture we readily admit; but that the real issue is not whether the one contradicts the other, but whether, those revealed by the other are as unhesitatingly deny. In fact, revelation, as we hope to show, really has no controversy with science. Let us glance at some of the alleged contradictions.

1. Genesis. The first chapters of this book have been the great bone of contention, theologians having been wont to assume that Moses asserts the formation of the entire universe, or at least of our own globe, with all its internal and superficial furniture, in six literal days; while scientists at present in the main contend for an immense period of astronomical and geological ages, which they claim that they read in the nebular reductions, the rocky strata, and the vital evolutions. But a close inspection of the phraseology of Moses shows that he has not committed himself to either of these opposite opinions. He simply states in ver. 1 the fact of God's creation of our own planet and its solar system, substantially as they now exist, with its particular inhabitants. This is, but the counterfelt of the true knowledge which he prizes so highly (Heb. 11, 8; xiii, 2; Phil. i, 9; Col. iii, 10).

It was not until after the accession of David that the Jews became remarkable for their intellectual culture; but the patriarchs probably possessed a considerable knowledge of practical astronomy [see Astronomy].
2. The Antiquity of Man.—The questions of the antiquity and unity of the human race upon the earth are indeed more explicitly touched upon in the Bible, but modern science has hitherto added nothing adequate to overthrow the Biblical testimony. Presumptions to the contrary have not been made, or if they exist, not admitted as a first inference from the Biblical account, is found on a closer examination not to be necessarily intended by its language; and a consideration of its uselessness and impracticability for the mere purpose of drowning a few thousands in a particular locality induced expositors to limit the prevalence long before the modern scientific objections were thought of.

3. The Resurrection, etc.—The doctrine of the survival of the soul after death, and of the resurrection of the body, are coming more and more to be seen to be not only not incompatible with physiological science, but to be absolutely necessary deductions from psychological and anthropological reasoning, as apart from revelation. If the miraculous element be admitted into nature, and hard facts demand its occasional intervention, as well as its primal impulse, all difficulty on physical grounds vanishes from these problems of the future world. The imperceptible but frequent renewal of the material organism actually furnishes a striking illustration of the continuity of identity in the midst of apparent dissolution and atomic change.

5. Alleged Uncritical Statements.—But it is said that certain specific statements of Scripture are shown by science to be false. For instance, in natural history the current theory of the development of animals (Lev. xi, 5, 6; Deut. xiv, 7), whereas in fact they have no cud; and the ant with non-hibernating insects (Prov. vi, 6—8; xxx, 25), whereas in truth it lies torpid all winter. The answer to this is that the Scripture writers give a correct account of an actual phenomenon, although their descriptions are not couched in scientific terms. Their language is always optical, i.e. in accordance with the exterior or apparent phenomena. As, in the case of the hare, they undoubtedly refer to the constant motions of the lips, which seems like chewing the cud. They were not mistaken as to the fact which they meant to state, nor do they use language which when properly interpreted gives an impression of being quite different from the language of those who have no experience of what they write about. The Scripture writers have a happy faculty of putting themselves in the place of those to whom they speak, and in so doing convey their meaning more truly than if they had written in the language of the learned. 

5. Alleged Uncritical Statements.—But it is said that certain specific statements of Scripture are shown by science to be false. For instance, in natural history the current theory of the development of animals (Lev. xi, 5, 6; Deut. xiv, 7), whereas in fact they have no cud; and the ant with non-hibernating insects (Prov. vi, 6—8; xxx, 25), whereas in truth it lies torpid all winter. Astrologia Ecclesiastica. His life being endangered by these attacks, he moved to Padua, where, in 1612, II, 19, to occupy himself with writing a commentary on the Apocalypse; but before he had completed this work he died, Nov. 19, 1619. Of Scoppius's works, the principal are, Poema Varia (Heidelb. 1598); — Verainaeum Libri Quattuor, etc. (Norim. 1596); — Spectate Lectiones (ibid. 1597); — De Arte Critica (ibid. 1597); — Symbola Cubiti Mysticae Lignis Sacrosanctis Incisa (Breslau. 1612); — De Rhetoricis Exercitationibus Generibus (Milan, 1628); and others.

Scirras, in Greek mythology, was an appellative of Minevea, a temple being dedicated to her under this name at Phalerum, the harbor of Athens, and another on Salamis.

Sciron, in Greek mythology, was (1) a notorious robber who established himself on the rocks between Athens and Megara, where he compelled the passers-by to wash his feet, and afterwards kicked them into the sea, upon which a large turtle seized and devoured them. Theseus served him as he had formerly served others. (2) The son of Pylas. He married a daughter of Pandion, and disputed with Naus, a son of Pandion, the possession of the temple of Megara. They agreed to arbitrate between them, gave the government to Naus, and the conduct of the army in time of war to Sciron. Others designate him as the husband of Chariclo, the father of Endelis, the son-in-law of Cycnus, and the father-in-law of Eacus.

Scalivina, a long grown worm by Romish pilgrims.

Scalivonic Versions. See Slavonic Versions.

Scofield, Alanson, a Presbyterian minister, was born in Albany County, N. Y., Sept. 3, 1800, and worked at his trade as a tanner until he was of age. He then commenced a course of study, and graduated at Union College, N. Y., in 1830. After studying theology about one year at Andover, Mass., he entered Princeton Seminary in the fall of 1831, and remained two years. He was licensed by the Presbytery of Albany Oct. 8, 1833, and dismissed Feb. 5, 1836, to the Presbytery of Geneva as a licentiate. He was in the service of the American Education Society for six years, and resided at Auburn, N. Y., until 1839. He was ordained Oct. 8, the same year, and was pastor of the Church of West Fayette, Seneca Co., N. Y., from 1839 to 1845, and three years stated supply of the Church at Red Hook, N. Y. In 1848 he removed to Stillwater, and was stated supply for two years at Augusta. Afterwards he served the Church at Stony Creek, in the Presbytery of Wastenaw, as pastor from 1849 to 1856. Then he was stated supply at Corunna and Newburg, in the Presbytery of Saginaw, Mich., for a period of four years, first at Fremont, and afterwards at Quincy. In 1864 or 1865 he was transferred from the Presbytery of Saginaw to that of Coldwater. About the year 1868 he removed to California, Mich., where he resided during the remainder of his life, serving the Church in that place, the whole or part of his time, as its stated supply. He became in 1871, by a change in the presbyteries necessitated by the reorganization, a member of the Monroe Presbytery. During the last four years of his life he was in the service of the Presbyterian Board of Publication as a missionary. He died suddenly of apoplexy on Sabbath morning, June 18, 1876. Mr. Scofield was a man of immense physical vigor, of uniting energy, wonderful tenacity of purpose, skilled as a debater, genial and warm-hearted, earnest and sound in doctrine, and thoroughly devoted to the interests of the Church. (W. P. S.)

Scollitas, in Greek mythology, was a surname of Pan, whose brazen effigy stood at Megalopolis.

Scopzy. See Skopzy.

Scopus (Σκόπος, a watchman or mark), the popular epithet given by Josephus to an eminence at seven furlongs' distance, on the north, from Jerusalem, whence Cæeuris approached the city from Gaboon (el-Jilb), and Titus from Gophna (Jifna), the latter obtaining a fine view of the town (Truscott, II, 19, II). Dr. Robinson locates it on the high level tract and brow upon the Nablus road, being the extension of the Olivet range (Bib. Res. i, 407), a position in which Barclay (City of the Great King, p. 74) and Porter (Handbk. for Syria, p. 118) coincide. According to Lieut. Conder, this spot is still called by the equivalent Arabic name SS-E-Mahb. Dried dates and all the requirements of the military notices (Quar. Statement of the "Pal. Explor. Fund," April, 1874, p. 111; comp. p. 94). See JERUSALEM.

Scoresby, William, D.D., an English clergyman and Arctic explorer, was born at Cropton, Yorkshire, Oct. 5, 1789. He commenced a seafaring life at the age of 14, and in his twenty-first year, when his father as commander of the Resolution, and carired on the business of whale-fishing. In 1822 he explored the east coast of Greenland, and upon his return devoted himself to study, entering Queen's College, Cambridge, from which he graduated as B.D. in 1834. In 1830 he received the degree of D.D., and labored faithfully as chaplain to the Marine Church in Liverpool, and afterwards at Bradford, Yorkshire, till failing health compelled him to retire to Torquay. He here engaged in scientific and philanthropic labors. For the better prosecution of his researches he made a voyage to the United States in 1847, and to Australia in 1855, returning from the latter in 1856, enfeebled by the arduous labors which he had undergone. He died at Torquay March 21, 1857. His principal works are, An Account of the Arctic Regions (1820, 2 vols.); — Journal of a Voyage to the Northern Whale Fishery (1823); — Discourses to Seamen (1831); — Zoetic Magnatism (1849); — Stateraths in the Arctic Regions (1854); — and Experiences. His Life has been written by his nephew, R. E. Scoresby-Jackson (Lond. 1861).

Scorpion (Σκοπρος, kábr), a Deut. viii. 15; Ezek. ii. 6; σκοπρος, Luke x., 19, xi. 12; Rev. ix. 3, 8, 10), a well-known injurious insect of hot climates, belonging to the class Arachnida and order Pulmonaria, which is shaped very much like a lobster. It lives in damp places under stones, in clefts of walls, cellars, &c.; and in summer nights even creeps about in streets and on steps (Russell, Aeppl, ii. 110). The head and breast are closely clothed with fine hairs, and there are two prominent eyes on the end of the front. The eyes are arranged much as in the spiders — one pair in the centre of the thorax, the rest symmetrically on each side of the front. In the genus Scorpio proper there are six of these organs, in Bothus eight, and in Androctonus twelve. All these, however, may be quite readily discerned as scorpion. In the male the eighth, feet, covered with hair. There is a very active tail, of six joints, which ends in a crooked point (Pliny, xi, 62) like a fox's claw (Schulz, Leifung, iv, 351). They are carnivorous in their habits, and move along in a threatening attitude with the tail elevated. The sting, which is situated at the extremity of the tail, has at its base a gland that secretes a poisonous fluid, which is discharges into the wound by two minute orifices at its extremity. The scorpion makes a painful wound in men and beasts (Pliny, xi, 62; Huet, Morroco, p. 302; comp. Minotii, Trew, p. 208) which produces fatal results (Pliny, xi, 90; Somnini, Trew, p. 312; Preud. Alpin. Rer. Eggp. p. 206; comp. Laticore, 'Oyage, p. 30), unless speedy remedies be provided (such are scellifying the wound, sucking out the poison, etc. (Russegger, Reis. II, ii. 225)). This is true, however, only of the Oriental scorpion (though Townsend, Lend and Book, i, 879, says its bite is never fatal in Syria), that mentioned in the Bible (some description and plates in Risell, i, 312; Preud. Alpin. wristig, iii, 370 sqq. Tab. 65; comp. Sir, xxvi, 10; Ezek. ii, 6); for the wound of the European, or Italian, scorpion is less dangerous. The former is distinguished by his shining black breastplate, which has given it the name Scorpio after. (Many plates are given in Ehrenberg's
SCORPION

Icon. et Descript. Animal. Icon. i, Der Animal Excerteb. but without descriptions. Three kinds of scorpions are named in the Descript. de l’Egypte, xxii, 409 sq.) The wildness of Sinai is especially alluded to as being inhabited by scorpions at the time of the Exodus (Deut. viii, 15), and to this day these animals are common in the same district as well as in some parts of Palestine. Ehrenberg {Symb. Phys.} enumerates five species as occurring near Mt. Sinai, some of which are found also in the Lebanon. Ezekiel (ii, 6) is told to be in no fear of the rebellious Israelites—here compared to scorpions. There are many scorpions in Palestine—in the plains of Jordan, on the mountains of Judah, etc. (Trollo, Trav. p. 433; Schulz, Lettung, iv, 352; Thomson, Land and Book, i, 378 sq.), and they are proverbially common in Banias (Casarea Philippi). A part of the mountains bordering on Palestine in the south was named from them Acrabbin. See Bocchart, Hieroz. iii, 588 sq.; Shaw, Trav. p. 168. On the scorpion of Asia Minor, see Van Loenep, Bibel Lands, p. 309 sq.; and on those of Egypt, Olivier, Voyage, v, 171. Those found in Europe seldom exceed two or three inches in length, but in the tropical climates they are occasionally found six inches long. Those of Palestine are from one to three inches in length. There are few animals more formidable, and none more irascible, than the scorpion; but, happily for mankind, they are equally destructive to their own species as to other animals. Maupertius put about a hundred of them together in the same glass, and they scarcely came into contact when they began to exert all their rage in mutual destruction, so that in a few days there remained but fourteen, which had killed and devoured all the rest. But their malignity is still more apparent in their cruelty to their offspring. He enclosed a female scorpion, big with young, in a glass vessel, and she was seen to devour them as fast as they were extruded. There was only one of the number that escaped the general destruction—by taking refuge on the back of its parent; and this soon after avenged the cause of its brethren by killing the old one in its turn. Such is the terrible nature of this insect; and it is even asserted that when placed in circumstances of danger, from which it perceives no way of escape, it will sting itself to death. Ordinarily, however, it is said to be extremely fond of its young, which it carries about on its back.

A scorpion for an egg (Luke x, 12) was probably a proverbial expression. According to Erasmus, the Greeks had a similar proverb (ἀπὶ περίγης σκορπίων). But the creature has, of course, no likeness to an egg, as some have supposed that this passage implies (comp. Thomson, Land and Book, i, 379 sq.). The apostles were evaded with power to resist the stings of serpents and scorpions (Luke x, 19). In the vision of St. John (Rev. ix, 3, 10) the locusts that came out of the smoke of the bottomless pit are said to have had "tails like unto scorpions," while the pain resulting from this creature's sting is alluded to in ver. 5. The prophecy here has received many fanciful interpretations. See Revelation, Book of. The "scorpions" of 1 Kings xi, 11, 14; 2 Chron. x, 11, 14, have clearly no allusion whatever to the animal, but to some instrument of scourging, unless, indeed, the expression is a mere figure. Cælius (De rerum natur. i, 43) thinks that the "scorpion" intended is the spiny stem of what the Arabs call Hedek, the Solanum melongena, var. esculentum, egg-plant, because, according to Abul-Fadi, this plant, from the resemblance of its spines to the sting of a scorpion, was sometimes called the "scorpion thorn"; but, in all probability, this instrument of scourging was in the form of a rod with iron points, "Virga—si nodosa vel aculeata, scorpion rectissimo nomine vocatur, qui arcutuo vulvere in corpus infingitur" (Isidore, Orig. Lat. 5, 27; and see John, Bibli. Ant. p. 287). In the Greek of 1 Macc. vi, 51, some kind of wood missile is mentioned under the name ἐκσπορίνα; Churches founded in Egypt thus: τὰ πλωτὰ, and the reason of its name. See Smith, Dict. of Class. Antiquities, art. "Tormentum." Another tropical use of the word is given in the Mishna (Chelih, xii, 3). Scorpions, in mythological astronomy, was the Scorpion in the circle of the zodiac, a monster which Diana sent to encounter Orion when pursued by the latter.

Scott, Reginald, was the younger son of John Scot of Scotshall, near Smoother, Kent, England, and was born in the first half of the 16th century. He studied at Oxford, and upon his return home devoted himself exclusively to learned pursuits. His famous work, The Discovery of Witchcraft, was published in 1584, and is designed to combat the prevalent belief on the subject. It called forth the Demonology of James I, who forms us that he wrote it "chiefly against the same false opinions of Wierus and Scot, the latter of whom is not ashamed in public print to deny there can be such a thing as witchcraft." Scot's work passed through three editions and was translated into French and German. It was ordered to be burned by the common hangman, and copies of it were burned extremely rare. He published A Perfect Platform of a Hop Garden (1576). His death occurred in 1599.

Scotch Baptists. In Scotland a particular class of Baptists has long existed under this name. With the exception of baptism, they are nearly allied in sentiment to the old Scotch Independents—followers of Robert Dale (q. v.). Mr. Carmichael, pastor of an Antiburghian church at Cupar, was so changed his views, was baptized in 1765 by Dr. Gill in London. Returning to Edinburgh, he administered that ordinance to five others. In 1769 he was joined in the pastorate by a Mr. M‘Lean, who bore an important part during the various internal dissensions which arose. He was one of the more moderate of the Scotch Baptists and Dundee, after great depression, gathered strength and influence, and in 1795 several societies were formed in the north of England. At the census of 1851 they were returned as having fifteen meeting-houses in England with 2087 sittings. The Scotch Baptists are Calvinists; are strictly congregational; they observe the love-feast, and upon certain occasions the kiss of charity, and also wash one another's feet when it is really serviceable as an act of hospitality; they abstain from eating blood and things strangled; advocate plain attire; they hold, with respect to marriage, that, while one of the parties being an unbeliever does not dissolve the relation when one other is saved, it is the duty of Christians to marry only in the Lord. For further information consult the works of M‘Lean, Inglis, Braithwood, and Jones, and that of their great opponent, Andrew Fuller, Treatise on Slavonianism. See Edgar, Eccles. Cyclop. s. v.; Blunt, Dict. of Sects, s. v.; Religions of the World (Lond. 1877).

Scotch Philosophy. See Scottish Philosophy.
Politically, the kingdom is divided into thirty-three counties, grouped in eight geographical divisions, with a total area of 30,468 square miles, of which the islands comprise about 5000. The population in 1871 was 3,360,018, of whom 1,603,143 were males and 1,756,875 females. The people are divided into the Highlanders and the Lowlanders, two distinct stocks, differing in language, manners, and dress. The language of the Highlanders is the Erse, or Gaelic, a Celtic dialect, not analogous to English. The peculiarities of language, costume, etc., are gradually falling into disuse. Their chief vices are intemperance and unchastity; so that in 1872 nine per cent. of the births were illegitimate, the proportion rising to sixteen and four tenths per cent. in Banff. In general government Scotland forms an integral part of the United Kingdom. The same legal code is used as on the same footing with England, except in regard to law and law-courts and the form of Church government, upon which points express stipulations exist in the articles of union between the two kingdoms. The nobles elect of their own sixteen peers to represent them in the House of Lords, and in 1874 the country was represented in the House of Commons by sixty members.

History.—The original Scotland (or Scotia) was Ireland, and the Scots (or Scotti), at their first appearance in authentic history, were the people of Ireland. Scotland was known to the Romans by the name of Caledonia, and perpetuated by that name to the eleventh century. They were polygamous and idolaters, their religion being druidical. They were hardly and brave, and offered to their Roman invaders a fierce and obstinate resistance. In the reign of Titus (A.D. 79–81), Julius Agricola led a Roman army beyond the friths of Forth and Clyde, and in 84 defeated the Caledonians under Galgacus. He and his Roman successors failed to thoroughly subdue the country, and withdrew in the early part of the 5th century. Between the two walls in the province Valentia (Northumberland, Dumfriesshire, etc.) dwelt five tribes who had become practically Romanized and civilized, and who, after the withdrawal of the Romans, formed a union called "Regnum Cumbrensis." The Saxons arrived in Scotland in 449, conquered and settled the Lowlands, and one of their leaders, Edwin, founded the present capital, Edinburgh (Edwinesburg). About 508 the Scots, from Ireland, crossed over to Scotland and settled on the west coast, establishing the kingdom of Strathclyde under Fergus, son of Lochelech. His nation had been converted to Christianity by St. Patrick. Under Conal, his grandson, Columbia began the conversion of the northern Picts. In the middle of the 9th century the Scots acquired a predominance in the country, the Picts disappearing as a people (probably amalgamated and absorbed by the Scots) during the reign of Kenneth, who became king in 856. In 866 the Danes, under the Vikings, began to invade Scotland, and continued their incursions, until, in 1014, after a series of defeats by Malcolm II, they gave up the contest. During the reign of Constantine (904–955), the seat of the ecclesiastical primacy was transferred from Dunkeld to St. Andrew's, and the regal residence fixed at Scone. At the latter place, in the sixth year of his reign, Kel- lach, the bishop, and the Scots swore to observe the laws and discipline of the faith and the rights of the churches and the gospels. This seems to indicate the meeting of some sort of council, civil or ecclesiastical, and if so, is more probably a combination of both, according to the form prevalent at this period both among the Celtic and Teutonic nations. During the reign of Malcolm III (1057–1093), a great social and political revolution occurred in Scotland. In 1072 William the Conqueror invaded Scotland and secured homage from Malcolm as his feudal superior, which is so much disputed, and is one of much dispute between the two countries. Malcolm's residence in England, and his marriage with the English princess Margaret, led to the introduction of English customs, language, and population into the north-
ern and western districts. King Kenneth transferred his residence to Forteviot, in Strathearn, which had been the Pictish capital, fixing, soon after, the ecclesiastical metropolis of the United Kingdom at Dunkeld, where he built a church dedicated to St. Columba. The condition of the country was greatly improved under David (1124-1153), the youngest son of Malcolm, who was appointed as regent. David was forming to the rules of the Church and the principles of religion, he never forgot that he, not the clergy, was to rule. He introduced a system of written law superseding the old Celtic traditional usages. David was as great a reformer in the Church as in the State. He established the Abbeys and endowed parishes, provided for the maintenance of the clergy by means of tithes, and, displacing the old Celtic monastic bodies, introduced the Benedictine and Augustinian orders. There followed several centuries of internal strife and war with England, resulting in much distress and great disorder. During the reign of James V there were many religious agitation and discord. The practical corruptions of the Church were greater than in any other country of Europe, and, as a consequence, the principles of the Reformation were pushed further than elsewhere. The Roman Catholic system being overthrown, a contest began between Episcopacy and Presbyterianism. James VI struggling hard to establish an absolute supremacy both in Church and State. The opponents of the crown bound themselves, first by the National Covenant, and afterwards, in alliance with the English Puritans, by the Solemn League and Covenant. The Act of Union (with England) was formally ratified by the Parliament of Scotland Jan. 16, 1707; it continued unpopular for many years, but the discontent has gradually ceased. For further discussion of the mental and religious life of Scotland consult Church in Scotland, in the Westminster Rev. Jan. 1868; Religious Life in Scotland, ibid. July, 1871; Radcliff, Hist. of Reformation.

SCOTLAND, CHURCHES OF. See the following articles.

SCOTLAND, EPISCOPAL CHURCH OF. In the latter part of the 16th century, the Scottish nation, disgusted with the lasciviousness, inconsistency, and oppression of the Church of Rome, was anxious to reform it. The Papal party soon dwindled to nothing—their bishops forsook their sees and went abroad; but the ancient churches of St. Andrew's, Glasgow, etc., still continued, and were presided over by archbishops and bishops, some of whom had been constituted before the Reformation. Of this old episcopate, James Beaton, archbishop of Glasgow, was the last survivor, dying April 24, 1603. James I revived the order (October, 1610), when John Spottiswood, Andrew Lamb, and Gavin Hamilton were consecrated respectively bishops of Glasgow, Brechin, and Galloway by the bishops of London, Ely, and Bath. But the Solemn League and Covenant followed soon after, and this succession came to an end in the person of Thomas Sydserf, bishop of Orkney, who died in 1668. Charles II was scarcely seated upon the throne when he was advised to restore episcopacy, and to suppress, if not all at once, yet by gradual encroachments, the Presbyterian government in the Scotch Church. On the advice of James Sharp, lord Clarendon, high in favor with the king, discretion was taken to call the old Episcopalians who had been long absent from Scotland. The management of the whole affair was left to Sharp, who was placed at the head of the establishment as archbishop of St. Andrew's. On Dec. 15 (or 16), 1661, James Sharp, Andrew Fairfull (Fair- fow), and Alexander Jamieson, were consecrated to the sees of St. Andrew's, Glasgow, Dunbarton, and Galloway by the bishops of London, Worcester, Carlisle, and Llandaff. The selection was unfortunate. Sharp was chiefly known, through the whole period of his episcopate, as the unrelenting foe of the Presbyterian church; Hamilton was good-natured and weak, and both he and Fairfull had been zealous in past times to enforce the Covenant; Leighton was a man of primitive holiness and an accomplished scholar, but in other respects not qualified for his office. The conduct of Sharp, especially in forbidding the clergy to meet in their presbyteries "till such time as the bishops should appoint," was so far contrary to the spirit of the new Parliament vested the whole government and jurisdiction of the Church in the several dioceses in the bishops, whereas previously the presbyteries had possessed a voice in the administration of the diocese. A proclamation was issued that all who had not obeyed the late laws, who had not surrendered their livings only by virtue of a call from the people and an appointment by the presbytery—should desist from preaching and other ministerial functions. Above two hundred churches were closed in one day, often men of weight and ability being displaced by men unqualified, by lack of education and morals, for the pulpit. The Convention Act (q. v.), passed by the English Parliament, was immediately adopted by the Scotch Legislature. Another act followed, substituting a national synod in the place of the General Assembly. The business of the synod was to be laid before it by the crown, and if agreed to by the president, the archbishop of St. Andrew's, and the principal bishops. This synod was not an ecclesiastical law of the land. In 1666 the Covenanters rose in arms, but were entirely subdued, many of them being hanged for rebellion. The course of Sharp in securing hostile legislation and in persecuting the Covenanters was disapproved of by many of the clergy and bishops of the Church. A compromise was proposed by Leighton and approved of by Charles (1667). It was substantially to the effect that the Church should be governed jointly by the bishops and clergy assembled in ecclesiastical court, the bishop acting only as president; that the Presbyterian ministers, in taking their seats, might declare that their recognition of a bishop was made only for the sake of peace. Other concessions were made, so that the episcopacy was reduced to the lowest point of authority compatible with its bare existence. But neither the Covenanters nor Episcopalians would accept the compromise, and matters grew worse until, in 1679, Sharp was assassinated; and then a reaction of the Presbyterian party. This papal party, in their claim of rights, stated the conditions upon which they admitted William, prince of Orange, to the vacant throne. They affirmed in this state paper that "all prelacy was a great and inseparable grievance." The bishops retired from the convention, the Presbyterianists were left in control, and, according to the old episcopacy was once more abolished. At this date the Episcopal Church of Scotland stood thus: there were two archiepiscopal provinces—St. Andrew's and Glasgow—with twelve bishoprics. The clergymen were about 800, some of whom transferred their allegiance to William and Mary, but the greater part declined to do so, and formed a union with the Nonconformists of England, with whom their history is closely entwined for ninety years, until the latter disappeared. In 1702 queen Anne wrote to the privy council, expressing her desire that the Episcopal clergy should be permitted the free exercise of public worship—an act of generosity, as they still declined submission to the lord high commissioner. The Act of Union, by which England and Scotland were united, took place May 1. 1707, but did not immediately benefit the Episcopalians, even the English regiments stationed in Scotland not being allowed the use of the English Prayer-book. Queen Anne died in 1714, and the next...
year the rebellion broke out in behalf of the Pretender. The Episcopalians were supposed to be favorable to his cause, and were regarded with distrust, and met with very harsh usage. On taking the oath of allegiance, the Episcopal clergy generally refused to pass it; and in 1719, to officiate in public and to use the English liturgy. They were undisturbed by the authorities until the second rebellion, in 1745, the principal cause of distraction being the controversy among themselves between the Nonjuring (q. v.) and their opponents. The second rebellion of 1745 nearly completed the destruction of the Episcopal Church in Scotland. Hanoverians naturally regarded a Church whose bishops were appointed by the Pretender with suspicion. An act was passed forbidding every Episcopal clergyman to officiate without taking the oaths to the government, and in 1746 making more than four persons besides the clergyman's family an illegal meeting. In 1748 it was enacted that none but English or Irish letters of orders should be deemed sufficient to qualify any minister for the exercise of his office in Scotland, and the clergy were only permitted to officiate in their own houses. This state of things continued till the accession of George III in 1760. In 1762 the Bishop of St. Andrew's was recalled by the bishops and brought to its present state. From this period the Church has used the English liturgy, with the exception of the communion office. From the time when the bishops met at Aberdeen and acknowledged George III as their rightful sovereign, the Church ceased to be a Nonjuring Church. In 1762 an act was passed which removed the penalties of the penal laws, with the various acts of queen Anne, George I, and George II, forbade the clergy from officiating in England "except in the case of such as shall have been ordained by some bishop of the Church of England, or of Ireland." This prohibition was so far removed in 1804 as to allow them to hold communion with the special permission of the Bishop in writing, such permission extending only to two Sundays at a time. The Scottish bishops early in the present century resumed the titles which they had been compelled to lay aside, but these titles are not allowed by law. The Thirty-nine Articles of the Church of England were made the standard of faith, and in 1868 the Prayer-book was adopted as the authorized service-book of the Episcopal Church, permission being given in certain cases to use the Scottish communion office. Several flourishing congregations of English Episcopalians still (1864) declined to recognise the authority of the Scotch bishops or hold communion with their bishop's liturgical forms and usages as a subject of the eucharist as unscriptural. In 1864 all restrictions on the clergy were removed, save that an English or Irish bishop might refuse institution to a Scotch clergyman on his first presentation to a benefice in England or Ireland. The dioceses of the Scottish Episcopal Church are seven, viz., Moray, Aberdeen, Buchan, Argyle, St. Andrew's, Edinburgh, and Glasgow. The bishops are chosen by the clergy of the diocese and by representatives of the lay communicants, a majority of both orders being necessary to a valid election. One of the bishops, under the name of "primus," chosen by the other bishops, presides at all meetings of the bishop and representatives of the clergy. The Church has increased rapidly. The livings are generally very small, the minimum fixed income being £100 a year, and very few rating higher, unless the ministers have private incomes. Few of the middling class are connected with the Episcopal Church, its members being made up principally of the wealthy nobles and the poor peasantry. In 1841 Trinity College was founded at Glaesgow, in Perthshire, and St. Ninian's Cathedral at Perth was consecrated by the bishop of Brechin in 1851. See Burnet, Hist. of his Own Times; Spottiswood, Hist. of the Church of Scotland (1623; new ed. Edinb. 1847-51, 3 vols, 8vo); Collier, Eccles. Hist.; Bishop Skinner, Eccles. Hist. of Scotland, etc. (Lond. 1788, 2 vols, 8vo); Russell, Hist. of the Church of Scotland (ibid. 1824, 2 vols, 8vo); Laubury, Hist. of the Nonjuring; Cunningham, Church Hist. of Scotland; Grub, ECCLES. Hist. of Scotland; also Marxden, Dict. of Christian Churches, s. v.; Religions of the World (ibid. 1877).

SCOTLAND, RELIGION OF. For information respecting the Established Church of Scotland, the Reformed Presbyterian Church, United Presbyterian Church, Free Church of Scotland, see Presbyterian Churches.

The first Synod was formed Oct. 22, 1761, and consisted of Gillespie, Boston, and Thomas Colier, according to the words of the original minute, "for the relief of Christians oppressed in their Christian privileges." Its first synod was formed in Edinburgh in 1778, and in 1794 a hymn-book was sanctioned by the synod. In 1807 it numbered about 60 congregations with 36,000 members, and in 1847, 7 presbyteries, 114 congregations, and about 45,000 members. In 1894 proposals were made for a union between the Reformed and Presbyterian churches, which were committed to a committee, and at Edinburgh, May 15, 1847, under the name of the United Presbyterian Church (q. v.). See Blunt, Dict. of Sects, s. v.; Eadie, Eccles. Cyclop. s. v. See Presbyterian Churches.

Scotopites, one of the many names of the Circumcisions (q. v.). It is found in Isidore Hispalensis, and in Gratian's Decretals, II, xxiv, 3.

Scott, Andrew J., a minister of the Methodist Episcopal Church, was born in Philadelphia, Pa., about 1846. His conversion occurred when he was sixteen, and he was received on trial by the New Jersey Conference in 1852, but was soon dismissed which resulted in his death, Jan. 2, 1871. Mr. Scott was affable, kind, and sincere, and as a minister be-
SCOTT 454  SCOTT

Scott, Archibald, a Presbyterian minister, was a native of Scotland, and migrated in his boyhood and alone to the colony of Pennsylvania, about 1760. He is said to have been originally a laboring man, and to have pored over his books while his horses were feeding. Dr. Cooper, a worthy physician of the colony, being impressed with Scott's remarkable aptitude for learning, was instrumental in introducing him into the family and school of a Mr. Finley, where he enjoyed the advantages of a thorough academic education, which he compensated for in some measure by working on the farm during the period of his connection with this school he joined the Presbyterian Church, and, for the time, devoted himself to the thoughts of entering the ministry. He was for several years a student of theology under the supervision of principal Graham, of Liberty Hall Academy, and during this period supported himself by conducting an academy of high reputation in Augusta County, Va., at which Dr. Campbell laid the foundation of his accurate scholarship. He was licensed to preach by the Hanover Presbytery, Oct. 31, 1777, and was ordained and installed pastor of the united churches of Hebron and Bethel, in Augusta County, in December, 1778, which relation continued for more than twenty years, and was at last dissolved by his death, March 4, 1799. Mr. Scott's charge was a very scattered one, comprising a district some twenty miles square. Like most of his brethren, he also had a very inadequate salary during the Revolution; but he never suffered anything to divert him from his great work as a minister of the Gospel. "He entered warmly into the American cause, and exhorted his people to fight for freedom. It was his practice to assemble all the children and youth of his charge in different neighborhoods on week-days, to attend to catechetical instruction. It was in this employment that he was engaged on that memorable Saturday of June when the alarm of the approach of colonel Tarleton and his British dragoons spread consternation from Staunton throughout the surrounding valley of Virginia. It is said that Mr. Scott, like his two neighboring brethren, Graham and Brown, exhorted the striving youths of his congregation to arm themselves and go with their neighbors, to stand with their arms at Rock Fish Gap, on the Blue Ridge Mountains, to defend the flag with the lives and blood of his brethren. He was the recollection of that stand that gave occasion to those memorable words of general Washington—"If I should be beaten by the British forces, I will retreat with my broken army to the Blue Ridge and call the boys of West Augusta around me, and there I will plant the flag of my country." Mr. Scott was greatly beloved and esteemed in his day. He possessed a logical and discriminating mind, and was a strong, vigorous thinker; his preaching is said to have been in a high degree instructive, and often eloquent and powerful. He attached much importance and devoted much time to the religious instruction of the young. Besides the Sunday School, which he founded, he introduced what was known as The Mother's Catechism, a work extending to 32 pp. 8vo, the appendix of which he wrote himself. See Sprague, Annals of the Amer. Pulpit, iii, 387; Allibone, Dict. of Brit. and Amer. Authors, s. v.; Davidson, Hist. of the Presb. Church in Kentucky, p. 29; Foote, Sketches of Virginia (20 series). (J. L. S.)

Scott, Charles W., a minister of the Methodist Episcopal Church, was born in Flushing, L. I., Oct. 10, 1845, and joined the Church in his eighteenth year. He was admitted into the Pittsburgh Conference in 1866; was superannuated in 1874, and died of consumption, Jan. 28, 1875. He was studious, careful, amiable, devout, and conscientious. See Minutes of Annual Conferences, 1875, p. 36.

Scott, Daniel, a Dissenting minister, the son of a merchant in London, was educated with Butler and Secker under a Mr. Jones, at Tewkesbury, Gloucestershire, from whose seminary he removed to Utrecht, Holland, where he took the degree of LL.D. While there he changed his views concerning the mode of baptism, and became a Baptist. Returning to England he settled in London, or Colchester, and devoted all his time to writing. He was never married, and died in the latter place in the year 1775. The works which are, Essay towards a Demonstrations of the Supravity of Trinity (Anon. 1725, 1738) — A New Version of Matthew's Gospel, etc. (1741) — Appendix to Heraclea's Greek Lexicon (1745, 2 vols. 4to).

Scott, David, a Presbyterian minister, was born in Philadelphia, Pa., March 13, 1849. When a child, his parents removed to New York city, and he was educated there. He was admitted to the New York city church at the age of fifteen. He entered the employ of the Manhattan Gas Company as a book-keeper, and until he graduated spent his vacations in earning the money needed for his education. He was prepared for college at the Lawrenceville (N. J.) High-school, under Rev. Samuel M. Hamill, D.D. He united on passing of his faith with the Fifteenth Street Church (now Phillips Memorial Church), New York city, at the age of fifteen. He was graduated from the College of Jersey in 1875, taking a fellowship in the classics of the condition of which is that the recipient shall spend one year abroad in some European university. At the age of twenty, he entered Princeton Theological Seminary and studied one term, after which he went to Leipzig, Germany, where he pursued the study of theology and philosophy for one year; then returning, he entered the ministry in the seminary, and, having finished the required two years, was graduated in 1877. He was located by the Presbytery of New York, April 4, 1876, and was ordained by the same presbytery as an evangelist of the Fourteenth Street Presbyterian Church, June 8, 1877. For nearly a year (from September, 1876, to June, 1877) Mr. Scott was tutor of Latin and Greek at Princeton College, N. J., while pursuing his studies in the seminary. Having been accepted as a missionary by the Presbyterian Board of Foreign Missions, he emigrated with his wife, Sept. 1, 1877, for Teheran, Persia. There he remained about sixteen months, during which time he had had mastered the Persian language, which he spoke with fluency and ease. After the death of his wife, he returned to the United States, intending again to resume his work for Teheran as soon as possible. He arrived in New York City near the end of March, almost immediately after his wife grew ill, and died in that city, April 1, 1879. He was a young man of excellent abilities and of fine scholarship, and his death is regarded as a sad loss to the cause of foreign missions. (W. P. S.)

Scott, Eliahu J., a minister of the Methodist Episcopal Church, was born in Greensborough, Aug. 11, 1803, and joined the Baptist Church at the age of twelve. He continued in that Church about seven years, when he joined the Methodist Episcopal Church in 1829 entered the Conference. He was ordained deacon June 27, 1830, and elder Aug. 11, 1832. After fifteen years he was one of the superannuated, and was then superannuated for seven years, when he became again effective. He traveled the Montpelier District, Vermont Conference, for three years, and took once more a superannuated relation, being appointed in 1866. He was for several years the Conference secretary, delegate to the General Conference in 1836, editor of the Vermont Christian Messenger. See Minutes of Annual Conferences, 1866, p. 129.

Scott, Jacob, a minister of the Baptist denomination, was born in Boston, March 1, 1815, and was a graduate of Brown University in the class of 1836, and of the Newton Theological Institution in the class of
His ordination occurred at Petersburg, Va., September, 1842. He was pastor at Petersburg and Hampton, Va., and for two years chaplain at the University of Virginia. Subsequently he had charge of important churches in Portland, Me.; Fall River, Mass.; and Yonkers, N.Y. He was obliged, on account of his health, to retire from the ministry. For some time he was superintendent of schools in Malden, Mass., where he died, Dec. 10, 1871. (c. 1872).

**Scott, James (1), D.D., a (Dutch) Reformed minis-**
er, was born Sept. 27, 1809, at Glasgow, Scotland, in the
house in which Mary Queen of Scots took refuge after
the battle of Langside. His father, who was educated for
the ministry, but never preached on account of ill-
health, was a wealthy and devoted man. At fifteen he
united with the Church of Lochwinnoch, and, although
struggling with very limited means, he prosecuted his
studies at the University of Glasgow for three years,
and afterwards at the college in Belfast, Ireland, for two
years. Having married in Ireland, he removed to the
United States in 1822, studied theology under care of
the New York Presbytery, and was licensed by them
in 1834. His first settlement was in the Presbyterian
Church, German Valley, N.J., for eight years. In 1843
he accepted the call of the First Reformed Church,
Newark, N.J., with which his remaining ministry was
spent. Few men have achieved such thorough pas-
tory work in this Church and district as he. He seri-
ously reduced and broken down when he took it, and grew
during his fifteen years of service to be next to the
largest Church in its entire denomination, numbering
over six hundred communicants, and flourishing out-
wardly and spiritually. A large debt was removed,
and three new and healthy churches grew out of it
within this period. Dr. Scott’s mind was synthetic
rather than analytical. He was highly imaginative, a
great lover of nature and art, literary in his tastes, and
excelled in descriptive writing and in illustrative and
pictorial address. His style teemed with figures. Rhe-
torical in manner and vivid in coloring, with a large
robust frame, a clear, strong voice, a full, canny Scotch
face lighted up with benevolent smiles, and an attrac-
tive delivery, his preaching always drew large, popular
audiences. But he was not content merely with this;
his sermons were instructive, expository, free of theo-
logical dogmatism, practical, earnest, full of glowing
gospel truths, pathetic, faithful, and finely adapted to times,
seasons, and occasions. His range of topics was un-
usually wide, embracing, among ordinary themes, full
courses of pulpit lectures on Church history, prophecy,
the religious condition of Europe, the Pentateuch, Ruth,
Psalms, Canticles, harmony of the Gospels, Acts of the
Apostles, and an unflinching spirit of Esther. As a pastor he was almost unrivalled. He knew every-
body among his people and all about them. Young
people and children were his particular delight and
care. Among the sick and poor and wretched his at-
tentions were unerring. Beyond his own congregation he
was so thoroughly well known and identified with
every good public interest in Newark that he was justly
called at his funeral the curate of the city. He
devoted himself with zeal to the organization of the ad-
mirable Newark Library Association, to various educa-
tional movements, such as the public schools of Newark,
the endowed of Rutgers College, and the preparation of
a series of school-books. In all evangelical mission
work, like that among the Germans, Sunday-schools,
and the poor, he was a leading spirit. His disposition
was remarkably cheerful, sunny, unsuspecting, frank,
generous, self-conscious, and pleasantly egotistical at
the same time urbane and shrewd. His influence on newspapers, conducted a constant foreign correspond-
ence with eminent men, and delivered literary lectures
and addresses, and was always eminent for public spirit.
The poet Robert Pollok was his bosom friend. He
prepared an excellent life of this favorite author of The
Course of Time, which was published by the Carters,
New York, and has had a large circulation. He also
wrote much in verse, and left a posthumous manuscript
volume of poems, with a directory for its publication. But his
crowning distinction was his thoroughly devoted Chris-
tian ministerial life. It was radiant with the results of
faithful service. His death was sudden. He rose from
his bed and was going to his bath on a Saturday morn-
ing, when he was seized with the fatal disease of which
he had entertained frequent apprehensions. Immedi-
ately he said, "This is paralysis—this is death. I am not
afraid to die; I am ready." His last message, just be-
fore he became unconscious, was, "Give my love to all
my people. Tell them they were in my dying thoughts,
and that when dying I sent my blessing to my young
people." At fifteen he united with the Church of Lochwinnoch, and, although struggling with very limited means, he prosecuted his studies at the University of Glasgow for three years, and afterwards at the college in Belfast, Ireland, for two years. Having married in Ireland, he removed to the United States in 1822, studied theology under care of the New York Presbytery, and was licensed by them in 1834. His first settlement was in the Presbyterian Church, German Valley, N.J., for eight years. In 1843 he accepted the call of the First Reformed Church, Newark, N.J., with which his remaining ministry was spent. Few men have achieved such thorough pasto-
tory work in this Church and district as he. He seri-
ously reduced and broken down when he took it, and grew
during his fifteen years of service to be next to the
largest Church in its entire denomination, numbering
over six hundred communicants, and flourishing out-
wardly and spiritually. A large debt was removed,
and three new and healthy churches grew out of it
within this period. Dr. Scott's mind was synthetic
rather than analytical. He was highly imaginative, a
great lover of nature and art, literary in his tastes, and
excelled in descriptive writing and in illustrative and
pictorial address. His style teemed with figures. Rhe-
torical in manner and vivid in coloring, with a large
robust frame, a clear, strong voice, a full, canny Scotch
face lighted up with benevolent smiles, and an attrac-
tive delivery, his preaching always drew large, popular
audiences. But he was not content merely with this;
his sermons were instructive, expository, free of theo-
logical dogmatism, practical, earnest, full of glowing
gospel truths, pathetic, faithful, and finely adapted to times,
seasons, and occasions. His range of topics was un-
usually wide, embracing, among ordinary themes, full
courses of pulpit lectures on Church history, prophecy,
the religious condition of Europe, the Pentateuch, Ruth,
Psalms, Canticles, harmony of the Gospels, Acts of the
Apostles, and an unflinching spirit of Esther. As a pastor he was almost unrivalled. He knew every-
body among his people and all about them. Young
people and children were his particular delight and
care. Among the sick and poor and wretched his at-
tentions were unerring. Beyond his own congregation he
was so thoroughly well known and identified with
every good public interest in Newark that he was justly
called at his funeral the curate of the city. He
devoted himself with zeal to the organization of the ad-
mirable Newark Library Association, to various educa-
tional movements, such as the public schools of Newark,
the endowed of Rutgers College, and the preparation of
a series of school-books. In all evangelical mission
work, like that among the Germans, Sunday-schools,
and the poor, he was a leading spirit. His disposition
was remarkably cheerful, sunny, unsuspecting, frank,
generous, self-conscious, and pleasantly egotistical at
the same time urbane and shrewd. His influence on newspapers, conducted a constant foreign correspond-
ence with eminent men, and delivered literary lectures
and addresses, and was always eminent for public spirit.
The poet Robert Pollok was his bosom friend. He
prepared an excellent life of this favorite author of The
Course of Time, which was published by the Carters,
Pittsburgh Conference. He was ordained deacon in 1827, and elder in 1829. The Erie Conference was formed in 1886, and he became one of its members. He was made a superannuate in 1847, but became effective the next year. In 1853 he was again superannuated, and held this relation until his death, Sept. 2, 1861. See Minutes of Annual Conferences, 1862, p. 124.

Scott, Milo, a minister of the Methodist Episcopal Church, was born in New Berlin, Champaign Co., N. Y., in 1818, and joined the Church in 1836. He was licensed to preach in 1842, and joined the Genesee Conference in 1843. After a brief illness of four days, he died Oct. 1, 1864. See Minutes of Annual Conferences, 1864, p. 210.

Scott, Orange, a noted Methodist preacher, was born in Brookfield, Vt., Feb. 13, 1800, and up to his twentieth year had attended school but thirteen months. He was converted at a camp-meeting, in September, 1820, and immediately joined the Methodist Church. Next year he commenced preaching on Bernard Circuit, and in 1822 he was received into the New England Conference. His labors were crowned with abundant conversions and to sundry hard-earned defeats of his early education. In 1830 he was made presiding elder of Springfield district, and in 1834 of the Providence district. In 1832 he declined an offer to serve one of the wealthiest congregational churches in Rhode Island. The same year he was elected a delegate to the General Conference. About this time he became a convert of the Wesleyan methodists, and was subsequently cast out of the General Conference of 1836 he carried through stringent resolu- tions on the subject. He subsequently labored with great success as pastor in Lowell and elsewhere. Being dissatisfied with the action of the General Conference of 1840 on the subject of slavery, he retired from the Church, and was largely influential in the formation of the Wesleyan Methodist Church (q. v.), of which he was the book-agent till his death, which occurred in great peace at Newark, N. J., July 31, 1847.

Scott, Robert, a minister of the Methodist Episcopal Church, South, was born about 1805. He was received into the Virginia Conference on trial in 1829, and was graduated to deacon's and elder's orders in 1831 and 1833. For twenty-eight years he labored in the itinerant ministry, and in 1857 took a supernumerary relation. He died in 1866. See Minutes of Annual Conferences, 1866, p. 7.

Scott, Thomas, D.D., a clergyman of the Church of England, was a native of Lincolnshire. He was born Feb. 16, 1747, at Braytoft, a small farm-house five miles from Spilsby. He was educated at Beaminster from 5th to 10th year, and at the following five years he studied at Scorton. At the age of sixteen he was bound apprentice to a medical practitioner at Alford, but at the end of two months the master was dissatisfied with his behavior, and sent him home. He was now employed about the farm for some time, and compelled to labor in the most menial capacities—sometimes tending the sheep, and at others following the plough. In this menial situation he continued for more than nine years, yet continually cherishing the wish of becoming a clergyman. Thoughts of the university, of learning, and of study often presented themselves to his mind; and he at length consulted a clergyman at Boston, who encouraged his attempt at qualifying himself for the ministry; and having acquired a competent knowledge of Greek as well as Latin, he eventually obtained ordination from Dr. Green, bishop of Lincoln, Sept. 20, 1772. His first curacy was that of Stoke Golding and Gayhurst, Buckinghamshire, from which he removed in 1776 to the same place; in the spring of 1777 he settled in Weston Underwood, succeeding Mr. John Newton to the curacy of Olney in 1781. In 1785 he was removed from Olney to the chaplainship of the Lock Hospital, near Hyde Park Corner, and held, besides, two lectureships in the city. In 1803 he obtained the living of Aston-Sandford, in Buckinghamshire, which he held to the period of his death, April 16, 1821. It was an exceedingly small parish, but he could not be prevailed on to seek a larger, on account of the paucity of baptisms and burials which took place—a circumstance which, in some measure, relieved his scruples respecting the service as prescribed in the ritual. He first appeared as a preacher in a small way in West End, but in "A Familiar and Genuine System of Natural, Practical Observations, and Marginal References (1796, 4 vols. 4to; 9th ed., with the author's last corrections and improvements, 1825, 6 vols. 4to)." He was also the author of a great number of pieces, which have recently been collected and published uniformly (10 vols. 8vo), including Remarks on the Bishop of Lincoln's Refutation of Dr. Burnet's "Essay on Important Subjects:—Sermons, Tracts, etc. He left in MS., at the period of his decease, a copious account of his own life, replete with interest, which has been published by his son, and very extensively read. See Memoirs of Thomas Scott, by his son.

Scott, William C., a Presbyterian minister, was born in Martinsburg, Berkeley Co., Va., Jan. 13, 1817. He was conducted through his academic course principal- ly by himself, and was a candidate for the General Conference of 1838, but was not admitted, on account of the opposition of the Synod of Virginia, and united with his father's Church in the spring of 1839. He was in constant attendance on the annual sessions of the Wesleyan Methodist Church (q. v.), of which he was the book-agent till his death, which occurred in great peace at Newark, N. J., July 31, 1847.

Scott, William D., a minister of the Methodist Episcopal Church, South, was born in Mecklenburg County, Va., Feb. 1808. He graduated at the Medical University, Philadelphia, March 2, 1880, moved to Trenton, and engaged in the practice of his profession. He was licensed to preach Aug. 15, 1840; admitted into the
travelling ministry in 1841; ordained deacon Nov. 6, 1842, and elder Nov. 25, 1844. In 1845, because of failing health, he was superannuated, and in 1850 became effective again; but in 1851 he was once more superannuated and remained so until 1863. In 1853 he removed to Baltimore, Maryland, N.J., Oct. 3, 1874. We record here as a part of his history that he bequeathed a hundred acres of land each to the Vanderbilt University and the Indian Mission Conference. See Minutes of Annual Conferences, 1874, p. 63.

Scott, William M. Kendall, D.D., an eminent Presbyterian divine and educator, was born in Jefferson County, O., in 1817. He graduated at Jefferson College, Pa., in 1838, and at Union Theological Seminary, N.Y., in 1841. He was licensed by the West Lexington Presbytery, and in 1847 was elected professor of languages in Centre College, Danville, Ky.; and, accepting a call of the First Presbyterian Church in that place, he was ordained by the Transylvania Presbytery in 1848. In June, 1856, he became pastor of the Seventh Presbyterian Church, Cincinnati, O., which relation existed for two years, when, in 1859, the General Assembly elected him professor of Biblical literature and exegesis in the Theological Seminary of the North-west at Chicago, Ill. His health had been gradually declining for some time, and in the autumn of 1860 he determined to withdraw, having and giving among his kindred and friends to recuperate his wasted energies; but his hopes were vain, and he died Dec. 22, 1861, at the residence of his father-in-law, Rev. Dr. Charles Hodge. The death of Dr. Scott produced a deep impression upon the Church. The board of directors of the Theological Seminary of the North-west adopted a series of resolutions, and the presbytery of Chicago the following minute: "As a teacher, he was thorough and accurate. Much of his time was given to the work of instruction, and he had fully prepared himself for it. . . . As an expositor of God's Word, he was at all times, whether in the lecture room or in the pulpit, lucid, clear, and suggestive, attracting all by the originality and freshness of his views. As a presbyter, he loved the courts of the Church; and being thoroughly conversant with the theory and practice of our system, he was an invaluable member in all complex and difficult cases." See Wilson, Presb. Hist. Almanac, 1869, p. 204. (J. L. S.)

Scottish Philosophy is an appellation currently applied to the method and principles of philosophizing and to the system of thought which is supported by several professors in the universities of Scotland. Prominent among these were Thomas Reid (1710-96), professor of philosophy in King's College, Aberdeen (1752-63); professor of moral philosophy in the University of Glasgow (1753-89); Dugald Stewart (1753-1835), professor of moral philosophy in the University of Edinburgh (1785-1810); Dr. Thomas Brown (1778-1829), colleague with Stewart as professor of moral philosophy (1810-20); and Sir William Hamilton (1788-1856), professor of logic and metaphysics in the University of Edinburgh (1836-56). Besides these designers of the Scottish school, others should be named who were more or less conspicuous in the various metaphysical discussions which preceded or accompanied the lectures and writings of these leaders, whether favorable or adverse —viz.: Francis Hutcheson (1694-1747), professor of moral philosophy in the University of Glasgow (1729-46); George Turnbull (1698-1748), regent of Marischal College, Aberdeen (1721-27); David Hume (1711-76); Adam Smith (1723-90), professor of logic in the University of Glasgow (1751), professor of moral philosophy in the same (1752-63); James Beattie (1735-1803), professor of moral philosophy in Marischal College (1790-1802); Thomas Chalmers (1780-1847), professor of moral philosophy in Marischal College (1837-42), professor of theology in the University of Edinburgh (1827-43); John Wilson (1785-1854), professor of moral philosophy in the University of Edinburgh (1820-54); and James Frederick Ferrier (1808-64), professor of moral philosophy in the University of St. Andrew's (1845-64).

Of all these, Dr. Thomas Reid, by common consent, is the central, if not the most eminent, person in what is known definitively as the Scottish school. Prominent among these were his doctrines of representative ideas in sense-perception and his definition of knowledge, as also the assertion that sensation and reflection are the only sources of knowledge. These principles had been used by Berkeley, with certain additions of his own, to demonstrate that the material world is known to us only as a system of ideas which are made steadfast and trustworthy by the mind of God. Hume pushed Berkeley's argument one step further, and proved that we have no more direct and certain knowledge of spirit than we have of matter; and, moreover, that the relation of causation cannot be derived from either sensation or reflection, and is resolvable into custom, or the habitual association of ideas. Hume had also astonished and offended the community by his views of morality, miracles, and the usually accepted argument for the existence of God. Against this system Reid asserted that the direct perception of material qualities, and the positive suggestion or belief of material objects. He also insisted that there are certain original principles of belief which cannot be derived from either sensation or reflection. These he called First Truths, First Principles, Principles of Common-sense, etc. He is generally styled the "Common-sense Philosophy." Under this designation it was expounded in a popular treatise by James Oswald (ob. 1793) and James Beattie (1735-1803). The principal works of Reid were, Inquiry into the Human Mind, or Principles of Common-sense (London, 1765); Essays on the Intellectual Powers of Man (1785); Essays on the Active Powers of Man (1798).

Next to Reid in significance is Dugald Stewart for his undeviating and almost literal adherence to the doctrines of his teacher. He was more learned than Reid, more elegant, and more imaginative; but he did little less than to enunciate and enforce the doctrines of Reid by examples and confirmations from his copious reading in a style which was ornate and carefully wrought. His influence was not confined to Great Britain. His lectures were attended by pupils from France, who subsequently were active in the reform of philosophy in their own country. His works are always more popular than those of Reid. In 1792 he published vol. i of The Elements of the Philosophy of the Human Mind; in 1814 vol. ii; in 1827 vol. iii; in 1793 The Outline of Moral Philosophy; in 1810 his Philosophical Essays, which are more severely and purely metaphysical than any of his other writings. In 1823 and 1824 he published a General View of the Progress of Metaphysical, Ethical, and Political Science since the Revival of Letters, in which his critical taste and erudition are abundantly displayed; in 1829 The Philosophy of the Active and Moral Powers.

Dr. Thomas Brown should be named next to Dugald Stewart, not to the position of professor of moral philosophy, as is often the case, but as the incomparable assessor, nor because his combination of subtle analysis with rhetorical exuberance made him immensely popular for a time, but because he introduced new elements into the field of discussion, and gave an important impulse to a direction of thought which is now striving to replace the fundamental principles taught by Reid. We refer to the prominent articles by Brown, which have an association of ideas, to which Brown, following Stewart somewhat, assigned a very great significance in the explanation of psychological phenomena and philosophical beliefs. James Mill, John Stuart Mill, and Alexander...
Bain were all influenced by the philosophizing of Brown. The modern doctrine of inseparable associations was received with suspicion from Hume, who essayed itself in direct opposition to the so-called introspective theory of Hamilton in the criticism of his philosophy by John Stuart Mill. But although Brown in this and some other particulars deviated from the traditions of Reid and Stewart, he still held fast to the doctrine of irreducible foundation of metaphysical truths. Though he accepted Hume's conception of the causal relation, he did not, with Hume, resolve our belief in its constancy into custom or experience. His analysis of the sense perceptions opened the way for the physiological psychology which has since been so earnestly prosecuted. For these and other reasons Brown is a considerable figure among the Scottish philosophers.

Still more considerable is Sir William Hamilton, whose astonishing erudition, subtle logic, and massive strength revived the interest in the old questions which had begun to wane, and gave a new direction to the old inquiries and discussions. His first published contributions were several articles in the Edinburgh Review; viz, the first on Cousin and the Philosophy of the Conditioned (1827), others on the Philosophy of Perception (1830), and Recent Publications in Logical Science (1833). In 1836 he elected professor of logic and metaphysics in the University of Edinburgh. In 1845 he published the first instalments of his works on Thomas Reid, with notes and illustrations, which remained unfinished till after his death. This work, in short foot-notes and long, learned appendices, contains some of his most valuable contributions to philosophy. His Lectures on Metaphysics and Logic were published after his death under the direction of Rev. H. I. Manse and Prof. John Veitch (1859, 1860, 4 vols.). Prof. Veitch also published his Memoirs (1869). Hamilton's philosophical teachings may be classified as follows.

He was true to Reid's doctrine that common-sense is the foundation and the criterion of all true and trustworthy philosophy. He expounded immense research in the effort to show that this view was sanctioned by the most eminent of ancient and modern philosophers. At the same time, he endeavored to formulate more accurate conceptions and more satisfactory definitions of common-sense and its relations to the criteria of truth. His doctrine of the intuitions, or first principles, is a great departure of Reid in the direction of formal exactness. Hamilton followed Reid in rejecting the doctrine of representative perception, tracing out with labored erudition the several theories held by the advocates of this doctrine, and refuting them at every point. His classification of these theories is a masterpiece of ingenuity, acuteness, and learning. His doctrine is an attempt to reconcile the latest results of physiological research with the doctrine of natural realism as taught by Reid. While he held, with Reid, to the necessity of a priori or intuitive truths, he sought to reconcile or modify this position by his doctrine of the relativity of knowledge. His philosophy of the conditioned was the result of an effort to adjust the Scottish with the Kantian theory of the a priori element in knowledge. In doing this, he coincided more nearly with Jacobi than with any other German philosopher, although he differed from Jacobi in his fondness for scholastic distinctions and learned erudition. In formal logic he was eminently at home, both in its subtle refinements and its special literature. He elaborated a new and original scheme of logical symbolization on the basis of the doctrine of the quantification of the predicate, to which he attached great importance. Whatever may be the fate of his peculiar teachings, his influence will long be felt and acknowledged in reawakening an interest in philosophical questions, and in respect for philosophical studies in Great Britain and every English-speaking country. See Hamilton, Sir William.

Besides these four leaders of the Scottish school, Hutcheson deserves especial honor for anticipating in fact, though not with effect upon the course of speculation, some of the most important positions that were taken up from Hume and Hume's followers as if Hutcheson had himself been influenced by a small but able school of Irish critics of Locke, whose home was in Trinity College, Dublin. George Turnbull should not be overlooked, who was the instructor of Reid, and, in some sense, anticipated many of his doctrines. The subtle and consequent influence of Hume should not be forgotten, for without Hume the Scottish metaphysics would never have had existence. Hume not only waked Kant from his dogmatic slumber, but compelled Reid into the position of an earnest and patient inquirer into the correctness of the current philosophy received from Hume. It is a circumstance that, even were the world owe the birth, beginnings, and character of the two most significant schools of philosophy in modern times, viz. the German and the Scottish, Adam Smith did not fall into the ranks with Reid; but he wrote the ingenious Theory of Moral Sentiments, the ethical principles of which have been enforced in the present generation with a new accession of energy and zeal. Thomas Chalmers was not an originator of special philosophical opinions, but he expounded and enforced profound ethical and metaphysical conceptions with contagious energy and inspiring enthusiasm. John Wilson was more of a poet than a philosopher, but he brought to the study of the science of ethics a rare insight into ethical themes. The acute and brilliant Ferrier may have made a single convert to his theory of consciousness, but he could not fail to kindle a genuine interest in philosophical studies by his subtle analysis and his lucid statements. It does not fall within our task to characterize living teachers and writers; otherwise we might speak of Prof. Henry Calderwood, the daring critic of Hamilton when Hamilton was in his prime; Prof. A. D. Frazer, the subtle and sympathizing biographer and editor of Berkeley; Prof. Veitch, the genial biographer of Hamilton and Stewart; and the indomitable and tenacious Alexander Bain, whose zeal and learning must sooner or later arouse antagonists and critics who shall effectively protest against the extremes to which he carries his associational theories. Two other writers should not be overlooked. James Hutchison Stirling, M.D., the author of the Secret of Hegel, the critic of Hamilton, and the able antagonist of Huxley in his As A Rival to Science (1853), has the merit of being an ingenious author of Philosophy of Ethics and Notes Expository and Critical on Certain British Theories of Morals, give ample proof that the interest in philosophical studies is not likely to die out, and that, in some form or other, a Scottish philosophy will continue to be taught and defended, which is the theory of Reid and Hamilton. Nor should we fail to give just honor to Dr. James M'Cosh, who was trained in the Scottish philosophy, and has done so much to expound and defend, in an independent and critical spirit, its most important and distinctive principles in his well-known works, and has also written the history of the Scottish school with an enthusiasm and fidelity.

The Scottish philosophy has had no inconsiderable influence on the Continent, especially in France. Dugald Stewart attracted many pupils from that country, and among them the distinguished Royer Collard, who lectured in the Sorbonne in the years 1811-14, which lectures were the first metaphysics lectures of repute against the traditional system of Condillac. The fragments of these lectures were subsequently published in connection with a translation of the works of Reid made by Theodore Jouffroy, who, with Victor Cousin, was a pupil of Collard. The Eclectic and the more modern Historical and Critical schools of philosophy owe much to the Scottish philosophy and the impulses which it received from the Scottish teachers with whom it began. This influence has been gratefully acknowledged by Royer Collard, Theodore Jouffroy, Victor Cousin, and many of Cousin's pupils.

Scotus, Duns. See Duns Scotus.

Scotus (Erigena), John, a very notable philosopher of the Carolingian period, who reanimated in his own person the long-slighted speculations of the Neo-Platonists, and communicated ... than whatsoever he could have said. There was no direct influence exercised by them on his own age and on the ages that ensued; there may be a very imperfect appreciation of the philosophy which he revived, remodelled, and transmitted; there may be little profundity when he is compared with his eminent predecessors and his more illustrious successors; but there was great intellectual boldness in his career. There were vigorous and originality in his profession and exposition of the elder and almost forgotten doctrines in a dull and declining day. A profound impression was communicated by him to his own and to subsequent times, though it was conveyed by devious and unnoted channels, and through long and strangely disguised modes of transmission. A full and penetrating appreciation of this lonely and memorable dreamer in relation to the creeds, the thoughts, the interests, and the fortunes of his times might throw unexpected light on the history of philosophy and of theology, and even upon the confused struggles of the speculative formative period of the 9th and 10th centuries, the dearest because the least comprehended period of Christian history.

I. Life. — The origin, and the place and date of birth of John Scotus Erigena are all involved in obscurity and are wholly uncertain. According to one account, he was born on the western borders of England and was of royal Saxon blood. According to another tradition, he came from the western highlands of Scotland, and from the monastic establishments of St. Columba. The generally received opinion, however, is that he was Irish, and acquired his learning in the religious houses of Ireland, which then presented a higher culture and education than could be found anywhere outside of Western Europe, outside of the Saracen schools in Spain. We may safely acquiesce in M. Guizot's positive declaration that he was of Irish extraction and of Irish training; but this is a conviction, not an established fact. There is conjecture in the conclusion, as well as in M. Guizot's other conjectures, that he was called Scotus or to distinguish him from the multitude of other Irish Johns, or Scotch Johns; it may have been conferred in the same spirit in which Alcuin bestowed classical or Scripture names upon Charlemagne and his studious contemporaries. These are only conjectures. Certain knowledge we have none on this subject, or on the place of his birth, or the time of his death. He is supposed to have been born between 810 and 812, and no grave error will be committed by provisionally accepting the earlier as the correct date. Current rumors in his own day and generation represented him as having acquired his singular and varied knowledge, like the elder Greek sages, by travels in Greece, Asia, Egypt, Italy, and France. Such travels are among the most questionable of the legends of Anna Comnena; but that he did travel extensively is rendered probable by a citation from his works, adduced by M. Guizot, which seems to make distinct reference to such wanderings. The peculiar direction of his studies, the character of his learning, the scheme of his philosophy, his addiction to the Greek and to the Neo-Platonic speculations, might all suggest personal acquaintance with the Greeks and the countries of the Greeks. It has scarcely been noticed that the Pythagorean sect, or, at any rate, the Pythagorean doctrine, in connection with its Neo-Platonic developments, continued to maintain itself, even beyond the 9th century, in Constantinople and in other parts of the Eastern Empire. The expression of the declarations of Anna Comnena; but it escaped the regard of M. Guizot while he was awkwardly endeavoring to trace the dissemination of Neo-Platonic influences from the 5th to the 9th century. Wherever Scotus may have strayed, wherever he may have been educated, nothing is known of him till he appears in the service of Charles the Bald of France.

Whether an exile from his own country, or a pilgrim in search of knowledge or of sustenance, or invited by the king to aid in promoting liberal pursuits, he was cordially welcomed by the monarch, who made a zealous effort in a distracted time to renew the prestige of his grandfather Charlemagne for the advancement of learning. Scotus Erigena went to Paris, and was placed at the head of the School of the Palace. There is no agreement of opinion in regard to the date of this migration. It is variously assigned to the years 840, 843, 817, 850, and 870. It could not well have been before 843, when Charles ascended the throne. It could not have been later than 850, when the controversy in regard to Gottschalk was raging. Scotus Erigena would be between thirty and forty, probably, at the time. We have little information in regard to his personal appearance. He was small in stature and slender in frame; but the physical deficiencies which would invite only contempt in a modern period, and which endowed the brilliancy of his mind, the amiability of his temperament, and the quickness of his wit in social intercourse. The French king became warmly attached to him, and made him his constant companion and intimate friend. Charles was himself devoted to letters. He invited teachers from other countries, and is said to have attracted many Greeks to his schools. Employment was found for Erigena beyond the Cathedra Palatina. He was requested by the king to translate a treatise On the Celestial Hierarchy, falsely ascribed to Dionysius the Areopagite, who was just as erroneously identified with St. Denis, the supposed apostle of Christianity at Paris. The works of Erigena were translated into Latin by the emperor Michael the Stutterer, as a present to the Frank emperor Louis le Debonnaire. They were held in high regard in France—not the less high because they were Greek and unintelligible. John Scotus complied with the king's request and translated the book into Latin, adhering, however, so closely to the words of his foreign text as to indicate that the knowledge which he had of the Greek, as of the Hebrew and Arabic, was neither elegant nor profound. His reputation, or his position in the king's favor, drew the regards of Hincmar, archbishop of Rheims, who was involved in the controversy of the Areopagite between Mau- rius Maurus, of Mentz, and Gottschalk. The archbishop requested John to refute the polemic of Gottschalk. This task was executed with zeal, but it laid...
him open to the charge of heresy and provoked fresh logosnasy. His polemic was denounced by Prudentius of Treves and Florus of Lyons, who inveighed against the Cenobitian precepts in their treatise De Pradestinacione. We shall not enter into the nice distinctions of the different species of predestination, which lead, by so many slightly divergent routes, to heresy. The controversialists, like "the infernal peers,"

"Reason'd high Of providence, foreknowledge, will, and fate; Fix'd fate, free-will, foreknowledge absolute; And found no end, in wandering mazes lost."

The master of the Palatine School added to his version of The Celestial Hierarchy translations of the other works credited to Dionysius the Areopagite. At some subsequent time he completed his own system of philosophical under the title De Divinione Nature, or, rather, with the Greek designation Περὶ φύσεως μεταμόρφωσις. The controversial tracts of John had raised up antagonists and enemies; his philosophical tenets occasioned perplexity and alarm. Pope Nicholas, in 867, complained to Charles the Bald of his doubt of the ten- dency—the versions of Dionysius Areopagita—had been promulgated by John Scotus without having been first submitted to the approval of the apostolic see. He re- quired the king, therefore, to send Scotus to Rome to explain and justify his procedure, or, at least, to dismiss him from the superstition of the Palatine School. The king's answer is unknown: silentium legit alterum. That he did anything is improbable; but Scotus Erig- ena drops almost entirely out of view after 867. He is sometimes said to have withdrawn into seclusion in France. He is otherwise said to have returned to Eng- land after the death of Charles, and to have been placed by King Alfred at the head of his school at Oxford, whence he was driven by the commotions of the students. According to Matthew of Westminster and Roger de Hoveden, he was intrusted with the school at the monastery of Mekun, where, having armed his pupils by his severity, he was murdered by them with their styles (shtellos). This last story has, however, been transferred to the philosopher from another and some- what later Joannes Scotus, who taught at Athelney, John Erigena seems to have ended his days in France, and to have died before 876. A letter written in that year to Charles the Bald by Anastasius Bibliothecarius speaks of him as if he were dead. He passed away like a bright star through the world, leaving little or no memory, visible only in a brief transit, undiscoverable in its earlier and in its later course.

II. Works. The principal works of Scotus Erigena— the works which gave him reputation and provoked censure—have been already mentioned, and will have to be noticed again in examining his doctrine. Several other tractsates were written by him, or have been as- signed to him. We cannot determine the dates or the sequence of his intellectual labors. His translations were probably communicated, in their progress, to the circle of curious inquirers with whom he was associated in the court of Charlemagne; but the be- longings to the project before their publication. There was no such definite chronology in respect to literary productions in the days of manuscript as has been usual since the introduction of printing. We cannot, therefore, ar- range the works of Erigena according to any chronological scheme. He translated all the works of the alleged Scotus Erigena: The Celestial Hierarchy, The Ec- clesiastical Hierarchy, The Book of the Divine Names, The Mystical Theology, and his Ten Letters. Some of these may have been previously rendered into Latin. He translated the Scholae of Maximus on the writings of Dionysius. He composed a tractate On the Encha- nced World, which is regarded as the degenerate production of a disciple of Erigena, and anticipated the position of Ralph Cudworth, that the sacrament of the Lord's supper is only a commemora- tion of his sacrifice: tamen memoria veri corporis et

"sangnum ejus. It is not obvious how this opinion is consistent with the realistic or the pantheistic character of the philosophy of Scotus, but its coherence may be detected in the system of his treatise On the Vision of God, and other disputations, which have been lost. The reveries of Plotinus, and the rev- ery upon reveries of Marciliius Ficinus, might enable us to recose some image of the theory of the Vision of God if we could imitate the German fashion of recon- structing the reveries and reverences out of our inner consciousness. A treatise On the Duties of Man was ascribed to him by the abbot Thithemius, and several other productions have been attributed to him with little reason.

III. Philosophy. It is not proposed to enter further into the theological positions of Erigena than may be necessary to show their relations to his speculative do- trine and to interpret it, or to be interpreted by it. There is a close correspondence between his theology and his philosophy, as must always be the case when different lines of thought are pursued by the same person with earnestness and sincerity. Moreover, the dis- tinctive character of any philosophical doctrine is easily and briefly determinate, notwithstanding variety of man- ifestations and multiplicity of details, by detecting the fundamental or cardinal principle, which must control those manifestations and details if there be honesty of purpose and execution of the thought. Such a principle may be readily discerned in the tenets of Scotus Erig- ena and in their development. The essence of the divine nature is its central dogma, which every- thing proceeds, and whence arises his heterodoxy in regard to the Trinity. Whether he reached this position by independent reflection, or deduced it from logical postulates, or derived it from Neo-Platonic suggestions, or from all sources unconsciously combined, this seems to be the prolific germ of his whole system. He dis- tinctly acknowledges his obligation to Dionysius; yet the obligation was not one of servile acceptance, but of original development. However the spirit may be dis- guised under hard dialectical forms and under derivative arguments and phrases, there is a genuine and vigorous originality in John Scotus which is evident in many ways. The unity of the divine nature is its point of departure. Hence, all things proceed from God; all things subsist in God; all things terminate in God. The procedure of Erigena is this, and it gives the title to his work On the Division of Nature. The genetic division of nature is fourfold: (1) the nature that creates; (2) the nature that created; (3) the nature that is created, but does not create; (4) the nature which is neither created nor created. It will be observed that there is a gradual and delusive sliding of meanings in the application of the slippery and perplexing word "nature," and that the term cannot be strictly applied to that which is not created; therefore neither to the first nor to the fourth genus. It is necessary to note this, as the errors and heresies charged upon Erigena are in part due to the insufficiency and indistinctness of all language—defects which he strenuously asserts himself. Turning to his particular objections, we find four classes of error natural qualities are not created; (2) the nature that is created, but does not create; (3) the nature that is neither created nor creates; (4) the nature as an abstract conception, a metaphysical entity, the Neo-Platonic Unitas or Unitas, not a personal God: that the nature which is created but creates is also a vague abstraction, but must mean the forces, or laws, or ideas regulating all secondary creation—operating, therefore, simply through the medium of matter. In this sense there is no nature that is not created, but there is a nature that is not created, but there is a nature that is not created; there is only the principle of the ordinary conception of the term, and signifies the concrete result of the action of the laws imposed and of the forces communicate by the Supreme Nature—sustained, therefore, by the continuous action of the laws and by his continuous action; and that the nature which neither creates nor is created a nonentity, an unknown and indefinable possibility, possible but un-
imaginary—the impalpable and inapprehensible which lies beyond the present scope of the historian of the conceivable. This fourth nature might be altogether rejected, but it would make a fatal breach in this rarefied scheme of philosophy. Erigena justifies and provides for it in his first and most general division of things—into those which are and those which are not. There is a very marked Erigenism, or Hellenism in the use to which he makes of his own dialectical method to the doctrine; for he declares that even God is, in a certain sense, non-existent. He is, and he is not. Absurd and blasphemous as such a proposition appears, it finds a parallel as M. Caraman points out, in a similar utterance by Fénelon. What is meant is simply, as the context in both cases shows, that the human understanding is led to see in known qualities, perfections, characteristics, terms, improper—for the definition of the Divinity; that beyond all utterance, beyond all imagination, is everything appertaining to the Divine Essence. So far as this perfect nature lies without the apprehensible realm of the created and of the uncreated, it is for us non-existent, since esse and scire are one and correlative. There may be extravagance of conception and exaggeration of expression in such a thesis, but it is not necessarily either irreverent or absurd in its import. The fourth nature, then, as it is only in posse, belongs to the Divine Nature, or to the yet unmanifested operations of its reception and aspect.

The tendency of this quadrifid nature is evidently to pantheism, if it is not already pantheistic. The tendency is apparently pressed to its consummation in the development of the scheme, which is controlled in form and statement by the text of Dionysius and in the spirit of Neo-Platonism. Hence flow these tenets: "God, who alone truly exists, is the essence of all things; as Dionysius the Areopagite says, 'God is the beginning, the middle, and the end: the beginning, because all things come from him and participate in his essence; the middle, because all things subsist in him and by him; the end, because all things move towards him to attain to the limit of their motion, and the stability of his perfection.'" etc.

Nothing subsists outside of the Divine Nature; it alone properly and truly exists in all things, and nothing properly and truly exists which is not. Creation is the procession of God through personal immobility to the invisible and incalculable, and to such causation. Matter is only apparent; there is no real substance but the Divine Essence." It is not surprising that Scotus Erigena has been frequently regarded as the precursor of Spinoza, though Brucker distinguishes between the pantheism of the former and the atheism which he erroneously attributes to the latter.

Erigena's philosophy is Neo-Platonic; it is in the shape that which he borrows from Neo-Platonic sources or from the shaping influences of Neo-Platonic mysticism is alone considered, it is impossible to regard his philosophy as anything else but pantheism. His writings were, of course, accepted literally by his contemporaries so far as they were understood. The hazardous consequences of his doctrine were the more readily apprehended, as certain explicit dogmas were obviously at variance with the teachings of the Church, such as the denial of transubstantiation and the subordination of authority to reason. That such should be the caseness of the 9th century is much more pardonable than that metaphysicians of the 19th should rarely see in The Division of Nature anything but crude and unmitigated pantheism. Crude it is not, for it is characterized throughout by acute penetration and vigorous thought. Unmitigated it is not, for there is a cautious assertion of this restriction to the impotency of the human mind and of physical operation. The intellectual region, in regard to which he boldly speculates, is declared by him to be unutterable, ineffable, incomprehensible, superelemental, supersubstantial, superdivine. In his struggles to grasp the inapprehensible, he invents terms transcending all human appreciation, like a Byzantine emperor devising titles of hyperapophysate dignity. Some palliation may be offered even for the apparent extravagance which is, perhaps, more in the framework and phraseology of the doctrine—in the inevitable vagueness of the expression—than in the actual contemplation of the author. It must, indeed, be acknowledged that all inaccuracies or imbecilities of language react upon those from whom they proceed, modify all subsequent deduction. It, and all that is consequent upon the Einsteinian conception, is in cognizance and contrary to his design. But, while the immediate and derivative consequences of such aberrations should be fully recognised, they should be treated as aberrations, and, therefore, as undesigned. Such tenderness of consideration is merited by Scotus Erigena, an earnest thinker, and the first of the modern philosophy in medieval Christendom, when the materials of thought and the materials of expression were as yet loose and indeterminate. Examining the De Divisione Naturae with the caution and reservations which such tenderness prescribes, it may be conjectured that, when Erigena speaks of all things and of all things being God, he really means little more than is implied in the Scripture phrase: "in whom we live, and move, and have our being," that when he speaks of all things proceeding from God, and of all things returning to him, he does not intend to assert the mere evolution of Deity into shifting phenomenal forms, or the reabsorption into the finite of the eternal and the unmanifested.

Much of the questionable doctrine of Scotus Erigena sprang from his dialectical procedure. Following Aristotle, but imperfectly understanding him, he regarded division as the highest function of philosophy. Hence came the title and the treatment of his principal work, De Divisione Naturae. The characteristic of this work is an abstraction with the grades of existence, and Ueberweg charges him with "hypostatizing the Tabula Logica." There is some truth in these charges, but they must not be pressed too far. It is, however, to this predominance of the dialectical procedure: to the conjunction of reason with authority; to the co-ordination of philosophy and theology; to the formal statement and refutation of objections; and to the array of scriptural, patriotic, and other testimonies in support of his conclusions, that Scotus Erigena owes his title to be considered the precursor of the scholmen. He also furnishes the prelude to the great controversy between the Realists and nominalists by his doctrine of ideas and his qualified realism.

IV. Influence.—M. Guizot conceives that the influence of Scotus Erigena died with him. This is true in respect to his direct and ostensible influence, which was scarcely noticeable even in the maturity of his career. He was outside of his age. Deep night and the obscurity of the intellectual world made his appearance from the scene. But he had awakened reflection, though soon diverted into other currents. He had scattered seeds which lay dormant, not dead, in the soil. The impulse communicated by him must have been obscurely transmitted to other times, since Pope Honorius
SCOGAL, Henry, an eminent Scottish divine, the second son of Patrick Scogal, bishop of Aberdeen, was born in June, 1650, at Salton, in East Lothian. At the age of fifteen he entered the University of Aberdeen, and had no sooner finished his studies than he was promoted to a professorship (1669). At the age of twenty-three he was admitted into holy orders, and settled at Auchterless, near Aberdeen. In 1674 he was appointed professor of divinity in King's College, Aberdeen. He died at the early age of twenty-eight, June 20, 1678, and was buried in King's College Church, Old Aberdeen. His principal work is entitled The Life of God in the Soul of Man (Anon. 1671, ed. by bishop Burnet).

SCOURGE (usually some form of சுத்தின், shō, to lash / சுயதி, shō, job v, 21; ix, 23; I sa, x, 26; xxviii, 18, a. whip, as elsewhere rendered: சுதுர்கை, shō, Isa. xxviii, 15, 16; shōt, Josh. xxxii, 18; but in Lev. xix, 20, சுத்தையின், bivvikrēth, chastisement in general; φαγοῦλαν, the Lat. flagellum, or whip, John ii, 13; so the verb φαγοῦλα, Matt. xxvi, 26; Mark xvi, 15; θρίψον, a severe kind of whip, Acts xx, 24; Heb. xi, 32; tropically, "plague," Mark iii, 10, etc.; in a literal sense the verb μᾶθησις, Acts xx, 25. The punishment of scourging was very common among the Jews. Moses ordains (Deut. xxv, 1-3) that if there be a controversy between men, and they come to judgment, then the judges may judge; but if the matter be wicked, or hard to be beaten, the judge was to cause him to lie down, and to be beaten before his face, according to his fault, by a certain number of, but not exceeding forty, stripes. There were two ways of giving the lash—one with thongs or whips made of rope-ends or strips of leather, the other with cords. In the case of the offender was stripped from his shoulders to his middle and tied by his arms to a low pillar, that he might lean forward and the executioner the more easily strike his back. Some maintain that they never gave more nor less than thirty-nine strokes, but that in greater faults they struck with proportionate violence. Others think that when fewer than the number were inflicted, they might increase the number of blows. Paul informs us (2 Cor. xi, 24) that at five different times he received thirty-nine stripes from the Jews; which seems to imply that this was a fixed number, not to be exceeded. The apostle also clearly shows that correction with rods was different for him; for he says, "I was not beat with rods." The rabbins affirm that punishment by the scourge was not ignominious, and that it could not be objected as a disgrace to those who had suffered it. They maintain, too, that no Israelite, not even the king or the high-priest, was exempt from this law. This must be understood, however, of the worse whipping inflicted in their synagogues, which was really a legal and particular penalty than a public and shameful correction. Philo, speaking of the manner in which Flaccus treated the Jews of Alexandria, says he made them suffer the punishment of the whip, which, he remarks, is not less inapplicable to a free man than death itself. Our Saviour, speaking of the pains and ignominy of his passion, commonly puts his scourging in the second place (Matt. xx, 19; Mark x, 39; Luke xviii, 32). The punishment of scourging was specially prescribed by the law in the case of a betrothed bondwoman guilty of unchastity, and perhaps in the case of both the sexes; for although the law, in its original form, was subject to scourging in Egypt, as they still are by the law of the Koran for incontinence (Sale, Koran, ch. iv, note, and xxiv; Lane, Modern Egypt, i, 147; Wilkinson, Antient Egypt, abridg. ii, 211). The instrument of punishment in ancient Egypt, as it is also in modern times generally in Egypt, was usually a stick, applied to the soles of the feet in bastardino (see loc. cit., Chardin, vi, 114; Lane, Modern Egypt, i, 146). See BASTINADO.

A more severe scourge is possibly implied in the term "scorpions," whips armed with pointed balls of lead, the "horrible flagellum" of Horace, though it is more probably merely a vivid figure. Under the Roman method the culprit was stripped, stretched with cords or thongs on a frame (disarticatum), and beaten with rods. After the Porcian law (B.C. 300), Roman citizens were exempted from scourging, but slaves and foreigners were liable to be beaten, even to death. This infliction, as a method of extorting a confession, was not unusual among the Romans, and sometimes practised on their own selves. The same punishment was also occasionally inflicted for ecclesiastical offences (Matt. x, 17; Acts xxvi, 11), and sometimes as an instant mode of chastisement (John ii, 15). See Gesenius, Thesaurus, p. 1062; Isidore, Orig. v, 27; Horace, 1 Sat. ii, 41; iii, 119; Prov. xxvi, 3; Acts xxvi, 22, and Grotius, ad loc. xxvi, 24, 25; 1 Kings xii, 22; Cicero, Per. iii, 28, 29; Pro Tob. 6; L iv, 9, 32; Sallust, Cat. 51; and the monographs of Krumholz, De Servitore Fustibus Caesar (in the Bibl. Breu, viii, 87 sqq.); Sagittarius, De Flagellatione Christi (Ven. 1674); Strauch, De Ritu Flagellandi apud Judaeos (Veteb. 1668); Hilpert, ed. (Heinem. 1652); Seysel, De Rito Flagellandi et Rosonato (Veteb. 1678); and Ad Flagellatione Apostolorum (Veteb. 1683). See the title:

SCOURGING, a practice sanctioned by the Romish Church, to be given to any individual, for the mortifying of the flesh, voluntarily scourges himself. This is resorted to in many monasteries at regular intervals, frequently as often as three or four times a week, and in many cases much oftener. It is also performed during particular days of Lent. See FLAGELLANTS.

SCREECH-OWL (screech, lit. prob. from निव, night, and so designating some nocturnal creature; Sept. ἀκούσκοντας; Aquila, λήπαι; Symmachus. λματα; Vulg. lumia; marg. "night-monster"), a creature mentioned in connection with the desolation that was to mark Edom. According to the rabbis, the rīṭim was a noc-
tural spectre in the form of a beautiful woman that carried off children at night and destroyed them (see Bochart, Hieroz. iii. 629; Gesenius, Thesaur. s. v.; Buxtorf, Lex. Chalde et Talm., p. 1140). With the lith is may be compared the ghule of the Arabian fables. The old versions support the opinion of Bochart that a spectre is intended. As to the _ovumivranus_ of the Sept. and the _lamia_ of the Vulg. translations of Isaiah, see the Hieroz. iii. 892, and Gesenius (_Jesuia_, i. 913-920). Michaelis (Suppl. p. 1443) observes on this word, "In the poetical description of desolation, we borrow images even from fables." Among Oriental nocturnal birds we have Strix ulula, _S. brachyotus_, or short-eared owl, likewise found in Egypt and Arabia, as well as to the north of Syria, a bold, pugnacious bird, residing in ruined buildings, mistaken by commentators for the screech-owl, _S. stridulata_, and supposed by some to be the _lith_ of the Bible. The spectral species, again, confounded with the goat-sucker, is, we believe, _S. coromanda_ [see Night-hawk], and the same as _S. orientalis_ of Hasselquist, who makes it synonymous with _massane_ and with the Syrian _buna_, but apparently only upon the evidence of the vulgar, who believe in the "spectral lady" appearance of the _lith_ and _buna_, and in its propensity to lacerate infants, of which this bird, together with the _S. ulula_ and _bubo_ of antiquity, is accused. The original version of the story, however, refers, not to an owl or goat-sucker, but to the poetical _Strix_ of the ancients, a _lamia_ with breasts, that is, a harpy or a vampire, being a blood-sucking species of the bat family (Ovid, Fast. vi, 139, and the fables of C. Titinius, quoted by Gesner, De Strige, p. 738). See Bat. If, however, some animal be denoted by the Hebrew term, the screech-owl (_S. flammeus_) may well be supposed to represent it, for this bird is found in the Bible lands (see Tristram, _Ibii_, i. 26, 46), and is, as is well known, a frequent inhabitant of ruined places. The statement of Iby and Mangius relative to Petra illustrates the passage in Isaiah under consideration: "The screaming of eagles, hawks, and owls, which were soaring above our heads in considerable numbers, seemingly annoyed at any one approaching their lonely habitation, added much to the singularity of the scene" (see also Stephens, _Israël_. of Trave., ii. 76). Kita (Pict. Bible, note ad loc.) might perhaps refer the _lith_ to the eagle-owl, or _Bubo maximus_, which is found in many parts of the world, and haunts old ruins and other places where it is not liable to interruption. Like others of its tribe, it remains silent in its solitude during the day, but comes forth at night from its retreat, adding, by its strange appearance and dismal tones, to the gloom of the scenes which it delights to frequent. The ground color of its plumage is brown mingled with yellow, diversified with wavy curves, bars, and dashes of black. Its length is about two feet; the legs are feathered to the toes, and the iris of the eye exhibits a bright orange color. See Owl.

Screen, a partition, enclosure, or parchment separating a portion of a room or of a church from the rest. In the domestic halls of the Middle Ages a screen was almost invariably fixed across the lower end, so as to part off a small space, which became a lobby (with a gallery above it) within the main entrance doors, the approach to the body of the hall being by one or more doorways through the screen. These were of wood, with the lower part, to the height of a few feet, formed of close paneling, and the upper part of open-work. The passage behind the screen for the use of the servants was called "the Screen." In churches, screens were used in various situations, to enclose the choir, to separate subordinate chapels, to protect tombs, etc. That at the west end of the choir or chancel was often called the rood-screen, from the rood having been placed over it previous to the Reformation. Screens were formed either of wood or stone, and were enriched not only with moldings and carvings, but also with most brilliant coloring and gilding. The screens at the west end and sides of the choir in cathedrals and large churches were usually close throughout their whole height, as they also occasionally were in other situations; but in general the lower part only, to the height of about four feet from the ground, was close, and the remainder was of open-work. The oldest piece of screen-work that has been noticed is at Compton Church, Surrey; it is of wood, of transition character from Norman to Early English, consisting of a series of small octagonal shafts with carved capitals supporting plain semicircular arches, and forms the front of an upper chapel over the eastern part of the chancel.

Of the Early English style the existing examples are almost invariably of stone. Some are close walls, more or less ornamented with paneling, arcades, and other decorations; some are close only at the bottom, and have the upper part formed of a series of open arches. Specimens of wooden screens of very early Decorated
date remain at Stanton Harcourt, Oxfordshire, and at Sparsholt, Berkshire, and in the north aisle of the choir of Chester Cathedral: these have the lower part of plain boarding, and the upper of small feathered arches supported on circular banded shafts. Stone screens of this date are variously, and often very highly, enriched. Some have the upper part of open-work, similar to those of wood; and others are entirely close, and are enriched with arcades, panels, niches, pinacles, diapering, and other decorations characteristic of the style: specimens remain at Lincoln and several other cathedrals and large churches. Perpendicular screens exist in great variety in very many churches, both of wood and stone. Some of them are profusely ornamented with panelling, niches, statues, pinacles, tabernacle-work, carvings, and other enrichments. The lower part usually consists of close panels, and the upper part of open-work divided by mullions supporting tracery; but sometimes the whole is close, with the same general arrangement of panelling. The illustration given from Fyfield Church, Berkshire, is an example of a parclose.

Scribe (טֶה, sophēr, a writer; γραμματέας), a word the early appearance of which in Heb. literature shows the antiquity of the art of writing. The name of Kirjath-Sepher ("city of the book," Josh. xv, 15; Judg. i, 12) may possibly connect itself with some early use of the title. In the song of Deborah (v. 14) the word appears to point to military functions of some kind. The "pen of the writer" of the A.V. has been thought to be the rod or sceptre of the commander numbering or marshalling his troops; but it may naturally signify only that those unused to warfare in the emergency exchanged the pen for the sword. The title appears with more distinctness in the early history of the monarchy. They must be distinguished, however, with the skotérion (likewise literally recorders) from whom they are expressly distinguished (2 Chron. xxxvi, 11), as the latter were rather inspectors than writers. See Officer. Three men are mentioned as successively filling the office of scribe under David and Solomon (2 Sam. viii, 17; xx, 25; 1 Kings iv, 3, in this instance two simultaneously). Their functions are not specified, but the high place assigned to them, side by side with the high-priest and the captain of the host, implies power and honor. We may think of them as the king's secretaries, writing his letters, drawing up his decrees, managing his finances (comp. the work of the scribe under Joash, 2 Kings xii, 10). At a later period the word again connects itself with the act of numbering the military forces of the country (Jer. lxxii, 25, and probably Isa. xxxiii, 18). Other associations, however, began to gather round it about the same period. The zeal of Hezekiah led him to foster the growth of a body of men whose work it was to transcribe old records, or to put in writing what had been handed down orally (Prov. xxv, 1). To this period accordingly belongs the new significance of the title. It no longer designates only an officer of the king's court, but a class, students and interpreters of
as in ancient times comparatively few could write, this was, in fact, a learned profession. Such persons, evidently official characters, are frequently depicted on the Egyptian monuments, as that nation was proverbial for recording everything relating both to public and private life. The Assyro-Babylonian scribes, on the other hand, appear more like lawyers than scribes, and are frequently seen writing in small square characters, and not in the cuneiform style. See Writing.

Scribes, Jewish. These persons (called in Heb. ספריה, sopherin; Gr. γραμματίς) were originally mere writers or copyists of the law, who followed this business as a mode of livelihood; but eventually they rose to the rank of a learned profession—becoming the doctors of the law and interpreters of the Scriptures. As such they frequently appear in the New Test., and occasionally in the later books of the Old; and their office gradually became of still more importance after the dissolution of the Jewish commonwealth. (The following notices are from the Septuagint, the Talmudic allusions and the Talmudical references to the subject.)

The prominent position occupied by the scribes in the Gospel history would of itself make a knowledge of their life and teaching essential to any clear comprehension of our Lord's work. It was by their influence that the latter formed the foundations of the Christian church. Such was it also when the "new doctrine" was first proclaimed, it had become through them. Far more than priests or Levites, they represented the religious life of the people. On the one hand, we must know what they were in order to understand the innumerable points of contrast presented by our Lord's acts and words. On the other hand, we must not forget that there were also, inevitably, points of resemblance. Opposed as his teaching was, in its deepest principles, to theirs, he was yet, in the eyes of men, as one of their order—a scribe among scribes, a rabbi among rabbins (John i, 49; ii, 2; vi, 25, etc. Comp. Schultgen, Hor. Heb., ii, "Christus Rabbinorum Summus").

The rise, progress, and influence of the Jewish doctors and interpreters of the law are properly divided into five distinct periods, which are indicated by the special applications under which they were designated in successive times.

Sopherim, or "Scribes," properly so called.

1. The Name and its Signification. In the earlier records of the Old Test. the name Şopher (ספֶּר, participle of סָפָר, to write, to count) is given to officers of state whose functions were to write the king's letters, draw up his decrees (2 Kings xii, 10; 2 Chron. xxiv, 11), and to number and write down the military forces as well as the prisoners (Judg. v, 14; 2 Kings xxxv, 19; Isa. xxxiii, 18; Jer. iii, 25). As writing was intimately connected with the art of writing, and as these two accomplishments were always associated together in ancient times, these scribes occupied a distinguished position. Hence they are mentioned side by side with the high-priest and the captain of the host (2 Kings xii, 10; 2 Chron. xxiv, 11): and hence, too, the term Sopher (שופר) became in the post-exile period the honorable appellation of one who copied the law for himself or others, one skilled in the divine law, an interpreter of the Scriptures (Gen. vii, 16; Deut. xii, 12; Neh. xi, 3, etc.). The authority of most Hebrew scholars is with regard to the etymology of the word (Gesen. s. v.). Ewald, however (Poet. Rücht. i, 126), takes סֹפַר as equivalent to סֵפֶּר, "a judge."

In their anxiety to preserve the text of Holy Writ as well as to point out the import of its injunctions, these scribes counted every letter and classified every precept of the law. To indicate this, the Talmud, in accordance with its general practice always to deduce from the name the various actions of the man, derives the appellation Sophar from סֹפַר, to count, maintaining that this name was given to those who counted the letters of the law (Kiddushin, 30 a), as well as from סֶפֶּר, to number, to arrange, to classify, submitting that the name was also given to them because they classified the precepts of Scripture (Jerus. Shekalim, i, 1). They had ascertained that the central letter of the whole law was the reh of סֹפַר in Lev. xi, 42, and wrote it accordingly in a larger character (Lightfoot, On Luke 2). They counted up, in like manner, the precepts of the law that answered to the number of Abraham’s servants or Jacob’s descendents.

The Greek equivalent answers to the derived, rather than the original, meaning of the word. The γραμματίς of a Greek state was not the mere writer, but the keeper and registrar, of public documents (Thucyd. iv, 118; vii, 10; so in Acts xix, 35). The scribes of Jerusalem were, in like manner, the custodians and interpreters of the γράμματα upon which the polity of the nation rested. The same idea is applied to the sacred class in the New Test. and is repeated in both the Epistles of St. Paul (Rom. xiv, 8; 1 Cor. vii, 19; Luke vii, 30; x, 25; xiv, 3; γομοδίδασκαλοι in Luke v, 17; Acts v, 34). Attempts have been made, but not very successfully, to reduce the several terms to a classification. All that can be said is that γραμματίς appears the most generic term; that in Luke xi, 45 it is contrasted with the ἀρχιερεύς; that in Acts xix, 35, seems the highest of the three. Josephus (Ant. xvii, 6, 2) paraphrases the technical word by ἀρχιερεύς. Lightfoot’s arrangement, though conjectural, is worth giving (Harm. § 77). The "scribes," as such, were those who occupied themselves with the study of the law. In the Talmud, all the rabbinical interpretations of the Mishna, acting as assessors, though not voting in the Sanhedrin. The "doctors of the law" were expounders of the Gemara, and actual members of the Sanhedrin. (Comp. Carpzov, App. Crit. i, 7; Leusden, Phil. Hebr. c. 23; Leyerer, in Herzog’s Real-Encyclop. s. v. "Schriftgelehrte").

2. Date and Institution. The period of the Sopherim begins with the return of the Jews from the Babylonian captivity, and ends with the death of Simon the Just (B.C. cir. 485-390), embracing nearly a hundred and sixty years. Though there were popular teachers of the law in the Babylonian captivity, as is evident from Ezra viii, 16, 17, it is difficult to determine when the institution of the Sopherim began. The first occasion on which we find that Ezra himself was at the head of such a class (Ezra vii, 12, 21; comp. Neh. xiii, 13), yet the language in which the sacred oracles were written was gradually dying out, and Hebrew ceased, in many instances, to be the language of the people (ver. 24). This rendered the understanding of the Scriptures by the people at large a difficult matter. Besides, the newly altered state after the return from the Babylonian captivity, which called for new enactments as well as for the expansion and modification of some Pentateuchal laws, imperatively demanded that an authoritative body of teachers should so explain the law, which was regarded as the only rule of practice, as to adapt it to present circumstances. Hence Ezra, who reorganized the new state, also organized such a body of interpreters, of which he was the chief. It is for this reason that he is called Sopher = one occupied with books, interpreter of the Book (vii, 6, 11, 12, 21; Neh. viii, 1, 4, 9, 13; xii, 26, 30), that he is called the second Moses (Sanhedrin, 21 b; Josipho, ibid. cap. iv; Jerus. Meguil. ii, 9); and that it is said "when the Temple was forgotten by Israel, Ezra came from Babylon and restored it again" (Stucca, 20 a; comp. 2 Esdras xiv, 21-47). The skill in the law, both from among the tribe of Aaron and the laity, who, with Ezra, and after his death to the time of the Talmud, thus interpreted and fixed the divine law, are denominated
Scribes, Jewish

Sopherim—"scribes," in the strict sense of the word. Many of these Sopherim were members of the Great Synagogue which was formed by Nehemiah after the death of Ezra; hence the terms Sopherim and the men of the Great Synagogue (בניאויה לארשי האברכים) are frequently interchanged; and hence, too, the canons which were enacted during this period are sometimes recorded in the name of the former and sometimes in the name of the latter, though they proceed from one and the same body. Reserving those enactments which are recorded in the name of the Great Synagogue for that article [see SYNAGOGUE, THE GREAT], we shall here specify the most important acts and monuments which have come down to us as proceeding from the Sopherim.

The Sopherim. -- The Sopherim, at this period (528), the words of Ezra vii, 10 describe the high ideal of the new office. The scribe "is to seek (לָא) the law of the Lord and to do it, and to teach in Israel statutes and judgments." This far more than his priesthood, was the true glory of Ezra. In the eyes even of the Persian king he was "a scribe of the law of the God of heaven" (vii, 12). He was assisted in his work by others, chiefly Levites. Publicly they read and expounded the law, perhaps, also, translated it from the already obsolescent Hebrew into the Aramaic of the people (Neh, viii, 8-13). In the succeeding age they appear as a distinct class—"the families of the scribes," with a local habitation (1 Chron. i, 55). They compiled, as in the two books of Chronicles, excerpts and epitomes of larger histories (1 Chron. xi, 16; 2 Chron. xxiv, 3). Occasionally they add the occurrences of the word midrash ("the story" [margin, "the commentary"] of the prophet Iddo), afterwards so memorable, in 2 Chron. xxxiii, 22, shows that the work of commenting and expounding had already begun. In the latter period, it is not too much to say that the work of the Sopherim embraces the whole field of civil and religious law, both as it is contained in the written Word of God and as it obtained in the course of time; and that it is most essential to the criticism and interpretation of the Old Testament to understand these enactments, inasmuch as they materially affect the text of the Hebrew Scriptures. This will be evident from the following brief description of some of the Sopheric work.

(1). In accordance with the primary meaning of their name, the scribes, or Sopherim, copied the Pentateuch, the phylacteries, and Mezuzoth for the people (Pesharim, 50 b), since it was only the codices which proceeded from these authoritative teachers that could be relied upon.

(2). They guarded the Bible against any interpolations or corruptions, and for this purpose counted the letters of the Scriptures. Thus the scribes tell us that in five instances (Gen. xviii, 2; xxxvii, 2; Psa. xxxvi, 7; ixviii, 28), a rare crept into the text through a vitiated provincial pronunciation, for which reason these Sopheric corrections are called the emendations of the scribes (בְּנֵי תְּפִלָּה, נָרָדִים, 37 b [see Keri and Kethib; Masorah]; Glinnburg's translation of Jacob ben-Chajim's Introduction to the Rabbinic Bible, p. 12).

(3). They read the law before the people in the synagogues on stated occasions, for which reason Ezra, the chief scribe, is denominated (עֲנַי יִשְׂרָאֵל) the proctor of the law (1 Esdras viii, 1). Hereafter the usage of the word scribe, or Sopher (ספירה), in post-Biblical Hebrew to denote a public reader of the law (Sanhedrin, 31 a). Moreover, they indicated to the people when words were in pause or when they were in the plural or simply had dual forms, as is the case with עֲנַי יִשְׂרָאֵל, etc. These indications are called the reading of the scribes (בְּנֵי תְּפִלָּה). These expositions are called Sopheric comments (בְּנֵי תְּפִלָּה).

(5). They defined the limits of each precept, and determined the manner in which the sundry commands of the divine law are to be performed—e.g., they fixed the passages of Scripture meant by "the words of command" which the Lord enjoined the Israelites "to bind for a sign upon their hands, and to be as frontlets between their eyes" (Exod. xiii, 9; 16; Deut. vi, 8; xv, 18, with Menachoth, 94 b [see PHylACTERY) ; the portions of the Bible to be recited at morning and evening prayer as indicated in the words "thou shalt talk about them . . . when thou liest down and when thou risest up" (Deut. vi, 7), etc. These definitions of the injunctions are denominated the measures of the scribes (בְּנֵי תְּפִלָּה), which, though in theory they are distinguished from the letter of the Bible (הַצַּלִּים), yet in practice are equal to it, and are regarded as divinely legal (בְּנֵי תְּפִלָּה).

(6). They fixed the traditional law, which was in the mouth and memory of the people.

(7). They enacted prohibitory laws, called fences (בְּנֵי תְּפִלָּה), to guard the Biblical precepts from being violated, and these enactments are styled the precepts of the scribes or the Sopherim, the injunctions of the elders; and in the New Testament, the traditions of the elders (Matt. xv, 2; Mark vii, 5), the traditions of the fathers (Gal. i, 14). Hence, as the phrase בְּנֵי תְּפִלָּה is not only used to express the Sopheric expositions of the Pentateuch, but more especially to denote the definitions and hedges of the scribes superadded to the divine law, it is frequently identical with the phrase oral law (בְּנֵי תְּפִלָּה). Hence, too, the remark which often occurs in the Talmudic writings, "a subject the basis of which is in the words of the Pentateuch, but the definition or superstructure of which is from the words of the scribes" (Sanhedrin, 87 a; Jerus. talm. xi, 4; Kiddushin 77 a); when the simple letter of the inspired code is spoken of in contradiction to the definitions and hedges of the scribes.

(8). They removed anthropomorphisms and other indelicate expressions from the Scriptures by introducing alterations into the text, of which the following seventeen instances are especially recorded: 1. For the original reading, כְּשֶׁיָּדַע, they substituted כְּשֶׁיָּדַע and Jehovah still stood before Abraham" (Gen. xviii, 22), they substituted יהוה שֶׁיָּדַע, and Abraham still stood before Jehovah; for it appeared offensive to them that the Deity should be before the patriarch. ii. For the remark of Moses in his prayer, "Kill me, I pray thee, . . . that I may not see thy evil" (Num. xi, 15)—i.e., the punishment wherein thou visitest Israel—they substituted "that I may not see רְאוֹיִי" (my evil), because it might seem as if Moses ascribed evil to the Deity. iii. They altered "Let her not be as one dead, who proceeded from the womb of (הָנָּום) our mother, and half of (הָנָּום) our flesh be consumed" (Num. xii, 12) into "Let her not be as one dead-born, which, when it proceeds from the womb of (הָנָּום) its mother, has half (הָנָּום) its flesh consumed." iv. They changed לֹא וְתַבְדָּל (Deut. iii, 10), which is still retained in the Septuagint, into פִּלּוּ� (for sons cursed (בְּנֵי תְּפִילָה) themselves), because it was too offensive to say that the sons of Elie cursed God, and that Eli knew it and did not reprove them for it. v. "Will God see (רְאוֹיִי) with his eye" (2 Sam. xvi, 12) they altered into "Will God look (רְאוֹיִי) at my affliction" because it was too anthropomorphic. vi. "To his God (הָנָּום), O Israel, . . . and Israel went (רְאוֹיִי) to their God" (1 Kings xii, 16), they altered into "To your tents (רְאוֹיִי), O Isra
Israel... and Israel departed (שֶׁלַח) to their tents;" because the separation of Israel from the house of David was regarded as a necessary transition to idolatry, it was looked upon as leaving God and the sanctuary for the worship of idols in tents. viii. For the same reason they altered 2 Chron. x, 16, which is a parallel passage. viii. "My people have changed (נָעֵד) my glory for an idol" (Jer. ii, 11) they altered into "have changed (לִנְעֵד) their glory into an idol," because it is too offensive to say such a thing. ix. "They have put the rod to (תְבוֹא) my nose" (Ezek. viii, 17) they changed into "They have put the rod to (תְבוֹא) their nose." x. "They have changed (לִנְעֵד) my glory into shame" (Hos. ii, 7) they altered into "I will change their glory into shame" (הָגֵד) for the same reason which dictated the eighth alteration. xi. "Thou diest not" (תָּפָס) addressed by the prophet to God (Hab. i, 2), they altered into "We shall not die" (תָּפָס) because it was deemed improper. xii. "The apple of (רְכִים) mine eye," (Zech. ii, 12) they altered into "The apple of (רְכִים) his eye," for the reason which called forth the ninth emendation. xiii. "Ye make (יָתָן) me expire" (Mal. i, 18) they altered into "Ye weary (יָתָן) it," because of its being too gross an anthropomorphism. xiv. "They have changed (לִנְעֵד) my glory into the similitude of an ox" (Psa. cvi, 20) they altered into "They have changed (לִנְעֵד) their glory into the similitude of an ox," for the same reason which called forth the alterations in Jer. ii, 11 and Hos. iv, 7, or emendations eighth and ninth. xv. "Am I a burden (לְכָרָה) to thee?" (Job vii, 20) which Job addresses to God, they altered into "So that I am a burden (לְכָרָה) to myself," to remove its offensiveness. xvi. "They condemned (נָעֵד) God, or the divine justice" (Job xxxii, 8) they altered into "They condemned (נָעֵד) Job," for the same reason which called forth the fourteenth emendation. xvii. "Thou wilt remember, and thy soul will mourn over me" (לָמַיְהַת) (Lam. iii, 20) they altered into "and my soul is humbled within me" (לָמַיְהַת) because of the seeming impropriety on the part of the speaker to say that God will mourn. These alterations are denominated the seventy emendations of the scribes (שֵׁלְטַיִם), or simply Tikun Sopherim (שֵׁלְטַיִם) = the emendations of the scribes, and are given in the Masora Magna on Num. i, 1; xi, 15; Psa. cvi, 20; Ezek. viii, 17; Hab. i, 12; and in the Masora Parva (סָפָא), 13. (Comp. Finken in the Kern Chem. 1816, 1856), ix, 52 sq.; Geiger, Urscriff und Ubersetzungen der Bibel, p. 908 sq.; Freudenthal, Ochlok Wocholok [Hanover, 1864], p. 87 sq.; Ginsburg, The Introduction of Jacob ben-Chasid to the Rabbinic Bible, Hebrew and English [Lond. 1885], p. 28, etc.; Wedde, Die Emdenisations a Sopherim in Livris V. T. Protoposa [Vratislaviæ, 1860].

4. The Manner in which the Sopherim Transmitted their Work.—Their great reverence for the divine law, their extraordinary modesty and humility, as well as their fear lest any of their writings should be raised to the dignity of Holy Writ, prevented the scribes, or Sopherim (שֵׁלְטַיִם), from publishing these emendations in separate treatises. This is the reason why there are no books of the scribes extant, and why they most scrupulously abstained from dogmatizing, so much so that the phrase the laws of the scribes (לְקָרָה לְקָרָה) does not occur. It was the later doctors of the law (נָעֵד לְקָרָה) who canonized the opinions of the scribes (נָעֵד לְקָרָה), which, it was claimed, had been transmitted orally and through diverse signs.

These signs (שֵׁלְטַיִם) or indications (שֵׁלְטַיִם) the scribes are said to have put down in the margins of the copies of the Hebrew Scriptures to indicate to them the interpretations and definitions which their predecessors, contemporaries, and they themselves put on certain passages, and these signs are held to have formed the foundation of the Keri and Kethib, plene and defects, etc., of later times. Thus, for instance, from Exod. xxiii, 8 they deduce that it is the bounden duty of the master to marry his maiden who was sold to him for this purpose, though the law tolerates an alternative, and to indicate this opinion the scribes put in the margin again (כָּרָה לְקָרָה) "whom he will not take," the word אֶל with ת instead of נ, i.e. whom he ought to take (comp. Berekoth, 13 a; Rashi on Exod. xxiii, 8). Again, in Lev. xxv, 20, 30, it is enacted that if a house in a walled city has been sold and is not redeemed within a year, it becomes the absolute property of the purchaser. Now, the scribes defined the phrase soldil city to mean a city which had walls in the time of the conquest of Canaan by Joshua, though these walls were afterwards removed; and to indicate this they put in the margin against על אחרים על אחרים אֶל יֶבּוּל, "which had a wall," the word אֶל with ת instead of נ, i.e. which has not wall now (comp. Erubin, 32 a; Shevuoth, 16 a; Rashi on Lev. xxvi, 30, 31; Ma'monasim, 1a; Haggadah, 4b; Shemag, 6b). They concluded from Lev. xxviii, 4 that the proclamation or fixing of the new moon devolved upon the supreme court at Jerusalem (Mishna, Rosh-hashanah, i, 9; ii, 5, 7), and to indicate this the scribes wrote the defective יִשָּׁר, "ye shall pronounce," i.e. שַׁלֶּמֶשׁ, "it is sanctified" [see New Moons], instead of the plene יִשָּׁר. The scribes also indicated that certain commandments are not to be restricted to Jerusalem, but are to be kept wherever the Jews reside, by writing in such instances the defective שַׁלֶּמֶשׁ אָבְרָהָם, i.e. in your desolations, instead of the plene שַׁלֶּמֶשׁ אָבְרָהָם שַׁלְּמֶשׁ אָבְרָהָם, your dwellings (Lev. xxviii, 14, 31). These signs are the basis of the Masorah, and account for many of the various readings which obtained in the course of time. For further information on this most important branch of the Sopheric work, we must refer to the elaborate treatise of Kraachel, entitled More Neboke Ha-Zeman, sec. xiii, p. 161, etc.

5. The Authority of the Sopherim.—Though the scribes of this period themselves did not issue their expositions of what they believed to be the doctrines of Holy Writ with the declaration that "except every one do keep them whole and undefiled, without doubt he shall perish everlastingly," or "except a man believe them faithfully," and withal stated them as their opinions about the teachings of the divine law, yet the doctors of the law who succeeded the Sopherim accepted these expositions as final, and decreed that whosoever gainsays their authority commits a capital offence. As the penalty attached to the violation of some of the most licentious injunctions and prohibitions was not very serious in consequence, as the differences between the diverse kinds of transgression, while there is no distinction made in the Sopheric enactments, since the same amount of guilt and the same kind of punishment were incurred in case any one of their precepts was violated, the sages of the Mishna remarks, "To be against the words of the Bible; he who, in order to transgress the Scriptures, says phylacteries are not enjoined in Holy Writ, is acquitted, but he who says that there ought to be five compartments in the phylacteries, thus adding to the decisions of the scribes, is guilty" (S. T. 3, 3). Hence the well-known exposition of Eccles. xiii, 8, which is as follows: "Above these, my son, beware; of making many books there is no end;" i.e. my son, take care of the decisions of the
scribes above the words of the Bible, for in the words of Scripture there are both (ןָּעַשְׂיָה) injunctions and (יִנְּשָׁבֹת) prohibitions [the transgression of some of these involves only a slight punishment], while the transgression of any one of the precepts of the scribes is a capital offence. And if thou shouldest say, seeing that they are so weighty, Why are they not written down? [reply] "To make many books there is no end" (Ḳiddushin, 21 b).

It is probable, however, that these bold statements, which appear to exalt the expositions of men above the Word of God, are really due to the succeeding period, which we will characterize in its place, and to which we relegate much that relates to the office and its influence.

II. THE TANAIM, OR TEACHERS OF THE LAW OF NEW-TEST. TIMES.—1. Name and Date of the Tanaim.—The appellation Tanaim is Aramaic (תנאים, sing. יָנִיאָה, frequentative of the Chaldee יניאת=Hebrew יָנִיאָה, to repeat), and literally denotes repeaters of the law, or teachers of the law. The Hebrew equivalent for this title is תֹּלָהָיָה, while in the New Test. this class of teachers are denominated νομοδιδάσκαλοι (Luke v, 17; Acts v, 34). These teachers of the law are also called the sages, the wise (ἱσόμικες, sapiors), elders (πρεσβύτεροι, presbuteroi), Sages (Sofia, 46; Sabbath, 64), and in later times rabbanan (רבי נא=our teacher, rabbi = פָּדָּבָנָו, Mark x, 51; John x, 16), rabbi, and rabboni. See Rabbis. It is only rarely that the great doctors of this period are called מָשָׁרָי (comp. Kolinas, 13 b). The period of the Tanaim begins with the famous Antigonos of Soho (B.C. 200), and terminates with Samuel III ben Jehudah I (A.D. 220), in whose presidency the Sanhedrim, and with it the college, was transferred from Japheth to Tiberias, thus extending over 420 years.

2. The Work of the Tanaim.—The labors and tenets of these doctors of the law are of the greatest interest to the Christian student of the New Test. inasmuch as it was in their midst that our Saviour appeared; and as both Christ and his apostles frequently refer to the teachings, and often employ the very language of the Tanaim. The chief aim of the doctors of the law during this period was—

(1) To fix and formalize the views and expositions of their predecessors, the Sopherim, and to pass them as laws. Thus fixed and established, these views were termed Halachoth (הַלַּכָּה) =laws: they are composed in Hebrew and expressed in idiomatic and often enigmatical formule. The formalizing of these Halachoth was especially needed, since the successive ascendancy of the Persian, Egyptian, Syrian, and Roman powers over Palestine greatly influenced the habits and conduct of the Jewish people, and since the scribes themselves, as we have seen, did not set forth their opinions as final. The relation which the work of the Tanaim, or the νομοδιδάσκαλοι, in this department bears to that of the scribes will be better understood by an example. The scribes deduced from the words "When thou liest down and when thou risest up" (דַּעֵה יִקְרָא, Deut. vi, 7), that it is the duty of every Israelite to repeat both morning and evening the sections of the law (i.e. Deut. vi, 4-9; xi, 13-21) which proclaim the unity of God, without specifying the hours during which the passages are to be recited; while the νομοδιδάσκαλοι, accepting this deduction of the scribes as הַלַּכָּה, fixed the time when this declaration about the unity of God is to be made by every Israelite, without mentioning the length of the section to be recited, or that it is a duty to do so, because they founded it upon the interpretation of the Sopherim (Mishna, Berakoth, i, 1-5).

(2) The Tanaim compiled exegetical rules (תענוגות) to show how these opinions of the scribes, as well as the expansion of these views by doctors of the law, are to be deduced from the Scriptures. See ISRAEL BEN-
very reverence in which it had originated. Step by step the scribes were led to conclusions at which we may believe the earlier representatives of the order would have started back with horror. Decisions on fresh questions were accumulated into a complex system of casuistry. The new precepts, still transmitted orally, more precisely fitting into the circumstances of men’s lives than the old, came practically to take their place. The “Words of the Scribes” (מִלְּתֵי הָלָא) now used as text-books to which those decisions were honored above the law (Lightfoot, Harm. vol. i, § 77; Jost, Judenl. i, 99). It was a greater crime to offend against them than against the law. They were as wise, while the precepts of the law were as water. The first step was taken towards annulment the commandments of God for the sake of their own traditions. The casuistry became at once subtle and pruriæ, evading the plainest duties, tampering with conscience (Matt. xxv, 1-6; xxiii, 16-24). The right relation of moral and ceremonial laws was not only forgotten, but absolutely inverted. This was the result of the profound reverence for the letter which gave no heed to the “word abiding in them” (John v, 39).

(4.) The history of the full development of these tendencies is found elsewhere. See Talmud. Here it will be enough to notice in what way the teaching of the scribes in our Lord’s time was making to that result. Their first work was to report the decisions of previous rabbis. These, as we have just seen, were the Halachoth (that which goes, the current precepts of the schools)—precepts binding on the conscience. As they accumulated, they had to be compiled and classified. A new code, a second corpus juris, the Mishna (/bytrop-sacw/), grew out of them, to become in its turn the subject of fresh questions and commentaries. Here ultimately the spirit of the commentators took a wider range. The scribes of the Talmud divided their work in the obiter dicta of rabbis, the widest fables of Jewish superstition (Tite. i, 14), were brought in, with or without any relation to the context, and the Gemara (completeness) filled up the measure of the institutes of Rabbinic law. The Mishna and the Gemara together were known as the Talmud (instruction), the “necessary doctrine and erudition” of every learned Jew (Jost, Judenl. ii, 202-222).

(5.) Side by side with this was a development in another direction. The sacred books were not studied as a code of laws only. To search into their meaning had frequently to be subordinated to the guidance of the rabbinic interpretation, the “house of the interpreter” completely took its place in the text of the Old Testament. The process by which the meaning, moral or mystical, was elicited was known as Midrashah (saying, opinion). There was obviously no assignable limit to such a process. It became a proverb that no one ought to spend a day in the Beth-ham-Midrash (the “house of the interpreter”) without lighting on something new. But there lay a stage higher even than the Halakoth. The mystical school of interpretation culminated in the Cabala (revelation, the esoteric received doctrine). Every letter, every number, became pregnant with mysteries. With the strangest possible distortion of its original meaning, the Greek word which had been the representative of the most exact of all sciences was chosen for the wildest of all interpretations. The Greek kalas (καλάς) became the Ḥasham (saying, opinion). There was obviously no assignable limit to such a process.

4. Some of the distinguished doctors of the law of this period and their tenets.—As the presidents and vice-presidents of the chief seat of learning during the whole of this period are given in chronological order in the article Schools (Hebrew), we shall here only mention such of the doctors of the law as have influenced the Jewish mind and the religious opinions of the nation, and by their teaching prepared the way for Christianity. Foremost among these doctors of the law are to be mentioned:

a. Antigonus of Soho (B.C. 200-170), whose famous maxim, according to tradition, gave rise to Sadduceism and Boethusianism (see SADDUCEES), and who received the traditions of the fathers from Simon the Just, and transmitted them to his successors (Abot, i, 5). The tenet of the Sadducees, however, never commanded the assent of more than a small minority. It tended, by maintaining the sufficiency of the letter of the law, to destroy the very occupation of a scribe, and the class, as such, belonged to the party of its opponents. The words “scribes” and “Pharisees” were bound together by the Sadducees for the alliance against the scribes (Luke v, 30). See PHARISEES. Within that party there were shades and subdivisions, and to understand their relation to each other in our Lord’s time, or their connection with his life and teaching, we must look back to what is known of the five pairs (אשת כי) of teachers who represented the scribal succession. Why two, and two only, are named in each case we can only conjecture, but the Rabbinic tradition that one was always the nephew, or, president, of the Sanhedrin as a council, the other the ab-beth-din (father of the House of Judgement), presiding in the supreme court, or in the Sanhedrin when it sat as such, is not improbable (Jost, Judenl. i, 100).

b. Jose ben-Joezer of Zereda and his companion, Jose ben-Jochanan of Jerusalem, who were the first of the four pairs (אשת כי) that headed the Sanhedrin and the doctors of the law as president and vice-president (B.C. 170-140). Jose ben-Joezer was a priest, and played an important part in the Maccabean struggles. He was the spiritual head of the Chasidim (Mishna, Chapugh, ii, 7), also called scribes (פָּרָשָּׁי; 1 Macc. vii, 12; 2 Macc. v, 16), and later on the various sectarian doctrines of themselves into the Essenism (see CHASIDIM; ESSENES) was among the “company ofAssidians who were mighty men of Israel, even all such as were voluntarily devoted unto the law,” and the high-priest of the sixty who were slain by Bacchides through the treachery of Alcimus (1 Macc. ii, 42; vii, 13-16, with Chapugh, 18, 19, Bereshith Rabbi, תרשלים, § Ixv). The grand maxim of Jose ben-Joezer was, “Let thy house be the place of assembly for the sages, sit in the dust of their feet, and eagerly drink in their words” (Abot, i, 4). Bearing in mind the distracted state of the Jewish people at that time, and the fearful strife which Hellenism made among the highest sacerdotal functionaries, and which threatened to overthrow the instinct of the people, this solemn adumbration of the martyr that every household should form itself into a band of defenders of the faith, headed by sages—i.e., scribes, or doctors of the law—and that every Israelite should strive to be instructed in the religion of his forefathers is one of the noblest of the ancient custom of disciples sitting on the ground and sometimes in the dust at the feet of their teachers), will be appreciated. This will also explain the maxim of his colleague Jose ben-Jochanan: “Let thy house be wide open, let the poor be thy guests, and do not talk much with them; it has been given to the latter part of the Children of Judah to prevent the partition between the apostate Hellenists, who desecrated the sanctuary, and the faithful, as well as to
prevent the residence of Jews among the Syrians, and check Hellenistic luxuries, these two doctors of the law cnstated that contact with the soil of any foreign country, and the use of glass utensils, impart Levitical defilement (Sabbath, 14 b). These rigorous laws of Levitical purity laid the foundation of the withdrawal of the Essenes from the community at large, and of the ritual and doctrinal difference between the Pharisees and Sadducees, as hitherto the differences of these two parties were chiefly political. Hence the remark in the Mishnah: "Since the death of Jose ben-Joestar of Zereda and Jose ben-Sethaib, the unity of the schools has ceased" (Sotah, ix, 9). The precepts ascribed to them indicate a tendency to a greater elaboration of all rules connected with ceremonial defilement. Their desire to separate themselves and their disciples from all occasions of defilement may have furnished the starting-point for the name of Pharisee. The brave struggle with the Syrian kings had turned chiefly on questions of this nature, and it was the wish of the two teachers to prepare the people for any future conflict by founding a fraternity (the Chaborizim, or associates) bound to the strictest observance of the law. Every member of the order, on his admission, pledged himself to the observance of its rules, and the maintenance of the unity of the sect. They looked on each other as brothers. The rest of the nation they looked on as "the people of the earth." The spirit of scrupulosity was growing. The above precept associated with the name of Jose ben-Joestar pointed to a further growth (Jost, i, 238). It was hardly checked by the taunt of the Sadducees that "these Pharisees would purify the sun itself" (ibid. i, 217). See PHARISEES.

c. Jehochanan, the high-priest and governor of Jerusalem, ben-Simon, ben-Mattathias, commonly called John Hyrcanus (B.C. 150-106), was a distinguished Pharisaic scribe, or doctor of the law. The enactments which he passed, as recorded in the Mishnah, show his endeavors to suppress all notoriety connected with the observance of the law, and his desire to alleviate the unnecessary burdens of the law. Though Ezra, to punish the Levites for their backwardness in returning from Babylon, deprived them of their tithes or transferred them to the priests (Ezra ii, 36-42; vii, 15; Neh. vii, 43-45; comp. with Mishnah, Maxsar Shenai, v, 13; Sotah, ix, 10; Babylon Talmod, Yebamoth, 86 b; Kahaloth, 26 a), yet the formula consisting of Deut. xxvi, 13-15, and called confession (יִכְלָל), in which the Israelite had to declare in the Temple before God that he had paid the tithes to the Levite, continued to be recited at the time of the evening sacrifice on the last day of Passover. There was also a custom of singing every morning in the Temple Ps. xlv, 23-26 as part of the hymnal service, and of crowning the sacrificed beasts, and for the blood to be poured over their eyes, so as momentarily to blind them in order that they might be bound easily. Moreover, up to the time of Jehochanan the high-priest = John Hyrcanus, the people worked during the middle days of the festivals. See PASSOVER; TABERNACLES, FEAST OF. "Now Jehochanan the high-priest did away with the confession about the Levitical tithes (because it was too cumbersome). He also ordered the discontinuance of chanting: 'Awake!' (Ps. xlv, 23, etc., because the singing of it every morning made it appear as if God were asleep) and the bounding of the sacrifices (because it was cruel); interdicted working on the middle days of the festivals, since the work in the Temple and the work in Jerusalem, and ordered buyers of questionable produce, whether it had been tithed or not, to tithe it" (Mishnah, Maxsar Shenai, v, 16; Sotah, ix, 10).

d. Jehoshuah ben-Perachja and his colleague, Natai of Arabela, who were the second of the four pairs (וֹמִים) that headed the Sanhedrim and the doctors of the law as president and vice-president (B.C. 140-110). Though their surviving maxims are very few, they are instructive of the irremovable breach which was then made between the Pharisees and the Sadducees. In harmony with the wisdom, humanity, consistency, and leniency of John Hyrcanus, under whose pontificate and rule these two distinguished doctors of the law taught, Jehoshuah ben-Perachja propounded the maxim, "Procure for thyself a teacher, gain to thyself a friend, and judge every man on his side of the law, and to the limits of his sect or order (Jost, i, 227-238). His colleagues, Natai of Arabela, at all events, who regarded the foreign policy of the Saducees as desecration of God's holy heritage [see SADDUCEES], and as working into the hands of those very enemies whom they had only just driven from the holy city (1 Mac. xii, etc.), taught: "Keep aloof from wicked neighbors, have no fellowship with sinners, and reject not the belief in retribution" (Aboth, i, 7). It was this maxim which brought about the final separation between the Pharisees and the Sadducees in the time of Hyrcanus. The gulf thus created was deepened by an unhappy circumstance at the assumption of the high-priesthood by John Hyrcanus. He was an assiduous student of the Pharisees and go over to the Sadducees, and which gave the first impulse to the bloody sufferings and the ultimate destruction of his country and people, for whose independence and religion he and his family fought so bravely. The circumstance is as follows: Having returned from a glorious victory, and being pleased with the condition of the people at home, Hyrcanus gave a banquet, to which he invited both Pharisees and Sadducees. As he was enjoying himself in the midst of his guests, he, instigated by the Sadducees, asked the Pharisees to tell him whether there was any command which he had transgressed, that he might make amends for it. One of the Pharisees, a distinguished lawyer, in the name of the law of God, of his rule of life. To this one of the Pharisees replied: "Let Hyrcanus be satisfied with the regal crown and give the priestly diadem to some one more worthy of it; because before his birth his mother was taken captive from the Maccabean home, in a raid of the Syrians upon Modaim, and it is illegal for the son of a captive to officiate as a priest, much more as high-priest." The Sadducees, who had thus far succeeded, tried to persuade Hyrcanus that the Pharisees did this designedly in order to lower him in the eyes of the people. To ascertain it, Hyrcanus demanded of the Sanhedrim to sentence the offender to capital punishment. But the Pharisees, doctors of the law, opposed the death penalty on the ground that the civil enactment against indignities heaped upon a sovereign, who believed and taught that all men are alike in the sight of God, and whose very president at this time propounded the maxim of leniency, said that according to the law they could only give him forty stripes save one, which was the regular punishment for slanderers. It was this which made Hyrcanus go over to the Sad-ducees, massacre many of the Scribes, and fill the Sanhedrim with Sadducees (comp. Josephus, Ant. xii, 10, 5, 6, with Kiddushin, 66 a; Grätz, Geschichte der Juden 2d ed., iii, 438).

e. This similar condition, however, soon passed by, and the Scribes were again in the ascendency in the reign of Alexander Jannaeus, son of John Hyrcanus, when Simon ben-Shetach (q. v.), brother of queen Salome (Herodoth, 48 a), was the president of the Sanhedrim, and Jehudah ben-Tabai vice-president (B.C. 110-65). Though Simon ben-Shetach had for a time to quit the court and live in the country, because he was accused by the king son against the sovereign, yet Alexander Jannaeus reinstated him upon the solicitation of the Parthian ambassadors, who missed at the royal table the wisdom of this scribe, which they had so much enjoyed on a former occasion. He allowed himself to be elected member of the Sanhedrim, which was then filled with the Sadducees whom John Hyrcanus had put there, and by his
wisdom repeatedly in the presence of the queen and
king confounded these Sadducees by puzzling questions
about the treatment, without tradition, of such legal
cases as are not mentioned in the Mosaic law, so much
so that they gradually quitted the supreme court, and
Simon filled the vacancies with the scribes. The ca-
imious event which happened at the Feast of Taber-
nacles while Alexander Janneus was officiating in the
Temple (see TABERNACLES, Feast a car) cheered for a
time the progress of the scribes, but it was more than
made up by the fact that this sovereign, on his death-
bed, committed his wife to the care of the Pharisees
(Josephus, Ant. xiii, 16, 1, 2). Under Simon ben-Shet-
tach and Judah ben-Tabai the Sanhedrim was en-
tirely restored. The amount of money fixed by the
law was again instituted (March 17, B.C. 78) to commemorate the re-
turn of the residue of the scribes (בנדי ל/>
) who went into exile in the days of John Hyrcanus.

The reconstruction of the Sanhedrim, however, was not
the only important work effected by these two doctors of
the law. To render divorce difficult, Simon ben-
Shetach decreed that the money of marriage-settlement,
which was at first deposited with the wife's father, and
afterwards in his own hands, should be a fixed sum for
no loss to the husband in case he divorced his wife—
so as to amount at least to two silver minas (about £7 10s.)
if the bride were a maiden, and half that sum to a
widow; that the husband should invest it in his busi-
ness, so as to render it a matter of great inconvenience
and loss to him, and that if any of the property should be
purchased for the payment of this settle-
ment (dnk, mygdag), thus precluding the pos-
sibility of her being defrauded of it by unprincipled
heirs (Babylon Kethuboth, 82 b; Jerusalem Kethuboth,
cap. viii, end; Sabbath, xiv, 6; xvi, 6). See MAR-
riage.

Simon ben-Shetach, moreover, introduced superi-
or schools into every provincial town, and ordained
that all the youths from the age of sixteen should visit
them (Jerusalem Kethuboth, viii, 11), which created a
new epoch in the education of the nation. See SCHOOL.

Their zeal, however, to uphold the law in opposition to
the Sadducees led them to commit rigorous acts towards
their antagonists (Josephus, Ant. xiii, 16, 1); and on
one occasion Jehudah ben-Tabai, to eradicate the Sад-
declean notions of the people, [see SADUDEE], con-
demned to death a false accuser (Sanh. 29a, b). But when Simon ben-Shetach reprimanded his colleague for this unlawful act, Jehudah ben-Tabai, who was then president of the Sanhedrim, was so truly penitent that he at once gave up the presidency, threw himself on the grave of the man he had condemned, cried bitterly over the base avarice that took his
own life as an atonement for the one he had judiciously
taken away (ibid.). This rash act taught him greater
leniency for the future, and accounts for his precept to
judges: "Only as long as the accused stand before thee
regard them as transgressors of the law; but regard them
as innocent immediately after they are released
and have suffered the penalty of the law" (Abot, i, 8).

The following may be mentioned as an instance of
Simon ben-Shetach's extraordinary conscientiousness,
which must have greatly impressed itself upon the
minds of the people, and prepared the way for the re-
ception of the truth as it is in Jesus. The Sadducees,
out of revenge for his rigorous measures against them,
suborned two witnesses, who testified that his son com-
mitted a capital crime. He was accordingly sentenced
to death. As he was led to the place of execution, the
witnesses, being filled with horror that they had con-
demned innocent blood, confessed that they had borne
false witness. But as the law from time immemorial
had enacted that "the evidence once given and accept-

ed cannot be revoked" (Maimonides, Yad Ha-Cherakah
Hilchoth Eduth, iii, 5), and though Simon's fatherly
feelings for a moment made him hesitate about the
propriety of the execution, yet his son, to uphold the dig-

nity of the law, explained to him, "Father, if thou
wast not the one to whom the salvation should go from
thee, pay no regard to my life," and accordingly the
son died a martyr to the honor of the law (Jerusalem
Chagigah, ii, 2; Sanhedrin, i, 5; vii, 3). This noble
sacrifice on the part of Simon ben-Shetach evidently
made him lay down the maxim, "Test witnesses most
carefully, and be cautious in questioning them, lest they
speak in their turn, and learn them to be false as they
had been" (Abot, i, 9). No wonder that tradition celebrates Simon ben-Shetach as the "restorer of the divine
law to its pristine glory" (Kidushin).

As, at that time, the two great parties of the kingdom
were the Sadducees and the Pharisees, and the latter
were elected to the presidency and vice-presidency (B.C. 65-30) as the fourth pair (משיח). They are generally considered
as having been proselytes; but this is precluded by
the fact that they were at the head of the Sanhedrim,
and that according to the Jewish law no proselyte could
ever be an ordinary member of the seventy-one.

Indeed, Gritz (iii, 481) has shown that they were Ax-
andrian Jews, and that the notion of their having been
proselytes is the result of the mistake of the Talmudists in the Talmud. Though very few of their enactments
have come down to us, yet the influence which their
great learning and unflinching integrity gave them among
the people is large, and especially among the
succeeding doctors of the law, was such as to secure for
them a place among the great names of the school, and
therefore, their enactments have been propounded by Shemaja and Ab-
talion (Mishna, Edoth, i, 3; Pesachim, 66 a), who were styled the two magistrates of their day (לפוע דרי). The two
maxims of these distinguished scribes which have survived reflect the deplorable condition of the Jews under
the Roman yoke. Thus Shemaja urged on his disciples, "Love a handcraft, hate the rabbinate, and befriend not thyself with the worldly powers" (Abot, i, 10); while Abtalion said, "Sages, be careful in your utterances, lest ye draw upon yourselves the punishment of exile, and ye be banished to a place
where the water is poisonous [i.e. of seductive influ-
ence], and the disciples who go with you drink thereof
and die, and thus bring reproach upon the sacred name
of God" (ibid, i, 11). Some idea may be formed of Shemaja's influence and influence at the trial of Herod before the Sanhedrim. When this mag-
nate was summoned before the supreme tribunal to an-
swer the accusation of the mothers whose children he
had slain, and when his armed appearance and his retinue
of soldiers frightened the other members of the court into
silence, Shemaja, the president, had the courage to pro-
ounce the sentence of death against him (Josephus, Ant.
xiv, 9, 4). When he showed himself to be irresistible, they
had the wisdom to submit, and were suffered to continue
their work in peace. Their glory was, however, in great
measure gone. The doors of their school were no longer
thrown open to all comers so that crowds might listen
to the teachers. The Sadducees had to be brought into
the temple. The regulation was probably intended to discourage the attendance of the young men of Jerusalem at the scribes' classes; and apparently it had that effect (Jost, i, 248-
253). On the death of Shemaja and Abtalion, there
were no qualified successors to take their place.

Two sons of Butha, otherwise unknown, for a time occupied it, but they were themselves conscious of their
incompetence. A question was brought before them which
neither they nor any of the other scribes could answer.
At last they asked, in their perplexity, "Was there none
present who had been a disciple of the two who had been
so great?" The question was answered by Hillel the
Babylonian, knowing also, then anew or after, the
story of David. He solved the difficulty, appealed to prin-
ciples, and, when they demanded authority as well as argu-
ment, ended by saying, "So have I heard from my
masters Shemaja and Abtalion." This was decisive.

The sons of Bethera withdrew. Hillel was invited by
acclamation to enter on his high office. His alleged
descent from the house of David may have added to his
popularity.

The name of Hillel (born cir. B.C. 112) has hardly
received the notice due to it from students of the Gospel
history. The noblest and most genial representative of
his race was the first to live in which the system of the
sibres was capable of producing. It is
instructive to mark at once how far he prepared the way
for the higher teaching which was to follow, how far he
inevitably fell short of it. The starting-point of his
career is given in a tale which, though deformed by
Rabbinic exaggeration, yet freshens the memory. The
young student had come from Golah, in Babylonia,
to study under Shemenaj and Abtalion. He was poor
and had no money. The new rule requiring payment
was in force. For the most part, he worked for his
livelihood, kept himself with half his earnings, and paid
the expenses to the college porter. On one day, how-
ever, he had failed to find employment. The doorkeeper
refused him entrance; but his zeal for knowledge was
not to be baffled. He stationed himself outside, under
a window, to catch what he could of the words of
the sibres within. It was winter, and the snow began
to fall, but he remained there still. It fell till it lay upon
him for three days; and the window was darkened and
blocked up. At last the two teachers noticed it, sent
out to see what caused it, and, when they found
out, received the eager scholar without payment. "For
such a man," said Shemenaj, "one might even break the
Sabbath!" (Geiger, in UgoUini Thebaar, xxi; Jost, i, 254).
In the earlier days of his activity, Hillel had as his col-
league Menachem, probably the same as the Essene
Mann of Josephus (Ant. xv, 10, 5). He, however,
was tempted by the growing power of Herod, and, with
a large number (eighty in the Rabbinc tradition) of his
followers, entered the king's service and abandoned,
at once his calling as scribe and his habits of devotion.
They appeared publicly in the gorgeous apparel, glist-
nering with gold, which was inconsistent with both
(Jost, i, 250). The place thus vacant was soon filled
by Shammai. The two were held in nearly equal honor.
One, in Jewish language, was the Nasi, the other the
Ab-beth-din, of the Sanhedrin. They did not teach,
however, as they had once done; they had lost
mony with each other. Within the party of the Phar-
isees, within the order of the sibres, there came for
the first time to be two schools with distinctly opposed
tendencies—one vehemently, rigidly orthodox, the other
orthodox also, but with an orthodoxy which, in the lan-
guage of the time, should call liberal be called
conservative. The points on which they differed were
almost innumerable (comp. Geiger, ut sup.). In most
of them—questions as to the causes and degrees of unclean-
ness, as to the law of contracts or of wills—we can find
little or no interest. On the former class of subjects
the school of Shammai represented the extreme de-
velopment of the Pharisee spirit. Everything that
could possibly have been touched by a heathen or an
unclean Israelite became itself unclean. "Defilement"
was as a contagious disease which it was hardly possible
to avoid even with the careful scrupulosity described in
Mark vii, 1-4. They were, in like manner, rigidly sab-
bathinists. It was unlawful to do anything before the
Sabbath which would in any sense be in operation
during it, e.g., to put cloth into a dye-vat, or nets into the
sea. It was unlawful on the Sabbath itself to give
money to the poor, or to teach children, or to visit the
sick. They maintained the marriage law in its strict-
ness, and held that nothing but the marriage with the
wife could be good (Jost, i, 257-290). We must
not think of them, however, as rigid and austere in
their lives. The religious world of Judaism presented
the inconsistencies which it has often presented since.
The "straitest sect" was also the most secular. Sham-
mai himself was said to be rich, luxurious, self-indulgent,
Hillel remained to the day of his death as poor as in his
youth (Geiger, loc. cit.). The teaching of Hillel showed
some capacity for wider thoughts. His personal char-
acter was more lovable and attractive. While on the
one side he taught from a mind well stored with the
traditions of the elders, he was, on the other, anything
but a slavish follower of those traditions. He was the
first to lift the veil from the veil in which the system of
the law with a dialectic precision which seems almost
to imply a Greek culture (Jost, i, 257). When the
letter of a law, as e.g., that of the year of release, was
no longer suited to the times, and was working, so far as it
was kept at all, only for evil, he suggested an interpre-
tation which was fundamentally and properly set it aside.
His teaching as to divorce was in like manner a
adaptation to the temper of the age. It was lawful for
a man to put away his wife for any cause of disfavor, even
for so slight an offence as that of spoiling his dinner by
her bad cooking (Geiger, loc. cit.). The genial charac-
ter of the man comes out in some of his sayings, which
remind us of the towns of Jesus in the Sermon on the
Mount, and present some faint approximations to a higher
teaching: "Trust not thyself to the day of thy death." "Judge
not thy neighbor till thou art in his place." "Leave
nothing dark and obscure, saying to thyself, I will ex-
plain it when I have time; for how knowest thou wheth-
ver the time will ever come?" (14: 10, 16). It is hard to
say who gains a good name, gains it for himself; but who
gains a knowledge of the law, gains everlasting life" (comp.
John v, 39; Aboth, ii, 5-8). In one memorable
rule we find the nearest approach to that which was
imprinted in the great commandment of the Gospel: "Do
nothing to thy neighbor that thou wouldest not that
he should do to thee." The contrast showed itself in
the conduct of the followers not less than in the teachers.
The disciples of Shammai were conspicuous for their
fierceness, appealed to popular passions, used the sword
to decide their controversies. Out of that school grew
the party of the Zealots, fierce, fanatical, vindictive, the
political bigots of Pharisaism (Jost, i, 267-269). Those
of Hillel were, like their master (comp., e.g., the advice
of Gamaliel, Acts v, 34-42), cautious, gentle, tolerant,
unwilling to make enemies, content to let things take
their course. One school resisted the other, the whole
was disposed to foster, the study of Greek literature. One
school sought to escape from heathenism, the full burden of the law, the other that he
should be treated with some sympathy and indulgence.
See PROSELYTES. One subject of debate between the schools exhibits the contrast as going deeper than these ques-
tions, touching upon the great problems of the universe.
"Was the poor man so much more liberal as to have been
better for him never to have been?" Or was this
life, with all its suffering, still the gift of God, to
be valued and used as a training for something higher
than itself?" The school of Shammai took, as might be
expected, the darker, that of Hillel the brighter and the
wisest, view (Jost, i, 264).
Outwardly, the teaching of our Lord must have ap-
tered to men different in many ways from both. While
they repeated the traditions of the elders, he "spake as
one having authority," "not as the sibres" (Matt. vii,
29; comp. the constantly recurring "I say unto you").
While they confined their teaching to the class of
scholars, he "had compassion on the multitudes" (ix, 36).
While they were to be found only in the coun-
cil or in their schools, he journeyed through the cities
and villages (iv, 23; ix, 35; etc.). While they spoke of
the kingdom of God vaguely, as a thing far off, he pro-
claimed that it had already come nigh to men (iv, 17).
But, in matters of the household of the wife and the
flesh, he must have appeared in direct antagonism to
the school of Shammai, in sympathy with that of Hillel.
In the questions that gathered round the law of the
Sabbath (xii, 1-14; 2 John, v, 1-16; etc.) and the idea of purity
(Matt. xv, 1-11, and its parallels), this was obviously
the case. Even in the controversy about divorce, while
his chief work was to assert the truth, which the disputants on both sides were losing sight of; he recognised it, must be the law. He treated the law of Hillel as the true interpretation of the law (xix, 8). When he summed up the great commandment in which the law and the prophets were fulfilled, he reproduced and ennobled the precept which had been given by that teacher to his disciples (vii, 12; xxii, 34-40). So far, on the other hand, as the temper of the times, and the adaptation of the teaching of Christ must have been felt as unsparingly condemning it.

4. It adds to the interest of this inquiry to remember that Hillel himself lived, according to the tradition of the rabbis, in the latter days of the Maccabean dynasty, and must have been present among the doctors of Luke ii, 46, and that Gamaliel, his grandson and substantially his successor, was at the head of this school during the whole of the ministry of Christ, as well as in the early portion of the history of the Acts. We are thus able to explain the fact which so many passages in the gospels lead us to infer—the existence all along of a party among the scribes themselves more or less disposed to recognise Jesus of Nazareth as a teacher (John iii, 1; Mark x, 17), but far from the kingdom of God (xii, 34, advocates of a policy of toleration (John vii, 51), but, on the other hand, his pronouncing and unaltering testimony of their faith (xiv, 42), afraid to take their stand against the strange alliance of extremists which brought together the Sadducean section of the priesthood and the ultra-Pharisaic followers of Shammai. When the last great crisis came, they apparently contented themselves with a policy of absence (Luke xxii, 50, 51), possibly not even summoning courage to the counsel which condemned our Lord was a packed meeting of the confederate parties, not a formally constituted Sanhedrin. All its proceedings, the hasty investigation, the immediate sentence, were vitiated by irregularity (John i, 407-409). Afterwards, when the fear of violence was once over, and popular feeling had turned, we find Gamaliel summoning courage to maintain openly the policy of a tolerant expectation (Acts v, 34).

5. Education and Life.—(1). The special training for a scribe's office began, probably, about the age of thirteen. According to the 'Pirke Aboth ('v, 29), the child began his study of the law at five years old. Three years later every Israelite became a child of the law (Bar-Misveath), and was bound to study and obey it. The great mass of men rested in the scanty teaching of their synagogues, and those who became their Tephillim, the texts inscribed on their phylacteries. For the few, however, the school of the rabbi opened to him, to the calling of a scribe, something more was required. He made his way to Jerusalem, and applied for admission to the school of some famous rabbi. If he were poor, it was the duty of the synagogue of his town or village to provide for the payment of his fees, and in part also for his maintenance. His power to learn was tested by an examination on entrance. If he passed it, he became a "chosen one" (_tiles, comp. John xv, 16), and entered on his work as a disciple (Carpzov, App. Criti, i, 7). The master and his scholars met, the former sitting on a high chair, the elder pupils (יֵילָדִים) on a lower bench, the younger (יַעֲנוֹת) on the ground, both literally "at his feet." The class-room might be the chamber of the Temple set apart for this purpose, or the private school of the rabbi. In addition to the rabbi, or head master, there were assistant teachers, and one interpreter, or crier, whose function it was to proclaim aloud the whole school what the rabbi had spoken in a whisper (comp. Matt. x, 27). The education was chiefly catechetical, the pupil submitting cases and asking questions, the teacher examining the pupil (Luke xi). The questions might be ethical, "What was the great commandment of all? What must a man do to inherit eternal life?" or casuistic, "What might a man do or leave undone on the Sabbath?" or ceremonial, "What must a man eat and drink for the most purifying pue-

rities. (Comp. Evang. Infant. c. 45, in Tischendorf, Codex Apoc. N. T.) In due time the pupil passed on to the laws of property, of contracts, and of evidence. So far he was within the circle of the Halakah, the simple exposition of the traditional "words of the scribes." He might remain content with this, or pass on to the haggadah, and the most intriguing pue-

rities. In both cases, pre-eminently in the latter, par-

ables entered largely into the method of instruction. The teacher uttered the similitude, and left it to his hearers to interpret for themselves. See PARABLE. That the relation between the two was often one of genial and kindly feeling we may infer from the saying of one famous scribe, "I have learned much from the rabbins my teachers, I have learned more from the rab-

bins my colleagues, I have learned most of all from my disciples" (Carpzov, App. Criti, i, 7). (2.) After passing through the course of training, probably at the age of thirty, the probationer was solemnly admitted to his office. The presiding rabbi pronounced the formula, "I admit thee, and thou art admitted to the chair of the scribe," solemnly ordained him by the imposition of hands (יהֶרֶם הַיָּדוֹ = χανδρία), and gave to him, as the symbol of his work, tablets on which he was to note down the sayings of the wise, and the "key of knowledge" (comp. Luke xi, 52), with which he was to open or to shut the treasures of divine wisdom. So ad-

mitted, he took his place as a Chazer, or member of the fraternity, was no longer ὕπερμονε υπό τὸν νόμον (Acts iv, 13), was separated entirely from the multitude, the brute herd that knew not the law, the "cursed" "people of the earth" (John vii, 15, 49). (For all the details in the above section, and many others, comp. the elaborate treatises by Ursinus, Antiqu. Heb., and Heubner, De Academia Hebraeorum, in Ugozli Theorar. ch. xx.)

6. The position of the rabbi. In his admission the choice of a variety of functions, the chances of failure and success. He might give himself to any one of the branches of study, or combine two or more of them. He might rise to high places, become a doctor of the law, an arbitrator in family litigations (Luke xii, 14), the leading spirit of the devout of the pious (John xii, 14). The rabbi had the power of expounding and applying the law, of pronouncing a sentence of life or death (comp. Matt. xxv, 14), of appointing the judges of the land (Deut. xxv, 16). He might have to content himself with the humbler work of a transcriber, copying the law and the prophets for the use of the synagogues, or Tephillim for that of the devout (Otho, Lex. Rabb. s. v. "Phylacteria"), or a notary writing out contracts of sale, covenants of es-

pouls, bills of repudiation. The position of the more fortunate was, of course, attractive enough. Theoretically, indeed, the office of the scribe was not to be a source of wealth. It is doubtful how far the fees paid by the pupils were appropriated by the teacher (Bux-
torff, Synag. Judaeic. c. 46). The great Hillel worked as a day-labourer. Paul the tentmaker, our Lord's work as a carpenter, were quite consistent with the popular conception of the most honored rabbi. The indi-

rect payments were, however, considerable enough.

Scholars brought gifts. Rich and devout widows main-
tained a rabbi as an act of piety, often to the injury of their own kindred (Matt. xxii, 14). Each act of the notary's office, or the arbitration of the jurist, would be attended by an honorarium.

(4.) In regard to social position, there was a like con-

tradiction between theory and practice. The older scribes had had no titles [see Rabbi]; Shemaja, as we have seen, warned his disciples against them. In our
Lord’s time the passion for distinction was insatiable. The ascending scale of Rab, Rabbi, Rabban (we are reminded of our own Reverend, Very Reverend, Right Reverend), presented so many steps on the ladder of ambition (Scrupius, *De Tit. Rabbi*, in *Ugoëlo*, ch. xxii). Other forms of worldliness were not far off. The later Rabbis had discovered that the deathbed of a nobleman had a right to a goodly house, a fair wife, and a soft couch* reflected probably the luxury of an earlier time (Ursini *Antiq. Heb.* c. 5, ut sup.). The salutations in the market-place (Matt. xxiii. 7), the reverential kiss offered by the scholars to their master, or by rabbins to each other, the greeting of Abba, father (ver. 9, and Lightfoot, *Hor. Heb.* vol. i. p. 76), were paralleled with the simple *żyrow* and *jżrow* of our Lord and his disciples, with the broad blue zizith or fringe (the *krestien* of Matt. xxiii. 5), the Tephillin of ostentatious size—all these go to make up the picture of a scribe’s life. Drawing to themselves, as they did, nearly all the energy and thought of Judaism, the close hereditary caste of the priesthood was powerless to compete with them. Unless the priest became a scribe also, he remained in obscurity. The order, as such, became contemptible and base. For the scribes there were the best places at feasts, the chief seats in synagogues (ver. 6; Luke xiv. 7). (5) The character of the order in this period was marked, under these influences, by a deep, incurable hypocrisy, all the more perilous because, in most cases, it was unconscious. We must not infer from this that all were alike tainted, or that the work which they had done, and the worth of their office, were not recognised by Him who rebuked them for their evil. Some there were not far from the kingdom of God, taking their place side by side with prophets and wise men among the instruments by which the wisdom of God was teaching men (Matt. xxiii. 34). The name was still honourable. The apostles themselves were to be scribes in the kingdom of God (xiii. 45). The Lord himself did not refuse the salutations which hailed him as a rabbi. In “Zenas the lawyer” (*yowmoc*, Tit. iii. 13) and Apollos “mighty in the Scriptures,” sent apparently for the special purpose of dealing with the *máxai vóumai* which prevailed at Crete (Tit. iii. 9), we may recognise the work which members of the order were capable of doing for the edifying of the Church of Christ.

3. The Later Doctors of the Law.—I. Name and Date.—The name Amoraim (אמוראים, sing. איורא, from אֵיָּרָא, to say, to hold forth, to expound), like the appellation Tanaim, is Aramaic; it literally denotes reporters, expositors, and was given, after the redaction of the Mishna, to those “wise men” and “doctors of the law” who alone constituted the authorized recorders and expositors of the received Halachah. The period of the Amoraim begins with the immediate disciples of R. Jehudah the Holy (A.D. 220), and terminates with the completion of the Babylonian Talmud (cir. A.D. 600), embracing nearly 270 years.

2. The Work of the Amoraim.—As the title implies, these Amoraim had to examine, decide, and expound the import of the Mishna for general practice. After the redaction of the Mishna by Jehudah the Holy (A.D. 163-193), this *corpus juris* became the canonical code, and Ramban saying that “the disciples of the wise apportioned the work of practice, both in Babylon, whether it was imported immediately after its appearance by the celebrated Rab (q. v.), and in Palestine. These commentators and discussions on the Mishna in the two countries are embodied in the two Talmuds, or more properly Gemaras, which are named after them—Jerusalem and Babylon. The Jerusalem Talmud was made up in Tiberias about A.D. 400, because the Christian government took away from the doctors of the law the right of ordination, thus causing the extinction of the patriarchate and the decension of the Palestinian school; while the Babylonian Talmud was not closed finally till the period of the Saboraim, as the schools were still greatly flourishing in Babylon under the presidency of Rech Mebiha (רכ מְבִּיתָא, or heads of schools, and the Rech Galutha (רֵכִּ֖ה גַּלְוָּתָא), or the princes of the exiles, as they were called. See MDRASH, TALMUD. For the distinguished doctors of the law who occupied the patriarchate, and were the presidents and vice-presidents of colleges during this period, we must refer to the article SCHOOLS, JEWISH, where they are enumerated in chronological order.

3. The Saboraim, or the Teachers of the Law after the Conclusion of the Talmud.—I. Name and Date.—The appellation Saboraim (םבורהין), from the Aramaic יבורה, to think, to discern, to judge) properly signifies devoeees, and was given to those doctors of the law who determined the law (דִּבְרֵיהֶם) from a careful examination of all the pros and cons (בן אֵם) urged by the Amoraim in their controversies on divine, legal, and ritual questions contained in the Talmud. Hence the remark of Sherira Gaon (A.D. 968-998), “Though no independent legislation existed after the cessation of the Amoraim, yet there continued exposition and weighing of the transmitted and prevalent opinions; and it is from weighing of those opinions that the doctors derive their name, Saboraim” (Grätz, v. 420). The period of the Saboraim extended from A.D. 500 to A.D. 650; however, it is divisible into two parts, and it is only the first part—i.e. from the death of Raba. A.D. 500, to the death of R. Giza and R. Simuna, A.D. 550—which can properly be denominated the real Saboraim epoch; while the second part, which consists of the interval between the real Saboraim and the rise of the Gaonim, from A.D. 550 to 657, has no proper designation, because the doctors who lived at this time and the work which they did are alike unimportant and desultory.

4. The Work of the Saboraim.—Unlike their predecessors the Tanaim and Amoraim, and their successors the Gaonim, these doctors of the law neither formed a succession of teachers nor were they engaged in any new work. They were a circle of literati and teachers, who supplemented and completed the work of the Amoraim. They explained all doubtful questions in the Talmud, made new additions to it both from oral traditions and M.S. notes, inserted into it all the anecdotes which happened in the different schools, corrected it, and wrote it down in the form in which we now have it. Hence their work had nothing to do with theories, but was pre-eminently practical. The chief men among these Saboraim which have come down to us by name are R. Giza, the president of the college at Sora, and R. Simuna the president of the college at Pumbeditha and Rabai of Roh. Their disciples and successors who belonged to this period are unknown (Grätz, v. 15 sq.; 422 sq.).

5. The Gaonim, or the Last Doctors of the Law in the Chain of Rabbinic Succession.—I. Name and Date.—It is now difficult to ascertain the etymology of Gaon (גאון), the title of the chief doctors of the law who succeeded the Saboraim. One thing, however, is certain—namely, that it is not Hebrew, since as early as the Bible and in the Septuagint it bore the Aramaic meaning of pride, haughtiness—and while here it is an honorable apppellation given exclusively to the presidents of the two distinguished colleges at Sora and Pumbeditha. Now, the period in which it originated may have thrown some light on the etymology of this title. Grätz (v. 139, 477) has shown that this title obtained A.D. cir. 658. When Ali, the son-in-law of the Caliph and vizier of the government, ruled over the East, the Muslims were divided into two parties, one for and the other against him, both the Babylonian Jews and the Nestorian Christians decided in his favor and rendered him great assistance. Maremès, who supported Ali’s commander-in-chief in the siege of Mosul, was nominated Catholic, while R. Isaac, the president of
the college at Sora, who at the head of several thousand Jews aided Ali in the capture of Firus-Shabur (May, 467), was rewarded with the title Gaon ("accolade"). According to the text, the title Gaon is either of Arabic or Persian origin, and properly belonged to the presidents of the Sora college, who alone bore the appellation at the beginning. The president of the subordinate sister college at Pumbeditha was called the head of the college (Heb. אֲרָמָאִיק אֶדֶם הָנָבִי, Aramaic אֲרָמָאִיק מִשְׁכַּנְיָא הָנָבִי by the Babylonians); and the appellation Gaon, whereby they were sometimes styled, obtained at first among the non- Babylonians, as the title Gaon was not extant in the written form until the close of the Talmudic period. 

When Sora, after the death of Saadia, began to decay altogether, and Pumbeditha continued alone to be the college of the doctors of the law, the presidents of its college, like those of Sora, were described by the title Gaon. The period of the Gaonim extends from A.D. 657 to 1034 in Sora, and from 657 to 1038 in Pumbeditha, during which time the former college had no less than thirty-five presidents and the latter forty-three. See Pumbeditha; Saadia, Isaac ben Samuel. In the organization of these colleges, the president of each school sat in front; next to him in rank was the superior judge (Heb. עַלְפֵּה הַבֵּית; Aramaic עָלָמִים נִכבָּשִׁים), who discharged the judicial functions, and was presumptive successor to the Gaonate. Then came the ten who constituted the more limited synod, seven of whom were at the head of the assembled students (עַדְמֵי לַאֲדָמִים), and three associates (עַדְמֵי חֲלוֹזִים); these sat with their faces towards the president. Then came the college of one hundred members, subdivided into two uneven bodies—the one consisting of seventy members and representing the Great Sanhedrin (q.v.), the other consisting of thirty members and representing the Sanhedrin of the smaller Sanhedrin. Of these hundred, the seventy only were ordained; they bore the title of teachers (סְרֵבָּא, magisteri), or the ordained sages (סְרֵבֵּי אֲדָמִים), and were capable of advancing to the highest office, while the other thirty were simply candidates (עַדְמֵי עֵתִית), and do not seem to have been legally entitled to a seat or voice. The seventy sat in seven rows, each consisting of ten, and being under one of the seven heads of the college. They transmitted their membership to their sons.

3. The Work and Authority of these Colleges. In later times these colleges assembled together for two months in the year—viz. in Adar (March) and Elul (September). In these sittings the members explained difficult points in the Talmud, discussed and answered all the legal and ritual questions which were sent in during the vacation from the different Jewish communities abroad, and enacted new laws for the guidance and regulation of the dispersed congregations, in accordance with the requirements of the ever-shifting circumstances of the nation and the sundry localities. Each member of the college took part in the discussions; the president summed up the various opinions, decided the question, and ordered the secretary to write down the decision. All the decisions which were passed through the session were read over again by the president before the assembly was dissolved, were signed in the name of the college, sealed with the college seal, and forwarded by special messengers to the respective communities, who, in return, sent gifts to the college, which constituted the chief carry-revenue tools for the pecuniary support of the schools for training the doctors of the law. Their ordinary income was derived from regular taxes which the college fixed for those communities which were under their jurisdiction.

Thus the jurisdiction of Sora extended over the south of Iraq, with the two important cities Wasit and Basra, to Ophir (= India), and its annual income, even when it began to decline, amounted to 1500 ducats; while that of Pumbeditha extended over the north of Iraq up to Tigris, and over the cities of Babylon and the province of Babylon, and was endowed by a regular judge and the seven heads of the college, appointed judges for each district, and gave them regular diplomas. As these judges, or dayanim (דַּיָאָנִים), had not only to decide civil questions, but also to settle religious matters; they were also the rabbis of the respective communities, and selected for themselves, in each place, two learned members of the congregation, who were styled elders (דַּדְנִים), and with them constituted the judicial and rabbinical college. This local college had to issue all the legal instruments—such as marriage contracts, letters of divorce, bills of exchange, business contracts, receipts, etc. Though each of the two imperial colleges had the power of governing itself and of managing its own affairs and dependencies, yet the College of Sora was, at first, over that of Pumbeditha, as may be seen from the following facts: (1). In the absence of the prince of the exiles, the gaon of Sora was regent, and called in the taxes from all the Jewish communities. (2) The College of Sora got two shares of the taxes, while Pumbeditha only got one share. (3) The president of Sora exercised the precedence of the president of Pumbeditha, even though the former happened to be a young man and the latter an old man. In later times, however, the College of Pumbeditha rose to the dignity of Sora, and eventually eclipsed it. These seats of learning, in which were trained the doctors of the law—the successors of the ancient scribes—and which represented the unbroken chain of tradition and instruction, were extinguished in the middle of the 11th century.

VI. Literature.—Krochmal, More Nebocio He-Semam (Lemberg, 1851), p. 161, etc.; Frankel, Monatschrift für Geschichte und Wissenschaft des Judentums (Dessau, 1852), i, 292 sq.; Steinschneider, Jewish Literature (London, 1857), p. 9, etc.; Catalogue Libr. Heb. in Bibliotheca Bodleiana, p. 2615, etc.; Griml in Frankel's Monatschrift (Leips., 1857), vii, 336 sq., 381 sq.; Geschichte der Juden, vols. iv and v; Frankel, Hodegetica in Miscellan (Lips. 1860); and the Latin monographs of Sibylin (Vit. 1760), Georgius (ibid. 1734), and Her (Frank. 1737); and also Pick, The Scribes in the Time of Christ (in the Lutheran Quarterly, 1878, p. 249 sq.).

Scrip, an old Saxon name for satchel (Bible Educator, iv, 209), is used in the A. V. as a rendering of the Heb. עַלְפֵּה, yalkait (from עֶלַל, to collect; Sept. συλλογή), in I Sam. xxii, 40, where it appears as a synonym for בְּרֵית הַיָּעֲרָה (to κίτου, τὸ ποιμανείον), the bag in which the shepherds of Palestine carried their food or other necessaries. In Symmachus and the Vulg. pera, and in the marginal reading of A. V. "scrip," appear in 2 Kings iv, 42 for הַעַלְפֵּה, taklidon, which in the text of the A. V. is translated huak (comp. Gesen. s. v.). The מַרְפָּה of the New Test. appears in our Lord's command to his disciples as distinguished from the מָרְפָּה (Matt. x, 10; Mark vi, 6) and the בִּלְדוֹרֶן (Luke x, 4; xxii, 35, 36). The English nature and usage of the word is explained by the lexicographers. The English word has a meaning precisely equivalent to that of the Greek. Connected, as it probably is, with scripe, scrip, the word was used for articles of food. It belonged especially to shepherds (As You Like It, act iii, sec. 2). It was made of leather (Millon, Comus, 626). The later sense of scrip as a written certificate is, it need hardly be said, of different origin or meaning; the word, on its first use in English, was written script (Chaucer). The scrip of the ancient peasants was of leather, used especially to carry their food on a journey (ἅμηλα τῶν δωρῶν, Said.; Θησος τοις ἀργυροῖς, Ammon.), and slung over their shoulders. In the Talmudic writers the word בֵּית הַעַלְפֵּה is used as denoting the same thing; and is named as part of the equipment both of shepherds in their com-
mon life and of proselytes coming on a pilgrimage to
Jerusalem (Lightfoot, Hor. Heb. on Matt. x, 10). The
ζωή, on the other hand, was the loose girdle, in the
folds of which money was often kept for the sake of
safety [see GIRDLE]; the βαλλάκτης (bacculus, Vulg.),
was the smaller bag used exclusively for money (Luke
gii, 16). See Bag. Lightfoot, Hor. Heb. on the authority of
rabbis in the Mishnah.的 describes the scarp as "a kind of vesture, which was a little upper garment in which were many places sewed, where they put anything they met with that they had occasion to use; so that this was a kind of apron with divers purses or pockets made in it, in which the Jews put their necessaries as we do in our pockets, which apron they could readily put off or on, wear or lay aside, as they saw occasion. As in such an apron they had their pockets, so in the scarft or girdle wherewithal they girded their undercoats they had their purses. Their girdles were ordinarily of linen, and in them they kept their money when they travelled or went from home on their business" (Temple Service, ix, 121). See PERSIAN. Notwithstanding the great hospitality of the Orientals, travellers cannot always calculate upon obtaining a supply of food in their cottages, for most of the peasants are so poor that they can rarely afford to keep more provisions than will meet the immediate wants of their families. On the other hand, the Persians and the nomads and shepherds are therefore accustomed to take with them a satchel, or wallet, in which they carry some dry food and other little articles likely to be useful on a journey. It was in such a bag that David carried the pebbles with which he smote the boasting champion of the Philistines (1 Sam. xvii, 40). When Christ sent forth his apostles, he forbade them to provide themselves with these satchels; and nothing can more forcibly show the completeness of their dependence on Divine Providence, while executing their mission, than their neglecting to supply themselves with what all other travellers would have regarded as an indispensable requisite (Matt. x, 10; Mark vi, 8; Luke ix, 3; comp. Luke xxi, 35, 36). They were to appear in every town or village as men unlike all other travellers, freely doing without that which others looked on as essential. The fresh rule given in Luke xxi, 35, 36, perhaps, also, the facts that Judas was the bearer of the bag (ἀλατσάριον, John xii, 6), and that when the disciples were without bread they were ashamed of their forgetfulness (Mark viii, 14-16), show that the command was not intended to be permanent. The sarp is often made of haircloth, and is of various forms. In Palestine, however, it is usually made of leather (Porter, Damescena, ii, 109). In the south of Spain, where many of the Moslem conquerors are still retained, the sarp is usually of goat-skin, and is generally carried over the shoulder. The purse, which some inaccurate commentators have confounded with the sarp, was always suspended from the girdle. A kind of sauce is attributed to the sarp by some of the Eastern Jews, as it preserves their food from being polluted by being brought into contact with those whom they are taught to regard as unclean or profane (see Hackett, Illustrations of Scripture, p. 39). Thomson found the farmers, in the vicinity of the Lake of Gennesaret, carrying wallets made of the skins of kids stripped off whole and roughly tanned; and he supposes these to be the sacrip of the Bible (Land and Book, i, 552 sq.).

Scriptorium. The desks of religious houses at which the monks wrote in the scriptorium.

Scriptorium. In the Middle Ages, when learning was neglected elsewhere, such literature as there was found a refuge in monasteries. In every great there was an apartment called scriptorium, or antiquarium, where writers were constantly employed copying psalters, missals, Church music, and such works as they could obtain. The monks in these rooms were enjoined to pursue their occupation during the whole day, and to avoid mistakes in grammar, spelling, or pointing. In some cases authors permitted their works a solemn adoration to the transcript copy them exactly. When a number of copies of the same work was to be made, it was usual to empress personal capitals at the same time in writing; each monk wrote a certain portion. If a monk's handwriting was so low as to leave off. Sometimes they wrote at the request of another person, called the dictator, who held the pen and dictated; hence the errors in orthography in ancient MSS. These scriptoria were ordinarily ranged that benches were placed one behind the other for the copyists, so that, a name or word being written, one end and naming a word or a musical note, it was quickly copied by all, each naming it in such a way that these writing monks were sometimes distinguished by the name of librarii, a term applied to the scriptorium who gained a living by writing, but more usual designation was antiquarius. Indeed, the word scriptorium is from Greek writers only, and means "works," the antiquarius only those that were ancient and hence they derived their name." It was the duty of the librarian, or precentor of the monastery, to provide writing-mons with the books they were to copy with the materials necessary for their occupation. The writing-mons were also forbidden to waste anything. The junior monks were usually employed in the transcription of ordinary books, which was ordained that the "gospels, psalters, and oracles should be carefully written by monks of an age." Nuns were occasionally employed in a way.

Scripturalists, a term sometimes applied to students on account of their fundamental doctrine, the Scriptures are the only sufficient rule of faith and obedience. The Jews also occasionally use the word to denote those who reject the Mishna and wholly and solely to the Old-Test. Scriptures.

Scripture (Στοιχεῖον, καθέναν, Dan. x, 21, writing, where rendered; in the New Test. γράμματα, of the significance, but always rendered "Scripture") is the chief facts relating to the books to which, individually and collectively, this title has been applied, will be brought under the usages of the language. By Scripture is generally understood the whole of the Old and New Testaments, as the exact meaning of the language of the Old and New Tests, with which elucidation modern researches and speculation thrown upon the subject. The Captivity to the fall within the scope of this article to trace the word meets us with any distinctive force. In the Scriptures we read of the law, the book of the law
Exod. xxxii, 16, the commandments written on tables of testimony are said to be the writing of the word (γράμματα θεου), but there is no special sense word taken by itself. In the passage from Ps.
28, Sept. in γράμματα ἁμαρτίαι; while A. V. has "the Scripture of truth," the words probably mean more than "a true writing," thought of the Scripture as a whole is hardly found there: the statement there given was only a quotation from a Biblical book. The word is doubtless is to the divine purposes, which are figuratively represented as a book of destiny (comp. Ps. 69; 1). See Boo. This idea appears in
30, 5, 18 (SCRIPTURAE), Sept. καθεν την γραμματην—A. V. it was written"; and is probably connected with profound reverence for the sacred books which earlier scriptures to confine their own teaching to ord
SCRIPTURE, APOCRYPHAL

dition, and gave therefore to "the writing" a distinctive pre-eminence. See Scripts. The same feeling showed itself in the constant formula of quotation, "It is written..." even when the addition of any words defining the passage quoted (Matt. iv. 6; xxi. 13; xxvi. 24). The Greek word, as will be seen, kept its ground in this sense. A slight change passed over that of the Hebrew, and led to the substitution of another. The κεθαύμ (ketab, &c.=writings), in the Jewish arrangement of the Old Test., was used for a part, and not the whole, of the Old Test. (The Hagigatha [q. v.]), while another form of the same root (kethuboth) and to have a technical significance as applied to the text, which, though written in the MSS. of the Hebrew Scriptures, might or might not be recognized as κεφαλή, the right intelligible reading to be read in the congregation. Another word was therefore wanted, and it was found in the Mishna (V. 33., Neh. viii. 6), or "reading," "the thing read or recited, recitation. (The same root, it may be noticed, is found in the title of the sacred book of Islam (Koran =recitation).) This, accordingly, we find as the equivalent for the collective γραφή. The boy at the age of five begins the study of the Mikra, at ten passes on to the Mishna (Talmud, v. 24). The old word has not, however, disappeared, and κεθαύμ, "the writing," is used with the same connotation (ibid. iii. 10).

2. With this meaning the word γραφή passed into the language of the New Test. Used in the singular, it is occasionally found in a more limited sense, viz., the New Test., only, and is used in the Old Test. (Mark xii. 10; John vii. 38; xiii., 18; xix. 37; Luke iv. 21; Rom. ix. 17; Gal. iii. 8., et al.). In Acts xvi. 23 (if the γραφή in it takes a somewhat larger extension, as denoting the writing of Isaiah) but in verse 35 the more limited meaning reappears. In two passages of some difficulty, some have seen the wider, some the narrower sense.

(1) Πάσα γραφή τῶν ἑβδομάτων (2 Tim. iii. 16) has been translated in the A. V. "All Scripture is given by inspiration of God," as if γραφή, though without the article, were taken as equivalent to the Old Test. as a whole (comp. πᾶσα οἰκοδομή, Eph. ii. 21; πᾶσα ἑρμηνευθήσεως, Matt. iii. 2), and Συνάντησις, the predicate asserted of it. This is doubtless the correct construction. Even if we should retain the narrower meaning, however, we might still take Συνάντησις as the predic.

ate. Every Scripture—sc. every separate portion—is divinely inspired. It has been urged, however, that this "association of the Old and New Testaments held in common, would be less suitable to the context than the assigning of that truth as a ground for the further inference drawn from it; and so there is a large amount of authority in favor of the rendering, "Every γραφή, being inspired, is also profitable..." (comp. Meyer, Alford, Wordsworth, Elliott, Wieseler, ad loc.). But this renders the latter clause unbalanced, and the και is evidently intended as a copulative, and not as a mere expletive adverb. There does not seem any ground for making the meaning of γραφή dependent on the adjective χειρισμένος ("every inspired writing"), as if we required a γραφή not inspired. The usual reading of the New Test. is, when a word is used as a noun, and the word γραφή is never used of any common or secular writing.

(2) The meaning of the genitive in πάσα προφητεία γραφής (2 Pet. i. 20) seems at first sight, anarchous though it be, distinctly collective. Every prophecy of the Old Test. is Scripture. A closer examination of the passage will perhaps lead to a different conclusion. The apostle, after speaking of the vision on the holy mount, goes on, "We have as something yet firmer, the prophetic word" (here, probably, including the utterances of New-Test. prophetia, as well as the "words of the Old Test.), and "We have as χειρισμένος λόγος is used by Philo of the words of Moses (Leg. All. (Leg. All.), 14; i. 35, ed. Mang). He, of course, could recognize no prophets but those of the Old Test. Clemen
Church. See Bingham, Christian Antig. bk. xiv. ch. iii, § 15. See APOCRYPHA.

SCRIPTURE, INTERPRET. OF, JEWISH. We here present some details supplementary to the art. IN-
TERPRETATION OF JEWISH. 1. Among the Robbinic Jews.—Immediately after the
close of the canon, the study of the Old Test. became
an object of scientific treatment. A number of God-
fearing men arose, who, by their instruction, encour-
agement, and solemn admonitions, rooted and builded up
the people in their most holy faith. The first among
these was Ezra, who read and explained the law to the
people (Neh. viii., 8). As the Bible formed the central
point around which their legends, sermons, lectures,
discussions, investigations, etc., clustered, a homiletico-
exegetical literature was, in the course of time, devel-
oped, which was called Midrash (מִדְרָשׁ). This Midr-
ash again developed itself in the Halalchah (הללכה), i.e.
current law, fixed rule of life; also called אֲדַבֶּרֶתָא, what
was heard or accepted, and Ḥagadah (חָגָדָה), i.e. what
was said, without having the authority of a law, i.e.
free exposition, homilies, moral sayings, and legends.
Starting from the principle that Scripture, especially the
Pentateuch, contained an answer to every question, the
text was divided into a number of ways, viz.:
1. Parallelistic, in a simple, primary, or literal; 2. Rabbinical, or allegorical; 3. Ḥadli,
recondite or mysterious sense, which was afterwards
designated by the acrostic Parod (פַּרְוָד). These four
modes of interpretation were also espoused by the cele-
brated Nicholas de Lyra (q. v.), which he describes in the
well-known compend—
"Littera gesta docet, quid credas Allegoria;
Moralis quid agas, quos tendas Anagogia.
Long before De Lyra, we also find a threefold mode of
interpretation by Origen, viz. : συμβατικός, υποβαθμικός,
and τιμωρικός (comp. της ἀρχής, iv. c. 2).
As the Misharic literature has already been treated in the
art. Mlahrash (q. v.), we can only refer to it.
The fourfold mode of interpretation, however, was not
sufficient for the explanation, and, according to the old
saying that "the law can be interpreted in forty-nine dif-
ferent modes" (מִדְרָשׁ, Midrash Robb. Leç. § xxvi, p. 149 b), all impossibilities could be
made possible. Hence the necessity arose for laying
down and fixing certain laws for the interpretation of
the Scripture. This was done by Hillel the Great (q. v.)
by his יד רח, or seven rules, according to which the
law was to be explained, viz.:
1. Inferences from minor to major (לַכִּי יִלָּכֶה). Thus,
e. g., in Exod. xxiii, 13 it is not said whether the
borrower of a thing is responsible for theft. In ver. 9–11,
however, it is declared that the depository who can free
himself from making restitution in cases of death or ac-
cent must make restitution when the animal is stolen;
while in ver. 13 the borrower is even obliged to make
restitution in cases of death or accident. Hence the in-
ference is made from the minor (i.e. the depository) to
the major (i.e. the borrower) that he (in xxiii, 13) is all
the more responsible for theft (Haba Metrit, 95 a; comp.
also for other examples, Berakoth, ix, 5 med.; Beza,
2; Sanhedrin, vi, 5; Edygoth, vi, 2). 2. Inference
from major to minor (לַכִּי יִלָּכֶה). The rule
employed by Hillel himself against the sons of Batheira, who pretended not to know
whether or not the Paschal lamb might be slain on the
Sabbath when the evening of the Passover happened
to fall on that day. Hillel affirmed this question on
the ground of the analogous inference. In Numb.
xxviii, 2 it is said concerning the daily sacrifice, "to
offer it in its time" (וַיְהִי הַיְמֵה הָעִשָּׂא); and it is also said re-
specting the Paschal lamb, "let the children of Israel keep
it in its time" (טַבְעֵה הָעִשָּׂא, Numb. ix, 2). He thus
concluded, since the daily sacrifice can be offered on the
Sabbath, so likewise can the Paschal lamb (Pesachim,
vi; 2; Jerus. Pesachim, 66 a; Toseph. Pesachim, c.
3). 3. Analogy of two objects in one verse (אֲנָלֵוגָה אָבָנָא
תַּא דָּבָר). Thus in Lev. xv, 4 two objects are
mentioned, the bed and the chair (יִתְבָּא הַיָּדוֹת),
which, though belonging to two different classes, have
the common quality of serving for repose. And as these
are declared to be unclean when touched by him who
has an issue, and to have the power of defiling both
men and garments through contact, it is inferred that all
things which serve for resting may be rendered un-
clean by him who has an issue, and then defile both
men and garments.
4. Analogy of two objects in two verses (אֲנָלֵוגָה אָבָנָא
תַּא דָּבָר תַּא דָּבָר). Hereby is meant that
wherever a special statement follows a general one,
the definition of the special is to be applied to the
general use. Thus in Lev. ix, 2 we read, "If any man
of you bring an offering to the Lord, from cattle, from
oxen, and from sheep," Here cattle is a general ex-
tension, and may denote different kinds of animals.
Oxen and sheep is the special whereby the general is
defined, and therewith it is rendered coextensive. Hence
it is inferred that only oxen and small cattle may be
brought as sacrifices, but not beasts.
5. General and special (גַּם וַיֵּצֵא וַיֵּצֵא). Hereby is meant that
wherever a special statement follows a general one,
the definition of the special is to be applied to the
general use. Thus in Lev. i, 2 we read, "If any man
of you bring an offering to the Lord, from cattle, from
oxen, and from sheep," Here cattle is a general ex-
tension, and may denote different kinds of animals.
Oxen and sheep is the special whereby the general is
defined, and therewith it is rendered coextensive. Hence
it is inferred that only oxen and small cattle may be
brought as sacrifices, but not beasts.
6. Analogy of another passage (אֲנָלֵוגָה אָבָנָא steht), being an extension of 3 and 4.
7. The connection (כְּשֶׁבָּא וַיֵּצֵא). Thus the
prohibition in Lev. xxv, 11, "Ye shall not steal," only
refers to stealing money, because the whole connection
treats of money matters.
To these exegetical principles Nahum of Ginno (q. v.)
not only added another canon, but he also maintained
that certain defined particles employed in the text were
to be looked upon as so many indications of a hidden
meaning in the words. In this he was opposed by Ne-
chunjah ben-Ha-Kanah (q. v.), on the one hand, and
accepted by Akiba (q. v.), on the other, who not only
adopted this principle, but went much beyond it.
Starting with an erroneous notion of the character of
inspiration, he refused to submit the sacred text to the same
critical rules as other writings. He maintained that
every sentence, word, and particle in the Bible must have
this use and meaning, and he denied that mere rhetorical
figures, repetitions, or accumulations occurred in the
Bible. Every word, syllable, and letter which was not
absolutely requisite to express the meaning which it
was desired to convey, must, he maintained, serve some
other purpose, and be intended to indicate a special
meaning. He introduced into his views this system.
The seven exegetical principles of Hillel were enlarged into
forty-nine, and were strictly applied to every possible
case; irrespective of the consequences of such
conclusions. Great as the authority of Akiba was, yet as formerly
Nechunjah ben-Ha-Kanah had opposed the exegetical
principle of Nahum of Ginno, so Nahum of Ginno,
Elia (q. v.), rejected those of rabbi Akiba, and kept by
the rules of Hillel, which he somewhat altered by re-
jecting one, adding another, and subdividing a third
into five parts. These principles of rabbi Israel are
known as his thirteen exegetical canons, the חָזֶב וַיֵּצֵא וַיֵּצֵא.
Another mode of interpretation was according to the ḥiqṭir, i.e. read not so, but so—a very important rule, which exhibits the beginnings of the Masorah (q.v.). In the 5th and 4th centuries nothing new was added to the exegetical canons, and the rabbis of this period did not go beyond their predecessors. The main study was devoted to that branch of literature which found its climax in the Mishna and Gemara, now constituting what is termed the Talmud (q. v.). In the 7th century, however, “we find ourselves with Jewish scholars who had begun to be awake to the importance of serious inquiry into the true meaning of the written Word of God, and men who brought to the task of such investigations minds not only teeming with the traditions of their forefathers, but educated in the newer science of their own age. Of this class the representative is Saadiah (q. v.) Gaon, who was beyond compare, both as a philologist and theologian, the most competent expositor of Holy Scripture that had hitherto appeared in the schools of Judaism; and who was followed by men yet more powerful, in Ahen-Ezra, Rashbi, Kimchi, Alfarabi, and others, who have been, or will yet be, treated in this Cyclopedia. These commentators do not all adopt the same principle of interpretation. They teach the same doctrines substantially, they write under the influence of similar prejudices more or less strong, and they aim at like objects; but they work in different ways. The idea of this rule was, since every letter, every word and sentence is a number, to reduce the word to the number it contains, and to explain the word by another of the same quantity. Thus from the words “Lo! three men stood by him” (Gen. xiiii, 2), it is deduced that these three angels were Michael, Gabriel, and Raphael, because the number of the Hebrew words, and lo! three men, and these are Michael, Gabriel, and Raphael, are of the same numerical value, as will be seen from the following reduction to their numerical value of both these phrases:

\[
\begin{align*}

\]

From the passage, And all the inhabitants of the earth were of one language (Gen. xi: 1), it is deduced that all spoke Hebrew, being changed for its synonym סֵפֶּל, and סֵפֶּל + 5 + 100 + 400 = 409, is substituted for its equivalent סֵפֶּל = 1 + 8 + 400 = 409.
mirror" (see Gfrirer, Philo, ii, 292 sq.). Josephus, it seems, also fauc'd this mode, as can be seen from his words in the preface to his Antiquitates, that Moses, in his works, had only indicated some things, and others he had communicated in allegories worthy of the topics (τὰ μὲν αἰσθητῶν τοῦ μοναστείου, τὰ δὲ ἀλληγορικῶς μὲραν σημασίαν). But it reached its zenith in the writings of Philo (q.v.) of Alexandria, the whole of which are occupied with explanations or allegorical interpretations of the books of Moses.

Like most Jewish theologians, Philo places the authority of Moses above that of the other inspired writers, who are considered rather as his interpreters and followers than as his equals. But even in Moses we have to distinguish what he attained by philosophical acquirement from that which he received from God, either in ecstasy (a state more or less attainable by all the initiated), in answer to his inquiries, or by direct communications. The results of all these are laid down in the Scriptures. But all deeper spiritual truths appear there veiled; the letter conveying comparatively low and carnal views in order to condescend to the gross and carnal notions of the vulgar, so as to bring at least some truth to them, and perhaps gradually to attract them to higher and more spiritual views. It was impossible in it to interpret literally many of the scriptural statements, which, so understood, are contrary to reason, and would degrade Judaism below the level of heathen philosophy. In explaining the supposed allegories of Scripture, the Greek text of the Sept. is rigidly adhered to by Philo, though traces of an imperfect acquaintance with the Hebrew text are evident. A good deal was, of course, to be left to the exegetical tact of each interpreter, but the following seem to have been some of the principles of Alexandrian exegesis: 1. The terms in the text may be expanded, and its statements applied to any or all topics to which the same expressions might figuratively be applied. Thus the word "placcat" might, besides its proper meaning, apply to the Logos, and even to God, who contains and fills all. 2. The idea conveyed in the text may be educed from the words by showing a similar etymological derivation, and hence an affinity between the words and the idea. 3. Everything not absolutely requisite in the text was supposed to point to some special and hidden meaning. 4. Attention was to be given to the exegetical traditions of the fathers, which especially showed itself in the explanation of proper names. 5. Above all, the commentator may, by reaching the ecstatic state of the inspired writer, sympathize with and gain an immediate view of his author's truth. Several such interpretations may all convey portions of truth. Such being the procedure of Philo, the natural consequence was "that he completely altered the peculiar subject-matter and spirit of the old covenant, whose essential character is constituted by the revelation of God in facts and history; and that he volatilized the truth of God into abstract ideas." See Philo (Judeus).

III. Among the Cabalists.—An entirely different attitude towards the Old Testament was assumed by the Cabalists, the Jewish theosophists of the Middle Ages; for they endeavored to lay a foundation for their theosophic doctrine and theories formed by fusing Greek and Oriental speculations, together with the Old-Testament revelation, in allegorical and mystical interpretations of the Old Testament, especially the history of creation in Genesis, and Ezekiel's vision of the chariot of God. For this purpose they availed themselves of the artificial hermeneutical methods of the Talmudic Haggadah. They not only made use of the four modes of interpretation comprised in the mnemotechnic Parades, of the Notaricon and Guimatria mentioned above, but also of the Ta'urifh (ת"רף), an anagram which consists in the change of any word into others by the transposition of the component letters, which form various words. Thus ר"ש in the "beginning," has been anagrammatized...
This catalogue agrees his contemporary Rufinus, who accuses Jerome of compiling, or rather plundering (complilandi), the Scriptures, in consequence of the rejection by that father of Susanna and the Benedictice. Cyril of Alexandria divides the canonical books into five of Moses, seven other historical, five metrical, and five prophetical.

With these catalogues the Jews also agree. Josephe enumerates twenty-two books—five of Moses, thirteen prophets, and four books of morality. The prophets were divided by the ancient Jews into the early prophets (viz. Joshua, Judges, Samuel, and Kings) and the later prophets, which were again subdivided into the greater (viz. Isaiah, Jeremiah, and Ezekiel) and the twelve lesser (viz. Hosea, Joel, Obadiah, Jonah, Nahum, Zephaniah, Haggai, Zechariah, and Malachi). The Jews agree with Jerome's division into eight prophets and nine Hagiographa (Kethubim).

The canon of the Alexandrian version includes the other books, called ecclisialical, which we have already given in their order. See DEUTERIO-CANONICAL. As the early Christians, who were, in general, offered with Hebrew) received this version, for which they had the sanction of its employment by the New-Test writers, and as from it flowed the old Latin and several other ancient versions, we must not be surprised at finding that all these books, being thus placed in the Bible without any mark of distinction, were examined and censured by the primitive Christians, and were, equally with the canonical, read in the churches. Jerome, in his Latin translation of the Bible from the Hebrew in the 4th century, introduced a distinction by means of his prefaces, prefixed to each book, which continued to be placed, in all the MSS. and in the early printed editions of Jerome's version, in the body of the text, from which they were for the first time removed to the beginning or end of the Bible after the decree of the Council of Trent in A.D. 1546 (see REV. C. Gorham's Letter to Van Es [Lond. 1826]). Luther was the first who separated them from the others, and removed them to a place by themselves in his translation. Lonicer, in his edition of the Sept., 1526, followed his example, but gave so much offence by so doing that they were restored to their places by Cephalaeus in 1529. They were, however, published in a separate form by Plantin in 1575, and have been, since that period, omitted in many editions of the Sept. Although they were never received into the canon either by the Palestinian or Alexandrian Jews, yet they seem to have been, by the latter, considered as an appendix to the canon (De Wette, Einleitung). There are, besides these, many books of which they have been ever since perished, as well as the book of Jasher (Jos. xx, 13; 2 Sam. xiv, 22), which is part of the book of the Wars of Jehovah (Num. xxii, 14). Some books bearing these names have been printed, but they are forgeries. The book of Jasher, however, published at New York in 1840, is not, as would appear from the appendix to Parker's translation of De Wette's Introduction, a reprint of the Bristol forger; but it is a translation of the much more respectable (though also spurious) book of Jasher which we have already referred to as published at Naples in 1625, and written in excellent Hebrew before the close of the 16th century. See THE American Christian Examiner for May, 1840. See JASHER.

In regard to the order of the books, the Talmudists and the Masoretes, and even some MSS. of the latter, differ from each other. The Alexandrian translators differ from both, and Luther's arrangement, which is generally followed by Protestants, is made entirely according to the order which has been established by our MSS. of the Old Testament. The Buddhist Bibles are thus arranged, viz. five books of Moses: Joshua, Judges, two books of Samuel, two books of Kings; Isaiah, Jeremiah, Ezekiel, and the twelve minor prophets: Psalms, Proverbs, Job, Canticles, Ecclesiastes, Esther, Daniel, Ezra, Nehemiah, and 1 and 2 Chronicles. The New Testament consists of the four Gospels, the Acts, Epistles of Paul, Catholic Epistles, and the Apocalypse; these are

IX—H H
differently arranged in the Greek and Latin MSS. All these writings have been considered in the Christian Church from the earliest period as divinely inspired (3οντωντος, 2 Tim. iii. 14-16), as no doubt the books of the Old Test. were by the Jews (see Talmud, passim; Philo, De Vir. Motis. vol. ii.; Josephus, Cont. Apion. i. 8; and the manner of their citation in the New Test.). The early Christian writers also constantly maintain their inspiration (Justin Martyr, Second Apology; Ireneaus, i. 4; Origen, Pragµ. Apocynê, Præf.), the only difference of opinion being as to its limits. Some of the fathers maintain their verbal inspiration, as to the form and words of the thoughts or sentiments, or that the sacred writers were merely preserved from error (Dupin, On the Canon). But the first controversy raised on this subject was in the 16th century, when the theses of the Jesuits [see MacCarréka], who had maintained the lower notion of inspiration, were condemned by the faculties of Louvain and Douai. Jahn observes (Intro. that on this subject the entire Christian world was divided, and that the condemnation of the theses was not sanctioned by the Church or the Roman primate, and that the Council of Trent has pronounced no judgment on the subject. Henry Holden, doctor of the Sorbonne, published his Analyse Félix, in 1632, in which he defended that notion of the fathers which maintained only an exemption from errors appertaining to doctrine. Jahn further observes (loc. cit.) that most Protestants, until the middle of the 18th century, defended the most rigid notions of verbal inspiration; but that, from the time of Tøllers and Semler, the idea of inspiration was frittered away and eventually discarded. The high notion of inspiration has been recently revived among Protestants, especially in the eloquent work of M. Gausen, of Geneva, Theopneustia (1842). The moderate view has been that generally adopted by English divines (Hawterson, On Inspiration, Home's Introduction; app. to vol. i.), while in America the higher notion of verbal inspiration has, until very recently, prevailed. See Inspiration.

II. History and Authenticity of the Holy Scriptures.

1. The Old Testament.—The first Scripture, the Pentateuch, was kept in a sacred place, the tabernacle, both in the wilderness and in the land of Canaan; and the successive sacred writings that were produced before the building of the Temple of Jerusalem were committed to the same safe custody; but when the Temple was built, Solomon removed into it these writings, and commanded that all succeeding Scriptures should be there preserved also. Though the MSS. by Nebuchadnezzar, it does not appear that the MSS. were destroyed, for none of the succeeding sacred writers allude to anything of the kind, which they certainly would have done as a matter of deep lamentation. During the captivity, Daniel (ix, 11, 13) alludes to the written law as in existence; and Ezra (Neh. viii. 5, 6) read the book of the law to the people on their return from Babylon. About the time of Ezra, inspiration closed; the Spirit departed from Israel with Malachi, the last of the prophets, or, as the Jews call him, the seäl of the prophets. Then the canon was formed by Ezra, and the Jews never dared to add, or allow anything to be added, to it. The canon of the Scriptures, as collected by Ezra, is attested by Josephus in his book Contra Apion, wherein he mentions the number of the books, the arrangement, and the contents; and adds that after a long lapse of time no one has dared to add, diminish, or alter; and that it is imputed in all Jews from their birth to consider these books the oracles of God, and, if need require, cheerfully to die for them. Five hundred years after Ezra, a complete copy of the canon of Hebrew Scripture was preserved in the Temple, with which all others might be collated. Although Christ often reproached the scribes and Pharisees for their enormous glosses on Scripture, he never said that they had in any way falsified the Scriptures. Paul (Rom. iii. 2) reckons among their privileges that "to them were committed the oracles of God," without in that they ever abused their privilege by corrupting them.

The Jewish canonical division of Scripture into great parts—the law, the prophets, and the holy [see Psalms]—was also established by our Saviour (Luke xxviii. 44) when he alludes to threefold division: "All things must be fulfilled which were written in the law of Moses, and in the prophets, and in the Psalms, concerning me." The authenticity of the Old Test. is abundantly proved (4, 5) by the authors, who speak in a corroborative manner of persons and facts mentioned in it; such professors being unquestionably to have lived a later period than the sacred writers whom they quote, such as Diodorus Siculus, Longinus, Ptolemy, etc., who corroborate Moses; (2) by the fact that Grotius that there do not appear in any ancient records any testimonies that contradicted produced in the Old Test.; (3) by the corroborative many traditions preserved among different and nations; (4) by the collection of many hundreds of the Old Scriptures written at different periods (see the fact that); (5) by the fact that the idea of inspiration was prevalent among the Samaritans, with the Arabs, and which, from the violent enmity between the Jews and Samaritans, could never have been by collision old Chaldæan Targums, or paraphrases, agree so much with the Hebrew as to be more properly copies of the (paraphrases); (6) by the explication of the Hebrew, that in the detail simpl the narratives of their great men and their national history instead of seeking to exalt themselves and their like other historians.

2. The New Testament.—From the time of the canon of the Old Test. was completed till the publication of the books of the New Test., about four hundred sixty years elapsed. During the life of Jesus and for some time after his ascension, nothing subject of his mission seems to have been consistent with the purpose of writing, for the purpose of publication, by his apostles. During the period between his resurrection and his ascension, the churches possessed miraculous gifts, the apostles and disciples were enabled to expound the prophecies of the Old Test., and to show their fulfillment. After the angel had attracted attention, and Christ was planted, not only in Judea, but in the countries of Italy, Greece, and Asia Minor, the Scriptures of the New Test. were written by the apostles and other inspired men, and intrusted to the keeping of the church. Ready had others written narratives on the rise of the new religion, but they were not authenticated (see the prologue). When authentic documents were required to confirm the information of the churches, and for the propagation of the faith, the evangelists, under divine guidance, made use of the earlier narratives of others, the public records, and even of private memorials. What must not be lost sight of that all the first writers were divinely guided as to what they write.

These several pieces which compose the Scripture of the New Test. were written in the Greek language, which was then almost universally understood. In the case of the New Testament, he never said that they had in any way falsified the Scriptures. Paul (Rom. iii. 2) reckons among their privileges that "to them were committed the oracles of God," without in that they ever abused their privilege by corrupting them.
SCRIPIURES, HOLY

SCRIVER

possession of the whole. From the manner in which they were at first circulated, some portions were necessarily lost or entirely suppressed. While copies of each book would be extensively multiplied, it is, at the same time, a certain fact that no other books besides those which at present compose the volume of the New Test, were admitted by the earl churches. The original collection of the several books for the formation of the canon of the New Test. evidently took place in, or immediately after, the apostolic age; but it was not any council convened by any bishop or Church that first ascertained and determined their canonical authority. Indeed, the books admitted into the canon were never supposed to derive their authority and validity from any council, inasmuch as the authority of the books existed before any councils, and consequently prior to any official or ecclesiastical declarations concerning them. As the several books were assumed to be of complete authority as soon as they were published by their inspired authors, the churches were eager for their possession, and had them transcribed and freely circulated everywhere. Thus, even in the apostolic age, several churches would be in possession of all the writings of the New Test, for the genuineness and authenticity of which they had all the requisite evidence from the highest sources. Though the books of the New Test were written in the Greek language, the writers were Jews, hence, as might be expected, the passages evidencing their authorship, by which everywhere gives a Hebrew coloring to the style of their several writings. We have no evidence that the books of the New Test were ever corrupted; indeed, as these books were the foundation of the Christian faith, alterations were both impossible and impracticable without detection. These books are quoted or alluded to by a series of Christian writers, as well as by the adversaries of the Christian faith, who may be traced back in regular succession from the present time to the apostolic age. Some of the ancient versions, as the Syriac, and several Latin versions, were made at the close of the first, or at the commencement of the second, century. Now the New Test. must necessarily have existed previously to the making of those versions; and a book which was so early and so universally read throughout the East in the Greek and in the Syriac languages, and throughout Europe and Africa in the Latin, must be able to lay claim to a high antiquity. The correspondence of these versions, with our copies of the original Greek attests their genuineness and authenticity.

But though the ancient MSS. of the Scriptures which have descended to our times have not been wilfully altered, they have, nevertheless, been subject to the vicissitudes incident to copying in the course of transmission. Still, the uniformity of the MSS. which are dispersed in so many countries and in so great variety of languages is truly astonishing. The various readings consist almost wholly in palpable errors in transcription, grammatical and verbal differences, such as the insertion or omission of a letter or article, the substitution of a word for another, or the transposition of a word or two in a sentence. Taken altogether, they neither change nor affect a single doctrine or duty announced or enjoined in the Word of God. From the recent heresey laboring in examining the MSS. and collecting the variations, we have for the New Test. the investigations of Mill, Bengal, Wettstein, Griesbach, Matthis, Scholz, Lachmann, Tischendorf, Mai, Treu, and Scrivener, who have examined several hundred MSS. and compared their differences. The old versions also, such as the several Syriac copies, the Latin, Gothic, etc., have been compared and their supposed variations added to the lists. The books stand, four the fathers have been subjected to the same ordeal, and all their discrepancies and peculiarities seized on and subjoined to the formable catalogue. The various readings of Greek New-Test. Scriptures, thus multiplied by the fidelity of collators, may now amount to more than a hundred thousand. This immense combination of specimens, however, can only fully supply the astonishing preservation of the sacred text, considered, nevertheless, so many thousands of times—in Hebrew during thirty-three centuries, and in Greek during eighteen hundred years—that the hopes of the enemies of religion in this channel have been overthrown; while the faithful can rejoice in the fact that they possess in all their purity these writings which are able to make them wise unto salvation.

SCRIPIURES, USE OF, IN THE EARLY CHURCH. We have seen above that great care was taken by the fathers of the Christian Church to secure a speedy translation of the Scriptures into the languages of the several nations as they were converted to Christianity. Eusebius (De Prep. Evang. lib. xii. c. 1) says, "They were translated into all languages throughout the world;" while Theodoret (De Curaud. Græcor. Affect. Serm. 5, t. 4, p. 555) declares "that every nation under heaven had the Scripture in its own tongue." This translation was done to encourage its reading by the people, and, still further to secure this end, it was an ancient custom to have Bibles in the vulgar tongues laid in a convenient part of the church for the people at their leisure to employ themselves in perusing the sacred word. Not only the clergy, but people were allowed to read, but children also were encouraged and trained from their infancy to the reading of the Holy Scriptures. Catechumens were obliged to learn the Scriptures as part of their discipline and instruction, and they formed the chief part of the studies of the clergy. Both the clergy and monks were accustomed to have them read to them at their meals, and many became so well versed in the Scriptures that they could repeat them by heart. Nor were the people denied the privilege of reading the Scriptures in their homes, but were rather encouraged to thus prepare themselves for the public ceremony. In these latter ancient times, the copies, which were always two at least, and sometimes three or four, were taken from both the Old and the New Test., except in the Church of Rome, where only epiclit and gospel were read. Those who withheld the Scriptures from the people were considered to be guilty of sacrilege; but such an offence was unknown to the ancients. It was considered a crime to yield up the Scriptures to persecutors demanding them, and those thus guilty were styled traditores, or betrayers. See Bingham, Christian Antiq. (see Index).

Scriver, Christian, a Lutheran clergyman and writer of devotional works in the 17th century, the contemporary and friend of Spener, was born at Rendsburg, in Holstein, Jan. 5, 1629. His childhood was spent under the care of a widowed mother in the trying period of the Thirty Years' War; but a wealthy merchant—the brother of Scriver's grandmother—finally made provision for his needs. After suitable preparatory studies, Scriver became a private tutor, and in 1647 entered the University of Rostock. In 1655 he was archdeacon at Stendal, and in 1657 pastor at Magdeburg, with which position he continued till he was appointed pastor of a school, and finally a senior in the government of the Church. He refused to leave Magdeburg in answer to repeated calls to Halberstadt, to Berlin, and to the court of the Holy Roman Empire. He was in advanced age induced to accept the post of court preacher at Quedlinburg. In 1692 he published an apocalypse, which was called a prophecy, and in 1698, he died. He had been married four times, and had had fourteen children born to him, but he outlived all his wives and children except one son and one daughter.

The name of Scriver has lived among the common people through the publication of his Scenecatachus (Magdeburg and Leipzig, 1731; Sächsische, 1738 sq., 5 parts in 2 vols. fol.), a manual of devotion which he dedicated to "the Triune God," and which deserves high commendation. Another work deserving of mention is
his Gotthold's Zaufllüge Andachten (1st ed. 1671, and often), a sort of Christian parables, 400 in number, which are based on objects in nature and ordinary occurrences in life. The Sich- u. Siegelbote describes a sickness through which he passed, and the aids and comforts derived from God's goodness in that time. Priitius has published a work of consolation, entitled Wittenroet, from Scriver's literary remains.

For Scriver's life, see Priitius's preface to the Seelen- schatz; Christmann, Biographie (Nurembrg. 1829); Har- genbach, Ween u. Gesch. d. Reformat. iv; Eccleg. Pro- testantismus, ii, 177 sq.

Sorobiciuli, a name given among the ancient Ro- mans to altars dedicated to the worship of the infernal deities. They consisted of cavities dug in the earth, into which libations were poured.

Scroil (12. ειφερ, Isa. xxxiv, 4, a book, as elsewhere; so also βιβλιον, Rev. vi, 14), the form of an ancient book (q.v.).

Scrooll, (q.v.) A name given to a numerous class of ornaments, which in general character resemble a band arranged in undulations or convolutions. (2.) It is also applied to a particular kind of moulding shown in the example from Dorchester church, called the scroll or roll moulding, a marked feature of the Decorated style.

Scrutiny, the inquiry into the faith and manner of candidates for baptism. It was made in the presence of the congregation on seven days the last being Wednesday before Passion-Sunday. The name of each candidate was called; then the deacon bade him pro- tract himself five times and rise, in memory of the five wounds of Christ. The sign of the cross was made on his forehead by the sponsor and acolyte; lastly, he was sprinkled with ashes. The custom died out in 860.

ScrUTINy is the name, also, of one of the three canonical modes of electing a pope in the Romish Church. It is the method almost invariably followed, and is thus managed: Blank schedules are supplied to each of the cardinals, who fills them up with his own name and that of the individual for whom he votes. If two thirds of the votes are not in favor of any one person, the cardinals proceed to a second vote by occasion (q.v.). See Guiller, Faiths of the World, a.v.; Wall- cott, Stic. A recheld, a.v.

Scudder, Catharine Hastings, a missionary to India, was born in Utica, N. Y., Aug. 22, 1825. She was the daughter of Prof. Thomas Hastings, known and honored throughout the churches of the United States for his successful efforts in raising the standard of church music. In her tenth year, she composed a carol, which was sung in Dr. Erskine Mason's church. The development of her piety gave early indications of her destiny as a missionary. When eleven years old, her heart was deeply affected by the fact that the missionaries who had charge of the Ceylon mission schools were obliged to disband some of them for want of funds, and to send back to the darkness of heathenism many of the native children, and her sympathy led to corresponding action. She prepared a constitution, and formed a family association to sew for the heathen, and this association continued in existence until she left home for India, and exchanged manual for mental and moral labor in behalf of those for whom she felt a life-long solicitude. From the time she determined to devote herself to the missionary work, her character matured rapidly and with remarkable power, and the beauty of the Lord shone in and around her. In September, 1848, she was married to the Rev. William W. Scudder, son of the Rev. John Scudder, M.D., who was an ardent friend of the missionary in that field, so long the home of his honored father. Soon after, they embarked for India, on the ship Flavia. In mid-ocean there was a revival on board, in which several of the roughest sailors were converted. When 200 miles from Madras, a meeting was held, at which there were eight of the seamen hopeful to go to the Ceylon mission, and the discipline of the Church for some eight weeks with the Church on the first Sabbath after her arrival on the shores of India, and enjoyed a delightful com- munion season with the Indian Church, full of gratitude to God for having permitted her to arrive on the field of her labors. Her allotted station was the island of Ceylon, and there she soon as she should master a few words of the language, she commenced her work. She was permitted to prosecute her labors during the short period of two years only. While on a journey with her husband, returning from Madura, she was attacked with cholera, and died March 11, 1849, declaring in her last words that she was happy in Jesus. (W. F. S.)

Scudder, John, M.D., a celebrated missionary in Ceylon and India, was born at Freehold, N. J., Sept. 3, 1758, graduated at Princeton College in 1811, and at the College of Physicians and Surgeons in New York, in 1815. He established himself at once in medical prac- tice in that city with success and lucrative prospects. In 1818 he married Miss Harriet Waterbury, the es- timable and efficient companion of his missionary life. In 1819, while waiting to see a patient, he picked up in the anteroom a tract called The Conversion of the World, or the Claims of Six Hundred Millions, and the Ability and Duty of the Churches respecting them. Deeply im- pressed by its appeal he consulted with his wife prayer- fully, and with fasting and great deliberation. They gave themselves up to the foreign missionary service, offered themselves to the American Board, and prepared for their work. His friends were astounded that he should sacrifice his medical prospects of fame and fortune for such a venture. But the vote was made, never to be recalled, and joyously to be fulfilled. He was licensed by the Classis of New York of the Reformed Dutch Church in June, 1819, and they sailed on the 8th of that month for their destination, with Mears, Wins- low, Spalding, and Woodward, to reinforce the Ceylon mission at Trincomalee. Here he immediately began his career as a missionary, physician, and teacher, although he was not ordained until May 15, 1821, in the Wesleyan chapel at Jaffnapatam, by clergymen of the Congregational, Baptist, and Methodist denominations. In the large hospital which he established, cholera and jungle fever were treated with eminent success, as well as many other diseases of the climate. In 1829 a college was organized. In 1824 the mission enjoyed a wonderful revival of religion, which wrought with power at Dr. Scudder's schools. His influence added much to the great prosperity of the Ceylon mission. In 1836 he and Mr. Winslow were transferred to India to establish a printing-press at Madras for publishing the Scriptures and other religious books. He was instrumental in the founding of the Church Missionary Society in India in 1838. Eight millions of pages were printed by these brethren the first year, and more in later years. These were scattered through every open door far and wide among the natives. Dr. Scudder resided at Chin- tadrapurah, near Madras, many years, and the young men grew up the Aroc Mission, which was received under the American Board of Christian Foreign Mission in 1852, and subsequently passed into the care of the Reformed Church in America in 1853 as the Aroc Mission of the Reformed Church. After a residence of twenty-three
years abroad, his health having suffered from the climate, Dr. Scudder returned to America in 1842, and remained until 1846. During these four years his time was employed in constant missionary service among the churches of this country. His labors among children and among the Madura, and in Madagascar, were highly successful. He read his public meetings, and his marvellous success in addressing them and direct influence for their conversion and consecration to the mission work. Upon his return to India, he resumed his work with characteristic zeal and energy. For a short time (1849), he was temporarily connected with the Madura mission; and in November of the same year Mrs. Scudder died, but a few days previously his son Samuel also deceased at New Brunswick, N. J., where he was pursuing his theological studies preparatory to joining his father and brothers in India. The death of this promising young man, in his twenty-second year, called forth one of the most touching appeals for men for his field, and in their absence he resolved to make up for Samuel's loss by personally rendering extra service. This excessive labor brought on serious illness. In 1854, by medical advice, he went to the Cape of Good Hope. The voyage rejuvenated him, and after a brief sojourn at Wynberg, where he was much gratified by the Christian influence in the English-speaking people, he arranged to return again to his field. But only two days before the ship arrived, he died suddenly of apoplexy, Jan. 13, 1855. Of his fourteen children, nine survive. His seven sons and two daughters became missionaries in the same field with their parents, and in the Aroet Mission of the Reformed Church. Two of the sons have since been obliged to leave India on account of ill-health, and have done good service to the Church at home. One of the daughters was, and the other still is, in missionary work (1870). Besides his numerous communications to the Missionary Herald and other periodicals for thirty-five years, Dr. Scudder issued several publications, which have all had a wide and useful circulation. Among these are, The Redeemer's Last Command:—The Harvest Perishing:—An Appeal to Mothers:—Knocking at the Door;—Passing over Jordan.—Letters to Children, etc., Scudder's distinguishing traits were decision of character, martyr-like attachment to the truth, and steadfastness in prosecuting his plans. He had in him many of the highest elements of moral heroism, a sublime daring to do right irrespective of opposition, a supreme regard for first principles, a scorn of all that was mean and small. He had the marked qualities of a man of prayer and wisdom in accomplishing his purposes which easily overrode mere conventionalities of routine. His intellect was robust, intensely active, and independent. His will was most positive and all-controlling when once he believed himself to be right. Nothing daunted his brave soul. In early life he had for months been the victim of a most terrible spiritual conflict, which ended in a peace that nothing afterwards seriously disturbed. It was the grand victory of his life, which dwarfed all other contests and made self-sacrifice the easy law of his new being. When one told him that he should consult conscience lest he should overreach himself, he said that he had the conscience of that sort long ago. When asked in America, "What are the discouragements of the missionary work?" he replied, "I do not know the word. I long ago erased it from my vocabulary." He fought the battles of temperance among the missions and people, and for the extirpation of caste in the church, but amidst much hiss and ridicule, with heroic triumphant. His piety was sweetly expressed in saying to one of his sons that his ambition was to be one of the inner circle around Jesus in heaven." For years before his death he enjoyed unbroken assurance of faith. His power and tact in personal religious conversation with almost everybody, and the impression these conversations usually left on his hearers, is one of the chief reasons that the Gospel in almost every large town in Southern India. He made frequent and extensive tours for this purpose, preaching generally twice a day, and once "he stood at his post eleven consecutive hours. He did not even stop to eat, but had coffee brought to him." His biography is full of stirring incidents illustrating these and other characteristics of this remarkable man. A memoir of him has been published by his brother-in-law, Rev. J. D. Vasterling ( REV.), (New York, 1840); also a previous volume called The Missionary Doctor and his Family, by M. E. Wilmer (Board of Publication of the Reformed Dutch Church). See Sprague, Annals of the Amer. Pulpit, vol. ix: Corwin, Manual of the Reformed Church in America, p. 204-210. (J. R. T.)

Scudder, John B., a Presbyterian minister, was born near Princeton, N. J., June 8, 1810. He was the eldest son of Jacob Scudder, M.D. He entered Princeton College in 1830, after which he spent one year in teaching in Virginia, and then returned to Princeton and entered the Theological Seminary. A failure of health prevented him from completing his theological course, and he went to Holmesville, Mass., for its recovery. While there he had actively in the Sabbath-school and prayer and other religious meetings, making himself generally useful as a Christian. After the restoration of his health he had charge of several classical schools in Louisiana and at Memphis, Tenn., and also in Georgia and Florida. The last years of his life were spent in Georgia. Although he was not ordained, he had assumed the relations of the pastor, and, while engaged as principal of a large school, was much occupied in conducting religious exercises, in distributing religious tracts, and in other earnest and successful efforts to advance the kingdom of Christ in the world. As a colaborer, he was as useful as any in the ministry, and his labors of love were highly appreciated and much blessed. Like Harlan Page, his personal efforts brought many into the kingdom who might have been beyond the reach of ministerial influence. On the morning of July 19, 1876, he was suddenly struck down by apoplexy, and, after explaining "How blessed a thing it is to be prepared to die" he breathed his last. (W. F. S.)

Scull. See Skull.

Sculp. See Skull.

Sculp. Hebrew. By the well-known law (Exod. xx, 4 sq.; Deut. iv, 16 sq.; xxvii, 15; comp. Dios. Sic. Eclog. xii, 1; Strabo, xvi, 761; Josephus, Cont. Apion. ii, 6; Ewald, Isr. Gesch. ii, 110 sq.; Tacit. Hist. v, 5, 4. But see Bertheau, Isr. Gesch. p. 248) the Israelites were not forbidden to make any image in stone, wood, or metal (Michaelis). The word (Michaelis) in the 25th chapter of the 25th year of the reign of Jehoshaphat (Jos. xxiv, 4). The entrance of Jehovah, on the ark of the covenant, there were two cherubs of gold, and flower-work as ornament was placed on the golden candlestick; and the large brazen bathing-vessel in the court (the so-called brazen sea [p. 76]) was supported on twelve brazen ovens (1 Kings vii, 26), though Josephus blames this arrangement as illegal (Ant. vii, 5, 5). In the wilderness, too, even Moses set up a brazen serpent (Num. xxxii, 8), and the Philistines offered golden figures as an offering to Jehovah (1 Sam. vii, 17 sq.). But the design was to forbid all worship of images, and also all images of Jehovah (comp. Exod. xxiv, 4). The graven image of the children of Dan (Judg. xvii, 3, 5; opp. ii, 591), for a sensual people would easily be led into idolatry by them, or at least would lose much of the spirituality of their ideas of Jehovah (comp. Philo, Opp. i, 496); and thus the golden calf of Aaron (Exod. xxxii, 4), the graven image of the children of Dan (Judg. xvii, 3), the golden image of Jeroboam (1 Kings xii, 28 sq.) were antitheocratic. Yet this Mosaic law prevented the great progress of sculpture, which in all nations has received its greatest impulse from religious faith and worship. (Schnaase, Gesch. d. bibl. Künst. 1, 257, that the imagination of the Hebrews, as shown in their poetry, was far behind and menial for the holy work. More.) Most of their works of brass of this kind were by Phenician artists (1 Kings vii, 14). An example of sculpture not of a religious character occurs in the audience throne
of Solomon, which was supported and surrounded by fourteen finely wrought lions, the symbol of strength (1 Kings x, 19 sq.; 2 Chron. ix, 19 sq.). After the exile, stricter views prevailed; and the orthodox Jews, or followers of the Pharisees, interpreted the Mosaic prohibition of sculpture in general (Josephus, Ant. xv, 8, 1; xvii, 5, 2, xviii, 3, 1; War, ii, 9, 2; comp. also Maimonides in Hottinger, Jus. Hebr. 39), even of architectural ornament (Josephus, War, ii, 19, 4; comp. Ant. xviii, 6, 2; Tacit. Hist. v, 5). Yet according to Josephus, Ant. iii, 6, 2, only the images of living creatures were prohibited. Accordingly, a palace of the tetrarch Herod in Tiberias, which was adorned with the figures of beasts, was burned by order of the Sanhedrin, simply because it was thought to violate their law (Josephus, Life, 12). Still less were images tolerated in the Temple (id. War, i, 33, 2; Ant. xviii, 6, 2). Even the image of the emperor, carried on the eagles of the soldiers, could not be admitted into Jerusalem (ibid. xviii, 3, 1, and 5, 3; comp. War, ii, 9, 2; Ant. xv, 8, 1 sq.). Yet such rigid views were not universal; at least, at an earlier period, John Hyrcanus adorned his castle beyond the Jordan with colossal animal figures (ibid. xii, 4, 11); queen Alexandra had portraits of her children made (ibid. xv, 5, 6); and Herod Agrippa possessed statues of his daughters (ibid. xix, 9, 1).—Winer.

Hebrew sculpture, as such, was not a doubt was based upon, and sustained by, the art as practiced in Egypt. It was there governed by very strict rules, fixed proportions being established for every figure, which the statuary was not permitted to violate; and hence arises the great sameness in the Egyptian statues, and the stiffness for which they are all remarkable. Isaiah describes the process of idol-making very minutely. "The carpenter stretcheth out his rule; he maketh it out with a line; he fitteth it with planes, and he maketh it out with the compass, and maketh it after the figure of a man, according to the beauty of a man; that it may remain in his house" (xliv, 13). The mode of proceeding will easily be understood by a reference to the accompanying engravings. When a proper block of marble or granite had been procured by the sculptor, the surface was first smoothed, and parallel lines drawn from top to bottom; other lines were then drawn, at equal distances, from side to side, so as to divide the whole into a series of squares. The size of these squares was proportioned to the size of the figure, but the number of them was invariable; whatever might be the dimensions of the figure: nineteen of these squares, according to some authorities, and twenty-one and one fourth according to others, were allowed for the height of the human body; when smaller figures or ornaments were introduced, the squares were subdivided into smaller squares, proportioned to the less figure. The outline was then traced, and its proportions were invariably. This, which to moderns would seem the most important part of the process, required no great exertion of skill in the Egyptian artist. It was then inspected by the master-sculptor, who wrote on various parts of it, in hieratic characters, such directions as he thought it necessary to give to the inferior artists who actually cut the figure. The colossal statues on which the workmen in the accompanying engraving are engaged appears so far advanced towards completion that the instructions of the master-sculptor have been chiselled away. We are informed by Diodorus Siculus that the most eminent statuary always went to reside for a time in Egypt, as modern artists do in Italy, to study the principles of their art. He particularly mentions Telecles and theodorus, the sons of Theocles, who made the celebrated statue of the Pythian Apollo at Samos, after what he calls "the Egyptian fashion." He explains this fashion to be the separate execution of the parts, for the statue was divided into two parts, at the groin: one half was cut by Telecles at Samos, and the other by Theodorus at Ephesus; yet, when they were joined together, they fitted so exactly that the whole seemed the work of one hand. And this seemed the more admirable because the attitude of the statue was considered, for it had its hands extended, and its legs at a distance from each other, in a moving posture. We thus see that Egyptian sculpture was almost wholly a mechanical process; the laws of the country prohibited the intervention of novelty in subjects considered sacred; and the more effectually to prevent the violation of prescribed rules, it was ordained that the profession of an artist should not be exercised by any common or illiterate person. Wilkinson, indeed, has shown the great probability of the higher artists having been included in the ranks of the priesthood. In some instances, however, we find reason to believe that the Egyptian artists broke through these trammels. In the two granite statues of lions presented by lord Prudhoe to the British Museum, we perceive a boldness and freedom of execution scarcely compatible with a strict adherence to mechanical rule (see Wilkinson, Ancient Egypt. ii, 342 sq.).

SCULPTURE, CHRISTIAN. The art of sculpture has an antagonistic principle to overcome in the Christian conception of the world, and its progress has been much
implied by that fact: for, while this art must deal primarily with physical forms, and, at the most, can only regard the spirit as an abstract idea, while a part of a common whole, the Christian idea exalts the spirit, making of the body a mere instrument and medium of development, which is laid aside when the stage of a higher spiritual existence is reached; and in the measure in which Christianity confines all ideality to the realm of spirit, so does it render impossible the attainment of its ideal to an art which aims to achieve it. In its representations a unity of spirit and body, of idea and phenomenon. The history of Christian sculpture down to the 16th century accordingly shows that the constant effort of artists was to discover a mode of conception and treatment, i.e. a style, which would enable them to be true to this idea, and to accommodate the laws of the plastic art; and the several periods, as well as the sculptors and their productions, differ among themselves chiefly as the consciousness of this task has become apparent and the problem been more or less successfully solved.

Sculpture was neglected, however, during the first period in the history of Christian art (1st to 10th century) to a degree that permitted but a slight recognition of this task. The dislike of heathenism and its idolatries, in which service the noblest efforts of ancient art had been expended, was at first so great that a cultivation of the formative arts was out of the question; and when this stage gave rise to a demand, the Christian sculptors were employed in painting rather than sculpture, the only object being to bring before the faithful representations of scenes and incidents recorded in the Scriptures; and for this purpose paintings and mosaics were more suitable than sculptures. But four statues of a religious character may with certainty be attributed to this period: (1) a marble statue of Hippolytus, Bishop of Portus Romanus and martyr, in the former half of the 3rd century, the figure seated and wearing a toga, the execution thoroughly ancient in the lower part of the sculpture, while the upper part is a modern renovation; (2) the celebrated bronze statue of St. Peter whose feet the faithful are expected to kiss on festival occasions at Rome, resembling the Hippolytus in style and character, and probably executed at Constantinople in the 5th century; and (3) two statues of the Good Shepherd, one belonging to the 5th or 6th century, and the other to a later period, when ancient Christian art had acquired a certain degree of historical information respecting sculptures of a non-religious character also, e.g. equestrian statues of Justinian and Theodoric the Great, but none have been preserved to this time. Such other relics of this period as are still extant belong to the class of sculptures in relief—e.g. the designs found on sarcophagi and tombs, of which a considerable number belonging to the 3rd and 6th centuries are known, among them the sarcophagus of Junius Bassus, the prefect of Rome, who died in 359, soon after his conversion to Christianity—one of the most important remains of early Christian sculpture. The carvings in ivory, some of which may date back to the 3rd century, are among the earliest. They were employed in the ornamentation of the diptychs (q. v.), and of chairs, book-covers, and other articles. Similar work was done in silver and gold, which metals were largely employed in the ornamentation of doors in churches, pulpits, etc.; but too little has been preserved to enable us to form any opinion as to their style. The fact of its having been used so largely as it was serves only to illustrate the craving of the Church for external pomp and show, and the coarse taste of a period which could delight in an excess of glittering tissue.

The different works in relief which have been preserved to us from the early Christian period all resemble each other in character in the fact that they ignore the peculiar demands of the plastic art as completely as do the representations in color in the art of painting. Both arts were treated in the same spirit and style—a style that was neither picturesque nor plastic, that did not aim at an organic blending of the diverse elements, nor yet at their solution into the antagonizing principles, but simply at a mechanical combination of the two by seizing on certain elements from either side and disregarding others—specifically the early Christian style. The two arts went hand in hand in the further development of this method; but sculpture appears to have fallen into a decline earlier than painting, since it would seem that only sculptures in stone wade of the two by seizing on certain elements from either side and disregarding others—specifically the early Christian style. The Middle-age style differs from that of the preceding period in that it no longer aims at a mechanical combination of the plastic and the picturesque, but executes all sculptures directly in the spirit and method peculiar to the painter's art. It therefore becomes as picturesque as the architecture of that age, and, like painting, dependent on it. But the further development of this style led sculptors involuntarily to a mode of apprehension and execution more in harmony with the special laws of their art, and thus gave rise to a new style fundamentally distinct from the ancient and which was to be found not only in the old Romanesque sculpture, but envoys to impart to them more soul and feeling, and also a more natural form. The aim was not realized at once, but the effort to achieve it gave to the work accomplished something of that plastic character which early Christian art had perverted and ultimately wiped out. There are in Germany (on the so-called golden gate of the cathedral at Freiberg, in Saxony, and on the pulpit and altar of the church at Wechselburg) magnificent sculptures of this period, whose plastic beauty recalls to mind the masterpieces of antiquity. It is significant that Nicholo Pisano (about 1290), called the father of Italian sculpture, and, at all events, the leading sculptor of the Romanesque school in Italy, suddenly turned away from the old Christian (Byzantine) types and devoted himself to the study of the monuments of antiquity, at least with reference to form and apparel. The Romanesque style, however, was too much a symbol of the times, to have disappeared with the ideas and tendencies of the Middle Ages to endure. The Gothic took its place, and with it came in a new era, inasmuch as both painting and sculpture turned directly to nature and to the actual world for their ideals. Figures in relief or in statues obtained greater individuality thereby, though beauty of form was entirely dis-regarded, and all emphasis was laid on adequate expression of the inner life. The plastic character of the sculptor's works was, of course, sacrificed by this method, and it was only natural that the aid of colors should be called in to transform all figures into statuesque paintings; but as the Gothic style aimed primarily to express this inner life it threw off the concep-tions of the world and of the Christian moral life, and employed natural forms only as the vehicle of such expression, it was readily led to attach importance, in the end, to such beauty of physical form as would ade-quately represent the beauty of soul in which the ideal of its aspiration had been unified. The picturesque was, in consequence, so greatly modified in many of the later productions of this style that the aesthetical impression does not suffer in any way.

The third and most flourishing period in the history of Christian art is characterized by the conscious effort to bring the art into resemblance with the forms and principles of growth in nature, and with the conditions and requirements of art in general, and of every branch of art in particular, so that, independent-ly of tradition and the Church, it may represent the
SCULPTURE 488

SCUOPHYLACIUM

Christian ideal with artistic freedom and with adequate beauty of form. Sculptors now sought to reconcile the Christian idea with the requirements of their art, special attention being given to works in relief and to a combination of high with low reliefs in their representations, as being most likely to secure the end in view. We can do little more in this place than mention a few of the most successful statues.

In Italy, the celebrated Lorenzo Ghiberti (born at Florence about 1380, died after 1455), one of the greatest masters of Christian sculpture, deserves special mention, as does also his talented rival, Donato di Betto Bardi (1389-1460), called Donatello, and Luca della Robbia (1400-1482) and other Venetian artists. At the beginning of the 16th century a number of masters appeared by the side of Leonardo da Vinci—the Florentines Giovanni Francesco Rustici and Andrea Contucci, and the Venetian Alonzo Lombardi—who succeeded in honoring the idealism of Christianity, and also in doing justice to the claims of realism to natural and living representation in sculpture. Their works fall below the greatest masterpieces in painting by Raphael only as they are unable to represent the transcendental side of Christianity, the transformation of the human into the divine, with equal clearness. Michael Angelo Buonarroti, however, soon displaced these masters in sculpture who had been secured in this art by the grand, overpowering, and extraordinary, in which he paid but little attention to ideal beauty of form or to the requirements of plastic art. The result was that, in the middle of the 16th century Italian sculptors had adopted a style which aimed chiefly at effect, and which was marred by ostentation and mannerisms, and often governed by coarse naturalism.

German sculptors were not favored with the advantages secured to their Italian compatriots by the possession of the models of antiquity; but their works nevertheless attained to a degree of perfection during this period which renders them not unworthy to be placed by the side of the products of Italian art. Various monuments of stone erected to the dead in the cathedral at Mayence and other Rhenish churches exhibit a depth and ingenuity of conception and a beauty of form in the sculptures executed by unknown hands in the 15th and 16th centuries which are worthy of especial notice. The works of the Italian masters are, however, done in bronze. The Nuremberg artist family, of which Peter Vischer (died 1529) was the most celebrated member, is especially prominent. The best works of the latter artist (especially those in St. Sebaldis's Church at Nuremberg) willbear comparison with the finest work of the Italian masters; he even indicate a higher stage in the development of art in Germany than is apparent in the paintings of such masters as Durer and Holbein, since the works of these artists fail to show that identity of physical shape and formal beauty which art imperatively requires. But Vischer and a few colleagues stand almost alone, and the height upon which they stood was not maintained by their successors. A rapid decline took place, and by the middle of the 16th century German art, both sculpture and painting, had degenerated into a bare imitation of the Italian masters.

This point marks the transition to the fourth period in the history of Christian art. Great convulsions in the political and religious world gave rise to new impulses, but they affected sculpture less than painting. The products of the early part of this period displayed warmth of feeling and passion combined with a deliberately naturalistic treatment, in both of which qualities they were not only the Christian ideal, but the spirit and nature of plastic art itself; and these qualities show that sculpture and architecture (q. v.) were similarly affected by causes then at work, so the progress of events involved them in a similar degradation.

In Italy, Lorenzo Bernini (1598-1680), celebrated both as a sculptor and an architect, an imitator of the style of Michael Angelo, introduced the same forced style into sculpture which he had given to his buildings, and it became the fashion to affect the imposing and ostentatious, and by the use of all manner of curves and crooks to secure the idea of movement. France at once adopted the new style and added to it the feature of theatrical display. Spain, the Netherlands, and Germany had to follow methods for a time, but in the 18th century likewise gave way to French taste and the Rococo style, which, from that point, increased in affected adornment, coquetish elegance, and frivolous licentiousness.

A better spirit was aroused by Winkelman's writings and a growing familiarity with the relics of antiquity. The painter Asmus Jacob Carstens (1754-98) was the first to gain a true conception of the beautiful, and left a number of drawings which are thoroughly penetrated by the spirit of antiquity. With his younger contemporary, Antonio Canova (1757-1822), that spirit entered again into the domain of sculpture, though as yet impure and showing traces of the French style. It is purer in the German Johann Heinrich von Dannewerk (1758-1841), and best of all in the gifted Bertold Thorwaldsen (1770-1844). All that has been done, however, though much of it is excellent, serves only to afford further proof that the Christian ideal and the Greek style are irrevocably at variance with each other; and for this reason some sculptors (of Munich) have gone back to the position occupied by the great masters at the beginning of the 16th century. Nothing definite has been accomplished, and it remains for the future to determine whether Christian sculpture can be carried forward from that point to a higher perfection.

The only modern work dealing specially with the history of Christian sculpture that need be mentioned is Cicognara, Storia della Scultura, dal suo Rinascimento in Italia sino al Seicento di Napoli (Venice, 1813, 3 vols.), much of whose matter is, however, already antiquated.

Scultore (pl. Scultori), (Schulze), Abraham, was born at Gronberg, in Silisia, Aug. 24, 1556, and went to Breslau in 1582. Obliged to leave on account of his father's loss of fortune, he took a situation as tutor in Freistadt, where he enjoyed the opportunity of hearing the sermons of Melancthon and of Abraham Buchholtzer. In 1584 he made a journey to Poland, and the year following to Lithuania, where he remained two years, attending public lectures and reading private lectures to others. In the same manner he employed himself in the University of Wittenberg and Heidelberg, till he was admitted into the Church in 1584. Officiating in a village church for a few months, he was sent for by the elector to be one of his preachers. In 1598 he was appointed pastor of the Church of St. Francis, Heidelberg, and two years after became a member of the Ecclesiastical Senate. He was appointed court preacher about 1615, which position he retained until he accepted the professorship of divinity in 1618. After the battle of Prague he resolved to return to Heidelberg; but the fury of war had dispersed the students, and he retired to Emden in August, 1622, where he died, Oct. 24, 1626. His principal works are, Conclusio Disputationis Baronii de Baptismo Constantini (Neustadt, 1607, 4to);—Annals Evangeli per Europam 15. Socii Renornatii (Heidelberg, 1618, 8vo)—Aziomata Concimantium (Han. 1619, 8vo)—Observaciones in Paternian artibus in Theodorum, Tinetum, et Philenom.—Medulla Patrum (1684, 4to).

Scoun (Scuon), chéedh, strictly an overlaying), rather, rust of a pot (Ezek. xxiv. 6, 11, 12).

Scuophylacium (scuophylácium), a recess near the altar corresponding with the medieval "umbrère," in which the chalice, paten, and every utensil employed in offering the eucharistic sacrifice were anciently placed immediately after mass. Reference is made to such a receptacle by the councils of Laodicea and Agatha.
Scurvy (םֹר, garbik, from בֹּר, to scratch), scurf on the skin (Lev. xxi, 20; xxii, 22), perhaps of a malignant kind ("scab," Deut. xxviii, 27). So also the word בֹּר, yālālepēth, rendered "scabbed" (Lev. xxii, 20; xxii, 22), signifies a sort of itching scab, scurf, scabber, so called as sticking fast. See Lepra. The disease known by the name of scurvy in modern times is usually caused by long confinement in cold and damp climates, without fresh provisions, and a due quantity of acceptable food. In the progress of the disease the skin becomes dry and scaly, livid spots appear, and the sufferer experiences great debility.

Scutocheon (old form, soouchon; Latin, scutum = a shield), besides signifying an escutcheon, is also an old name for the angles of buildings or parts of buildings, such as window-jams, etc., but apparently for those only which are greater than right angles.

Sectum. See Pome.

Sectum Fidelis (shield of faith), a sacred device frequently represented in stone and wood carving, on monumental brasses, in stained glass, and ancient paintings, in which the doctrines of the Trinity in Unity and the Unity in Trinity were set forth for the instruction of the faithful. The example in the accompanying wood-cut is from the south window of the south transept of Thame Church, Oxfordshire (1829). It has since disappeared.

Scylla, in Greek mythology, was the daughter of Typhon and Echidna, or of Neptune and the nymph Cretaias. The descriptions of this marine monster are sufficiently striking, though they were never followed in the formative arts. Homer makes her to dwell by a rock which reached to the skies, and whose brow was constantly crowned with clouds. The mountain could not be scaled because of its smooth surfaces, and the monster was accordingly able to dwell undisturbed in the cavern which the waves had washed at its foot, and thence to inflict destruction on all who might approach. The giantess had twelve feet, which, however, were less dangerous than might be supposed, because they were all fastened to the rock; but the horrible body had six long necks, surmounted by six terrible heads, which roared unceasingly under the impulse of hunger and ferocity. The mouth was armed with a triple row of teeth, and every form of creature afforded them a welcome prey. In the absence of other food, they seized on dolphins and seals, but if a ship drew near, it was obliged to sacrifice a portion of its crew. Ulysses came prepared for a conflict, and sought in every way to drive off the monster with spear-thrusts and poisons, but was at length obliged to pay for the temerity which led him to navigate the Sicilian straits with the loss of six of his most faithful companions. These waters (between Italy and Sicily) were at that time regarded as impassable because of Scylla and Charybdis (incldt in Scylla cupiens victare Charybdin), one of which was certain to destroy the navigator. Their terrors are now altogether dissipated, and no fishing-boat dreads these monsters. Scylla is usually represented as a gigantic female figure with an oar raised as if to strike, the body ending in two dolphin tails.

Scyllis, in Greek mythology, was a celebrated architect, who was supposed to be the son of Deidalus by a paramour of unknown name, whose father lived at Gortys, in Crete. Many of the buildings in Sicily were attributed to him and his brother Dionysius.

Scyllus, in Greek mythology, was a son of Jupiter in Crete.

Scythes, in Greek mythology, was a son of Hercules and Echidna.

Scythian (Σκηθή) occurs in Col. iii, 11 as a generalized term for a rude, ignorant, degrased person. In the Gospel, says Paul, "there is neither Greek nor Jew, circumcision nor uncircumcision, barbarian, Scythian, bond nor free; but Christ is all and in all." It was anciently applied sometimes to a particular people, and sometimes to all the nomad tribes which had their seat to the north of the Black and Caspian seas, stretching indefinitely eastward into the unknown regions of Asia. It had thus much the same latitude as "Tartars," and was in like manner synonymous with Barbarian (Βαβυλον). The same view of Scythian barbarism appears in 2 Mac. iv, 47 and 3 Mac. vii, 5, also in Josephus (Cont. Apion. 287) and Parmenio (ap. Athen. v, 221). For other similar testimonies, see Wettstein, Nov. Test. ii, 292. The Scythians were, in fact, the ancient representatives of the modern Tartars, and, like them, moved from place to place in carts drawn by oxen. It is from this circumstance that they, or a tribe nearly allied to them, may be recognised on the monuments of Egypt. In the latter part of the 7th century B.C., they had become well known as a formidable power through the whole of Western Asia. Forced from their original quarters north of the Caucasian range by the inroads of the Mas-
SCYTHIAN 490  SCYTHOPOLIS

which is complicated by the undefined and varying applications of the name Scythian and Scythians among ancient writers. As the Biblical notion is destroyed, it is sufficient to state that the Scythians of Ezekiel's age—the Scythians of Herodotus—were in all probability a Japhetic race. They are distinguished, on the one hand, from the Araphites, a clearly Mongolian race (Herod., iv, 29), and they are connected, on the other hand, with the Thracians, a clearly Indo-European race (Ibid. iv, 10). The mere silence of so observant a writer as Herodotus as to any striking features in the physical conformation of the Scythians must further be regarded as a strong argument in favor of their Japhetic origin. For the geographical and ethnographical relations of the term, see Smith, Dict. of Class. Geog. ii, 930—945. Perhaps also of importance is the fact that from the earliest times among the Scythians were Scythians also among the early converts to Christianity. Many of this people lived in Greek and Roman lands, and could have heard the Gospel there, even if some of the first preachers had not already penetrated into Scythia itself. See Nat. Anim. Rev. Dec. 1876; Journ. Sac. Lit. April, 1835.

Scython, in Greek mytholgy, was a man whom the poets represent as possessed of the ability to change his sex at will.

SCYTHOPOLIS (Σκυθοπόλις, Pashito—Syria Beisan; Vols. cicovio Σκυθωπολης), that is, "the city of the Scythians," occurs in the A. V. of Judith iii, 10 and 2 Macc. xii, 29 only. In the Sept. of Judg. i, 27, however, it is inserted (in both the great MSS.) as the synonym of Beth-shean (q. v.), and this identification is confirmed by the narrative of I Macc. v, 52, a parallel account to that of 2 Macc. xii, 29, as well as by the repeated statements of Josephus (Ant. v. 1, 22; vi, 14, 8; xii, 8, 5). He uniformly gives the name in the contracted shape (Σκυθωπολης), in which it is also given by Eusebius (Onomastix, passim), Pliny (H. N. v, 18), Strabo (xvii), etc., and which is inaccurately followed in the A. V. Polybius (v, 70, 4) employs the fuller form of the Sept. Beth-shean has now, like so many other places in the Holy Land, regained its ancient name, and is known as Beisan alone. A mound close to it on the west is called Tell Shik, in which it is perhaps just possible that a trace of Scythopolis may linger. But although there is no doubt whatever of the identity of the place, there is quite a considerable difference in the manner of operating as to the origin of the name. The Sept. (as is evident from the form in which they present it) and Pliny (H. N. v, 16) attribute it to the Scythians, who, in the words of the Byzantine historian George Synclius, "overran Palestine and took possession of Beisan, which from then is called Scythopolis." This has in modern times generally referred to the invasion recorded by Herodotus (i, 104—106), when the Scythians, after their occupation of Media, passed through Palestine on their road to Egypt (about B.C. 600—a few years before the taking of Jerusalem by Nebuchadnezzar), a statement now recognised as a real fact, though some of the details may be open to question (Rawlinson's Herod., i, 246). It is not at all improbable that either on their passage through, or on their return after being repulsed by Psmmetichus (Herod., i, 105), some Scythians may have settled in the country (Ewald, Gesch. iii, 694, note); and no place would be more likely to attract them than Beisan—fertile, most abundantly watered, and in an excellent military position. In the then state of the Holy Land they would hardly meet with much resistance. See SCYTHIAN.

Reland, however (apparently incited thereto by his doubts of the truth of Herodotus's account), discarded this explanation, and suggested that Scythopolis was a corruption of Succothopolis—the chief town of the district of Succoth. In this he is supported by Gesenius (Notes to Burchardt, p. 1058) and by Grimm (Exeg. Handbuch on 1 Macc. v, 52). Since, however, the objection of Reland to the historical truth of Herodotus is
now removed, the necessity for this suggestion (certainly most ingenious) seems not to exist. The distance of Succoth from Beisân, if we identify the former with Suqâ‘, is ten miles; while if the arguments of Mr. Beke are followed, it would be thirty miles. Earthworks with justice that had the Greeks derived the name from Succoth, they would have employed that name in its translated form as Šeqwa‘, and the compound would have been Seqonopolis. Reldâ’s derivation is also dismissed without hesitation by Ewald, on the ground that the two names Succoth and Sykthe have nothing in common (Gesen. Thesaur. p. 360, 598). When used for the sea, it very often, but not always, takes the article. Other words for the sea (in the A.V. “deep”) are: ḥaqqâ‘, metosûlîh, or ḥâqqâ‘, metosûlîh (only in the plural), or ṣu‘âlûh simply (ᾭδωρ, βασαν, ὁδύσασ, profundum); ḥâmmîl (καταρασσωμεν, ἀλώας, “water-flood,” Psa. xxix, 10). Smaller pools were distinguished into ḥâmmîl, ṣâ‘ûl, a natural pool or pond (ἐς, 35, ἐς, 8; Isa. xxvii, 7; xli, 18, etc.), and ṣâ‘ûl, bêrekâ‘, the same as the Arabic birkâh, an artificial pool or reservoir (2 Sam. ii, 12; Nahum ii, 9).

The following are the applications of the term yâm in Scripture:

1. The “gathering of the waters” (yammin), encompassing the land, or what we call in a more or less definite sense the “Ocean.” In this sense the term is used in Gen. i, 2, 10, and elsewhere, as Deut. xxxii, 18; Kings x, 22; Psa. xxxiv, 2; Job xxxii, 8, 13; xxxviii, 8; see Homen, Hiad, xiv, 301, 302; Hesiod, Theog. 107, 109, and 2 Pet. iii, 5.

2. The word is used with the article, with some of the uses: a) Of the Mediterranean Sea, called the “hinder” (יוֹם ים), the “western,” and the “utmost sea” (Deut. xxi, 24; xxxiv, 2; Joel ii, 20); “sea of the Philistines” (Exod. xxvii, 21); “the great sea” (Num. xxxii, 6, 7; Josh. xv, 47); “the sea” (Gen. xiii, 15; Psa. lxxx, 11; evii, 23; 1 Kings iv, 20, etc.). See MEDITERRANEAN. b) Also frequently of the Red Sea (Exod. xiv, 4; Josh. xiv, 6), or one of its gulfs (Numb. xxi, 31; Isa. xii, 15), and perhaps (1 Kings x, 22) the sea traversed by Solomon’s fleet. See RED SEA.

The passage of the two seas met (παντοφλακιον, Acts xxvii, 41) is explained by Cunybeare and Howson as a place where the island Salomonetta, off the coast of Malta, in St. Paul’s Bay, so intercepts the passage from the sea without to the bay within as to give the appearance of two seas, just as Strabo represents the appearance of the islands from the Bosphorus in the same sea; but it seems as likely as that by the “place of the double sea” is meant one where two currents, caused by the intrusion of the island, met and produced an eddy, which made it desirable at once to round the ship (Cunybeare and Howson, ii, 423; Strabo, ii, 124). 3. The term is also applied to the great internal lakes of Palestine, whether fresh or salt; viz.:

(a) The Sea of Chinnereth, ים כנרת (Num. xxxiv, 11), called in the New Test., “the Sea of Galilee” (Matt. iv, 18), the “Sea of Tiberias” (John xxi, 1), and the “sea (or lake) of Gennesaret” (Matt. xiv, 34; Mark vi, 55; Luke v, 17), which last is but a variation of the Hebrew name. See GALILEE, SEA OF.

(b) The Dead Sea, called in Scripture the Salt Sea, ים סourg, (Gen. xiv, 9), the Sea of the Plain, or the Arabah, ים הערabh (Deut. iv, 40), and the Eastern Sea, ים המלח (Joel ii, 20; Ezek. xlvii, 18; Zech. xiv, 8). It is not named or alluded to in the New Test. It is called by Josephus (War, iii, 10, 7) ים אספלית, by which name, or in the Latin form of Lacus Aspalitiae, it was known to the classical writers. See SALT SEA.

(c) The Lake Meron is named once only in Script-
Sea, Molten

Seal (סהל, chōthām, ᵉنهار). The seal, together with the staff, has been in the East from the earliest times (Gen. xxxviii, 18) the favorite trinket of the men (see Cant. viii, 6; Hag. ii, 23; Jer. xxxi, 24; Sir. xxvii, 22; comp. Rosenmuller, Morgan, vi, 325). Both are included in the description of the Babylonian (Herod. ii, 36; Strabo, xvi, 746). It was attached, as still in Persia, by a cord, and worn upon the bosom or in a finger-ring on the right hand (Gen. xlii, 42; Esth. iii, 10, 8; vii, 2; Jer. xxii, 24; comp. Chardin, iv, 23; v, 454 sq.; Robinson, i, 36, and see especially Longus, De Annal. Sign. (Mail. 1613, Lisse 1703)). The ancient seal was carved in an ancient one (Exod. xxxviii, 11). The seal usually contains no figures (yet see the drawing of one found at Cusa, in Ker Porter, Trans. i, 425, pl. Ixxx, 2), but simply

Seal. (From originals in British Museum.)

1. Signet ring.
2. Signet cylinder of Semachsekh.
3. Seal of chaldean, with Phoenician inscription.
4. Seal of sphynx chaldean, with Assyrian inscription.
5. Seal of chaldean, with Persian inscription.
6. Seal in form of a duck, with the head resting on the back.
7. Clay impression from one of Esarhaddon. (From Kuyunjik.)
8. Clay impression from seal—deer, ox of wheat. (From Kuyunjik.)
9. Clay impression from seal—deer, a scorpion. (From Kuyunjik.)

the name of the wearer, sometimes with a sentence from the Koran, and it is customary to give an impression of it instead of a signature (Chardin, i, 289, 855; iii, 112, 362, 366, with plates; Olearius, Trans. p. 633; Rosenmuller, Morgan, iii, 205 sq.; Comp. Curtius, iii, 6, 7; Herod. iii, 128). For this purpose the seal is moistened with a kind of black ink (Harmer, Obs. ii, 460, 479; iii, 479); but in sealing letters (1 Kings xxi, 8; comp. Josephus, Life, p. 44), bags (Job xiv, 17), and sacks (Mishna, Shabb. viii, 5), as well as doors, clay or sealing-earth was used (ibid.). Among the Jews the women also carried seal-rings (ibid. vi, 3). Eastern princes confer the dignity of minister or regent by the delivery of the state seal, or a seal-ring (Gen. xli, 42; Esth. iii, 10; vii, 2; 1 Mac. vi, 15; comp. Curtius, 5, 4; Aristoph. Eq. 947); see Schulz, Leitung, iv, 218 sq.; Tournefort, Voyage, ii, 388), and sometimes they invested successors in the same manner (Josephus, Ant. xx, 2, 3). In the later language of the Jews the word chōthām meant a counter or token, perhaps with a seal. Such were used in the Second Temple (Mishna, Shoḥadā, 3 sq.), and a special officer of the seals was stationed there (ibid., vi, 1). See Ring.

The seal, with the owner's name or some other device engraved upon it, was usually employed to authenticate public or private documents. Seals for this purpose, made of some durable substance, of copper, silver, gold, or precious stones set in metal, were commonly used in the East. Sometimes the signet-ring was used for this purpose (Gen. xxxviii, 18; Jer. xxxii, 10). If a door had to be sealed, it was first fastened with some ligament, over which was placed some well-compact clay,
and then impressed with the seal, so that any violation of it would be discovered at once (Job xxxviii, 14; Sol. xxiii, 44; Prov. xxxi, 60). Seals were sometimes put in sealed bags and enclosed in earth-ware vessels for greater security (Deut. xxxii, 34; Jer. xxxii, 14; Job xiv, 17). The seal, if a cylinder, was rolled on the moist clay, hence Job says, "it is turned as clay to the seal" (xxxviii, 14); and sometimes the tablet or impression was placed in the furnace, and baked. The term "sealed" is sometimes used figuratively for that which is permanent (Isa. viii, 16) and confirmed (John vi, 29; Rom. iv, 11), also for that which is to be kept secret until the appointed time (Dan. viii, 26; xii, 4, 9). So also the "book or roll sealed with seven seals" symbolized the plan of the divine government, which is impenetrable to every creature, but fully comprehended by the Saviour, who is exalted to the throne of the universe (Rev. v, 2-8). The "seal of the living God," on which is supposed to be engraved the name of Jehovah, which was impressed upon the foreheads of the faithful, symbolizes the indwelling of the Holy Spirit (vii, 2-17; Ephes. i, 13, 14; vi, 30; 2 Cor. i, 22; Ezek. ix, 4, 6; 2 Tim. ii, 19). See Signt.

SEAL, ABBATIAL, is the official formal seal of an abbott. 

SEAL, CONSECRATION OF AN EPISCOPAL. It was customary in many parts of the Church during the Middle Ages to consecrate the seal of a newly made bishop with his vestments and other episcopal insignia. The form of consecration was simple, the seal being blessed with holy water. At the death of the bishop, his seal or seals (for he had usually more than one) were carefully destroyed. 

SEAL, DECANAL, is the official formal seal of the dean of a cathedral or collegiate church. 

SEAL (Eclesiastical, use of), a piece of metal or other hard substance, e.g. bone or ivory, usually round or elliptical, on which is engraved some device, used for making impressions on wax. The wax set or affixed to an ecclesiastical or legal instrument, duly impressed or stamped with a seal, is likewise designated by the same term. The use of seals as a mark of authenticity to letters and other instruments in writing is very ancient, and was allowed to be sufficient without signing the name, which few could do of old. In 1327, owing to the prevalence of forgeries and the absence of public notaries in England, abbots, priors, deans, archdeacons, their officers, and rural deans, spiritual bodies, colleges, and convents, were required to have seals. If the office was perpetual, then the name of the man who bore it was engraved on the seal; but rural deans and officials whose office was temporary, had only the name of their office engraved upon it. They resigned their seals at the expiration of their tenure by him to whom they had been commissioned. The name seal is also given to the little stone which covers the sepulchre of relics in an altar. 

SEAL, EPISTORAL, is the official formal seal of a bishop, attached to letters of orders, licenses, deeds of institution, induction, degradation, and other documents. They represent the arms of the diocese, impaled with the personal arms of the bishop. Bishops commonly have two official seals—a large and a small one. These, in England, on their death, are sent to Lambeth Palace to be defaced and destroyed under the direction of the archbishop's official. 

SEAL OR BAPTISM. Baptism was often called, in the early Church, "the seal of the Lord," "the seal of Christ," and the like. Many passages, especially Ephes. i, 13; iv, 30; John iii, 33, and other similar passages, especially 2 Cor. i, 21, 22. This use of the word is taken from the circumstance that the stamp or impression of a seal upon anything was regarded as a mark of property, or a token that it belonged to a certain owner, namely, the person whose seal it bore. Thus Gregory of Nazianzen (Orat. 40) calls baptism the seal and sign of sovereignty, or the token that the baptized person was subject to the dominion and government of God, and lived to obey his will. See Riddle, Christian Antiqu. p. 484. 

SEAL or CONFESSIO, a name for the obligation on a priest never to reveal the secrets of the confessional. See Lee, Gloss. of Liturgical Terms, s. v.; Walcott, Sta. Arch. Arch., s. v. 

Sealed Books, certain printed copies of the revised Anglican Prayer-book, as settled at the Savoy Conference, issued A.D. 1662, which, having been examined by the commissioners appointed for that purpose, were certified by them to be correct. They were ordered by Parliament to be preserved in certain cathedral and collegiate churches. A folio reprint of the Sealed Book was issued by Pickering (1844), and again by Masters (1848, 8vo). See Lee, Gloss. of Liturgical Terms, s. v. 

Seal-skin. See Badger. 

Seal occurs in Scripture only in the epithet ἄμμος, "without a seal," applied to our Saviour's inner garment ("coat"), which the soldiers at his crucifixion accordingly cast lots for (John xix, 23). Monographs on this fact are cited by Volbeding, Index Programmatum, p. 60. 

Seaman, Richard, a minister of the Methodist Episcopal Church, was born April 28, 1786. He studied medicine, and was admitted to practice in New York when about nineteen. He became a Christian in 1812, and in 1828 was received into the New York Conference, and was regularly appointed until 1845, when he was obliged to take a supernumerary relation. He continued to labor as his strength would permit, but for the last thirteen years of his life was a great sufferer from rheumatism. He died Nov. 6, 1864. He was a man of superior judgment, integrity, uprightness, modesty, generous, and evangelical. See Minutes of Annual Conferences, 1865, p. 100. 

Sea-monster is the rendering in Lam. iv, 8 of the Heb. תמר, "the margin has "sea-calves," The root of the word is שָׁמְר, "to stretch out," hence it seems to apply to a slim creature that extends itself, and some think it means a kind of serpent. Others would render it "jackal." It is variously rendered in the A. V. ("whale," "serpent," etc.), nor is it probable that it was very definite in its application. See DRAGONS. 

Sear occurs in Scripture only in the rendering of the word καρποσκολω, to brand ("sear with a hot iron"), in a tropical sense of the conscience (1 Tim. iv, 2). To sear the flesh is to cauterize or burn it, and thus deprive it of the power of sensation. In 1 Tim. iv, 2 the term denotes the effect of habitual sin, by which the conscience becomes so stupefied as to be insensible to the most enormous guilt and the most fearful threatenings of punishment. See BURNING. 

Searle, Jeremiah, a (Dutch) Reformed minister, was born at Atkinson, N. H., in 1795. He was educated in part at Bowdoin College, Me., and graduated at Union College, N. Y., in 1820. He studied theology with Dr. Andrew Yates, and was licensed by the Congregational Association of Vermont in 1823. His ministerial life was spent in the following Reformed churches: Rotterdam, N. Y., 1823—25; Coxsackie, 1825—51; Keyport, N. J., 1851—53; Fallsburgh, N. Y., 1853—61. He was a man of great sweetness of spirit, amiable and beloved; a minister and a workman who needed not to be ashamed; studious, careful, and licensed by the Congregational and experimental in preaching; solemn, and yet cheerful, in manner; catholic in his sentiments, yet firm in the faith. He was president of the General Synod in 1850. He died in 1861. His ministry was marked by truly missionary labors, and crowned with two notable revivals of religion. See Corwin, Manual of the Ref. Church. (W. J. E. 1)
SEARLE

Searle, Moses C., a Presbyterian minister, was born in Byfield, Mass., Sept. 17, 1797. He graduated at the College of New Jersey, Princeton, in 1821, and at the Theological Seminary in that place in 1824; was licensed by the New Brunswick Presbytery, and, going East, began his labors in Grafton, Mass., being ordained by Newburyport Presbytery in 1826 as pastor of the Congregational Church in that place. He subsequently labored in New Hartford, N.Y.; Dorset, Vt.; Haverhill, N.H.; Bradford, and Byfield, Mass., where he died, Dec. 10, 1865. Mr. Searle was a man of deep piety and affectionate disposition, an excellent pastor and good preacher. See Wilson, Pref., Hist. Almanac, 1868, p. 226. (J. L. S.)

Searles, Isaac, a minister of the Methodist Episcopal Church, was born in Hartford, Conn., Oct. 30, 1816, removed to Ohio at an early age, and professed conversion in his seventeenth year. He was received on trial into the Rock River Conference, Aug. 25, 1841; ordained deacon in 1843, and elder in 1845. In 1848 the Wisconsin Conference was formed, and Mr. Searles became one of its presidents. He was president of the University of Iowa for a short time, but became effective in 1852; superannuated in 1866, and active in 1867. His last appointment was Brandon, Wis., where he died, Dec. 8, 1870. See Minutes of Annual Conferences, 1871, p. 273.

Sears, Allen, a Methodist Episcopal minister, was born in New York State in 1806, received on trial in the Kentucky Conference in 1838, appointed to Taylorsville Circuit as junior preacher, and continued to travel within the bounds of that conference for seven years successively. In 1845 he was transferred to the Indiana Conference, and appointed to Vincennes Station; in 1846, to Spencer Circuit. He died Dec. 4, 1846. He was a man of very strong faith, deep piety, a truly evangelical preacher, and a good pastor. See Minutes of Annual Conferences, iv, 185.

Sears, Clinton W., a minister of the Methodist Episcopal Church, was born in Chautauqua County, N. Y., April 27, 1819. He was educated at Yale College and Middletown Wesleyan University. He was a member of the Cincinnati Conference, and had occupied several responsible stations, when, in 1862, he was appointed chaplain of the Ninety-fifth Regiment New York Volunteers. He was seized while in service with the camp dysentery, and returned to his home, July 15, 1863, and died Aug. 25, 1863. Mr. Sears was a good scholar, an able preacher, and a faithful pastor. See Minutes of Annual Conferences, 1868, p. 148.

Season (properly רֶשֶׁם, a fixed time; κασφό, often rendered “time” in general, and not specific of a portion of the year). The general division of the year by the Hebrews was into two seasons, “Summer and Winter” (Psa. lxxiv, 17; Zech. xiv, 8); but they appear also to have conveniently divided the year into six special seasons: “seed-time and harvest, and cold and heat, and summer and winter” (Gen. i, 14; viii, 22). The same division obtains among many Oriental nations, as the Hindus and Arabsians, at this day. According to this division of the seasons in Palestine, they would seem to have been distributed in the following order: Summer, from the middle of August to the middle of October; Seed-time, from the middle of October to the middle of December; Winter, from the middle of December to the middle of February; Cold, from the middle of February to the middle of April; Heat, from the middle of April to the middle of August. See Agriculture.

Seasons, Canonical. See Festivals.

Seat (usually some form of בַּשָּׁה, yashah, to sit; κάθοντα, to sit). There is no mention made of chairs in the Old Testament, but seats of various kinds are named. (1) נַשָּׁה, kathah, (from נַשֵּׁה, to cover, also occurring twice, Job xxxvi, 9; 1 Kings x, 19, in the form נְשָׁה), is a throne, a royal throne, as in Deut. xvii, 18:

2 Sam. viii, 13, or the elevated seat of the high-priest; 1 Sam. i, 9; iv, 15, but is sometimes applied to a seat in general, though usually with some honorary distinction, as 1 Sam. ii, 8; Isa. xxii, 23. See Throne. (2) נַשָּׁה, mashah (from נָשָׁה, yashah, to sit), means any seat, as 1 Sam. xx, 25; Job xxxvii, 7, hence the site of a city, 2 Kings ii, 19; an assembly or session, as Psa. i, 1, and the dwelling of men, Gen. xxv, 49, and often. (3) The word נְשָׁהhips, leshah (from נָשָׁה, takem, to weigh), is rendered “seat” in the A. V., Job xxxiii, 8, but means rather dwelling, abode. (4) Finally, שִׁבְתָּה, is the infinitive of the verb yashah (as No. 2, above), used substantively, as in Amos vi, 3.

Orientals usually seat themselves upon mats or carpets on the floor. In the houses of the wealthy there are spread pillows, or cushions, stuffed with cotton; and sometimes broad low sofas, or divans, are used, with arms, stuffed cushions, and costly ornaments. Upon these divans, as well as upon the floor, they sit with the legs bent under, and crossed in a half-kneeling posture. Among some of them Europeans have even introduced chairs. The Ancient Egyptians had chairs and ottomans in great variety and of the most elegant forms, much in the modern fashion (Wilkinson, As. Egy. i, 58 sq.); and no doubt the wealthy Hebrews imitated them. See Handicraft. In later times the Hebrews adopted the custom of reclining upon couches at table (1 Sam. ix, 22; Amos vi, 4; Esth. vii, 8; Matt. xxiii, 6; Luke vii, 37, 50). Among the Romans a chair of a particular form was used by the magistrates when administering justice, and this is called “the judgment-seat” (Matt. xxvii, 19; Acts xviii, 12, 16; Rom. xiv, 10). See Judgment-seat.

The place in which a person is seated regulates, in Eastern nations, the degree of rank or precedence which he claims for himself or receives from others. In Persia the distance from the throne within which the dignitaries of the court and nobles may sit is regulated by the strictest etiquette. The same particularity is observed in every department of public and private life, in the formal divan, in the social feast, and even in the retirement of the domestic chamber. To this particularity there are many allusions in Scripture: thus “the seat of Moses,” in which the scribes and Pharisees sat, expresses metaphorically the dignity which belonged to their office as teachers or expounders of the law; “the seat of honor,” to which allusion is made in the Apocalypse, was the highest seat in the synagogue so much coveted by the Pharisees. Thrones are mentioned only in reference to deity or sovereignty; every other kind of dignity is determined by the seat. It was usual for persons who were greatly respected to be employed as judges or arbitrators; and for such seats were provided in some public place, round which the people respectfully stood, paying the most respectful reverence to the
Seba ( Heb. Seba,’ אֶבֶּה ָאֲנָאָנָא , Sept. Σαβία , occasionally Σαβίλια ; Vulg. Sabasia;), the oldest son of Cush (Gen. x, 7; xii, 5), was, according to some, a country or nation of Cushites, named, in connection with Egyptians, Cushites, and Arabians (Sabaeanas) (Isa. xliii. 8; xlv, 14; Ps. lxxxii, 10), and in Isa. xlv, 14; Ezek. xxxiii, 42, as a rich and proud race. (The following account is based in part upon that of Poole, in Smith’s Dict. of the Bible.)

I. Name.—Besides the singular form above, there is given the plural סֶבָּאָנָא ( Sept. Σαβιάεια; Σαβιάειαν; Vulg. Sabasiae), incorrectly rendered “Sabaeanas,” a name given in the A. V. with more probability to the סֵבָא ( Joel iii, 8 [ Heb. text, iv, 3]; and to Sheba, used for the people [Job 1, 10]), but it would have been better had the original orthography been followed in both cases by such renderings as “people of Seba,” “people of Sheba,” where the gentile nouns occur. See SABAAN; SHEBA.

If Seba be of Hebrew or cognate origin, it may be connected with the root סֶבָא, saba, “he drank to excess,” which would not be inappropriate to a nation seated, as we shall see was that of Seba, in a well-watered country; but the comparison of two other similar names of Cushites, Sabtah (סָבְתָה) and Shebathekah (סְבַתְהָ֫כָה), does not favor this supposition, as they were probably seated in Arabia, like the Cushite Sheba (כִּ֭שֵּׁבָה), which is not remote from Saba (סַבָּה), the two letters being not infrequently interchanged.” Genesius has suggested the Ethiopic sabay, “a man,” as the origin of both Saba and Seba, but this seems unlikely. The names of Cushian origin of nations, of Cush, possibly countries, of Ethiopia, probably mainly, if not wholly, of Negritian race, Sababa, Sabara (Brugach, Geogr. Inscr., ii, 9, tav. xii, K, 1), are more to the point; and it is needless to cite later geographical names of cities, though that of one of the upper confluent of the Nile, Astasolus, compared with Astabara, and Astapaus, seems worthy of notice as perhaps indicating the name of a nation. The proper names of the first and second kings of the Ethiopian 25th dynasty of Egypt, Shebek (שְבֶ֑כֶּה) and Shebetek, may also be compared. Genesius was led, by an error of the Ethiopologists, to connect Sevechus, a Greek transcription of Shebetek, with Sakk or Shob, the crocodile-headed divinity of Ombos (Lex. s. v. שֶבֶטֶק).

Biblical Notices.—Besides the mention of Seba as one of the lists of the sons of Cush (Gen. x, 7; x Chron. 1, 9), there are but three, or, as some hold, four, notices of the nation. In Psalms lxxix, there is evident a first reference to the reign of Solomon, Seba is thus spoken of among the distant nations which should do honor to the king: “The kings of Tarshish and of the isles shall bring presents; the kings of Sheba and Seba shall offer gifts” (ver. 10). This mention of Seba and Seba together is to be compared with the occurrence of a Sheba among the descendants of Cush (Gen. x, 7), and its fulfillment is found in the queen of Sheba’s coming to Solomon. There can be little doubt that the Arabian kingdom of Sheba was Cushite as well, and more particularly Jostanite; and this occurrence of Sheba and Seba together certainly lends some support to this view. On the other hand, the connection of Seba with an Asiatic kingdom is important in reference to the race of its people, which, or at least the ruling class, was, no doubt, not Negritian. In Isaiah liii, Seba is spoken of with Egypt, as more particular Egypt or Cush, apparently the geographical reference to the Exodus, where we read, “I gave Egypt [for] thy ransom, Cush and Sheba for thee” (ver. 3). Here, to render Cush by Ethiopia, as in the A. V., is perhaps to miss the sense of the passage, which does not allow us to infer, though it is by no means impossible, that Cush, as a geographical designation, includes Seba, as it would do if here meaning Ethiopia. Later in the same book there is a passage parallel in its indications: “The labor of Egypt and merchandise of Cush, and of the people of Seba, men of stature, shall come over unto thee, and they shall be thine” (xlv, 14). Here there is the same mention together of the three nations, and the same special association of Cush and Seba. The great stature and beauty of these nations have been mentioned by Herodotus, who speaks of them as by report the tallest and handomest men in the world (iii, 20; comp. 114); and in the present day some of the tribes of the dark races of a type intermediate between the Negritians and the Egyptians, as well as the Caucasian Abyssinians, are remarkable for their size and fine form, which are probably for their height. The doubtful notice is in Ezekiel, in a difficult passage: “And with men of the multitude of [cush] were brought drunkeards [עִדְּבָנִים]; but the Keri reads עִדְּבָנֵים, ‘people of Seba’ from the wilderness, which put bracelets upon their hands, and beautiful crowns upon their heads” (xxiii, 42). The reading of the A. V. in the text is, “with the men of the common sort,” and in the margin, “with the men of the multitude of men.” The first clause would seem to favor the idea that a nation is meant, but the reading of the text is rather supportive of what follows the mention of the “drunkeards.” Nor is it clear why people of Seba should come from the wilderness.

3. Identification.—The list of the sons of Cush seems to indicate the position of the Cushite nation or country Seba. Nimrod, who is mentioned at the close of the list, ruled at first in Babylonia, and apparently afterwards in Assyria: of the names enumerated between Seba and Nimrod, it is highly probable that some belong to Arabia. We may thus conjecture a curve of Cushite settlements, one extremity of which is to be placed in Babylonia; the other, if prolonged far enough in accordance with the mention of the African Cush, in Ethiopia.

The other passages we have examined seem to show (if we omit the last) that Seba was a nation of Africa, bordering on or included in Cush, and in Solomon’s time independent and of political importance. We are thus able to conjecture the position of Seba. No ancient Ethiopian kingdom of importance could have excluded the island of the Nile, and therefore this one of Solomon’s time may be identified with that which must have arisen in the period of weakness and division of Egypt that followed the empire, and have laid the basis of that power that made Shebek, or Sabaco, able to conquer Egypt and found the Ethiopian dynasty which ruled that country as well as Ethiopia.

Josephus says that Seba (Σαβία) was the ancient name of the Ethiopian island and city of Meroe (Ant. ii, 10, 2), but he writes Seba, in the notice of the Noachian settlements, Saba (ibid. i, 6, 2). So, too, Strabo and Dioscorus Siculus (see Mannert, Geogr. p. 199). But the name Meroe is more probably Ethiopic, meaning the watered land (see Tuch, Gen. p. 222; comp. Kleines, Isch. i, 122, who gives Seba a similar meaning). This view of Seba, as identical with Meroe, has been adopted by all the moderns as suited to every passage where it is mentioned (comp. Michaelis, Speci. i, 180 sq.). Certainly the kingdom of Meroe succeeded that of Seba; and the ancient city of the same name may have been a capital, or one of the capitals, of Seba, though we do not find any of its monuments to be even as early as the 25th dynasty. There can be no connection between the two names. According to Josephus and others, Meroe was named after a sister of Cambyses; but this is extremely improbable. It seems rather the Egyptian Cush, apparently the geographical term, the ancient Egyptian Meru, an island, which occurs in the name of a part of Ethiopia that can only be this or a similar tract, Meru-pet, “the island of pet” (Phut?) = the bow,” where the bow may have a geographical reference to a bend of the river, and the word island to the country enclosed by that bend and a tributary. See
SEBAK 496 SEBAT

Phut. It may be remarked that it seems certain that, from a remote time, Ethiopia below Meroë could never have formed a separate powerful kingdom, and was probably always dependent upon either Meroë or Egypt.

4. Description.—Meroë was a large island in Ethiopia, formed by the Astaboras, on the east (Atbara, Takassze), and the Napata (Upper Atbara after it enters Nubia, Zeph. iii, 10; Isa. xviii, 1), the two arms that unite to form the Blue Nile (Strabo, xvii, 821). See Nitis. It is mountainous, but fruitful (Heliod. Ethn. x, 8), and its chief city is also called Meroë. This has been from antiquity the seat of a priesthood with an oracle of Jupiter Ammon (Herod. ii, 29), and a trading-place for the negroes (Diod. Sic. i, 38; ii, 5 sq.; Plut. Cleob.; Ptol. iv, 8). It is noted by the ancients as remarkable for the fact that here the sun casts shadows part of the year southward and part northward (comp. Strabo, ii, 155 sq.; Pliny, ii, 76; Lucan, x, 300, 305, etc.; some think this is referred to in Isa. xvi, 1; Zeph. iii, 10). The city lay in the northen extremity of the island (seventy thousand paces from the entrance, i.e. the southern extremity—Pliny, vi, 35), five thousand stadia from Syene (Strabo, ii, 114; comp. Pliny, ii, 70), and ten thousand from Alexandria (Strabo, ii, 114). The city of Meroë had gained control of the whole island, and sent colonies of priests to Upper Egypt to settle Thebes and Ammonium. In its flourishing period this kingdom was exceedingly powerful (Pliny, vi, 85), and was inhabited by farmers, shepherds, and hunters (Strabo, xvii, 821). Deserts of sand surrounded it (ibid.). The priesthood retained power until the third century before Christ, when it was overthrown by a king Ergamenes (under Ptolemy Philadelphus). Thenceforward the power of the city seems to have declined; it disappears from the view of Western writers, and not until the time of Augustus do we begin to hear sparse, and on some points contradictory, accounts of a city somewhere in that region, under queens who bear the common name of Candace (comp. Pliny, vi, 35; Dion Cass. liv, 5; Euseb. H. E. ii, 1). But Meroë was deserted, a few houses only remaining. Modern travellers have striven to find its site, and it is identified with some probability as the ruins almost twenty miles north-east of the Nubian city Shendi, in the Dar el-Atbara, a district near Assur forming a peninsula, between the river Atbara, the Nile (Bahr Assarak), and the river Rahad. (See Russegger's Charte von Nubien, in his Rel., and ii, 476, 480 sq.; Bruce, Travels, iv, 542 sq.; Burchhardt, Travels in Nubia, p. 273 sq.; Rumph, Arab. p. 114, 305, with plate; Caillaud, Travels in Upper Egypt, i, 181, 182, 184, 4 voix, with plates; Hoskins, Travels in Ethiopia, Exhibiting the State of the Country under the Dominion of Meroë [Lond. 1855], with plates.) This supposition is confirmed by the records of distances left by the ancients, for from Syene to Assur the caravan road is 564 English miles by Russegger's account, 569 by Hoskins's, while the ancient reckoning is equivalent to 568 or 590 English miles—an unimportant difference. So the distance from the beginning of the island to the city was 60 miles (see above), and Russegger found the distance from Assur to the mouth of the Atbara 55. Hoskins 50 miles. See Ludolf, Comment. Hist. Ethn. p. 88 sq.; Delisle, in the Histoire de l'Académie des Sciences in 1704, p. 365 sq.; Tschacke, Ad Met. III, i, 256 sq.; Manner, x, i, 182 sq.; Heeren, Ideen, ii, i, 352; Forbiger, Handb. ii, 814 sq.; Smith, Dict. of Class. Geog. s. v. "Meroë." See Ethio. 

Sebak. See Thicket.

Sebald, Sr., a legendary wonder-worker of the Romish Church, said to have been the son of a Danish king, or, by another tradition, of a peasant. He began his studies at Paris before he was fifteen years of age, and after five years was married to the daughter of the king Dagobert, from whom, however, he separated with her consent after the lapse of a single day, in order to become a hermit and practice a rigid asceticism. After ten years he made a pilgrimage to Rome, and received authority to preach from pope Gregory II. While on the way to Germany he miraculously delivered St. Willibald from death by starvation, and after reaching Bavaria, where he was received with great honor and went to the churches, and settled near Nuremberg as a hermit. The date of his death is uncertain, being given as A.D. 801, 901, or 1070. He had directed that his body should be laid on a wagon drawn by four bullocks, and buried where the cattle should come to a stop. The place so indicated was before St. Peter's Chapel at Nuremberg, where, according to popular tradition, a church was built into a church, took his name. Many wonders were wrought by his lifeless body, in consequence of which he was beatified by pope Gregory X, and canonized by Martin V (1425), while the town of Nuremberg chose him for its patron saint. The 19th of August is set apart for his commemoration. A rich and artistic monument by Peter Vischer, erected to his memory, may be seen in the Church of St. Sebaldus, at Nuremberg.

Se-Baptists, a small and obscure sect which struck off from the Brownists (Independents) early in the 17th century. They received their name from the act of their leader, John Smith, of Amsterdam, in baptizing himself, and in maintaining at several places the right to be declared for the principles of the Baptists. Upon this he left Amsterdam and settled with his disciples at Ley, where, being at a loss for a proper administrator of the ordinance of baptism, he plunged himself and then performed the ceremony upon others. The Se-Baptists maintained that it is lawful for every one to baptize himself; and the Samo-Sybaritic (as a small, Russian sect of self-baptizers) give as a reason that there is no one on earth sufficiently holy to administer the ordinance right. See Blunt, "Dict. of Sects," s. v.; Gardner, "Faiths of the World," s. v.

Sebastè. See Samaria.

Sebastian, Sr., a Christian martyr under Dioclétian, was born at Narbonne, in Gaul, and educated at Milan. Although a Christian, he entered the Roman army, concealing his religion, with the view of being enabled by his military status and professional capacity for成效. He rose to high favor under Dioclétian, and was made a member of the emperor's guard. At length he was informed against, and Dioclétian used every effort to induce him to renounce the Christian belief, but in vain. He was condemned to be put to death by a troop of Mauritian archers, who transfixed him with arrows and left him for dead. Some Christians coming to the place of execution to bury him found signs of life remaining, and he was removed to the house of a Christian lady, Irene, and recovered. He would not yield to the persuasions of his friends to remain in seclusion, but intentionally placed himself in the emperor's way. Dioclétian condemned him to be beaten to death with clubs in the amphitheatre, and his body was flung into one of the sewers of the city. According to the Acts of Martyrdom, it was discovered by means of an apparition, and carried by a Christian lady, Lucina, to the catacomb which is still called by his name. The day of his martyrdom was Jan. 20, 288, but by the Greeks the feast is held Dec. 20.

There is another saint of the same name, who is said to have suffered martyrdom in Armenia.

Se'bát, or rather Shkhat (Heb. Shébāt, שְׁבָט, a rod or tribe; Sept. Σεβατός), the fifth month of the Jewish civil year, and the eleventh of the ecclesiastical year, from the new moon of February to that of March; or, according to others, corresponding to our January. See Month. The name is substantially the same in the Syriac and Arabic. The Jews began in this month to number the years of the trees they planted, the fruits of
which were esteemed impure till the fourth year (Zech. i, 7). See Calendar, Jewish.

Sebun, in Japanese mythology, is a feast of puri-
ification and of expelling the evil spirit, which is done short of before the advent of the new year. This festi-
vale also serves as the date for the settlement of semi-
annual payments.

Sebrita (סְבְרִיתָה), or imaginary readings, is a tech-
nical term of the Masorites to denote that words in the
Bible ought to be read so and so, but they are not. This
expression is derived from סבּר, סבר, "to believe,
think;" thus we read in Dan. vii, 25 סבּר, סבר, and he thought, and in the Chaldee paraphrase on Prov. xiv, 12,
there is a way which is right in the view of man," we
read there is a way which man imagines (סְבְרִיתָה),
etc. Now there are a number of such imaginary or
supposed readings to be found in the Hebrew text of
the Old Test., as the following examples will prove. Thus we read:

יָם, there, is said to stand eight times for יָם, as in Gen. xix, 25; xxvii, 8; Lev. xviii, 29, etc.

יָם, thousand, is said to stand four times for יָם, as in Exod. xxxii, 25; Jud. iv, 16, etc.

וַיְכַלֶּר, and he said, is said to stand twelve times for וַיְכָלֶר, "and they said," as in Exod. xiv, 25; Numb. xxxii, 25, etc.

וָלוֹת, into the land, is said to stand five times for פָּלוֹת, as in Gen. xiv, 25, etc.

לָשְׂנָה, a wife, stands three times for לָשָׁנָה, "for a wife," as in 2 Chron. xxii, 6; Ezra ii, 61; Neh. vii, 68.

לָשָׂנָה, which, stands four times for לָשֶׂנָה, "which," Exod. xiv, 13; Lev. vii, 36, 38; Numb. iv, 49.

לָשָׂנָה, which, stands ten times for לָשֶׂנָה, "which," Deut. xvi, 10; xxiv, 8; Josh. ii, 7; xiii, 8; xiv, 2; Jer. xxiii, 21; Isa. li, 13; Hos. viii, 12; Jonah i, 14; Hag. i, 12.

לָשָׂנָה, thou, stands three times for לָשֶׂנָה, "now," as in 1 Kings i, 16, 20, etc.

לָשָׂנָה, from it, stands six times for לָשָׂנָה, "from her," as Lev. vi, 8; xxvii, 9; Josh. i, 7; Judg. xi, 34; 2 Kings xvii, 39; 1 Kings xxii, 48. לָשָׂנָה, upon, stands nine times for לָשֶׂנָה, "unto," as Gen. xxxi, 13; Josh. iii, 1; xiii, 16; Judg. vii, 22.

לָשָׂנָה, upon, stands twice for לָשָׂנָה, "with," as Gen. xxx, 40; 1 Sam. xx, 8.

Without enquiring upon this list, we will remark for those interested in that subject that these יָם are given in alphabetical order by Fréer in his Maso-
rote Magna: the first part is entitled Massoreticisches Wort-
tuch, p. 369 sq. See Buxtorf, Tiberius, p. 257 sq.; Levi-

Sebonde (or de Sabunde), RAIMOND, a Spanish
philosopher, was born at Barcelona during the 14th cen-
tury; but his life is little known. He practiced medi-
cine at Toulouse in 1430, and his death is placed in 1432. He
wrote, besides several MS. works, Theologia Natural-
is (Deventer, 1487, fol. and later), in which he sets forth the
dogma of Aquinas after the manner of Raimond
Lully. The work was translated by Montaigne (Paris,
1569, 8vo). Of Sebonde’s other essays, the principal is
entitled De Natura Hominis (Cologne, 1501, 4to), an
abridgment of the Theologia Naturalis. See Hoefer,

Sebraee, GOTTLEB, a minister of the Methodist
Episcopal Church, was born in Prussia, Nov. 8, 1833,
and came to the United States in 1832. He soon after was
converted, and began to preach in 1836; but his health
failing, after filling three or four appointments, he retir-
ed from the active ministry and settled near Red
Wing. He died, from the effects of a fall from his
wagon, June 8, 1876. He was a member of the North-
west German Conference. See Minutes of Annual Con-
ferences, 1876, p. 154.

Sebuah. See Sebuans.

Sebuans, the name given to the second of the four
Samaritan sects named by Ephinius, the other three
being the Essenes, Gortaeans, and Dositheans. It was
Sebbothan, Eduboth in Sebubah; and perhaps these sects
saw their own convenience, and partly through hostility to the
Jews, kept the sacred festivals at different periods from
them—viz. the Passover and Pentecost in autumn, and the
Feast of Tabernacles in the time usually allotted for the
Passover. This sect was not permitted to worship along
with the other Samaritans in the temple on Mount Gerizim, in light of their Horei Custodes, considers them to be identical with the Sebuans.

Sect 'ca'ah [many Sect 'ca'ah] (Heb. Sekkukah, יִשְׂכָקַע, thicklet; Sept. Σεκκοκα v. αἰσθανατός; Vulg. Seckachor, or Sickachach), one of the six cities of Judah situated in the
Midbar (“wilderness”), that is, the tract bordering on the
Dead Sea (Josh. xxv, 61). It occurs in the list be-

中间 Midian and Osh-Nibusan. It was not known to
Eusebius and Jerome (Onomast.). From Sinjih, among the
highlands of Transjordan, near Seilan, Dr. Robinson
saw a place called Sekkakah (Bib. Res. ii, 81, note); but
this locality is, of course, out of the question. The
place possibly corresponds to the site of Kurr Astar, one of
two ruined towers on Wady Khrureen (Robinson,

Secchi, GIOVANNI BATTISTA, called Il Caravaggio, an
Italian painter, born at Caravaggio in 1619. He left
several important works at Milan; among them are,
Adoration of the Magi, and a Pietà.

Secession Kirk of Scotland. See Presby-
terian Churches; United Presbyterians.

Secshii'as (Σεκσιας, Σεκσιας), Apocryphal
forms of the Heb. name Secshaniy (q. v.); namely,
(a) the father of Lettus (1 Esdr. viii, 29), or rather of
one whose name has dropped out of the text (Ezra viii,
3); (b) the “son” of Jezeluo (1 Esdr. viii, 32) or Jaha-
ziel (Ezra viii, 5).

Sε'chu (Heb. with the art. ἴσσεχος, ἴσσεχος, the
watch-tower, implying that the place was on or near an
elevation; Sept. Σεχα v. Σεχα, a region in Ramah,
containing a famous well (or rather cistern, ἴσσος), which
Saul passed while in pursuit of David (1 Sam. xix, 22),
"Assuming that Saul started from Gibeah (Tuleil el-
Ful), and that Nebi Samwil is Ramah [?], then Dir
Nebellah (Kefar Nebellah), alleged by a modern trav-
eller (Schwarz, Palest, p. 127) to contain a large pit,
would be in a suitable position for the great well of
Sech. Schwarz himself (p. 157) would identify it with
Askar, on the south-east end of Mount Elai, and the
well with Jacob’s Well in the plain below; and Van
de Velde (8, and ii, 53 sq.) hesitatingly places it at
Skibh, in the mountains of Judah north-east of Heb-
ron; but this they are forced into by their respective
theories as to the position of Ramahaim-Zophim" (Smith).
Sech is perhaps represented by the present Khurrah
er-Ram, which still contains a cistern (Robinson, Later
Res. p. 287), and lies near er-Ram (Ramah) directly on
the road from Tuleil el-Fil (Gibeah of Saul).

Sechuana Version. The Sechuana occupies a
prominent place in the great Caffre family of lan-
guages, and is the most important of all languages of South-
ern Africa. The first portion of the Sechuana version com-
mitted to the press was the Gospel of St. Luke, printed at
Cape Town in 1831, under the personal superinten-
dence of Mr. Moffat. In 1841 the whole New Test. was
printed at Sebuah, under the direction of the British and
Foreign Bible Society, under the eye of the translators.
From that time on Mr. Moffat devoted himself to the
translation of the Old Test., which was completed in
1859. A revision of the entire Bible was commenced in
Second-first Sabbath (Σάββατον δευτερο-$\pi\omega\rho\sigma\varsigma$); Vulg. Sabbatum secundum primum; A.V. "second Sabbath ("after the first")") is not found anywhere in Luke vi, 1, and apparently coined for the occasion, as the compound adj. δευτερο-$\pi\omega\rho\sigma\varsigma$ is found nowhere else in all the range of Greek literature. The learned have therefore been greatly divided, or, rather, in doubt, as to its meaning, since it is in itself quite vague and ambiguous. The earliest opinion is that of Eusebius (Hares. i, 30, 51), followed by Isidore of Pelusium (iii, 110), Suidas (s.v. Σάββατον), Theophylact (ad loc.), and cited among later writers by Petavius (i, 61) and Scaliger (Emend. Temp. vi, 551), viz. that the Sabbath thus indicated was that which immediately succeeded the Paschal festival; for (argue they) the "morning after the Sabbath" (i.e. Passover) is the point from which the law orders the seven weeks to be reckoned till Pentecost. Hence all the weeks and Sabbaths of that interval are designated from this name (общею $\pi\omega\rho\sigma\varsigma$) δευτερο-$\pi\omega\rho\sigma\varsigma$ του $\Pi\alpha\sigma\varepsilon\gamma\omega$, i. e. the number of the other, or first-fruits presented as a wave-offering. This is the view embraced by most moderns, quoted in detail by Wolf (Curta in N. T. i, 619 sq., where several arbitrary opinions by various authors are likewise enumerated); see also Köcher (Auctaeol. ad loc.), Russ (Harmon. Evangel. p. 639 sq.), Marsh (Notes to Michaelis’s Intro. ii, 61). The circumstances of Luke’s narrative indicate that the first Sabbath (as is shown by the verse which in the Greek is the second) was reckoned the first Sabbath after the second day of unleavened bread, for that usually fell within the Passover week; whereas our Lord, on the occasion referred to, had evidently left Jerusalem at the close of the entire festival, and was on his way back to Galilee. Nor would this have been a natural and appropriate term for such a day, since that would rather have been a “first after the second” (πρωτο-$\delta\epsilon\nu\tau\iota\rho\sigma\varsigma$), if, indeed, it could have been called second at all, seeing it either was simply, or else preceded, the first Sabbath of the series of seven between Passover and Pentecost. It seems rather to have been the first of that series, but the second after the beginning of the Paschal week; which circumstance affords a simple and appropriate explanation of the compound name. That the incident in our Lord’s history occurred at that season is evident from the fact that the grain stood ripe, but unreaped, in the fields; and a comparison of the evangelical narratives makes it likewise clear that the event took place in the state of John states (v, 1) that Jesus attended that year at Jerusalem was the Passover. If this collocation is correct, the Sabbath in question could not well have been the one occurring during the Paschal week, as that is a matter of the pool of Bethesda. The only mode of escaping this conclusion is by the unnatural supposition that the former “Sabbath” was merely the Passover-day itself, which, as some claim, is metaphorically thus named in a few cases (Lev. xxxii, 11, 15; comp. Josh. vi, 11). See Mayer, Commentar. ad loc., Hase, Leben Jesu, 142; H. M. Clever, Early Review of Antiquities. See the monuments De Sabbato Deutero prophetae, by Muller (Rost. 1665), Goloner (Vitae s. a.), Van Til (L. B. 1708). See Passover; Pentecost; Sabbath.

Secret. See MYSTERY.

Secret Discipline (Lat. ocraei disciplina), a term used to signify a practice of the early Christian Church of performing the rites of religion with secrecy. It was founded upon the words of Christ, “Give not that which is holy unto the dogs,” etc. (Matt. vii, 6), and began to be common shortly after the middle of the 2d century. The first aim of the observance was to guard the more sacred and mysterious doctrines from popular misconception and blasphemy among the pagans. The discipline of the secret appears in several forms: (1) Both unbelievers and catechumens were
SECTS, CHRISTIAN

499

DISMISSED from the church, when the ordinary service was closed, by one of the deacons, who said, "It, misa est," "the assembly is dismissed." After this the sacrament was administered. (2) The lectures addressed by the presiding teacher to the body of catechumens in general were confined to the general doctrines of Christianity. The more mysterious doctrines, those which regarded the sacraments of baptism and the eucharist, were not treated in public, but communicated in certain interviews at the close, and to those only who had undergone the preliminary probation. (3) The eucharist, if referred to at all in the presence of the uninstructed, was spoken of in words so conceived as to conceal its nature. Some very curious examples of this concealment might be cited—e.g. Epiphanius, referring to the formula "this is the bread of life," says for the Arians, "(Tois aîst troi'tōt). The mysteries thus specially guarded were baptism, the unction, or chiasm ordination of priests, the Lord's supper, liturgy, the knowledge of the Holy Trinity, the Creed, and the Lord's Prayer. See Coleman, Christ. Antig. p. 85. See ARCA ANCTA DISCIPLINA.

SECRET OF THE MASS, a prayer in the canon of the mass before the preface, and having much the same tenor as the postcommunion; it is said in a low voice by the celebrant after the Orate fratres. In France it was marked with the mystic letters V. D. St. Gregory calls it the Canon of the Secret. According to some writers, it represents that the working of God in the holy communion passes man's understanding; but, as Cramer explains it, Christ's secret is revealed to Him who would be found the Lamb of God before his passion. The bells in England were forbidden to be rung during this service in 1701. The secrets were formerly called super obliqua and may have taken their name from the secretions of gifts and oblations.

SECRET, any prayers said secretly and not aloud. Anciently, at the commencement of the divine office, the Lord's Prayer and Hail Mary were said silently, as also other portions of the same office. But this rule was abolished in the English Church during the changes which took place three centuries ago, though it still obtains in the Latin communion.—Lee, Glossary of Liturgical Terms, s. v.

SECRETARIA, a name given to the sessions of the councils in the early Christian Church because they were held in the secretarium (q. v.).

SECRETARIUM (or SACRERIUM), a part of early Christian churches, which was also called diocesum (q. v.). It was called secretarium, as Dugange conjectures, because the consistory or tribunal of the Church was here kept, the secretum or secretariwm being a known name for the courts of the civil magistrate. Others suppose it derived its name from its being a place of safety, or the robing-room of the officiating clergy.

SECRETARIUS (1), the confidential correspondent of a bishop, abbot, head of a college, or other ecclesiastical dignitary. (2) A sacristan or sexton.

SECT [in Biblical usage] (ἀδεργος, i. e. division; hence "heresy," Acts xxiv, 14; 1 Cor. xi, 19; Gal. v. 20; 2 Pet. ii, 1), a religious party (Acts v, 17, etc.) hence discord (1 Cor. xi, 19, etc.). Among the Jews there were several sects mentioned in the New Test., distinguished by their practices and opinions, yet united in communion with each other and with the body of their nation. See Sects, Jewish. Christianity was originally considered as a new sect of Judaism; hence Tertullus, accusing Paul before Felix, says that he was chief of the seditious sect of the Nazarenes (Acts xxiv, 5); and the Jews of Rome said to the apostle when he arrived in that city that, "as concerning this sect, we know nothing where it is spoken against" (Acts xxvii, 22). Peter (2 Pet. ii, 1-10) foretells that false teachers should arise among them "who privily shall bring in damnable heresies [or sects], even denying the Lord that bought them, and bring upon themselves swift destruction." He adds that these people, being great lovers of this world, are not afraid to introduce new sects, where the word sect is taken in the same sense as heresy. See HERESY.

Among the Greeks the philosophers were divided into different sects; as the Academics, the Stoics, the Peripatetics, the Cynics, the Epicureans, etc. The Jews, in imitation of the Greeks, began to divide themselves into sects about the time of the Maccabees; and it seems as if the Corinthians had a mind to introduce something like this into Christianity when they boast- ed, I am a disciple of Peter, I of Paul, I of Apollos (1 Cor. i, 12; iii, 22, etc.). See DIVISION.

SECT [in ecclesiastical usage] (Lat. secta, cut off), a collective term comprehending all such as follow the doctrines and opinions of some divine, philosopher, etc. By the Roman Catholic Church it is applied to all those religious bodies which separated from her communion. By Protestants, generally, it is employed in no opprobrious sense to signify the various organizations into which the Protestant churches are divided. Separate organization rather than difference of opinion is the meaning conveyed by the term; for great and known differences were followed by division and breach in the society, are not considered as constituting distinct sects. Thus High and Low Church are only called parties, because they have not formed separate communions. Among the Jews the term was differently understood, for among them there were no separate communities erected, if we except the Samaritans. The same Temple and the same synagogues were attended alike by Pharisees and Sadducees. They were often of both denominations in the Sanhedrin and even in the priesthood. Another difference was, also, that the name of the sect was not applied to all the people who adhered to a man's opinions, but solely to the men of eminence among them, who were considered as the leaders of the party. There have been, from time to time, a great number of sects, separating, often on points of no importance, from some other Church organization. These are treated of in separate articles, and it will only be necessary to add here that with respect to certain sects, especially those belonging to the first centuries, we have no other information than such as is afforded by their foes, who were not always scrupulous in their theological warfare. Their statements should, therefore, often be taken with considerable allowance. See SECTS, CHRISTIAN.

SECTARIANISM, devotion or adherence to a sect, generally signifies that spirit which makes more of the sect or organization than of the cause of Christ.

SECTARIES, a term used to denote those who adhere to the same sect and maintain the same doctrines.

SECTION, the representation of a building cut asunder vertically so as to show the interior; also of a moulding or other member in architecture cut asunder so as to show its profile.

SECTS, CHRISTIAN. The various sects which have arisen in the Church from time to time are treated of under several appropriate captions in this Cyclopædia. Thus we treat, simply with the idea of sectarianism, and with the ethical and legal aspects which the question assumes in certain lands.

The word sect occurs in classical literature in (Cicero, Tacitus, etc.) in the sense of sequor, as involving the idea of separation to some leader rather than that of separation of the body. It consequently might be applied to Christianity itself at the beginning, when devotion to Jesus of Nazareth seemed to be the prominent trait of the new tendency. In a later period the
word came to signify separation, from, as if derived from secure, to cut off. This has continued to be its principal meaning to our day. Protestantism is evidently prohibited from employing the word in this sense by the fundamental principle which concedes the right to personal convictions and the free expression of beliefs; and it is a somewhat unusual term in the vocabulary of American ecclesiastism, whose occurrence in almost every instance is explained by an intimation of heresy as charged upon the ecclesiastical body to which the term is applied.

In European countries where State churches have been established the case is different. Separation there has often been regarded an odious offence, and has sometimes been construed into a separation from the State. The Pietism of the 17th century did something to break down this prejudice by revealing to the world an orthodoxy and piety superior to those of the churches, and the pseudo-enlightenment of later days likewise contributed to this end by advocating an absolute freedom of thought; but in both continental and insular Europe the term sect still carries with it a stigma, and to many minds involves the notion of heinous guilt.

In the Romish Church this term is not in general use, and is employed only as the synonym of heresy or schism. This meaning was adopted by the Reformers and developed, so that Luther regards the sect as a moral evil, and Reformed refused to tolerate any deviation from scriptural standards as understood by themselves, an apparent inconsistency whose explanation lies in the fact that these men had attained to positive convictions of truth; they saw but a single and exclusive object on which faith might lay hold, and could not conceive of diversities of view respecting that object. The unhappy Peasants' War confirmed Luther in his aversion to the idea of absolute toleration, and his influence contributed towards making sectarianism an offence against both Church and State.

The efforts of him to prevent the development of sects were, however, always counteracted by principles which underlay the ecclesiastical systems held by themselves. Not only does this apply to the principle of Protestantism, that freedom of religious belief is the right of every person, but it is shown in the results of territorialism and nationalism in the churches of Germany. The tendency of these systems is leading to the notion that the ruling prince of any territory should possess absolute power over the exercise of religion within his dominions, but that he should regard all religions as equal so long as none of them should endanger the welfare of the State. The latter system is still prevalent in all ecclesiastical power over the particular congregation. It is evident that neither of these systems was calculated to repress a tendency towards sectarianism. Another factor in the problem was furnished by the extensive changes made in the map of Europe at the close of the 18th century, the breaking-up of states and dividing of their populations insuring a more cosmopolitan character to the inhabitants of countries, and thus reacting on their relations to the Church. When, finally, it came to be understood that the only claim of an evangelical Church to recognition by the State is that its roots strike down into the faith of the people, the last barrier in the way of complete toleration was practically overthrown. The logic of the situation is clear, and a hearty acceptance of the conclusion to which it leads is delayed only by prejudice and political considerations. In most of the countries of Protestant Europe, however, grave difficulties still prevent the exercise of ecclesiastical functions by dissenting ministers, and the established churches are favored by existing laws.

The relation of private conscience to the question of sectarianism regarded as a separation from an existing Church evidently demands consideration under every ecclesiastical system. Frequent the motive which leads to the separation of an individual from his Church is not a good one: he is devoted to some specialty which the general Church does not undertake in her central services, e.g. Millenarianism, etc., or he finds too much of worldliness, fashion, regard for wealth, etc., in the Church, and too many unworthy members. Clearly, separation from a Church of Christ in which the pure Word of God is preached and the sacraments are duly administered is not allowable only in answer to the clear call of duty; and, as a general rule, separation should take place only by compulsion, as in the case of the separation of Luther from the Romish and of Wesley from the Anglican Church. On the whole subject, see Herzog, Real-Encyklop. s. v., and the literature there mentioned.

SECTS, JEWISH (Ancient). These were of two kinds, arising from the fact that the differences of opinion, sentiment, and conduct were sometimes of a theological and sometimes of a practical character; but, among the ancient Jews, so close was the connection of Church and State that all theological or philosophical views necessarily affected the civil and social relations.

1. Religious.—1. The Pharisees. These were the orthodox party, and our Lord testifies to the general correctness of their belief (Matt, xxiii, 28). Their activity in liturgical and ceremonial particulars that their excessive regard for traditional observances was betrayed. In this regard the Rabbinical Jews of modern times are their acknowledged successors. See RABBINISM, in external deportment they were scrupulously exact; but, their motive being a love of popularity and a pride of self-righteousness, they were sternly rebuked by our Lord as arch hypocrites and ecclesiastical tyrants. See PHARISEES.

2. The Sadducees. These were next in importance, and of even more aristocratic influence, but they were the rationalists of their day (Acts xxiii, 8). They are represented by inimical writers as the originals of the modern Karaites (q. v.). See SADDUCEES.

3. The Essenes. These were rather a class of ascetics or Jewish hermits, who are not mentioned in the New Testament, and are chiefly known from the description of Josephus, who at one time belonged to their fraternity. See ESSENES.

II. Political.—1. The Zealots. These are mentioned in the New Testament, and by Josephus as the violent party who contended for national rights and independence from all foreign influence. They had their type in the Chasidim of earlier and later times. See ASSIDIAN. They largely contributed to the final collision of the Jews with the Romans. See ZEALOTS.

2. The Herodians. These appear, from the slight notices of them (Matt. ii, 16, etc.), to have been the temporizing party, who favored Greco-Roman innovations. They had their originals in the apostates under Antiochus Epiphanes (Dan. xi, 35). See HERODIAN.

On the subject generally, see, in addition to the works cited under the articles on each of the above, Sararri, Drusii et Scaligeri Opacae, de Trib. Judaeorum Sectis (Delph. 1708); separately, Drusius, De Hasidismo (Franck. 1693); De Secta Judaeorum (Arnh. 1619); Sararri, De Tribus Judaeorum Sectis (Franck. 1603); Scaliger, De Tribus Jud. Heresiis (Franck. 1605); Arnh. 1619); Land, De Secta Judaeorum (Upal. 1700); Geiger, Sadducæus et Pharisaæus (Bresl. 1869); Die Etablierung des Judenemtum, in der Monatsb. f. Gesch. und Wiss, des Judenthum, Jan. 1865; Meth. Quart. Rev. Jan. 1868, p. 129.

SECTS, JEWISH (Modern). In the 17th century existed the sect of the Sabbatarians, so called after Sabbatius-Zelili (q. v.), whose apostles to Islamism, and death in 1676, did not diminish the number of his followers, but rather increased it; and as there is no calculating the obstinacy of human credulity, his followers gave out that he had been transported to heaven, like Enoch and Elijah. Notwithstanding the constant
and active opposition of the Jewish priesthood, the sect spread in all quarters, and numbered among its members men like Moses Chayim Luzzatto (q. v.). "Sabbathism," say Mimonite still exists as a sect of Judaism, though, probably, among the followers of its believers, rather supported by that corporate spirit which holds the followers of a political or religious faction together than by any distinct and definite articles of belief."

But, in the middle of the last century, an extraordinary adventurer named Jacob Frank (q. v.) organized a sect out of the wrecks of the Sabaathist party, of which we will speak now, although in the order of time an earlier sect, that of the Chasidim, ought to be mentioned. The sect which Frank organized assumed the name of Soharites or Cabalists, also of Frankists. As to the creed of this sect, it leaned towards Christianity rather than Judaism. It rejected the Talmud, but insisted on a hidden sense in the Scriptures. It admitted the Trinity and the incarnation of the Deity, but preserved an artifial ambiguity as to the person in whom the Deity was incarnate, whether Jesus Christ or Sabbat- Zebi. With the death of Frank the whole movement seems to have abated. Of greater signifi- cance are the new groups of "New Saints" or "New Israelites" or New Saints, or Pietists. The founder of this sect was Rabbi Israel ben-Kliezer Baal-Shem, also Beish, מושכל, from the initials of אֲבוֹת הַנֵּשֵׁק. As the ten- nents of these Saints, who still exist in Poland, Galicia, etc., are given in the article CHASIDIM, we can only refer to it. (B. P.)

Secular Clergy. Parish priests and all who were charged with the cure of souls were named clerics secu- lares, so called as living according to the manners of the time (seculum). They were so called in contradis- tinction to regular clergy (q. v.), who belonged to the monastic orders or religious congregations.

Secular Court, Delivering up to the. A punish- ment peculiar to delinquent clergymen. The ancient law comprises it under the name of curia tradi, and gave it to a different meaning from that which modern use and practice has put upon it. Among the modern canonists it signifies delivering a clergyman up to the secular judge after degradation, to be punished for some great fault or breach, or such crime that the Church had power to inflict. In the old law the curia has a larger sense, not only to denote the judge's court, but the corporation of any city. In this there were some servile offices: and when a clergyman was degraded for any offence and reduced to the quality of layman, he was obliged to serve the curia, or secular court, or corporation of the city, and, that many times, only in some mean office and servile condition. This was looked upon as being a slave to an earthly power, and precluded him from ever regaining his clerical dignity again, for no curial was allowed to enter the ecclesiastical state. Besides this, there was another way of delivering over delinquent clergymen to the secular court, which was when they had committed crimes such as were properly of civil cognizance; for clergymen were considered in a double capacity — as ministers of the public and as members of the commonwealth. See Bingham, Antiq. of the Christ. Church, p. 1083.

Secular Power. See Secular Court.

Secular Sermons. In Roman Catholic theolog- ical, are discourses preached at the centennial jubilee of any great religious institution. Their aim is to review the history and work of the church in question, or to rehearse the displays of divine grace manifested in and through its life. The scope of such sermons will consequently be determined in each case by the character of the solemnities of which they form part and the treatment of the theme selected will include the presentation of noteworthy features belonging to the subject, or the discussion of some religious topic which may be deduced from or il-
SECLARIISTS

The name assumed by a sect of modern unbelievers to express their fundamental tenet that the duties and interests connected with the world which we see around us are those with which alone we have any concern. The Secularists are atheists, so far as they consider the existence of a personal God an open question, for belief in which no sufficient proofs are adduced. They are pantheists, so far as they consider nature to be the Great Being. The doctrine then, of the Secularists is that if men properly use the powers of nature which are within their reach, they have no need to resort to prayer, with the view of seeking assistance from heaven. On the subject of morality they maintain that "there exist, independently of Scripture authority, guarantees of morals in human nature, intelligence, and utility." The facts and doctrines of Christianity are, of course, denied by them. Although the Secularists profess to be independent thinkers, their principles are in reality nothing more or less than the echo of rationalism and positivism among the less educated classes of thoughtful men. See Blunt, Dict. of Sects; Patrology, "Faith" of the Church, etc.

SELRALIZATION, of persons belonging to religious orders in the Roman Catholic Church, is a term which denotes the severing of the vows which bind to poverty and monastic obedience. Permission to this end can proceed only from the papal chair, and is but rarely granted. The persons affected thereby are clergymen in the higher orders of the ministry, who are thus transferred from the secular clergy, and are made to live outside of their monasteries (clerici seculari); and nuns, and the lay brothers and sisters of suppressed convents, who have taken the vows of their orders upon them, and are by this act restored to the world, though auctor voto castigata. Secularization differs from laicization, or entire dissolution of the rule imposed by the order, in that the latter absolves from the vow of chastity and makes marriage valid.

SECULAR. In the early Christian Church there existed a distinction between the clergy and laity, the latter being called not only laymen, but also βασιλικοί, "seculars" (Chrysostom, Hom. 3, in Lex.; Hom. 28 in Rom.; Hom. 35 in I Cor. xiv; Theodore, Com. in Cor. xiv, 16). See Riddle, Christian Antiquities, p. 191.

Secundians, a Gnostic sect of the 2d century, owning for their leader Secundus, "who was born," says Hippolytus, "about the same time as Pтолеmaeus," and thus was contemporary with the immediate followers of Valentine. Ireneus represents the Secundians as a branch of the Valentian school (Hieron, i, 11, 2); but, although they emanated from that school (Hippolytus, Refug. iv, 31), it seems they introduced a new system of doctrine, and as to render Secundus more properly a rival than the disciple of Valentine. Secundus placed at the head of his δόχον, whom he appears to have considered as real substances or persons, two principles, Light and Darkness. He divides the Ogdoad into a pair of Tetradas, a right and a left Tetrad, or Light and the other Darkness" (Tertullian, Adv. Valens, 38). This admission of the principle of dualism constitutes an essential difference between the Secundians and the Valentinians. It is evidently borrowed from the Oriental philosophy, and brings the Secundians so far nearer the Manicheans. Accordingly, Homer classed the dualism whose chief character was predominantly physical, the Ophites, Saturniunus, Secundus, and subsequently the Manicheans; as adherents of pantheistic Monism, Valentinus and his widespread school, especially Heracleon his contemporary, Ptolomeus, and Marcus (Person of Christ, i, appendix, p. 448). There is also mentioned as a distinction between the Secundians that the latter did not derive the power Acharnian from any one of the thirty ἔων, but from the fruits which issued out of their substance (Tertullian, ut supr.). He invented first four more ἔων, and then four in addition (Pseudo-Tertullian, xiii). The Secundians were Docetists. Augustine (Heres, xiii) and Auctor Faenitini (xii) charge them with gross immorality. The latter adds that they were condemned by Diodorus, bishop of Crete.

Secundinus, the name of two persons in the early Christian Church. 1. A Manichean of Africa, who wrote against Augustine because of his departure from that heresy. Augustine replied to him, under date of about A.D. 405, in the tract Contra Secundum Manichaeum, iii, i, showing why he had embraced orthodox views, and confuting the Manicheans from the letter of his opponent (Migne, Patrologiae, xiii, Op. Augvst. p. 578). 2. A son of the Lombard Restitutus and Darea, a sister of St. Patrick. He lived in Ireland from A.D. 488, and died at the age of seventy-five, in 550. Secundinus was bishop of Domnah, and composed an ode on St. Patrick during the life of the latter, which was long on the lips of the Irish. It is given in Migne (Patrologiae, lxi, 888). Immediately after having composed the above ode, he died, thus verifying a prediction of St. Patrick. See Thomas of Domnah, cited at Dublin, God's Sacrament, March 17, p. 528 sq., in the life of St. Patrick.

Secundus (the Lat. word Grecized, Σεικονιας), a Christian of Thessalonica, and one of the party who went with the apostle Paul from Corinth as far as Asia (ἀπὸ τοῦ γῆς Αἰγίας), probably to Troas or Miletus (all of them so far, some farther), on his return to Jerusalem from his third missionary tour (Acts xx, 4). A.D. 55.

Secundus (heretic). See Secundians.

Securtas, in Roman mythology, was a personification of security, represented on coins as a quietly grazing mare, with the nether limbs crossed, the left elbow braced against a column, and the right hand placed over the head. She is furnished with a spear, a cornucopia, and an olive or palm branch.

Sedefci'as (Σεδεφκας), the Grecized form of the Hebrew name Zedekiah (q. v.), applied in the Apocalypse to two men: 1. A person mentioned (Bar. i, 1) as the father of Josiah, himself the grandson of Bahuch, and apparently identical with the false prophet Zechariah in Jer. xxix, 21, 22; 2. The "son of Josiah, king of Judah" (Bar. i, 8), the Zechariah under whom Jerusalem was destroyed by the Babylonians.

Seder Olam (סדר עולם), or the Succession of the World's History, is an ancient Jewish chronicle, written by R. Jose ben-Chalaffa, of Sepphoris, who flourished about A.D. 100-150. In thirty chapters it professes to give the history of Israel up to the time of the author, or rather to the termination of the last Jewish war under Bar-Nachoche, in the close of the first century. Some omissions, which, in part, are compensated by another historical work which bears the same title, but, in contradiction to the Seder Olam, or the Seder Olam Rabba (סדר עולם רבה)=the Major Chronicle, it is designated the Seder Olam Zutta (סדר עולם זוטא)=the Minor Chronicle. The best edition of the Seder Olam is that by Meyer (Amsterdam, 1699), which appeared together with the Seder Olam Zutta, a Latin

Seder Zeraim. See Mishna.

Sedá (Lat. a seat), a term used by the Latin ecclesiastical writers to denote a bishop's throne, which, with the thrones of his presbyters on each side of it, were arranged in a semicircle above the altar. Some suppose this to have been so arranged in imitation of the seats in the synagogues in which the reading to the assembly of the monides, at the upper end the law was placed in the wall in an arch, and on each side the elders were seated in a semicircle. The bishop's seat was usually covered with some decent material, suitable to the dignity of his office and person. See Bingham, *Antiquities of the Christian Church*, i, 290.

Sedes Apostolica. See Apostolical.

Sedes Impedita (a hindered see). An expression by which the early church designates the state of the papal or an episcopal office when its functions are seriously hindered or altogether interrupted by the force of difficulties from without.

1. The interruption of episcopal functions (sedes episcopalis impedita) may be occasioned (1) when outward foes (paganos or heretics) have seized the occupant of the see and carried him prisoner in which case the chapter administers the diocese, either directly or through a vicar, until the will of the pope can be ascertained (Sext. c. 3; *De Suppl. Negl. Prat.*, i, 8). (2) When a bishop is removed from his diocese and imprisoned by the government of his own country. The chapter must then immediately report the circumstance to the papal court, and until the case is decided the administration will rest in the hands of the vicar-general on the spot (comp. Philipps and Görres, *Hist.-polit. Blätter*, vol. ii, No. 3, p. 158 sq.). (3) When the bishop has been suspended or excommunicated, or when physical weakness or mental imbidity unfit him for the further exercise of his office. Since in the former case the action emanated directly from the papal chair, and that action operates to destroy the official authority of the vicar-general at the same time (Sext. c. 1; *De Off. Vicar.*, i, 15), the pope at once makes provision for the temporary government of the diocese. In the latter case an episcopal coadjutor must be appointed.

2. Papal functions are interrupted (sedes apostolica impedita) when the pope is imprisoned and prevented from administering his office, in which case as many cardinals as may be available perform its functions so far as strict necessity requires, or as the provisional directions of the pope himself may allow; or when hostile powers prevent access to the papal chair or render it extremely difficult. In this case the authority of bishops within their dioceses is extended to take such provisional action as may become necessary, but in harmony with the current practice of the apostolic chair.

Sedes Vacans (a vacant see), strictly a vacancy of the papal or an episcopal chair, since the term sedes (Σάδες) is applied only to apostolica, i.e. Roman and other episcopal sees; but it is in use extended to abbies, prelatures, and all dignities to which the right of collating to benefices belongs. For the rules which govern in the event of the vacation of the papal chair, see Cardinal Claver; Pope. This article will be devoted to the subject with reference to bishoprics only. A sedes vescus occurs by death, resignation, translation, deprivation, etc., and continues until a successor has been regularly installed. The current business of a bishopric during such interregnum was formerly administered by its presbytery, but subsequently, after the 4th century, by an officer termed Intercessor, Intervenator,visitator, or commendator. A provision was made that the see should be filled within a year, in order to prevent the seizure of the office by the temporary administrators, and also to hinder secular lords from appropriating the income of a vacant see. Still later the temporary administration was intrusted to the chapters, at first in rotation and afterwards in temporariness as well. The modern arrangement is based on the constitution of the Council of Trent and of the Congregatio Concilii. The episcopal jurisdiction during a vacancy inures in the chapter, but is administered by one or more "eccomist" and a capitular vicar, who may be the general vicar of the late bishop, and all of whom must be appointed with the consent of the body, after knowledge of the vacancy has been obtained. The capitular vicar must be a doctor or licentiate of canon law, or else possess abilities in that direction, and must be taken from the chapter if a suitable person can be found. When there is no chapter, or when the chapter neglects to appoint administrators, the metropolitan is empowered to act in its stead if the church be a suffragan church, the oldest suffragan bishop if it be a metropolitan church, and the nearest bishop if it be an exempt church. The capitular vicar is not the agent of the chapter in this instance, but administers independently; and he is not liable to be deprived of his office without sufficient reason, the determining of which does not rest with the chapter, but with the Congregatio super Negotia Episcoporum. Certain general limitations, however, restrict his action. All episcopal rights which inhere in the ordo episcopalis, or are delegated by the pope, are in abeyance during the vacancy, except as provision for their exercise is otherwise made by the curia, or circumstances compel the employment of a neighboring bishop. A year of mourning (annus luctus) is appointed, during which no orders may be conferred within the bishopric, except they become necessary to administer a benefice which has been, or is about to be, received. Nor may the capitular vicar dispense with benefices which are a part of the bishop's collation, or the income of the diocese be in any way employed, except perhaps to pay the salary of the administrator. No real estate may be transferred to other hands, and, in general, no change which might result in disadvantage to the future, bishop may be introduced. The sedes vacans ends with the installation of the new bishop, who is authorized to exact a complete account of the bishopric and its administration during the interregnum. A quasi vacans is distinguished from the sedes vacans, for which see Sedes Impedita.

On the general subject, comp. the literature given in Pütter, *Lit. des deutschen Staatsrechts*, vol. iii, § 1461; in Klüber's *Fortsetzung*, vol. iv, § 1461, p. 528, 529; *Ferraris, Bibliotheca Canonicum, s. v.*; Ritter, *Der Capitular-Vikar* (Münster, 1842); Rau, *Rechte der Domkapitel*, etc., in the *Tüb. theol. Quartalschrift*, 1842, iii, 865-412; *Huller, Die jurist. Persönlichkeit, d. kath. Domkapitel in Deutschland* (Bamberg, 1860).

Sedgwick, Obadiah, a Nonconformist divine, was born at Marlborough, in Wiltshire, England, in 1600, and educated at Queen's College and at Magdalen Hall, Oxford. He became chaplain to Lord Horatio Vere, whom he accompanied to the Netherlands. Returning to Oxford, he was admitted to the reading of sentences (1629). In 1635 he was at St. Mildred's Chapel, London; until interrupted by the bishop, and in 1639 became vicar of Coggeshall, Essex. In the rebellion he took part against the Church and State. In 1646 he was preacher at St. Paul's, Covent Garden; and, retiring to Marlborough, he died there in January, 1658. The principal of his works are: The *Fountain Opened* (1657) — An *Exposition* of *Paul's Epistles* (1658, 4to) — The *Anatomy of Secret Sin* (1660) — *Parable of the Prodigal* (1660): — Synopsis of Christianity.

Sedill (plur. sedillas), the Latin name for a seat, a term which in modern times has come to be pretty gen-
Sedile. 504  Sedilus

eraly applied by way of distinction to the seats on the south side of the choir near the altar in churches, used in the Roman Catholic service by the priest and his attendants, the deacon and subdeacon, during certain parts of the mass; or in the Episcopal Church for the priests and deacons during the eucharistic service. Sedilia were sometimes movable, but more usually in England were formed of masonry and recessed in the wall like niches. Sedilia are comparatively rare on the Continent, but very numerous examples remain in Great Brit-

ain, a few of which are of as early date as the latter part of the 12th century; but the majority are later, extending to the end of the Perpendicular style. The earliest form in the catacombs, and repeated at St. David's, was a bishop's throne flanked by collateral seats. In general they contain three separate seats, but occasionally two, or only one, and in a few rare instances four, as at Rothwell Church, Northamptonshire, and Furness Abbey; or five, as at Southwell Minster; sometimes a single seat under one arch, or formed on the back of a window, is found, long enough for two or three persons. They are very commonly placed at different levels, the eastern seat being the step the highest and the western the lowest; but sometimes, when three are used, the two western seats are on the same level, a step below the other, and sometimes the two eastern are level and the western a step below them. The decorations used about them are various, and in enriched buildings they are occasionally highly ornamented, and sometimes sur-
mounted with tabernacle-work, pinnacles, etc. Some ancient sedilia consist of plain benches formed of masses of masonry projecting from the wall, and it is not improbable that such may have once existed in some of the churches in which no traces of these seats are now to be found. At Lenham Church, Kent, is a single seat projecting considerably from the wall (though the back is slightly recessed), with stone elbows resembling an arm-chair; this is popularly called the confessional. At Beckley Church, Oxfordshire, is also a single stone seat with one elbow.

Sedilia. 504  Sedilus

Sedile, Lenham, Kent.

Sedition. In the early Church, kings and emperors were looked upon as political parents, whose authority and majesty were reputed sacred and supreme under God. All disloyalty or disrespect in them, either in word or action, was always severely chastised by the laws of the Church. For the first three hundred years, Christians gloried over the heathens in this, that though the emperors were heathen, and some of them furious persecutors of the Christians, yet there were never any seditionists or disloyal persons to be found among them. The fourth Council of Carthage forbids the ordination of any seditious person. The fourth Council of Toledo orders all clergymen who took up arms in any sedition to be degraded from their order, and to be confided to a monastery to do penance all their lives. See Blingham Antiq. of the Chris. Church, p. 985 sq.

Sedlnitzsky, Leopold von, formerly prince-bishop of Breslau, was born July 29, 1787, at Gepersdorf, in Austro-Silesia. Appointed for the Church, he was educated accordingly, and in 1798 the cathedral chapter of Breslau already nominated him as dean. In 1804 he commenced his studies at the Breslau University, where ex-Jesuits or their pupils were his teachers. In 1808, Sedlnitzky (not Sedlnitzky, as Dr. Kurtz has it) was made provost of the chapter, and in 1835 prince-bishop. In the different positions which Sedlnitzky occupied, he had the best opportunity of seeing the doings of the hierarchy. A rupture with the see of Rome became finally a mere question of time, and on May 9, 1840, he resigned his bishopric. Frederick William IV, then king of Prussia, appointed him as member of the council of state, and thus he was obliged to take up his abode at Berlin. He now studied Church history and symbolism. The authority of the councils lost its power with him, as not founded upon the Holy Scriptures. He saw that the faith in the free grace of God in Christ, and not the episcopal government, was the uniting link of the Church. At first he attended the divine service of his Church, but this he soon abandoned, and listened to the preaching in different evangelical churches. He had a great desire for the Lord's supper, and it was a great pain to him to be deprived of this communion with the Lord and the brethren. After many hard inward struggles, he resolved in 1808 to join the evangelical Church, and in the church of Friedrich Werder he partook of the Lord's supper. From his own means he founded two institutions at Berlin—the Paulinum in 1862 and Johanneum in 1864—for both the education of teachers for the school and Church. In Breslau, also, he founded an institution for evangelical students of theology. Sedlnitzky died May 25, 1871, being the first Roman Catholic bishop who after the time of the Reformation became a convert to the evangelical Church. See Kurtz, Lehrbuch der Kirchengeschichte (1874), ii, 262, especially the autobiography of Sedlnitzky, which was published in 1872, and which is an important contribution to modern Church history. For a review of this biography, see Hauck, Theol. Jahresberichte, 1871, vii, 700 sq. (B.F.)

Sedilios, Caius Coelius (or CæliuS), a priest and Christian poet in the reigns of Theodosius II and Valentinian III. Little is known respecting his parentage and life. He is said to have taught philosophy and rhetoric in Italy, and to have subsequently become a priest in Achaia, and ultimately a bishop. The year of his death is not known. He obtains recognition chiefly as the author of a number of religious writings, among
them the hexameter poem Carmen Paschale, etc., in which Old-Test. miracles, the miracles of Christ's life, and finally his death, resurrection, and ascension, are treated—until the whole to the heretical views of Arian and Sabellian. Various editions of this poem have been published—by Cellarius (1704), Gallandi (1773), and others, the latest edition being by Arevalo, or Aurival (Rome, 1794). In response to the request of the priest Macedonius, Sedulius translated the work into prose, and called it Ostius Paschale. Two other hymns are also attributed to him—namely, Eligia, or Colloquio Veteris et Novi Testamenti, and A Sofia Ortus Ordine, an acrostic on the life of Christ which is sometimes called the Abecedarius.

Sedulius, Scotus (or Junior), a Christian writer of the 8th century, of whose works we possess, Collectarum in Granes Epistolae S. Pauli (first published at Basel [1528]), and afterwards in the Bibliotheca Max. [Lugd., 1677] tom. vi.:—some exegetical labors on the first three Gospels published by cardinal A. Mai in the Scripturum et Veterum Collectio Nova, tom. ix.—and a political and religious work entitled De Rectoribus Christianis et Constantiades Regulae. Gustavi F. Poggii Publicae季ride Quinze лет (first published at Leipzig in 1619). The MS. belonged to the library of the Heidelberg University, with which it was taken to Rome in 1622, and has been admitted into the Speculum Romanum Vitaeclam (Rom. 1839–1844), tom. x., of cardinal Mai. In tom. vii. of the latter work may also be found Explanations of the Commentationes S. P. Ioannis Evangelistae by Sedulius. Comp. Dictionnaire Historique et Critique, par Pierre Bayle (Rotterdam, 1720), tom. xxx., p. 2562 sq., Biog. Universelle (Paris, 1825), tom. xii., p. 436 sq.

See (properly נָבָי, nāḇā; idōb.), a term used in Scripture not only of the sense of vision by which we perceive external objects, but also of inward perception, of the kind of spiritual or supernatural sight of hidden things—of prophecy, visions, ecstasies. Hence it is that those persons were formerly called seers who afterwards were called Nabi, or prophets, and that prophecies were called visions. See See.

The verb to see is Hebraistically used to express all kinds of sensations. It is said (Exod. xx, 18) that the Israelites saw voices, thunder, lightnings, the sound of the trumpet, and the whole mountain of Sinai covered with clouds or smoke. To see good, or goods, is to enjoy them. "I believed to see the goodness of the Lord in the land of the living" (Psa. xxvii, 19), i.e, I hope that God will come back into my own country, into the land of Judea, where I shall live in peace and prosperity. Job says (vii, 7), "I shall die, and see no more; I shall no longer enjoy the good things of this world." The psalmist says (Psa. iv, 6), "There be many that say, Who will show us any good?" that is, to enjoy any happiness in this life.

By an easy metaphor from this, to see the face of the king is to be of his council, his household, or to approach him. The kings of Persia, to maintain their respect and majesty, seldom permitted their subjects to see them, and hardly ever showed themselves in public. None but their most intimate friends or their familiar domestics had the honor of beholding their faces (Esth., 4, 10, 14). Frequent allusion is made to this custom in Scripture, which mentions the seven principal angels that see the face of the Lord and appear in his presence (Rev., i, 4).

See (Lat. sedes, a seat), the seat of the bishop's throne, and used also to denote the whole extent of his episcopal jurisdiction.

See, Apostolical. This term, under the full form of "holy apostolical see," is now used to designate the jurisdiction and power of the pope as bishop of Rome. But anciently every bishop's see was dignified with the title of sedes apostolica (see Apostolical), as deriving its authority through its succession from the apostles. See Apostolical Succession. Pope Sixtus himself (Stiria, Ep., 126) gives an account of the appellation apostolica. St. Augustine, Sidonius Apollinaris, and others make no distinction in favor of the bishop of Rome. See Bingham, Antig. of the Christ. Church, p. 22, 67.

See, Andrew J., a minister of the Methodist Episcopal Church, South, was born Dec. 6, 1832, and joined the Church when about fifteen. He was licensed to preach in 1854, in the fall of which year he was admitted on trial into the Memphis Conference. He labored without intermission until his death, in 1871. See Minutes of Annual Conferences, 1871, p. 577.

See, Aristotle (Se, άριστος, ariston), the seed-time of Palestine (Lev. xxvi, 5) for grain came regularly in November and December (Lightfoot, Hor. Hebr. p. 340, 1908; Korte, Reis. p. 492). Since the harvest began in the middle of Nisan, the time of growth and culture was about four months (John iv, 36; see Luke, ad loc.). But this was certainly a very general reckoning, and perhaps had become proverbial. (In this passage the word άριστος, yet, does not seem to accord with this explanation; see also Anger, De Temp. Act. Ap. p. 24 sq.; Wieseler, Chronol. Synops. p. 216 sq.; Jacoby, in Studi. u. Krit., 1888, p. 868 sq.). See Agriculture.

Sowing was done by the hand, as often with us, though according to the Gemara (Babba Metz. fol. 100), the Jews were accustomed for this work to the use of the Oriel (Lev. Rab. p. 685). The seed when sown and the young plants have more enemies in the East than even here: not only drought, hail, mice (1 Sam. vi, 5), fire, but also grasshoppers and locusts (see these words), often destroy promising harvests. The following legal regulations are found in the Pentateuch:

1. Two kinds of seed, as wheat and barley, must not be sown on the same land (Lev. xix, 19; comp. Josephus, Ant. iv, 8, 20). The Talmudists (Mishna, Chialin, ii, 8) say that between two fields sown with different seeds must intervene either fallow ground or a ditch, path, or wall; but the law does not include garden hedges (ibid. iii, 1; Shab. ix, 2). Michaelis (Mos. R. iv, 320 sq.) strives to show that the lawgiver meant simply to require a careful sorting of the seed, which is recommended by the ancients as very advantageous (Virgil, Georg. i, 195 sq.; Varro, R. R. i, 52, 1), and which would render improper a sowing-wet of the land (Hort. Lat. i, 205 sq.). But this cannot be supported, and a custom so advantageous to the agriculturist did not need the authority of law. Lappenberg (in the Brem. u. Verdenesch. Biblioth. v, 957 sq.) gives a purely theological exposition of it; and perhaps other parts of the law furnish an easier explanation of this class of regulations than this one. See Divinæ. The more exact requirements of the rabbins will be found in the Mishna (Chialin, ch. i-iii).

They are very trifling, and sometimes show a disposition to evade the law; but even anciently it was not so strictly enforced as to prevent giving a field of barley a border of spelt (ibid. xxvii, 25; see marg. A. Y.). In general the land is confined to Palestine, and the Jews do not refuse elsewhere to enjoy the fruit of mixed harvests (comp. Hottenger, Hebr. Leges, p. 376 sq.; Darnov, De Modis Seminandi Diversa Semina Hebr. Vet. [Viteb, 1865]).

2. Lev. xi, 37 sq. provides that seed set apart for sowing should remain clean if the current was a creeping beast fell upon it; but if it had been wet, it should be made unclean, perhaps because wet seed takes up impurities far easier than dry (comp. the analogy, ver. 34). Similar is the law of purification in the Zendavesta (ii, 336, Kleuker), and a similar distinction of wet and dry is observed among the Arabs still (Niebuhr, Beeckh. p. 40).

By an easy metaphor, seed, as the prolific principle of future life, is taken in Scripture for posterity, whether of man, beasts, trees, etc., all of which are said to be sown and to fructify as the means of producing a suc-
Rebekah have retained the peculiar syntax of the covenant, where our translators missed the mark, in Gen. xxxiv, 60, "Those who hate him." Whether these Syrians understood the Messianic aspect of the promise, or whether, like the Sept., who did not see the ὁ πρόδρομος, they merely followed the grammar, their language confirms to the keys to the language of the thousands of millions who will subdue all His haters.

Isa. xlvi, 19, as it stands in our Hebrew Bibles, furnishes an exception to the principle laid down above. If we should attach importance to one exception, occurring in a composition highly poetical, against three-score plain examples, it is to be observed that the Sept. has a parallel in the Vulgate, and with preterites it—thus removing all difficulty in the case.

With this clue to the Abrahamic covenant, and through it to the protovangel, we arrive with precision at the unity of the seed promised there—the Ἰησοῦς that shall bruise Satan on the head. The masculine singular copied by the Sept. is twice used in that promise. He is the God of peace who bruises Satan (Rom. xvi, 20).

Seeds, a phrase indicating that tapestry, hangings, or church vestments were, for their greater ornamentation, sprinkled over at regular intervals with pearls, anciently called "seeds."

Seekers, a small sect of Puritans which arose in England in 1645, and was afterwards merged in that of the Quakers. Their followers derived much of their employment in which they represented themselves as being continuously engaged, that of seeking for the true Church, ministry, Scriptures, and ordinances, all of which, they alleged, had been lost. Baxter (Life and Times, p. 76) says of them, "They taught that our Scripture was uncertain; that present miracles are necessary to faith; that our ministry is dead and without authority, and our worship and ordinances unnecessary or vain." They and the Rationalists were promoters of the deism of England. See Hagenbach, Hist. of Doctrines, ii, 288.

Seelen, Johann Heinrich von, a German theologian, was born Aug. 9, 1688, at Asel, near Stade. In 1713 he was called to the rectorate at Flensburg, in 1715 to Stade, and in 1718 as rector to Lübeck, where he died, Oct. 29, 1762. Seelen was a voluminous writer. His most important work is his Meditationes Exercitiorum, quibus Varia Uttrixium Testamenti Loca Expendatur, oder Illustratur (Lübeck, 1780-87, 5 pts). He also wrote dissertations on different passages of the Scripture, for which he issued a handbook, Seelen, Johann Heinrich von, Handbuch der theologischen Literatur. (B. F.)

Seel-stone, a medieval mason's term for that stone which was placed on the top of a niche or tabernacle to crown and complete it. "Item, for garnishing ye seel-stone, iis. ivd."

Seely, Amos W., a (Dutch) Reformed minister, was born in New York city in 1805. He graduated from Union College in 1828, and from Princeton Theological Seminary in 1831. His ministry was spent chiefly in the Reformed Church in Western New York, and was greatly blessed in its results. He was a plain, earnest, practical preacher; a man of guileless character and tender piety. He died in 1865. He published two works which passed through several editions, Doctrinal Thoughts and Practical Thoughts. See Corwin, Manual of the Reformed Church. (W. J. E. T.)

Seelye, Edward E., D.D., a (Dutch) Reformed minister, was born at Lansingburgh, N. Y., in 1819, and graduated at Union College in 1839, and at Princeton Theological Seminary in 1843. Until 1858 his ministry was exercised in the Presbyterian churches of Stillwater, N.Y., from 1843 to 1850, and Sandy Hill, N.Y., from 1850 to 1858. At the latter date he removed to Schenectady as pastor of the First Reformed Church, where he died in 1869. Mr. Seelye's physique was tall, large,
ruled, and indicative of the best of health. His mind was vigorous, comprehensive, and direct. His preaching was orthodox, logical, scholarly, instructive, interesting, and warm-hearted. His delivery was impressive and popular. He left a valuable posthumous work entitled Bible Emblems, which has been printed by the American Tract Society, New York. See De Baun [Rev. J. A.], Tribute. (W. J. B., T.)

Seeneey, Robert, a minister of the Methodist Episcopal Church, was born Oct. 12, 1897. He graduated at Columbia College in 1817, and soon afterwards united with the Church. In 1820 he was received on trial in the New York Conference, and labored with great acceptability in its most important stations. In 1832 he was placed upon the supernumerary list, but continued to preach until he received a paralytic stroke in the left side on July 1, 1854, which was followed by a stroke upon the right side, from which he could not rally. As a preacher, Mr. Seeneey was chaste, clear, and forcible; as a Christian he was ardent, affable, and faithful. See Minutes of Annual Conferences, 1855, p. 545.

Seer is the almost invariable rendering in the A. V. of הֵדָּה, chosèh (which is otherwise translated only in Isa. xxviii, 15, "agreement;" xxi, 10, "prophet;" xvii, 15, "gazer;" Ezek. xxii, 5, 16; xxvii, 28, that see, etc.) and occasionally in Sam. ix, 22; Jer. xxvii, 3, 27; Chron. ix, 22; xxvi, 38; xxix, 22; 2 Chron. xi, 7, 10; of מִזְרָח, rôdâh; while the tantamount and technically used prophet is usually denoted by נָסִי, nabi (on the meaning and etymology of which see Hartmann, 3d Excurs. to his Uebers. d. Michna, p. 219 sq.; Paulus, Excerg. Conservat. ii, 122 sq.; and the different views of Redelob, Der Begr. d. Nabi [Leips. 1889]; Ewald, Prophet. i, 6 sq.; Hävernigg, Einlass. ins A. T. ii, 6 sq.). All the names may be applied to different persons (1 Chron. xxix, 29); and the Chronicles hold this distinction throughout—calling, e. g., Samuel rôdâh, Gad chosèh, and Nathan nabi—a distinction, to a great extent, lost in the A. V., where the first two are confounded. According to 1 Sam. ix, 9, rôdâh was the older name for prophet, and it is especially applied to Samuel; nabi is the most usual word; chosèh perhaps passed from the ritual language into that of history. It is found almost solely in Chronicles.

These words were applied, in Hebrew antiquity, from Samuel's time until after the return from captivity, to men inspired by God (comp. Amos iii, 7; 2 Poc. i, 21, by the prophet) of the prophets of the high places (1 Chron. xxiv, 20; comp. Gesen. Comment zu Is. i, 388; Theaur. ii, 742) who comprehended the principles of the theocracy, and were devoted to them, denouncing in energetic terms all that tended to undermine them; though in earlier days the name was applied to those who stood in relations of confidence with God (Gen. xx, 7; Exod. vii, 1; xv, 20, etc.). Of the activity of these prophets among foreigners but one example is given (Jonah, 1 sq.). At first they appear but occasionally, where the welfare of the people is in danger, or as counsellors of the theocratic kings (1 Sam. xxvi, 5; 2 Sam. vii, 2 sq.); but when the kingdom was divided, a wider field was open to them (2 Kings xviii, 13 sq.). As the fate of the people drew near, they raised their voices the more earnestly—rebuking now idolatry, religious affections, immorality; now the wicked and selfish government, and the false policy of the king and the grandees of the realm; now warning or threatening the thankless people with the judgments of Jehovah; now casting a glance at the nobled form of the theocracy again arising from this ruin of the national welfare and honor. Public places—markets (Amos v, 10; Isa. xxxii, 31), streets, the courts of the Temple (Jer. vii, 1; xix, 14; xxvi, 2; comp. xxix, 26)—were usually the localities of their action (xxv, 2). But they also went, though not welcome then, to the palaces of the nobles, to the nobles themselves, shunning no danger or repulse (Ezek. xii, 5). Thus their order formed a beneficial balance against the misuse of the royal power, the narrow sympathies and dulness of the priests, the untheocratic tendencies of the people themselves, and accomplished a portion of that which is explained in modern times from representatives of the people and the free press. It would be proper to call the prophets demagogous, in the original and best sense, as popular leaders (De Wette, Christl. Stützlin, ii, 32). Since in the theocracy religious and political elements were mingled, the subject and the aim of the efforts of the prophets are sometimes mingled and sometimes classed, sometimes to the other; but was never merely political, since a religious reference is found in all. Their views could not be limited to the present, but extended to the future which should succeed it (comp. Von Ranmer, Vorles. über allgemeine Gesch. i, 135; Ewald, Prophet. i, 216; 219); but such predictions were not bound to events fortunes from the present. This we learn by an unprejudiced examination of the prophecies yet remaining, and a comparison of their contents with the historical standpoint of the authors. Indeed, the minute prediction of very distant events, overleaping the immediate future, would have had no purpose for the generation then living, nor would it have furthered the interests of the theocracy as a holy community. Yet Eichhorn has pressed this view too far (De Prophet. Pos. Heb. Paralip., in the Comment. Soc. Getting. Rec. vo). The image of the future suggested by the prophets is naturally connected with the present of the author; hence we can often, as in the Chaldean period, trace a chronological progress from the indefinite and general to the definite and special. Only in one group of prophecies did they leave the relations and circumstances of their own times and direct the people to a distant ideal future, when, not satisfied with the immediate future, they speak of the Messiah and this blessed time should come to consist in the Messiah and the renewal of their kingdom under him, set forth and cherished by the prophets, which gave the religious life of the nation that new, peculiar impulse which secured them so important a place in the history of religion and of man (comp. Crussius, Bibl. Theol. p. 83 sq.; Delitzsch, Christl. Stützlin, ii, 58, sq.). The form of the prophetical representations was simple and artless; sometimes in dialogue (Jer. xxviii), yet never without the rhythm which is so natural to the rapid speech of the Orientals; never without imaginative elevation (comp. Ewald, Ausführ. Lehrb. d. Hebr. Spr. p. 136 sq.; Uebers. d. V. T. Prophet. Christs. Anth. Temp. Orph. i, 172 sq.; 196 sq.; 223 sq.; 235 sq.; 245 sq.; 259 sq., and often was poetical (Amos i, 7 sq.; Isa. v, 1). The early prophecies seem to have been accompanied by music, which was used as an aid to religious feeling (2 Kings i, 15), and all of them by energetic gestures; and often symbolic actions were connected with them (1 Kings xi, 29 sq.; Jer. xiv, 1, xvi, xxvii, xxvii, xiii, 9 sq.; Ezek. iv, vii, 8 sq.; xxiv, 3 sq.; xxvii, 15 sq.), or symbolic costume (Isa. ii, 2 sq.; comp. Staud-}
two prophets attested for their boldness with their lives (xxiv, 20 sq.; Jer. xxxvi, 20 sq.); and that Jeremiah, above all, was the object of the bitter hate and active persecution of the united court and priesthood, who supported themselves by false prophets. See JEREMIAH.

But the educated laity and the officers of state thought they had long outgrown the prophetic utterances, and that the court and the policy were too subtle for the state to become ever more worldly. Afterwards, the remembrance of the abuse offered the prophets was a sad one for the people (Neh. ix, 26; Matt. v, 12; xiii, 31; Acts vii, 52; 1 Thess. ii, 15), which was little weakened by the zeal of the later Jews to seek out and adorn the tombs of the prophets. False prophets, or orators, who for the sake of a selfish power, and even did homage to the abandoned wickedness of the times (Jer. xxiii, 14, 15; xxviii, 15), yet gave themselves out as inspired by the Divine Spirit, appear, especially in the last terrible period of the kingdom, in league with the priests (v, 13, 31; vi, 15; viii, 10; xiv, 14); and the true prophets of Jehovah not only came, at times, into open conflict with them (xxvi, 7 sq.; xxviii, 13 sq.; comp. v, 15), but spoke by inspiration against them (xiv, 13 sq.; xxiii, 16 sq.; xxvii, 9 sq.; xxix, 31 sq.; Ezek. xiii, 2 sq.; xxvi, 25; Hos. ix, 7 sq.; Mic. iii, 11).

In the law (Deut. xii, 1 sq.; xxvi, 20) false prophecy was punished with death (Schröder, De Pseudoprophet. philol., p. 323 sq.; Hahn, p. 354 sq.).

The origin of the prophets, in the meaning we have unfolded, is to be referred to the end of the period of the Judges, or to the time of Samuel (comp. Acts iii, 24), who was himself a prophet (1 Sam. iii, 20), and may be considered as having founded the order by establishing schools of prophets (comp. xix, 24), and to have pointed out its relations to the theory. The Book of the Prophets (Literatur. Anzeiger, 1818, p. 38), indeed, makes these schools of the prophets to be merely a union of helpers of the prophets in their arduous office, such as Baruch was, who, besides the study of the law, busied themselves with sacred music; but this lacks support.

Prophecy, indeed, could not be taught; and, no doubt, many of the scholars never received the inner prophetic call. But this is true now in our theological schools, yet we do not, on this account, consider them mere institutions for educating clerks, etc. Moses, in the wilderness, had given instances, in his own person, of every kind of prophetic appearance. What the kingdom of Israel wanted was that the true prophet with his school and itinerant preaching, the establishment of the prophetic nation in Palestine, and the spirit of Jehovah raised up warriors (the Shophim, or Judges), there was little need of sacred oratory (Judg. iv, 4 sq.; vi, 8 sq.; 1 Sam. ii, 27 sq.), and the people saw in their prophets simply wise men, soothsayers (hence the older name mish of prophets, which is applied even to Samuel [1 Chron. ix, 22; xxiv, 25 etc.], though he is called also nabi [1 Sam. iii, 20]), a view which prevailed up to Samuel's time (ix, 8 sq.), while even later the prophets were chiefly sought by the people as wonderful physicians and miracle-workers.

It is clear that Samuel by no means first founded prophetic schools in Hebrew, as indeed, such a spiritual movement cannot be voluntarily inaugurated among a people; but that he was led on by the establishment of royalty to impart to the prophets his judicial relation (Judg. vi, 1 and 1 Sam.). On the schools of the prophets, see Vitringa, Synag. Vet., 1, 2, 7; Buddei Hist. Rel. Vet. 1, 4, 12; Test. ii, 11; Malte-Brun, Hist. des religions 3, 10; Dies. de Scholl. Prophec. (Basle, 1701); Kahl, De Prophec. Scholl. (Göttingen, 1687); Hering, Abb. v. den Schulen der Prophec. (Bresl. 1777); Staudtin, Gesch. der Sitten]. i, 293 sq.

They existed in various cities, often which had an ancient character for sanctity, especially Ramah (1 Sam. xix, 19, 20; Jericho (2 Kings ii, 5), at Bethel (comp. xxviii, 8 sq.) and at Jerusalem (ver. 10 sq., no allusion to the Holy Land). The pupils, who were not all young or unmarried men (ver. 1), lived together (vi, 1), sometimes in great numbers (ii, 16; comp. 1 Kings xviii, 4, 13), had common fare (2 Kings iv, 38 sq.), and provided together
SEER 509 SEER

for their wants. As to the nature of the instruction, we have no particulars. Music and singing were certainly among the subjects taught (1 Sam. x. 5; comp. Fornel, Gesch. d. Mus. i., 286, 245, 248, 488 sq.); but, perhaps, more for the cultivation of noble sentiments, and for awakening inner feeling, than as an accompaniment to their exhortations.

The cultivation of lyric poetry by them cannot be altogether denied, yet the extent of it has been exaggerated. The style derived from Heth, which was the inspiration of the ancient Canaanite, was much such as was found in the Bened. Mag. vi, 38 sq.; see contra Bengel, Supplurn, ad Introd. in Lib. Psalm. [Tub. 1816] p. 5 sq.; De Wette, Comm. ub. d. Psalm. p. 9 sq., 3d ed. The chief subject of instruction was probably law, not in its details in writing, but as a great whole, a theocratic conception; and the theocratic spirit was the all of their labors. The pupils, when the impulse of the spirit came upon them, sometimes made excursions, during which others, who came near them, were momentarily influenced in the same way (1 Sam. x. 5 sq.; xix., 20 sq.); and some were employed, it would seem as a trial of them, as missionaries of the prophets (2 Kings ix. 1). The comparison of the schools of the prophets with monkish cloisters (Jerome, Ep. 105, ad Rustic. Monach. and 58 ad Psalm.) is wide of the mark (see Hering, loc. cit. 71 sq.); and if any parallel is to be sought for anything so peculiar, that with Pythagorean union (Tennemann, Gesch. der Phil., § 518, 520, 522; comp. Herder, iii. 39 sq.) is not to be supposed that all the prophets, or that the most influential of those known to us, were educated in these schools. It was open to every man or woman who felt an inward call to this office to assume the duties of a prophet (Amos viii, 14); and the prophetical inspiration often broke forth suddenly (2 Chron. xxv., 14 sq.)

There were also instances in which the calling of the prophet seemed to be hereditary in one family (1 Kings xvi, 1; comp. Amos vii, 14; on Zech. i., 1; see Rosenmuller, ad loc.). Those who had been educated by older prophets seem usually to have been consecrated to their calling by anointing or the delivery of the prophet's mantle (1 Kings xix. 16 sq.; comp. 2 Kings ii., 13 sq.); but it was the inner voice, or a vision, which directly impelled the prophets to step forward as such (Isa. vi.; Jer. i. 2; Ezek. i.). The cycle of prophetical activity was found, after the division, chiefly in the kingdom of Judah, which, at least outwardly, had remained true to the theocratic spirit; in the north there was no prophet of national influence, and after the overthrow of this kingdom, and in exile, there were influential prophets among the Jews. But in the kingdom of Israel (Eichhorn, in his Biblioth. d. Bibl. Lit. iv., 193 sq.), whose establishment the prophets had aided, or, at least, not hindered (1 Kings xii. 29 sq.), their influence was interrupted and more of a negative character. In the changes of dynasties they rarely took some part (xiv., 14 sq.; xvi., 1 sq.; xxi., 17 sq.; 2 Kings ix. 1 sq.), in which they were acted by religious views. It cannot be doubted that the activity of the prophets, in that long period, was the utmost value to the people, as a guide of spirit of the times, and the inspiration, for the most of them, has had anything comparable to them (comp. Eichhorn, preface to his 4th vol. Emlne. ins A. T.).

In this point of view, such laments as Psa. lxxxiv.; 9, Lam.; ix., 9, find their full justification. The prophetic power in the Old Testament, besides Moses (Deut. xviii., 15; xxxiv., 10), and those whose books remain in the canon, are the following, nearly in chronological order: Samuel, Gad, Nathan [see these names], the two latter under David and Solomon; Abi- jah, Shemaiah, Iddo (1 Kings xi. 29; xii. 22; xii., 4 sq.; 2 Kings xxvii., 7; xxviii., 2; xxix., 17; iii., 9; Jer. ii., 7; comp. 2 Ks. x., 4; Jer. iii., 6 sq.; comp. Amyx and Jehoram; Azariah, Jahiel, Jehu, Micah, Jehozadak, Eliezer, Oded (2 Chron. xv., 1, 1 sq.; xvi., 1 7; xx., 37; 1 Kings xi., 1; xxii., 8), under Asa, Baasha, and Jehoshaphat; Elijah, Elisha, Micah, under Ahaz and successors; Zechiah (2 Chron. xxvi., 20), under Jehoash; Jonas, under Jeroboam II (2 Kings xiv., 25); Oded, under Abaz (2 Chron. xxx., 1 sq.), and Jehoiachin (Jer. xxvi., 20); besides three prophetesses—Deborah (Ruth, iv. 7, 11), Huldah, a woman married (2 Kings xxiii., 14), and Noadiah (Neh. vi., 14), a false prophetesses. But they act in this without any settled principle, including almost every man of note in the Old Testament, among the prophets. Prophecy disappeared on the new establishment of the Jews in Palestine; and, indeed, the last prophets are thought to show less of the holy spirit than the earlier ones; and, after the erection of the second Temple, no voice was heard, although the return of the prophets was hoped for continually (1 Mac. iv. 46; xiv., 41). According to the Talmudists the Bath kol sometimes took the place of prophecy. (Comp. Buxtorf, Lex. Talm. s. v. 22, and Oloth, Lex. Rob. p. 82 sq.; see also Schottgen, Hor. Hebr., i, 379, on the unconscious soothsaying of the rabbins. It has been applied to John xi., 51. That in 1 Pet., 10, is different.) So entirely was the old inspiration lost that even the patriotism of the Maccabees called forth nothing beyond military heroism. The birth and development of the new Christianity evoked inspired utterances from two but (Luke i. 67; ii. 36). The appearance of Jesus even awakened false prophets, and, during the war of extermination between the Greeks and Romans, "prophet" was synonymous with deceiver and seducer of the people. Only a few scattered utterances of soothsayers occur during the centuries following the captivity (Josephus, Ant. xiii., 10, 7; xiii., 11, 2; comp. War, iii., 5, 3). See Gurtler, Systemat Thol. Proph. (Amst. 1702); Witsi, Miscel. Stor. bk. i., in 24 chapters, on prophets and prophecy; Carpozv, Introd. in V. T. p. 1 sq.; and his Appar. p. 113 sq.; Eichhorn, Einleit. ins A. T. iv., 512 sq.; Jahn, Einleit. ii., ii, 324 sq.; Nie- meyer, Charakri, v., 245 sq.; Herder, Geist der hebr. The writings of Dorotheus (ed. Fabric. [Ham. 1714]) contain traditions of the oldest prophet.

So those of an unknown writer (De Vero Prophet), sometimes ascribed to Ephippius. Comp. Hammaker, Comment. in Libr. de Vito et Morte Prophet. (Amst. 1832).

On the meaning of the word "prophet" in the New Testament, see the dictionaries. The name was given to certain Christians of both sexes (1 Cor. xii., 5; comp. Acts xxi., 9) who spoke in the public assembly (1 Cor. xii., 4; xiv., 26 sq.; Rieger, Die Prophet. und Prediger, ii., 261 sq.; comp. Acts xii., 17, Neander, Pfam. i., 205). Prophecy was, among the charismata, a spiritual gift of the Holy Spirit (Rom. xii., 6; 1 Cor. xii., 10), and stood next to that of speaking with tongues (xii., 10; xiii., 8; xiv., 22; comp. Acts xii., 6), but is pointed out by Paul as more efficacious for the edifying of the Church (1 Cor. xiv., 3 sq., 22). See, in general, Van Dale, De Idolol, p. 201 sq.; Mosheim, De Illia qui Prophet Vocabur in N. T. (Helmst. 1732); also in his Dissert. ad Hist. Eccles. ii, 125 sq.; Knapp [G.], De Dono Prophet. in Eccle. N. T. (Halle, 1765); Zacharias, De Vocis or Torviia Gaud. in Eccle. Chris. (Gott. 1767); Koppe, 3. Essay in Theor. Predem die Eph. p. 149 sq. Thus prophets are those Christians who, seized by a momentary inspiration (Acts xii., 6), disclosed to the assembly in their own tongue (comp.)

Seforno. See SORNO.

Segelia, in Roman mythology, was a rural deity who secured growth to the germinating crops of grain.

Segneri, Paolo (1), an Italian preacher, was born at Nettuno, March 21, 1624, of an old Roman family. In 1638 he entered the Order of the Jesuits at the College of St. Andrew, in Rome, where he taught grammar, and earnestly studied the Scriptures, the fathers, and the classical writers. Unable to obtain authority as a missionary to the Indies, he travelled on foot, from 1655 to 1692, through Italy, especially in Perugia and Mantua, gathering crowds to hear his discourses. Innocent XI called him to Rome in 1692 as his preacher in ordinary; but he was not so popular there, and was shortly succeeded in that theological to the penitentiary and examination of bishops. His healing, however, having failed, he died Dec. 9, 1694, worn out with labor. He wrote several works on practical theology, which are enumerated in Hoefer, Nouv. Biog. Générale, a. v.

Segneri, Paolo (2), called the Younger, an Italian Jesuit, nephew of the foregoing, was born at Rome, Oct. 18, 1673. He devoted himself to missions, and, after the earthquakes of 1708, he preached to the terrified Romans. At the request of the archduke Cono III, he occupied the pulpits of the principal churches of Florence, Modena, and Bologna, and thus induced prince Frederick of Poland to abjure Lutheranism. He died at Sinigaglia, June 15, 1713. He wrote a few works on practical religion.

Se'gub (Heb. Segub, מִשְׁפַּת [v. r. in Kings Septh, סְגָבָּה], elevated; Sept. Χειροσ, v. r. in Chron. Σεηφά], the name of two Hebrews.

1. The son of Hezron, grandson of Judah. His mother was the daughter of Machir, the “father” of Gilead, and he was himself father of Jair (1 Chron. ii. 21). B.C. cir. 1850.

2. The youngest son of Hiel, the builder of Jericho, who died for his father’s sin, according to Joshua’s prediction (1 Kings xvi. 34; comp. Josh. vi. 28). B.C. cir. 910.

According to Rabbinical tradition, he died when his father had set up the gates of the city. One story says that his father slew him as a sacrifice on the same occasion.

Segur, Seth Willard, a Congregational minister, was born at Chittenden, Vt., Dec. 24, 1831. At fifteen years of age he united with the Church, and soon after entered Royalton Academy, where he was fitted for college. He entered Middlebury College, and graduated in 1859. After graduation he entered the Auburn (N. Y.) Theological Seminary, and graduated in 1862. He was licensed by the Royalton Association May 8, 1861, and soon after ordained. He was installed over the Church in Newbridge, June 8, 1862, and, after remaining nine years, resigned. Success attended his ministry, and during his pastorate one hundred and thirty-four were received into the Church. He was next settled at Gloucester, Mass., where he was installed June 14, 1871, and remained until 1873, when he resigned to accept a call to West Medway, over which Church he was duly installed. As a preacher his eloquence was easy, graceful, and impressive, and many were drawn to the ways of rightousness. While on a visit to Tallmadge, he attended a semi-centennial celebration of the Church, and after a short illness died, Sept. 25, 1873 (W. P. S.).

Seguy, Joseph, a French Roman Catholic bishop, was born at Rodez in 1669. He was early received into the priesthood, and before the French Academy a eulogium on St. Louis, which cardinal de Fleury rewarded him with the See of Genlis. His success in other discourses was such that the Academy, in 1786, gave him the prize. Seguy bore the title of preacher to the king, and continued his ministry till advanced age, when he became a canonicate which he held at Meaux, March 12, 1761. Some of his sermons have been published.

Seho Dagung, in Hindustan, is the name of a magnificent pyramidal temple at Rangoon, entirely covered with gold, and dedicated to the deity of the Birmanes.

Seid, in Norse mythology, was a magical spell usually employed among the Vanes, in which the god who was descended from the Vanes, was protected by the Vanes, and in which he received instructions from Odin. Nothing definite is known respecting its origin; but it would seem that a degree of knowledge in chemistry lay at its base, by which all kinds of magic were known. It was regarded as beneficial to the deity of a man, however, and Odin was the only one permitted to use it.

Seidel, Caspar Timoteus, a Lutheran of Germany, was born Sept. 20, 1703, at Schön-Brandenburg, and died as doctor of divinity in the University of Königsalter, at Helmstädt, May 30, 1758. He became Diplomat, in qua olnlentur Pontificum in matrimonio a Præsa Ecclesiae Apostol. (Helmstadt, 1732): — Programmata de Quo Christus Pascam suam Ultimam Omnium Eodem Judæis comedet, necne? (ibid. 1748) — longe über die Sekte der Elenken (ibid. 1747). Seidel published several collections of sermons delivered at Nuremberg, which are entitled in Zuchold, Biblioth. theolog. p. 121 sq.; and Handbuch der theolog. Literatur. (B. P.)

Seidel, Gotthold Emanuel Fried, a Lutheran theologian of Germany, born at Berlin, March 10, 1774, was appointed in 1802 dean of the Epigodi of Nuremberg, in 1817 pastor of the Church at Nuremberg, and in 1829 dean of Nuremberg. Feb. 6, 1838, Seidel published several collections of sermons delivered at Nuremberg, which are entitled in Zuchold, Biblioth. theolog. p. 1215; Koch, Geschichte des deutschen Kirchenw, 294 sq. (B. P.)

Seidel, Heinrich Alexander, a Lutheran theologian of Germany, was born Feb. 4, 1811, at Mecklenburg-Schwerin. He studied theology at Berlin, and in 1839 he was called to the professorship at Berlin. In 1851 he was made pastor of St. Peter in Schwerin, but bodily infirmities obliged him to retire in 1859 from the pastorate, and he died Oct. 13, 1861. Seidel is best known in German hymnology and the production of spiritual hymns, which he published in two collections, entitled Kreuz und Herrn (Schwerin, 1839 and 1857). See Zuchold, Biblioth. theolog. p. 1215; Koch, Geschichte des deutschen Kirchenw, 294 sq. (B. P.)

Seiler, Georg Friedrich, a German theologian, was born Oct. 24, 1735, at Kreussen, near Bayreuth, and in 1772 he was made a doctor of theology at Coburg; in 1770, professor of theology at Erlangen; in 1772, university preacher; in 1773, member of the theology faculty and principal of an institute for moral and liberal arts, founded by himself at Erlangen. May 15, 1807. In theology he represented the romantic view, which he also propagated by his lectures and writings, most of which are not well known, but have been republished. Of
SEIR

Mount Seir was originally inhabited by the Horites, or "trogloxytes," who were doubtless the excavators of those singular rock-dwellings found in such numbers in the ravines and cliffs around Petra. They were possessed by and apparently annihilated by the posterity of Esau, who "dwelt in their stead." (Deut. ii, 12). The history of Seir thus early merges into that of Edom. Though the country was afterwards called Edom, yet Seir, the name of Mount Seir, does not pass away: it is frequently mentioned in the subsequent history of the Israelites (1 Chron. iv, 42; 2 Chron. xx, 10). Mount Seir is the subject of a terrible prophetic curse pronounced by Ezekiel (ch. xxxvi), which seems now to be literally fulfilled: "Thus saith the Lord God, Behold, O Mount Seir, I am against thee; and I will make thee most desolate. And I will lay thy cities waste, and when the whole earth rejoiceth I will make thee desolate. . . . I will make thee perpetual desolations, and thy cities shall not return, and ye shall know that I am the Lord." The southern part of this range now bears the appellant eash-Shebar, which is the other than a modification of the ancient name. In modern times these mountains were first visited and described by Burckhardt (Syria. p. 40), but they have often since been visited by other travellers, among whom Dr. Robinson has perhaps furnished the best description of them (Bib. Res. ii, 551, 552). At the base of the chain are low hills of none particular; the precipitous rock masses of porphyry, which constitute the body of the mountain; above these is sandstone broken into irregular ridges and grotesque groups of cliffs; and again, farther back, and higher than all, are long elevated ridges of limestone without precipices. Beyond all these stretches off indefinitely the high plateau of the great eastern desert. The height of the porphyry cliffs is estimated by Dr. Robinson at about 2000 feet above the Arabah (the great valley between the Dead Sea and Elanitic Gulf); the elevation of Wady Musa above the same is perhaps 2000 or 2200 feet; while the limestone ridges farther back probably do not fall short of 3000 feet. The whole breadth of the mountainous tract between the Arabah and the eastern desert above does not exceed fifteen or twenty geographical miles. These mountains are quite different in character from those which front them on the other (west) side of the Arabah. The latter seem to be not more than two thirds as high as the former, and are studded with isolated peaks of granite; while those on the east appear to enjoy a sufficiency of rain, and are covered with tufts of herbs and occasional trees. The valleys are also full of trees and shrubs and flowers, the eastern and higher parts being extensively cultivated, and yielding good crops. The general appearance of the soil is not unlike that around Hebron, though the face of the country is very different. It is, indeed, the region of which Isaac said to his son Esau, "Behold, thy dwelling shall be [far] from the fatness of the earth, and the dew of heaven from above." (Gen. xxvii, 39). See DIUMRA.

3. An entirely different mountain from the foregoing, which is formed on one declivity and forms the southern boundary of the territory of Judah (Josh. xv, 10 only). It lay westward of Kirjath-jearim, and between it and Beth-shean. If Kuriet el-Fanab be the former, and Ain-shems the latter of these two, then Mount Seir cannot fail to be the ridge which lies between the Wady Aley and the Wady musa. The name of the mountain, which is called Saris stands on the southern side of this ridge, which Tohler (Dritte Wanderung, p. 203) and Schwarz (Palest. p. 97) with great probability identify with Seir, notwithstanding considerable difference in the names. The Saris, on the south of the Wady Surar (Robinson, 1st ed. ii, 365), is nearer in orthography; but not so suitable in its position. It is possibly the same as the Seir in the Alex. MS., is one of the eleven names inserted by the Sept. in Josh. xv, 59. The neighboring names agree. In the Vir. MS. it is 'Basiqin.
How the name of Seir came to be located so far to the north of the main seats of the Seirites we have no means of knowing. Perhaps, like other names occurring in the tribe of Benjamin, it is a monument of an incursion by the Edomites which has escaped record. See Seir, etc. But it is more probable that it derived its name from some peculiarity in the form or appearance of the mountain. Robinson (iii. 156) speaks of a large hill or mountain which he mistook for a mountain of the tribe of Benjamin, but without any allusion to the name of Seir.

Se‘rah (Heb. with the art. ha-se‘rah), יְשֵׁרָה, the shaggy; Sept. Σειραθα, v. Σειρωθα; Vulg. Seirath, the place to which Ehud fled after his murder of Eglon (Judg. iii. 26), and whither, by blasts of his cow-horn, he collected his countrymen for the attack on the Moabites in Jericho (ver. 27). It was in "Mount Ephraim" (ver. 27), a continuation, perhaps, of the same rough wooded hills (such seems to be the signification of Seir) which stretched even so far south as to join the territory of Judah (Josh. xv. 10). The definite article prefixed to the name in the original shows that it was a well-known spot in the day—Smith. It is probably the same as Mount Seir (q. v.) just referred to, the Sura of the present day.

Seirim. See SATHIR.

Se‘ita, in Lapp mythology, are deities whose office it was to promote the fertility of fields and herds. Very little is known respecting the form they assumed in the popular conception. They are said to have fed fat like birds.

Se‘itonti, in Prussian mythology, were the lowest class of priests, of whom each village had one or more. They were regarded with great awe, but did not, like the priests, enjoy the respect of the people.

Seja, in Roman mythology, is (1) a surname of Fortune, to whom Servius Tullius dedicated a temple. (2) A Roman deity of sowing.

Seja, in Hindu mythology, is identical with Aman-da, the noted serpent which was wound about the mountain Mandar in order to turn it into the Milk Sea.

Se’la (Heb. with the art. ha-se’la, סֵלָה, the rock, as rendered in Judg. i. 36; 2 Chron. xxv, 12; Obad. 3; and by the Sept. [ע] σέληνα; A. V. "Selah" in 2 Kings xiv, 7), the name given in the above passages, and (in the A.V.) in Isa. xvi, 1, to the metropolis of the Edomites in Mount Seir. In the Jewish history it is recorded that Amaziah, king of Judah, "slew of Edom, in the valley of salt, ten thousand, and took Sela by war, and called the name of it Joktheel unto this day" (2 Kings xiv, 7). The parallel narrative of 2 Chron. xxvi. 11-13 supplies fuller details. From it we learn that, having beaten the Edomites, the army with a great army, in the "valley of salt"—the valley south of the Dead Sea—Amaziah took those who were not slain to the cliff, and threw them headlong over it. This cliff is asserted by Eusebius (Onomast. I,πρα) to be "a city of Edom, also called by the Assyrians Re-kem," by which there is no doubt that he intends Petra (see Bed. Peku‘, and the quotations in Stanley’s Sin., and Pal. p. 94, note). The title thus bestowed is said to have continued "unto this day." This, Keil remarks, is a proof that the history was nearly contemporaneous with the event, because Amaziah's conquest was lost again by Ahaz less than a century afterwards (2 Chron. xxviii, 17). This latter name seems, however, to have passed away with the Hebrew rule over Edom, for no further trace of it is to be found; and it is still called by its original name by Isaiah (xvi. 1). These are all the certain notices of the place in Scripture; for it may well be doubted whether it is designated in Judg. i. 36 and Isa. xlix, 11, as some suppose. On the ground of the sameness of signification, it is by common consent identified with the Petra, 500 Roman miles from Gaza (Pliny vii, 92), the ruins of which, now called those of Wady Mina, are found about two days' journey north of the top of the Gulf of Akaba, and three or four south from Jericho. This place was in the midst of Mount Seir, in the neighborhood of Mount Hor (Josephus, Ant. iv. 4, 7), and therefore in Edomitic territory—not in the desert, as Josephus (Ant. iv. 4, 7) gives the name of Arce (Ar’eq) as an earlier synonym for Petra, where, however, it is probable that "Aretu or Ar’eq (alleged by Eusebius, Onomast., as found in Josephus) should be read. The city lay, though, at a high level, in a hollow shut in by mountain-cliffs, and approached only by a narrow ravine through which, and across the city's site, the river winds (Pliny viii, 92; Strabo, xvi, 779). See PETRA.

Se’la-hammah’lekoth (Heb. סֵלָה הָעֹמִּדְתּ, סֵלָה הָעֹמִּדְתּ; Sept. πετράς ἡ μεσοθέα; Vulg. Petra divisus), a rock in the wilderness of Moab, the scene of one of those remarkable escapes which are so frequent in the history of Saul's pursuit of David (1 Sam. xxiii, 28). Its name, if interpreted as Hebrew, signifies the "rock of escapes," or "of divisions." The former is the explanation of Gesenius (Thesaur, p. 485), the latter of the Targum and the ancient Jewish interpreters (Midrash; Rashi). The escape is that of David; the divisions are those of Saul's mind, undecided whether to remain in pursuit of his enemy or to go after the Philistines; but such explanations, though appropriate to either interpretation, and consistent with the Oriental habit of playing on words, are doubtless mere conjectures. The analogy of the Hebrew no less than the Arabic nomenclature makes it almost certain that this cliff must have derived its name either from its smoothness (one of the radical meanings of פֶּתַר), or from some peculiarity of shape or position, such as is indicated in the translations of the Sept. and Vulgate. The divisions characteristic of the mountain, or rather cliff (for such Sela properly means), probably were the seams or veins of rock with which it was furnished, the most famous of escape. According to Lietz, Conder (Travels in Palestine, ii, 91), the name Mal'akk is still applied to part of a rocky gorge between Ziph and Moab, "seamed with many torrent-beds." See SELAH (2 Kings xiv, 7). See Sela.

Se’lah (Heb. הָעֹמִּדְתּ). This word, which is only found in the poetical books of the Old Testament, occurs seventy-one times in the Psalms, and three times in Habakkuk. In sixteen psalms it is found once, in fifteen twice, in seven three times, and in one four times—always at the end of a verse, except in Ps. iv, v, 19 (20): i, 34; and Hab. iii, 9, 9, where it is in the middle of a verse, though at the end of a clause. All the psalms in which it occurs, except eleven (iii, vii, xxiv, xxv, xlix, lii, lxxx, lixxii, lixxv, lixxx, xlix, ciii), have also the musical direction "to the Chief Musician."
the psalmody, in order to receive anew the divine inspiration. Chrysostom (Opp. ed. Montfaucon, v, 540) takes it to indicate the portion of the psalm which was given to another choir. Augustine (On Ps. iv) regards it as an interval of silence in the psalmody. Jerome (Ep. ad Marcellum) enumerates the various opinions which have been held by the subjects of this verse. The latter denotes a change of metre, a cessation of the Spirit's influence, or the beginning of another sense. Others, he says, regard it as indicating a difference of rhythm, and the silence of some kind of music in the choir; but for himself he falls back upon the version of Aquila, and renders Selah by a reference to the custom of the Jews to put at the end of their writings Amen, Selah, or Shalom. In his Commentary on Ps. iii he is doubtfully whether to regard it as simply a musical sign, or as indicating the perpetuity of the truth contained in the passage after which it is placed; so that, he says, "wheresoever Selah (that is, diaspalma or semper) is put, there we may know that what follows, as well as what precedes, belongs not only to the present time, but to eternity." Theodoret (Pref. in Ps.) explains diaspalma by μελος μεταβολη or οναλαγη (as Suidas), "a change of the melody." On the whole, the rendering διασφαλη increases the difficulty, for it does not appear to yield the meaning of Selah, and its own significance is obscure.

3. Rabbinical Writers.—The majority of these follow the Targum and the dictum of R. Eleazar (Talm. Erubin, v, 54) in rendering Selah "forever," but Aben-Ezra (On Ps. iii, 3) showed that in some passages this rendering was inappropriate, and expressed his own opinion that Selah was a word of emphasis, used to give weight and importance to what was said, and to indicate its truth—"but the right explanation is that the meaning of Selah is like 'so it is,' or 'thus,' and 'the matter is true and right.'" Kimchi (Lez. s. v.) doubted whether Selah had any special meaning in Ps. iv, x, and proposed Ex. xx, 20: "Selah," and, "to raise, elevate, with μαρτυρον, and interprets it as signifying a raising or elevating the voice, as much as to say in this place there was an elevation of the voice in song.

4. Modern Writers.—Among these there is the same diversity of opinion. Crusius (Theol. s. v.) derives Selah from selah, to suspend, of which the origin is the imperative Kal, with παραγοντις, in pause παραγονα. But this form is supported by no parallel instance. In accordance with his derivation, which is harsh, he interprets Selah to mean either "suspend the voice," that is, "be silent," a hint to the singers, or "raise, elevate the stringed instruments." In either case he regards it as denoting a pause in the song, which was filled up by an interlude played by the choir of Levites. Ewald (Die Diichte des A. B. i, 179) arrives at substantially the same result, but by a different process. He derives Selah from selah, a different substantive και, with ιππογοντις in pause καιπογονα (comp. καιπογονα, from και, root και, Gen. xiv. 10). So far as the form of the word is concerned, this derivation is more tenable than the former. Ewald regards the phrase "Higgaiion, Selah," in Ps. ix, 16 [17], as the full form, signifying "music, strike up!"—an indication that the voices of the choir were to cease while the instruments alone came in. Hengstenberg follows Gesenius, De Wette, and others, in the rendering Pause! but refers to it as a "restatement of the pause," and understands it as the silence of the music in order to give room for quiet reflection. If this were the case, Selah at the end of a psalm would be superfluous. The same meaning of pause or end is arrived at by Fürst (Handb. s. v.), who derives Selah from a root סל, selah, to cut off (a meaning which is perfectly arbitrary), whence the
among the interjections, and renders it _Praise_! ‘_For my own part,_’ he says, ‘_I believe it to be descended from the Arabic root _selah_, ‘_he blessed,’ etc., and used not unlike the word _Amen_, or the doxology, among ourselves._’ Delitzsch thinks that the instrumental accompaniment, which follows the psalm, would require that and that the Selah indicated loud playing when the singing ceased (Psalmcian, i, 19). Hupfeld, the other most distinguished scholar among recent commentators on the Psalms, agrees with Delitzsch in general that the Selah was the signal for the singing to cease and the instrumental music to be performed alone; and he takes an _interlude_ to be the meaning of the obscure word _śāqēya_, by which Selah has been rendered in the Sept. We conclude, therefore, as the general drift of modern interpretation, that Selah denotes a pause in the vocal performance at certain emphatic points, while the single accompanying instrument carried on the music. If any further information be sought on this subject, it may be found in the treatises contained in _Ugolino_ (vol. xxiii), in _Noldius_ (Concord. Part. Am. et Vind. No. 1877), in _Sachsitzt_ (Hebr. Poes. p. 346), and in the essay of Sommer quoted above. See also Stolte, _Selah Philologice Enucleatum_ (Wittenb. 1683); _Feuer, De Selah_ _Ebraorum_ (Naumb. 1739); _Daville Reviue_, 1864. See _PSALMS, BOOK OF._

**Selah. See Qaul.**

_Selden_, Johns, an eminent lawyer and antiquarian, was born at Salisbury, a hamlet in the parish of West Farringdon, in Sussex, on the 22nd of May, 1584. He received the rudiments of his education at the Free School of Chichester, and at the age of fourteen entered at Hert Hall, Oxford, where, although possessing great abilities, he did not particularly distinguish himself. He entered himself at Clifford’s Inn in 1602 for the study of law, and in 1604 removed to the Inner Temple for the completion of his legal studies. He acquired very early a taste for antiquarian research, in which department he afterwards became so eminent. He was, in fact, one of the most learned men of his age. He lived in stirring times, and was, almost inevitably, mixed up with the stormy politics of the period; but he belonged to no extreme party, although a friend of liberty and of the popular cause. He died Nov. 30, 1654. His works are very numerous and learned. The following are those which require special notice here: _De Dia Syri Fratrumq. Nativitas_ (1617), which contains a history of the idol deities mentioned in Scripture, and a summary of the Jewish calendar: _De Successione in Roma Dei, iuris et Legis Ebraorum_ (1631). An improved edition of this work appeared in 1636, including an additional treatise entitled _De Successione in Pontificalium Ebraorum_. Both these treatises were republished by the author, with additions, in 1638—_De Jure Naturali et Gentium_ _Articulato Disciplinarium Et Libri Septem_ (1640). In this work the author treats of the seven so-called precepts of Noah, and gives a digest of all the laws of the Jews, distinguishing those which belong to universal law from those which are merely national and local—_cujus Ebraeis; seu de Nephtitis et Discretis ex Jure Gentilis, Ebraeorum et Gentium Articulato Disciplinarium Tres Libris_ (1646). Everything relating to marriage and divorce among the Jews will be found treated of here: _De Synedriis et Praetextibus Juridicis Veterum Ebraorum_ (1650). In this work, on which Selden spent twelve years, he sets forth everything recorded of the Sanhedrin, or juridical courts of the Jews, with collateral notices of similar institutions in other countries.

**Selections of Psalms.** The Psalter, as it stands in the Prayer-book of the Church of England, is divided into sixty portions, agreeing with the average number of mornings and evenings in the month. There are also ten selections of Psalms, any one of which may be used instead of the regular psalms of the day. These are prefixed to the Psalter, and consist of one or more

_substantive_ ḥal, which, with ṣparagogy becomes in pause ṭlāh, a form which is without parallel. While etymologists have recourse to such shifts as these, it can scarcely be expected that the true meaning of the word will be evolved by their investigations. Indeed, the question is as far from solution as ever. Beyond the fact that Selah is a musical term, we know absolutely nothing about it, and are entirely in the dark as to its meaning. Sommer (Bibl. Androtii, i, 84) has devoted an elaborate discourse to its explanation (translated in the _Bibliotheca Sacra_, 1848, p. 66 sq.). After observing that Selah everywhere appears to mark critical moments in the religious consciousness of the Israelites, and that the music was employed to give expression to the energy of the poet’s sentiments on these occasions, he (p. 49) arrives at the conclusion that the word is used in those passages where, in the Temple Song, the choir of priests who stood opposite to the stage occupied by the Levites were to raise their trumpets (הַלֵּךְ), and with the strong tones of this instrument mark the words just spoken, and bear them upwards to the hearing of Jehovah. Probably the Levitical minstrels supported this priestly intercessory music by vigorously striking their harps and psalteries; whence the Greek expression διάφωτα. To this point, moreover, the full title of the _Selah_ (Exeget. Psalmcian, i, 16): the first word of which denotes the whiff of the stringed instruments (Ps. xcii, 4), the other the raising of the trumpets, both of which were here to sound together. The less important _Hippican_ fell away, when the expression was abbreviated, and Selah alone remained." Dr. Davidson (introd. to the Old Test. ii, 249) with good reason rejects this explanation as labored and artificial, though it is adopted by Keil in Havernick’s Einleitung (iii, 120–129). He shows that in some passages (as Ps. xxi, 4, 5; liii, 3; iv, 7, 8) the playing of the priests on the trumpets would be unsuitable, and proposes the following as his own solution of the difficulty: The word denotes elevation or ascent, i.e., loud, clear. The music which commonly accompanied the singing was soft and feeble. In cases where it was to burst in more strongly during the silence of the song, Selah was the sign. At the end of a verse or strophe, where it commonly stands, the music may have really been strongest and loudest. It may be marked thus, as of all the theses he to conjecture which have been given, that it is mere conjecture, based on an etymology which, in any other language than Hebrew, would at once be rejected as unsound. A few other opinions may be noticed as belonging to the history of the subject. Michaelis, in despair at being unable to assign any meaning to the word, regarded it as an example of the _parasia_ or other letters of three other words (Supp. ad Lez. Hebr.), though he declines to conjecture what these may have been, and rejects at once the guess of Meïbonious, who extracts the meaning _da capo_ from the three words which he suggests. For other conjectures of this kind, see Eichhorn, Bibliothek, v, 545. Matthiesen was of opinion that the passages where Selah occurred were repeated either by the instruments or by another choir: hence he took it as equal to _ritornello_. Herder regarded it as marking a change of key, while Paulus Burgensis and Schindler assigned it to no meaning, but looked upon it as an emollient word used to fill up the verse. _Buxtorf_ (Lez. Hebr.) derived it from ṭlāh, _salāh_, to spread, lay low; hence used as a sign to lower the voice, like piano. In Eichhorn’s _Bibliothek_, v, 545, if it is suggested that Selah perhaps signifies a scale in music, or indicate a rising or falling in the tone. _Koster_ (Stud. u. Krit. 1831) saw in it only a mark to indicate the strophical divisions of the Psalms, but its position in the middle of verses is against this theory. Augusti (Pract. Exe. ad d. Psa. p. 125) thought it was an exclamation, like _Halleluylah_; and the same view was taken by the late Prof. Lee (Hebr. Gr. § 248, 2), who classed it
psalms, chiefly on the same subject. The following are the subjects of the several selections: 1. the majesty, greatness, and compassion of God; 2. God as an all-seeing judge; 3. prudence and trust in God; 4. contrast between wicked and good; 5. blessedness of the righteous; 6. the Lord a refuge; 7, 8. the happiness and joy of those who wait upon the Lord, etc.; 9. God infinite and worthy of all praise; 10. invitation to unite in praising God.

Seleid (Heb. id. סלת, nsolmation; Sept. סלעד v. r. 'Aleaslad), a descendant of Jerahmeel, son of Hezron, being the elder of the two sons of Nadab, and without children (1 Chron. ii. 30). B.C. post 1615.

Selemaia (Vulg. Semelis, the Gr. text being lost), the third named of the five rapid scribes whom Ezra was charged to select for taking down his visions (2 Esd. xiv. 24).

Selemaias (Σελημιας) the Greek form (1 Esdr. ix. 84) of the name of Shelemiah (q. v.), one of the "sons of Bani" (Ezra v. 34).

Selemus, in Greek mythology, was a shepherd-boy of Achaia. He was found asleep among his herds by the nymph Argyra, and his youth and beauty led her to bestow on him her favor; but the beauty of man is not constant like that of a nymph, who retains her youth and beauty always, and Argyra accordingly forsook her lover when his charms were no longer fresh and blooming to her eyes. Venus herself endeavored to turn the hard heart of the goddess, but in vain, and Selemus pined away under the agonies of unrequited love. In her compassionate Venus now changed him into a stream, on which she conferred the quality of inducing forgetfulness in the minds of all lovers who should bathe in its waters, so that they might be cured of their passion.

Selene (Σεληνη, the moon), a goddess worshipped by the ancient Greeks, being the personification of the moon. She is called a daughter of Hyperion and Theia, and, accordingly, a sister of Helios and Eos. She is also called Phoebe, as the sister of Phoebus, the god of the sun. In later times Selene was identified with Artemis, and the worship of the two became amalgamated. Among the Romans she was called Luna, and had a temple on the Aventine at Rome. Selene is described as a very goddess, with long wings and a golden diadem, and Aeschylus called her "the eye of night."

Seleucia [some wrongly Seleucia] (Σελευκία), a city of Syria, situated west of Antioch, on the seacoast, near the mouth of the Orontes; sometimes called Seleucia Pieria, from the neighboring Mount Pierus; and also Seleucia ad Mare, in order to distinguish it from several other cities of the same name, all of them denominate from Seleucus Nicator. Its ancient name was Rivers of Water ("Γηράτος ποταμών). Strabo, xvi. 2, 8). It is fully described by Polybius (s. 39). It was practically the seaport of Antioch (q. v.), as Osea was of Rome, Neapolis of Philippi, Cenchrea of Corinth, and the Piraeus of Athens. The river Orontes, after flowing past Antioch, entered the sea not far from Seleucia. The distance between the two towns was about sixteen miles, chiefly of broken ground, with a large mountain called Corypheum on the north near the sea. We are expressly told that Paul, in company with Barnabas, sailed from Seleucia at the beginning of his first missionary circuit (Acts xiii. 4); and it is almost certain that he landed there on his return from it (xiv. 26). The name of the place shows at once that its history was connected with that line of Seleucidæ who reigned at Antioch from the death of Alexander the Great to the close of the Roman republic, and whose dynasty had so intimate a connection with Jewish annals (1 Macc. xi. 8; Josephus, Ant. xviii. 9, 8). See SYRIA. This strong

SELEUCIA

order of the emperor Constantius. One hundred and sixty bishops were present, of whom about one hundred and five were Semi-Arians, forty Anomoeans, and thirteen Catholics; among these was St. Hilary of Poitiers, who for four years had been banished into Phrygia. Among the Semi-Arians were George of Laodicea, Silvester of Taras, Macdonius of Constantinople, Basil of Ancyra, and Eustachius of Sestate. The Anomoeans formed the party of Acacius of Cesarea. The thirteen Catholic bishops, who probably came from Egypt, alone maintained the consubstantiality of the Word. Leonas, the imperial questor, had orders to attend the deliberations and pronounce on the decisions. The bishops forming the party of Acacius, anxious to avoid any inquiry into the several accusations and complaints which they were aware would be brought against them, insisted that, first of all, the questions relating to the faith should be examined, and after some discussion they gained their point. In the very first sitting, however, they openly renounced the Council and the Creed of Nicaea, and maintained that the Son was of a substance different from that of the Father. A discussion ensued between them and the Semi-Arians, which ended in the Acacians leaving the assembly, disguised with its decision, viz., that the formulary drawn up at Antioch in 341 should be adhered to.

In the second sitting the formulary of Antioch was confirmed by the Semi-Arians, who were alone in the council; while the Acacians drew up a new formulary, condemning both the similarity of substance and the contrary. In the third sitting the dispute was continued. Leonas having been deposed by the council, was unable to attend for them, and to deliver their formulary of faith. In the fourth sitting the Acacians declared that they believed the likeness of the Son to the Father to consist in a likeness of will only, and not of essence. The others maintained a likeness of essence also, and no decision was arrived at.

In the fifth sitting the Acacians were summoned to attend to examine the case of St. Cyril, who appealed from the judgment of Acacius, by whom he had been deposed. They refused to attend; and, after having summoned them, the council deposed Acacius, Eudocias of Antioch, George of Alexandria, and several others. They reduced to the communion of their respective churches, Asterius, Eusebius, and five others, until such time as they should disprove the accusations brought against them. Another bishop was elected to the see of Antioch. The sentence of the council was not, however, carried into effect, as the deposed bishops were able to secure the favor of the emperor.

Seleucians, the followers of Seleucus, a philosopher of Galatia, who, about the year 880, adopted some of the notions of the Valentinians. He taught that Jesus Christ assumed a bodily only in appearance; that the world was not made by God, but was eternal; that the soul was only an animated fire created by angels; that Christ does not sit at the right hand of the Father in a human body, but that he lodged his body in the fortress and convenient seaport was, in fact, constructed by the first Seleucus (died B.C. 200), and here he was buried. It was taken by Tolemen Eutereges on his expedition to Syria, but was recovered by Antiochus Epiphanes. It retained its importance in Roman times, and in Paul's day it had the privileges of a free city (Pliny, H. N. v, 18). The remains are numerous, the most considerable being an immense excavation extending from the higher part of the city to the sea; but to us the most interesting are the two piers of the old harbor, which still bear the names of Paul and Barnabas. The masonry continues so good that the idea of clearing out and repairing the harbor was entertained, but not executed, by one Ali Pasha, of Aleppo. Accounts of Seleucia were first given by Pococke (Observations in the East, xxii, 182), and afterwards in the narrative of the Euphrates Expedition by general Chesney, and in his papers in the Journal of the Royal Geographical Society (viii, 228 sq.), and also in a paper by Dr. Yates in the Museum of Classical Antiquities. The harbor has still more lately been surveyed by captain Allen (Dead Sea, etc.). See also Conybeare and Howson, St. Paul, i, 137; Lewin, St. Paul, i, 116 sq.; Smith, Dict. of Classical Geog. s. v.

SELEUCIA (in Chaldean), COUNCIL OF, was held in 410, in order to re-establish ecclesiastical discipline in Persia and Mesopotamia. Twenty-seven canons were made.

1. Orders prayers to be made for princes.
2. Continues a profession of faith agreeing with that of Nicaea.
3. Orders that the consecration of a bishop be performed by three bishops at least.
4. Excludes from every ministration priests and deacons who do not observe strict continence.
5. Ordains the same thing with respect to clerks guilty of usury.
6. Excommunicates all who have dealings with usurers, etc.
7. Directs that priests and other clerks shall eat in a place distinct from the poor.
8. Orders that their sleeping-rooms also shall be separate.
9. And 10. Ordains that there shall be but one archdeacon in each diocese, who shall act as the arm and tongue of the bishop to publish and execute his will.
10. Permits the archdeacon to celebrate the holy eucharist in the absence of the bishop, and gives him power to punish deacons under certain circumstances.
11. Provides that all ordained priests and deacons anywhere save before the altar.

SELEUCIA (in Syria), COUNCIL OF. This council was held in the Church of St. Tecla, Sept. 27, 359, by
The general policy of Seleucus towards the Jews, like that of his father (iii, 2, 3, καὶ Σέλεους), was concilia-
tory, as the possession of Palestine was of the highest
importance in the prospect of an Egyptian war; and he
undertook a large share of the expenses of the Tem-
ple service (ver. 3, 6). On one occasion, by the false
representations of Simon (q. v.), a Jewish of-
cer, he was induced to make an attempt to carry
away the treasures deposited in the Temple by
means of the same Heliodorus who murdered him.
The attempt signally failed, but it does not ap-
pear that he afterwards showed any resentment
against the Jews (iv, 4, 5); though his want of money
had not induced him to pay the enormous tribute due to the Romans may
have compelled him to raise extraordinary revenues,
for which cause he is described in Daniel as a
"raiser of taxes" (xi, 20; comp. Lively, xil, 19). See
Manzini's monograph (in Italian) on this prince (Main-
land, 1684).

Coin of Seleucus IV.

Seleucus. See Seleuciana.

Seleucneutabini, a sect of dissenters from the Russo-
Greek Church resembling the Strigolniki (q. v.).

Self-baptizers. See Sk Baptists.

Self-deception, deception proceeding from, and
practiced upon, one's self, especially in forming judg-
ments or receiving impressions of our own state, char-
acter, and conduct. For example: 1. In judging of
our own character we are very apt to enhance the good
qualities we possess, to give ourselves credit for others
that we really have not, and to ignore the evil qualities
that should be seen by us. 2. In the matter of our con-
duct we are very prone to persuade ourselves either that
our acts were not wrong, or that the peculiar circum-
stances under which we were placed were so extenuating
as to remove actual guilt. 3. There is a tendency to
confound the non-appearance of a vicious action with
its actual extirpation. 4. An improper estimate of the
reality of our repentance, faith, works, etc., or of the im-
portance of the same. The range of objects as to which
men deceive themselves is very wide, including God,
Jesus Christ, the Holy Spirit, Scriptures, experience,
etc. Still, considering the great and necessary
orders men slavish of procrastination, leads them to overrate
themselves, flatter them with an easy victory, and con-
 firms their evil habits. The means of avoiding self-
deception are strict self-inquiry, prayer, watchfulness,
and diligent study of God's Word.

Self-dedication, the unserved dedication of our-
selves to God with the purpose of serving him in holiness and righteousness.

Self-defence, the act of defending one's self and
property from injury. The right of self-defence has been questioned by many, and has also been stoutly ad-
vocated. The secular law requires no man to submit
passively to the infliction of evil upon his person, but al-
ways allows him to defend himself. Of course, the vio-
cence used must only be so much as is necessary for de-
finite. Is the principle of self-defence contrary to the
Gospel, or should a man choose rather to lose his own
life than to save it at the expense of another's? It
may be answered that where there is reason to believe
that life is at stake one is justified in taking the life of
the would-be murderer; for the reason that in attempt-
ing a felony he has forfeited his life, and in preserving
your own you spare the innocent. It is generally com-
SELF-DENIAL 518  SELIG

sidered lawful even to kill in the defence of chastity, provided there be no other way of preserving it.

Self-denial, the forbearing to follow one's inclinations or desires. In the scriptural sense it is the renouncing of all those pleasures, profits, views, connections, or practices that are prejudicial to the true interests of the soul. The understanding must be so far denied as not to lean upon it independent of divine instruction (Prov. iii, 5, 6). The will must be denied so far as it opposes the will of God (Eph. v, 17). The affections must be denied when they become inordinate (Col. iii, 5). The gratification of the members of the body must be denied when out of their due course (Rom. vi, 12, 18). The honors of the world and praise of men must be foregone when they become a snare (Heb. xi, 24–26); also worldly emoluments, when to be obtained in an unlawful way or when standing in opposition to religion and usefulness (Matt. iv, 20–22). Friends and relatives must be renounced, so far as they oppose the truth and would influence us to oppose it too (Gen. xii, 1). Our own righteousness must be relinquished, so as not to depend upon it (Phil. iii, 8, 9). Life itself must be laid down if called for in the cause of Christ (Matt. xvi, 24, 25). In fine, everything that is sinful must be denied, however pleasant and apparently advantageous, since, without holiness, no man shall see the Lord (Heb. xii, 14).

Self-examination, the act of examining one's own conduct and motives. It is a duty commanded by God (2 Cor. xiii, 5), and, to result favorably, should be deliberate, frequent, impartial, diligent, wise, and with a desire of amendment. In self-examination reference should always be made to the Word of God as the rule of duty.

Self-government, the wise and conscientious regulation of all our appetites, affections, and habits on Christian principles.

Selfishness, an inordinate self-love, prompting one, for the sake of personal gratification or advantage, to disregard the rights or feelings of other men. It is a negative quality—that is, it consists in not considering what is due to one's neighbors through a deficiency of justice or benevolence. Selfishness is contrary to the Scriptures, which command us to have respect for the rights and feelings of others, and forbids us to en-croach thereupon.

Self-knowledge, the knowledge of one's own nature, abilities, duties, principles, prejudices, tastes, virtues, and vices. This knowledge is commanded in the Scriptures (Ps. iv, 2; 2 Cor. xiii, 5). It is of great utility, as it leads to humility, contrition, prayer, self-denial, charity. When by self-knowledge we become acquainted with our powers, resolution, and motives, then we secure self-possession. To secure self-knowledge there must be watchfulness, frequent and close attention to the operations of our own mind, study of the Scriptures, and dependence on divine grace.

Self-love (in Greek, φιλαυτία), an element of character which is to be carefully distinguished from selfishness as being radically different, and not so in degree only. The former is demanded by the moral consciousness in man, while the latter is condemned, and the same distinction prevails in the Scriptures. The one is the basis for motives to self-examination, for prudence and carefulness of life, for self-renewal and improvement in character. By the grace of God all "works of the flesh" (Gal. v, 19; comp. 1 Tim. vi, 10) are rooted.

General or philosophical ethics requires self-love in the sense that each person should honor the idea of humanity or the human personality which underlies his own nature, and that he should develop it in every direction. The principle of humanity which asserts the dignity of human nature is the prevailing idea. Theological ethics treats self-love as a disposition which

has for its object the Christian personality, which springs from love to God and Christ, which sanctifies the Lord in the heart (1 Pet. iii, 15), protects against all contamination of the flesh and spirit (2 Cor. vii, 1), and seeks to be renewed in the spirit of the mind (Eph. iv, 23) in all that may be glorified with Christ (2 Cor. iii, 18). The regenerated personality, therefore, constitutes both subject and object in Christian self-love, while, in the natural sentiment, unregenerate man is the substituted entity, and Christian self-love alone is really virtuous, a personal disposition through which the Christian makes himself to God a holy, living sacrifice (Rom. xii, 1).

The intimate relation subsisting between self-love and love to our neighbors is such that they are inseparable and mutually condition each other. Not only does love for others limit our love of self, but the egoist degrades himself in proportion as he indulges in his egotism; and no person is capable of being useful to others in his character and his life who does not in the best sense love and care for himself. Every duty to self may accordingly be viewed as duty to our neighbors, and vice versa, if care be taken to guard against the eudaemonism which is so likely to intrude.

In its spiritual aspect the Christian assumes a twofold character in which the negative and positive elements predominate at different times. The former element corresponds to self-respect, whose influence leads the Christian to avoid everything that may wound, or in any way impair, the dignity conferred on him, and which impels him to cultivate the best and most beneficent of characters. Upon this ground the positive element in self-love carries forward the work of renewal, including the whole of Christian development and perfection. And inasmuch as the entire man is concerned in these objects of self-love, it follows that the body must share in the development and other benefits secured to the spirit, though it is not the spirit's main concernment (1 Thess. v, 23). At this point Christian self-love passes over into spiritual discipline, and coincides to some extent with Christian asceticism. See Herzog, Real-Enzyklop. n. v.; Fleming, Vocab. of Philos. n. v.

Self-murder. See Suicide.

Self-seeking. See Covetousness.

Selig, Gottfried, a convert from Judaism, whose original name was Philipp Heygmann, was born at Weissensfel in 1722. Up to his tenth year he enjoyed the lectures of a private tutor; after this time he was sent away to Dissel, near Breda, to a Dutch Benedictine monastery. When he was thirteen years of age, his father wished him to become a merchant, but to this proposition he would not yield. His father finally consented to give him a better education, and a candidate of theology was intrusted with his instruction in the German and Latin languages. At times the pupil, who was well acquainted with the objections against Christianity, propounded questions to his teacher which the latter could not answer, because he was not acquainted enough with the Hebrew language. The teacher then invited a certain Herrlich, who was well acquainted with the Hebrew and Rabbinic literature, to meet Philipp several times in order to dispute with him about Christianity. The result was that the sting left in the Jewish heart became the impetus for further searching the Scriptures. About Christmas of 1737, Philipp went to pastor Schumann and handed to him a paper in which certain passages of the New Test. were written down, and of which he desired an explanation. This visit was quite exalted, and Sept. 17, 1738, he was baptized at Weissensfel, assuming the name Gottfried Selig. In 1761 he came to Leipzig, where Prof. Dathe examined him in Hebr. and thes. and Prof. Bossard in Talmudia et Rabbinics, and thus he was enabled to commence his lectures in Rabbinic literature. He died after 1792. He wrote, Collectio adversarior. Hebraeoramultra 4000 Assergens (Leipsic,
Seyne's writings were numerous, but most of them have been forgotten. The more noteworthy are an exposition of the book of Psalms, in various editions and revisions (last ed. Leipsic, 1588), and a large number of hymns. His poetical writings evince talent of no mean order, but are marred by the constant introduction of references to personal troubles, etc., an undue attention to details, frequent emphasis and undue doctrine, though the latter feature is preserved from becoming offensive by the fact that it is in the main the expression of the writer's heart. See Wetzel, Lieder-historie, vol. iii; Götzke, Septem Dissertata de N. Seln. (1725); Koch, Geschichte des deutschen Kirchenleides, vol. i; Mutzel, Gedichte. Lieder der engl. Kirche aus dem 16. Jahrhundert (Berlin, 1855, 3 vols.); Herzog, Reaktionskreise, p. v.; Hagenback, Hist. der Doctrines, ii, 149-151.

Seloreau, a medieval term for a canopy; the inner roof of a room which is sealed or closed with planking.

Selvedge (sélvedj, 'an end, as often rendered'), the edge of a piece of cloth (Exod. xxvi, 4). See Tabernacle.

Selina, Henry, a (Dutch) Reformed minister, was born in Amsterdam, Holland, in 1636. He was regularly educated in one of the universities of that country for the ministry, and licensed by the Classis of Amsterdam as early as 1652. In 1659 he accepted a call made by the Dutch West India Company, through the Classis of Amsterdam, to become the minister of the Dutch Church of Breukelen (now Brooklyn) for four years. He was ordained in 1660 in Holland, and came to this country with Rev. Harmans Bloem, who was on his way to the Church of Kingston, N.Y. During his ministry at Brooklyn, Mr. Selina, by special request of Gov. Stuyvesant, came over to New York and preached regularly on Sabbath evenings to the negroes and other poor people, on his farm, or Bowery, and on the present location of St. Mark's Episcopal Church, corner of Ninth Street and Second Avenue. His ministry at the places was very popular and useful. He returned to Holland at the close of his fourth year, in 1664, and took charge of a congregation of poor folks who earned their bread by gathering turf. He was happy in serving them, and declined a pressing invitation in 1670 to come to New York as colleague of the aged Rev. Abraham Van Eimeren, and the Collegiate Church of Middelburg. The call was renewed and accepted by him in 1682. The period was critical for the Dutch Church, in consequence of the English ascendency in the province and the establishment of the State Church. "The Dutch were only tolerated, according to capitulation, as dissenters. The government attempted to exercise arbitrary powers, but the people resisted. Dominie Selina was fully alive to the importance of the subject, and was rejoiced at the arrival of Gov. Dongan in 1683, who allowed full liberty of conscience." An assembly of the people was soon called, which, among
other matters, established the legal position of the denominations, allowing the churches to choose their own ministers. When Leisler usurped the governor's chair, Mr. Selyns was one of his most formidable opponents, and preached a jubilant sermon over his fall. This conduct divided his congregation, and his salary was partly withheld for years; but he held his ground tenaciously and triumphantly, until the charter of May 11, 1696, he felt that the liberties of his Church were entirely secured. Not till then did he seek relief and a colleague in his large congregation. The Rev. Guilerinus (Walter) Du Bois was called in 1699, and for fifty-five years "ministered before the Lord" in that one church. Mr. Selyns died July, 1701. He was the most eminent of the ministers who had yet come from Holland—prudent, sagacious, bold, earnest, of positive convictions, fearless of danger, a defender of the faith, and a peace-maker. He was a successful minister of the Gospel, and had probably more to do in determining the position of the Reformed Dutch Church in America than almost any other man. In spirit towards other churches he was liberal, kindly, and catholic. He held friendly relations with the chief men of the state, and maintained correspondence with eminent literary men of the colonies, such as the Mathers and other notables. He was also a poet, versifying with equal ease Latin and Dutch. Cutting-Mather (in Magnalia Christi Americana, iii, 41) says of him that "he had so nimble a faculty of putting his devout thoughts into verse that he signalized himself by the greatest frequency which perhaps ever man used of sending poems to all persons, in all places, on all occasions; and upon this, as well as upon greater accounts, was a David unto the flocks of our Lord in the wilderness." Murphy, Anthology of New Netherland, contains much of his life and poetry. See also De Witt, Hist. Discovere; Sprague, Amals of the Amer. Pulpit, vol. ix; Corwin, Manual of the Reformed Church, p. 219-217. (W. R. T.)

Sem (Σημ), the Grecized form (Luke iii, 36) of the name of Shem (q. v.), the son of the patriarch Noah.

Semach'ah (Heb. in the prolonged form Semach'ayah, supported of Jehovah; Sept. Σαμαχαήα v. v. Σαμαχαια), the sixth and last-named son of Shemahiah, the son of Obed-edom (1 Chron. xxvi, 7). B. C. cir. 1013.

Semag, or Semak. See Moses de Coucy.

Semamith. See Spider.

Semantra (σημαντρα, σιμαντα), wooden boards, or iron plates full of holes, which the modern Greeks use instead of bells to summon the people to church. These instruments they hold in their hands, and knock them with a hammer or mallet. The same term is sometimes applied to a bell, or a metal drum used for the same purpose.

Semargia, in Slavic mythology, was a goddess personifying winter—the cold season of the year—and highly revered among the grand Pantheon at Kief by the Russians.

Semaxi, a name mentioned by Tertullian as sometimes applied to Christian martyrs by their persecutors, from the fact that those who were burned alive were usually tied to a board or stake of about six feet in length, which the Romans called semaxia.—Bingham, Christ. Antiq. bk. i, ch. ii, § 10.

Sembat, a Palaunic, who about the year 840, formed a sect in the province of Arrat by a fusion of Parseism and Paulicianism. He established himself at Thondrac, from which place his sect was called Thondracians (q. v.).

Sembiani, a Christian sect who were so called from their leader, Sembianus, who condemned the use of all wine. He persuaded his followers that wine was a production of Satan, denied the resurrection of the body, and rejected most of the books of the Old Test.

Sem'ei (Σημείο), the Grecized form apparently of two Heb. names: 1. Shem (q. v.), spoken of as (a) one of the "sons of Asson" (1 Esdr. ix, 28, &c. 1 Chron. ix, 33); (b) the son of Cisai and father of Jairus, among the ancestors of Mordecai (Esth. xii, 2, Semei). 2. The son of Joseph and father of Mattathias in our Lord's genealogy (Luke iii, 26, v. r. Semei), probably Sim'eha'meta (q. v.), the son of Shechaniah and father of Neriah (1 Chron. ii, 25).

Semíbis, in Greek mythology, was the mother of Bacchus and daughter of Cadmus and Harmonia. See Bacchus.

Semel'ius (Σεμελίους, v. r. Σεμελίους, Σεμελί- λος), a corrupt Greek form (1 Esdr. ii, 16, 17, 25, 30) of the name of Sim'hiby (q. v.), the Samaritan scribe (Ezra iv, 8, 9, 17, 28).

Semente'ra Ferre, or Semente'sa Die'ss, was kept in seed-time by the Romans for the purpose of praying for a good crop. It lasted only one day, and was fixed by the pontifex maximus.

Semi-Arians, a sect which arose in the 4th cent., holding a modified form of Arianism. It was founded by Eusebius of Cesarion and the sophist Arie- tius. The Semis opposed the strict definition of orthodox Nicene theologians like St. Athanasius, and to the equally strict definition which characterized the logical intellectualism of the old Arians. Its symbol was the Homoousion, which they substituted for the orthodox Homoousion; that is, the Son was regarded not as of the same substance with the Father, but of a substance like in all things except in not being the Father's substance. They maintained, at the same time, that though the Son and Spirit were separated in substance from the Father, still they were so included in his glory that there was but one God. Unlike the Arians, they declared that our blessed Lord was not a creature, but truly the Son born of the substance of the Father; yet they would not allow him, with the orthodox, simply to be God as the Father was, but asserted that the Son, though distinct in substance from God, was at the same time essentially distinct from every created nature.

The Semi-Arian party first came into prominence at the Council of Nicaea (A.D. 325), under the leadership of Eusebius, bishop of Cesarion. During the fifty-six years that elapsed between the Council of Nicaea and that of Constantinople (A.D. 335-381) as many as eighty councils are on record, a large number of which were held by the Semi-Arian bishops in support of their contests with the orthodox and with their own sects. The Semi-Arian party had not one uniform definition of faith, but differed from each other on many important points; the only real bond of union was their opposition to the term which unequivocally expressed Catholic doctrine. Nothing, in fact, was more conspicuous than the unsettled variableness of the Semi-Arian creed. Two confessions of faith were drawn up at the Council of the Dedication (Socrates, Hist. Eccl., ii), held at Antioch, A.D. 841; another by the bishops of Palestine, a few months afterwards (ibid., ii, 18); four years later (A.D. 845) at Antioch; and Sirmium (A.D. 851 [see Sozomen, Hist. Eccl., iv, 6]) and again at the same place the next years later (ibid.). From about this time a reaction went steadily on, until in A.D. 366 fifty-nine Semi-Arian bishops subscribed an orthodox formula, and were received into the Catholic Church (Socrates, Hist. Eccl., ii, 12). There is no evidence of any large number of the party afterwards existing. Many others, doubtless, came back to the Church, not a few plunged into the heresy of the Monarchians [see MACKDONALD], and some, like Eudosius of Antioch in 376, became orthodox and Anomoeans. Consult Blunt, Dict. of Theology; id. Dict. of Sects, s. v.; Hagenbach, Hist. of Doctrines, vol. i, § 92; Newman, Hist. of the Arians; Pusey, Councils of the
Church, ch. v.; Gardner, Faith of the World, s.v. See Ariasism; Sabelius.

Semi-cope, an inferior kind of cope. This term is sometimes applied to a small cope; occasionally to the old black Sarum choral cope, like cloaks without sleeves; and occasionally to a cope of linen, serge, or buckram, unornamented with embroidery.

Semi-idealtes, a sect of Asephali (q. v.), which at one period or another under the name of Harsanianos at the end of the 5th century. They had no succession of priests, and professed to keep up the celebration of a valid eucharist by placing a few crumbs of the bread which had been consecrated by Diocletian in a vessel (eucardia, literally an offering, from eu cardia, euricidion, a holy heart, euricidion, the name), and then using as fully consecrated the bread baked from it. See Damasc. Ad Hieros. iii.; Baroniuss, Annuall, ad ann. 533; Neale, Patriarchate of Alexandria, ii., 22.

Semi-double, an inferior or secondary ecclesiastical festival, ranking next above a simple feast or bare commemoration.

Semi-frater, a layman or a secular cleric who, having bidden a religious house by gifts or personal service, was regarded as in some way belonging to the order of fraternity, having a share in its prayers during life, and in mortuary masses after death.

Semi-jeunia (half-faste), a name given to the weekly fasts in the ancient Christian Church, because the services of the Church continued on these days no longer than till three o'clock in the afternoon, whereas a complete fast was never reckoned to end before evening. These half-fasts were also called Stations (q. v.).

Semi-Judaizers (1), a Socinian sect, originated in the 6th century by Francis David, a Hungarian, who was superintendent of the Soceanian churches in Transylvania. The principal doctrine which David and his followers maintained was that neither prayer nor any other act of religious worship should be offered to Jesus Christ. Faustus Socius argued strongly against this tenet; and when all efforts to reclaim the Hungarian heretic were found to be fruitless, the public authorities threw him into prison, where he died at an advanced age, A.D. 1575. The sect, however, survived its founder, and for a long time gave no little trouble to Socius and his followers in Poland and Lithuania. Faustus Socius wrote a book expressly against the Semi-Judaizers, while at the same time he strongly admitted that the point in debate between himself and them was of no great importance, since in his own view it was not necessary to salvation that a person should pray to Christ.

(2.) The name Semi-Judaizers was also given to a sect founded near the close of the 16th century by Martin Seidelius, a Silesian, who promulgated various strange doctrines in Poland and the neighboring countries. The chief points of this system were that God had indeed promised a Saviour or a Messiah to the Jewish nation, but that this Messiah had never appeared, and never would appear, because the Jews by their sins had rendered themselves unworthy of so great a deliverer; that of course Jesus Christ was erroneously regarded as the Messiah; that it was his only business and office to explain the laws of nature, which had been greatly obscured, and therefore that whoever shall obey this law as expounded by Jesus Christ will fulfill all the religious duties that God requires of him. While diffusing these erroneous opinions, Seidelius rejected all the books of the New Test. as spurious.

(3.) In Russia, also, a small sect of Semi-Judaizers, called Sabatiniki (q. v.), exists, which mixes up to a considerable extent Jewish and Christian rites.

Semakin (סְמִקָּע), or Junctions, is a Masoretic term to denote "approaching, belonging together, connection," of one word with another. Now, when two or more words are associated together through the addition or diminution of a letter or word, or by the interchange of words which are not in the habit of being joined in this manner, and if it only occurs so in one place, the Masorites remark thereon, מָסָּר, i.e. "not extant so joined." Thus, in דַּעְרֵה לָא, and corn and wine (Gen. xxviii. 37), they remark "not extant so joined," and thus the Masorah finals under the letter Vav, p. 28 a, col. 2, 3, gives a list of sixty-two pairs, both words of which have Vav conjunctive, and are without parallel. The same remark is made on בִּירוֹת, brizers, thorns (Isa. xxxvii. 4), since in all other places it is with Vav conjunctive. The sixteen pairs without the Vav conjunctive are given in the Masorah.

The same remark is made in דַּעְרֵה לָא, Sabbath, Sabbath (Exod. xvi. 28), since in all other passages in which these two words are joined they are inverted. Thus in ver. 28 we read דַּעְרֵה לָא, but everywhere else דַּעְרֵה לָא. A list of thirty-nine instances which occur in this connection is given by the Masorah in the part entitled Various Readings (דַּעְרֵה לָא). See Friedendorf, Ochelim we-Ochelam, § 235, p. 50, 189 sq.; § 255, p. 50, 188 sq.; § 278, p. 53, 147 sq.; Leviticus-Maasoret (ed. Gimsburg), p. 212 sq.; Buxtorf, Tiberias, sive Commentaria Masoretica, p. 258 sq. (B. F.)

Seminarist, a Roman Catholic priest who has been educated in a seminary.

Seminary-priest, a name given in England to Roman Catholic clergy during the 17th century, on account of their having been educated and prepared for holy orders in one of the foreign seminaries—e.g. Rheims, Douai, or Toulouse.

Semioφórous (Σεμιοφόρος), Greek term for a worker of miracles.

Semi-Pelagianism, the name invented by the schoolmen to mark the middle line of opinion held by the Pelagians (q. v.), on one side, and the predestinarian theory of Augustine, on the other. As early as A.D. 426 the monks of Adrametum, in Byzacena Africa, having read Augustine's letter to Sixtus (Ep. 194), were astonished at the doctrine therein propounded, viz. that men were disposed of entirely, either in the way of happiness or misery, by an arbitrary decree. To their structures Augustine answered by putting forth his two works De Gratia et Libero Arbitrio and De Corruptione et Gratia. The task of harmonizing these conflicting systems of theology was attempted by John Cassianus (q. v.), and he became the real founder of Semi-Pelagianism. Cassianus acknowledged the universal deterioration of human nature by the fall; but he assigned also an unlimited scope to the divine goodness and love that wills the salvation of all, and bends everything to that end. He expressly condemns the main position of Pelagius and his school. He claims that by this we give support to the profane notion of some who assert that the sum of salvation is in our own power, and by making everything to free will make the grace of God to be dispensed according to each man's merit (Coll. xiii. 16). He entirely ignores irresistible grace and absolute decrees of double predestination; while he holds the doctrine with respect to preventing grace agrees generally with that of Augustine. In fact, he cannot agree with those who make the gift of grace dependent upon human merit, nor with others who deny that man has any power in himself to originate good in his own heart. These opinions doubtless helped to form the doctrine like for the theory of irresistible grace and divine predestination. Stanch partisans opposed the Semi-Pelagians, the master-spirit among them being Prosper of
Aquitania (q. v.); while on their side we find certain great names, especially Vincentius of Lerius (q. v.).

In Cæsar's time, was directed principally against the doctrinal development of Augustine as being unsupported by the Catholic tradition of the Church (Voss, Hist. Pelag. i. 10). In this work he brought forward his three famous tests of the truth of a doctrine, viz., antiquity, universality, and general consent. An appeal to Cælestinus, the Roman bishop, against the Semi-Pelagians having been unsuccessful, Prosper published several writings in refutation of their doctrines; and upon the death of Cælestinus, he endeavored to prevail upon Sixtus, his successor, to reprim the Semi-Pelagians. Failing in this, Prosper wrote several tracts on the same subject and died after the middle of the 6th century, a question arose between Lucidus, a presbyter, and Faustus, bishop of Reims, in Provence. The bishop admonished Lucidus in person, and afterwards wrote him a letter, setting forth in brief terms his own view of the doctrine of grace. By the advice of the council held at Arles (476), he published a work on the disputed points, De Gratia et Humane Menti Libero Arbitrio. The book was answered a century later by Cæsarius of Arles in a treatise of similar title, De Gratia et Libero Arbitrio, which, however, is lost. In 520 some Scythian monks assailed the work of Faustus, and presented their confession of faith to the legates of pope Hormisdas in Constantinople, in which they affirmed their belief that the will of man was powerless for any other object than to “discern and desire carnal and worldly matters,” etc. They met with a cold reception from the legates, and fared no better with Hormisdas, to whom they appealed. A council was held at Araniso (Orange), in France, July 5, 529, at which twenty-five articles concerning grace and free will, and directed against the Semi-Pelagian doctrine, were drawn up, and subsequently confirmed by Boniface II. A similar expression of doctrine was made by a council at Valence, in the province of Vienne, but the problem remained unsolved how to reconcile the opposing motives—powers of grace and free will. Augustine continued to be regarded as the great light of the Western Church, although in the Middle Ages there was an occasional tendency to dispute his authority. See Hagenbach, Hist of Doctrines (see Index) I; Müller, in Herzog's Real-Encyklop. s. v. Neander, Kirchengesch. (2d ed. of 1844), ii. 1179-1217; Gardner, Faith of the Western Church (Anti-christianism) in Blunt, Dict. of Theology, s. v. See Pelagianism.

Semis (Σεμίς, v. g. Σεμις, Σεμίς, Σεμίς) a Gracized form (1 Esdr. ix. 23) of the name Shimii (q. v.) the Levite after the return from Babylon ( Ezra x. 29).

Semitic Languages. See Semitic languages.

Semitic Universalists, an appellation given by Mosheim to those Dutch divines of the Reformed Church in the 17th century who maintained that God indeed wishes to make all men happy, but only on the condition of their believing; and that this faith originates from the sovereign and irresistible will of God, so that the free, unconditioned election of man is not grounded on the hypothesis of a particular state, but rather on the universal and eternal efficacy of the divine love. They were sometimes called called Hypothetical or Conditional Universalists, and scarcely differ, except in words, from Infra-Calvinists (q. v.).

Semler, Johann Salomo, a German theologian in the latter half of the 18th century, who became notorious as the founder of the modern school of so-called neoclassical criticism of the Bible. He was born in 1725 at Saxard, where his father held the office of dean; and from his earliest childhood devoted himself to the study of the pietism of Halle. In obedience to its urgent exhortations, he formed the habit of earnest prayer. His student life at Halle, where he matriculated in 1748, was spent amid similar surroundings; but he failed to obtain peace of mind. He was specially attracted towards Munting's (q. v.) massive learning, but appears to have been even too little influenced by the Wolian logical schematicism of that scholar. He devoured books without digesting them, and obtained, as a principal result of his studies, a suspicion which subsequently became the fundamental principle of his system of dogmatical hermeneutics, the difference climax between theology and religion. In 1750 he was made a master, and soon afterwards began the congenial work of editing the gazette of his native town; but in the following year he was called to the chair of history at Altorf, and six months later to a theological chair at Halle. He delivered lectures on hermeneutics and Church history; and ere long reached the conclusion that "the historical interpretation really belongs to the first century as representing the sum and contents of the conceptions of that age, and must be distinguished from the present application of Scripture, as correctly interpreted, to the instruction of Christians of to-day." His discoveries were not without influence; they encouraged him to continued independence of thought, but warned him that he would thereby arouse the opposition of a class of people who might work material injury to his prospects.

On the death of Baumgarten, in 1757, Semler became the most prominent member of the faculty at Halle, and enjoyed an unequalled popularity despite the confusion, and even barrenness, of his deliveries. As he became bolder in the presentation of his views, he was violently opposed by the orthodox party—periodicals were filled with invectives, and ministerial associations entertained charges against him; but all this served only to increase his popularity, until none of his colleagues could venture to dispute his pre-eminence, though the list included such names as J. G. Knapp, Nösselt, and Gruner, J. L. Schulze, A. Freylinghausen, G. Chr. Knapp, and A. H. Niemeyer. In 1779 he wrote a reply to the Wofenbüttel Fragmentists, however, and also a critique of the Uberwiegentheit, in which he showed how the personal peculiarities of a teacher or any amount of personal excitement under the impression of his epoch, could beget the feeling of a distinctive unity in the theological-pedagogical seminary, on the ground that his recent course had astounded his hold on the confidence of the public. A number of writings from his pen, devoted, on the one hand, to the promotion of free thought, and, on the other, to the defence of churchly orthodoxy, were issued in the period immediately following, and did much to intensify the position raised against him from every side; and when he became a believer in alchemy, in the last years of his life, it was accepted by many as a proof of impaired vigor in his mind. He died in 1791.

Semler's criticism was directed against two points: (1) the traditional view with respect to the canon of the Bible; and (2) the ordinary treatment of Church history, particularly that of the earlier ages. His merit consists in having destroyed many errors in consequence of his investigations, and in having opened the way to more correct opinions.

1. Semler's Exposition of the Canon.—The traditional view regarded the canon as constituting a unit which is overthrown by the idea of inspired; and only the view that shook in his own mind by the studies of B. Simon, Clericus, and Wetstein, and also by his own investigations. He became convinced that the opinions of recent times did not correspond with those of the earlier
ages, and that theological views are subject to constant changes (his desultory mind was incapable of attaining to the idea of a progressive development in theology). With respect to the canon, he came to think that the original idea was not that of a fixed norm of doctrine which should be binding for all ages, but rather that of "a catalogue of the books which were read in the assemblies of Christians." These books were brought together through the force of accidental considerations rather than in pursuance of a definite plan. The early Christians desired to accept as divine those books of the Old Testament (whose version was already variously established by the Palestinian, the Samaritans, and the Alexandrians) which should be found in the Septuagint translation, the latter being regarded as inspired; and as the enumeration of canonical books belonging to the New Testament, varied in the early Church, the bishops, for the sake of uniformity, agreed upon a definite number of books which should be used as a canonica lectio in the worship of the Church. Semler's investigations into the character of the Old and New Testament texts likewise contributed to overturn the traditional idea of the inspiration of the Scriptures: for while that theory assumed that the teaching contained in the books had been handed down through the centuries to us, he urged that the Holy Spirit had himself caused a revision of the Scriptures by the hand of Ezra, and that it could not be supposed, in the face of historical and diplomatic data, that an extraordinary divine supervision had been exercised over copyists. He insisted, further, that the Scriptural writings show on their face that they were not intended to be a norm of doctrine for all men, since the Old Testament, was written for Jews whose religious apprehension was but limited, the Gospel by Matthew for extra-Palestinean Jews, that by John for Christians possessed of Greco-cuman culture. He argues that it was necessary to accommodate the teaching of Christianity to the needs of these various classes, which explains the appeal to miracles and the use of "stories" by Jesus and some of the apostles—the σαρξ, according to his opinion—and the emphasizing of the πνεῦμα by Paul. The latter apostle sought to adapt his writings to the Jewish modes of thought so long as he entertained the hope of gaining over the Jews in considerable numbers to the new religion—the Epistle to the Hebrews being an illustration; but he eventually abandoned this hope, and so became the first to make Christianity a religion for the world. The Catholic epistles, finally, were intended to unite the two ancient parties of Christendom—the Jewish and Gentile. To the conception of the historical criticism thus present in outline the results attained by the most recent Tubbingsen school. With respect to the Apocalypse, Semler regarded it as a sort of Jewish mythology—"the production of an extraneous dreamer"—and wrote much to demonstrate its unfitness for the place it holds in the canon.

Having postulated the theory of accommodation by which the Old Testament, and much of the New, lost their authoritative character, Semler was obliged to show what, if any, element of binding truth remains to Christianity after all that is merely local and temporary has been peeled off from it. Bible, he finds it is that which serves to distinguish man a moral being, but declares that even this cannot be comprised in any definite set of truths, since different individuals are stimulated to virtue by different portions of the Scriptures. Whatever develops a new and better principle, that leads to the veneration of God in the soul, is Christianity; and the same is true of the Christian alone (whether the latter to a greater or lesser degree) who can only be the expression of a moral judgment. He even thinks that nothing more than a difference in the form of expression is involved when the higher moral truths of Christianity are characterized as a revelation, or as a progressive development of the natural reason (see Schmidt, Die Theol. Semler's, p. 167).

It is evident that Semler's theories remove the last distinctions between Christianity and Naturalism or Deism; but he nevertheless protests vigorously against being classed with Naturalists, and it was zeal against Naturalism that had led him to enter the lists against the Wolfenbiittel Fragmentist and the Confession of Bahrdt, though he had previously (in 1759, in his "Konversations-Grundlehre," p. 24-57) reduced the distinguishing peculiarity of Christianity to a better morality. The solution of this contradiction must be found in the distinction Semler made between private religion and the publicly acknowledged teaching of the Church. He was open to religious impressions, given to prayer and the singing of religious hymns, and earnestly engaged in efforts to promote a Christian morality. He assured his students that an inward power, the peculiar privilege of those who possess a Christian knowledge of God, shall be realized by those who form the habit of prayer, and urged them to make the trial. It was, doubtless, through this early religious training that he condemned all interference with the authoritative established doctrines of the Church, though his separation of the faith of a private person from the teaching of the Church is open to the suspicion that he was too servile to sacrifice material prosperity in order to uphold a privately recognized truth. He boasted that a private scholar had the right to defend new opinions in the department of his labors; but that, as a teacher appointed by superior authority, it is his duty to follow the beaten track, when required, or else to resign his office. And it is certain that he thus expressed his serious convictions, and that his views in this respect grew out of his religious temperament.

2. Semler's Researches in Church History produced less durable results. He lacked the necessary qualities for thorough work in this field—a philosophical and profoundly Christian spirit, a philosophical and religious pragnamism, and especially an unbiased judgment. He brought to light an abundance of new material, however, and became the father of the history of doctrines; while his restless scepticism contributed towards a more satisfactory settlement of many incidents, and prepared the way for more unprejudiced views respecting many historical phenomena. His faults are, that he is incapable of rising above the conception of his own time of Christendom, and therefore prefers the arrangement by centuries; that he has no philosophical apprehension of dogma; and that he gauges past centuries by the tests of his own time—e.g. enlightenment and tolerance, liberality and morality. Being convinced that the character of private religion must necessarily differ with the multitudes of individuals, he is continually outraged to find all independence of private thought repressed by the power of the Church. Lacking a profound faith himself, he naturally stamps every appearance of mysticism as fanaticism; and as he is never able to escape the suspicion of piously cunning and of the Bible it impresses despite his the impression it leaves on the mind of Church history is but dreary at the best. The martyrs were people "whose minds were unshackled, monks and hermits were madmen, the bishops chiefly intrigues, Augustinian keen and crafty, Tertullian Highly odd and fanatical, Theodoret superstitious, Bernard sanctimonious." Pelagius and Jansenius established (with notes in 1775) meets with his approval. His method, too, was chaotic and confused, resulting in lengthy pref- aces and numerous additions, appendices, and supple- ments to his works, most of which suffer, in addition, from the absence of indexes, and even of tables of con- tents. He was, however, able to deliver four or five lectures per day; and yet he managed to write no less than one hundred and seventy-one
books, though but one or two of them passed into a second edition.

The views of Semler on the canon of Scripture and connected subjects are developed in numerous works, prominent among which are the Abhandlung vom freien Gebrauch des Kanons (1771-75, 4 vols.;—with which connect his Neue Untersuchungen über die Apocalypse (1776);—Vorberichtigungen zur Hermeneutik (1776);—Briefe zur Erleichterung der Privat-Religion der Christen (1784);—Von freier Unters. des Kanons.—Erklärungen über theolog. Themen:—Vorberichtigung auf die Königl. grossart. Aufgabe von d. Gottheit Christi (1787).—On Church history, Selecta Capita Historiæ Ecclesiasticae:—Vom Ersuchen eines Ausszug aus d. Kirchengeschichte:—Commentarius Historiae de Antiq. Christianorum Status:—Und Neue Versuche die Kirchenhistor. d. ersten Jahrh. mehr aufzuklären.

Senné (Σεμνή, revered), a Greek term for a nun.

Sennión (Σεννίων), a Greek term for a monastery.

Sennium (Σεννιον, a temple), a name given by Philo to places of worship of the Therapeuts (q. v.). He says, "In every one of their dwellings there is a sacred house or chapel, which they call their sennium, or monastery, where they perform the religious mysteries proper to their holy lives." (Bingham, Christ. Antiq. vol. vii, ch. ii, § 11).

Sennoes is afterwards to be called senatus, as Sicus shows out of Balzam, Methodius, and Suidas. See Bingham, Christ. Antiq. vol. vii, ch. ii, § 14.

Sennos (Σενός), a Greek term for a monk.

Sempsecta, a term for a monk who had passed fifty years in a monastery. He was excused from regular duties, and at Westminster and Cowland lived in the infirmary and had a young attendant.

Semphycrétas, in Greco-Egyptian mythology, was a being which represented Hercules in combination with the Egyptian Harmachis. It has been regarded as symbolical of the germinating period, in and through which germs make their appearance, or of the union of time and life.

Sempiternitas (Lat. semper, "always," and eternitas, "eternity"), an everlasting state of existence, having a beginning, but no end. It is used in speaking of angels and the souls of men in distinction from the eternity of God. See Hagenbach, Hist. of Doctrines, § 166.

Semple, Robert BAYLOR, a Baptist minister, was born at Rose Mount, King and Queen Co., Va., Jan. 20, 1769. After completing his academical course, he commenced the study of law; but having been induced to join the Baptist Church, he turned his attention to the ministry. On Sept. 20, 1790, he was ordained pastor of Brunswick Church, King and Queen County, which position he held until his death, Dec. 29, 1831. He is identified with the earliest efforts of the Baptist Church to send the Gospel to the heathen. He was a member of the first Baptist General Convention; president for a number of years of the Virginia Baptist Missionary Society; was a member of the General Association of Virginia, and president of its board of managers. He was also an earnest friend of the Colonization Society; and when the Columbian College in the District of Columbia became involved, he accepted the charge of its financial concerns (in 1827), accomplishing his difficult task with great discretion and energy. He published a Catechism (1809):—A History of Virginia Baptists (1810);—and various Memoirs and Letters. See Sprague, Annals of the Amer. Pulpit, vi, 305.

Senan Panthis, a Hindú sect which was established by Sena, the third of the disciples of Râmánand, but is now almost, if not quite, extinct. For some time, however, Sena and his descendants were the family gurus of the rajah of Bandogor, and from that circumstance enjoyed considerable authority and reputation.

Senā'īḥ [some Sena'āḥ] (Heb. Senaḥ, סֵנהָֹה, thorny; Sept. Σενα, Σενανά, Σεναγά, etc.), the name of a man (B.C. ante 445) whose descendants, or (more probably), if a town (but none like it is elsewhere mentioned), whose inhabitants (given in various numbers, all apparently exaggerated by erroneous transcription) returned from Babylon (Ezra ii, 35; Neh. vii, 38) and rebuilt the Fish-gate at Jerusalem (Neh. iii, 2, Heb. with the art. han-Senaḥ'; Sept. Sena'āvād; A. V. "Hasenah").

Senagón, in Hindú mythology, is a king belonging to the race of Children of the Sun, who is connected with the fables relating to the tyrant of Ceylon (Lanka), the noted Rāvāna, and consequently with the story of Rama. Rāvāna having demanded a vessel filled with honey and hoards of gold for his three devoted, he was thereupon assaulted and terrible, and vanquished by the gigantic demon in the territories of Senagón because it brought him trouble. Senagón found it, and discovered, and in it a beautiful child which he recognised as an embodiment of the goddess Lakshmi. She was subsequently married to Rama, an incarnation of her consort Vishnu.

Sénat, in French, the Senate, body of senators, either deliberative or legislative and by the Sept., for the collective mass of the Jewish elders, and later for the Sanhedrin) is used once in the New Testament. (Acts v, 21) for some portion of the Sanhedrin, apparently the elders, who constituted its main element. See Elders; Sanhedrin.

Senatorium, a place in some churches where are the seats appropriated to the use of emperors, kings, magistrates, and other persons of distinction. Some think that it is so called because the bishop and presbyters, who form the senatus of the church, were seated there.

Senault, Jean Francois, a French preacher and religious writer, was born at Aix, near Pontoise, in 1601. After studying at Douai, in 1618 he entered the then young congregation of the Oratory, and being denominated superior of the house, by his labors in the art of preaching, he was ordained a priest by an earnest study of the Scriptures, the Church fathers, and the best French authors. For forty years he preached with success at Paris, to the court, and in the provinces. He was made superior of the Seminary of St. Magdolle, and in 1662 was elected superior-general of the Oratory, an office which he administered graciously and with great prudence till his death, Aug. 8, 1672. He wrote several religious biographies and practical works, for which see Hoefer, Nouv. Biog. Générale, s. v.

Sendal. See Sendel.

Sendel, a kind of taffeta, frequently used of od is the making of ecclesiastical garments and banners. The clergy in 1434 were forbidden to wear their hair rolled with fur or sendel.

Senderling, John Z., D.D., a Lutheran minister, was born Nov. 12, 1800, at Philadelphia, Pa. In early life a teacher, for knowledge and a desire to be useful in the Master's service, he was advised to prepare for the Gospel ministry. In 1817 he entered Hartwick Classical and Theological Seminary, where he remained seven years. Immediately after graduating he was licensed to preach, and took charge of a small church in Clay Township, N. Y. In 1826 he went to Centre Brunswick, near Troy, and then to the city of Troy, where he remained till 1856, when he received a call as pastor of St. Paul's Church in Johnstown, N. Y.
spring of 1867 he resigned his pastorate, and lived a retired life until Dec. 20, 1877, when he was called to his rest. (B. P.)

**Seneca, Lucius Annaeus, was a teacher, rhetorician, philosopher, poet, essayist, epistolographer, naturalist, advocate, magistrate, and statesman, under the later Roman emperors of the adjective Julian house. It is in the character of philosopher that his reputation has endured through all subsequent times. This reputation has been preserved, as it was generated, mainly by the piquancy of his style, the terseness of his expression, the incisiveness and the epigrammatic felicity of his phrase, and the constant ostentation of an earnestness which was, in some degree, factitious, and of a profusion of which it is apparent that his contemporaries and his posterity could not restrain. His renown was secured, or by whatever accidents it was perpetuated, the name of Seneca has ever continued the most notable and the best known in the scanty catalogue of Roman philosophers, and of Romans pretending to philosophy. There has been no period in which any smattering of letters survived when Seneca was not admired and cited. His own profession, "Nulla dies sine linea," has been applicable to him in many forms. The fathers of the Church, the schoolmen of the Middle Age, the poets of the Renaissance, and their corvillas the Elizabethan dramatists, had all frequent recourse to Seneca, and Shakespeare was reproached with his too apparent use of the contemporary history of gnomes and maxims. In his own day, Seneca occupied a conspicuous station. His abilities merited a very high position, and his accomplishments accorded with his abilities. He obtained the quiescence and the pretorship in the official hierarchy when these honors were conferred by imperial favor. He was the instructor and chief minister of an emperor whose excesses and atrocities have made the name of Nero a synonym for all that is brutal and heartless in despotism, desplicable in license and vanity, and unparalleled in crime. He lauded frankness and simplicity (De Tranquil. Anim., i, 5–6; Ep. ii, 9), and echoed the desire of Property:

> Utinam Rome nemo esset dives; et ipe Straminea possidet dux habitare causa.

But while eulogizing cottage life—"domus haec sapientiae augusta, sine cultu, sine strepitu, sine adparatur" (De Constant. XV, v)—he passed his days in splendid villas and in palaces. He professed the wise man's indifferency to the hazards of life, the caprices of fortune, and the conditions of existence, but he felt in all the spirit of the contemporary spirit. He abjured the name of Roman sybarite, and prayed the blessings of obscurity in the press of courtiers, of whom he was the chief. He strenuously opposed poverty, but he more sedulously increased his millions, and is charged with provoking the most serious of British revolts by the sudden recall of his wasteful loans. These contrasts were human weakness—"mor talibus moes ex magnis majora cupiendi" (De Brevif., III, ii, 2)—but they were not the sage's triumphs over human infirmities and worldly temptations. He addressed his treatise On Clemency to Nero, but he disregarded, if he did not sanction, the poisoning of Claudius; he justified the assassination of Agrippina by his son, and he failed to prevent the divorce and murder of the emperor Octavia. He might well exclaim, "Mali inter malos vivimus" (De Ira, III, xxvi, 4). Could he find an excuse in another of his sayings, "Manseue immansueta tractanda?" (ibid., xxvii, 3). He extolled on the evils of war, and wrote at great length On Benevolence, but he enriched himself by imperial confiscations. He exulted in the perfect freedom of the true philosopher, and cringed to the freedom and missions of an imbecile and semi-idiotic sovereign (Consol. ad Fug.).

**Dion Cass., LXI, x). He was prominent among the Stoics of the time, whom he patronized by his countenance; he was esteemed by the Stoics as the satellites and profligates of the court, whom he rebuked by his precepts, but did not stigmatize by his retirement. In all things he was a rhetorician and an actor. His literary productions glitter with the coruscations of unintermitting paradox and antithesis; but the paradox of his tenets and the antithesis of his style are less novel and less startling than the contrasts between his profession and his carriage, his principles and his practice (pænula tæ inanissima oüs ἴδωσι βου ὑπερ 〈γέγραφη διόν υπολογισμοῖς 〉). The image and example of his life were his bequest to his friends. They should have been accompanied with the epigraph,

> Defecit prudentia aris ab arte mea.

At the first contemplation of these strange anomalies we are inclined to say, "tota vita mentitur" (Ep. V, iv, 10)—his life was all a lie. But much that is contradictory, much that may invite the sternest reprobation, may be palliated by regarding the times, the difficulties of the situation, and the artificial and discolored lights under which all is seen. Such discrepancies, however, between the philosophy and the conduct cannot fail to stimulate curiosity and to require cautious estimation.

**I. Life.**—L. Annaeus Seneca was the second son of M. Annaeus Seneca, the rhetorician, and the author of the **Controversia», for the instruction of his son, on the art of rhetoric. His elder brother, Gallio, proconsul of Achaea at the time of Paul's visit, had assumed the name of the distinguished advocate Junius Gallio, by whom he had been adopted. His younger brother, L. Annaeus Mela, was the father of Lucan, the poet of the Pharsalia. Marcus Annaeus Seneca, the founder of the family, was a citizen from Corduba, in Spain, and of the equestrian order. He was wealthy, reputable, accomplished, and noted for his wonderful memory. He took an eminent position at Rome as a teacher of rhetoric, and lived to be an octogenarian. His illustrious son was born at Corduba, but was transferred to Rome in early life, and was educated there under his father and Paprius Fabianus, Attalus, and Sotion. Fabianus he mentions frequently in his works with respect and affection. By Sotion he was initiated into the mysteries, vagaries, and eccentricities of the Pythagoreans. Seneca was so earnest in his abstractions and in his renunciation of animal food that he became emaciated and endangered his health. By the urgent persuasions of his father he abandoned his fasts and vigils, and turned from the pursuit of severe philosophy to the business of life. He adopted a forensie career. The remains of Seneca attest his abilities, the breadth of his culture, the diversity of his acquirements, and the range of his fancy. In his letters and reflections, the fluency and perspicuity of his style. He soon rose to eminence and lucrative employment. He became questor, at what time is unknown, but probably in the middle of the reign of Tiberius. Under Caius his life was nearly cut short. Jealousy of his talents, envy of his distinction, apprehension of his sentiments, hatred of his opinions and associations, or more adequate provocations, excited that insane and furious emperor's hostility, and he was designated for execution. By adroit intervention he was spared, on the representation that he would soon sink under disease. Two years later Caligula was murdered, but the opening of the new reign was insipidous to him. Claudius banished him to the serele and inhospitable island of Corica—"Horrida desertis undique vasta locis." Messalina suspected his intimacy with the emperor's nieces, Agrippina and Julia, and alleged an intrigue with the empress. Seneca was safer and more innocent on the most inhospitable coast than in the company of any of these infamous sires. He had already addressed his treatise On Anger to his brother Novatus, who had not yet become Gallio. Little of his fortitude, and nothing of the tranquillity of the philosopher, were displayed by Seneca in his exile. In the first period at Capri he wrote the **Constitution to Helvia**, his mother, to calm her natural grief at the violent and hazardous separation. It abounds in
showy sentiments, in exquisite expressions, in whole-
some but exaggerated reflections, which fall upon the
expectant ear like the sound of hollow brass. His equa
minity is belied by his effort to discover, to multi-
ply, and to adorn reasons for equivocity. The imprau-
sion is irresistible that the affected contentment of the
sage is only the triumph of the rhetorician, and intend-
ent to attract public admiration and sympathy. This
unfavorable effect is deepened by the Consolation to
Pobjius, also composed in the Cosircan seclusion, and
written as a proof that the powerless freedman of Claudius to comfort
him on the loss of his brother, and to invoke for his-
self the commiseration of the libertine and the favor of
his master. The wise man, who, like Ovid, had be-
moaned the miseries of banishment in elegiac verse,
declared that, under Claudius, “the life of exiles was
more tranquil than that of princes under Caius.” He
enlarged upon the resplendent qualities of the stupid,
misled, blundering pedant on the throne, whose pum-
kinned faction he was to celebrate after his death in bitter
satire. The intense servility and adulation of the twen-
ty-sixth chapter of this discursive Consolation has
often attracted remark; but it has high literary merits.
After eight years not unpleasantly spent, Seneca was
recalled from his exile. The new empress, Agrippina,
mindful of old intimacy, or anxious for additional sup-
port, summoned him from the sterile rocks of Corsica to
the luxury and license of the imperial palace. He
was advanced to the preetorship, and appointed tutor to her
son, the young, handsome, promising Domitius Nero.
He knew the prince well. What might not be anticipated from the disciple of Seneca?
It was very shortly before the acceptance of this charge
that he had written the Consolatio ad Marciam on
the death of her son. It was apparently followed by
the disquisition On Tranquillity. Unreality of emotion
characterizes both works. Marcia was the daughter of
Cremutius Cordus, the republican historian of the last
civil wars. Her son, for whom she was tardily con-
solled, had been dead three years. The praise of intel-
lectual calm came with a suspicious air from one who
had been fretting and moaning in obscurity for eight
years, and was ready to welcome the bustle and extra-
avagance of the court. There seems to have been no hesi-
tation in accepting the proposals of Agrippina to for-
sake tranquillity. She was scheming to advance to
the throne a son of whom her father had said that noth-
ing but a monster could spring from such parents. The
throne was secured by poisoning the old and uxorious
emperor on the same prerogative day as the pri-
ministrator under Agrippina, with Burrus as head of
military affairs. The first service of the political or
political philosopher was to compose for his pupil a ful-
some laudation of the murdered prince, whose memory
he lampooned himself. The Neronian lands were so
highly appreciated that the senate directed them to be
inscribed on a pillar of silver, and to be read by the
preetors when they entered on their office. When Nero
had been a year upon the throne, his younger colleague,
Britannicus, the son and true heir of Claudius, was
removed out of his path—perhaps by poison, though this
has been disputed for seventeen years. A more opportu-
nate moment, Seneca addresses to his imperial pupil the notable trea-
tise On Clemency. What was the demand for it, un-
less cruel dispositions had been manufactured? How
could they have been carried into effect unless by the acqui-
escence of Seneca, who was now in the height of his
power? (Tacitus alleges (Ann. XIII, xi) that he pub-
lished a few lines explaining a Neronian scene under the
inscrutabiliter "testificando quam honesta precipere, vel jactandi
ingenii." Seneca is charged with encouraging and excusing
Nero’s amour with Acte with scarce worse excuses.
The offence was venial in comparison with other sub-
scenes; however, it inflamed and inflamed the growing hostility between the mother
and the son. Public affairs continued to be conducted
quietly and prosperously, and Seneca has reaped the
honor. The calm was only on the surface. A few
years later, the indictment of Sullius, under the anti-
quated Cinsian law, brought discredit upon Seneca, who
appears to have been active in the prosecution. Suilli-
lius, in his defence, turned savagely upon him—charged
him with having been the guestror of Germanicus, and
with having corrupted his daughter none the less; de-
manded by what wisdom or by what precepts of phi-
losophy he had accumulated such a vast estate in four
years; and accused him of having seduced rich and childless men, as with a net, and for ex-
hausting Italy with his usuries (Tacit. Amm. XIX, xili).
The arts of the infamous Poppea Sabinia widened the
breach between Agrippina and her son, and the trust
and influence of Seneca sickened with the declining au-
thority of Agrippina. He was alarmed and jeopardized by the unnatural combat. The mother sustained the
rights of the injured empress Octavia; the son yielded
to the wiles of the sorceress Poppea Sabinia, whose vic-
tory portended the utter overthrow of the maternal su-
prenacy. It was a conflict to be terminated only by
the death of Nero or of Agrippina. The mother, by
whom crimes he had secured the throne, was the vic-
tim. It was generally credited that Seneca and Burrus
assented to the matricide, though they devolved the ex-
ecution on other instruments. Seneca has been accused of
suggesting the crime to regain Nero’s confidence. That he defended it has never been denied, and admits no
exculpation. A later minister of Rome welcomed death with the words: "It is within his control to get rid of a
less atrocity; but the meanness of Seneca’s com-
licity in the crime sustained him in his position, if not
in his full ascendancy, for a few years longer. He
was still the first subject in the empire, the most promi-
inent of the imperial ministers, when the "Quinquennium
Neronis," the first five years of the new reign, was cele-
brated by the Quinquennal games. The imaginary felicity of these years was long a memory and a regret
to the Roman world, and posterity has accepted the im-
pression which was then made. To Seneca has been
assigned the credit of those halcyon days. Yet Brit-
nicus had been suspiciously removed; Agrippina had
been murdered by her son, and Seneca had justified the
murder; Poppea Sabinia had supplanted Octavia, and
subverted her subsequent divorce and assassination.
The Quinquennium Neronis was a theatrical illusion—a
hypocrisy of brief duration. With the death of Burrus
(A.D. 69), the scene rapidly changes. The marriage of
Poppea was declared null and void, and the impera-
tor, now son of the young and innocent empress Octavia at the
age of nineteen, and the final overthrow of Seneca’s in-
fluence were nearly simultaneous—"Mors Burri infregit
Senecas potentiam" (Tacit. Amm. XIV, lii, 1). About
the same time, Paul was brought as a prisoner to Rome,
on his appeal to Cesar. Signs and portents, on earth
and in heaven, terrified the superstitious. Earthquakes
and bloody comets spread distress and consternation
and pestilence succeeded. In the second summer after
the murder of Octavia, the fearful conflagration which
led to the persecution of the Christians and the martyr-
dom of St. Paul occurred. The“Infernal" was published
for six days and seven nights. During these years,
Seneca’s influence had vanished, and his peril had been
ever before him. The avowements of Nero “that he
would perish rather than injure him” (Sueton. Nero.
nxx) were scarcely reassuring. A convenient ambigu-
ity may be detected in the phrase. Seneca begged for his
life, for his family, for his friends. He pleaded for his
city and his vast estates, his five hundred ivory-footed chairs of
citron, his three or four millions of substance (Tacit.
Amm. XIV, liv; Dion Cass. LXI, x). His entreaties and his offers were disregarded, but he sought an ot-
entatious seclusion. He endeavored to conceal himself
under the name of Agrippina, to escape the scurrile
criticisms of his youth; he seemed oblivious of human
affairs, and to hold communion only with philosophy

Digitized by Google
and with his God. “Deo parere, libertas est” (Senec. De Vita Beata, xv, 7). To these years of solicitous obscurity belong his best and most characteristic works—the treatises De Providentia, De Breviitate Vitae, De Vita Beata, De Beneficiis, the Letters to Lucilius, and the Natural Questions. The danger so long foreseen was not averted by philosophical pretensions or by rhetorical homilies. Seneca, whether justly or not, was believed or declared to be involved in the conspiracy of Calpurnius Piso. Was he guilty? The recorded evidence is wholly inadequate. The probabilities alone convict him, and guilt in this case would be the most innocent of his criminalities. He knew his own peril; he knew the persistent and unceasing vehemence of Nero’s passions were unleashed; he had been cognizant and acquisitent, perhaps active in some cases, in the murder of Claudius, of Agrippina, of Octavia, and probably in many more assassinations. There is no appeal for him from his suspicion’s life to his sentimental morality, however lofty, pure, and fascinating. He was ordered to die, and the same decree was issued against his brother Gallio (but see Tacit. Ann. LXV, lxxiii) and his nephew, the poet Lucan. The fatal mandate was promptly obeyed, but his death was lingering and painful. The history of Seneca became more or was more consistent with his philosophy than his manner of leaving it. There was something of parade—something of the vos plaudite of a classic comedy; but the ancients were always actors, and the ostentation of philosophic calm and indifference had been the habit of Seneca’s life, and could not be wholly abandoned in the last act, when the situation was so tragic and imposing, so apt for one of his own dramas. The story of Seneca’s serene and lingering death is told by Tacitus (ibid. LXV, lix-lxiv) with elaborately art and with the most adroit chiar-oscuro. It is one of the most finished of the numerous delineations of the consummate artist, and has furnished the exemplar for many inferior imitators. The story has been so often repeated, and so familiar, that it need not be reiterated here; but a suspicion remains that some of the touches of the painter’s brush have no better justification than there was for the loose rumor reported by him that the conspirators had designed, if successful, to elevate Seneca to the throne of the Caesars.

II. Writings. The literary remains of Seneca are in both prose and verse. The prose productions and the moral essays, fragments of such essays, one hundred and twenty-four Letters to Lucilius (which are themselves essays), the Ludus de Morte Claudii (or Apocolocyntosis), and seven books of Natural Questions, or speculations in natural history. The Apocolocyntosis is a medley of prose and verse, but its authorship is doubtful. Seneca’s poetic consists of nine epigrams—seven of them of the exile—and ten tragedies, one of which (the Octavia) cannot have been written by him, while it remains uncertain whether he wrote any of them. The merits and defects of Seneca’s style may be gathered from the incidental remarks already made. It may suffice at this time to quote the last extant of the emperor Caesar, “Arena sine calce,” and to approve the equally brief and accurate criticism of Quintilian, “Abundat dulcis dulcis vitia.” It is always affected, it is always pointed, it is always attractive, it is always radiant; but it is a string of artificial gems, not of “Orient pearls at random strong,” or of genuine diamonds.

There are some old fabrications ascribed to Seneca, which should not be left altogether unnoticed. One of these is the treatise De Formula Honesta Vita, which was constantly cited as his in the Middle Ages, but is now attributed to Martinus Dumiensis, a Christian writer contemporaneous with Justinian. The other is the imaginary correspondence between Seneca and Paul, which was known to Sertorius, but letters are indisputably spurious; but an acquaintance between the pagan moralist and the Christian missionary is not without probability, though it is without evidence. The belief in such acquaintance, and the favorable acceptance of the Letters by Jerome and Augustine, encouraged the fancy that Seneca had been converted to Christianity. More deserving of consideration than the probability of such intercourse is the close agreement between many passages in the writings of the Roman philosopher and in the Epistles of the apostle, and the singular consonance of the maxims of the Stoic rhetorician with the precepts of the evangelists and apostles. This significant concord has been commented on by several especial care, by Dr. Lightfoot, the new bishop of Durham. The parallelsisms are most frequent and most startling—of course in ethical rather than in theological matters. Almost equally suggestive is the fact that the ethical productions of Seneca are much after the fashion of sermons and homiletic discourses—preaching a purer faith, a cleaner heart, and virtuous action in the midst of a corrupt and unbelieving generation. An obvious explanation is that which induced the supposititious correspondence between Seneca and Paul. When this is rejected, it is easy to presume the diffusion of Christian doctrine by constant communications of all kinds between the several parts of the empire, and certain that Christian influence was early discernible at Rome, and has been detected in the contemporaneous Roman law. There was a Christian community in the palace at an early period. But this does not explain all. During the whole lifetime of Seneca there was an earnest and widely extended movement in the line of moral renovation, which was illustrated by the growth of Stoicism at Rome and the expansion of its doctrines, by the tenor of the writings of Philo-Judeus, by Sibyline forgeries, and by the memorable career of Apollo- nius Tyaneus, which has been disguised and obscured by the flames of history, but which, equipped with a reverential interpretation of “the ways of God to man” to conjecture that the miseries of the civil wars which had spread from Calpe to the Euphrates, the consequent disintegration of society everywhere, and the general dissoluteness which those wars had engendered, produced, along with the decay of the empire, the desire of the need, a solicitude for the accomplishment, and attempts at the introduction, of a religious regeneration. Such a condition of the mind and heart of the nations would be a natural preparation for the reception and diffusion of Christianity. Nor does it seem alien to the course of Providence, who never effects great changes per saltum, and to whom “a thousand years are but as a day.”

III. Philosophy. No distinct scheme of philosophy can claim Seneca as either its founder or its systematic expositor. He only enlarged the lines, adorned the percepts, and amplified the spirit of the philosophy which he set out to show and defend. He has always been so regarded, and is recognised as such by Zeller, Ueberweg, and the other historians of ancient philosophy. It is therefore needless to dwell upon his doctrines. They are those of the Stoics (q.v.). But Seneca was much more and much less than a Stoic of the old and rigid school, and much of his favor in his own and in later times may be attributed to the excess.
and the defect. He was thoroughly unsystematic and discontinuous. He indulges in no speculation to establish or to fortify the theory. He employs the current tenets of Plato, as well as those of Seneca, to form a broader comprehension than Zeno or Chrysippus. He was latitudinarian in his sentiments. He applauds the character, commends the ethical doctrines, and cites the maxims of Epicurus. He inclines to the large intelligence of the Peripatetics, and emulates the spiritual aspirations of the Academicians. Philosophy, in his conception, is a moral system and reveals only in the closet: it was the rule of life in the midst of distractions and temptations, of uncertainties and dangers—a refuge for the troubled mind, a shelter from suspicion and envy, a defence against tyranny, and the balm of a serene conscience (De Beat. Vit. xxv).

Philosophy has been, since the Christian revelation, so distinct from religion, or so completely identified with it, that it is not easy to appreciate its character, its charms, and its value in those ages when it was the sole substitute for revealed truth—when from its dark, intricate, and insoluble problems alone could be expected vague hopes and vaguer aspirations, where Christianity afforded absolute assurance to the cultivated and inquiring pagan. Philosophy was pursued as the guide of life, the moderator of prosperity, the solace in adversity, the oracular response to the eager questions which the earnest heart and intelligent mind are ever asking about here and hereafter—about the world, its origin and its governance; about man, his duties and his destinies; about all that lies beyond the dark veil of death and the darker veil of birth. This is fully manifested in Seneca's invitation to Paulinus to seek "the shady spaces of divine philosophy" (De Brev. Vite, xix, 1, 2).

Philosophy offered many inducements to its pursuit or its pretense under the early empire. It was a discipline of mind and heart to those of gentle disposition and refined tastes whose easy circumstances in life relieved them from the necessity of public or professional vocations. Hence philosophy grew into a fashion, and the fashion, like all fashions, moral or religious, was often perverted into a cloak or a pretense. Under the pressure of despotic rule, slight differences become symbols of political faith. At Rome, Stoicism associated itself with regrets for the republic, with a mild, inert aversion to the empire, or with a more decided antipathy to the emperor. Lord of himself, the Stoic renounced the independence of man by governments or by fortune. He yielded his pretensions, afforded little offence to the constituted powers. The sober sovereignty of the Stoic had its single throne within in his own bosom. There he, too, was emperor; he cared for naught beyond. He had thus the credit of independence, without assuming the complexion of a conspirator or a revolutionary. Every age illustrates the facility with which prevalent principles shrivel up into empty forms. Loud professions may disguise hollow sentiments. Sentiments accordant with the professions may be sincerely entertained, and yet produce neither earnestness of feeling nor constancy of action. Men will then die for their avowed and not for it. Genuine martyrs may be found who would scarcely practice what they die for. Their faith in their profession—"Cum verba erupit, adeptus ad consuetudinem labuntur" (Senec. De Brev. Vit. vi, 3). Such was Seneca. Augustine's comment on his boast of independence may be applied to most of his virtues: "Agit autem ipsum imperfectum, quod prae tota reconditissima..." (Epist. 107, 1). To this danger he was peculiarly exposed. He was courtly in manners and courtly in associations, amiable and impressive in disposition, serene and averse to violent emotions; of affectionate and placid temperament, rather than of deep and solid nature; vain rather than modest, insensible to the suffusion of his birth, his home influences, his education, his vocation, his career, his experience in either fortune, led him to deem that best which was most plausible or most secure. He was the son of a great rhetorician, brought up in the schools of the rhetoricians, destined for a rhetorical career of easy profit, distinction, and promotion by rhetorical displays. Rhetoric was the passion of the time; he was not constituted to despise it. He declared, "Oratio sollicita philosophum non decet" (Ep. XIv. v, 4); yet his expression was always curious and surprising. He has given us the maxim, "Qualis vir, talis oratio." It may be justly inverted, Quaïlis oratio, talis vir. All that remains of Seneca shows that he was nothing if not rhetorical. The tартness of expression, the compression of phrase, the fertility of fancy, the paradox of thought, were ever uppermost in his mind. These things did not make him false, but unreal. They did not make him insincere, but superficial. His prolixities were good, but evanescent in action. He had the fragility of the man who looks to form and fashion, not to substance. This may explain the contradiction between the ethical theory and the personal morality of Seneca. An instructive parallel, on a lower plane and with narrower exorbitancies, is furnished by the contrast between the character and the Night Thoughts of Edward Young. It is a perilous and doubtful task to unravel the depths of the human heart; to reconcile the complex and often unconscious duplicities of human nature; to decide where delusion ends and deception begins; to estimate the force of temptation and to disentangle them; to discern the subtle harmony which binds all the parts of life together, and may unite general purity and noble appetites to grievous frailties and ignoble crimes. None but the All-seeing One, "to whom all hearts are open, and from whom no secrets are hid," can pierce the obscure mazes of human motives. The harsh, censorious, confident, sweeping, unrestricted judgment of them will blunder, whether it praise or blame—"Ut absolvatis, ignoscete" (Senec. De Benef. VII, xxviii, 3). Was it a cry from his own lacerated conscience when Seneca exclaimed so truly and so sadly, "Magnus humanum pecus recenserus habet!"

IV. Literature.—The historians of ancient philosophy and the Works of Seneca, of course. See also Lodge, The Life of L. Annaeus Seneca, described by Justus Lipsius, in the Works of L. Annaeus Seneca, both Morav and Naturalis (Lond. 1614); La Grange, Vie de Seneque (Paris, 1819); Aubertin, De Sop. Doctoribus qui a Cn. Martio ad Neroem, Prenses. Romae Reserunt. Bernhardt, Die Anschauung des Seneca vom Universum (Wittenhardt, 1861); Seidler, Die religio-sittliche Weltanschauung des Philosophen L. Annaeus Seneca (Frau- stadt, 1865); Dourff, Du Stoicisme et du Chrétianisme, etc. (Paris, 1863); Montée, Le Stoïcisme à Rome (ibid. 1865); Martha, Les Moraliades sous l'Empire Romain (ibid. 1866); Labit, Apigramma, Die Mutter Nero's (Berlin 1867); Lightfoot, Essay on St. Paul and Seneca, ap. Comm. on the Epistle to the Philippians; Westminster Rev. July, 1867, No. clxxiii, art. ii; Merivale, Romans under the Empire (Lond. 1860-62). (G. F. H.)

Senectus, in Roman mythology, a personification of old age. He dwells at the entrance to Hades.

Senex. See Bona.

Se'nech (Heb. Sheen, 775,271,273,279,287; Sept. Σενεχα [Vat. Ερωματ, Alex. omits]; Vulg. Sene), the name of one of the two isolated rocks which stood in the "passage of Medinet Habu" (Deut. xxxii, 43), more ancient than and his armor-bearer (1 Sam. xiv, 4). It was the southern one of the two (ver. 6), and the nearest to Gela (A. V. "Gibeah"). The name in Hebrew means a "thorn," or thorn-bush, and is applied elsewhere only to the memorable thorn of Horeb; but whether it re- fers in this place to the scholar of the growth of senex upon it, we cannot ascertain. The latter is more consistent with analogy. It is remarkable
that Josephus (War, v. 2, 1), in describing the route of Titus from the north to Jerusalem, mentions that the last encampment of his army was at a spot "which in the Jews' tongue is called the valley" (or perhaps the plain) "of thorns (σκαρφαλών), near a certain village called Gabathaouelé," i.e. Gibeah of Saul. The ravine of Michmash is about four miles from the hill which is usually considered certain to be that of Gibe-
ya. This distance is perhaps too great to suit Josephus' expression; still the point is worth notice. — Smith. Between Jeba, or Gaba, and Mucma, or Mich-
 mash, there are two narrow and deep valleys, or gorges, running nearly parallel towards the east, with a high, rocky, and precipitous ridge between them. These two valleys unite a little lower down, and a little to the east of the direct line from Jeba to Muckma. This is the passage of Michmash alluded to in 1 Sam. xiii, 23; Isa. x, 28, 29. The ridge between the two valleys has two steep or precipitous sides, one facing the south towards Gaba, and the other facing the north towards Michmash. These were the "sharp rocks" or precipices called "Seneh" and "Bozez." The two valleys are still called Suweineh and Buweizheh. Jeba stands on the south side of Suweineh, on the very edge of the valley, and Muckma on the north edge of Buweizheh. Lieut. Conder regards the valley of Suweineh itself as a trace of the name Seneh, and thinks its opposite wall was searched by Jonathan (Quot. Statement of the "Pal. Expl. Fund," April, 1874, P. 62); and graphically describes the descent of his own surveying party down the rocks (Text Work in Palestine, ii, 113). See Bozez.

Seneš (old men), a name given to the primates of the Christian Church in Africa. Here the primacy was not confined, as in other places, to the civil metropolis, but always went along with the oldest bishop of the province, who succeeded to this dignity by virtue of his seniority, whatever place he lived in.

Seneschál, a monastic name for a steward. His duties were to seat the guests in the guest-hall, send presents to strangers of degree, and in some cases to have charge of the bishop's palace. The same name was given to stewards of the year or months, minor canons, or clerks, who catered for the bishop.

Sengler, Jacques, a Roman Catholic divine of Germany, was born at Husenstamm, near Frankfort-on-the-Main, Sept. 11, 1779. When twenty years of age, after having learned the trade of a shoemaker, he entered the gymnasiurn at Frankfurt. In 1824 he studied theology at Tubingen, under Mohler, and in 1828 he attended the philosophical lectures of Schelling at Munich. In 1830 he commenced publishing the Catholic Church Gazette for Germany, and numbered among his contributors, besides Dillingner and Fischer, such Protestant divines as Hoffmann, Weiss, and others. In 1821 he went to Marburg as professor of philosophy, where he remained for seven years. He signed the terms with his Protestant colleagues, Hufeld, Kling, Henke, J. Muller, etc. In 1842 he was called to Freiburg, where he lectured for thirty-six years, and where he also died, Nov. 8, 1878, five days after having retired from his office. As a philosopher, he tried to harmonize speculation with Christianity; as a Roman Cath-

so-called "peace in the Roman spirit of exclus-

Sengumara Brāma, in Hindī mythology, is one

of the most ancient sages and princes of the human race. He was contemporary with king Druven, a grandson of the father of all who have been born, and gave to him his only daughter Bravīmame in marriage.

SENG-WAN-MAU, in Chinese mythology, is the supreme deity of the Chinese, which is composed of nothing, is created from nothing, and does or thinks nothing, though, as conceived of, is not without exalted divine attributes, e.g. incomprehensibility, omniscience, justice, etc. He is seated in the highest heaven, and thence looks down in immovable quietude on the do-
ings of mankind. He is never pictured, because no conception of his form is possible; but there are a number of inferior gods, who preside over every rank of men, over every human occupation, city, etc., who are portrayed in every imaginable form, in clay, stone, wood, etc. These gods are subordin-
ate to Seng-Wan-Mau, and are the rulers of human affaires, so that man's destinies, his weal and woe, are committed to their hands. Their images are worshiped, but they are also broken into fragments when the gods fail to gratify the wishes of the wor-
shippers.

Senior (1), a monk from the age of forty to fifty years who was excused from the external offices of provisor, procurator, cellarer, almoner, kitchener, master of the works, etc., but took his turn in singing masses. (2) The head of a college of secular canons, as at Aosta, Hauz, Hertogenbosch, Trent, Liibeck, and in some Italian cathedrals, the antians, or senior, corresponds to the archpriest of certain French cathedrals, in which he acted in the bishop's absence as his representative in the administration of sacraments and the benediction of ashes, palms, and the font. Such an arch-

priest was required in every cathedral by the Coun-

cil of Merida.

Senior Bishop. In the Protestant Episcopal Church, the bishop who is oldest in the order of con-
secration is thus known. The senior bishop is presi-
dent of the House of Bishops, and has certain duties committed to him by the general constitution and canons of the Church. Except in case of infirmity, he con-

secrates the newly elected bishop; he also receives the testimonial of a bishop elect, in case of such election taking place during the recess of the General Conven-
tion, and transmits them to all the other bishops for their consent or dissent. Special general conventions are called by his summons on consent of all the bish-

ops; the constitution of any general convention may be changed by him. This plan of deciding as to presidency was adopted in 1789; but in 1792 a different principle was adopted, viz. that of rotation. This con-

tinued only for a short time, and the order of seniority was again established.

Seniority. See Senior Bishop.

Se'ni'r (1 Chron. v., 23; Ezek. xxvi., 9). See Shé-

Senlis, Councils of (Concilium Silvanetense). There were several councils held in Senlis, which is a town in the diocese of Oise, France.

I. Held in 873 by the bishops of the provinces of Sens and Rheims, in which Carloman, the son of King Charles the Bald, was brought to judgment, deposed from every ecclesiastical dignity, and reduced to lay communion, on account of his treasonable and other evil practices, 1009, ix. 257.

II. Held Nov. 14, 1255, by the archbishop of Rheims and six of his suffragans, who put the whole of the king's domains within the province of Rheims under an interdict. See COMPÈTÈNE, SYNOpoS.

III. This council was held in 1810 by Philip de Ma-
rigni, archbishop of Sens. Nine Templars were con-
demned and burned, denying in the hour of death their
confession of guilt, extorted from them by torture. See Dubois, Hist. of Parts, p. 551.

IV. The fourth council at Sensis was held in 1315 or 1316 by Robert de Courtenay, archbishop of Rheims, and his suffragans, in which Pierre de Latilly, bishop of Chalons-sur-Marne (accused by Louis Hutter of the death of Philip le Bel, and of another murder, and imprisoned) demanded his liberty and the restitution of his property. Subsequently he was entirely Justified of the charge, and was left in quiet possession of his bishopric. See Mansi, xi, 1632.

V. Held in 1326 by William de Brie, archbishop of Rheims, with seven of his suffragans (present either in person or by their deputies). Seven canons were made.

1. lays down the proper forms to be observed in holding councils.
2. Declares excommunicated persons to be incapable of suing at law, of defending themselves, and of giving evidence.
3. Excommunicates those who violate the asylum afforded by churches, either by dragging away forcibly those who have taken refuge there, or by refusing them protection.
4. Against clandestine marriages.
5. Against those who impede ecclesiastical jurisdiction.

See Mansi, xi, 1678.

Sennachrib (Sana'a), an encampment of the Romans under Titus, thirty fallages from Tiberias, which was in sight (Josephus, War, iii, 9, 7); perhaps the Sennasrasi (סנאסורasi) or Trinsir (תינסיר) of the Talmud (Belaud, Palest, p. 999). Schwartz says (Palest, p. 178) that ruins in that vicinity are still called Sineh by the Arabs. Thomson identifies the place with the modern Shaghbeh, containing traces of old buildings (Land and Book, ii, 65).

Sennachib'ri (some Senachib'ri) (Heb. Sanechhebri, סנאהصيب'; read in the cuneiform as Sinachibri, i.e. Sin [the Moon] increases brothers, though it should be noted that he was not the first-born; Sept. Sinacciapri; v. Sinacciapri; Josephus, Σανασσαρισ; Herodotus, Σανασσαρισ; Vulg. Senachirib); a famous Assyrian monarch, contemporary with Hezekiah. The name of Sennacherib (in Assyrian Sin-ach'ri-bi) is written in various ways; but three forms are most common, of which we present the most usual. It consists of three elements: the first, Sin, or the "Moon" god; the second, aki, or "brothers" (威尼斯人); and the third, ibir, or "he increased" (มาจาก); the meaning of the whole being "the Moon has multiplied brothers." See Cuneiform, Sin, aki, ibir.

1. Earlier Annals. — Sennacherib was the son and successor of Sargon (q.v.). We know very little of him during his father's lifetime. From his name, and from a circumstance related by Polybius, we may gather that he was not the eldest son, and not the heir to the crown till the year before his father's death. Polybius (following Berosus) related that the tributary kingdom of Babylonia was held by a brother—who would doubtless be an elder brother—of Sennacherib's, not long before that prince came to the throne (Berosus, Frug, 12). Sennacherib's brother was succeeded by a certain Hagesi, who reigned only a month, being murdered by Merodach-baladan, who then took the throne and held it three months. The details of Sennacherib's campaigns are given under each year in the cuneiform archives of his reign. From these it appears that he began to reign July 16, B.C. 705, and was murdered in December, 681 (Smith and Sayce, Cune. Hist. of. Senn. [Lond. 1878] p. 8).

His first efforts were directed to crushing the revolt of Babylonia, which he invaded with a large army. Merodach-baladan ventured on a battle, but was defeated and driven from the country. Sennacherib then made Belus (Bel-ini) an officer of his court, viceroy, and, quittig Babylonia, ravaged the lands of the Arabian tribes on the Tigris and Euphrates, whence he carried off 200,000 captives. In the ensuing year he made war upon the independent tribes in Mount Zagros, and penetrated thence to Media, where he reduced a portion of the nation which had previously been independent.

2. Conquest of Judah. — We give the account of this as condensed from the cuneiform annals by the late George Smith (Hist. of Assyria from the Monuments, p. 117 sq.):

"The eastern expedition of Sennacherib occupied his third year, and at the close of this year, his southern and eastern borders being secure, he had leisure to turn his attention to the affairs of Palestine. Encouraged by the king of Egypt, his king of Tyre, and Zidon, and, finding that the Asryrian yoke, some of the smaller sovereignties had either voluntarily joined him or been forced to submit to the king of Judah, and Lilies (the king of Desenep), the king of Tyre and Zidon, had also rebelled against Sennacherib. The Assyrians had lost their hold on all the country from Lebanon to Arabia, and Sennacherib resolved to reconquer this region. Crossing from his capital into Syria, where he called the land of the Hittites, he attacked the kingdom of Zidon; the land of Zidon was not prepared to resist Sennacherib, so he embarked on one of the islands of the city of Tyre, and the king of the land of Yatnam (the island of Cyprus), abandoning his country to the mercy of the Assyrians. Sennacherib now hastened to the various cities of the coast of Tyre, the strong city, appears to have successfully resisted him, but he captured Ziddummab (great Zidon, Josh. xix, 29), Battle (the city of Zidon; the modern Zidzit and Zirpit, Zarephath, 1 Kings xviii, 19), Mahalla Ulus (Nassan, Josh. xix, 29, 29), Assibit (Azkab, ver. 39), and Akkn (Achab, ver. 40). The coast of Tyre, down to the land of the Philistines, was now in the hands of Sennacherib, and he raised a man named Tubalib to the throne of Zidon, and fixed upon Beth-dagon as the annual tribute. The success of Sennacherib along the coast, and the fall of the Egyptian aid, would altogether have been a serious blow to his estate, and the various rulers sent envoys with tribute, and tokens of submission to present before the king of Assyria. Among these were the king of Sama'ra: Tubalib, the newly made king of Zidon: Aballe-bili, king of Are'um; Urmeleke, king of Gebal: Meinti, king of Ash'dor; and Bubuli, king of the Ammonites: Ezemashibali, king of the Moabites; and Atramir, king of Edom. Sennacherib, now made their peace, and Akkron, and Ezekron, and Judah alone remained unsubdued. The treaty started from Akkn, and keeping along the coast, invaded Aske'lon, and capturing Zidq, the revolting king, sent him, his wife, and his whole family, his daughters, and the relations of the Assyrians, captive to Assyria. The cities of Askelon, Bit-dagana (Beth-dagon, Josh. xvi, 41), Tappu (Doppa, Josh. 1, 4), and Hebron (Heber, Josh. 1, 46) and Akrab, Josh. 1, 47, were successively captured, and Sennacherib placed Samur-bud, the son of Akkn, on the throne. Moving from Akkn, Sennacherib attacked Edom: he tells us that Pedi, king of Edom, and in consequence of his having been faithful to Assyria, and the priests, princes, and people of Edom had conspired against him and lusted their arms, and in bonds, had delivered him into the hands of Hezekiah, king of Judah, to be kept prisoner at Jerusalem. The revolt of Edom relied on the assistance of Egypt; and when Sennacherib advanced against the city, a force under the king of Egypt came to their assistance, to back up the Anyary allies. The forces of Egypt (the plural being used), and from the king of Mi'mon, or Ethiopia. The forces, of the latter. Sennacherib turned his face to Atalia (Elteke, ver. 44), where the two forces met, and the Egyptians were defeated. See So. The king of Egypt, then, with the army of Ethiopia, was defeated by the capture of Atalia and Tama (Timnah, x, 10), and Sennacherib again marched to Edom, and put to death the king of Edom, and in the meantime the cities which had been severely treated the people. Their king, Pedi, was deposed. The king of Judah, king of Judah, and, being delivered up, was placed upon the throne, and thus restored by the treaty of the expedition given in the Assyrian annals consists of the attack on Hezekiah. The king of Judah was the most important king, and the Assyrians who had been defeated by Assyria, and were reserved for the last operations. After settling the affairs of Edom, Sennacherib marched against his king of Egypt, and captured forty-three cities of Hezekiah, agreeing with the statement of the on the third month of the year of the victory (1 Kings xviii, 13-16) that he came up against all the forces of Judah, and took the city, and the smaller places round them were destroyed, and Sennacherib carried into captivity 200,000 people of all sorts, together with horses, mules, asses, camels, oxen, and sheep in
great numbers. Sennacherib goes on to relate that he shut up Hezekiah in Jerusalem like a caged bird, and built towers round the city to attack it. Sennacherib now began to prepare to dispose of territory which he had conquered. The towns along the western side he detached from Judah, and divided them between Metnissu, king of Ashkelon, Sammardari, king of Ashdod, Adali, king of Ekron, and Ziliel, king of Gaza, the four kings of the Philistines who were now in submission to Assyria, and he increased the amount of the tribute due from these principalities. Hezekiah and his principal men, shut up in Jerusalem, now began to fear, and resolved on submission. Meanwhile the soldiers of Sennacherib were attacking Lachish, one of the last remaining strong cities of Judah. The pavilion of this proudest of the Assyrian kings was pitched within sight of the city, and the monarch sat on a magnificent throne while the Assyrian army assaulted the city. Lachish, the strong city, was captured, and thence Sennacherib dictated terms to the humbled king of Judah. Hezekiah sent by his messenger and made submission, and gave tribute, including thirty talents of gold, 800 talents of silver, precious stones of various sorts, couches and thrones of ivory, skins and horns of buffaloes, girls and eunuchs, male and female musicians. According to the record of Sennacherib, he returned to Nineveh in triumph, bearing with him this tribute and spoil, and not a single shadow of ravage or disaster appears in the whole narrative.

The accounts of this expedition of Sennacherib given in the Bible relate that after the submission of Hezekiah, "the angel of the Lord" went through the camp of the Assyrians and destroyed 185,000 men of Sennacherib's army and that the Assyrian monarch returned in disgrace to Nineveh (2 Kings xix, 35-37). This overthrow of Sennacherib's army is confirmed by a story told to Herodotus (ii. 141) by the Egyptian priests. They relate that in the time of an Egyptian king named Sethos, Sennacherib made an expedition against Egypt, and came as far as Pelusium. Sethos went out against him with an inferior army, having invoked the aid of the Egyptian gods and been promised deliverance. In the night, as the two armies lay opposite each other, hosts of field-mice came and destroyed the bowstrings of the Assyrians, who next morning fled.

The discrepancy in dates between the cuneiform and the Biblical accounts of this invasion are at present irreconcilable (Journ. of Sac. Lit. July, 1854, p. 388 sq.). See Chronology. There has probably been an error in reading the former, or perhaps an error in the record itself. All attempts to connect the Scripture date with the cuneiform are forbidden by the manner in which it is interlaced and confirmed by the context. Rawlinson and others have sought a partial solution of the difficulty by the supposition of a twofold attack by Sennacherib upon Palestine; but neither the Assyrian nor the Biblical annals give any countenance to this view. See Hezekiah.

3. Later Campaigns and Death. In his fourth year Sennacherib invaded Babylonia for the second time. Merodach-Baladan continued to have a party in that country, where his brothers still resided; and it may be suspected that the viceroy, Belibus, either secretly favored his cause, or, at any rate, was remiss in opposing it. The Assyrian monarch, therefore, took the field in person, defeated a Chaldean chief who had taken up arms on behalf of the banished king, expelled the king's brothers, and, displacing Belibus, put one of his own sons on the throne in his stead. In his fifth year he led an expedition into Armenia and Media; after which, from his sixth to his eighth year, he was engaged in wars with Susiana and Babylon. From this point his annals fail us.

Sennacherib is believed to have reigned at least twenty-two years, and perhaps twenty-four, years. The date of his accession appears to be fixed by the canon of Prolemy to B.C. 702, the first year of Belibus or Elibus; but Col. Rawlinson's revised computation (in the Athenaeum, No. 1869, Aug. 22, 1863, p. 245) dates the accession in B.C. 704, and the late Assyriologist George Smith makes the reign to have begun in B.C. 705. The Scripture synchronism locates its beginning in B.C. 715. The date of his death seems to be marked in the same canon by the accession of Asarhaddon (Esrabhaddon) to the throne of Babylon in B.C. 680; but it is possible that an interval occurred between the two. See Esrahaddon. The monuments are in conformity with the canon, for the twenty-second year of Sennacherib has been found upon them, while they have not furnished any notice of a later year.

Of the death of Sennacherib nothing is known beyond the brief statement of Scripture, that "as he was worshipping in the house of Nisroch (?) his god, Adrammelech and Sharezer his sons smote him with the sword: and they escaped into the land of Armenia" (2 Kings xx. 19; Isa. xxxvii. 38). It is conjectured that Chorenese and Alexander Polybius both refer to the elder of these two sons by a different name (Ardumazanes or Argamanzus); and it is still more curious that Abydenus, who generally drew from Berosus, should interpose a king Nergilus between Sennacherib and Adrammelech, and make the latter be slain by Esrahaddon (Esenbius, Chr. Cons., i, 9; comp. i, 5; and see also Mos. Chor. Arm. Hist. i, 22). Moses, on the contrary, confirms the escape of both brothers, and mentions the parts of Armenia where they settled, and which were afterwards peopled by their descendants.

4. Character. Sennacherib was one of the most cruel of the Assyrian kings, and also one of the proudest of them. The prophet Isaiah pictures his haughtiness—his "stout heart," and the "glory of his high looks;" represents him as boasting, "Are not my princes altogether kings?" and as ascribing his victories to his "strength of hand" and his "wisdom"—victories, at the same time, so complete as to make away the eggs of a fowl so scared that it never fluttered nor "peeped" (x. 8-14). Sennacherib himself verifies the portrait, for he calls himself "the great king," "king of nations," "king of the four regions," "first of kings," "favorite of the great gods," etc. The
accompanying seal depicts him killing a lion, and in one of his inscriptions he boasts of such a conquest. His approaching invasion filled Jerusalem with deep alarm, and Isaiah again and again depicts it. His boasts of previous conquests were not vain ones: ancient monarchies had disappeared before him, opposing armies had perished "as grass on the house-tops," and his numerous hosts had drunk up rivers on their march. An ideal march is vividly sketched for him—by Athal, Migor, and Michnas, to Geba, and Nob on the northern shoulder of Olivet. Sennacherib did not come by this route, for he wished to prostrate Egypt; but the route sketched might have been taken, and its very difficulties are meant to picture Assyrian intrepidity and perseverance. All the while Sennacherib was only God's "rod," an "axe in his hand," and "Lebanon," an image of his stately and warlike grandeur, "shall fall by a mighty one." "The virgin, the daughter of Zion," without armor or prowess, but courageous in her seeming helplessness, laughed him to scorn. Nay, God would do to him as he had done to the captives at Lachish, "put a hook into his nose," and ignominiously and easily turn him "back by the way he came" (Isa. xxxvii). "The stout-hearted are spoiled, they slept their sleep; at thy rebuke, both the chariots and horses were cast into a deep sleep;" "the earth feared and was still, when God arose to judgment" (Isa. lxvii, 5-9). Sennacherib was not only a great warrior, but also a grand builder. He seems to have been the first who fixed the seat of government permanently at Nineveh, which he carefully repaired and adorned with splendid buildings. His great work is the palace of Koyunjik, surpassing in magnificence all the buildings of his predecessors. The royal structure, built on a platform of about ninety feet in elevation, and paved with bricks, covered fully eight acres. Its great halls and chambers were ranged round three courts; one of them 154 feet by 125, and another 124 feet by 90. One of the halls was about 180 feet in length by about 40 in breadth, and sixty smaller rooms have been explored. These rooms are broader than those of his predecessors, probably because he used cedars from Lebanon. He built also, or repaired, a second palace at Nineveh on the mound of Nebbi Yunus, confined the Tigris to its channel by an embankment of brick, restored the ancient aqueducts, which had gone to decay, and gave to Nineveh that splendor which she then reserved for the ruin of the empire. The realistic sculptures of Sennacherib are very instructive; every-day scenes of Assyrian life are depicted by them; landscapes and hunting: the various processes of masonry; the carving and transportation of the great bulls; and the slaves working in gangs, and often in the presence of the king. He also erected monuments in distant countries. One of his memorials is at the mouth of the Nahr el-Kelb, on the Syrian coast, verifying his boast that he "had come up to the height of the mountains, to the sides of Lebanon;" and it stands beside the tablet which tells of the conquests of Rameses the Great, more than five centuries before the period of Sennacherib. See NINEVEH.

Sennert, Andreas, a German Orientalist, was born at Wittenberg in 1606, and began the study of the Semitic languages at the age of ten years. Having completed his education, he visited various universities in Germany and Holland, and in 1638 was appointed professor of Hebrew in his native place, where he died, Dec. 22, 1693. He wrote various philological works, among which are, *Compendium Lexicis Hebrews* (Witten. 1664);—*Rabbininum* (ibid. 1666);—*Grammatica Orientalis* (ibid. 1666);—*Aenigma Platonicum* (ibid. 1648). For a more complete list of his works, see *Furst., Bibl. Jud. iii, 312 sq.; Steinschneider, Bibl. Handbook, iv, 856; Wolf, Bibl. Hebr. iv, 922; Hoeber, Novo. Bibl. Générale, s. v.*

Sens, Council of (Councilium Senonense). These councils were so called from being held in Sens, a town in the department of Yonne, France. I. This council was held in 1140. Among those present were Louis VII, Samson of Rheims, and Henry of Sens. In this council St. Bernard charged Abelard (q. v.), who was present, with his errors, accusing him of making degrees in the Trinity, as Arius had done; of preferring free will to grace, with Pelagius; and of dividing Jesus Christ, with Nestorius. He produced extracts taken from his works, and called upon Abelard either to deny having written them, or to prove their truth, or to retract them. Abelard, instead of defending himself, appealed to Rome; whereupon the bishops present concerted themselves with condemning his doctrine, passing no sentence upon him personally out of deference to Innocent II, to whom Samson and three of the bishops wrote, requesting his concurrence in their judgment. The pope condemned Abelard in the same year, and, in his answer to the letter of the bishops, declared that he could not with them in the sentence they had passed, and that he had imposed perpetual silence upon Abelard. The latter published an apology, in which he confessed the sound Catholic faith, declared that he desisted from his appeal, and retracted all that he had written contrary to the truth. See Mansi, x, 1018. II. Held in 1189 by the legate Peter against the Populican (Papal, a sect of Menestrels), the dean of Nevers, and Raynaldus, abbot of St. Martin, were charged with this heresy. The latter was deposed, being found guilty not only of this heresy, but also of those of the Stercoranists and Origenists. Both decided from the council to the pope. See Mansi, xi, 33. III. The third Council of Sens was held in May, 1220, by William de Melun, archbishop of Sens. Four statutes were published. 1. Enacts that the bishops should grant an indulgence of forty days to those persons who would fast on the vigil of the feast of the Holy Sacrament. 2. Directs that places in which clerics were forbidden to enter should be laid under an interdict. 3. Condemns those priests who dressed themselves improperly, such as in red, green, yellow, blue, white boots, etc., and wore beards and long hair. See Mansi, xi, 1860. IV. This council was held in 1485 by Tristan de Salazar, archbishop of Sens, in which the constitutions published by his predecessor, Louis, in a council held A.D. 1466, were confirmed. Among other matters treated of were...
the celebration of the holy office, the reform of the clergy and of the monks, the duties of laymen towards the Church, etc. It also enacted that canons shall be considered absent who are not present at nocturn, before the end of the Venite; at the other hours before the first psalm, and at mass before the end of the last Kyrie. Most of these regulations were taken from the canons of Baale, Lateran, and the Praeconium. See Mansi, xiii, 1721, Apa.

Sensation, the immediate effect produced on the mind by something acting upon the bodily organs. The earliest sign by which the Ego becomes perceptible is corporeal sensation, and this sensibility appears to be a necessary attribute of animated organic matter itself. It is the result of sensations expressed in the general sensation, which, however, is very obscure, even pain not being clearly felt by it at the place where it exists. The next step from this obscure, original, innate sensation is particular sensation, through the medium of the nervous system. Sensation should be distinguished from perception. The former properly expresses that change in the state of the mind which is produced by an impression upon an organ of sense; perception, on the other hand, expresses the knowledge or the intimations we obtain by means of our sensations concerning the qualities of matter. Sensation proper is not purely a passive state, but implies a certain amount of feeling. It may be described, on the psychological side, as resulting directly from the attention which the mind gives to the affections of its own organism. Objection may be made that every severe affectation of the body produces pain quite independently of any knowledge we may possess of the cause or of any operation of the will being directed towards it. Yet facts prove that if the attention of our minds be absorbed in other things, no impulse can produce in us the slightest feeling. Numerous facts prove that a certain application and exercise of mind, on one side, is as necessary to the existence of sensation as the occurrence of physical impulse, on the other. See Fleming, Vocab. of Philosophy, s. v.

Sense, Moral. See Moral Sense.

Sense of Scripture. See Interpretation.

Sentence, Ecclesiastical. Among the sentences pronounced by ecclesiastical judges are: 1. Declarative, a sentence which closes and puts an end to a controversial suit, and has reference to the chief subject or principal matter in dispute; 2. Interlocutory, a sentence which determines or settles some incidental question which has arisen in the progress of an ecclesiastical suit; 3. Deprecation, a sentence by which the cloister or rector of a parish is formally deprived of his preferment due to his behavior and examination.

Sentences, a name for the unarranged texts of Scripture, or preliminary antiphons, which, in the Prayer-book of the Anglican Church, form a part of the introduction to matins and evening-song.

SENTENCES, Book of. See Lombard, Peter.

SENTENCES, Offertory, a name for the texts of Scripture either said or sung at the time of the offertory in the Anglican form for the celebration of the holy eucharist. See OFFERTORY.

Sententiaril, the followers of Peter Lombard (q.v.), whose four Books of Sentences, on their appearance in 1162, at once acquired such authority that all the doctors began to expound them. They brought all the doctrines of faith, as well as the principles and precepts of practical religion, under the dominion of philosophy. They were held in the highest estimation, and attracted great numbers of eager listeners, whose state of things continued down to the time of the Reformation. See Gardner, Faiths of the World, s. v.

Senter, Anthony, a Methodist Episcopal minister, was born in Lincoln County, N. C., Jan. 28, 1785, converted in 1806, admitted on trial in 1809, into full connection in 1811, and filled the following appointments: Great Pee Dee Circuit, 1809; Bladen, 1810; Little Pee Dee, 1811; Bladen, 1812; Georgetown, 1814; Charleston, 1815; and presiding elder of the Broad River District, 1816-17. He died Dec. 28, 1817. A strong mind and a benevolent heart, a single eye and a steady purpose to glorify God, an unwavering faith, fervent love, and burning zeal—these were the salient attributes of this good man. See Minutes of Conference, i, 307; Stevens, Hist. of the M. E. Church, iv, 240; Bangs, Hist. of the M. E. Church, iii, 79.

Senter, M. Alverton, a minister of the Methodist Episcopal Church, was the son of Riley Senter, of Murphey's Cal. He graduated from the Genesee College in 1865, and united with the Troy Conference in 1867. He served the Third Street Church in Troy, N. Y., and was pastor for the same length of time of the Church in South Adams, Mass. He was then appointed to Hoosic Falls, N. Y., and served it for a little over a year. He died at the residence of Joseph Hillman in Troy, Feb. 1, 1876. See Minutes of Annual Conferences, 1876, p. 81.

Sentia, in Roman mythology, was the goddess of opinion, i.e. the deity who inspires opinions, views, judgments.

Sentinues, in Roman mythology, was the god who awakened and watched over the senses of the newly born.

Sent'nah [some Sem'ah] (Neh. xi, 9). See HANAH.

Seorah. See Baerly.

Seoor'im (Heb. Seorim, סְעֹרִים, plural of סָעָר, תַּנְנָא; Sept. Ἵμηριας v. Σεβυρίας), the head of the fourth division of priests as arranged by David (1 Chron. xxiv, 8). B.C. 1012.

Separates, a sect of Calvinistic Methodists in the United States, which arose about 1740 in consequence of the labors of George Whitefield. They took, at first, the name of "New Lighters," and afterwards, being organized into distinct societies, were known as "Separates." They were soon after joined by a preacher (Shubal Stearns, of Boston) who labored among them until 1751, when he embraced the opinions of the Baptists, as did also many others of the Separates. The distinctive doctrine of the sect was, that believers, being guided by the immediate teachings of the Holy Spirit; such supernatural indications of the divine being regarded by them as partaking of the nature of inspiration, and above, though not contrary to, reason. See Blunt, Dict. of Sects, s. v.; Gardner, Faiths of the World, s. v.

Separation of Church and State. See Church and State.

Separation of Eastern and Western Churches. See Schism.

Separatism, a term used to denote the disposition and practice by which persons withdraw from established communities or dissent from settled and common views or beliefs. This article is concerned with the religious, or more specifically the ecclesiastical, form of separatism only.

The strict meaning of the phrase "religious separatism," which is also its only admissible meaning, makes it denote a tendency to break away from accepted religious views or a settled Church organization without sufficient cause. The imperfections and faults of the Church constitute the ordinary plea by which the action resulting from such tendency is defended; but separatists never attempt to purify the Church from within, it is evident that the real motives by which
they are actuated are personal indifference towards the Church, an alienation from the Church through the influence of rival institutions, or other reasons found in themselves. History shows that pride and perverse views have been the usual motives from which separatists have acted. All true reformers have continued in their churches until thrust out, e.g., Luther, Wesley, etc.

The term separatist (q.v.) occurs for the first time in the history of Protestantism, though it applies to movements in the ancient and Middle Age churches as well. Separations of churches and groups already indicated were not unknown in any period of the history of the organized Church. In Protestantism the churches of England and Scotland furnished several kinds of separatists during the 16th and 17th centuries, especially the Independents and the Brownists (q.v.).

The term, however, became a party name for the first time in Germany, being originally employed in the Wetterau, then in Württemberg, and subsequently in Bremen. In the latter place, a Lutheran student of theology named Theodore Schermers became the head of a small clique (1899) which taught a kind of purgatory, rejected infant baptism and all public worship, and maintained that all of Christ's commands are not unalterable laws; that the Church is corrupt because of the abuses attendant on its observance. They led a retiring and pious life, wholly apart from the Church. The most able refutation of their peculiar views was written by J. W. Jäger, of Tübingen (1715).

Other minor separatist movements occurred about this time. Separate sects were established in the disputes growing out of the Pietist controversy.

The congregations of the Inspired (q.v.) demand special notice in this connection. These persons denounced all ecclesiastical organization as a work of the devil, which they cursed through inspiration of the spirit, and resolutely avoided. They justified their separation by saying that the Church is corrupt and has been divorced from Christ; that the ministrations of unregenerate persons are without effect; that only spiritual ties can bind a Christian to the Church; that infant baptism has no support in Scripture; that an inward and powerful impulse led them to withdraw from public worship, and secured to them a wondrous rest and peace of conscience; that separation insures exemption from many temptations; that it is favorable to the cultivation of an impartial love for all pious persons, and for them only; it secures solitude, quietness, love for the cross, and a self-denying temper, all of which are necessary to the welfare of the soul. They argued that the Church's corruption could not be corrected by a chilling and baleful influences existing in the Church, and declared that persons once earnest to purify the Church had, without exception, sunk into indifference and spiritual sloth because they had not come out from the mystical and apocalyptic Babylon. Their opponents replied by showing that in the Saviour's parable the wheat and tares were made to grow together until the harvest; that Christ and the apostles did not avoid the services of the corrupt Temple, though they superceded it when its work was done; and that Protestantism had not assumed an independent organization by its voluntary action, but only when necessity, consequent on its expulsion from a Church corrupt in its very principles, had compelled that measure. God's kingdom is a leaven; but the separation of the good from the bad is reserved for the day of judgment. The simple duty of each individual is to guard himself and his surroundings from the evil. On the Inspirationists see Weissmann, Intro., Mem. for Emancip., Erkenntnisse der Schriften. (Stuttgart, 1718), pt. ii, sec. xvii, p. 1254 sqq., No. 9. On the Separatists generally, Schlegel, Kirchengesch. d. 18ten Jahrhunderts, ii, 1054 sqq.

Separatists, a general term which may be considered as meaning dissenters from the Church of England, but also applied at different periods to certain sects as the special name by which they chose to be known.

1. In the reign of bloody Mary, the name was given to two congregations of Protestants who refused to conform to the service of the mass. Mr. Rose was minister of the one which met in Bow-church Yard, London, where thirty of them were apprehended in the act of receiving the Lord's supper, and narrowly escaped being committed to the flames. The other and much larger congregation was discovered at Islington, and Mr. Rough, its minister, and several others were burned by order of bishop Bonner.

2. In Ireland there are three distinct bodies of Separatists. The Walkerites, founded by Rev. John Walker, who seceded from the Established Church of Ireland and formed a small Church in Dublin on the principle of holding no communion with any other sect. They profess to found their principles entirely upon the New Test., and to be governed wholly by its laws. On doctrinal points they agree with the Sandemanians (q.v.). They hold that by his revealed word the spirit of God works in them, both to will and to do; that God is the sole author and agent of everything that is good; and maintain that everything that comes from the sinner himself, either before or after conversion, is essentially evil. That of any change in the law of Christ's kingdom, is utterly unchristian. They have, therefore, no clerical order. Another body of Irish Separatists was originated by Rev. Mr. Kelly, who seceded from the Established Church, and was soon after joined by Rev. George Carr, of New Ross. They form a branch of the same order and discipline as the Sandemanians, though in doctrine they approach more nearly to the evangelical dissenters. The Darbies, followers of the Rev. Mr. Darby, who combined strict evangelical doctrines with the peculiar tenets of the Millenarians. From these sprung the Plymouth Brethren (q.v.).

8. A German Pietist sect in Württemberg who separated themselves from the Lutheran Church about the middle of the 18th century. Meeting with much opposition and persecution, a number of them, under George Rapp, emigrated to Pennsylvania, and formed the Harmony Society. In 1815 they removed to Indiana, where they remained only two years, and then returning to their property, returned to Pennsylvania, and in Beaver County built a town called Economy, where they have amassed considerable property. See RAPPISTS. Those who remained in Germany, after much opposition, were allowed to form a congregation at Kornthal, and became known as Kornthalian. See KONSTITUTIONAL. Those who returned from Pennsylvania to the German Evangelical Union, formed by Frederick William III of Prussia, were also called Separatists.

4. The name was assumed by some of the early Puritans, perhaps the early Tractistes (q.v.). In their principles, condemning taste in dress, joyousness of life, etc., we recognize the class of Puritans afterwards represented by the Quakers. There were a few congregations of Separatists in Scotland, and one was commenced in London in 1820. See Blunt, Dict. of Sects, s. v.; Gardiner, Faiths of the World, s. v.

SEPARATISTS AT ZOAR. The village of Zoar, which is the seat of this body of dissenters, is in Tuscarawas County, O. From Nordhoff's "Communitarian Societies of the United States we gather the following information respecting them:

1. History. This society, like the Harmony Society, originated in Württemberg, and like them, the Inschanists, and others were dissatisfied from the Established Church. They refused to send their children to the schools under the control of the clergy, and to allow their young men to serve as soldiers, brought upon them persecution from both civil and ecclesiastical authorities. They suffered for ten or twelve years, when they were assisted by some English Quakers to emigrate to this country. They arrived at Philadelphia in August, 1817, and bought a tract of 5600 acres of land in Ohio. They chose Joseph Bümeler
SEPHEAR

535 SEPHEAR

read; in the afternoon the children meet to study the Bible; and in the evening they meet to sing and listen to the reading of some work that interests them. During the week the Sunday school articles and public prayer are not practiced among them, neither do they have any "preacher." They use neither baptism nor the Lord's Supper. They address each other by the first name, and use no titles of any kind. They wear their hats in a public room, and seat the sexes separately in Church.

SEPHEAR (Heb. Sepher, "a numbering;" Sept. Σαφάρ, v. Σαφαρ), "a mountain of the east," a line drawn from which to Mesha formed the boundary of the Sebaitian tribes (Gen. x. 30). The name may remind us of Sephar; which, perhaps, supplies the spot we seek (see Burchhardt, Arabia, p. 286). If this be the case, and Mesha be (as usually supposed) the Mesene of the ancients, the line between them would intersect Arabia from north-east to south-west.

The Singapore called "a mountain of the east" is to be understood with reference to popular language, according to which Arabia is described as the "east country." See Baumgarten, Theol. Commentar z. A. T. i. 122; Bochart, Phaleg. ii. 20.—Kitto. The immigration of the Joktanites was probably from west to east (see Aramaic, Shem), and the western portion of the peninsula. The undoubted identifications of Arabian places and tribes with their Joktanitic originals are included within these limits, and point to Sephar as the eastern boundary. There appears to be little doubt that the ancient seaport town called Dhaftari or Zafari, and Dhafer or Zafar (now Jafar, i. e. ez-Zafar), without the indigenous termination, represents the Biblical site or district: thus the etymology is sufficiently near, and the situation exactly agrees with the requirements of the case. Accordingly, it has been generally accepted as the Sephar of Genesis.

But the etymological fitness of this site opens out another question, namely, as there are no less than four places bearing the same name, besides several others bearing names that are merely variations from the same root. The frequent recurrence of these variations is curious; but we need only here concern ourselves with the four first-named places, and of these two only again are the names of importance. Neither of twofold importance, as bearing on the site of Sephar, and as being closely connected with the ancient history of the Joktanitic kingdom of Southern Arabia, the kingdom founded by the tribes sprung from the sons of Joktan. The following extracts will put in a clear light what the B, best Arabian writers themselves say on the subject. The first is from the most important of the Arabic lexicons:

"Dhafar is a town of the Yemen; one says, 'He who enters Dhafar learns the Birmyritic.' . . . Es-Saghāni says, 'In the Yemen there are four places, every one of which is named Dhafar, one of which is called Dhafar-al-Hak, near San'a', two days' journey from it on the south; and the Tubaheca use it beside there; and it is said that it is San'a' itself.' In relation to it is called the oxus of Dhafar. (Bu-Es-Sikkāt says that the oxus of Dhafar is so called in relation to Dhafrā'-Aṣād, a city in the Yemen. Another is in the Yemen as near as Bat, in the extremity of the Yemen, and is known by the name of Dhafrā'-Balb (that is, of the sea-coast), and in relation to it is called the oxus of Dhafrā'-Balb (eith the ruins or shoo-wood), that is, the wood with which some fumigate, because it is said to be derived from India, and from it to (the rest of the Yemen). . . . And it Yākūt meant, for he said, 'Dhafar . . . is a city in the extremity of the Yemen, near to Katab. As to the two, the oxus of them is a fortress on the south of San'a', two days' journey from it, in the country of the tribe of Bani-Murād, and it is called Dhafrā'-Uthayn (the rays of a flower or legs). It is also called Dhafrā'-Zeyd; and another is on the north thereof, also two days' journey from it, in the country of the tribes, and is called Dhafrā'-Dhāhub. (Fajl. 'Arīs, MS. e.v.)"
There are now only three or four inhabited houses in El-Beld. It is on a small peninsula lying between the ocean and a bay, and the port is on the land side of the town. In the present day, during nearly the whole of the year, at least at low tide, the bay is a lake and the peninsula an isthmus; but the lake is of sweet water. In the rainy season, which is in the spring, it is a gulf of sweet water at low tide, and of salt water at high tide.

The city is called also Saphar /metropolis/ (Σαφαρία πορθμός) or Saphar (in Anon. Peripl. p. 274), in long., 38° 14' 30", according to Ptolemy, the capital of the Sapharitae (Σαφαρίται), placed by him (vi, 6, 25) near the Homerite; but their accounts are obscure, and probably from hearsay. In later times, as we have already said, it was the seat of a Christian bishop, and in A.D. 343, by permission of the reigning Tubbaz, in Dhabari (written Tapharon, Tapharos, by Philostorgius, Hist. Eccles. iii, 4), in 'Aden, and on the shores of the Persian Gulf. Theophilos, who was sent with an embassy by order of the emperor Constantine to effect this purpose, was the first bishop (Cassius, i, 111 sq.). In the reign of Abrahah (A.D. 537-570) St. Gregentius was bishop of these churches, having been sent by the patriarch of Alexandria (see the authorities cited by Cassius, i, 142-145).

Sephərād (Heb. Sepharād, sephərād) is, in the Hebrew, meaning, if Heb. separated; Targ. Ḥasid, i.e. Ispamia; Sept. εὐδαος Vulg. in Bispurah, a name which occurs in Obad. 20 only, as that of a place in which the Jews of Jerusalem were then held in captivity, and whence they were to return to possess the cities of the south. Its situation has always been a matter of uncertainty, and cannot even now be said to be settled.

1. The reading of the Sept. given above, and followed by the Arabic Version, is probably a mere conjecture, though it may point to a modified form of the name in the then original, viz. Sepharath. In Jerome's copy of the Sept. it appears to have been Ephraeath. Since (Comm. in Abd) he renders their version of the verse transmigratio Jerusalem usque Euphratam. This is certainly extremely ingenious, but will hardly hold when we turn it back into Hebrew.

2. The reading of the Vulgate, Bosphorus (obtained by taking the name Sephar as a possessive as part of the name Sepharād—and at the same time rejecting the final D), was adopted by Jerome from his Jewish instructor, who considered it to be "the place to which Hadrian had transported the captives from Jerusalem" (Comm. in Abd). This interpretation Jerome did not accept, but preferred rather to treat Sepharād as connected with a similar Assyrian word signifying a "boundary," and to consider the passage as denoting the dispersion of the Jews into all regions. We have no means of knowing to which Bosphorus Jerome's teacher alluded—the Cimmerian or the Thracian. If the former (Strait of Yenikale), which was in Iberia, it is not impossible that this rabbi, as ignorant of geography outside of the Holy Land as most of his brethren, confounded it with Iberia in Spain, the Iberians at that time being called by the Jews themselves the Sepharādim, German Jews being known as the Ashkenazim. It is difficult to suppose that either of these can be the true explanation of Sepharād. The prophecy of Obadiah has every appearance
of referring to the destruction of Jerusalem by Nebuchadnezzar, and there is no reason to believe that any Jews had been at that early date transported to Spain. Others have suggested the identity of Sephardar with Sippahara in Mesopotamia (Hardt, Sepharra Babyloniae [Helmst. 1708]), but that is more probably Sephiroth.

5. The name has perhaps been discovered in the cueneiform Persian inscriptions of Nakh-1-Rustum and Behistun (see Burnouf, Mém. sur Deux Insct. Cunéif. 1866, p. 147), and also in a list of Asiatic nations given by Niebuhr (Reiseh. ii, pl. 31). In the latter it occurs between Ra Ta and Ta Mani, and between Ta Uta (Ionia). De Sacl was the first to propose the identification of this with Sephardar, and subsequently it was suggested by Lassen (Zeitschr. f. Morgenl. V, i, 50) that S P R D was identical with Sardica, the ancient capital of Lydia. This identification is approved of by Winer, and adopted by Dr. Pusey (Intro. to Obsyd. p. 252, note, also p. 245). In support of this, Furst (Hind. ii, 95 a) points out that Antigonus (B.C. cir. 320) may very probably have taken some of his Jewish captives to Sardis; but it is more consistent with the apparent date of Obadiah's prophecy to believe that he is referring to the event mentioned by Joel (i, 6), when "children of Susah stripped Jerusalem" and "hated the sons of the Javanim" (Ionians), which—as the first captivity that had befallen the kingdom of Judah, and a transportation to a strange land, and that beyond the sea—could hardly fail to make an enduring impression on the nation.

6. Ewald (Propheten, i, 404) considers that Sephardar has a connection with Zareephath in the preceding verse; and while deprecating the "penetration" of those who have discovered the name in a cuneiform inscription, suggests that the true reading is Sepharar, and that it is to be found in a place three hours from Akka, i.e. doubtless the modern Shefa Omar, a place of much ancient repute and veneration among the Jews of Palestine (see Zunz, note to Parchi, p. 428); but it is not obvious how a residence within the Holy Land can have been spoken of as a captivity, and there are considerable differences in the forms of the two names.

7. Michaelis (Suppl. No. 1778) has devoted some space to this name, and among other conjectures ingeniously suggests that the "Sparata" (q. v.) of 1 Macc. xii. 15 are accurately "sepharadies." This suggestion, however, does not appear to have stood the test of later investigations. But it is adopted by Kell (id loc.), who objects to the view expressed above (No. 5) that Sardis would naturally be Hebraized סדרת.

8. Juynboll proposes (Hist. Samar. p. 20) to read סדרת, at the end of (i.e. beyond) the Ephrutes, as the origin of the Sept. rendering, but such a phrase would be unnatural.

Sephardar, a name applied to the Spanish Jews. They were banished from Spain in 1492, and from Portugal in 1497, and yet they still maintain their identity and attachment to their ancient country, in every part of the world. They look upon themselves as a higher order of Israelites. One peculiar point of distinction which marks them out from other Jews is their daily use of the old Spanish language, with which they are so familiar that their own Scriptures are better known to them in the old Spanish version than in the original Hebrew. See Jews.

Sepharvaim (Heb. Sepharvāyim, ספַּרְפַּרְתִּים). Sept. Σφαραβαίης, Ἱππαβαίος is mentioned by Sennacherib in his letter to Hezekiah as a city whose king had been his tributary (2 Kings xvi. 21; Isa. xxxvii. 18; comp. 2 Kings xviii. 34). It is coupled with Hena and Ava, or Ivah, which were towns on the Ephrutes above Babylon. Again, it is mentioned in 2 Kings xxvi. 24 as one of the places from which colonists were transported to people the desolate Samaria, after the Israelites had been carried into captivity, where it is again joined with Ava, and also with Cuthah and Babylon. These indications are enough to justify us in identifying the place with the famous town of Sippara, on the Euphrates above Babylon (Ptolemy, v. 18), which was near the site of the modern Mosul. Sippara was mentioned by Herod as the place where, according to him, Xithrus (or Noah) buried the records of the antediluvian world at the time of the deluge, and from which his posterity recovered them afterwards (Fragm. Hist. Gr. ii, 501; iv, 280). Abudeness calls it πόλεως Σκεπαρραίων (Fragm. 9), and says that Nebuchadnezzar excelled it with a vast sea, for purposes of irrigation. Pliny seems to intend the same place by his "oppida Hippareonum"—where, according to him, was a great seat of the Chaldaic learning (Hist. Nat. vi, 30). When Pliny places Hippara, or Sippara, on the Narragy (Nahr Agam), instead of on the Ephrutes, his reference is to the artificial channel which branched off from the Euphrates at Sippara and led to the great lake (Chald. Νεβαδής) excavated by Nebuchadnezzar. Abudeness called this branch "Araclusus" (Ἀράκλας). Ar Akan (Fragm. 10). The plural form here used by Pliny may be compared with the dual form in use among the Jews; and the explanation of both is to be found in the fact that there were two Sipparas, one on each side of the river. Herod calls Sippara "a city of the country of the Medes"; and in its vicinity it bears the same title, being called Taipar shu-Shlamah, or "Sippara of the Sun"—the sun being the chief object of worship there. Hence the Sepharvites are said, in 2 Kings xxvi, 31, to have "burned their children in the fire to Adramelech and Anamalech, the gods of Sepharvaim"—two distinct deities representing respectively the male and female powers of the sun, as Lunus and Luna represented the male and female powers of the moon among the Romans.

Sepharvite (Heb. Sepharvīyī, ספַּרְפַּרְתִּיִּים, but only in the plural; Sept. Σφαραβαίης v. r. Σφαραβαίων), a native of Sepharvaim (q. v.) (2 Kings xxvi, 31).

Sepha'la (1 Macc. xiii, 88). See Shekphelah.

Sepher Asara Maamathoth. See Appendixo, Caleb.

Sepher Ha-Bahir. See Nechunjah ben Ha-Kanah.

Sepher Ha-Nikkud. See Chajug, Jekudo ben-David.

Sepher Jezirah. See Jezirah.

Sepher Nitsachon. See Lippmann, Jomtor.

Sepher Torah. See Torah.

Sepher Zerubabel (Σφαραβαίων, ספַּרְפַּרְתִּים) is the title of an apocalyptic book, written in the form of a dialogue between Zerubbabel and the angel Metatron about the birth, education, life, war, and death of Armilus, who is about to appear after the war between Gog and Magog, etc. The wonders of the Messiah were to be seen between 1063 and 1068. This work, which was probably written between 1050 and 1060, was first printed at Constantinople in 1519; then at Wilna in 1819. Lately it was published by Jellinek, according to two Leipsic MSS. (Cod. 22 and 58), in his collection entitled הַקָּדוֹשָׁה הַרְשָׁשָׁה [Leipsic, 1858], ii, 54–57. See Fürst, Bibl. Jud. iii, 317; Grätz, Gesch. der Juden, vi, 58 sq. (B. P.)

Sephirot (ספַּרוֹת) is a Cabalist term of frequent occurrence in late Jewish writers. The ten Sephirot have been represented in three different forms, all of which may be seen in H. More's Opera Philos. 1423; and one of which, almost in the identical form, had already been given in the art. Cabala. The Sephirot have been the theme of endless discussion; and it has even been disputed whether they are designed to express theological, philosophical, or physical mysteries. The Jews themselves generally regard them as the sun
and substance of Cabalistical theology, indicating the emanating grades and order of efflux according to which the nature and manifested operation of the Supreme Being may be all parties appear to consider in concurrence the first three Se phi roth to belong to the essence of God, and the last seven to denote his attributes, or modes of existence. The following treatises on this subject are among the most remarkable: a dissertation by Rhenferd, De Stylo Aposcopico Cabalistic, in Danz's Nov. Text. ex Tabulae Illum, p. 1090, in which he endeavors to point out many extraordinary coincidences between the theosophy of the Cabala and the book of Revelation (which may be compared with an essay of similar tendency in Eichhorn's Bibl. Bibl. scil. iii, 181); some remarks by Lowé, in the last-named journal, on the subject; and a dissertation by Yitzger, Se phi roth Kabalisticus, in his Observ. Sacra, i, 126, in which he first showed how the Sephiroth accorded with the human form.

Se phi roth. See SPh O R No.

Se phi roth (Se phi roth v. scil. Sphi roth), a town of Upper Galilee, not mentioned under this name in Scripture, but frequently by Josephus. It was garrisoned by Antigonus in his war with Herod the Great, until the latter took it early in his Galilean campaign (Josephus, Ant. xiv, 15, 4). It seems to have been a place of arms, and to have been occasionally the royal residence, for, in the troubled period which arose in the country Yitzger, Se phi roth Kabalisticus, in his Observ. Sacra, i, 126, in which he first showed how the Sephiroth accorded with the human form.

Septicorn. See SPh O R No.

Septicorn is a common object of theSeptuagint, the third Sunday before Lent. The reason of its application to the day is uncertain. Some liturgical writers—e.g. Pamelius—trace it to the association of the ancient monastic Lent of seventy days with the seventy years' captivity of Israel in Babylon. The following is more probable: There being exactly fifty days between the Sunday next before Lent and Easter-day inclusive, that Sunday is termed Quinquagesima, i.e. the fifth Sunday, and the immediately preceding Sundays are called from the next round numbers Sexagesima, the sixtieth, and Septuagesima, the seventieth. The observation of these days and the weeks following appears to be as ancient as the time of Gregory the Great. Some of the more devout Christians observed the whole time from the first of these Sundays to Easter as a season of humiliation and fasting, though the ordinary custom was to commence fasting on Ash-Wednesday. See Eden, Dict. of the Church, s. v.; Blunt, Dict. of Theology, s. v.

Septuagint is the common title of the earliest and most important version of the Old Testament, namely, into Greek, and is generally held to have derived its title (seventy) from the traductionary number of its translators (see below), rather than (as Eichhorn thought) from the authority of the Alexandrian Sanhedrin as consisting of seventy members. In the following account we shall endeavor to sift the truth out of the traditions on this subject. See Greek Versions.

I. Origin of the Version.—This is as great a riddle as the sources of the N.T. The case which has influenced the translators from the number and names of the translators, the times at which different portions were translated, are all uncertain.

1. Ancient Testimony on the Subject.—(1) The oldest writer who makes mention of the Septuagint is Aristobulus, an author referred to by Eusebius (Prepar. Eron. I, xiii, 15). He states that, to the translation of the Old Testament (beginning at 565). According to Eusebius, he was a Jew, who united the Aristotelian with the Jewish philosophy, and composed a commentary on the law of Moses, dedicated to Polymius Philometor. He is also mentioned in 2 Mac. 1, 10. Both Clement and Eusebius make him contemporary with Philometor (2nd century B.C.), for the passages in their writings, in which they speak of him under Philadelphus must either have been corrupted by ignorant transcribers or have been so written by mis-

Middle Ages; the latter professing to mark the site of the birthplace of the Virgin Mary, assigned by a late tradition to this locality. It became the see of a suffragan bishop under the metropolitan of Scythopolis (Le Quien, Oriens Christianus, iii, 718, 714), and there are coins still extant of the reigns of Dominian, Trajan, etc. (Rend. Palestina, c. 1093-1003; Eckel, Doct. Vet. Num. iii, 425, 426).—Smith, Dict. of Class. Geog. s. v. A recent German writer (Lebrecht, in his pamphlet on the subject [Berlin, 1877]) maintains that this was the site of the Bethel (q. v.) of the Talmud.

Sept. See Septum.

Septfoil (seven-leaf), an architectural ornament which has seven cusps or points.

Septimana in Albis (sevenfold in white) is the name frequently given to the first week in Whitsun tide with reference to the state of the newly baptized, who wore their white robes of baptism during that time. See Alis.

Septimontium, a Roman festival which was held in the month of December, and lasted only for a single day. The day of the Septimontium was a dies feriatus for the Montani, or the inhabitants of the seven ancient hills, who offered sacrifices to the gods in their several districts. They were believed to have been instituted to commemorate the enclosure of the seven hills of Rome within the walls of the city. See Romc.

Septuagesima (seventieth), the third Sunday before Lent. The reason of its application to the day is uncertain. Some liturgical writers—e.g. Pamelius—trace it to the association of the ancient monastic Lent of seventy days with the seventy years' captivity of Israel in Babylon. The following is more probable: There being exactly fifty days between the Sunday next before Lent and Easter-day inclusive, that Sunday is termed Quinquagesima, i.e. the fifth Sunday, and the immediately preceding Sundays are called from the next round numbers Sexagesima, the sixtieth, and Septuagesima, the seventieth. The observation of these days and the weeks following appears to be as ancient as the time of Gregory the Great. Some of the more devout Christians observed the whole time from the first of these Sundays to Easter as a season of humiliation and fasting, though the ordinary custom was to commence fasting on Ash-Wednesday. See Eden, Dict. of the Church, s. v.; Blunt, Dict. of Theology, s. v.

Séptuagint is the common title of the earliest and most important version of the Old Testament, namely, into Greek, and is generally held to have derived its title (seventy) from the traductionary number of its translators (see below), rather than (as Eichhorn thought) from the authority of the Alexandrian Sanhedrin as consisting of seventy members. In the following account we shall endeavor to sift the truth out of the traditions on this subject. See Greek Versions.

1. Ancient Testimony on the Subject.—(1) The oldest writer who makes mention of the Septuagint is Aristobulus, an author referred to by Eusebius (Prepar. Eron. I, xiii, 15). He states that, to the translation of the Old Testament (beginning at 565). According to Eusebius, he was a Jew, who united the Aristotelian with the Jewish philosophy, and composed a commentary on the law of Moses, dedicated to Polymius Philometor. He is also mentioned in 2 Mac. 1, 10. Both Clement and Eusebius make him contemporary with Philometor (2nd century B.C.), for the passages in their writings, in which they speak of him under Philadelphus must either have been corrupted by ignorant transcribers or have been so written by mis-
take (Valckenaer, § 10, 11; Dihne, p. 81 sq.). His words relative to the Septuagint are these:

"It is manifest that Plato has followed our law, and studied diligently all its particulars: for before Demetrius Phaleerus a translation had been made by others of the history of the Jews in the time of our forefathers in Egypt, and of all that happened to them, and of the conquest of the last king, Alexander, of the whole world; and latterly the same whole law, since it is manifest that the aforesaid philosopher borrowed many things, for he was very learned, as was Pythagoras, who also abridged many of our doctrines into his system. But the entire translation of our whole law (διὰ τῆς ἐκκλησίας τοῦ θεοῦ τῆς ἡμῶν πατρίδος) was made in the time of that king, a king, named Seleucus, a name of a greater zeal, under the direction of Demetrius Phaleerus."

The entire passage has occasioned much conjecture and discussion. It is given by Valckenaer (Distribut, etc.), Thiersch (De Versione Alexandrana), and Frankel (Vorstudien, etc.). It appears that the words of Aristotle do not speak of any prior Greek translation, as Hody supposes, or indeed of any translation whatever. They rather refer to some brief extracts relative to Jewish history, which had been made from the Pentateuch into a language commonly understood by the Jews in Egypt, before the time of Demetrius. The entire law was first rendered into Greek under Philadelphia. Helycher, from a British museum MS. in the British museum, asserts that the fragments of Aristotle preserved by Eusebius and Clement were written in the 2d century by another Aristobulus, a Christian, and that Aristobulus, the professed Peripatetic, was a heathen. But the quotation of Cyril of Alexandria (Contra Julianum, lib. vi), to which they appeal, was, according to Eusebius that father, as may be seen by comparing it with Clement, Richard Simon also denied the authenticity of Aristobulus's remains (Histoire Critique du V. T. p. 189). But Valckenaer has sufficiently established their authenticity. The testimony of Aristotle is corroborated by a Latin scholion recently found in a MS. of Plautus at Reading, which Ehrhardt compared with a passage in Ritschl in a little book entitled Die alexandrinischen Bibliotheken, etc. (Berlin, 1838). From the passage of Aristobulus already quoted, it appears that in the time of Aristobulus, i.e., the beginning of the 2d century B.C., this version was considered to have been made when Demetrius Phaleerus lived, or in the reign of Ptolemy Soter. Hody, indeed, has endeavored to show that this account contradicts the voice of certain history, because it places Demetrius in the reign of Philadelphia. But the version may have been begun under Soter and completed under Philadelphia, his successor. In fact, Eusebius related the time when it originated; for it is well known that the Palestinian account, followed by various fathers of the Church, asserts that Ptolemy Soter carried the work into execution, while according to Aristaeus, Philo, Josephus, etc., his son Philadelphia was the person. Hody harmonizes the discrepancy by placing the translation of the Pentateuch in the two years during which father and son reigned conjointly (B.C. 286 and 285). The object of Demetrius in advising Soter to have in his library a copy of the Jewish laws in Greek is not stated by Aristobulus, but Aristaeus relates that the librarian represented it to the king as a desirable thing that such a book should be deposited in the Alexandrian library. Some think that a literary rather than a religious motive led to the version. So Hävernick. This, however, may be reasonably doubted. Hody, Sturz, Franke, and others conjecture that the object was religious or ecclesiastical. Eichhorn refers it to protection of the Jews and a desire to have their sacred laws placed in an ecclesiastical motive. It is not probable, however, that the version was intended for the king's use, or that he wished to obtain from it information respecting the best mode of governing a nation and enacting laws for its economic well-being. The character and language of the version unite it with an Egyptian king, probably ignorant of Greek, could not have understood the work. Perhaps an ecclesiastical motive prompted the Jews who were originally interested in it, while Demetrius Phaleerus and the king may have been acted by some other design.

It is difficult, if not impossible, to ascertain whether Aristotle's words imply that all the books of the Old Testament were translated into Greek under Philadelphia, or simply the Pentateuch. He means, in the latter term used by Aristobulus, meant at that time the Mosaic books alone, although it was afterwards taken in a wider sense so as to embrace all the Old Testament. Valckenaer thinks that all the books were comprehended under it. It is certainly more natural to restrict it to the Pentateuch. The Pentateuch, therefore, was completed under Philadelphia.

(2.) The next historical testimony regarding the Septuagint is the prologue of Jesus the son of Sirach, a document containing the judgment of a Palestinian Jew concerning the version before us. His words are these: "And not only these things, but the law itself, and the prophets, and the rest of the books, have no small difference when they are spoken in their own language." Frankel has endeavored to throw suspicion on this passage, as if it were unauthentic, but his reasons are extremely slender (p. 21, note v.). It appears from the law of the prophets, and the other books had been translated into Greek in the time of the son of Sirach, i.e., that of Ptolemy Physcon, B.C. 130.

(3.) The account given by Aristaeus comes next before us (see Rosenmüller, Handb. d. Lit. d. bibl. Kritik u. Exeg. ii, 413 sq.). This writer pretends to be a Gentile, and a favorite at the court of Ptolemy Philadelphia, king of Egypt. In a letter addressed to his brother Philocrates, he relates that Philadelphia, when forming a library at great expense, was advised by Demetrius Phaleerus to apply to the Jewish high-priest Eleazar for a copy of the book containing the Jewish laws. Having previously purchased the freedom of more than 300,000 talents, he sent a his brother the king sent Aristaeus and Andreas to Jerusalem with a letter requesting of Eleazar seventy-two persons as interpreters, six out of each tribe. They were dispatched accordingly with a magnificent copy of the law, and were received and entertained by the king for several days with great respect and liberality. Demetrius led them to an island, probably Pharos, where they lodged together. The translation was finished in seventy-two days, having been written down by Demetrius piece by piece, as agreed upon after mutual consultation. It was then publicly read by Demetrius to a number of Jews who were present. They approved of it, and imprecations were uttered against any one who should presume to alter it. The Jews requested permission to take copies of it for their use, and it was carefully preserved by command of the king. The interpreters were sent home loaded with presents.

The word Aristaeus, which was first published in the original Greek by Simon Schaar (Basel, 1561, 8vo), and several times reprinted, was also given by Hody in Greek and Latin, in his book entitled De Bibliorum Textibus Originalibus, Versionibus Graecis, et Latina Vulgata (Oxon. 1705, fol.). The most accurate edition, however, is that by Galland, in the Bibliotheca Vet. Puteana, vol. ii. It was translated into English by Whiston, and published at London in 1727, 8vo. See also Aristaeus, Hist. LXXII 1st ex Rec. Eld. de Paris (Francois, 1610; Oxon. 1692).

(4.) In all discussions relative to the name Septua- gint, so universally appropriated to the Greek version of the Old Testament, it is necessary to have in view that the Octateuch, as published by Ritschl ought to be considered. The origin of this Latin scholion is curious. The substance of it is stated to have been extracted from Callimachus and Eratosthenes, the Alexandrian librarians, by Tzetzes, and from his Greek note an Italian of the 16th century has borrowed some quota in it. The writer has been speaking of the collecting of ancient Greek poems carried on at Alexandria under Ptolemy.
SEPTUAGINT 540 SEPTUAGINT

Philadephis, and then he thus continues: "Nan rex ilei philosophis affermissum [corr. "afferrissum", Ritschl]; "affectissimus", Thiersch] et cetera omnia acutissimis claris, disquisitis imperis regiae munificentiae ubi terrarum quantum validum voluminosum opertum Demetri Phasenon in duas bibliothecas fecit, alterum extram regionem alteram autem in regia." The scholiast then goes on to speak of books in many languages: "Quae summa diligentia rex ilee in suum linguam fecit ac optimum interpretibus convertit" (see Thiersch, De Pentateuch Versione Alexandrina [Erlang. 1841], p. 9, 9).

Bernhardi reader of p.m. "pensemum," "et lex semen," and this correction is agreed to by Thiersch, as it well may be: some correction is manifestly needed, and this appears to be right. This gives us seventy elders associated in the formation of the library. The testimony comes to us from Alexandrian authority; and this, if true (or even if believed to be true), would connect the Septuagint with the library— a designation which might most easily be applied to a version of the Scriptures there deposited; and, let the translation be once known by such a name, then nothing would be more probable than that the designation should be applied to the version. This may be regarded as the first step of the formation of the Septuagint, before it became known as "pente
tuagint be first known as applying to the associates in the collection of the library, then to the library itself, and then to that particular book in the library which to so many had a far greater value than all other contents. Whether more than the Pentateuch was thus translated and there deposited in the royal library is a separate question.

2. Confirmation by Later Authorities.—(1.) Of Jewish writers, Josephus (Ant. xii, 2) agrees in the main with the Alexandrians; but Philo's account (De Vita Moysis, lib. ii.) differs in a number of circumstances.

(2.) Among Alexandrian Church fathers Ireneus (lib. iii. c. 24) relates that Polymnyi Lysiag, wishing to adorn his Alexandrian library with the writings of all nations, requested from the Jews of Jerusalem a Greek version of their Scriptures; that they sent seventy elders well skilled in the Scriptures and in later languages; that the king separated them from one another and bade them all translate the several books. When they came together before Polymny and showed their version, God was glorified, for they all agreed exactly, from beginning to end, in every phrase and word, so that all men may know that the Scriptures are translated by the inspiration of God.

Justin Martyr (Cohort. ad Graecos, p. 34) gives the same account, and adds that he was taken to see the cells in which the interpreters worked.

Epiphanius says that the translators were divided into pairs, in thirty-six cells, each pair being provided with two scribes; and that thirty-six versions agreeing in every point were produced, by the gift of the Holy Spirit (De Pud. et Mens., c. iii.—vi.)

(3.) Among the Latin fathers Augustine addresses to the inspiration of the translators— "Non autem secundum LXX interpretes, qui etiam ipsi divinum Spiritum interpretati, ob hoc aliter videntur nonnulla dixisse, ut ad spiritum sanctum sunt unani, ad manus admoneor lectoris intentio" (De Doct. Christ. iv, 15).

But Jerome boldly throws aside the whole story of the cells and the inspiration— "Et necso quis primus auctor Septuaginta cellulas Alexandri mendoce suo extruxit, quislibal dedita scripturam sententia, cum Alex- trius ejusdem Polymnyi [paterneari], et multo post tempora, quae in retulsionibus, silicci congregatos, contulisse scribit, non prophetasse. Aliud est enim vatem, aliud esse interpres. Ibi Spiritus ventura predicit; hic erudito et verborum copia ea quae intelligit transfert" (Pref. ad Pent., iv).

B. Modern Opinions.—(1.) Until the latter half of the 18th century the origin of the Septuagint ascribed by Alex- trius was firmly believed; while the numerous additions that had been made to the original story in the progres- sion of centuries were unhesitatingly received as equally genuine. The story was first reckoned improbable by L. Vives (in a note to Augustine's De Civitate Dei); then Scaliger asserted that it was written by a Jew; and, Richard Simson, in his Criticisms, or per- ceive the truth of Scaliger's assertion. Hody was the first who demonstrated with great learning, skill, and discrimination that the narrative could not be authentic (De Bibl. Text. Orig. Vers. Graec. et Lat. Vulg. [Oxford, 1705] lib. iv.) It is now universally pronounced fabulous.

(2.) But the Pseudo-Aristaeus had a basis of fact for his fiction; on three points of his story there is no material difference of opinion, and they are confirmed by the study of the version itself: (a.) The version was made at Alexandria. (b.) It was begun in the time of the earlier Ptolemies, about B.C. 280. (c.) The law (i.e., the Pentateuch) alone was translated at first. It is also very possible that there is some truth in the statement that a copy was placed in the royal library. (The emperor Akbar caused the New Testament to be translated into Persian.)

(3.) But by whom was the version made? As Hody justly remarks, "It is of little moment whether it was made at Alexandria by the Jews; but it is a question of great importance whether the Hebrew copy of the law and the interpreters (as Pseudo-Aristaeus and his followers relate) were summoned from Jerusalem and sent by the high-priest to Alexandria." On this question no testimony can be so conclusive as the evidence of the version itself, which bears upon its face the marks of imperfect knowl- edge of Hebrew, and exhibits the forms and phrases of the Macedonian Greek prevalent in Alexandria, with a plentiful sprinkling of Egyptian words. The forms ἐκκαλομον, αἰτεῖμαιδολομον, betray the fellow-citizens of the Persian poet who chose the same irac- bul line with κατά τῆς ἐκκαλομον. Hody (II, iv) gives several examples of Egyptian renderings of names and coins and measures; among them the hippodrome of Alexandria for the Hebrew כֹּבְּרָת (Gen. xlvii., 7), and the papyrus of the Nile for the rush of Job (vii., 11). The reader of the Sept. will readily agree with his conclusion, "Sive regia jussu, sive sponte un Judeus, a Iudaicis Alexandrinis fuisse factum." The question as to the moving cause which gave birth to the version is one which cannot be so decisively answered either by internal evidence or by historical testimony. The balance of probability must be struck between the tradition, so permanently confirmed by the king's intervention, and the simpler account suggested by the facts of history and the phenomena of the version itself. It is well known that after the Jews returned from the captivity of Babylon, having lost in great measure the familiar knowledge of the ancient Hebrew, the readings from the books of Moses in the synagogues of Palestine were explained to them in the Chaalidic tongue in Targums or paraprases; and the same was done with the books of the prophets when, at a later time, they also were read in the synagogues. The Jews of Alexandria had probably still less knowledge of Hebrew; their familiar language was Alexandrian Greek; but it is probable that in the large numbers soon after the time of Alexander and under the earlier Ptolemies. They would naturally follow the same practice as their brethren in Palestine; the law first, and afterwards the prophets, would be explained in Greek, and from this practice would arise in time an entire Greek text in which the Alexandrine text would be transmitted. The version seem to confirm this view; the Pentateuch is the best part of the version; the other books are more defective, betraying probably the increasing degeneracy of the Hebrew MSS. and the decay of Hebrew learning with the lapse of time.

(4.) Never accept the opinion that the Pentateuch was translated a considerable time before the prophetic parts is not warranted by the language of Justin, Clemens of...
II. Textual Basis of the Version.—1. It has been inquired whether the translator of the Pentateuch followed a Hebrew or a Samaritan codex. The Sept. and Samaritan harmonize in more than a thousand places, where they differ from the Hebrew. Hence it has been supposed that the Samaritan edition was the basis of the Sept. Various considerations have been adduced in favor of this opinion, viz. (a) the De Dieu, Selden, Whiston, Hottinger, Hassencamp, and Eichhorn are enlisted on its behalf. But the irreconcilable enmity subsisting between the Jews and the Samaritans, both in Egypt and Palestine, effectually militates against it. Besides, in the prophets and Hagiographa, the orthography of the Sept. text is even greater and more remarkable than those in the Pentateuch; whereas the Samaritan extends no further than the Mosaic books. No solution, therefore, can be satisfactory which will not serve to explain at once the cause or causes of both the differences between the Septenary and the Hebrew in the Pentateuch, and those found in the remaining books. The problem can be fully solved only by such a hypothesis as will throw light on the remarkable form of the Sept. in Jeremias and Esther, where it deviates most from the Masoretic MSS., presenting such transpositions and interpolations as excite the surprise of the most superficial reader. A mere difference in the orthography or spelling of a single word may be rejected not only for the reasons assigned, but also for the following. (1.) It must be taken into account that if the discrepancies of the Samaritan and Jewish copies be estimated numerically, the Sept. will be found to agree far more frequently with the latter than the former. (2.) In the cases of considerable and marked passages occurring in the Samaritan which are not in the Jewish, the Sept. does not contain them. (3.) In the passages in which slight variations are found, both in the Samaritan and Sept., from the Jewish text, they often differ among themselves, and the amplification of the Sept. is less than that of the Samaritan. (4.) Some of the small amplifications in which the Samaritan seems to accord with the Sept. are in such incorrect and non-idiomatic Hebrew that it is suggested that these must be translations, and, if so, probably from the Sept. (5.) The amplifications of the Sept. and Samaritan often resemble each other greatly in character, as if the former had been influenced by the latter in each case. But as, in spite of all similarities such as these, the Pentateuch of the Sept. is more Jewish than Samaritan, we need not adopt the notion of translation from a Samaritan codex, which would involve the subject in greater difficulties, and leave more points to be explained. The best plan seems to be to regard the Sept. with the Samaritan, see bishop Fitzgerald in Kitto's Journal of Sacred Literature, Oct. 1846, p. 324-332.

Some suppose that the one was interpolated from the other—a conjecture not at all probable. Jahn and Bauer imagine that the Hebrew MS. used by the Egyptian Jews agreed more closely with the Samaritan in the text and forms of its letters than the present Masoretic copies. This hypothesis, however, even if it were otherwise correct, would not account for the great harmony existing between the Samaritan and Sept.

Another hypothesis has been put forth by Gesenius (Commentaries on the Pentateuch, chap. ii. Sept., Orig. in Hebrew). He observes that both the Samaritans and Sept. flowed from a common recension (śekhānā) of the Hebrew Scriptures, one older than either, and different in many places from the recension of the Masoretes now in common use. "This supposition," says Prof. Stuart, by whom it is adopted, "will account for the discrepancy and for the agreements of the Sept. and Samaritan." The following objections have been made to this ingenious and plausible hypothesis. (a.) It assumes that before the whole of the Old Testament was written there had been a revision or recension of several books. But there is no record or tradition in favor of the idea that inspired...
men applied a correcting hand in this manner till the close of the canon. To say that others did so is not in unison with right notions of the inspiration of Scripture, unless it be equally affirmed that they corrupted, under the idea of correcting, the holy books. (b) This hypothesis of an earlier Pentateuch, which took place at a period comparatively early, before any books had been written except the Pentateuch, Joshua, Judges, and the writings of David and Solomon. If it be improbable that a revised edition was made before the completion of the canon, it is much more improbable that it was undertaken when the books were written. (c) It is not improbable that an older recension was still current after Ezra had revised the whole collection and closed the canon. In making the Sept. version, it is very improbable that the Jews, who were the translators, followed a recension far inferior in their estimation to the copy of the sacred books corrected by Ezra. This objection rests on the assumption that Ezra completed the canon of the Old Testament, having been prompted, as well as inspired, to arrange and revise the books of Scripture. Such is the Jewish tradition; and although a majority of the German critics disallow its truth, yet it is held by very able and accomplished men.

Prof. Lee (Prolegomena to Bagster's Polyglot) accounts for the agreement between the Sept. and Samaritan in another way. He conjectures that the early Christians intermixed their copies with Samaritan glosses, which ignorant transcribers afterwards inserted in the text. But he has not shown that Christians in general were acquainted with the Samaritan Pentateuch and its additions to the Hebrew copy; neither has he taken into account the reverence entertained by the early Christians for the sacred books. We cannot, therefore, attribute the least probability to this hypothesis.

Another hypothesis has been mentioned by Frankel, viz., that the Sept. flowed from a Chaldean version, which was used before and after the time of Ezra—a version inexact and paraphrastic, which had undergone many alterations and corruptions. This was first proposed by R. Asaria di Rossi, in the midst of other conjectures. Frankel admits that the assumption of such a version is superfluous, except in relation to the Samaritan Pentateuch, where much is gained by it. This Chaldee version circulated in various transcripts here and there; and as the same care was not applied in preserving its integrity as was exercised with respect to the original Hebrew, the copies of it presented considerable differences among themselves. Both the Greek version and the Samaritan Pentateuch were taken from it. Frankel concedes that this hypothesis is not satisfactory with regard to the Sept., because the mistakes found in that version must have frequently originated in misunderstanding the Hebrew text. There is no evidence, however, that any Targum or Chaldee version had been made before Ezra's time, or soon after. Explanations of the lessons publicly read by the Jews were given in Chaldee, not regularly perhaps, or uniformly; but it can scarcely be assumed that a Chaldee version had been made out in writing, and circulated in different copies. Glosses, or short expositions of words and sentences, were furnished by the public readers for the benefit of the people; and it is by no means probable that several of these traditional comments were incorporated with the version by the Jewish translators, to whom they were familiar.

In short, no hypothesis yet proposed commends itself to general reception, although the Vorstadten of Frankel have probably opened up the way towards a correct solution. The greater source from which the peculiarities in the Sept. and the Samaritan flow appears to us to have been early traditional interpretations current among the Jews, targums, or paraphrases—not written, perhaps, but orally circulated. Such glossarial versions, which must have circulated chiefly in Palestine, require to be traced back to an early epoch—to the period of the second Temple. They existed, in substance at least, in ancient times, at once indicating and modifying the Jewish mode of interpretation. The Alexandrian mode of interpretation stood in close connection with the Palestinian; for the Jews of Egypt looked upon Jerusalem as their chief city, and the Sanhedrim of Jerusalem as their ecclesiastical rulers. If, therefore, we can ascertain the traditional paraphrases of the one, those of the other must have been substantially the same (see Giesebrech's Ecclesiastical History, transl. by Cunningham, 1, 80).

Tycheno (Tentamen de Varia Cod. Heb. V. T. MSS. Gener.) thought that the Sept. was made from the Hebrew transcribed into Hebrew-Greek characters. It is almost unnecessary to refer to such a notion. It never obtained general currency, having been examined and refuted by Dathe, Michaelis, and Hassenkamp.

2. Evidence as to the Verbal Condition of the Original.

Here we naturally inquire as to two obvious points:

(1) Was the version made from Hebrew MSS. with the vowel-points now used? A few examples will indicate the answer.

A. PROPER NAMES.

Hebrew.

Exod. vi, 11, יִשָּׂרָאֵל, Libn. לֵיתְנֵי.

vi, 19, יִשָּׂרָאֵל, Machil. מֹאֲכַל.

xiii, 20, יִשָּׂרָאֵל, Etham. אֵתָם.

Deut. iii, 10, יַעֲבֹר, Salschah. יָעַבֵּר.

iv, 43, יִשָּׂרָאֵל, Bezer. בֹּשֶׁר.

xxxiv, 1, יָשָׂרָאֵל, Plegah. פֶּלְגָּה.

B. OTHER WORDS.

Hebrew.

Septonagint.

Gen. i, 9, יִשָּׂרָאֵל, place. יֵשָׂרֵאֵל.

xxv, 11, יִשָּׂרָאֵל, and he drowz them away. יֵשָׂרֵאֵל.

Exod. xii, 11, יִשָּׂרָאֵל, unleavened bread. יֵשָׂרֵאֵל.

Numb. xvi, 5, יִשָּׂרָאֵל, in the morning. יֵשָׂרֵאֵל.

Deut. xv, 18, יִשָּׂרָאֵל, double. יֵשָׂרֵאֵל.

Isa. ix, 8, יִשָּׂרָאֵל, a word. יֵשָׂרֵאֵל.

Examples of these two kinds are innumerable. Plainly the Greek translators had not Hebrew MSS. pointed as at present. In many cases (e.g. Exod. ii, 25; Nahum iii, 8) the Sept. has possibly preserved the true pronunciation and sense where the Masoretic pointing has gone wrong.

(2) Were the Hebrew words divided from one another, and were the final letters י, ה, כ, ק in use when the Sept. was made? Take a few out of many examples.

Hebrew.

Septonagint.

(1) Deut. xxxvi, 5, יִשָּׂרָאֵל, a perishing Syrian. יֵשָׂרֵאֵל.

(2) Kings ii, 14, יָשָׂרָאֵל, he also. יֵשָׂרֵאֵל.

(3) Kings xxii, 90, יִשָּׂרָאֵל, and he drowz them away. יֵשָׂרֵאֵל.

(4) Chron. xvii, 10, יִשָּׂרָאֵל, and I told thee. יֵשָׂרֵאֵל.

(5) Hos. vi, 5, יִשָּׂרָאֵל, and thy judgments. יֵשָׂרֵאֵל.

The Sept. reads: יֵשָׂרֵאֵל.

(6) Zech. xi, 7, even thee. יֵשָׂרֵאֵל. O poor of the flock. יֵשָׂרֵאֵל.

Here we find three cases (2, 4, 6) where the Sept. reads as one word what makes two in the present Hebrew text; one case (3) where one Hebrew word is made into two by the Sept.; two cases (1, 5) where the Sept. trans-
fers a letter from the end of one word to the beginning of the next. By inspection of the Hebrew in these cases it will be easily seen that the Hebrew MSS. must have been written without intervals between the words, and that the present final forms were not then in use.

In three of the above examples (4, 5, 6), the Sept. has preserved the division.

In the study of these minute particulars, which enable us to examine closely the work of the translators, great help is afforded by Cappelli Critica Sacra, and by the Vorstudien of Frankel, who has most diligently annotated the text of the Sept. His projected work on the Hebrew text of the Sept. has not been completed, but he has published a part of it in his treatise Ueber den Einfluß der palästinischen Ezech. auf die alexandrinische Herrn. in which he reviews minutely the Sept. version of the Pentateuch.

III. Ecclesiastical Authority and Influence.—The Sept. does not appear to have obtained general authority among the Jews so long as Hebrew was understood at Alexandria. It is remarkable that Aristobulus quotes the original, even where it departs from the text of the Sept. The version was indeed spread abroad in Egypt, in the East, and Africa Minor, and Asis Minor. It seems to have been so highly esteemed by the Jews, as to be publicly read in the synagogues. From a passage of Justinian, it would seem that some Jews wished the public interpreter, who reads the lessons out of the law and the prophets in Hebrew, to give his explanations of them in Greek, while others desired to have them in Chaldee. The reader, therefore, employed this translation as explanatory of the sections recited in the original, yet, although they highly esteemed the Greek, they did not regard it as equal to the Hebrew. Even the Talmudists make honorable mention of its origin. It is true that the Talmud also speaks of it as an abomination to the Jews in Palestine; but this refers to the 2d and 3d centuries, and belongs to a period in which the Sept. was not immediately after the appearance of Christ. When controversies arose between Christians and Jews, and the former appealed with irresistible force of argument to this version, the latter denied that it agreed with the Hebrew original. Thus by degrees it became odious to the Jews—as much execrated as it had before been commended. They had recourse to the translation of Aquila, who is supposed to have undertaken a new work from the Hebrew, with the express object of supplanting the Sept., and favoring the sentiments of his brethren.

Among the Christians the ancient text, called souvá, was current before the time of Origen. We find it quoted by the early Christian fathers—in Greek by Clemens Romanus, Justin Martyr, Ireneaus; in Latin versions by Tertullian and Cyprian. We find it quoted as inaccurate by the Jews (Just. Martyr. Apol.), and provoking them to obtain a better version (hence the version of Aquila, etc.). We find it quoted by Josephus and Philo; and thus we are brought to the time of the apostles and evangelists, whose writings are full of citations and references, and imbued with the phraseology of the Sept. From all this we are justified in the following conclusions on this head:

The Sept. was highly esteemed by the Hellenistic Jews before the coming of Christ. An annual festival was held at Alexandria in remembrance of the completion of the work (Philo, De Vita Mosis, lib. ii.). The manner in which it is quoted by the writers of the New Test. proves that it had long been in general use. We have the name of the Sept. in the legal and historical books by colo- nization, the Greek language prevailed; wherever Jews were settled, and the attention of the neighboring Gentiles was drawn to their wondrous history and law, there was found the Sept., which thus became, by Divine Providence, the means of spreading widely the knowledge of the One True God, and his truths, by colonization, to come throughout the nations; it was indeed ortium genitus ad Christum. To the wide dispersion of this version we may ascribe, in great measure, that general persuasion which prevailed over the whole East (per creuerat Oriente toto) of the near approach of the Redeemer, and which led the magi to recognize the star that proclaimed the birth of the King of the Jews.

2. Not less wide was the influence of the Sept. in the spread of the Gospel among the Gentiles. Many of the first converts who assembled at Jerusalem on the day of Pentecost, from Asia Minor, from Africa, from Crete and Rome, used the Greek language; the testimonies to Christ from the law and the prophets came to them in the words of the Sept.; St. Stephen probably quoted from it in his address to the Jews on the verb of Lias in his chariot (ὡς προόρισαν τοις παρακατα- γων υπεροχη); they who were scattered abroad went forth into many lands, speaking of Christ in Greek, and pointing to the things written of him in the Greek version of Moses and the prophets; from Antioch and Alexandria in the East to Rome and Massilia in the West, the voice of the Gospel sounded forth in Greek; Clemens of Rome, Ignatius at Antioch, Justin Martyr in Palestine, Ireneaus at Lyons, and many more, taught and wrote in the words of the Greek Scriptures; and a still wider range was given to the Sept. by the Latin version (or versions) made from it for the use of the Latin churches in Italy and Africa Minor. About the same period, by the numerous other versions into the tongues of Egypt, Ethiopia, Armenia, Arabia, and Georgia. For a long period the Sept. was the Old Test. of the far larger part of the Christian Church (see the Hulsean Prize Essay, by W. R. Churtong, On the Influence of the Sept. on the Progress of Christianity [Camb. 1861]; and an art. in the Zeitschr. f. wissemch, Theol. 1862, vol. iii.).

A number of other versions have been founded on the Sept. 1. Various early Latin translations, the chief of which was the Vetua Italia: 2. The Coptic and Sahidic, belonging to the 1st and 2d centuries; 3. The Ethiopic, belonging to the 4th century; 4. The Syriac, belonging to the 5th century; 5. The Georgian, of the 6th century; 6. Various Syriac versions, of the 6th and 8th centuries; 7. Some Arabic versions [see Arabic Versions]; 8. The Slavonic, belonging to the 9th century.

IV. Literal Origin of Portions of the Version.—This is a subject for inquiry which has received but little attention; not so much, probably, as its importance deserves. It was noticed by Tregelles many years ago that the headings of certain psalms in the Sept. coincide with the liturgical directions in the Jewish Prayer-book. The results were at a later period communicated in Kittto's Journal of Sacred Literature, April, 1852, 207—209. The 3d Psalm may be compared with the 23d Psalm, Sept. (Heb. 24th), is headed in the Sept. τῆς μᾶς σαββατοῦ; so, too, in Heb. in De Solae's Prayers of the Sept., ιὴν ἵππος: Psal. lxxiv., Sept. (Heb. lxxvii.), ιεροπλος σαββατοῦ: Psal. xciii, Sept. (Heb. xciv.), τρεινός σαββατοῦ. Psal. xcii, Sept. (Heb. xcvii.), τινὶ τόμον τοῦ προ- σβατοῦ. There appear to be no Greek copies extant which contain similar headings for Psal. lxxxi and lxxx (Heb. lxxxi and lxxii), which the Jewish Prayer-book appropriates to the third and fifth days; but that such once existed in the case of the latter psalm seems to be shown from the Latin Psalterium Vetua having the prefixed quinta sabbati, ιὴν ἵππος: Delitsch, in his Commentary on the Psalms, has recently pointed out that the notation of these psalms in the Sept. is in accordance with certain passages in the Talmud.

It is worthy of inquiry whether variations in other passages of the Sept. from the Hebrew text cannot at times be connected with liturgical use, and whether they do not originate in part from rubrical directions. It seems probable that the Sept. was not translated from a copy prepared for synagogue worship.

V. Character of the Version.—Under this head we
have to consider several special questions relating to its internal character as a translation:

1. Is the Sept. Faithful in Substance?—Here we cannot answer by citing a few examples; the question rests upon a complex, intricate, and, in opinion we express, must be verified by continuous reading. For a purely philological examination, see Septuagint, Linguistic Character of.

(1.) It has been clearly shown by Hody, Frankel, and others that the several books were translated by different hands: to have any comprehensive revision to perform, they must be considered separately. Names and words are rendered differently in different books; e.g.,

φασόν, the Passover, in the Pentateuch is rendered φασόν; in 2 Chron. xxxv. 6, φασάνον.

υὰμών, in Exod. xxviii. 98, δύναται; in Deut. xxxiii. 8, δύναται: Ezra ii. 63, φασάνεται: Neh. vii. 65, φασάνειον.

Φασάνειον, in 2 Tim. xxviii. 28, φασότα: Ezra ii. 63, φασότα.

The Philistines in the Pentateuch and Joshua are φασότα; in the other books ἀλληλοφασάνειον.

The books of Judges, Ruth, Samuel, and Kings are distinguished by the use of ἐν εἰς instead of ἐν τῇ.

These are a few out of many like variations.

(2.) Thus the character of the version varies much in the same book. Thus, one case of the Pentateuch is the best as Jerome says ("Confiteor quam sanctius curris Hebraicae consenat"), and this agrees well with the external evidence that the law was translated first, when the book MSS were more correct and Hebrew better known. Perhaps the simplicity of the style in these early books facilitated the facility of the version.

(3.) In the major prophets, some of the most important passages are seriously obscure—e.g. Isa. ix. 1, τοὺς ὑμιν τοῖς χειμώνας τοῖς θεοί καταφέρουσα, and in ix. 6, "Eliasa nactus est interpretem sese indulgunt" (Zwingli); Jer. xxiii. 6, καὶ τοῦτο τὸ δῶμα αὐτῶν τὸ καλεῖς αὐτὸν Κύριος ἱσηθεὶς ἐν τοῖς πορευόμενοι.

Ezekiel and the minor prophets (speaking generally) seem to be better rendered. The Sept. version of Daniel was not used, that of Theodotion being substituted for it.

(5.) Supposing the numerous glosses and duplicate renderings which have evidently crept from the margin into the text to be removed (e.g. Isa. viii. 16; Hab. iii. 2; Joel i. 8) these are blimishes not of the version itself, but of the copies—and forming a rough estimate of what the Sept. was in its earliest state, we may perhaps say of it, in the words of the well-known similar, that it was, in many parts, "the wrong side of the Hebrew tapestry," exhibiting the general outlines of the pattern, but confused in the more delicate lines, and with many ends of threads visible; or, to use a more dignified illustration, the Sept. is the image of the original seen through a glass not adjusted to the proper focus—the larger features are shown, but the sharpness of definition is lost.

2. Is the Version Mutually Accurate in Details?—We have anticipated the answer to this question, but will give a few examples:

(1) The same word in the same chapter is often rendered by differing words—Exod. xii. 13, ἔκτισεν; "I will pass over," Sept. ἐκτίσατο, but 23, ἔκτισα, "will pass over," Sept. παρελθέω.

(2) Differing words by the same word—Exod. xii, 23, παρελθέω, "pass through," and παρελθεῖσα, "pass over," both by παρελθεῖσα; Numb. xvi. 4, 5, παρελθεῖσα, "offering," and παρελθεῖσα, "sacrifice," both by ἑκάστα.

(3) The divine names are frequently interchanged; Κύριος is put for ὑπάρχει, God, and Ἐδραίος for ὑπάρχει, Jehovah; and the two are often wrongly combined or wrongly separated.

(4) Proper names are sometimes translated, sometimes not. In Gen. xxiii, by translating the name Machpelah (ἡ μαχαιλή), the version is made to speak of the cave being in the field (ver. 9), and then of the field being in the cave (ver. 17), οὗ ἄγων ἡ Εφροί, ὃς ἐν τῇ μαχαιλή στηθείη, the last word not warranted by the Hebrew. Gen. vi. 14 is a curious example of four names of persons being translated—e.g. ἡ ἱερσία, "to Tobiah," Sept. τοῖς χρυσίασι δαιμόνιοι; Psalms in Deut. xxxiv. 1, is ὡσία, but in Deut. iii. 27, τοῦ λαγησίου.

(5) The translators are often misled by the similarity of Hebrew words—e.g. Numb. iii. 36, ἐνημέρωσεν, "the cords of it," Sept. τὰ καταλαμβάνα, and iv. 26, τὰ πεπιστύρα, in other places οἱ κλαίοντες, and Isa. lv. 2, ἡ συγκομίσαται, both rightly. Exod. iv. 31, ἔμπνευσεν, "they heard," Sept. ἔκθετον (ἐκθέτον); Numb. xvi. 15, I have not taken one soul (ὁ ζώον); Sept. οὐκ ἐπιτίθηται (πρόσηκα). Deut. xxxii. 10, ἐπιτίθηται, "he found him," Sept. αὐτέρκειται αὐτοῖς; 1 Sam. ii. 2, ἐπιτιθήμενος, "I am gray-headed," Sept. καθάρεται (καθάρεται); Gen. iii. 17, τὸ ἐπιτίθηται, "for thy sake," Sept. ἐπὶ τοῦ άγόου σου (ἐπὶ).

In very similar cases the error may be thus traced to the similarity of some of the Hebrew letters, γ and α, and γ, and ο, and in some it is difficult to see any connection between the original and the version—e.g. Deut. xxxii. 8, παρελθεῖσα, "the sons of Israel," Sept. ἀγγέλων θεοῦ. Aquila and Symmachus, vion Ἰσραήλ.

Isa. xxi. 11, 12.
Watchman, what of the night? Watchman, what of the night? The watchman said, Φωτιστὸς τοποκείμενος, the morning cometh, and also the night. If ye will inquire, inquire ye. Return, come.

(6) Besides the above deviations and many like them, which are probably due to accidental causes—the change of a letter, or doubtful writing in the Hebrew—there are some passages which seem to exhibit a studied variation in the Sept. from the Hebrew, e.g. Gen. li. 2, on the seventh (ἑβδομάδα) day God ended his work; Sept. συνέδεθαι, ο ὄνομά τοῦ ἑβδομάτου τοῦ θεοῦ, a reading not found in the Hebrew, which is only by an add. in Exod. xxi. 40, καὶ ἐν τῇ γῆς Χριστίαν, appears to be of this kind, inserted to solve a difficulty.

Frequently the strong expressions of the Hebrew are softened down; where human parts are ascribed to God for hand the Sept. substitutes power: for mouth, word, etc. Exod. iv. 16, "Thou shalt be to him instead of God" (ὁ τοῦ τοῦ θεοῦ), Sept. στὶς ὑμῖν ἡ τῆς λαλήματος τῆς λαλήματος, these and many more savour of design rather than of accident or error.

The version is, therefore, not minutely accurate in details; and it may be laid down as a principle, never to build any argument on words or phrases of the Sept. without comparing them with the Hebrew. The Greek may be right; but very often its variations are wrong.

3. We shall now be prepared to weigh the tradition of the fathers, that the version was made by inspiration (κατ' εὐθυγραμμίαν τοῦ θεοῦ, Ireneaus; "Divino Spiritu
Even Jerome himself seems to think that the Sept. may have sometimes added words to the original "ob Spiritus Sancti auctoritate, licet in Hebrewis voluminibus non legatur" (Proph. in Paral. tom. i, col. 1419).

Let us try to form some conception of what is meant by the inspiration of translators. It cannot mean what Jerome here seems to allow, that the translators were divinely moved to add to the original, for this would be the inspiration of prophets, as he himself says in another passage (Proph. in Genes.), "Allud est entium vertere. alien esse interpretum." Every such addition would be, in fact, a new revelation. Nor can it be, as some have thought, that the deviations from the original were divinely directed, whether in order to adapt the Scriptures to the mind of the hearers or for other purposes. This would be, pro tanto, a new revelation, and we are at a loss to conceive of such a revelation; for, be it observed, the discrepancy between the Hebrew and Greek Scriptures would tend to separate the Jews of Palestine from those of Alexandria, and of other places where the Greek Scriptures were used; there would be two different copies of the same books circulated throughout the world, each claiming divine authority; the appeal to Moses and the prophets would lose much of its force; the standard of divine truth would be rendered doubtful; the trumpet would give an uncertain sound. No! If there be such a thing as an inspiration of translators, it must be an effect of the Holy Spirit on their minds, compelling them to do their work of translation more perfectly than by their own abilities and acquirements, to overcome the difficulties arising from defective knowledge, from imperfect MSS., from similarity of letters, from human infirmity and weariness; and so to produce a copy of the Scripture worthy of the Word of God, and true to the history of his people, in its original truth and purity. This is the kind of inspiration claimed for the translators by Philo (Vit. Mosiah, lii.): "We look upon the persons who made this version not merely as translators, but as persons chosen and set apart by divine appointment, to whom it was given to comprehend and express the sense and meaning of Moses in the fullest and clearest manner."

The reader will be able to judge from the foregoing examples whether the Sept. version satisfies this test. If it does, it will be found not only substantially faithful, but minutely accurate in details; it will enable us to compare the Old and the New Testament in every instance; and if an error has crept in; it will give evidence of that faculty of intuition in its highest form which enables our great critics to divine from the faulty text the true reading; it will be, in short, a reproduction of the original text, purified from the errors of human hands and eyes, established with the sanction of authority, and thereby it is a question to be decided by facts, by the phenomena of the version itself. We will simply declare our own conviction that, instead of such a divine republication of the original, we find a marked distinction between the original and the Sept.—a distinction which is well expressed by the phrase "Septuagint" (Proph. in Genes.). "Ibi Spiritus ventura predict: hic eruditio et verborum copia ea qua intelligentis transfert." It will be remembered that this agrees with the ancient narrative of the version, known by the name of Aristea, which represents the interpreters as meeting in one house, forming one council, conferring together, and agreeing on the sense (see Hady, lib. ii. c. vii. There are some, perhaps, who will deem this estimate of the Sept. too low; who think that the use of this version in the New Testament stamps it with an authority above that of a mere translation. But as the apostles and evangelists do not invariably cite the Old Testament according to the Sept., nor do we have any reason to think that they were under the necessity of doing so, it is evident that their citations are based on the original text. The decision as to any particular reading must be made by weighing this evidence, together with that of other ancient versions, with the arguments from the context, the rules of grammar, the genius of the language, and the comparison of parallel passages. Thus the Hebrew will sometimes correct the Greek, and sometimes the Greek the Hebrew; both liable to err through the infinity of human ears and hands, but each checking the other's errors. 2. The close connection between the Old and the New Testament makes the study of the Sept. extremely

VI. Benefits to be Derived from the Study of the Septuagint. After all the notices of imperfection above given, it may seem strange to say, but we believe it to be the truth, that the student of Scripture can scarcely read a chapter without some benefit, especially if he be a student of Hebrew, and able, even in a very humble way, to compare the version with the original.

1. We have seen above that the Sept. gives evidence of the character and condition of the Hebrew MSS., from which it was made with respect to vowel-points and the mode of writing. This evidence renders very material help in the correction and establishment of the Hebrew text. Being made from MSS., far older than the Masoretic recension, the Sept. often indicates readings more ancient and more correct than those of our present Hebrew MSS., and editions, and often speaks decisively between the conflicting readings of the present MSS. The following are instances:

Psa. xxii, 17 (in the Sept. xxi, 16). The printed Hebrew text is יְדַעְתָּי; but several MSS. have a verb in the third person plural, יְדָעָתָי: the Sept. steps in to decide the doubt, וַיְדַעֵן חֵרָיו מֹן וַיַּסְדִּיק מֹן, confirmed by Aquila, נהקהו.

Psa. xvi, 10. The printed text is יְדַעְתָּי, in the plural; but near two hundred MSS. have the singular, יְדָעָה, which is clearly confirmed by the evidence of the Sept., וַיְדָעֵהּ תָּתֵם וַיִּשָּׁדְּדִיק תָּתֵם, rendering unnecessary the addition of words in italics in our English version.

Other examples might be given, but we must content ourselves with one signal instance of a clause omitted in the Hebrew (probably by what is called הַמְּלֹאכָּה הַנָּבִיא) and preserved in the Sept. In Gen. iv, 6 is a passage which in the Hebrew and in our English version is evidently incomplete: 'And Cain talked (צָאֵק) with Abel his brother; and it came to pass when they were in the field, that the Heavenly Jehovah (יְהֹוֹת הַנִּבּיִים) is a word commonly used and rendered as above, spoken, 'Cain said unto Abel;' but, as the text stands, there are no words spoken, and the following words '... when they were in the field' come in abruptly. The Sept. fills up the lacuna Hebraeo rum codicum (Pearson), and puts קִנֵּבְיַנוֹ (אֲבֵנֶיה) of אֶבֶן צִוְו, as the passage is thus cited by Clemens Romanus (Ep. i, 4). The Hebrew transcriber's eye was probably misled by the word יָדַע terminating both the clauses. In all the foregoing cases we do not attribute any paramount authority to the Sept. on account of its superior antiquity to the extant Hebrew MSS., but we take it as an evidence of a more ancient Hebrew text, as an eye-witness of the texts, 280 or 180 years B.C. The decision as to any particular reading must be made by weighing this evidence, together with that of other ancient versions, with the arguments from the context, the rules of grammar, the genius of the language, and the comparison of parallel passages. Thus the Hebrew will sometimes correct the Greek, and sometimes the Greek the Hebrew; both liable to err through the infinity of human ears and hands, but each checking the other's errors.

The close connection between the Old and the New Testament makes the study of the Sept. extremely
valuable, and almost indispensable to the theological student. Pearson quotes from Irenaeus and Jerome as to the citation of the words of prophecy from the Sept. The Sept. can only be used to the purpose of translation, and not for serious study. When he says that the apostles "prophetica omnia ita enunciatuerunt quemadmodum Seniorium interpretatio continet." But it was manifestly the chief storehouse from which they drew their proofs and precepts. Grinfield says that "the number of direct quotations from the Apocrypha in the New Testament" is "too small to think grains of importance." Evidently, the number may be estimated at 350, of which not more than fifty materially differ from the Sept. But the indirect verbal allusions would swell the number to a far greater amount" (Apol. for LXX, p. 37). The comparison of the citations with the Sept. is much facilitated by Grinfield's Edition Helenistica of the New Test. and by Gough's New Test. Quotations, in which the Hebrew and Greek passages of the Old Test. are placed side by side with the citations in the New. (On this subject see Hody, p. 248, 281; Kennicott, Diæst. Gen. § 84; Cappelli Critica Sacra, vol. ii.)

3. Further, the language of the Sept. is the mould in which the ideas and expressions of the apostles and evangelists are cast. In this version Divine Truth has taken the Greek language as its shrine, and adapted it to the things of God. Here the peculiar idioms of the Hebrew are gathered upon the stock of the Greek tongue; words and phrases take a new sense. The terms of the basic ritual in the Greek version are employed by the apostles to express the great truths of the Gospel, e. g. ἁρμακίας, ἰδιωτικά, δεσμία ἐνίκωσίας. Hence the Sept. is a treasury of illustration for the Greek Testament. Many examples are given by Pearson (Prof. of LXX), e. g. σαρακόν, πνεύμα, διακοινο, φοίνικα τῆς σαρκοφ. "The Gnosis was a serious warning against the "Gnosis Nostrum Testamenti" of the intellecturo nihil est utilius, quam diligitur verseretur Alexandrinum Antiqii Foderi interpretationem ex una plus petiti auxiliis, quam ex veteribus scriptoribus Graecis simul sumtis. Centena repertiorunt in N. T. nusquam obvia in scriptis Graecorum veterum, sed frequentata in Alex., versione." E. g. the sense of τὸ πάσχα in Deut. 16:3. In the sacrificial week, throws light on the question as to the day on which our Lord kept his last Passover, arising out of the words in John xvi, 28, ἀλλ' ἵνα φάγωσι τὸ πάσχα.

4. The frequent citations of the Sept. by the Greek fathers, and of the Latin version of the Sept. by the fathers who wrote in Latin, form another strong reason for the study of the Sept. Pearson cites the appellation of Scurabusa bonus applied to Christ by Ambrose and Augustine, as explained by reference to the Sept. in Hab. ii. 11, κάκιων ἐκ Ἑλέων.

5. On the value of the Sept. as a monument of the Greek language and literature, its most purified phases, this is not the place to dwell. Our business is with the use of this version as it bears on the criticism and interpretation of the Bible, and we may safely urge the theological student who wishes to be "thoroughly furnished" to have always at his side the Sept. Let the Hebrew, if possible, be placed before him; and at his right, in the next place of honor, the Alexandrian version. The close and careful study of this version will be more profitable than the most learned inquiry into its origin; it will help him to a better knowledge both of the Old Test. and the New.

VII. Objects to be Attained by the Critical Scholar.—

1. Among these a question of much interest, suggested above, still awaits for a solution. In many of the passages which show a studied variation from the Hebrew (some of which are above noted), the Sept. and the Samaritan Pentateuch agree—e. g. Gen. ii. 2; Exod. xii. 40.

2. They also agree in many of the ages of the post-diluvian patriarchs, adding one hundred years to the age at which the first son of each was born, according to the Hebrew (see Cappelli Critica Sacra, III, xx. 7). See Patriarch.

3. They agree in the addition of the words ἐπὶ τῶν πρεσείων (Gen. iv, 9), which many have seen reason to think rightly added.

4. Various reasons have been conjectured for this agreement—translation into Greek from a Samaritan text, interpolation from the Samaritan into the Greek, or vice versa; but the question does not seem to have found a satisfactory answer (see § ii above).

5. If this could be accomplished with any tolerable completeness, it would possess a strong interest, as being the first translation of any writing into another tongue, and the first repository of divine truth in the great colony of Hellenistic Jews at Alexandria.

The critic would probably take as his basis the Roman edition from the Codex Vaticanus as representing most nearly the ancient (κοινή) texts. The collection of fragments of Origen's Hexapla, by Montfaucon and others, would help him to eliminate the additions which have been made to the Sept. from other sources, and to purge out the glosses and double renderings; the citations in the New Test. and in Philo, in the early Christian fathers, both Greek and Latin, would render assistance of the same kind: and perhaps the most effective aid of all would be found in the fragments of the old Latin version collected by Sabbatier in 3 vols. fol. (Rheims, 1749).

6. Another work of more practical and general interest still remains to be done, viz. to provide a Greek version, accurate and faithful to the Hebrew original, for the use of the Greek Church, and of students reading the Scriptures in that language for purposes of devotion or mental improvement. Field's edition is as yet the best of this kind. It originated in the desire to supply the Greek Church with such a faithful copy of the Scriptures; but as the editor has followed the text of the Alexandrian MS., only correcting, by the help of the Sept. and its parallel passages (e. g. in Gen. xv, 15, correcting τραφαῖς in the Alexandrian MS. to τραφεῖς, the reading of the Complut. text), and as we have seen above that the Alexandrian text is far from being the nearest to the Hebrew, it is evident that a more faithful and complete copy of the Old Test. in Greek might yet be provided.

We may here remark, in conclusion, that such an edition might prepare the way for the correction of the blemishes which remain in our authorized English version. Embracing the results of the criticism of the last two hundred and fifty years, it might exhibit several passages of the original purity; and the corrections thus made, being approved by the judgment of the best scholars, would probably, after a time, find their way into the margin at least of our English Bibles.

One example only can be here given, in a passage which has caused no small perplexity and loads of commentary. Isa. ix. 3 is thus rendered in the Sept.: Τὸ πάσχα ἐν λαῷ, δ κατάγας ἐν εὐφροσύνῃ καὶ τῷ ἑλεαστῷ ἐν εὐφροσύνῃ καὶ τῷ τρισθυμῷ ἐν ἀμώμῳ. It is easy to see how the faulty rendering of the first part of this has arisen from the similarity of the Hebrew letters מ and ר, and from an ancient error in the Hebrew text. The following translation restores the whole passage to its original clearness and force:
(5.) The divergence between the extreme points of the series of MSS. may be estimated from the following statement:

73 differs from the Roman text in 40 places, with Hebrew text.

59 differs from the Roman text in 40 places, with Hebrew.

Between these and the Roman text lie many shades of variety. The Alexandrine text falls about half-way between the two extremes:

Differing from Roman text in 25 places, with Hebrew.

The diagram below, drawn on a scale representing the comparison thus instituted (by the test of agreement with the Hebrew in respect of additions or omissions), may help to bring these results more clearly into view. The base-line R. T. represents the Roman text.

The above can only be taken as an approximation, the range of comparison being limited. A more extended comparison might enable us to discriminate the several MSS. more accurately, but the result would perhaps hardly repay the labor.

2. But what is the value of this text? Was the version at first more accurate with the Hebrew, as in (72) and (59), and did it afterwards degenerate into the less accurate state of the Codex Vaticanus? Or was the version at first less accurate, like the Vatican text, and afterwards brought, by critical labors, into the more accurate form of the MSS. which stand highest in the scale?

History supplies the answer. Jerome (Ep. ad Suriam et Fredatem, ii, 627) speaks of two copies, one older and less accurate, suiij, fragments of which are believed to be represented by the still extant remains of the old Latin version; the other more faithful to the Hebrew, which he took as the basis of his own new Latin version.

In another place (Prefat. in Paralip. vol. i, col. 1022) he speaks of the corruption of the ancient translation, and the great variety of copies used in different countries:

It appears from these and other passages that Origin, finding great discordance in the several copies of the Sept., laid this version side by side with the other three translations, and, taking their accordance with each other as the test of their agreement with the Hebrew, marked the copy of the Sept. with an obeb, \( \frac{1}{2} \), where he found superfluous words, and supplied the deficiencies of the Sept. by words taken from the other versions with an asterisk, \( * \), prefixed. The additions to the Sept., were chiefly made from the Theodotion (Jerome, Prolog. in Genesis, vol. i; see also Proef. in Job, p. 795). From Eusebius, as quoted below, we learn that this work of Origin was called Teraphal, the fourfold Bible. The following specimen is given by Montfaucon:

Gen. i. 1.

But this was only the earlier and the smaller portion of Origin's labors: he rested not till he had acquired the knowledge of Hebrew, and compared the Sept. directly with the Hebrew copies. Eusebius (Hist. Eccle. vi, 16, p. 217, ed. Valer.) thus describes the labor; which led to the greater work, the Hexapla; the last clause of the passage refers to the Tetraplia:

"So careful was Origin's investigation of the sacred oracles that he learned the Hebrew tongue, and made himself master of the original Scriptures received among the Jews in the Hebrew letters; and reviewed the versions of the other interpreters of the Sacred Scriptures, besides the Sept., and discovered some translations varying from the well-known versions of Aquila, Symmachus, and Theodotion, which he searched out, and brought to light from their concealed secrets in neglected corners, ... and in his Hexapla, after the four principal versions of the Psalms, added a fifth, a sixth and a seventh translation, stating that one of these was found in a cask at Jericho, in the time of Antoninus, son of Severus: and bringing these all into one view, and dividing them in columns over against one another, together with the Hebrew text, he left to us the work called Hexapla; having arranged separately, in the Tetraplia, the versions of Aquila, Symmachus, and Theodotion, together with the version of the Seventy."

"Quis ignorat, quod tantum in Scripturis divinis habituer studiis, ut ethiam hebraeum linguam contra antichas gentis glosa naturae illustraret: et accepta LXX interpretum, et extrema editione cum lectione Aquilae scilicet Pontici proselyti, et Theodotionis Ebonieni, at Symmachii et aliorum, et Theodotionis dogmatici, ... et Preterea quattuor et sextam et septimam editionem, quae etiam non de eis bibliotheca habebatur, miro labore repetit, et cum ceteris editionibus comparavit."

From another passage of Jerome (in Epist. ad Titum, vol. iv, pt. i, p. 437) we learn that in the Hexapla the Hebrew text was placed in one column in Hebrew letters, in the next column in Greek letters:

HEXAPLA (Hor. xi, 1).

It should here be mentioned that some take the Tetraplia as denoting, not a separate work, but only that portion of the Hexapla which contains the four columns filled by the four principal versions (Notes on Eusebius, p. 106) thinks that the Tetraplia was formed by taking those four columns out of the Hexapla, and making them into a separate book. But the testimony of Origin himself (iii, 881; ii, 131), above cited, is clear, that he formed one corrected text of the Sept. by comparison of the three other Greek versions that of Heuschius in Alexandria and Egypt; that the churches lying between these two regions used the Sept. text copied by Eusebius and Pamphilus (H. Eccl. v. i, col. 1022). The great variety of text existing MSS. is thus accounted for by the varying sources from which they have descended.

The Roman edition, edited under pope Sixtus V (1585).

The texts of (1) and (2) were probably formed by collation of several MSS. The Roman edition (3) is printed from the venerable Codex Vaticanus, but without many errors. This text has been followed in most of the modern editions. A transcript of the Codex Vaticanus was prepared by Cardinal Bessarion; it was lately published at Rome by Yerecelli. It is much to be regretted that this edition is not so accurate as to preclude the necessity of consulting the MS. The text of the codex, and the parts added by a later hand, to complete the codex (among them nearly all of Genesis), are printed in the same Greek type, with distinguishing notes.

The fac-simile edition by Barber (4) is printed with types made after the form of the letters in the Codex Alexandrinus (British Museum Library) for the fac-simile edition of the New Testament, by Woide in 1786. Great care was bestowed upon the sheets as they passed through the press. The Codex Sinaiticus (5) was published in the same year at the expense of the emperor of Russia, and a very limited edition was printed. See Sinaitic MS.

2. Other important editions are the following: The Septuagint in Walton’s Polyglot (1657) is the Roman text, with the various readings of the Codex Alexandrinus, and the Greek Testament text (1657) is only valuable for the preface by Pearce. An edition of the Codex Alexandrinus was published by Grabe (Oxford, 1707-20), but its critical value is far below that of Barber’s. It is printed in common type, and the editor has exercised his judgment on the text, putting some words of the codex in the margin, and replacing them by what he thought better readings, distinguished by a smaller type. This edition was reproduced by Breitinger (Zurich, 1730-32, 4 vols. 4to), with the various readings of the Vatican text. The edition of Boas (Franque, 1709) follows the Roman text, with its scholia, and the various readings given in Walton’s Polyglot, especially those of the Codex Alexandrinus. This has often been reprinted, and is now the commonest text. The valuable critical edition of Holmes, continued by Parsons, is similar in plan to the Hebrew Bible of Kennicott; it has the Roman text, with a large body of various readings from numerous MSS. and editions (Oxford, 1815). Oxford Polyglot (1815), Oxford Polyglot (1819), and the apparatus of the text in 8vo, others of smaller size, forming part of his Polyglot series of Bibles. His text is the Roman.

The latest edition, by Field (1859), differs from any of the preceding. He takes as his basis the Codex Alexandrinus, but corrects all the manifest errors of transcription by the help of other MSS., and brings the text up to the 60th of the Septuagint text with the order of the Hebrew Bible. The text in Stier and Theile’s Polyglottten Bibel (Bielefeld, 1854) is revised arbitrarily, and without the aid of the Codex Sinaiticus. Scrivener has promised a new critical edition.

3. Editions of particular books, more or less critically prepared, have occasionally been issued: Genesis, by Lagarde (Lips. 1688); Esther, by Fritzsch (Turci, 1848); Ruth, by the same (ibid. 1867); Jeremiah, by Spohn (Lips. 1794-1828); Ezekiel, by Vincent (Rom. 1840); Jonah, by Höhn (Lips. 1867-88). The genuine text of Daniel (which was long supposed to be lost, the translation of Theodore having been substituted for it in the common MSS.) was first published separately by Simon de Magistris in 1772, from the Codex Chigiannis; and it was reprinted by J. D. Michaelis (1773-74), Seggar (1775), and more critically by Hahn (1845), from the Codex Ambrosianus.

The best Leseion to the Septuagint is that of Schleicher’s Universale (Leips. 1821, 5 pts.), and reprinted at Glasgow (1822, 3 vols. 8vo). An earlier one is that of Bihl (Hag. 1779-80, 3 vols.). The best for the Apocrypha is Wahl’s Classis (Lips. 1868). The best Concordance is that of Trimmus (Amst. 1718, 2 vols. fol.). An earlier one is that of Kircher (1677). The Winer’s X. T. Grammar Leipzig offers an excellent service for philological comparison. The student may also consult Sturz, De Diaceto Macedoniano (Lips. 1808); Maltby, Two Sermons before the University of Durham (1843).

GREEK LANGUAGE.

X. Literature.—In addition to the works named by Wahl, Bihl, Theol. iv, 31 sq., 156 sq.; Rosenmuller, Handb. Litter. in saec. ixxx. (Leips.), and Darlington, d. Theol. s.v. “Alex. Vera,” the following are important: Cappelli Critica Sacra (Par. 1650); Walton’s Polyglott, ad Bibl. Polyglott. (Lond. 1657); Pearson [Bp.] Proef. Patristica ad LXX (ibid. 1655); Vossius, De LXX Interp. (Hag. 1661; aps. 1668); Montfaucon, Hexaplo- logum Origine quam Scirentur (Par. 1710; Lips. 1747); Hody, De Bibl. Text. Original. Vers. Graec. et Latina Vulgata (Oxf. 1704); Hottinger, Thesaurus (Zur. 1649); Owen, Inquiry into the Sept. (Lond. 1769); Brief Account, etc. (ibid. 1787); Kennicott, Dissertations to his Vet. Text. (Oxon. 1776-80); Werner, De LXX Interpret. (ibid. 1778); Beloch, Die hebräischen Handschriften der alten Welt (Hamb. 1877-82); Hoffmann, Die Handschriften der alten Welt (Hamb. 1877-87); Valckenier, Diatribe de Artabatulo Judico (L. B. 1806); Schleusner, Oppus. Crit. ad Vers. Graec. V. T. (Lips. 1812); Dahne, Judäisch-ägyptisch-philologische (Halle 1831-34); Töpel, De Pent. Interp. Alte. Judae. Crit. et Hom. (Halle. Sex. 1860); Gießer, Urchristenstudiu (Stuttg. 1881, 8vo); Fabrici, Bibliotheca Sacra, ed. Harless, vol. III; Studier, De Versiculis Alexandrinis Origine, Historia, Usu, et Abusus Critico (Berna, 1825, 8vo); Credner, Beitrag zur Einleitung, etc. (Halle, 1838, 2 vols. 8vo); Amersfoort, Dissertatio de Variis Lectionibus Holmnesiae (Lugd. Bat. 1815, 4to); Pluche, Lectiones Alex. et Hebr. (Bonn. 1807); Thiersch, De Pent. Ver. Alex. (Er- tange, 1810); Gaisford, Lexicographia Americana (Leips. 1841); Ueber den Einfluss der palastinischen Exegese auf die alex. Hervortrutz (ibid. 1851); Grünfeld, N. T. Editio Hellemistica (ibid. 1845), and Apology for the Septuagint (ibid. 1840); Selwyn, Note Critica in Ex. xl-xxv, Numeros, Deuteronomonomy (ibid. 1856-58); Also_macro, Tschr. d. A. d. Berzel. Courtland, Hol- семей Essay (ibid. 1861); Pearson [G.], Popers, in the Journal of Sacred Lit., i, iv, v, vii, 3d series.

SEPTUAGINT, LINGUISTIC CHARACTER OF THE. The language of the Sept., from its close connection with that of the New Test., has been a fruitful source of discussion, and various theories on the subject have been maintained, the Septuagint being more ancient than the Hebrew. The nature of the Greek word used as the term "Septuagint" to express a style of Greek which was so full of Hebrew words and Hebraisms as to be scarcely intelligible to readers who had no knowledge of He-
breu or Chaldee. He illustrates this by the Spanish Jew's translation of the Bible into the Spanish tongue, which can be understood only by those who have some knowledge of Hebrew as well as Spanish. Later critics have, however, admitted the existence of an Alexandrian dialect, from which the Sept. has derived some of its features, though these are not its most prominent characteristics. Thus Hofty, quoting Croesus, says: "The Greek translators of the Scriptures are to be described as Hebraists, Chaldaists, and Alexandrians. Their version is full of Hebrew, Chaldee, and Alexandrian words and phrases. They render word for word, and often where a passage is thus translated, the words are Greek, but the Hebrew construction is retained" (E. Bibl. Text. Orig. II, iv, 23).

As the text from which the Alexandrian version was made did not have the vowel-points, it would be very interesting to know how the translators pronounced the Hebrew, and the more so since some critics who delight in hunting after various readings would make the Sept. the standard for the Hebrew text. But here we are at a loss, and all that we know can only make out from the version itself. Commencing with the alphabet, the pronunciation of the letters is given to us in the Lamentations of Jeremiah, where the verses are arranged alphabetically. The letters of the alphabet, thus commencing the different verses, are expressed fully, as the following scheme will show:

\[ \alpha = \text{Alpha}, \quad \varepsilon = \text{Epsilon}, \quad \eta = \text{Eta}, \quad \zeta = \text{Zeta}, \quad \lambda = \text{Lambda}, \quad \kappa = \text{Kappa}, \quad \chi = \text{Chi}, \quad \rho = \text{Rho}, \quad \sigma = \text{Sigma}, \quad \tau = \text{Tau}. \]

That \( \alpha \) and \( \rho \) were pronounced as \( v \) and \( r \) we may infer from the fact that \( v \) is always equivalent to the Hebrew \( v \), thus \( \text{v} = \text{vav} \). From the version itself we see that the letters had the following pronunciation:

\[ \text{M}, \text{N}, \text{P}, \text{Q}, \text{R}, \text{S}, \text{T}, \text{U}, \text{V}, \text{W}, \text{X}, \text{Y}, \text{Z} \]

In itself inaudible (like the Greek \( \text{spiritus lenis} \)), receives its intonation from the vowel, as \( \text{α}, \text{αι}, \text{αι} \). Sometimes it has the \( \text{spiritus asper} \), as \( \text{α}, \text{αι}, \text{αι} \). (Judg. ix. 37, 39.)

It is \( \beta \), sometimes \( \phi \): \( \text{βασιλεὺς} \) (Judg. vii. 29), \( \text{ταυτεῦ} \); also \( \text{βιαίος} \) (Josh. xix. 30, 31). Sometimes \( \beta \) is expressed by \( \mu \), as \( \text{μυτικός} \), \( \text{γεμιζόμενον} \), or by \( \mu \) alone, as \( \text{μαθητής} \). (Ch. viii. 8, 9, 10, 10.)

It is \( \gamma \), sometimes \( x \), as \( \text{κεφαλίς} \), \( \text{δόξα} \), \( \text{άιων} \) also \( x \), as \( \text{σκέφτεσθαι} \), \( \text{συνεκρούω} \).

It is \( \delta \), but also \( \lambda \), as \( \text{δύο} \) (Gen. xxxvi. 39, Mar. 15). It is \( \lambda \), like \( \kappa \), either inaudible, as \( \text{κυρίος} \), \( \text{καθιστήρ} \); or it has the \( \text{spiritus asper} \), as \( \text{γιω} \), \( \text{λιθόω} \).

It is \( \upsilon \), \( \varepsilon \) (Gen. xxiv. 5, and xxxvii. xix. 12). Sometimes it is not expressed at all, as \( \text{εὐς} \), \( \text{αὐτός} \). (Ch. vii. 15, 16.)

It is \( \zeta \), seldom \( \zeta \), as \( \text{ζυγός} \) (Gen. xxvii. 21); but \( \text{ζυγός} \), (Gen. iv. 26); \( \zeta \), \( \zeta \), \( \text{ζυγός} \). Sometimes it is inaudible at the beginning, middle, and end of a word. Often it is \( \zeta \), \( \zeta \), \( \zeta \); \( \text{ζυς} \), \( \text{ζυγός} \); sometimes \( \zeta \) as \( \text{ζυγός} \) (Gen. xxvii. 24).
7. Very prominent also are the Egyptian words which we find in the Sept., and which betray the origin of the translation. The following are the most remarkable:

άλδευν, truth, the rendering of דְּשֵׁן (Thummim, or perfections), in Exod. xxvii. 26; Lev. viii. 8, and Deut. xxxii. 8. According to Αἰλαίον, Αλδεύν was the name given to an image of sapphire stone, which was hung by a golden chain round the neck of the high priest of the highest in rank of the Egyptian priests, who also held the office of judge. This was to denote the truth or justice with which he was to deal the cases which were brought before him. Hence it is supposed that the use of it for the Θυμήμονες of the high-priest was derived; yet not without the meaning of truth, or more accurately of the faithfulness and righteousness of God.

The word itself, πληκτής (the sacred bull of the Egyptians), occurs in Jer. xiii. (xxvi.), 15: "καὶ ἐκεῖνος...· ἀπεί ὁ πλήκτης ἐν τῇ δουλείᾳ τοῦ σωτῆρος."

We may also note that a measure which is mentioned by Herodotus as being used in Egypt and Persia. It is put for the "homer" in Isa. vi. 10, and it also occurs in Dan. xii. 8 (History of Bel and the Dragon).

Σύρα, or Σύρεις, is an Egyptian word for the papaw, or some other vegetable or grain of the same genus, as it occurs both in the Hebrew and Sept. of Gen. xii. 2; Isa. ix. 7, 8. It is also found four times in Josephus, as applied to the "creation" of the world, was traced by Hody to Egyptian philosophy. But it seems rather to be derived from the συρίζων, or genealogy, of which the first book of the Pentateuch is composed.

Σύρος was a drink made from barley in Egypt, mentioned by Herodotus and Dioscurides. It is found in the Sept. version of Isa. xix. 10, where it seems that σύρα (strong drink) was read instead of ποομο (merchandise).

Σύρα is found in Psa. cxxxi. 16, "I will abundantly bless her provision." Jerome said that it was an Egyptian word for corn; and Hesychius mentions ρύριμα as a decoction of milk, or orange juice, rendered by the Sept. as "Egyptian provisions," perhaps the medicinē athara of which Pliny speaks. The Heb. תּוֹס is, however, rendered Σύρα (venileos) in Gen. xxiv and xxvii.

Σύρομεσσος is used to denote a measurement of space in Gen. xxxv. 19; xlvii. 7. Jerome seems to have been perplexed by its introduction in these passages. Hody conjectures that the use of the word was suggested by the hippodrome which was constructed by Ptolemy Lagos at Alexandria, and was the scene of the events recorded in the 3d book of the Maccabees. Thus the "hippodromos of Ephrath" signifies a certain distance from Bethlehem, which was nearly the interval between the goal of the Egyptian race-course.

The word κοσμός, used for a cap, in Gen. xlvii. 10, is of Persian origin. The κοσμός, a head-band or fringed garment, the wearer of which is called κοσμοβιος (Exod. xxvii.; Isa. iii.), was an Egyptian ornament.

The word κοσμος, in Isa. xix. 2, is not to be read κοσμος, "law," but has the sense of "provincie," or "district," Egypt being divided into seven, being governed by seven superintendents, or prefects. This sense it occurs in 1 Macc. x. 30.

The word κοσμος is supposed by Jerome to be the Hebrew σφακ, but Hesychius states that it was an Egyptian measure containing forty κυδαρίας (Num. xxviii. 5; Judg. vi. 19).

The word κοσμος occurs in some of the Greek texts in Exod. ii. 3, the Egyptian paper-roll, which was the material of the ark in which the parents of Moses concealed him. It is also called βιβλίον, and hence the "vessels of bulrushes" in Exod. ii. 2, are called δέσμες λιβάνων. The κοσμοικā are used in the Sept. for the chambers and treasuries of the Temple in Solomon's time (1 Chron. xxi. 6, and Levites (1 Chron. xxi. 6, 28, 55; Ezek. xi. 18, etc.). The κοσμοικα are mentioned by Clemens Alexandrinus as a class of priests among the Egyptians.
The same variations we find in addverbs, particles, proper nouns, but more especially in certain phrases.

See Thiersch, De Pentateuchi Versione Alexandrina (Erangen, 1840); Frankel, Vorstudien der Septuaginta (Leips. 1841); Kaulen, Einleitung in die heilige Schrift (Freiburg, 1876), p. 65 sq. (B.F.)

SEPTUAGINT, TALMUDIC NOTICES CONCERNING THE. It is strange that the writers of the art, SEPTUAGINT in general, and of the Bible and in Kitto's Cyclopaedia should not have mentioned the notices we find concerning that version in the Talmud and other Jewish writings. It is true that in Kitto we find it stated, "It is spoken of in the Babylonian and Jerusalem Talmuds:" but where, and what, the reader is at loss to see. Yet these notices are of very important, since they form a great deal of light on one or some points which have vexed the interpreters. The oldest notice is that contained in the Mechilta, a Midrashic commentary on Exodus (comp. the art. MIdrash), where Exod. xxi, 40 is thus cited: "וְעִבְּרוּ הַעַלּוֹת בְּכֵן עַד כֶּנֶּסֶת הָעַלּוֹת הָיְתָה (Ver. 26); Lev. xi, 6, 35 (instead of Lev. xii, 16); Exod. iv. 20, 21 (instead of Deut. xvi. 15); Deut. xxi, 19 (they added) (Ver. 17); Exod. xvi, 8, 36; and they wrote, Lev. xi, 6, and Deut. xvii, 7, 9, חָדַּבְדוּ (for חָדְבְדוּ)."

From this passage we can infer that, besides the changes enumerated here, others are not to be excluded; besides, it only speaks in general of those who wrote the Bible for Ptolemy, and neither the number seventy nor seventy-two writers or translators is mentioned. It is different with the relation given in the Jewish Talmud, Megila, i. 9. Here the number of changes made is given as thirteen (םיִמְּשָׁרְשַׂר שֵׁרֶשׁ שֵׁי): the passages are the same as given in the Mechilta, with some very slight changes. Thus Gen. ii, 27 (comp. v. 2) we read הָדְלֵי, xil, 6, רָמִי (instead of אָם); Exod. xxii, 40, וְיָדוּרָה הַבּוֹדֵי נַעַרְבָה; in Lev. xi, 6 (Deut. xiv, 7) the explanation of the change is given that the name of Ptolemy. The place, however, of the translators is also not given. The Babylonian Talmud, Megilla, 9 a, however, mentions the number of elders as seventy-two, who were put in seventy-two different cells without knowing for what purpose. Then king Ptolemy went to each of these and said to him, "Write for me the law of Moses, your teacher." God disposed it so that they all transcribed alike. The changes mentioned here are given without any number; but they are almost the same as the above, with slight modifications. Gen. i, 27 (comp. v, 2), חֹדֵלִין is not changed, but חֹדֵלִין is changed into נַעֲרֵבָה: xil, 6 agrees with the Jerusalem Talmud; and so, likewise, Exod. xxi, 40. We find, as an addition, that in Exod. xxvii, 5, 11, שֵׁיָמָר is written for שֵׁי and שֵׁי; in Deut. xvii, 8, we have the addition שָׁמִי without שָׁמִי; and to Lev. xi, 6 (Deut. xiv, 7) a similar explanation is given as in the Jerusalem Talmud, that the name of Ptolemy's wife was שֵׁי; and hence they thought that it would be regarded as a mockery, on the side of the Jews, should they have mentioned her name (as that of an unclean animal) in the law. In the Midrashim only single passages are mentioned—thus Gen. i, 27 in Bereishith Rabba, ch. viii, as Mechilta, with which also agrees Gen. ii, 2 in ch. x: xi, 7 with ch. xxxviii; xviii, 12 with ch. xlvii; xil, 6 with ch. xcviii, where, as in Mechilta, we find שָׁמִי. All these passages are accompanied with the remark that here is
one of the changes made for Ptolemy, without giving their number. In *Semanth Rabbi*, ch. vii., on Exod. xiv., 20, it is stated that this is one of the eighteen changes made for Ptolemy, without stating wherein these changes consist. In *Bereishith Rabba*, ch. lixii. on Exod. xiiii. 40, in order to show that Abraham was already called *Israel,* the verse is quoted, *"It is an old matter; the dwelling of the Israelites in Egypt, Canaan, and Goshen,* etc. (ch. lixiii. 20), where it is added in parenthesis *before the stay in Egypt was numbered among the 430 years."

In the treatise *Sefera Torath,* i. 8, 9, seventy elders are mentioned who wrote the law, and the alterations made are given as thirteen. In the treatise *Sopherin,* i. 7, 8, we also read of thirteen alterations made by the translators.

In examining more minutely these changes we shall find the following:

1. Gen. i. 1-3, according to the structure of the language and the most ancient traditions still preserved by Rashi and Aben Ezra, is to be rendered "In the beginning when God created the heaven and the earth, and the earth was without form and void, and darkness was upon the face of the deep, and the spirit of God was upon the face of the waters, and God said," etc. (Gen. i. 1). The verse has been altered to "I will make man in the image (בְּרֵאשֵׁית), after our likeness (בְּרֵאשֵׁית), and in the likeness of (בְּרֵאשֵׁית)," to remove the appearance of polytheism.

2. Gen. ii. 5, which says, "And on the seventh (יַעֲנָה) day was the work finished," has been altered to "And on the sixth (יָעֲנָה) day was the work finished," to avoid the apparent contradiction, since God did not work on the seventh day, but rested.

3. Gen. xi. 7, which says, "Let us go down, and let us confound them (לַעֲנַ שָׂרָת)," has been altered to "I will go down and I will confound them (לַעֲנַ שָׂרָת)," to remove the apparent contradiction in the passage where the man and woman are spoken of as having become *one flesh,* and the name *nir* (לַעֲנַ שָׂרָת) has been altered to *nir* (לַעֲנַ שָׂרָת), to remove the apparent contradiction, since God did not work on the seventh day, but rested.

4. Gen. xii. 11, which says, "After my decay I had again pleasure," has been altered to "After my decay I had again pleasure," to avoid the offensive application to the distinguished mother of Israel of the expression (לַעֲנַ שָׂרָת), which is used for rotten old garments (comp. Geiger, *Urschrift,* p. 45 sq.).

5. Gen. xlix. 6, which says, "In their anger they slew a man, and in their self-will they hamstrung an ox," has been altered to "In their anger they slew an ox (לַעֲנַ שָׂרָת), and in their self-will they hamstrung a fat ox (לַעֲנַ שָׂרָת)," to do away with the wholesale slaughter of men.

6. Exod. xiv. 19, the word (לַעֲנַ שָׂרָת), is altered to (לַעֲנַ שָׂרָת), because of the reluctance of the translators to make mention of the word (לַעֲנַ שָׂרָת). This alteration is still preserved in our text of the Sept.

7. Exod. xiiii. 40, and all other lames, i.e., "the land of Canaan," has been added in order to avoid the apparent contradiction, since the Israelites did not sojourn four hundred and thirty years in Egypt.

8. Exod. xxi. 2, which says, "All cattle (לַעֲנַ שָׂרָת) are changed into (לַעֲנַ שָׂרָת); i.e., worthy, or searchers after wisdom," because it was not thought becoming to say that all the revealed beings were brought about by sacrifices.

9. In Lev. x. 8 and Exod. xiv. 19, the word (לַעֲנַ שָׂרָת), a hare, has been altered into (לַעֲנַ שָׂרָת), (הַרְגָּשֵׁית), or (לַעֲנַ שָׂרָת), because of the reluctance of the translators to make mention of the word (לַעֲנַ שָׂרָת).

10. Numb. xvi, 15, which says, "as was changed into (לַעֲנַ שָׂרָת), a desirable thing, for the same reason as given under 8. This alteration is still in our text of the Sept.

11. Deut. xvi. 19, the word (לַעֲנַ שָׂרָת), to shine, has been inserted so as to avoid the idolatry of the heathen being ascribed to God.

12. Deut. xvi. 5, where we read that God had not commanded the Israelites to worship other gods (in accordance with Deut. ix. 20), has been altered to (לַעֲנַ שָׂרָת), which I have forbidden the nations to worship, to preclude the possibility of ascribing the origin of idolatry to the God of Israel.

This pug for the alterations. But there are two other very important notices, viz. "that the day on which the translation of the Bible into Greek was made was regarded as a great calamity equal to that of the worship of the golden calf" (comp. Kuenen, *The Religion of Israel,* iii. 214-216). The Samaritans took the same view on account of their hatred of the Jewish translation (comp. Herzfeld, *Geschichte,* iii. 157). Says de Wette, "It seemed to the Jews and others that little evidence to convince us that such a feeling, more or less widely spread, must have existed. It is the same instinct which to this hour makes it a sin, if not an impossibility, in the eyes of a devout Mussulman, to translate the Koran; which in the Christian Church assailed Jerome with the coarsest vituperation for venturing on a Latin version which differed from the Greek; which at the Reformation regarded it as a heresy to translate the Latin Scriptures into the languages of modern Europe; and which, in England, has in our own days regarded it in the English Church as a dangerous innovation to revise the Authorized Version of the 17th century, or in the Roman Church to correct the barbarous dialect of the Douay translation of the Vulgate, or to admit of any errors in the text or in the rendering of the Vulgate itself. In one and all of these cases this reluctance has sprung from the same tenacious adherence to ancient and sacred forms—from the same unwillingness to admit of the Reformation and other translations than that of the Sept., even at the cost of serious discrepancies when once familiarized by established use. But in almost all these cases, except, perhaps, the Koran, this sentiment has been compelled to yield to the more generous desire of arriving at the hidden meaning of sacred truth, and of making that truth more widely known. So it is not the least essential aim of the case of the Septuagint" (Jewish Church, iii. 286 sq.). While we agree in the main with the learned dean, yet in the case of the Sept, the explanation of the above-mentioned Talmudic statement must be sought for somewhere else. It is known that most of the early controversies with the Jews were conducted in the Greek language, and on the common ground of the faithfulness of the Sept. version, which was quoted alike on both sides. And so it continued to be respected during the age of the writers of the New Test. and the 1st century of the Christian era. As, however, the version grew into use among Christians, it gradually lost the confidence of the Christian Church, especially with those who were persecuted against them by the Christians. The first signs of this appear in the works of Justin Martyr, in the 2d century. His Dialogue with Trypho the Jew professes to be the account of a discussion which actually took place, and Eusebius (Hist. Eccl. iv. 18) places the scene of it at Ephesus, which is abundantly corroborated by the Old Test.; and even such passages are quoted as not to be found in the Hebrew. The latter circumstance made Justin charge the Jews with removing especially four prophecies of Christ from their copies. The first of these is: "And Ezra said unto the people,
This passover is our Saviour and our refuge; and if ye consider and it enter into your heart that we shall, by a figure (περιπάτως, i.e. the cross), afflict him and afterwards hope in him, this place shall not be made desolate to all time, saith the Lord God of Hosts. But if ye believe him not, and hear not his preaching, ye shall become a spoil for the Gentiles" (Dial. c. 72). This passage is found by Lachmann (ms. add.); Zahn (c. 18), is not to be found in the book of Ezra, and may probably have been interpolated according to the Apocryphal Ezra (vi, 21) into the copies of the Sept. by some Christian. The second (from Jer. xi, 19) had, he said, been but recently erased from certain copies, and was rejected by others which were given to the same agogues. This, however, is found entire in all our present copies. The third passage is said to be taken also from Jeremiah: "And the Lord God remembered his dead, who were fallen asleep in the dust of their tombs, and descended to them to declare unto them the good tidings of his salvation." These passages are remarkable from their resemblance to those of 1 Pet. iv, 6 (μετέχοντες εἰς ἐνεργείας ζωῆς). The passage of Jeremiah, as alleged by Justin Martyr, read κατέβη πρὸς αὐτούς ἐνεργείας ζωῆς. "If a genuine passage," says Churton, "the apostle's words seem to contain an allusion to them as well as to the doctrine enunciated in the preceding chapter of his epistles, that the Christian shall convert from some traditional saying of the prophet, or adapted from Peter's words, it seems that the person who introduced them into the text of the Sept. took the words of the apostle in their literal sense, and not as later commentators have conjectured, that the persons called μετέχοντες were alive at the time of the preaching." The fourth and last passage is from Ps. cxvi, 10: "Declare among the heathen that the Lord hath reigned from the tree" (Dial. c. 73). Out of this passage the Jews are accused of having erased the last words, ἀπὸ τοῦ Ἐξόλου. The words ἀπὸ τοῦ Ἐξόλου are quoted again by Justin Martyr in his Apology: they are also quoted by Tertullian (Adv. Jud. c. 10), Ambrose, Augustine, Leo, Gregory, and others. Yet the words occur in no Greek or Hebrew MS., and the probability is that they were added by some Christian. Under these circumstances we can very well understand the feeling of the Jews towards a version which brought such accusations against them; and this it seems, gives us the real clue to the Talmudic passage which regarded the day of the translation of the Bible into Greek as a great calamity. See Frankel, Vorstudien zur Septuaginta, p. 25 sq.; Geiger, Uebersicht der Bibel, p. 493 sq.; Massuchet, Safodin (ed. Muller, Leipzig, 1878), p. 12 sq.; Ginsburg, Der Aegyptische Text der Septuaginta (Wien, 1869), p. 424 sq.; Church, The Influence of the Septuagint Version, p. 41 sq.; Reiske, Beitrage zur Erklarung der Allent Testamenten, vii, 299 sq.; Friedlander, Patriotische und talmudische Studien (Vienna, 1874), p. 133 sq. (B. P.)

Septuagint, a term used by certain 17th-century Anglican writers for the fixed or movable rule placed on each side of the entrance of the sanctuary to support the communicants when they kneel to receive the Lord's body and blood.

Septulchre (σεπτολυρία, kibor, or נֵטָלוּר, keburstah, a burying-place or grave, as sometimes rendered; τάφος, a tomb, as elsewhere rendered; also מַעְטָלָר or מַעְטָלוּר, a monument, likewise rendered "grave" or "tomb"). Man-kind in all ages have been careful, indeed of necessity, to provide suitable resting-places for the dead. In treating of the Hebrew usages in this respect, we will advance whatever elucidation modern research has contributed.  

I. General Principles of Sepulture.—1. The Duty.—The Jews uniformly disposed of the corpse by entombment wherever possible, and, failing that, by interment; extending this respect to the remains even of the slain enemy and malefactor (1 Kings xi, 15; Deut. xxii, 23), in the latter case by express provision of law. Since this was the only case so guarded by Mosaic precept, it may be concluded that natural feeling was relied on as rendering any such general injunction superfluous. Similarly, to disturb remains was regarded as a barbarity, only justifiable in the case of those who had themselves outraged religion (2 Kings xxiii, 16, 17; Jer. viii, 1, 2). The rabbins quote the doctrine "dust thou art, and to dust thou shalt return" (Gen. iii, 19) as a reason for interring the dead, referring to entomb or inter their dead; but that preferential practice is older than the Mosaic record, as traceable in patriarchal examples, and continued unaltered by any Gentile influence; so Tacitus (Hist. v, 5) notices that it was a point of Jewish custom potius corpora condere.  

The precedent of Jacob's and Joseph's remains being returned to the land of Canaan was followed, in wish at least, by every pious Jew. Adopting a similar notion, some of the rabbins taught that only in that land could those who were buried obtain a share in the resurrection which was to usher in the Messiah's reign on earth. Thus that land was called by the rabbins "the land of the living," and the sepulchre itself "the house of the living.

Some even feigned that the bodies of the righteous, wherever else buried, rolled back to Canaan underground, and found there only their appointed rest (Nicolaus, De Septu. Heb. xiii, 1). Tombs were, in popular belief, fed by the soul as the sepulchre was by the animals of the Gentiles. Thus Machpelah is stated (Lightfoot, Centuria Chorographica, s. v. "Hebron") to have been the burial-place not only of Abraham and Sarah, but also of Adam and Eve; and there was probably at the time of the New Test. a spot fixed upon by tradition as the site of the tomb of every prophet of note in the Old Test. To repair and adorn these was deemed a work of exalted piety (Matt. xxiii, 29). The scruples of the scribes extended even to the burial of the ass whose neck was broken (Exod. xxxix, 20), and of the first-born of cattle (Matt. xxvii, 51, 52; John, xix, 31). See GRAVE.

2. Site.—On this subject we should remember that our impressions, as derived from the Old Test., are those of the burial of persons of rank or public eminence, while those gathered from the New Test. regard a private station. But in both cases "the manner of the Jews'" included the use of spices where they could command them: through the influence of the Oriental nations, the use of spices was general in the East (2 Chron. vii, 14). A portion of these were burned in honor of the deceased, and to this use was probably destined part of the one hundred pounds' weight of "myrrh and aloes" in our Lord's case. On high state occasions the vessels, bed, and furniture used by the deceased were burned (2 Chron. xxxiv, 32). Such burning was called the "great burning" made for Asa. If a king was unpopular or died disgraced (e. g. Jehoram, 2 Chron. xxxix, 19; Josephus, Ant. ix, 5, 3), this was not observed. In no case, save that of Saul and his sons, were the bodies burned, nor, in that case were they so burned as not to leave the "bones" easily concealed and transported, and the whole meaning of the words looks like a hastily packed burial against hostile violence. Even then the bones were interred and re-exhumed for solemn entombment. The ambiguous word in Amos vi, 10, נֵטָלוּר, rendered in the A. V. "he that burneth him," possibly means "the burner of perfumes in his honor," i.e. his near relation, on whom such duties devolved; rather than, as most think, "the burner of the corpse." For a great mortality never causes men to burn corpses where it is not the custom of the country; nor did the custom vary among the Jews on such an occasion (Ezek. xxxix, 12-14). It was the duty of the next of kin to perform and preside over the whole funeral service. Before a company of public buriers, originating in an exceptional necessity (Ezek. loc. cit.), had become, it seems, customary in the times of the New Test. (Acts v, 6, 10). The closing of the eyes, kissing, and washing the corpse (Gen. xlvi, 4; 1, 1; Acts ix, 37) are customs common to
all nations. Coffins were but seldom used, and, if used, were open; but fixed stone sarcophagi were common in tombs of rank. The bier, the word for which in the Old Test. is the same as that rendered bed [see Bed], was borne by the nearest relatives, and followed by any who wished to do honor to the dead. The grave-clothes (sha'ar, ibrāqā) were probably of the fashion worn in life, but swathed and fastened with bandages, and the head was covered separately. Previously to this being done, spices were applied to the corpse in the form of ointment, or between the folds of the linen; hence our Lord's remark that the woman had anointed his body πώς τῷ ἰσραήλ, with a view to dressing it in these ἰσραήλ, not, as in the A.V., "for the burial." For the custom of mourners visiting the sepulchre, see Matt; for other usages, see Funeral.

3. The Site.—A natural cave enlarged and adapted by excavation, or an artificial imitation of one, was the standard type of sepulchre. This was what the structure of the Jewish soil supplied or suggested. A distinct and simple form of this kind, as contrasted with the complex and elaborate rites of Egypt clings to the region of Palestine, and varies but little with the great social changes between the periods of Abraham and the captivity. Jacob and Joseph, who both died in Egypt, are the only known instances of the Egyptian method applied to patriarchal remains. Sepulchres, when the owner's means permitted it, were commonly prepared beforehand, and stood often in gardens, by road-sides, or even adjoining houses. Kings and prophets alone were probably buried within towns (1 Kings ii, 10; xv, 6, 28; 2 Kings x, 36; xiii, 9; 2 Chron. xvi, 14; xxvi, 27; 1 Sam. xxvi, 1; xxvii, 6). Sarah's tomb and Rachel's seem to have been chosen merely from the accident of the place of death; but the successive interments at the former (Gen. xxxi, 31) are a chronicle of the strong family feeling among the Jews. It was the sole fixed spot in the unsettled patriarchal life; and its purchase and transfer, minutely detailed, are remembered with affection in the kind, until repeated on a similar occasion at Shechem. Thus it was deemed a misfortune or an indignity, not only to be deprived of burial (Isa. xiv, 20; Jer. xxxii; 2 Kings ix, 10), but, in a lesser degree, to be excluded from the family sepulchre (1 Kings xiii, 22), as were Uzziah, the royal leper, and Manasseh (2 Chron. xxxvi, 25; xxxiii, 20). Thus the remains of Saul and his sons were re-claimed to rest in his father's tomb. Similarly, it was a mark of a profound feeling towards a person not of one's family to wish to be buried with him (Ruth i, 17; 1 Kings xiii, 31), or to give him a place in one's own sepulchre (Gen. xxiii, 6; comp. 2 Chron. xxxv, 16). The hired servile force occupied space for more than one generation; and these galleries of kindred sarcophagi are common in many Eastern branches of the human race. Cities soon became populous and demanded cemeteries (comp. πολύευρον, Sept. at Ezek. xxxix, 15), which were placed without the walls; such a one seems intended by the expression in 2 Kings xxiii, 6, "the graves of the children of the people," situated in the valley of the Kedron or of Jehoshaphat. Jeremiah (vii, 32; xix, 11) threatens that the eastern valley, called Tophet, the favorite haunt of idolatry, should be polluted by burying there (comp. 2 Kings xxiii, 16). Such was also the "potter's field" (Matt. xxvi, 69) which was thrown out by digging for clay into holes serviceable for graves. See Cemeteries.

II. Explicit Information from Ancient Sources as to

Corinthian Tomb at Petra.

The Style of Sepulchres.—1. From a Comparison with Early Heathen Nations.—It has been too much the fashion to look to Egypt for the prototype of every form of Jewish art. The Egyptian tombs at Thebes were extensive excavations in the barren mountains which skirted the city on the west. In like manner, the magnificent tombs in the necropolis of Sela, in Arabia Petraea, were sculptured out of the sides of the rock surrounding the ancient city. See Petra. The Edomites and the Egyptians seem to have regarded the habitations of the living merely as temporary resting-places, while the tombs are regarded as permanent and eternal mansions; and, while not a Vestige of a habitation is to be seen, the tombs remain monuments of splendor and magnificence, perhaps even more wonderful than the ruins of their temples. Funeral urns or vases are found in great numbers on the plains and mounds of Assyria and Mesopotamia containing human skeletons or fragments of bones which appear to have been calcined.

But in Jewish history there is a total diversity from these customs in the matter of tombs. From the burial of Sarah in the cave of Machpelah (Gen. xxiii, 19) to the funeral rites prepared for Dorcas (Acts ix, 37) there is no mention of any sarcophagus, or even coffin, in any Jewish burial. No pyramid was raised—no separate hypogeum of any individual king, and, what is most to be regretted by modern investigators, no inscription or painting which either recorded the name of the deceased or symbolized the religious feeling of the Jews towards the dead. It is true, of course, that Jacob, dying in Egypt, was embalmed (Gen. i, 2), but it was only in order that he might be brought to be entombed in the cave at Hebron, and Joseph, as a naturalized Egyptian and a ruler in the land, was embalmed; and it is also mentioned as something exceptional that he was put into a coffin, and was so brought by the Israelites out of the land and laid with his forefathers. But these, like the burning of the body of Saul, were clearly exceptional cases. See Embalming.

Still less were the rites of the Jews like those of the Pelasgi or Etruscans. With that people the graves of the dead were, or were intended to be, in every respect similar to the homes of the living. The lucumon lay in his robes, the warrior in his armor on the bed on which he had reposed in life, surrounded by the furniture, the vessels, and the ornaments which had adorned his dwelling when alive, as if he were to live again in a new world with the same wants and feelings as before. Besides this, no stall, niche, or sepulchral mound has yet been found in the hills or plains of Judea, nor have we any hint either in the Bible or Josephus of any such having existed which could be traced to a strictly Jew-
ish origin. In very distinct contrast to all this, the sepulchral rites of the Jews were marked with the same simplicity that characterized all their religious observances. The body was washed and anointed (Mark xix. 8; xv. 1; John xix. 39, etc.), wrapped in a clean linen cloth, and borne without any funeral pomp to the grave, where it was laid without any ceremonial or form of prayer. In addition to this, with kings and great persons there seems to have been a "great burning" (2 Chron. xvi. 14; xxii. 12; Jer. xxxi. 35), all these being measures more suggested by sanitary exigencies than by any harking after ceremonial pomp.

2. Normal Style.—This simplicity of rite led to what may be called the distinguishing characteristic of Jewish sepulchres—the deep loculus—which, so far as is now known, is universal in all purely Jewish rock-cut tombs, but hardly known elsewhere. Its form will be understood by referring to the annexed diagram, representing the forms of Jewish sepulchre. In the apartment marked A, there are twelve such loculi about two feet in width by three feet high. On the ground floor these generally open on the level of the floor; when in the upper story, as at C, on a ledge or plate-form, on which the body might be laid to be anointed, and on which the stones might rest that closed the outer end of each loculus. The shallow loculus is shown in chamber B, but was apparently only used when sarcophagi were employed, and therefore, so far as we know, only during the Graeco-Roman period, when foreign customs came to be adopted. The shallow loculus would have been singularly inappropriate and inconvenient where an unembalmed body was laid out to decay, as there would evidently be no means of shutting it off from the rest of the catacomb. The deep loculus, on the other hand, was as strictly conformable with Jewish customs, and could easily be closed by a stone fitted to the end and luted into the groove which usually exists there. This fact is especially interesting, as it affords a key to much that is otherwise hard to be understood in certain passages in the New Test. Thus in John xi. 39, Jesus says, "Take away the stone;" and (ver. 40) "they took away the stone," without difficulty, apparently; which could hardly have been the case had the loculus been a shallow one, as would be required to close the entrance of a cave. Also in xx. 1, the same expression is used, "the stone is taken away;" and though the Greek word in the other three Evangelists certainly implies that it was rolled away, this would equally apply to the stone at the mouth of the loculus, into which the Marys must have then stooped down to look in. In fact, the whole narrative is infinitely more clear and intelligible if we assume that it was a stone closing the end of a rock-cut grave than if we suppose it to have been a stone closing the entrance or door of a hypogeum. In the latter case the stone to close a door—say six feet by three feet—could hardly have weighed less than three or four tons, and could not have been moved without machinery. There is one catacomb—that known as the "Tombs of the Kings" (see below)—which is closed by a stone rolling across its entrance; but it is the only one, and the immense amount of contrivance and fitting which it has required is sufficient proof that such an arrangement was not applied to any other of the numerous rock tombs around Jerusalem, nor could the traces of it have been obliterated had it anywhere existed. From the nature of the openings where they are natural cavens, and the ornamental form of their doorways with their arched roofs, it is evident, except in one instance, that they could not have been a work of a later date than the latter part of the war, and it seems only to be the closing of the last of these expressions can refer. But until a more scientific exploration of these tombs than has hitherto been given to the public, it is impossible to feel quite certain on this point.

Thirdly, although, as we have seen, Jews were as free from the pomp and vanities of funeral ceremonial, they were at all stages of their independency an eminently burying people. From their entrance into the Holy Land till their death by the Romans they seem to have attached the greatest importance to the posthumous residence of their bodies, and in all places to have shown the greatest respect, if not veneration, for the sepulchres of their ancestors. Few, perhaps, could enjoy the luxury of a rock-cut tomb. This is known, and all that are likely to be done are there not possibly 500, certainly not 1000. But in Jerusalem or about the camp, where the days of its prosperity have possessed a population of from 30,000 to 40,000 souls, it is evident that the place of the mass of the people must then, as now, have been consigned to graves dug in the earth, but situated as near as possible to their habitation, as their means would allow their own personal burial. The body lay on the stone bier, and its place in the Temple walls (Ezek. xliv. 7-9), and, however needfully it may have done in their life, the place of their carefully recorded in the Chronicles of the Kings, as the cause why that place is chosen generally as late as can be, as if record was not only the most direct, but the final judgment, the life of the people, of the dead, or the life of the soul of the dead, as the case may be. Such graves are described in Strabo and other writers in the usual form. A pool lies near the great stones in the Temple, and the place called *Elath, each large enough to accommodate a corpse. On the fourth side the cavern is approached through a small open covered court or portico, or a narrow lane from the court to the cavern was closed by a stone, called *Elath, as capable of being rolled, firming the Evangelistic narrative. Sometimes such caverns, each with its recesses, were entered by several sides of the same portico (Mish. Batr., 6, 8; quoted by J. Nicolaus, De Sepulcr. Sodav.). Such a tomb is that described in John xix. 39, and is such a one which as Trapp has been described (40), and which must have been the tomb of the Kings (above to). But earlier sepulchres were doubtless mortuary places, and, to judge from 2 Kings xiii, 21, did not maintain contact of remains. Sepulchres were sometimes by pillars, as that of Rachel, or by walls, as those of the Ammonites at Madin (Josh. x. 4), and had places of higher and lower honours, they were, from their assumed importance sometimes made the repositories of treasures (cf. ii. 183). We find them also distinguished by use of the title" (2 Kings xxiii, 17), Such as were otherwise not so prominently "white" (Matt. xxv. 27) once a year, after the rains before the Passover, by defilement (Hottinger, Crisis, p. 1034; Roestenreich, De Sepul. Calce Notat. in xxiii).

III. Historical Notice of Hebrew Sepulchres.—1. In the Extant Antiquities of the Jews at Jerusalem.—1. Sepulchres of the Patriarchs and other Emblems.—We find that one of the most striking incidents in the life of Abraham is the purchase of the burying-ground of Ephron the Hittite at Hebron, in which was buried the body of Machpelah, in order that he might the
Sarah, his wife, and that it might be a sepulchre for himself and his children. His refusing to accept the privilege of burying there as a gift shows the importance Abraham attached to the transaction, and he insisted on purchasing and paying for it (Gen. xxiii, 20), in order that it might be “made sure unto him for the possession of a burying-place.” There he and his immediate descendants were laid 3700 years ago, and there they are buried, in which one in modern times has seen their remains, or been allowed to enter into the cave where they repose. A few years ago, Signor Pierotti says, he was allowed, in company with the pasha of Jerusalem, to descend the steps to the iron grating that closes the entrance and to look into the cave. What he saw there was that it was a natural cavern, untouched by the chisel and unaltered by art in any way. Those who accompanied the prince of Wales in his visit to the mosque were not permitted to see even this entrance. All they saw was the round hole in the floor of the mosque which admits light and air to the cave below. The same round opening exists at Nebi Samwil in the roof of the reputed sepulchre of the prophet Samuel, and at Jerusalem there is a similar opening into the tomb under the dome of the rock. In the former it is used by pious votaries to drop petitions and prayers into the tombs of patriarchs and prophets. The latter having lost the tradition of its having been an opening, the opening now only serves to admit light into the cave below. Unfortunately, none of those who have visited Hebron have had sufficient architectural knowledge to be able to say when the church or mosque which now stands above the cave was erected; but there is no great reason for doubting that it is a Byzantine church erected there between the age of Constantine and that of Justinian. From such indications as can be gathered, it seems of the later period. On its floor are sarcophagi purporting to be those of the patriarchs; but, as is usual with such, they were the work of only cenotaphs representing those that stand below, and which are esteemed too sacred for the vulgar to approach. Though it is much more easy of access, it is also most as difficult to ascertain the orientation of the building that encloses the sacred precincts of these tombs. From the account of Josephus (War, iv, 7), it does not seem to have existed in his day, or he surely would have mentioned it; and such a citadel could hardly fail to have been of warlike importance in those troublous times. Besides this, we do not know of any such enclosed enclosure surrounding any tombs or sacred place in Jewish times, nor can we conceive any motive for so excluding these graves. There are not any architectural mouldings about this wall which would enable an archaeologist to approximate its date; and if the beveling is assumed to be a Jewish arrangement (which is very far from being exclusively the case), on the other hand it may be contended that no buttressed wall of Jewish masonry exists anywhere. There is, in fact, nothing known with sufficient exactness to decide the question, but the probabilities certainly tend towards a Christian or Saracen origin for the whole structure, both internally and externally. See Machpelah.

For Joseph’s Tomb and Rachel’s Tomb, see those articles respectively.

Aaron died on the summit of Mount Hor (Num. xx, 28; xxxii, 39), and we are led to infer he was buried there, though it is not so stated; and we have no details of his tomb which would lead us to suppose that anything existed there earlier than the Mohammedan Kube that now crowns the hill overlooking Petra, and it is, at the same time, extremely doubtful whether that is the Mount Hor where the high-priest died. See Hon.

Moses died in the plains of Moab (Deut. xxxiv, 6), and was buried there, but no man knoweth his sepulchre to this day on which he died; and it is very probable that the only instance in the Old Test. of a sepulchre being concealed, or of one being admitted to be unknown. See NNUO.

Joshua was buried in his own inheritance in Timnah-sarah (Josh. xxiv, 30), and Samuel in his own house at Ramah (1 Sam. xii, 3). The Jews, probably interpret as meaning in the garden attached to his house, as it is scarcely probable it would be the dwelling itself. We know, however, so little of the feelings of the Jews of that age on the subject that it is by no means improbable that it may have been in a chamber or locus attached to the dwelling, and which, if closed by a stone carefully cemented into its place, would have prevented any annoyance from the circumstance. Joab (1 Kings ii, 34) was also buried “in his own house in the wilderness.” In fact, it appears that from the time when Abraham established the burying-place of his family at Hebron till the time when David fixed that of his family in the city, to which here his name, the Jewish rulers had no fixed or favorite place of sepulture. Each was buried on his own property, or where he died, without much caring either for the sanctity or convenience of the place chosen.

2. Sepulchre of David.—Of the twenty-two kings of Judah who reigned at Jerusalem from 1048 to 500 B.C., eleven, or exactly one half, were buried in one hypogeeum in the “city of David.” The names of the kings so lying together were David, Solomon, Rehoboam, Abijah, Asa, Jehoshaphat, Ahaziah, Amaziah, Jotham, Hezekiah, and Josiah, together with the good priest Jehoiada. Of all these it is merely said that they were buried “in the sepulchres of their fathers” or of the kings” in the city of David, except of two—Asa and Hezekiah. Of the first it is said (2 Chron. xvi, 14), “they buried him in his own sepulchre which he had made for himself in the city of David,” and laid him in the burial-place which he had made for his father, and divers places prepared by the act of the act of the Kings and Chronicles; that these sepulchres were situated in the city of David, leave no doubt that they were on Zion (q. v.). It is quite clear, however, that
the spot was well known during the whole of the Jewish period, inasmuch as the sepulchres were again and again opened as each king died; and from the tradition that Hyrcanus and Herod opened these sepulchres (Ant. xiii. 8. 4; xvi. 7. 1). The accounts of these last openings are, it must be confessed, somewhat apocryphal, resting only on the authority of Josephus; but they prove at least that he considered there could be no difficulty in finding the place. It was a secret transaction, if it took place, regarding which rumor might fashion what wondrous tales it pleased, and no one could contradict them; but there having been built a marble stele (Ant. xvi. 7. 1) in front of the tomb may have been a fact within the cognizance of Josephus, and would, at all events, serve to indicate that the sepulchre was rock-cut, and its site well known. So far as we can judge from this and other indications, it seems probable that there was originally a natural cavern in the rock in this locality, which may afterwards have been improved by art, and in the sides of which loculi were sunk, where the bodies of the eleven kings and of the good high-priest were laid, without sarcophagi or coffins, but "wound in linen clothes with the spices, as the manner of the Jews is to bury" (John xix. 40).

Modern tradition has assigned the name of the Tomb of David (also of Solomon) to a structure still standing on Mount Zion outside the present city walls, otherwise called the Cenaculum, from the tradition that it was likewise the building in which the Lord's supper was instituted. From the time of the notice by the apostle Peter (Acts ii. 29), which shows that the true site was then well known, the royal tombs appear to have been forgotten, or at least they are not mentioned till the close of the 11th century, when Raymond d'Agiles, one of the historians of the first crusade, says regarding the Cenaculum, "There are also in that church the sepulchre of king David and Solomon, and of the holy pontifical Stephen" (Gesta Dei per Francos, p. 174). In the next century Benjamin of Tudela visited the holy city, and wrote the following singular story, which has perhaps some foundation in fact: "On Mount Zion are the sepulchres of the house of David, and those of the kings who reigned after him. To the tomb of David and Solomon are admitted the most distinguished of the people, and also the rabbi, and the priest to repair it. He ordered stones to be taken from the original wall of Zion for that purpose, and twenty workmen were hired at stated wages, who broke stones taken from the very foundation of the wall of Zion. Two laborers thus employed found a stone which covered the mouth of a cave. This they entered in search of treasures, and proceeded until they reached a large hall, supported by pillars of marble, encrusted with gold and silver, and before which stood a table with a golden sceptre and crown. This was the sepulchre of David; to the left they saw that of Solomon in a similar state; and so on the sepulchres of the other kings buried there. They saw chests locked up, and were on the point of entering when a blast of wind like a storm issued from the mouth of the cave with such force that it threw them helpless on the ground. They lay there until evening, when they heard a voice commanding them to go forth from the place. They immediately rushed out and communicated the strange tale to the patriarch, who summoned a learned rabbi, and heard from him that this was indeed the tomb of the great king of Israel. The patriarch ordered the tomb to be walled up so as to hide it effectually." The narrator closes by the statement, "The above-mentioned rabbi told me all this." About the middle of the 15th century the tombs are mentioned by several travellers, and one (Tucher of Nuremberg, A.D. 1478) says that the Moslems had converted the crypt, or lower story of the Cenaculum, into a mosque, within which were shown the tombs of David, Solomon, and the other kings. In the following century, Pitter, a German traveller, professes to have visited the tombs, and gives a brief description. "On the left of the Cenaculum, under the choir, is a large vaulted cave; from it we come by a narrow passage, shut in by wooden rails, to an arch on the left, in which is a very long and lofty monument cut entirely out of the rock, with carving admirably executed. Under this are buried David, Solomon, and the other kings of Judah." This account also partakes of the marvellous, and must be received with caution. It is a fact, however, that Jews, Christians, and Moslems have now for more than four centuries agreed in regarding the Cenaculum as the spot beneath which the dust of the kings of Judah lies. Numbers of Jews may be often seen standing close to the venerable building, looking with affectionate sadness towards the spot. In 1689 Sir Moses Montefiore and his party were admitted to the mosque. They were led to a trellised doorway, through which they saw the tomb, but they were not permitted to enter. A few years ago an American lady, daughter of Dr. Barclay, was enabled, through the kindness of a Mohammedan lady friend, to enter and sketch the sacred chamber. She says, "The room is insignificant in its dimensions, but is furnished in the most magnificent style. The tomb is apparently an immense sarcophagus of rough stone, and is covered by green satin tapestry richly embroidered with gold. A satin canopy of red, blue, green, and yellow stripes hangs over the tomb; and another piece of black velvet tapestry embroidered in silver covers a door in one end of the room, which, they said, leads to a cave underneath. Two tall silver candlesticks stand before this door, and a little lamp hangs in a window near it, which is kept constantly burning" (City of the Great King, p. 212). The real tomb, if it be in this place, must be in the cave below. The structure covered with satin and described by Miss Barclay is merely a cenotaph, like those in the mosque at Hebron. When both mosque and cave are thrown open, and full opportunity given for the search, then, and not till then, can it be satisfactorily established that the royal tombs are or are not in this place (Porter, Hand-Book for Palestine, p. 181 sq.).

Besides the kings above enumerated, Manasseh was, according to the book of Chronicles (2 Chron. xxxiii, 20) buried in his own house, which the book of Kings (2 Kings xxi, 18) explains as the "garden of his own house, the garden of Uzza," where his son Amos was buried, also, it is said, in his own sepulchre (ver. 20);
ish loculi open. Other chambers and loculi have been commenced in other parts, and in the passages there are spaces where many other graves could have been located, all which would tend to show that it had been disused before completed, and consequently was very modern. But, be this as it may, it has no architectural mouldings, no sarcophagi or shallow loculi, nothing to indicate a foreign origin, and may therefore be considered, if not an early, at least as the most essentially Jewish of the sepulchral excavations in this locality—every other important sepulchral excavation being adorned with architectural features and details betraying most unmistakably their Greek or Roman origin, and fixing their date, consequently, as subsequent to that of the Maccabees; or, in other words, like every other detail of pre-Christian architecture in Jerusalem, they belong to the 140 years that elapsed from the advent of Pompey till the destruction of the city by Titus.

4. The "Tombs of the Kings."—The most important of the great groups in the vicinity of Jerusalem is that known as Kehár es-Sultan, or the Royal Caves, so called because of their magnificence, and also because that name is applied to them by Josephus, who, in describing the third wall, mentions them (στήνατα Βασιλείας) [War, v, 4, 2]. By some, however, they are identified with the Monument of Herod (bid. 8, 2; 12, 2); by others, as Robinson and Porter, with the tomb of Helena, the widowed queen of Monobazus, king of Adiabene. She became a proselyte to Judaism, and fixed her residence at Jerusalem, where she relieved many of the poor during the famine predicted by Agabus in the days of Claudius Caesar (Acts xi, 28), and built for herself a tomb, as we learn from Josephus (Ant. xx, 2, 1 sq.; 4, 3; War, v, 2, 2; 4, 2; Pausan. viii, 15, 5; Euseb. ii, 12; Jerome, Epit. Pala). See JERUSALEM. Into the question of the origin of these tombs it is, however, unnecessary to enter; but their structure claims our attention. They are excavated out of

Plan of the "Tombs of the Prophets" on Olivet.

But we have nothing that would enable us to indicate where this was; and Ahaz, the wicked king, was, according to the book of Chronicles (2 Chron. xxvii, 27), "buried in the city, even in Jerusalem, and they brought him not into the sepulchres of the kings of Israel." The fact of these last three kings having been idolaters, though one reformed, and their having all three been buried apparently in the city, proves what importance the Jews attached to the locality of the sepulchre, but also tends to show that burial within the city, or the enclosure of a dwelling, was not so repulsive to their feelings as is generally supposed. It is just possible that the rock-cut sepulchre under the western wall of the present Church of the Holy Sepulchre may be the remains of such a cemetery as that in which the wicked kings were buried.

For the sepulchres of the Maccabees, see MOHAM. For the modern or traditionary "Tombs of the Kings" near Jerusalem, see below.

3. The "Tombs of the Prophets."—The neighborhood of Jerusalem is thickly studded with tombs, many of them of great antiquity. A succinct but valuable account of them is given in Porter's Hand-book (p. 143 sq.); but it is only necessary in this article to refer to two or three of the most celebrated. The only important hypogeum which is wholly Jewish in its arrangements, and may consequently belong to an earlier, or to any epoch, is that known as the Tombs of the Prophets in the western flank of the Mount of Olives. See OLIVET. Through a long descending gallery, the first part of which is winding, we enter a circular chamber about twenty-four feet in diameter and ten high, having a hole in its roof. From this chamber two parallel galleries, ten feet high and five wide, are carried southwards through the rock for about sixty feet; a third diverges south-east, extending forty feet, They are connected by two cross galleries in concentric curves, one at their extreme end, the other in the middle. The outer one is 115 feet long and has a range of thirty niches on the level of its floor, radiating outwards. Two small chambers with similar niches also open into it. This tomb, or series of tombs, has every appearance of having originally been a natural cavern improved by art, and with an external gallery some 140 feet in extent, into which twenty-seven deep or Jew-

---

Facade of the Entrance to the "Tombs of the Kings."
the rock. The traveller passes through a low arched doorway into a court ninety-two feet long by eighty-seven wide. On the western side is a vestibule or porch thirty-nine feet wide. The open front was supported by two columns in the middle. Along the front extend a deep frieze and cornice, the former richly ornamented. At the southern side of the vestibule is the entrance to the tomb. The architecture exhibits the same ill-understood Roman-Doric arrangements as are found in all these tombs, mixed with bunches of grapes, which first appear on Maccabean coins, and foliage which is local and peculiar, and, so far as anything is known elsewhere, might be of any age. Its connection, however, with that of the tombs of Jehoshaphat and the Judges fixes it to the same epoch. The entrance doorway of this tomb is below the level of the ground, and concealed, so far as anything can be said to be which is so architecturally adored; and it is remarkable as the only instance of this quasi-concealment at Jerusalem. It is closed by a very curious and elaborate contrivance of a rolling stone, often described, but very clumsily answering its purpose. This, also, is characteristic of its age, as we know from Pausanias that the structural marble monument of queen Helena of Adiabene was remarkable for a similar piece of misplaced ingenuity. Within, the tomb consists of a vestibule or entrance of the "Tombs of the Kings." Rolling Stone at the Door of one of the "Tombs of the King's." halls about twenty feet square, from which three other square apartments open, each surrounded by deep loculi. These again possess a peculiarity not known in any other tomb about Jerusalem, of having a square apartment either beyond the head of the loculi or on one side: as, for instance, AA have their inner chambers, A'A', within, but n and n, at n' n', on one side. What the purpose of these was it is difficult to guess, but, at all events, it is not Jewish. But perhaps the most remarkable peculiarity of the hypogeum is the sarcophagus chamber n, in which two sarcophagi were found, one of which was brought home by De Saulcy, and now is in the Louvre.

5. The "Tombs of the Judges."—The hypogeum now known by this name is one of the most remarkable of the catacombs around Jerusalem, containing about sixty deep loculi, arranged in three stories; the upper stories with ledges in front to give convenient access, and to support the stones that closed them; the lower flush with the ground: the whole, consequently, so essentially Jewish that it might be of any age if it were not for its distance from the town, and its architectural character. The latter, as before stated, is identical with that of the Tomb of Jehoshaphat, and has nothing Jewish about it. It might, of course, be difficult to prove this, as we know so little of what Jewish architecture really is; but we do know that the pediment is more essentially a Greek invention than any other part of their architecture, and was introduced at least not previously to the age of the Cypselides, and this peculiar form not till long afterwards, and this particular example not till after an age when the debased Roman form of the Tomb of Absalom had become possible.

6. Tombs in the Valley of Jehoshaphat.—There are three conspicuous sepulchres here, which we briefly describe in the order in which they occur, beginning at the south. See Jehoshaphath, Valley of.

(1.) The so-called "Tomb of Zechariah," said to have been constructed in honor of Zechariah, who was slain "between the temple and the altar" in the reign of Josiah (2 Chron. xxiv, 21; Matt. xxiii, 35), is held in great veneration by the Jews. It is doubtful, however,
whether it be a tomb at all, and the style of architecture can scarcely be earlier than our era. It bears a considerable resemblance to the so-called Tomb of Absalom, the northernmost of the three. It consists of a square solid basement, measuring eighteen feet six inches each way, and twenty feet high to the top of the cornice. On each face are four engaged Ionic columns between antae, and these are surmounted, not by an Egyptian cornice, as is usually asserted, but by one of purely Assyrian type, such as is found at Khorsabad.

As the Ionic or voluted order came also from Assyria, this example is, in fact, a purer specimen of the Ionic order than any found in Europe, where it was always used by the Greeks with a quasi-Doric cornice. Notwithstanding this, in the form of the volutes—the egg-and-dart moulding beneath, and every detail—it is so distinctly Roman that it is impossible to assume that it belongs to an earlier age than that of their influence. Above the cornice is a pyramid rising at rather a sharp angle, and hewn, like all the rest, out of the solid rock. It may further be remarked that only the outward face, or that fronting Jerusalem, is completely finished, the other three being only blocked out (De Saulcy, ii, 308), a circumstance that would lead us to suspect that the works may have been interrupted by the fall of Jerusalem, or some such catastrophe; and this may possibly also account for there being no sepulchre on its rear, if such be really the case. To call this building a tomb is evidently a misnomer, as it is absolutely solid—hewn out of the living rock by cutting a passage around it. It has no external chambers, nor even the semblance of a doorway. From what is known of the explorations carried on by M. Renan about Byblus, we should expect that the tomb, properly so called, would be an excavation in the passage behind the monolith—but none such has been found (probably it was never looked for)—and that this monolith is the stele or indicator of that fact. If it be so, it is very singular, though very Jewish, that any one should take the trouble to carve out such a monument without putting an inscription or symbol on it to mark its destination or to tell in whose honor it was erected.

(2) The middle tomb of this group, called that of St. James, is of a very different character. It consists of a veranda with two Doric pillars in antis, which may be characterized as belonging to a very late Greek order rather than a Roman example. Behind this screen...
how disposed of in the two very narrow loculi that exist. The great interest of this excavation is, that immediately in rear of the monolith we do find just such a sepulchral cavern as we should expect. It is called the Tomb of Jehoshaphat, with about the same amount of discrimination as governed the nomenclature of the others, but is now closed by the rubbish and stones through which the walls of the Tomb were perforated by the thankful tomb-rabbi, and consequently its internal arrangements are unknown; but externally it is crowned by a pediment of considerable beauty, and in the same style as that of the Tombs of the Judges, mentioned above—showing that these two, at least, are of the same age, and that there can certainly, must have been no immediate connection with the excavation of the monolith; so that we may feel perfectly certain that the two groups are of one age, even if it should not be thought quite clear what that age may be. See Absalom’s Pillar.

7. Other Greek-Roman Tombs.—Besides the tombs above enumerated, there are around Jerusalem, in the valleys of Hinnom and Jehoshaphat, and on the plateau to the north, a number of remarkable rock-cut sepulchres, with more or less architectural decoration, sufficient to enable us to ascertain that they are all of nearly the same age, and to assert with very tolerable confidence that the epoch to which they belong must be between the introduction of Roman influence and the destruction of the city by Titus. The proof of this would be easy if it were not that, like everything Jewish, there is a remarkable absence of inscriptions which can be assumed to be original. The excavations in the Valley of Hinnom with Greek inscriptions are comparatively modern, the inscriptions being all of Christian import, and of such a nature as to render it extremely doubtful whether the chambers were sepulchral at all, and north the dwellings of ascetics, and originally intended to be used for this purpose. These, however, are neither the most important nor the most architectural—indeed, none of those in valley are so remarkable as those in the other localities just enumerated. The most important of those in the Valley of Hinnom is that known as the “Retreat-place of the Apostles.” It is an unfinished excavation of extremely late date, and many of the others look much more like dwellings for the living than resting-places of the dead.

In the valley of Siloam there is a monolithic cell of singularly Egyptian aspect, which De Saulcy (Voyage autour de la Mer Morte, ii, 306) assumes to be a chapel of Solomon’s Egyptian wife. It is probably of very much more modern date, and is more Assyrian than Egyptian in character; but as he is probably quite correct in stating that it is not sepulchral, it is only necessary to mention it here in order that it may not be confounded with those that are so. It is the more worthy of remark, as one of the great difficulties of the subject arises from travellers too readily assuming that every cutting in the rock must be sepulchral. It may be so in Egypt, but it certainly was not so at Cyrene or Petra, where many of the excavations were either temples or monastic establishments; and it certainly was not universally the case at Jerusalem, though our information is frequently too scanty to enable us always to discriminate exactly to which class the cutting in the rock may belong.

The same remarks as are above made respecting the “Tombs of the Judges” apply to the tomb without a name, and merely called “a Jewish tomb,” in their neighborhood, with bevelled facets over its façade, but with late Roman-Doric details at its angles, sufficient to indicate its epoch; but there is nothing else about these tombs requiring especial mention (see Thompson, Land and Book, ii, 492).

The comparative lateness of the so-called sepulchre of Gamaliel and other rabbinic tombs at Meirfún is proved by the presence of sarcophagi still within them (Thompson, Land and Book, i, 438).

Since the destruction of Jerusalem by Titus, none of the native inhabitants have been in a position to indulge in much sepulchral magnificence, or perhaps had any taste for this class of display; and we in consequence find no rock-cut hypogea, and no structural monuments that arrest attention in modern times.

IV. Comparison with Modern Oriental Tombs.—The style of the public cemeteries around the cities of ancient Palestine in all probability resembled that of the present burying-places of the East, of which Dr. Shaw gives the following description: “They occupy a large space, a great extent of ground being allotted for the purpose. Each family has a portion of it walled in like a garden, where the bones of its ancestors have remained undisturbed for many generations. For in these enclosures the graves are all distinct and separate; each of them having a stone placed upright, both at the head and feet, inscribed with the name or title of the deceased; while the intermediate space is either planted with flowers, bordered round with stone, or paved with tiles.” Examples of these tombs are given in the accompanying cuts. By these it is seen that, as among people in good circumstances, the monumental stones are placed upon quadrangular tombs, in the centre of which evergreen or flowering shrubs are often planted, and tended with much care. There were other sepulchres which were private property, erected at the expense and for the use of several families in a neighborhood, or provided by individuals as a separate burying-place for themselves. These were situated either in some conspicuous place, as Rachel’s on the highway to Bethlehem (Gen. xxxv, 19), or in some lonely and sequestered spot, under a wide-spreading tree (ver. 8) in a field or a garden. Over such garden tombs, especially when the tomb is that of some holy person, lamps
are sometimes hung and occasionally lighted. The graves of the most eminent Mohammedan saints are each covered with a stone or brick edifice called socle. It has a dome or cupola over it, varying in height from eight to ten feet. Within lamps are often hung, and the grave proper is covered with carpet and strings of beads. Sometimes more costly ornamentation is used. In common cases, sepulchres were formed by digging a small depth into the ground. Over these, which were considered an humble kind of tomb, the wealthy and great often erected small stone buildings, in the form of a house or cupola, to serve as their family sepulchre. These are usually open at the sides. Sometimes, however, these interesting monuments are built up on all sides, so that the walls are required to be taken down, and a breach made, to a certain extent, on each successive interment. "This custom," says Carne, "which is of great antiquity, and particularly prevails in the lonely parts of Lebanon, may serve to explain some passages of Scripture. The prophet Samuel was buried in his own house at Ramah, and Joab was buried in his house in the wilderness. These, it is evident, were not their dwelling-houses, but mansions for the dead, or family vaults which they had built within their own precincts." Not unfrequently, however, those who had large establishments, and whose fortunes enabled them to command the assistance of human art and labor, purchased, like Abraham, some of the natural caverns with which Palestine abounded, and converted them by some suitable alterations into family sepulchres; while others, with vast pains and expense, made excavations in the solid rock (Matt. xxvii. 60). These, the entrance to which was either horizontal or by a flight of steps, had their roofs, which were arched with the native stone, so high as to admit persons standing upright, and were very spacious, sometimes being divided into several distinct apartments; in which case the remotest or innermost chambers were dug a little deeper than those that were nearer the entrance, the approach into their darker solitudes being made by another descending stair. Many sepulchres of this description are still found in Palestine; but the descent into them is so choked up with the rubbish of ages that they are nearly inaccessible, and have been explored only by a few indefatigable hunters after antiquities. Along the sides of those vast caverns niches were cut, or sometimes shelves ranged one above another, on which were deposited the bodies of the dead, while in others the ground-floor of the tomb was raised so as to make different compartments, the lowest place in the family vaults being reserved for the servants. Some of those found near Tyre, and at Alexandria, are of the round form shown in Fig. 1, but these seem exceptions; for the tombs at Jerusalem, in

Ground-plans of Oriental Sepulchres.

Asia Minor, and generally in Egypt and the East, offer the arrangements shown in Fig. 2.

On modern Oriental usages, see Hackett, Illustrations of Scripture, p. 97-100; De Saulcy, Dead Sea, i. 103-105, 170; Thomson, Land and Book, i. 148 sq.; Van Lennep, Bible Lands, p. 579 sq.; Lane, Modern Egyptians, i. 267, 359, etc.; and on ancient sepulture, the monographs cited by Volbe- ding, Index Programmum, p. 49, 66, 67; and Haas, Leben Jesu, p. 217; and those referred to under Funeral.

SEPULCHRE OF CHRIST. This has been alluded to in the foregoing article, but the interest of the subject demands a fuller treatment. The traditional site is now occupied by the "Church of the Holy Sepulchre," and the question of the identity of the locality is fully discussed under CALVARY; GOLGOTHA. Its general position is sufficiently indicated under JERUSALEM, and in the maps accompanying that article and PALESTINE. A full description of the build-
2. First Interior Room. — Supposing, then, the rush over, and the traveller to have recovered from its effects, he will find himself in a large apartment, forming a sort of vestibule; on the left, in a recess in the wall, is a large divan, cushioned and carpeted, where the Turkish doorkeeper is usually sitting with half-a-dozen of his friends, smoking the long pipe and drinking coffee, and always conducting himself with great dignity and propriety. Directly in front, within the body of the church, having at each end three enormous wax candles more than twenty feet high, and a number of silver lamps suspended above it of different sizes and fashions — gifts from the Catholic, Greek, and Armenian convents — is a long flat stone called the "Stone of Unction," and on this it is said the body of our Lord was laid when taken down from the cross and washed and anointed in preparation for sepulture. This is the first object that arrests the pilgrims on their entrance, and here they prostrate themselves in succession, the old and the young, women and children, the rich man and the beggar, and all kiss the sacred stone. It is a slab of polished white marble, and only does duty as a substitute for the genuine stone, which is said to be beneath it; but this consideration in no degree affects the multitude or the fervor of the kisses it receives. As you advance towards the stone you have Mount Calvary immediately on your right hand.

Beyond the Stone of Unction the traveller finds himself in the body of the church, a space of about 300 feet in length and 160 in breadth. In front his progress is arrested by the southern exterior of the Greek Chapel, which occupies more than half the great area; on his left, at the western end, is a circular space about 100 feet in diameter, surrounded by clumsy square columns, which support a gallery above, and a dome 150 feet high, of imposing appearance and effect. This is the Latin Chapel, in the centre of which, immediately below the aperture that admits light through the dome, rises a small oblong building of marble, twenty feet long, twelve broad, and about fifteen feet in height, surmounted by a small cupola standing on columns. This little building is circular at the back, but square and finished with a platform in front. Within it is what passes for the Holy Sepulchre. We reserve its description for the last.

28. 28. Where Christ appeared to his Mother after the resurrection.
3. Holy Objects in Detail.—Leaving for a moment the thorough that is constantly pressing at the door of the sepulchre, let us make the tour of the church, beginning from the south-west and proceeding by the north to the east, and so round to our starting-point. The church, be it observed, faces the four cardinal points.

The first object we have to notice is an iron circular railing, in the shape of a large parrot’s cage, having within it a lamp, and marking the spot where Mary watched the crucifixion “afar off.” In the arcades round the Latin dome are small chapels for the Syrians, Maronites, and other sects of Christians, who have not, like the Catholics, Greeks, and Armenians, large chapels in the body of the church. The poor Copts have nothing but a nook, about six feet square, in the western end of the sepulchre, which is tawdrily adorned in the manner of the Greeks. The Syrians have a small and very shabby recess, containing nothing but a plain altar; in the side there is a small door opening to a dark gallery, which leads, as the monks say, to the tombs of Joseph and Nicodemus, between which and that of the Saviour there is a subterranean communication. The tombs are excavated in the rock which here forms the floor of the chamber.

Farther on, and nearly in range of the front of the sepulchre, is a large opening, forming a sort of court to the entrance of the Latin Chapel. On one side is a gallery containing a fine organ; and the chapel itself is neat enough, and differs but little from those in the churches of Italy. The chapel in which the organ stands is called the “Chapel of the Apparition,” where Christ appeared to the Virgin. Within the door on the right, in an enclosure completely hidden from view, is the Pillar of Flagellation, to which our Saviour was tied when he was scourged, before being taken into the presence of Pontius Pilate.

In this instance the holy object cannot be reached by the lips of the faithful, it is deemed equally efficacious to kiss it through another medium. A monk stands near the rail, and, touching the pillar with a long stick that has a piece of leather at the point of it, like a billiard-cue, stretches it towards the lips that are ready pouting to receive it. Only half the pillar is here; the other half is in one of the churches in Rome, where may also be seen the table on which our Saviour ate his last supper with his disciples, and the stone on which the cock crowed when Peter denied his Master.

Leaving the Chapel of the Apparition and turning to the left with our faces due east, we have on the right hand the outside of the Greek Chapel, which occupies the largest space in the body of the church, and on the left is a range of chapels and doors, the first of which leads to the prison where they say our Saviour was confined before he was led to the crucifixion. In front of the door is an unintelligible machine, described as the stone on which he was placed when put in the stocks.

In the semicircle at the eastern part of the church there are three chapels: one of these contains the stone on which our Lord rested previously to ascending Mount Calvary; another is the place where the soldiers parted his raiment among them; and the third marks the spot where Longinus, the soldier who pierced his side, passed the remainder of his days in penance. Beneath one of the altars lies a stone having a hole through it, and placed in a short trough, so that it seems impossible for anything but a spectre to pass through the hole. Nevertheless, the achievement was a customary penance among the Greeks, and called by them “purgatory”; but latterly the Turks have in mercy guarded the stone by an iron grating.

In this part also is the entrance to one of the most holy places in the church, the Chapel of the Cross. Descending twenty-eight broad marble steps, the visitor comes to a large chamber eighteen paces square, dimly lighted by a few distant lamps; the roof is supported by four short columns with enormous capitals. In front of the steps is the altar, and on the right a seat on which the empress Helena, advised by a dream where the true cross was to be found, sat and watched the workmen who were digging below. Descending again fourteen steps, another chamber is reached, darker and more dimly lighted than the first, and hung with faded red tapestry; a marble slab, having on it a figure of the cross, covers the mouth of the pit in which the true cross was found.

On reascending into the body of the church and ap-

The “Tomb of Christ.”
proaching the vestibule through which we first entered, we find Mount Calvary on our left. This we ascend by a narrow marble staircase of eighteen steps, formed of a single stone, a fact to which the pilgrim’s attention is solicited by the monks as a proof that the chapel at the top is really founded on the natural rock. But this fact would prove nothing; for there is a staircase in the Rospoll Palazzo at Rome of one hundred and twenty steps, cut from a single block of white marble. Every visible part of the chapel is a manifest fabric. To this objection it is answered that “the stone-work cases the rock,” which may or may not be true; but wherever examination might be allowed it seems to be purposely withheld. The chapel is about fifteen feet square, paved with marble in mosaic, and hung on all sides with silken tapestry and lamps dimly burning; it is divided by two short pillars, hung also with silk and supporting quadrangular arches. At the extremity is a large altar, ornamented with paintings and figures, and under the altar a circular silver plate with a hole in the centre, indicating the spot in which rested the step of the cross. Behind the altar and separated from it by a thin wall is a chapel, in the centre of which is a stone marking the exact spot where Abraham was about to sacrifice Isaac; and the monks state that when the cross was laid down, before it was raised, our Lord’s head rested upon this spot; they seem to consider the establishment of this fact necessary to the complete fulfillment of the type.

Descending to the floor of the church, we are shown another rent in the rock, said to be a continuation of the one above, but so guarded by an iron grating that examination is out of the question, as it can only be examined by thrusting a taper through the bars. Directly opposite the fissure is a large monument over the head of Adam.

The little chapel on the spot where Mary stood when St. John received our Lord’s dying injunction to protect her as his mother is an appendage to Mount Calvary.

The Tomb itself.—The reader will probably think that all these things are enough, and more than enough, to be comprised under one roof. Having finished the tour of the church, let us return to the great object of the pilgrimage to Jerusalem—the Holy Sepulchre. Taking off the shoes on the marble platform in front, the visitor is admitted by a low door, on entering which the proper head must needs do reverence. In the cenotaph of the first chamber is the stone which was rolled away from the mouth of the sepulchre—a square block of marble cut and polished; and, though the Armenians have lately succeeded in establishing the genuineness of the stone in their chapel on Mount Zion (the admission by the other monks, however, being always accompanied by the assertion that they stole it), yet the infatuated Greek still kisses and adores the block of marble as the very stone on which the angel sat when he announced to the women, “He is not dead; he is risen; come and see the place where the Lord lay.” Again bending the head, and lower than before, the visitor enters the inner chamber, the holiest of the holy. The sepulchre “hewn out of the rock” is a marble sarcophagus, somewhat resembling a common bathing-tub, with a lid of the same material. Over it hang forty-three lamps, which burn without ceasing night and day. The sarcophagus is six feet one inch long, and nearly about one half the chamber; and, one of the monks being always present to receive the gifts or tribute of the pilgrims, there is only room for three or four at a time to enter. The walls are of a greenish marble, usually called verd-antique, and this is all. It will be borne in mind that all this is in a building above ground, standing on the floor of the church.

SEPULCHRE, CHURCH OF THE HOLY. See the preceding article and JERUSALEM.

SEPULCHRE, THE EASTER, a representation of the entombment of our Saviour, set up in Roman Catholic churches at Easter, on the north side of the chancel, near the altar. In England, previous to the Reformation, it was most commonly a wooden erection, and placed within a recess in the wall or upon a tomb; but several churches still contain permanent stone structures that were built for the purpose, some of which are very elaborate, and are ornamented with a variety of decorations, as clocks, candelabra, and statues of Christ and the Apostles, and are beautiful examples of the Decorated style. Sepulchres of this kind also remain in the churches at Northwold, Norfolk; Holcombe Burnell, Devonshire, and several others. The crucifix was placed in the sepulchre with great solemnity on Good Friday, and continually watched from that time till Easter-day, when it was taken out and replaced upon the altar with especial ceremony.

SEPULCHRE, ECCLESIASTICAL, a receptacle for the blessed sacrament which is reserved, among the Latins, from the mass of Maundy Thursday. There is a good example of an Eastern sepulchre in the north chapel of the Church of St. Mary, Haddenham, in Buckinghamshire, England.

SEPULCHRE, REGULAR CANONS OF, a religious order said to have been founded by Godfrey on the capture of Jerusalem in 1099. Many of these canons journeyed into Europe; but the order was suppressed by pope Innocent VIII, and its revenues were ultimately bestowed on the Knights of St. John of Jerusalem. According to Broughton, the suppression of the order did not extend to Poland.

Sepulveda, Juan Gines de, a Spanish writer, was born at Cordova in 1491 (or 1490). He assisted cardinal Cajetan at Naples in the revision of the Greek Testament. In 1529 he went to Rome, and in 1536 was appointed chaplain and historiographer to Charles V. He is memorable for writing a Vindication of the Cruelties of the Spaniards against the Indians. Charles V suppressed the publication of the work in his dominions, but it was published in Rome. He died at Salamanca in 1572. He was the author of various works besides the one mentioned, in particular of some Latin Letters.—A Translation from Aristotle, with Notes:—A Life of Charles V and Philip II, printed together at Madrid (1780, 4 vols. 4to).

Sequence. 1. The later name of the pneuma, a melodious and varied prolongation of the Hallelujah. 2. The announcement of the Gospel of the day when taken from the middle of the Gospels, but called initium when the opening words were to follow. On the four days of Holy Week the words “The Passion of our Lord Jesus Christ” replaced the ordinary sequence, or initial. 3. The name for a hymn in metre. See PROSE; SEQUENCES.
SEQUENCES

In chanting the Graduale in the Mass it was customary to prolong the last syllables of the Hallelujah through a succession of notes without words, which were termed sequences, when considered in their combination with the utora or jubilations with reference to their character. They were intended to indicate that feeling had reached a point at which it was too strong for expression. The difficulty of retaining a long series of notes in the memory led to efforts for devising mnemonic helps, which eventually resulted in the adoption of suitable rhythmical language in Latin prose to fit the music—Notker Balbulus (q. v.; died 912), a monk of St. Gall, being especially distinguished in accomplishing this kind of work. The idea was suggested to him by some verses which were modulated or fitted to the series of tones in an antiphonarium belonging to a fugitive priest of Glimex, and with such success that his teacher, Marcellus, a Scotchman, had his verses collected and sung by his pupils; and also persuaded Notker to dedicate his work to some prominent personage and give it to the world. Notker thus became the originator of an edifying element of worship, which was approved by the popes and speedily introduced into wider circles; and as he not only composed new series of notes made current—the mettensis major and minor, the Romanæ and Amenæ—but also composed new series of notes, he became the creator of an elevating, melodious choir music which was inserted in the Mass. Each piece was divided into several parts, each a step upward to a higher and in like manner, the text, which was everywhere adapted to the melody, consisted of a number of shorter or longer sections. A poetic character was thus naturally given to the text, and such compositions were consequently called "hymns"—a term that is not misplaced when applied to those written by Notker. They were in hymns of praise in which the leading features of a festival, the faithful support of the Almighty God, the Redeemer's merits, the dignity of the Blessed Virgin, etc., are fervently presented; while in their intent they were a continuation of the Hallelujah in the Gradual, though they might also be separately employed.

These sequences were introduced into use in Germany, England, France, and other countries. Notker's works became the type, and imitations in great number followed, until they were employed to edify the people at every festival; and more than one hundred were contained in the Missals.

The term is derived from Latin missel, misel, meaning misal. It contains both a Latin and a Greek element. The Greek part is the diminutive of the word for mission, which means "sent to." The Latin part is derived from the verb misere, meaning "to pity." The sequence was used to express a sense of community and solidarity in prayer and praise, especially during the Easter season. Notker's sequences were famous for their beauty and their ability to create a spiritual atmosphere.

Seraiah (Heb. Se'rah; יְרַעְיָה, perhaps overflow; Sept. in Gen. סֵרָעָה [v. τὰ ἦχον], but in Chron. סֵרָאֵי [v. τὰ ἦχον]; also written "Sarai" [q. v.], in Num. xxvi, 46), the daughter of Asher, son of Jacob (Gen. xliii, 17; Num. xxxvi, 46; 1 Chron. vii, 30). B.C. c. 1864. The name Seraiah is of uncertain origin. It is possible that the name was a derivative of the Hebrew word "sera," meaning "beauty," and that Seraiah was a beautiful woman.

Seraiah (Heb. Seraphah; סֵרַפָּה [once in the prolonged form, Seraph'ah, סֵרַפָּה, Gen. xxxvi, 62], wor- ker of the sanctuary; Sept. סְרַפָּאָה, but with many v. r.; the proper name of eight persons)

1. Second-named son of Kenaz, and father of a Joab who was head of a family of the tribe of Judah in the valley of the Cherashim (1 Chron. iv, 13, 14). B.C. c. 1500.
2. The scribe or secretary of David (2 Sam. viii. 17). B.C. cir. 1015. This person's name is in other places corrupted into Sheva, שְׁבָא; A.V. "Sheva" (2 Sam. xx. 25), "Shisha," שִׂישָא (1 Kings iv. 3), and "Shavsha," שַׁבְשָׁא (1 Chron. xvii. 16).

4. Son of Asriel, and one of the persons charged with the apprehension of Jeremiah and Baruch (Jer. xxxvi. 26). B.C. 606.

5. The son of Neriah and brother of Baruch (Jer. lii. 60-64). Probably had his seat in the court of King Zedekiah, the nature of which is somewhat uncertain. In the A.V. we have, "This Seriah was a king's privy councilor," which, according to Kimchi, means a chamberlain, or one who attended the king when he retired to rest (i.e. prince of rest); but better, perhaps, according to Gesenius, "chief of the quarters" for the king and his army, that is, quartermaster-general, after the meaning of menuchah as a halting-place of an army (Numb. xx. 53). The suggestion of Maurer, adopted by Hitzig, has more to commend it, that he was an officer who took charge of the royal caravan on its march, and fixed the place where it should halt. Hiller (Onomast) says Seriah was prince of Menuchah, a place on the borders of Judah and Dan, elsewhere called Manahath. This Seriah was sent by Zedekiah on an embassy to Babylon, probably to express his submission to that monarch about four years before the fall of Jerusalem. B.C. 594. He was charged by Jeremiah to communicate to the Jews already in exile a book in which the prophet had written out his prediction of all the evil that should come upon Babylon (Jer. lii. 60-64). It is not stated how Seriah acquitted himself of his task; but that he accepted it at all shows such respect for the prophet as may allow us to conclude that he would not neglect the duty which it imposed.

6. The high-priest at the time that Jerusalem was taken by the Chaldeans. B.C. 588. He was sent prisoner to Nebuchadnezzar at Riblah, who put him to death (2 Kings xxv. 18; 1 Chron. vi. 41; Jer. lii. 34; Ezra vii. 1). The son of Tanhumeth the Netophathite, and one of those to whom Gedaliah promised security (2 Kings xxv. 23; Jer. xi. 8). B.C. 587.

8. A priest, the son of Hilkiah, who returned from exile (2 Chron. xxxiii. 11, 12). He is called Azariah (q. v.) in Neh. vii. 7. B.C. 536.

Seraphic Doctor. See Bonaventura.

Seraphic Hymn, the Ter sancta, or "Holy, holy, holy," which concludes the preface in the communion service. Its basis is found in Isa. vi. 3. The hymn itself occurs in every ancient liturgy. It must not be confounded with the Trisagion (q. v.).

Seraphim (Heb. Seraphim, סֵרָפָח, Sept. Sarpheis, or Serapha; the plural of the word סֵרָפָא, saraph). Celestial beings described in Isa. vi. 1-6 as an order of angels or ministers of God, who stand round his throne, having each six wings, and also hands and feet, and praising God with their voices. They were therefore of human form, and, like the Cherubim, furnished with wings as the swift messengers of God. Some have indeed identified the Cherubim and Seraphim as the same beings, but under names descriptive of different qualities: Seraphim denoting the burning and dazzling appearance of the beings elsewhere described as Cherubim. It would be difficult either to prove or disprove this; but there is a difference between the form of Ezekiel and the Seraphim of Isaiah which it does not appear easy to reconcile. The "living creatures" of the former had four wings; the "Seraphim" of the latter, six; and while the Cherubim had four faces, the Seraphim had but one (comp. Isa. vi. 2, 3; Ezek. i, 5-12). If the figures were in all cases purely symbolic, the difference does not signify (see Hendewerk, De Seraph, et Cherub, non Diversis [Reg. 1856]). See Cherubim. There is much symbolical force and propriety in the attitude in which the Seraphim are described as standing, while two of their wings were kept ready for instant flight in the service of God; with two others they hid the face to express their awe and desire to look upon the Divine Majesty (see Exodus iii. 6; 1 Kings xix. 13, comp. Plutarch, Quaest. Rom. vol. x.), and with two others they covered their feet, or the whole of the lower part of their bodies—a practice which still prevails in the East when persons appear in a monarch's presence (see Lowth, An Essay to explain the Description of the Temple of Solomon, ad loc.). They are described as twofold—to celebrate the praises of Jehovah's holiness and power (Isa. vi. 3), and to act as the medium of communication between heaven and earth (ver. 6). From their antiphonal chant ("one cried unto another") we may conceive them to have been ranged in opposite rows on each side of the throne. As the Seraphim are nowhere else mentioned in the Bible, our conceptions of their appearance must be restricted to the above particulars, aided by such uncertain light as etymology and analogy will supply. We may observe that the idea of a winged human figure was not peculiar to the Hebrews: among the sculptures found at Mourghab, in Persia, we find a representation of a deity with two wings. They are also found in independent art, in two pairs of wings springing from the shoulders and extending, the one pair upwards, the other downwards, so as to admit of covering the head and the feet (Vaux, Nit. and Persp. p. 322). The wings in this instance imply dedication; for speed and ease of motion stand, in man's imagination, among the most prominent tokens of divinity. The meaning of the word "seraph" is extremely doubtful; the only word which resembles it in the current Hebrew is saraph, סָרָפ, "to burn," whence the idea of brilliancy has been extracted. Such a sense would harmonize with other descriptions of celestial beings (e.g. Ezek. i. 18; Matt. xxviii. 9); but it is objected that the Hebrew term never bears this secondary sense. Gesenius (Theotaur. p. 3841) connects it with an Arabic term signifying high or exalted, and this may be regarded as the generally received etymology; but the absence of any cognate Hebrew term is certainly worthy of remark. It may be seen in the article Serpent that a species of serpent was called saraph, and this has led some to conceive that the Seraphim were a kind of basilisk-headed Cherubim (Daurer, Theolog. A. T. p. 189). In the Cherubim of Ezekiel (Ezek. i. 5) and the Seraphim of Isaiah, the serpent's heads, such as we find figured in the ancient temples of Thebes (Gesen, Comment., in Jes.). Hitzig and others identify the Seraphim with the Egyptian Serapis; for although it is true that the worship of Serapis was not introduced into Egypt till the time of the Ptolemies (Wilkinson, Anc. Egypt., iv. 360 a. q.), it is known that this was but a modification of the more ancient worship of Kneph, who was figured under the form of a serpent of the same kind, the head of which afterwards formed the crest of Serapis. But we can hardly conceive that the Hebrews would have borrowed their imagery from such a source. Knobel's conjecture that Seraphim is merely a false reading for sharathah הַשַּׂרְתָּה, "ministers," is ingenious, but the latter word is not Hebrew. See the Studien und Kritiken, 1844, ii. 454, ANOEL, CHERUB, LIVING CREATURES, TERRAPHIM.

Seraphina, a keyed wind instrument, the tones of which are produced by the play of wind upon metallic reeds, as in the accordian. It consists, like the organ, of a key-board, wind-chest, and bellows.

Seraphon, bishop of Thumesos in Egypt, called Scholasticus because of his eloquence and dialectical keenness, is said by Rufinus to have been abbot of numerous monasteries, and to have exercised rule over some ten thousand hermits, whom he employed in reaping at harvest-time, in order that their earnings might aid in
supporting impoverished Christians about Alexandria. Antonius and Athanasius are reported to have been his intimate friends and counsellors, the latter having secured his elevation to the bishopric. In 348 Serapion attended the Council of Sardica, and helped to procure the acquittal of Athanasius from the charges under which he lay; and when the latter had again fallen under the displeasure of the emperor Constantius, Serapion was one of the five bishops who were delegated to attempt his restoration to favor. He died A.D. 358. See Socrates, Hist. Eccl. iv. 29.

Chrysostom's deacon at Constantinople, under Honorius and Arcadius, was another Serapion, who aided that father in enforcing a thorough discipline among the clergy, of whom he said that only the utmost strictness could secure their improvement. The clergy were exasperated by his words and actions, and sought to excite the opposition of the populace against both reformers, but in vain; and Chrysostom ultimately made Serapion bishop of Heraclia in Thrace.

Serapis, in Egyptian mythology, was a highly venerated god of Alexandria, whose origin was rather Greekian, however, than Egyptian. He was the Greek god of the underworld—Pluto, the giver of blessings on whose head was placed a bull's head to denote that the ruler of the underworld causes man's nourishment to spring from the earth. He was transferred to Alexandria in the time of the Ptolemies, and unwillingly accepted by the inhabitants; but eventually forty-two temples of Serapis were enumerated in Egypt. The following fable in relation to his importation was in circulation: A beautiful youth appeared to Ptolemy I in a dream, and commanded the king to bring his statue from Sinope, revealing, at the same time, that he was Serapis, the god who gives blessings or cures. After the surmounting of many difficulties, the enterprise was at length accomplished—the god contributing to that result by going from his temple to the ship. The city of Alexandria erected to him a temple in the place Rhacotis. Political reasons may have determined this transfer from Asia to Egypt—e. g. the importance of making the new capital the central seat of religion; and this latter end was completely realized, inasmuch as Serapis took the place of Isis, with the exception that he was never conceived of as suffering and dying. He was regarded as consort to Isis, as the sun and Nile god, and as the supreme god. The sick, also, invoked his aid, with the result that he was, in the end, confounded with Esculapius. A marble bust in the Vatican represents him as a bearded, earnest man, with rays surrounding, and a grain-measure surmounting, his head.

Serarius, Nicholas, a learned Jew and commentator on the Scriptures, was born in 1556 at Ramberg villages, in Lorraine. After studying the languages, he taught ethics, philosophy, and theology at Wurzburg and Mentz, in which last city he died, May 20, 1610, leaving many works, of which the following are the principal: De Pharisiorum, Sadduceorum, et Ecclesiæ Secta (Franeker, 1605; Mentz, 1604)—Commentarius in Libros Jos., Jud., Ruth., Reg., et Paralip. (ibid. 1608—16, 2 pts., fol.)—Prologomena Biblica (ibid. 1612)—Robini et Heredes (ibid.)—Opuscula Theologica (3 tom. fol.)— and others which are collected in 16 vols. fol. See Fürst, Bibl. Jud. ill, 316; Winer, Handbuch der theol. Literatur.

Sēred (Heb. esp. ēser; Sept. Sēpēd v. r. Sāpīd), the first name of three sons of Zebulon (Gen. xliii, 14), and head of the family of the Sharādīm (Num. xxvi, 26). B.C. cir. 1864.

Serestus, in Greek mythology, was a companion of Eneas, who gathered up the armor of Memnonides, the priest of Apollo whom Eneas had slain, and who erected a column of victory to Mars Gravis.

Serge (Lat. cera, a wax taper). Those in a low basin were called mortars, and burned during matins at the choir door. Lyndwood says that in very many churches the two (i. e. on the altar) were furnished by the curate.

Sergeant (ἡσαυρεύς, literally rod-holder, Acts xvi, 35), properly a Roman lectus, the public servant who bore a bundle of rods before the magistrates of cities and colonies as insignia of their office, and who executed the sentences which they pronounced.

Roman Colin exhibiting the Lictors with their fasces.

Sergeant, John, a Congregational minister, was born in Newark, N. J., in 1710. He graduated at Yale College in 1729, and was appointed tutor in 1731. The Commissioners for Indian Affairs having found the Indians living at Skateboard and unaknakukoak, on the Housatonic River, disposed to receive a missionary, chose Mr. Sergeant for that position; and he went in October, 1734, to examine his field of labor. In August, 1735, he was ordained at Deerfield, and labored with the Indians until his death, July 27, 1749. He translated into the native language parts of the Old and all the New Testament, excepting the book of Revelation. During his life one hundred and twenty-nine savages were baptized, and forty-two became members of the Church. See Sprague, Acts of the Amer. Pulpit, i, 388.

Serestus, in Greek mythology, was a companion of Eneas, who is named in connection with the sailing-match instituted by Eneas. His vessel stuck fast on a rock; but he was nevertheless rewarded with the gift of a female slave from the hero (Virg., Aeneid, i, 610; v, 121, etc.).

Sergiots (Sergiots, or Sergists), a section of the Paulicians who held in veneration the memory and writings of one Sergius, who lived at the beginning of the 9th century. His efforts led to a division—his followers being known as Sergiots, and his opponents Baniites, after the name of their leader, Banius. See PAULICIANS.

Sērus (Ῥωμαίος Χαῖρας, a Latin name, a Roman consul in consul, who was converted by the preaching of Paul and Barnabas (Acts xiii, 7). A.D. 44. Sergius is described by the
evangelist as a "discreet" or "intelligent" man; by which we are probably to understand that he was a man of large and liberal views, and of an inquiring turn of mind. Hence he had remained Elymas, and hence also he became curious to hear the new doctrine which the apostle brought to the island. The strongest minds at that period were drawn with a singular fascination to the occult studies of the East; and the ascendency which Luke represents the "sorcerer" as having gained over Sergius, illustrates a characteristic feature of the times. For other examples of a similar character, see Conybeare and Howson, Life and Epistles of St. Paul, i, 177 sq. But Sergius was not effectually or long deceived by the arts of the impostor; for, on becoming acquainted with the apostle, he examined at once the claims of the Gospel, and yielded his mind to the evidence of its truth. Nothing of his history subsequent to his conversion is known from Scripture. There is no reason to suppose that he abandoned his post as governor of Cyprus; but the legends assert that he did so, and followed Paul; and that eventually he went with the apostle into Spain, and was left by him at Narbonne, in France, of which he became the bishop, and died there.

The title (inaccurately rendered "deputy" [q. v.]) given to this functionary exhibits one of those minute accuracies which, apart from their inspiration, would substantiate the sacred book as a genuine and contemporaneous record. Cyprus was originally a prætorium provincia (eparchia provinialis), and not prætor as stated by the evangelist (Acts xiii, 6, 8, 12; see Dion Cass. liv, 528; Kuinöll, on Acts xiii, 7). For the value of this attestation to Luke's accuracy, see Lardner, Credibility of the Gospel Narrative, i, 82 sq. Coins, too, are still extant on which this very title, ascribed in the Acts to Sergius Paulus, occurs as the title of the Roman governors of Cyprus (see Akerman, Numismatique Illustrations, p. 41; Conybeare and Howson, Life and Epistles of St. Paul, i, 176, 187). See Cyprus.

Sergius, Sr. Several saints and martyrs occur who bear this name.

1. One is usually associated with a martyr named Bacchus, like himself a native of Rome. It is related that they were accused of being Christians, and exiled by the emperor Maximian. When nothing could induce them to sacrifice to idols, Bacchus was tortured to death, and his body thrown to wild beasts, who, however, would not harm it. Sergius was then taken to Rosaph, in Syria, and tortured, but comforted by an apparition of Bacchus, while his wounds were healed by an angel. He was beheaded in 290; and the emperor Justinian is credited with having changed the name of Rosaph to Sergiopolis, while the martyr's relics were preserved in the church of that town. Oct. 7 was set apart for the commemoration of Sergius and Bacchus.

2. Another Sergius, whose day occurs on Jan. 23, is said to have been martyred under Diocletian; and a third was a monk in the Convent of Mar Saba, in Palestine, and, together with other monks, was attacked and slain by robbers in the year 797. His day is on March 30.

3. Sergius, surnamed the Confessor, was born at Constantinople, lived in the former half of the 9th century, and wrote De Rebus in Re Publica et Ecclesia Gentis—a history of the iconoclastic controversy from the Romish point of view, which embraced the period from Constantine Copronymus to Michael II Balbus, but is now lost. He was taken prisoner while defending the worship of images (according to some statements, in the reign of Leo the Isaurian; according to others, in that of Theophilos), deprived of his goods, and exiled; for which reason Photis termed him the Confessor. The saints' calendar of the Greek Church assigns May 13 as his day. See Ausführl. Heiligen-Lection nebst beigesg. Heil.-Kalender (Cologne and Frankfort, 1719), p. 2006 sq.

Sergius, the name of several Roman Catholic saints.

I. Pope from 687 to 701, contemporary with Eugene I, was born at Antioch and reared in the monasteries. The most noteworthy event of his administration was a dispute with the Eastern Church, which ultimately led to the separation of the East from the West in 787. Emperor Justinian II had convoked an ecumenical council (Concilium Quinsexstitum) at Constantinople, and Sergius attended it by Sergius, who decrees; but as six decrees had been passed which were contrary to the practice of Rome (e.g. omitting all the Latin councils and papal decrees from the list of authentic sources of Church law, acknowledging the validity of the whole eighty-five canones apos tolicani, and it was in allusion to the emperor's power on Saturdays during Quadragesima, making the arch of Constantinople equal to the pope, etc.), forbade their promulgation. The emperor ordered imprisonment of the refractory pope, but was immediately dethroned after a revolt in his army. Rome decided to reject this council, and this occasion was seized which subsequently divided the Church. Sergius succeeded, on the other hand, in restoring the communion with Rome of the churches which had been broken by the Controversy of the Three Chapters, and other prominent incidents of his pontificate were the founding of the bishopric of Utrecht by William of Aquitaine, and the decree that the papal vicar was required to be sung three times before the service of the mass. Oct. 9 was set apart for the commemoration of this pope.

II. Pope from 844 to 847. He contributed much to the exaltation of the papacy by daring to oppose the requirement of the confirmation of the consecration and consecration by the civil power, and by maintaining his position in the face of the protest of the emperor Lothaire against this infradiction of the law of the realm. The controversy of Paschalsus, respecting the Lord's supper was begun during his reign.

III. Pope from 904 to 911, who owed his election to the influence of the shameless Theodora and her shameless daughters Marozia and Theodora, the rulers of the time in Rome. He was grossly and licentious, and was in continual relations with Marozia, and with several children, among them the future pope XI, though the latter statement is denied by respectable authorities. The only noteworthy event of his pontificate was the approval of the fourth and fifth councils of the emperor Leo Philosophus, which a synod at Constantinople (920) condemned, and the renewed introduction of the Benedictine rule at the abbey of Berno.

IV. Pope from 1009 to 1012, previously bishop of Alba. He began the custom that the pope should adopt a new name on assuming the titular see, and it is said that Sergius was formerly called Pero, i.e. swine's mouth. Being ashamed of this, he assumed the name of Sergius rather than alter the custom which has been followed by all succeeding popes.

Serpipando, Glirolamo, an Italian theologian born at Naples, May 6, 1489. On the death of his father, he entered the order of the Augustine friars in 1513, and engaged in a study that led to his appointment as a professor at Sienna in 1515, professor of theology at Bologna in 1517, and vicar-general in 1523, and gave himself to preaching with great success. In 1539 he was elected general of his order, and the following year was re-elected. He declined the bishopric of Florence, but was elected bishop of Salerno in 1540, and resigned the see of Naples to the emperor in 1550 upon his appointment as archbishop of Salerno. He was made cardinal, and designated as one of the papal legates to the Council of Trent, where he died Jan. 17, 1565, worn out with toil. His character was
SERJEANTS 571

singularity, benevolence, and modesty. He wrote a number of ecclesiastical works and sermons, besides a commentary on Romans and Galatians. See Hoefer, Noue. Biogr. Générale, s. v.

SERJEANTS, servants in monastic offices: those of the church, the guest-house, refectory, and infirmary were subordinate officers. The first was the bell-ringer, except on high masses and vespers. The candle-lighter, except round the high-altar (he also laid out the vestments for the celebrant at the high-altar), was the chandler, who made all the wax candles, and assisted the sub-sacrist in baking the hosts. The serjeant of the infirmary was the barber, and, with the clerk and cook, waited on the monks who were sick or aged.

SERMON, Lat. sermon, a discourse delivered in public religious services. In the early Church sermons were called tractates (expository), disputationes (argumentative and controversial), allocutions, and by the Greeks διακήθησις (doctrinal), or homilies (familiar addresses). The place of the sermon in the service was immediately after the reading of the psalms and lessons out of the Scriptures, before the catechumens were dismissed, and the minister whose discourse it was delivered was the bishop, when he was present, or one of his presbyters in any church from which he was absent: then it was considered as the bishop preaching by proxy. In some cases a special commission was given to a layman to deliver a sermon, and then he might do it by the authority of the bishop's commission for that time. This applied to the public services in the churches, and was not necessary when laymen did it in a private way as catechists in their catechetical schools, as at Alexandria and elsewhere. Sometimes it happened that two or three sermons would be preached in the same assembly, first by the laymen, and then by the bishop. Or, if more than one bishop were present, several of them would preach one after another, reserving the last place for the most honored person. In some places sermons were preached every day, especially in Lent and the festival-days of Easter. In larger towns and cities, it seems probable that two sermons were delivered on Sunday; but this custom did not prevail in the country parishes. The sermon was either, 1, an exposition of Scripture; 2, a panegyrical discourse upon some saint or martyr; 3, a sermon upon some particular time, occasion, festival; or, 4, a sermon upon a particular doctrine, against heresy, or to recommend the practice of virtue. All of these had examples in the sermons of Chrysostom and Augustine. Origen appears to have been the first to deliver his sermons extempore, it having been the general practice to carefully compose and write them beforehand. It was customary to introduce the sermon with a short prayer for divine assistance for the preacher and his hearers; and sometimes, if occasion required, this prayer was said in the middle of the discourse. It was usual in many places, before beginning the sermon, for the preacher to use the common salutation Pax vobis, Peace be unto you, or The Lord be with you. There was no general rule as to the length of the sermon, that being doubtless determined by the circumstances of the occasion, e.g. whether one or more sermons were to be delivered. Scarcely any of them would take an hour in delivery, and many of them not more than half that time. It was not considered, by many in the ancient Church, to be improper for the preacher to deliver a sermon prepared by another person; on the contrary, it was considered as a mark of the compositions of more eloquent men, provided he compose his own life answerable to God's Word. The sermon was always concluded with a doxology to the Holy Trinity. The posture of preacher and hearers was generally the reverse of that prevalent now, for then the preacher sat and his hearers stood. It was a peculiar custom in the African Church, when the preacher chanced to cite some remarkable text of Scripture in the middle of his sermon, for the people to join with him in repeating the remainder of it. This was, no doubt, done to encourage the people to hear, read, and remember the Scriptures. It was a very general custom for the people to show their appreciation of the sermon by the manner of the applause (as orthodox), or signs, or clapping of hands. We notice also the custom, prevailing among many ancient hearers, of writing down the sermons, word for word, as they were delivered, and by this means some extempore discourses were handed down to posterity. See Bingham, Christ. Antiq. p. 700 sq.; Walcott, Sacred Archs. s. v.

SERMON ON THE MOUNT, the common name of a discourse delivered by Jesus to his disciples and a multitude on the Mount near Capernaum on the night of the Sixth of May in the early second year of his public ministry. It is a complete system of the moral law, in the spiritual form which it assumes under the Christian dispensation, and has deservedly been made the subject of much study and learned exposition (Matt. v, vi, vii; Luke vi. 20 sq.; Comp. Mark i. 8 sq.; Matt. xviii, 8, 9). The best complete exposition is certainly that of Tholuck, Bergpredigt (4th ed. 1856). An earlier edition has been translated into English (1843, 2 vols.), See also Valenti, Commentar. C. d. Bergpredigt. (Basil, 1849); Mackintyre, Expos. of the Sermon on the Mount (Lon. 1854); Fritsch, Comment. on the Sermon on the Mount (ibid. 1859); Todd, id. (ibid. 1856); Trencb, Expos. of the Sermon on the Mount (ibid. 1851); and the literature cited by Volking, Index Programmatsm. p. 32; and Hase, Leben Jesu, p. 121. See Jesus.

SERMON ON THE MOUNT, The, and the Talmud. In the essay prepared by the late E. Deutsch entitled The Talmud, among other daring statements we find also the following: We need not urge the priority of the Talmud to the New Test. To assume that the Talmud has borrowed from the New Test, would be like assuming that Sanscrit sprang from Latin, or that French was developed from the Norman words found in English. Similar is the remark of Rammoh : It is sometimes supposed that, the compilation of the Talmud being posterior to that of the Gospels, appropriations might have been made by the Jewish compilers from the Christian morality. But that is inadmissible; there was a wall of separation between the Church and the synagogue (Luis. ii. p. 108). Such things have been, and will be, as true, especially by those who have not taken the pains of examining for themselves: but sober-minded scholars have arrived at different results. Says Mr. Farrar : Some excellent maxims—even some close parallels to the utterances of Christ—may be quoted, of course, from the Talmud, where they lie imbedded like pearls in a sea of oozy mud. It seems to me indisputable, and a matter which every one can now verify for himself, that these are amazingly few, considering the vast bulk of national literature from which they are drawn. And, after all, who shall prove to us that these sayings were always delivered by rabbins to whom Jesus had not spoken? Who will supply us with the faintest approach to a proof that, when not founded on the Old Test., they were not directly or indirectly due to Christian influence or Christian thought? (Life of Christ, ii. 486.) According to our judgment, there is only one way of arriving at a just estimate, as to which of these sayings is, and this is to give the parallel passage of the Talmud with the author who uttered the sentence, and the time in which he lived. The date of the author must settle the question once for all, and this is our purpose in the sequel.

Matt. v. 3: Blessed are the poor in spirit. — Ganahedron, fol. 43 b.: "The poem of the Levite. [A.D. 219-279] said, Behold, how acceptable before the Lord are the humble. While the temple stood, these songs and parables were extolled in their exaltation for sins committed; but an humble word, such as heares of the defilement of the heart on

one ask for thy sake, give him the said also.

"Bless them that curse you." —Sanhedrin,
of 45b and a: "R. H. Judah (d. A.D. 190) said:
Be rather of the accused than of those that
curse."

vi, 1: "Take heed that ye do not your alms before
men to be seen of them." —Chagiga, fol. 5, col.
1: "Rabbi Yannai (cir. A.D. 130) said to a man
who gave alms in such a public manner, You
had better not given him anything; in the
game you gave it to him you must have hurt
his heart."

vi, 96: "Behold the fowls of the air: for they sow
not, and they gather not;" etc. —Kiddushin,
of 39b, col. 2: "R. Sim-
mon ben-Elezar (who lived in the 3d century
A.D.) said, Hast thou ever seen a beast or a
bird that followed a trade? and yet they are
fed without toil. But these were only created
to minister to me, while I was created to
minister to my Maker. Was it not right, then,
that I should be supported without toil? But
I have married my work and forfeited my
support."

vi, 2: "With what measure ye mete it shall be
measured to you again." —Sanhedrin, fol. 100, col.
1: "Rabbi Meir (q. v.) said, With what measure
man metes it shall be measured to him from heaven.

vi, 4: "Let thine mouth be filled with good words,
etc. —Baba Bathra, fol. 15, col. 2: "R. Johanan
(A.D. 150-270) surranged Bar-Na'ah, vol. 8, col.
8. Do they say, Take the splinter out of thine eye,
his eye, he will answer, Remove the beam out of
thine own eye."

It is strange that, concerning this Talmudic
quotations in the Hebraica, N.Y., March, 1919),
a remark should have said: The first four pae-
erb in Matthew and Luke vi, 22, 23 is, as is
well known (etc.), like most sentences of
that age, have been borrowed from the New Test,
borrowed from contemporaneous Jewish literature."

And the chronological date of the author of that sen-
tence is the best proof for the antiquity of
statements made by men who, for the sake
of the Talmud, try to disparage the New Test.

The New Test sentence is also illustrated in Erachin,
of 16, col. 2, where R. Ta襻n (cir A.D. 190) says, "It would greatly aston-
lish me if there could be found any one in
this age who would receive an admonition. If
he did not accomplish to take the splinter out of
his eye, he would answer, Take the beam out
of thine own eye."

vi, 5: "If thy right eye offend thee, first cast out the beam
out of thine own eye, and then shalt thou see," etc.

vi, 24-25: "Therefore whosoever heareth

SERMONIZING

ings of mine, and doth them, I will liken him unto a wise man, which built his house upon a rock; 
for when the rain descended, and the floods came, and the winds blew and beat upon that house; it stood fast because it was built upon a rock. And every one that hearkeneth unto them shall be wise. And every one that heareth them shall do well. And he that heareth me shall prosper: but he also that despiseth me shall be cursed. And I will give you a parable. A certain kingdom was divided between two brothers. And the first part of the kingdom was divided among the first brother, and the second part of the kingdom was divided among the second brother. And the first brother said unto the second brother, Give me my part of the kingdom.
it ought to produce. There remains no true unity after such divisions, seeing they make two or three different discourses, which are joined into one only by an arbitrary connection. Three sermons preached at different times, if they be formed upon some regular concerted plan, make one piece or entire discourse as much as the three accounts of an affair by three witnesses, who, by being joined and delivered together." That Fénelon, in the above quotation, was arguing against the abuses of division, rather than against proper plans of discourse, is sufficiently obvious from his own subsequent directions as to the plan and development of a sermon, which should be, "at first, a general view of our subject, and endeavor to gain the favor of the audience by a modest introduction, a respectful address, and the genuine marks of candor and probity. Then we should establish those principles on which we design to argue, and in a clear, easy, sensible manner, propose the principal facts we have to build upon, insisting chiefly on those circumstances of which we intend to make use afterwards. From these principles and facts we must draw just consequences, and argue in such a clear and well-connected manner that all our proofs may support each other, and so be the more remembered.

Every step we advance, our discourse ought to grow stronger and more conclusive, may become the more force and evidence of the truth; and then we ought to display it in such lively images and movements as are proper to excite the passions." A following sentence discloses more definitely the view of Fénelon: "We ought to choose some method, but such a method as is not discovered and promised in the beginning of our discourse." In this he admits the importance, if not the necessity, of a plan, but denies the propriety of stating the plan in advance. In respect to the latter item, it is safe to believe that different subjects and occasions may make different requisitions of the preacher—circumstances not seldom occurring in which a lucid statement of the plan would emphasize the great objects of a sermon. At other times and on other subjects, it may be better to carry the hearers insensibly along to conclusions, without disclosing the processes or marking the steps by which the conclusions are reached. The governing principle in this matter should be that of adaptation. Hence any attempt to fix arbitrary and unvarying rules must result in failure. But the preacher should not, on this account, make the mistake of attempting to prepare and deliver sermons without plan. He should rather accustom himself to habits and forms of close logical analysis and synthesis, studying in the several kinds of the more elaborate forms of discourse to different classes of subjects and occasions. By this means, he may rise above the necessity of loading down his mind with numerous rules, and attain not only facility, but correctness of mental action in shaping his addresses to the comprehension and the persuasion of his hearers. On this plan, an essential and ever-increasing variety, both in the form and matter of his discourses, may be secured; while without it, or some similar mode of procedure, there is great danger of falling into ruts or grooves of thought which, however easy to the preacher, become trite and wearisome to hearers. If, then, his logical plans be set on fire with evangelical love and a consuming zeal in behalf of souls, he will be able to produce sermons of the highest rhetorical power.

According to all the best authorities, a sermon should have an organic structure—at least an introduction, an argument, and a conclusion. In cases of extreme brevity, the beginning and end of the argument may serve as the conclusion, and the conclusion as the conclusion of the sermon. Whether and to what extent the principal and essential parts of a sermon should be marked with divisions and subdivisions should be determined with reference to the probability of oratorical effect. If they can be made to secure greater attention on the part of hearers, and to fasten clearer and deeper impressions on their minds, it would be prudery to reject them. If, on the other hand, they would break the course of thought or mar the unity of the sermon, it would be folly to employ them. So of any style of division, if found helpful and auxiliary to good results, it is to be cultivated. If it seem artificial, redundant, or otherwise a hindrance to oratorical power, let it only rejoin these when no other resource is by being joined and delivered altogether.

2. Style.—The impracticability of prescribing fixed and arbitrary rules as to the language to be employed in preaching is quite as great as in reference to plans of discourse. Nevertheless, there are not wanting important principles to guide the composers of sermons, whether written or oral.

(1) The language of a sermon should be prose, and not poetry.

(2) All the essential qualities of a good prose style should be found in every sermon. Summarily stated, these qualities are purity, precision, perspicuity, unity, harmony, and strength. The lack of any one of these qualities may justly be counted as a defect in the style of any sermon. It belongs to the science of rhetoric to define and illustrate them severally, and also to give suggestions as to their attainment, their laws, and their special uses.

(3) Supplied to the general qualities of a good style, a few special characteristics may be named as highly desirable in the style of sermons, although with some variation of degree in accordance with subjects and occasions.

No discriminating criticism of sermons can be made, apart from a proper classification of each particular sermon, on the basis of its subject or special design. By such a classification, sermons are usually distributed into five classes, viz. expository, homiletic, doctrinal, practical, and miscellaneous or occasional. The last-named class requires a somewhat extended subclassification with reference to special topics and occasions, e.g. a missions; b. education; c. temperance; d. charity; e. funerals. The appropriate treatment of each class is the subject of a separate discourse.

To a thoughtful mind, the law of adaptation will hardly fail to suggest important, though not easily described, variations in the style to be employed in treating topics so different in character. Yet a sermon on any one of these subjects, or, in fact, on any subject appropriate for discussion in a Christian pulpit, will fall short of the highest excellence if lacking in such qualities of style as the following:

i. A combination of simplicity with dignity. It is essential that a sermon embody such a choice of language as will tend to make wise the simple; yet, in his effort to be plain, the preacher must avoid triviality. He must employ words and present images corresponding to the grandeur of the truth which he proclaims, and which may also be understood by the unlearned. Simplicity in the sense recommended is opposed to the affection of elegance and the straining after pompous words and unusual expressions. It employs the language of the people, but makes it the instrument of elevating their thoughts and ennobling their character.

ii. It is incumbent on preachers to make frequent use of scriptural quotations and allusions as a means of declaring and illustrating God's message in its proper form and spirit. Hence the style of their sermons should be in harmony with the tenor and spirit of the Holy Scriptures. The peculiar quality hereby indicated, and which the quotations themselves do not supply, is sometimes called scriptural congruity. It is the picture or framework of silver in which the apples of gold may be fast set.

iii. Another peculiar quality of style demanded in sermons is directness of address. It is the province of poetry to sweep circles and various curvilinear lines of beauty through the realms of thought. Its objects may be well accomplished by exciting admiration and emotions of pleasure. True preaching has a higher aim, and consequently needs to localize its power in order to produce conviction in the mind and proper emotions in
the heart. Hence a good pulpit style tolerates neither the indirectness of an essay nor any rhetorical embellishments which are not auxiliary to directness of address. It rejects circumlocutions and demands those forms of expression that make hearers feel that they are personally the objects of the sacred message. As a good preacher, a man who can communicate in a lively, fresh way, a good sermon seems to speak directly to every hearer. When, in connection with a just reference to the principles above stated, preachers severally maintain their individuality of thought and expression, they will find sermonizing not only a fascinating engagement, but one full of encouragement from the happy result following.

Se'ron (םֵרוֹן; in Syr. and one Gr. MS. Ἰßρων; Vulg. Serón), a general of Antiocoie Epiphanes, in chief command of the Syrian army (1 Macc. iii, 18, 8 ἄρχων τῆς Συρίας), who was defeated at Beth-horon by Judas Maccabeus (B.C. 160), as in the day when Joshua pursued the five kings "in the going-down of Beth-horon" (1 Macc. iii, 24; Josh. x. 11). According to Josephus he was the governor of Canaan in the battle (Ant. xii, 7, 1), nor is there any reason to suppose that his statements are mere deductions from the language of 1 Macc.—Smith.

Serohsh, in Persian mythology, was one of the mightiest of Ormuzd's genii, king of the earth, and director of all things in it. He was not, however, one of the seven amasapandras, but only an assistant to Ardibeheht, one of their number.

Serpent. The frequent mention of this creature in the Bible, together with the important part which it plays in early mythology, justifies a fuller treatment of the subject here than could well be given under the special terms by which the several species are designated. To these, however, we also refer as affording further details on certain points.

Bible Names.—The following are the Heb. and Gr. words by which either the serpent in general or some particular kind is represented in the A. V. with great variety and little precision.

1. Nuchash (نوش; so called probably from its hissing; Sept. and New Test. φίδιας), the generic name of any serpent, occurs frequently in the Old Test. The following are the principal Biblical allusions to this animal: Its sublety is mentioned in Gen. iii. 1; its wisdom is alluded to by our Lord in Matt. x. 16. The poisonous properties of some species are often mentioned (see Psa. liii, 4; Prov. xxiii, 29); the sharp tongue of the serpent, which it would appear some of the ancient Hebrews believed to be the instrument of poison, is mentioned in Psa. cxli, 3; Job xx, 16, "the viper's tongue shall slay him;" although in other places, as in Prov. xxiii, 32; Eccles. x. 8, 11; Numm. xxi, 9, the venom is correctly ascribed to the bite, while in Job xx, 14 the gall is said to be the poison. The habit of serpents of hiding, following, or lying concealed in hedges is alluded to in Eccles. x. 8, and in holes of walls, in Amos v, 19; their dwelling in dry, sandy places, in Deut. viii, 15. Their wonderful mode of progression did not escape the observation of the author of Prov. xxxi, 30, who expressly mentions it as "one of the three things which are too wonderful for him" (ver. 19). The oviparous nature of most of the order is alluded to in Isa. ix, 5, where the A. V., however, has the unfortunate rendering of "cockatrice." The art of taming and charming serpents is of great antiquity, and is alluded to in Psa. lvi, 5; Eccles. x. 11; Jer. viii, 17, and doubtlessly intimated by James (iii, 7), who particularizes serpents among all other animals that "have been tamed by man." See SERPENT-CHARMING.

2. Sar'das (סַרְדָּס, prob. burning [see SARCIF]; Sept. φίδις or ἄρχων; A. V. "fiery") occurs generally in connection with the above term (Numm. xxi, 6; Deut. viii,

15), but occasionally alone (Numm. xxii, 8; Isa. xiv, 29; xxx, 6), as some peculiarly venomous species.

Much has been written on the question of the "fiery serpents" (םֵרוֹן הָרָעָה) of Numm. xxii, 6, 8, with which it is usual to identify the "fiery flying serpent" of Isa. xxx, 6 and xiv, 29. In the transaction recorded (Numm. loc. cit.; Deut. viii, 15) as having occurred at the time of the Exodus, when the rebellious Israelites were visited with a plague of serpents, there is not a word about their having been "flying" creatures; there is therefore no occasion to refer the venomous snakes in connection to the kind of which Niebuhr (De script. de l'Arab. p. 156) says, "speaking of a serpent at Baara denominated heie surserhe, or heie thidre, "flying serpents," which obtained that name from their habit of "springing" from branch to branch of the date-trees they inhabit. Besides these are tree-serpents (dendropods), a harmless family of the colubrine snakes, and therefore quite out of the question. The Heb. term rendered "fiery" by the A. V. is by the Alexandrine edition of the Sept. represented by ἄρχων τῆς Φίδιας, "deadly." Onkelos, the Arabic version of Saadia, and the Vulg. translate the word "burning," in allusion to the sensation produced by the bite; other authorities understand a reference to the bright color of the serpents. It is impossible to point out the species of poisonous snake which destroyed the people in the Arabian desert. Niebuhr says that the only truly formidable kind is that called beta, a small slender creature spotted black and white, whose bite is instant death, and whose poison causes the dead body to swell in an extraordinary manner (see Forskål, Descr. Animal. p. 15). It is obvious that either the cerasus or the naja haje, or any other venomous species frequenting Arabia, may denote the "serpent of the burning bite" which destroyed the children of Israel. See Ziegler, De Serpentibus Ignitus (Jena, 1792).

The "fiery flying serpent" of Isaiah (loc. cit.) can have no existence in nature if taken in strict literalness, though it is curious to notice that Herodotus (ii, 75; iii, 108) speaks of serpents with wings whose bodies he imagined he himself had seen near Buto in Arabia. Monstrous forms of snakes with birds' wings occur on the Egyptian sculptures; it is probable that some kind of flying lizard, as Draco crocatus, or Draco incisus (lizards), may have been the "fiery serpent" of which Herodotus speaks; and perhaps, as this animal, though harmless, is yet calculated to inspire horror by its appearance, it may denote the flying serpent of the prophet, and may have been regarded by the ancient Hebrews as an animal as terrible as a venomous snake. Dr. Smith, in his Lakedem, Hamilton Smith is disposed to take the saroph, or supposed winged serpent, to be a haje, one of the more Eastern species or varieties of the cobra or naja, which have the faculty of actually distending the hood, as if they had wings at the side of the head, and are the same as, or nearly allied to, the well-known spectacle-snake of India; and this interpretation seems to accord with the words of Moses, the serpents, the burning ones (Numm. xxi, 6). The serpent may exhibit this particular state of irritation when it stands half erect with its hood distended, or it may be that variety which is possessed of this faculty to the greatest extent. Naja rafectrix, the green or malacca cobra, it is reported by Dr. Smith to be scarcely distinct from the Egyptian naja haje. With regard to the faculty of flying, the lengthened form, the muscular apparatus, the absence of air-cells, and the whole osteological structure are all incompatible with flight or the presence of wings: hence Herodotus, in his search for the flying serpent near Buto, may have observed heaps of eel-like locusts cast on shore by the sea—a phenomenon not unfrequent on that coast—but most assuredly not heaps of bones and ribs of serpents. As for those of Plutarch, they may have been noxious sand-flies. Flying serpents are only found represented in the symbolical pictures of
Egypt, where they occur with birds' wings. Those of history, and of barbarous nations excessively habituated to figurative forms of speech, are various; some being so called because of their rapid motion, others on account of a kind of spring they are said to make at their victims, and a third class because they climb trees, and are reported to swing themselves from thence upon their victims, or to other trees. Now, many species of serpents are climbers; many hang by the tail from slender branches of low trees in highly heated glens, snapping at insects as they wheel around them; but all are delicately jointed, and if any should swing further than merely to change their hold, and should miss catching a branch, they would most certainly be dialogated, and, if not killed, very seriously injured. From personal experiments, we can attest that serpents are heavy in proportion to their bulk, and without the means of breaking their fall; that few, large or small, could encounter the shock of twelve or fourteen feet elevation without fracturing many spinal processes of their vertebrae, and avoid being stunned for a length of time, or absolutely crushed to death. Being instinctively conscious of the brittleness of their structure, nearly all snakes are timid, and desirous of avoiding a contest unless greatly provoked. This remark applies, we believe, to all innoxious serpents, the great boa perhaps excepted, and to most of the poisonous, exclusive of several species of viper and cobra-de-capello (comp. Thomson, Land and Book, ii. 388). Of the so-called flying, or rather darting, serpents, Nieuhof found near Bearn a venomous species called heie sursurie and heie thiare—that is, “flying serpent”—because it was said to fling itself from one tree to another. Admiral Anson heard, at the island of Quibo, of snakes flying without wings: we may notice the Acundias and Fresters, that fell like arrows from the tops of trees, and the green Atilia of Ceylon, said to spring from trees at the eyes of cattle—an accusation repeated of more than one species in tropical America. Next we have the uer tampang harti, seen in a forest near the river Pedang Bessie, somewhere, we believe, in the Australasian islands, under circumstances that most certainly require confirmation; since this fiery serpent, so called from the burning pain and fatal effect of its bite, swang itself from one tree to another, 240 feet distant, with a declination to the horizon of only about fifteen degrees! We may thus refer the “winged” or “flying” serpent to the Naja tripudians, in one of its varieties, because, with its hood dilated into a kind of shining wing on each side of the neck, standing, in undulating motion, one half or more erect, rigid, and fierce in attack and deadly poisonous, yet still denominated “good spirit,” and in Egypt ever figured in combination with the winged globe, it may well have received the name of sariatph, and may thus meet all the valid objections and conciliate seemingly opposite comments (see Numb. xvii. 6, 8; Deut. viii. 15; Isa. xvi. 29; xxx. 6; and Psalm's Illustrations), excepting the authority of Herodotus, Pausanias, and Bochart, which, with all the respect due to their names, is not now sufficient to establish the existence of a kind of serpent whose structure is contrary to the laws of zoological organization. In Is. xiv, 29, and xxx. 6, the epithet הַשָּׁרֹת, meophéph, vi-brating (rendered “flying” in the A. V.), is another form for “winged,” and occurs in passages unconnected with the events in Exodus. Both bear instinctive interpretatations. A further confirmation of the “fiery serpents,” or “serpents of the burning bite,” being najas, occurs in the name Ras om-krige (Cape of the Haje serpents), situated in the locality where geographers and commentators agree that the children of Israel were afflicted by these reptiles. Should it be objected that these are the haje and not the spectacle-snake, it may be answered that both Arabs and Hindus confound the species.

3. Akhabh (_ackabah, Sept. ā'ariq, A. V. “adder”) is found only in Ps. cxl. 5, “They have sheathed their tongues like a serpent; adders' poison is under their lips.” The latter half of this verse is quoted by Paul from the Sept. in Rom. iii. 13 (‘_as‘). The poison of venomous serpents is often employed by the sacred writers in a figurative sense to express the evil temper of ungodly men; that malignity which, as bishop Horne says, “is the venom and poison of the intellectual world” (comp. Deut. xxxii. 33; Job xx. 14, 16).

It is not possible to say with any degree of certainty what particular species of serpent is intended by the Hebrew word; the ancient versions do not help us at all, although nearly all agree in some kind of serpent, with the exception of the Chaldean paraphrase, which understands a spider by akhabh, interpreting this Hebrew word by one of somewhat similar form (שׁלום, akkabish). The etymology of the term is not ascertained with sufficient precision to enable us to refer the animal to any determinate species. Gesenius derives it from two Hebrew roots (_אָכָּב, akab, “to turn backward,” and _אָכָּב, akab, “to lie in wait”), the combined meaning of which is “rolled in a spire and lying in ambush,” a description which would apply to almost any kind of serpent.

The number of poisonous serpents with which the Jews were acquainted was in all probability limited to some five or six species, and it is not improbable that the akhabh may be represented by the Torcito of Egypt and North Africa. At any rate, it is unlikely that the Jews were unacquainted with this kind, which is common in Egypt and probably in Syria. See Appendix.

4. Pithen (πίθην, from an obsolete root prob. signifying to twist or to be strong; Sept. ā'ariq, πολυκόρνως, πολυκόρνως). The Hebrew word occurs in the six following passages: Deut. xxxii. 33; Ps. liii. 5; xci. 13; Job xx. 14, 16;
The Toxicoa (Echis arenicolou) of Egypt.

Isa. xi. 8. It is expressed in the passages from the Psalms by "adder" in the text of the A. V. and by "asp" in the margin; elsewhere the text of the A. V. has "asp" as the representative of the original word pēthēn.

That some kind of poisonous serpent is denoted by the Hebrew word is clear from the passages quoted above. We further learn from Ps. ivii, 5 that the pēthēn was a snake upon which the serpent-charmers practiced their art. In this passage the wicked are compared to "the adær adder that stoppeth her ears which will not hearken to the voice of charmers, charming never so wisely:" and from Isa. ix, 8, "the sucking child shall play on the hole of the asp," it would appear that the pēthēn was a dweller in holes of walls, etc. The question of identity is one which is by no means easy to determine. Bochart contributes nothing in aid to a solution when he attempts to prove that the pēthēn is the asp (Hieroz. iii, 156), for this species of serpent, if a species be signified by the term, has been so vaguely described by authors that it is not possible to say what known kind is represented by it. The term asp in modern zoology is generally restricted to the Vipera aspis of Latreille; but it is most probable that the name, among the ancients, stood for different kinds of venomous serpents. Solinus (c. xxvii) says, "plures diversae-que sunt aspidum species;" and Ælian (N. A. Anim. x, 31) asserts that the Egyptians enumerate sixteen kinds of asp. Bruce thought that the asp of the ancients should be referred to the ceraeatae, while Cuvier considered it to be the Egyptian cobra (Naja haje). Be this, however, as it may, there will be little doubt that the Hebrew name pēthēn is specific, as it is mentioned as distinct from akabāh, sephishphon, teipōnī, etc., names of other members of the Ophidia.

Oedman (Verzeich. Stammel. x, 81) identifies the pēthēn with the Coluber lebetina, Linn., a species described by Forskål (Desc. Anim. p. 15). Rosenmüller (Not. ad Hieroz. iii, 156), Dr. Lee (Heb. Lex. s. v. יבש), Dr. Harris (Nat. Hist. of Bible, art. "Asp"), Col. H. Smith (Encyc. Bib. Lit. art. "Serpent"), believe that the pēthēn of Scripture is to be identified with the Coluber betan of Forskål. Oedman has no hesitation in establishing an identity between the C. lebetina and the C. betan; but from Forskål's descriptions it is most probable that the two species are distinct. The whole argument that seeks to establish the identity of the C. betan with the pēthēn of Scripture is based entirely upon a similarity of sound. Rosenmüller thinks that the Arabic word betan ought to be written pōtēn, and thinks there can be no doubt that this species represents the pēthēn of Scripture. Oedman's argument, also, is based on a similarity of sound in the words, though he addsuces an additional proof in the fact that, according to the Swedish naturalist quoted above, the common people of Cyprus bestow the epithet of kouphé (κουφε) upon the C. lebetina.

He does not, however, believe that this species is absolutely deaf, for he says it can hear well. This epithet of deafness attributed to the C. lebetina Oedman thinks may throw light on the passage in Ps. lviii, 5, about "the deaf adder." As regards the opinion of Rosenmüller and others who recognise the pēthēn under the betan of Forskål, it may be stated that, even if the identity is allowed, we are as much in the dark as ever on the subject. The whole body of the C. betan is never black and white; it is a foot in length, and of the thickness of two thumbs; oviparous; its bite kills in an instant, and the wounded body swells." The evidence afforded by the deaf snake of Cyprus, and adduced in support of his argument by Oedman, is of no value whatever; for it must be remembered that the order of the Ophidia is very imperfect, as all the members of this order are destitute of a tympanic cavity. The epithet "deaf," therefore, so far as relates to the power all serpents possess of hearing ordinary sounds, may reasonably be applied to any snake. Vulgar opinion in many countries attributes "deafness" to the adder; but it would be very unwise to infer from them that the deaf adder (Felicia berus) is identical with the "deaf adder" of the 58th Psalm. Vulgar opinion in Cyprus is of no more value in the matter of identification of species than vulgar opinion elsewhere. A preliminary proof, moreover, is necessary for the argument. The snake of Cyprus must be demonstrated to occur in Egypt or the Holy Land: a fact which has never yet been proved, though, as was stated above, the snake of Cyprus (C. lebetina) may be the same as the Echis arenicolou of North Africa.

Very absurd are some of the explanations which commentators have given of the passage concerning the "deaf adder that stoppeth her ears" of the 58th Psalm (according to Bochart, iii, 162) asserts that "this snake becomes deaf when old in one ear; that she stops the other with dust, lest she should hear the charmer's voice." Others maintain that "she applies one ear to the ground and stops the other with her tail." That such errors should have prevailed in former days, when little else but foolish marvels filled the pages of natural history, is not to be wondered at, and no allusion to them would have been made here if this absurd error of "the adder stopping her ears with her tail" had not been perpetuated in our own day. In Byrthner's Lyre of David, p. 165 (n. 947), the following explanation of the word pēthēn, without note or comment, occurs: "Asp, whose deafness marks the venom of his malice, as though impenetrable even to charms; it is deaf of one ear, and stops the other with dust or its tail, that it may not hear incantations." Dr. Thomson also (Lond and Book, i, 221) seems to give credence to the fable when he writes: "There is also an opinion that the adder will actually stop up his ear with his tail to fortify himself against the influence of music and other charms." It is not then needless to observe, in confusion of the above error, that no serpent possesses external openings to the ear. The true explanation of Ps. lviii, 5 is simply as follows: There are some serpents, individuals of the same species perhaps, which defy all the attempts of the charmer—in the language of Scripture such individuals may be termed deaf. The point of the rebuke consists in the fact that the pēthēn was capable of hearing the charmer's song, but refused to do so. The individual deafness was an exception to the rule. If, as some have supposed, the expression "deaf adder" denoted some species that was incapable of hearing, whence it had its specific name, how there could be any force in the comparison which the psalmist makes with wicked men? Serpents, though, comparatively speaking, deaf to ordinary sounds, are no doubt capable of hearing the sharp, shrill sounds which the charmer pro-
duce either by his voice or by an instrument; and this comparative deafness is, it appears to us, the very reason why such sounds as the charmer makes produce the desired effect in the subject under treatment. As the Egyptian cobra is more frequently than any other snake the object of the snake-charmers of the Bible-lands practice their science, as it is fond of concealing itself in walls and in holes (Isa. xi. 8), and as it is not impossible that the derivation of the Hebrew word pethen has reference to the expanding powers of this serpent's neck when irritated, it appears to us that at least a serpent representing the claim of the serpent as the very doubtful species of Coluber betanci, which on such slender grounds has so been positively identified with it. See SERPENT—CHARMING.

5. Ephelé (Ἐφελέ); Sept. δραμ, ἀστίς, (βασιλίσκος) occurs in Job xx, 16; Isa. xxx, 6; and lxx, 5, in all of which passages the A. V. has "viper." There is no scriptural allusion by means of which it is possible to determine the species of serpent indicated by the Heb. term, which is derived from a root which signifies "to hiss." Shaw (Trav. p. 261) speaks of some poisonous snake which the Arabs call lellah (el-effish): "it is the most malignant of the tribe, and rarely above a foot long." Jackson also (Morocco, p. 110) mentions this serpent; from his description it would seem to be the Algerian adder (Clathro arvus var. Mauritaniaca). The snake (Iyabrah) that fastened on Paul's hand when he was at Melita (Acts xxviii, 3) was probably the common viper (Velissa berus), which is widely distributed throughout Europe and the islands of the Mediterranean, or else the Vipera aspis, a not uncommon species on the coasts of the same sea. See VIPER.

6. Teiphon, or Teiphōn (Τειφόν; Sept. τειφόν, οὐσίως, ἐπιείκεσθαι, occur five times in the Hebrew Bible. In Prov. xxiii, 22 it is translated "adder," and in the three passages of Isaiah quoted above, as well as in Jer. viii, 17, it is rendered "cockatrice." The derivation of the word from a root which means "to hiss" does not help us at all to identify the animal. From Jeremias we learn that it was of a hostile nature, and from the parallelism of Isa. xxi, 8 it appears that the teiphon was considered even more dreadful than the pethen. Bochart, in his Hieros. (ili, 182, ed. Rosenmüller), has endeavored to prove that the teiphōn is the basilisk of the Greeks (whence Jerome in Vulg. reads regulus), which was then supposed to destroy life, burn up grass, and make stumps and branches 'blacken with the noxious influence of its breath (comp. Pliny, II. N. viii, 59); but this is explaining an "ignotum per ignotius."

The whole story of the basilisk is involved in fable, and it is in vain to attempt to discover the animal to which the ancients attributed such terrible power. It is curious to observe, however, that Forskål (Deser. Anim. p. 13) speaks of a kind of serpent (Coluber hollelik is the name he gives it) which he says produces irritation on the spot touched by its breath; he is quoting, no doubt, the opinion of the Arabs. Is this a relic of the basiliskan fable? This creature was so called from a mark on its head, supposed to resemble a Klingy crown. Several serpents, however, have peculiar markings on the head—the varieties of the spectacul-corals of India, for example—so that identification is impossible. As the Sept. makes use of the word basilisk (Psa. xc, 13; cx, 15 A. V.), it was thought desirable to say this much on the subject. The basilisk of naturalists is a most forbidding-looking yet harmless lizard of the family Iguanidae, order Sauvia. In using the term, therefore, care must be taken not to confound the mythical serpent with the veritable Saurian. Basilisk is an indefinite English name, which belongs to no identified serpent, and now appears only in the works of ancient compilers and heralds, where it is figured with a crest, though there is no really crested or frilled species known to exist in the whole Ophidian order. Crested serpents occur, it is true, on Greek and Etruscan vases; but they are invariably mythological representations, probably derived from descriptive rumors of the hooded najus, cerastes, and perhaps surmenne; the first of these having what may be likened to a turbaned, the other to a coronated head, and the third in an ophidian crown. But it is from the apparently crowned form that the denominations of basilisk and regulus were derived. See BASILISK.

It is possible that the teiphōn may be represented by the Algerine adder (Clotho Mauritaniaca), but it must be confessed that this is mere conjecture. Dr. Harris, in his Natural History of the Bible, erroneously supposes it to be identical with the Rohaj zephen of Forskål, which, however, is a fish (Trigem zephen, Cuv.), and not a serpent. See COCKATRICE.
naturalists: "Sifflon, serpentsis genus leve, punctis maculisque distinctum"—"a small kind of serpent marked with dots and spots" (Goliou, Arab. Lex. s. v.). "The cerastes (Cerastes Haselquividis) is brownish white, with pale—brown irregular unequal spots" (Catalogue of Snakes in Brt. Mus. i. 29). It is not pretended that the mere fact of these two animals being spotted affords sufficient ground, when taken alone, for asserting that they are identical, for many serpents have this character in common; but when taken in connection with what has been adduced above, coupled with the fact that this species of snake belongs only to a very few kinds common in the localities in question, it does at least form strong presumptive evidence in favor of the identity of the stephophiles with the cerastes. The name of cerastes is derived from a curious horn-like process above each eye in the male (and occasionally, it would seem, in the female likewise), which gives it a formidable appearance. Bruce, in his Travels in Abyssinia, has given a very accurate and detailed account of these animals. He observes that he found them in great numbers in those parts which were frequented by the jeroas, and that in the stomach of a cerastes he discovered a jeroa of a size. Of the two of these snakes in a glass vessel for two years without any food. Another circumstance mentioned by Bruce throws some light on the assertions of ancient authors as to the movement of this snake. Aelian (De Anim. xvi. 13), Isidorus, Eljis, have all recorded of the cerastes that, whereas other serpents creep along in a straight direction, this one and the kamrakas (not doubt the same animal under another name) move sideways, stumbling, as it were, on either side (and comp. Bochart). Let this be compared with what Bruce says, "The cerastes moves with great rapidity and in all directions, forwards, backwards, sideways: when he inclines to surprise any one who is too far from him, he creeps with his side towards the person," etc. The words of Ibn-Sina, or Avicenna, are to the same effect. It is right, however, to state that nothing unusual has been observed in the mode of progression of the cerastes in the gardens of the Zoological Society; but, of course, negative evidence in the instance of a specimen not in a state of nature does not invalidate the statement of so accurate an observer as Bruce. The celebrated John Ellis seems to have been the first Englishman who gave an accurate description of the cerastes (see Philosoph. Transact. 1789). Haselquividus minutely described it (Ibid. p. 231, 365). The cerastes is extremely valuable; the skin is composed of leather to match eighteen pigeons upon the thigh as quickly as possible, and they all died nearly in the same interval of time. It averages from twelve to fifteen inches in length, but is occasionally found larger. It belongs to the family Viperidae, order Ophiidae. This is a dangerous species, usually burrowing in sand near the holes of jeroas, and occasionally in the cattle-paths; for there are now few or no runs of cart-wheels, where it is pretended they used to conceal themselves to assault unwary passengers. It is still common in Egypt and Arabia. Another kind of horned serpent is the Ergz cerastes of the Moorish and Egyptian deserts. The two long-fanged snakes, but remarkable for two very long back teeth in the lower jaw, which pass through the upper jaw, and appear in the shape of two white horns above its surface. It is known to the Egyptian Arabs by the name of harbagh, which may be a distortion of obhkaion in Horapolo, and is classed by Haselquint among slow-worms, because in form the tail does not taper to a point. Its colors are black and white marbling, and the eyes are lateral and very near the snout. See Asp.

8. Trimmaurus, Deut. viii, 15, appears to be a serpent, though rendered by "drought" in the A. V., and others, so called because of the intolerable thirst occasioned by its bite. If this translation be correct, it will form in modern nomenclature one of the genus Histris, and subgenus Diphas or Bonbyurus. But no species of this division of snakes has yet been found in Western Asia, albeit there are several in India; and Avicenna locates the Taurus in Syria; whereupon Cuvelier remarks that Gessner's figure of Diphas belongs precisely to the subgenus here pointed out. As one of the colubrine family, it should not be venomous; but the last-mentioned writer remarks that several of these are regarded in their native localities with great dread; and on examination it is found that, although they have no erectile tubercular fangs, with a poison-bag at the roots, there is on the long back teeth a groove, and a large gland at the base of the maxilla, which it is not unlikely contains, in some at least, a highly venomous poison. See Drocourt.

9. Z Achilles, literally a crawler' occasionally stands for Deut. xxxiii, 24, 'serpent'; Mic. vii, 7, 'worm' as a general term for the serpent tribe. See Worm.

10. Tomis, Deut. iii, 9, 10, 12; elsewhere usually 'dragon' seems in the above instances to denote a venomous reptile (Deut. xxxii, 33; but of a vague character. See Sea-Monster.

11. The usual and proper term 'serpent' in the New Test. is ὑπάμα, a snake of any kind; but once (James iii, 7 ἑστράφω elsewhere 'creeping thing') is thus rendered. More specific terms, noticed above, are ἄρριξ, ἄρριξ, ἄρριξ.

12. Scientific Classification and Characteristics.—1. Systematical nomenclature and travellers enumerate considerably more than forty species of serpents in Northern Africa, Arabia, and Syria. Of these it is scarcely possible to point out with certainty a single one named in the Bible, where very few descriptive indications occur beyond what in scientific language would now be applied genealogically. It is true that, among the names of the list, several may be synonyms of one and the same species; still none but the most recent researches give characters sufficient to be depended upon, and as yet nothing like a complete herpetology of the regions in question has been established. For, snakes being able to remain in a very low degree of cold, and also the greatest heat, there are instances of species being found, such as the haje, precisely the same, from the Ganges to the Cape of Good Hope; others, again, may be traced from Great Britain to Persia and Egypt, as is instanced in the common viper and its varieties. The reader, therefore, of making vain efforts at identifying all the names, will do well to assign an entire course to assign them to their proper families, with the exception of those that can be pointed out with certainty; and in so doing it will appear that even now species of importance mentioned by the ancients are far from being clearly established. Serpents may be divided generally into two very distinct sections—the first embracing all those that are provided with movable tubular fangs and poison-bags in the upper jaw; all regarded as ovo-viviparous, and called by contraction viper: they constitute not quite one fifth of the species hitherto noticed by naturalists. The second section, much more numerous, is the colubrine, not so armed, but not therefore always innocuous, since there may be in some cases venomous secretions capable of penetrating into the wounds made by their fixed teeth, which in all serpents are single points, and in some species increase in size as they stand back of the jaws. The greater part, if not all, of these comparatively innocuous species of parasitic serpents, including the largest or giant snakes, and the pelamis and hydrophis, or water-serpents, among which several are venomous.

If we are right in the above identification, one class of serpents, the cobra tribe, may be regarded as the type of the most venomous serpents in the East. The genus Naja—Horid (?) of Savary—is distinguished by a plaited head, large, very venomous fangs, a neck dilatable un-
Serpent

der excitement, which raises the ribs of the anterior part of the body into the form of a disk or hood, when the scales, usually not imbricated, but lying in juxtaposition, are separated, and expose the skin, which at that time displays bright iridescent greens, contrasting highly with their brown, yellow, and bluish colors. The species attain at least an equal, if not a superior, size to the generality of the genus vipers; are more massive in their structure; and some possess the faculty of self-inflation to triple their diameter, gradually forcing the body upwards into an erect position, until, by a convulsive crisis, they are suddenly to strike backwards at an enemy or a pursuer. Capt. Stevens, of the Royal Marines, in order to ascertain the truth of the universal report concerning the mode of striking back ascribed to the serpent, had a quill introduced into the vent of one lying dead on the table, and blown into. The skin distended till the body rose up nearly all its length; he then caused the experiment to stop, from the alarming attitude it assumed.

2. Among the various tribes of animals which are inimical to man, there is none that can compare with the venomous snakes for the deadly fatality of their enveny: the lightning stroke of their poison-fangs is the same in kind of a swift discharge as the torture the most horrible. The bite of a vigorous serpent has been known to produce death in two minutes. Even where the consumption is not so fearfully rapid, its delay is but a brief prolongation of the intense suffering. The terrible symptoms are thus described: A sharp pain in the part, which becomes swollen, shining, hot, red, then livid, cold, and insensible. The pain and inflammation spread, and become more intense; fierce shooting pains are felt in other parts, and a burning fire pervades the body. The eyes water profusely; then come swooning, sickness, and bilious vomitings, difficult breathing, cold sweats, and sharp pains in the loins. The tongue swells, and a yellow or black fluid, white or black watery blood runs from the wound, which changes to a yellowish matter. Violent headache succeeds, and giddiness, faintness, and overwhelming torments, burning thirst, gushing discharges of blood from the orifices of the body, intolerable fetor of breath, convulsive hic-coughs, and death.

The agent of these terrible results is an inodorous, tasteless, yellow fluid, secreted by peculiar glands seated on the cheeks, and stored for use in membranes placed on the side of each upper jaw, and enveloped by a thick skin of a large, curved, pointed tooth, which is tubular. These two teeth, or fangs, are capable of being erected by a muscular apparatus under the power of the animal, when they project at nearly a right angle from the jaw. The manner in which the deadly blow is inflicted is remarkable, and is alluded to in Scripture. When the rage of the snake is excited, it commonly throws its body into a coil more or less close, and raises the anterior part of its body. The neck is now flattened and dilated, so that the scales, which ordinarily lie in close contact, are separated by wide interstices of naked integument skin. The neck is bent more or less back, the head projecting in a horizontal position. In an instant the whole fore part of the animal is launched forward towards the object of its anger, the erected tooth is forcibly struck into the flesh, and withdrawn with the velocity of a thought. No doubt the rage which stimulates the action calls for an increased secretion of the poison glands, by which the store-sac is filled with the secretion. The muscular contraction which gives the rapid blow compresses at the same instant the sac; and as the acute point of the fang enters the flesh, the venom is forced through the tubular centre into the wound.

III. Scripture History.—It was under the form of a serpent that the devil seduced Eve; hence in Scripture Satan is called "the old serpent" (Rev. xii. 9, and comp. 2 Cor. xi. 3). On this metaphorical use of the word, see the Jour. of Sci. Lit. Jan. 1852, p. 561 sq.; comp. Biblioth. Sacra, Jan. 1864.

The part which the serpent played in the transaction of the first fall must be believed over without some brief comment, being full of deep and curious interest. First of all, then, we have to note the subtlety ascribed to this reptile, which was the reason for its having been selected as the instrument of Satan's wiles, and to compare with it the quality of wisdom mentioned by our Lord as pertaining to its kind ("Serpent," Mat. x. 16). It was an ancient belief, both among Orientals and the people of the Western world, that the serpent was endowed with a large share of sagacity. The Hebrew word ובשׂנֵה, translated "subtle," though frequently used in a good sense, implies, it is probable, in this passage, "mischiefous and malignant craftiness," and is well rendered by Aquila and Theodotion by πανσοφος, and thus commented upon by Jerome, "Mago iste habeas verborum subtilitates versatulatur" (see Rosenmuller, Schol. ad loc.). The ancients give various reasons for regarding serpents as being endowed with wisdom, as that one species, the ceraastes, hides itself in the sand and bites the heels of animals as they pass, or that, as the head was considered the noblest part, the serpent was careful to conceal it under the folds of the body. Serpents have in all ages been regarded as emblems of cunning craftiness. The particular wisdom alluded to by our Lord refers, it is probable, to the sagacity displayed by serpents in avoiding danger. The disciples were warned to be as prudent in not incurring unnecessary persecution.

It has been supposed by many commentators that the serpent, prior to the fall, moved along in an erect attitude, as Milton (P. L. ix. 396) says—

"Not with indented wave
Prone on the ground, as since, but on the rear,
Circular base of rising folds that tower's
Fold above fold, a surging maze."

Comp. also Josephus (Ant. i. 1, 4), who believed that God now for the first time inserted poison under the serpent's head, and observed the effect of the use of foeces, causing him to crawl low on the ground by the unmitigating inflations of the body (κατα της γης ολιγοομονων). Patrick (Comment. ad loc.) entertained the extraordinary notion that the serpent of the fall was a winged kind (sarpheph), and Adam Clarke has been the laughing-stock of exegetes ever since for maintaining that the serpent of the garden was an orange-slug (Comment. ad loc.).

It is quite clear that an erect mode of progression is utterly incompatible with the structure of a serpent, whose motion on the ground is so beautifully effected by the mechanism of the vertebral column and the multitudinous ribs, which, forming as it were so many pairs of levers, enable the animal to move its body from place to place; consequently, had the snakes before the fall moved in an erect attitude, they must have been formed on a different plan altogether. It is true that there are saurian reptiles, such as the Strophius tetrapodius and the Chinese dragon of South Africa, which in external form are very like serpents, but with quadrupeds; indeed, even in the boa-constrictor, underneath the skin near the extremity, there exist rudimentary legs. Some have been disposed to believe that the snakes before the fall were similar to the Strophius. Such a hypothesis, however, is untenable, for all fossil insects reveal in no essential respects from modern representatives of that order: it is, moreover, beside the mark, for the words of the curse, "upon thy belly shalt thou go," are as characteristic of the progression of a saurphoid serpent before the fall as of a true ophidian after it. There is no reason whatever to conclude, from the language of Scripture, that the serpent underwent any
change of form on account of the part it played in the history of the fall. The sun and the moon were in the heavens long before they were appointed "for signs and for seasons, and for days and for years." The typical form of the serpent and its mode of progression were, in all probability, the same before the fall as after it; but subsequent to the fall its form and progression were to be regarded with hatred and disgust by all mankind, and thus the animal was cursed "above all cattle," and a mark of condemnation was forever stamped upon it. There is no necessity to show how that part of the curse here referred to, which speaks of the "enmity" that was hitherto existent between the serpent and mankind; and though, of course, this has more especial allusion to the devil whose instrument the serpent was in his deceit, yet it is perfectly true of the serpent. Few will be inclined to differ with Theocritus (Id. xi, 56)—

"Ec taois."

Serpents are said in Scripture to "eat dust" (see Gen. iii, 14; Isa. lxv, 25; Mic. vii, 17); these animals, which, for the most part, take their food on the ground, do consequently swallow with its large portions of sand and dust, which is called *serpent.*

IV. Mythology. As already seen, scriptural evidence attests the serpent's influence on the early destinies of mankind; and this fact may be traced in the history, the legends, and creeds of most ancient nations. It is far from being obliterated at this day among the pagan, base, and superstitious creations of both the lower and higher orders, whereby the most virulent and dangerous animals of the viviparous are not uncommonly adored, but more generally respected, from motives originating in fear; and others, of the oviparous race, are suffered to abide in human dwellings, and are often supplied with food, from causes not easily determined, excepting that the serpent is ever observed to possess a superhuman knowledge or power. Hence, besides real species, ideal forms, taken from the living, but combining other or additional properties, occur, at the most early periods, as metaphorical types, in fable and history, and in the hieroglyphics and religious paintings of many nations. Such are the innumerable fables in Hindostan lore of Nagas and Nagas kings; the primeval astronomy which placed the serpent in the skies, and called the Milky Way by the name of Ananta and Sesha Naga; the pagan obscure yet almost universal record of the deluge typified by a serpent endeavoring to destroy the ark, which astonishment and sentenced to be destroyed by a form of a dragon about to devour the moon, when, in an eclipsed state, it appears in the form of an amphibious, or crescent-shaped boat; and, strange as it may seem, lunar eclipses still continue to be regarded in this character, and to excite general apprehension in Central Africa as well as in China, in the South Sea Islands as well as in America. See DRAGON. The nations of the North once believed in the Jormund Gander, or Kater serpent of the deep; and they, together with the Celts and Basques and all Asia, had legends of the Orm, the Pyshtah, the dragon guardian of riches, brooding on gold in caverns deep below the surface of the earth, or lying in huge folds on dry and extensive heaths. These fables were a residue of that antique dragon-worship which had its temples from High Asia and Colchis to the north of Great Britain, and once flourished both in Greece and Northern Africa—structures with avenues of upright stones of several miles length, to be the ruins of which we first come across in Carnak in Brittany, Aubry in Wilts, and Redruth in Cornwall—the last the two mentioned more particularly showing their connection with the circle constituting a form of the mundane egg, which again was an emblem of the deluge and the ark. The Hesperian, Cyprian, and Indian mounds, which lines of the same doctrine, still more distorted, and affording ample proof how far the pagan world had departed from the simplicity of scriptural truth, from the excessive use of metaphorical descriptions and fanciful symbols. In Egypt, the early centre of ophthalmology, this debasing service was so deeply rooted that a Christian sect of heretics, called Ophite, or, according to Clemens Alexandrinus, Orphian, arose in the 2d century of our era. As an emanation of the Gnostics, their errors are particularly noticed by Tertullian, and form a signal instance of human perverseness ingeniously misleading itself and others by the abuse of symbols; yet, when the anguine type did not pass into long, distorted legends, it is evident, from the brazen serpent raised by Moses in the wilderness, that it was correctly farmed by the people as a sign, not in itself a power, of divine aid; and that its true symbolical meaning did not escape even pagan comprehension appears from profane history, in Meliss, the good serpent, being likewise properly understood by the Egyptians, until idolatry distorted all the national reminiscences, and the promise of what was not fully revealed till the Saviour appeared on earth was obliterated. Ob, Oub, the Coptic Hof, Obion in Kircher, was, however, the general name for serpents in Egypt; and Kneph, or Cnuphis, or In Nuphi, the good genius, always figured as the Nachash, or "serpent"; and Theophrastus, the same as the lord-serpent of India, and still a personification of the vanquisher of the deluge—Vishnu and many other beings being pagan denominations of Noah. In this sense the good genius Cnuphis was a type of the Saviour of men, and called by them the spirit pervading nature, the creator, the harbinger of both good and evil; being referred, after the loss of the true interpretation, to any typical form of the patriarch, the events of the deluge and the creation, thus confounding the operations of the Almighty with the ministry of his servant. (See Deane, *The Worship of the Serpent traced throughout the World* [London, 1838].) See SERPENT—worship. The behemoth is not to be passed over among the great destroyer Python tribe, which devour each other; it is represented on Egyptian monuments bearing a mummy figure on its tail, and gliding over a seated divinity with an egg on the head, while human sacrifice by decapitation is performed before it. This serpent is so constantly drawn that we recognize the Thaibanne, *Ophites Thebaenus,* which grows to twelve or more feet in length, is still found in Upper Egypt, and is a congener, if not the same as *Python tigris albinus,* the great snake even at present worshipped in Cutch: it may be the Aphphis of the Egyptians. To the north, the behemoth's descendants, descended from the same stock that is not from our purpose; but the Egyptian Python here noticed, changing its character from being of a type of the deluge to that of an emblem of the ark carrying the spirit of human life within or upon it, was not without its counterpart in England, where lately, in digging out the deep, black mud of a ditch, a boat-shaped Python, carrying the eight Eones (?) or Noahcsides, has been discovered, with emblems that denote them to be the solar regenerators of mankind. Thus, as is ever the case in polytheistical legends, the type disappears through multiplied transitions and the number of other symbols and personifications characterized by the same emblem. It was so in this instance, when the snake form was conferred also on abstractions bearing the names of divinities, such as Ranno, Hoph, Bai, Hoh or Hih, and others.

The asserted longevity of the serpent tribe may have suggested the representation of the harmless house-snake with the body of the reptile, as is traced at Carnac in Brittany, Abury in Wilts, and Redruth in Cornwall—the last two mentioned more particularly showing their connection with the circle constituting a form of the mundane egg, which again was an emblem of the deluge and the ark. The Hesperian, Cyprian, and Indian mounds, which lines of the same doctrine, still more distorted, and affording ample proof how far the pagan world had departed from
was asserted to be produced by the venomous viper species. With such powers of destroying animal life, and with an aspect at once terrible and resplendent, it may easily be imagined how soon fear and superstition would combine, at periods anterior to historical data, to raise these monsters into divinities, and endeavor to deprecate their wrath by the blandishments of worship; and how design and cupiditiy would teach these very votaries the manner of subdued their ferocity, of extracting their instruments of mischief, and making them subservient to the wonder and amusement of the vulgar by using certain echoes of sound which affect their hearing, and exciting in them a desire to perform a kind of pleasurable movement that may be compared to dancing. Hence the Nagas of the East, the Hagworms of the West, and the Haje have all been deified, styled agathodemon, or good spirit; and figures of them occur wherever the superstition of pagan antiquity has been accompanied by the arts of civilization.

"Almost throughout the East," writes Kalisch (Hist. and Crit. Comment. Gen. iii. 1), "the serpent was used as an emblem of the evil principle, of the spirit of disobedience and contumacy. A few exceptions only can be discovered. The Phenicians adored that animal as a beneficent genius; and the Chinese consider it as a symbol of superior wisdom and power, and ascribe to the kings of heaven (tien-hoong) bodies of serpents. Some other nations fluctuated in their conceptions regarding the serpent. The Egyptians represented the eternal spirit Kneiph, the author of all good, under the mythical form of that reptile; they understood the art of taming it, and bore it in their embraces; and submitted to the influence of its magic property after death; but they applied the same symbol for the god of revenge and punishment (Tithrambo), and for Typhon, the author of all moral and physical evil; and in the Egyptian alphabet the serpent represents humility and cunning, lust and sensual pleasure. In Greek mythology it is certainly, on the one hand, the attribute of Ceres, of Mercury, and of Zuesclus, in their most benificent qualities; but it forms, on the other hand, a part of the terrible Furies, or Eumenides: it appears in the form of a Python as a fearful monster, which the arrows of a god only were able to destroy; and it is the most hideous and most formidable part of the impious giants who despise and blaspheme the power of Heaven. The Indians, like the savage tribes of Africa and America, suffer and nourish, indeed, serpents in their temples, and even in their houses. They believe that they bring happiness to the places which they inhabit; they worship them as the symbols of eternity, but they regard them also as evil genii, or as the imical powers of nature, which is gradually deprived by them, and as the enemies of the gods, who either tear them to pieces or tread their venomous head under their hoofs after their defeat. So is the whole of animal-worship. Its principle is, in some instances, gratitude, and in others fear; but if a noxious animal is very dangerous, the fear may manifest itself in two ways—either by the resolute desire of extirpating the beast, or by the wish of avenging the conflict with its superior power; the latter the same fear may, on the other hand, cause fierce enmity, and, on the other, submission and worship. See, on the subject of serpent-worship, Vossius, De Orig. Idol. i. 5; Bryant, Mythology, i. 420—490: it is well illustrated in the apocryphal story of "Bel and the Dragon," comp. Steindorf, De Ophiolcaqo; Winer, Bib. Rassell. i. ii. 488.

From a modification, perhaps, of this idea of a tutelary genius, in Egypt and other Oriental countries a serpent was the common symbol of a powerful monarch. It was embroidered on the robes of princes and blazoned on their diadems to signify their invincible might; and that, as the wound inflicted by them is incurable, so the fatal effects of their displeasure were neither to be averted nor endured.

The evil spirit in the form of a serpent appears in the Abrimman, or lord of evil, who, according to the doctrine of Zoroaster, first taught men to sin under the guise of this reptile (Zandareeta [ed. Kleek.], i. 25; iii. 84; see Rus, De Serpente Seducitore Non Naturali sed Diabolico [. . .], 1712, and Grapinus, De Tentatione Eva et Christi a Diabolo in Assumpto Corpo Facta [Rostoch. 1712]). But compare the opinion of Dr. Kalisch, who (Comment. on Gen. iii. 14, 15) says: "the serpent is the reptile, not an evil demon that had assumed its shape. . . . If the serpent represented Satan, it would be extremely surprising that the former only was cursed, and that the latter is not even mentioned. . . . It would be entirely at variance with the divine justice forever to curse the animal whose shape it had pleased the evil one to assume." According to the Tal-marists, the name of the evil spirit that beguiled Eve was Sammael (Samuel): "R. Moses ben-Majemon scribit in More (ib. ii. c. 90), Sammaele iniquitasse serpenti antiquo et seduxisse Eva. Dicta historia latinitatis absoluta usurparsi de Saturna, et Sammaele nihil aliud esse quam ipsum Satanam" (Butler, Lec. Talm. col. 1495).

It is of more importance to remark that in the traditions of most pagan nations, which have been embodied in their mythology, the serpent appears as the enemy of man, and a triumph over this enemy is usually described as the greatest achievement of a popular deity. The Egyptian Horus is frequently represented piercing the head of some terrible serpent with his spear. From this source the Greeks and Romans adopted the fable of Apollo and the serpent Python, which is thus narrated by Ovid:

"Of new monsters earth created more Unwillingly, but yet she brought to light These, Python, too, the wondering world to fright. And the new nations with so dire a sight: So monstrous was his bulk, so large a space Did his vast body and long train embrace. Him Phoebus back on a bank espied, And all his skill against the monster tried.hooked his shaft took place, he lay dead On his full quiver, and 'twas long before The expirying serpent wailed in his gore."

Lok, one of the favorite heroes of the Northern mythology, is represented as a destroyer of serpents, and a legend similar to the classic story just quoted represents him as destroying a monstrous serpent with his hammer.
opposed to the deities at the creation of the world. It is clear that the dragon is included in the curse after the fall, and that the gods invoke on the head of the human race all the evils which inflict humanity. Wisdom and Love itself injure him. He will have family quarrels (line 28); he will submit to tyranny (line 24); he will anger the gods (line 26); he will not eat the fruit of his labor (line 27); he will be disappointed in his desires (line 27); he will have trouble of mind and body (line 9 and 31); he shall completely break the lines (line 28). No one thinks we can continue these topics, but again our narrative is broken, and it only reopens where the gods are preparing for war with the powers of evil, which are led by Tiamat, who was probably sprung from the part played by Tiamat in the fall of man. See 7.

SERPENT, CHRISTIAN SYMBOLISM OF. As a symbol, the serpent was used by the early Christians in three different senses.

1. To signify the victory of Jesus Christ over the devil. This was represented by a coiled serpent at the foot of the monogram on the cross to show “ut qui in ligno vincedat, in ligno quoque vincereatur.” Antiquque gems bearing this device have been discovered, but their date cannot be earlier than the time of Constantine. The type is somewhat altered on medals of this emperor, having a dragon pierced by the staff of the labeurn. Ancient iconography often represented the saints as treading on the serpent to express their victory over the spirits of darkness.

2. The figure of the serpent was also employed to signify the virtue of prudence or wisdom as commanded by Christ, “Be ye wise as serpents:” and as it was supposed that bishops should exemplify this virtue in its highest form (1 Tim. iii, 9), we often find the picture of early bishops surrounded by a serpent as by a frame. For the same reason, in the early Latin Church the pastoral staff was terminated at the top by a serpent’s head.

3. The serpent was used as a symbol of the cross and of Christ himself. These allegories have been developed by Grotius and Giacomo Bosio in their works on this subject (De Cruce et De Cruce Triumphale). This use of the symbol, derived from the teachings of Christ (John iii, 14), soon degenerated into a worship of the serpent itself. This reached its climax among the Ophites (q. v.), who set it in the place of Christ himself (Augustine, De Haeres. c. 17, 46).

In the same connection the inhibition of the cross is interdicted, the early Christians made use in its stead of the emblem of the serpent, as of the lamb, the good shepherd, and many others. These they wore as amulets and in other ways to show their confidence in the Saviour which they typified. They are found made of precious stones, on some of which is cut the figure of Moses, a rod in his hand, and an enormous serpent before him; a second person on the other side of the serpent represents the Jesus people.

In the commentary upon the 37th Psalm, Ambrose makes use of the type of the serpent principally as a symbol of the resurrection and of immortality.

Serpent of Brass (σπάρτανής; Sept. ῥάπαν ἀ χαλάνας, Numb. xxvi, 9; 2 Kings xxvii, 9). In addition to the treatment of this subject under Brazen SERPENT and NEHEMITHAN, some important particulars may here be enumerated. The familiar history of the brazen serpent need not be repeated here. The nature of the fiery snakes by which the Israelites were attacked has been discussed under SERPENT. The scene of the history, determined by a comparison of Numb. xxvi, 3 and xxxii, 42, must have been either Zalmonah or Punon. The name of both places probably comes from a word with it, Zalmonah as meaning “the place of the image.” Punon as probably identical with the Phoen mentioned by Greek writers as famous for its copper-mines, and therefore possibly supplying the materials (Boehart, Hieroz. ii, 8, 18). See PUNON; ZALMONAH. The chief
interest of the narrative lies in the thoughts which have at different times gathered round it. We meet with these in four distinct stages, embodied in as many widely separated passages of Scripture. We have to ask by what associations each was connected with the others.

1. The Formation of the Object (Numb. xxii, 8, 9).—The truth of the history will, in this place, be taken for granted. Those who prefer it may choose among the hypothesis by which men halting between two opinions have endeavored to rend the historical and to eliminate the supernatural element. The theory which ascribes the healing to mysterious powers known to the astrologers or alchemists of Egypt may be mentioned, but hardly calls for examination (Marshall, Can. Chron. p. 146, 149; B. Tirza, in Deifying, Exercit. Sac. ii, 210). Literalists may look on the cures as having been affected by the force of imagination, which the visible symbol served to heighten, or by the rapid rushing of the serpent-bitten from all parts of the camp to the standard thus erected, curing them, as men are said to be cured of the bite of the tarantula by dancing (Bauer, Rel. Gesch. ii, 520; Paulus, Comm. IV, 1, 136; Thomasson, ii, 351). They may see in the serpent the emblematic sign-post, as it were, of the camp-hospital to which the sufferers were brought for special treatment, the form in this instance, as in that of the rod of Zosculus, being a symbol of the art of healing (Hoffmann, in Scherer, Schrif. Forsch. i, 19). If we are to look for the kind of reasoning the conjurer considered, it remains for us to inquire into the fitness of the symbol thus employed as the instrument of healing. To most of the Israelites it must have seemed as strange then as it did afterwards to the later rabbins that any such symbol should be employed. One of the Jewish interlocutors in the story of Justin Martyr with Trypho the Philadelphia (392) declares that he had often asked his teachers to solve the difficulty, and had never found one who explained it satisfactorily. Justin himself, of course, explains it as a type of Christ.

The second commandment appeared to forbid the likeness of any living thing. The golden calf had been destroyed as an abomination. Now the colossal serpent (the narrative implies that it was visible from all parts of the encampment), made, we may conjecture, by the hands of Bezalel or Aholib, was exposed to their gaze, and they were told to look to it as gifted with a supernatural power. What reason was there for the difference in this and the other commandments? One reason is that the second commandment forbade not all symbolic forms as such, but those that men made for themselves to worship; but the question still remains, Why was this form chosen?

It is hardly enough to say, with Jewish commentators, that any outward means might have been chosen, like the lump of figs in Hezekiah's sickness, the salt which healed the bitter waters, and that the brazen serpent made the miracle more miraculous, inasmuch as the glare of burned brass, the gaze upon the serpent form, were, of all things, most likely to be fatal to those who had been bitten (Gen., Exod., Num., Deut. and Ezra and others, in Buxtorf, Hist. Euen. Serp. c. 5). The fact is doubtful, the reason inadequate. Another view, verging almost on the ludicrous, has been maintained by some Jewish writers. The serpent was set up in terrorem, as a man who has chastised his son hangs up the rod against the wall as a warning (Otho, Lexic. Rubbin, s. v. "Serpens").

It is hardly enough again to say, with most Christian interpreters, that it intended to be a type of Christ. Some meaning it must have had for those to whom it was actually presented; and we have no grounds for assuming that for itself, still less in the multitude of Israelites slowly rising out of sinfulness, unbelief, rebellion, a knowledge of the far-off mystery of redemption. If the words of our Lord in John iii, 14, 15, point to the fulfilment of the type, there must yet be another meaning for the symbol. Taking its part in the education of the Israelites, it must have had its starting-point in the associations previously connected with it. Two views, very different from each other, may have been capable of the nature of the oblique view. On the one side it has been maintained that, either from its simply physical effects, or from the mysterious history of the temptation in Gen. iii, the serpent was the representative of evil. To present the serpent-form as deprived of its power to hurt, impaled as the trophy of a conqueror, was to assert that evil, physical and spiritual, had been conquered, and the change to strength even the weak faith of the Israelites in a victory over both. The serpent, on this view, expressed the same idea as the dragon in the popular representations of the archangel Michael and St. George (Ewald, Geschicht, ii, 296). To some writers, as to Ewald, this has comprised, this and the rest, a symbol of the serpent. It has been adopted by some orthodox divines who have been unable to convince themselves that the same form could ever really have been at once a type of Satan and of Christ (Jackson, Humiliation of the Son of God, ch. xxxi; Patrick, Comm. ad loc.; Espagennus, Burrmann, Vitringer, in Deifying, Observ. Sac. ii, 15). Other writers, again, have started from a different ground. They raise the question whether Gen. iii was then written, or, if written, known to the great body of the Israelites. They look to Egypt as the starting-point for all the thoughts which the serpent could suggest, and they have been able to find in the Egyptian serpent, the symbol of health and life (comp. Serpent, and, in addition to the authorities there referred to, Wilkinson, Anc. Egyptians, ii, 134; iv, 395; v, 64, 238; Kurzt, Hist. of the Old Covenant [Eng. transl.], iii, 348; Wissius, Egyptiaceae, in Ugo, b, 692). This, for them, explains the very word Serpent, as the known emblem of a power to heal that it served as the sign of life on which the faith of the people might fasten and sustain itself.

Contrasted as these views appear, they have, it is believed, a point of contact. The idea primarily connected with the serpent in the history of the fall, as throughout the proverbial language of Scripture, is that of wisdom (Gen. iii, 1; Matt. x, 16; 2 Cor. xi, 3). Wisdom, apart from obedience to a divine order, alloying itself to man's lower nature, passes into cunning. Man's nature is envenomed and degraded by it. But wisdom, the selfsame power of understanding, yielding to the divine law, is the power that makes the history of the Israelites, and the serpent-form thus becomes a symbol of deliverance and health. The Israelites were taught that it would be such to them in proportion as they ceased to be sensual and rebellious. There were facts in the life of Moses himself which must have connected themselves with this not simplest and. When he was brought up he was taught that the divine wisdom could work with any instruments, his rod became a serpent (Exod. iv, 1-5). (Comp. Cyril. Alex. Schol. 15; Glaphyra in Exod. ii. The explanation given by Cyril is, as might be expected, more mystical than that in the text. The rod was transformed into a serpent represents the Divine Word taking on himself the likeness of sinful flesh.) When he and Aaron were called to their great conflict with the perverted wisdom of Egypt, the many serpents of the magicians were overcome by the one serpent of the future high-priest. The conqueror and the conquered were alike in outward form (Exod. iv, 4-7).

2. The Destruction of the Object (2 Kings xviii, 4).—The next stage in the history of the brazen serpent shows how easily even a legitimate symbol, retained beyond its time, after it had done its work, might become the occasion of idolatry. It appears in the reign of Hezekiah as having been, for some undefined period, an object of worship. The zeal of the king was called upon to destroy it. It receives from him, or had borne before, the name Nehushtan (q. v.). We are left to conjecture when the worship began, or what was its locality. Ewald's conjecture (Geschicht, iv, 422) that this was the
serpent may have remained at Zalmonah, the object of occasional pilgrimages, is probable enough. It is hardly likely that it should have been tolerated by the reforming rod of kings like Asa and Jehoshaphat. It must be, we may believe, have received a fresh character and become more conspicuous in the period which preceded its destruction. All that we know of the reign of Ahaz makes it probable that it was under his auspices that it received a new development, that it thus became the object of a marked aversion to the iconoclastic party who were then in power. Intercourse with countries in which idolatry prevailed—Syria, Assyria, possibly Egypt also—acting on the feeling which led him to bring together the idolatries of all neighboring nations, might easily bring about this perversion of the reverence felt for the time-honored relic.

Here we might expect the history of the material object would cease, but the passion for relics has prevailed even against the history of the Bible. The Church of St. Ambrose at Milan has boasted for centuries of possessing the brazen serpent which Moses set up in the wilderness. The earlier history of the relic, so called, is matter for conjecture. Our knowledge of it begins in the year A.D. 971, when an envoy was sent by the Milanese to the court of the emperor John Zimises at Constantinople. He was taken through the imperial cabinet of treasures and invited to make his choice, and he chose this, which, the Greeks assured him, was the very one on which Christ was nailed (Sigonius, Hist. Regm. Ital. bk. vii.). On his return it was placed in the Church of St. Ambrose, and popularly identified with that which it professed to represent. It is, at least, a possible hypothesis that the Western Church has in this way been led to reverence what was originally the object of the worship of some Ophite sect.

3. The Apocryphal Notices of the Object.—When the material symbol had perished, its history began to suggest deeper thoughts to the minds of men. The writer of the book of Wisdom, in the elaborate contrast which he draws between true and false religions in their use of outward signs, sees in it a σύμβολον σωτηρίας, εἰς ἀνάμνησιν εἰνόλης νόμον σου, "he that himself was not saved by the thing that he saw (διὰ τὸ Σώματος σου), but by thee that art the Saviour of all" (Wisd. xvi, 6, 7). The Targum of Jonathan paraphrases it, "that he would lay his heart unto the Name of the Word of the Lord." Philo, with his characteristic taste for an ethical, mystical interpretation, represents the history as a parable of man's victory over his lower, sensuous nature. The metal, the symbol of permanence and strength, has changed the meaning of the symbol, and that which had before been the emblem of the will, yielding to and poisoned by the serpent pleasure, now represents σωφροσύνη, the ἀντίπαθες ἀκολούθια σάμαρου (De Agricult. The facts just stated may help us to enter into the bearing of the words of John iii, 14, 15. If the paraphrase of Jonathan represents, as it does, the current interpretation of the Targum, it is the duty of the teacher to whom the words were spoken could not have been ignorant of it. The new teacher carried the lesson a step further. He led him to identify the "Name of the Word of the Lord" with that of the Son of man. He prepared him to see in the lifting-up of the crucifixion that symbol which should answer in its power to heal and save to the serpent in the wilderness.

4. Our Lord's Allusion to the Object (John iii).—A full discussion of the typical meaning here unfolded belongs to exegesis rather than to a dictionary. It will be enough to note here that—which connects itself with facts or theories already mentioned. On the one side the termination has been extended to all the details. The pole on which the serpent was placed was not only a type of the cross, but was itself crucial in form (Just. Mart. Dial. c. Tryph. p. 322). The serpent was nailed to it as Christ was nailed. As the symbol of sin, it represented his being made sin for us. The very metal, like the fine brass of Rev. i, 15, was an emblem of the might and glory of the Son of Man (comp. Lampe, ad loc.). On the other, it has been observed (Patrick and Jackson, ut supra) that the serpent was from the beginning, and remains still, exclusively the symbol of evil; that the lifting-up of the Son of man answered to that of the serpent because on the cross the victory over the serpent was accomplished. The point of comparison between the two is therefore not that they were contemporaries, but between the look of the Israelite to the outward sign and the look of a justifying faith to the cross of Christ. It will not surprise us to find that in the spiritual, as in the historical interpretation, both theories have an element of truth. The serpent here also is primarily the emblem of the "glory of God" in the form of a god, a god of heaven, as Christ, but as the word of the Israelite to the outward sign and the look of a justifying faith to the cross of Christ. In the nature of the Son of Man it is once more in harmony with the divine will, and leaves the humanity pure and untainted. The crucifixion is the witness that the evil is not overthrown by the power of Christ. Those who are bitten by the serpent find their deliverance in looking to him who knew evil only by subduing it, and who is therefore mighty to save. Well would it have been for the Church of Christ if it had been content to rest in this truth. Its history shows how easy it was for the old perversion to reproduce itself. The highest of all symbols might fall into the hands of the heathen. It is possible even for the cross of Christ to pass into a Nestorian (comp. Sief, Worte des Lordes Jesus, on John iii, and Kurtz, Hist. of the Old Covenant [Eng. transl.], iii, 344-356).

What, then, are the particulars in which these acts in the Old and in the New Test. correspond; or what are the points of resemblance implied in our Lord's words—as and even so? In our answer we must avoid the error of trying to reckon up a number of these resemblances; and, indeed, we must look to essential correspondence, not to any fanciful likeness on the surface. This we must do in agreement with the principle that the relation is the same between the bitten Israelites and the serpent lifted up for them to look at as between perishing sinners and the crucified Saviour who is offered to them. There are three such correspondences: (1) There is "the serpent" which Moses lifted up in the wilderness (Deut. iv, 4, 5). This was the child of the cross, and gave rise to the due time on the cross. It is in stating this point of resemblance, however, that there have been most extravagant and error, which have disgusted some sober thinkers, and induced them to deny it altogether—a denial which we think unwarrantable, when we observe the manner in which the two objects are singled out and placed together. The reference is certainly not at all to heathenish notions of the serpent as possessed of a healing power. Nor even is it directly to the old serpent, on whom Christ has inflicted a fatal wound, and made a show of him openly, triumphing over him in his cross. It is better to say that the brazen serpent had the material form of the true serpent, because it wrought the mischief, yet but a serpent destitute of venom and impotent for evil; and that so God sent his Son in the likeness of sinful flesh, yet without sin. We prefer, however, to say that the brazen serpent seemed a most improbable means of curing the serpents' bites; and so he who was condemned and crucified as a malefactor seemed most unsuitable to save condemned and perishing men. (2) There is the lifting-up of the serpent upon the pole, no doubt in such a way as to render it conspicuous to the farthest extremities of the camp, which would be the more easily effected on account of its metallic brilliance. One who is the lifting-up of the Son of man, who says, "Look unto me and ye be saved, all the ends of the earth" (Isa. xiv, 22); as the apostle says to those who have heard the Gospel, "Before whose eyes Jesus Christ hath been evi-
dently set forth, crucified among you" (Gal. iii, 1). It is impossible to overlook this comparison, except by misrepresenting the celebrated Son of Man as if he must be lifted up;" though there is no room for mistake when we have our Lord’s own words, "And I, if I be lifted up from the earth, will draw all men unto me," by which phrase he signified the manner of his death, and was understood as doing so (John xii, 32-34). (3) There is the healing of the physical wound by the bodily eye looking to the serpent, and the corresponding spiritual healing by looking to the crucified Son of Man with the eye of faith—the natural life in the one case having that relation to the everlasting life in the other which the type always bears to the antitype.

Modern Oriental Serpent-charmers.

There can be no question at all of the remarkable power which from time immemorial has been exercised by certain people in the East over poisonous serpents. The art is most distinctly mentioned in the Bible [see Charm], and probably alluded to by St. James (iii, 7). The usual species operated upon, both in Africa and India, are the hooded snakes (Naja Tripudians, and Naja haje) and the horned crotaluses. The skill of the Italian maresi and the Libyan pegilli in taming serpents was celebrated throughout the world; and to this day, as we are told by Sir G. Wilkinson (Rawlinson, Herodotus, iii, 124, note, ed. 1862), the snake-players of the coast of Barbary are worthy successors of the pegilli (see Pliny, viii, 35; xii, 25; and especially Lucan’s account of the pegilli [Pharsal. ix, 892]). See numerous references cited by Bochart (Hieros. iii, 164, etc.) on the subject of serpent-taming. Multitudes of modern observers have described the practices of the snake-charmers in such terms as to leave no doubt of the fact. One instance may suffice for illustration. Mr. Gogerly, a missionary in India, says that some persons, being incredulous on the subject, after taking the most careful precautions against any trick or artifice being played, sent a charmer into the garden to prove his powers: "The man began to play upon his pipe, and, proceeding from one part of the garden to another for some minutes, stopped at a part of the wall much injured by age, and intimated that a serpent was within. He then played quicker, and his notes were louder, when almost immediately a large cobra-de-capello put forth its hooded head, and the man ran fearlessly to the spot, seized it by the throat, and drew it forth. He then approached the poison-fangs, and looked out; afterwards it was taken to the room where his baskets were left and deposited among the rest. . . . The snake-charmer," observes the same writer, "applied his pipe to his mouth and sends forth a few of his peculiar notes, and all the serpents stop as though enchanted; they then turn towards the musician, and approaching him within two feet, raise their heads from the ground, and, bending backward and forward, keep time with the tune. When he ceases playing, they drop their heads and remain quiet on the ground." That the charmers frequently, and perhaps generally, take the precaution of extracting the poison-fangs before the snakes are subjected to their skill there is much probability for supposing, but that this operation is not always attended to is clear from the testimony of Bruce and numerous other writers. "Some people," says the traveller just mentioned, "have doubted that it was a trick, and that the animals so handled had been first trained and then disarmed of their power of hurting, and, fond of the discovery, they have rested themselves upon it without experiment, in the face of all antiquity. But I will not hesitate to aver that I have seen at Cairo a man . . . who has taken a avarastes with his naked hand from a number of others lying at the bottom of the tub, has put it upon his bare head, covered it with the common red cap he wears, then taken it out, put it in his breast, and tied it about his neck like a necklace, after which it has been applied to a hen and bit it, which has died in a few minutes." Dr. Davy, in his Interior of Ceylon, speaking of the snake-charmers, says on this subject: "The ignorant vulgar believe that these men really possess a charm by which they thus play without dread, and with impunity, from danger. The more enlightened, laughing at this idea, consider the men impostors, and that in playing their tricks there is no danger to be avoided, it being removed by the abstraction of the poison-fangs. The enlightened in this instance are mistaken, and the vulgar are nearer the truth in their opinion. I have examined the snakes I have seen exhibited, and have found their poison-fangs in and uninjured. These men do possess a charm, though not a supernatural one, viz. that of confidence and courage. . . . They will play their tricks with any hooded snakes (Naja Tripudians), whether just taken or long in confinement, but with no other kind of poisonous snake." (See also Tarent, Ceylon, ed. 1, 190.) Some have supposed that the practice of taking out or breaking off the poison-fangs is alluded to in Psa. livii, 6, "Break their teeth, O God, in their mouth." The ser-
out, they marched around it chanting their charms, the "mystic sound" of which chased the serpents far afield—poisoned arrows and darts, heaps of flames, fires, of different kinds of wood, beyond the farthest tents, the smell of which prevented the serpents from approaching. Thus the camp was protected during the night. But if any soldier, when abroad in the daytime, happened to be bitten, the Psylli exerted their powers to effect a cure. First they rubbed the wound with the urine of a dog, as they said, the poison from spreading while they assayed their arts to extract it (Pharsalia, ix). See Exchaintmont.

In this account we find the voice repeatedly mentioned; and it is to the "voice of the charmer" that the Psalmist refers. We may suppose that, in the passage we have quoted, the charmers use a form of words—a charm—or else chanted a song in some peculiar manner. So Eusebius, in mentioning that the Egyptians abounded in serpent-charmers in his time, says that they usually employed a verbal charm. This is still one of the processes of the Oriental serpent-charmers. Roberts says that the following is considered in India the most potent form of words against serpents: "Oh, serpent! thou who art coiled in my path, get out of my way: for around thee are the moungete, the porcupine, and the kite in his circle is ready to take thee!" The Egyptian serpent-charmer also employs vocal exercises, not to draw the venomous creatures from their retreats. Mr. Lane says, "He assumes an air of mystery, strikes the walls with a short palm-stick, whispers, makes a clucking noise with his tongue, and spits upon the ground; and generally says, 'I adjure you by God, if ye be above, or if ye be below, that ye come forth; I adjure ye by the most great name, if ye be obedient, come forth; and if ye be disobedient, die! die! die!"' (Modern Egyptians, ii, 104). See Adder.

With regard to the manipulation of serpents by the Egyptian magicians (Exod. iv), we may remark that in modern times the psylli, or charmers, by a particular pressure on the neck of the cobra or haje, have the power of rendering the inflation of the animal—which is a character of the genus—so intense that the serpent becomes rigid, and can be held out horizontally as if it were a rod. This practice explains what the soothsayers of Pharaoh could perform. It is probable that the most common species of serpents was the rod. The Hebrews knew the species; for although the text (Exod. iv, 3) uses, for the rod of Aaron converted into a serpent, the word שパイ, makhesh, and subsequently (vii, 15) מ信息发布, tamin, it is plain that, in the second passage, the word indicates "monstrous," as applied to the makhesh just named—the first being an appellative, the second an epithet. That the rods of the magicians of Pharaoh were of the same external character is evident from no different denomination being given to them; therefore we may infer that they used a real serpent as a rod—viz., the rod of Aaron transformed into a haje—for their imposture, since they no doubt did what the present serpent-charmers perform with the same species by means of the temporary asphyxiation, or suspension of vitality, before noticed, and producing restoration to active life by liberating or throwing down. Thus we have the miraculous character of the prophet's mission shown by his real rod becoming a serpent, and the magicians' real serpents merely assuming the form of rods; and when both were opposed, in a state of animated existence, by the rod devouring the living animals, confounding the great typical personification of the protecting divinity of Egypt. See Serpent.

Serpent-worship. The extent to which this species of idolatry has prevailed is very remarkable. From the fact that Satan assumed the form of a serpent, in his temptation of our first parents, it has been adopted as the symbol of Typhon, or the evil deity of the ancients, Egypt, and Assyrian languages. Such is the spirit of evil in the hieroglyphics of the Chinese and Mexicans. The serpent whose head the Messiah was to crush was transformed, in heathen fable, into the hydra which Hercules vanquished, and in India into that over which Krishna triumphed; into Horus in Egypt, Siegfried among the Germans, and Crac in Poland. We have also the eventful Python slain by Apollo, and the hundred-headed snake destroyed by Jupiter. The serpent was anciently worshipped in Chaldea and in several other nations of the East. Servius tells us that the ancient Egyptians called serpents good deities. The asp was the emblem of the goddess Rano, and was supposed to protect houses, or the building of them, as well as the infancy of a royal child. This serpent was called Thermuthis, and with it the statues of Isis were crowned as with a diadem. The snake Bai also appears to have figured as a goddess; and another snake-headed goddess had the name of Hoh or Hih. The Typhon of the Egyptians had the upper part of his person decorated with a hundred heads like those of a serpent or dragon.

In the religions of all the Asiatic nations the serpent is regarded as a wicked being who brought evil into the world. As such it became, in course of time, an object of religious worship in almost every part of heathendom, from the western shores of the Pacific to the avert evil than to express reverence or gratitude. The Hindo serpent is the type and emblem of the evil principle in nature; and as such we see it wrestling with the goddess Parvati, or writhing under the victorious foot of Krishna, when he saves from its corrupting breath the herds that pasture near the waters of the Yamuna. "As a further illustration of this view, it is contended that many Hindús, who feel themselves constrained to pay religious worship to the serpent, regard it, notwithstanding, as a hideous reptile, whose approach inspires them with a secret awe and insurmountable horror." In the symbolic language of antiquity the serpent occupies a conspicuous place. In Gen. iii, i, we are told that "the serpent was more subtle than any beast of the field which the Lord God had made." In consonance with this view the Chinese regard Long, or the winged dragon, as the being who excels in intelligence. The supernatural power of the serpents was adored under the form of a serpent or dragon; hence the Apocryphal book Bel and the Dragon. To represent the Almighty upholding the world by his powerful Word, the Hindús describe it as resting upon a serpent which bites its own tail; and the Phoenicians entwine the folds of a serpent around the cosmic egg. On the Egyptian monuments Kneph is seen as a serpent carried upon two legs of a man, or a serpent with a lion's head. The Siamese, while they are afraid of venomous serpents, never dare to injure them; but, on the contrary, they consider it a lucky omen to have them in or near their houses. Among the Chinese the serpent is considered a symbolic monster, dwelling in spring above the clouds to give rain, and in autumn under the waters.

Among the North American Indians the serpent was formerly held in great veneration; the Mohicans paying the highest respect to the rattlesnake, which they called their grandfather. Many primitive nations, however, looked upon the serpent as the symbol of the evil principle. Among the idolatrous nations who descended from Ham this species of idolatry was universally practiced, and has sometimes been alleged to have been the most prevalent kind of worship in the aneditridian world. See Ferguson, Tree and Serpent Worship (Lond. 1869). See also Serpent.

Serrad, Giovanni Andrea, an Italian prelate, was born at Castel Monardo (now Filadelfia), Feb. 4, 1731, and studied for the priesthood twelve years at Rome under the best teachers. He reorganized the Seminary of Tropea in 1739, and then went to Naples in connec-
tion with marquis Friggiani, whose life he wrote, and also with abbe Genovesi, who procured him the chair of history in the Royal University, and afterwards that of theology in the College of the Saviour (1768).

He was appointed bishop of Potenza in 1782, but was not consecrated till a year later, owing to some technical opposition. At the reorganization of the Royal Academy of Naples in 1778, he was chosen secretary. He was massacred Feb. 24, 1799, during the revolution which followed the French army.

He wrote several works on local ecclesiastical history, in Latin and Italian, for which see Hoefer, Nouv. Biog. Générale, s. v. 

SERRES (Lat. Servans), JEAN DE, a French Protestant historian and theologian, was born at Villeneuve de Berg about 1540, and educated at Lausanne, especially in ancient languages and philosophy. He early distinguished himself by his learned historical writings. In 1578 he was called to Nismes as rector of the academy and principal of the College of Arts. He was very active and conspicuous in the ecclesiastical affairs of the times, especially by his writings and the part he took in public religious bodies. He died at Geneva, May 31, 1598. For his extensive works, chiefly embracing Church history and polity, see Hoefer, Nouv. Biog. Générale, s. v.

SERUY, FRANÇOIS JACQUES HYACINTHE, a French theologian, was born at Toulon in 1658. He early entered the Order of St. Dominic, and was sent to Paris for theology, where he applied himself to philosophy and began preaching. In 1690 he went to Rome, and became theologian to cardinal Altieri, and was engaged on the Index. He returned to Paris in 1696, and the next year took the degree of doctor, and was called as professor of theology to Pauza, where he died, March 12, 1728. His works on ecclesiastical history and theology are enumerated in Hoefer, Nouv. Biog. Générale, s. v. Among them are, De Christo ejusque Virgine Matre (Venice, 1719): — Historia Congregationum de Aux. Div. Grot. sub Summis Pontiff. Chem. VII et Paulo V (in 4 liber, distributa, Louvain, 1700; Antv. 1709, fol.).

See Fürst, Bibl. Jud. iii, 317; Winer, Handbuch der theologischen Literatur.

SERUG (Heb. Serug, סֶרּוּג, branch [Gesen.]), or strength [Fürst]; Sept. Σαραχθα; New Test. Σαρακθα; "Sarach," Luke iii, 35; Josephus Σαραγχα. [Ant. i, 6, 5,9], one of the postdiluvial patriarchs, being the son of Reu, and the father of Nahor the grandfather of Abraham (Gen. xi, 31; xxi, 31). His age is given in the Hebrew Bible, at the above passages, as 230 years—thirty years before he begat Nahor and two hundred years afterwards. But in the Sept. 130 years are assigned to him before he begat Nahor (making his total age 350), being one of its systematic variations in the ages of the patriarchs between Shem and Terah. See CHRONOLOGY. Bochart (Phaleg, II, xxvii) conjectures that the town of Serug, a day's journey from Charrre, in Mesopotamia, was named from this patriarch. Suidas and others ascribe to him the deification of dead benefactors of mankind. Epiphanius (Ad. hirc. i, 6, 2) says "the name signified his innovation," which states that, though in his time idolatry took its rise, yet it was confined to pictures: and that the deification of dead men, as well as the making of idols, was subsequent. He characterizes the religion of mankind up to Serug's days as Scythic; after Serug and the building of the Tower of Babel, the Hellenic or Greek form of religion was introduced, and continued to the writer's time (see Petavius, Anim. adv. Eph. Oper. ii, 13).

The account given by John of Antioch is as follows: Serug, of the race of Japheth, taught the duty of honoring eminent deceased men, either by images or statues (καὶ των σάμων καὶ των ταφων), which, however, may here be used of pictures, especially in the universality as if still living, of preserving a record of their actions in the sacred books of the priests, and of calling them gods as being benefactors of mankind. Hence arose polytheism and idolatry (see Frugm. Historiam. Grac. iv, 945, and note). It is in accordance with his being called of the race of Japheth that Epiphanius sends Phaleg and Reu to Thrace (Epist. ad Descri. Paul. ii, 3).—Smith.

There is, of course, little or no historical value in any of these statements, beyond the fact that the charge of độcracy and idolatry was made not only against the fathers of the Euphrates in Josh. xxii, 4.

SERUK MENACHEM. See SARUK.

SERUMMER, in Norse mythology, was the beautiful hall in Freya's dwelling of Folkvang, where she gathered about herself, in the service of love and for the enjoyment of all the pleasures of life, half the heroes of the earth. In the abode of all the Einheria is either here or in the hall of Balder, Wotan's, Odin's. Men. a. v.

Servant (usually בָּנוֹ, בָּנוֹת, בָּנוֹת, אֲדֻמִי, אֲדָמִית, which are invariably rendered thus in the A. V. or else "bondman," but "servant" is occasionally the rendering of בָּנוֹ, בָּנוֹת, properly a lad or "young man," or בָּנוֹת, meshearith [Exod. xxxiii, 11; Num. xi, 28; 2 Sam. xxiii, 17, 18; Prov. xxv, 12], a minister, as elsewhere rendered; Gr. in like manner sometimes παις, ἱκανος, etc.).

See Exod. The Hebrew terms נַדַּר and meshearith, which alone answer to our "servant," in so far as this implies the notions of liberty and voluntariness, are of comparatively rare occurrence in other languages, but, as the term נַדַּר, which is common in the A. V., properly means a slave. In many passages the correct reading would add considerable force to the meaning—e.g. in Gen. ix, 25, "Cursed be Canaan; a slave of slaves shall he be unto his brethren;" in Deut. xvi, 15, "Remember that thou wast a slave in the land of Egypt;" in Job iii, 19, "The slave is free from his master;" and particularly in passages where the speaker uses the term himself, as in Gen. xviii, 3, "Pass not away, I pray thee, from thy slave." Slavery was, in point of fact, the normal condition of the underling in the Hebrew commonwealth, while the terms above given refer to the exceptional cases of young or confidential attendants. Joshua, for instance, is described as at once the נַדַּר and meshearith of Moses (Exod. xxxiii, 11); Elisha's servant sometimes as the former (2 Kings iv, 12; 19, 20), sometimes as the latter (iv, 43; vi, 15). Amnon's servant was a meshearith (2 Sam. xii, 17, 18). In Amos iv, 10, Meshearith was a synonym for the sons of Bilhah (Gen. xxxvii, 2, where instead of "the lad was with," we should read he was the servant-boy to the sons of Bilhah). The confidential designation mese- reath is applied to the priests and Levites in their relation to Jehovah (Ezra viii, 17; Isa. lx, 6; Ezek. xxiv, 11), and to the cognate verb to Joseph after he found favor with Potiphar (Gen. xxxvii, 4), and to Joseph's fellow servant in Ahabiah (2 Chron. xxii, 8). In 1 Kings xx, 14, 15, we should substitute "servants" (נַדַּר for "young men." See HIRLING; SLAVE.

SERVANT OF JEHOVAH (תָּנוֹ, תָּנוֹת, נַדַּר τοῦ קָרְיָא, servant of the Lord, also in the phrase "my servant," etc.), a term used typically in several senses. 1. A worshipper of God (Neh. i, 10); so the Israelites in general (Ezra vii, 11), and Daniel in particular (Dan. vii, 21). In this sense it is also applied as an epithet to the Messiah, e. g. to Abraham (Ps. cxv, 6, 42), Joshua (John xvii, 29; Judg. ii, 8), Job (Job i, 8, etc.), David (Ps. cxvii, 1, etc.), Eliasim (Isa. xxii, 20), Zerubbabel (Hag. ii, 24), and to saints in general (Ps. xxxiv, 23, etc.; Isa. liv, 17, etc.). See SAINT. 2. A. B. L. The term "Ballsassor of God" and called and sent to perform any service (Isa. xlix, 6), e. g. Nebuchadnezzar, whom God used as his instrument in chastising his people (Jer. xxvii, 6; xiii, 10); but usually some favorite servant, as the angels (Job iv, 18), or prophets (Amos iii, 7; Jer. vii, 25, etc.; Dan. ix, 6; Ezra ix, 1), and even the Messiah (Isa. i, 18, 15; Ps. cxv, 26), and Isaiah (Isa. xx, 3). Sometimes the two ideas of a pious worshipper of God and a special messen-
Servator. See Slavics.

Servetus, in Roman mythology, was a surname of Jupiter, signifying the preserver.

Servant, one who assists the priest at the celebration of the holy eucharist by lighting the altar-tapers, arranging the books, bringing bread, wine, and water for the sacrifice, and by making the appointed responses in the name and behalf of the assembled congregation, was sometimes called "adulator." The Cluniacans allowed one of the Servants, in obedience to pope Soter's injunction and the plural wording of the Dominus vobiscum, required always two.

Servetus, Michael (Serveto, surnamed Renes, known in France as Michel de Villemeuve), unquestionably the leading Antitrinitarian in the period of the Reformation, was born at Villaneuve, in Arragon, in 1539 or 1541, and belonged to an ancient Christian family of prominence, perhaps of noble rank. His father was a jurist and notary, and Michael was sent at an early age to Toulouse in preparation for a similar career; but his impetuous and imaginative spirit was not attracted by the dry study of jurisprudence, and turned with preference towards theological investigations, prompted, perhaps, by the fact that at Toulouse he first became acquainted with the Bible. The above statements are taken from his own testimony at the Geneva trial, and are probably truthful in the main; but it is difficult to harmonize them with his declarations at Varenna, to the Lord Janet, in 1556 [see below]; Stevin, the father Quintana, the confessor of Charles V, at the early age of perhaps fourteen or fifteen years, and with his master accompanied the court to Italy on the occasion of the emperor's coronation at Bologna, and to Germany on its return. The further statement that he remained with Quintana in Germany until the death of the latter in 1552 is known to be positively untrue, since he was at Basle, and alone, by the close of the summer of 1550; and the Geneva testimony recites that he came to Basle direct from Toulouse, by way of Lyons and Geneva, without referring in any way to travels in Italy or Germany.

When Servetus came to Basle he was without experience in the Christian life, and his moral consciousness was undeveloped. Religion was not to him an answer to the questionings of the human heart—a dissolving of doubts in the field of morals, a deliverance from internal conflicts. The unmistakably speculative tendency of his mind led him to conceive of Christianity as being itself the sum of the doctrine, and he had already developed a scheme in which the doctrines of God and of his manifestation in Christ, in their speculative aspects, were regarded as constituting its essential basis. The object of his visit was to find a publisher for the book in which he had embodied his views, and to secure for it full regard on the part of the Swiss, in behalf of the modifications he proposed to introduce into the teaching of the Reformation. (Caleamplados), however, found his statements of doctrinal views ob-
project to its conclusion. The rashness and almost fanatical tenacity of his natural temper are well illustrated in the narrative; for the method by which it was accomplished serves to show with equal clearness that he was not above the use of caution, artifice, and even duplicity, when needed to secure himself against the consequences of his action. The bookseller Arnoulet, of Vienne, was secured by the use of money and the false assurances of a friend; that done, the manuscript was conveyed pri-

ously to Lyons, Chartillon, Geneva, and Frankfurt, without the knowledge of persons resident in Vienne. It appeared early in 1553, and bore the name Christianisæ Restitutio; etc. The author's name is indicated at the end by the letters "M. S. 7." and the name of the publisher and the place of printing are not given.

This most extensive of the works of Servetus (734 pp.

svs) presents no thorough elaboration and systematic statement of his ideas, but consists rather of a series of disconnected papers, some of them new and others emendations of earlier productions from his pen. It contains seven books De Trinitate Divina; three books De Fide et Justitia Regni Christi, et de Caritate; five books De Regeneratione et Manuductione Superba et de Regno Antichristi; Epistula Triginta ad Jo. Calvinum; Signa Sensus Regni Antichristi et Revelatiæ Divinae Gratiae et de Mysterio Trinitatis et Veterum Disciplina ad Ph. Melanchthonem, etc., Apologia. The attitude of the author towards the dogmas of God, the Father, Son, and Spirit, as held by the Church, is that of uncompromising hostility. He regards it as of necessity involving tritheism and poly-
themias, and even atheism; or, on the other hand, as inconceivable; and he finds it significant that this doc-
trine began to prevail at the very time from which the Church must date its growing degeneracy. But, while rejecting a trinity of essence in the Godhead, he insists on a trinity of manifestation; the fundamental principle that God is one and undivided leads to a second prin-
ciple—namely, that everything which comes to pass in or with the divine nature is but a disposition, which does not affect the divine essence, but must be regarded some-
what as one of its accidents. God is able to dispose and manifest himself because he is not an abstract un

iverse mathematical point, but rather an infinite Spirit, and in the process, all forms are given, and he is in them, and bears them within itself. His manifestation of him-

self results from the act of his will, rather than from any necessity lying in his nature, and takes place because without such revelation of himself he could not be known by his creatures. The mode of manifestation is likewise without limit, for the Spirit, within the bounds of Christ, to the soul of Christ on his becoming incarnate, the two constituting but a single and indivisible substance; but the soul included corruptible elements of blood and created light down to the experience of the resurrection. In that experience he was, so to speak, born again; the creature was renewed, the corruptible elements were wholly absorbed into the Spirit of God, and the result-

ant combination forms the true Holy Spirit, the principle of all regeneration, which proceeds from the mouth of Christ. In this way the real Trinity is constituted—a trinity not of things or so-called persons in the divine essence, but a threefold manifestation of himself by the one and indivisible God.

Such was the teaching which Servetus presented to the world as the restored truth of Christianity. He was incapable, from the tendency of his mind, of admitting the importance of the element of practical ethics in the scheme of Christianity, and regarded the latter as to be eminently a system of doctrine. He speaks constantly of the person of Christ, but rarely of his work of redemption.

Faith is represented as the central and fundamental element, but rather in the character of apprehension and assent than of trust. The ideas of sin and guilt are scarcely recognised, and are confined to wicked actions; and the guilt of the natural man is of such a nature as not to be unto death in the case of persons under twenty years of age. The baptism of children is accordingly condemned, and is even characterized as being a principal source of the corruption of the Church. Baptism should not be conferred until persons have reached the age of
thirty years, and have been prepared by preaching, careful instruction, repentance, and faith. The Lord's supper serves the same essential purpose, to which it was instituted, as the Eucharist; and as the new man will at once require sustenance. Good works and holy living do not necessarily spring from faith, but they are not beyond the ability of mankind, even in the heathen state. By them a higher degree of blessedness may be attained, and they are useful to themselves and others. But the guises of our forefathers were gone, and the business of the flesh; for which reason such works as will subdue the flesh are recommended, and such others as will satisfy the claims of justice (prayer, almsgiving, voluntary confession, etc.) so far as to wholly or partially deliver from the purgatorial fires which await even the faithful and the baptized in the region of the dead.

The first intention of Servetus was to escape into Spain, but he soon turned towards Switzerland in the hope of being ultimately able to reach Naples. He arrived at Geneva in the middle of July, and remained about a month in the public hoselry, where Calvin learned of his presence and caused him to be apprehended (Aug. 18). As the laws required that a civilian should appear as the accuser, Nicholas de la Fontaine, Calvin's pupil and amanuensis, acted in that relation, and charged Servetus with having disseminated grossly erroneous teachings, on account of which he had already been imprisoned and was now a fugitive. Thirty-eight articles were attached to this charge, which had been drawn up by Calvin, and to which the accused was required to render categorical answers. Servetus bore himself quietly, and answered with considerable frankness, but the council nevertheless ordered the case to proceed to trial. In a subsequent examination, the accusers produced 2000 depositions of convictions, and claimed the privilege of publicity and in the Church convincing Calvin, in whom he recognised his principal antagonist, that such doctrines were unscriptural and erroneous. The action of Philibert Bertheilier, a declared enemy to Calvin and leader of the libertine party, who openly sought to protect Servetus and to guide the reformer to declare himself the real accuser, and he was accordingly admitted to the sessions of the court and allowed to take part in the proceedings. The presence of Calvin, and his own confidence in the protection of powerful supporters, influenced Servetus to display more arrogance in his replies, until in the heat of argument he gave utterance to strong and unconvincingly polemical assertions. It now appeared that his guilt in the principal matter was proved, and the determination of his punishment alone remained to be settled. The procurator-general (Aug. 23) brought forward thirty new questions relating to the circumstances of the prisoner's life, his designs, and his intercourse with other theologians, and the warnings he had received from them, to which Servetus responded with greater moderation, though not without doing violence to the truth. He also petitioned that he might be discharged from trial under criminal process, since such action had never before occurred in matters concerning the faith before the time of Count Zwing, and was the more unreasonable in his case, as his views had been made known to a few scholars only, and he had nothing in common with the rebellious Anabaptists; and he requested, further, that he be furnished with legal counsel as especially necessary to a stranger in his situation. His petition was denied on the recommendation of the procurator-general, who was of opinion that it would be insufficient; but his earlier request for a discussion with Calvin was granted, with the modification that it should take place before the council rather than in the Church. Servetus, however, suddenly changed his tactics, and instead of entering on a discussion with Calvin at their meeting on Sept. 3, he demanded to depart to draw up the competency of civil tribunals to deal with questions of faith; and on the ground that the Church of Geneva could not impartially determine in matters at issue between Calvin and himself, he appealed to the judgment of the churches in other places. As this appeal corresponded with a resolution already reached in the council, it was entertained, and the matter referred to the authorities of the evangelical cities of Switzerland; and it was determined that all further transactions should be conducted in writing and in the Latin language. Calvin accordingly extracted from the works of Servetus their most hurtful teachings, and submitted them, accompanied with remarks intended to show their blasphemous and dangerous character, on Sept. 5. Servetus responded with complaints about the treatment he was obliged to undergo, and appealed from the smaller council to the Council of the Two Hundred, many of whose members, as he knew, were hostile to Calvin; but finding it necessary to refute Calvin's allusions to his personal use of violent attacks and reproachings against his opponent, while at the same time presenting more clearly, and with less dissimulation than before, the meaning and tendencies of his views. A comprehensive reply by Calvin and his colleagues was met with further insult, though a private communication intended to instruct the former in certain principles of philosophy and other matters was written in a spirit of greater moderation. A messenger from the council conveyed the writings exchanged between the respective parties, and a copy of the principal work written by Servetus to the councilors and the clergy of Zurich, Berne, Basel, and Schaffhausen. Calvin did not neglect to influence his friends by means of his private correspondence in the endeavor to secure an approval of his course; and Servetus, in the meantime, directed a complaint against Calvin as a false accuser, and demanded that he should be imprisoned and tried, the prosecution to continue until the councilors should sentence him to suffer death or some other punishment.

The opinions of the cities had all been received by Oct. 22, and were unanimous in condemning the false teachings of Servetus as not to be tolerated in the Church. The Council of Berne especially urged the use of severe punishment if the introduction of such errors, while the clergy of that city sought to moderate the force of that recommendation by a warning against indiscretion. Calvin and his associates were decidedly of the opinion that the penalty of death should be inflicted on the accused, and so expressed themselves, though averse to death by fire as involving unnecessary cruelty. When the council met to determine the penalty to be imposed (Oct. 23), opinions were divided, and several councilors were absent. A recess was therefore taken until Oct. 26. The synod A. Perrin, a zealous opponent of Calvin, then proposed, first, an acquittal of the accused, and afterwards a reference of the matter to the Council of the Twelve, but in each case without success. The sentence of death by fire was pronounced in conformity with the laws of the empire. The condemned man was profoundly moved, and pleaded earnestly for mercy, but he could not be persuaded to recant. He died Oct. 27, 1553, without having changed his views in any important particular, but without exhibiting the marks of a Christian spirit.

It is not possible to regard the character of Servetus as favorably as it has been described by the opponents of Calvin. He was not pure and great, and though he
ultimately died for his convictions, he was by no means a martyr for the truth. He concealed his beliefs and attended mass in France during more than twenty years at a time when multitudes chose death or the loss of country and prospects rather than deny their faith. He availed himself unhesitatingly of falsehood and perjury, especially in the trial at Vienne. He con-
tained a high degree of conscientiousness. As a thinker, he was noticeable for originality and ingenuity, for speculative depth and a wealth of ideas, though the very number of ideas prevented him from presenting them with adequate clearness. His theological and christological system rested to a much greater extent on the speculations of his own imagination than on the conclusions of the general church of Christendom or the theories in natural philosophy, and to a much smaller extent upon the Bible. His one-sided intellectualism, finally, afforded no satisfaction to the religious sense in man, while his strongly pantheistic leanings and his irreverent polemics necessarily offended the religious consciousness. His pyre unfortunately did more to enlighten the world than all his books. His teachings were scarcely understood until the most recent times. His so-called followers, the later Antitrinitarians, failed to comprehend either their organic unity or their ful-
ness and depth, and, while they appropriated surface ideas, were unable to appreciate what is really speculative. They were indeed able to sectionalize, for example, to sensualize the twofold manifestation of God into an es-
setation of subordinate deities, and Socinus deprives the real Sonship and Deity of Christ as taught by Ser-
ventus until nothing beyond his essential manhood rem-
ants. The course pursued by Calvin in the trial of Servetus has been the subject of incessant dispute from his own day until now. His contemporaries already condemned his action, though the most eminent orthodox thinkers and theologians approved his course; and though the argument has been renewed as often as occasion offered, the Christian world is not yet able to agree upon a judge-
ment which shall afford universal satisfaction. The facts upon which a decision must be based are as fol-
lows:

1. Calvin was thoroughly convinced that the welfare of the Church demanded the death of Servetus as an incorrigible heretic, and never hesitated to acknowledge that conviction. When Servetus requested that Calvin should protect him during a proposed journey to France, the latter refused, and wrote to Farel, under date of Feb. 7, 1546, "If I [Servetus] should come hither, I will not permit him to escape with his life, if my au-
thority has any weight" (Henry, "Léon Calvin," iii, 60, appendix). His views upon the subject never changed from his first to his last; while the former trial was in progress, e.g. the letter of Sept. 14, 1553 (Ét. et Resp. fol. 127), in which Bullinger urges Calvin not to leave Geneva even though Servetus should not be punished with death. The absence of such facts from the records of the trial is sufficiently explained by the consideration that they were not matter for public record; and the Fideles Expositio Errorem M. Serveti, etc., written to explain his conduct in that unhappy business, does not justify the argument sometimes based on it to show that Calvin did not desire the death of Servetus, since the book was intended to show, first, that incorrigible heretics ought to be punished by the secular arm; and, second, that Servetus was such a heretic.

2. In obedience to such convictions, Calvin caused the imprisonment of Servetus as soon as he learned that the latter was in Geneva, and personally directed the prosecution of the trial. Both statements rest on his own repeated acknowledgments in letters to his friends, and in his Refutatio, and are substantiated by the pub-
lic records.

3. While Calvin wished Servetus to die, he did not favor his being burned at the stake (comp. the letter to Farel of Aug. 26, 1553 [Ét. et Resp. fol. 114]), and Beza, (John, Calv., Vitae).
of the principality raised to 18,687 square miles, with a population of 1,720,000 inhabitants. The country is mountainous and densely wooded. From the interior numerous chains proceed northward, forming massive barriers both on the eastern and western frontiers, and sloping pretty steeply towards the swamps plains along the Save and the Zambezi. The principal towns are Morava and Timok, affluents of the Danube, and the Kolubara, an affluent of the Save, which itself falls into the Danube at Belgrade. The principal towns are Belgrade (the capital), Krugovatz, Semendria, Uzhitza, and Shabatz, and in the new districts Nish and Vranja. The climate is warm and humid in the lower, but somewhat colder in the higher regions. The soil in the valleys is fertile, and cereals are raised in abundance. The mountains are believed to be rich in valuable minerals, but mining is almost unknown, and manufacturing industry is in the most backward condition. There is no nobility, and the peasants are free householders.

II. Church History. — The original inhabitants of Serbia were principally Thracians. Conquered, shortly before Christ, by the Romans, it formed part of Illyricum, under the name of Moesia Superior. Overrun by the Huns, Ostrogoths, Longobards, etc., it came under Byzantine rule about the middle of the 6th century; but was wrested from the empire by the Avars in 576. These latter were driven out by the Serbs, then living north of the Carpathians, who themselves spread over the country in great numbers. About the middle of the 9th century they were converted to Christianity by missionaries sent by the emperor Basil. For about 200 years they were almost constantly at war with the neighboring Bulgarians, but in 1043 Stephen Bogislas broke their power. His son Michael (1050–80) took the title of king, and was recognised as such by pope Gregory VII. A struggle of nearly a hundred years resulted in the maintenance of their independence, and in 1165 Stephen Nemanka secured a firman from the patriarch of Constantinople for two centuries. During this period the kingdom attained the acme of its power and prosperity, embracing, under Stephen Danush (1358–56), the whole of Macedonia, Albania, Thessaly, Northern Greece, and Bulgaria. At the request of king Stephen II, son of Stephen Nemanka, the bishops of Serbia were in 1221 authorized by the patriarch of Constantinople to elect their metropolitan on condition that he be confirmed by the patriarch. The brother of the king, St. Sabas, became the first archbishop of Uzhitza and all Servia. Stephen Danush, in 1351, convoked the synod at Seres, which raised the metropolitan of Servia to the dignity of patriarch. Sabas, the first patriarch of Servia, died in 1354; and the patriarchate was restored to Constantinople. The jurisdiction of the Servian patriarch extended not only over Servia and Bulgaria, but also over a large portion of Macedonia. He had his residence near Ipek, at the termination of the Streja Gora Mountains in Albania. In consequence of this measure, the patriarch of Constantinople pronounced the anathema against the Servian patriarch, but this was revoked in 1379. The progress of the Turkish arms proved fatal to the welfare of Serbia. In 1389 Lazarus I was defeated at Kossovoj, and his son and successor, Stephen, became a vassal of the Ottoman Sultan. In 1395 the Ottoman Sultan granted Servia with Turkey, excepting Belgrade, which was held by the Hungarians until 1521. By the treaty of Passarowitz (1718) a considerable portion of the country was made over to Austria, but in 1739 it reverted to Turkey. During all this time the Turkish government had allowed the country to continue to existence when, in 1589, patriarch Arsenius III, after the failure of the Servian insurrection which the Austrians had instigated against Turkish rule, had emigrated with 37,000 Servian families to Austrian territory, the patriarchate of Ipek was not interfered with, but the appointment was always conferred upon a Greek, who purchased the position from the Ottoman Sultan. In 1765 (according to another statement in 1769) this patriarchate was abolished and united with that of Constantinople. The last patriarch (Basil) fled to Russia, where he died, in St. Petersburg. Four metropolitans, generally Greeks, were now appointed for Servia, the sees of whom were Belgrade, Nish, Uzhitza, and Novi-Bazari, and none of whom had a suffragan. After sixty years of oppression, the people revolted. The prince Palko, under the protection of the assistance of Russia, triumphed, and Czerny was elected by the people prince of Servia. Deserted by Russia and France, the Turks again became masters of the country (1813). But two years after, under Mihal Orosmovitch, the people won back their liberties. Milosh was chosen prince of Servia (1817) and was subsequently recognised by the sultan. After the election of Czerny, the metropolitan of Carlovitz, in Austria, had been recognised as the head of the Servian Church; but in 1830 Milosh again appointed a metropolitan for Servia. In 1834 Turkey restored six Servian districts which she had retained since 1815, and in the spring of 1872 relinquished a few additional localities, though not all that had been annexed as her own. The seat of the legislature, which had always been at Krugovetz, was removed to Belgrade in October, 1875.

III. Religion, etc. — The inhabitants nearly all belong to the Greek Church, but are independent of the patriarc of Constantinople.

The hierarchy of the Church of Servia consists at present (1879) of a metropolitan and five bishops. The metropolitan is elected by the prince and the Servian bishops. He resides at Belgrade, and, according to the regulations of 1698, is assisted in the government of the Church by a titular bishop and several preachers and presbyters. The titular bishop and the other diocesan bishops constitute, at the same time, the Synod of the Metropolitan, to which are referred marriage affairs, as well as all complaints of the administration and government of the Church by the metropolitan. The metropolitan has authority over the episcopates, the consecration of churches, etc., and a fixed annual income of 6000 florins (about $2400). He also possesses some real estate, especially vineyards near Semendria. The bishops are elected by the people, under the superintendence and guidance of the minister of justice, and ordained by the metropolitan. They have an unlimited jurisdiction in all matters purely ecclesiastical. All churches and ecclesiastical institutions are under the superintendence of the minister of justice, who makes the necessary arrangements conjointly with the elders of the Church. Servia has now five diocesan bishops, namely, the bishop of Shabatz, the bishop of Uzhitza (who resides at Karonovatz), the bishop of Negotin, and in the districts annexed in 1878 to Servia the bishops of Nish and Vranja. Each of them has a fixed income of 4000 florins (about $1600). He also receives fees for ordinations, consecration, and other ecclesiastical functions. In regard to fees for burials, the bishop has to come to an understanding with the family of the deceased. All other fees were abolished in 1822, although voluntary gifts are still frequently made and accepted. The bishops have to pay from their income their archdeacons and secretaries. The secular clergy number about nine hundred members. The clergymen in the larger places are fixed on by the government, while those at the rural districts only receive fees. Every parish priest is obliged to keep accurate lists of births, marriages, and deaths.

Servia has many convents, most of which, however, have only a small number of inmates. Many of the convents have wholly abandoned; others are hermitages, near which lodging-houses are kept up at the time of pilgrimages. The convent Sweti Krail (holv king) at Studenica contains the bones of king Stephen Nemanka, by whom it was founded, and who in 1200 died as monk of one of the convents on Mount Athos. His son Raksha, better known in Servian history as St. Sabas the Goth, was elected to the diocese of Uzhitza; when, transferred the bones of his father in 1208 to the Convent of IX. — P.R.
Studentiza, which after the cloister name of king Stephen is sometimes called the Laura of St. Simon. A Roman Catholic bishopric was established by pope Innocent X in 1644 at Belgrade. In 1728 the see was transferred from Belgrade to Semendria, and the name of the diocese is now Belgrade and Semendria. The bishop is a suffragan of the archbishop of Antivari, in Albania. The number of Roman Catholics is small. In 1861 some accounts claimed a population of 30,000, but the Roman statistician Petri (Prospetto della Gerarchia Episcopale (Rome, 1850)) says nothing of the Roman Catholic population of the diocese. The official statistical book of Belgrade gives the number of Roman Catholics in 1874 as 4161. In 1892, the papal nuncio of Vienna, Viale Prea, visited Belgrade in order to reorganize the diocese, but no account of the results of his mission has ever been published. The Protestants numbered in 1874, according to the official statistical report of the government, 492, the Jews 2049, and the Mohammedans 6306. In the districts annexed in 1878 there are estimated to be 75,000 Mohammedans. Secession from the State Church is rigorously forbidden, but otherwise all the other religious denominations enjoy entire religious liberty.

Education is making rapid progress in Servia. Fifty years ago there was no public primary school; now education is compulsory, and for its management a special ministry of education has been organized. In 1874 there were 517 public schools, with 23,000 pupils. The first gymnasium was established in 1880, and in 1874 the principality had two complete gymnasia and five gymnasia, with an aggregate attendance of 2000 students. A normal school was established in 1872. The high school in Belgrade contains three faculties, and has about 200 students.

IV. Character.—The Servians are distinguished for the vigor of their frame, their personal value, love of freedom and the national poetic and spiritual. Their manners and mode of life are exceedingly picturesque, and strongly possess a stronger in their favor. They rank among the most gifted and promising members of the Slavic family. See Ranke, Die serbische Revolution (Hamburg, 1839; 2d ed. 1844); Mitrobovic, Gesch. Serviens von 1389-1815 (Leipzig, 1867); Cumbet, Etude Historique sur les Révolutions et l'Indépendance de la Servie depuis 1804 jusqu'à 1850 (ibid., 1855, 2 vols.); Hilferding, Gesch. der Serben und Bulgaren (Bautzen, 1856); Denton [Rev. W.]. Servia and the Servians (Lond., 1862); Elodie Lawton Mijatovics (Win. Tweedie), Hist. of Montenegro (Lond., 1874); Delandt, La Servie au 19e Siecle, Kara George et Milosch (Paris, 1875); Grieve, The Church and People of Servia (Lond., 1884); Jakshich, Recueil Statistique sur les Contéries Servia (Belgrade, 1875).

Servian Version. See Slavonic Versions.

Service (properly ἱδρυσία, dôlia, i. e. bondage; but the rendering in the A. V. in many places of less severe words, as ἱλασμός, λατρεία, etc.). See Service.

SERVICE. See LORD'S SUPPER.

SERVICE OF THE CHURCH. It appears that there was a daily celebration of divine worship in the time of Cyprian; and it has been supposed that the practice of offering public prayer every morning and evening was established during the 3d century. The order of the daily morning and evening services, as they undoubtedly obtained in the 4th century, was as follows: The morning service began with the reading of Ps. lxiii, followed by prayers for the catechumens, energumens, candidates for baptism, and penitents; for the faithful, the peace of the world, and the state of the Church. The closing prayer preserved during the day, the bishop's commendation or thanksgiving, the imposition of hands, or bishop's benediction, concluding with the dismissal of the congregation with the usual form, Ἰδρύσεται ἐν τῷ πρωτότοκῳ, "Depart in peace." The evening service (called hora laceraria, because it began at the time of lighting candles) was in most parts the same with that of the morning, except with such variation of psalms, hymns, and prayers as were proper to the occasion. 1. The liturgy from the one hundred and forty-first; 2. Proper prayer for the evening; 3. The evening hymn. In some churches the Lord's Prayer was always made a part of the daily worship both morning and evening (see Bingham, Christ. Antiq., xiii, 10, 11). At the Reformation, in order to suppress the abuse of vulgar and idolatrous worship by a scriptural and reasonable service, it was appointed that the "morning and evening service" should be "said daily throughout the year." This order is observed in cathedral and collegiate churches, in the universities, and in some parishes, but has not been generally followed in parochial churches.

That of the Church of England contains the Book of Common Prayer, Administration of the Sacraments, and other rites and ceremonies of the Church. See COMMON PRAYER.

The service-books of the Latin Church include the Missal, the Pontifical, the Day Hours, the Breviary, the Ritual, the Processional, the Ceremonial for Bishops, the Benedictional, and others.

Those of the Greek Church are, (1) the Euchologion, corresponding to the Missal; (2) the Menaia, answering to the Breviary, without the ferial offices, and full of ecclesiastical poetry in measured prose; (3) Paraklesis, or great Octoechos, the ferial office for eight weeks, mainly the work of Joseph of the Studium; (4) Triton, the Lent volume, from Sunday before Septuagesima to Easter; and (5) the Pentecostarion, the office for Easteride.

Services, an ecclesiastical name for arrangements of the Canticles, Te Deum, Benedictus, Benedicite, Magnificat, and Nunc Dimittis, and the psalms sung by substitution for them, consisting of a succession of varied airs, partly verse and partly chorus, sung in regular choirs, of which, probably, the germ is to be found in the Ambrosian Te Deum, a succession of chants which is mentioned first by Boethius, who lived a century after Augustine. The simplified notation of this music, as used in the Salisbury and Roman breviaries, was composed by the Gallican, Pilahus's service, an imitation, rather than an adaptation, of the original arrangement. Probably the first was the setting of the Venite by Caustun in the time of Henry VIII. In 1641 complaint was made of "singing the Te Deum in prose after a cathedral-church way." There are two classes: (1) full services, which have no repetitions, and are sung with an almost regular alternation by the two choirs; (2) verse services, which have frequent repetitions, no regular alternations, and are full of verses, either solos or passages sung in slower time by a selected number of voices.

SERVICES, DOMESTIC. The domestic officers (servilia) of a monastery were the cook, baker, brewer, laundryman, and tailor. At Rochester these were appointed by the bishop.

Serving Dress or Robe. See Surplice.

Serving Tables, one of the parts of the Presbyterian sacramental service. Where the Presbyterians have not adopted the Congregational mode of partaking of the sacrament, the following is the order: "The table on which the elements are placed, being decently covered, the bread in convenient dishes, and the wine in cups, and the communicants orderly and gravely sitting around the table or in their seats before it, the minister ministers the elements by sprinkling the wine pouring, etc. The whole of the communicants not partaking at once, it is found necessary to continue the distribution of the elements, with intervals of psalm-
singing; during which those who have eaten leave the table to give place to a fresh set of communicants. The distribution of the bread and wine and the delivery of an address are what constitutes serving the table. The number of tables varies from four to eight, and each address occupies ten minutes or a quarter of an hour. The minister of the place serves the first table; the rest are served by his assisting brethren.

Servites, or Servants of the Blessed Virgin Mary, an order of monks in the Roman Catholic Church founded (1233) in Florence by seven rich Florentine merchants. Their main object was to propagate devotion to the Virgin Mary. They lived at first as hermits, carrying on business only on a monastic scale, and not keeping the rule of St. Augustine and obtained from pope Martin V the privilege of a mendicant order. The order having become relaxed, it was re-established in 1595 in its original strictness as "Servites Eremites." This order has produced a large number of distinguished men, among whom may be mentioned father Paul Sarpi, author of the History of the Council of Trent, and St. Philip Benizzi (died 1285), one of the apostles of Western Europe in the 13th century. The Servites were extremely popular during the 16th century because of their many works of charity. Their dress was a cassock of sedge, a coat, a head covering, and an alms-bag.

There were also female Servites, who were never very numerous, and a large body of Tertiarians (q.v.). The order, in 1870, was divided into twenty-seven provinces, the central house being the monastery of the Annunciation in Florence. They were involved in the decree suppressing religious orders in Italy and Germany. They were introduced into the United States in 1870 by bishop Melcher of Green Bay, Mich. There was a similar order founded in Naples in 1243.

Servitor (servitor), a minister, as elsewhere rendered, a personal attendant, but not in a menial capacity (2 Kings iv. 48). See Servant.

Servitude (servitude). The servants of the Israelites were slaves, and usually foreigners (1 Chron. ii. 34), who yet were required to be circumcised (comp. Gen. xviii. 23, 27). Servants of both sexes were acquired (comp. Mishna, Kiddushin, i, 2 sq.), sometimes as prisoners of war, whose lives were spared (comp. Numb. xxxi, 26 sq.), sometimes by purchase in peace (these were called nukhun, Nukhun, Nigbat, Nigbat, Nigbat, Nigbat, Nigbat, 6; see Gen. xvii. 23; Exod. xxxii. 7; xxii. 23; Lev. xxv. 44; and on their purchase in Assyria now, see Russegeur, Reis i, 156). But foreign servants who had escaped could neither be enslaved nor given up to their masters (Deut. xxiii. 15 sq.). The children of slaves were of course the property of the master (comp. Gen. xviii. 23; Exod. xxiii. 4). These were generally considered most faithful (Horace, Ep. ii. 2, 6). At the legal valuation, perhaps an average, thirty silver shekels were given for a servant (Exod. xxii. 32), while a free Israelite was valued at fifty (Lev. xxxv. 3). On the price of remarkable servants in Egypt under the Ptolemies, see Josephus (Ant. iii. 9, 4). A moderate price for a Jewish slave was one hundred and twenty drachmas (Ibid. iii. 2, 8). An Israelite could become by purchase the property of another (Exod. xxii. 2; Deut. xv. 12) if he was compelled by poverty to sell himself (Lev. xxv. 39); but he could not, according to the law, be treated as a slave, and in any case he obtained his freedom again, without ransom, after six years of service, or in the year of jubilee (Exod. xxii. 2 sq.; Lev. xxv. 40, 40 sq.), if he was not ransomed earlier (ver. 42 sq.). Perhaps the case was different with him who was sold for theft (Exod. xxii. 5, 8). Even this sale was always to an Israel- ite or to the family of the in- jured man or to the highest bidder is doubtful (Ibid. iv. 8, 27). It seems that hard creditors could sell insolvent debtors or their families (2 Kings iv. 1; Isa. 1.1; Neh. v. 5; Matt. xiv. 25), but perhaps not legally, as some- times among the Greeks (Becker, Charikl. ii. 32). Parents were permitted to sell daughters (Exod. xxi. 7), but the law showed much favor to such servants (ver. 8 sq.), for, though there is difficulty in the statements, it is plain that the house of the slaveowner (Hengstenberg, Pentat. ii. 488 sq., whom Kurz, Mos. Opyr, p. 216, contradicts without reason). It is plain that servants could not have been dispensed with among a people where almost every man was an agriculturist, and where there were few of a lower class to work for hire (yet comp. 1 Chron. ii. 16). Deut. xvi. 12, 13. See also Josephus, Ant. iv. 8, 38); and, indeed, the ancestors of the Israelites, the nomadic patriarchs, had numbered slaves among their valuable possessions (Gen. xii. 16; xxiv. 35; xxx. 48; xxxii. 5). These were very numerous (xv. 14), and, in case of need, served as an army for defence (ver. 14 sq). When a daughter of the family married a stranger, a female servant accompanied her to her new home (xxix. 24, 29). The Mosaic law sought to establish on just principles a permanent relation between master and servant, and conferred many favors on the servants. They not only enjoyed rest from all work on the sabbath day (Exod. xx. 10); not only was it forbidden to punish a slave on that day, he should die on the spot (xxi. 20), or to muzzle him (ver. 26 sq.), on penalty, in the former case, of suffering punish- ment (not death, perhaps, as the rabbins say; comp. Koran, ii. 175); in the latter, of the freedom of the slave (less protection than this was given to the Greek and Roman slave, see Charid. iv. 5, 6; Hengstenberg, Pentat. ii. 58 sq.); not only were they to be admitted to certain festivals (Deut. xii. 18; xvi. 11, 14; comp. Athen. xiv. 659; Buttman, Myth. ii. 52 sq.), but every slave of Hebrew descent obtained his freedom after six years' servitude (Exod. xxi. 2 sq.; Deut. xv. 12; comp. Josephus, Ant. xiii. 5, 1, including females, Deut. xv. 19); yet without wife or child, if these had come to him in the house of his master (Exod. xxi. 3 sq.); and the year of jubilee emancipated all slaves of Hebrew descent (Lev. xxv. 41; Jer. xxxiv. 8 sq.; comp. Josephus, Ant. xiii. 12, 9). If a slave would not make use of the legal freedom granted him in the seventh year, but wished to remain in his master's house, then he was led to the judge, and his ear was bored (Exod. xxi. 6; Deut. xv. 17). So the bored ears among other nations were a proof of servitude— as the Egyptians [Petron, Satir. 102], the Lydians, Indians, and Persians [Xenoph. Anab. iii. 1, 17; Plutarch, Rom. 101; Plin. Hist. Nat. xii. 4]; yet comp. Rosenmuller, Moses, ii. 1, 70 sq., and on the symbols and commission by the Romans, see Becker, Rom. Alter. ii. 66 sq. Plautus [Pars. v. 2, 21] shows that the wearing of ear-rings was a mark of a slave. There is no other kind of manumission mentioned in the Old Test. (see Mishna, Mass. Sheni, v. 14). It was at least allowed to slaves of Israelitish descent to acquire some property (Lev. xxv. 49; comp. Arvieux, iv. 3 sq.); and though, on the whole, the servants were required to labor diligently (Job vii. 2; Sir. xxxiii. 26, 28), and the masters required attention and obedience in service (Psa. cxiii, 2), inflicting corporal punishment when necessary (Prov. xxiv. 15, 19; xxi. 10; ii. 5), and the Jewish government. The Hebrews sometimes married their masters' daughters (1 Chron. ii. 35; see Rosenmuller, Morgenl. iii. 235 sq.). It was more usual for the masters to give Israelitish slaves to their dependents, by which they acquired the rights of daughters (Exod. xxii. 9; comp. Gen. xxvi. 8; Chardin, Voyage, ii. 290). The relation of chief servant, or head of the house, in whom the master reposed full confidence, may have continued
in the more important families from patriarchal times (Gen. xxiv, 5; comp. xxv, 2; xxix, 2; and for a modern parallel, Arriuex, iv, 30); and slaves seem even to have been employed to educate the sons of the house (ταῦτα γεωργίαν, Gal. iii, 24 sq.; see Wachsmuth, Hel len. Alterth., ii, 368). The common slaves were required to do field and house work (Luke xvii, 7 sq.), and, especially the females, to turn the handmills, and to take off or carry the master’s sandals, etc. None but the Essenes, among the Jews, rejected all slavery, as contradicting the natural freedom of men (Philo, Opp. ii, 458, etc.; see the Theophrastus, ibid. ii, 492).

It is well known that in war with foreign nations many Jews were sold abroad as slaves (Iesil iii, 11; Amos. iii, 10; 41; 2 Macc. xiii, 11, comp. Deut. xxviii, 68). This happened especially in the wars with Egypt (Josephus, Ant. xii, 2, 3) and Syria, then with Rome; and after the destruction of Jerusalem ninety-seven thousand Jews fell into the power of the victorious enemy (id. War, vi, 3, 2). The Jewish community at Rome consisted, in great measure, of freed slaves. See, in general, Pignoria, De Servis et eor. op. Vet. Minister. (Patav, 1694, and often); Mos. Maimon, De Servis et Ancillis (tract. c. vers. et not. Kall, Hafni, 1744); Abich, De Servor, Hebr. Acquis. atq. Serv. (Lips. 1704); Atig, Opp. v, 222 sqq.; Mieg, Constitut. Servi Hebr. ex Script. et Rabbin. Collect. (Herborn, 1785); Michaelis, Mos. Rit. ii, 338 sqq.; Am. Bibl. Repov. 2d Ser. XIII, 302 sqq. See Nethinim; Slave.

Servus Servorum Dei (Servant of the servants of God), an official title of the Roman pontiffs, in use since the time of Gregory the Great, by whom, according to his biographer, Paul the Deacon, it was assumed as a practical rebus of the ambitious assumption of the title of "Papal" (or universal) Patriarch by John, successor of the fast and contemporary Patriarch of Constantinople. Other Christian bishops previous to Gregory had employed this form, but he was doubtless the first of the bishops of Rome to adopt it as a distinctive title. It is found in all the letters of Gregory preserved by the Venerable Beate in his history.

Sesecuplum (taken once and a half), that sort of usury which consisted in making loans at fifty per cent. interest. The excessive extortionate and great oppression, it was condemned in the clergy by the councils of Nice and Laodicea, under the name of usuraux; and also in laymen by the law of Justinian, which allows nothing above centesimal interest in any case. See Bingham, Chrisl. Antiq. vi, 2, 6. See Usury.

Sesha is, in Hindu mythology, the great king of the serpentine race, upon whom Vishnu reclines on the primeval waters. He has a thousand heads, which serve as a canopy to Vishnu; and he is the world, which rests on one of his heads. His crest is ornamented with jewels. Coiled-up, Sesha is the emblem of eternity. He is often also called Vasuki or Ananta, "the eternal."

Ses'is (Σείς v. r. Σεσίς), a Grecized form (1 Esdr. ix, 34) of the name Sheshai (q. v.), in the Hebrew list. (Exx. x, 40).

Session of Christ, the perpetual presence of our Lord's human nature in the highest glory of heaven. The statement of the fact appears in all the Latin forms of the Greek. The Cappadocian fathers, "Sedet ad dexteram Patriam," which developed into "Sedet ad dexteram Dei Patriam Omnipotentiam" at some time not later than the 6th century. The article does not appear in the Creed of Nicea, but in the Constantinopolitan expansion of that formulary it is given in words which are similar to those of the ancient Latin Church, κατά το σωτήριον ἐκ ἐκείνης τος ἡμῶν [1]. Naturally two questions suggest themselves for consideration:

1. What does this exaltation of Christ's human nature imply? We answer, An actual translation of his body and soul to heaven and their actual continued abode there, and that in uninterupted identity with the body and soul which had been born of Mary. This identity was historically established by the chosen witnesses of the resurrection, who saw his ascension and heard the words of the angels, "This same Jesus, which is taken up from you into heaven," etc. (Acts i, 11); and not long after by the declaration of Stephen (vii, 56). Although the body of Christ has doubtless undergone a change so that it is a spiritual body, yet locality may be predicated of it now as well as previously to his death. It is an error, therefore, to suppose that the bodily presence of Christ is that of the omnipresent Deity, as is maintained by the Ubiquitarians (q. v.). Because of this local bodily presence Christ sends his Holy Spirit to mankind. 2. What is the result of this exaltation? It was accomplished partly with reference to the glory of his own person, and partly with reference to his work as the Saviour of mankind. The human nature which, united with the divine nature, accomplished the purpose of 1689 was fittingly raised up to the highest glory — "Wherefore God highly exalted him," etc. The ultimate object of the Incarnation was to bring us to God, into the divine presence. By this exaltation of our nature in the person of Christ a capacity was originated for its exaltation in ourselves. And, being the first-born among many brethren, he carried our humanity into heaven as the "Forerunner" of the elect. And so he spoke to them, as he said, "that where I am, there ye may also be" (John xiv, 2, 8). See Herzog, Real-Encyclop. s. v. "Stand Christi;" Blunt, Dict. of Doct. Theology, s. v. See Intercession; Resurrection.

Ses'othel (Σεσοθήλ), a corrupt form (1 Esdr. ix, 31) of the Hebrew name Bezaleel (q. v.), of the "sons of" Pahath-moab (Ezra x, 30).

Sesuto (or Sisuta) Version of the Holy Scriptures. The Sesuto belongs to the African tongues, and is spoken by the Basutos, which form a part of the Bechuana nation, dwelling between the Winterberg mountains and the higher branches of the Yellow River. For this people of South Africa the Gospel of Matthew was translated and printed in 1867. In 1869 the gospels of Mark and Luke, as translated by the French missionaries Pelissier, Armouset, and Cassius, were printed in Cape Town, to which in 1849 the Gospel of John was added. Since that time not only the rest of the New Test., but also parts of the Old Test., have been added, and it is hoped that very soon this people will have the whole Bible in their own vernacular. See about 1878, about one-fifth of the portions of the Scriptures had been circulated among them. See The Bible of Every Land, but more especially the annual reports of the British and Foreign Bible Society since 1860. (B. P.)

Seth (Heb. Seth, סֵת, i. e. compensation; Sept. and New Test. Σήθ; Josephus, Σεθος [1. Ant. i, 2, 5]; A. V. "Sheth" in 1 Chron. i, 1; Num. xxix, 7), the third son of Adam (born B.C. 4042), and the father of Enos (Gen. iv, 25, 26; v, 3-8; 1 Chron. i, 1; Luke iii, 38). The signification of his name (given in Gen. iv, 25) is "appointed" or "put in" the place of the murdered Abel, and Delitzsch speaks of him as the second Abel, but Edwald (Crit. i, 353) thinks that another signification, which he prefers, is involved in the text of those who write the phrase "children of Seth" (Numb. xxxv, 17) has been understood as equivalent to all mankind, or as denoting the tribe of some unknown Moabitish chiefship: but later critics, among whom are Rosenmuller and Gesenius (Theocrit. p. 846), bearing in mind the parallel passage (Jer. xlviii, 40), render the phrase "children of a man, tumultuous ones," i. e. hostile armies. See Seth.

In the 4th century there existed in Egypt a sect calling themselves Sethians, which are classed by Neander (Ch. Hist. ii, 115, ed. Bohm) among those Gnostic
raiseth up the sick, or the tree from which this oil flows, or on account of the sickness of thy father? This is not to be found now. Go, therefore, and tell thy father that after the accomplishing of 8500 years from the creation of the world, the only-begotten Son of God, being made man; and he shall anoint him with this oil, and shall raise him up, and shall baptize with the Holy Spirit and with fire, and those that are with him, and then shall he be healed of every disease; but now this is impossible. When the prophet and the patriarchs heard these words, they rejoiced greatly.

In the Apocryphal literature Seth plays a prominent role, and even in Regnard the Fo'c Seth is mentioned as seeking for the oil of compassion:

"Die drei gegrabenen Namen
Brachte Seth der Fromme vom Paradiese herabred,
Als er das Oel der Beruhmtheit suchte.

See Fabricius, Cod. Pseudoepigr. V. T. i. 139 sq.; II. 49 sq.; Synelcyes, Chronog. p. 10; Selenok, Dia. de Horte Hades
in his Otto Theolog. p. 600; Baring-Gould, Legendes de Patentarcha et Propheta, p. 81 sq. (B.P.)

Sethians, or Sethites, a sect of the Orphics (q. v.), of the 2nd century, who paid divine honor to Seth, believing him to have reappeared in the person of Jesus Christ. They taught that Seth was made by a third divinity, and instituted in the room of the two families of Abel and Cain, destroyed by the deluge. They were thus distinguished from the Cainites (q. v.), who assigned the highest place to Cain. The Sethians regarded Cain as a representative of the Hylic, Abel of the Psychial, and Seth, who was finally to reappear in the person of the Messiah, of the Pneumatic principle. See Neander, Church Hist. (Torrey), i. 448.

Se'thur ( Heb. Sethur, מֶשְׁתִּיר, hidden; Sept.Saανιψ, the son of Michael, of the tribe of Asher, and one of the Twelve spies sent by Moses to view the promised land (Num. xi. 18). B.C. 1857. See V. V. V. V. Okt. Licht, footnotes de Nomina Sethur (in the Maccab. Dutch, i. 482 sq.).

Set-off (or Offset), the part of a wall, etc., which is exposed horizontally when the portion above it is reduced in thickness. Set-offs are not frequently covered, and in greater measure concealed, by cornices or projecting mouldings, but are more usually plain. In the latter case, in classical architecture, they are generally nearly or quite flat on the top, but in Gothic architecture they are sloped, and in most instances have a projecting drip on the lower edge to prevent the wet from running down the walls: this is especially observable in the set-offs of buttresses.

Se toν apathhton MONARCHEN (Μανωνδρλος, The Everlasting King) is the beginning of a hymn written σεξ Χαριτων (to Christ) by Gregory of Nazianzum (q. v.). The first few lines of this hymn run thus in Mrs. Charles's version:

"Hear us now, Eternal Monarch,
Grant us now to hymn and praise thee—
Thou the King, and thou the Almighty
By whom are our hymns and praises,
By whom are the choirs of angels,
Archangels, and the earth's foundations,
By whom only shines the sun,
By whom walks the moon in brightness,
By whom smile the stars in beauty,
By whom all the race of mortals
Have received their godlike reason,
And whither works and works unknown.

For the original Greek, together with a German translation, comp. Bisailer, Auswahl althochdeutscher Lieder, p. 10, 156; Rambach, Anthologie christlicher Gesänge, i. 48 sq.; Fortlage, Gesänge christlicher Vorzeit, p. 25, 361;
Seven (שֵׁשׁ, šēš). The frequent recurrence of certain numbers in the sacred literature of the Hebrews is obvious to the most superficial reader; and it is almost equally obvious that these numbers are associated with certain ideas, so as in some instances to lose their numerical force, and to pass over into the province of symbolic signs. This is more or less true of the numbers three, four, seven, twelve, and forty; but seven so far surpasses the rest, both in the frequency with which it recurs, and in the importance of the objects with which it is associated, that it may fairly be termed the representative symbolic number. It has hence attracted considerable attention, and may be said to be the keynote on which the symbolism of numbers depends. The original meaning of the number seven is a question that meets us at the threshold of any discussion as to the number seven. Our limits will not permit us to follow out this question to its legitimate extent, but we may briefly state that the views of Biblical critics may be ranged under two heads, according as the symbolism is attributed to the actions or characteristics of the number itself, or to external associations of a physical or historical character. According to the former of these views, the symbolism of the number seven would be traced back to the symbolic of its component elements three and four, the first of which is Divinity, and the second — Humanity, whence seven = Divinity + Humanity, or, in other words, the union between God and man, as effected by the manifestations of the Divinity in creation and revelation. So again the symbolism of twelve is explained as the symbol of the 3 X 4, or a second combination of the same two elements, though in different proportions, the representative number of Humanity, as a multiplier, assuming a more prominent position (Bähr, Symbolik, i, 187, 201, 224). This theory is seductive from its ingenuity and its appeal to the imagination, but there appears to be little foundation for it. For (1) we do not find any indication, in early times at all events, that the number seven was more prominent than any other arithmetical elements, such as two and five. Bengal notes such a division as running through the heptads of the Apocalypse (Gnomon, at Rev. xvii, 1), and the remark undoubtedly holds good in certain instances, e.g. the trumpets, the three latter being distinguished from the four former by the triple "woe" (Rev. viii, 13), but in other instances, e.g. in reference to the promises (Gnomon, at Rev. vii, 2), the distinction is not so well established; and even if it were, an emendation might be found in the adaptation of such a division to the subject in hand. The attempt to discover such a distinction in the Mosaic writings — as, for instance, where an act is to be done on the third day out of seven (Num. xix, 12) — appears to be a failure. (2) It would be difficult to show that the introduction of a series of six other species was designed to three and four previously to the sanctity of seven. This latter number is so far the sacred number kar'ı šešqay that we should be less surprised if, by a process the reverse of the one assumed, sanctity had been subsequently attached to three and four as the supposed elements. But (3) the representations on mere numbers are alien to the spirit of Hebrew thought; they belong to a different stage of society, in which speculation is rife, and is systematized by the existence of schools of philosophy.

We turn to the second class of opinions, which attribute the symbolism of the number seven to external associations. This class may be again subdivided into two, according as the symbolism is supposed to have originated in the observation of purely physical phenomena, or, on the other hand, in the peculiar religious enactments of Mosism. The influence of the number seven was supposed to be traced to the Hebrews; it prevailed among the Persians (Esth. i, 10, 14), among the ancient Indians (Von Bohlen, Alt. Indien, ii, 224 sq.), among the Greeks and Romans to a certain extent, and probably among all nations where the week of seven days was established, as in China, Egypt, Arabia, etc. (Ideler, Chronol, i, 178, ii, 478). Cicero calls it the knot and cement of all things, as being that by which the natural and spiritual world are comprehended in one idea (Tusc. Qvest, i, 10). The wide range of the word seven is this in respect an interesting and significant fact: with the exception of "six," it is the only numeral which the Semitic languages have in common with the Indo-European; for the Hebrew šēš is essentially the same as īštā, septem, seven, and the Sanscrit, Persian, and Gothic names for this number (Pott, Etym. Forsch, i, 129). In the countries above enumerated, the institution of seven as a cyclical number is attributed to the observation of the changes of the moon or to the supposed number of the planets. The Hebrews are held by some writers to have borrowed their notions of the sanctity of seven from their heathen neighbors, either wholly or partially (Von Bohlen, Introdc. to Gen. i, 216 sq.; Hengstenberg, Balbaun [Clark's ed.], p. 393); but the peculiarity of the Hebrew view consists in the special deference paid to the number seven. In the Jewish law the number seven is almost everywhere the dominant number. Whatever influence, therefore, may be assigned to astronomical observation or to prescriptive usage, in regard to the original institution of the week, we cannot trace back the peculiar associations of the Hebrews further than to the point when the seventh day was consecrated to the purposes of religious rest.

Assuming this, therefore, as our starting-point, the first idea associated with seven would be that of religious periodicity. The Sabbath, being the seventh day, suggested the adoption of seven as the coefficient, so to say, for the appointment of all sacred periods: and we thus find the seventh month ushered in by the Feast of Trumpets, and signalized by the celebration of the Feast of Tabernacles and the great Day of Atonement; seven weeks as the interval between the Passover and the Pentecost; the seventh year as the sabbatical year; and the year succeeding 7 X 7 years as the jubilee year. From the idea of periodicity it passed, by an easy transition, to the duration of peace and of the cleansing of the world; and thus seven days were appointed as the length of the feasts of Passover and Tabernacles; seven days for the ceremonies of the consecration of priests; seven days for the interval to elapse between the occasion and the removal of various kinds of legal uncleanness, as after childbirth, after contact with a corpse, etc.; seven
times appointed for aspersion either of the blood of the victim (e.g. Lev. iv, 6; xvi, 14) or of the water of purification (xix, 5; comp. 2 Kings v, 10, 14); seven things to be offered in sacrifice (oxen, sheep, goats, pigeons, wheat, oil, wine); seven victims to be offered on annual sacrifices, as in Benjamin (Numb. xxiii, 1), and especially at the ratification of a treaty, the notion of seven being embodied in the very term (טָבָא) signifying to swear, literally meaning to do seven times (Gen. xxi, 28; comp. Herod. iii, 8 for a similar custom among the Arabianis). The same idea is further carried out in the vessels and arrangements of the Tabernacle—in the seven arms of the golden candlestick, and the seven chief utensils (altar of burnt-offerings, laver, showbread table, altar of incense, candlestick, ark, mercy-seat).

The number seven, having thus been impressed with the seal of sanctity as the symbol of all connected with the Divinity, was adopted generally as a cyclical number, with the subordinate notions of perfection or completeness. It hence appears in cases where the notion of satisfaction is required, as in reference to punishment for sin (Gen. xlix, 10; Isai. xxxv, 12; Prov. vi, 13), or to forgiveness of them (Matt. xviii, 21). It is again mentioned in a variety of passages too numerous for quotation (e.g. Job v, 19; Jer. xv, 9; Matt. xii, 45) in a sense analogous to that of a "round number," but with the additional idea of sufficiency and completeness. To the same end we may refer the numerous instances in which persons or things are mentioned by sevens in the historical portions of the Bible—e.g. the seven kine and the seven ears of corn in Pharaoh's dream, the seven daughters of the priest of Midian, the seven sons of Jesse, the seven deacons, the seven sons of Sceva, the two or seven generations in the pedigree of Jesus (Matt. i, 17); and, again, the still more numerous instances in which periods of seven days or seven years are combined with the repetition of an act seven times; as, in the taking of Jericho, the town was surrounded for seven days, and on the seventh day it fell at the blast of seven trumpets borne round the town seven times by seven priests; or, again, at the flood, an interval of seven days elapsed between the notice to enter the ark and the coming of the flood, the beasts entered by sevens, seven days elapsed between the two missions of the dove, etc. So, again, in private life, seven years appear to have been the usual period of a hiring (Gen. xxxv, 12; Num. xxxi, 12, 28; Lev. xxv, 45); seven days for a marriage-festival (ver. 27; Judg. xiv, 12), and the same, or in some cases seventy days, for mourning for the dead (Gen. i, 3, 10; 1 Sam. xxxi, 13).

The foregoing applications of the number seven become of great practical importance in connection with the interpretation of some of the prophetic portions of the Bible, and particularly of the Apocalypse. For in this latter book the ever-recurring number seven both serves as the mould which has decided the external form of the work, and also, to a certain degree, penetrates into the essence of it. We have but to run over the chief articles of that book—the chalices, the seven seals, the seven trumpets, the seven vials, the seven angels, the seven spirits before the throne, the seven horns and seven eyes of the Lamb, etc.—in order to see the necessity of deciding whether the number is to be accepted in a literal or a metaphorical sense—in other words, whether it represents a number or a quality. The decision of this question affects not only the number seven, but also the number which stands in a relation of antagonism to seven, viz. the half of seven, which appears under the form of forty-two months, = 2/3 years (Rev. xiii, 5); twelve hundred and sixty days, also = 2/3 years (xii, 6), and, again, a time, times, and half a time (xii, 14). In the miraculous legend frequently recurring in the Old Testament, as in the forty-two stations of the wilderness (Numb. xxxiii); the three and a half years of the famine in Elijah's time (Luke iv, 25); the "time, times, and the dividing of time," during which the persecution of Antiochus Epiphanes was to last (Dan. vii, 25), a similar period being again described as "the midst of the week," i.e. the half of seven years (ix, 27); "a time, times, and a half" (xii, 7); and again, probably, in the number of days specified in Dan. viii, 14; xii, 11, 12. If the number seven express the notion of completeness, then the number half-seven = incompleteness and the secondary ideas of suffering and disaster: if the one represent divine agency, the other we may expect to represent human agency. Mere numerical calculations would thus, in regard to unfurnished prophecy, be either wholly superseded, or, at all events, take a subordinate position to the general idea conveyed. See Journal of Sacred Literature, Oct. 1861, p. 154 sq; New-Englander, No. 1858. See Numbers.

Seven Capital Sins. See Seven Deadly Sins.

Seven Chief Virtues. The, According to the teaching of both Roman Catholic and Eastern Churches, these virtues are faith, hope, charity, prudence, temperance, chastity, and fortitude.

Seven Days After, the term by which the octave of a festival is described in the Book of Common Prayer. Thus the proper prefaces in the communion service, except that for Trinity Sunday, are to be said upon certain days, and, likewise, during seven days afterward.

Seven Deadly Sins. The, as defined by the Romish Church, are pride, anger, envy, sloth, lust, covetousness, and gluttony.

Seven Dolours of the Blessed Virgin Mary. Feast of, a modern festival of the Roman Catholic Church, which, although bearing the name of devotion to the Virgin Mary, in reality regards those incidents in the life of Christ which are most closely associated. This festival is celebrated on the Friday preceding Palm-Sunday (q. v.). The "Dolors," or sorrows, of the Blessed Virgin, have long been a favorite theme of Roman Catholic devotion, of which the pathetic Stabat Mater Dolorosa is the best-known and most popular expression; and the festival of the Seven Dolours is intended to individualize the incidents of her sorrows, and to present them for meditation. The seven incidents referred to under the title of "Dolours" are: 1. The prediction of Simeon (Luke ii, 34); 2. The flight into Egypt; 3. The loss of Jesus in Jerusalem; 4. The sight of Jesus bearing his cross toward Golgotha; 5. The crown of thorns; 6. The piercing of his side with the lance; 7. His burial. This festival was instituted by pope Benedict XIII in 1725.

Seven Heroes of Thebes. See Thebes, Seven Heroes of.

Seven Sacraments. The Council of Trent, session 7, canon 1, says, "If any one shall say that the sacraments of the new law were not all instituted by Jesus Christ our Lord, or that there are more or less than seven—to wit, baptism, confirmation, the eucharist, penance, extreme unction, orders, and matrimony—or even that any one of these seven is not truly and properly a sacrament, let him be anathema." See SACRAMENT.

Seven Sleepers, the heroes of a celebrated legend, first related in Ovid (Fast. iv, 234), and in the second half of the 6th century (De Glorii Martyrum, c. 96); but the date of which is assigned to the 3rd century and to the persecution of the Christians under Decius. According to the narrative, seven Christians of Ephesus took refuge in a cave near the city, where they were discovered by their pursuers, who walled up the entrance in order to starve them out. As the seven were of different ages, and possessed in their behalf: they fell into a preternatural sleep, in which they lay for nearly two hundred years. The concealment is supposed to have taken place in 250 or
SEVEN SPIRITS

251, and the sleepers to have been reanimated in 447. Their sleep seemed to them to have been for only a night; and they were greatly astonished, going into the city, to see the corpse exposed upon the church-steps, which but a few hours ago, as it appeared, was the object of contempt. Their wonderful story told, they were conducted into triumph in the city; but all died at the same moment.

Seven Spirits and Orders of the Clergy. The Roman Catholics of the Western Church, in general, abide firmly by the principle established by the schoolmen, that the priesthood is to consist of seven classes, corresponding to the seven spirits of God. Of these the three who are chiefly employed in the duties of the ministerial office compose the superior order [see Clergy, 3]; and the four whose duty it is to wait upon the clergy in their administrations, and to assist in conducting public worship, belong to the inferior order. See Coleman, Christ. Antiq. p. 73.

Sevenfold Gifts, the gifts of the Holy Spirit; so called from their enumeration in Isa. xi. 1-6. There is an allusion to them in the hymn Veni, Creator Spiritus in the Ordinal (q.v.), thus—

"Come, Holy Ghost, our souls inspire, And lighten with celestial fire; Then dost thy sevenfold gifts impart."

In a prayer of the Order of Confirmation these gifts are specified as follows: "Daily increase in them thy manifold gifts of grace—the spirit of wisdom and understanding, the spirit of counsel and might, the spirit of knowledge and true godliness; and fill them, O Lord, with the spirit of thy holy fear."

Seventh-day. See Sabbath.

Seventh-day Baptists. See Baptists.

Seventh-day Baptists (German). See Baptists.

Seventy (70), šābīm, as being the multiple of the full number seven and the perfect number ten, shares in the sacredness or conventionality of the former in Scripture. See Seven. They are sometimes put in contrast in the complete phrase "seventy times seven" (Gen. iv, 24; Matt. xviii, 21). Some of the most remarkable combinations of this number are specified below.

SEVENTY DISCIPLES OF OUR LORD (Luke x, 1, 17). These seem to have been appointed in accordance with the symbolism of the seventy members of Jacob's household (Exod. i, 5) and, likewise, the seventy elders of the Jews (xxiv, 1; Num. xi, 16). See Sanhedrim. The following is the traditional list of their names (see Townsend, New Test.; and the monographs cited by Danz, Wörterb., s. v., "Lucas," Nos. 60-63; and by Hass, Leben Jesu, p. 165):

1. Agabus the prophet.
4. Andronicus of Pannonia, or Spain.
5. Apelles of Smyrna, or Heraclea.
6. Apollo of Cesareia.
7. Aristarchus of Apamea.
8. Aristobulus of Britain.
10. Asenheitis of Hircania.
13. Cesar of Dyrachium.
15. Corpus of Berytus in Thrace.
17. Clemens of Side.
20. Damas, a priest of idol.
22. Epaphroditus of Andrace.
23. Erasus of Panas, or of the Philippians.
25. Hermas of Philippi, or Philippiola.
27. Hermogenes, who followed Simon Magus.
29. Herodion of Taras.
30. James the greater of our Lord, at Jerusalem.
31. Jason of Taras.
33. Linus of Rome.
34. Luke the Evangelist.
35. Lucius of Lydica in Syria.
36. Mark, who is also John, of Biblepolis, or Biblis.
37. Mark the Evangelist, bishop of Alexandria.
38. Mark, the nephew of Barnabas, bishop of Apollonia.
39. Mathias, because he was the apostle.
40. Narcissus of Athens.
41. Neon, who died when Stephen suffered martyrdom.
42. Nicodorus of Cari.
43. Olympius, a martyr at Rome.
44. Onesiphorus, bishop of Corone.
45. Parmenas of the Saul.
46. Petrus, the same with Petros (Rom. xvi, 14) of Paul, or, according to others, of Naples.
47. Philemon of Gaza.
48. Philemon, called in the Acts Philp, who baptized the church of Candace, of Trallium, in Asia.
49. Philologus of Sinope.
50. Phileon, bishop of Marathon.
51. Philotheus of Ahezen, who followed Simon Magus.
52. Prochorus of Nicomedia, in Bithynia.
53. Publius.
54. Quartus of Berytus.
55. Rhodon, a martyr at Rome.
56. Rufus of Algora.
57. Silas of Corinna.
58. Sylvanus of Thessalonica.
59. Sosthenes of Iconium.
60. Stephanus, the first martyr.
61. Tertius of Iconium.
62. Thaddeus, who carried the epistle of Jesus to Edessa, to Abgarus.
63. Timon of Bosta of the Arabians.
64. Trophimus, who suffered martyrdom with Paul.
65. Typchus, bishop of Chalcodon, of Bithynia.
66. Tychicus of Colophon.
67. Urcius of Macedon.
68. Zenas of Diodora.

SEVENTY WEEKS OF DANIEL'S PROPHECY (Dan. ix, 25-27). This is so important a link in sacred prediction and chronology as to justify its somewhat extensive treatment here. We first give an exact translation of the passage.

"Seventy heptads are decreed to transpire upon the nation, and upon thy holy city, for (entirely) closing the [punishment of] sin, and for sealing up (the retributive sentence) of their [offences], and for expiating guilt, and for bringing in (the state of) perpetual righteousness, and for sealing up (the verification of) vision and prophecy, and for making holy of holies. And then shall know and consider, (that) from the (time of) a command occurring for returning and building (i.e. for rebuilding) the beauty existing of Messiah prince, (shall intervene) seven heptads, and sixty and two heptads, (i.e.) street shall return and be built (i.e. shall be rebuilt), and the houses, (that) in distress of the times. And after the sixty and two heptads, Messiah shall be cut off, and nothing shall be left to him; and people of the coming prince shall destroy the city and the holy [building] and his end of fighting shall come with (or, like) a flood, and until the end of wailing (shall occur the) decreed desolations. And he shall establish a covenant towards many persons (during) one heptad, and (at the) middle of the heptad he shall cause to cease sacrifice and offering; and upon (the topmost) corner of the Temple shall be reared oblations (i.e. idolatrous images) of (the desolate) land that (it) till completion, and a decreed (one) shall pour out upon (the desolator)."

In ver. 24 we have a general view of the last great period of the Jewish Church (see the middle line in the diagram). It was to embrace four hundred and ninety years, from their permanent release from Babylonian bondage till the time when God would cast them finally off for their incorrigible unbelief. See Week. Within this space Jehovah would fulfil what he had predicted, and accomplish all his designs respecting them under their special relation. The particulars noted in this cursory survey are, first, the conclusion of the then existing exile (expressed in three variations, of which the last phrase, "expiating guilt," explains the two former, "closing the sin" and "sealing up offences"); next, the fulfilment of ancient prophecy by ushering in the religious prosperity of Gospel times;
and, lastly, as the essential feature, the consecration of the Messiah to his redeeming office.

The only "command" answering to that of ver. 25 is that of Artaxerxes Longimanus, issued in the seventh year of his reign, and recorded in the seventh chapter of Ezra, as Pridaude has abundantly shown (Connection, s. a. 409), and as most critics agree. At this time, also, more Jews returned to their home than at any other, and the literal as well as spiritual "rebuidling of Jerusalem" was prosecuted with unsurpassed vigor. The period of the event, although he afterward extends "all the days of the Messiah" (see the upper line of above diagram); that is, as far as his public recognition as such by the voice at his baptism, the "anointing" of the previous verse; and not to his death—as is commonly supposed, but which is afterwards referred to in very different language—nor to his birth, which would make the entire compass of the prophecy depend much from four hundred and ninety years. The period of this verse is divided into two portions of "seven heptads" and "sixty-two heptads," as if the "command" from which it dates were renewed at the end of the first portion; and this we found was the case. Ezra, under whom this reformation of the state and religion began, was succeeded in the work by Nehemiah, who, having occasion to return to Persia in the twenty-fifth year after the commencement of the work (Neh. xiii, 6), returned "after certain days," and found that it had so far retrogressed that he was obliged to institute it anew. The length of his stay at court is not given, but it must have been considerable to allow so great a backsliding among the lately reformed Jews. Pridaude contends that his return to Judea was after an absence of twenty-four years; and we have supposed the new reform then set on foot by him to have occupied a little over three years, which is certainly none too much time to carry out the lower line of the diagram. The "rebuidling of the streets and intrenchments in times of distress" seems to refer, in its literal sense, to the former part especially of the forty-nine years (comp. Neh. iv), very little having been previously done towards rebuilding the city, although former decrees had been issued for repairing the Temple; and in its spiritual import it applies to the whole time, and peculiarly to the three years of the last reform.

The "sixty-two years" of ver. 25, it is observed, are not said to commence at the end of the "seven weeks" of ver. 25, but, in more general terms, after the "distressing times" with which the previous period was occupied; hence they properly date from the end of that reform, when things became permanently settled. It is in consequence of a failure to notice this variation in the limits of the two periods of sixty-two weeks referred to by the prophet (comp. the middle portions of the upper and of the larger line in the diagram), that critics have thrown the whole scheme of this prophecy into disorder, in applying to the same event such irreconcilable language as is used in describing some of its different elements. By the ravaging invasion of foreigners here foretold is manifestly intended the destruction of Jerusalem by the Roman troops, whose emperor's son, Titus, is here spoken of as the "person of the" (see the lower line of the diagram). The same allusion is also clear from the latter part of the following verse. But this event must not be included within the seventy weeks; because, in the first place, the accomplishment would not sustain such a view—from the decree, B.C. 459, to the destruction of Jerusalem, A.D. 70, being five hundred and twenty-eight years; secondly, the language of ver. 24 does not require it—as it is not embraced in the computations for which the seventy weeks are there stated to be appointed to Jerusalem and its inhabitants; and, lastly, the Jews then no longer formed a link in the chain of ecclesiastical history in the divine sense—Christian believers having become the true descendants of Abraham. At the close of the verse we have the judgments with which God would afflict the Jews for cutting off the Messiah: these would be so severe that the prophet (or, rather, the angel instructing him) cannot refrain from introducing them here in connection with that event, although he afterward extends "all the days of the Messiah." What these sufferings were, Josephus narrates with a minuteness that chills the blood, affording a wonderful coincidence with the prediction of Moses in Deut. xxviii, 15-68;—they are here called a "flood," the well-known Scripture emblem of terrible political calamities (as in Isa. viii, 7,8; Dan. xi, 10, 22; Nah. i, 8). 

Ver. 27 has given greater trouble to critics than any other in the whole passage; and, indeed, the common theory by which the seventy weeks are made to end with the crucifixion is flatly contradicted by the cessation of the daily sacrificial offerings at the Temple "in the middle of the week." All attempts to evade this point are in vain; for such an abolition could not be said to occur in any pertinent sense before the offering of the great sacrifice, especially as Jesus himself, during his ministry, always countenanced their celebration. Besides, the advocates of this scheme are obliged to make this last "week" encroach upon the preceding "sixty-two weeks," so as to include John the Baptist's ministry, in order to make out seven years for "confirming the covenant;" and when they have done this, they run counter to the previous explicit direction, which makes the first sixty-nine weeks come down "to the Messiah," and not to John the Baptist (see the lower line of the diagram). The "rebuidling of the streets and intrenchments in times of distress" seems to refer, in its literal sense, to the former part especially of the forty-nine years (comp. Neh. iv), very little having been previously done towards rebuilding the city, although former decrees had been issued for repairing the Temple; and in its spiritual import it applies to the whole time, and peculiarly to the three years of the last reform. The seventy weeks, therefore, were allotted to the Jews as their only season of favor or mercy as a Church, and we know that they were not immediately cast off upon their murder of Christ (see Luke xxiv, 27; Acts iii, 12-26). The Gospel was specially directed to be first preached to them; and not for their spiritual or personal ministry, but for several years afterwards, the invitations of grace were confined to them. The first instance of a "turning to the Gentiles" proper was the baptism of the Roman centurion Cornelius, during the fourth year after the resurrection of Christ. In this interval the Jewish people had shown their determined opposition to the new "covenant" by imprisoning the apostles, stoning Stephen to death, and officially proscribing Christianity through Sanhedrin. Soon after this martyrdom occurred the conversion of Saul, who was a chosen vessel to bear God's name to the Gentiles; and about two years after this event the door of conversion was thrown open for their nation from the covenant relation of the Church, instead of the Jews, by the vision of Peter and the conversion of Cornelius. Here we find a marked epoch, fixed by the finger of
God in all the miraculous circumstances of the event, as well as by the formal apostolic decree ratifying it, and obviously forming the great and guiding link between the two religious systems. We find no evidence that "many" of the Jews embraced Christianity after this period, although they had been converted in great numbers on several occasions under the apostles' preaching, not only in Judea, but also in Galilee, and even among the semi-Jewish inhabitants of Samaria. The Jews had now rejoined, as it were, a nation with a tested and incorrigible hatred; and having thus disowned their God, they were forsaken by him, and devoted to destruction, as the prophet intimates would be their retribution for that "decision" in which the four hundred and ninety years of this second and last probation in the promised land would result. It is thus strictly true that Christ personally and by his apostles "established the covenant" which had formerly been made, and was now renewed, with many of the chosen people for precisely seven years after his public appearance as a teacher; in the very middle of which space he superceded forever the sacrificial offerings of the Mosaic ritual by the one perfect and sufficient offering of his own body on the cross.

In the latter part of this verse we have a graphic outline of the terrible catastrophe that shall fall upon the Jews in consequence of their rejection of the Mesiah, which description that should not cease to distress them but by the earthly abomination nation: it forms an appendix to the main prophecy. Our Saviour's language leaves no doubt as to the application of this passage, in his memorable warning to his disciples that when they should be about to "see the abomination of desolation, spoken of by Daniel the prophet, stand in the holy place," then they should then "see flee in the moun- tains" (Matt. xxiv, 15, 16; comp. xxiii, 36, 38).

In the scheme at the head of preceding page, several chronological points have been partially assumed which entirely satisfy with the results obtained would require to be fully proved. A minute investigation of the grounds on which all the dates involved rest would occupy too much space for the present discussion; we therefore content ourselves with determining the two boundary dates of the entire period, trusting the intermedi ate ones to such incidental evidences of their correctness as may have been afforded in the foregoing elucidation, or may be furnished in connexion with the eventment proposed (see Browne, Ordo Sacrorum, p. 96-107, 203). If these distant points can be fixed by definite data independently of each other, the correspondence of the interval will afford strong presumption that it is the true one, which will be heightened as the subdividing of the prophecy proceeds; and the figures thus the above coincidence in the character of the events will receive all the confirmation that the nature of the case admits.

1. The Date of the Edict.—We have supposed this to be from the time of its taking effect at Jerusalem rather than from that of its nominal issue at Babylon. The distance, however, being only four months, will not seriously affect the argument. Ezra states (vii, 8) that "he arrived at Jerusalem in the fifth month [46, our July-August] of the seventh year of the king," Artax erxes. Ctesias, who had every opportunity to know, makes Artaxerxes to have reigned forty-two years; and Thucydides states that an Athenian embassy sent to Ephesus in the winter that closed the seventh year of the Peloponnesian war was there met with the news of Artaxerxes's death: πεδαγος η... ο Αρταξ... ... γειτονικος (κατα γαρ τον τον χρονον τη... λεηφης) (Edil. Pelop, iv, 50). Now this war began in the spring of B.C. 431, as all allow (Thuc. ii, 2), and its seventh year expired with the spring of B.C. 424: consequently, Artaxerxes died in the winter introducing this latter calendar year, and his reign began some time in B.C. 466. The same historian also states that The mistoches, in his flight to Asia, having been driven by a storm into the Athletic sea, at that time blocking Naxos, managed to safely carry away to Ephesus, where he sent a letter solicitation to Artaxerxes, then lately invested with the charge of the Persians, (Bell. Pelop, i, 137). The date of the conquest of that island is B.C. 466, which is, therefore, also that of the Persian king's accession. It is now necessary to fix the season of the year in which he became king. If Ctesias means that his reign lasted forty-two years, or only over rather than under that length, the accession must be dated prior to the beginning of B.C. 466; but it is more in accordance with the usual computation of reigns to give the number of current years, if nearly full, and this will bring the date of accession down to about the beginning of summer, B.C. 466. This result is also more in accordance with the simultaneous capture of Naxos, which can hardly have occurred earlier in that year. I may add that it likewise explains the length assigned to this reign (forty-one years) by Poleney, in his astronomical canon, although he has mislaid modern compilers of ancient history by beginning it in B.C. 465, having apparently himself fallen into some confusion, from silently annexing the short intermediate periods of anarchy, sometimes to the preceding and at others to the ensuing reign. The "seventh year" of Artaxerxes, therefore, began about the summer of B.C. 465, and the first [Hebrew 464] Hebrew month Hifisar (which in the Hebrew calendar month gives the following Molech April of B.C. 459 as the time when Ezra received his commission to proceed to Jerusalem for the purpose of executing the royal mandate.

2. The Date of the Conversion of Cornelius.—The solution of this question will be the determination of the distance of this event from the time of our Saviour's Passion; the absolute date of this latter occurrence must, therefore, first be determined. This is ascertained to have taken place in A.D. 29 by a comparison of the duration of Christ's ministry with the historical date of Luke iii, 1-20; but the investigation is too long to be inserted here. See CHRONOLOGY. A ready mode of testing this conclusion is by observing that this is the only one of the adjacent series of years in which the calculated date of the equinoctial full moon coincides with that of the Friday of the crucifixion Passover, as any one may see— with sufficient accuracy for the purposes of the present investigation and the week-day back from the present time. This brings the date of Christ's baptism to A.D. 25; and the whole tenor of the Gospel narratives indicates that this took place in the latter part of summer.

The following are special treatises on this prophecy: Hulsius, Specimina Antiquitatis (Bruxelles, 1668); Calov, De LXX Septimannis (Vitern, 1668); Sosimann, De LXX Hebr. Dan. (Lugd. 1678); Schönwald, Diss. de LXX Hebr. (Jen. 1730); Marshall, Treatise on the 70 Weeks of Daniel (Lond. 1729); Markwick, Calculation of the LXX Weeks of Daniel (ibid. 1729); Pfaff, Dios. de LXX Hebr. (Thib. 1734); Pagnonch, Diss. de Hebr. Danielis (Jen. 1749); Ayrton, Liber LXX Hebramatim Regimaut (Rom. 1748); Offerhaus, De LXX Septimanais Danieli (Griving, 1756); Parry, On Daniel's 70 Weeks (Northampton, 1762); Michaelis, Versuch über die 70 Wochen Daniels (Götting, 1771); also Epistolae de LXX Hebrinamudiamus (Lond. 1779); Hasenkamp, Veni, idem, id. 70 ill. (Lond. 1782); Moreau de St. Albin, Explication LXX Hebr. (Middelburg, 1771); Jung, Chronologia LXX Hebr. (Heidelberg, 1774); Blayney, Dissertation on the 70 W. (Ofx. 1775); Winter, Sermon on the 70 W. (Lond. 1777); Lorenz, Interpret, Non LXX Hebr. (Argent. 1791); Wiener, Inquise, in LXX Hebr. (Worcieb. 1787); Vull, Infinitum, in LXX Hebr. (Coust. 1801); Butt, Commentary on the 70 W. (Lond. 1807); Faber, Dissertation on the 70 W. (ibid. 1811); Stobard, Dissertation on the 70 W. (ibid. 1825); Scholl, Comment, de LXX Hebr. SEVENTY YEARS 603 SEVERINUS

Hoffmann, Die 70 Jahrwochen (Nuremb. 1836); Denny, Charts of the 70 W. (Lond. 1849); Blackley, The 70 W. Explained (ibid. 1850). See also the Stud. and Crit. 1854, ii, 270; 1858, iv; (Gettysb.) Evangel. Rev. April, 1867, iii; Goode, Warburton Lect. for 1854-58 (Lond. 1860). See DANIEL.

SEVENTY YEARS is a frequent number in Scripture, both symbolical and literal; e.g. the seventy years of Tyre's depression after its capture by Nebuchadnezzar till its relief by the downfall of Babylon (Isa. xxvii, 13-17); and especially the seventy years of the Jewish captivity at Babylon (Jer. xxv, 11; xxix, 10). See CAPTIVITY.

Severally. In the office for the baptism (Protestant Episcopal Church) of those of riper years, the questions proposed by the minister to the candidates are to be considered as addressed to them severally, and the answers to be made accordingly. By this rubric every candidate is to view himself as isolated and alone, although the minister is not obliged to distinctly propose the questions to every individual. In the Order of Confirmation there is a rubric somewhat analogous. The candidate "kneeling before the bishop, he shall lay his hands upon the head of every one severally, saying," etc.

Severians, an old term not now in use, which seems to have signified a kind of cornice, or string-course.

Severians, a sect of Encratite Gnostics, successors of the Tatianists, whose complicated system of Ἐκς they abandoned, but whose Encratite notions of creation they developed or heightened. The Severians held that the well-known Gnostic power Ἰάλδαβαθος was a great ruler of the powers; that from him sprang the Devil; that the Devil, being cast down to the earth in the form of a serpent, produced the vine, whose snake-like tendrils indicate its origin; that the Devil also created woman and the lower half of man. Eusebius states that the Severians made use of the law and prophets and Gospels, giving them a peculiar interpretation, but abused the apostle Paul and rejected his epistles, as also the Acts of the Apostles (Euseb. Hist. Eccl. iv, 29). Augustine, on the other hand, states that they rejected the Old Test. (Aug. Hist. xxiv). The tenet of the creation of the world by an inferior Demiurge presupposes the inherent evil of matter, and it is a natural deduction from this to deny the resurrection of the dead. The Severians followed this principle to this conclusion, according to Augustine (Hist. xxiv), while Natalis Alexander denies the probability of Augustine's report. The Severians were Doecetas, as were the Tatianists. See Blunt, Dict. of Sects, s. v.; Gardiner, Faiths of the World, s. v. "Monophysites;" Hagenbach, Hist. of Doc. i, 290; Neander, Ch. Hist. iii, 170. See ENCRATITES; MONOPHYSITES.

Severinanus, bishop of Gabala, in Syria. The historical appearance of this personage is interwoven with the life and fortunes of John Chrysostom. During a protracted absence of the latter in Asia Minor, Severinanus acted as his representative, and availed himself of the opportunity to intrigue against Chrysostom, for which he was expelled from Constantinople. Being soon recalled by his patroness, the empress Eudoxia, he became reconciled to Chrysostom; but he afterwards renewed his intrigue efforts in connection with theophilus of Alexandria. His later history is unknown. Six sermons on the history of the creation, together with the homilies already published by this missionary, along with works of Chrysostom in the Monfaucen ed. v, i, and the Mecchitarists of Venice published certain of his homilies in 1827. On his life, see Palladius, De Vita S. Joh. Chrysostom.; Socrates, Hist. Eccl. vi, 18; Sozomen, Hist. Eccl. viii, 6.

Severinus, Sr., the apostle of Noricum. The records of his early life are scanty, but indicate that he was born of Christian parents in Italy early in the 5th century. He chose a hermit's life in early youth, and settled in the town of Noricum, being transferred to a number of other towns, by the libation of the Eucharist, until he returned to the West in order to devote himself to the active propagation of Christianity among the heathen, establishing himself first in Pannonia, but afterwards in Noricum. The latter was an imperial province lying between the river Danube and the Alps, and was intersected with Roman roads on which were located not only fourteen large towns, but numerous Roman colonies, municipalities, and camps, which contained a Roman population (comp. Strabo, iv, 206, and vii, 304, 313; Tacitus, Ann. ii, 63; id. Hist. i, 11, 70; Pliny, xxi, 7, 90; Ptolemy, ii, 1, 12; viii, 6, 2, 7; 1, 8, 2; Zosimus, iv, 34). The population had also adopted the Roman language and customs, and commercial intercourse with active trade with the Italian cities, particularly Rome and Aquileia. Christianity had, consequently, been long introduced when Severinus settled in Noricum; but it had failed to subdue the prevailing paganism, so that in the middle of the 5th century St. Valentine was repeatedly expelled from the country because of his attempts to preach the Gospel. A complete resolution was not accorded to Christianity until after Theodosius the Great had issued a general edict prohibiting all idolatry throughout the empire (in 392 (Cod. Theol. de Pagannis, i, 7, 5, 11 sq.).); and an additional difficulty was encountered in the convulsions which grew out of the migration of Eastern nations then in progress.

Severinus fixed his residence in the neighborhood of Vepiana, a town on the Danube near where the modern Pöchlarn stands, and engaged in the practice of a rigid asceticism. He also founded a monastery and gathered a large number of pupils whom he trained, by precept and example, to imitate the virtues of the early Christians and to avoid the corrupt manners of the world. He never partook of food before sundown except on feast-days, walked constantly with bare feet, and always slept on a cæcumium spread on the bare floor of his chamber. But, not content with fulfilling his vow in the most faithful manner, he also frequently traversed the country to preach the Gospel, to comfort the Christian communities, who were incessantly ravaged by the predatory assaults of barbarous hordes, and to admonish them to avert the threatening dangers by prayers and good works, and to faithfully pay their expenses of the poor. He was also indefatigable in laboring to secure the liberation of imprisoned Christians, in healing the sick, and in entertaining and aiding helpless fugitives. Being endowed with the ability to form a correct estimate of existing conditions, he was frequently able to point out the places which were exposed to attacks from the enemy, and he never failed to give timely warning of danger and to suggest proper measures of defence. His reputation accordingly increased more and more, so that he was barely able to attend to all the requests addressed to him for instruction, counsel, comfort, and aid. Even the famous Odosius, leader of the Rgians and Severinans, did not dare to seek him and ask for his counsel and blessing when about to engage in his expedition to Italy in A.D. 476.

The zeal displayed by Severinus for the outward welfare of the people and for the success of Christianity led several congregations to make him their bishop; but he declined the office on the ground of his own solitude. The later years of his life were disturbed by the incursions of the Alemanni and the Rgians. One of the latest acts of his life was an attempt to persuade the Rgian king Faia, or Felethus, and his cruel queen, Gisa, to refrain from hostilities against the Noricans. He died Jan. 2, 482, and was eventually buried in Italy, first at Monte Felte, and afterwards on a small island near Naples, where a costly tomb had been erected for him by a noblewoman. Christianity had been firmly established in Noricum during his life; the bishopric of Lohr, subsequently transferred to Passau, had already...
been founded (Vita S. c, 30), and three others (Teur- 
nia, or Tiburnia, Cellinia, now Ciliey, and Eména, now 
Ludhiana, whose bishops are remembered among the 
members of a synod held at Grado in 579) were established 
in the course of the next century.

Severinus, pope from 638 to 640, and successor of 
Honorian I. The Monothelite troubles led to the 
prompting of his confirmation by the emperor Heraclius 
until 638. The charge was obtained on the pledge of his 
legates that the Roman clergy should subscribe to the 
emperor's Ecumen (q.v.). He was enthroned May 28, 
and died Aug. 1 following. He condemned the Ecumen, 
and consequently the Monothelite doctrine. —Hergoz, 
Real-Encyclop. s. v.

Severites. See Angelites.

Sevérus, founder of the Gnostic sect named after 
him Severians (q.v.). He came from Scoppolis to 
Flindia, and while a pagan was a lawyer. Receiving bap- 
tism at Tripoli, in Phœnicia, he became a monk and 
united himself with a society of zealous Monophysites. 
Banished, he came to Constantinople to seek protection 
from the emperor. He told him that the defence of the 
Chalcidonian Council was the cause of all the distur- 
bances and dissensions. The introduction of litany to 
old and venerated Church song the Trisagion which 
might serve as the basis of a coalition between the op- 
posing parties. Later, in the reign of Justin, Severus, 
who had managed to become patriarch of Antioch, saved 
his life by fleeing to Egypt. He returned to Constantin- 
ople with Anthimus, under the protection of the em- 
peror Sapor; but Justinian, finding that he had been 
imposed upon by the Monophysites, deposed Anthimus, 
and decreed that "the writings of Severus should be 
burned, and none should be permitted either to own or 
transcribe them." See Neander, Ch. Hist. ii, 581 sq.

Severus, SEVÉRUS, Sulpicius, St., was born about 368, of a 
prominent family, and in manhood shone for a time as 
a leader. He was married the daughter of a wealthy 
consul; but she died about 392, and he spent 
the remainder of his life in monastic seclusion with a 
few like-minded persons, in Aquitaine. He was an ad- 
mirer of Martin of Tours, whom he repeatedly visited. 
Gennadius states that he was gained over to Pelagian- 
ism in his old age, and that he had expressed himself in favor of that system; but that, having dis- 
covered his error, he imposed himself on perpetual si- 
cence as a penance. He died at Marseilles, whither he 
had retired, soon after A.D. 410. The writings of Se- 
verus are, Vita S. Martini Turonensis, with legendary 
embellishments.—Historia Sacra, or Chronica Sacra, 
containing Jewish and Church history to A.D. 400, in- 
terspersed with marvels, but written in a flowing style:— 
Dialogi Tres, written about A.D. 405, and treating in 
part of the monastic life and virtues, in part of the 
merits of Martin of Tours; finally, some letters of no im- 
portance and doubtful authenticity (see Bühler, Christl. 
Röm. Thed., p. 218-222). The works of Severus have 
been separately published in various editions; the best 
complete edition is that of Hieronymus de Prato (Vero- 
na, 1751-54), without the letters. A reprint from this 
ed. with the letters added is given in Galland, Bibl. 
Patrum, viii, 355 sq.—Hergoz, Real-Encyclop. s. v.
Seawall, Samuel, chief-justice of the supreme court of Massachusetts, was born at Bishopstone, England, March 28, 1652. His father established himself in the United States in 1661, when Samuel was nine years old. In his childhood the latter was under the instruction of Mr. Parker, of Newbury. He was graduated at Harvard College in 1671, and afterwards preached for a short time. In 1688 he went to England, and resided there until 1699. In 1699 he was appointed in the new charter one of the council, in which station he continued till 1725. He was made one of the judges in 1692, and chief-justice of the superior court in 1718. Sharing in the then general belief in witchcraft, he concurred in its condemnation in 1692; but at a public fast, Jan. 14, 1697, he acknowledged it to be an error. In 1699 he was chosen one of the commissioners of the society in England for the propagation of the Gospel in New England. He died Jan. 1, 1730. By his wife he received a large fortune, thirty thousand pounds, which he employed for the glory of God and the advantage of men. Eminent for piety, wisdom, and learning, in all the relations of life he exhibited the Christian virtues and secured universal respect. For a long course of years he was a member of the Old South Church and one of its greatest ornaments. Judge Seawall's writings are, Answer to Que- ries respecting America (1680) — Prospects touching the American Indians (1696) — Horae theologice moralia of John (1721, 4to) — Memoriale relating to the Kennebec Indians (1721, 4to) — Phoenomena quaedam Apocalypptic ad Aspectum Novi Orbis Configurata (2d ed. 1727, 4to).

Seawall, Thomas, D.D., a distinguished minister of the Methodist Episcopal Church, was born in Essex, Mass., April 28, 1818. He was educated at Wilbraham, and graduated from the Wesleyan University, Middle- town, Conn., 1837. He united with the Baltimore Conference in 1841, and spent a year in Europe and the East. He entered upon active work when he returned, but on account of ill-health located in 1848. He was readmitted in 1849 and given a supernumerary relation, which he retained until 1863, when he resumed pastoral work. In 1866 he was transferred to New York East Conference and stationed in Brooklyn, and was retransferred in 1869, taking a supernumerary relation. He died Aug. 11, 1870. In 1860 Dr. Sewall was a delegate to the General Conference. He was a man of refined tastes and scholarly culture, a born orator, and a successful minister. See Minutes of Annual Conferences, 1871, p. 19.

Seawell, William (1), the historian of the Quakers, was the son of Jacob Williamson Sewell, and was born at Amsterdam in 1650. His grandfather left his native country, England, that, as a Brownist, he might enjoy more freedom in Holland. William Seawell lost both his parents in early life, but, having been instructed by them in the principles of the Quakers, he adhered to them during life. He was a student of unwarried application, attaining a knowledge of Greek, Latin, English, French, and High Dutch. He is chiefly noted for his History of the People called Quakers, written first in Low Dutch, and afterwards by himself in English. One principal object with the author was a desire to correct what he conceived to be gross misrepresentations in Gerard Groce's History of Quaker-ism. The work seems to have been first published in 1722, folio, and reprinted in 1725.

Seawell, William (2), an English clergyman, was born in the Isle of Wight about 1805. The son of a solicitor, he was educated at Harrow and Oxford, became fellow of Exeter College, and incumbent of Caris- bootham, Isle of Wight. He was public examiner in 1836 to 1841, and in 1852 was appointed principal of St. Peter's College at Radley. He was a supporter of the tractarian movement. His published works are, Hora Philologica: — Conjectures on the Structure of the Greek Language (1880) — Sacred Thoughts in Verse (1881; 2d ed. 1882) — Christian Veneration of the Scriptures (1881) — besides Harmonia, and treatises on Christian morals and politics, etc.

Seawell, William D., a Methodist Episcopal minister, was born in Chesherville, Me., July 15, 1818. He was converted in 1831, entered the itinerancy on Sidney Circuit September, 1866, under the presiding elder; admitted on trial in 1857, and served two years on Kilmarock and Harmony circuits; was received into full connection at Utica, N.Y., in 1869, and appointed to Vassarborough Circuit, where he pursued his labors with great zeal and success until near the time of his death, which occurred April 24, 1840. He possessed a good and well-cultured mind. His attachment to the doctrines and institutions of the Church was strong and unwavering. See Minutes of Conferences, iii, 145.

Sexagesima, the Sunday which, in round numbers, is sixty days before Easter.

Sexes, Separation of, in Churches. The rules of the primitive churches required the separation of the sexes in the churches, and this was generally observed. The men occupied the left of the altar on the south side of the church, and the women the right on the north. They were separated from each other by a veil or lattice. In the Eastern churches the women and catechumens occupy the gallery, while the men fill the pews below. In some churches a separate apartment was also allotted to widows and virgins. See Coleman, Christ. Antiq. a. v.

Sext, a name given to the noonday service (q. v.) of the early Christian Church because it was held at the sixth hour.

Sexton, a corruption of sacristan (q. v.). This officer was anciently the attendant and waiter on the clergy. His duties at the present day in the Church of England is to keep the church, dig graves, provide the necessary for service — as for baptism and the Lord's supper — under the direction of the church-war- dens. The office may be held by a woman, and the salary usually depends on the annual vote of the parishioners. In Scotland the sexton, whose duties are much the same as in England, is usually called the beadle, from the French bedel, to cry, or to make proclamation. The appointment to office in the Established Church is with the heritors.

Sextry. See SACRISTY.

Sextus, a term, in the ancient canon law, to signify a collection of decreals made by pope Boniface VIII; thus called from the title, Liber Sextus, and being an addition to the five volumes of decreals collected by Gregory IX. The persons reputed to have been commissioned to draw it up were William de Manselote, archbishop of Ambrun; Berenger, bishop of Beziers; and Richard, bishop of Sienna.

Seymour, Truman, a minister of the Methodist Episcopal Church, was born in Albany, N. Y., Jan. 25, 1799, and united with the Church there at the age of seventeen. In 1829 he joined the New York Conference, and was a member of this, and, later, of the Troy Conference, until his death, Nov. 15, 1874. See Minutes of Annual Conferences, 1875, p. 64.

Seys, John D.D., a minister of the Methodist Episcopal Church, was born in Santa Cruz Island, West Indies, March 30, 1799. In 1821 he joined the Wesleyan Church in the island of St. Eustatious. Notwithstanding much opposition from friends, he continued in this Church, and in 1835 was licensed while he was ordained in 1829, and, coming to the United States, joined the Oneida Conference. In 1833 he was a missionary among the Oneida Indians, and in 1834 sailed for Liberia as superintendent of the Methodist Episcopal Church Missions in West Africa. He returned in 1841,
and in 1842 he was appointed to Wilkesbarre, Pa. The following year he went again to Liberia, from which he returned in 1845, when he resigned his connection with the mission and joined the New York Conference. In 1850 he became travelling agent of the Maryland Colonization Society, locating at Baltimore, where he remained six years. He was then appointed agent for the Colonization Society in Indiana, Illinois, and moved to Springfield, O. The same year he went to Africa and located a settlement, and from this time to 1870 was associated with Africa and the improvement of the colored race. He also acted as United States agent for recaptured slaves, and as United States consul and minister resident in Liberia. On his return to the United States, in 1871, he was a member of the Cincinnati Conference. He died Feb. 9, 1872. See Minutes of Annual Conferences, 1872, p. 107.

Sforno, Obadiah. See Obadiah ben-Jacob de Sforno.

Sha'labbin (Heb. Shaalabbin', שָׁלַבִּין; but many MSS. Shaalbabbin', שָׁלַבְבִּין, city of foaxes) Sept. Σαλαβίνιν v. τ. Σαλαβίνιμ; Vulg. Selebia), a town in the tribe of Dan (Josh. xix. 42, where it is named between Ir-shemesh and Ajalon); probably the same elsewhere (Judg. i. 38; 1 Kings iv. 9) called Shaalabim (q. v.).

Sha'labim (Heb. Shaalabim', שָׁלַבִּים, according to First = שַׁלַבִּים, house [i.e. place] of foaxes; Sept. Σαλαβίνιν, Σαλαβίον, v. τ. Σαλαβίινιμ, Βελαλαιμ, and even αἱ ἄλλαι), occurs in an ancient fragment of history inserted in Judg. i, enumerating the towns of which the original inhabitants of Canaan succeeded in keeping possession after the general conquest. Mount Heres, Ajalon, and Shaalabim were held against the Danites by the Amorites (ver. 55) till, the help of the great tribe of Ephraim being called in, they were at last compelled to succumb. It is mentioned with Ajalon and Gibea in John xix. 42 (Shaalabim and Gibea Beth-shemesh both there and in 1 Kings iv. 9, in the last passage as making up one of Solomon's commissariat districts. By Eusebius and Jerome it is mentioned in the Onomasticon (s. v. Selab) as a large village in the district of Sebastia (i. e. Samaria), and as then called Selaba. But this is not very intelligible, for, except in the statement of Josephus (Ant. xx. 1, v. 1) in which the allotment of the Danites extended as far north as Dor (Tantura), there is nothing to lead to the belief that any of their towns were at all near Samaria (see Schwarz, Palet. p. 140), while the persistent enumeration of Shaalabim with Ajalon and Beth-shemesh, the sites of both which are within the territory of the Danites, shows that within a radius of fifteen miles west of Jerusalem, is strongly against it. It is also at variance with another notice of Jerome, in his commentary on Ezek. xlviii. 22, where he mentions the "towers of Ailon and Selebi and Emmaus-Nicopolis," in connection with Joapha, as three landmarks of the tribe of Dan. Shaalabim may possibly be identified with the modern village Beit Sira, a village a little north of Yalo, on the south side of Wady Suleiman; or, perhaps (so First), rather with Selib, a ruined village north of the wady (Robinson, Researches, 1852, iii, 144, notes). See Shaalbonite.

Sha'labbonite (Heb. Shaalboni, שָׁלַבְבִּין, Sept. Σαλαβίνιν, v. τ. Σαλαβίον, Σωμίν, and even Όομί, Vulg. Salabonitas, de Salboni), an epithet of Ellahba (q. v.), one of David's thirty-seven chief heroes (2 Sam. xxiii. 17), called in some MSS. of the LXX Calumian, a place otherwise unknown, unidentical with Shaalabim (q. v.).

Sha'aph (Heb. שָׁאָף; Gen. 14:16, 18; 2 Kgs. 15:29; 2 Chron. 25:6), the name of two men.

1. Last named of six sons of Jahdai, of the tribe of Judah (1 Chron. ii. 47). B.C. prob. post 1612.

2. Third named of four sons of Maachah, concubine of Caleb, of the tribe of Judah; he was the "father" (i. e., founder) of Madmannah (1 Chron. i. 49). B.C. post 1612.

Sha'air'am (Heb. Sha'air'am, שָׁאָרֵי-ם; two gates; Sept. in Josh. xvi. 25, in Sam. i. 38, in Chron. i. 37, v. τ. Σαραίαμ, Vulg. Saraiam, Saraim), a town in the "valley" or maritime plain of Judah (Jos. xv. 36, A. V. "Sharaim," where it is named between Aceah and Aditham). Its occurrence among the cities of Simeon (1 Chron. iv. 31) is probably a clerical error for Shaaribah (Jos. xix. 6). "It is mentioned again in the account of the rout which followed the fall of Goliath, where the wounded fell down on the road to Shaaraim and as far as Gath and Ekron (1 Sam. xvii. 52). These two notices are consistent with each other. Goliath probably fell in the Wady es-Sunnt, on opposite sides of which stands the representations of Shinar and Jarmuth; Gath was at or near Tell es-Safah, a few miles west of Sochoh at the mouth of the same wady; while Ekron (if 'Akir be Ekron) lies farther north. Shaaraim is probably therefore to be looked for somewhere west of Shweikeh, on the lower slopes of the hills where they subside into the great plain" (Smith). "The valley of Amona runs down among the hills for some distance, and then forks below Tell-Zakartah; one branch, or rather side valley, running to Gath (Tell es-Safah), and the other to the plain of Ekron. Perhaps the town of Shaaraim may have been situated at the fork, and may have taken its name from the 'two passages' (see App. to vol. ii. for Shaar hazen, "gates") (Kim). It is probably identical with the Ir-Tarain of the Talmud (Tosephah, Ahaloth, s. f.), for the Chaldean tarain has the same meaning, gates (Schwarz, Palet. p. 102). From the associated localities it must be sought in the vicinity of the modern Shannah, a village with traces of ruins about two and a half miles south of Ekron (Van de Velde, Memoir, p. 114). Lieut. Conder at first proposed Tell Zakartah as a suitable position for Shaaraim (Quar. Statement of "The Pal. Explor. Fund," 1875, p. 194), but M. Ganneau suggests the ruin Sar'ich (ibid. p. 162), mentioned in Dr. Robinson's list (Append. to vol. iii, 1st ed. of Researches) between Shweikeh and Ezana and Bei-Natif, in which Lieut. Conder seems finally to coincide (Ten Work in Pal. ii, 339).

Shaash'gaz (Heb. Shaashgaz, שָׁשֶׂגֶז, Persian, servant of the beautiful; Sept. Gezal, the appropriate name of a Persian eunuch, the keeper of the concubines in the court of Xerxes (Esth. ii. 14). B.C. cir. 525. See Hegai.

Shabbath. See Sabbath; Talmond.

Shabb'mitha [many Shabbath'at, some Shabbath'at'] (Heb. Shabbath'ata, שַׁבַּתָּת, Sabbathical, i. e. born on the Sabbath; Sept. Σαββάτα, v. τ. Σαββάται and Καββάται; in Neh. viii. 7 Σαββάταις, one of the chief Levites, who was active in the reformation and restoration under Ezra and Nehemiah (Ezra x. 15; Neh. viii. 7; x. 16). B.C. cir. 450. See Saba.}

Shabal. See Smail.

Shachal. See Lion.

Shachaph. See Cuckoo.

Shach'ia [many Schach'ia] (Heb. Shok'ya, שֹׁכַקְיָה; the margin, accusation; Genisenius or announcement [Furst]; but the text has Shok'ya, שֹׁכַקְיָה, captivity; Sept. Συκαία v. τ. Σύκαται and Σύκαται; Vulg. Secai, Secu), the sixth name of the sons of Shaaraim (q. v.), of the tribe of Benjamin, by his wife Hodesh (1 Chron. viii. 10). B.C. post 1612.

Shadanana, in Hindu mythology, is a surname of the god Kirtikeya, signifying "the head with six faces."

Shad'rai (Heb. Shadday, שָׁדַדְיָה, in psalm-pref. as an ancient name of God, rendered "Almighty" everywhere in the A. V. In all passages of Genesis except one (xlix,
SHADDAI

607

SHADOW

"25", in Exod. vi, 3, and in Ezek. x, 5, it is found in connection with נְּבִּיא, "God," El Shaddai being there rendered "God Almighty," or the Almighty God." It occurs six times in the Septuagint, twice in Numbers (xii, 4, 16), twice in Ruth (s, 20, 21), thirty-one times in Job, twice in the Psalms (Ixxvi, 14 [15]; xc. 1), once in Isaiah (xiii, 6), twice in Ezekiel (i, 24; x, 5), and once in Joel (l, 15). In Genesis and Exodus it is found in what are called the "Elohist" divisions of those books, in Numbers in the Jahvistic portion, and throughout Job the name Shaddai stands in parallelism with Elohim, and never with Jehovah.

By the name or in the character of El Shaddai, God was known to the patriarchs—to Abraham (Gen. xvii, 1), to Isaac (xxxvi, 3), and to Jacob (xlii, 14; xliii, 9; lxxix, 25). The name Jehovah was revealed (Exod. vi, 3). By this title he was known to the Midianite Balaam (Num. xxxii, 4, 16), as God the Giver of Visions, the Most High (comp. Ps. xci, 1); and the identity of Jehovah and Shaddai, who dealt bitterly with her, was recognised by Naomi in her sorrow (Ruth i, 20). Shaddai, the Almighty, is the God who chastens men (Job v, 17; vi, 4; xlii, 16; xxii, 2); the just God (vii, 3; xxiii, 10), who hears prayer (vii, 5; xxii, 26; xxvii, 10); the God of power who cannot be resisted (xxv, 25), who punishes the wicked (xxi, 20; xxvii, 15), and rewards and protects those who do well (xxviii, 25, 29). Shaddai is the God of providence (xxii, 17, 23; xxvii, 11), and of foreknowledge (xxiv, 1), who gives to men understanding (xxxi, 8) and life (xxxi, 4): "an excellent and powerful, in judgments, and in justice, whom none can perfectly know (xi, 3; xxxvi, 20). The prevalent idea attached to the name in all these passages is that of strength and power, and our translators have probably given to "Shaddai" its true meaning when they rendered it "Almighty."

In the Targum throughout the Hebrew word is retained, as in the Peshitta-Syrac of Genesis and Exodus, and of Ruth i, 20. The Sept. gives θεὸς, οἰκονομός, Εἰκόνα, Κύριος, παντοκράτωρ, Κύριος παντοκράτωρ, τὸ τάγμα πάντων (Job viii, 3), ιστοριῶν (Ps. Ixxvi, 14 [15]), τὸ Θεοῦ τοῦ οὐρανοῦ (Ps. xcvi, 1), σαβέζ (Exek. x, 5), and ταυστορία (Joel i, 15). In Job xxix, 5 we find the strange rendering εὐδοκιμία. In Genesis and Exodus "El Shaddai" is translated θεος μου, ους, and σωτήρ, "God," in Deut. xliv, 3. The word is often rendered by the Septuagint θεος or θεος, in all cases except Domitius (Job vi, 17; vi, 4; 14; Isa. xiii, 6), Deus (Job xxxii, 3; xl, 2), Deus处处 (Ps. xcvi, 1), sublimis Deus (Ezek. i, 24), celestis (Ps. Ixxvi, 14 [15]), potentis (Joel i, 15), and dignae (Job xxxvii, 23). The Venetian-Greek has κραταιος. The Peshitta-Syrac, in many passages, renders, in "Shall dai," simply "God," in others καθαρτιος, "strong, powerful" (Job v, 17; vi, 4; etc.), and once εὐδοκιμία, "Most High" (ver. 14). The Samaritan version of Gen. xxvii, 1 has for "El Shaddai" "powerful, sufficient," though in the other passages of Genesis and Exodus it simply retains the Hebrew word; while in Numb. xxiv, 4, 16, the translator must have read יִדְּדּּ כָּה, "a field," for he renders "the vision of Shaddai" and "the vision of the field," i.e. the vision seen in the open plain. Aben-Ezra and Kimchi render it "powerful."

The derivations assigned to Shaddai are various. We may mention, only to reject, the Rabbinical etymology which connects it with שְׁדָה, "kneading," given by Rashi (on Gen. xxvii, 1), "I am he in whose Godhead there is sufficient for the whole creation;" and in the Talmud (Chagiga, fol. 12, col. 1), "I am he who said to the world, Enough!" According to this, שְׁדָה = שְׁדָּה יַנְּעִי. "He who is sufficient," "the all-sufficient One," and so "He who is sufficient in himself," and therefore self-existent. This is the origin of the ἐκαριος of the Sept., Theodore, and Hesychius, and of the Arabic alikhoj of Shaddai, which has the same meaning. Gesenius (Gram. § 86, and Jenaix xiii, 6) regards שדָּה, shada, as the plural of majesty, from a singular noun, שָדָּ, shad, root בּ. שד, שד, שד, shad, shad, shad, shad, shad, shad, which they derive "to be strong" (Furst, Handb.). It is evident that this derivation was present to the mind of the prophet from the play of words in Isa. xiii, 6. Ewald (Lehrb. § 153 c, 5th ed.) takes it from a root יִשְׁכָּ, yeshca, and compares it with יִשְׁכָּ, ishsho, from יִשְׁכָּ, ishsho, the older termination יִשְׁכָּ being retained. He also refers to the proper names שִׁבְּדִי, Shishai (Jesu), and שִׁבְּדִי, Bashay (Neh. iii, 18). Rödiger (Gesen. Thesaur. s. v.) disputes Ewald's explanation, and proposes, as one less open to objection, that Shaddai originally signified "my powerful ones," and afterwards became the name of God Almighty, like the analogous form Adonai. In favor of this is the fact that it is never found with the definite article, but such would be equally the case if Shaddai were regarded as a proper name. On the whole there seems no reasonable objection to the view taken by Gesenius, who also adopts (Gram. § 139, 6).

Shaddai is found as an element in the proper names Amminadab, Zuzuadhai, and possibly also in Sheede there may be a trace of it.

Shade, JACOB B., a minister of the German Reformed Church, was born in Montgomery County, Pa., April 25, 1817. He began his studies in Marshall College, Mercersburg, Pa., in May, 1839; and finished his theological studies in the seminary located in the same place. Full of zeal, he preached, while in the seminary, in destitute places among the mountains west of Mercersburg, and was the means of organizing several congregations. He was licensed and ordained in May, 1843, and continued his labors for a short time in the mountains where he had preached before. At the close of the same year he became colonel in the Secretary, Pennsylvania, and was thus able to organize several congregations. He was also fortunate in the field of work in which he spent a year or two in the same work in Alabama. On his return his health had entirely failed, and he died Jan. 6, 1846. With ordinary natural abilities, he was possessed of extraordinary zeal and devotion to the work of Christ. He preached in German and English.

Shaford, GEORGE, a minister of the Methodist Episcopal Church, was born at Scotter, in Lindsey, Lincolnshire, England, Jan. 12, 1775. At the age of nineteen he received his first communion in the Established Church, and for a time was very serious and punctual in the discharge of religious duties; but he fell back into sin. He enlisted in the militia while still a youth, and became quite desperate in wickedness. He was hopefully converted May 5, 1795, and within two weeks became a member of the Methodist Society. In 1796 he united with the Conference, and was appointed to labor in the west of Cornwall. He was sent in the spring of 1778 to America; and labored for a month in New Jersey, four months in New York city, and four or five months in Philadelphia. He was stationed in 1776 in the Virginian line of the Continental Army, awaiting to take the test-oath during the Revolutionary war, he returned in 1778 to Great Britain. There he resumed his labors, and continued them with unabated diligence and fidelity till disease and infirmity obliged him to retire. He died March 11, 1816. Mr. Shaford had a Christian character that was decidedly marked. He was a man of prayer, of Christian temper, and godly conversation. As a preacher he was not above mediocrity, and yet his labors were very successful. See Simpson, Cyclop. of Methodistism, s. v.; Sprague, Annals of the Amer. Pulpit, vii, 34.

Shadow (םָשָׁ, šet, or בָּשָׁ, šeṭel; σκια, either simple or in composition), the privation of light by an object interposing between a luminary and the surface on which the shadow appears. The light of the sun mar
be obscured; but "with the Father of light there is no parallax nor tropical shadow;" no interposing bodies can change his purposes or for a moment intercept and turn aside his truth, because he is equally present everywhere (James i. 17). A shadow falling on a place follows the course of the body which causes it; and, as it is often extremely rapid, the fleetness of human life is often compared to it (1 Chron. xxi. 15; Job xiv. 2). Shadow is also used in the sense of darkness, gloom, "the shadow of death"—I. E. death-shade, a season of severe loss or persecution (Psa. xxviii. 8; Isa. xxi. 10). The notion of ignorance and wretchedness (Matt. iv. 16; Luke i. 79). Hackett (Illustr. of Script. p. 46 sq.) thinks that David's image of the valley of death's shadow may have been suggested by such wild, dreary ravines as the Wady Aily. Shadow is also used for covering and protection from the heat for repose, where the word shade would be preferable. The Messiah "is as the shade of a great rock in a weary land" (Isa. xxxii. 2; xlix. 2; Sol. Song ii. 3; Psa. xvii. 8; lxiii. 7; xcli. 1) (comp. Hackett, Illustr. of Script. p. 50 sq.). Shadow is used so that the Jewish economy was an adumbration, or a shadowing-forth, of the things future and more perfect in the Christian dispensation (Heb. viii. 5; Col. ii. 17; Heb. xi. 10). The curative power of Peter's shadow (Acts v. 15), see Engelschall, De Umbra Petri (Lips. 1725); Krakewitz, id. (Rost. 1704).

Shadrach (Heb. Σαδράχ, Assyrian, Sadrāx, v. r. Sādrāx; Vulg. Sèdrach), the Chaldee name of Hananiah, the chief of the "three children" who were Daniel's companions (Dan. i. & 7, etc.). His song, as given in the Apocryphal Daniel, forms part of the service of the Church of England, under the name of "Benedictus omnia opera." A long prayer in the furnace is also ascribed to him in the Sept. and Vulgate; but this is thought to be by a different hand from that which added the song. The history of Shadrach, or Hananiah, is briefly this. He was taken captive with Daniel, Michael, and Azariah at the first invasion of Judah by Nebuchadnezzar, in the fourth, or, as Daniel (1, 4) reckons, in the third, year of Jehoiakim, at the time when the Jewish king himself was bound in fetters to be carried off to Babylon. B.C. 606. Being, with his three companions, apparently of royal birth (ver. 3), of superior understanding, and of goodly person, he was selected, with them, for the king's immediate service; and was for this end instructed in the language and in all the learning and wisdom of the Chaldeans as taught in the college of magicians. Like Daniel, he avoided the pollution of the meat and wine which formed their daily provision at the king's cost, and obtained permission to live on pulse and water. When the time of his probation was over, he and his three companions, being found superior to all the other magicians, were advanced to stand before the king. When the decree for the slaughter of all the magicians went forth from Nebuchadnezzar, we find Shadrach uniting his companions in prayer to God to reveal the dream to Daniel; and when, in answer to that prayer, Daniel had successfully interpreted the dream and been made ruler of the province of Babylon and head of the college of magicians, Shadrach next appeared to a high civic office. But the penalty of Oriental greatness, especially when combined with honesty and uprightness, soon had to be paid by him, on the accusation of certain envious Chaldeans. For refusing to worship the golden image he was cast with Meshach and Abed-nee into the burning furnace. But he maintained his integrity and his abhorrence of idolatry, and came out of the furnace with his two companions unharmed, heard the king's testimony to the glory of God, and was "promoted in the province of Babylon." We hear no more of Shadrach, Meshach, and Abed-nee in the Old Test, after this; neither are they spoken of in the Apocrypha. In Daniel we come to the Epistle to the Hebrews, as having "through faith quenched the violence of fire" (Heb. xi. 33, 34). But there are repeated allusions to them in the later Apocryphal books, and the martyrs of the Maccabean period seem to have been much encouraged by their example. See I Macc. ii. 55, 60; 3 Macc. vi. 6; 4 Macc. xii. 9, 11, 14; xvii. 3, 21, xviii. 12. Bardenhewer (I. E. H. p. 557) observes, indeed, that next to the Pentateuch no book is so often referred to in these times, in proportion, as the book of Daniel. The apocryphal additions to Daniel contain, as usual, many supplementary particulars about the furnace, the angel, and Nebuchadnezzar, besides the introduction of the prayer of Shadrach and the hymn. The odour Parker observes with truth, in opposition to Berthold, that these additions of the Alexandrine prove that the Hebrew was the original text, because they are obviously inserted to introduce a better connection into the narrative (Josephus, Ant. x. 10; Pridexue, Connect. i. 50, 60; Parker's De Wette's Introduc. ii. 480-510; Grimm, on 1 Macc. ii. 60; Hitzig [who takes a thoroughly sceptical view], on Dan. iii; Ewald, iv. 106, 575-579; Kell, Einleit. Daniel). See DANIEL.

Shade as to the etymology, "this name is identified by some with Hadrack, hadrack (Zech. ix. 1), the name of a Syrian god who represents the seasons ( itemView _to turn, 'wind'). The interchange of the short sibilant with the sound without parallel. Others profess to trace the name to a Babylonian source, and connect it with the Assyrian Sadriru or Sadrhu, 'the great scribe' (ViewItem _frequent in Assyrian) before the guttural' (Speaker's Commentary). According to Boi, the name is Persian, and signifies reproaching in the way; according to Benfey, it is Zend, meaning royal.

Shady-trees, in Job xi. 21, 22, is the rendering of the Hebrew tsedilim, thầylîm (Sept. and Vulg. render at random), which perhaps means properly the prickly lotus-bushes. See TREE.

Shaffer, Hiram M., a minister of the Methodist Episcopal Church, was born in Carroll County, O., in 1804, and graduated as a physician when but eighteen years of age. He afterwards studied law, and was admitted to the bar at Sidney. He was graduated at Kenyon College in 1831, was licensed to preach in 1832, and entered the Ohio Conference the same year. In this and the Central Ohio Conference he passed his ministerial life. He was several times elected delegate to the General Conference. He died near Richwood, O., Dec. 29, 1871. He published a work on Infant Baptism (N. Y. 1836, 12mo) and a treatise on a Manual Conference (1847), 92. See Churches of Christ of the American Baptist Church (1872), 92.

Shake appears in a few passages of the A. V. In two senses: as the rendering of (a) " śākhā, śēkā (Isa. xi. 2), an arrow (as often elsewhere); (b) " śākēr, properly a thigh (as often); hence the shank of the golden candlestake in the Tabernacle, where the stem (ViewItem _separated into the three feet (Exod. xxv. 31; xxxvii. 17; Num. viii. 4). See CANDLESTICK.

SHAF'T, the body of a column or pillar; the part between the capital and base. In Middle-Age architecture the term is particularly applied to the small columns which are clustered round pillars, or used in the jams of doors and windows, in arcades, and various other situations. They are sometimes cut on the same stone, or made of one block which is broken, and sometimes of separate pieces. In the latter case they are very commonly of a different material from the rest of the work, and are not unfrequently polished: this mode of construction appears to have been first introduced towards the end of the Norman style. In Early Norman work they are given to them, but in the later style they are occasionally octagonal, and are sometimes ornamented with zigzags, spiral mouldings, etc. In the
Early English style they are almost always circular, generally in separate stones from the other work to which they are attached, and very often banded; in some instances they have a narrow fillet running up them. In the Decorated style they are commonly not set separately, and are frequently so small as to be no more than vertical mouldings with capitals and bases; they are usually round and filleted, but are sometimes of other forms. In the Perpendicular style they are cut on the same stones with the rest of the work. They are most generally round, and are sometimes filleted; in some cases they are polygonal, with each side slightly curved.

Shaftesbury. Anthony Ashley Cooper, the third earl of, was born in London, Feb. 26, 1671. He was educated under the supervision of Locke, entered Parliament in 1699, from which he withdrew on account of delicate health, and took up his residence in Holland in 1698 or 1699. He entered the House of Lords in 1700, supporting the measures of William III, and retiring upon the king's death. He was noted as a philanthropist, was esteemed as a freethinker, and wrote a Letter on Euthanasia (1708) in defence of the rights of the philosophical rhymes—Sensus Communis (1710): A Soliloquy, or Advice to an Author (1710). He died at Naples, Feb. 5, 1713. His principal work, Characteristics of Men, Manners, Opinions, and Times, was posthumously published (1719-23, 3 vols.).

Sha'gë (Heb. She'gè, שָעֹג, "writing.; Sept. סְבֶה v. r. סָבַּב). He is called the father of Jonathan, one of David's captains (1 Chron. xi, 34). B.C. cir. 1050. In the parallel list of 2 Sam. xxvii, 38, he is called Shammah (q. v.), unless, as seems probable, there is a confusion between Jonathan the son of Shage the Hararite, Jonathan the son of Shammah, David's brother, and Shammah the son of Agee the Hararite.

Shabar. See ADELETH-SHAHAR.

Shahara'tim (Heb. Shehchara'tiym, שְׁחָרָתִים, double dawn, i.e. the morning and evening twilight; Sept. ζαυρίη v. r. ζαυρία and ζαυρίη; Vulg. Saharaim), a person named among the descendants of Benjamin as the father of several children in the land of Moab by two wives (1 Chron. viii, 8). B.C. ante 1612. Considerable confusion appears to have crept into the text where this name occurs (ver. 3-11), which may perhaps be removed by transposition of the middle clause of ver. 8 and the whole of ver. 6 after ver. 7, and rendering as follows: "And there were sons (born) to Bela, Addar, and Gera, and Abihud, and Abiashua, and Naaman, and Acoha [or Achiach], and Gera [repeated by error], and Shephupham [spuriously inserted], and Huram [spuriously inserted likewise from the sons of Becher] and (their father) himself banished Naaman, and Achiach [or Acoha], and Gera [repeated by error], and Huram; he begot Uzza and Achishuad. And these are the descendants of Echud [i.e. Achiach, otherwise Acharih], chief of the progenitors of the inhabitants of Geba (afterwards) exiled to Manachath: Shacharayim begot (children) in the land of Moab of his two wives Hashhim and Baara [or Cho-desh]—namely, of the latter, Yobab, and Tsihyah, and--IX—Q q.

Meysha, and Malkam, and Yeats, and Shobyra [v. r. Shokyrah], and Mirmah, chiefmen of their lineages; and of the other, Abitub and Elpaal." See Jacob.

Shahab'ism (some Shakast'ism) (Heb. Shachast'isim, עַשְׁכֹּסִית, so the marg., but the text has Shactast'isim, עַשְׁכֹּסִית, towards the heights [for the word is plur. with the 7 local added]); Sept. Σαλιμ υπό τον ἄγιον τον κυρίου, [taking the last syllable for ἀγιον, to the sea], v. r. ἀγιον; Vulg. Sceastro, a place in the tribe of Issachar, between Mount Tabor and the Jordan (Josh. xix, 22). A trace of the name may yet remain in the village of Sirin, north of Wady Sharar, near which it joins Wady Bireh, south-east of Tabor.

Shaked. See ALMOND.

Shakers, the popular name of an American communitarian sect who call themselves "The United Society of Believers in Christ's Second Appearing." 1. History. The Shakers arose as a distinct body in the first half of the 18th century, but are accustomed to trace their origin back to the Camisards (q. v.), or French Prophets. Three of their number went to England about 1705 and propagated the prophetic spirit so rapidly that in the course of the year there were two hundred or three hundred of these prophets in and about London. The subject of prophecy was the near approach of God's kingdom and the millennial state. In 1747 James Wardley, originally a Quaker, headed a party who had no established creed or particular mode of worship and professed to be governed by the spirit of God as he should dictate. In 1757 Ann Lee (Mrs. Stanley) adopted Wardley's views, joined the society, and became its head, the society adopting its distinguishing name of Shakers. "The work," they said, "which God promised to accomplish in the latter day was eminently marked out by the prophets to be a work of shaking. From this time till 1770 Ann Lee professed to have received by special manifestation of divine light those revelations in virtue of which her followers have ever since called her Mother Lee, and have regarded her as the equal of Jesus Christ, head of all women, as he was head of all men. She lived apart from her husband from that time, and he took another wife. See Lee, Ann.

In 1774, obeying what she believed to be a divine command, Ann Lee sailed from Liverpool and came to the United States. Their first settlement was in the town of Watervliet, N. Y., seven miles from Albany, where they remained in retirement till the spring of 1780. In 1779 a religious revival took place, chiefly among the Shakers at New Lebanon, Columbia Co., N. Y., accompanied by remarkable physical manifestations, and in the spring of 1780 some of those most afflicted visited mother Lee, and there, as they believed, found a key to their experiences. Mother Lee traveled from place to place preaching and advising; in Massachusetts she appears to have remained two years, and, it is asserted, performed miracles in several places. Mother Lee died in 1784, having already broached the idea of community of property, and having formed her little family into a model for Shaker organizations. Mother Ann was succeeded in her rule over the society by elder James Whitaker, who had come from England with her. He was called Father James, and under his ministry was erected (1785) "the first house for public worship ever built by the society." He died in July, 1857. In the same year Joseph Meachem, formerly a Baptist preacher and a convert of mother Lee, collected her followers into an independent settlement in New Lebanon, which still remains as a common center of Shakerism on the continent. In the course of five years, under the administration of Meachem, eleven Shaker settlements were founded—viz. at New Lebanon and Watervliet, N. Y.; at Hancock, Troy, Durham, Harvard, and Shirley, Mass.; at Enfield, Conn.; at Canterbury and Enfield, N. H.; and at Alfred and New Gloucester, Me. There were no other
societies formed till 1805, when three missionaries from New Lebanon established the following: Union Village, Watervliet, White Water, and North Union in Ohio; and Pleasant Hill and South Union in Kentucky. They number from six thousand to eight thousand souls.

II. Theological Doctrines.—The Shakers hold: 1. That God has given to man four revelations. “They believe that the first light of salvation was given or made known to the patriarchs by promise; and that these believed in the promise of Christ, and were obedient to the command of God made known unto them as the people of God; and were accepted by him as righteous or perfect in their generation, according to the measure of light and truth manifested unto them; which were as waters to the ankles, signified by Ezekiel’s vision of the holy waters (ch. xlvii). The second light of dispensation was the law that was given of God to Israel by the hand of Moses, which was a further manifestation of that salvation, as water to the loins (ver. 4). The third light of dispensation was the gospel of Christ’s first appearance in the flesh, which was as water to the loins (ver. 4). The fourth light of dispensation is the second appearance of Christ, or final and last display of God’s grace to a lost world, in which the mystery of God will be fulfilled and a decisive work accomplished, to the final salvation or damnation of all the children of men; which, according to the prophecies, rightly calculated and truly understood, began in the year of our Saviour 1747.” In the first revelation God was only known as a Great Spirit. In the second, or Jewish period, he was revealed as the Jehovah, he, she, or a dual being, male and female. In the third cycle God was made known as the Father; and in the last cycle, commencing with 1770, God is revealed as an Eternal Mother, the bearing spirit of the creation of God. Christ they also believe to be dual, male and female, a supermundane being, making in his first appearance a revelation to Jesus, a divinely instructed and perfect man, and who by virtue of his anointing became Jesus Christ.

2. The new revelation teaches the doctrines of the soul’s immortality and its resurrection, which they believe to be the quickening of the germ of a new and spiritual life, denying a bodily resurrection. Those who marry and indulge in the earthly procreative relation they term “the children of this world.” They do not condemn them, but believe themselves called to lead spiritual and holy lives, free from lust and carnal indulgence, and therefore refrain from marriage. Thus, like the Egyptian hermits in the 3d century, they place holiness in a life of celibacy. They hold that Christ revealed to Jesus the doctrines of non-resistance and non-participation in any earthly government.

3. The second appearing of Christ the Shakers believe to have taken place through mother Ann Lee in 1770, who, by strictly obeying the light in her, became righteous even as Jesus was righteous. The necessity for this appearing of Christ in the female form resulted from the dual nature of Christ and of deity. This second appearing of Christ is the true resurrection state, and a physical resurrection is to be repudiated as repugnant to science, reason, and Scripture.

4. The Shakers assign to each revelation or cycle its heavens and hells. The first revelation was to the antediluvians, and its heaven and hell were for the good and bad among them; the wicked of that cycle being “the spirits in prison” (1 Pet. iii. 19). To the second hell, Gehenna, they consign the Jews and heathen who died before the coming of Jesus; the second heaven being Paradise, which was promised to the thief on the cross. The third dispensation is that of the Church of the first appearing of Christ, and to its heaven Paul was caught up. The fourth heaven is now forming; in it Jesus and mother Ann reside, and to it all will go who have resisted temptation until all their evil propensities and lusts are destroyed. It is the heaven of heavens, and to it will be gathered all who accept the doctrines of the Shakers here, and all in the lower hells and heavens who shall yet accept them.

5. They hold to oral confession of sin as necessary to receive power to overcome it. They also believe in the power of some of their members to heal diseases by prayer and dietetics. They believe themselves to be under the immediate guidance of the Holy Spirit, and maintain that it is unlawful to take oaths, to use compliments, or to play at games of chance.

6. The Shakers are spiritualists in a practical sense. They hold Swedenborg to be the angel of spiritualism mentioned in Rev. xviii, and regard the spiritualistic movement as a preparation of the people to receive their doctrines. For a study of their peculiar views we refer the reader to A Selection of Hymns, etc. (Watervliet, O., 1833); Millennial Hymns (Canterbury, N. H. 1847); Fifteen Years in the Senior Order of Shakers.

Shaker Worship—the Dance.
A Holy, Sacred, and Divine Roll and Book, etc. (1848); The Divine Book of Holy and Eternal Wisdom (Canterbury, N. H., 1848).

III. Worship.—In their mode of worship they are remarkable for their habit of dancing to express the joy they have in the Lord. They enter their house of worship and kneel in silent prayer, then rise and form in regular columns, the men on one side and the women on the other. Several men and women then commence a tune, while every other person dances, keeping time admirably for at least half an hour. The hymns or “spiritual songs” which they sing are believed by the Shakers to be brought to them, almost without exception, from the “spirit-land,” also the airs to which these songs are sung. When dancing is over, the seats are placed and an exhortation begins, then, rising, they sing a hymn, another exhortation follows, and the meeting concludes. They neither practice baptism nor observe the Lord’s supper, holding that these ceased with the apostolic age. They hold general fasts, and have no order of persons regularly educated for the ministry.

IV. Temporality.—The Shakers have a ministry composed of two brethren and two sisters, who have the oversight of one from four societies; also each family in every society has four elders, two brethren and two sisters, who have charge of the family. There are three classes of members: (1) Novitiates: those who accept the doctrines of the society, but do not enter into temporal connection with it, remaining with their own families and controlling their own property. (2) Juniors: those who become members of the community and unite in labor and worship, but who have not surrendered their property to the society, or, if so, only conditionally, and with the privilege of retaining it back, though without interest. (3) Seniors: those who, after a satisfactory probation, enter into a contract to consecrate themselves, their services, and their property to the society, never to be reclaimed by them or their legal heirs. Before joining the society the candidate must pay all debts, discharge all bonds and trusts, renounce all contracts, and, in short, separate honorably from the world. The Shakers are republican in their ideas of government, never vote nor accept office from the government. They are orderly, temperate, and frugal, cultivating the soil with great success, and also engaging in other branches of trade. They have published since 1870 the Shaker and Shakeress, a monthly, edited by F. W. Evans and Antoinette Doolittle (Mount Lebanon, N. Y.). See Burder, Hist. of Religions; Gardner, Faiths of the World; Harper’s Magazine, xiv, 146 sq.; Marden, Dict. of Churches; Nordhoff, Communist Societies of the United States (N. Y. 1878), p. 117 sq.

Shakli, in Hindū mythology, is the consort of Siva, whom he loved so greatly that despair led him to pull out one of his hairs on the occasion of her death. Her father had offended Siva, and she resented the insult to such an extent that she laid aside the body she had received from him, and was born again as Parvati.

Shakra, in Hindū mythology, is Vīśnū’s celebrated weapon—a circular plate endowed with reason, inflicting mortal wounds and returning to the god after performing its mission of punishment. The inhabitants of the mountainous sections of Northern India still use a similar weapon, which becomes terrible in their hands. It is a plate of hardened steel, two lines thick in the centre and keen-edged about the circumference. It may be thrown a distance of two hundred feet, and will penetrate the most approved armor.

Shaktus, a principal Hindū sect, the worshipers of Bhugavatee, or the goddess Dūrgā. They are chiefly Brahmins, but have their peculiar rites, marks on their bodies, formulas, priests, and festivals. They reject animal food, but sometimes partake of spirituous liquors presented to their goddesses. None of them become mendicants. See Ward, History of the Hindus.

Shalak. See Cormorant.

Shalai. See Maken-Shalai-Hashi-Baz.

Shalém. (Heb. Shalem, שָׁלֵם, safe; Samar. שׁלמָא שׁלמה׃ Sept. Σαλήμ, Vulg. Sulem) appears in the A. V. as the name of a place near Shechem, to which Jacob came on his return from Mesopotamia (Gen. xxxiii, 18). It seems more than probable, however, that this word should not here be taken as a proper name, but that the sentence should be rendered “Jacob came safe to the city of Shechem” (םָלָם שֵּׁמֶל שָׁלֵם יָשַׂחְמָא). Our translators have followed the Sept., Peshito-Syrace, and Vulg., among ancient, and Luther’s among modern, versions, in all of which Shalem is treated as a proper name, and considered as a town dependent on or related to Shechem. And it is certainly remarkable that there should be a modern village bearing the name of Salim in a position to a certain degree consistent with the requirements of the narrative when so interpreted, viz. three miles east of Nahilas (the ancient Shechem), and therefore between it and the Jordan valley, where the preceding verse (ver. 17) leaves Jacob settled (Robinson, Bib. Rec. ii, 279;
SHALIM

612

SHALLUM

Wilson, *Bible Lands*, ii, 72; Van de Velde, *Syr. and Pal.*, ii, 302, 334; Schwarz, *Palest.*, p. 151). But there are several considerations which weigh very much against this being more than a fortuitous coincidence. See JACOB.

1. If Shalem were the city in front of which Jacob pitched his tent, then it certainly was the scene of the events of ch. xxxiv; and the well of Jacob and the tomb of Joseph must be removed from the situation in which tradition has so appropriately placed them to some spot farther eastward and nearer to Saltim. Eusebius and Jerome felt this, and accordingly make Sychem and Salem one and the same (Onomast., under both these heads). See SYCHEM.

2. Though east of Nabal's, Saltim does not appear to lie near any actual line of communication between it and the Jordan valley. The road from Sakht to Nabal's would be either by Wady Maleh, through Taysir, Tubas, and the Wady Bidan, or by Kerawa, Yanun, and Beit-Furik. The former passes two miles to the north, the latter two miles to the south, of Saltim, but neither approaches it in the direct way which the narrative of Gen. xxxii, 18 seems to denote that Jacob's route did. But see the note of *Jer. Excav.* p. 42. See SUCCESSION.

3. With the exceptions already named, the unanimous voice of translators and scholars is in favor of treating *shalem* as a mere appellative. Among the ancients, Josephus (by his silence, *Ant.* i, 21), the Targums of Onkelos and pseudo-Jonathan, the Samaritan Codex, the Arabic version, among the moderns, the Montefiore-Green Version, Rashi, and *Talmud* and Meyer (Ammon. on *Seder Olam*), Alonzo, Rinaldo (Pualent. and *Disert.* Misc.), Schumann, Rosenmüller, J. D. Michaelis (*Bibel für Ungelernte*), Tuch, Baumgarten, Gesenius (*Theaur.* p. 1422), &c. *Biblia* *Dei* (*Biblia* *Dei*, 1671). Hintz (on *Jer.* xi, 5) would make Shalem the name of the tower of Shechem (Judg. ix. 46). Comp. Hackett, *Illustrations of Script.* c. 159 sq. See PEACE.

4. This question is somewhat complicated with the position of the Shalim of the New Test. (John iii, 21), but the two places are not necessarily the same. See SALLIM.

Shallim (Heb. *Shallim*, הַשַּׂלִים, region of fowes; Sept. Σπιρσαία, v. 3. Ἀλεωρία, Ἑσσαφα), a region (γῆς, "land") through which Saul, the son of Kish, went in search of his father's sheep (1 Sam. xiii. 17). It is identified by Schwarz (*Palest.* p. 155) with Shalol, near Qiphrah (1 Sam. xiii, 17). "It appears to have lain between the 'land of Shalisha' and the 'land of Yemini' (probably, but by no means certainly, that of Benjamin). In the uncertainty which attends the route—its starting-point and termination no less than its whole course—it is very difficult to hazard any conjecture on the position of Shallim. The spelling of the name in the original shows that it had no connection with Shalem or with the modern Saltim east of Nabal's (though between these two there is probably nothing common except the name). It is more possibly identical with the 'land of Shallum' (1 Chron. xxvi, 13), the situation of which appears, from some circumstances attending its mention, to be almost necessarily fixed in the neighborhood of Tiyibiah, i.e. nearly six miles north of Michmas, and about nine from Gibeah of Saul." See RAMAHS.
