Theodulphe, termed Aureliamnius, probably a Goth, was one of the men whom Charlemagne invited to France to assist in the advancement of learning. He was in Gaul as early as 781, and in his classical tendencies resembled Alcuin, whose commendation he received. He was, in fact, one of the foremost representatives of the pec- uliar Renaissance poetry called into being by Charle- magne's forcible promotion of culture. His poems are not without value to an understanding of the social con- ditions of his time. As a theological writer he is less important, his works being limited to tracts—De Ordine Baptismi, De Spiritu Sancto—fragments of sermons, and Capitula addressed to the prebysyters of his parish. The Capitula reveal his care for his clergy, and espe- cially his anxiety for the establishment of an efficient system of popular schools throughout the diocese. Charlemagne gave him the abbey of Fleury and the bishopric of Or- leans, and employed him in affairs of state. In 794 Theodulph was present at the Council of Frankfort. After the death of Charlemagne, he appears to have at first connected him for the party of Louis the Pious, but afterwards to have desired a more powerful ruler. The complaint laid against him at Aix-la-Cha- pelle accused him of conspiring with Bernard of Italy, and he was imprisoned in the monastery of Angers. He was pardoned by Louis, but was soon afterwards snatched away by death, in 821.

Theodorus (or Theodorus), the name of three bishops who at different times presided over the see of Valais in the 5th century.

1. Theodorus I was the first bishop of the Church of Valais. He was present at the Synod of Aquileia in 381, which condemned the Arius bishops Palladius and Secundianus, as directed by the command of the emperor Gratian; and his zeal for orthodoxy was such that he refused to condemn Palladius. He was a Christian and priest. He was especially meritorious in enhancing the welfare and glory of his own church, where he is said to have established orthodoxy on an assured basis, and to have discovered the relics of the Thebais martyrs, in the altar which he subsequently built a church near where the Church of St. Maurice now stands. The influx of pilgrims to this church caused him to devise an appropriate cult, and thereby to give occasion for the organization of a monastery. Theodorus also forwarded relics to Vitricius of Rouen and Martin of Tours, for which he received permission by Maximian, Emperor, of Luvianus Senatorum; and he furnished Isaac, bishop of Geneva, with information respecting the discovery of the famous relics which became the basis of the leg- end written by Eucherius. Theodorus I thus appears to have been the actual apostle of the country, as he was its first consecrated bishop, and also the founder of the Church of Valais and of the cult which became its boast. His name appears in the oldest liturgical manuscripts of the country, the very ancient Misale Sedetum, an ancient Martyrology preserved in the Castle of Valeria in Sion, and in the Martyrol. Galli. His name occurs also among those of the ten bishops who wrote to pope Silvester from Milan in 390. After this he disappears, and is accordingly supposed to have died about 391. See the ancient Acta Conc.; S. Eucherius Passio Agamennion Martyr.; ancient martyrologies; Vita Theodoli, Episc. in the Bollandists, ad Aug. 16, iii, 296—298; Herzog, Real-Encyklop.

2. Theodorus II, bishop of Valais, is mentioned in the spurious articles of endorsement by king Sigismund to the Council of St. Maurice, and was evidently founded by the author of that document with Theodorus I, as he is made to urge the erection of a new church and to defend the existing one on the ground that the bones of the Thebais martyrs were yet unburied; all this so late as A.D. 515. Despite the doubts raised by this anachronism, he must be supposed to have existed, as his name occurs in the ancient and trustworthy list of Agamennian bishops, and in all subsequent lists as well. He is also mentioned by an
THEOGNOSTUS

THEOLOGIA GERMANICA

anonymously contemporary, in the life of abbot Ambrose of St. Maurice, as having raised collections in behalf of the new church edifice, and as having assisted in the collection of Ep. 4:10, and during the new bishops of Constantius, appears in the Synod of Epaon in A.D. 517; the death of Theodors was accordingly prior to that date. See Bolland, ad Aug. 27.

3. THEODORUS III, preferably called THEODULUS, the most famous, but also the most imperfectly authen-
ticated, bishop of Valais of this name, is reputed to have lived in the time of Charlemagne. The only source for the assumption that he lived is the legend of St. Theodu-
lus, by Rudopert, which runs as follows: Theodulus, of the noble family of Grammont, in Burgundy, was in-
vited by Charlemagne to a general council which was to de
termine the true succession of the throne. At the
bishops responded to the monarch's tears with the promise of twenty, and even more, prayers and sacrifices, but Theodulus promised only a single one. His prayer was continued day and night and followed with the mass, so that God sent an angel who revealed to The-
lus the emperor's crime, and assured him that it was forgiven. Thus attested, the emperor could not doubt the bishop's assurance, and rewarded the latter with the
privilege of his country, that he might be able to control the rude inhabitants, while exempting the clergy of the civil authorities. A later addendum to this legen-
dary account says that Theodulus had received from him an angel that the pope intended to spend a night in the embraces of a concubine. While thinking upon this
revelation, the devil drew near in female form. Theodulus seized him, leaped on his shoulders, and compelled him to serve as a medium of transportation to Rome, where he was able to prevent the papal sin. The Bollandists add to the above a miracle, through which Theodulus filled all obtainable vessels with the juice of a single grape which he had blessed at a time when the vintage had failed. This miracle elevated him to the rank of patron saint of the country, in which character he is still contemporary with great rejoic-
ing on Aug. 16. No martyrlogies or similar docu-
ments mention this Theodulus. Rudopert is clearly a
mythical personage. The bishop under consideration is imaginary, and probably developed out of the fact that donations to the Church of Valais were made to
honour St. Maurice or St. Theodot (Theodorus), and the
other fact that Charlemagne had a court bishop named
Theodore, who dedicated the Church of Zurich. See
Gelpke, Kirchengesch. d. Schweiz, i, 91 sq.; 120 sq.; ii, 95 sq.; Bridgust, Vallesia Christiana (1774), p. 34 sq., 36 sq.; Rivaz, De la Legion Thibemana (1779), p. 57, etc.; Comte, 
Considerazioni Gulielmi Cuperti, etc.—Hertzog, Real-
Encykl. s. v.

Theognostus. A person of this name is said by
Philip of Sidra (see Dodwell, Dissert. in Iren. [Oxon. 1689], p. 480 sq.) to have presided over the catechetical school of Alexandria in the second half of the 4th cen-
tury. Photius calls him an Aleutian and an ex-
gegete; and he was unquestionably an Origenist, in
the strict sense. Photius also expressly states that Theognostus shared the errors of Origen with respect to the Trinity, and termed the Son ekeij (comp. Dionys. Alex-
and., see Athenæus, De Bucal. 1061 B; also Origen, De Princ. 1, 8, 6). Theognostus wrote seven books of Histories, which, according to
Photius, constitute a doctrinal work constructed in the
order of loci—(1) of God the Father as the exclusive
originator of the world (against an assumed eternity of
matter); (2) of the Son; (3) of the Spirit; (4) of the
angels and spirits; (5) of the incarnation; (6) of the trans-
nation; also Origen, De Princ. i, 8, 6). A new
work was preserved by Athanasius in De Deor. Nic. Synod., § 25, and a fragment from that father's work
On the Baptism of the Holy Ghost (Athan. Ep. 4 ad
Ser.) stands in rapport. See Galland, Bibl. Vet. Petri, i, 224 sq.; also Origen, De Schola Alexand., Halle, (1824), i, 78; ii, 325 sq.

Theognostus (Theognostos), the name given in ancient Greece to a class of poems recounting the genealogy of the gods. Musaeus is said to have written the earliest
Theognostos; but his work, as well as the theognies of Orpheus (q. v.) and others, have perished; that of
Hesiod being the only one that has come down to us. This has been translated by Thomas Cook (London 1728, 2 vols. 4to).

Theologal. The third Lateran Council, held in
1179, ordered that teachers should be appointed to the
various churches and monasteries who should instruct the clergy, and be rewarded for their labors with suit-
able honor. At the Fourth Lateran Council repeated
this ordinance, and provided in Canon 10 that only capa-
bable men should be appointed in cathedrals and con-
vent churches, who should, in their capacity of masters, assist the bishops in preaching, hearing confessions, im-
posing ecclesiastical penalties, and otherwise promoting the welfare of Christians. Canon 11 provided, in ad-
dition, that, where the means of a church permitted, a
good teacher of grammar should be appointed; while
metropolitan churches should appoint a theologian,
whose business it should be to instruct the clergy and other clergy; that is, the knowledge of Holy Scripture
and all other matters which are important to the care of souls. This teacher should be allowed the income from a
prebend so long as he continued to perform the func-
tions of his office, but should not rank as a canon; and
it was to such instructors that the name of theologal
was given. The Council of Basle ordered the more
general employment of theologals. See Fortgesetzte

Theologia Germanica (the German title is Büchlein von der deutschen Theologie), is the title of the
famous theological work, by an unknown author, which was discovered by Luther and published for the
first time by him in 1516. The title merely implies that it is a German theological work, and is not to
be understood as assenting the spirit of exclusiveness to which Poërt objectied, in any degree.

The contents of the book are entirely in harmony with the writings of Tauler, Suso, and other mystics
connected with the Friends of God of the 14th century. Its object is to teach self-renunciation, the laying-aside of our own and the accomplishing of the Divine will. It declares that only our self-will separates man from God, the perfect one; it was self-will that changed an
gel to a devil. It is this angel who, in its turn, has
set the flames of hell. Haughty and opinionated minds, it as-
serts, aim at perfection in other ways than that of hu-
ility and obedience. In this their conduct resembles that of the devil, and they can accordingly end only in
ruin. Communion with God is to be had only when
the soul passes through repentance and is purified from
sin and selfishness, thus attaining to enlightenment.
Love and the practice of virtue are also requisite to
true enlightenment, as is, in addition, a cheerful en-
durance of trials and temptations. Thus enlighened,
a soul is fitted to enter into the union with God and enters into an
endling perfection.

The book has been attributed to various authors, e.g.
Ebelinus, Tauler, etc., but without authority. Luther's preface declares that it was written by a priest and
saint in the "Deutschherrn" house at Frankfort-on-
the-Main, who, according to Dieterich of Würzburg, calls it simply Der Frankfurter. Ham-
berger, in Hertzog, Real-Encyklop. s. v., thinks that
the priest Heinrich of Rödelheim has been shown be-
ond controversy to be its author. The question of
authorship is a difficult one, because the writer, who
was associated with the Friends of God, intentionally
followed the custom of those mystics in writing anony-
mously.
The Theologian 325

Theology

The fact that Luther first gave publicity to the work caused it to be regarded in time as the special property of Protestants. The Romish Church at first paid no attention to it, though it gave occasion to the Bavarian bishop Furstinger to write a Tatsche Theology from his point of view. In March, 1621, however, the German emigrants to the New World, influenced by the ancient Romish theologian, Gütner, has charged it with pantheistic tendencies; but this is evidently malicious, since it stains the language of a book which does not pretend to a strictly scientific character further than the case will warrant. Luther's edition of 1516 was inserted, but the extremely cursory editing of the whole work, and was accompanied with a preface from his pen. Numerous editions followed in rapid succession, Luther himself adding five to those already mentioned. The most desirable edition is perhaps that of Johann Arndt, who supplements Luther's preface with an excellent one by himself (1681). The manuscript discovered by Dr. Reuss was edited by Dr. Pfeiffer, of Vienna (2d ed. 1855). This version is more complete than Luther's, in particular the first third and near the end of the work. Repeated translations have been made into Low-German, Flemish, English, Latin, and French; the best-known English version being that of Miss Susanna Winkworth, with preface by Rev. C. Kingsley, and introduction by Prof. Stowe (Andover, 1856)._Lisco, Heilslehre der Theologia Germanica, etc. (Stuttgart, 1857), and Herzog, Real-Encyklop. s. v.

Theologian, one who treats of theology, or the science of things divine. The most ancient Greek used the latter term in the sense of sarrutto de deo, and those who wrote the history of the gods, their works and exploits, were called 2ελόγου. Moses is called by Philo Stelolouthis when he gives the history of the creation. Among the Romans, from the time of Numa Pompilius to Lucilius, the knowledge of the gods was made subservient to the interests of the State. Thus, according to Augustine (De Ciu. Dei, vi, 1), there were three kinds of theology — the political, or that of the poets; the physical, or that of the philosophers; and the political, or that of the legislators. The Greek Christians originally designated any deep philosophical apprehension of the truths of religion by the term gnosis (knowledge), which was opposed to Plato (faith). First, during the 3rd and 4th centuries, the word theology came into use especially in connection with the death of the fathers as defended the doctrine of the deity of the Logos, evangelist John and Gregory of Nazianzum were termed theologians. During the same period, the word theology was applied to the doctrine of the Trinity. In the century following, Theodoret widened its application by applying it to the whole circle of theological instruction in religion. Finally, in the 12th century, Abelard, in his Theologia Christiana, gave the word that comprehensive signification it still bears, as expressive not only of a theological, but also of a practical, exposition of religious truth. In general, therefore, theology is the knowledge of the doctrine carried to the highest degree of perfection in respect to correctness, clearness, and evidence of which it is susceptible in this world.

Theology is divided into two great branches — (1) Natural, or that which relates to such disclosures of the world's at hand in the (2) Reformed, or such as he has made through his spoken and written word. Eminent writers in the latter department of theology, as Schleiermacher, Hagenbach, Pelt, Godet, and others, present different methods of arranging the different subjects embraced in this study. See the compilation by Dr. M'Cleintock given in the article METHODOLOGY (q. v.), etc. The different branches are discussed under their several heads. See also APOLOGISTS; ECCLESIASTICAL HISTORY; ECCLESIASTICAL POLITY; ETHICS; POLIMICS, etc.

Theologianus is the title of a clerical instructor of the clergy associated in chapters, etc., who was appointed, by the authority of several councils, to teach the Holy Scriptures; the Theologian (q. v.).

Theology (from 2ελεγον, God, and 2ελογεις, discourse) is not to be interpreted simply as its etymology requires, but to comprehend the doctrine of the Trinity, but is to be understood with reference to a definite range of life which it is to bring into the consciousness and apprehend both theoretically and practically. False theology is, consequently, the doctrine of the Christian religion, nor of the self-consciousness of the man, nor of the self-consciousness of the life of the Christian life is, moreover, not religion, but the kingdom of God, or God's organic revelation to the world—the Church (see STORR, Schleiermacher, Baum-garten-Crusius, and many Romish theologians; also Kling, in Herzog, Real-Encyklop. xii, 600-606). Theology thus becomes the science of the unfolded, objective self-manifestation of the Divine Spirit in the phenomenal kingdom of God—a practical science which develops progressively and side by side with that kingdom. But it is none the less a positive science also through its relation to the kingdom. Schleiermacher (Kurse Overstul, etc.) defines it as the comprehensive of all that scientific knowledge and those scientific methods without whose possession and use a harmonious direction of the Christian Church, i. e. a Christian Church government, is not possible. This definition is, however, too external; for in the material of theology all truth finds its goal, and that fact should be expressed in its definition. Both the object and the scientific character of theology will be retained if the latter be defined as the scientific self-consciousness of the Church with reference to its development through the Holy Spirit, or, more briefly, its self-consciousness with respect to the Divine Spirit, this self-consciousness being the self-consciousness by the Holy Spirit. From this definition theology branches out into particular departments. The self-consciousness has for its first task the apprehension of the Church in actuality by determining its historical origin, development, and present state. Historical theology is the history of the kingdom of God consciously apprehended. It subdivides into the three special branches of Sacred History, Ecclesiastical History, and Ecclesiastical Statistics.

The determination of sources and portrayal of the working and development of the leading principles by which events are governed are of primary importance in historical study. The first source is unique, being the truth of the Divine Spirit. The source for the beginnings of the Christian Church is, at the same time, a regulative guide and vivifying principle to the Church. By the side of other sources it affords a guide respecting the time of the origin of the Old Covenant, and its development until it became the New, and it possesses unquestionable authority as the earliest witness to the operative power of the Divine Spirit in the world, and consequently as its mediating principle, or as the Bible, the only sacred book.

The Bible is the only source. The Bible is essentially a knowledge respecting the Bible (Biblical theology, in the wider meaning). It is all-important to determine what books belong to the Bible, and this is the business of the Canon. The whole Bible is to be authenticated both in its parts and its text; to accomplish this is the
THEOLOGY

work of historical and textual criticism. Introduction to the books of the Old and New Tests. (Inteogogia), or, more properly, the writers whose Canon and of Biblical Literature, presents the collective material to view, and is followed by philological and theological exposition. The scientific conception of this expository work is Hermeneutics, or the art of interpretation. The history of the Word of God, the Divine Revelation, and the presentation of its contents which have attained to their development are given in Sacred History (and Archaeology) and in Biblical Dogmatics and Ethics—usually termed, in Germany, Biblical Theology of the Old and New Tests.; the latter being the final and gradually developing phase of the Divine Revelation, whose central people and events are contained in the Gospels, of which the kingdom is wrought through Jesus Christ. This science is theologicohistorical, and therefore deals largely with details, e.g., the particular doctrinal contents of separate Old-Test, books, etc.

Personal convictions are of great importance in this connection. Without being rooted in the Divine Revelation, no apprehension of its meaning is possible. The contents of the Revelation as appropriated both by the individual and the Church must accordingly be received into the scientific consciousness, which indicates the task of scientific theology. The latter, however, does not derive its contents directly from the Bible, but through numerous intermediate agencies, to contemplate which is the work of Ecclesiastical History, and, in so far as they belong to the present age of the Church, of Ecclesiastical Statistics.

Ecclesiastical History portrays the history of the kingdom of God, from the founding of the Christian Church on the day of Pentecost to the present day, having the end of prophecy continually in view as its goal. It directs its attention more prominently either to the outward development of that kingdom in the Church and the life as renewed and inspired by Christianness (Church History), or to the consciousness of that development and its contents—the History of Doctrines and the connected History of Christian Ethics, Literature, and Art. The study of Sources, Geography, Chronology, etc., likewise involves much that is peculiar, and requires the separate theological treatment of those branches, in consequence of which originate Patristics, Ecclesiastical Archeology, History of Liturgies, etc.

The present not only forms the limit of development at which the kingdom of God has arrived, but also the ground from which we stand. The description of this ground is the work of Ecclesiastical History. It includes both external and internal conditions, both of the faith and the life, and gives rise, on the one hand, to Statistics of Churches in different countries and of different denominations and sects, and, on the other, to Historical Symbols.

Inquiry into the faith and morals of different denominations leads from Statistics over to Systematic Theology. The nature of the latter is determined by the nature of the Christian consciousness as based on a new life in the individual and the race. The development of that consciousness is the work of Ecclesiastical History. It includes both external and internal conditions, both of the faith and the life, and gives rise, on the one hand, to Statistics of Churches in different countries and of different denominations and sects, and, on the other, to Historical Symbols.

As Systematic Theology does not proceed from the Christian convictions of the individual, but from those of the entire Church or of one of its subordinate parts, it provides room for Ecclesiastical Tradition. The starting-point is the word of God as objectively presented to us in the Canon, as approved in the heart of the character of Christ, and as given in Tradition in the forms of faith, custom, constitution, and methods. The consumption is in the Dogmas, in which God's kingdom is the object of the spiritual consciousness of the general Church, or, under historical limitations, assumes a definite form in the particular denomination (Denominational Principles or Systematic Symbolics). At this point the doctrinal consciousness discovers its variation from the systems of other denominations and of morbid apparitions with which the Church is familiar, which is the subject of the next chapter. The renovation gives rise to Polemics, or, better, the discussion of ethical and doctrinal excrecences in the Church (analogous to pathology in medicine).

The ground has thus be prepared for the founding and establishing of Thetical Theology, the confessional Dogmatics and Ethics, as determinations determined on the basis of the underlying faith. Here the dogma, in its character of scriptural truth subjectively apprehended and handed down in the Church by authoritative tradition, attains to its complete development; and here the various doctrines are combined into a system through the labor of critical, religious, ethical, and systematic scholars. The true relation is accurately indicated by the oxymoron in the phrase "the science of the faith." Unquestionable certainty is given in the faith, but the mind transmutes this successively and partially into knowledge.

This dogmatico-ethical process begets a system of knowledge respecting God and divine things. This constitutes Speculative Theology, the last result of a philosophy of Christianity which was conceived in mysticism, unfolded in theosophy, sifting by criticism, and formed by speculation, and now presents Christianity with the true idea of it as the essence of all culture and as the crown of the scientific labors of the entire human race. Christianity is here presented as a religion, and as the highest manifestation of religion, and also as the complete realization of the kingdom of God on earth through a progressive development which reaches down to the final consummation; and in this light Christianity is presented as the central feature in the philosophy of human history.

The duty of the Church to insure its own edification through the power of the Holy Spirit comes into prominence here, as it does in the historical department.

That ecclesiastical consciousness, that scientific understanding of its foundations and methods constitutes Practical Theology, the third principal branch of theological science. The starting-point of this science is the energy of the Christian life which is to be perfected. Practical theology is the science of human operations within the kingdom of God and as enabled by the Holy Spirit, to the end that that kingdom may be fully developed. Only through God can we arrive at God, in knowledge as in feeling or in practice.

The setting-forth of these fundamentals, and of the methods by which the organism of the God kingdom, particularly in the Church, is to be erected and on them, is the work of the science of Ecclesiastical Foundations, otherwise the science of the principles of Practical Theology, which finds its completion in the science of Church Organization. We next discover a separate department of Church Constitution and Church Government, as Practical Theology, and subdivides into Church Law and Church Government (in a restricted sense, Church polity; in an unrestricted, the care of souls). The process of self-edification under the Holy Spirit's influence, moreover, gives rise to a recognition of the means through which the church is achieved, and a third technical part, covering the theories of art methods in the different Christian churches, which are known, with reference to the shaping of the external forms of
w Judaism, as the other religions; in many cases, with reference to the proclamation of the Word of God, as homiletics or kerygma; with reference to the training of the young, as Christian pedagogics and catechetics; with reference to the conversion of heathen and other false religions, as Hellenistics and theodicy of missions; and with reference to the organization of scientific instruction for the Church, as ecclesiastical pedagogy, which has to do with the Christian organization of institutions of learning, as the placing of theological faculties in universities, the founding of theological seminaries, etc. Theological literature cannot, of course, be brought within any rule, but may be classified in conformity with its manner of entering various branches of the Church's life—H. R. E. A. V. S. See THEOLOGIAN.

See Pelt, Th. Encycl. (Hamb. and Gotha, 1843), with whose theory the above article is substantially agreed. See ENCYCLOPEDIA OF THEOLOGY, with the literature there referred to.

THEOLOGY, NEW ENGLAND; including "New Divinity," "Edwardsian Divinity," "Hopkinsianism," etc.

I. Origin and Development. The original theology of New England was the strict Calvinism of the Reformed standards. In 1648 the Westminster Confession was formally adopted by the synod convened at Cambridge, and it remained the standard of faith for all the New English churches until 1680, when "the elders and messengers of the churches in the colony of New England presented the confession drawn up by the Congregationalists of the mother country, and known as the Savoy Confession." In 1708 the Connecticut churches made the same change. This substitution was in neither case demanded by a changed theological sentiment in the churches, the Savoy Confession being almost word for word identical with the Westminster, except on points connected with Church polity. Its Calvinism was equally strict. Not long after this, however, strong and independent minds began to appear in the ranks of the New England ministry, whose philosophical acumen and practical earnestness could not rest content with a theological system which to them seemed palpably inconsistent in parts, and morally paralyzing as a whole. These, prompted partly by their own subjective difficulties, and partly by the exigences and influences of the period which witnessed the rise of New England Unitarianism, the introduction of Universalism, the visits of Charles Wesley and George Whitefield, the planting of Methodism, the Revolutionary War, the abolition of slavery in the New England states, the defection from orthodoxy of Harvard College and the largest churches of Massachusetts, the end of the compulsory support of religion by taxes, the fall of the Lockean and the rise of a transcendental school of philosophy, the extension of the Baptist and of the Methodist Episcopal and Protestant Episcopal churches over all the New England States, the founding of the noble missions of the American Board—not to mention remoter and less important events, but the whole series of modifications in the traditional Calvinistic system of doctrine designed to render it more rational, more palatable to the believer, and more easily defensible against the assailant. This process has been going forward with a good degree of steadiness ever since the days of President Edwards. One has brought forward a metaphysical novelty, another a theological one, a third an ethical; liberal and progressive influences have become incorporated in organs and institutions; free pulpits have popularized the various ideas; school systems have been shaped under the influence of the improved doctrination; in short, an almost complete theological revolution has gradually taken place. In their earliest development, the more generally received of these new views were styled "New-light Divinity"; then "New Divinity," afterwards "Edwardsian," sometimes "Hopkinsian," or "Hopkinian." From the fact that Edwards, Hopkins, West, and Catlin resided in Berkshire County, the system was at one time called "Berkshire Divinity." When embraced in Great Britain by Andrew Fuller, Dr. Ryland, Robert Hall, Sutcliffe, Carey, Jay, and Erskine, it was called "American Church Divinity." It spread from it to the European systems. In this country it has often been denominated "New England Theology," in order to discriminate it from systems that have prevailed in other parts of the land. This term, however, is far from satisfactory, partly because the New England theology of today is very different from the New England theology of a hundred and fifty years ago, and partly because, in speaking of the New England theology of recent times, the term must be used in a sense sufficiently wide and vague to include differing types of doctrine historically associated with various individual divines and schools such as Andover, New Haven, and East Windsor (now Hartford) schools.

The precise relation sustained by the elder Edwards (1703-58) to this theological development has long been, and still remains, a subject of controversy. The advocates of the most advanced new views are anxious to claim him as the real father of the whole movement, while the Old-school writers, with equal zeal, endeavor to guard the good man's memory from so "slanderous an allegation." The former appeal to the "Ten Improvements in Theology," enumerated by the younger Edwards (Worc i, 461) as having been "made by his father," in which Edwards superseded the "Savoy Confession drawn up by the Congregationalists of the mother country," and placed it in the very first rank among the innovators upon New England orthodoxy. The latter find in this enumeration of the younger Edwards only an effort on the part of his father to magnify the number and character of his father's theological novelties, in order the better to prepare the way for the introduction of his own more radical and dangerous ones. One writer (in Princeton Rev. Oct. 1858) has attempted to show that President Edwards's only deviations from the current Calvinism of his age were confined to two points viz., he held to mediate instead of immediate imputation; and, secondly, advanced a system of doctrine that superseded the "Savoy Confession." The true state of the case would seem to be that Edwards, without intending to initiate, or even to occasion, such a grand revolution, really advanced principles and made statements which afterwards suggested, and almost logically necessitated, the peculiar views and even phraseology of his successors (see Park, On the Rise of the Edwardsian Theory of the Atonement).

To present a complete delineation of New England theology, it would be necessary to write a critical history of New England speculation. Contributions and modifying influences have come from so many sources that even then it would be exceedingly difficult to apportion to each of the original elaborators his precise due. This difficulty is greatly enhanced by the imminency of the relations which subsisted among them. So close were those relations that in some instances it is next to impossible to determine the real authorship of any given doctrine. Among the most important numbers of the "grand triumvirate" of New England theologians, the "great triumvirate of New England theologians," were not merely contemporaries, they were confidential friends, reciprocal teachers and learners, mutual givers and receivers, allied investigators of divine truth. Each had peculiarities of belief, each held fast to the substance of the Calvinistic system, but there was a substantial agreement in much that was new and revolutionary. For many years they enjoyed the most fa-
vorable opportunities for the interchange of sentiments, mutual stimulation, and influence. Their relations to the generation succeeding were also intimate. The first was father of Dr. Edwards, the second his theological teacher, the third was his most valued counsellor, and was intimately associated with him in the examination of MSS. As his friends, Confessional companion of Bellamy and Hopkins, intimate with Drs. Edwards, Smalley, and Emmons. Through Dr. Edwards the spirit of the triumvirate was transmitted to his pupils Dwight and Griffin, to his friends Backus and Smalley. Smalley was a pupil of Bellamy, the instructor of Emmons, the friend of Hopkins and West. To the extent that the exact influence of the work which each brought to the actual development is evidently a task of the greatest difficulty.

About the year 1756 there were four or five clergy men whose views had come to be popularly distinguish ed as "Edwardians." In 1773 the number had increased, according to Dr. Stiles, to about forty-five. During this year Dr. Hopkins published his Inquiry into the Nature of True Holiness, elaborating the Edwardean theory more perfectly than Edwards had done; and, in a voluminous appendix, defending it against the objections which Mr. Hart and others had published against it. Thenceforth, as the new divinity was generally denominated "Hopkinsians." This new term, though first applied to the New Divinity with special reference to its doctrine of the utter sinfulness of all acts preceding regeneration, was soon used to designate all Calvinistic divines who favored the doctrines of general atonement, natural ability, the active nature of true holiness and sin, and the justice of God in imputing to men none but their own personal transgressions. Their number in 1756, according to Dr. Hopkins, was upwards of a hundred. Dr. Stiles enumerates as among the champions of the new divinity in 1787 the two Edwardses, Bellamy, Hopkins, Tromball, Smalley, Judson, Spring, Robinson (father of Dr. Edward Robinson), Strong, Dwight, Em mons. In 1799 Hopkins appended the names of West, Levi Hart, Backus, presidents Balch and Fitch. A later pen has added the honored names of Dr. Carlin, president Appleton, and Dr. Austin. At the present time the peculiarities of New-school New-England theology have very general prevalence in the orthodox Congregational churches of the New England and Western States, and are favored by many in other Calvinistic bodies. They are taught in the theological seminaries of Andover, New Haven, Bangor, and Chicago. They are embraced by quarters of marked ability, among which the Bibliotheca Sacra and The New-Englander hold the first rank. They have affected the current theological teachings of the Baptist churches not a little; and the great schism which divided the Presbyterian Church in 1837 was chiefly traceable to their influence in that communion. See Presbyterian Church in the United States.

II. Relation to Original Calvinism.—The metaphysical and ethical principles accepted by the New-school representatives of modern New England theology, and fundamental to the system of doctrine, are the following: (1) There is a radical distinction between necessity and certainty. (2) All sin is of an active and voluntary nature; the same is true of all holiness. (3) Although in every exercise the human will possesses the natural power of contrary choice, still, as a matter of fact, it is not exercised. In other words, although the will always can choose the least apparent good, it always will choose the greatest apparent good. (4) Natural ability must in all cases equal obligation. (5) Moral character or deserts are in no case transferable. In logically adhering to these principles as the foundation of all their conclusions, the Edwardean divines have deviated from the old Calvinistic system in the following important theological, anthropological, and soteriological points:

1. Predestination.—They do not teach that God de-
THEOLOGY, NEW ENGLAND 329

THEOLOGY, NEW ENGLAND

the two than their respective views of the final end of
God in creation and Providence. According to Old Cal-
vinism, that end—the end to which all minor ones are
subordinated—was the subjection of the creature to
the will of God, and particularly his justice and mercy, to intelligent crea-
tures; according to Dr. Taylor, of New Haven, as under-
stood by many, it is the production of the largest amount of happiness possible, holiness being simply a means thereto; according to Andover, and perhaps the main body of New England divines, this is the securing of the largest amount of holiness, the highest happiness being simply a natural consequence.

(But see a somewhat different representation of Taylor’s views by president Porter in The New-Englander for 1860, p. 726-727.)

The doctrine respecting the “Doings of the Un-
regenerate” has been quite too prominent in the history and development of this New Divinity to be passed over in silence. There have been three theories: (1) That man is under obligation to repent at once, and that all moral choices before repentance are sinful and must be utterly Cast out (Ecclesiastes: 10-17). (3) That man is under obligation to repent immediately, but he may perform preliminary acts which are neither sinful nor holy, and hence are not forbidden (Taylor). (3.) (Corresponding with the Old-school theory) That while all acts of choice are sinful before repentance, it is nothing more than to submit oneself to the power of the Holy Spirit. (4.) (Corresponding with the Old-school theory) That while all acts of choice are sinful before repentance, it is nothing more than to submit oneself to the power of the Holy Spirit.

III. Relation to Original Arminianism.—The repre-
sentatives of old-fashioned Calvinism have often charged that the modifications introduced by the Edwardian divines have simply brought about a separation of the Arminian system for the Calvinistic one of the primitive New England churches. The teachings of New England theology with respect to the absolute dependence of individual salvation upon individual divine elec-
tion are now both acknowledged and admitted, and human ability considered apart from the gracious aids of the Holy Spirit, do not sustain this charge; but in almost every other principle and doctrine the allegiance is, in our view, susceptible of the fullest substantiation.

1. Take the “five points” of the original Arminian creed as given, and the Arminians denied (1) that the decrees of God respecting the eternal salvation or damnation of individual men are irrespective of the use they may make of their own freedom; (2) that in the divine purpose and by divine decree the benefits of the atonement are limited to un-
conditional election in particular individuals; (3) the conse-
quently of original sin all persons naturally engendered from Adam are in such a condition of spiritual death that without that effectual calling and supernatural renovation which is by divine decree limited to the elect they can do absolutely nothing either towards the fulfillment of God’s law or towards an effectual ap-
propriation of the benefits of redemption; (4) that those gracious influences of the Holy Spirit which are adapted, sufficient, and of firm and salutary effect upon the heart, name-
ly, to the unconditionally elect; and (5) that true be-
lievers cannot, by any possibility, totally and finally fall from grace. In every one of these memorable issues of the Remonstrant and Contra-Ramonstrant parties the representatives of New England theology stand with the original Arminians.

2. The same metaphysical and ethical principles un-
derlie the two systems. We will review them in the order before given: (1.) Certainty as distinguished from necessity. This was a favorite Arminian distinction (see Arminius, i, 280, 281; iii, 402, 411, 416, 423, 425; Epistola Theologica, epist. xii, lxxxii [Arminian]; Carmel, p. 777, etc.). (2.) Active and voluntary nature, the voluntary nature being defined by the Arminian divines (see, for instance, Episcopius, ii, 92 b; Carmel, p. 186, 187, 902, 904; Limborch, ii, xxii, 15; iii, 4, 8; v, iii, 2). (3.) Self-determination in view of motives. According to New-school New England theology, the will invariably chooses the greatest good proffered for choice, nor even the greatest apparent good as estimated by the cool exercise of judgment, but simply that which appears which good which appears to the subject, organized, circumstanced, and disposed as he is, as most desirable. It is only saying, in other words, that a man invariably chooses just as under the circumstances at that moment the state of his mind prompts him to choose. But, (a), the Arminian authorities never denied this position. They did deny that the mere absence of action constituted liberty (Episcopius, i, 356, 357 a); but New England divines do the same. They denied that mere spontaneity is liberty in its full sense (ibid. p. 198 b; Carmel, p. 158, 159); but the New England divines do the same. They denied, as did Leibnitz, that the deci-
sion of the will is inevitably determined "ab initio" (Episcopius, i, 209 s q; Carmel, p. 986; Limborch, p. 131, etc); but in the form pro-
ounced to them, the divines of New England would in like manner repudiate it. They denied that the will is necessarily determined by motives; but this doctrine is rejected with equal infirmities by the New school New England theology. (b.) The will in all rational choices invariably acts in view of a good (Episcopius, i, 202 b, et al.). (c.) The will is able to choose the least apparent good. This follows from the Armin-
ian doctrine, of power to the contrary. The will is also illus-
trated in choices between objects of equal apparent de-
serability. "Si paria offerat, quorum alterum tantum eligendum est, libertas plenaria locum habebit" (ibid. p. 207). (d.) In all deliberate choices, men ordinae follow the decision of the judgment; when not, it is because "sum causae impedit" (ibid. De Libertat. Ecclesiae, Arqurisc, VIII, ix, et al.). (e.) They will never choose evil as evil, or "sub ratione nulli" (ibid. i, 215 b, 318 sq). (f.) Though the will does not invariably choose the greatest good, it does according to the decision of the judg-
ment, it does according to all rational choices invariably choose that good which the subject, organized, circumstanced, and disposed as he is, as most desirable. This doctrine seems to be clearly implied in cap. x of Episcopius, Examen Sententiar Cameronis. The apparent contradiction found in cap. vii of his Respon-
sio ad Definitionem Cameronis is easily solved by ob-
serving that according to the doctrine of Episcopius, as distinct from the Cameronian, the internal necessity of the will does not necessarily follow the dictate of reason, nor invariably follow the dictate of the natura appetitiva, both which maintenances are perfectly consistent with the doctrine in question—to wit, that the will invariably chooses the good which to the whole man under the in-
ward and outward conditions seems the most desirable. On this point, then, so far as the doctrine of the New-
school divines of New England from being incompatible with Arminian teachings that, on the contrary, that doctrine finds in Remonstrant literature some of its earliest and most carefully guarded enunciations. (4.) Obligation cannot be traced to the natural state of the Arminians (see Arminian, Declaratio, passim; Carmel, p. 96 b; also VII, ii, passim Limborch, III, iv, 7, etc.). Here we may remark that the distinction between natural and moral ability is much older than its emergence in New England theology, being found in the New Testament and in several of the divines (see Episcopius, ii, 94 a; Carmel, p. 156, 421). (5.) Intransferability of moral character and desert, strongly asserted by Episcopius, ii, 151 b; by Carmel, p. 131-137, 424, 470, 896-902; by Limborch, V, Ixxviii, 18, III, 11, et al. 3. In every one of these metaphysical, anthropological, and ari-

tological teachings the two systems are in marked accord. (1.) The Decrees of God.—The New-school divines of
New England hold to a universal foreordination, absolute as respects all divine acts, effectual as regards all consequences of those acts. One of the consequences of those acts is the establishment and maintenance of human freedom. What said Arminian theology? (a.) All who believe on Christ must be saved; (b.) facit, nisi prius apud se id decreverit facere” (Curellus, p. 82). (b.) God foreordains (positively or permissively) whatsoever cometh to pass—“Nihil absque ipsius permisset aut directae eventus” (ibid. p. 87). (c.) God decrees to do things which he knows will occasion sin and judgment, by the prudent employment of means which, if wrought, he knows would prevent sinful choices. This also is clearly involved in what is laid down by Arminius (iii, 418-429), Episcopius, Curellus, and Limborch on Permissio, Exercitatio, and Induratio. (2d. God decrees to do that which he knows will occasion sin, for a specific end, and that end is the best possible (Arminius, iii, 419). (c.) A decree to do that which will as a matter of fact occasion sin does not in any wise necessitate that sin (Curellus, p. 392, 1021).

(3.) The Constitution of Men not Sin, but the Invariable Occasion of Sin.—No New England divines have produced a theory of original sin and destiny in vain, for traces of those ideas are found in Curellus, Dissertatio de Peccato Originis, and in Limborch, III, iv.

(3.) The Attonement.—The identity of the Arminian view of the atonement with the Dutch Arminians, as respects the nature of the atonement, ground of its necessity, and particularly proved in art. iii of the Meth. Quar. Rev. July, 1860.

(4.) Justification.—Arminius’s definition of justification could be subscribed to by the whole body of New England divines with perhaps the exception of Emmons. “Justification is a just and gracious act of God as a judge, by which, from the throne of his grace and mercy, he absolves from his sins man, a sinner, but who is a believer, on account of Christ and the obedience and righteousness of Christ, and considers him righteous [justum], to the salvation of the justified person, and to the glory of divine righteousness and grace” (ii, 116).

(5.) Regeneration.—By the older Arminian, Calvinistic, and Lutheran divines this operation of the Spirit is not sharply and definitely distinguished from sanctification, but in the definitions of the representative New England divines there is nothing to which Arminius or his disciples would have objected.

(6.) The regenerate cannot fail away. This is universally maintained by the Arminians. (6.) The regenerate in point of fact never do fall away. Arminius did not decide. He says, “At no period have I asserted that believers do finally decline or fall away from faith and salvation” (ii, 251). Like New England Calvinists he asserted the possibility of the fact, of a total and final defection of the elect.

From the foregoing it is evident that the evangelical New England reaction against Calvinism, while remarkably indigenous and original, resembles in a most striking manner the earlier Arminian reaction. The Remonstrants repudiated no part of standard Calvinism, in which these New England theologians do not repudiate; they revolted from traditional tenets from the same honorable motives; they anticipated by two centuries nearly every favorite idea of their New England successors, and would perhaps have anticipated every one explicitly, had it not been for the backwardness of the psychological and ethical sciences. Nevertheless, there ever remains this radical difference, that according to New England theology, as according to original Calvinism, the real reason why one man is saved and another damned is not in the last analysis to be found in the different foreordinations of God respecting the two, and this difference of foreordinations is referable solely to the sovereign good-pleasure of God.

IV. Variations and Side-issues.—Several noteworthy views and speculations, to which their respective authors owed no small share of their reputation, are either not adopted or positively repudiated by the great mass of recent New England Calvinists. For example:

1. The Edwardean notion of human liberty. President Edwards is generally understood to have accepted the definition of Locke and of the sensational school, making liberty an endowment of the Jesus man will “the power of opportunity, or advantage that any one has to do as he pleases”; in other words, one’s ability freely to execute volitions philosophically or coactively necessitated. The inadequacy of this definition is now universally admitted. See Edwards.

2. John Edwards’s doctrine of disinterested benevolence. This was at one time the most vital and essential element in the New Divinity. With Hopkins it was the cornerstone of systematic theology. See Hopkins.

3. Emmons’s hypothesis of God’s efficient causality of every mortal act of man. Emmons held that God was the efficient originator of every volition of the human mind, good or evil, holy or sinful. He has had but few adherents, and doubts are expressed as to whether he has been correctly understood by many on this point (Park, Memoir, p. 385 sq.). See Emmons.

4. Nathaniel W. Taylor’s view of the non-prevenient necessity of sin and of the origin of original sin. These views are found in Curellus, Dissertatio de Peccato Originis, and in Limborch, III, iv.

5. The perfectionism of Prof. Finney. See Christian Perfection; Oberlin Theology.

6. Dr. Edward Beecher’s doctrine that all the descendants of Adam are necessarily in a state of probation in a previous state of being, and that they are born under the curse of original sin on account of having sinned in that pre-existent state. See his Conflict of Ages and Concord of Ages. See Pre-existence.

7. Dr. Horace Bushnell’s view of Christ and of the Sacred Trinity, revelation, sin, and the atonement. See literature below.

2. The Pre-Educational Period.—See Sprague, Annals, vol. i, Clinton, John; Davenport, John; Mathews, Cotton, Inglis, and Richard; Stoddard, Solomon; Wigglesworth, Edward.

| GION.

THEOLOGY, SPECULATIVE. This title has come into

| use, particularly in Germany, to designate that
| method in systematic theology which, availing itself of
| all the helps subsidiary to theology, collects its material
| under the guidance of a philosophical or speculative
| survey of the field, and combines it into a systematic
| whole.

1. The necessity for such a term is shown by the fact

| that neither systematic theology nor Christianity itself
| can be compressed within the compass of a system of prac-
| tical doctrines only. Christianity is designed to benefit
| the entire man, his intellect as well as his feelings and
| will. Indeed, Christian piety is based on the truth; and
| Christianity is the revelation of the truth and the abso-
| lute religion. To attain a direct objective knowledge of
| God, as distinct from the indirect knowledge obtained
| from the consideration of his works, etc., is evidently the
| work of speculation; and the same is true of that
| defence of Christianity which not only undermines the
| arguments of assailants, but establishes the reasons for
| Christianity in truth.

2. The material of speculative theology is gathered

| from the realm of experience everywhere, mundane
| and supermundane, and more directly still from the
| Christian faith. The task of speculative theology is to
| combine the experimental facts of the religious life into
| a harmonious system in which thought and scientific
| knowledge, the facts of a philosophical, or mechanical
| nature, are coordinated with the historical facts
| connected with Christianity, and trace them up until they
| arrive at the great central fact—the divine life incarnated
| in the person of Jesus Christ. Faith, by which we mean an immovable foot-
| ing on the truths and realities of Christianity, is there-
| fore a prerequisite for this science; but this can never
| be more than a prerequisite, because the science is equally based on
| the safe ground of known historic fact.

Christianity is specially adapted for speculative treat-

| ment by reason of its possessing a point of internal unity
| which combines both idea and fact, God and man, and
| therefore becomes in itself the power to overcome
| all contrats. The ancient Church correctly fixed that
| point in the incarnation of the Logos (Ignatius, Irenæus,
| Origen, Athanasius, Gregory of Nyssa).

The dangers of speculation in theology are well illustrated in the in-
| tellectualism of contemplation as displayed in the Eastern
| Church. It manifests practical and ethical tendency of the West served to complete, and, to some extent, cor-
| rect, the Eastern intellectualism. Tertullian and Au-
| gustine gave themselves to practical speculation; but
| Anselm was the father of genuine Christian speculation
| (Car Deus Homo?) Aquinas and Duns Scotus, though
| inferior to them in rendered good service in the same field.
| The Reformations was concerned rather with the dis-
| tinguishing characteristics of this speculative interests of Christianity, though Anselm's ideas were carried for-
| ward and established in its progress. Not until after
| fundamental inquiries into the philosophy of knowledge
| and into the limits of human understanding, connected with the external
| world, which we possess had been made was it entirely pos-
| sible to utilize, for speculative purposes, the treasures of
| Christian doctrine, for defence, attack, and positive develop-
| ment. The fruitage of such investigations may be seen
| in the works of Schleiermacher, Kaub, Martheinecke,
| Rothe, Martens, etc. See PRACTICAL THEO-
| OLOGY.

Upon the whole subject consult Baur, Christ. Gnosis

| (1883); Ritter, Gesch. d. christl. Philosophie (1841-51,
| 6 vols.). See Herzog, Real-Encyklop. s. v.

THEOMANCY (θεόμαντης, God, and μαντία, divination),

| a kind of divination drawn from the responses of the oracle among heathen nations.

THEÓNAS, or THEOON (see the extract from Philo-

| stigorus given by Photius), was bishop of Marmarica, in
| Cynusia, in the 4th century, and one of the most de-
| voted adherents of Arius. The synodal circular given in
| Athanasius, i, 398 sq. (ed. Montfaucon), from bishop
| Alexander, which mentions the earliest measures taken
| against Arius, contains the names of Theonas and his
| colleague and neighbor Secundus of Piolemi. The
| circular referred to indicates that both Theonas and Se-
| cundus had been deposed; but it would seem that the
| deposition was not enforced, since they appeared at the
| Council of Nice in the character of qualified members.
| They achieved notoriety in that synod by resisting the
| Homounosis more firmly even than did their leaders,
| Eusebius and others; and as they refused to unite in
| the condemnation of Arius, they were again deposed
| and banished. Philostigorus (i, 2, 1) states that Theonas
| was recalled by the emperor Constantine; but he would
| seem to have taken no further part in the ecclesiastical
| conflicts of the time. His name occurs no more in the
| lists of controversies (see Tertullian, Hominon, So-
| crates, Hist. Eccles. i, 9 (Decree of Nice); Kipphanus,
| Hier. ix, 8, and comp. lxvii, 6, and lix, 11; Tillemont,
| Mémoires pour servir à l'Histoire Eccles. (Brussels, 8vo ed.), vi, 2; Hist. Abrégé des Ariens, art. vi, vii; and
| History of the Council of Nice, art. vi, xii.—Herzog, Real-
| Encyklop. s. v.

THEOPASCHTES (from θεός, God, and πασχω, to suffer).

| This term was applied to those persons in the ancient
| Church who pronounced in favor of the formula that
| God had suffered and been crucified, and occurs for
| the first time in the letters of Iasidore of Pelusium (q. v.)
| (Ep. i, 102, 124). The addition of the clause θεός կաτα-
| σκόπον to the Trisagion by Peter Fullo (q. v.) gave gun-
| ner currency to its use (Theophan, Chronographia, p. 97,
| 184), and formed an element in the Monophysite dis-
| pute. Fulgentius Ferrandus and Fulgentius of Ruspe
| declared in favor of the formula "One belonging to the
| Trinity has been crucified" (see Gieseler, i, 286; Schörmich, xviii, 329), which was subsequently reversed by
| the Fifth (Ecumenical Synod of Constantinople in
| 558 (Athanaea 10). Fullo's addition to the Trisagion
| was in use among the Catholics of Syria until its rejec-
| tion by the Concilium Quieruam in 692 (Canon 81),
| after which only Monophysites and Monothelites con-
| tinued in the Catholic Church, and the latter had
| reached the conclusion that every addition to the Tris-
| agion involved a quaternity. Theopaschtism is a very
| general conception of the popular mind, even in Protos-
Theophany. The ancient Greeks were accustomed, during a certain festival known as η ἑορτάζων, to display at Delphi before the public gaze the appearance of all their gods. Θεοφανεία denoted the apparition of one or more gods. The term thus understood was applied by ancient Christian writers to the manifestations of God under the Old Covenant and to the incarnation of Christ. In the former case it refers to the events leading to the birth, the baptism, and the second advent of Christ. 'Η ἑορτάζων was, however, a usual substitute for its employment as respects his birth. See EPIPHANY. Later usage has given it the term a doctrinal meaning, by which it is made to designate a special form of the divine revelation of the divine glory; for it is necessary to examine the entire series of modes of the divine manifestation (see Breternicher, Systemat. Entwicklmg, p. 196). Without delaying to undertake a survey of this kind, we sketch the scriptural view of the theophany in the following paragraphs.

1. The theophany is never an immediate revelation of the supramundane Deity itself (John i, 18; 1 Tim. vi, 16). God reveals himself only in Christ (Matt. xii, 27). The theophany is therefore more accurately defined as a Christophany, or an epiphany of God in Christ; and all nature is a storehouse of signs of the divine presence, which uniformly point to Christ (Rom. i, 20; Col. i, 16). See LOGOS.

2. The theophany, regarded as a Christophany, is developed in three great stages: (1) under the Old Test.; (2) in the incarnation; (3) in Christ's second advent.

3. In that advent the theophany, or revelation of the divine glory, will reach its consummation (Titus ii, 13). The first advent was also a revelation of the kindness and love of God (iii, 4) and of his grace and truth (John i, 14-17; xiv, 9); and with that revelation corresponded the fact that Christ saved the Father in all his work, even as the future manifestation of Christ shall be accompanied with the blessed vision of the saints (1 John iii, 2). Our attention is, however, confined by dogmatics to the modes of manifestation which occurred under the Old Test. prior to the advent of Christ, or under the New as accompanying or representing his presence. See ADVENT.

3. The theophany or Christophany of Scripture is the epiphany of the coming Christ, mediated through the angel of the Lord (Gen. xvi, 7, etc.), of the face (Exod. xxxiii, 14; Isa. iii, 9), or of the covenant (Mal. iii, 1). This angel was not a created being. His symbolic sign was the pillar of cloud and fire; his attribute the display of the glory or majesty of God (Exod. 24, 17); his later Rabbinical and theological designation on the Shekinah (q. v.).

4. The manifestation of God in Christological theophany begins with the voice of the miracle (Heb. 1, 1). The voice of God and of heaven being identical, but different from the Bath-Kol of the later Jews, and progresses towards apparition proper, which is a miracle addressed to the eye, and in which the angel of the Lord appears escorted by actual angels, at first only two, but in later inscriptions growing in number. See JESUS-KOL.

5. Theophany, the objective mode of revelation, never takes place without being accompanied in the mind of the observer with an ecstatic vision. This connection with the theophany distinguishes it from the ordinary historical occurrences (2 Kii vi, 17; John xii, 12; Acts ix, 7; comp. xxii, 9, 12, 11). On the other hand, no vision is without its element of theophany, which fact distinguishes it from mere subjective hallucination (Isa. vi, 1 sq.; the book of l uniel; Zechariah; Acts x, 9). See VISION.

6. The various modes of manifestation can be distinguished, therefore, only when the predominantly objective facts of the theophany are compared with the predominantly subjective facts of the vision. See PROPHECY.

7. Theophanic Christophany enters fully into earthly
THEOPHILANTHROPISTS—conditions by being incorporated in elements of nature and of soul-life. It completes itself in one direction by the appariation of angels, and in the other by symbolical representations of an earthly nature (Gen. iii, 24; Exod. ii, 16; Ps. cxviii, 1, cxxiv; Isa. lxxi, 2). Mal. ii, 7); but mostly all by the guidance of King Urim and Thummim.

8. Vision takes place in the way of a momentary vacating of the body or an ecstasy (2 Cor. xii, 4). It expands in an abundance of symbolical and allegorical visions (Ezek., Dan., Zech., Rev.), and finds its completion in the prophetic visions. The last and highest determination of the ordinary life of the person chosen, and occurs chiefly where the common life has not been developed to any considerable extent, as with the Old-Test. Joseph; or where it is involved with a secular calling, as in the case of the New-Test. Joseph.

See Deut. xi, 6.

9. The life of Christ combined into a higher unity all the fragmentary features of pre-Christian theophanies (οὐρανός, Heb. i, 1). His personal life revealed God to the world, and the entire universe became for him, in turn, a theophanic environment attesting himself, and his future life by the subjective vision, in which the contrast between ecstasy and ordinary consciousness of the world no longer exists. Consult Herzog, Reim-Encyklop., s. v.; Buttelstedt, De Appearitionibus Doctrum Gentilium (Ger. 1744); Milles, De Varsia Generibus Theosophiis (Hab. 1802); Stud. u. Krit. u. Sie Chemnitz, James Thacher.

THEOPHILANTHROPISTS (Gr. lovers of God and man), the name assumed by a party of French deists during the Reign of Terror to indicate their adherence to a natural or theistic religion and worship which were intended to supersede Christianity. In February, 1790, freedom of religious opinion, and with it of religious worship, was allowed; and it was clear that neither Christianity nor Catholicism in its usual forms had been driven out of the hearts of the people. The civil authorities were much concerned lest the old political sympathies for royalty should revive with Catholicism. Still, a felt consciousness of the necessity of some religion led many to adopt a form of worship adapted to a natural religion. The foundation of this new religion was laid in 1796 by five heads of families, who, having declared themselves Theophilanthropists, met together every week for united prayer, to listen to moral readings, and to be instructed in a practical religion. In the same year a kind of catechism or directory for public or social worship was published at Paris under the title of Manuel des Théanéoristes. This breviary was based on the simple fundamental articles of a belief in the existence of God and in the immortality of the soul. In 1798 Thiébaut-Lépeaux stood at the head of the society; the Directory assigned ten parish churches to the rapidly growing association, and the new worship soon spread over the provinces. As to their mode of worship, there was a simple altar—whereon flowers and fruit, according to their season, were placed as thank-offerings—and a rostrum for the speaker. The walls were adorned with moral mottoes, such as, "Children, honor your parents and respect your elders;" "Husbands and wives, be kind to one another." Instead of the traditional festivals, there now occurred those of nature, arranged according to the seasons of the year; in the place of sacraments, there were arbitrary and highly sentimental ceremonies, which took place at the birth of a child, at the reception of new members, at celebrations of marriage, at distribution of prizes to children, and at funerals. They had four special festivals, in honor of Socrates, St. Vincent de Paul, Jean Jacques Rousseau, and Pantheism. When the wedding began to revive, the Theophilanthropists began to decline. They and their sentimental trumpery were turned out of the churches; the Revolutionary government forbade them, Oct. 4, 1801, to use even the three churches which were left in their hands; and when their petition for holding their services elsewhere was refused, the Theophilanthropist religion soon died of inanition, despaired by the inful pile as well as by those who still remained Christians. An attempt to revive it after the revolution of 1830 utterly failed. See Blunt, Dict. of the Bible, s. v.; Gravier, Fruits of the School; s. v.; Graugues, Histoire des Sectes Religieuses; Hagenbach, Hist. of the Church in the 18th and 19th Centuries, ii, 435. Théophilestäti (θεοφιλεστατος, most dear to God), a title of respect given to bishops in the early Church. This title frequently occurs in the emperor's rescript in the civil law, and was of such common use in those times that Socrates (Proem. ad lib. vi) thinks himself obliged to make some apology for not giving it to the bishops that were then living. See Bingham, Christ. Antiq. bk. ii, ch. x, § 6.

THEOPHILUS (Θεόφιλος, friend of God), the name of two men associated with sacred history, one of them being mentioned in the New Test. and the other by Josephus.

1. The person to whom Luke inscribes his Gospel and the Acts of the Apostles (Luke i, 1; Acts i, 1). A.D. cir. 56. The important part played by Theophilus in allaying immediately occasioned the composition of these two books, together with the silence of Scripture concerning him, has at once stimulated conjecture, and left the field clear for it. Accordingly we meet with a considerable number and variety of theories concerning him.

1. Several commentators, especially among the fathers, have been disposed to doubt the personality of Theophilus, regarding the name either as that of a fictitious person or as applicable to every Christian reader. Thus Origen (Hom. in Luc.) raises the question, but does not discuss it, its object being merely practical. He says that all who are beloved of God are Theophili, and may therefore appropriate to themselves the gospel which was addressed to Theophilus. Epiphanius (Heresii. ii, 429) speaks doubtfully: ειναι ειναι τοις Θεοφιλοις τας γραφινες Πανευ, ἢ παντι καιρω θεοφιλοι διηγησανται. Sallustian (Epist. ad Salomon) apparently assumes that Theophilus had no historical existence. He justifies the composition of a work addressed Ad Ecclesiam Catholicaem, under the name of Timotheus, by the example of the evangelist Luke, who addressed his gospel to Theophilus. In the words of Erasmus, "the love of God."" Si nam scire Theophilium vocabulo amor, sic Timoteio honor divinitatis exiptrimitur." Even Theophylact, who believes in the existence of Theophilus, takes the opportunity of moralizing upon his name: και πας οδερως θεοφιλος, και κρατος κατα των παθων αναδημοσεως Θεοφιλου εστιν κρατιστος, δε και αιδος την εις ουνομα του Θεογενου (Argum. in Luc.). Among modern commentators, Hammond and Leclerc accept the allegorical view; Erasmus is doubtful, but, on the whole, believes Theophilus to have had a real existence.

2. From the honorable epithet σπάρτηρ, applied to Theophilus in Luke i. 3, compared with the use of the same epithet as applied by Claudius Lysias and Tertullius severally to Felix, and by Paul to Festus (Acts xxiii. 26; xxiv. 3; xxvi. 25), it has been argued with much probability, but not quite conclusively, that he was a person in high office in Rome, and a personal friend (Argum. in Luc.) conjectures that he was a Roman governor, or a person of senatorial rank, grounding his conjecture expressly on the use of κρατιστος. Eucumenius (Ad Act. Apol. i, 1) tells us that he was a governor, but gives no authority for the assertion. The traditional connection of Lucius Antiochus with the Theophili has disposed some to look upon Antioch as the abode of Theophilus, and possibly as the seat of his government. Bengel believes him to have been an inhabitant of Antioch, "ut veteres testantur." The belief may partly have grown out of a story in the so-called Recognitions of St. Clement (lib. x), which represents a certain nobleman of Antioch...
THEOPHILUS

334

THEOPHILUS

of that name to have been converted by the preaching of Peter, and to have dedicated his own house as a church, in which, as we are told, the apostle fixed his episcopal residence. Hence it is inferred that spòrèiws in Acts i, 1 proves that Luke was on more familiar terms with Theophilus than when he composed his gospel.

3. In the Syriac lexicon, extracted from the Lexicon Heptadot, of Castell, and edited by Michaelis (p. 948), the following description of Theophilus is quoted from Bar-Bahul, a Syrian lexicographer of the 10th century: "Theophilus, primus credentium et celeberrimis apud Alexandrienses, qui cum aliis Ægyptiis Lucam rogabat, ut eis evangeliunm scrieret." In the inscription of the Gospel according to Luke in the Syriac version, we are told that it was published at Alexandria. Hence it is inferred by Hase (Bibl. Bremensis Class. ch. iv, fasc. iii, dis. 4, quoted by Michaelis, Intro, to the New Test. [ed. Marsh], vol. iii, ch. vi, § 4) and by Bengel (Ordo Temporum [2d ed., p. 196]) that Theophilus was, as asserted by Bar-Bahul, a convert of Alexandria. This writer ventures to advance the startling opinion that Theophilus, if an Alexandrian, was no other than the other Greek of that name, who is said by the Hagiographer, name of Diodichis ('μυτοικας, i. e. Θεοφιλός). It hardly seems necessary to refute this theory, as Michaelis has refuted it, by chronological arguments.

4. Alexander Morus (Ad Quemdam Loca Nov. Fad. Note, ad Luc. i, 1) makes the rather hazardous conjecture that the Theophilus of Luke is identical with the person who is recorded by Tacitus (Annal. ii, 55) to have been denounced for fraud at Athens by the court of the Areopagus. Grotius also conjectures that he was a magistrate of Achaia baptized by Luke. The conjecture of Grotius must rest upon the assertion of Jerome (an assertion which, if it is received, renders that of Morus possible, though certainly most improbable), namely, that Luke published his gospel in the parts of Achaia and Boeotia (Jerome, Comment. in Matt. Proem.).

5. It is obvious to suppose that Theophilus was a Christian; but a different view has been entertained. In a series of dissertations in the Bibl. Bremensis, of which Michaelis gives a resume in the section already referred to, the notion that he was not a Christian is maintained by different writers, and on different grounds. Michaelis, one of the contributors, assumes that he was a Roman governor, argues that he could not be a Christian, because no Christian could be likely to have such a charge intrusted to him. Another, Theodore Hase, is of the opinion that Theophilus of Luke is no other than the deposed high-priest Theophilus the son of Annus (see below). Michaelis himself is inclined to adopt this theory. He thinks that the use of the word καρπαῖς in Luke i, 4 proves that Theophilus had an imperfect acquaintance with the facts of the gospel (an argument of which bishop Marah very properly disposes in his note upon the passage of Michaelis), and further contends, from the iv ἴπτιοu of Luke i, 1, that he was not a member of the Christian community. He thinks it probable that the evangelist wrote his gospel during the imprisonment of Paul at Caesarea. He is astonished at the address of the Jewish nation. According to this view, it would be regarded as a sort of historical apologia for the Christian faith.

In surveying this series of conjectures, and of traditions which are more nothing than conjectures, we find it easier to determine in what we are expected to believe. In the first place, we may safely reject the patriotic notion that Theophilus was either a fictitious person or a mere personification of Christian love. Such a personification is alien from the spirit of the New-Test. writers, and the epithet spòrèiws is a sufficient evidence that it is directed not to Theophilus as one of the heads of the Jewish nation. According to this view, it would be regarded as a sort of historical apologia for the Christian faith.

THEOPHILUS OF ANTIoch

pagans in his district, which resulted in the most of them being driven out of Egypt. His behavior to the different sects of Christians was marked by the same unqualified irenicism. He appears to have passed a part of his early life among the Christians of Nitrus, some of whom were Origenists and others Antiochene.

At first he declared himself decidedly against the latter, and, in opposing them, he sided openly with the Origenists, drawing his arguments from the works of Origen. When, however, it became evident that the majority of the Egyptian monks were Antiochene, Theophilos went over to them about 899, condemned the writings of Origen, commanded all his clergy to burn them, and commenced a cruel persecution of all who opposed the Antiochene morphists, while he himself continued to read the works of Origen with admiration. In 401 he issued a violent letter in which he condemned the writings of Origen and threatened the latter's adherents; in the following year he sent forth another of like character, to the unbound delight of Jerome. Theophilos was subsequently called to Constantinople by the empress Eudoxia, and secured the deposition and banishment of the Origenists (q. v.) in 403. During the tumult which followed, Theophilos escaped and returned to Alexandria, where, in 404, he issued a third Paschal letter against the Origenists, and where he died in 412. The works of Theophilos mentioned by the ancient writers are, Προσωπωρογεων τοις φοιτητας γα τα Καταραγων έναι, and De Homesthese (Dialog, ii, 191), and which Gennadius (38) calls "adversus Origenem unum et grande volumen:"—Letter to Porphyry, Bishop of Antioch, quoted in the Acta Concilii Episc. pt. i, c. 4.—the three Paschal Letters already mentioned and one more:—and some other unimportant letters, letters, and controversial works. The Paschal Letters are still extant in a translation by Jerome, and are published in the Antidot, contra Divers. Oiamna Sacrorum Heresiae (Basel, 1528 fol.); and the whole of his extant remains are contained in Galland, Biblioth. Patr. vii, 203 fol.; Carey, Hist. Lit. s. v. 365, p. 279, 380, 414; Murdock, note to Mosheim, Eccles. Hist. l, 444 (Engl. ed.).—Smith, Dict. of Greek and Latin Biog. s. v.

Theophilos of Antioch, a writer and bishop of the Primitive Christian church, was educated a heathen, and afterwards converted to Christianity. He was ordained bishop of Antioch, succeeding Eros, about A.D. 170, and governed the church twelve or thirteen years, at the end of which he died. Having been converted from heathenism by the study of the mysteries, he wrote an apology for the Christian faith, addressed in the form of a letter to his friend Autolycus. The work shows much learning and more simplicity of mind. In its general structure it resembles the works of Justin Martyr and the other early apologists; but it contains a more detailed examination of the evidence for Christianity, derived both from Scripture and from history. The three books of Theophilos to Antioch were first published in the collection of the monks Antonius and Maximus entitled Sententiarium sicte Capitula, Theologi- corrarium praeclare, et Historia et Prospecta Libri, Tomi Tres. There have been a number of manuscripts, and most complete being that of Johann Christopf Wolf (Hamb, 1724, 8vo), and an English translation by Joseph Betty (Oxford, 1722, 8vo). Theophilos was the author of several other works which were extant in the times of Eunuchus and Jerome. Among them were works against the heresies of Marcion and Hypothenere.—Commentary on the Gospels (still extant in Latin, and published in the Bibliotheca Patrum [Paris, 1755, 1598, 1699, 1654, etc.]). Jerome refers to his Commentaries on the Proverbs. See Smith, Dict. of Greek and Roman Biog. s. v.; Alford, Bible Greek, vol. i, 816; Mosheim, Eccles. Hist.; Herzog, Real-Encyclop. s. v.

Theophilus of Cessaia, a bishop who presided over the Council of Cessaia in Palestine, and signed the letter of that council, which appears to have been drawn up by himself, on the Paschal controversy, A.D. 198.

Theophilos of Cilicia, so often mentioned in legend, is said to have originally been the administrator of the Adana bishopric. Of modesty, he declined the episcopal see, and was deprived of all his honors by the new favor of Dios. He was applied for help to a Jewish sorcerer, who brought him into a nightly convention of devils. Here help was promised to him provided he would deny Christ and Mary and would assign his soul. He was restored to his former position; but, regretting what he had done, he prayed as a penitent to Mary, and this intercession Christ took the assignment away from the devil and enchanted him with his breast while asleep in the church, tired out by prayer. He now openly confessed his sin and died three days later. The author of the legend is said to have been a Greek cleric, Eutychianus; while a Neapolitan priest, Paulus (9th century), made it known in the West. In the Acta SS. for Feb. 4 we find this legend in a poetical dress, by the bishop Marob of Rennes. See Jurjina, Epitomes de Rulobon, vol. ii; Pfeiffer, Marienlegenden (Stuttgart, 1846); Blumenau, Theophilos (Gien, 1838); Hoffmann von Fallerelen, Theophilos (Hanov. 1853—54).—J. B., Riedens Gedichte über Theophilos (Munich, 1873; edited after a Munich MS. of the 18th century). (B. F.)

Theophilos of the Indies, bishop of the Homerites, was born in the isle of Diu. When yet a youth he was brought as a hostage to Constantinople, where he became a Christian (Arian). He was made deacon, and finally bishop for the Arabic mission about 850. Being supplied by Constantius with rich presents for the princes at home and with money for the building of churches, he converted the king of the Homerites, and built churches at Taphar, Aden, and Hormuz. The large number of Jews, however, residing in the country prevented a further propagation of Christianity. In the year 856 Constantius appointed him bishop of the Ethio- pian Church. From the isle of Socota he went to Axum, but was soon obliged to leave the place. See Le Quelen, Orienta Christiana, li, 644; Theolog. Universal-Lexicon, s. v. (B. F.)

Theophori (Θεοφόροι, God-bearers), a name assumed by some of the early Christians, signifying that they carried about with them the presence of God. St. Ignatius gives himself this title in his inscriptions to his epistles, both of which begin Ἰηναρων ὧ καὶ θεο- φόροι; and explains his meaning in his dialogue with Trajan, "Theophorus is one that carries Christ in his heart." "Yes," said Trajan, "carry him that was crucified in thy heart?" He replied, "Yes; for it is written, 'I will dwell in them and walk in them.'" Anastasius Bibliothecarius, indeed, gives another reason why Ignatius was called Theophorus (Θεοφόρος, God-bearer)—because he was the child whom our Saviour took and placed in the midst of his disciples, laying his hands upon him; and, therefore, the apostles would never presume to ordain him by imposition of hands after Christ. But, as bishop Pearson and others observe, this is a mere invention of the modern Greeks, Vincentius Bellavacca and others advance this ridiculous reason: that Ignatius was so called because the name of Jesus Christ was found written in gold letters in his heart. But against these traditions we have the fact that the title was not peculiar to Ignatius, but common to all Christians. See Bingham, Christ. Antig. bk. i, ch. i, § 4.

Theophylact, archbishop of Achrida and metropolitan of Scythia, a eminent ecclesiastical writer, was born and educated at Constantinople, and was bishop in 1077, and perhaps some years later. The date of his death is uncertain, but probably about 1112, or later. After he was made bishop, he labored diligently to extend Christianity in his diocese, but met with much opposition, of which he complained in his
epistles. The works of Theophylact are: *Commentaria
in Quatuor Evangelia* (Paris, 1631, fol.); *Commentaries
on the Acts of the Apostles*, Greek and Latin (Colom-
bia, 1659); *Commentaries on St. Paul's Epistles*, Greek and
Latin (Lond. 1636, fol.); *Commentaries on Four of
the Minor Prophets*; namely, Habakkuk, Jonas, Nahum,
and Hosea, in Latin (Paris, 1588, 8vo). The Comment-
aries on all the twelve minor prophets are extant in
Greek in the library of Strasbourg, and have been de-
scribed by Michaelis in his *Biblioth. Orientalis*. These
commentaries are founded on those of Chrysostom; but
his exegesis is so direct, precise, and textual, and his
remarks are so often felicitous and to the point, that
his commentaries have always been highly prized—See
especially his *Commentaries on the Acts of the Apostles*,
which have been commended by John Meursius (Leyden,
1617, 4to), and also in the *Bibliotheca Patorum*—besides
several tracts, some of which are rather doubtful.
A splendid edition of all his works in Greek and
Latin was published by J. F. Bernard Maria de Ru-
Dict.* s. v.; Smith, *Dict. of Greek and Latia Biotog.* s. v.

The Theophylactian name given to the orthodox
Christians of Alexandria by the Jacobites in the 7th

Theosebites, a sect which spread in Palestine and
Phoenicia during the first half of the 5th century, and
appear to have been similar to, if not identical with, the
Hypsistarians (q. v.). The Theosebites exalted the
moon, sun, and stars into objects of worship, and yet ac-
cepted the Christian Deity; those who adopted their res-
olution thus appear to have been an adulteration of
Christianity with Magianism. Probably these sects are to
be traced to the Therapeutæ and Essenes, who worshipped
τοῖν θεόν or τύχαρον, kept the Jewish Sabbath, and Jew-
ish observances respecting food. They professed a pæ-
stial belief in Christ, but were, at the same time, strict
Unitarians.

Thesophsy (Σεφωσοφία, divine wisdom), the name
given to a so-called sacred science, which holds a
place distinct as well from that of philosophy as from
that of theology, even in questions where these latter
sciences have the same object with it: namely, the
nature and attributes of God. In investigating the divine
nature and attributes, philosophy employs as the basis of
its investigation the ideas derived from natural rea-
son, while theology supersedes to the principles of
natural reason those derived from authority and revela-
tion. Thesophsy, on the contrary, professes to exclude all dia-
lectical process, and to derive its knowledge of God
from direct and immediate intuition and contemplation,
or from the immediate communications of God himself.
Thesophsy, therefore, so far as regards the science of
God, is but another name for mysticism (q. v.); and the
direct and immediate knowledge or intuition of God, to
which the Mystics laid claim, was, in fact, the formation
of that intimate union with God, and consequent ab-
straction from outer things, which they made the basis of
their moral and ascetical system. Thesophsy has exis-
ted from a very early date; and within the Christi-
\~nian period we may number among Thesophs the Neo-
Platonists, especially Plotinus, Iamblichus, and Proclus,
the Hesychasts of the Greek Church; all those of the
medieval Mystics who laid claim to any dogmatical theo-
\~r\~y; and in later times the Paracelsists, Bodenstein and
Thalhauser, Weizel, Jacob Boehme, and Swedenborg.

Below is a brief outline of Thesophsy as taught by
Boehme among his followers. He worked out the efflux
from the One Infinite Existence, and such an efflux is
a necessary attribute of God's own being. All things
come from a working-will of the holy, triune, incompre-
hensible God, who manifests himself through an exter-
nal efflux of fire, light, and spirit. Angels and men are the
true and real sons of God, the true light, life, and spirit,
the divine fire from which light and love are gener-
ated in them. This triune life in God is the perfection
of being, and the loss of it constituted the fall of angels
and men. Thus man having been made a living image
of the divine nature and endowed with immortality, he
was exchanged for love, light, life, and spirit of the
world. He died to the influences of the Spirit of God on the very day of his transgres-
sion, but remained subject to all the external influences
of the world; and the restoration of the influence of the
Spirit constitutes the work of redemption and sanctifica-
tion. Christ restores man to the nature of the physical
al life, which is possessed by all through new birth
and his indwelling. No son of Adam can be lost except
by the willful loss of this paradigmal gorm of the divine
life; and its development is the development of salva-
tion. In the hands of Law, the theosophy of Boehme
achieved a much more reasonable form. All that in which
it had been clothed by its author, whose language was a
medley of alchemy, obscure analogies, and false eury-
logies. It was then exhibited as a philosophy of re-
demption and spiritual life, which only wanted the key-
stone of sacramental psychology to make it a firm sys-
tem of truth. For full information on the subject, see
Walton, *Notes and Materials for an Adequate Bio-
ography of William Law, comprising an Elucidation of
the Scope and Contents of the Writings of Jacob Boehme,
d and of his Great Commentator Dionysius Andreas Freher,
etc. (1854).* See Blunt, *Dict. of Doctrinal Theology*, s. v.;
*Chamber's Encyclopedia*, s. v.

Thetóikos (Θετοίκος, God-bearing). 1. A title ap-
plied by the later writers to the Virgin Mary as the
"mother of God." See MARIOLATRY.

2. An ecclesiastical term adopted at the councils of
Epheus and Chalcedon to assert the doctrine of the
divinity of our Lord's person. The truth which it was
designed to teach is that although two natures are
united in one Christ, yet there are not two persons, but
one. Our Lord was a divine person from all eternity,
and upon his incarnation he did not cease to be the
person he had been before. There was, therefore, no
change or interruption of his identity, for the Godhead
became incarnate, not by the conversion of the Godhead
into flesh, but by taking the manhood into God. Al-
though the nature which he took of the substance of
his mother was human, the person who was born was
divine, and this was the truth declared in the adoption
of the term Θετοίκος. It is not, of course, meant that the
Virgin was the mother of the Godhead of our Lord,
but that it is the nature, which he took of the substance,
was so united to the divinity that the person
gotten of her was God as well as man. In this sense
she might be called the mother of God. Equivalent
expressions are used by Irenæus and Ignatius, while
Θετοίκος is used by Alexander of Alexandria, Athana-
sius, Cyril, Beza, Origen, and others of this theologian.
This doctrine has been the cause of much debate, and
of more than one council. See CHRISTOLOGY.

Therapeuτεσ (Σεισαρετταί [attendants, i. e. war-
shippers, sc. of God] and Σεισαρεττηδες), a Jewish sect in
Egypt, which is described by Philo in a separate
treatise Περὶ Λογίου Ἰθμίου αἰτῶν ἀρτίων, or De Vita Contemplativa (Off. [ed. Mangey], ii, 471-
496). It is strange that no later writer of that period,
even Josephus, knows anything about the Therapeu-
tes; for what we find in ecclesiastical writings about
them since the time of Eusebius is nothing but a repro-
duction of the Philonic narrative; and the erroneous
opinion of Eusebius, who regarded the Therapeutæ as
Christians, has been followed by all Church fathers,
with the exception of Photius. Modern critics have,
with a few exceptions, identified the Therapeutæ with the
Essenes, but with this difference, that while the for-
er were only theorists, the latter were men of practical
life. Of late the question as to who the Therapeu-
tæs were has excited much discussion since, especially
among the Jewish historians. Schubert, especially
the Jewish historian Grätz, believe Philo's treat-
sie to be spurious, and only an embellishment of Chris-
tian monarchism as it began in Egypt. But, before de-
THERAPEUTÆ

The fatherland of the Therapeutæ is Egypt, and beyond this country the order has probably not been propagated. When Philo speaks of their diffusion through the whole world (πολλακοι μιν ουν της ιακωμης ουσια του ταυτο του γενους), we cannot take his words in their literal sense, for the same reasons as above. But in a more general sense, because we have no notice whatever of the Therapeutæ outside of Egypt. What he meant to say is that, outside of Egypt, there were also men of a similar tendency, without believing that they really belonged to this order in Egypt. Keim thinks, therefore, that Philo’s words are an exaggeration, or rather that he confuses the hermit life of the Jews with like “phenomena among the Greeks and barbarians.” Grätz, however, holds a different opinion, and adds this as an argument for Christian monks, who were generally diffused at an early age (as early as the time of the Porphyrius or of Philo). “But,” asks Dr. Keim, “has not Philo compared both the Essenes and Therapeutæ with the Gymnosophists and Magi, with the wise man Kalanos, with Anaxagoras and Democritus?”

It is evident that Philo, in describing this order, had a certain colony in view near Magnesia Lemnae, to the south of Alexandria, where the Therapeutæ lived. They dwelt at no great distance from each other, but every man in his own little house, his sanctuary, and his cell. They lived alone for the whole week, not stepping over the threshold, nor looking out (συν απλους συν υπεραινταντες, ἀλλ’ απελθε ἐς ἄνωθεν).

Simple as was their house, their diet was equally so, being a cloak of some shaggy hide for winter, and a thin mantle or linen shawl in the summer; and in their religious assemblies they appeared in a white garment. At the ordinary table their diet was very simple; it was not even necessary to cut the flesh of the animals on which it was served, and their mode of living was very simple. None of them took any meat or drink before the setting of the sun, because they believed that the work of philosophizing was one worthy of the light, and that the care for the necessities of the body was suitable only to darkness; on week days only they partook of the flesh of the animals, and their occupation was hunting. A brief portion of the night to the other (πολλ’ τοις μιν φιλοσοφοις ἄξων φωτός κρινομεν ἐννα, σκοτος δι’ εις τας σωματικας ἀνάγκας, ἄνω της μιν ἦμες, τας δε βραχι τι μόρος της νυκτος ἐνεμας). Many fasted for three days, several for six. They ate nothing of a common dish, but each brought his own, which was cooked without seasonings of salt, which the more luxurious of them further seasoned with hysop, and their drink was water from the spring. For such a simple mode of living they naturally had no need of great earthly possessions; but, as Philo says, they left their possessions to their relatives and friends, and without any property they went out, as if their mortal life had already come to an end, only anxious for an immortal and blessed existence (ἀιτε δι’ αυτος της αασαντος και μακαριας εις των ἡμιον τιτλοι ρητεσαι νομιζοντες ἵνα των θευρη μιν ανοελαται τοις ουσίαις ουσι ου θεογραφαι, ἀιτε και της αληθειας ολοθρευται). They prayed twice every day, at morning and at evening. When the sun rose, they entreated God that the happiness of the coming day might be real happiness, so that their minds might be filled with heavenly light. The interval between morning and evening was devoted wholly to prayer, which was usually of a very private character. They took up the Sacred Scriptures and philosophized concerning them, investigating the allegories of their national philosophy, since they looked upon their literal expressions as symbols of some secret meaning of nature intended to be conveyed in those figurative expressions, which are drawn from those of the philosophy of the Logos, the Pure Mind, the All-Pervading God, the Creator of all things.

As a canon of such allegorical exposition of Scripture, the real home of which was in Egypt, they used the writings of the Rabbis for the guidance of this interpretation, and the figures of the Scripture, and the conceptions of the authors of the Rabbins, as the diviners, and the Logos, as the all-pervading deity, were the materials for this construction.

They also composed psalms and hymns to God in every kind of metre and melody imaginable, which they sang at their meetings. Having thus passed the day, they prayed again that their soul, being entirely lightened and relieved of the burden of the outward-senses, might be able to trace out truth existing in its own consistory and council-chamber (in τωστω των συνειριων και βουληματων διηεσει ηρημων); and many of them of Philo’s statement is to be given credence, are said to have spoken in their sleep, divulging and publishing the celebrated doctrines of the sacred philosophy (πολλοι ουν και ἐκλαλητητον εν υπνων αινοτολογημα τα της ἑραις φιλοσοφιας αυτομη δι’ ερμηθα).

Women were left by the council of the members of the order, for the greater part of whom, though old, were virgins in respect to their purity, and were animated by the same admiration for, and love of, wisdom, in the exercise of which they were desirous to pass their lives. These women, like the male members of the order, lived separately, performing the same duties: but at the meetings and banquets both sexes were united.

Slaves—labor was dispensed with, because they looked upon the possession of slaves as something absolutely and wholly contrary to nature—for nature had created all men free; but the injustice and covariance of some men who preferred inequality—that cause of all evil—having subdued the weaker, had given to the more powerful authority over the vanquished. At their common banquets, therefore, no slaves ministered to their wants, but young men who were selected, and whose dress was such that nothing of a slavish character could be seen in it, or, to use the words of Philo, ἄξωτοι δι’ και καλιμνοι των φιλοσοφων ειςαυαν υπεραιντοτε, ενεκα των μιν εδωκον ἐπιφρεσον και συνειριωτα, εις το τοιο το θυμηπισμον, i.e., they were unpretentious and were their tunicas let down, in order that nothing which bears any resemblance to a slavish appearance might be introduced into this festival.

At the banquet they were presided over by a president (προδρομος), who addressed them and intoned a form of prayer, in which they all joined, but according to the length of time they belonged to the order. We must not, however, think that the president or elders exercised any gubernatorial power, for this is nowhere inferred; their functions were only restricted to the assemblies, in which also ἐγγενες and ἔφροι were mentioned, who acted as leaders of the choruses. The seventh day was especially distinguished. They anointed their bodies, and, clothed in white garments, they assembled in the common συμπισμον. Here they sat down with all becoming gravity, keeping their hands inside their garments, having their right hand between their legs, and the left hand by their side, close to their flank. Then the oldest of them, who had the most profound learning in their doctrines, came forward and spoke with steadfast look and with steadfast voice, with great powers of reasoning, and great prudence— not making any exhibit of their gratitude or respect, nor did they speak of the ecclesiarchs of old or the sophists of the present day, but investigating with great pains and explaining with minute accuracy the precise meaning of the laws, which penetrated through their hearing into the soul, and remained there lasting. Quietly they listened in silence, showing their approbation by nodding their heads, and indicated to the eye by a light smile their look of the eyes. In this sacred assembly the women also shared; but they had their own seats, being separate...
rated from the male members by a wall rising three or four cubits upwards, but in such a manner that they could converse with those who were within.

The seventh Sabbath, the πετυμασθή, was especially distinguished. The number fifty was regarded by them as the most holy and natural of numbers, being compounded of the power of the right-angled triangle, which is the principle of the origination and condition of the whole (τὰς δὲ πρωτέως μεγάλας ἰσότροπας πετυμασθέντας θεολογίας ἐν παντὶ πλῆθος Πλειαδάν, ἀγάστας καὶ φισταστός ἀγάμος), ἵνα τὸς ὑδρογόνου τριγώνων ὑψηλόμενος, ἤπειροι ἄρχον τῆς ἁλλής γενέσεως καὶ συστάτους). Clothied in white garments, they came together to the common feast. Before they partook of the same, they lifted up their eyes and hands to heaven and prayed to God that it might be acceptable to him. After the prayer, they sat down, the men sitting on the right hand and the women on the left, on rugs of the coarsest material. Before the feast commenced, questions were asked and answered. A passage of the Scripture was explained and religious questions were settled. All listened attentively to the speaker, indicating their attention and comprehension by their nods and looks. When the president appeared to have spoken at sufficient length, and to have carried out his intentions adequately, so that his explanation had gone on felicitously and fluently through his gifts of wisdom, acuteness, and language, the others had been profitable, applause arose from them all as of men rejoicing at what they had seen and heard; and then some one, rising up, sang a hymn which had been made in honor of God, either such as he had composed himself or some ancient one of some old poet. After him others also arose in their ranks, and in becoming manner, while every one else listened in decent silence, except when it was proper to take up the burden of the song and join in at the end. When each individual had finished his psalm, the young men brought in the table on which was the food—the leavened bread, minchah, and mingled with some hysoop, out of reverence for the sacred table which was in the holy outer temple; for on this table were placed loaves and salt without seasoning, and the bread was unleavened, and the salt unmixed with anything else.

After the feast they celebrated the sacred festival during the whole night (μετὰ δὲ τὸ δείπνον τῶν ἵππων ἔνας πανωρίζεται). All stood up together, and in the middle of the entertainment the two choruses were formed at first, the one of men and the other of women. Each chorus had its leader and chief, who was the most honored and honored of the leaders of the teaching, the hymns in honor of God in many metres and tunes, at one time all singing together, and at another moving their hands, and dancing in corresponding harmony. When each chorus of the men and each chorus of the women had feasted separately by itself, they joined together, and the two became one chorus—an imitation of that one which, in old time, was established by the Red Sea, on account of the wondrous works which were displayed there before Israel, and where both men and women together became one chorus, Moses leading the men, and Miriam leading the women; and the strings, raising their hands to heaven, imploring tranquility and truth and acuteness of understanding. After the prayer, each retired to his own separate abode, again practicing the usual philosophy to which each had been wont to devote himself.

II. Therapeutæ and Essenes.—On account of the manifold traits which were found among the Therapeutæ and Essenes, it has been inferred that the Therapeutæ were but the Egyptian branch of Palestinian Esseniun. This hypothesis is seemingly confirmed by what Philo says at the beginning of his treatise on the Therapeutæ: Having mentioned the Essenes, who are selected for their admiration and for their especial adoption the practical course of life, and who excel in all, or what, perhaps, may be a less popular and invidious thing to say, in most of its parts, I will now proceed, in the regular order of my subject, to speak of those who have placed the speculative life, and I will say what appears to me to be desirable to be said on the subject. The majority of critics have therefore not hesitated to believe in a causative connection between the two sects, and have thus, on account of Philo's words, separated the Egyptian Therapeutæ, as the theoretiasts, from the Palestinian Essenes, whom they designate the practitioners. In this assumption, there can only be a diversity of opinion as to which of the two sects justly claims the temporal precedence—whether the theory of the Therapeutæ or the practice of the Essenes is the original, or, in other words, whether Egypt or Palestine originated the theoretiastery within Judaism which is designated by the name of Essenism. The opinion that the temporal precedence belongs to the Therapeutæ, and that after Therapeutism had been planted on the soil of Judea the Order of the Essenes originated, is advocated by Grieser [Kritische Geschichte des Therapeutismus. Stuttgart, 1831 (2d ed. Leipzig, 1855), Lutterbeck (Die neuen testamentlichen Lehrbücher [Mayence, 1852], I, 275 sq.), Mangold (Die Irenkreb der Pastoralbriefe [Marburg, 1858], p. 57 sq.), and Holtmann (Geschichte des Volkes Israel und die Entstehung des Christentums [Leips. 1867], II, 79 sq.). The opposite opinion is represented by Ritshy (Geschichte des Therapeutismus [Leips. 1855], p. 348 sq.), Hilgenfeld (Die jüdische Apokalypse in ihrer geschichtlichen Entwicklung [Jena, 1857], p. 278 sq.), Herzfeld (Geschichte des Volkes Israel [2d ed. Leips. 1888]), J., ill., 406), Zeller (Geschichte der Philosophie der Griechen [Ibid. 1808], III, III, 258 sq.), Bellermann (Vorrichtungen des Abendland über Essener und Therapeuten [Berlin, 1821], p. 80, note), and Harnischmacher (Die Essenorum apud Judeos Societate [Bonn, 1866], p. 26), who admit a causative connection of both, without deciding the time of the origin. Now, denying, as we do, in opposition to the above-mentioned critics, any connection between the Therapeutæ and the Essenes, we add, in the question which of the two formed the connecting-link for the other, we will, for the sake of justifying our assertion, draw a parallel between the two sects, and first consider those points in which both agree. Both sects diligently studied the Scripture, and interpreted the same allegorically. Besides the Old Test., both had a high consideration for the writings of the older members of their order. They favored the abolishing of slavery; lived in a very simple manner, and were accustomed to appear at their religious exercises in white garments. More common traits cannot be proved as the Therapeutæ and Essenes were an entirely married life. But even this is no proof, because, according to Josephus, at least one part of the Essenes, though perhaps only the minority, married. It cannot also be said that both agreed in leading a life entirely separated from the world. Of the Therapeutæ, it is true, this can be said, but not of the Essenes, because, as Josephus tells us, they instructed the youth and took otherwise an active part in the weal and woe of their people, as they did, for instance, in the war against the Romans for the liberty of their country.

But what are the differences which exist between the Therapeutæ and Essenes? We call attention to the following:

1. The Therapeutæ led a monastic, secluded life, given entirely to contemplation. The Essenes, according to the rules of their order, were obliged to work. Their labor was prescribed for them by the law, and was variously appointed. They cultivated the fields, and were engaged in manual labors as well as in arts.

2. The Therapeutæ were separated from each other in cells, and only came together on the Sabbath and on the special occasions. The Essenes, however, however, as they resided, had their common lodges, where they lived and dined together.

3. The Therapeutæ, upon entering the order, left everything to their relatives and friends. The Essenes delivered their property to the order for the benefit of all.

4. The Therapeutæ did not eat before the setting of the sun; the Essenes enjoyed two meals daily.
5. The Essenes were divided into four classes or grades, which were so marked that a member of one class had to be born himself when he touched anything belonging to a lower class. The Therapeutæ had no such distinction, and the rank of the higher degrees had the knowledge of mysteries, which was not communicated to the lower degrees; of the priests and scribes of the Temple there were no offerings to the Temple at Jerusalem, and thus became guilty of apostatising from an important part of the Mosaic law. The Therapeutæ were connected with the Temple and with the sanctuary, and were known something about it; and even if Pliny's silence could be explained because he only knew one Essenic colony living by the Dead Sea, it might be supposed—and in this Grätz is correct—that Josephus, who otherwise speaks very fully about the order, ought to have mentioned the Therapeutæ. The silence of Josephus can therefore only be explained from the very fact that the Therapeutæ had no connection whatever with the Essenes, but that they formed an independent sect within the Egyptian Judaism, the existence of which—since its number and activity were less important—was entirely unknown to the Essenes and their scribes concerning the female Therapeutæ (Σερπατραγίδες). Grätz also finds incredible, because Josephus marks it as one of the characteristics of the Essenes to avoid all contact with the opposite sex; hence he believes that these female Therapeutæ were nothing else than the sisters (sorores substantiæ) of the male Christian ascetics used to have about them for the sake of attaining, by constant temptation, a higher virtue, but who, as is known, have been the cause of great scandals. Against this, Zeller remarks that in this respect the Egyptian Essenes or Therapeutæ might have had other institutions than those of the Palestinians, since their principles on the worth of an unmarried state were in the main not affected; and this difference of view does not indicate such a great deviation from the principles of the order as the practice of one branch of the Palestinian Essenes who married they agree with; that, according to them, the wives of the married Essenes were not, like the female Therapeutæ, members of the order. But this actual deviation—that while the Essenes excluded women entirely from the common feasts and meetings, this was not the case among the Therapeutæ—it is precisely the living witness of the differences between the Therapeutæ and Therapeutæ not, as Zeller believes, one and the same sect. This being the case, it must not be supposed, as Grätz believes, that the Therapeutæ, not being Essenes, were Christians. Grätz overlooks the circumstance that while the so-called sorores substantiæ lived in very close communication with the Christian ascetics, this cannot be said of the female Therapeutæ. For can we safely infer, from the participation of women in the common feasts and meetings, that the Therapeutæ really lived each with a female companion? Against such a hypothesis we have also the words of Philo, τὰς γυναῖκας τῶν ἡμῶν ἡμῶν καὶ συνηφορίαν τοῖς λεγετίται, οἰκουμενίας φιλόσοφων, who emphasizes the fact repeatedly that they sought solitude and desired to be left to themselves in order not to be disturbed in their contemplative life (διήγησιν γὰρ καὶ θεατρικῶν τῶν ἡμῶν ἐναντίον καὶ μεταφυσικῶν). But, as Zeller points out, there is the passage in this treatise which indicates, by Grätz tries to prove, that the Therapeutæ, like the Christian ascetics, had aimed at a higher degree of perfection by living together with the female members? From the introductory words of the Philonic treatise, Grätz also infers that the female Therapeutæ, each with a companion, were not in self-will or conveyed by the female Therapeutæ, since the self-will with the treatise Προ τῶν σωτηρίων εἶναι ἄλληδραν erroneously, as with a writing on the Es-
The words in question are, Ἐσσένων πτερι διαλεξεῖς ὑπὸ τοῦ πρακτικοῦ ἔγγυων καὶ ζωοτρόποιν αὐτή τῆς ἄναρχος ὑπογράφουσαν τῷ μνήμιον τῷ πληρωματασκευασμένῳ ἁπάτης τοῦ πληρωματασκευασμένῳ. Philo could not possibly say that he "wrote a treatise" on the Esseēnes (Ἐσσένων πτερι διαλεξεῖς), when the passage in question only occupies the twelfth part of the treatise, and he only mentions this sect as one of the many. But against this it must be argued that διάλεγείασα πτερι των διαλεξεις, when in context, does not mean "to write a treatise," but "to speak on something," and this, as Zeller remarks, Philo has evidently done concerning the Essenes. Moreover, such an association of topics is not inconical at all, as Grätz thinks, because by this two Jewish sects which have at least some traits in common were brought into contact. The Essenes, the title of the treatise on the Therapeutæ and for its being written by a Christian, Grätz thinks to lie in the fact that Christians—so Eusebius (Hist. Eccles, ii, 17) and others after him—recognised the Therapeutæ as "flesh of their own flesh." The holy cells of the Therapeutæ are called monasteries. It is evident, argues Grätz, that we have here the beginning of the monastic cells, which existed even before Anthony of Thebes, the founder of monasticism. But even if we admit that the entire mode of living of the Therapeutæ is similar to that of the later Christian monks, we are not at all justified to infer that the Therapeutæ were Christian monks. Why—and herein we agree with Grätz—should there not have been in Egypt, the fatherland and the proper home of monasticism, ascetics even before Anthony of Thebes? And why should this not have been possible within the pale of Judaism? And are the Palestinian Essenes not a similar phenomenon? To impress on the Therapeutæ the Christian character because of the word μοναστήριον, which the Christian monks used for their cell, is not reasonable, because, as Zeller remarks us, the expressions μοναστήριον and σεμνήθησις were only used by the Therapeutæ for a part of the Lord’s supper, and the whole, of the dwelling. The supposition seems to be that the Therapeutæ, or rather Philo himself, formed the words μοναστήριον and σεμνήθησις, and that Christian monks borrowed this nomenclature from their Jewish predecessors. That Philo, who was the first to use these expressions, has also formed the same appears evident from the fact that he himself explains them when saying, ἐν οἷς ἔστη δια ιερά ἡ σεμνήθησις καὶ διὰ τοῦ μοναστηρίου, ἐν ἧς ἔστησα ἡ σεμνήθησις τῶν μοναστηρίων τιθήμεναι. The Therapeutæ, Grätz goes on to argue, had not only a common feast, but after the feast, in the Lord’s supper, the essential part of the Jewish services, consisting of unleavened bread, of which all did partake, but only the better ones. Grätz evidently believes that we have here the difference between the messa catechumenorum and the messa fidelium. From the latter, which consisted in the celebration of the Lord’s supper and in a kind of liturgy, those who were not yet baptized, together with those who were excommunicated, were excluded; for, he asks, is this not Christian? But this question we must also answer in the negative. Grätz, as Zeller remarks, has over looked, and not, as did the Christian monks, for the whole of the dwelling. The question is, whether this supper was a prerogative of the better ones. Now the words ἐν Ἰουδαίοις προσφυγόν τοις κρυπτοίς do not refer to the Therapeutæ, but to the Jewish priests, to whom alone the Therapeutæ conceded the right of baptism. The design of this treatise is this unquestionably follows from the words of Philo: ὅταν δὲ ἐκεῖστος διασκορείται τοῦ ἔρευν οἱ νῦν τῶν πρὸς τοῦ συμφερόντος τραίτρον ἀνυφόβιον, ὅποι ἐστὶ, τὸ τὸ παναγιστάτου πτερι διαλεξεῖς ὑπὸ προσφυγεῖας ὑπὸ τοῦ πρακτικοῦ ἔγγυων καὶ ζωοτρόποιν αὐτή τῆς ἄναρχος ὑπογράφουσαν. The Therapeutæ were Christians, Grätz also finds in the fact that the presbyters among them occupied the first position; and that they were not presbyters because of their age, but because of their strict observance of the Therapeutæ life (προσφυγεῖας γραμματεύμας κατὰ τὸ ποιήμα τῆς προσφυγεῖας, ἐν τούτῳ μνήμις παίσεος ἐντείνει τῆς προσφυγεῖας ἱεράς, ἀλλά τοις ἐν πρώτῳ ἡλίκίας ἠγάπηκαν καὶ ἐνσωμάτωσαν τῇ ζωγραφείᾳ μετὰ καθάρσεως). We have thus, Grätz argues, the presbyters, or ἵστοσια, of the Christian congregations, who held one and the same office in the ante-Nicene time. But this conclusion is the less justifiable, since the office of presbyters was not exactly a Christian institution, but existed even before the Christian era, and was adopted by the Church from Judaism. Even among the Essenes we find such a distinction of rank, and the word ἵστος is not at all peculiar to Judaism and was adopted by the Church; hence to call them Christians, although he firmly believes that Christ belonged to the Essenes. The argument which Grätz takes from the vigils, so common among the Therapeutæ, for the sake of making them Christians is also of no avail, because fasting was something peculiar to Judaism and was adopted by the Church; not to say that the vigils, such nocturnal services existed before the Christian era. It is therefore not necessary to think, as does Grätz, following Eusebius (Hist. Eccles. ii, 17), of Christian rites before Easter Sunday. From the liturgy, the metrical hymns, and the typical mode of explaining the prophecies, according to Grätz, other arguments for the Christian character of the Therapeutæ might be made. But even these alleged Christian traits are purely Jewish. Of the hymns of the Therapeutæ, Philo expressly states that they were formed after the hymn of Moses and Miriam (Exod. xvi); and as to the allegorical interpretation, it was used among the Alexandrian Jews before the Christian era, and even before Philo. But as to what Grätz understands of the liturgy of the Therapeutæ and of its Christian character, he has not fully entered upon this point, nor can anything of the kind be deduced from Philo’s statement. We refer to Scaliger, other arguments for the Therapeutæ to Eusebius, who stated after him who regarded the Therapeutæ as Christians, but this proof is the least satisfactory. Eusebius regards the treatise Περὶ θρονίου Ἡσυχίασεις of Philonism, and makes the Jewish philosopher a disciple of John Mark, who accompanied Paul on his first missionary tour, and afterwards labored at Alexandria. According to Eusebius, the Therapeutæ existed as Christians in the 1st century. The opinion of Grätz that the Therapeutæ were a Christian monastic sect of the 2d or 3d century of the Christian era has therefore no ground in Eusebius, but is based on Christian writers, with the exception of Photius (Myrobihbon sive Bibliotheca [Rothomagi, 1565], ed. Dav. Halschelius, p. 275), identify Therapeutæ with monks, and while the writings falsely ascribed to Dionysius Areopagite use both expressions synonymously, it is possible that Scaliger is correct. We refer to Scaliger, other designation of Therapeutæ for monks depends solely upon the interpretation of Eusebius (Scaliger, De Eumenidone Temporum, vi, 252). With the exception of Grätz, no writer has regarded the Therapeutæ as a Christian heretical sect, and he himself is yet unde nted in this view. It is clear that if the Therapeutæ, as acknowledged by the dozen within the Church in the 2d and 3d centuries, he should place them. According to Grätz, the author of the treatise probably belonged to the Eu-
cretico-gnostic or Montanistic party. But he has not tried to state any plausible reason for his hypothesis, which, in fact, would be impossible; and he himself says that this point is outside of his object, and must be left to the determination of those who are learned in such a specialty. We ask, however, what reason could there have been for a Christian, even for a heretic, to father upon Philo such a book, for the sake of recommending monastic asceticism? We now hear, except from Eusebius, whose erroneous view concerning the Therapeia led him to an opinion, that Philo had such a good reputation within the Christian Church, and that Christians appealed to him for their views. And what is the more remarkable is the fact that in the whole treatise neither Christ nor the doctrines of Christianity are once mentioned. Where, then, is the Christian character of the Therapeia? As for the linguistic character of the book Περί Βιων Θεοφραστος, it entirely agrees with Philo's mode of representation; and there is no internal nor external argument for denying Philo to be the author of the book. The Therapeia, as we shall see farther on, were Jews.

IV. Character and Origin of the Sect of the Therapeutas. From the manner in which Philo speaks of the Therapeia, there can be no doubt that he himself was very much prepossessed regarding them, for the book Περί Βιων Θεοφραστος is nothing but a panegyric on the sect. This fact alone would lead to the supposition that Philo, who was a scholar and a politician, would have an interest in making a suitable panegyric on the religious sect that attracted his attention. But as for the religious sect that made it necessary to write the Therapeia, there is no other thing to be said about, except that it was, as the title of the book shows, a panegyric on a sect unless it represented his own sect.

Now there can be no doubt that the Therapeia represented a Jewish sect. They based their investigations and researches upon the writings of the Old Testament. In their σημεία they had only the law and the prophets (νόμοι καί λόγια Προφητῶν διὰ προφητῶν). Philo, in his other works, also guilty of the same mistake, further says that they gave themselves to philosophical speculation, according to the holy scriptures, the prophet Moses (κατὰ τῶν προφητῶν Μωσῆς, εἰσίων, εἰς τοὺς νόμους). The Therapeia strictly observed the Jewish Sabbath, and had great reverence for the Temple. They believed in a resurrection of the dead, both physical and spiritual. Their holy choruses are expressly said to be an imitation of those at the Red Sea. All these traits show that, on the one hand, the Therapeia strictly adhered to the traditions and views of Judaism, while, on the other hand, they deviated in many particulars; hence they were characterized as a sect.

As to their name, Philo leaves us to choose between two views. They are called Therapeia either because they profess an art of medicine more excellent than that in general use in cities (thus Therapeia would be equivalent to "physicians for the soul"), or because they have been instructed by nature and the sacred laws to serve the living God (Σωτήριος τὴν Ὀν'; thus Therapeia would signify those who "serve God."). The latter view is probably the more correct, since the Therapeia, as the true spiritual "worshipers of God," called themselves the contemplatives κατ' ἑαυτούς, and this sufficiently explains the whole tenor and character of the sect than the designation "physicians for the soul." Besides, Philo uses ιερατεύων, καταθέτων, καταθέτων, καὶ καταθέτων, καταθέτων, in order to designate the worship of God in the sense of Alexandrian theosophy, in opposition to those who taught the greater number of sacred offices.

From the Greek derivation of Therapeia, we see that there existed a spiritual relationship between this sect and Jewish Alexandrian religious philosophy; and we are led to this assumption when we consider the object which formed the basis of their contemplative life. Its purpose was to lead to the knowledge of the Deity. To achieve this it was necessary to suppress the material man and elevate the spiritual. For this reason they lived in a very simple manner, restricting their wants to the smallest measure. Abstinence and moderation they regarded as the foundation of all virtues, because by these man is brought nearer to the simple, which enables him to see the simple essence of the Deity, and to indulge in the blessed intuition of the same. Therefore the Therapeia lived secluded from the outside world; they denied themselves everything that could bring them in contact with others, thus living only to themselves and their contemplation. They denied themselves marriage, because they preferred to live together with the divine wisdom; and sought not after the mortal, but the immortal, fruits of a soul loved by God, and with which the only one brings forth when she is formed and takes her place in the spiritual world. It was then the only way to the father. For this reason slavery was banished from their midst, because, in a community which was animated by such motives, men could not be tolerated who were degraded below the dignity of men. If the entire aim of the Therapeia accords with the object and time of the Alexandrian School, the spiritual relationship between the two shows itself more fully in the allegorical exegesis, which, distinguishing between spirit and letter, idea and symbol, endeavored to explain the writings of the Old Testament. According to Philo, the Therapeia adhered to the teachings of the ancients, who, as the founders of this tendency, led behind them many memorials of the allegorical system. The same symbolic character we also find in their holy feast. The historical relation with which it connected itself was the exode from Egypt and the going through the Red Sea, as in the case of the ancient Israelites. The imitation of those songs which Moses and Miriam sang, according to the allegory of the Alexandrians and Philo, Egypt is the symbol of the sensual life in earthly lust and bodily pleasure; the song of Moses symbolizes the rapture which man feels after he has denied himself and has not lived after the flesh. Egypt, therefore, has two meanings and, now, as a purely spiritual being, indulges in the intuition of the Deity. Thus the Therapeia, like Philo and the Alexandrians, held the view that, the body being the seat of sin, the flight from a corporeal into a purely spiritual existence ought to be the true and highest aim of life. And Philo himself expressly states that the Therapeia went into the desert, because they had entirely broken with their earthly life, and intended to lead another, as it were immortal and blessed existence. The Therapeia thus represent a sect which earnestly strove after carrying out and practicing those principles and views which the Jewish Alexandrian religious philosophy did homage. At what time, however, this sect, with its ceremonies, originated it is hard to tell, since Philo does not say anything more definite about it. The only indication in the Περί Βιων Θεοφραστος from which we may conclude that this sect existed is elsewhere than in the Therapeia, and in the Therapeia possessed writings of the ancients which the founders had left behind them as memorials of the allegorical system, and which the Therapeia took as a kind of model. The founding of the sect probably took place at the time when the Jewish Alexandrian religious philosophy began to develop itself. We may trace it back to the beginning.
of the 2nd century before Christ, to Aristobulus, who introduced Jewish doctrines into the Orphic hymns because he believed that Greek philosophers had derived their wisdom from an ancient version of the Pentateuch and had been influenced on his reading freedom in Greek philosophy with Jewish theology in the Septuagint, which, according to Josephus, was commenced in B.C. 285, is at least very doubtful; but certain it is that with the beginning of the 2nd pre-Christian century the conditions were already given for the origin of the sect. That there existed a Therapeutian community that had been founded in Egypt is not probable, and its number was, perhaps, not very large.

After all, it is very interesting to know that about the time when Christ came into the world, among the Jews in Egypt the desire was felt to come into a nearer relation to the Deity, and to be freed from those relations which were not satisfactory. The Therapeutae endeavored to reach this object by leaving all earthly possessions, and in this respect they resemble the Christian monks, who borrowed from them many traits, as, in fact, Egypt was the real country of monasticism. But when Christians regarded them for a long time as flesh of their own flesh, they misunderstood the character and tendency of the Therapeutae entirely, because their whole history shows how far they were still from that goal which alone could satisfy the cravings of the heart, but which human reason and power alone cannot reach. And one reason for this peculiar distinctiveness from the Graeco-Pauly-tron Phaleg-anandirische Theosophie (Stuttg., 1805); Dähne, Geistesgeschichte der jüdisch-alexandrinischen Religions-Philosophie (Halle, 1884); E. Bruck, De Godsdienst van Israel (Haarlem, 1670), ii, 582 sq. (Engl. transl. by J. The last writer comes to the conclusion that the Therapeutae were not Jews, and that the treatise bearing the name of Philip was written towards the end of the 3rd century as an apology for Christian asceticism. (B. F.)

Theras (tia), a corrupt Greek form (1 Esdr. viii, 41, 61) of the name Hebraized (Ezra viii, 21, 31) Athena (q. v.).

Theremin, Ludwig Friedrich Franz, a celebrated German preacher and professor, was born at Gramzow, March 19, 1790. He was of Hugenot extraction, his family having emigrated from France after the Revocation of the Edict of Nantes, and his father was a French congregation, in the town where Franz was born. After suitable preparation, the latter was ordained at Geneva in 1805, and in 1810 was chosen by the French congregation at Berlin to be its pastor. This post he exchanged, Dec. 29, 1814, for that of preacher to the court. In 1824 he was made a member of the high consistory and lecturer in the department of instruction of the ministry of worship; and in the same year the degree of Doctor of Divinity was conferred upon him by the University of Greifswald. In 1839 he added to his former dignities that of extraordinary, and in 1840 that of ordinary, honorary, professor in the University of Berlin. On the appearance of a theosophical seminary which he established at his own expense in a house, devoting himself to the guidance of the latter with an enthusiasm which increased steadily, in proportion as physical infirmities restricted the range of his activity as a preacher. A cataract formed over one of his eyes, and gave rise to the apprehension that he might totally become blind; but he was relieved from such fear by death, which came to him quietly and gently Sept. 26, 1846. His wife had preceded him into the eternal world by more than twenty years. A son and an unmarried daughter survived him.

Theremin was the representative of a specific homiletical tendency which held that classical antiquity is the true school of eloquence and claimed Demosthenes as its master. Its characteristic was that it devoted exclusive attention to finished perfection of form, and consequently had nothing in common with that rugged German school of eloquence of which Luther is the representative, and whose peculiarity it is that "out of the fulness of the heart the mouth speaketh" and shapes its own forms of expression. Not Luther or Harms, but Massillon, was Theremin's ideal; for Theremin's mind was in its structure not German, but French. This peculiarity of Theremin's school, which Massillon did not find a school of pupil orators in any actual sense; while Reinhard, to whom he was unquestionably superior, had numerous imitators. Theremin's fundamental principle in homiletics was that eloquence is not an art, but a virtue (see his work Bereitsamkeit einer Ta- gesrede). The idea is, that eloquence is not, like other virtues, a duty; nor is the use of elo- quence confined altogether to the promotion of ethical results. As a preacher he was accustomed to use brief texts, and consequently to employ considerable latitude in the handling of his themes, often dragging in extraneous matters, instead of educating it from the text. His bearing in the pulpit was that of quiet dignity; his gestures were few and simple, his voice good, his modulation perfect. The finish of his productions, however, produced the impression of an aristocratic refinement, which, though evidently altogether natural in his case, produced a certain degree of snobbishness. These were secured by Luther, Heinrich Müller, Conrad Rieger, L. Hofacker, and others. Ten volumes of his Sermons have been published, most of them in repeated editions (Duncker and Humblot, Berlin). Other works of theological and ascetical character emanated from his pen, and have enjoyed a deserved recognition, e. g., Lehrstücke, Die göttliche. Reichis (Berlin, 1823); —Adalbert's Bekennnisse (2d ed. 1883); —Ausbildungen (6th ed. 1858). See Herzog, Real-Enzyklop. n. v.

Theresa, or Teresa, St., was born at Avila, in Castile, Spain, March 21, 1515. Her full name was Theresa Sanches de Cepeda. From early childhood she was accustomed, with a favorite brother, to read the lives of the saints and martyrs, until they both became possessed of a passionate desire to obtain the crown of martyrdom. When they were children eight or nine years of age they made a begging expedition into the country of the Moors, in hopes of being captured by the infidels and sacrificed for their faith. Disappointed in this, they resolved to turn hermits; but in this they were also prevented. Theresa lost her mother at the age of twelve, and in a few years became so worldly that her father gave her in marriage at the age of sixteen, in a convent. Here her mind again took a religious turn when twenty years of age she obtained her father's consent to take the vow, and entered the convent of the Carmelites at Avila. For nearly twenty years, however, she says, she lived without feeling that repose for which she had hoped when she sacrificed the world. But at length while reading the Confessions of St. Augustine,
THERESA

St. Theresa.

she was led to pray with greater confidence, and her enthusiastic and restless spirit found peace. She remained in the convent in her native town till 1561, when she conceived the idea of reforming the Order of the Carmelites, into which several disorders had crept. In 1562 she laid the foundation of the new monastery at Avila, which she dedicated to St. Joseph, whom she had chosen as her patron saint. The branch of her order which she founded were the "Barefooted Carmelites," and also, after her, the Thermians (q. v.). It was the principle of Theresa that the convents of the Carmelites, under her new rule, should either have no worldly possessions whatever, and literally exist upon the charity of others, or that they should be so endowed as not to require any external aid. This was a principle from which her spiritual directors obliged her to depart; and yet such was her success that at the time of her death she had founded seventeen convents for women and fifteen for men. During the latter part of her life Theresa found ample occupation in travelling from one convent to another to promulgate her new regulations for the government of her order. In 1582 she was seized with her last illness in the palace of the duchess of Alba, but was, by her urgent request, carried back to her convent of San José, where she died a few days afterwards. She was beatified by pope Paul V, April 24, 1614, and canonized by Gregory XV, March 22, 1622, her feast being fixed on October 15. Philip III declared her the second patron saint of the Spanish monarchy after Santiago, a decree solemnly confirmed by the Spanish Cortes in 1812. Her shrine is at Avila, in the church of her convent. The ascetic treatises and letters of Theresa, in which she describes the internal struggles and aspirations of her heart, are among the most remarkable documents of the mystic literature of the Roman Catholic Church. Five of them are extant: Discursos o Redacciones de su Vida (1662)—El Camino de la Perfeccion, prepared in 1563 as a guide for the nuns of the reformed order—El Libro de las Fundaciones, an account of convents founded by her—El Castillo Interior, o las Moradas (1577)—Santos Conceptos del Amor de Dios. The original MSS. of the first four works are preserved in the library of the Escorial, that of the last was burned by order of her confessor; but a copy had previously been taken by one of her nuns. The first complete edition of St. Theresa's Works appeared at Salamanca (1587), and a recent one by Ochoa at Paris (1847)—Letters (Saragossa, 1858). The abbe Migne edited a complete collection of her works in French (Paris, 1840—46, 4 vols.); and père Marcel Bouix published a French translation

from the original MSS. (Le Mans, 1852—56, 3 vols. 8vo). For Lives of Theresa consult those of Ribera (Salamanca, 1590), pere Bouix (Paris, 1865), Bollandist Vandermeere (Brussels, 1895), and Maria French (London, 1878). See Mrs. Janesew, Legends of the Monastic Orders, p. 416 sq.

Thermeleth (Θερμελήθ), a Greek form (1 Esdr. v, 36) of the name Hebraized (Ezra ii, 59) THERMELETH (q. v.).

Thesaurus, the treasurer of a cathedral or collegiate church; the bursar (treasurer) of a college or monastery; the keeper of a shrine house or treasury.

Thessaalionian (Θεσσαλιωνιας), the designation (Acts xxvi, 4, 5; 1 Thess. i, 1; 2 Thess. ii, 13) "of Thessalonica," Acts xxvi, 2) of an inhabitant of Thessalonica (q. v.).

THESSALONIANS, FIRST EPISTLE TO THE, is the eighth in order of the Pauline epistles as found in the New Testament, but the first in point of chronological date, and immediately followed by the second bearing a corresponding number.

1. Authorship and Canonicity.—The external evidence in favor of the genuineness of the First Epistle to the Thessalonians is chiefly negative, but this is important enough. There is no trace that it was ever disputed at any age or in any section of the Church, or even by any individual till the pretended century of the 2d hand, the allusions to it writers before the close of the 2d century are confessedly faint and uncertain—a circumstance easily explained when we remember the character of the epistle itself, its comparatively simple diction, its silence on the most important doctrinal questions, and, generally speaking, the absence of any salient points to arrest the attention and provoke reference. In Clement of Rome there are some slight coincidences of language, perhaps not purely accidental (c. 88, κατά πάντα περιμεστείς αυτής, comp. 1 Thess. v, 18; ibid. συνάξιον σοι όμως δεδω το σουμέν εἰς X, I., comp. ver. 29). Ignatius in two passages (Polyc. 1, and Ephes. 10) seems to be reminded of Paul's expression ἀδελαίτης προσάγεις (1 Thess. v, 17), but in both passages of Ignatius the word ἀδελαίτης, in which the similarity mainly consists, is absent in the Syriac, and is therefore probably spurious. The supposed references in Polycarp (ch. iv to 1 Thess. v, 17, and ch. ii to ver. 22) are also unsatisfactory. It is more important to observe that the epistle was included in the Old Latin and Syriac versions, that it is found in the canon of the Muratorian fragment, and that it was also contained in that of an individual of the Council of Carthage, 364. But other Eusebian commence direct citations (Adr. Hes. v, 6, 1): "On account of this the apostle hath set forth the perfect spiritual man, saying in 1 Thess. 'But the God of peace sanctify you wholly, and may your whole body, soul, and spirit be preserved blameless to the coming of our Lord Jesus Christ' " (comp. 1 Thess. v, 20). Clemens Alex. (Pedag. i, 88): "But this the blessed Paul hath most clearly signified, saying, 'When we might be burdensome as the apostles of Christ, we were gentle among you, as a nurse cherishest her children' " (comp. 1 Thess. i, 7). Tertullian (De Resurr. Car. c. 24): "While the apostles of God found the Thessalonians; for we read, 'How ye were turned from idols to serve the living and true God, and to wait for his Son from heaven, Jesus whom he hath raised from the dead' " (comp. 1 Thess. i, 9, 10). This father quotes the epistle more than twenty times. To these citations we may add those by Causs (ap. Euseb. Hist. Eccl. vii, 20), by Origen (Cont. Cels. lib. iii), and by others of the ecclesiastical writers (Lardner, ii, pl. locc.).

On the other hand, the internal evidence derived from the character of the epistle itself is so strong that it may fairly be called irresistible. It would be impossible to enter into a full question of the authorship here. The other may be referred to the Introduction of Jewett, who has handled this subject very fully and satisfactorily.
An equally strong argument may be drawn also from the matter contained in the epistle. Two instances of this must suffice. In the first place, the fineness and delicacy of touch with which the apostle’s relations toward his Thessalonian converts are brought before the reader—a yearning to see them, his anxiety in the absence of Timothy, and his heart-felt rejoicing at the good news—are quite beyond the reach of the clumsy forgeries of the early Church. In the second place, the writer uses language which, however it may be explained, is certainly colored by the anticipation of the speedy advent of the Lord. The regular language natural enough on the apostle’s own lips, but quite inconceivable in a forgery written after his death, when time had disappointed these anticipations, and when the revival or mention of them would serve no purpose and might seem to discredit the apostle. Such a position would be an anachronism in a writer of the 2d century.

The genuineness of this epistle was first questioned by Schrader (J. Paulus), who was followed by Baur (Paulus, p. 490). The latter writer has elaborated and systematized the attack. The arguments which he alleges in favor of his view are briefly considered below by Lienemann, and more at length, and with great fairness, by Jowett. The following is a summary of Baur’s arguments. (a.) He attributes great weight to the general character of the epistle, the difference of style, and especially the absence of distinctive Pauline doctrine. These considerations will be considered below in discussing the Apocryphal passage in the second epistle. (b.) He urges the contradictions to the account in the Acts—a strange argument, surely, to be brought forward by Baur, who postulates and discards the authority of that narrative. The real extent and bearing of these divergences will be considered below (§ vi). (c.) He discovers references to the Acts, which show that the epistle was written later. It will be seen, however, that the coincidences are subtle and incident, and the points of divergence and prima-facie contradictions, which Baur himself allows, and indeed insists on, do not precisely the supposed assertion of copying. Schliermacher (Einleit. ins N. T. p. 150) rightly infers the independence of the epistle on these grounds. (d.) He supposes passages in this epistle to have been borrowed from the acknowledged letters of Paul. The resemblances, however, which he points out are not greater than, or, indeed, so great as those in other epistles, and bear no traces of imitation.

II. Date.—This has been approximately determined in the following way: During the course of his second missionary journey, which began in the year 47, Paul founded the Church of Thessalonica. Leaving Thessalonica, he passed on to Berea. From Berea he went to Athens, and from Athens to Corinth (Acts xvii, 1–xviii, 18). With this visit to Corinth, which extends over a period of two years or thereabouts, his second missionary journey closed, for from Corinth he returned to Jerusalem, paying only a brief visit to Ephesus on the way (ver. 20, 21). There is some uncertainty about the movements of Paul’s companions at this time (see below); but, whatever view we adopt on this point, it seems indisputable that, when this epistle was written, Silvanus and Timothy were in the apostle’s company (1 Cor. 16, 1); this latter view is more consonant with the statements of the second missionary journey, for, though Timothy was with him on several occasions afterwards, the name of Silvanus appears for the last time in connection with Paul during this visit to Corinth (Acts xvii, 5; 2 Cor. i, 19). The epistle, then, must have been written in the first year of this visit of Timothy. Paul left Thessalonica and the close of his residence at Corinth, i. e., within the years 48–51. The following considerations, however, narrow the limits of the possible date still more closely. (1.) When Paul wrote, he had already visited, and probably left, Athens (1 Thess. iii, 1); consequently he might revisit Thessalonica. When he revisited Thessalonica, he had despatched Timothy to obtain tidings of his converts there. Timothy had returned before the apostle wrote (ver. 2, 6). (2.) Paul speaks of the Thessalonians as “enamples to all that believe in Macedonia and Achaia,” adding that “it is in every place their faith to Godward is spread abroad” (i, 7, 8)—language prompted, indeed, by the overflowing of a grateful heart, and therefore not to be rigorously pressed, but still implying some lapse of time at least. (3.) There are several traces of a growth and progress in the condition and circumstances of the Thessalonian Church. Perhaps the mention of “rulers” in the Church (v, 12) ought not to be added as proving this, since some organization would be necessary from the very beginning. But there is other evidence besides. Questions had arisen relating to the state of those who had fallen asleep in Christ, so that one or more of the Thessalonian converts were in doubt (i, 7). (2.) Paul was conquered by the storm of persecution which the apostle had discerned gathering on the horizon had already burst upon the Christians of Thessalonica (iii, 4, 7). Irregularities had crept in and sullied the infant purity of the Church (iv, 4, v, 1). The last express mention of the Thessalonians is in the Roman epistle, (4.) The letter was evidently written by Paul immediately on the return of Timothy, in the fulness of his gratitude for the joyful tidings (iii, 6). Moreover (5.), the second epistle was written before he left Corinth, and there must have been a sufficient interval between the two to allow of the growth of fresh difficulties, and of such communication between the apostle and his converts as the case supposes. We shall not be far wrong, therefore, in placing the writing of this epistle early in Paul’s residence at Corinth, i. e., during the year 49.

The statement in the subscription appearing in several MSS. and versions that it was written “from Athens” is a superficial inference from 1 Thess. iii, 1, to which no weight should be attached, as is clear from the epistle itself (i, 7). I even think that the Thessalonians had become “enamples to all that believe in Macedonia and Achaia: for from you [says he] sounded out the word of the Lord not only in Macedonia and Achaia, but also in every place your faith to Godward is spread abroad.” Now, for such an extensive example the same time of the Gentile Thes-

anians and of the Gospel by them, a much longer period of time must have elapsed than is allowed by the supposition that Paul wrote this epistle while at Athens; and, besides, his reference particularly to Achaia seems prompted by the circumstance of his being, at the time he wrote, in Achaia (v, 22), which Corinth was the chief city. (2.) His language in iii, 1, 2 favors the opinion that it was not from Athens, but after he had left Ath-

ens, that he wrote this epistle; it is hardly the turn which one living at Athens at the time would have given his words. (3.) Is it likely that during the short time Paul was in Athens before writing this epistle (supposing him to have written it there) he should have “over and again” purposed to revisit the Thessalonians, but have been hindered? And yet such purposes he had entertained before writing this epistle, as we learn from ii, 19; and this greatly favors the latter view. Finally, I would once more adduce as a reason why Paul should have come to him from Thessalonica with good tidings concerning the faith and charity of the Christians there (iii, 6). But bad Timothy followed Paul to Athens from Berea, what tidings could he have brought the apostle from Thessalonica except such hearsey reports as would inform the Thessalonians that Paul’s letter had been received.

From these considerations it follows that this epistle
was not written from Athens. It must, however, have been written very soon after his arrival at Corinth; for at the time he left Athens, he had not arrived from Thessalonica (Acts i. 18; ii. 5; iii. 6), and Paul had not been long in Corinth before Timothy and Silas joined him there (Acts xvii. 1-5).

Michaelis contends for a later date, but his arguments are destitute of weight. Before Paul could learn that the fame of the Thessalonian Church had spread through Achaia and far beyond, it was not necessary, as Michaelis supposes, that he should have made several extensive journeys from Corinth; for as that city, from its mercantile importance, was the resort of persons from all parts of the commercial world, the apostle had abundantly time of procuring the information that thus during a brief residence there. As little is it necessary to resort to the supposition that when Paul says that over and again Satan had hindered him from fulfilling his intention of visiting Thessalonica he must refer to shipwrecks or some such misfortunes (as Michaelis suggests); for Satan has many ways of hindering men from such purposes besides accidents in travelling. The views of critics who have assigned to this epistle a later date than the second missionary journey are stated and refuted in the Introduction of Koch (p. 23, ete.) and of Lunemann (§ 5).

Thessalonians to Other Epistles.—The epistles to the Thessalonians then (for the second followed the first after no long interval) are the earliest of Paul's writings—perhaps the earliest written records of Christianity. They belong to that period which Paul elsewhere styles "the beginning of the Gospel" (Phil. iv. 15). They present the disciples in the first flush of love and devotion, yearning for the day of deliverance, and strain- ing their eyes to catch the first glimpse of their Lord descending amidst the clouds of heaven, till in their feverish anxiety they forget the sober business of life absorbed in this one engrossing thought. It will be re- mem- bered of the period of about five years intervening before the second group of epistles—those to the Corinthians, Galatians, and Romans—were written, and about twice that period to the date of the epistles of the Roman captivity. It is interesting, therefore, to compare the Thessalonian epistles with the later letters and to note the points of difference. These differences are mainly fourfold.

1. In the general style of these earlier letters there is greater simplicity and less exuberance of language. The brevity of the opening salutation is an instance of this. "Paul ... to the Church of the Thessalonians in God our Father and the Lord Jesus Christ, grace and peace to you" (1 Thess. i. i; comp. 2 Thess. i. i). The closing benediction is correspondingly brief: "The grace of our Lord Jesus Christ be with you" (1 Thess. v. 28; comp. 2 Thess. iii. 18). And throughout the epistles there is much more evenness of style; words are not accumulated in the same way, the syntax is less involved, parentheticals are not so frequent, the turns of thought and feeling are less sudden and abrupt, and, altogether, there is less intensity and variety than we find in Paul's later epistles.

2. The antagonism to Paul is not the same. The direction of the attack has changed in the interval between the writing of these epistles and those of the next group. Here the opposition comes from Jews. The admission of the Gentiles to the hopes and privileges of Messiah's kingdom on any condition is repulsive to them. They "forbid the apostle to speak to the Gentiles in the name of the Lord" (Acts xvi. 1). A period of five years changes the aspect of the controversy. The opponents of Paul are now no longer Jews so much as Judaizing Christians (Ewald, Jahrb. iii. 249; Stendachr. p. 14). The question of the admission of the Gentiles has been solved by time, for they have "taken the primary ground of heaven by storm." But the antagonism to the apostle of the Gentiles having been driven from its first position, entrenched itself behind a second barrier. It was now urged that though the Gentiles may be admitted to the Church of Christ, the only door of admission of admissibility to the Jewish Messiah is through a circumcision ceremony. The language of Paul speaking of the Jewish Christians in this epistle shows that the opposition to his teaching had not at this time assumed this second phase. He does not yet regard them as the disturbers of the peace of the Church, the false teachers who, by imposing a bondage of ceremonial observances, frustrate, indeed, the free grace of God. He can still point to them as examples to his converts at Thessalonica (1 Thess. ii. 14). The change, indeed, was imminent; the signs of the gathering storm had already appeared (Gal. ii. 11), but hitherto they were faint and indistinct, and had scarcely broken through the horizon of the Church.

3. It will be no surprise to see that the doctrinal teaching of the apostle does not bear quite the same aspect in these as in the later epistles. Many of the distinctive doctrines of Christianity, which are inseparably connected with Paul's name, though implicitly contained in the teaching of these earlier letters, are indeed they follow directly from the true conception of the person of Christ—were yet not evolved and distinctly enunciated till the needs of the Church drew them out into prominence at a later date. It has often been observed, for instance, that there is in the epistles to the Thessalonians no mention of the characteristic concept of justification and works; that the word "justification" does not once occur; that the idea of dying with Christ and living with Christ, so frequent in Paul's later writings, is absent in these. It was, in fact, the opposition of Judaizing Christians insisting on a strict ritualism which led the apostle, somewhat later, to dwell at greater length on the true doctrine of a saving faith and the true conception of a godly life; but the time had not yet come.

4. This difference appears especially in the eschatology of the apostle. In the epistles to the Thessalonians, as has been truly observed, the Gospel preached is that the coming of the Christian Lord Jesus Christ is near. There are many reasons why the subject of the second advent should occupy a larger space in the earliest stage of the apostolic teaching than afterwards. It was closely bound up with the fundamental fact of the Gospel, the resurrection of Christ, and thus it formed a natural starting-point of Christian doctrine. It afforded the true satisfaction to those Messianic hopes which had drawn the Jewish converts to the fold of Christ. It was the best consolation and support of the infant Church under persecution, which must have been most keenly felt in the first abandonment of worldly hopes. It helped to comfort those who, when compared with a righteous Judge who would not overlook iniquity, it was essential to that call to repentance which must everywhere precede the direct and positive teaching of the Gospel. "Now he commandeth all men everywhere to repent; for he hath appointed a day in the which he will judge the world in righteousness by that Man whom he hath ordained, whereby he hath given assurance unto all men in that he raised him from the dead" (Acts xvii. 30, 31).

There is no just ground, however, for the supposition that the apostle entertained anticipatory expectations as to the Lord's second coming. His language is suited to every age of the Church. Where an event is certain of accomplishment, but uncertain as regards the precise time, it may be said to be always "at hand" to devout expectation; and this is the aspect which the topic in question, after all that has been written on the subject, in any event, does not wear. Paul is not setting a task of proving that he was mistaken, and therefore that the gift of inspiration was only partial, is as arduous as one would suppose it must be ungrateful.

IV. Relation to the Associated History.—A comparison of the narrative in the Acts with the allusions in this and other epistles, and Epiphanius' antiques against the Manichaean Gregori- mon, is equally instructive with the foregoing comparison. With some striking coincidences, there is just that de-
gree of divergence which might be expected between a writer who had borne the principal part in the scenes referred to and a narrator who had obtained his information from others, between the casual half-expressed allusions of a familiar letter and the direct account of the professed historian.

1. Passing over patent coincidences, we may single out one of a more subtle and delicate kind. It arises out of the form which the accusation brought against Paul and his companions at Thessalonica takes in the Acts: "All these do contrary to the decrees of Caesar, saying that there is another king, one Jesus" (xvii, 7). The allusions in the epistles to the Thessalonians enable us to understand the ground of this accusation. It appears that the Christ had called upon his hearers to come out into his oral teaching in this city, as it does into that of the epistles themselves. He had charged his new converts to await the coming of the Son of God from heaven as their deliverer (i, 10). He had dwelt long and earnestly (προς τοὺς διάδοχοὺς τοῦ βασιλέως) on the terrors of the day, which would overtake the wicked (iv, 6). He had even explained at length the signs which would usher in the last day (2 Thess. ii, 5). Either from malice or in ignorance such language had been misrepresented, and he was accused of setting up a new god to foreign to the Roman empire (i, 4). He passed from his discourse on the terrors of the future to the terrors of the present (iv, 6). The language of these epistles diverges from the narrative of Luke on two or three points in such a way as to establish the independence of the two accounts, and even to require some explanation.

(r.) The first of these relates to the composition of the Church of Thessalonica. In the first epistle Paul addresses his readers distinctly as Gentiles, who had been converted from idolatry to the Gospel (i, 9, 10). In the Acts we are told that "some (of the Jews) believed . . . and of the devout Greeks (i. e. proselytes) a great multitude, and of the chief women not a few" (xvii, 4). If for οὕτως λέγεται Ελληνικά we read Ελληνικῶν, "proselytes and Greeks," the difficulty vanishes; but though internal probabilities are somewhat in favor of this reading, the array of direct evidence (now reinforced by the Codex Sinaiticus) is against it. But even if Luke in his report of the events that were occurring, the account of Luke does not exclude a number of believers converted directly from heathendom; indeed, if we may argue from the parallel case at Berea (xvii, 12), the "women were chiefly of this class; and if any divergence remains, it is not greater than might be expected in two independent writers, one of whom, not being an eye-witness, possessed only a partial and indirect knowledge. Both accounts alike convey the impression that the Gospel made but little progress with the Jews themselves.

(2) In the epistle the persecutors of the Thessalonian Christians are represented as their fellow-countrymen, i. e. as heathens (ἐπὶ τῶν ἰδίων συμβολήτων, i. e. 14), whereas in the Acts the Jews are represented as the bitter opponents of the faith (xvii, 5). This is fairly met by Paley (Nor. Paul. ix, No. 5), who points out that the Jews were the instigators of the persecution, which, however, they were powerless to carry out without aid from the heathen, as may be gathered even from the narrative of Luke. We may add, also, that the expression ἵδε συμβολήτες need not be restricted to the heathen population, but might include many Hellenist Jews who must have been citizens of the free town of Thessalonica.

(3) The narrative of Luke appears to state that Paul remained only three weeks at Thessalonica (xvii, 2), whereas in the epistle, though there is no direct mention of the length of his residence among them, the whole language (i, 4; ii, 4-11) points to a much longer period. The most important of the points, if the account in Acts be correct, the former needs to be modified. In the Acts it is stated simply that for three Sabbath days (three weeks) Paul taught in the synagogue. The silence of the writer does not exclude subsequent labor among the Gentile population; and, indeed, as much seems to be implied by his preaching, which exasperated the Jews against him.

(4) The notices of the movements of Silas and Timothy in the two documents do not accord at first sight. In the Acts Paul is conveyed away secretly from Berea to escape the Jews. Arrived at Athens, he sends to Silas and Timothy, whom he should find at Beroea, urging them to join him as soon as possible (xvii, 14-16). It is evident from the language of Luke that the apostle expects them to join him at Athens; yet we hear nothing more of them for some time, when at length, after Paul had passed on to Corinith, and several incidents had occurred, we are told that Silas and Timothy came from Macedonia (xvii, 5). From the first epistle, on the other hand, we gather the following facts: Paul there tells us that they (ἡμᾶς, i. e. himself, and probably Silas) no longer able to endure the suspense, "consented to be left alone at Athens, and sent Timothy their brother" to Thessalonica (iii, 1, 2). Timothy returned with good news (ver. 6) (whether to Athens or Corinith does not appear), and when the two epistles to the Thessalonians were written, both Timothy and Silas were with Paul (i, 1; 2 Thess. i, 1; comp. 2 Cor. i, 19). Now, though we may not necessarily connect an undesigned coincidence out of these materials yet, on the other hand, there is no insoluble difficulty; for the events may be arranged in two different ways, either of which will bring the narrative of the Acts into accord with the statements of the epistles.

(a.) Timothy was despatched to Thessalonica, not from Athens, but from Beroea, a supposition quite consistent with the apostle's expression of "consenting to be left alone at Athens." In this case Timothy would take Silas somewhere in Macedonia on his return, and the two would join Paul in company; not, however, at Athens, where he was expecting them, but later on at Corinith, some delay having arisen. This explanation, however, supposes that the pluralς "we consented, we sent" (ἐνδοξοσμηκον, ἐπιστάμενοι), can refer to Paul alone.

(b.) The alternative mode of reconciling the accounts is as follows: Timothy and Silas did join the apostle at Athens, where we learn from the Acts that he was expecting them. From Athens he despatched Timothy to Thessalonica, so that he and Silas (ἡμᾶς) had to forego the services of their fellow-laborer for a time. This mission is mentioned in the epistle, but not in the Acts. Silas and Timothy, it appears, left Paul after a mission, not recorded either in the history or the epistle; probably to another Macedonian Church—Philippi, for instance, from which he is known to have received contributions about this time, and with which, therefore, he was in communication (2 Cor. xi, 9; comp. Phil. iv, 14-16; see Koch, p. 15). Silas and Timothy returned together from Macedonia and joined the apostle at Corinith. This latter solution, if it assumes more than the former, has the advantage that it preserves the proper sense of the pluralς "we consented, we sent," for it is at least doubtful whether Paul ever uses the plural of him. self alone in the singular sense of Luke. It is explained either by his possessing only a partial knowledge of the circumstances, or by his passing over incidents of which he was aware as unimportant.

Whether the expected meeting ever took place at Athens is therefore a matter involved in much uncertainty. So, also, is the account of Paul's stay in Athens, and others are of opinion that, at least as regards Timothy, it did take place; and the infer they that Paul again remained him to Thessalonica, and that he made a second journey along with Silas to join the apostle at Corinith. Hug, on the other hand, supposes only one journey, viz. the one to Thessalonica, and his correspondence with the apostle, in 1 Thess. iii, 1, 2, as intimating, not that he had sent Timothy from Athens to Thessalonica, but that he had prevented his coming to Athens by send-
THESAOLIANS

ing him from Berea to Thessalonica. Between these two opinions there is nothing to enable us to judge with certainty, unless we attach weight to the expression of Luke 2:36: "He shall be great, and shall be set above his brethren." This is the opinion of Timothy and Silas in Athens (Acts 17:34), "as speedily as possible." His desiring them to follow him thus, without loss of time, favors the conclusion that they did rejoin him in Athens, and were thence sent to Thessalonica. See SILAS; TIMOTHY.

IV. Institution of the Epistle.—We are now prepared to consider the circumstances of the Church at Thessalonica which drew forth this letter. These were as follows: Paul had twice attempted to revisit Thessalonica, and both times had been disappointed. Thus prevented from seeing them in person, he had sent Timothy to inquire of them as to their condition (ii, 1-5). Timothy returned with most favorable tidings, reporting not only their progress in Christian faith and practice, but also their strong attachment to their old teacher (ver. 6-10). The First Epistle to the Thessalonians is the outpouring of the apostle's gratitude on receiving this welcome news.

At the same time, the report of Timothy was not unmixed with alloy. There were certain features in the condition of the Thessalonian Church which called for Paul's interference, and to which he addresses himself in his letter. (I.) The very intensity of their Christian faith and zeal, so exclusively on the day of the Lord's coming, had been attended with evil consequences. On the one hand, a practical inconvenience had arisen. In their feverish expectation of this great crisis, some had been led to neglect their ordinary business, as if the daily concerns of life were of no account in the immediate presence of so vast a change (iv, 11; comp. 2 Thess. ii, 1; iii, 6, 11, 12). On the other hand, a theoretical difficulty had been felt. Certain members of the Church had died, and there was great anxiety lest they should be excluded from any share in the glories of the Lord's advent (iv, 13-18). Paul rebukes the irregularities of the former, and disapproves the fears of the latter. (3.) The flame of persecution had broken out, and the Thessalonians needed consolation and encouragement under their sore trial (ii, 14; iii, 2-4). (3.) An unhealthy state of feeling with regard to spiritual gifts was manifesting itself. Like the Corinthians at a later day, they needed to be reminded of the superior value of "prophecy," compared with other gifts of the Spirit which they exerted at its expense (v, 19, 20). (4.) There was the danger, which they shared in common with most Gentile churches, of relaxing into their old heathen profligacy. Against this the apostle offers a word in season (iv, 4-5), which is twice renewed (v, 11-13; 13-18; also in Latin, and in Works); Zanchius, Commentaries [includ. Phil. and Col.] (Neot. 1595, fol.; also in Opp.]; RoPlock, Commentaries (Edinb. 1568; Herb. 1601, vsoj also Lectures (Edinb. 1666, 4to); Hunnius, Expositio (Francof. 1663, 8vo); Steuart [Rom. Cath.], Commentaries (In- golst. 1609, 4to); Col. [Sochin.], Commentaries [from Pet. Moor's notes] (Racov. 1656, 8vo; also in Opp.]; Ferguson, exposition (Lond. 1674, 8vo); Schmid, Paraphraxis [includ. other ep.] (Hamb. 1691, 1696, 1704, 4to); Landresen, Erklärung (Frankf. 1707, 4to); Strees, Meditatiun (Amst. 1710, 8vo); Turrutin, Commentaries (Basil. 1729, 8vo; also in Opp.]; Chandler, Notes [in Gal. (Lond. 1777, 4to); Krause, Erklärung [includ. Phil. (Frankf. 1790); Schleiermacher, Notes (Berol. 1823, 8vo]; Pelt, Commentaries (Gryph. 1830, 8vo); Schott, Commentaries (Lips. 1834, 8vo); Tafel, Historia Thessaloni- acenium (C. 1852, 8vo); Summaries of Lectures (Denz. 1850, 2 vols); Lillie, Versien (N. Y. 1856, 4to); also Letters (ibid. 1870, 8vo); Eliott, Commentary (Lond. 1858, 1862, 1866, 8vo); Edmuns, Commentary (ibid. 1858, 8vo); Headland, Notes (ibid. 1866, 8vo]; Badley, Commentary (Lond. 1877, 8vo). See Epstein. On the first epistle alone the following are known: Scalier, exposition (Lond. 1629, 4to); Martin, Analy- sis (Graening. 1669, 12mo]; Van Alphen, Verklaring

than by any urgent need, which might have formed a centre of thought, and impressed a distinct character on the whole. Under these circumstances, we need not expect to find in the epistle a continuous argument, and any analysis must be more or less artificial. The body of the epistle, however, may conveniently be divided into two parts, the former of which, extending over the first three chapters, is chiefly taken up with a retrospect of the apostle's relation to his Thessalonian converts, and an explanation of his present circumstances and feelings; while the latter, comprising the 4th and 5th chapters, contains some seasonable exhortations. At the close of each of these divisions is a prayer commencing with the same words, "May God himself," etc., and expressed in somewhat similar language. The epistle may therefore be tabulated as follows:

Salutation (v. 1).

I. Narrative portion (I, 2-III, 18).

1. The apostle gratefully records their conversion to the Gospel and their progress in the faith (1, 2-10). He reminds them how pure and blameless his life and ministry among them had been (II, 1-12). He repeats his thanksgiving for their conversion, dwelling especially on the persecutions which they had endured (11, 13-18). He describes his own deep sense of anxiety, the consequent mission of Timothy to Thessalonica, and the encouraging report which he brought (13, 14, 15, 16).

2. The apostle's prayer for the Thessalonians (iii, 11-18).

II. Hortatory portion (iv, 1-24).

1. Warning against impurity (v, 1-8).

2. Exhortation to brotherly love and sobriety of conduct (v, 9-12).

3. Touching the advent of the Lord (iv, 13-v, 11).

a. That they shall have their place in the resurrection (iv, 13-18). b. The time, however, is uncertain (v, 13, 18). c. That all must be watchful (v, 16).

3. Exhortation to orderly living and the due performance of social duties (v, 12-18).

4. Instructions relating to prayer and spiritual matters generally (v, 16-22).

5. The apostle's prayer for the Thessalonians (v, 23, 24).

The epistle closes with personal injunctions and a benediction (v, 25-28).

VII. Commentaries.—The following are the special exegetical helps on both the epistles to the Thessalonians exclusively; to the most important of them we pre- fix an asterisk (*), or, in the case of Commentaries (In- golst. 1609, 4to); Col. [Sochin.], Commentaries [from Pet. Moor's notes] (Racov. 1656, 8vo; also in Opp.]; Ferguson, Exposition (Lond. 1674, 8vo); Schmid, Paraphrasis [includ. other ep.] (Hamb. 1691, 1696, 1704, 4to); Landresen, Erklärung (Frankf. 1707, 4to); Strees, Meditation (Amst. 1710, 8vo); Turrutin, Commentaries (Basil. 1729, 8vo; also in Opp.]; Chandler, Notes [in Gal. (Lond. 1777, 4to); Krause, Erklärung [includ. Phil. (Frankf. 1790); Schleiermacher, Notes (Berol. 1823, 8vo]; Pelt, Commentaries (Gryph. 1830, 8vo); Schott, Commentaries (Lips. 1834, 8vo); Tafel, Historia Thessaloni- acenium (C. 1852, 8vo); Summaries of Lectures (Denz. 1850, 2 vols); Lillie, Versien (N. Y. 1856, 4to); also Letters (ibid. 1870, 8vo); Eliott, Commentary (Lond. 1858, 1862, 1866, 8vo); Edmuns, Commentary (ibid. 1858, 8vo); Headland, Notes (ibid. 1866, 8vo]; Badley, Commentary (Lond. 1877, 8vo). See Epstein. On the first epistle alone the following are known: Scalier, Exposition (Lond. 1629, 4to); Martin, Analysis (Graening. 1669, 12mo); Van Alphen, Verklaring...
His cavils are more than usually frivolous, and have been most fully replied to by Guericke (Beitrag zur hist.-krit. Einlei. ins N. T. [Halle, 1822], p. 92-99), by Reiche, *Epist. vindicative* (Göt. 1829), and by Pelt, in *the Prolegomena* to his *Commentary on the Epistles to the Thessalonians* (p. xxvii). See also Grimm, in *Theol. Stud. u. Krit.*, 1850, p. 758 sq.; Lipsius, *ibid*., 1854, p. 905 sq.; Hilgenfeld, in *his Zeitschr. f. wiss. Theol.*, 1862, p. 225 sq.

It will thus be seen that this epistle has been rejected by some modern critics who acknowledge the first to be genuine. Such critics, of course, attribute no weight to arguments brought against the first, such as we have considered already. The Apocalyptic passage (2 Thess. ii, 1-12) is the great stumbling-block to them. It has been a subject of a great deal of attention, all relating to events subsequent to Paul's death—the Neronian persecution, for instance—or as betraying religious views derived from the Montanist of the 2d century, or, lastly, as contradicting Paul's anticipations expressed elsewhere, especially in the first epistle, of the near approach of the Lord's advent. That there is no reference to Nero we shall endeavor to show presently. That the doctrine of an Antichrist did not start into being with Montanism is shown from the allusions of Jewish writers even before the Christian era (see Berthold, *Christ.*, p. 69; Gröger, *Jahrb. des Heils*, ii. 397); and appears still more clearly from the passages, some of which are cited to in the paragraph above. That the language used of the Lord's coming in the second epistle does not contradict, but rather supplement, the teaching of the first—postponing the day, indeed, but still anticipating its approach as possibly within the apostle's lifetime—may be gathered both from expressions in the passage itself (e.g., ii, 7, "is already working") and from other parts of the epistle (i, 7, 8), especially those which speak of the "signs" of the coming. Other special objections to the epistle will scarcely command a hearing, and must necessarily be passed over here.

II. Date.—There is the strongest reason for believing that this second epistle was written very soon after the first, and at the same place, viz. Corinth, A.D. cir. 50. The circumstances of the apostle while writing the one seem very much the same as they were while writing the other; nor do those of the Thessalonians present any great changes that would account for so rapid a reception in the second epistle as may be supposed to in the second epistle may be supposed to in a very short time to have produced. What seems almost to decide the question is, that while writing the second epistle, the apostle had Timothy and Silas still with him. Now, after he left Corinth, it was not for a long time that those of these three persons were with him in his company (Acts xviii, 18; comp. xix, 22); and with regard to one of them, Silas, there is no evidence that he and Paul were ever together at any subsequent period.

It will be seen presently that the teaching of the second epistle is corrective of, or rather supplemental to, that of the first, and therefore presupposes it. Moreover, the first epistle bears on its face evidence that it is the first flush of his affectionate yearnings towards his converts after his departure from Thessalonica; while, on the other hand, the second epistle contains a direct allusion to a previous letter, which may suitably be referred to the first—"Hold fast the tradition which ye were taught either by word or by letter from us" (ii, 15). We can scarcely be wrong, therefore, in maintaining the received order of the two epistles. It is due, however, to the great names of Grothus and of Ewald, that their dates of the second epistle are reversed in this by Baur, Hilgenfeld, Laurent, and Davidson, to mention that they reverse the order, placing the second epistle before the first in point of time—on different grounds, indeed, but both equally insufficient to disturb the traditional order, supported as it is by the considerations above considered.
saw chiefly the outpouring of strong personal affection occasioned by the renewal of the apostle’s intercourse with the Thessalonians, and the doctrinal and hortatory portions are more salutary than spiritual. On the other hand, his leading motive seems to have been the desire of correcting errors in the Church of Thessalonica. We notice two points especially which call forth his rebuke.

1. It seems that the anxious expectation of the Lord’s advent, instead of subsiding, had gained ground since the writing of the first epistle, and that the same enthusiasm is referred to in this great crisis as imminent, and their daily vocations were neglected in consequence. There were expressions in the first epistle which, taken by themselves, might seem to favor this view; and, at all events, such was falsely represented to be the apostle’s doctrine. This notion some insinuated as a truth, specially confirmed to them by the Spirit; others advocated it as part of the apostolic doctrine; and some claimed for it the specific support of Paul in a letter (ii, 2). Whether the letter here referred to is the apostle’s former epistle to the Thessalonians or one forged in his name by some keen and unscrupulous advocates of the notion above referred to is uncertain. The latter opinion has been generally adopted from the time of Chrysostom downwards, and is certainly somewhat counted nanced by the apostle’s statement in the close of the epistle as to his autograph epistles being the mark of a false epistle (chap. 2, 2), but the same time, it must be admitted that the probability of such a thing being done by any one at Thessalonica is, under all the circumstances of the case, not very strong. He now writes to soothe this restless spirit and quell their apprehensions, by showing that many things must happen first, and that the end was not yet, referring to his oral teaching at Thessalonica in confirmation of this statement (ii, 1-12; iii, 6-12).

2. The apostle had also a personal ground of complaint. His authority was not denied by any, but it was tampered with, and an unauthorized use was made of his name. It was difficult to ascertain the exact circumstances of the case from casual and indirect allusions, and indeed we may perhaps infer from the vague ness of the apostle’s own language that he himself was not in possession of definite information; but, at all events, he is suspiciously anxious. Designing men might misrepresent his teaching in two ways: the former by suppressing what he actually had written or said, or by forging letters and in other ways representing him as teaching what he had not taught. Paul’s language differs in places at both these modes of false dealing. He seems to have noticed and repelled suspicions of this kind, even when he wrote the first epistle. At the close of that epistle he binds the Thessalonians by a solemn oath, “in the name of the Lord,” to see that the epistle is read “to all the holy brethren” (v, 27)—a charge unintelligible in itself, and only to be explained by supposing some misrepresentations in the apostle’s mind. Before the second epistle was written his suspicions seem to have been confirmed, for there are two passages which allude to these misrepresentations of his teaching. In the first of these he tells them in vague language, which may refer equally well to a false interpretation of his own words intended to supplement a letter forged in his name, “not to be troubled either by spirit or by word or by letter, as coming from us, as if the day of the Lord were at hand.” They are not to be deceived, he adds, by any one, whatever means he employs (κατελείψας πρὸς ὑμᾶς, ii, 3). In the second of the cases, he says, “The salutation of Paul with my own hand, which is a token in every epistle: so I write” (iii, 17) —evidently a precaution against forgery. With these two passages should be combined the expression in iii, 14, from which we infer that he now entertained a fear of this sort of opposition. “If any man obey not our word conveyed by our epistle, note that man.”

IV. Exhortation. —The most striking feature in this epistle is the apocalyptic passage, announcing the revelation of the Man of Sin (ii, 1-12); and it will not be irrelevant to investigate its meaning, bearing, as it does, on the circumstances under which it was written, and illustrating this aspect of the apostle’s teaching. He had dwelt much on the subject; for he appeals to the Thessalonians as knowing this truth, and reminds them that he told them these things when he was yet with them. The following considerations may help to understand this aspect of the doctrine.

1. The passage speaks of a great apostasy which is to usher in the advent of Christ, the great judgment. There are three prominent figures in the picture—Christ, Antichrist, and the Restrainer. Antichrist is described as the Man of Sin, the Son of Perdition, as the Adversary who exalts himself above all that is called God, as making himself out to be God. Later on (for apparently the reference is the same) he is styled the “mystery of lawlessness,” “the lawless one.” The Restrainer is in one place spoken of in the masculine as a person (ὁ ἀρχιστόν), in another in the neuter as a power, an influence (πάντες ἐκ τῶν ἄνθρωπων). The “mystery of lawlessness” is already at work. At present it is checked by the Restrainer; but the check will be removed, and then it will break out in all its violence. Then Christ will appear, and the enemy shall be consumed by the breath of his mouth, shall be brought to naught by the splendor of his advent.

2. Many different explanations have been offered of this passage. Each generation and each section in the Church has regarded it as a prophecy of that particular power which seemed to them and in their own time to be most fraught with evil to the true faith. A good account of these various interpretations will be found in Lienemann’s commentary on the epistle, p. 204, Schlussebm. zu i, ii (see also Alford, Proleg.). By one class of interpreters it has been referred to circumstances which passed within the circle of the apostle’s own experience, the events of his own lifetime, or the period immediately following. Others, again, have seen in it the prediction of a crisis yet to be realized, the end of all things. The former of the three, the Preterists, have identified the Man of Sin with divers historical characters, and have sought for a historical counterpart to the Restrainer in Blixmanner. Among them are the mentioned names of Grotius, Wetstein, Wetbey, Schwartz, Nielsel, Krause, and Kern. Agreeing, however, in the main point of a past accomplishment, these writers differ widely in interpretation. The Man of Sin was, according to Grotius, Caligula; according to Wetstein, Titus; according to Schwartz, Simon Makkabæus; according to Wetbey, Le Clerc, etc. The Jewish people are thought to have been thus induced in their opposition to Christianity and to the Roman power (τῷ καριοῦ). Commentators of this class are, of course, compelled to consider the coming of Christ as already past, i.e. to interpret it as the destruction of Jerusalem; and this alone seems to render the view untenable. For Paul’s description of the parousia, or appearance, of Christ (1 Thess. ii, 19) is far too exalted to correspond to any temporal event. The latter class of interpreters, the Futurists, have also given various accounts of these matters, and it is clear that which is already working. We hold, in general terms, that this view is substantially right, i.e. that the prophecy, however it may have been partially fulfilled in the past, yet awaits its complete fulfillment. But among the advocates of the Futurist opinion also differences of opinion exist. In the first place, it is clear that the Man of Sin was Mohammed, and the “mystery of iniquity” is Mohammedanism, which, it is held, will yet culminate in some fearful Antichristian form. From the middle of the 11th century the pope began to be considered the predicted Antichrist, and this view, as might have been expected, became the prevalent one in all the Protestant churches. By way of retaliation, Romanists main-
tained that Luther and Protestantism are pointed at in the passage. This seems to show the danger of limiting the prophecy to any one form of Antichristian error. It is enough to say here that these were "many antichrists" (1 John ii, 18); the one he specifies as denying that "Jesus Christ had come in the flesh" is descriptive neither of Mohammed nor of the pope nor of Luther, but of the Gnostics. Many of the features of Antichrist as portrayed by Paul no doubt present themselves in the papacy, but others hardly so. At any rate, the papacy, so far as it contains elements of impiety, seems to have reached its culminating point; perhaps did so three hundred years ago, and yet Christ has not come. We are disposed, therefore, to adopt the view that there have been, since the prophecy was written, many papal imitations of Christ's miracles —the Gnostics, the Judaizing tendencies of the 1st century, Mohammed, the papacy, the French Revolution, etc.; but that there still is in prospect some mystery of iniquity which will combine in itself the several evil tendencies which the Church has already witnessed, but in a greatly intensified form; and probably that this final outburst of impiety will be embodied in a personal head or representative, the Man of Sin of our epistle. His appearance will be the signal for the second advent of Christ. As regards the Restrainer (ὁ κατὰ τὸν θρόνον, τὸ κατὰ τὸν θρόνον), the view of the fathers does not seem to have been so clear that Paul observed this temporal power in his and their day the Roman empire, by which the excesses of lawless licentiousness are, to some extent, held in check. Hence, in Paul's view, the mission of the State as such was a divine one (Rom. xiii). See Antichrist.

5. When we inquire definitely, then, what Paul had immediately in view when he spoke of the Man of Sin and the Restrainer, we can only hope to get even an approximate answer by investigating the circumstances of the apostle's life at this epoch. Now we find that the chief opposition to the Gospel, and especially to Paul's preaching at this time, arose from the Jews. The Jews had conspired against the apostle and his companions at Thessalonica and had cast him himself by a secret flight. Thenese they followed him to Berea, which he hurriedly left in the same way. At Corinth, whence the letters to the Thessalonians were written, they persecuted him still further, raising a cry of treason against him, and bringing him before the Roman proconsul. These ideas of the apostle are found again in some of these epistles: "They slew the Lord Jesus and the prophets, and persecuted the apostles; they are hateful to God; they are the common enemies of mankind, whom the Divine wrath (ἡ ὀργὴ) at length overtakes" (1 Thess. ii, 15, 16). With these facts in view, it is not surprising that Paul speaks of the Messiah in his primary aspect, is represented especially by Judaism. With a prophetic insight the apostle foresees, as he contemplated the moral and political condition of the race, the approach of a great and overwhelming catastrophe. And it is not improbable that our Lord's predictions are not only the result of the natural process of the human mind, but are consistent with the apostle's vision, and gave a color to this passage. If it seem strange that "lawlessness" should be mentioned as the distinguishing feature of those whose very zeal for "the law" stimulated their opposition to the Gospel, we may appeal to our Lord's own words (Matt. xxiii, 28) declaring that "many will say to me, "Lord, Lord, with thee in they are full of hypocrisy and lawlessness (ἀδικίαν)." Corresponding to this view of the Antichrist, we shall probably be correct, as already suggested, in regarding the Roman empire as the restraining power, for so it was taken by many of the fathers, though without altogether understanding its bearing. It was to Roman justice and Roman magistrates that the apostle had recourse at this time to shield him from the enmity of the Jews, and to check their violence. At Philippi, his Roman citizenship extorted an ample apology for ill-treatment. At Thessalonica, Roman law secured him a fair place. As a Roman proconsul acquired him of frivolous charges brought by the Jews. It was only at a later date under Nero that Rome became the antagonist of Christendom, and then also she, in turn, was fitly portrayed by John as the type of Antichrist. Whether the Jewish opposition to the Gospel entirely exhausts the consideration of the "mystery of lawlessness" as he saw it "already working" in his own
day, or whether other elements did not also combine with this to complete the idea, it is impossible to say; but we may presume that he had at least a dim and general anticipation of the more distant future, and at least, the final earthly catastrophe which the Divine Spirit intimates in this striking prediction. Moreover, at this distance of time and with our imperfect information, we cannot hope to explain the exact bearing of all the details in the picture. But, following the guidance of history, we seem justified in adopting this as a probable, though only a partial, explanation of a very difficult passage. See REVIZATION, BOOK OF.

V. Contents.—This epistle, in the range of subject as well as in style and general character, closely resembles the first; and the remarks made on that epistle apply, for the most part, equally well to this. The structure, also, is somewhat similar, the main body of the epistle being divided into two parts in the same way, and each part closing with a prayer (ii, 16, 17; iii, 16; both commencing with αὐτῷ ἐν ὑμῖν). The following is a tabular summary:

The opening salutation (i, 1, 2).

I. A general expression of thankfulness and interest, leading up to the difficulty about the Lord’s advent (i, 3–11, 17).

1. The apostle pours forth his thanksgiving for their progress in the faith; he encourages them to be patient under persecution, reminding them of the judgment to come, and prayers that they may be secured to meet it (i, 3–12).

2. He is thus led to correct the erroneous idea that the judgment is imminent,pointing out that much must happen first (i, 11–15).

3. He repeats his thanksgiving and exhortation, and concludes this portion with a prayer (i, 16–17).

II. Direct exhortation (ii, 1–16).

1. He urges them to pray for him, and confidently anticipates progress in the faith (iii, 1–8).

2. He reproves the idle, disorderly, and disobedient, and charges the faithful to withdraw from such (iii, 9–16).

This portion again closes with a prayer (iii, 16).

The epistle ends with a special direction and benediction (iii, 17, 18).

VI. Commentaries.—The following exegetical helps are on the Second Epistle to the Thessalonians exclusively: Hoffmann, Commentaries [incl. Tit.] (Francof. 1545, 8vo); Brudshaw, Exposition (Lond. 1620, 4to); Jackson, Exposition (ibid. 1621, 4to); Reiche, Authentic., etc. (Gott. 1829, 4to); Scelater, Exposition (Lond. 1629, 4to). See EPISTLE.

Thessalonica (Θεσσαλονίκη), in classical writers also Thessalonike and Thessalonaii, a large and important town of Macedonia, visited by Paul on several occasions, and the seat of a Church to which two of his letters were addressed. (For fuller details we refer to Smith’s Dict. of Greek and Roman Geography, s. v.)

I. Name.—Two legendary names which Thessalonica is said to have borne in early times are Eemathia (Zo- 

mar, Hdt. xii. 26) and Hallea (Steph. B. s. v.), the latter probably having reference to the maritime position of the town. During the first period of its authentic history, it was known under the name of Thersa (Θηρ-

sa, Ασκ.; Θηργα, Herod.,Thucyd.; Hip-

pon, Μαλέας, Chron. p. 193, ed. Weimann), derived, in common with the designation of the gulf (Ther- 

maicus Sinus), from the hot-springs which are found on various parts of this

View of Thessalonica.
be larger) it is the most important town of European Turkey next after Constantinople.

In "Political and Military History."—Thessalonica was a place of some importance even while it bore its earlier name of Thorna. Three passages of chief interest may be mentioned in this period of its history. Xerxes rested here on his march, his land-forces being encamped on the plain between Thorna and the Axios, and his ships cruising about the Theronic gulf; and it was the view from hence of Olympus and Olimbos which tempted him to explore the course of the Peneus (Herod. vii, 128 sq.). A short time (B.C. 421) before the breaking-out of the Peloponnesian war, Therna was occupied by the Athenians (Thucyd. i, 61); but two years later it was ravaged by the Macedonians under Philip II. The third mention of Thenna is in Eusebinus (De Fis. Leg. p. 31, ed. Bekk.), where it is spoken of as one of the places taken by Pausanias.

The true history of Thessalonica begins, as we have implied above, with the decay of Greek nationality. The earliest author who mentions it under its new name is Polybius. It seems probable that it was rebuilt in the same year (B.C. 315) with Cassandra, immediately after the fall of Pydna and the death of Olympias. We are told by Strabo (loc. cit.) that Cassander incorporated in his new city the population not only of Thorna, but likewise of three smaller towns, viz. Area and Chasia (which are supposed to have been on the eastern side of the gulf) and Chalastra (which is said by Strabo [vii, Epis. 9] to have been on the farther side of the Axios, whence Tafel [p. xxii], by some mistake, infers that it lay between the Axios and Thorna). It does not appear that these earlier cities were absolutely destroyed; nor, indeed, is it certain that Thenna lost its separate existence. Pliny (loc. cit.) seems to imply that a place bearing this name was near Thessalonica; but the text is probably corrupt.

As we approach the Roman period, Thessalonica begins to be more and more mentioned. From Livy (xliv, 10) this city would appear to have been the great Macedonian naval station. It surrendered to the Romans after the battle of Pydna (ibid. xlv, 45), and was made the capital of the second of the four divisions of Macedonia (ibid. xliv, 29). Afterwards, when the whole of Macedonia was reduced to one province (Flor. ii, 14), Thessalonica was its most important city, and virtually its metropolis, though not so called till a later period. See MACEDONIA. Cicero, during his exile, found a refuge here in the quator's house (Pro Planc. 41); and on his journeys to and from his province of Cilicia he passed this city, on the road here his exitus letters. During the first civil war Thessalonica was the headquarters of the Pompeian party and the Senate (Dion Cass. xii, 20). During the second it took the side of Octavius and Antonius (Plutarch, Brut. 46; Appian, B. C. iv, 119), and reapèd the advantage of this course by being made a free city (see Pliny, loc. cit.). It is possible that the word Δήμος is the head of Octavia, on some of the coins of Thessalonica, has reference to this circumstance (see Eckhel, ii, 79); and some writers see in the Vardar gate, mentioned below, a monument of the victory over Brutus and Cassius.

Even before the close of the Republic, Thessalonica was a city of great importance, in consequence of its position on the line of communication between Rome and the East. Cicero speaks of it as "posita in remm imperii nostrae." It increased in size and rose in importance after the partition and habitation of the Empire. Strabo, in the 1st century, and Lucian, in the 2d, speak in strong language of the amount of its population. The supreme magistrates (apparently six in number) who ruled in Thessalonica as a free city of the Empire were entitled πολιάρχοι, as we learn from the remarkable inscription, found in the city (Hist. i, 6), which begins with an inscription on the Vardar gate (Böïch, 1867. Babli mentions another inscription containing the same term). In Acta xvii, 5, the δήμοι is mentioned, which formed part of the constitution of the city. Tafel thinks that it had a δῆμος also.

During the Roman period, three centuries of the Christian era Thessalonica was the capital of the whole country between the Adriatic and the Black Sea; and even after the founding of Constantinople it remained practically the metropolis of Greece, Macedonia, and Illyricum. In the middle of the 9th century, as we learn from coins, it was made a Roman colony; perhaps with the view of strengthening this position against the barbarian invasions, which now became threatening. Thessalonica was the great safeguard of the Empire during the first shock of the Gothic invasions. Constantine passed some time here after his victory over the Sarmatians; and perhaps the second arch, which is mentioned below, was a commemoration of this victory. He is said also, by Zosimus (ii, 86, ed. Bonn), to have constructed the port, by which we are, no doubt, to understand that he repaired and improved it after a time of comparative neglect. Passing by the dreadful massacre by Theodosius (Ribben, Rome, ch. xxvii), we come to the Sasanian wars, of which the Gothic wars were only the prelude, and the brunt of which was successfully borne by Thessalonica from the middle of the 6th century to the latter part of the 8th. The history of these six Sasanian wars, and their relation to Thessalonica, has been elaborated with great care by Tafel.

In the course of the Middle Ages, Thessalonica was three times taken; and its history during this period is thus conveniently divided into three stages. On Sunday, July 29, 904, the Saracen fleet appeared before the city, which was stormed after a few days' fighting. The slaughter of the citizens was dreadful, and vast numbers were sold in the various slave-markets of the Levant. The story of these events is told by Jo. Cameniata, who was a priest-bearer to the archbishop of Thessalonica. From his narrative it has been inferred that the population of the city at that time must have been 220,000 (De Excckio Thessalonicensi, in the volume entitled Theophaes Continus in the Bonn ed. of the Byzantine writers [1888]). The next great catastrophe of Thessalonica was caused by a different enemy—the Normans of Sicily. The fleet of Tancred sailed round the Morea to the Theronic gulf, while an army marched by the Via Egnatia from Dyrrhachium. Thessalonica was taken on Aug. 15, 1185, and the Greeks were barbarously treated by the Latins, whose cruelties are de-
THESALONICA

speeched by Nicetas Choniates (De Andron. Commno, p. 388, ed. Bonn, 1885). The celebrated Eustathius was an archbishop of Thessalonica at this time; and he wrote an account of this capture of the city, which was first published by Tafel (Thub. 1829), and is now printed in the Bonn ed. of the Byzantine writers (De Thessalonica a Latinita Capta, in the same vol. with Leo Grammaticus [1842]). Soon after this period follows the curious history of Western feudalism in Thessalonica under Boniface, marquis of Montferrat, and his successors, during the first half of the 13th century. The city was again under Latin dominion (having been sold by the Greek emperor to the Venetians), when it was finally taken by the Turks under Amurat II, in 1430. This event also is described by a writer in the Bonn Byzantine series (Joannes Anagnostes, De Thessalonicensi Ecclecio Narratio, in the same vol. with Phanizes and Cænasus [1889]).

For the medieval history of Thessalonica see Mr. Finlay's works, Medieval Greece (1861), p. 70, 71, 135-147; Byzantine and Greek Empire (1858), I, 315-352; (1864), ii, 182, 264-286, 607. For its modern condition we must refer to the travelers, especially Beaujour, Cousinney, Holland, and Leake.

IV. Ecclesiastical History.—The annals of Thessalonica are so closely connected with religion that it is desirable to review them in this aspect. After Alexander's death the Jews spread rapidly in all the large cities of the empire, and the princes which had formed his empire. Hence there is no doubt that, in the 1st century of the Christian era, they were settled in considerable numbers at Thessalonica; indeed, this circumstance contributed to the first establishment of Christianity there by Paul (Acts xvii, 1). It seems probable that a large community of Jews has been found in this city ever since. They are mentioned in the 7th century, during the Slavonic wars; and again in the 12th, by Eustathius and Benjamin of Tudela. The events of the 15th century had the effect of bringing a large number of Spanish Jews to Thessalonica. Paul Lucas says that in his day there were 50,000 of this nation here, with 22 synagogues. More recent authorities vary between 10,000 and 20,000. The present Jewish quarter is in the south-east part of the town.

Christianity, once established in Thessalonica, spread from it in various directions, in consequence of the missionary labors of the Apostle, and the mission of the city (1 Thess. 1, 8). During the succeeding centuries this city was the bulwark, not simply of the Byzantine empire, but of Oriental Christendom; and was largely instrumental in the conversion of the Slavonians and Bulgarians. Thus it received the designation of "the Orthodox City." It is true after this time; and the withdrawal of the provinces subject to its jurisdiction from connection with the see of Rome, in the reign of Leo Isauricus, became one of the principal causes of the separation of East and West. Cameniata, the native historian of the calamity of 904, was, as we have seen, an ecclesiastic. Eustathius, who was archbishop in 1185, was, beyond dispute, the most learned man of his age, and the author of an invaluable commentary on the Iliad and Odyssey, and of theological works, which have been recently published by Tafel. A list of the Latin archbishops of Thessalonica from 1205 to 1418, when a Roman hierarchy was established along with Western feudalism, is given by Le Quien (Oriens Christianus, iii, 1089). Even to the last we find this city connected with questions of religious interest. Simeon of Thessalonica, who is a chief authority in the modern Greek Church on ritual subjects, died a few months before the fatal siege of 1430; and Theodore Gaza, who went to Italy soon after this siege, and, as a Latin ecclesiastic, became the translator of Aristotle, Theophrastus, and Hippocrates, was a native of the city of Demetrius and Eustathius.

V. Connection with the Apostle Paul.—Paul's visit to Thessalonica (with Silas and Timothy) occurred during his second missionary journey, and to this is due the introduction of Christianity into Thessalonica. Timothy is not mentioned in any part of the direct narrative of what happened at Thessalonica, though he appears as Paul's companion before at Philippi (Acts xvi, 1-15), and afterwards at Berea (xvii, 14, 15); but from his subsequent mission to Thessalonica (1 Thess. iii, 1-7; see Acts xviii, 5), and the mention of his name in the opening salutation of both epistles to the Thessalonians, we can hardly doubt that he had been with the apostle throughout.

Three circumstances must here be mentioned, which illustrate in an important manner this visit and this journey, as well as the two epistles to the Thessalonians, which the apostle wrote from Corinth very soon after his departure from his new Macedonian converts. (1.) This was the chief station on the great Roman road called the Via Egnatia, which connected Rome with the whole region to the north of the Ægean Sea. Paul was on this road at Neapolis (Acts xvi, 11) and Philippi (ver. 12-40), and his route from the latter place (xvii, 1) had brought him through two of the well-known minor stations mentioned in the Itineraries. See AMPHIPOLIS; APOLLONIA. (2.) Placed as it was on this great road, and in connection with other important Roman ways, Thessalonica was an invaluable centre for the spread of the Gospel. It must be remembered that, be-
sides its inland communication with the rich plains of Macedonia and with far more remote regions, its maritime position made it a great emporium of trade by sea. In fact, it was nearly, if not quite, on a level with Corinth and Ephesus in its share of the commerce of the Levant. Thus we see the force of what Paul says in his first epistle, shortly after leaving Thessalonica.—ἀφ’ ὑμῶν ἤρχεται ὁ λύγος τοῦ Κυρίου ὁ μέγιστος ἐν τῇ Μακεδονίᾳ καὶ ἐν τῇ Ἀχαιᾳ. διὰ τῶν ματών τιμών χάρις Ἰησοῦ (1, 8). (3) The circumstance noted in Acts xxvii, 1, that there was the synagogue of the Jews in this part of Macedonia, had evidently much to do with the apostle's plans, and also doubtless with his success. Trade would inevitably bring Jews to Thessalonica; and it is remarkable that the apostle soon had a prominent place in the annals of the city.

The first scene of the apostle's work at Thessalonica was the synagogue. According to his custom, he began there, arguing from the ancient Scriptures (Acts xxvii, 2, 3); and the same general results followed as in other places. Some believed, both Jews and proselytes; and it is particularly added that among these were many influential women (ver. 4); on which the general body of the Jews, stirred up with jealousy, excited the Gentile population to persecute Paul and Silas (ver. 5–10).

It is stated that the ministrations among the Jews continued for some weeks (ver. 2); but they were not obliged to limit this time the whole stay of the apostles at Thessalonica. A flourishing church was certainly formed there; and the epistles show that its elements were much more Gentile than Jewish. Paul speaks of the Thessalonians as having turned "from idols," and he does not note here, as in other places, the Jews' excuse for a departure. For the expressions as in Σαβάκης γειλης (1 Thess. i, 6), and γειλης ἐγών (3, 2), sum up the suffering and conflict which Paul and Silas and their converts went through at Thessalonica (see also ver. 14, 15; iii, 3, 4; 2 Thess. i, 4–7). The persecution took place through the instrumentality of a certain (Ραφείων ἰδιότα ἰδιότα) ὑποκριτής (1 Thess. xvi, 5), who, instigated by the Jews, raised a tumult. The house of Jason, with whom the apostles seem to have been residing, was attacked; they themselves were not found, but Jason was brought before the authorities on the accusation that the Christians were trying to set up a new king in opposition to the emperor; a guarantee (ῥό ιερως) was taken from Jason and others for the maintenance of the peace, and Paul and Silas were sent away by night southward to Berea (Acts xxvii, 5–10). The particular charge brought against the apostles receives an illustration from the epistles, where the kingdom of Christ is prominently mentioned (1 Thess. ii, 12; 2 Thess. i, 5). So, again, the doctrine of the resurrection is conspicuous both in Luke's narrative (xxviii, 3) and in the first letter (i, 10; iv, 14, 16). If we pass from these points to such as are personal, we are enabled from the epistles to complete the picture of Paul's conduct and attitude at Thessalonica, as regards his love, tenderness, and zeal, his individual soul, and his disinterestedness (see i, 5; ii, 1–10). As to this last point, Paul was partly supported here by contributions from Philippi (Phil. iv, 15, 16), partly by the labor of his own hands, which he diligently practiced for the sake of the better success of the Gospel, and that he might set an example to the idle and selfish. (He refers very expressly to what he had said and done at Thessalonica in regard to this point; see 1 Thess. ii, 9; iv, 11; comp. 2 Thess. iii, 8–12.) See THESALONIANS. To complete the account of Paul's connection with Thessalonica, it must be noticed that he was certainly there again, though the name of the city is not specified, on his third missionary journey, both in going and returning (Acts xx, 1–3). Possibly he was also there again after his liberation from his first imprisonment. See Phil. i, 26, 26; ii, 24, for the hope of revisiting Macedonia, entertained by the apostle at Rome, and 1 Tim. i, 3; 2 Tim. iv, 18; Tit. iii, 12, for subsequent journeys in the neighborhood of Thessalonica.

Of the first Christians of Thessalonica, we are able to specify by name the above-mentioned Jason (who may be the same as the apostle's own kinsman mentioned in Rom. xvi, 21), Demas (at least conjecturally; see 2 Tim. iv, 10), Gaius, who shared some of Paul's perils at Ephesus (Acts xix, 29), Secundus (who accompanied him from Macedonia to Asia on the eastward route of his third missionary journey, and was probably concerned in the business of the collection; see xx, 4), and especially Aristarchus (who, besides being mentioned here with Secundus, accompanied Paul on his voyage to Rome, and had therefore probably been with him during the whole interval, and is also specially referred to in two of the epistles written during the first Roman imprisonment; see xxvii, 2; Col. iv, 10; Phil. 24; also Acts xix, 29, for his association with the apostle at Ephesus in the earlier part of the third journey).

VI. Ancient Remains.—The two monuments of greatest interest at Thessalonica are two arches connected with the line of the Via Egnatia. The course of this Roman road is undoubtedly preserved in the long street which intersects the city from east to west. At its western extremity is the Vardar gate, which is nearly in the line of the modern wall, and which has received its present name from the circumstance of its leading to the river Vardar, or Axios. This is the Roman arch believed by Beaunjour, Holland, and others to have been erected by the people of Thessalonica in honor of Octavius and Antonius, and in memory of the battle of Philippi. The arch is constructed of large blocks of marble, and is about twelve feet wide and eighteen feet high; but a considerable portion of it is buried deep below the surface of the ground. On the outside face are two bas-reliefs of a Roman wearing the toga and standing before a horse. On this arch is the above-mentioned inscription containing the names of the poliarch of the city. Leake thinks from the style of the sculpture, and Tafel from the occurrence of the name Flavius in the inscription, that a later date ought to be assigned to the arch (a drawing of it is given by Constancia). The other arch is near the eastern (said in Clarke's Travels, iv, 355, by mistake, to be near the western) extremity of the main street. It is built of brick and Triumphal Arch of Constantine at Thessalonica.
THESSALONICA

faced with marble, and formerly consisted of three archways. The sculptured camels give an Oriental aspect to the monument; and it is generally supposed to commemorate the victory of Constantine over Licinius or over the Sassanids.

Near the line of the main street, between the two above-mentioned arches, are four Corinthian columns supporting an architrave, above which are caryatids. This monument is now part of the house of a Jew; and, from a drawing that the figures were petrified by magic, it is called by the Spanish Jews Jéstas Incomtadas. The Turks call it Sireth-Mahle. (A view will be found, with architectural details, in Stuart and Revett, Athen. Antig. iii, 58.) This colonnade is supposed by some to have been part of the Propyleas of the Hippodrome, the position of which is believed by Pausanias and Clovis to have been in the south-eastern part of the town, between the sea and a building called the Rotunda, now a mosque, previously the church Eski-Metropolis, but formerly a temple, and in construction similar to the Pantheon at Rome. Another mosque in Thessalonica, called Eski-Juma, is said by Beaujour to have been a temple consecrated to Venus Thermia. The city walls are of brick, and of Greek construction, resting on a much older foundation, which consists of hewn stones of immense thickness. Everywhere are broken columns and fragments of sculpture. Many remains were taken in 1439. One of the city gates, the entrance through which it is said the emperor Constantine entered on his return, is called the Tower of the Statue, because it contains a colossal figure of Thessalonica, with the representation of a ship at its feet. The castle is partly Greek and partly Venetian. Some columns of red antique, supposed to be relics of a temple of Herakles, are to be noticed there, and also a shattered triumphal arch, erected (as an inscription proves) in the reign of Marcus Aurelius, in honor of Antoninus Pius and his daughter Faustina.

In harmony with what has been noticed of its history, Thessalonica has many remains of ecclesiastical antiquity. Beaujour says that in this respect it surpasses any other city in Greece. The church of greatest interest (now a mosque) is that of St. Sophia, built, according to tradition, like the church of the same name at Constantinople, in the reign of Justinian, and after the designs of the architect Anthemius. This church is often mentioned by Tafel; he believes that it was erected about the end of the 7th century; but Leake conjectures, from its architectural features, that it was built by the Latins in the 13th. Tafel has collected with much diligence the notices of a great number of churches which have existed in Thessalonica. Dapper says that in his day the Greeks had the use of three churches. Walpole (in Clarke's Travels, iv, 849) gives the number as sixteen. All travellers have noticed two ancient pulpits, consisting of "single blocks of variegated marble, with small steps cut in them," which are among the most interesting ecclesiastical remains of Thessalonica.

VII. Authorities.—The travellers who have described Thessalonica are numerous. The most important are Lucas, Second Voyage (1705); Pococke, Description of the East (1743-45); Beaujour, Tableau du Commerce de la Grèce, translated into English (1806); Clarke, Travels in Europe, etc. (1819-23); Holland, Travels in the Ionian Islands; Cathedral Churches of Greece (1825); Macdonald (1831); Leake, Northern Greece (1835); Zachariais, Reise in dem Orient (1849); Griesbach, Reise durch Rumelien (1841); Bowen, Mount Athos, Thessaly, and Epirus (1852); Dodd, in the Biblioth. Sacra, xi, 830; xvii, 485; xxvii, 146.

In the Mémoires de l'Académie des Inscriptions, tom. xxxviii, Sect. Hist. p. 121-146, is an essay on the subject of Thessalonica by the abbé Belley. But the most elaborate work on the subject is that of Tafel, Hist. Thessalonicae necque ad A.D. 904, the first part of which was published at Berlin in 1835; this part has been reprinted as Prolegomena zu dem Dissertatio de Thessalonicae et Ioniae Geographica (Berlin, 1839). With this should be compared his work on the Vin Egnatia. To these authorities we ought to add the introduction to some of the commentaries on Paul's Epistles to the Thessalonians and the Galatians by Koch (ibid., 1849) and Lüttemann (Götting, 1850). The early history of the Thessalonian Church is discussed by Burgundhout, De Oest Chr. Thessal., Ortus, Fatigues (Leid., 1825). A good description of the modern place is given in Murray's Handbook for Greece, p. 455.

Theudsas, a person incidentally mentioned but once in the New Testament (Acts x, 56), and concerning whom much controversy has arisen.

I. The Name.—This, in the original, is Θεοδάς (a form which likewise occurs in Josephus, Ant. xx, 5, 1), and, if Greek, may be for Θεόδας, as a contraction of Θεοδάς ή Θεόδασ, i.e. God-given = Johanan (comp. Vulg. Theodas). A similar form, Θεόδας, occurs in DioGenes Laert. ix, 116. If Hebrew (Simonis, Onomast. N. T. p. 72), it may — ὁ Θεόδας, praise. The Mishna has a similar form, דתא (Datera).

II. Scriptural Statement.—According to Luke's report of Gamaliel's speech before the Jewish Sanhedrin, on the occasion of the first arraignment of the apostles (A.D. 29), Theudas was the leader of a popular tumult some time previously (πρὸ τοῦ ταύτα τῶν ἠμῶν) (Acts v, 36-38). He is spoken of as a religious impostor of high pretensions (Μυρῷ διὸν τῷ τουράν), to whom a considerable body of adherents (αὐτῶν ἀνήρ χρὴς καὶ ἡ ταξία) closely attached themselves (προσευκτικῶς, διά της οἰκουμενής, A. B.), but who was ultimately slain (ἀγριότητι, and his party annihilated (ὑπὸ τῆς ᾄδος τῆς συν. ὀλίγη), and all his followers were put to death (Josephus, Ant. xvii. 1, 2; War, ii. 12). Thus far there is no difficulty; it is only by a comparison of contemporaneous history that a discrepancy is alleged as arising.

III. Adjustment of the Account with Josephus.—No insurrection of this name is mentioned by the Jewish historian at the period to which Gamaliel must refer, but he gives statements of several somewhat similar occurrences about that time.

1. A religious impostor (γὰρ τὰς ἁγίας) named Theudas is described by him as having raised a strikingly analogous movement. In the reign of Claudius, when Caius Fadius was procurator of Judea, Josephus's account of the matter (Ant. xx, 5, 1) is that this fanatic, laying claim to prophetic powers, persuaded a very large body of people to follow him to the Jordan, taking their effects along with them, with the assurance that they would be delivered out of their bondage, and that they had done before Elijah and Elisha in the days of old; but being unexpectedly attacked by a squadron of cavalry sent out after him by Fadius, his followers were killed or taken prisoners, and the leader himself, being taken, was beheaded. The reign of Claudius and the procuratorship of Fadius is this indicated, i.e. some fifteen years later than the delivery of Gama-
liel's speech; and some forty after the scriptural event, since Luke places his Theudas, in the order of time, before Judas the Galilean, who made his appearance soon after the detraction of Archelaus, i. e. A.D. 6 or 7 (Josephus, War, ii, 8, 1; Ant. xviii, i, 60; xx, 5, 2).

Three questions must be answered: (i) was there ever a Jewish insurgent named Theudas, as Josephus says; (ii) if so, was Josephus' account of the facts true or false; (iii) if it is true, should we accept what he says as a trustworthy account of the facts before the Sanhedrim occurred in the time of Claudius (constituted to the manifest chronological order of the Acts), desires mention only as a waymark of the progress which has been made in Biblical exegesis since his time.

1. Another explanation (essentially different only as proposing to identify the person) is that Luke's Theudas may have been one of the three insurgents whose names are mentioned by Josephus in connection with the disturbances that took place under the time of Herod's death. So much for (Theol. Stud. v. Kritik. 1887, p. 622, etc.; translated in the Biblioth. Sacra, 1848, p. 409 seq.) has been argued by an insurrection of the Jewish people, as is supposed by some (Yale's Ad Euseb. H. E. ii, 11), is at complete variance with the simplicity and unartistic character of his narrative. It is a question in which we are interested to know whether the writer of the Acts either fabricated the speech put into the mouth of Gamaliel, or that it was carelessly and surreptitiously woven into it a transaction which took place forty years or more after the time when it was said to have occurred (see Zeller, 123 sq. p. 132 sq.).

But without resorting to either of these violent methods, the difficulty may be solved with perfect satisfaction by the simple hypothesis that there were two insurgents of the same name. Since Luke represents Theudas as having preceded Judas the Galilean (q. v.), it is certain that he could not have appeared later, at all events, than the latter part of the reign of Herod the Great. The very year, now, of that monarch's death was 4.B.C.; the last year of the period of Judas's belligerent parties, under the direction of insurrectionary chiefs or fanatics (Тερα μοηνα Σοφίου συνθήκην την 'Ιουλίαν κατάραμαν, Josephus, Ant. xvii, 12, 4). The whole of these, with three exceptions, are passed over by Josephus without particularizing their leaders, so that it need neither of them to the fact that the Theudas was introduced into the composition of the narrative of the second epistle, the first of the two being the name of Simon, the son of Alphaios or Alphax, the disciple of the great Greek Rabbin, and the second of Matthias, who is mentioned in the second epistle of Peter as having been with the apostles on the day of Pentecost. It is clear then that the name of Matthias is mentioned in the second epistle of Peter as being the Hebrew form of 'Ματθαύος = Matthias, of whom Josephus (Ant. xvii, 6, 2, 4) gives a detailed account as a distinguished teacher among the Jews, who, in the latter days of Herod the Great, raised a band of his scholars to effect a social reform in the spirit of the old Hebrew constitution, by "destroying the heathen works which the king had erected contrary to the law of their fathers." A large golden eagle, which the king had caused to be erected over the great gate of the Temple, in defiance of the command of the Sanhedrim, images or representations of any living creatures, was an object of their special dislike, which, on hearing a false report that Herod was dead, Matthias and his companions proceeded to demolish; when the king's captain, supposing the undertaking to have a higher origin, subscribed to him the aid of a body of soldiers with a band of soldiers, and arrested the proceedings of the multitude. Dispensing the mob, he apprehended forty of the bold spirits, together with Matthias and his fellow-lider Judas. Matthias was burned. Now, had we used the term Theudas for the term Matthias,
THEURGISTS

Thiardi, Henri de, cardinal of Bisay, was born May 25, 1657, and at the age of twelve received the abbey of Noaille, in reward for his father's services to Louis XIV. He was educated at the Jesuit College of Dijon and at the Sorbonne, and was made doctor of theology and dean of the University of Dijon, but was never consecrated. In 1697 he was made archbishop of Bordeaux, but declined, and soon afterwards was given the abbey of Trois-Fontaines and Sainte-Germain, and the bishopric of Meaux. He was raised to the cardinalate May 29, 1716. He had made Jansenism unpleasing to Louis XIV, and was not allowed to marry. He died in Paris, July 26, 1737, having published numerous ecclesiastical works, for which see Hoefer, Nouv. Biog. Générale, s. v.

Thibault, archbishop of Canterbury, of whose family nothing is known, was first made abbot of Bec after the year 1136, and soon after was called to England, where we find him raised to the see of Canterbury in 1139. Under the influence of learned men, Thibault espoused the case of the pope in the quarrels with the king of England, and was therefore treated by the latter as a public enemy. He escaped to St. Omer, but was afterwards imprisoned by Eustachius for refusing to crown the son of the latter. Some time after 1158 he was restored, but was afterwards banished by the dean of Canterbury, and died April 18, 1161, leaving a number of Letters. See Hook, Lives of the Archbishops of Canterbury, s. v.

Thibet, Religion of. The religion of Buddha was introduced into Thibet under king Strongtan Gampo, in A.D. 617–696, by priests from Sinde. These priests brought with them the art of writing, and translated the sacred books of the Indian Buddhists into Thibetan, and the monasteries became the centre of learning, education and professional skill. In the 11th century, the Bompa religion (the old worship of evil demons) was once more established, but after eighty years the Bud- dhist priests again came into power. These priests, in the 14th century, had become mere jugglers; and then arose a reformer, the monk Deokhapa, born in 1555, in the district of Amo, where is now the famous monastery of Kunbum. He opposed the tricks and pretended miracles of charlatanism, and undertook the task of uniting and reconciling the dialectical and mystical schools of Thibetan Buddhism. His influence was never universally acknowledged. In the 15th century, Gedun-Dub, provost of a large monastery, claimed to be an incarnation of Buddha, and assumed the title of the "very costliest teacher ocean." The Mongols called him Gyatso, or Dalai Lama, the "priest ocean," and thus was inaugurated the Dalai Lama system (q. v.), which became the established religion of the country. The election of the grand lama, although by lot, has been so managed as to prevent any child from being elected which might be disagreeable to the Chinese government. The last election took place in 1875, and a child from the western boundary, towards Ladakh, was elected, which seems to indicate a decrease of the Chinese influence. Thibet is greatly oppressed by its ecclesiastical system. The number of monasteries and monks is almost incredible. Eighteen thousand live in and around Lassa; on an average every thirteenth, and in some places every seventh, monastery must be provided for by other dioceses. The poverty of the people very nearly, their moral depravity still greater. Between 1854 and 1864 some French missionaries attempted to establish a Ro- man Catholic station at Bonga, in South-eastern Thibet, but were violently assailed by the lamas, and, unpro- tected by their own authorities, they were ordered to leave. All other efforts to introduce Christianity have also failed; indeed, so jealous of Europeans are the au- thorities that they are rarely even admitted into the country. See Lamaism.

Thibetan Version. The vast and mountainous tract of country in which the Thibetan language is spoken lies directly north of Hindustan, from which it
THIEF

is separated by the Himalaya Mountains. Its eastern frontiers border on China; to the west it extends as far as Cashmere, Afghanistan, and Turkestan; while on the north it is bounded by the countries of the Turks and the Mongols. It is, for the most part, comprised within the Chinese empire; the western parts, however, appear to have been inhabited by a race of Tartars, who, under the jealousy of the Chinese government, Tibet has hitherto been almost inaccessible to foreigners, and our knowledge of the country is in consequence extremely limited.

In 1816 an attempt was made by the Church Missionary Society to furnish the Tibetans with a version of the Scriptures in their own language; but this attempt, like all others in the same line, this important undertaking ultimately proved abortive. The matter rested until the year 1848, when Dr. Häberlin, an agent of the British and Foreign Bible Society, after journeying through Tibet, again forced the necessity of a Tibetan version upon the attention of Christian societies. Dr. Häberlin states, as the result of his observations and inquiries in Tibet, that "as far as the Tibetan language is spoken and the Lamas have any sway, so far literary exercises exercise an important influence on the people. If there were a version of the Scriptures in the Tibetan language, thousands of volumes might annually be sent into the interior of Asia from five different points along the immense frontier of British India; and the millions of people speaking that language, and inquisitive as the Chinese are, might thus have a profitable opportunity of being made acquainted with the things that belong to their salvation. In spite of things, in fact, the object advocated by Dr. Häberlin moved very slowly, for not until 1856 do we read of an effort made towards translating the Gospel of St. Matthew, which in 1863 was published by the Moravian Mission at Kyelang. About the same time, a Bible society for the Punjab, with its headquarters at Lahore, began its labours in an attempt to provide a translation by that society was the translation of the Scriptures into the Tibetan, which had already been commenced by Moravian missionaries. The difficulties, however, were very great, and the work of translation was naturally very slow. Hence we need not be surprised that five years after the publication of the Bible of St. Matthew those of John and Mark were published, while up to the New Test. has not yet been completed. See Bible of Every Land, p. 20 sq. (B. P.)

Thief (θλημώς). Among the Hebrews, the restitution that was required in case of theft was double the amount taken (Exod. xx, 3-8). If a sheep, however, was stolen, and had been slain or sold, fourfold was required; or if an ox, a fivefold restitution was to be made. The reason of this distinction was that sheep, being kept in the desert, were more exposed than other animals to be stolen; and oxen, being so indispensible necessary in an agricultural community, could not be taken from their owners without great injury and pecuniary aggravation (xxii, 1). In case the thief was unable to make the restitution demanded by the law, he was sold, with his wife and children, into servitude (ver. 3; 2 Sam. xii, 6; 2 Kings iv, 1; comp. Gen. xlix, 14). In later times, the fine is thought by some to have been increased (Prov. vi, 30, 31). Whoever slew a thief who was attempting to break a house at night, i.e. any hour before sunrise, was left unpunished, since he did not know what hour he must not live his own life, and he was unable also, owing to the darkness, to identify and thereby bring him to justice (Exod. xxii, 2). See THIEFT.

"Men do not despise a thief," says Solomon, "if he steal to satisfy his soul when he is hungry. But if he live in largeness, and his house be not reduced by it, it is like the substance of his house" (Prov. vi, 30, 31). Bishop Hall is of opinion that Solomon, in this passage, does not so much extenuate the crime of theft as point out the greater crime of adultery; but we have abundant evidence that theft, unaccompanied by violence, was viewed more leniently by ancient than by modern legislators. Wilkinson says, "The Egyptians had a singular custom respecting theft and burglary. Those who followed the profession of thief gave in their name to the chief of the robbers, and agreed that he should be informed of everything they might therefore steal to be sold by them. On the cessation of this, the owner of the lost goods always applied by letter to the chief for their recovery; and having stated their quality and quantity, the day and hour when they were stolen, and other requisite particulars, the goods were identified, and on payment of one quarter of their value they were delivered to the same state as when taken from his house; for, being fully persuaded of the impracticability of putting an entire check to robbery, either by the dread of punishment or by any other method that could be adopted by the most vigilant police, they considered it more for the advantage of the community that a certain sacrifice should be made, in order to secure the restitution of the remainder, than that the law, by taking on itself to protect the citizen and discover the offender, should be the indirect cause of greater loss; and that the Egyptians, like the Indians, and, I may say, the modern inhabitants of the Nile, were very expert in the art of deceiving, we have abundant testimony from ancient authors" (Anc. Egyp- tians, ii, 216). See STOLE.

The criminals who were crucified with our Lord appear to have been, not "thieves" in the ordinary sense of the word, but rather public robbers or highwaymen (Apeirîs is carefully distinguished from θλημώς, John x, 8), i.e. fellow-insurgents with Barabbas; for it is said that he "lay bound with them that had made insurrection with him in the city, who had committed murder in the inscription" (Mark xv, 7). These malefactors, as bishop Malby has well observed, "were not thieves and robbers all of them, but men who had taken up arms on a principle of resistance to the Roman oppression, and to what they thought an unlawful burden, the tribute-money; who made no scruple to rob all the Romans, and when engaged in these unlawful causes made less difference between Jews and Romans than they at first meant to do" (Sermone [1818-22], vol. 1). See ROMANS.

Thilemon, otherwise Diethomas, a Bavian prelate and artist, was born of noble parentage about 1045. Agreeably to the custom of his time, he was as well versed in mechanics as in the fine arts. He executed many works in painting and sculpture for the churches, particularly for the Church of St. Blaise, near Ems. In 1079 he was elected bishop of the city of Thale, which was situated on the Ems, and in 1090 was chosen bishop of that city. He started for the Holy Land about 1099, and is said to have been taken prisoner by the infidels, who, learning of his skill in sculpture, commanded him to restore the arms of a brazen idol. Refusing to do so on account of religious scruples, he was put to death, in 1101. See Spooner, Bioq. Hist. of the Fine Arts, n. v.

Thiemer (or Tìermes), in the mythology of the Laplanders, was the son of the devil by a Lapland girl. The latter was sitting upon the ground under a tree, when Perkel (the devil), disguised as a stranger, came to her, and asked her to hang her fur coat upon a bundle of wood. This she complied with, but suddenly the bundle of wood began to burn, and the girl, in order to escape his embraces, became his victim. The child was removed to the highest heaven, and was there questioned as to whose child it desired to be, the father's or the mother's. It decided in favor of the mother, after which the high ruler made it of a god of thunder. As it grew up, it knew how to give flowers, how to give thundering and lightning, now uprooting trees, again splitting rocks, doing good and evil. The Laplanders have a poorly developed worship of the deities. Thus, it seems, there can be accredited to Thiemers only a general worship.
THIEVES

Thierry, Jean Baptiste, a French divine, was born at Chartres, Nov. 11, 1636. He was professor at the Collège du Plessis in Paris, and was, in 1666, appointed to the incumbency of Champrom in Gastine (Chartres). Here he came in conflict with the archdeacon of Chartres, and went to Ribraye (Meuse), where he died, Feb. 28, 1703. He wrote, De Festorum Dierum Immunitatione (Lyons, 1668), which was placed on the Index "donee corrigitur:"—Traité de l'Exposition du S. Sacrament de L'Autel (Paris, 1673) — Traité des Supériorités selon l'Écriture Sainte (ibid. 1673) — Discours sur la Sainte Larme de Vendôme (ibid. 1696), against which Malbillon wrote a rejoinder, Lettre d'un Bénédictin à Mgr. de Blois (ibid. 1700). Against the priesthood he wrote, L'Avocat des Paupers (ibid. 1676) — L'Accusation des Perreaux (ibid. 1690). He also wrote some historical works, for which see Nicero, Mémoires pour Servet, etc., vol. xi.; Dupin, Nouvelle Biblioth. vol. xiv.; Theolog. Universal-Lex. s. v.; Hoefer, Neue, Bioóg. Générale, s. v. (B. P.)

Thietmar, a noble Saxon belonging to the family of Waldeck, and related to the imperial house, was born July 25, 976. In 989 he became canon of St. Maurice, and in 1002 provost of Waldeck, which his grandfather had founded. In 1009 he was made bishop of Merseburg, and in 1018 he died. He wrote a chronicle, with the purpose of transmitting to his successors in the bishopric a history of Merseburg; but the work grew into a history of the German State and of the neighboring Germanic and Slavonic countries. It is the most important source for the time of the later emperors, since its statements cover almost the whole of the 10th century, and are largely the reports of what the author himself saw and knew. The book is deficient in point of literary excellence, but is characterized by abundance of matter and truthfulness of spirit. It is as important for the illustration of manners and customs in the days of the Saxon emperors as for the statement of historical events.

Thieves, The Two, on the Cross (Matt. xxvii., 38-43; Mark xv, 27; Luke xxi., 33-43; comp. John xviii., 32). The men who under this name appear in the history of the crucifixion were robbers (Aperai) rather than thieves (Eptera), belonging to the lawless bands by which Palestine was at that time and afterwards infested (Josephus, Ant. xvii., 10, 8; xx, 8, 10). Against these brigands every Roman procurator had to wage continual war (Josephus, War, ii, 15, 2). The parable of the Good Samaritan shows how common it was for them to attack and plunder travellers even on the high-road from Jerusalem to Jericho (Luke x, 30). It was necessary to use an armed police to encounter them (xvi. 12). The case of Barabbas, the wild robber life was connected with a fanatical zeal for freedom which turned the marauding attack into a popular insurrection (Mark xv, 7). For crimes such as these the Romans had but one sentence. Crucifixion was the penalty at once of the robber and the rebel (Josephus, Ant. xvii., 19, 2). Of the previous history of the two who suffered on Golgotha we know nothing. They had been tried and condemned, and were waiting their execution before our Lord was accused. It is probable enough, as the death of Barabbas was clearly expected at the same time, that they were among the suorvansaeori who had been imprisoned with him, and had taken part in the insurrection in which zeal, and hate, and patriotism, and lust of plunder were mingled in wild confusion. They had expected to die with Jesus Barabbas (q. v.). They found themselves with one who bore the same name, but who was described in the superscription on his cross as Jesus of Nazareth. They could hardly fail to have heard something of his fame as a prophet, of his triumphal entry as a king. They now find him sharing the same fate as themselves, condemned on much the same charge (Luke xxiii., 5). They tore at their tresses and crossed their hearts as they stood in their place, while He fainted by the way. Their garments would be parted among the soldiers. For them also there would be the drugged wine, which He refused, to dull the sharp pain of the first hours on the cross. They catch at first the prevailing tone of scorn. A king of the Jews who could neither save himself nor help them, whose followers had not even fought for him (John xviii., 36), was strangely unlike the many chieftains whom they had probably known claiming the same title (Josephus, Ant. xvii., 10, 8), strangely unlike the "notable prisoner" for whom they had not hesitated, it would seem, to incur the risk of bloodshed. But over one of them there came a change. The darkness which, at noon, was beginning to steal over the sky awed him, and the divine patience and silence and meekness of the sufferer touched him. He looked back upon his past life, and saw an infinite evil. He looked to the man dying on the other cross, and felt for him, and saw his dying passion. There, indeed, was one unlike all other "kings of the Jews" whom the robber had ever known. Such a one must be all that he had claimed to be. To be forgotten by that King seems to him now the most terrible of all punishments; to take part in the triumph of his return would be a bliss and peace of all his hopes. When his prayer was answered, not in the letter, but in the spirit. To him alone, of all the myriad who had listened to him, did the Lord speak of Paradise (q. v.), waking with that word the thoughts of a purer past and the hopes of an immediate rest. But its joy was to be more than that of fair groves and pleasant streams. "Thou shalt be with me." He should be remembered there.

We cannot marvel that a history of such wonderful interest should at all times have fixed itself on men's minds, and led them to speculate and ask questions which we have no data to answer. The simplest and truest way of looking at it has been that of those who, from the great Alexandrian thinker (Origen, in Rom. iii) to the writer of the most popular hymn of our own times, have seen in the "dying thief" the first great typical instance that "a man is justified by faith without the deeds of the law." Even those whose thoughts were less spiritual have seen in it an allusion to the case of other like cases the baptism of blood supplied the place of the outward sign of regeneration (Hilar. De Trinit. c. x; Jerome, Ep. xiii). The logical speculations of the Pelagian controversy overlouded, in this as in other instances, the clear judgment of Augustine. Maintaining the absolute necessity of baptism to salvation, he
THIEVES

THIGH

had to discuss the question whether the penitent thief had been baptized or not, and he oscillates, with melancholy indecision, between the two answers. At times he is disposed to interpret the solution which had satisfied others. Then again he ventures on the conjecture that the water which sprang forth from the pierced side had sprinkled him, and so had been a sufficient baptism. Finally, yielding to the inexorable logic of a sacramental theory, he rests in the assumption that he probably had been baptized before, either in his prison or before he entered on his robber-life (August. De Anima, i, 11; iii, 12; Serm. de Temp. 180; Retrat. i, 26; iii, 18, 55).

Other conjectures turn more on the circumstances of the event. M. Touchard again echoes the mark, and finds in the Lord's words to him, dropping all mention of the Messianic kingdom, an indication that the penitent thief was a Gentile, the impenitent a Jew, and that thus the scene on Calvary was typical of the position of the two churches (Gnomon N. T. in Luke xxiii.). Stier (Words of the Lord Jesus, ad loc.) reads in the words of reproof (σελεραίμα ἅπαν τὸν θέατον) the language of one who had all along listened with grief and horror to the revilings of the multitude, the burst of an indignation previously suppressed. The Apocalyptic gospels, as usual, do their best to lower the dignity of the thief. Thus Stier (ibid.) and others boast the repentant robber into the unseen world. He is the first to enter Paradise of all mankind. Adam and Seth and the patriarchs find him already there bearing his cross. Michael the archangel had led him to the gate, and the fiery sword had turned aside to let him pass (Eveg. Nccl. ii, 18). Names were given to the two robbers. Dennes or Dismas was the penitent thief, hanging on the right, Gestas the impenitent on the left (ibid. i, 10; Narrat. Joseph. c. 3). The cry of entreaty is expanded into a long, wordy prayer (Narrat. Joseph. loc. cit.), and the promise suffers the same treatment. Thus Touchard dignifies the Traythyn's prayer that of the crucifixion. The holy family, on their flight to Egypt, come upon a band of robbers. One of them, Titus (the names are different here), has compassion, purchases the silence of his companion Damaclus, and the infant Christ prophesies that after thirty years Titus shall be crucified with him, and shall go before him into Paradise (Eveg. Infant, c. 52). As in other instances [see MAGI], so in this, the fancy of inventors seems to have been fertile in names. Bede (Collect. Mart.) gives Matha and Joca as those which prevailed in his time. The name given in the Gospel of N. T. to the band of robbers is Dissenus. St. Dennes or Dismas takes his place in the hagiology of the Syrian, the Greek, and the Latin Church. — Smith. It has been assumed that the penitent thief had been very wicked; that he continued so till he was nailed to the cross; that he joined the other malefactor in insulting the Saviour; and that then, by a miracle of grace, he was transformed into a penitent Christian; so Origen (Hom. 35 in Mtt.), Chrysostom (Hom. 88 in Matt.), and others (comp. Suicer, s. v. Aptrajt). But this view of the case seems to involve some misconception of the facts, which it may not be inexpedient to indicate. Whitby says, "Almost all interpreters that I have read were say that this thief began his repentance on the cross." With regard to his moral character, he is indeed styled by the evangelist one of the "malefactors (κακοοιγροι) who were led with Jesus to be put to death" (Luke xxiii, 32); but the word is evidently δισεραίμα, i.e. malefactors and robbers. The words "a robber" (Mark xv, 27) taken as robbers; but this word denotes not only robbers, etc., but also brigands, rebels, or any who carry on unauthorized hostilities, insurgents (Thucyd. iv, 55). Insurrection was a crime, but it was a civil crime, a person might have committed who had genuine quality, who had maintained a respectable character. Again, this man's punishment was crucifixion, which was not in use among the Jews, but was inflicted by the Romans, as we have seen, not on mere thieves, but rebels. Barabba was one of these, and though he "lay bound with them that had made insurrection with him, who had committed adultery," Mark (xxv, 27) has the same word, ἄρτρα, "robber," which is applied to him by John (xviii, 40). It is most probable that these "malefactors" were two of his companions. Our Lord was condemned under the same charge of insurrection (Luke xxiii, 2), and the man whose case is not so stated was probably an insurrectionary sufferer. "Thou art under the same sentence," Εν ρα ταύτα ἑνταύτη, and admits that they both were guilty of the charge, while our Lord was innocent of it (ver. 40, 41). It is impossible, then, to determine the degree of his guilt. Supposing what provocations he had received under the despotic and arbitrary rule of a Roman governor such as Pilate, how far he had been active, or only mixed up with the sedition, etc. The notion that he was suddenly and instantaneously converted on the cross is ground entirely upon the general statement of Matthew, which says, "the thieves also which were crucified with him cast the same in his teeth" (xxvii, 44); whereas Luke, in his relation of the incident, is more exact. Instances of Matthew's style of speaking, which is called amplification, abound in the gospels, and in all writers. Thus, "the soldiers brought him his liquor in a sponge" (Luke xxiii, 49); whereas Mark tells us they did so (Matt. xxvii, 48; Mark xv, 36). "The disciples had indignation" (Matt. xxvi, 8), "some of them" (Mark iv, 4), "one of them" (John xii, 4). So in Mark xvi, 5; Matt. xxviii, 2, there is mention of one angel only: but in Luke xxiv, 4; John xx, 12, there is mention of two. This is substantially the explanation given by Cyprian (De Passione Domini), Augustine (De Com. Evang. iii, 16), and others, which assumes a synecdoche or syllepsis or entailage. The captions objections to the narrative of Luke as inconsistent with that of Matthew and Mark, and the inference drawn from them that both are more or less contradictory, is a forepuerile (Strauss, Leben Jesu, ii, 519; Ewald, Christi, in Gesch. v, 438). It is far from certain that either faith or repentance of this "thief" was the fruit of this particular season. He must have known something of the Saviour, otherwise he could not have said olliv drarov ἀφέξας, "he hath done nothing amiss." He may have been acquainted with the miracles and preaching of Jesus before he was cast into prison; he may have even conversed with him there. He was convinced of our Lord's Messiahship, "Lord, remember me when thou comest into thy kingdom." His crime seems to have been of a very capital nature, and he might have been both a sincere believer, and, with this one exception, a practical follower of Christ. Köcher (sp. Bloomfield, Recen. Synop.) tells us that it is a very ancient tradition that the thief was not converted at the cross, but was previously imbued with a knowledge of the Gospel. See Ruiniol, Macknight, etc.; and the monographs cited by Volbeding, Index Programmatum, p. 68; Hase, Leben Jesu, p. 212.

Thigh (γυνή, γαρέκ; Sept. μαρέκα; Vulg. femur), properly the part of the body from the legs to the trunk, of men, quadrupeds, etc. (Gen. xxii, 25, 31, 32; Judg. iii, 16, 21; Psal. xl, 8; Cant. iii, 8), occurs in several phrases of special significance in the Bible. 1. Putting the hand under the thigh appears to have been a rough, rude, and contemptuous manner of oath to any one. Abraham required this of the oldest servant of his house, when he made him swear that he would not take a wife for Isaac of the daughters of the Canaanites (Gen. xxiv, 2-9). Jacob required it of his son Joseph, when he bound him by oath not to bury him in Egypt, his father in the land of Canaan (Gen. xxvi, 29-31). The custom of taking an oath under this ceremony in taking an oath are very doubtful. Aven-Ekra says, "It appears to me that it was the cus-
tom in that age for a servant to place his hand on his master's thigh, at the command of the latter, to show that he considered himself subject to, and undertook, his master's bidding; and such is present the custom in certain cases of circumcision was the badge and type upon the thigh (comp. Judg. iii, 16, 21; Psal. xlv, 3; Cant. iii, 8), this custom was as much as to say, If I falsify, kill me. Not a few commentators, ancient and modern, explain it of laying the hand on or near the actio circumcisinorum, to protest that such solemn covenant of God was not written upon the thigh (comp. Jer. xxxi, 30; Song, p. 110). Cocecius, Buxtorf, Mercerus, and Junius all adopt this explanation. In Rev. xix, 16 is said is the Word of God (ver. 13) hath on his forehead and on his thigh a name written, King of kings and Lord of lords. Schleiermacher, on the other hand, says we were not written upon the thigh, but upon the sword. Montfauccon gives an account of several images of warriors having inscriptions on the thigh (Antiquités Épigraphiques, III, ii, 265, 269; Gruter, iii, 1489; and Zornii Opuscula S. S. ii, 759).

Thilo, Johann Karl, a theologian of Halle, was born at Langensalza, in Thuringia, Nov. 28, 1794. While a student he began to distinguish himself by superior philological attainments. He completed his studies at Leipsic and Halle, and in 1817 obtained the post of collaborator in the Latin school of the Orphanage at Halle, and subsequently that of teacher in the Royal Pedagogium. He remained in the latter station five years, but joined to its duties those of theological tutor in the university, where he began to deliver lectures on exegetical and patristical subjects in 1819. In 1820 he visited Paris and Oxford in the company of Gesenius, and on his return assisted Knapp, who afterwards became his father-in-law, in the conduct of the Theological Seminary. In 1822 he was made extraordinary, and in 1825 ordinary, professor of theology. In 1833 he received the title of consistorial councillor, and in 1840 the badge of the Order of the Red Eagle. He was a member of the Order of Freemasons, an honorary member of Francke's institutes. The lectures of Thilo extended into the fields of the history of dogmatics and of the Church, and into symbols and patristics. They were characterized by thoroughness of treatment and fulness of detail as well as simplicity of style; and they came in time to be recognized as the best and most valuable in the university. The progress of his researches led him from the study of classical antiquity and the Greek philosophies to the antiquity of the Church, the Neo-Platonists, and the Greek fathers. He was also led to give attention to the almost extinguished field of the New-Test. Apocrypha. In 1823 he published Acta St. Thomas Apostoli, etc. The fruit of subsequent labors was accidentally lost in 1829, so that the appearance of the first volume of his Codex Apocryphus N. T., etc., was delayed until 1832. This volume, containing the Apocryphal gospels, proved the greatest literary production of his life. His physical health was completely broken, and he labored only partially executed. In 1838 appeared Acta Apostol. Petri et Pauli, etc. ; in 1846, Acta Apostol. Andrea et Matthie, etc.; and in 1847, Fragm. Actum St. Ioannis, etc., Thilo also furnished a contribution to the literature of the Old and New Test., in the manner written for Knapp's jubilee in 1829, Specimen Exercit. Criticorum in Stat. Salomonis (Halle, 1829). Various dissertations display his acquaintance with the Neo-Platonic and the Church writers who followed in their steps; e. g. De Uno Erregro Commentationes III (1839 sqq.) ; -- Euseb. Alexander. Oratio non apoqyphorum premiaci de Magia et Stalia Questione (1834) ; -- Comment. in Syn. Hymn. II (1842 sqq.). He was long employed on a complete edition of the hymns of Synesius, but did not finish the undertaking. This was also the case with his last important work, the Bibliotheca Patrum Graec. Dogmat. I., a single volume, containing St. Chrysostom. Dogmat. Selecta, the text of Montfaucun, being the extent to which it was published. Thilo was simply a student and an inquirer. He connected himself with none of the theological parties in the Church, because he saw much to approve and something to condemn in them all. He was, in any sense, unable to regard his own mind as fully formed. He gave himself simply to the work of inquiry, and became, in consequence, one of the most widely and accurately learned men of the modern Church within the field of his own chosen labors. He was, withal, a devout lover of the Bible, a most general reader in the friendly circle, and a profoundly inspired observer of all impor-

THIRTY YEARS' WAR

Tant events. He died May 17, 1853. Dryander's discourse delivered at the funeral of Thilo was published at Halle in 1853; and a brief characterization of Thilo was given by Meier in the Halleischer Sektionskatalog (1858-54); and another in Convers.-Lexikon d. Gelehrten (1856). See Herzog, Real-Encyklop. s.v. Thilo.

Thilo, Wilhelm, a German teacher, was born in the year 1802, and died Feb. 17, 1870, at Berlin. For a number of years he stood at the head of the Berlin seminary for the education of teachers, and published, Spener als Kutscher (Berlin, 1840):—Das geistliche Lied in der evangel. Volksschule Deutschland (ibid., 1842; 2d ed. 1855);—Ludwig August Helmbold nach Dietze (2d ed. 1856);—Ludmilla Elisabeth Gräfin von Schwarsz-Rudolstadt. Ein Beitrag zur Geschichte der geistl. Dichtung im 17. Jahrhundert (ibid. 1855);—Melachthon im Dienste an heiliger Schrift (ibid. 1860);—Preussischs Volksschulleven nach Geschichte und Statistik (ibid. 1867). See Zuchold, Bibl. Theol., ii, 1892; Literarischer Handzettel für das kathol. Deutschland, 1868, p. 66; 1870, p. 486. (F. P.)

Thim' natha (Job. xix. 43). See TIMNAH.

Thionville, COUNCIL OF (Concilia apud Theodosius-villam). Thionville, now known as Dieckenhofen, is a town of Germany, in Lorraine, situated on the Moselle; and has belonged in succession to the counties of Luxembourg, the principality of the Palatinate, the Electorate of Austria, Spain, and France. It was ceded by the peace of May 10, 1871, to Germany. This town has been the seat of three councils.

I. Held in 822; thirty-two bishops being present, among whom were Aistuphus of Mayence and Ebbio of Rheims. Four or five articles were drawn up in defence of ecclesiastical persons and property. See Mansi, Concil. viii, 1519.

II. Held in February, 885; more than forty bishops being present. All the proceedings against Louis le Débonnaire were declared to be null and void, and he was conducted to the cathedral church of Metz, and solemnly restored to his rights and privileges. This done, the prelates returned to Thionville, where Agobard of Lyons and Bernard of Vienne, who were absent, were solemnly deposed, together with Ebbio of Rheims, who, being present, himself consented to the sentence, and renounced the episcopate. See Mansi, vii, 1065.

III. Held in October, 844, in a place called at present “Just” (Judicium); Drogon, bishop of Metz, presided. In this council Lothaire, Louis and Charles promised to observe brotherly concord among themselves. Six articles were drawn up, which the princes promised to observe. They are exulted, among other things, to live in unity and peace; to forbear from violence; to visit each other; to aid each other, with the exception of that of perpetual chastity; have directors and superiors, yet live in the world, marry, and carry on business. Their only distinguishing mark is a scapulary and leather girtle, but these are often worn by their ordinary dress.

Third Orders is the name given by Roman Catholices to persons who desire to live a religious life in their homes, and yet have connection with some regular order. The first mention of such persons is in 1199, in connection with the Augustines, though this order claims that it was established much earlier. There are third orders of nearly all the principal orders, as of Dominicans, Minims, Carmelites, Trinitarians, etc. Their members take the vow of allegiance to the rules of the order, with the exception of that of perpetual chastity; have directors and superiors, yet live in the world, marry, and carry on business. Their only distinguishing mark is a scapulary and leather girtle, but these are often worn by their ordinary dress.

Thirds, a peculiar arrangement, under Mary queen of Scots, for the support of the Protestant clergy. “The barons,” says Knox, “perceiving that the Book of Discipline was refused, presented to the nobility certain articles, requiring idolatry to be suppressed, the Kirk to be planted with true ministers, and some certain provision to be made for them, according to equity and com

science. . . And so devised they that the kirkmen” (the former clergy) “should have no intimation with the two parts of their benefices” (that is, with two thirds), “and that the third part should be lifted up by such men as thereto should be appointed, for such uses as in the time of the Free Church of Scotland it was.” It was that two thirds of the benefices were retained by the popish clergy, and the remaining third handed to a collector for the queen. The ministers and superintendents were to have a sum modified for their support, and the surplus was to become a part of the revenue of the crown. Thus very little was left for the ministers of the Kirk.

Thirlwall, ConnoP, D.D., an English clergyman and historian, was born at Stepney, Middlesex, Feb. 11, 1737. His precocity was so great that his father published for him, at the age of eleven, a volume of his compositions, Principe, or Essays and Poems on Various Subjects (1809). He took the Craven and Bell scholarships at Trinity College, Cambridge, 1815; graduated as senior chancellor’s medallist, 1818; became tutor and fellow; and was called to the bar in 1825. In 1828 he entered the Church, and became rector of Kirby-under-Dale, Yorkshire. For several years he was examiner for the classical triposes at Cambridge, classical examiner in the University of Oxford, and visitor to the University of Lampeter. He was created bishop of St. David’s in 1840, which office he resigned in June, 1874. He died July 27, 1875. He published a number of sermons, charges, letters, addresses, and essays, which, with other writings, were issued under the title of Literary and Theological Remains, edited by canon Perowne (Long. 1875-6, 3 vols.).

Thir't (τίς, ἔτος) is a painful natural sensation occasioned by the absence of moistening liquids from the stomac. As this sensation is accompanied by vehement desire, the term is sometimes used in Scripture, in a moral sense, for a mental desire, as in Jer. ii, 25, “Withhold thy breath from thirst; but thou saidst, I loved strangers, and after them will I go;” in other words, “I desire the commission of sin—I thirst for criminal indulgence.” Matt. v, 6, “Blessed are they who hunger and thirst after righteousness.” Psa. xlii, 2, “My soul thirsteth for God.” The same figure is employed in the discourse of our Lord with the woman of Samaria, “Whosoever drinketh of the water which I shall give him shall never thirst,” an allusion which the woman mistook as if intended of natural water, drawn from some spring possessing peculiar properties (John iii, 14). See HUNGER.

Thirty-nine Articles. See ARTICLES, THE Thirty-nine.

Thirty Years' War, The, a German political and religious conflict, was not properly one war, but rather an uninterrupted succession of wars (1618-48), in Germany. Austria, most of the Catholic princes of Germany, and Spain were engaged on one side throughout, but against different antagonists.

I. Cause of the War.—For the influences which led to this struggle we must look back to the 16th century, when Germany was divided into two parties by the Reformation. Under Maurice of Saxony, Protestantism became triumphant, and by the Peace of Augsburg (1555) each State was allowed to prescribe the form of worship best conformed to the views of its inhabitants. This article was by which all prelates who should thereafter abjure Catholicism were to forfeit their benefices. Another matter of dispute was the desire to secure for Protestants the right of worship in Catholic states. The Catholic refused to admit such an article, and all that could be
THIRTY YEARS' WAR

THISBE

363

Frederick V entered Munich. Wallenstein was recalled, and, after a few months' waiting, the battle of Lützen was fought, Nov. 16, 1632, in which Gustavus fell, but Wallenstein was defeated. The death of Gustavus Adolphus was a severe blow to the Protestants, though the genius and indefatigable zeal of his chancellor, Oxenstierna, and the tenacity with which the Swedes and Danes, with all their means, persevered, preserved the advantages they had gained, till the crushing defeat of Bernard of Weimar at Nordlingen, Sept. 6, 1634, restored to the emperor a preponderating influence in Germany. Saxony now made peace at Prague, May 30, 1635, obtaining such satisfactory terms for its liberation as to reconcile it to the emperor. The Saxons within three months, adhered to by all the princes of that sect. The Calvinists were left to their fate. Sweden, however, resolved to continue the struggle, and Oxenstierna professed his readiness to give him the direction of the war. Baner led the Swedes into Germany, and won the great battle of the Thirty Years' War, Nov. 24, 1634. The Emperor, on his death, in 1641, he was succeeded by Torstensen, who made the Swedish arms a terror throughout Germany. Conde and Turenne led the French to victory over the leaguers on the Rhine, until at last the emperor was defeated by all his allies except the duke of Bavaria, whose territories were secured mainly by the efforts of Turenne and Wrangel. Preliminaries had been arranged for negotiations as early as 1641, but it was not until Oct. 4, 1648, that the Peace of Westphalia was concluded at Münster.

5. Battles of the Thirty Years' War.—These, ecclesiastically considered, were the most decisive victories of the Thirty Years' War (Lond. 1665); Banke, Geschichte Wallensteinis (Leips. 1869); Stieve, Ueberzug der dreissigjährigen Kriege (Munich, 1875), vol. 1; and similar sketches by Menzel (Breisgau, 1835-89, 3 vols.), Flathe (1840), Mèboul (1840), Barthold (1842), Hildanus (1855), Klupp (1861), Hauser (1862), Gindely (Prague, 1869), Gardner (Lond. 1874).

Thisbe (θισβή v. θισβή), a name found only in Tob. i, 2, as that of a city of Naphtali from which Tobit's ancestor had been carried captive by the Assyrians. The real interest of the name resides in the fact that it is maintained by some interpreters (Hiller, *Onom.,* p. 236, 947; Reland, *Palest.* p. 1008) to be the place which had the glory of giving birth to Tobit (q. v.). This, however, is, at the best, very questionable, and derives its main support from the fact that the word employed in 1 Kings xxvii, 1 to denote the relation of Elija to Gilgal, if pointed as it now stands in the received Hebrew text, signifies that he was not a native of Gilgal, but a visitor there, and one who had originated from a different and foreign district. But it is also possible to point the word so that the sentence shall mean "from Tishbi of Gilgal," in which case all relation between the great prophet and Thise of Naphtali at once falls to the ground. There is, however, a truly singular word in the text of the Septuagint, a glance at which (on the following page) will show how hazardous it is to base any definite topographical conclusions upon it.

Assuming that Thise, and not Thise, is the correct reading of the name, it has been conjectured (apparently for the first time by Keil, *Comm. über die Könige,* p. 247) that it originated in an erroneous rendering of the Hebrew word תישב, which word, in fact, occurs in the

* t. e. probably Hazor.

Hebrew version of the passage, and may be pointed in two ways, so as to mean either "from the inhabitants of," or "from Tishbi," i.e., Thibis. The reverse suggestion, in respect of the same word in 1 Kings xvii, i, has also been made. See Tishbite. But this, though very ingenious, and quite within the bounds of possibility, is at present a mere conjecture, since none of the texts support it, and there is no other evidence in its favor.

No name resembling Thibis or Thibis has been yet encountered in the neighborhood of Kedes or Safed, but it seems impossible to suppose that the minute definition of the Latin and Revised Greek texts—equaled in the sacred books only by the well-known description of the position of Shiloah in Judg. xxvi, 19—can be mere invention.

Thistle is the rendering, in the A. V., of two Heb. and one Gr. word: 1. נָגָר, darrār, any thorny plant, especially of the weed-like sort; always collectively in parallelism with נֶפֶר, kōtet, "thorn" (Gen. iii, 18; Hos. x, 8); 2. נֹגַר, chōdakh, a stronger or hook-like thorny bush (2 Kings xiv, 9; 2 Chron. xxxv, 18; Job xxxi, 40; elsewhere "thorn," etc.); 3. ἄχθων, a three-pronged thorn, the caltrop (Matt. vii, 16; "brier," Heb. vi, 8). The tendency of all vegetation in Palestine to run into spines, noticeable in the most weeds as well as trees, is a subject of remark to all travellers (see Hackett, Illustr. of Scripture, p. 126). The thistle (a common name for various genera, especially Carduus cirsium, etc.) grows abundantly in many countries, and is a small plant; but in the warm air of Palestine, and in rich soils like the plain of Esdraelon, the large and luxuriant thistle will overtop the mounted horseman. On the road from Jerusalem to Rama, Hasselquist (Travels, p. 280) found six different sorts; and in the south of Judæa, in the course of one afternoon, Messrs. McConomy and Bonar counted ten or eleven species. Miss Beaufort speaks of giant thistles of the height of a man on horseback which he saw near the sea of Galilee, while the F톨ock (Egyptian Srp. and Syrian Shirness, ii, 45, 50). “The most common species of this weed in Palestine are, Notothasa Syرتarica, a tall flowering thistle with powerful spines; Scelismus malacatus, a very noxious plant, with a bright orange color; and Carthamus coruscans, another yellow-flowering thistle, whose formidable spines irritate irritating wounds, like the sting of a poisonous insect” (Tristram, Nat. Hist. of the Bible, p. 424 sq.). See Thorn.

Thiven, Synod of, was held by Nieres, the first bishop, or catholicus, of the Armenian Church, in A.D. 536. It was called through the influence of the Persian ruler Chosroes, who desired the separation of the Christian subjects from the Christians of the Roman empire. At the synod the Monophysite system was confirmed, and the anathema pronounced on the Chalcedonian council. See Neander, Hist. of the Church, i, 558.

Tholuck, Friedrich August Gottgutreus, one of the greatest Protestant divines of Germany, was born at Breslau, March 60, 1799, of humble parentage. He continued at school till twelve years of age, when he was set to learn his father's trade, which was that of a goldsmith. It is said that he had till late years a ring which he himself had made. Still he hated the trade so much that he determined to get back to study. He soon found his way to the gymnasium, from which he graduated at the age of eighteen. His diligence was so great that he almost destroyed his sight, so that at times he has been on the verge of blindness. For a while he remained at the University of Breslau, but afterwards went to Berlin. In some way or other a taste for Oriental literature was awakened in him, and he began to study under Prof. Kosegarten (then of Greifswald, but from 1817 till 1824 professor at Jena), who was a great Oriental scholar, the means to carry on such studies. Prelate von Dietz, another distinguished Orientalist, took such an interest in him as to adopt him as his son; and when the Prelate died, Von Altenstein secured for him all needful support. He went soon after to Jena, where he studied under his benefactor, Kosegarten, and graduated as doctor of philosophy. He always looked back upon these Oriental studies with delight, and said on Dec. 1, 1870 (the evening before the fiftieth anniversary of his appointment as professor), in answer to a congratulatory address from Jena, "You may be assured, my friends, that when I look back upon these studies, it is not with feelings like those with which one recollects a forsaken love, but rather with those felt towards one that still inflames and fills my spirit with youthful enthusiasm, and at the same time calls up a grateful remembrance of Prof. Kosegarten of Jena, who so lovingly encouraged and helped me on in the path of these studies." Tholuck's progress in Oriental lore is proved by three works which he published, two of which are learned productions. The first was written in 1821, from Turkish, Persian, and Arabic MSS., and entitled Syræan sive Theosophia Persarum Pantheistica, quam e MSS. Bibliothecae Regiae Berolinensii Persicae, Arabice, Turciæ eruit et illustravit (Berolini, 1821). The second was more popular, and appeared in 1825 with the title An Anthology of the Oriental Mystic Poems, with an Introduction on the Mystics Generally, and the Eastern in Part...
THOLUCK

sicular. The third of these works appeared in 1826, and was one of learning——Speculations of the Later Orientalists respecting the Doctrine of the Trinity.

While at Berlin, the great crisis in his religious life was approaching. The Bible, the church, and the church fathers, in order to understand this, it is necessary carefully to read his work Sin and Redemption, or the True Consecration of a Sceptic. This was published in 1825, and was, in effect, a refutation of De Wette's Theodicy, or the Consecration of a Sceptic. It describes the conversion of two young theologians, Andraus and Guido, who were, without a doubt, Dr. Julius Müller and the writer himself. This work was written in three weeks, and, like many books written off-hand, it has had remarkable success. Still more insight into Tholuck's spiritual life is caught in his address on the evening preceding the jubilee of his brother, Dr. A. Tholuck, in 1826. His remarks were so good that they have been reproduced, for they furnish the key to his extraordinary success in winning souls to Christ:

"Those whom I see around me are not merely my pupils, nor my admirers, but my friends——my friends in Christ, many of them also my children in Christ, whom I have also borne with much pain. My course has been designated a successful life among youth. I have had not merely to work, but to struggle, to plant new life in dead, corrupt, and wayward youthful hearts. But this can only be where the spirit of fire is the beam of a light from God, and I cannot but remind you of my own weakness, with adoring wonder than to think how this spirit of fire has ever been given to me since the hour when I received the Holy Spirit in the house of prayer. Remember, I have often said, that I have not always been able to speak so freely of the acquisition of knowledge as this was the end. Just then God brought me into contact with a venerable saint who lived in fellowship with Christ, and from that time I have had but one passion, and that is Christ, and Christ alone. Every one of Christ I took upon as a fortress which I must conquer and win. And it was on my eighteenth year when the Lord gave me my first convert. He was an artillery-officer, a Jew, a wild creature, without rest; but soon he became a follower of Christ. And the next year I met the same shame. And when I look back upon the thousands of souls, brothers and sisters who have been won for the Lord, I can only say the Lord hath done it. In working thus to save souls, my life has been one of joy rather than toil. Among the students were many frivolous, careless ones. I just now remember one whom a mother laid on my heart, but who soon fell among companions who led him astray, so that he could be found at home only at six in the morning. More than once I visited him at that hour, and also in prison, but all seemed in vain, till one day I met him. I said, 'Tholuck, what shall I tell? He should have hard work it is not that we have one in league with us. You are in a position, and I am a little one, and while we are preachers, "Well, the preacher is right."' The next evening I received a letter from him, in which he wrote, 'Tholuck, I am now saved. I am a Christian, and the Jew is not in vain, for he is now a noted preacher of the Gospel of Christ. And what a number of those who were once my pupils, seeing the truth, have taken up and made Christ mine. "I have but one passion, and that is Christ, and Christ alone."'

Happy the veteran saint and scholar who could, in a green old age, look back upon such labors! He had all the more confidence in the power of Christianity from having felt it in his own heart. When he left the gymnasium to enter the university, his oration was on The Superiority of Mohammedanism over Christianity. He was especially prejudiced against experimental Christianity, which was then called Pietism and Mysticism. He thought it checked all vigor of action and freedom of thought, and impressed on every countenance the pale hue of death, and that all who adopted it must turn their view from the boundless magnificence of the stary heavens and dwell in the damp and gloom of a catacomb. Neander exerted a great influence on him in this matter, but it was Küttwitz who was the instrument of his conversion, as well as of his friends Ohlhausen, Julius Müller, and Richard Rothe.

On Dec. 2, 1829, Tholuck passed his examination as licentiate of theology at the Berlin University. This was a daring step, for he then suffered from a complaint which, according to three physicians whom he consulted at the request of Von Kottwitz, was to end in speedy death. But a young physician, without curing him, removed the imminent danger, and he could go on in his work. A few months after the consideration of the possibility of the Prussian government, he went to England in 1825, and spent nearly a year there in travels undertaken for the purpose of prosecuting scientific researches. On his return to Berlin in 1826, he was called to fill the chair of ordinary theology at Halle, made vacant by the death of Dr. F. P. Wiedemann, in 1825. His nomination to the position of extraordinary professor of theology at Berlin, so deeply was he imbued with the spirit and interested in the prosecution of the work of Francke at Halle that the daily longing of his heart was that he might be transferred to the university founded by him. "Every day I have been pleased to call me to that place where, a hundred years before, August H. Francke had built his Orphan Asylum, and had, by his addresses both from the pulpit and from the chair, gathered a faithful community, teaching that the first stage on the way to the true knowledge of God and the knowledge of life, was to know the Saviour, the molder of Francke fell upon him, and, by a remarkable coincidence of Providence, after laboring as his successor for more than fifty years, his burial took place within one day of the 150th anniversary of the burial of Francke, and the passage selected as the text of the prayer at the funeral appropriately served the same purpose at the funeral of Tholuck——"Lord, it is done as thou hast commanded," from the Gospel for the Sunday (June 10) on which Tholuck died.

The state of things which he found when he went to Halle in 1826 is described by himself as follows:

"It is universally known how a dead orthodoxity had, throughout the land, cut off the life of the great cities, had severed the connection between the German churches and universities. ... Almost throughout the breadth of the country the tendency to 'rationalism,' as it was called, was the beginning of the decay of the church. The century, more than a quarter, that had been voluntary, had taken an uncontested possession of the pulpits and academical chairs. ... At Halle there had been but one single man (Prof. Knapp) who, feebly indeed, and secretly enough, dared to resist all-powerful Rationalism. Out of nine hundred students he found one who, being revived by the aid of a Christian craftsman, believed in the divinity of Christ. They were called 'idiotic orthodox,' they were the few, the little ones, faint-hearted, weak, and not gifted, and over against them the great multitude of the gifted, active, and assiduous students. The body of professors, college and academic teachers, in agreement with the whole mass of the students, had sent a petition to the minister of state for ecclesiastical affairs against my appointment. ..."

Such was the state of Germany, its Established Church, and its institutions when Tholuck was called to Halle. Hegel, who, as a philosophical lecturer, has unhinged Christian principles in the religious atmosphere of Berlin, urged Tholuck, in his parting words, that he should "deal a death-blow to the bald rationalism prevalent at Halle." This was no easy task, considering that Gesenius and Wegscheider had such wonderful influence there.

Tholuck's position was, therefore, at first exceedingly difficult in this reign of rationalism. He was scouted, hated, and ridiculed as a pietist, mystic, fanatic, Pharisee, etc.; but he persevered, and God most richly blessed his labors. A radical revolution has been wrought in Halle, so far as theological excursions are concerned. L. Witte, one of his pupils, who represented him at the Evangelical Alliance, in 1873, at New York, and read the paper he had prepared on Evangelical Theology in Germany, says,

"We know that, in a great measure, the wholesome change from rationalism to faith which has been granted to our native country within the last fifty years is, next to God's grace, owing to the restless zeal of this 'miles Christi,' as he likes to call himself, without of any reproach. In dark and dreary days he has gallantly borne disgrace for Christ's sake. He, a single man, has won the field in the University of Halle; and all his colleagues, one
by one, have been forced to yield to his superiority of Christ. In so doing, he knew that he planted thousands upon thousands to call him their spiritual father, their father in Christ."

Tholuck verified the prophetic words of Prof. Hegel, drew the sword of the Spirit, and gave bald rationalism its death-blow in the University of Halle. It was only with the threat of the government and its Pfuner that Tholuck, in 1840 that Tholuck's influence assumed great dimensions. Frederick William IV and the minister of worship, Eichhorn, looked upon his theology as one which avoided all extremes and yet held the faith firmly. They considered it the only justifiable form. When vacancies came up, they appeared in the will and testament as a means of securing his advice was always valued, whether it had been formally asked or voluntarily proposed. Under the minister Von Raumer, his influence rather declined; but under the succeeding minister, Von Muthler, it acquired its old power and dimensions, and many of the appointments of that time were suggested by him. His earnest labor for personal and experimental religion caused him to view with mildness smaller departures from ecclesiastical orthodoxy. Divine truth was in his eyes too sublime to be sharply and exactly defined in formula. In his True Consecration of the Eucharist, he expressed a strong desire to express the personality of God if the self-consciousness and existence of the Divine Being are admitted. Sternly to insist upon creeds seemed to him a departure from the faith. In his sermon he despised all rhetoric and display of learning. The words were nervous, flashed into the heart like lightning. And then his life, so warm and tender and loving, made him a universal favorite with his students. It is no wonder that he exerted an almost fascinating influence over them. Indeed, he looked upon personal effort among students as his peculiar calling. Every year, he spent two hours, a moderate amount, with three or two with him, with whom he engaged in pleasant but earnest conversation. This gave him, after a time, such an extensive psychological knowledge that he could easily find an entrance to the hearts of those whom he would save. Tholuck said himself, in the address which he delivered at his jubilee,

"Not without reason has it been said that I would rather have candidates for the ministry than with pastors, and rather with students than with candidates. Not without cause have they called me a preachers' professor, and even pastoral professors, as opposed to a book professor, who everywhere had a home with students, and nowhere elsewhere. I have had in my life in many a sporting shout, and, as it were, their flowerbuds as they unfolded petal after petal, and in the full-development of all its beauty, I had the pleasure, in a different perfume and color. Yes, that is a blessed delight! and he who has once found his love and his pleasure is lost to this world, and he who has given the gift of being a professor, will no longer find the life of a professor to be labor, but rather joy and pleasure. And thus have I spent my life, and up to the present day my life as a professor has not been my work, but rather my joy and my delight."

"At the same time, the life of a professor is not all pleasure and enjoyment. If upon every word an echo would resound in the awakened heart; if upon every warning spiritual breath green shoots would spring up; if on every bestowal of a gift there would follow its reception—then it would be nothing but enjoyment. But this it does not have to happen, for there are also the silent, the dull, and the slow ones, whom one can call again and again, but no echo resounds; where one can thrust in the spade day after day before anything is heard resounding under the earth. And to be surrounded by such, that was my lot in the teaching."

"I have seen the secrets of many hundred young men disclosed to me; I have seen them wander far, far from the path of a Christian life. I have sought them, and by this means, I have had the pleasure to know that many a one perceived it who now enjoys this pleasure once only and now."

"This, then, is the life of a student professor: he has not only easy, joy- and pleasure-bringing work, but also a heavy one, which seeks its day of rest. He has the precious task when such young men are found that sit at the feet of Christ, who have been awakened from their slumber, or who have returned from their erring ways! Wherever giving is also receiving, that is a work which affords a higher enjoyment than all others that are more easily performed.

With such a love for students, Dr. Tholuck became a very popular professor, and students flocked to Halle from all parts of the world. His thorough knowledge of the English language made him a great favorite with American students, large numbers of whom sat at his feet. Among the most distinguished of these we may mention Drs. Hodge, Addison, Alexander, Prentiss, H. B. Smith, Park, and others. The partiality manifested for Tholuck by American students was reciprocated by him. He regarded them with more than ordinary interest, and was in the habit of calling a number of those named his "special pets."

Besides the English, he was a master of a great many languages, and was only surpassed by cardinal Mezmoïant, who was also known for his linguistic dialects. He was also gifted with poetic genius and had acquired an immense store of varied learning. He was not only a master in theology, but profoundly versed in philosophy, philosophy, history, and poetry; in ancient and modern, Oriental and Occidental, heathen, Jewish, Mohammedan, and Christian literature. He was a voluminous writer. He commenced his literary labors as an author in 1821, and, besides the works already named, he wrote Commentaries on the Epistle to the Romans, the Hebrews, the Psalms, the Gospel of John:—a philosophico-theological exposition on The Sermon on the Mount:—The Creed:—The Christian Character History (an antidote to Strauss's Life of Christ) —The Spirit of the Lutheran Theologians of Wittenberg in the 17th Century:—And The Academic Life of the 17th Century. In the last two productions he gives, mostly from MS. sources, a very interesting and graphic, but by no means favorable, picture of the palmy days of orthodox Lutheranism, for the instruction and warning of those contemporaries who would so zealously revive it as the best state of the Church, without considering that it was followed by the terrible apostasy of Rationalism. These works were forerunners of an extensive history of Reformation, Rationalism, and the Houtermans, the former writer, with several volumes of Sermons, as well as numerous articles published in the theological journals of Germany. He also issued his miscellaneous writings in two volumes, and republished The True Consecration of the Eucharist (1828), under the changed title of The Doctrine of Sin and the Propitiator, in 1851. Most of his writings have been translated into the more widely spoken modern languages of Europe.

Dr. Tholuck was also an able and popular preacher. He breathed and exhibited the spirit of evangelical piety in all the circles in which he moved—domestic, social, and political. He was a man of high moral tone and bland in his manners, social in his disposition, and kindly affectioned towards all men. He did not eschew pleasantness, but gave it its due place in conversation, and thus furnished the matter for many relatable anecdotes. He accepted the Prussian Union as consistent with the catholicity of Christianity, as well as with the doctrines of the Lutheran Church as set forth in her catholic symbol, the Augustana, and hence never allied himself with the separatistic Lutherans in their attempt to revive and perpetuate the symbolic dogmatism of the Lutheran theologians of the 17th century. In spite of his frail physical constitution, he was permitted to celebrate his semi-centennial jubilee as a professor Dec. 2, 1870, an occasion which was graced by the presence of a great number of his former pupils from all parts of the world. In responding to one of the addresses presented to him at his semi-centennial jubilee, he referred to the beautiful present that had been bestowed upon him, and the comparatively small number of his days in which he was in the enjoyment of health. The performance of so much unintermittent labor, and the great age which he attained, are attributable to his abstemious habits and systematic exercise of the physical and moral position as approved by his personal piety, and his extraordinary success in doing good and glorifying Christ.

On June 10, 1877, Dr. Tholuck's wife sent the follow-
THOMAS

367

THOMAS

ing telegram to Dr. Schaff, who was then at Stuttgart, announcing his death, together with his last words:

"HALLE, June 10, 1877.

"This day, at 4 o'clock P. M., Dr. August Tholuck, after long suffering, gently entered into that blessed rest for which he had been longing from the days of his youth, the life of this his life, which was often threatened with an early termination, had come to a peaceful close. The cold, deathlike frost which had blighted his face for years, the age of seventy-eight years, two months, and ten days. Under the heavy pressure and painful anxiety of the last year, he had given himself over to the care of the Lord. He died in the presence of God, and was observed in various ways, the growing assurance of his faith and the victory of love in his heart. His last intelligent word, "I am not afraid; Christ died for me!"--Ich fürchte mich nicht!--denn Christus starb für mich!"--spoke volumes, and his death was a fitting prelude to the end. It was a fitting close of a long and useful career which was devoted to Christ. The sum and substance of his theology was that Jesus lived and died for the salvation of sinners. To him as the only Master he led his innumerable pupils. His lecture-room and his pulpit were a school of Christ. Herein lie his significance and fame in the history of German theology and religion. The New York Observer (Aug. 16, 1877) thus announced Tholuck's death to its readers: "The greatest theological light of Germany has just been extinguished;" while the Lutheran Observer (Aug. 8, 1877) winds up an article on Tholuck in the following words:

"Although Tholuck is dead, he nevertheless, like Abel, "speaks on the earth.." He speaks through the recollection of his conversations, exhortations, and sermons; speaks in the notes taken of his lectures; speaks in his articles published in theological reviews; speaks in the printed volumes written with his own hand; speaks through the sentiments, character, and labors of his students who have finished their course; speaks through the faith, writings, and efforts of his students who still live; speaks through the moulding influence exerted upon the University of Halle, and the evangelical leaven infused into the institutions of Europe; speaks through the reformation of church and state; speaks in the great religious activity in the Lutheran and other Protestant churches; yea, speaks in his whole life as a Christian man, as a popular writer, as a learned theologian, as an eloquent preacher; and, over and above all, 'he yet speaketh,' and will continue to speak as the studentenprofessor the time shall be no more.

We have not as yet a complete biography of Dr. Tholuck, who will fill some chapters in the Church history of the 19th century. A sketch was published by Dr. Schaff, in his Germany: its Universities, Theology, and Religion (Philadelphia, 1857), p. 278 sq. Another sketch is given in the Thologisches Universal-Lexikon, s. v. One more is contributed by a friend from England. As to Tholuck's works, it would be useless to try to enumerate them. Zuchold alone (Bibl. Theol. ii, 1832 sq.) gives four pages. His Commentaries have been translated into English, and so have some other of his works. The last of these, so far as we are aware, is Hours of Christian Devotion (Edinburgh, 1870), a work which has repeatedly been edited in Germany. (B. P.)

Thomàs (Θωμᾶς), one of the twelve apostles. A.D. 27-29.

1. His Name.—This is evidently a Greekized form of the Aramaic θωμής, Tômà, which means the twin; and so it is translated in John xi, 16; xx, 24; xxii, 2, σ. Δέκα, which has passed into a name, Dekumus (Q.v.). This name occurs also on Phenician inscriptions in a form which may be made up of the original Aramaic, 𐤊𐤋𐤃𐤊𐤉𐤌, almost exactly our "Tom." The frequency of the name in England is derived not from the apostle, but from St. Thomas of Canterbury. Out of the signification of this name has grown the tradition that he had a twin-sister, Lydia (Pater Apost. p. 272), or that he was the twin brother of the colloquial English abbreviation, viz. THOM and TONY (Genesius, Monumenta, p. 356). In Heb. also (Cant. vii, 4) it is simply Θωμᾶς, thom, almost exactly our "Tom." The frequency of the name in England is derived not from the apostle, but from St. Thomas of Canterbury. Out of the signification of this name has grown the tradition that he had a twin-sister, Lydia (Pater Apost. p. 272), or that he was the twin brother of the colloquial English abbreviation, viz. THOM and TONY (Genesius, Monumenta, p. 356). In Heb. also (Cant. vii, 4) it is simply Θωμᾶς, thom, almost exactly our "Tom." The frequency of the name in England is derived not from the apostle, but from St. Thomas of Canterbury. Out of the signification of this name has grown the tradition that he had a twin-sister, Lydia (Pater Apost. p. 272), or that he was the twin brother of the colloquial English abbreviation, viz. THOM and TONY (Genesius, Monumenta, p. 356). In Heb. also (Cant. vii, 4) it is simply Θωμᾶς, thom, almost exactly our "Tom." The frequency of the name in England is derived not from the apostle, but from St. Thomas of Canterbury. Out of the signification of this name has grown the tradition that he had a twin-sister, Lydia (Pater Apost. p. 272), or that he was the twin brother of the colloquial English abbreviation, viz. THOM and TONY (Genesius, Monumenta, p. 356). In Heb. also (Cant. vii, 4) it is simply Θωμᾶς, thom, almost exactly our "Tom." The frequency of the name in England is derived not from the apostle, but from St. Thomas of Canterbury.
Sêôc to the divine nature. This is too artificial. It is more to the point to observe the exact terms of the sentence, uttered, as it were, in astonishment. "It is, that is, the thing not of the thing," as the Septuagint translates it. "The form of Sêôc proves nothing, as this is used for the vocative. At the same time, it should be observed that the passage is said to Christ, "Thou art the Son of God." The word "myself" given it a personal application to himself. Additional emphasis is given to this declaration from its being the last incident related in the direct narrative of the gospel (before the supplement of ch. xxi), thus corresponding to the opening words of the prologue. Thus Christ was known to Thilo by his name, and by what he had in the beginning of his gospel declared him to be from all eternity; and the words of Thomas at the end of the twelfth chapter do but repeat the truth which John had stated before in his own words at the beginning of the first” (Arnold, St. vi, 401). The answer of our Lord sums up the moral of the whole narrative: “Because ‘Thomas’ (Ωτασ) is omitted in the best MSS. thou hast seen me, thou hast believed: are they that have not seen me, and yet have believed” (xx. 29). By this incident, therefore, Thomas, “the doubting apostle,” is raised at once to the theologian in the original sense of the word. “At Once” says Augustine, “se nobis dubitetur.” Winer and others find in the character of Thomas what they consider contradictory traits, viz., inconsistency and faith: a turn for exacting the most rigorous evidence. We find that a resolute and lively faith is always necessarily combined with a sense of its importance, and with a desire to keep its objects unalloyed and free from error and superstition. Christ himself did not blame Thomas for availing himself of all possible evidence, but only pronounced those blessed who would be open to conviction even if some external form of evidence should not be within their reach (comp. Niemeyer, Akaademische Predigten und Reden, p. 321 sq.). Monographs have been written in Latin on this scene in Thomas's life by Carpoz (Helmsl. 1757), id. (Yim. 1765), Rost (Budzs. 1785), andGame (Norimb. 1618).

In the New Testament the name of Thomas only twice occurs; in the fourth Book of the Acts of the Church of Galilee with seven of the discples, where he is ranked next after Peter (John xxi, 2), and again in the assemblage of the apostles after the Ascension (Acts i, 13).

3. Traditions.—Thomas is said to have been born at Antioch, and (as above stated) to have been twice, in the same year, appointed to the Apostolate (Cotel. p. 272, 512). The earlier traditions, as believed in the 4th century (Origen, ap. Euseb. Hist. Eccles., i, 18; iii, 1; Socrates, Hist. Eccles. Eccles., i, 19), represent him as preaching in Parthia (Clement. Recom. ix, 29) or Persia (as according to Jerome; see also Rufinus, Hist. Eccles. ii, 4), and as finally buried at Edessa (Socrates, Hist. Eccles. i, 18). Chromat. mentions his grave at Edessa as being according to one of the four genuine tombs of apostles, the other three being Peter, Paul, and John (Hom. in Heb. 26). With his burial at Edessa agrees the story of his sending Thaddeus, his brother, and his brother's son, Barnabas, to Christ (Acts i, 13). According to a later tradition, Thomas went to India and suffered martyrdom there (Gregor. Naz. Orat. xxi ad Arian. p. 488, ed. Par.; Ambrose, in Puer. xii, 10; Jerome, Ep. 148 [59] ad Marcell.: Nicc. Hist. Eccles. ii, 40; Acta Thomas, ch. i sq.; Abud. Hist. Eccles. Eccles., ch. Barachis. Thomas. Christiansa [Rom. 179]). This tradition has been attacked by Von Bohlen (Indian. i, 375 sq.). The ancient congregations of Christians in India who belong to the Syrian Church are called Thomas-Christians, and consider the apostle Thomas to be their founder (Fabrici. Biblioth. 17. 4, no. 8; Wisch. Hist. Orient., iii, 435 sq.; Ritter, Erdkunde, ii, 601 sq.) Against this tradition Thilo wrote in his edition of the Acta

THOMAS, p. 107 sqq. (comp. Augustini, Denkwürdigkeiten, iii, 219 sq.). This later tradition is now usually regarded as arising from a confusion with a later Thomas, a missionary (possibly to India). Whether, however, it is said to have been occasioned by a lance, and is commemorated by the Latin Church on Dec. 21, by the Greek Church on Oct. 6, and by the Indians on July 1. (For these traditions and their authorities, see Butler, Lives of the Saints, Dec. 21.)

The fathers frequently quote an Evangellum secundum Thomas and Acta Thomas, the fragments of the former of which have been edited by Thilo, in his Codex Apostrophus Novi Testamenti, i, 275; and by Tischendorf, in his Evangelia Apostrophia (Lips. 1843) and the Acta Thomas separately by Thilo (ibid. 1823); and by Thomsa, in his Acta Thomas (ibid. 1854). See APOCRYPHA; THOMAS, WRITINGS OF.

THOMAS (St.), CHRISTIANS OF, a body of Syrian Christians dwelling in the interior of Malabar and Travancore, in the south-western part of Hindustan. When the Portuguese landed in India in the 16th century, they discovered what they supposed to be a Nestorian Church there, the members of which called themselves Christians of St. Thomas. They retained the Syrian language, held the validity of only two sacraments, and were governed by bishops under a metropolitan. They rejected the authority of Peter, and did not enforce ecclesiastical discipline. They worshipped images. These churches were soon subjected to severe persecution, and many were forced into Romanism. The Inquisition, also, was established at Goa. Dr. Claudius Buchanan found, however, a remnant of them, in 1807, near Travancore. They still retain some ecclesiastical independence. According to a statement of some authority, the St. Thomas Christians number 70,000 individuals, and the Syro-Roman Catholics 90,000, that is, the party who have submitted to the papal jurisdiction. But the Church service in Syriac is not understood by the people, who are ignorant and prejudiced. That their creed is not directly Nestorian may be seen from the declaration of the metropolitan of Malabar made in 1806: “We believe in the Father, Son, and Holy Ghost, three persons in one God, neither confounding the persons nor dividing the substance; One in Three, and Three in One: the Father generator, the Son co-eternated, and the Holy Ghost, co-equal: None is before or after the other; in majesty, honor, might, and power coequal: Unity in Trinity, and Trinity in Unity.” The metropolitan disclaims the heresies of Arius, Sabellius, Macedonius, Manes, Manianus, Julianus, Nestorius, and the Chalcedonians, adding “that the Holy Ghost is co-equal from eternity through the Father and the Holy Ghost, the Son appeared on earth for the salvation of mankind; that he was born of the Virgin Mary through the means of the Holy Ghost, and was incarnate God and man.” They believe that the souls of departed men do not exist till the judgment-day; they allow three sacraments—baptism, ordination, and the eucharist: and they abhor auricular confession. In the consecration of the eucharist they use small cakes made with oil and salt; instead of wine is water in which raisins have been steeped; they observe no age for ordinations, but ordain the priest’s seven, eighteen, twenty, etc., who may marry as often as their wives die. Their children, unless in cases of sickness, are not baptized till the fiftieth day. At the death of any friend the relations keep an eight days’ fast in memory of the deceased. They observe the times of Advent and Lent, and many days of fasting. One date is Octavianus, which relates to Thomas—the Dominici a libis, or Sunday after Easter, in memory of the notable confession of Thomas; one on June 1, which is also celebrated by Moors and Pagans. The Church of England Missionary Society has established among these people an extensive mission, through which 180 students, and a college, has been established at Kottayam for the instruction of candidates for the ministry, which has been
THOMAS

THOMAS (St.), DAY OF, a festival observed, Dec. 21, in memory of Thomas the apostle. It was held by the Greek Church on Oct. 6.

THOMAS (St.), WRITINGS OF. These are as follows:

1. THOM. ACTA (Acts of Thomas), an Apocryphal work which belongs to a very high antiquity and was greatly esteemed among the Gnostics and Manicheans (comp. Euseb, Hist. Eccles. iii, 25; Epiph. Hieras. liii, 1; li, 1; lii, 2, etc.). Augustine has undoubtedly referred to it in three places, viz. Cont. Finoll. xxii, 79; Dhim-

mocio, De Nativ. Domini, l. xvi, 20; and in Ps. xliii, 20, jac
tol. Abide, i, 1 (Fabricius, Codex Apocryphi, i, 689) these
Acts are especially referred to. They were first edited by Thilo, in Codex Apocryphus Nov. Test. (Lips. 1832), vol. 1; afterwards by Tischendorf, in Acta Apostolorum Apocrypha (Ibld. 1851), p. 180-234; see also the appendix to Apocalypses Apocrypha (Ibld. 1865), p. 158-161.

Connected with the Acts is the—

2. THOM. CONSUMMATIO (Consummation of Thomas), which, like the former, was the source for the Hist. A post. Abide. It was edited first by Tischendorf from a cod. Paris, of the 11th century, and published in his Acta Apostolorum, p. 265-242. More important than these is the—

3. THOM. EVANGELIUM (Gospel of Thomas). Next to the Protevangelium of James, it was the oldest and best known. Ireneus probably knew it (comp. Ad. Hieras. i, 20), while Origen (Hom. 1 in Lucam) mentions the same explicitly: Pseudo-Origen. Philosophus (ed. Emm. Miller, Oxon. 1851), p. 101 (comp. p. 94), speaks of its having been used by a Gnostic sect, the Nasenese, in the middle of the 2d century; Euseb. (Hist. Eccles. iii, 25) mentions this gospel also, and Cyril. Hierosol. (Catech. p. 98, ed. Oxon. 1702; comp. Ibed. 4, p. 66) thinks that this Thomas was the disciple of Manes. The origin of this, as well as of most of the Apocryphal gospels, should be sought among the Gnostics, and especially among those who embraced Docetism with regard to the person of Christ; and the very large number of miraculous stories mentioned in this gospel, which found so much favor among the Manichæans, points to this Docetism. According to Ireneus, loc. cit., the author must have belonged to the Marcionian sect.

We have no complete text of this gospel, but fragments only. Cotelerius first published, in the notes to his Const. Apostol, vi, 17, a fragment according to the Fathers of the 4th century; a larger portion was published by Mingarelli, Nuova raccolta d'Opuscoli Scientifici (Venet. 1674), xii, 73-155. Tischendorf found a larger number of MSS., but their variations caused him to publish a triple text in his collection—viz. two Greek and one Latin—with the following titles: θυματικην και 
παθησι πατε του Κυ- 

ριου. This gives us the childhood of Jesus from his fifth to his twelfth year in nineteen chapters. Συγ-

γραμμα του αγιου αποστολου θυματι 
πες του πα-

θεως αναστροφης του Κυριου gives in eleven chapters the account of the ascension of our Lord. Tractatus de Pueritia Juxta secundum Thomas gives in fifteen chapters the time from the flight into Egypt to the eighth year of Christ's life. These texts are published by Tischendorf in his Evangel. Apocrypha (Lips. 1853); see also the LXI Prolegom. of the Apocal. Apocryph. A. S. (St.Petersbur. 1875) in his Contributions to the Apocryphal Literature of the New Test., Collected and Edited from Syriac MSS., in the British Museum. (B. P.)

THOMAS Λ BECKET, OF OF CANTERBURY. SEE B.ECKET, THOMAS L

THOMAS Λ KEMPIS. SEE KEMPIS, THOMAS L

THOMAS Λ AQUINAS. SEE AQUINAS, ST. THOMAS.

THOMAS Λ CELENO, was a native of Celano, in Abruzzo Uitra II. He is noted as having written the earliest biography of Francis of Assisi, and the hymn Dies Irae (q. v.). Neither the date of his birth nor of his death is known. It would appear from the preface to the biography that he was closely associated with Francis, as many of the statements are given as based on personal observation or the authority of Francis himself. Cesar of Spires, the first provincial of the Order of Franciscans in Germany, appointed him to the office of custos over the Minorite convents of Cologne, Mayence, Worms, Speyer, and Mainz, at least as early as 1221. This statement is questioned by some, because the chronicle of the order compiled by Mark of Lisbon does not mention him among the twenty-five earlier and more important disciples of the saint, though more obscure names are found in that list. The biography ascribed to him is given, with notes, in the Acta Sanctorum, Octo-

ber, tom. ii. There is no proof either for or against his claim to the authorship, which is nowhere asserted by himself. Nor is the honor of having composed the Dies Irae secured to him by any better evidence. The Franciscans attribute its composition to him, but the Docu-

mians to one of their own order, a Jesuit to an Augustinian monk, a Benedictine to Gregory the Great or to St. Bernard. Each of these statements is arbitrary, and some of them cannot be true. Bartholomew Alibizio of Flas was the first to credit the hymn to Celano, in his Liber Conformitatis (1385); and his statement is confirmed by the conclusion that the hymn was already at that date incorporated with the Missal, and therefore well known, and that Celano was generally held to be its author. Wadding, in Scriptores Ordinis Minorum, states that Celano composed two additional sequences, the Frigis Victor Fintz, in both of St. Peter's, Rome, 1691, and the Tresaula Nova Signa. THOMAS Λ VILLANNOVA. SEE VILLANEUVE.

THOMAS, BARNABES, one of Wesley's early helpers, was a native of Cornwall, England. He was ad-

mitted on trial by the Conference in 1764 and preached in Wales, and was likewise stationed in Cork. He was named in the deed of declaration. He at length deserted from an itinerant life, and settled in Leeds, but sank into obscurity. He died on the 20th of May, 1736; the Conference was in session in that city (1738). See Atmore, Meth. Memorial, s. v.

THOMAS, BENJAMIN CALLEY, a Baptist mission-

ary, was born in Massachusetts. He graduated at Brown University in the class of 1847, and at the New-

ton Theological Institution in the class of 1850. For eighteen years he was a missionary of the American Baptist Missionary Union, being stationed during this period at various places—three years at Tavoy, Bengal; three years at Hzenadah, Burmah; and two years at Baselain, Bombay. At one time he had under his charge a school for the education of native teachers. Returning to the U.S., he died in the city of New York, June 10, 1869. (J. C. S.)

THOMAS, BENJAMIN FRANKLIN, chancellor of Brown University, was born in Boston, Mass., Feb. 12, 1813, and was a graduate of Brown University in the class of 1830, having entered college at the early age of thirteen. He was admitted to the bar of Worcester in 1834. By way of ballot he was appointed, on an express proposition, and occupied a high position among the able lawyers with whom he was contemporary. For four years (1844-48) he was judge of probate for Worcester County. In 1853 he was appointed to a place made vacant on the bench of the Supreme Judicial Court of Massachusetts, and held the office for six years (1853-60). He signed his dissent in this, he remitted to Boston,

A a a
where in his profession he achieved eminent success. He served one term (1861–63) as a representative in Congress from Boston. He was elected chancellor of Brown University in 1874. He took place at Beverly, Mass., Sept. 27, 1878. (J. C. S.)

**Thomas, Christian**, a modern philosopher, was born at Leipzig in 1665, and graduated at the Leipzig University. Reading Puffendorff’s *Apostrophe for Rejecting the Scholastic Principles of Morals and Law*, he determined to renounce all implicit deference to ancient dogmas. Brucker gives the following brief specimen of his peculiar method: “I thought myself impressed upon the brain, and the action of thinking is performed in the whole brain. Brutes are destitute of sensation. Man is a corporeal substance, capable of thinking and moving, or endowed with intellect and will. Man does not always think. Truth is the agreement of thought with the nature of things. The senses are not deceitful, but all falsity is the effect of precipitation and prejudice. From perception arise ideas and their relations, and from these, reasonings. It is impossible to discover truth by the syllogistic art. . . . God is not perceived by the intellectual sense, but by the inclination of the heart, for a man perceives all creatures and knoweth all things; but God is known only in the heart. All creatures are in God; nothing is exter- rior to him. Creation is extension produced from nothing by the divine power. Creatures are of two kinds, passive and active; the former is matter, the latter Spirit. . . . The human soul is a ray from the divine nature, which becomes the highest centre of human life, love, etc. *Thomas* died at Halle in 1728. He published, *An Introduction to Puffendorf* (1687):—*A Defence of the Sect of the Pietists* :—*An Introduction to Aulic Philosophy*, etc.:—*Introduction to Rational Philosophy* :—*A Logical Praxis* :—*Introduction to Moral Philosophy* :—*A Cure for Irregular Passions* :—*Essay on the Nature and Essence of Spirit*, etc.

**Thomas, Christopher**, a Methodist Episcopal minister, was born in Matthews County, Va., Oct. 31, 1877. He was converted in 1816, admitted on trial in the Virginia Conference in 1828, and appointed to the Sussex Circuit. In 1854 he still held the same circuit; in 1865, Yeadon; in 1866, Salisbury; in 1867, Iredell; in 1868, Williamsburg; and in 1869, Newbern, N. C., all of which appointments he filled with ability and success. He died Nov. 14, 1889. He was a plain man, of strict integrity, consistent Christianity, and highly re- spectable abilities. See Minutes of Annual Conferences, 1850, p. 73.

**Thomas, David** (1), a minister of the Baptist denomination, was born at London, Tract, Pa., Aug. 16, 1782. In early life he enjoyed more than ordinary ad- vantages for obtaining a good education. He studied for some time at the Academy in Hopewell, under the tuition of Rev. Isaac Eaton, and in 1796 received the honorary degree of A.M. from Brown University. When quite young he began to preach. He removed to Vir- ginia in 1790, and spent about a year and a half in Berkeley County. He then visited Fauquier County, and under his ministry the Broad River Church was formed, of which, for a time, he was the pastor. Subse- quently, from this church, five or six other churches were organized, and united in different sections of the state, and his preaching was greatly blessed in the conversion of souls. He is said “to have been a minister of great distinction in the prime of his days. Besides the natural endowments of a vigorous mind, and the advantages of a classical and refined education, he possessed a high poetic address, expressive action, and, above all, a heart filled with love to God and his fellow men.” Many per- sons in Virginia had been accustomed to hear but little evangelical preaching. They were attracted by the elo- quence of so accomplished a minister as was Mr. Thomas, and not a few who occupied high social positions were led to the Saviour. Near the close of his life he re- moved to Kentucky. He lived to a great age, and for some time before his death was nearly blind. The in- fluence of this faithful servant of Christ was good and permanent. See *Lives of Virginia Baptist Ministers*, p. 51–53. (J. C. S.)

**Thomas, David** (2), a Welsh Congregational minister, was born at Cowbridge, May 19, 1783. He graduated at Wrexham Academy, studied theology with Dr. Jenkin Lewis, and itinerated through the hamlets and villages about Magor and Penywaun. In 1815 he set- tled over the parish of Wolvawesnewt, and in 1819 re- signed his charge to accept the pastorate of the Church at Llancarfan, and continued his missionary labours through many neighboring parishes. He died in November, 1864. His life was one calm, public, and unwavering testimony for truth and for God. See (Lond.) *Cong. Year-book*, 1866, p. 285.

**Thomas, David** (3), a Welsh Congregational minister, was born in 1789. He graduated at the Presby- terian College, Carmarthen, and was ordained in 1820 at Pembrokeahire, and shortly afterwards settled at Wotton-under-Edge, and retained this charge until the end of his life. He died March 28, 1861. His preaching was earnest, faithful, and evangelical. See (Lond.) *Cong. Year-book*, 1866, p. 268.

**Thomas, David** (4), A.B. an English Congrega- tional minister, was born at Merthyr-Tyd威尔, Aug. 16, 1811. He was educated at Highbury College and Glas- gow University, where he took the first prize in logic. He was ordained in 1836, at Zion Chapel, Bedminster. In 1844 he settled at Highbury Chapel, Gotham, and commenced that career of spiritual power and minist- erial prosperity which lasted thirty years, growing more and more bright and beautiful from year to year. Mr. Thomas had a vigorous intellect, highly cultivated, and marked by large intelligence and the purest taste. “His conversation on books, public men, and human affairs was made up of an immense store of learning, marked by no touch, and no small amount of genial humor.” He died Nov. 7, 1875. See (Lond.) *Cong. Year-book*, 1876, p. 374.

**Thomas, Ebenezer, D.D., L.L.D., a Presbyterian minister, was born at Chelmsford, England, Dec. 23, 1812. His father was an Independent minister, edu- cated at Hoxton College in London, and was ordained at Chelmsford in 1805, where he remained as pastor for a number of years. He removed to Cincinnati, O., when his son was but a child. He was engaged in preaching in Cincinnati and destitute neighborhoods for several years. With a view of supplying the destitute, he or- ganized the Calvinization Society (1830) as its presi- dential agent. He accepted a call to take charge of the Welsh Independent Church at Paddy’s Run, O. Here he es- tablished a boarding-school, and some of the first men of the country were his pupils. Under his father’s instruction, young Thomas was prepared for college. He entered the Miami University and gradu- ated in 1834. He possessed powers of mind of the highest order, and his scholarly attainments were rarely equaled, never surpassed. Immediately after his gradua- tion, he commenced teaching at Rising Sun, Ind. and afterwards at Franklin, O. When not engaged in teaching, he pursued the study of theology. He was licensed by the Presbytery of Oxford in 1836. Al- though he had not had the advantage of training in a theological seminary, there were few more thoroughly educated in every branch of theology. He was called to take charge of the Church at Harrison, and he was ordained there as a minister of the gospel in 1837. After remaining in Harrison over two years, he was called to the Hamilton Church, where he remained until 1849, when he was elected president of Hanover College. This position he occupied until 1854, when he resigned to accept the chair of Biblical literature and exegesis in the Theological Seminary at New Albany, Ind. Here he remained till the seminary was removed.
to Chicago, when he resigned, but was re-elected by the new board at its first meeting. He accepted the appointment, but on account of controversy in the Church in regard to his views and those of his colleague, Professor McMasters, in regard to slavery, the seminary was not opened for two years. In the meantime he was the pulpit of the Presbyterian Church in New Albany. In 1856 the synod in whose bounds the seminary was located voted to offer it to the General Assembly, and in 1859 it was accepted by the same. In the meantime the first Church of Dayton, O., gave Dr. Thomas a call, which he accepted. Here he was duly installed, and entered upon his work, which he prosecuted with energy and success for twelve years, when he resigned to accept the chair of New-Test. Greek and exegesis in Lane Seminary, Walnut Hills, Cincinnati, O. He died there Feb. 2, 1875.

Dr. Thomas was a general scholar. He carried his studies outside of the curriculum, and was at home in history, geology, botany, entomology, mineralogy, astronomy, and microscopy. He was a model teacher, his thorough knowledge of every department and his unrivalled colloquial powers combined to make him a great favorite in the class-room; a man was a sincere and sound Calvinist, and he was as rich in Christian experience as he was sound in the faith. As a preacher he was popular and successful in all the fields of his labor. In all that goes to make up excellence in writing and speaking, he was a prince. He was esteemed and honored by all. (W. P. S.)

Thomas, Edward, an Episcopal clergyman, was born in St. Stephen's Parish, S. C., Sept. 29, 1800, and received his early education at a school in Pineville. In 1817 he entered the sophomore class in the South Carolina College, Columbia, and graduated in 1819. He lived in Cambridge, Mass., in order to study at Harvard College; and, after a few months, transferred his residence to New Haven, prosecuting his studies at Yale. He entered the Theological Seminary, city of New York, in 1822; returned to his native state in the fall of 1824; and, in February, 1825, was ordained deacon by bishop Bowen, and became a missionary first to Fairfield District, and afterwards to Greenville. In April, 1826, he was admitted to priest's orders by bishop Bowen, and, after filling out his unexpired term at Greenville, became rector, February, 1827, of Trinity Church on Edisto Island. In 1845 he resigned his charge on account of ill-health, and went to reside at St. Augustine, Fla., where his health so improved that he felt able to undertake his duties again, and he returned to his charge in 1849. He declined, and after a further residence there returned to South Carolina, and in 1886 accepted a call to the parish of St. John's, Berkeley County. In the winter of 1887-88 the disease of which he died (an affection of the bowels) began to show itself, but he continued to labor on until May 24, 1840, when he gave up work entirely, dying July 11 of the same year. A volume of Sermons was published after his death, under the supervision of his widow. See Sprague, Ames of the Amer. Pulpit, v. 664.

Thomas, Eleazar, D.D., a minister of the Methodist Episcopal Church, was born in the State of New York; received an academic education at Cazenovia; was elected to the seventeen, and entered Geneva Conference as a probationer in 1839. He was transferred to California in 1852, and was pastor one year of the Powell Street Church, San Francisco. In 1856 he was elected editor of the California Christian Advocate; and re-elected in 1860 and 1864. He was chosen book- agent in 1867, which office he held until the end of that term in 1872, was appointed presiding elder of the Petaluma District. In the spring of 1873 he was appointed a member of the Peace Commission, and sent to treat with the Modoc Indians. On April 11 the commissioners were decoyed into the Lava Beds, Southern Oregon, and Dr. Thomas and Gen. Canby were killed. Dr.

Thomas was a man of good presence, fine address, and great zeal and energy as a minister. See Simpson, Cyclopedia of Methodism, s. v.

Thomas, Enoch, a Presbyterian minister, was born Dec. 31, 1803, at St. George's, Newcastie, Del. He was prepared for college at the Phillips Academy at Amherst, Mass., under John Adams, principal, and was graduated from Amherst College in 1823. About this time he united with the Second Presbyterian Church of Wilmington, Del. He then engaged for six months as assistant teacher in a seminary at Newark, Del., after which he entered Princeton Seminary, N. J., and remained there until near the close of 1835, when he left because of feeble health. He was licensed by the Wilmington Presbytery Oct. 14, 1835, after which he began to labor as a missionary in Rockingham County, Va. He was ordained sine tutele by the Lexington Presbytery at High Bridge Church, Va., June 17, 1837.

For about a year he preached at Union, Port Republic, and Shikoh, where his labors were attended by large congregations attended his ministry. Having accepted a call to Shemariah Church, Augusta Co., he was installed as pastor Dec. 1, 1838. His health improving improved, and the community having provided an academy, Mr. Thomas also commenced a classical school, which became one of the finest in the state. The united duties of pastor and teacher were too onerous, and he was, at his own request, released from his former charge, Oct. 12, 1843. This was his only pastoral charge. Thenceforth he resided about eighteen years at Beverly, Randolph Co., and labored as a missionary in that and several adjacent counties, ranging over a wide extent of wild and mountainous country, preaching in court-houses, jails, school-houses, barns, and private houses, wherever any would gather to hear the Word of God. There was no minister nearer on the west than Clarkesburg, and on the south-west than Parkersburg, and yet the wide region he traversed was a mountain wilderness; often his only road was an obscure path; dangerous rivers were to be forded; and many of the best people were living in log-cabins, often in a single room. But he enjoyed the work, gladly breaking the bread of life to the hungry and the starving. The breaking-out of the Civil War in 1861, stopped his work, and his mission field became a scene of strife. Having removed his family from Beverly to Craigsville, Augusta Co., he occasionally supplied, during the war, the churches of Windy Cove, Warm Springs, and Letcher, when opportunity offered. After the war he preached as opportunity offered. He gradually took up his ministerial work again, and died in July, 1879. For several of his last years he suffered seriously from chronic throat-disease. He died at Craigsville, Jan. 25, 1879. (W. P. S.)

Thomas, John (1), LL.D., an English prelate, was born at Carlisle, Oct. 14, 1712; was educated at the grammar-school at Carlisle, and Queen's College, Oxford. After his graduation he became an assistant at a classical academy, Soho Square, London; then private tutor to the younger son of Sir William Clayton. He was ordained deacon March 27, 1737, and priest Sept. 25. In the same year he was presented by George II to the rectory of Marshfield, and was instituted Jan. 27, 1738. On Jan. 18, 1748, he was appointed chaplain in ordinary to the king; April 23, 1754, he was made prebendary of Westminster; and Dec. 12, 1750, was appointed chaplain to George III. In 1762 he was appointed sub-almoner to the archbishop of York; and in 1779 he was instituted to the living of St. Bride's, London. He succeeded Dr. Pearson to the deanery of Westminster, 1768; and in November, 1774, became bishop of Rochester. He died Aug. 22, 1793. A valuable collection of his Sermons and Charges was published by Rev. G. A. Thomas (1796, 2 vols. 8vo).

Thomas, John (2), a Welsh Congregational minister, was born at Carmarthen, April 13, 1811. He was
Thomas, Joshua, a Welsh Congregational minister, was born at Pennain, Aug. 2, 1808. At an early age he was the subject of deep religious impressions, and at the age of seventeen joined the Church. He graduated at Brecon College, and was ordained pastor of the Church at Adullam, Newport, and served the charge until his death. He died Aug. 3, 1870. See (Lond.) Cong. Year-book, 1871, p. 353.

Thomas, Richard H., M.D., a minister of the Society of Friends, was born in Anne-Arundel County, Md., June, 1805. "Having received a liberal education and completed a course of medical studies, he settled in Baltimore, where he became eminent as a practitioner and teacher of medicine." In the work of the ministry he labored with great diligence. The held many meetings among other denominations, and preached with great acceptability. He was a man of pleasing address; and, possessing great vivacity and extraordinary talents, he gained ready access to the most cultivated society. He died at his residence, near Baltimore, Jan. 15, 1860. See Annual Monitor, 1860, p. 128.

Thomas, Robert Jermain, A.B., a Welsh Congregational missionary, was born at Bhavadar, Sept. 7, 1840. He matriculated at the London University at the age of sixteen, and gained the Mills scholarship and took high honors at the university. He was ordained June 4, 1863, at Hanover Chapel, and sailed the following month for Shanghai, under the direction of the London Missionary Society. He was appointed to the Pekin Mission, and on his way thither he undertook an extensive missionary journey through the peninsula of Corea, telling the glorious truths of the Gospel of Christ and distributing copies of the Scriptures. In 1866 the French admirals prepared an expedition against the Coreans, and Mr. Thomas was persuaded to act as an interpreter for the expedition. He was put to death by the Coreans while reading the Bible, July, 1866. See (Lond.) Cong. Year-book, 1868, p. 296.

Thomas, Samuel (1), a Methodist Episcopal minister, became a member of the society, in the early period of Methodism, in the State of New Jersey. He was an acceptable local preacher for a number of years; entered the itinerancy in 1796, and filled the following stations: In 1796-97, Flanders Circuit; 1798, Elizabethtown Circuit; 1799, Freehold; 1800-1, Newburg; 1802, Bethel; 1808, Elizabethtown; 1804-5, Freehold; 1806, supernumerary in Brooklyn; 1807, in New York; 1808, supernumerary, in which relation he continued until he died, in 1812. Mr. Thomas was a man of much prayer and diligence in searching the Scriptures, strongly attached to the doctrines and discipline of the Methodist Episcopal Church, and ever considered as a strict disciplinarian. See Minutes of Annual Conferences, i, 208; Stevens Hist. of M. E. Church, iv, 291.

Thomas, Samuel (2), an Independent minister, was born in Joris, Switzerland, in 1801. By his own in-

Thomson, Joshua, a Welsh Congregational minister, was born at Pennain, Aug. 2, 1808. At an early age he was the subject of deep religious impressions, and at the age of seventeen joined the Church. He graduated at Brecon College, and was ordained pastor of the Church at Adulcum, Newport, and served the charge until his death. He died Aug. 3, 1870. See (Lond.) Cong. Year-book, 1871, p. 353.

Thomas, Samuel, an English Congregational minister, was born at Pontrech, Nov. 20, 1815. He graduated at Breen College in 1843, and was ordained to the pastorate of Ebenezer Chapel, Newport. Under his pastoral superintendence a new chapel was erected, and the Church membership greatly increased. In 1860 he removed to Bethlem, and labored with the Church there until his death, April 5, 1869. See (Lond.) Cong. Year-book, 1870, p. 322.

Thomas, Thomas, a Welsh Congregational minister, was born near Carmarthens, in 1822, and was brought up under Unitarian influence and educated for the medical profession. While the love of his profession induced him to enter the ministry. He graduated at Homerton College, and accepted the pastorate of Fetter Lane Chapel, London, and labored also at Wellingborough thirteen years. In 1858 he removed to Bethnal Green Chapel, London, and labored with them until his death, March 19, 1861. Mr. Thomas was a workman of the highest type, and his generous nature and vivid imagination endeared him to a large circle of friends. See (Lond.) Cong. Year-book, 1862, p. 263.

Thomas, William, an English prelate, was born at Bristol, Feb. 2, 1819, and received his primary education in the school of Carmarthens, where his grandfather lived. He entered St. John's College, Oxford, in 1829, and removed, later, to Jesus College, of which he was afterwards chosen a fellow and appointed tutor. His ordination as deacon took place at Christ Church, June 4, 1837, and as priest in the year following. His first preferment was the vicarage of Penfield, Cardigan. He became chaplain to the Earl of Norwich, in 1842, and was appointed to the vicarage of Laughton, with the rectory of Llansadwilly annexed. In 1844 a party of Parliament horse came into town threatening to kill Mr. Thomas if they found him praying for the queen. They did interfere with him, but were so struck with his composure and patience that they left him without further disturbance. Soon after, the Parliament committee deprived him of his living of Laughton, from which time till the Restoration he endured great hardships, being obliged to teach a private school for his support. At the Restoration Mr. Thomas was reinstated in his living, and by the king's letters-patent made chanter of St. David's. In 1661 he was presented to the rectory of Llanaed in the Valley, Pembroke County, and made chaplain to the duke of York, through whose influence he was promoted to the deanery of Worcester, Nov. 25, 1665; and was presented to the rectory of Hampton, Nov. 25, 1667. Here he removed his family, quitting the living of Laughton. In 1677 he was promoted to the see of St. David's, and held the deanery of Worcester in commendam. Having been bishop of St. David's six years, he translated to the see of Worcester, where he effectually spent the remainder of his life. He died June 25, 1679. After his death Thomas published, An Apology for the Church of England (1678-79, 8vo)—A Sermon (1657) —The Mammon of Unrighteousness, a sermon. His Letter to the Clergy, and an imperfect work, Roman Oracle Si- lenced, were published after his death. See Chalmers, Encyc. Dict. a. v.
Thomas, William (2), an English clergyman and antiquarian, was grandson of the preceding, and was born in 1670. He was educated at Westminster school, whence he was elected to Trinity College, Cambridge, June 35, 1688. Here he took his master's degree of arts, and in 1692 he was elected a fellow of the college. In 1693 he was ordained deacon at Lambeth, and in 1696 he was ordained priest. He published Antiquitates Prioratus Majoris Malvernæ (1725) — a description of Dudley's Warwickshire (1780) — and Survey of the Cathedral Church of Worcester (1746). He intended to have published a history of Worcestershire, and to gather material for this, visited every church in the county. To these labors Dr. Nash owns himself greatly indebted.

Thomasin de Zirklaria (Zirklärle), in the Italian Tyrol, wrote a lengthy didactic poem between August 1215, and May, 1216, entitled Der wildecke Gast (The Foreign Guest), by which production he began the exten-sive use of the Tyrolese idiom in the 13th century. Thomasin was a layman, and wrote for laymen, and with him begins the distinction between a religious morality for the people and a theological morality of the Church. His work is characterized by vivacity and gracefulness, by clearness of expression and warmth of feeling, and by such "bearbeilen" and humorous beauties. Independence of thought is also a leading quality, and is carried to such a degree as to de-fend the principle that conscience is superior to ecclesi-astical institutions of every kind. Thomasin does not rage against the priesthood and the papacy, but rather extols them very simply and rather humorously as the "guardian of good doctrine;" but he does not, on the other hand, hesitate to utter in their ears the most cutting truths. His object, in brief, was to teach a practical morality; and his place is rather among the exponents of the religious and ethical tendencies of his time than among the poets. He teaches that Stätte, an inward and settled affluence for the good and the right, is the centre of all virtues. This is not the Consta-tica of the stoical Seneca merely, but a positive energy which actually gives effect to the impulses of the heart. Evil is Us-stätte, or instability. Among particular virtues, humility is given the highest rank. The poem was not printed until only until 1852, when it was issued by Rieckert under the title Der wildecke Gast des Thomasin von Zirklaria (Queidlinburg and Leipzig), with notes. Comp. extracts given in Gesch. d. poet. Nationalliteratur, by Ger-vinus, and see Dietel, Der wildecke Gast u. d. Moral des 13ten Jahrh. in Kiel, Allgem. Monatsschrift, Aug. 1852, p. 687-714. — Herzog, Real-Encyklop. s. v.

Theotokos, Gottfried, a German Protestant divine, was born in the year 1802 at Egenhausen, in Franconia. In 1821 he graduated at the gymnasium in Ansbach, and prosecuted his theological studies at the universities of Erlangen, Halle, and Berlin. In 1829 he was preacher at the Church of the Holy Ghost in Nuremberg, and in 1830 religious instructor, also, at the gymnasium there. In 1842 he was called to Erlangen as professor of dogmatics and university preacher. For more than thirty years he filled that chair, and died as senior of the faculty, Jan. 24, 1875. He published, Origines: ein Beitrag zur Dogmengeschichte des 6sten Jahrh. (Nuremberg, 1838) — Geschichte der theologischen und dogmatischen Literatur (Erlangem, 1844) — Beiträge zur kirchlichen Christologie (ibid. 1846) — Dogmatis de Obedientia Christi Activa Historia et Progressionis inde a Confessore Augustana ad Formulam usque Conciliorum (ibid. 1846) — Das Re- konstrukt der evang-luth. Kirche in der Consequenz seines Principles (Nuremberg, 1848) — Christi Person und Werk: 

Thomasin, Louis de', a learned French divine, was born at Aix, in Provence, Aug. 28, 1619. At the age of fourteen he entered into the Oratory, where he remained as professor of moral philosophy until he was appointed to the chair of divinity at Saumur. He removed to Paris in 1654, to hold conferences in positive theology in the Seminary of Sainte-Marie, which he continued till 1668. From that time he was engaged principally with his writings until his death, Dec. 25, 1695. His principal works are: Ecclesiasticale Discipline (reprinted 1725, 3 vols. in fol. French): — Theologica Dogmata (1680, 3 vols. in fol. Latin): — Tractatus in Divinis Office; = on the Sacraments; = on Truth and Falsehood; = on Absolution; = on Trade and Usury. The work was not published till 1692 (4to). — Also Offices for Studying and Teaching Philosophy in a Christian Manner (5vo): — A Universel Hebrew Glossary (Louvain, 1697, fol.), — Dissertations sur l'Origine, in Latin (1667, 4to): — Memoires historiques sur l'Origine, in Latin (1692, 4to). The work is prefixed to his Hebrew Glossary. See Chalmers, Biog. Dict. s. v.; Hoof, Eccles. Biog. s. v.; Herzog, Real-Encyklop. s. v.; Hoefer, Nouv. Biog. Générale, s. v.

Thomists, a name often given to the followers of Thomas Aquinas, who, besides adopting the Aristotelian philosophy, in opposition to Duns Scotus, who held the Platonio, also taught the doctrines of Augustine on the subject of original sin, free grace, etc. He has been termed the dogma of the immaculate conception, in opposition to Scotus. The two sects were also divided on the question of the sacraments, as to whether grace was conferred by them physically or morally; the Thomists holding the former, the Scotists the latter. Duns, who was a Thomist, in his theology, explained what is meant by the view of his party. He says, "the sacraments possess a physical causality, as the instruments of divine omnipotence, and truly and properly concur towards the production of their effects on the mind by a supernatural virtue from the principal agent, communicated to it in the sacrament in an efficacious, and so per- manent action; and, moreover, such a causality is more conformable to the declarations of Scripture, and demonstrates more fully the dignity of the sacrament, and the efficacy of the divine omnipotence and of the merit of Christ. Besides, they say that this is also more conformable to the intentions of councils and fathers, who, as they explain the causality of the sacraments, use various similitudes which undoubtedly designate a causality more than moral." On the contrary, the Scotists teach that "the sacraments do not cause grace physically, but morally; that is, they do not produce grace as physical causes do, but as moral causes; inasmuch as they efficaciously move God to produce the grace which they signify, and which God himself promises infallibly to give as often as they are rightly administered and worthily received," etc. The Thomists were Realists, while the Scotists were Nominalists; and although they were not natural enemies, they were such as to the doctrine of the Scotists, the prestige of Aquinas was so great that the Thomists ruled the theology of the Church up to the time of the controversy between the Molinists (q. v.) and the Jansenists, when the views of the Scotists substantially prevailed. See Aquinas, Thomas a.

Thomlinson, Joseph Smith, D.D., a minister of
the Methodist Episcopal Church, was born in George-
town, Ky., March 15, 1802; and, after serving a time at the
saddler's trade, entered Transylvania University,
where he held a high rank as a scholar. When Lafay-
ette visited the institution, Thomlinson was the person
chosen to tender him the greetings of his fellow-stu-
dents. He graduated in 1825, and became professor of
mathematics and natural philosophy in Augusta College.
In the same year he was admitted to the travelling con-
nection, and in due time was ordained to the offices of
deacon and elder. Having served as professor for some
years, he was chosen president of the Augusta College,
and held that office till 1849, when the institution was
broken down by a withdrawal of the patronage of the
Kentucky Conference, and the repeal of its charter by
the legislature of the State. He was subsequently elect-
ed to a position as President of the Ohio Wesleyan University,
Delaware, O., but declined to accept it, though he acted
as agent for the institution for two years. He accepted
an election as professor in the university at Athens,
O., and, having served in this capacity for a year, was
chosen president, which latter position he declined on
account of ill-health. His mind was so affected by the
sudden death of a favorite son that he never fully re-
covered; and although elected to the presidency of the
Springfield High-school and of the State University of
Indiana, he declined both. He died at Neville, O., June 4,
1853. See Sprague, Annuals of the Amer. Pulpit, vi, 706.

Thom'oi (Gopalo, Vulg. Cisem.), a corrupt Greek form
(1 Esdr. v. 92) of the Heb. name (Exra ii. 68; Neh. vii. 53; 1 Mac. iii. 12).

Thompson, Alexander Scroggs, a Presbyterian
minister, was born April 28, 1834, at Big Spring
(Springfield), Cumberland Co., Pa. He received his
early education at Newville Academy under Rev. Rob-
ert McCachren, and at Shippensburg Collegiate Insti-
tute under Prof. L. L. Sibbett. At an early age he joined the
American Presbyterian Church, and was licensed to
preach at Newville. He graduated from Jefferson College,
Pa., in 1864, and soon after entered Princeton Theological
Seminary, N. J. There he studied two years (1864–
66), and afterwards spent a third year (1866–67)
at the Western Seminary at Allegheny, Pa. He was li-
censed by New Brunswick Presbytery April 18, 1866,
and supplied New Harmony Church in Donegal Pres-
burytery during the summer of that year. He was or-
dained by the Presbytery of Allegheny at Worthington,
Armstrong Co., Pa., Nov. 20, 1867, and on the same day
installed pastor of Worthington Church. This relation
continued till June 1870, which occurred, July 4, 1878.
He was retiring in his manner, true in his friendships,
a very successful minister, and a model pasto-
r. His remains were buried at Newville, Pa. (W. P. S.)

Thompson, Amherst L., a young Congrega-
tional missionary, was born at Peru, Mass., in 1834.
Converted at the age of fourteen, he resolved to prepare
himself for the ministry. Trusting in Providence and his
own arm, he went through the curriculum of Monson
Academy and Amherst College, graduating in 1856.
He studied theology partly at New York and partly at An-
dover, graduating at the latter place. He was ordained
to the missionary work at Amherst Feb. 3, 1860, and on
the 18th, in company with eight other missionaries,
sailed from Boston for Urumiya, Persia, where he ar-
ived July 1. On Aug. 16 he was taken with a severe chills,
which soon developed into a terrible fever, complet-
ing its fatal work on the 29th. He sleeps by the side of
Stoddard in the little mission burying-ground in Mt. Seir,
Urumiya; and his name will ever be kept in the hearts of
telepathy, coolness and common-sense, and a brilliant
imagination. As a man and a Christian he is repre-
sented as a model. At his graduation at Andover he
delivered an essay on Congregational Church Polity
Adapted to Foreign Missionary Work, which was pub-

Thompson, Anthony A., an English Congrega-
tional minister, was born at Alnwick in 1835. He
graduated at Spring Hill College, and matriculated at the
London University. In 1865 he accepted a call from
Douglas, Isle of Man, and, after a period of zeal and hope,
entered upon his labors. His pulpitministrations were
marked by many tokens of blessings. He had a deep
consciousness of the responsibilities attending his posi-
tion, and faithfully fulfilled the duties devolving upon
him. He died April 5, 1866. See (Lond.) Cong. Year-
book, 1867, p. 199.

Thompson, Anthony F., a Methodist Episcopal
minister, was born in Kentucky, Sept. 2, 1806. He
became an elder in 1824, and was soon after licensed as
a local preacher, received on trial in 1829, appointed to
Terre Haute Circuit, Indiana Conference, in 1832, and
died May 19, 1838. He was a young man of excent
talents. See Minutes of Annual Conferences, i, 277.

Thompson, Charles, a Presbyterian minister,
was born at Salem, N. Y., Nov. 26, 1811. He was con-
verted in 1838; educated at Monmouth College and
Theological Seminary, Monmouth, Ill.; licensed by Chi-
icago Presbytery April 3, 1868; ordained by Monmouth
Presbytery pastor of Olga and Oquaska churches, Ill.,
June 17, 1871. He died Dec. 81, 1886, and left as a great
man, "walked with God," and preached in demonstration
of the spirit, and with power. See Wilson, Prov.

Thompson, Fredericke Bordin, a missionary of
the Reformed Church in America to Borneo, was born in
1810, and united with the Church in New Brunswick,
under Rev. Dr. James Hardenberg, at the age of
seventeen. His pastor having induced him to prepare for
the ministry, he graduated at Rutgers College in
1831, and at the Theological Seminary in New Bruns-
wick in 1834. After being settled as pastor of the
Church at Upper Red Hook, N. Y., from 1834 till 1866,
they sent him to the Far East, where he engaged in his
work, and was sent by the American Board of Commissi-
oners for Foreign Missions, and the Board of Foreign
Missions of his own Church, with the devoted William J.
Rohman, to join the mission in Borneo. He reached
Singapore Sept. 17, 1888, and labored at Karangan, one
of the two stations occupied by the mission (the other
being Sambas), for several years, with great industry
and devotion to his work, among the Dyaks. His first
wife, formerly a Miss Wyckoff, of New Brunswick, died
in 1859. In 1846 he married a Swiss lady, Miss Combe,
a teacher in the mission, who also died, in 1844. In
1847 a hurried journey of the Dyaks compelled him to de-
sist from labor; and, by medical advice, he sailed for
Europe with his motherless daughter, to place her with
her relatives in Switzerland, and to try the benefit of
the change of climate for himself. At first he im-
proved, but the disease returned, and he died Jan. 17,
1848. Thus ended the brief career of one whose piety,
talents, and consecration bade fair to place him, if he
had been spared, among the very first of modern evan-
gelist to the heathen. He was a grave, quiet, devout,
and intensely earnest man. His missionary trials and
last illness were borne with patient submission to the
will of God with a cheerful spirit, and his union with
peace with the Lord. His labors among the Dyaks,
like those of the whole mission, seemed to be fruitful of
immediate results; but his name lives in the Church
as a power for missions, and perhaps in future ages
Borneo will enshrine it among its first evangelists. See
Corwin, Evang. Hist., ii. 275, 276; id., Rev. C., Ch., p. 311.

Thompson, George C., a Methodist Episcopal
minister, was born at Nanticoke, Luzerne Co., Pa., Jan.
15, 1817. He was converted in December, 1832, edu-
cated at Cazenovia Seminary, licensed to preach Aug. 6,
1836, received on trial in the Oneida Conference in
1840, and appointed to Dundaff Station; in 1841, to Montrose Circuit; in 1842 ordained elder and appointed to
the same circuit; in 1843 he became insane, and died Sept.
THOMPSON 375

18, 1846, at the New York Lunatic Asylum in Utica. His talents as a minister were elevated. "In ministerial labors he was abundant, in mental application he was engaged."

Thompson, George Wadsworth, D.D., a Presbyterian divine, was born in New Providence, Essex Co., N.J., Oct. 10, 1819; converted in 1835; graduated at Rutgers College, New Brunswick, N.J., and at the Princeton Theological Seminary; was licensed by the Presbytery of New Brunswick; ordained pastor of the churches of Millington and New Berlin, 1842; became pastor of the Church of Lower Tuscarora in 1847, and remained there seventeen years. He died Jan. 28, 1864. Dr. Thompson had an acute, ready, practical mind. As a scholar he was thorough and critical; his Expository Lectures on Daniel and on the Romans display a vast amount of patient research, deep thinking, critical analysis, and full knowledge of the teachings of the Bible. See Wilson, Presb. Hist. Almanac, 1865, p. 123.

Thompson, John, a Presbyterian minister, was born near Chambersburg, Franklin Co., Pa., Nov. 11, 1772. He received his literary training in the Ken-tucky Training School, and was licensed by Transylvania Presbytery in 1799, and ordained by Washington Presbytery, O., in 1801. He was pastor of Glendale Church, O., 1801-33; then removed to Indiana, became a member of Crawfordsville Free-presbytery, and labored as an evangelist. He died Feb. 11, 1852, leaving an earnest, faithful, successful and unselfish minister, and many persons were hopeful under his labors. See Wilson, Presb. Hist. Almanac, 1860, p. 123.

Thompson, Jonathan, a Wesleyan Methodist preacher, was born at Torhouse, Haltwhistle, Northumberland, England. In his early life he resided for a time in Ayr, Scotland. He was converted under Cowman, at Collie-upon-Tyne. In 1786 he returned to Ayr, where he officiated as a local preacher. In 1789 he came out to labor in connection with the British Conference, and was sent to the Inverness Circuit. He was soon cut down by a fever in Elgin, Morayshire. He was in the same tomb that had received the remains of the holy Joshua Keighley only a year before. Young Thompson was a man of holiness and much prayer. "His great zeal for God, united with the fervor and impudence of youth, led him to excessive labor in the work of his great Master, which proved the cause of his death." See Minutes of Wesleyan Conferences, 1799; Atterbury, Meth. Memoirs, 1841.

Thompson, Joseph Parriah, D.D., L.L.D., an eminent Congregational divine, was born in Philadelphia, Aug. 7, 1819. He graduated at Yale College in 1838. Afterwards he pursued the study of theology at the Andover and New Haven Theological schools. In November, 1840, he was ordained pastor of the Chapel Street Congregational Church in New Haven. While occupying this position, Dr. Thompson assisted in establishing The New-England. He published also, while at New Haven, a Memoir of Timothy Dwight. In 1845 he was called to the pastoral charge of the Broadway Tabernacle Church in New York city, and was installed on the 15th of April of that year. For some years the Tabernacle continued to be a great centre of religious interest. The vast edifice was often thronged by a congregation composed of strangers, young men, and those who had no regular place of worship. The Tabernacle Church was the mother of several Congregational churches in New York and Brooklyn. The society determined to sell the Tabernacle in 1855, and the new church was built at the intersection of Broadway, Sixth Ave., and Thirty-fourth Street. This building was completed in 1859, and dedicated April 24 of that year. Unquestionably the ministry of Dr. Thompson the society flourished exceedingly. When the society was formed, there was a debt upon it of $65,000. No pew was sold, as it was resolved that there should be no private ownership in the building. In 1868 the society paid off $25,000 of this indebtedness; the remaining sum of $40,000 was paid to the society by two of the trustees. Thompson's immediate pastoral labors, he was always busy with his pen. In 1845 he printed a Memoir of David Hale (late editor of the Journal of Commerce), with Selections from his Miscellaneous Writings—a work which passed through various editions. In 1846 appeared his Young Men Admonished, afterwards, in subsequent editions, which were numerous, entitled Lectures to Young Men. Hints to Employers appeared in 1847, and another edition in 1851. Stray Meditations was published in 1852; and in 1857 there was a revised edition, entitled The Believer's Refuge. He was one of the first to celebrate the Independence of the Tabernacle, and he continued the service with the Rev. Dr. Storrs and the Rev. Dr. Bacon. In 1852 he originated the plan of the Albany Congregational Convention. He also served as a manager of the American Congregational Union and of the American Home Missionary Society. In 1862 he went abroad, visiting Palestine, Egypt, and other Eastern lands. This gave an Oriental cast to his subsequent studies and writings, and he became well known as an authority in Egyptology. Many of his writings upon this subject appeared in the North American Review, the Bibliotheca Sacra, the Journal of the American Geographical and Statistical Society, the Appendix of the Bible, and the revised edition of Kitto's Cyclop. of Biblical Literature. He published Egypt, Past and Present, in 1856. During the Civil War, Dr. Thompson occupied a warmly patriotic position. He did a great deal for the Christian Commission. Twice he went to the South; he visited the army; and he was a member of the Union League Club. In 1872 Dr. Thompson was compelled by ill-health to sever the relation which he had so long maintained with the society. One night, while working in his study, he imagined that he heard a terrible crash, as if the whole house were falling, and he remembered nothing more until he regained consciousness. He was in bed in the morning, and resigned his pastoral charge of the Tabernacle Church, it made him a gift of $30,000, and individuals gave him $20,000 more. Having resolved upon going abroad, he took up his residence in Berlin, where he devoted himself to study, especially in Egyptology. During the controversy between Bismarck and the other ministers, he was a constant visitor, and the request of the Prussian minister, he prepared and published a work on the relations of Church and State in America; and in the Centennial Year he delivered in different cities of Europe several addresses concerning the United States. His oration occasioned by the death of Mr. Bayard Taylor was highly commended in Berlin, was a beautiful and much-admired production. He had prepared an address to be delivered before the Evangelical Alliance at Basle, Switzerland, on the subject of the persecutions in Austria. When Mr. Taylor died, Dr. Thompson was spoken of as his successor. It is known that when the rumor reached his ears, he wrote that he could not accept the position, and considered himself unfit for it. He spoke excellently both French and German, and he frequently had occasion to employ his accomplishments as a linguist in the public addresses which he delivered in Europe. Though the German address which he delivered in Berlin was caused by an accident which had happened to him during his visit to London, when, while standing upon the doorstep of a friend's house, he was prostrated by vertigo, severely injuring his head. He died at Berlin, Sept. 20, 1873. Among his other productions may be noted: The Presbyterian Institution (1859): — Love and Penalty (1860): — Bryant Gray (1863): —
Christianeity and Emancipation (1865) — The Holy Conqueror (1866) — Men in Genesis and Geology (1869) — Life of Christ (1875) — with a great variety of pamphlets and contributions to periodical literature. He was understood, at his death, to be preparing a work on The Hebrews in Egypt. See N. Y. Tribune, Sept. 22, 1879.

Thompson, Joseph Russell, a Presbyterian minister, was born Sept. 15, 1823. He received a good academical training, graduated at Jefferson College in 1846, and at the Associate Theological Seminary at Ohio in 1851; was licensed to preach in the Associate Presbytery of Chartiers in 1852, and ordained and installed pastor of the Mount Pleasant Church April 25, 1853. He died Dec. 16, 1861. Mr. Thompson was a popular preacher, a constant worker, and a tender and thoughtful pastor. See Wilson, Pref., Hist. Almanac, 1863, p. 265.

Thompson, Lewis, a Presbyterian minister, was born at Volney, N. Y., April 25, 1830. After receiving a classical education, he entered the Union Theological Seminary in 1854, and, completing the course, graduated in 1857. He was ordained and installed pastor of the Church in Whippsey, N. J., June 5, 1857. He remained in this charge until 1875, when he accepted a call to the Foval Baptist Church at Niagara Falls, N. Y., and was licensed by the Associate Presbytery at Buffalo in 1869. He continued his active service in the Baptist Church until 1869, when he resigned to become editor of a religious paper in Bricksburg, N. J. He occupied this post for two years, and then removed to Brooklyn, N. Y., and became a classical teacher, in the occupancy of which position he died, April 19, 1878. (W. F. P.)

Thompson, Otis, a Congregational minister, was born in 1773, and was a graduate of Brown University in the class of 1798. After his graduation he was a tutor in the university for two years (1798-1800). Having pursued his theological studies with Dr. Emmons, of Franklin, Mass., he was settled for life as pastor of the Congregational Church in Rehoboth. For many years he was the accredited moral and religious educator of the community. He united, on profession of his faith, with the Chartiers Presbyterian Church, Washington Co., in 1827. He was graduated from Jefferson College in September, 1830, and passed from college immediately into Prince- ton Theological Seminary, N. J., where he spent two and a half years (1830-35) in study. He was licensed by the Presbytery of Philadelphia, April 19, 1835; and was ordained by the same presbytery, sine tuto, in the Great Valley Presbyterian Church, Oct. 7, 1833. Mr. Thompson spent the first two years of his ministry (from June 1, 1835, to June 1, 1855) as stated supply at Forkridge, Westchester Co., N. Y., where his labors were so appreciated by the believers that he was invited to the Yorktown church and accepted a call to Yorktown, N. Y., he was installed as pastor of the Church at that place, May 18, 1836; and after a most successful pastorate of ten years, having accepted a call to Tariffville, Conn., was released Feb. 5, 1846, and was installed pastor of the Church at Tariffville, March 17, 1846. There he labored with ability and fidelity six and a half years, when, his health becoming impaired, he was released by his presbytery, Sept. 30, 1852, and removed to Wisconsin. His next field was Racine, Ill., where he preached as stated supply from Oct. 8, 1852, to Oct. 8, 1856, and 1857. In 1856 he was supplied, for longer or shorter periods, as his health permitted, the churches of Rockford, Roscoe, Belvidere, and Willow Creek, Ill.; and Janeville and Brodhead, Wis. From July 1, 1862, he supplied Willow Creek Church for two years, when, having accepted a call from that Church, he was installed as pastor, July 6, 1864; and labored there very usefully until he was released, Nov. 16, 1868. He next preached as stated supply at Brodhead from Dec. 5, 1869, to Oct. 9, 1871. A few weeks after the latter date he removed to Greely, Col., to take charge as pastor of a newly organized Presbyterian Church, but was never installed, although he continued as pastor elect to fill its pulpit until March 1, 1877. From this time he was without any charge, but continued to be, so far as his age and increasing physical infirmities would permit, active in laying the foundation both of the Church and of the State in that new region, which he entered, March 19, 1875. Mr. Thompson's views of truth were clear and strong, and his voice gave no uncertain sound. As a preacher he was solid and able, at the same time earnest and affectionate; as a presbytery he was unsurpassed in Christian uprightness; as the head of a family he tenderly loved, and was beloved. (W. F. S.)

Thompson, Samuel, a Methodist Protestant minister, was born on the rocky shores of Maine, Oct. 5, 1792; he was converted in 1802, and at once began to preach. Three years later he was ordained deacon, and, after two more, elder. In 1812 he was located, and in 1816 removed to Wheeling Creek, W. Va., where he spent six and a half years, and then with the Methodists of Phila- delphia Episcopal Church, and united in the movement that eventually resulted in the Methodist Protestant Church. For fifteen years he labored to build up this new branch of the Methodist denomination, when from conscientious impulses he united with others in raising an anti-slavery Church (the Wesleyan). In 1816 he removed to Iowa, and continued in connection with the Wesleyans until 1860, when, learning of the anti-slavery element in the Methodist Protestant Church, he united with them at Mount Pleasant, Pa., and continued to labor in their interest till his death, Oct. 24, 1867. See Bas- wett, Hist. of the Meth. Prot. Church, p. 549.

Thompson, Samuel E., a Methodist Episcopal minister, was born in Westmoreland County, Pa., March 16, 1786, and carefully instructed in the principles of the Christian religion according to the views of the Presbyterian Church. In 1804 he joined the Methodist Episcopal Church, and was received on trial in the Western Conference, 1806, and from 1806 to 1818, a period of twenty-seven years, his field of labor in successive years embraced large portions of the states of Ohio, Indiana, Kentucky, and the whole of the territories of Missouri and Illinois. In all this vast region he first assisted to plant the principles of the Gospel, and afterwards continued to cultivate them in the most labious district. In 1836, his health failing, he was compelled to take a superannuated relation, and, as such, for the next four years he served the Church in the stations of Alton, Vandalia, Hillsborough, and Belle- ville. In 1840 he was again returned effective, and appointed to the South Illinois Conference, but died (March 19 of that year). He was a minister of fine abilities, and every- where he breathed the peaceful spirit of Christianity around him. See Minutes of Annual Conferences, iii, 596.

Thompson, Thomas, a Methodist Episcopal minister, was born in Beaver County, Pa., attended at a camp-meeting at Sheffield, and was preaching when the Rev. William Swaze; admitted on trial in the Pittsburgh Conference in 1831, and appointed to Leesburg Circuit. He labored as follows: Centreville, Mercer, Newcastle, Richmond, Salem, Lumberport, and Grandview. In 1843 he became a supernumerary, and in 1849 a superannuate. He died (March 1811). See Minutes of Annual Conferences, iv, 692.

Thompson, William, an eminent English Wesleyan preacher, was born in the county of Furneabgh-
Ireland, in 1738. He was converted young, and in 1757 he commenced his ministry among the Methodists. In 1758 he went to England, and soon learned what kind of a work it was which he had undertaken. On one occasion, when Mr. Thomson was preaching in a chapel, instigated by a minister of the Church of England, arose and carried him and the principal Methodists on board a transport which was ready to sail with a war-ship, England then being engaged in war on the Continent. Through the exertions of Lady Huntingdon, however, the government ordered their release, and Mr. Thomson laboured in Somerset, but with little success. After 1762 he travelled some of the principal circuits in England. His last was Manchester. He died at Birmingham, May 1, 1799, of a disease the seeds of which had been sown in 1754 by sleeping in a damp bed—an indecruption which killed many of the early Methodist preachers. William Thomson was one of the men who piloted the bark of Methodism through the troublous waters after the death of the great helmsman, Wesley. He was a man of that calmness, sagacity, and statesmanlike cast of mind which are so much needed at that time, and which led to his preservation as a preacher in the British Conference (1791) after Wesley’s death. He was one of the committee appointed to converse with Kilham. With the endowment of Benson, Bradburn, Hopper, and others, he sent out the Hallifiz Circular, which marked out a basis for the preservation and government of the infant church, and in his day his views were the state of the connection. He arbitrated in regard to the settlement of the Bristol disputes in which Benson was embroiled; he approved Mather’s Letter to the Preachers; and he gave to Methodism its distinct meetings and Plan of Pacification. He was one of the ablest speakers and closest reasoners in the British Conference. Fewer traces,” says Bunting (in his Life of his father, Jabez Bunting, ch. vi), “are to be found of him than of any of his eminent contemporaries. My father used to speak of the old man’s gravity of speech, spirit, and demeanor, and of the advantages he himself derived from his connection with the ministry.” See Atmore, Meth. Memorial, s. v.; Minutes of Annual Conferences, 1799; Stevens, Hist. of Methodism, iii, 25, 33, 140; Memoir of Entwistle, ch. iii; Smith, Hist. of West. Meth. Edinb., vol. i, ii (see Index, vol. iii).

Thomson, William J., a clergyman of the Reformed Episcopal Church, a classical teacher of high reputation, was born at Readington, N. J., March 8, 1812. He was the grandson of John Thomson, a Scotch immigrant who was killed by the Indians near Williamsport, Pa. After graduating at Rutgers College in 1834, he taught successfully at Millston, N. J., until 1838, when he began to pursue the usual course of study in the Theological Seminary of the Reformed Church. He entered the ministry in 1841, and was settled over the churches of Ponds and Wyckoff, N. J., for three years (1842–45), when he accepted the position of rector of the Grammar-School of Rutgers College. He held this important place eighteen years (1845–63), when he resigned and became principal of the Somerville Classical Institute. He died in 1867. He was a thorough student, scholar, and teacher. His standard of education was high; his drill incessant, exacting, and minute. He was never satisfied till his pupils had been thoroughly familiar with their subjects. He was also tutor in the classics in Rutgers College (1838–41), during his seminary course. Hundreds of his students have passed successfully into the learned professions and other honorable callings. A paralysis of the right side, which afflicted him at four years of age, and during his whole life, interfered materially with his efficiency, but did not affect his voice or mental powers. He was an enthusiastic teacher, sometimes stern and severe in discipline, but always conscientious, capable, and successful in dealing with intelligent scholars who wished to learn. His mind was clear and logically exact; his knowledge was always at command. His character was distinguished for unwielding uprightness and an honorable spirit; his attainments in the sacred languages and theology were large and accurate. As a preacher, he was plain, without any ornamentation of style or force of delivery, but had a winning and unaffected sympathy. See Corwin, Manual of the Ref. Ch. p. 492. (W. J. R. T.)

Thomson, Andrew, D.D., a Scotch Presbyterian minister, was born at Sanquhar, Dumfriesshire, July 11, 1779, and educated at the University of Edinburgh. He was pastor of the Church at Sprowton, Roxburghshire, from 1802 till 1808; afterwards of the East Church of Perth till 1810; subsequently of the New Greyfriars’ Church in Edinburgh; and finally of St. George’s Church, until his death, Feb. 9, 1831. Dr. Thomson was a man of uncorruptible zeal, untiring energy, and commanding eloquence. He attacked the British and Foreign Bible Society for circulating the Apocrypha with the Holy Scriptures. He opposed the abuses of lay and clerical government in the Kirk, and denounced British colonial slavery and other evils, and did much to promote education, morality, and evangelical religion in Scotland. Dr. Chalmers says of him, “His was no ordinary championship; and although the weapons of our spiritual warfare are the same in every hand, we know that there were none who made them more vigorously than he did, or who, with such an arm of might, and voice of resistless energy, carried, as by storm, the convictions of his people.” Among Dr. Thomson’s works are, Lectures, Expository and Practical, on Selected Portions of Scripture (Edinb., 1816, 2 vols. 8vo);—Sermons on Infinity (1821, 18mo; 1824, 4to);—Sermons on Hearing the Word (1825, 18mo);—The Scripture History (Bristol, 1826, 12mo);—The Scripture History of the New Testament (London, 1827, 12mo);—Sermons on Various Subjects (Edinb., 1829, 8vo);—Doctrines of Unscriptural Pardons, Being Sermons with Notes (Edinburgh, 1830, 12mo). He also published a number of tracts for Catechisms, educational and religious works for children. He originated and edited the Edinburgh Christian Instructor (1810 sq.), and contributed to the Edinburgh Encyclopaedia. After his death appeared his Sermons and Speeches in the Kirk, prefixed (1831, 8vo; Boston, 1882, 12mo). See Chambers and Thomson, Bpog. Dict. of Eminent Scotsmen. (W. P. S.)

Thomson, Edward, D.D., a bishop of the Methodist Episcopal Church, was born at Fortescue, England, Oct. 12, 1810, and, with his father’s family, came to America in 1818, settling, in 1820, in Wooster, O. He studied medicine at the University of Pennsylvania, receiving his degree in 1825, and, in nineteen months, commenced his practice. In December, 1831, he was converted, and, although brought up a Baptist, entered the Methodist Episcopal Church, and was admitted into the Annual Conference in 1832. After filling appointments in Norwalk, Sandusky City, Cincinnati, and Wooster, he was elected to the Miami Conference, and stationed at Detroit. From 1838 to 1843 he had charge of the Norwalk Seminary; in 1844 he was elected editor of the Ladies’ Repository; in 1846 president of the Ohio Wesleyan University, where he remained till 1890, when he was elected editor of the N. Y. Christian Advocate and Review. In 1856 he was elected to the office of bishop, in which capacity he made his first official visit to India. He died of pneumonia at Wheeling, W. Va., March 22, 1870. His published works are, Educational Essays (new ed. by D. W. Clark, D.D., Cincinnati, 1856, 12mo);—Letters from Europe: Moral and Religious, Geographical and Incidental (new ed., New York, 1850);—Allibone, Dict. of Brit. and Amer. Authors, s. v.;—Simpson, Cyclop. of Methodism, s. v.

Thondracians, an Armenian sect, founded by Semat about A.D. 840, and taking its name from Thondrace, where it was established himself. A Paulician by birth and education, he formed the acquaintance of Medusian, a Persian physician and astronomer, whose influence led him to attempt a combination of Parseeism
and Christianity. This sect, though meeting with no favor from the bishops, continually revived, and spread widely in Armenia. At one time in particular, about A.D. 1002, it made the most alarming progress, when it was regarded with alarm by the patriarch of the prelacy of Harkh. He was noted for the austerity of his life, and both he and his followers denounced the false confidence which was placed in masses, oblations, alms, and Church prayers; and he declared himself opposed to the animal sacrifice in the Armenian Church. He was taken by the oath-holders, branded with the heretic mark, proclaimed a heretic, thrown into a dungeon, from which he escaped, but was finally killed. Many of the reports respecting the doctrines and morals of the Thondracians, coming as they do from their enemies, are doubtless false, or at least exaggerated. See Neander, 

"Thor, the god of thunder, in Northern mythology, was, next to Odin, the highest and most feared of the gods. His parents were Odin and Frigg. His wives were the beautiful gold-haired Sif, by whom he had two sons, Lóride and Mod; and the Jötes maiden Jarnsaxa, a giantess, as such beauty that Thor, although the sworn enemy of the Jötes, could not refrain from making her his wife. She bore him his favorite son Magni, who was most like his father in courage and strength. Terrible is the flight of Thor through the heavens, rolling, thundering behind the clouds. Still more terrible is his blow, which, when he strikes his girdle against him, which gives him double strength. Thus ready, grasping with his iron gloves the hammer Mjölnir, he appears as an annihilator among the enemies of the gods. Thor's kingdom is called Thrydvangr; and the palace in his realm, Bilskirnir, is the largest that was ever built, and contains five hundred and forty halls. There is no one so wise as to be able to state all of Thor's deeds, and a day would be too short to mention them all. The most remarkable, however, are the following: In company with his two bucks and the evil Loki, he made a journey. Towards evening they came to a certain man who asked for a night's lodging. Here Thor killed his bucks and ordered them to be fried, and then invited his host and family to partake of the repast, warming them, however, not to devour the bones, but to place them on the spread-out hides of the bucks. Before starting farther on his journey the following morning, they found that the hides of the bucks were already covered with the hides of his master hammer, and the bucks immediately came to life, fresh and young, with the exception that one of them limped, because Thialf, the host's son, had broken the bone of his foot in order to get at the marrow. Now Thor, enraged, threatened to kill the whole family, but he also had pacified him, after the former offered him both his children, Thialf and Rökkva, as servants, whom Thor carried away on his journey. They lodged in the iron glove of the giant Utgardaloki, who accompanied Thor under the false name of Skinner, and sought to dissuade Thor from journeying towards his (Utgardaloki's) castle. However, was useless, and the trifling hindrances with which Utgardaloki sought to obstruct his path—for example, tying together his cloak-sack, in which the provisions were kept—made Thor the more zealous. Thor attempted, at different times, to break the giant's forehead, but without success. Finally they separated, and Thor continued his journey with his bucks and servants. About noon he noticed, in a large plain, a castle which was so high that it was impossible for Thor to look over it. The travellers arrived at a garden gate; and as Thor found it locked and was unable to open it, they were unable to go in. Inside they found a spacious hall, in which there were seated upon two benches a great number of giants. King Utgardaloki, distinguished by his height and dignity, sat in the centre, but he did not even notice the strangers, who saluted him. He only remarked, "This small fellow, I think, is Anakathor. Perhaps you are greater than you appear? What skillful things can you perform? In this place no one is permitted to remain who does not distinguish himself in some art or science." Loki answered him that he thought himself to be a great eater, and did not take part in the prizes. The king, amazed at the prominence of Harkh. He was noted for the austerity of his life, and both he and his followers denounced the false confidence which was placed in masses, oblations, alms, and Church prayers; and he declared himself opposed to the animal sacrifice in the Armenian Church. He was taken by the oath-holders, branded with the heretic mark, proclaimed a heretic, thrown into a dungeon, from which he escaped, but was finally killed. Many of the reports respecting the doctrines and morals of the Thondracians, coming as they do from their enemies, are doubtless false, or at least exaggerated. See Neander,

Here Thor killed his bucks and ordered them to be fried, and then invited his host and family to partake of the repast, warming them, however, not to devour the bones, but to place them on the spread-out hides of the bucks. Before starting farther on his journey the following morning, they found that the hides of the bucks were already covered with the hides of his master hammer, and the bucks immediately came to life, fresh and young, with the exception that one of them limped, because Thialf, the host's son, had broken the bone of his foot in order to get at the marrow. Now Thor, enraged, threatened to kill the whole family, but he also had pacified him, after the former offered him both his children, Thialf and Rökkva, as servants, whom Thor carried away on his journey. They lodged in the iron glove of the giant Utgardaloki, who accompanied Thor under the false name of Skinner, and sought to dissuade Thor from journeying towards his (Utgardaloki's) castle. However, was useless, and the trifling hindrances with which Utgardaloki sought to obstruct his path—for example, tying together his cloak-sack, in which the provisions were kept—made Thor the more zealous. Thor attempted, at different times, to break the giant's forehead, but without success. Finally they separated, and Thor continued his journey with his bucks and servants. About noon he noticed, in a large plain, a castle which was so high that it was impossible for Thor to look over it. The travellers arrived at a garden gate; and as Thor found it locked and was unable to open it, they were unable to go in. Inside they found a spacious hall, in which there were seated upon two benches a great number of giants. King Utgardaloki, distinguished by his height and dignity, sat in the centre, but he did not even notice the strangers, who saluted him. He only remarked, "This small fellow, I think, is Anakathor. Perhaps you are greater than
THORN

placed between you and me. When you subsequently

THORN

came to my castle and made your attempts, I selected

Vallisneria aculeata, Ruscus aculeatus, Forskalaea tencis-

simus, Aristida pungens, Salsola echiniformis, Echinops spinos-

sus, Buanas spinosa, Lycium spinosum, Poterium spinos-

um, Actaphaxis spinosa, Prenanthes spinosa, Ononis spinosa,

Salsola spinosa, Salsola spinifera, Zizyphus Spina Christi. See BOTANY.

In the morphology of plants it is now recognised

that thorns are abortive or undeveloped branches,

and in many cases under cultivation thorns become true

branches. A spine or thorn, of which we have ex-

amples in the hedgehog and the sloe, must be distinguished

from the prickles (acacia) which belong to the in-

tegumentary system of the plant, and which are really

hardened hairs. Of these last we have examples in the

bramble and the rose, and in the animal economy we have

something analogous in the spines of the hedge-

hog and the quills of the porcupine. "May we not see

in the production of injurious thorns—an arrestment by

the fiat of the Almighty in the formation of branches,

and thus a blighted passed on this part of creation—a

standing memorial of the effects of sin on what was de-

clared at first to be very good!" It is remarkable to

notice that when Christ wore a crown of thorns, the

Jews mocked him by putting on him a crown of thorns,

and thus what was an indication of the fall of man was

used by them to insult the seed of the woman who came

to bruise the head of the serpent. The removal of the

thorns which have grown and travelled in pain, is frequently set forth in the illustrations from the disappa-

reance of briars and thorns (Isa. l.v. 18;

Dr. Thomson (Land and Book, i, 81) illustrates Isa.

xxxiii, 12, "The people shall be as the burning of lime,

as thorns cut up shall they be burned in the fire," by the

following observation: "Those people yonder are cut-

ting up thorns with their mattocks and pruning-hooks,

and gathering them into a pile to be burned in these

burnings of lime. It is a curious fidelity to real life

that when the thorns are merely to be destroyed they

are not on fire where they grow. They are cut up only

for the lime-kiln" (see also ibid., p. 327 sq. for other

scriptural allusions).

1. AKANTHA (ákas-ka) occurs in Matt. vii, 16; xiii,

7, 22; xxvii, 27; and also in the parallel passages of

Mark and Luke, and as forming the crown of thorns, in

John xix. 5. The Hebrew name for the prickly

pin, now Zizyphus Spina Christi, "in all probability,

this is the tree which afforded the crown of thorns put

upon the head of Christ. It is very common in the

East. This plant is very fit for the purpose, for it has

many small and sharp spines, which are well adapted
to give pain: the crown might be made of these

soft, round, and pliant branches; and what, in my op-

inion, seems to be the greater proof is that the leaves

very much resemble those of ivy, as they are of a very deep

glossy green. Perhaps the enemies of Christ would have

a plant somewhat resembling that with which

emperors and generals were crowned, that there might be a

calamity even in the punishment." This plant is the

nebk or dhôm of the Arabs, which grows abundantly

in Syria and Palestine, both in wet and dry places. Dr.

Hooker noticed a specimen nearly forty feet high, spread-

ing as widely as a good Quercus ilex in England.

The whole fringe, or edge, of the branches in the

thorns; the marshy banks of the Lake of Tiberias; it

forms either a shrub or a tree, and, indeed, is quite com-

mon all over the country. It grows to a height of six feet

or more, and yields a slightly acid fruit, about the size

of the sloe, which is eaten by the Egyptians and Arabs.

Like its cousin the olive, it is poisonous in the twigs,

which are armed with profusion of sharp, strong
prickles, growing in pairs, the one straight, the other somewhat recurved (Tristram, Nat. Hist. of the Bible, p. 429). Some, however, have fixed upon Palmarus aculeatus, and others upon Lycium borridum, as the plant which furnished the thorny wreath in question. See Crown of Thorns.

2. AʿDūd (אֱדוֹד; Sept. ἡ βαύωσι; Vulg. rhamnus) occurs as a proper name in Gen. i, 10, 11: “the threshing-floor of Aʿdūd.” See Aʿdūd. In the fable in Judg. ix, 14, 15, the Aʿdūd, or “bramble,” is called to reign over the trees. From Ps. lvi, 9 it is evident that the Aʿdūd was employed for fuel: “Before your pots can feel the thorns.” Aʿdūd is so similar to the Arabic awṣṣ that it has generally been considered to mean the same plant, namely, a species of buckthorn. This is confirmed by atadmus being one of the synonyms of rhamnus, as given in the supplements to Dioscorides. A species of rhamnus is described both by Belon and by Rauwolf as being common in Palestine, and by the latter as found especially in the neighborhood of Jerusalem. It has been described by Alpinus as having an abundance of long branches, on which are found many long and very sharp thorns. So Rauwolf, “It puts forth long, slender, crooked switches, on which there are a great many long, strong, and acute thorns.” This has been supposed by some to be the above-mentioned true Christ's thorn, Rhamnus, now Zizyphus Spina Christi; but others place the plant in question is supposed to be Lycium Europaeum, or L. afrum (box-thorn), both of which species occur in Palestine (see Stradon, Flor. Palest. Nos. 124, 125). Dioscorides (Comm. i, 119) thus speaks of the βαύωσι: “The rhamnus, which some call persophonion, others leucosanthis, the Romans white-thorn, or cerbæs, and the Carthaginians atadus, is a shrub which grows around hedges; it has erect branches with sharp spines, like the oxyuranica (hawthorn?), but with small, oblong, thick, soft leaves.” Dioscorides mentions three kinds of rhamnus, two of which are identified by Sprengel, in his Commentary, with the two species of Lycium mentioned above. In his Hist. Rei Herb., however, he refers the βαύωσι to the Zizyphus vulgaris. See Belon, Observationes de Plnt. Sign., etc., II, lxviii; Rauwolf, Travels, III, viii; Alpinus, De Plant. Egypt., p. 21; Celsus, Hierob. i, 199.

Lycium Europaeum is a native of the south of Europe and the north of Africa; in the Grecian islands it is common in hedges (English Cyclop. s. v. “Lycium,” see also the passages in Belon and Rauwolf cited above).

3. BARKAH (בְּרָכָה, only in the plur.; Sept. Bapres-pia) occurs in Judg. viii, 7, 16, where Gideon is described as saying, “Then I will tear your flesh with the thorns (kozim) of the wilderness, and with briars (barkanim).” There is no reason for believing that briars, as applied to a rose or bramble, is the correct meaning; but there is nothing to lead us to select any one preferably from among the numerous thorny and prickly plants of Syria as the barkanim of Scripture. Rosenmüller, however, says that this word signifies “a fail,” and has no reference to thorny plants. It probably denotes the sharp stones set in the bottom of the Oriental threshing-aledge. See Bres.
31; Zeph. ii. 9), perhaps a kind of thistle. Tristram remarks (Nat. Hist. of the Bible, p. 470), "The charül would appear to be different from the ordinary nettle, since in Prov. xxiv. 81 it is mentioned along with it. It cannot be a shrub like the Zizyphus or the Pallurus, because it is evidently spoken of by Solomon as a plant of quick growth in the corn-fields. It must have been of some size, from the passage in Job, where the outcaste shelter under it. I am inclined to believe that it designates the prickly scabious (Acanthus spinosa), a very common and troublesome weed in the plains of Palestine, and equally abundant among ruins. We have often seen it in the plain of Esraelon choking the corn, and reaching to the height of six feet. Its sting is most irritating and unpleasant, and well supports the derivation of the Heb. word, ‘that which burns.’ See Nettle.

7. Chêdek (ךדפק; Sept. ἀκανθα, σῆς ιερῶν; Vulg. spina, pallurus) occurs in Prov. xv. 19, "The way of the slothful is as a hedge of chêdek (A.V. ‘thorns’)," and in Mic. vii. 4, where the A.V. has "brier." The Alexand. MS., in the former passage, interprets the meaning thus, "The waves of the slothful are strewn with thorns." Celsus (Hierob. ii. 85), referring the Heb. term to the Arabic chadhak, is of opinion that some spinous species of the solanum is intended. The Arabic term clearly denotes some species of this genus, either the S. melongena, var. esculentum, or the S. Sodomum (‘apple of Sodom’). See Vine or Sodom. Both these kinds are beset with prickles, and some species of solanum grow to a considerable size. They are very common in dry arid situations. S. spina, the S. spinosum of others, is found in Palestine. Dr. Harris is of opinion that chêdek is the Colutea spinosa of Forskål, which is called κακόδα in Arabic, and of which there is an engraving in Russell’s Nat. Hist. of Aleppo, tab. 5. See Briar.

8. Chôch (ךחות; Sept. ἀκαφεῖα, ἀκαίριος, κείριος; Vulg. palurus, lappa, spina, tribulus), a word of very uncertain meaning which occurs in the sense of some thorny plant, is rendered "thistles" in 1 Sam. xiii. 6; "brooms" in Isa. xxxiv. 13; but usually either "thistle," as in 2 Kings xiv. 9; 2 Chron. xxxv. 18 (in both which passages it is spoken of as growing on Lebanon); Job xxii. 40 (‘Let thistles grow instead of wheat,’ which shows that it was some rapidly maturing plant); or "thorns," as in 2 Chron. xxxiii. 11; Job

9. Dardar (דָּרָד) occurs in Gen. iii. 18, "Thorns also and thistles shall it bring forth to thee;” and again in Hos. x. 8, in both of which passages Dardar is conjoined with kol. The rabbins describe it as a thorny plant which they also call accoebita. The akbēt of the Arabs is a thistle or wild artichoke. The Sept. and Vulg., however, render Dardar by the word γριβόλος, tribulus, a cailrop, in both passages, and this will answer as well as any other thorny or prickly plant. See Tribulus, below.

10. Kimûdah (כימוד) or kimûdah (כימוד) occurs in Isa. xxxiv. 13; Hos. ix. 6, in both which passages it is spoken of as occupying deserted and ruined sites, and is translated "nettles." Another form of the word, kîmûdashan (כימודש), occurs in Prov. xxiv. 31, where it is used in connection with charul as descriptive of the neglected field of the sluggard, and is translated "thorns." All commentators agree that this is the sting-nettle (urtica), of which there are several varieties in Palestine. The most common is Urtica pilulifera, a tall and vigorous plant, often six feet high, the sting of which is much more severe and irritating than our common nettle. It particularly affects old ruins, as near Tell Hum, Belsan, and the ruined khan by the bridge over the Jordan, and forms a most annoying obstacle to the explorer who wishes to investigate old remains" (Tristram, Nat. Hist. of the Bible, p. 474). The ordinary nettle is a well-known wild plant, the leaves of which are armed with stings, connected with a small bag of poison; and when the leaves are slightly pressed by the hand, the stings penetrate the flesh, force in the poison, and pro-
duce a swelling with a sharp burning pain. The leaf, when wet or dead, does not possess this power. The presence of nettle betokens a waste and neglected soil. See NETTLE.

11. Kôrâ (κόρα) occurs in several passages of Scripture (Exod. xxii, 6; Judg. vii, 16; 2 Sam. xxiii, 6; Ps. cxviii, 12; Isa. xxxii, 12; xxxvi, 12; Jer. iv, 2; xiii, 12; Ezek. xxviii, 24; A. V. invariably “thorn”); in two (Gen. iii, 18; Hos. x, 8) it is mentioned along with dârdârâr, where the two words may be considered equivalent, respectively, to the English thorn and thistles. The Sept. translates it in all the passages by ἀκανθά, and it probably was used in a general sense to denote plants which were thorny, useless, and indicative of neglected culture or deserted habitations, growing naturally in desert situations, and useful only for fuel. But if any particular plant be meant, the ὀμνίς spinosi- su, or “rest-harrow,” mentioned by Hasselquist (p. 280), may be selected as fully characteristic: “Spinosisimus illa et permiscosa planta, campos integros tegit. Egypti et Palestinae. Non dubandum quin hanc indicaverint in aliquo loque scriptores sacri.”

12. Naâtaštâs (נָתַס) occurs only in two passages of Isaiah, in both of which it is translated “thorn” in the A. V. Thus (vi, 18, 19), “Jehovah shall hias for the fly that is in the uttermost part of the rivers of Egypt, and for the bee that is in the land of Assyria; and they shall come, and shall rest all of them in the desolate valleys, and in the holes of the rocks, and upon all the thorns” (naâtaštâs; Sept. πυκάς; Vulg. frutet- tum). By some this has been translated cretices; but that it is a plant of some kind is evident from lv, 13: “Instead of the thorn (naâtaštâs; Sept. σταφύλι; Vulg. salicisus) shall come up the fir-tree, and instead of the brier shall come up the myrtle-tree.” Some have understood it generally as thorn, shrub, thorny shrub, small tree, or thicket. Others have attempted to define it specifically, rendering it bramble, white-thorn, etc. (Celsius, Hierob, ii, 190); but nothing certain has been determined respecting it. Celsius endeavors to trace it to the same origin as the Arabic nazz, which he states to be the name of a plant of which the bark is employed in tanning leather. The meaning of the term, he continues, in Chaldee, is tâfgrâs, dâfgrâs, “to stick into” or “fix,” and it is therefore supposed to refer to a prickly or thorny plant. R. ben-Melech says that comments explain naâtaštâs by the Arabic word stîr, which is the name of a well-known thorny bush of Eastern countries, a species of Zizyphus. This, Sprengel says, is the Z. vulgaris, found in many parts of Palestine, as well as in many of the uncultivated tracts of other Eastern countries. Other suppose the species to be that of the Arabs, which is the Zizyphus lotus, and considered to be the lotus of the ancients. But from the context it would appear that the plant, if a zizyphus, must have been a less highly esteemed variety or species. But in a wild state these are very abundant, bushy, prickly, and of little value. Belon says: “Les arbres, pour la plus part, sont de tamarisques, cenopilia (i.e. zizyphus) et rhamnes.” In Freytag’s Arabic Lexicon the above Arabic word nazz is said to be the name of a thorny tree, common in the Hejaz, the bark of which is used in tanning hides, and from whose wood a denti- frice is prepared. This might be a species of acacia, of which many species are well known to be abundant in the dry and barren parts of Syria, Arabia, and Egypt.

13. Sânânâ (סנהן) occurs (in the plur.) only once (Exek. ii, 6) as a synonym of sâlâmôn, and is thought by many (the rabbins Castell, Fürst, etc.) to denote a thorny plant (A. V. “brier,” as cognate with sârî; but Celsius (Hierob. ii, 229) contends that it simply means rebellâs in Arabic, which is the Chand. ṣânân, to resist). It occurs in the feminine plur. form sânkōth (סנקות) in Job xii, 7, where it is translated “barbed irons.” Its resemblance to the Arabic âkkâ, thorn, sufficiently indicates the probability of its meaning something of the same kind.

15. Sâkînî (סקין) occurs in the well-known passage of Exod. iii, 2, where the angel of the Lord appeared unto Moses in a flaming fire out of the midst of a “bush” (mâdâh); the bush was not consumed. It occurs also in ver. 3 and 4, and in Deut. xxxiiii, 16, with reference to the same event. The Sept. translates senûth by bâróq, which usually signifies the rubus, or brambles; so in the New Test. bâróq is employed when referring to the above miracle of the burning bush. Bâróq is likewise used by Josephus, Philo, Clemens, Eusebius, and others (see Celsius, Hierob. ii, 58). The monks of the monastery of St. Catherine on Mount Sinai have a species of rubus planted in their garden near their Chapel of the Burning Bush; but this cannot be considered as any proof of its identity with the senûth from the little attention which they have usually paid to correctness in such points. Bové says of it, “C’est une espèce de Rubus, qui est voisin de notre R. fruticosus.” The species of rubus (our blackberry) are not common either in Syria or Arabia. Rubus sanguis, the holy bramble, is found in Palestine, and is mentioned by Dr. Russell as existing in the neighborhood of Aleppo, and Hasselquist found a rubus among the ruins of Scanderetta, and another in the neighborhood of Seide. It is also found among the ruins of Petra (?) (Caelcot). Celsius and others quote Hebrew authors as stating that Mount Sinai obtained its name from the abundance of these brambles (mâdâh). “D’autre part les Sinaï de nomine ejus.” But no species of rubus seems to have been discovered in a wild state on this mountain. This was observed by Pococke. He found, however, on Mount Horeb several hawkweed bushes, and says that the holy bush was more likely to have been a hawkweed of some kind. It is also probable that the spot where the phenomenon was observed, being a sequestered place and affording excellent pasture, whereas near the Chapel of the Holy Bush not a single herb grows. Shaw states that the Ozycocanthus A rubicus grows in many places on St. Catherine’s Mountain. Bové says, on ascending Mount Sinai: “J’ai trouvé entre les re-
Acacia surrounded by a Brier Bush in Wady Saal, near Sialu. (From a photograph by the Editor.)

Cher de granit un mespilus voisin de l'oxyacantha.” De Robinson mentions it as called zurus; but it is evident that we cannot have anything like proof in favor of either plant. Tristram remarks (Nat. Hist. of the Bible, p. 438), “The seneh denotes some particular kind of bush, and appears to be equivalent to the Egyptian senb, the Acacia Nilotica, very like the Acacia seyal, or skittah tree, but smaller and closer in growth. The A. Nilotica is common in the Peninsula of Sinai, which mountain is by some conjectured to have derived its name from the seneh bush.” But as there is no etymological connection between the Arabic sun (which is the same as skittah [q. v.]) and the seneh, and as the latter is a distinctive term, the basis of the identification of the latter with the acacia entirely fails, especially as the Sept. so constantly understands the burning bush to have been a thorn-like plant; moreover, had it been the well-known tree that yielded the shittim wood, we can see no reason for the use of a peculiar or different term to designate it. It was evidently not a tree at all, but a low bush, probably one of the many species of annual thorny plants still abounding on the mountain, and which, growing in the rainy season, remain dry and bare during the summer. Hence the surprise of Moses that the highly combustible object was not consumed. The writer was struck with the habit of his native guide on Mount Sinai, who constantly set fire to these bushes as he met them. See Bush.

16. Shamir (םשָׁמִיר) occurs in all the same passages as the next word, shaphith, below, wit. the addition also of Isa. xxxii, 13: “Upon the land of my people shall come up thorns (kottam) and briers” (shamir). It is variously rendered by the Sept., yi-pe'roq, yi-piroq, riphoc, epiroros, eporos. According to Abulfed, cited by Celsius (Hier. ii, 188), “the sumur of the Arabs is a thorny tree; it is a species of Sidera which does not produce fruit.” No thorny plants are more conspicuous in Palestine and the Bible lands than different kinds of Rhamnusae. The Arabs have the terms Sisam, Sidra, Dhal, Nakhen, which appear to denote either varieties or different species of Paliurus and Zizyphus, or different states, perhaps, of the same tree; but it is a difficult matter to assign to each its particular significance. Dr. Tristram states that “the Arabs of the Jordan valley confine the same sumur to the Paliurus aculeatus, or Christ's Thorn” (Nat. Hist. of the Bible, p. 428).

17. Shaphith (שָׁפִית) occurs in several passages of Isaiah (v, 6; vii, 23, 24, 25; ix, 18; 17; xxvii, 4), in all of which it is associated with shamir, the two being translated thorns and briers in the A. V. From the context of the whole passages, it is evident that some weed-like plants are intended, either of a thorny or prickly nature, or such as spring up in neglected cultures and are signs of desolation, and which are occasionally employed for fuel. Nothing has, however, been ascertained respecting the plant intended by shaphith, and consequently it has been variously translated in the several versions of the Scriptures. Gesenius thinks it is etymologically connected with the shittah tree (i. e. מְשָׁפֵית). See Shittah.

18. Sallon (סילון) occurs in Ezek. xxviii, 24: “And there shall be no more a prickling brier (sallon) unto the house of Israel, nor any grieving thorn (kotten).” The Sept. here has שָׁלוֹן and the Vulg. officinale. So also Sallon (סילון) occurs (in the plur.) in Ezek. iii, 6: “Though briers (sarabim) and thorns (sallim) be with thee.” The Sept. and Vulg. here render both words vaguele (Ἐρυθρόσεπτυαν και ἐρυθροσεπτυαν, εἰκεδυλίῳ et subversores). Several Arabic words resemble it in sound; as sil, signifying a kind of wormwood; sileh, the plant Zilla Myogram; silleh, the rpyoc of the Greeks, supposed to be Solodra kaki and S. tragus; milal or silem, which signifies the thorn of the date-tree, while the Chaldee word sileh signifies a thorn simply. It is probable, therefore, that sallon has something of the same meaning, as also sallim; but neither the context nor the etymology affords us a clue to the particular plant. Tristram, however, states that “the Arabic word sallmus is applied to the sharp points on the ends of the palm-leaf, and also to the butcher’s-broom (Ruscus aculeatus), a plant common enough in many parts of Palestine” (Nat. Hist. of the Bible, p. 431).
THORN IN THE FLESH

THORN (Ruscus aculeatus).

19. Sfr (ןש) occurs (in the plur.) in several passages, e. g. in Eccles. xii, 6, "as the cracking of thorns (סירם) under a pot," etc.; Isa. xxxvi, 14, "And thorns (סירם) shall come up in her palaces," etc.; Hos. xi, 6; Amos iv, 2; Nah. i, 10. The Sept. and other translations have employed words signifying thorns as conveying the meaning of סירם; but the etymology does not lead us to select one plant more than another.

20. סירד (בין) is mentioned only once as a desert shrub (Esa. iv, 13), "And instead of the brier (שורד, Sept. κοκυνίῳ, Vulg. urtica) shall come up the myrtle." Though this has generally been considered a thorny and prickly plant, it does not follow from the context that such is necessarily meant. It would be sufficient for the sense that some useless or insignificant plant be understood, and there are many such in desert and uncultivated places. In addition to Palustus cor- dus, Urtica, Conyza, species of Polygonum, of Euphorbia, etc., have been adduced; and also Ruscus aculeatus, or butcher's-broom. The etymology of the word is obscure.

21. Tribulus (ῥύπολος), Lat. tribulus, is found in Matt. vii, 16, "Do men gather figs of thistles?" (ῥυπολοι); and again in Heb. vi, 8, "But that which beareth thorns and briers (ῥυπολοί) is rejected." The name was applied by the Greeks to two or three plants, one of which was, no doubt, aquatic, Trapa natans. Of the two kinds of land tribulus mentioned by the Greeks (Dioscorides, iv, 15; Theophrastus, Hist. Plant. vi, 7, 5), one is believed by Sprengel, Stackhouse, Royce, and others to refer to the Tribulus terrestris, Linn., the other is supposed to be the Fagonia Cretica; but see Schneider's commentary on Theophrastus, loc. cit., and Du Molin (Flora Politeque Antiquae, p. 305), who identifies the tribulus of Virgil with the Centarea calciolus, Linn. ("star-thistle"). Celsius (Hercub. ii, 129) argues in favor of the Fagonia Arborea, of which a figure is given in Shaw, Travels (Catal. Plant. No. 229); see also Forskål, Flor. Az. Arab. p. 88. Both or nearly allied species are found in dry and barren places in the East; and, as both are prickly and spread over the surface of the ground, they are extremely hurtful to tread on. The word ῥυπολος is further interesting to us as being employed in the Sept. as the translation of daradar (above). The presence of species of tribulus indicates a dry and barren uncultivated soil, covered with prickly or thorny plants. The Tribulus terrestris, however, is not a spiny or thorny plant, but has spines on the fruit. The Greek word means literally "three-jointed," and is denoted the caltrap, or military crow-foot, an instrument composed of three radiating spikes, thrown upon the ground to hinder and ammoy cavalry (Veget. iii, 24; Plutarch, Moral. ii, 76). See WINK.

22. סֵפֶן (קִנ) or Tsēn (ץךנ) occurs (only in the plur.) in several passages of Scripture, as in Numb. xxxiii, 55; Josh. xxiii, 18, where it is mentioned along with שק (סֵפֶן); also in Job v, 5, and Prov. xxvii, 5. Both are invariably rendered "thorns" in the A. V. The Sept. has ῥυπολος in Prov. xxvii, 5, and βολιδις in Numb. xxxiii, 55 and Josh. xxiii, 13. It has been supposed that סֵפֶן might be the Eranthus palustris, but nothing more precise has been ascertained respecting it than of so many other of these thorny plants. We may therefore, with Michaelis, say, "Nullum simile nomen habent relique lingue Orientales; ergo fas est sapienti, Celsio quoque, fas sit et mihi, aliquid ignorare. Ignorantiae professo via ad inveniendum verum, si quis in Oriente quesierit." See also THORN-HEDGE.

THORN IN THE FLESH (σελόφοι τῷ σαρκϊ), an intonation ("a messenger of Satan to buffet me") mentioned in Luke xxii, 31, and originally of the Jewish practice (2 Cor. xii, 7). The expression has called forth very many, and some very absurd, conjectures (see the commentators, ad loc.), which may be resolved into the following heads, the first two of which are, from the nature of the case, out of the question:

1. Spiritual Temptations. Many have thought that the apostle refers to diabolical solicitations ("interjections Satans"), such as blasphemous thoughts (so Gerso, Luther, Calovius), or remorse for his former life (Osiander, Mosheim, etc.), or—according to Roman interpreters who seek a precedent for monkish legends—incombinations to lust (so Thomas Aquinas, Bellarmino, ESTUS, Corn. a Lapide, etc.). These are all negative, not only by their intrinsic improbability, but by the qualification "in the flesh."
THORN, CONFERENCE OF 385

adopted by very many, who differ, however, as to the particular aim. The ancients (Chrysostom, Theophylact, Gennadius, Jerome, on Gal. vi, 14) mention him as a man without assigning any special ground for the conjecture. Some have supposed hypochondriacal melancholy, which, however hardly answers the conditions of a σκυλός, whereby acute suffering seems to be implied. So of other speculations, for which see Poli Synopsis, ad loc.

On the whole (remarks Alford, ad loc.), putting together the figure here used, that of a thorn (or a pointed stake, for σκυλος primarily signifies [see Xenoph. Anab, v, 2, 5], occasioning pain, and the σκυλφυτος, or buffeting (i.e. perhaps putting to shame), it seems quite necessary to infer that the apostle alludes to some distress and ignominy of which he had at the same time caused him mortification before those among whom he exercised his ministry. Of such a kind may have been the disorder in his eyes, more or less indicated in several passages of his history (see Acta xiii, 9; xxiii, 1 sq.; Gal. iv, 14; vi, 11). But as affections of the eyes, however sad in their consequences, are not usually (certainly not to all appearance in the apostle's case) very painful or distressing in themselves, they hardly come up to the intense meaning of the phrase. Paul was therefore probably troubled with some internal disease of which the marks were evinced only in languor and weakness of body. This, and not the disposition to "bear about in their body" some token of mental frailty. See, in addition to the monographs cited by Volbe- ding, Index Programmatum, p. 81; and by Danz, Wörterbücher, p. 567, Bagot, Thorn in the Flash (Lond. 1840); Princeton Review, July, 1885. See Paul.

THORN, CONFERENCE OF, also known as "the Charitable Conference" (Colloquium Charitatis), was one of those efforts to clear away the differences between the several bodies of Christians, with a view to religious reunion, of which the 17th century furnishes more than one example. It was appointed in the city of Thorn, in October, 1645, by Ladislaus IV, at the suggestion of the Reformed preacher at Dantzic, Bartholomew Negri- nus, who had become a Catholic, and persuaded the king that such a conference would be attended with good results. At this all religious parties were to appear and confer together on religion, and come to an agreement. On the side of the Lutherans, some Saxion divines of Wittenberg, especially, were invited from Germany; for although they had been accursed as such by the head of the German theologians. The Königsberg divines were accompanied and assisted by Calixtus of Brunswick, who had been invited by elector Frederick William. His con- duct and the question of precedence between the Königs- berg and the Dantzic divines occupied the entire time of the conference, which broke up without any result, Nov. 21, 1645. The official account of the proceedings of the conference are printed in Calvius, Historia Synodetical- ca. See also Schröck, Kirchengeschichte seit der Reforma- tion, iv, 509; Mosheim, Ecclesiast. iii, 295, 309, 373, note.

THORNHYLE, HERRICK, a learned English divine, was educated in Trinity College, Cambridge, and became proctor of that university in 1638. In July, 1642, he was made and recitory of St. John's College, Cambridge, but was prevented from occupying that position, it being secured by a Mr. Min- shall. Later he was ejected from his living of Barley. At the Restoration he was replaced in this living, but resigned it in 1662. He died July 16, 1672. He assisted Dr. Walton in the edition of the Polyglot Bible, particularly in marking the variations in the Syriac version of the Old Test.; and wrote several treatises: A Discourse concerning the Primitive Form of the Government of Churches (Camb. 1663), The Public Charities and the Public Service of God (ibid. 1649, 8vo):—A Discourse of the Rights of the Church in a Christian State, etc. (Lond. 1649, 8vo):—Just Weights and Measures, i.e. the Present State of Religion weighed in the Balance, etc. (ibid. 1653, 4to):—A Discourse of the Forbearance of the Penal Laws, etc. (ibid. 1670):—An Essay to Popularize the English etc. (ibid. 1670):—also his famous book, An Epilogue to the Tragedy of the Church of England (ibid. 3 parts, 1670).

Thorn-hedge (θυρωμα, mensklad; for σκυλος, or perhaps simply from the interlacing of the briers; Sept. καραμελγαυ; Vulg. sepe), a hedge-row of thorny plants (Mic. vii, 4). The formidable character of the thorny thick- etes in Palestine is noted by almost every traveller. Near Jericho Mr. Tristram records as the principal tree "the Ziziphus spinosa Christi, growing twenty or thirty feet high, and with a stem four or five inches in girth, having long, pointed, and rather reflex thorns—a true wait-a-bit tree. No one can approach it with impunity unless clad in leather; and in three days the whole party were in rags from passing through the thickets" (Land of Is- rael, p. 202). In the same way Messrs. M'Cheyne and Bowes mention how Dr. Keith was baffled in his at- tempt to climb a vertand-looking hill by "strong briers and thorns," through which he found it impossible to force a passage. They add, "Some time after, when sailing up the Bosphorus, conversing with a gentleman whom we had met in Palestine, who appeared to be a man of some experience in the East, he spoke of the Mount Tabor to obtain the delightful view from its summit. His answer was, 'No; why should I climb Mount Tabor to see a country of thorns?' He was thus an unintentional wit- ness of the truth of God's Word" (Mission of Inquiry, p. 119). Such predictions as Isa. vi, 28; 24; xxxii, 12-15; Hos. ix, 6, acquire additional force from the observation that it is so often in the midst of magnificent ruins—once pleasant "laborcles"—or in regions which must formerly have been rich and fruitful fields, that these thorns and briers now maintain their undisputed and truculent empire. Thus, at Beth-nimrah, the traveller says, "The buildings may have been extensive, but the ruins are now shapeless, and generally choked by the prickly vegetation" (Tristram, Land of Israel, p. 522). Again, "We rode up the Ghör, through a maze of zizip- phus bush, which encumber a soil of almost incredible richness; watered every mile by some perennial brook, but with a trace of inhabitant or culturist, and then we saw a clump of palm-trees, the ruined heap of some old village, or a piece of a broken water-course, to tell us that once the hand of civilization was here. Myriads of turtle-doves peopled these thickets. We put them up absolutely by scores from every bush. The nests of the marsh-sparrow bore down the branch- es by their weight, and the chirping was literally deaf- ening. The bushes and weeds were laden with seeds" (Ibid. p. 570). In his last words King David compares the sons of Belial to "thorns thrust away, because they cannot be taken with hands; but the man that shall touch them must be armed with iron and the staff of a spear" (2 Sam. xxiii, 6, 7). A traveller tells how out of one of these bushes of nubk he tried to get a dove, which, when shot, had fallen into it: "but, though I had my gloves on, each attempt made my hand bleed and smart more painfully, as the thorns will not yield in the least. I failed in like manner when I tried to cut a stick" (Gadsby, Wanderings, ii, 60). When we remember that a single thorn is sometimes a couple of inches long, "as a sharp pin and as hard as a bone," we can appreciate the force of the allusions in Numb. xxxii, 50; Prov. xxvi, 9; Ezek. xxvii, 24; Jer. xxv, 5; and we can see why the hopelessly careless were called "hedge of thorns" (Prov. xv, 19; Hos. ii, 6). The nubk, or zizipa- phus, is much used for fuel. Occurring everywhere, it is easily obtained; its slender twigs, intensely dry, flask up at once in a fierce, brilliant flame, and, although very different from the "hemlock glos" or sheep's thorn of the Mount of juniper," a sufficient supply is sufficient to heat the kettle of the camping traveller. To its rapid ignition
The psalmist alludes, "Before your pots can feel the thorns, he shall sweep them away as with a whirlwind" (Psa. lvii, 9); where "the brightness of the flame, the height to which it mounts in an instant, the fury with which it seems to rage on all sides of the vessel, give force and even sublimity to the image, though taken from one of the commonest occurrences of the lowest life—a cottager's wife boiling her pot" (Horsey, *ad loc.*).

Exploding so quickly, they are as speedily quenched (Psa. cxviii, 13); and there is small result from their noisy crepitation (Eccles. vii, 6). "Ridicule is a faculty much prized by its possessors, yet, intrinsically, it is a small faculty. A scoffing man is in no lofty mood for the time; shows more of the imp than the angel. This, too, when his scoffing is what we call just and has some foundation in truth. While, again, the laughter of fools—that vain sound—said in Scripture to resemble 'the cracking of thorns under a pot' (which they cannot heat, but only soil and begrime), must be regarded in these later times as a very serious addition to the sum of human wretchedness" (Carlyle, *Miscellanea*, ii, 119).

Dr. Tristram further remarks, "I have noticed dwarf bushes of the *zizyphus* growing outside the walls of Jerusalem in the Kidron valley; but it is in the low plains that it reaches its full size and changes its name to the *dham* tree. It is sometimes called the lotus-tree. The thorns are long, sharp, and recurved, and often create a festering wound. The leaves are a very bright green, oval, but not, as has been said, of the shape of the ivy. The boughs are crooked and irregular, the blossom small and white, and the fruit a bright-yellow berry, which the tree continues to bear in great profusion from December to June. It is the size of a small gooseberry, of a pleasant, subacid flavor, with a stone like the hawthorn, and, whether fresh or dried, forms an agreeable dish, which we often enjoyed, mixing the berries with *leben*, or sour milk. There is no fence more impervious than that formed of *nubak*; and the Bedawin contrive to form one round their little camps with trifling labor. They simply cut down a few branches and lay them in line as soon as the barley is sown. No cattle, goats, or camels will attempt to force it, insignificant as it appears, not more than a yard high; and the twigs and recurved spines become so interwoven that it is in vain to attempt to pull the branches aside" (*Nat. Hist. of the Bible*, p. 429). See *THORN*.

The fences of prickly pear or Indian fig (*Opuntia vulgaris*), now so common in the lands of the Bible, were unknown in Bible times, the plant having only found its way to the Old World after the discovery of America (Tristram, *Nat. Hist. of the Bible*, p. 432). At present, however, it forms the common hedge-thorn of Palestine, especially in the villages of the plain of Sharon. It grows to the height of a large shrub, the stem of which is as thick as a man's body. The leaf is studded with thorns, and is of oval shape, about ten inches long, six wide, and three fourths of an inch thick; the stem and branches are formed by the amalgamation of a certain number of those succulent leaves that grow together the year round; first appearing, with stems and branches, with fifteen or twenty yellow blossoms, which are rapidly matured into a sweet and refreshing fruit of the size and shape of a hen's egg. See *HEDGE*.

**Thornton, Thomas C.**, D.D., a minister of the Methodist Episcopal Church, South, was born in Dum-fries, Va., Oct. 12, 1794; graduated in his native place, and began to preach when sixteen years old. In 1813 he entered the Baltimore Conference, and was transferred to the Mississippi Conference to take charge of Old Centenary College in 1841. From some misunderstanding, he left the Methodist and joined the Protestant Episcopal Church, but refused ordination, not accepting the doctrine of uninterrupted scriptural succession. In 1850 he returned to the Methodist Church, and was readmitted into the Mississippi Conference in 1853. He died March 22, 1860. He wrote *Theological Colloquies and Slavery as it Is in the United States*, in reply to Dr. Channing. See Simpson, *Cyclopedia of Methodist, a. v.*

Thornton, William Lockwood, A.M., Wesleyan minister, was born in Yorkshire, Jan. 27, 1811, and was a pupil of the venerable James Sigton, Leeds. He was accepted at the Conference in 1836, receiving as his first circuit an appointment to Glasgow, where he remained but a year, and in 1837 was stationed at Hull. After a three years' residence in that north-eastern seaport, he was transferred to the First Annual Conference, and in 1838, from thence to the Leeds East Circuit in 1837, and to Bath in 1838. After a three years' location at Bath, Mr. Thornton's itinerant career terminated, and in 1841 he became the resident classical tutor of the first theological institute established in Methodist, which, commencing at Hoxton, was afterwards divided between Richmond and Didsbury; and in 1842 he went to its northern branch, near Manchester. He remained there till 1849, when he was appointed editor of the Wesleyan periodicals. In 1864 Mr. Thornton represented the British Conference at the General Conference of the Methodist Episcopal Church; he then proceeded to Canada, and presided over that conference, and also over that in Eastern British America. On his return home, he was elected president of the British Conference, but died very suddenly, in his presidential year, March 5, 1865. Mr. Thornton was a man of fine talents and thorough culture. In early life he had given himself to hard and systematic study. As a preacher he was eloquent, his style finished and elegant; as an editor he was industrious and successful.

**Thornwell, James Henley, D.D., L.L.D., an eminent Presbyterian divine, was born in Marlborough District, S. C., Dec. 9, 1812. He received a good common-school training, prepared for college at the Cheraw Academy, S. C.; graduated at South Carolina College in 1831; and subsequently studied at Harvard University and in Europe. After some attention to the law, he devoted himself to theology, was licensed by Bethel Presbytery, and in 1854 was ordained and installed pastor of the Church of Christ at Cheraw. After the ordinance and after the churches of Waxhaw and Six Mile were added to his charge. This relation existed until 1837, when he was elected to the professorship of logic, belles-lettres, and criticism in the South Carolina College, to which metaphysics was soon added. In these departments he taught with uncommon ability and success. In America he fully deserves the distinguished titles which his
THORP, CONSTITUTIONS OF 387

THRACLA

admirers have long bestowed upon him of "the Logician." In 1840 he resigned his professorship, and was installed pastor of the Presbyterian Church at Columbia, S. C.; in 1841 became professor of sacred literature and evidences of Christianity in South Carolina College; in 1851, pastor of the Church at Charleston, S. C.; in 1856 accepted the presidency of South Carolina College; in 1856 was elected professor of theology in the Theological Seminary, Columbia, and also pastor of the First Presbyterian Church of that place, in which labors he continued until his death, Aug. 1, 1865. Dr. Thornwell published, The Argument of the Romans from the Infallibility of the Church and Testimony of the Fathers on behalf of the Apocrypha, Discussed and Refuted, etc. (N. Y. 1845). This is an answer to a series of letters by the Rev. Dr. (afterwards bishop) Lynch on the inspiration of the Apocrypha. "As a refutation, this work of Mr. Thornwell is complete" (Bibl. Rep. and Prince Rev. April, 1845, p. 268):—Discourses on Truth (1855, 12mo; 1869, 8vo), delivered in the chapel of the South Carolina College; a work highly commended. He also published single sermons, tracts, essays, etc., and papers in the Southern Literary Messenger. To weigh so much well-endowed with genius of an exalted character; a clear, penetrating, logical mind, which was cultivated by profound study, and consecrated to the advancement of learning and religion. "As a pastor, kind, affectionate, and worthy of all reliance; as a pulpit orator, a model of glowing zeal and fervent eloquence; as a gifted writer; as a man of feeling; H. W. Beecher says concerning him, "By common fame, Dr. Thornwell was the most brilliant minister in the Old-school Presbyterian Church, and the most brilliant debater in its General Assembly. This reputation he early gained." See Wilson, Prof. Hist. Abstr. N. Y. 1863, p. 209; Allibone, Dict. of Brit. and Am. Authors, v. v.; Duyckinck, Cyclop. of Amer. Lit. (1856), ii. 384; La Borde, Hist. of South Carolina College, 1859; Preb. Mag. vol. vii. (J. L. S.).

Thorp, Constitutions of. See York, Council of, of 1863.

Thorvaldsen, Albert Bertel, the renowned Danish sculptor, was born at Copenhagen, Nov. 19, 1770, and was the son of Gottschalk Thorvaldsen, a native of Iceland. A tradition had long been preserved in Denmark that the gods had promoted Thorvaldsen (Arnold Hildesland, who was killed in the battle of Bravalla, in 785) a descendant whose fame should spread from the extremities of the North even to the sunny regions of the South." He assisted his father (a carver in wood) at a very early age, and when eleven years old attended the Free School of Art in the city of Copenhagen, receiving when seventeen a silver medal from the academy for a bas-relief of Cupid Reposing, and at twenty the small gold medal for a sketch of Heliodorus Driven from the Temple. Two years later he drew the grand prize entitling him to the royal pension. But this being then enjoyed by another, he was obliged to wait three years, during which time he continued his professional pursuits and engaged in general study. Thorvaldsen set out for Italy May 20, 1796, arrived at Naples in January, 1797, and reached Rome March 8. After struggling against many discouragements, success waited upon him; his fame spread far and wide; and Christian (then crown-prince) of Denmark wrote him a pressing invitation to return to Copenhagen, telling him of the discovery of a white marble quarry in Norway. In July, 1819, he started to make his first visit to his native land, and arrived at Copenhagen in November. He was engaged in public feasts and other expressions of gratitude for about a year, and then returned to Rome. There he remained until 1838, when he decided to return to Copenhagen, and the Danish government sent a frigate to convey him and his works to Denmark. In 1841, finding the climate to disagree with him, he felt compelled to return to Italy, but returned to Denmark in the following year. He died suddenly, March 24, 1844. The favorite style of Thorvaldsen was basso-rilievo, in which he was the greatest master of his age. His principal works are, Christ and the Twelve Apostles:—Procession to Golgotha by the St'REPEST Preaching in the Wilderness, in the Church of Notre Dame, Copenhagen:—Entry into Jerusalem:—Rebecca at the Well. See English Cyclop. of Biogs. s. v.; Spooner, Biog. Hist. of Fine Arts, s. v.

Thoth. The Egyptian deity of written learning, the author of the mystical treatises on medicine and sacred literature, called by the Greeks the Hermеtic books, and himself, as the author of them, Hermes Trismegistus, and, in his character of introducer of souls in Hades, Hermes Psychopompos. He had many names and occupations, which led to his identification with many of the chief divinities by virtue of a parity of offices. He was called on a statue in the Leyden Museum "He who is the good Saviour," and on some of the funeral papyri he takes the place of Amunis, or even Horus, with respect to the souls of the deceased. In the Hall of the Two Truths it was the duty of Thoth to weigh the deceased, and to read from his tablets a record of his actions in the past life. Thoth was also the god of all writing, and founder of all the sciences. He brought to the gods a translation of all the sacred books, and he was called the "Scribe of the Gods," and the "Lord of the Divine Words." Another form of the god Thoth was identified with the moon, when he would be represented with the head of an ibis, surmounted by the horns, crescent, and lunar disk; but oftentimes he was figured with a human head, having that of the ibis as a cōnus, and wearing the atef crown. As Thoth-Ázah, or Thoth the Moon, he was generally entirely naked, and in the figure of an infant with thin beard of the highest, possibly, the land of the moon in its first quarter. At other times he was represented as an adult man, bearded, and wearing the short loin-cloth, or amut, of the Egyptians; sometimes he carried in his hand the eye of Horus, the symbol of the full moon, the Crook and the Uraeus, and the crook ansuatu. In his latter characteristics Thoth was regarded as one and the same with Khonsu of Thebes. The Cynocephalus ape was also sacred to the god Thoth, and hieroglyphically figured for him. It was Thoth who revealed to the initiated certain mysterious words and formulas, thus imparting a knowledge of divine things which was supposed to elevate man to the height of the gods. It was only necessary to pronounce these formulas in the name of the deceased over his mummy, and to place a copy of them by his side in the coffin, to insure for him the benefit of their influence in the dangers and blessings which he was destined to encounter in the lower regions. Should any one take possession of the magic-book composed by the god Thoth before he had been initiated, supernaturals catastrophes will assail him. He was also worshipped by the Phoenicians, Scythians, Germans, Gauls, and other ancient nations. His symbol was the ibis; and his festival was celebrated on the first day of the first month of the year.—Cooper, Architac Dict. s. v. See EGYPT.

Thracia, or Thrace (Θρᾴκη), occurs in the Bible in one passage of the Apocrypha only (2 Mac. xii, 35), where a Thracian horseman (γὰρ ἰσπιάν Θρακῶν τῆς, "a horseman of Thracia") is incidentally mentioned.
THREASES

388

THREE

apparently one of the body-guard of Gorgias, governor of Idaume under Antiochus Epiphanes (comp. Josephus, War, ii, 16, 4; Appian, Syr. 1; Civ. iv, 88). Thrase at this period included the whole of the country within the boundary of the Strymon, the Danube, and the ocean. The Rhodopes, the Propontis, and the Herodotean 99; Pliny, iv, 18); all the region, in fact, now comprehend- hed in Bulgaria and Rumelia. Under the Romans, Mosia Inferior was separated from it (Ptolemy, iii, 11, 1). In the early times it was inhabited by a number of tribes, each under its own chief, having a name of its own and according to its own customs, although a common general character of ferocity and addiction to plunder prevailed throughout (Herod. v, 8). Thucidides (ii, 97) describes the limits of the country at the period of the Peloponnesian war, when Sitalces, king of the Odrysæ, who inhabited the valley of the Hebrus (Maritsa), had acquired a predominant power in the country, and derived what was for those days a large revenue from it. This revenue, however, seems to have arisen mainly out of his relations with the Greek trading communities established on different points of his seaboard. Some of the clans, even within the limits of his dominion, still retained their independence; but after the establishment of a Macedonian dynasty under Lyonsichus, the central authority became more powerful; and the wars on a large scale which followed the death of Alexander furnished employment for the mar- tial spirit of the Thracians. Thrasea, a clan, perhaps, a deme, for their services as mercenaries everywhere. Cavalry was the arm which they chiefly furnished (see Homer, Odys. ix, 49), the rich pastures of Rumelia abounding in horses. From that region came the greater part of Sitalces' cavalry, amounting to nearly fifty thousand (see Herod. i, 94; v, 5 sqq. Tacit., Annal. iv, 85; Hor- ace, Sat. i, 6; Pliny, Hist. Nat. xvii, 3, 8, 2; xviii, 12, 1; Justin, viii, 3; Melia, ii, 2; Cellarius Notitia, ii, 15; Mannert, Geogr. vii, 1 sqq.; Gatterer, in the Comment. Soc. Gotting. iv and v [Germ. by Schlichthorst, Götting, 1800]; and Smith, Dict. of Class. Geog. a. v.).

The only passage in the New Testament containing an allusion to Thrasea is found in the Bible is Gen. 2, where—on the hypothesis that the sons of Japheth, who are enumerated, may be regarded as the eponymous repre- sentatives of different branches of the Japhetic family of nations—Tiras has by some been supposed to mean Thrasea. The suggestion is strengthened, if not facilitated similarity between the two names. A stronger likeness, however, might be urged between the name Tiras and that of the Tyrians, or Tyreans, the ancestors of the Italian Etruscans, who, on the strength of a local tradition, Herodotus places in Lydia in the ante-histor- ical times. Strabo brings forward several facts to show that in the early ages Thracians existed on the Asiatic as well as the European shore; but this circumstance furnishes very little help towards the identification re- ferred to. See Tiras.

Tirseas, or rather Thirseas (παραπηγή, Vulg. Thraseas), the father of Apollonius (q. v.), Syrian governor of Cœle-Syria and Phoenicia (2 Mac. iii, 5).

Three (Thirty, etc.) (Σαλαχή, ψάλαχη, etc.) frequently occurs as a cardinal number; thus, εἶς θρίαμβος (1 Kings x, 25) as an ordinal, ψάλαχος κατά τούς θρίαμβους (2 Kings xviii, 1); in combination with other numbers, as θρίαμβος κατά τούς θρίαμβους, thirteen; and it is also used in the plural as an ordinal for thirty, ψάλαχος (1 Kings xvi, 28). For other forms and uses of the words, see the Hebrew lexicons.

The nouns ψάλαχος, ψάλον, and ψάλαπτον, literally, according to one derivation, a third man, are used in the sense of a companion in a war, especially in a war with other nations, associated with war-chariots or cavalry. Thus (Exod. xiv, 7, 4) "Pharaoh took all the chariots of Egypt and captains (ψάλαχος) over all this armament." (ψάλαχος), not, as in our translation, "over every one of them;" Sept. γραφθέω ἐνωσάσται, τρισάταται over all; Vulg. ducès to- itius exercitus. So it is said (xy, 4) that "the choice of all Pharaoh's captains" (ψάλαχος), or third men, were drowned; Sept. ἀναβάζσται γραφθέω, Vulg. príncipes. The Septuagint text seems chosen upon the assumed analogism between the etymology of the Hebrew, qamær nore- šramoth, 'one who stands thrid,' and the Greek name. Among the Greeks, norešramoth this has this meaning, because there were three persons in each chariot, of whom the first fought, the second protected him with a shield, and the third guid- ed the horses. Wilkinson, however, says, "There were seldom more than two persons in each chariot," and except in triumphal processions. In the field each one had his own car with a charioteer (Ancient Egyptians, i, 385). Jerome, on Execli. xxi. 28, says, "Tristata, among the Greeks, is the name of the second rank after the royal dignity." But it is possible that the ideal meaning of the verb ψάλαχος may be to rule or direct, as appears from its share in such words as ψάλαπτον, "ex- cellent things," or rather "rules and directions" (Prov. xxii, 20), and ψάλαχος, a proverb, from hês, "to rule," hence an authoritative precept. According to this sense, our translation renders the word ψάλαχος "lord," "a lord on whose hand the king leaned" (2 Kings vii, 2; comp. v, 17, 19). If the latter derivation of the Hebrew word be admitted, it will cease to convey any allu- sion to the number three: of which allusion Gesenius speaks doubtingly of any instance, but which he decid- edly pronounces to be unsuitable to the first passage, where the word evidently stands in connection with war-chariots (see Gesenius, s. v., ψάλαχος). See Cap- TAIN.

Three days and three nights. "For as Jonas was three days and three nights in the whale's belly, so shall the Son of man be three days and three nights in the heart of the earth." The apparent difficulty in these words arises from the fact that our Lord continued in the grave only one day complete, together with a part of the day on which he was buried and of that on which he rose again. The Hebrews had no word ex- pressly answering to the Greek word ἐκκυμόνος, or natural day of twenty-four hours, an idea which they expressed by the phrases a night and a day or a day and a night, and, in the Apocalypse, by the phrase three and three hundred evening mornings (i.e. days, as it is in our translation), then shall the sanctuary be cleansed." Thus also, what is called "forty days and forty nights" in Gen. vii, 12, is simply "forty days" in ver. 17; where- more, as it is common in general computations to ascribe a whole day to two times that take up only a minor of time, this was done in the Jewish language it was necessary to mention both day and night; hence a part of three days was called by them three days and three times. We have another example in 1 Sam. xxx, 12, where the Egyptian whom David's men found in the field is said to have eaten none nor drank any water (three days and three nights). Nevertheless, in giving an ac- count of himself, the Egyptian told them that his mas- ter had left him "because three days ago I fell sick;" in the Hebrew it is I fell sick this third day, that is, this is the third day since I fell sick. Indeed, among the Hebrews, things were said to be done after three days which were done on the third day (comp. 2 Chron. x, 5 with ver. 12, Deut. xiv, 28 with xxxvi, 2). Agree- ably to these forms of speech, the prophecy of our Lord's resurrection from the dead is sometimes represented as taking place after three days, sometimes on the third day (with Mt. 28, Mark xvi, 9; Acts, 1, 2, Col. 1, 18). The phrase "three and four," so often repeated (Amos i), means abundance, anything that goes on towards ex- cess. It finds its parallel in Virgil's well-known words, O terque quaterque beati ("O three and four times hap- py.") 2 Sm. i, 94; see also Odys. v, 386). Three has also been considered, both by Jews and
Christians, as a distinguished or mystical number, like “seven.” Ainsworth, on Gen. xxvi, 4, has collected many such instances, but they appear to be somewhat fanciful. A ternary or trival arrangement of subjects, however, is very prevalent in the Bible (see an anonymous monograph on The Triads of Scripture [Lynchburg, 1865]). See Num. 33:5.

Three Characters (Tria Capitula), the title of an edict published by the emperor Justinian. He having, in the year 542, been shocked by some of the writings of Origen, published an edict in which nine of the chief Origenist errors were set forth and condemned, Origen himself being also anathematized. Theodore, the Monophysites, and Constance in Cappadocia, were dealt with by which to avenge the memory of Origen, and to strengthen the position of the Monophysites. He persuaded the emperor that the Acæphali might be restored to the Church and reconciled to the decrees of Chalcedon, if the writings under three “heads” or “chapters” which he named were condemned, and so ceased to become stumbling-blocks to them by seeming to support the Nestorian heresy. These were (1) the Epistle of Theodoret against the twelve anathemas of St. Cyril, (2) the Epistle of Ibas of Edessa to Maris, and (3) the works of Theodore of Mopoeusia. All these writings harangue (1) to weigh with the Church of Chalcedon, the condemnation of them by Justinian would be, to a certain extent, a repudiation of that council, and so a recognition of the Monophysites condemned by it. Attracted by the hope of reconciling the Acæphali, and not seeing these consequences, the emperor published the edict of the Three Chapters, A.D. 544; giving a profession of his own faith, and anathematizing the three works above named. The edict was subscribed by the four Eastern patriarchs, and, after some hesitation, it was also assented to by Vigilius, bishop of Rome, with an added clause to the effect that in doing so they did not condemn the Council of Chalcedon. This act he afterwards retracted when excommunicated by a council at Carthage, and in 550 declared the Eastern bishops separated from the communion of Rome. The condemnation of the Three Chapters, with a similar reservation respecting the Council of Chalcedon, was, however, confirmed by the 5th General Council, A.D. 558, the second Council of Constantinople. See Mansi, Conc. ix, 61, 181, 457; Natal. Alex. vi, 502.

Three Denominations, a name given to the Independents, the Baptists, and the Presbyterians at the time when these three sects represented the great body of English Dissenters. They were the Dissenters recognized by the Act of Toleration (1 William and Mary, c. 18), and had the privilege granted to them of presenting corporate addresses to the sovereign.—Blunt, Dict. of Sects, s. v.

Three Taverns (Τρεις Ταβερναι, Graecized from the Latin Tre Tabernae), a station on the Appian Road, along which Paul travelled from Puteoli to Rome (Acts xxviii, 15). The Roman Christians went, in token of respect, to meet him there. At these places Paul was probably apprised of his approach by letters or express from Puteoli (ver. 13-15)—one party of them resting at the Three Taverns, and the other going on to Appi Forum. When the apostle saw this unequivocal token of respect, he took fresh courage. There is no doubt that the Three Taverns was a frequented meeting-place of travellers. A good illustration of this kind of intercourse along the Appian Way is supplied by Josephus (Ant. xvii, 12, 1) in his account of the journey of the pretender Herod Alexander. He landed at Puteoli (Diascuria) to gain the Jews, and when he left the city, and when the report went about him that he was coming to Rome, the whole multitude of the Jews that were there went out to meet him, ascribing it to Divine Providence that he had so unexpectedly escaped.” See Paul.

The word ταβερνα is plainly the Latin taberna in Greek letters, and denotes a house made with boards or planks, quasi trubena. Wooden houses, huts, etc., are called tabernas. Thus Horace, "Pauperum tabernas regnumque turres" (Carm., i, 14, 13). Hence the word also means shops, as distinguished from dwelling-houses. Horace uses the word taberna, i.e., the builder's shop (Ep. i, 4, 71), and for a wine-shop (Ep. i, 14, 24). The shops at Pompeii are booths, connected in almost every case with dwellings behind, as they were in London three centuries ago. When catables or drinkeries were sold in a Roman shop, it was called taberna, tavern, vobziugell-house.

It is certain that there were many places in the Roman empire at this time which had the names of Forum and Taberna, the former from having markets of all kinds of commodities, the latter from furnishing wine and catables. The place or village called "Three Taverns" probably, therefore, derived its name from three large inns, or eating-houses, for the refreshment of travellers passing to and from Rome. Zoimus calls it τρεις καταλύα (ii, 10). Appii Forum appears to have been such another place. Horace mentions the latter, in describing his journey from Rome to Brundisium, as "differtium nautis, cauponibus atque malignis"—stuffed with barnacles, with vino and vinum, with viis et vinis (Odes, v, 1, 4, 8). That the Three Taverns was nearer Rome than Appii Forum appears from the conclusion of one of Cicero's letters to Atticus (ii, 10), which, while he is travelling south-eastwards from Antium to his seat near Formiae, he dates "Ad Appii Foro, hora quarta"—from Appii Forum, at the fourth hour; and adds, "Hedernum alias paulo ante, Tribus Tabernas" (I wrote you another, a little while ago, from the Three Taverns). Just at this point a road came in from Antium on the coast, as we learn from the same letter of Cicero (Att. ii, 12). The Itinerary of Antoninus places Appi Forum at forty-three Roman miles from Rome, and the Three Taverns at thirty-three; and, comparing this with what is observed still along the line of road, we have no difficulty in coming to the conclusion that the Three Taverns was near the modern Caterna (see Smith, Dict. of Greek and Rom. Geog., ii, 1236 b, 1238 b). In the 4th century there was a bishop of Three Taverns, named Felix (Ox- tatus, lib. i). It has been stated by some that the place still remains, and is called Tre Taverna. Thus, in Evelyn's time (1645), the remains were "yet very faire" (Diaries, i, 134). But recent travellers have been unable to find more than a few unnamed remains on the spot indicated by the Latin name of Humo et Tribus Tabernis et Villa, Analoge de l'Italie, p. 195; Westphal, Röm. Kompagnie, p. 69; Fick, Wissenschaftl. Reise, i, 375. See APPII FORUM.

Threshing (prop. ἱπποτιζων, but sometimes ἴπποτιζω, to tread out, ἰπποτιζων, and occasionally ἱπποτιζωται, and occasionally ἱπποτιζων). The Hebrews made use of three different processes for separating the grain from the stalk (comp. Isa. xxviii, 27 sq.), an operation always carried on in the open air. See STRAW.

1. In the earliest period, and even later for small quantities, especially in the former part of the harvest season, and for the thinner kinds of grain, the seed was often eaten out with sticks (עָנָבָה, ἰπποτιζων, or Sept. ἱπποτιζω). This was a process applied to other agricultural products (Jerome, ad Isa. loc. cit.), as well as to field grain (Judg. vi, 11; Ruth ii, 17; Isa. xxviii, 27; comp. Column, i, 21; Strabo, iv, 201). It is a method still in use in the East (Robinson, ii, 560; iii, 233). See HARVEST.

2. Usually, however, horned cattle (Mishna, Sebihit, v, 8, as still in Egypt, Arabia, and Syria), seldom asses or camels (in modern Egypt and Arabia, (Seba, p. 288), were driven around, usually yoked in pairs or several abreast, and these, by means of their hoofs (Mic. iv, 13), cut up and separated the chaff and straw from the grain (Isa. xxviii, 28; Jer. i, 11; Hos. xi, 11; comp. Varro, De Re Rust. i, 51; Homer, H. xx, 485 sq;
THRESHING-FLOOR

Pliny, xviii, 72). So also in ancient Egypt (Wilkinson, 2d ser. i, 87, 90). See THRESHING-FLOOR.

3. The most effectual method of threshing was by means of threshing-machines (Aṣmar, [Arab. moej]); or simply nāraq, Isa. xxviii, 27; xlii, 15; Job xlii, 22; also 117.22, Judg. viii, 7, 16; see Gesen. Theaur. p. 244; τρίποδος, tribulum, Pliny, xvii, 72; Talm. לָטרֶם). These consisted sometimes of a wooden plank (traheu, or qoṣr), set with sharp stones or iron points, which was dragged over the sheaves (Rashi, on Is. xxi, 15; comp. Varro, i, 52; Columel. ii, 21; Virgil, Georg. i, 164), sometimes of a sort of cart or wheeled sledge (πλοιστήριον Phænicum; comp. Jerome, ad Is. xxi, 10, and xxviii, 27). Such a wagon is mentioned in Is. xxviii, 27 sq. (רוֹסָב and עָיָשׂ). See THRESHING-INSTRUMENT.

Cattle were used for this vehicle, as usually still among the Arabsians (Wellsted, i, 194); and the Mosaic law forbade the yoking-together of various kinds of beasts, as well as the muzzling of the animals (Deut. xxiv, 4; Joseph. Ant. iv, 8, 21; 1 Cor. ix, 9; Talmud, Kelim, xvi, 7; comp. Elkan. Ant. iv, 25), a usage prevalent among the ancient Egyptians and other nations (Bochart, Hieros., i, 401; comp. Michaelis, Mos. Recht, iii, 180). See MUZZLE.

Threshing is frequently employed by the Hebrew poets as a figure of the divine or providential chastisements, especially national invasion (Isa. xxi, 15; Jer. ii, 39; Mic. iv, 13; Hab. iii, 13). In one passage (Isa. xxi, 10), the bruised grain is made an image of the captive Jews. See generally Schöttgen, Triusta und Tellona Antiquitates (Tr. ad Rh. 1727; Lips. 1763); Paulsen, Ackerbau, p. 110 sq. See AGRICULTURE.

THRESHING-FLOOR (תְּרֻשָּׁה, goren, ḥarav; Chald. ḥeṭṭār, Dan. ii, 35), a level and hard-beaten plot in the open air (Judg. vi, 37; 2 Sam. vi, 6), on which the sheaves of grain (Mic. iv, 12) were threshed (Isa. xxi, 10; Jer. ii, 39; Matt. iii, 12); the Mishna remarks that over the corn, by a man who superintended the operation, so as to subject the entire mass to a sufficient pressure; or the oxen were yoked to a sort of machine (what the Latins called tribulum or trakea) which consisted of a board or block of wood, with bits of stone or pieces of iron fastened into the lower surface to make it rough, and rendered heavy by some weight, such as the person of the driver, placed on it; this was dragged over the corn, and hastened the operation (ver. 27; xlii, 15). The same practices are still followed, only mules and horses are occasionally employed instead of oxen, but very rarely. Dr. Robinson describes the operation as he witnessed it near Jericho: "Here there were no less than five floors, all trodden by oxen, cows, and younger cattle, arranged in each case five abreast, and driven round in a circle, or rather in all directions, over the floor. The aed, or sledge, is not here in use, though we afterwards met with it in the north of Palestine. By this process the straw is broken up and becomes chaff. It is occasionally turned with a large wooden fork having two prongs; and, when sufficiently trodden, is thrown up with the same fork against the wind, in order to separate the grain, which is then gathered up and winnowed. The whole process," he adds, "is exceedingly wasteful, from the transportation of the corn on the backs of animals to the treading-out upon the bare ground" (Researches, ii, 277). During this operation the Mohammedans, it seems, generally observe the ancient precept of not muzzling the oxen while treading out the corn; but the Greek Christians as commonly keep them tightly muzzled. See THRESHING.

As in the East there is no rain during the harvest season (HesiOd, Opp. 558), the threshing-floors were in the open field, and were carefully selected and managed (Virgil, Georg. i, 178 sq.; Pallad. viii, 1; Pliny, Hist. Nat. xii, 92; xv, 8; xvii, 14; xviii, 71, etc.). The farmers remained on the corn-floor all night in order to guard the product (Ruth iii, 4, 6, 14). The threshing-place was of considerable value, and is often named in connexion with the wine-press (Deut. xvi, 10; 2 Kings vi, 27; Hos. ix, 2; Joel ii, 24), since wheat and wine and oil were the more important products of the land (Mishn. Baba Batra, ii, 8). They often bore particular names, as that of Nachon (2 Sam. vi, 6) or Chidon (1 Chron. xiii, 9), of Atad (Gen. i, 10), of Ornan, or Araunah (2 Sam. xxiv, 18, 20; 1 Chron. xxi, 15; Joseph. Ant. vii, 13, 4); B. G. Thomson, Land and Book, ii, 314; Hackett, Ill. of Script. p. 169; Van Lennep, Bible Lands, p. 79; Conder, Test.-Work in Palestine, ii, 259. See AGRICULTURE.

THRESHING-INSTRUMENT was a sledge for driving over the sheaves and separating the grain. These sledges, called among the Hebrews by the general term ברקָנים, barkanim, rendered "briers" in Judg. viii, 7, 16, were of two kinds, corresponding respectively with two words, the first of which alone is rendered as above in the A. V. See THRESHING.

1. Moragus (מָרגָו), so called from triturating; 2 Sam.
THRESHOLD

xxiv, 22; 1 Chron. xxi, 23; Isa. xii, 15; by ellipsis chariţ, pointed, Job xii, 22; Isa. xxviii, 27; Amos i, 3) was a threshing-instrument still in use in the north of Palestine. The Hebrew word "threshing-sledge" has some analogy in the Greek word σκόζνιστική "threshing-sledge," says, "It consists chiefly of two planks fastened together side by side, and bent upwards in front: precisely like the common stone-thresher of New England. Many holes are bored in the bottom underneath, and into these are fixed sharp fragments of hard stone. The machine is dragged by oxen as they are driven round upon the grain; sometimes a man or a boy sits upon it. The effect of it is to cut up the straw quite fine" (Researches, ii, 306).

2. Agdah (אָגוֹדָה), rendered "cart" or "wagon") was a threshing-sledge with wheels or rollers of wood, iron, or stone, made rough and joined together in the form of a sledge (Isa. xxviii, 27, 28). Mr. Lane found it still in use in Egypt, perhaps somewhat improved. He says, "For the purpose of separating the grain of wheat or barley, etc., and cutting the straw, which serves as fodder, the Egyptians use a machine called norag, in the form of a chair, which moves upon small iron wheels, or circular plates, generally eleven, fixed to three thick axle-trees; four to the foremost, the same number to the hindmost, and three to the intermediate axle-tree. This machine is drawn in a circle, by a pair of cows or bullocks, over the corn" (Mod. Egyptians, ii, 33).

Threshold is the rendering in the A. V. of three Heb. words.

1. Sapḥ (סָפָח), so called perhaps from the attrition there, Judg. xix, 27; 1 Kings xiv, 17; Ezek. xli, 6, 7; xliii, 8; Zeph. ii, 14; elsewhere "door" or "door-post," the sill, or bottom, of a door-way. See Gate.

2. Migdāḥ (מִגְדָּח), so called apparently from its firmness or stretch, obviously to be interpreted of the sill, or bottom beam, of a door (1 Sam. v, 4, 5; Zeph. i, 9; Ezek. xlviii, 1); but perhaps meaning sometimes, as the Targum points out, to stretch out, i.e., a projecting beam, or corbel, at a higher point than the threshold properly so called (Ezek. ix, 3; x, 4, 18). See Door.

3. Ašaph (אָשָׁפ), only in the plur. Assupim, מִשְׁפַּי, collections; Sept. συναγαγία; Vulg. vestibula; Neh. xii, 25), a storehouse or depository ("Assupim," 1 Chron. xxvi, 17), especially as connected with the western gates of the Temple, hence called betah-Assupim (ver. 15). See Assupim.

Throne (כָּסָא, kāsē; Spóvo, a seat; as often rendered; twice τάφος, kāsēth, 1 Kings x, 19; Job xxvi, 9; Chald. קָרֵד, korēd, Dan. v, 20; vii, 9, so called as being covered, i.e. either the seat itself or with a canopy) applies to any elevated seat occupied by a person in authority, whether a high-priest (1 Sam. i, 9), a judge (Psa. cxiii, 5), or a military chief (Jer. i, 15). In Neh. iii, 7 the term is applied to the official residence of the governor, which appears to have been either on or near the city wall. In the holy of holies, between the cherubim, was the throne of Jehovah, the invisible king of the Hebrews (Exod. xxv, 22). See PAVILION.

The use of a chair in a country where the usual postures were squatting and reclining was at all times regarded as a symbol of dignity (2 Kings iv, 10; Prov. ix, 14). In order to specify a throne in our sense of the term, it was necessary to add to kāsēth the notion of royalty; hence the frequent occurrence of such expressions as "the throne of the kingdom" (Deut. xvii, 18; 1 Kings i, 46; 2 Chron. vii, 19). The characteristic feature in the royal throne was its elevation: Solomon's throne was approached by six steps (1 Kings x, 19; 2 Chron. ix, 18); and Jehov'ah's throne is described as "high and lifted up" (Isa. vi, 1; comp. Hom. Odys., 130; iv, 136; Curtius, v, 2, 13). The materials and workmanship were costly: that of Solomon is described as a "throne of ivory" (i.e. inlaid with ivory), and overlaid with pure gold in all parts except where the ivory was apparent. It was furnished with arms or "saws," after the manner of an Assyrian chair of state (see Rawlinson, Herod. iv, 15). The steps were also lined with pairs of lions, the number of them being perhaps designed to correspond with that of the tribes of Israel. As to the form of the chair, we are only informed in 1 Kings x, 19 that "the top was round behind" (apparently meaning either that the back was rounded off at the top or that there was a circular canopy over it). In lieu of this particular, we are told in 2 Chron. ix, 18 that "there was a footstool of gold fastened to the throne," but the verbal agreement of the descriptions in other respects leads to the presumption that this variation arises out of a corrupted text (Themius, Comm. on 1 Kings, loc. cit.)—a presumption which is favored by the fact that the term ὑποθόνη and the Hophal form ὑποθόνιζεν occur nowhere else. The king sat on his throne on state occasions, as when granting audiences (1 Kings ii, 19; xxiii, 10; Esth. v, 1), receiving homage (2 Kings, xi, 19), or administering justice (Prov. xx, 8). At such times he appeared in his royal robes (1 Kings xxii, 10; Jonah iii, 6; Acts xii, 21). Archelaus addressed the multitudes from an elevated seat and a throne of gold (Jos, War, ii, 1, 1). A throne was generally placed upon a dais or platform, and under a canopy; and in the sublime description of the King of kings (Rev. iv), this latter is compared to the emerald hue of the rainbow. In Rev. iv, 4; x, 16 the elders who represent the Church as reigning with Christ are seated on thrones placed around his; and in ii, 13 Satan is represented as imitating the royal seat of Christ. For modern Oriental thrones, see Van Lennep, Bible Lands, p. 643.

Mr. Layard discovered in the mound at Nimroud, among other extraordinary relics, the throne on which the Assyrian monarchs sat three thousand years ago. It is composed of metal and of ivory, the metal being richly wrought and the ivory beautifully carved. The throne seems to have been separated from the state apartments by means of a large curtain, the rings by which it was drawn and undrawn having been preserved (Nim. and Bab. p. 198). The chair represented on the earliest monuments is without a back, the legs are tastefully carved, and the seat is adorned with the heads of rams.
The cushion appears to have been of some rich stuff, embroidered or painted. The legs were strengthened by a cross-bar, and frequently ended in the feet of a lion or the hoofs of a bull, either of gold, silver, or bronze (Nineteenth, ii, 225). The throne of the Egyptian monarchs is often exhibited on the ancient monuments. See Chair.

The throne was the symbol of supreme power and dignity (Gen. xlii, 40), and hence was attributed to Jehovah both in respect to his heavenly abode (Ps. xi, 4; cii, 19; Isa. lxvi, 1; Acts vii, 49; Rev. iv, 2) and to his earthly abode at Jerusalem (ser. iii, 17), and more particularly in the Temple (xxvii, 12; Ezek. xliii, 7). Similarly, "to sit upon the throne" implied the exercise of regal power (Deut. xvii, 18; 1 Kings xvi, 11; 2 Kings x, 30; Esth. i, 2), and "to sit upon the throne of another person" succession to the royal dignity (1 Kings i, 13). The term "throne" is sometimes equivalent to "kingdom" (2 Chron. lx, 8; Acts ii, 30; Heb. i, 8). So, also, "thrones" designate earthly potentates and celestial beings, archangels (Col. i, 16). See Seat.

THRONES, EPISCOPAL, the official seat placed in the cathedral, or chief seat of a diocese, and occupied by the bishop on public occasions. This was the common honor and privilege of all bishops from very early times. Thus Eusebius calls the bishop of Jerusalem's seat θρόνος Βασιλεύς, the apostle's throne, because James, bishop of Jerusalem, first sat in it. It was also called βασιλεία, βασιλεύοντας; and θρόνος Βασιλεύς, the high throne, because it was exalted somewhat higher than the seats of the presbyters, which were on each side of it, and were called the second thrones. It generally

stood at the east end of the choir or sanctuary; that is, in churches which were built in the form of basilicas, and were apsidal. This is still the case at Milan and Augsburg. In medieval times the bishop's seat was frequently the best and most exclusive stall on the south side, and almost invariably occupied by him dur-

ing the solemn recital of divine office. During mass, and on occasions when services took place at the altar, his throne was placed against the north wall within the sanctuary. Most of the English thrones are of wood, richly carved and gilded; and they are shown in the books. At St. Mark's, Venice, the Cathedral of Malta, and at the Cathedral of Verona the episcopal thrones are of marble. At Ravenna, Spalatro, and Torecello they are of alabaster; at St. Peter's, Rome, the throne is of bronze; and at Ravenna, St. Maximin's throne is of ivory.

In Portugal and Spain the episcopal throne is commonly that one which in England is occupied by the dean, on the first of the decani side. See Bingham, Christ. Antig. bk. ii, ch. ix, 7: Lee, Gloss. of Liturgy Terms, s. v.; Walcott, Sacred Archael. s. v.

Thrupp, Francis Joseph, an English clergyman, was born in 1827, and educated at Winchester School and Trinity College, Cambridge, where he obtained a fellowship. He took orders in the Church of England, travelled in the East, and became vicar of Barrington, Cambridgeshire, where he died, Sept. 24, 1867. He was the author of Ancient Jerusalem: a New Investigation into the History, Topography, and Plan of the City, etc. (Camb. 1865, 8vo); Introduction to the Study and Use of the Psalms (1860, 2 vols. 8vo):—The Song of Songs: a New Translation, Commentary, etc. (1862):—The Burden of Human Sin as Born by Christ (three sermons). He also furnished articles for Smith's Dict. of the Bible, and prepared part of the commentary on the Pentateuch for the Speaker's Commentary. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Thyrn, in Norse mythology, was a giant king of great strength, who, being a born enemy of Thor, sought to deprive him of his weapons in order to make him less dreadful for the giants. He succeeded in robbing Thor of his frightful hammer, Mjölnir, while Thor had fallen asleep. Loki discovered the thief and sought to negotiate with him; but Thyrn, assured Loki that he did not intend to deliver up the hammer until the beautiful Freia was given him as his wife. When this was told secretly to Freia, the goddess of love, she became so angry that everything shook, and her golden necklace broke in twain. Then it seemed as if there were no remedy. Loki, however, who was always ready with advice, proposed that Thor should dress himself as the bride. Although this plan seemed too womanish for the mighty Thor, he nevertheless decided to try it; and went veiled, laden with riches, and accompanied by Loki as his chambermaid, to Thyrn. There the tremendous beard, while the bride was in the foreground, was a strong point; but Loki knew how to excuse the goddess by the pretense of an eight days' fast, to which he said she had submitted herself from longing for Thyrn. So, also, her flaming eyes were excused from having been awake eight days. Thyrn's sister, more cautious than the fat giant, was suspicious of the matter, and would probably have detected the deception, as she had demanded to see the ring of Freia; but no sooner had Thyrn brought him the hammer of Thor, to dedicate it with the bride, than Thor, seeing his Mjölnir, grasped it, and destroyed all the giants.

Thugs (Hindi, thōrā, "to deceive"), a religious fraternity in India, professedly in honor of the goddess Kali, wife of Siva, who were addicted to the committal of murders, and lived chiefly upon the plunder obtained from their victims. They were also called Phanegors, or "stranglers," from the Hindustani phaṇa, a "noose." The Proceedings of the Thugs were generally these: banding together in gangs of from ten to fifty, and sometimes as high as three hundred, they assumed the appearance of ordinary traders; travelling, if able, on horseback with tents and other comfort; if not able to travel in this manner, they assumed more humble characters. Each gang had its jemadar, or leader; its guru, or teacher; its sarbaks, or interpreters; its bhikshus, or stranglers; and its laghazaas, or grave-diggers.
THUGS

393

THUNDER

Their mode of procedure was generally as follows: Some of the gang were employed to collect information respecting the movements of persons of means; and when they found one about to undertake a journey, endeavored to inanimate themselves into his confidence. The rest of the gang then followed him to travel in his company, under the plea of safety or for the sake of society, or else followed him, waiting for an opportunity to murder. This was generally accomplished by throwing a cloth around the neck of a victim, disabling him by strangulation, and then inflicting the fatal injury. After the murder was perpetrated, the body was mutilated by being thrown into a well or buried, so as to make detection the more difficult. The mode of dividing the plunder seems to have been to appropriate one third to their goddess Kali, one third to the widows and orphans of the sect, and the remainder to the partners in the assassination.

The Thugs had for their patron goddess Devi or Kali, in whose name they exercised their profession, and to whom they ascribed their origin. Formerly they believed Kali assisted them by devouring the bodies of their victims; but through the curiosity of one of the profession who pried into the proceedings of the goddess, she became displeased, and condemned them in future to the ways of the victims. Some stories reported that they presented her worshippers with one of her teeth for a pickaxe, a rib for a knife, and the hem of her lower garment for a noose. The pickaxe was regarded with the highest reverence by the Thugs: it was made with the greatest care, consecrated by many and minute rituals, and considered as one selected for the dignity on account of its shrewdness, caution, and sobriety; and was submitted to special purifications each time after it had been used in the preparation of a grave.

In honor of their guardian deity, there is a temple dedicated to Kali, in the town of Bindachuli, near Mirzapur, to the north of Bengal. When about to go on one of their murder expeditions, the Thugs betook themselves to the temple of the goddess, presented their prayers, supplications, and offerings there, and vowed, in the event of success, to consecrate to her service a large proportion of the booty. So implausible was their trust in Kali that not a moment of misfortune, even death, could make them waver in their faith in her. All the evil that befell them they attributed to a want of faithful observance of all the divinely appointed rules of their sanguinary craft. After every murder they performed a special solemnity called Tappini, the principal part of which consisted of a prayer to the goddess, and in making the murderer partake of gaur, or consecrated sugar, the effect of which was believed to be irresistible. Another feast observed by the Thugs throughout India is Kurkha Karma, or Kote. It is also in honor of Kali, and the requisites for its celebration are goats, rice, ghee (butter), spices, and spirits. The superstitions of the Thugs are all of Hindu origin; but they are also adopted by the Mohammedans, who, while stout adherents to the tenets of the Koran, yet pay divine honors to the Hindu goddess of destruction. This inconsistency they sometimes reconcile by identifying Kali, whose other name is Bhavani, with Fatima, the daughter of Mohammed, and wife of Ali, and by saying that Fatima invented the use of the noose to strangle the great demon Rukkubijiana.

At various periods steps have been taken by the natives and English governments to suppress the Thugs, but it is only since 1831 that energetic measures have been adopted by the British authorities to counteract the evil. This has been successfully accomplished by captain (afterwards Sir William) Sleeman, who secured the arrest of every known Thug, or relative of a Thug, in India. They were subjected to a variety of disciplinary and technical instruction was afforded them and their children. Their descendants are still under government supervision there, and the practice of Thuggee has become extinct. For a fuller account of the Thugs the reader is referred to Sleeman, Ramasseema, or a Vocabulary of the Peculiar Language used by the Thugs (1866); Taylor, The Confessions of a Thug (London, 1868); Thornden, Illustrations of the History and Practice of the Thugs (ibid. 1887).

Thumbastall, in ecclesiastical nomenclature, is a ring, set with pearls and rubies, or a rich ornament worn by the bishop over that part of the thumb of his right hand, and which is usually invested in the chrism, or holy oil. This was worn out of respect to the blood of Christ, to preserve his garments from stains. It was removed at that part of the service when he washed his hands. This ring was anciently called a "poacer."

Thum'mim. See URIM AND THUMMIM.

Thunder (prop. B'2, rdam, B'ortiv; occasionally [Exod. i, 28, 29, 33, 84; xix, 16; xx, 18; 1 Sam. vii, 10; xii, 17, 18; Job xxviii, 26; xxxvii, 25] B'2, kdl, voice, as an elliptical expression for Jehovah's voice [Psa. xxxix, 3 sq., etc.]; also in the plur. B'2, thun-

ners, Exod. ix, 28, etc.; which is likewise elliptical for the full voices of God [ix, 28]; once [Job xxxix, 19 (23)] erroneously in the A. V. for B'2, ramad3, a sladdering, i.e. probably the name of a horse as bristling and streaming in the wind). This sublimest of all the extra-binary phenomena of nature is poetically represented as the voice of God, which the waters obeyed at the Creation (Psa. civ, 7; comp. Gen. i, 9). For other instances see Job xxxvii, 4, 5; xii, 9; Psa. xviii, 18; and especially ch. xxix, which contains a magnificent description of a thunder-storm. Agree-

ably to the popular speech of ancient nations, the poet ascribes the effects of lightning to the thunder, "the voice of the Lord breaketh the cedars" (ver. 5; comp. 1 Sam. i, 19). In Jer. x, 13 the production of rain by lightning is referred to: "When he uttereth his voice, there is a multitude of waters in the heavens, he maketh lightnings with (or for) rain." See RAIN. Thunder is also introduced into the poetical allusion to the passage of the Red Sea in Psa. lxvii, 18. The plague of hail on the land of Egypt is very naturally repre-

sented as accompanied with "mighty thunderings," which would be literally incidental to the immense aggregate of the electric fluid on that occasion (Exod. ix, 22-29, 38, 84). It accompanied the lightnings at the giving of the law (xix, 16; xx, 18). See also Psa. lxxx, 7, which probably refers to the same occasion, "I answered thee in the secret place of thunder," liter-

ally, "in the covering of thunder," ilil3 nrtiy, i.e. the thunder-clouds. It was also one of the grandeur.

ting the divine interposition described in 2 Sam. xxii, 14; comp. Psa. xviii, 18. The enemies of Jehovah are threatened with destruction by thunder; perhaps, however, lightning is included in the mention of the more impressive phenomenon (1 Sam. i, 10). Such means are represented as used in the destruction of Sennacherib's army (Isa. xxxix, 5-7; comp. xxx, 30-38.). Bishop Lowth would understand the description as metaphorical, and regard the variety of expressive and sublime images, to illustrate the greatness, the suddenness, the horror of the event, rather than the manner by which it was effected (new transl., and notes ad loc.). Violent thunder was employed by Jehovah as a means of intimidating the Philistines in their at-

tack upon the Israelites (1 Sam. ii, 25), and while Jehovah is described as "causing his voice to be heard" in the battle (Isa. xxx, 30). Thunder was miraculously sent at the request of Samuel (1 Sam. xi, 17, 18). It is referred to as a natural phenomenon subject to laws originally appointed by the Creator (Job xxviii, 26; xxxviii, 25; Ecclus. xiiii, 1).
in the month of May, witnessed a thunder-storm in the mountains of Moab, near the Dead Sea. He says, "Before we had half ascended the pass, however, there came a shout of thunder from the dense cloud which had gathered at the summit of the gorge, followed by a rain, compared to which the gentle showers of our more favored clime are as dew-drops to the overflowing cistern. The black and threatening cloud soon enveloped the mountain-tops, the lightning playing across it in incessant flashes, while the loud thunder reverberated from side to side of the appalling chasm. Between the peals we soon heard a roaring and continuous sound. It was the torrent from the rain-cloud, sweeping in a long line of foam down the steep declivity, bearing along huge fragments of rock, which, striking against each other, sounded like mimic thunder" (Expedition, p. 533). See Lightning.

Thunderbolt (ט"ש, 'redekph, a name, or, "coal," Cant. viii, 6; hence lighting; fig. for arrow, Ps. lxxvi, 8; or fever, Deut. xxxii, 24). In accordance with the popular notion, "hot thunderbolts" (Ps. lxxvili, 48, ה"ש, Sept. ρυ πη, Vulg. sytax) means "lightnings." Then shall the right-aiming thunderbolts go abroad" (Wis. v, 21, בודיק כנף תעש, "flashes" or "strokes of lightning." "Threw stones like thunderbolts" (2 Macc. i, 18, συντριπτον εκτω). The word conveys an allusion to the mode in which lightning strikes the earth. See Lightning.

Thundering Legion. See Legion, Thundering.

Thuriral, a name given by Tertullian to those who sold frankincense to heathen temples, and whose business could not be free from the imputation of idolatry, because it furnished what was necessary to the worship of idols.

Thurible, a censer used in some of the services of the Roman Catholic Church, made of metal, usually in the form of a vase, with a cover perforated to allow the incense fumes of the burning incense to escape. It is usually carried by three chains which are attached to points around the lower portion, while a fourth is sometimes connected with the above, being united to the ring or handle, and is used at intervals to raise the upper portion or covering of the censer and allow the incense to escape
more freely. In the 8th century thuribles were commonly used and directions for their due adoption enjoined by the authority of the local synods. At Rome there are thuribles of gold in the treasury of the Church of St. John Lateran, reputed to have been given by the South Kensington and the British Museum and in private collections. The thurible is used at high mass, at vespers, at the benediction with the blessed sacrament, at funerals, public thanksgivings, etc. It has often been used in the Church of England since the Reformation. See Lee, Gloss. of Liturg. Terms, s. v.; Parker, Gloss. of Archtects, s. v.

Thurifer (incense-bearer), the ministering attendant in the Roman Catholic Church whose duty it is to carry the thurible or censer and swing it at the appointed time during service. He is ordinarily a chorister or acolyte, but on great occasions a subdeacon, deacon, or even a priest.

Thurificatori, or Thurificatores (incense-offerers), names for those who, during the pagan persecutions, consented to offer frankincense on an altar dedicated to an idol to avoid escape torture or death. This act of apostasy severed them from the Christian Church; and it was not till, by long penance, they had given satisfactory proof of sorrow for their crime that they were readmitted. See Lapsed; Libellatici.

Thuringia, Council of (Concilium Quattuorlicur- gens or Northumian, or Northuense), was held in 1105 by the emperor Henry, who had lately succeeded in reuniting Saxony to the Roman obedience. The council was held in the palace. The decrees of the preceding councils were confirmed, and the heresy of the Nicolaitans (meaning the concubinage of the clergy) was condemned.

Thuriferary (incense-bearer), a priest who bears the censer during the services of the Greek Church. He also assists the officiating priest to put on his sacred vestments, and, during the anthem, sprinkles a veil over the consecrated vessels.

Thursday (Anglo-Saxon Thor's-doeg, i. e. Thor's Day), the Dies Jovis of the Roman calendar, and sacred, in the Northern mythology, to Thor. It is called in German Donnerstag, thunder day. In the early Church, Augustine complained that some of the Christians persisted in keeping Thursday as a holiday in honor of Jupiter.

THURSDAY OF THE GREAT CANON, an Eastern phrase for the Thursday after Trinity Sunday.

Thurston, David, D.D., a Congregational minister, was born in Georgetown, Mass., Feb. 6, 1779. He was the uncle of the Rev. R. B. Thurston and half-brother of the Rev. Stephen Thurston, D.D. He graduated at Dartmouth College in 1804, and was ordained at Winthrop, Me., in 1807, where he remained pastor until 1851, with no intermission except the year in which he was agent for the American Anti-Slavery Society (1837), and the four months in 1850 when he attended the Peace Congress in Frankfort, Germany. During the remainder of his life, he labored four years each at Vassalborough, Searsmont, and Litchfield, Me. He died at the latter place, May 7, 1865. Dr. Thurston was a man of eminent piety, an earnest speaker, and no mean theologian. In 1819 he declined a professorship in Bangor Theological Seminary, and in 1833 wished to decline the degree of D.D. from Dartmouth College. He published twenty-two sermons, some in pamphlet form and some in periodicals—Growth in Grace—History of Winstrop (247 pp.); A Sermon of a Father to a Son;—and newspaper articles without number. See Cong. Quarterly, 1867, p. 813-329.

Thyatira (θαυατηρα), Vulg. civitas Thyatire- norum), a city in Asia Minor, the seat of one of the seven Apocalyptic churches (Rev. i, 11; ii, 18). It was situated on the confines of Myasia and Ionia, a little to the south of the river Hyllus, and at the northern extremity of the valley between Mount Tmolus and the southern ridge of Temeus. It was founded by Seleucus Nicator, and was regarded as a Macedonian colony (Strabo, xiii, 928), from the strong Macedonian element in its population, it being one of the many Macedonian colonies established in Asia Minor, in the sequel of the destruction of the Persian empire by Alexander. The original inhabitants had probably been distributed in hamlets round about when Thyatira was founded. Two of these, the inhabitants of which are termed Aremi and Nagdemi, are noticed in an inscription of the Roman times. According to Pliny, it was known in earlier times by the names Pelopia and Evhippia (Hist. Nat. v. 29). The Roman road from Pergamos to Sardis passed through it. The resources of the neighboring region may be inferred both from the name Evhippia and from the magnitude of the boot which was carried off in a foray, conducted jointly by Eumenes of Pergamos and a force detached by the Roman admiral from Canea, during the war against Antichus. During the campaign of B.C. 190, Thyatira formed the base of the king's operations; and after his defeat, which took place only a few miles to the south of the city, it submitted, at the same time with its neighbor Magnesia-on-Sipylos, to the Romans, and was included in the territory made over by them to their ally the Pergamene sovereign.

During the continuance of the Attalic dynasty, Thyatira nearly appears in history; and of the various inscriptions which have been found on the site, not one unequivocally belongs to earlier times than those of the Roman empire. The prosperity of the city seems to have received a new impulse under Vespasian, whose acquaintance with the East, previously to mounting
THYATIRA 396 THYATIRA

the imperial throne, may have directed his attention to the development of the resources of the Asiatic cities. A bilingual inscription, in Greek and Latin, belonging to the latter part of his reign, shows him to have re
stored the roads in the domain of Thyatira. From others, besides the time and the name Cassantina, there is evidence of the existence of many corrupt guilds in the city. Bakers, potters, tanners, weavers, robemakers, and dyers (oi βαφείς) are specially mentioned. Of these last there is a notice in no less than three inscriptions, so that dyeing apparently formed an important part of the industrial activity of Thyatira, as it did on that of the other Asiatic cities. With this guild there can be no doubt that Lydia, the seller of purple stuffs (παραφύσσωμεν), from whom Paul met with so favorable a reception at Philippi (Acts xvi, 14), was connected. The country around this city is fertile and well watered, abounding in oaks and acacias, and in its numberless streams are found the leeches used in medicine throughout Austria and the east of Europe in general. The mode of taking them is curious: a number of children are sent to walk barefooted among the brooks, and come back to their employers with their feet covered with leeches. They are said to be so well adapted for dyeing that in no place can the scarlet cloth out of which these are made be so brilliantly or so permanently dyed as here. The place still maintains its reputation for this manufacture, and large quantities of scarlet cloth are sent weekly to Smyrna.

Thyatira is at present a populous and flourishing town; its inhabitants amount to seventeen thousand, and they are on the increase. Its modern name is Ab-ihisar, or "the white castle." The town consists of about two thousand houses, for which taxes are paid to the government, besides two or three hundred small huts; of the former, three hundred are inhabited by Greeks, thirty by Armenians, and the rest by Turks. The common language of all classes is the Turkish; but in writing it the Greeks use the Greek, and the Armenians the Armenian characters. There are nine mosques and one Greek church. It exhibits few re
 mains of antiquity, save fragments built into the walls of houses. There is, indeed, an ancient building in a very ruinous condition at a little distance from the city, to which tradition has given the name of the Palace of the Cessars; it is impossible to determine either its date or its purpose. But though this is difficult to be identified, yet for miles around Thyatira are precious relics in the form of sarcophagi, capitals of columns, and similar fragments, used as troweigh, coverings for wells, and such purposes.

Thyatira was never a place of paramount political importance, and hence her history is less interesting to the classical student than those of Ephesus, Sardis, and Pergamos, which were the capitals of great kingdoms. Her chief hold on our consideration is that at Thyatira was seated one of those churches to which the Spirit sent prophetic messages by the beloved apostle. The message is one of a peculiar nature, but it is one that can be identified, yet for miles around Thyatira are precious relics in the form of sarcophagi, capitals of columns, and similar fragments, used as troweigh, coverings for wells, and such purposes.

evidence of a dedication of Rome, of Hadrian, and of the imperial family. Games were celebrated in honor of Tyrimnas, of Hercules, and of the reigning emperor. On the coins before the imperial times, the heads of Bacchus, of Athena, and of Cybele are also found; but the inscriptions only indicate a cult of the last of these.

Coin of Thyatira.

See Strabo, xiii, 4; Pliny, Hist. Nat. v, 31; Livy, xxxvii, 8, 21, 44; Polybius, xvi, 1; xxxii, 26; Zillan, Var. Hist. xii, 35; Böckh, Inscrip. Græc. Thyatir., especially Nos. 3484-3499; Jablonski, De Ecclesia Thyatiærensis (Francfort. ad V. 1739); Stoech, Antiq. Thyatir. (Zwoll. 1763); Hoffmann, Griechenland, ii, 1714; Svoroda, Seven Churches of Asia Minor, p. 48 sq.; Barber, Patmos and Seven Churches (Bridgeport, 1851), p. 187 sq.; and the works cited under Asia Minor and Revelation.

Thyine Wood (Ἐλλαὼ δίων; Vulg. lignum thy-šnum) occurs once in Rev. xvii, 12 (margin "sweet [wood]"); where it is mentioned as one of the valuable articles of commerce that should be found more in Babylon (Rome), whose fall is there predicted by John. Symmachus and the Vulg. also understand it to be meaner by the almug-trees of Kings x, 11. There can be little doubt that the wood here spoken of is that of the Thuya articulata, Des Font., the Callitris quadrivalvis of present botanists. Most of our readers are

familiar with the "arbor vitae," Thuya occidentalis, so common in our shrubberies. Closely allied to this—in the same cypress-like division of the Coniferae; indeed, until lately included in the genus Thuya—is the tree in question. This wood was in considerable demand by the Romans, being much employed by them in the or-
TIBERIAS

asiastical functions. It is composed of a high cap of gold cloth, encircled by three coronets, with a mound (and cross) of gold on the top. The tiara was originally a high cap, and was first used by pope Damasus II. A.D. 1948. Pope John XIII first girded it with a crown pope Bonifacius VII added a second crown in 1295; and pope Benedict XIII added the third in 1835, although some ascribe the latter to Urban V (1362-70). The tiara, when used as an imperial portion of dress, had at the bottom of it one golden circle of a crown-like shape. See Fig. 1.

TIBERIUM (New Test. and Josephus Tybospa, Talmud נִבְרִיאָס), the most important city on the Lake of Galilee in the time of Christ, and the only one that has survived to modern times, still retaining the same name.

1. Origin and Early Associations.—The place is first mentioned in the New Test. (John vi, 1, 28, xxxi, 1), and then by Josephus (Ant. xviii, 2, 8; War, ii, 9, 1), who states that it was built by Herod Antipas, and was named by him in honor of the emperor Tiberius. It was probably not a new town, but a restored or enlarged one merely; for Rez'kah (Jos. xix, 45), which is said in the Talmud (Jerusalem Megillah, fol. 701; comp. Oeth. Lec. Rabb. Meg. Tzemah) to have occupied the same position, lay in the tribe of Naphtali (if we follow the boundaries as indicated by the clearest passages), and Tiberias appears to have been within the limits of the same tribe (Matt. iv, 13). If the graves mentioned by Josephus (Ant. loc. cit.) are any objection, they must militate against this assumption likewise (Lightfoot, Choc. Cont. c. 72-74). The same remark may be made regarding the statement that Tiberias succeeded to the place of the earlier Chinnetret (Onomasticum, s. v.) but this latter town has been located by some farther north and by others farther south than the site of Tiberias. The tenacity with which its Roman name has adhered to the spot (see below) indicates its entire re-occupation. Moreover, generally speaking, foreign names in the East applied to towns previously known under names derived from the native dialect—as, e. g., Epiphania for Hammath (Jos. xix, 55), Palmymra for Tadmor (2 Chron. viii, 4), Ptolemains for Akko (Acts xxi, 7)—lost their foothold as soon as the foreign power passed away which had imposed them, and gave place again to the original appellations.

Tiberias was the capital of Galilee from the time of its origin until the reign of Herod Agrippa II, who changed the seat of power back again to Sepphoris, where it had been before the founding of the new city. Many of the inhabitants were Greeks and Romans, and foreign customs prevailed there to such an extent as to give offence to the stricter Jews. See HERODIAN.

Herod, the founder of Tiberias, had passed most of his early life in Italy, and had brought with him thence a taste for the amusements and magnificent buildings with which he had been familiar in that country. He built a stadium there, like that in which the Roman youth trained themselves for feats of rivalry and war. He erected a palace, which he adorned with figures of animals, "contrary," as Josephus says (Life, § 12, 13, 64), "to the law of our countrymen." The place was so much the less attractive to the Jews, because, as the same authority states (Ant. xviii, 2, 8), it stood on the site of an ancient burial-ground, and was viewed, therefore, by the more scrupulous among them almost as a polluted and forbidden locality. Tiberias was one of the forterices which Nero added to the kingdom of Agrippa (Josephus, War, xx, 13, 2). Coins of the city of Tiberias are still extant, which are referred to the times of Tiberius, Trajan, and Hadrian.

Herodian Coin of Tiberias.

Obverse.—Legend in Greek "of Herod the Tetrarch", palm-branch and the date 52 (A.D. 99). Reverse.—Wreath with legend "Tiberias.

2. Scriptural Mention.—It is remarkable that the Gospels give us no information that the Saviour, who spent so much of his public life in Galilee, ever visited Tiberias. The surer meaning of the expression, "He went away beyond the sea of Galilee of Tiberias," in John vi, 1 (πέραν τῆς δαλάσσης τῆς Γαλιλαίας τῆς Ἰοβιςαίας), is not that Jesus embarked from Tiberias, but, as Meyer remarks, that he crossed over the east side of the Galilean sea of Tiberias to the opposite side. A reason has been assigned for this singular fact, which may or may not account for it. As Herod, the murderer of John the Baptist, resided most of the time in this city, the Saviour may have kept purposely away from it, on account of the sanguinary and artistic (Luke xiii, 32) character of that ruler. It is certain, from Luke xxiii, 8, that though Herod had heard of the fame of Christ, he never saw him in person until they met at Jerusalem, and never witnessed any of his miracles. It is possible that the character of the place, so much like that of a Roman colony, may have been a reason why he who was sent to the lost sheep of the house of Israel performed so little labor in its vicinity. The head of the lake, and especially the Plain of Gennesaret, where the population was more dense and so thoroughly Jewish, formed the central point of his Galilean ministry. The feast of Herod his courtiers, before whom the daughter of Herodias danced, and, in fulfillment of the tetrarch's rash oath, demanded him the head of the dauntless reformer, was held in all probability at Tiberias, the capital of the province. If, as Josephus mentions (Ant. xviii, 5, 2), the Baptist was imprisoned at the time in the castle of Machaerus beyond the Jordan, the order for his execution could have been sent thither, and the bloody trophy forwarded to the implacable Herodias at the palace where she usually resided. Gams (Johannes der Täuf er im Gefängnis, p. 47, etc.) suggests that John, instead of being kept all the time in the same castle, may have been confined in different places at different times. The three passages already referred to are the only ones in the New Test. which mention Tiberias by name, viz. John vi, 1; xxi, 1 (in both instances designating the lake on which the town was situated), and vi, 28, where boats are said to have come from Tiberias near to the place where Jesus had miraculously supplied the wants of the multitude. Thus the lake in the time of Christ, among its other appellations, bore also that of the principal city in the neighborhood; and in like manner, at the present day, Both Tiberias, "Sea of Tiberias," is almost the only name under which it is known among the inhabitants of the country.

3. Later Jewish Importance.—Tiberias has an interesting history, apart from its strictly Biblical associations. It bore a conspicuous part in the wars between the Jews and the Romans, as its fortifications were an important military station (Josephus, War, ii, 20, 5; ill.
10, 1; *Life*, § 8 sq.). The Sanhedrin, subsequently to the fall of Jerusalem, after a temporary sojourn at Jannis and Sepphoris, became fixed there about the middle of the 2d century. Celebrated schools of Jewish learning flourished there through a succession of several centuries. The Mishna was compiled at this place by the great rabbi Judah ha-Kodesh (A.D. 190). The Mosorrah, or body of traditions, which has transmitted the readings of the Hebrew text of the Old Testament and preserved, by means of the vocalism, the pronunciation of the Hebrew, originated, in a great measure, at Tiberias. The place passed, under Constantine, into the power of the Christians; and during the period of the Crusades it was lost and won repeatedly by the different combatants. Since that time it has been possessed successively by Persians, Arabs, and Turks; and it contains now, under the Turkish rule, a mixed population of Mohammedans, Jews, and Christians, variously estimated at from two to four thousand. The Jews constitute, perhaps, one fourth of the entire number. They regard Tiberias as one of the four holy places (Jerusalem, Hebron, Safed, or the others), in which, as they say, prayer must be offered without ceasing, or the world would fall back instantly into chaos. One of their singular opinions is that the Messiah, when he appears, will emerge from the waters of the lake, and, landing at Tiberias, proceed to Safed, and there establish his throne on the highest 

summit in Galilee. In addition to the language of the particular country, as Poland, Germany, Spain, from which they or their families emigrated, most of the Jews here speak also the Rabbinic Hebrew and modern Arabic. They occupy a quarter in the middle of the town, adjacent to the lake; just north of which, near the shore, is a Latin convent and church, occupied by a solitary Italian monk. There is a place of interment near the cloister, in which a distinguished rabbi is said to be buried with 14,000 of his disciples around him. The grave of the Arabian philosopher Lokman, as Burchhardt states, was pointed out here in the 14th century.

4. Position and Present Condition. — As above intimated, the ancient name has survived in that of the modern *Tabarich*, which occupies unquestionably the and were employed for medicinal purposes. See HAMMAT.

It stood anciently, as now, on the western shore, about two thirds of the way between the northern and southern end of the Sea of Galilee. There is a margin or strip of land there between the water and the steep hills (which elsewhere in that quarter come down so boldly to the edge of the lake), about two miles long and a quarter of a mile broad. The tract in question is somewhat undulating, but approximates to the character of a plain. Tabarich, the modern town, occupies the northern end of this parallelogram, and the Warm Baths the southern extremity; so that the more extended city of the Roman age must have covered all, or nearly all, of the peculiar ground whose limits are thus clearly defined.
The present Tiberias has a rectangular form, is guarded by a strong wall on the land side, but is left entirely open towards the sea. A few palm-trees still remain as witnesses of the luxuriant vegetation which once clothed the land, and the great majority of its inhabitants, they are greatly inferior in size and beauty to those seen in Egypt. The oleander grows profusely here, almost rivalling that flower so much admired as found on the neighboring Plain of Gennesaret. The people, as of old, draw their subsistence in part from the adjacent lake. The spectator from his position here commands a view of almost the entire expanse of the sea, except the southern part, which is cut off by a slight projection of the coast. The precipices on the opposite side appear almost to overhang the water, but, on being approached, are found to stand back at some distance, so as to allow travellers to pass between them and the water. The lofty Hermon, the modern Jebel esh-Sheikh, with its glistening snow-heaps, forms a conspicuous object of the landscape in the north-east. Many rock-tombs exist in the sides of the hills, behind the town, some of them, no doubt, of great antiquity, and conjecturally in the best style of such monuments. The climate here in the warm season is very hot and unhealthy; but most of the tropical fruits, as in other parts of the valley of the Jordan, become ripe very early, and, with industry, might be cultivated in great abundance and perfection.

This place in common with many others in Galilee, suffered greatly by an earthquake on New-year's-day, 1837. Almost every building, with the exception of the walls and some parts of the castle, was levelled to the ground. The inhabitants were obliged to live for some time in wooden booths. It is supposed that but less than a hundred of the inhabitants were destroyed at that time. The place has even yet not fully recovered from the disaster.

Tiberias is fully described in Raumer's "Palastina, p. 125; Robinson's Biblical Researches, ii, 300 sq.; Porter's "Handbook, p. 421 sq.; Thompson's "Biblical Bible, ii, 71 sq.; and most books of travel in Palestine.

TIBERIUS, SEA OF (τῆς Θείρης, τῆς Θείρης; Vulg. mare Tiberiades). This term is found only in John xxi, 1, the other passage in which it occurs in the A. V. (vi, 1) being, if the original is accurately rendered, "the sea of Galilee, of Tiberias." John probably uses the name as more familiar to non-residents in Palestine than as the name of Tiberias, or of "these of Gennesaret," actuated, no doubt, by the same motive which has induced him so constantly to translate the Hebrew names and terms which he uses (such as Rabbi, Rabboni, Messias, Cephas, Siloam, etc.) into the language of the Gentiles. See Galilee, Sea of.

Tiberius (Tiberius), in full, Tiberius Claudius Nero Caesar, the Roman emperor, successor of Augustus, who began to reign A.D. 14, and reigned until 37. He was the son of Tiberius Claudius Nero and Livia, and hence a stepson of Augustus. He was born at Rome Nov. 16, B.C. 45. He became emperor in his fifty-fifth year, after having distinguished himself as a commander in various wars, and having evinced talents of a high order as a statesman and administrator of civil affairs. His military exploits and those of Drusus, his brother, were sung by Horace (Carmin. iv, 4, 14). He even gained the reputation of possessing the sterner virtues of the Roman character, and was regarded as entirely worthy of the imperial honors to which his birth and supposed piety had entitle him. He was placed on the throne and being raised to the supreme power, he suddenly became, or showed himself to be, a very different man. His subsequent life was one of inactivity, sloth, and self-indulgence. He was despot in his government, cruel and vindictive in his disposition. He gave up the affair of the St. in the comic vein, while he himself wallowed in the very kennel of all that was low and debasing. The only palliation of his monstrous crimes and vices which can be offered is that his disgust of life, occasioned by his early domestic troubles, may have driven him at last to despair and insanity. Tiberius died at the age of seventy-eight, after a reign of twenty-three years. The ancient writers who supply most of our knowledge respecting him are Suetonius, Tacitus (who describes his character as one of studied dissimulation and hypocrisy from the beginning), Annal. ch. i.-vi; Vell. Patern. ii, 84, etc.; and Dion Cass. ch. xvi.-xxiv. See Smith, Dictionary of Greek and Roman Biography, s. v.; and the monographs on Tiberius in German by Freytag (Bér. 1870) and Stahr (ibid. 1878), and in English by Beesley (Lond. 1878).

It will be seen that the Saviour's public life, and some of the introductory events of the apostolic age, must have fallen within the limits of his administration. The memorable passage in Tacitus (Annal. xvi, 44) respecting the origin of the Christian sect places the crucifixion of the Redeemer under Tiberius: "Ergo abolendo rumorit (that of his having set fire to Rome) Nero subdidi reos, et quiescitissima penis aequit, quos per flagitatia invasos vulgus Christianos appellat. Auctorominus ejus Christus Tiberio imperante per procuratorem Pontiensem Plautum supplex affectus est" (see the monographs cited by Volbeding, Index Programmatum, p. 95; see also Christus). In Luke iii, 1 he is termed Tiberius Caesar; John the Baptist, it is there said, began his ministry in the fifteenth year of his reign (μετατάξατο). This chronological notation is an important one in determining the year of Christ's birth and entrance on his public work. See Jesus Christ. Augustus admitted Tiberius to share in the imperial dignity for two or three years before his own death; and it is a question, therefore, whether the fifteenth year of which Luke speaks should be reckoned from the time of the copartnership or from that when Tiberius began to reign alone. The former is the computation justified by other data. See Chrono-

Cola of Antioch with the Head of Tiberius.

NOLOGY. The other passages in which he is mentioned under the title of Caesar offer no points of personal allusion, and refer to him simply as the emperor (Matt. xxii, 17 sq.; Mark xii, 14 sq.; Luke xx, 22 sq.; xxiii, 2 sq.; John xix, 12 sq.). See Cæsar.

Tibhath (Heb. תיבת, תיבת, daughter or [Furst] extension; Sept. [repeating the proposed], Marah; Vulg. Tibhath), a city of Hadadezer, king of Zobah (1 Chron. xviii, 8), which in 2 Sam. viii, 8 is called Bethah, probably by an accidental transposition of the first two letters. If Aram-Zobah be the country between the Euphrates and Coele-Syria, we must look for Tibhath on the eastern skirts of the Antilibanus, or of its continuation, the Jebel Shashabu and the Jebel Krie. But Furst (Heb. Lex. s. v.) thinks that the city Tibeitha, in the north-west of Mesopotamia (Phiny, Hist. Nat. vi, 30), or the place .fbzab of Arrian (in Steph. Byz.), which lay, according to the Panegyric Tables (xi, e), south of Niabis, may refer to this name.

Tibni (Heb. תבני, תבני, perhaps intelligent; Sept. τιβνηί, Josephus, Θαβναίος, Ant. viii, 12, 5; Vulg. Tobei, perhaps intelligent; Sept. τιβνηί, Josephus, Θαβναίος, Ant. viii, 12, 5; Vulg. Tobei, perhaps intelligent; Sept. τιβνηί, Josephus, Θαβναίος, Ant. viii, 12, 5; Vulg.)
TIGLATH-PILESER

Tiffin, Edward M.D., a local preacher in the Methodist Episcopal Church, was born in Carlisle, England, June 19, 1804; at an early age he commenced the study of medicine; removed to the United States in 1874, and settled in Charlestown, Jefferson Co., Va., where he became a practitioner. In 1790 he entered the Methodist Episcopal Church, and was ordained deacon by bishop Asbury, Nov. 19, 1792. In 1796 Dr. Tiffin took his residence in Chillicothe, in the territory north-west of the Ohio River, where he continued the practice of medicine, and preached regularly on Sundays. In the autumn of 1799, Dr. Tiffin was elected a member of the territorial legislature; in 1802 he was chosen a delegate from Ross County to the convention which adopted the first constitution of the state government for Ohio, of which convention he was elected president. In 1805 he was elected the first governor. At the session of the legislature in 1806-7, governor Tiffin was chosen United States senator, but resigned March 3, 1805, on account of the death of his wife. The same year he was elected to the legislature and chosen speaker of the House. The next year (1810) he was returned to the House of Representatives and elected speaker. He was selected by president Madison a commissioner of the General Land Office; but, not enjoying the society of Washington, he exchanged his office for one of the judicial circuit to which he was entitled. The circuit judges must not give tickets to those who have ceased to meet in class. All the financial questions are explained to those who are seeking to join the society, and notes of admission on trial, with a copy of the "rules," are given. If any member has walked disorderly, the minister has power to withholding his ticket until he has reversed privately with the offender; if not satisfied, he must inform the party that he may appeal to the leaders' meeting. But he must report the case first to the next weekly meeting of ministers in the circuit, and then to the leaders' meeting. See Simpson, Cyclop. of Methodists, a.v.

T'Idal (Heb. Tidal), צדָל, צַדָּל, if Shemtov=čěveš (Če-venius) or čěveš (Forest); but, according to Lenormant, Acanadian = great son; Sept., Točál; Vulg. Točál; Josephus, Θάδαλος, Ant. i, 9, 11; Vulg. Thadali), the last named (Gen. xiv. 1, 9) of the three subordinate "kings" who, in confederation with Chedorlaomer, attacked and defeated the rebellious princes of the Sodomitic pentarchy in the days of Abraham, B.C. cir. 2070. He is called "king of nations" (גּוֹר לֹא, goyim), which Symmachus interprets גּוֹר לֹא, and others Gallieus, both on very slender, if not inaccurate, grounds. Rawlinson suggests, for equally precarious reasons (Ancient Monarchies, i, 55, note), that the name is probably Turanian; but he justly remarks that, from the title given to Tidal, "it is reasonable to suppose that he was a chief over various nomadic tribes to whom no special tract of country could be assigned, since at different times of the year they inhabited different portions of Lower Mesopotamia. This is the case with the Arabs of these parts at the present day." See CHEDORLAOMER.

Tidhar. See PINE.

Tiedebeiak, in Chinese and Japanese mythology, was one of the head deities, who is said to be in the temple of Osaka. It is unknown what this deity represented, unless the description of the image permits a conjecture. Tiedebeiak, a powerful four-armed giant, with a crown upon his head, stands in splendidly ornamented dress upon a figure whose horned head and dragon tail charac-terize it as an evil deity.

Tierce, the service for the third hour, or nine o'clock in the morning, in the early Church. See MATIN; NONE; VESPERS.

Tircilita, the name given to the third order of Winimas (q. v.).

X.—CC
invasion cannot at present be fixed; but it was ap-parently many years afterwards that Tigrash-pileser made a second expedition to Damascus, which had more important results than his former one. It appears that after the date of his first expedition a close league was formed between Rezin, king of Syria, and Pekah, hav-ing for its special object the humiliation of Judaea, and intended to further generally the interests of the two allies. At first great successes were gained by Pekah and his confederate (2 Kings xv, 37; 2 Chron. xxviii., 6-8); but on their proceeding to attack Jerusalem it-self, and to threaten Ahaz, who was then king, with deposition from his throne, which they were about to give to a pretender, "the son of Tabae" (Isa. vii, 6), the Jewish monarch, instead of going to Damascus for assistance, sent messengers of Tigrash-pileser, consenting to aid him, again appeared at the head of an army in these regions. He first marched, naturally, against Damascus, which he took (2 Kings xvi, 9), razing it (according to his own state-ment) to the ground, and killing Rezin, the Damascusen monarch. After this, probably, he proceeded to chase Pekah, whose country he entered on the north-east, where it bordered upon "Syria of Damascus." Here he overran the whole district to the east of Jor-dan, no longer "lightly afflict[ing]" Samaria, but injur-ing her far more gravely, by the way of the sea, in Gallilee of the Gentiles (Isa. lx, 1), carrying into captivity "the Reubenites, the Gadites, and the half tribe of Manasseh" (1 Chron. v., 26), who had previously held this country, and placing them in Upper Mesopo-tamia from Harran to about Niabsis (ibid.). Thus the result of this expedition was the absorption of the kingdom of Damascus, and of an important por-tion of Samaria, into the Assyrian empire; and it fur-ther brought the kingdom of Judah into the condition of a mere tributary and vassal of the Assyrian mon-arch.

Before returning into his own land, Tigrash-pileser had an interview with Ahaz at Damascus (2 Kings xvi, 10). Here, doubtless, was settled the amount of trib-ute which Judaea was to pay annually; and it may be suspected that here, too, it was explained to Ahaz by his azaeran that a certain deference to the Assyrian gods was due on the part of all tributaries who were usually required to set up in their capital "the laws of Ashur," or "altars to the great gods." The "altar" which Ahaz "saw at Damascus," and of which he sent the pattern to Urijah the priest (ver. 10, 11), has been conjectured to have been such a badge of subjection; but it seems to have been adopted only out of love for a prevalent fashion.

This is all that Scripture tells us of Tigrash-pileser. He appears to have succeeded Pul, and to have been succeeded by Shalmaneser; to have been contemporary with Rezin, Pekah, and Ahaz; and therefore to have ruled Assyria during the latter half of the 8th century before our era. See Assyria.

2. Monumental Records.—From his own inscriptions we learn that his reign lasted at least seventeen years; that, besides warring in Syria and Samaria, he attacked Babylon, Media, Armenia, and the independent tribes in the subjoined region of Mesopotamia; and that, like other great Assyrian-monarchs, warring along the whole frontier of the e. and, finally, that he was (probably) not a legitimate prince, but a usurper and the founder of a dynasty. This last fact is gathered from the circumstance that, whereas the Assyrian kings generally glory in their ancestry, Tigrash-pileser, in all mention of his, not even recording his father's name upon his monu-ments. It accords remarkably with the statements of Berosus (in Euseb. Chron. Can. i, 4) and Herodotus (i, 95), that about this time, i. e. in the latter half of the 8th century B.C., there was a change of dynasty in As-syria, and that Tigrash-pileser belonged to a new family, although it was by no means an isolated occurrence, for within a few years, being superseded by another not long before the accession of Sennacherib. The authority of these two writers, combined with the monumental indications, justifies us in concluding that the founder of the lower dynasty or empire, the first monarch of the new king-doms, was the father of Tigrash-pileser, whose name must certainly be about this time, and whose monu-ments show him to have been a self-raised sovereign. The exact date of the change cannot be positively fixed; but it is probably marked by the sea of Nabo-nassar in Babylon, which synchronizes with B.C. 747.

According to this view, Tigrash-pileser reigned com-pletely from B.C. 747 to 730, and possibly a few years longer, being succeeded by Shalmaneser at least as early as 725. In the Assyrian Chronological Canon, of which there are four copies in the British Museum, all more or less fragmentary, the reign of Tigrash-pileser seems to be reckoned by a different method, the Babylonian "Athenaeum, No. 1813, p. 84." Rawlinson's latest computa-tion places his accession in 744 (ibid. Aug. 23, 1863).

See Shalmaneser.

The circumstances under which Tigrash-pileser ob-tained the crown have not come down to us from any good authority; but there is a tradition on the subject, which seems to deserve mention. Alexander Polyhis-tor, the friend of Sylla, who had access to the writings of Berosus, related that the first Assyrian dynasty con-tinued from Ninus, its founder, to a certain Beletas (Pul), and that he was succeeded by Belbalata, a man of low rank, a merchant-dresser, assigned to Cinder, a change of the gardens attached to the royal palace. Belbalata, he said, having acquired the sovereignty in an extraordinary way, fixed it in his own family, in which it continued to the time of the destruction of Nineveh (Fr. Hist. Gr. iii, 210). It can scarcely be doubted that Belbalata here is intended to represent Tigrash-pileser, Belbal being, in fact, another name of expressing the native Pal-ultra or Paltai-ul (Oppert), which the Hebrews represented by Pileser. Whether there is any truth in the tradition may, perhaps, be doubted. It bears too much resemblance to the Oriental stories of Cyrus, Gyges, Amasis, and others, to have in itself much claim to our acceptance. On the other hand, as above mentioned, it harmonizes with the remarkable fact—unparalleled in the rest of the Assyrian records—that Tigrash-pileser is absolutely silent on the subject of his ancestry, neither mentioning his father's name nor making any allusion whatever to his birth, descent, or parentage.

Tigrash-pileser's wars do not generally appear to have been of much importance. In Armenia he re-duced the rebel princes, and afterwards conquered the city of Arpad after a year's residence. He took Singara (Szeghain) and several places of less note in the northern portion of the country; but he does not seem to have penetrated far, or to have come into contact with Nabonassar, who reigned from B.C. 747 to 738 at Babylon. In Media and Upper Mesopo-tamia he obtained certain successes, but made no per-manent conquests. It was on his western frontier only that his victories advanced the limits of the empire. Among the conquered cities appear to be reckoned Meg-gido (Magdud) and Dor (Duru), both connected with Manasseh (Manassah). Before he left Syria, Tigrash-pileser's armies (?) submitted to King Merodach, a king from the kings of the neighboring countries. He re-cords his taking tribute from a king of Judah called Yahu-khaizi—a name which might represent Jehoahaz; but, as shown by the chronology, it probably stands for Ahaz, whose name may have been changed by his As-syrian successor in all mention of him. The matter has been quite patiently, and domestic troubles or dangers acted as a check upon his expeditions against foreign countries.
No palace or great building can be ascribed to this king. His slabs, which are tolerably numerous, show that he must have built or adorned a residence at Calah (? Nimrud), where they were found; but, as they were not discovered in situ, we cannot say anything of the original purpose of the oblong structure which was host to the first two princes of the Lower Kingdom, and the result of their hostility is that we have far less monumental knowledge of Shalmaneser and Tiglath-pileser than of various kings of the Upper Empire. See NINEVEH.

Tigré Version. Tigré is a language spoken throughout Eastern Abyssinia, from the eastern banks of the River Tachazze to the Shoho country, which separates Abyssinia from the Red Sea. Consequently, the Tigré is spoken throughout five months of the year, being three days' journey from the Red Sea, and by a population amounting to about three millions. The characters of the Tigré alphabet are, like the Amharic, of Ethiopian origin, and the Tigré language itself is more closely related to the Ethiopic than the Amharic or any other dialect of Abyssinia. The first attempt to translate the New Testament into this language was made by an Englishman named Nathanael Pearce about the year 1819. He had acquired varied and extensive information by numerous wanderings through various countries, and had resided for fourteen years in Abyssinia. He translated Mark and John; but, as, owing to his restless habits, he had never acquired skill in forming the Ethiopic characters, he was obliged to write his translation in Roman characters. His MS. is in the possession of the British and Foreign Bible Society; it has never been published, and its comparative value is still unascertained. In 1831 part of Luke was translated by Mr. Kugler, a missionary of the Church Missionary Society; and after his death the work was continued by Mr. Isenberg, of the same society, who, at his death, in 1863, left a revised manuscript copy of the four gospels. This MS. having been put into the hands of Dr. Krup, who collected the materials of Abyssinia, an application was made at once to the committee of the British and Foreign Bible Society to have this translation printed. Dr. Krup, who is well versed in the African languages, accompanied his application with a commentary of the character of Mr. Isenberg's translation. The committee consented to meet the expense of an edition of the four gospels, and thus for the first time a portion of the word of God was published in this vernacular in 1865. Since that time nothing further has been done towards completing the New Testament. See Bible of Every Land, p. 60. (B.F.)

Tigris (Tiryp; Vulg. Tigris, Tigris) is used in the Sept. as the Greek equivalent of the Hebrew Chebbishel (חֲבִישֶל) among the rivers of Eden (Gen. ii, 14), and is there described (so some render) as "running eastward to Assyria." After this we hear no more of it, if we except one doubtful allusion in Nahum (ii, 6), until the Captivity, when it becomes well known to the prophet Daniel, who had to cross it in his journeys to and from Susa (Shushan). With Daniel it is "the Great River" —�יָּרָשׁ אֶרֶץ—an expression commonly applied to the Euphrates; and by its side he sees some of his most important visions (Dan. x-xii). No other mention of the Tigris seems to occur except in the Apocryphal books, and there it is unconnected with any real history, as in Tobit (vi, 1), Judith (6, 9), and Ecclesiasticus (xxiv, 25). The meaning and various forms of the word have been considered under Hiddekel (q.v.). It only remains, therefore, in the present article, to describe more particularly the course, character, and historical relations of the eponymous river.

1. The Tigris, like the Euphrates, rises from two principal sources. The most distant, and therefore the true, source is the western one, which is in lat. 38° 10', long. 58° 20' nearly, a little to the south of the high mountain lake called Golijik, or Gülenjik, in the peninsula formed by the Euphrates, where it sweeps round between Palou and Telek. The Tigris's source is near the south-western angle of the lake, and cannot be more than two or three miles from the channel of the Euphrates. The course of the Tigris is somewhat north of east, but, after pursuing this direction for about twenty-five miles, it makes a sweep round to the south and descends by Arghani Maidan upon Diarbekir. Here it is already a river of considerable size, and is crossed by a bridge of ten arches a little below that city (Niebuhr, Voyage en Arabe, p. 286). It then turns suddenly to the east and flows in this direction past Osman Kieiu to Tigris; it thence more or less to the north-east, and then, taking a south-eastern direction which it pursues, with certain slight variations, to its final junction with the Euphrates. At Osman Kieiu it receives the second, or eastern, Tigris which descends from Nephtases (the modern Alas-Tagh) with a course almost due south, and, collecting all the water of the great system of streams, unites with the Tigris half-way between Diarbekir and Til, in long. 41° nearly. The courses of the two streams to the point of junction are respectively 150 and 100 miles. A little below the junction, and before any other tributary of importance is received, the Tigris is 150 yards wide and from three to four feet deep. Near Til a large stream flows into it from the north-east, bringing almost as much water as the main channel ordinarily holds (Layard, Nineteen and Babylon, p. 49). This branch rises near Bili, in northern Kurdistain, and runs at first to the north-east, but presently sweeps round to the north and proceeds through the districts of Shattak and Boktan with a general westerly course, crossing and recrossing the line of the 38th parallel, nearly to Sert, whence it flows south-west and south to Til. From Til the Tigris runs southward for 20 miles through a long, narrow, and deep gorge, at the end of which it rises up on the edge of the hills, but still billy, country of Mesopotamia, near Jershe. Through this it flows with a course which is south-east to Mouel, thence nearly south to Kileh-Sherghat, and again south-southeast to Samara, where the hills end and the river enters on the great alluvium. The course is now more irregular. Between Samara and Baghdad a considerable bend is made to the north; and, after the Shat el-Hie is thrown off in lat. 82° 40', a second bend is made to the north, the regular south-easterly course being only resumed a little above the 324 parallel, from which point the Tigris runs in a tolerably direct line to its junction with the Euphrates at Kurnah. The length of the whole stream, exclusive of meanders, is reckoned at 1146 miles. It can be descended on rafts during the flood season from Diarbekir, which is only 150 miles from its source; and it has been navigated by small boats rather nearly up to Mouel. From Diarbekir to the vicinity of Khorsabad navigation is much impeded by rapids, rocks, and shallows, as well as by artificial bunds, or dams, which in ancient times were thrown across the stream, probably for purposes of irrigation. Below Samara there are no obstructions; the river is deep, with a bottom of soft mud, the current on its course is rapid, and the navigation is tedious. The average width of the Tigris in this part of its course is 200 yards, while its depth is very considerable.

Besides the three head-streams of the Tigris which have already been described, the river receives, along
its middle and lower course, no fewer than five important tributaries. These are, the river of Zakko, or Eastern Khabur, the Great Zab (Zab Ala), the Lesser Zab (Zab Asfal), the Adhem, and the Diyaleh, or ancient Tynnes. All these rivers flow from the high range of Zagros, which take a little basin level; being watered by the melting snow of the east, and is able to sustain so large a number of great streams from its inexhaustible springs and abundant snows. From the west the Tigris obtains no tributary of the slightest importance, for the Thtarhar, which is said to have once reached it, now ends in a salt lake a little basin level. Its volume, however, is continually increasing as it descends in consequence of the great bulk of water brought into it from the east, particularly by the Great Zab and the Diyaleh; and in its lower course it is said to be a larger stream and to carry a greater body than the Euphrates (Chesney, Euphrates Expedition, i, 62).

2. The Tigris, like the Euphrates, has a flood season. Early in the month of March, in consequence of the melting of the snows on the southern flank of Niniveh, the river rises rapidly. Its breadth gradually increases at Diarbekr from 100 to 200 yards. The current is swift. The river continues through March and April, reaching its full height generally in the first or second week of May. At this time the country about Bagdad is often extensively flooded, not, however, so much from the Tigris as from the overflow of the Euphrates, which is here pouring through the city in a stream through a great inundation on both banks. About the middle of May the Tigris begins to fall, and by midsummer it has reached its natural level. In October and November there is another rise and fall in consequence of the autumn rains; but, compared with the spring flood, that of autumn is insignificant.

The water of the Tigris, in its lower course, is yellowish, and is regarded as unwholesome. The stream abounds with fish of many kinds, which are often of a large size (see Tohbi vi, 11, and comp. Strabo, xi, 14, 8). Abundant water-fowl float on the waters. The banks are fringed with palm-trees and pomegranates, or clothed with jungle and reeds, the haunt of the wild boar and the lion.

3. The Tigris, in its upper course, anciently ran through Armenia and Assyria. Lower down, from about the point where it enters on the alluvial plain, it separated Babylonia from Susiana. In the wars between the Romans and the Parthians we find it constituting for a short time (from A.D. 11 to 117) the boundary line between those two empires. Otherwise it has scarcely been of any political importance. The great chain of Zagros is the main natural boundary between Western and Central Asia; and beyond this the next defensible line is the Euphrates. Historically it is found that either the central power pushes itself westward to this river, or the power ruling the west advances eastward to the mountain barrier.

The Tigris is at present better fitted for purposes of traffic than the Euphrates (Layard, Nineveh and Baby- lon, p. 475); but in ancient times it does not seem to have been much used as a line of trade. The Assyrians, as they flooded down it the timber which they were in the habit of cutting in Amanus and Lebanon to be used for building purposes in their capital; but the general line of communication between the Mediterranean and the Persian Gulf was by the Euphrates. According to the historians of Alexander (Arrian, Exp. Alex. vi, 6; Strabo, xv, 8), the Persians purposely obstructed the navigation of the Lower Tigris by a series of dams which they threw across from bank to bank between the embouchure and the city of Opis, and such trade as there was along its course proceeded by land (Strabo, ibid.). It is probable that the dams were in reality made for another purpose, namely, to raise the level of the waters for the sake of irrigation; but they would undoubtedly have also the effect ascribed to them, unless in the spring flood-time, when they might have been shot by boats descending the river. Thus there may always have been a certain amount of traffic down the stream; but up it trade would scarcely have been practicable at any time farther than Samara or Tekrit, on account of the natural obstructions and of the great force of the stream. The lower part of the course was opened by Alexander (Arrian, viii, 7); and Opis, near the mouth of the Diyaleh, became thenceforth known as a mart (Jurjewoff), from which the neighboring districts drew the merchandise of India and Arabia (Strabo, xvi, i, 9). Seleucia, too, which grew up soon after Alexander, derived, no doubt, a good deal of its prosperity from the facilities for trade offered by this great stream.

4. The most important notices of the Tigris to be found in the classical writers are the following: Strabo, xi, 14, 8, and xvi, i, 9-18; Arrian, Exp. Alex. vii, 7; Pliny, Hist. Nat. vii, 27. See also Smith, Dict. of Gr. and Rom. Geog. v. Among modern writers may be mentioned Layard, Nineveh and Babylon, p. 45-51, 464-476; Layard, Chal. City and Temple, p. 1-63; Transactions of the Geog. Soc. of Bombay, vol. ix; Lynch, in Journ. of Geog. Soc. vol. ix; Rawlinson, Herodotus, i, 552, 553. See Euphrates.

Tikkun Sopherim (תיקון סופרים), or Emendations of the Scribes, refer to eighteen alterations which the scribes decreed should be introduced into the text, in order to remove anthropomorphisms and other in- delicate expressions. These eighteen emendations, or תיקון סופרים, are as follows, according to the order of the Hebrew Bible:

1. Gen. xvii, 28, where, for the original reading, וְזֶה בְּעָרָבָהָּ שֵׁה יִבְרָאָלָה שׁוֹלָחָה לְצָלָה לִשְׁלַחֵהּ אֵלֶּה, "and Jehovah still stood before Abraham," is now substituted, by the decree of the scribes שֵׁה יִבְרָאָלָה שׁוֹלָחָה לְצָלָה מִשְׁלֹחָה אֵלֶּה, "and Abraham still stood before Jehovah," because it appeared offensive to say that the Deity stood before Abra- ham.

2. Num. xi, 18, where Moses addresses God, "Kill me, I pray thee . . . that I may not see thy evil," לְאַל אֶלֶל מֵעַי, I.e. the punishment wherewith thou visitest Israel, is altered to "that I may not see my evil," אַל מֵעַי, because it might seem as if evil were ascribed to the Deity.

3. 1 Sam. ii, 18, where the original reading, "Let her not be as one dead who proceeded from the womb of our mother (בָּנָה), and half of our flesh (בָּנָה שְׁלָחָה) be consumed," is changed to "Let her not be as one dead-born, which when it proceeds from the womb of its mother (בָּנָה) has half of its flesh (בָּנָה) consumed." 1

4. 1 Sam. iii, 18, where the original, "for his sons cursed God!" (בָּנָה קֶסֶר לְאַל מֵעַי), the Sept. has it still שָׁלָח, is altered to "for his sons cursed themselve (בָּנָה בָּנָה), because it was too offensive to say that Eli's sons cursed God without being reprimanded by their father.

5. 6 Sam. xv, 19, where "will God see with his eye (בָּנָה), is made to read "will God look at my affliction (בָּנָה), The Seventyprobably read יִשְׁלַח, for they translate יִשְׁלַח

6. 1 Kings xii, 16, where "to his God (בָּנָה), O Israel . . . and Israel went to their God (בָּנָה) is given in" your tents (בָּנָה לְאִשָּׁת), . . . to your tents (בָּנָה לְאִשָּׁת), because the separation of Israel from the house of David was regarded as a necessary transition to idolatry; it was looked upon as leaving God and the sanctuary for the worship of idols in tents.

7. Chron. x, 16 concerns the parallel passage, which is similarly altered for the same reason.

8. Jer. ii, 11, where "my glory (בָּנָה) reads their glory (בָּנָה), because it was too offensive to say that God's glory was changed for an idol.

9. Ezek. vii, 11, where "my nose" (בָּנָה) is changed into "their nose" (בָּנָה)."
TIKVAH

11. Hos. iv, 7, where the same change is made as in 9.
12. Hab. 1, 12, where "thou diest not" (נֵבַע נַפְסֶךָ) is converted into "we shall not die" (אַל נִתְנֵּנָה נַפְסְךָ).
13. Zech. ii, 12, where "mine eye" (יִתְאוֹרְךָ) is varied by "his eye" (יִתְאוֹרְךָ), to avoid too gross an anthropomorphism.
14. Mal. 1, 13, where "you make me" (תָּאָרְךָ) is changed to "you make it" (תָּאָרְךָ); reason as in 12.
15. Psa. cxv, 20, where the same alteration is made as in 9 and 11.
16. Job vii, 20, where "a burden to thee" (יִשְׁפַּדְתִּי) is changed to "to myself" (יִשְׁפַּדְתִּי) as the original reading we see also from the Sept. εἰς αὐτόν σοι ποιεῖν.
17. Job xxxii, 9, where "they condemned God" (יִשְׁפַּדְתִּי) is altered to "they condemned Job" (יִשְׁפַּדְתִּי).
18. Lam. iii, 19, where "and thy soul will mourn over me" (יִשְׁפַּדְתִּי) reads "and my soul is humbled within me" (יִשְׁפַּדְתִּי), because of the remark that God will mourn.

These eighteen degrees of the Sopherim are enumerated in the Masorah Magna on Num. i, 1, and on Psa. cvi, 20; they are also given in the book Ochhah ve-Ochhah, p. 57, 119 (ed. Frensdorff, Hanover, 1864). The whole question on these Tikvah Sopherim is discussed by Pinesker in Kheren Chened, ix, 53 sq. (Berlin, 1856); Geiger, "Urschrift und Übersetzungen der Bibel," p. 808 sq. (Breslau, 1857); Wedell, "De Emendationibus a Sopherim in Libris Sacris Veteris Testamenti Propositis" (Frankfort, 1869). See OCLAH. (B. F.)

TIK'VAH (Heb. Tikvāh, תִּקְוָה, a cord [as in Josh. ii, 18, 21], or hope [as often]; the name of two Israelites.
1. (Sept. Oseuses v. r. Oseuses; Vulg. Thecua.) The son of Harhas and father of Shallum, which last was the husband of the prophetess Hulah (2 Kings xxii, 14). B.C. ante 632. He is elsewhere (2 Chron. xxxiv, 22) called Tikvah (q. v.).
2. (Sept. Oseuses v. r. Oseuses; Vulg. Thecua.) The father of Jahaziah, which latter was one of the "rulers appointed to carry out the divorce of the Gentile wives after the Captivity (Ezra x, 15). B.C. 458.

TIK'VATH (Heb. text Tōk'ath, תּוֹקָת, marg. Tōkath', תּוֹקָתֵה, assemblage [Gen.], or firmness [Furt.] Sept. Oseuses v. r. Oseuses and Koḥeṣu; Vulg. Thecua), the father of Shallum (2 Chron. xxxiv, 29); elsewhere (2 Kings xxiii, 14) called Tikvah (q. v.).

TIL. See VAN TIL.

TILE (תֵילֶה, lekenah, so called from the whitish clay), a brick (Ezek. iv, 1), as elsewhere rendered. See BRICK; TILING. The above passage illustrates the use of baked clay for the delineation of figures and written characters among the ancient nations, especially the Egyptians, Asyrians, and Babylonians. Not only were ordinary building bricks stamped with the name of the founder of the edifice, as well as with other devices, but clay (or stone) "cylinders," as they are now called, covered with the most minute writing, were deposited in the foundations of the buildings of Assyrian and Babylonian buildings, giving the history of the kings who erected the palaces. See Nineveh. But the most striking illustration of the prophet's delineations is afforded by the recent discovery of whole libraries of Assyrian literature in the form of small inscribed tablets of clay, which contain writing and pictorial representations of the most interesting character. When the clay was in a soft, moist state, in its mould or frame, the characters were put upon it, perhaps in some instances by a stamp, but usually by means of a sharp-edged bronze style about a foot long, each character being traced separately by hand, as we use a pen. After the completion of the writing or pictures, the clay was baked, and such was the perfection of the manufacture that many of these articles have been preserved from decay for three thousand years. They vary in color, owing, as some suppose, to the varying length of time they were in the kiln, while others think that some coloring matter must have been mixed with the clay. They are bright brown, pale yellow, pink, red, and a very dark tint nearly black. Usually the cylinders found are of a pale yellow, and the tablets a light red or pink. Some of them are unglazed, and others are coated with a hard white enamel. It is from these long-lost records that such details are in process of decipherment as are given in Smith's "Chaldæan Account of Genesis," and other works of recent Assyriology.

TILE, in Architecture, is a thin plate of baked clay used to cover roofs. In England there are but two kinds of tiles in ordinary use, plain tiles and pantiles. The former of these, which are by far the commonest, are perfectly flat; the latter are curved, so that when laid upon a roof each tile overlaps the edge of the next to it and protects the joint from the wet.

Pan-tiles.

The Romans used flat tiles turned up at the edges, with a row of inverted, semi-cylindrical ones over the joint to keep out the wet. In the Middle Ages tiles were extensively employed in England for covering buildings, though they seem always to have been considered an inferior material to lead. It does not appear that any but flat, plain tiles, with such others as were requisite for the ridges, hips, and valleys, were used. The ridge-tiles, or crest, formerly also called roof-tiles, were sometimes made ornamental. It is not unusual to find the backs of fireplaces formed of tiles, and in such situations they are sometimes laid in herring-bone courses, as in the great hall, Kenilworth: most of the fireplaces in Bodiam Castle, Sussex, are constructed.
in this manner, and the oven by the side of the larger fireplace in the hall is also built of tiles.

Glazed decorative tiles were anciently much used for paving sacred edifices. They are sometimes called Norman tiles, possibly from the supposition that they were originally made in Normandy; and, considering the age and variety of specimens that exist in Northern France, this idea may not be wholly erroneous. It is doubtful, however, whether any tiles have been discovered in England that present the features of the Norman style of architectural decoration, the most ancient being apparently of the 13th century. The name of encaustic has also been given to these tiles, and it would not be inappropriate were it not applied already to denote an antique process of art of a perfectly different nature; whereas a method wholly distinct, and peculiar to the glazed tiles of the Middle Ages, was commonly adopted in Northern Europe. The process of manufacture which, as it is supposed, was most commonly employed may be thus described: The thin squares of well-compacted clay having been fashioned, and probably dried in the sun to the requisite degree, their ordinary dimension being from four to six inches, with a thickness of one inch, a stamp which bore a design in relief was impressed upon them, so as to leave the ornamental pattern in cesso. Into the hollows thus left on the face of the tile clay of another color, most commonly white, or pipe-clay, was then inlaid or impressed. Nothing remained except to give a richer effect, and, at the same time, assure the permanence of the work by covering the whole in the furnace with a thin surface of metallic glaze, which, being of a slightly yellow color, tinged the white clay beneath it, and imparted to the red a more full and rich tone of color. In the success of this simple operation much depended upon this, that the quality of the two kinds of clay that were used should be as nearly similar as possible, or else, if the white was liable to shrink in the furnace more than the red, the whole work would be full of cracks; in the other case, the design would bulge and be thrown upward—imperfections, of which examples are not wanting. To facilitate the equal drying of the tile, deep scorings or hollows were sometimes made on the reverse, and by this means, when laid in cement, the pavement was more firmly held together. Occasionally, either from the deficiency of white clay of good quality, or perhaps for the sake of variety, glazed tiles occur which have the design left hollow, and not filled in, according to the usual process, with clay of a different color. A careful examination, however, of the disposition of the ornament will frequently show that the original intention was to fill these cavities, as in other specimens; but instances also present themselves where the ornamental design evidently was intended to remain in relief, the field, and not the pattern, being found in cesso. It must be observed that instances are very frequent where, the protecting glaze having been worn away, the white clay, which is of a less compact quality than the red, has fallen out and left the design hollow, so that an impression or rubbing may readily be taken. It appears probable that the origin of the fabrication of decorative pavements by the process which has been described is to be sought in the mediæval imitations of the Roman mosaïc-work by means of colored substances inlaid upon stone or marble. Of this kind of marquetry in stone, few examples have escaped the injuries of time; specimens may be seen on the eastern side of the altar-screen in Canterbury Cathedral, and at the abbey church of St. Denis and the cathedral of St. Omer.

Among the earliest specimens of glazed tiles may be mentioned the pavement discovered in the ruined priory church at Castle Acre, Norfolk, a portion of which is in the British Museum. These tiles are ornamented with scutcheons of arms, and on some appears the name "Thomas" they are coarsely executed, the cavities are left, and not filled in with any clay of different color. A profusion of good examples still exists of single tiles, and sets of four, nine, sixteen, or a greater number of tiles, forming by their combination a complete design, and presenting, for the most part the characteristic style of ornament which was in vogue at each successive period, but examples of general arrangement are very rare and imperfect. To this deficiency of authorities it seems to be due that modern imitations of these ancient pavements have generally proved unsatisfactory in the resemblance which they present to

Westleigh, Devon.

Pavement from St. Paul's in Worms.
Tiles from the Choir of Thame Church, Oxfordshire.

belonged to that portion of the structure which had been devoted to religious services. We often meet with the item "Flanders tiles" in building-accounts of castles, but these were for the fireplace only. The lower rooms were usually "earthed," the upper rooms boarded.—Parker, Gloss. of Architect. s. v.

Most of the tiles in England were made in the county of Worcester. Examples may be found in almost every parish church. Occasionally the patterns were alternately raised and sunk, so that the surface of the tiles was irregular. Examples of this sort were found at St. Alban's Abbey, and have been recently reproduced, and laid before the high-altar. From the 15th century to the 16th encasial tiles were commonly used for the floors of churches and religious houses. Tiles have been used for wall-decorations, and for the adornment of tombs on the Continent; and this custom has likewise been restored in England. Since the manufacture of tiles has been carried out so efficiently in Worcestershire, their use has been common for all restored churches in that county. Modern specimens in some cases are remarkably fine, though sometimes wanting in that grace and character which were so remarkable in the old examples.—Lee, Gloss. of Liturg. Terms. s. v.; Walcott, Soc. Archæol. s. v.

Tilenus, Daniel, a learned French divine, was born at Goldberg, in Lusinia, Feb. 4, 1563, and, going to France about 1590, was naturalized by Henry IV. First distinguishing himself as an opponent of the tenets of Arminianism, he afterwards enlisted on the side of the Remonstrants. His principal controversy was with Peter Du Moulin, which was carried on with so much zeal that their friends, among whom was James I of England, interposed to reconcile them. Tilenus had, before this, been appointed by Maréchal de Bouillon professor at the College of Sedan, but, about 1619 or 1620, was obliged to resign on account of his sentiments. He removed to Paris, where he lived on his property. He afterwards had a personal controversy with John Cameron, divinity professor at Saumur, concerning grace and free-will, which lasted five days. An account of this was published under the title of Collatio inter Tilenum et Cameronom, etc. Some time after, Tilenus addressed a letter to the Scotch nation, disapproving of the Presbyterians and commending the Episcopal form of the Reformed Church as established in England. This greatly pleased king James, who invited Tilenus to England, and offered him a pension. Tilenus accepted the offer, and returned to France in order to settle his affairs, but, becoming obnoxious to the people of Great Britain, he never returned. He died in Paris, Aug. 1, 1683. His latter days were spent in defending the Reformed Church of France, and he wrote several books, the titles of which are given in Brandt's Hist. of the Reformation and Quick's Synodicon. See Chamiers, Biog. Dict. s. v.; Huet, Nouv. Biog. Générale, s. v.
conscience was published in 1672, with a view to induce the papists, Tillotson and the clergy were directed by their bishops to preach against popery; and when and where the king and queen were present, they were to reply he should make to the king if his majesty should disapprove their course. Dr. Tillotson suggested this answer: “Since his majesty professed the Protestant religion, it would be a thing without precedent that he should forbid his clergy preaching in defence of it.” On April 2, 1672, the king was informed beforehand that there was to be a sermon on Josh. xxiv, 15, in which he expressed a sentiment of intolerance that exposed him to heavy censure. He was afterwards admitted into a high degree of confidence with king William and queen Mary; was appointed clerk of the close to the king, March 27, 1689; and was authorized, in August, by the chapter of his cathedral, to exercise archiepiscopall jurisdiction over the province of Canterbury, Sancroft having been suspended for refusing the new oath. His ambition had never extended further than to desire the exchange of his deanery of Canterbury for that of St. Paul’s, which was granted him in September. The king, however, nominated him to the archbishopric of Canterbury, April 28, 1691, and he was consecrated (May 31) in Bow Church. The rest of his life was spent in laboring for the good of the Church and the reformation of all abuses among the clergy. He died Nov. 24, 1694. He published, The Rule of Faith, a little quarto of 8 fols., of Sermons. A collective edition of his works, 254 Sermons, Rule of Faith, and Prayers, composed for his use, etc., was published in 1707 (8 vols. fol.). There have been later editions both of his complete works and of selections therefrom. His Works, with Life by Thomas Birch, D.D., were published by Raveen (1752, 8 vols. fol.). See Chalmers, Biog. Dict. a. v.; Allibone, Dict. of Brit. and Amer. Authors, a. v.

Tilton (Heb. marg. Tîlôn', תִּלְוָן; text, Tulôn', תולון; Syr.'Tûlon', Gk.'Τυλόν in Silomos or Tôon in Gesenius; Sept. Ἐβραϊς v. s. 'Tîlôn'; Vulg. Tîlon), the last named of the four “sons” of Shimón, a descendant of Judah (1 Chron. iv, 20). B.C. perhaps cir. 1618.

Tilton, Albert Freeman, a Baptist minister, was born in Deerfield, N. H., Oct. 15, 1809. He was a graduate of Waterville College in the class of 1885. He taught the next two years, first, in Townshend, Vt., where he was the principal of an academy in that place, and then in Boone County, Ky. For four years (1867-71) he was principal of a school at Princeton, Franklin, Ind., which became Franklin College in 1844. In 1841 he was ordained as an evangelist at Franklin, and preached in two or three places in Indiana. He was pastor of the Baptist Church in West Waterville for two years (1844-46), and for the next three years he supplied two or three churches. In 1849 he returned to Franklin, Ind., where he died Sept. 26, 1880. (J. C. S.)

Tilton, David, a Congregational minister, was born at Gilmanton, N. H., July 6, 1806. He studied theology one year in private, and one year at the Andover Theological Seminary, and was ordained, Oct. 14, 1855, over the Congregational Church in Edgartown (Martha’s Vineyard), Mass., where he remained three years. He was installed, Aug. 12, 1840, pastor of the Congregational Church in Laneville, Gloucester, Mass., but in the spring of 1850 he removed to North Chelsea, Mass., and was employed as a canvassing agent for the Congregationalist, and for various publishing houses. In 1892 he removed to Woburn, Mass., where he died, Feb. 10, 1933. See Unitarian Record, Yale College, 1880.

Tilton, Nathan, a Unitarian minister, was a graduate of Phillips (1664) College in 1734. He was ordained as pastor of the Church in Scarborough, Me., December, 1800, and died in 1851. See Sprague, Annals of the American Pulpit, viii, 209.

Time'us (Τηιμε'ς), father of the blind beggar cured by Christ (Mark x, 46), the son being thence called Bartimæus (q. v.). B.C. ante 29.

Timberlake, John W., a minister in the Methodist Episcopal Church, South, was transferred from the Tennessee to the Florida Conference in 1857, and was sent to Jacksonville, Fla., in 1858-59 and later to Fernandina. In 1861 he was appointed Sunday-school agent; but, on the breaking out of the war, he was appointed chaplain to the Second Florida Regiment, in which capacity he labored till his death, at West Point, Va., March 8, 1862. See Minutes of Annual Conferences of the M. E. Church South, 1861-1862, p. 253.

Timbrel (תִּמְרוּת, tâphâ, Exod. xv, 20; Judg. xi, 34; 2 Sam. vi, 5; 1 Chron. xxiii, 5; Job xxi, 12; Psa. lxxxi, 2; cxilix, 3; cl, 4; elsewhere rendered "tabor"); also the cognate verb הָתוּר, ṭâphûr, Psa. lxxviii, 25; rendered "tabor," Neh. ii, 7; רַ֖תוּר, Jud. iii, 7. The Heb. word is an imitative one occurring in many languages not immediately connected with each other. It is the same as the Arabic and Persian daf, which in the Spanish becomes adaf, a tambourine. The root, which signifies to beat or strike, is found in the Greek τόνναυρον or ρέμαυρον, Lat. tympanum, Ital. tamburo, Span. tambor, Fr. tambour, Prov. tabor, Eng. tabor, tabour; timbre, timbrel, tambourine, A. S. dubban, to strike, Eng. tap, and many others. It is usual for etymologists to quote like words in Semitic, as tafr, tâifr, tâfur, tâfur, a drum, as Arab. tâbur and tâbir, tâbûr and tâbûr; but, unfortunately, the tâbur is a guitar, and not a drum (Russell, Appe [2d ed.], i, 152). The parallel Arabic word is tâbî, which denotes a kind of drum, and is the same with the Rabb. Heb. tabâd and Span. tabal, a kettle-drum. The instrument and the word may have come to us through the Saracens. In old Eng. tabor was used for any drum. Thus Rob. of Gloucester (ed. Hearne, 1810), p. 896: "Yor of trompes and of tabors the Saracens made there. So great noises that Christenmen ai disturbed were." In Shakespeare’s time it seems to have become an instrument of peace, and is thus contrasted with the drum: "I have known when there was no music with him but the drum and the fife; and now had he rather hear the tabor and the pipe" (Much Abo about Nothing, act ii, sc. 3). Tabour et tabarine are diminutives of tabor, and denote the instrument now known as the tambourine: "Or Minnie’s whispering to his tabouris, Selling a laughter for a coin, as they meet" (Hall, Sat. iv, 1, 78).

Tabret is a contraction of taboureret. The word is retained in the A. V. from Coverdale’s translation in all passages except Isa. xxx, 32, where it is omitted in Coverdale and Ezek. xxviii, 18, where it is rendered "beauty." The Heb. tôph is undoubtedly the instrument described by travellers as the dyf or dis of the Arabs. It was used in very early times by the Syrians of Padaram at their merry-makings (Gen. xxxi, 27). It was played principally by the Arabs (Exod. xv, 20; Judg. xi, 34; 1 Sam. xviii, 6; Psa. lxvii, 25 [26]) as an accompaniment to the song and dance (comp. Judg. iii, 7), and appears to have been worn by them as an ornament (Jer. xxxi, 4). The tôph was one of the instruments played by the young prophets whom Saul met on his return from the campaign (1 Sam. xiv, 11). It accompanied the merriment of feasts (Isa. v, 12; xxiv, 8), and the joy of triumphal processions (Judg. xi, 34; 1 Sam. xviii, 6), when the women came out to meet the warriors returning from victory, and is everywhere a sign of hazard and peace. A great deal is made of it in the Temple-band (2 Sam. vi, 5; 1 Chron. xiii, 8). It accompanied the lamentation of festas (Isa. v, 12; xxiv, 8), and the joy of triumphal processions (Judg. xi, 34; 1 Sam. xviii, 6), when the women came out to meet the warriors returning from victory, and is everywhere a sign of hazard and peace. A great deal is made of it in the Temple-band (2 Sam. vi, 5; 1 Chron. xiii, 8).
The passage of Ezekiel, xxxviii, 13, is obscure, and appears to have been early corrupted. Instead of ἡ τῆς, "thy tabrets," the Vulg. and Targ. read τῆς, "thy beauty," which is the rendering adopted in Coverdale's and Cranmer's Bible. The Sept. seems to have read τῆς, as in ver. 16. If the ordinary text be adopted, there is no reason for taking ἐφή, as Jerome suggests, in the sense of the setting of a gem, "pala qua gemma continenter." See TABRET.

The tympanum was used in the feasts of Cybele (Herod. iv, 76), and is said to have been the invention of Dionysus and Rhea (Entr. Bacch. 59). It was played by women, who beat it with the palms of their hands (Ovid, Met. iv, 29), and Juvenal (Sat. iii, 64) attributes to it a Syrian origin: "Jam pridem Syrus in Tiberim defunctus Orontes Et linguis, et mores et cum tibiscus chordas Oblinguos, necon gentilis tympanum secum Vexit.

In the same way the tabor is said to have been introduced into Europe by the Crusaders, who adopted it from the Saracens, to whom it was peculiar (see Du Cange's note on De Joinville's Hist. du Roi Saint Louis, p. 61).

The author of Shute Hagybdorim (c. 2) gives the Greek κύμβαλος as the equivalent of ‛ĕph, and says it was a hollow basin of metal, beaten with a stick of brass or iron. The dif of the Arabs is described by Russell (Aleppo [1st ed.], p. 94) as "a hoop (sometimes with pieces of brass fixed in it to make a jangling) over which a piece of percussion is distended. It is beaten with the fingers, and is the true tympanum of the ancients, as appears from its figure in several reliefs, representing the orgies of Bacchus and rites of Cybele." The same instrument was used by the Egyptian dancing-women whom Hasaelquist saw (Traveela [ed. 1766], p. 59). In Barbary it is called tar, and is "made like a sieve, consisting (as Iaidore [Orig. iii, 31] describes the tympanum) of a rim or thin hoop of wood with a skin of percussion stretched over the top of it. This serves for the bass in all their concerts, which they accordingly touch very artfully with their fingers, or with the knuckles or palms of their hands, as the time and measure require, or as force and softness are to be communicated to the several parts of the performance" (Shaw, Travela, p. 202).

The Tar, or Modern Egyptian Tambourine.

Ancient Oriental Tympanum, or Tambourine.

Time (the proper and usual rendering of ἡ ἡμέρα, [later ἡμέρα, semidem], a general word, Gr. χρόνος, space of duration; while ἡμέρα, χρόνος, κας, χρόνος, signifies a fixed time, either by human or divine appointment, or the natural seasons). A peculiar use of the term occurs in the phrase "a time, times, and a half" ( Heb. בַּעֲשָׂרָה חָמֶשְׁנָה, Dan. xii, 7; Chald. בַּעֲשָׂרָה חָמֶשְׁנָה, vii, 25; Gr. ἡμέρα καὶ κας καὶ ἡμέρα, Rev. xii, 14), in the conventional sense of three years and a half (see Josephus, War, i, 1, 1). The following are the regular divisions of time among the Hebrews, each of which is invariably observed in the strict literal sense, except when explicitly modified by the immediate context. We here treat them severally but together, in the order of their extension, and refer to the several articles for more detailed information. See CHRONOLOGY.

1. Year (ipple), so called from the change of the seasons. The years of the Israelis, like those of the modern Jews, were lunar (Rabbinical יָמִי, of 554 d. 8 h. 48 min. 58 sec., consisting of twelve (unequal) lunar months; and as this falls short of the true year (an astronomical month having 29 d. 13 h. 44 min. 2.84 sec.), they were obliged, in order to preserve the regularity of harvest and vintage (Exod. xxix, 16), to add a month occasionally, so as to make it on the average coincide with the solar year (Rabbinical יָמִי), which has 365 d. 5 h. 48 min. 45.4 sec. The method of doing this among the very ancient Hebrews is entirely unknown (see a conjecture in Ideler, Chronol. i, 490; another in Greiner, Joed. p. 216). The Talmudists find mention of an intercalation under Hezekiah (2 Chron. xxx, ii; see also Mishna, Pesach, iv, 9), but without foundation (see, however, on the reconcilement of the lunar with the solar year, Galen, Comment. i, in Hippocr. Epidem. [Opp. ed. Kühn. xiii, 23]). Among the later Jews (who called an intercalated year יָמִי יָמִי, or יָמִי יָמִי, in distinction from a common year, or יָמִי יָמִי), an intercalary month was inserted after Adar, and was hence called Ye-daer (יֵדָא), or second Adar (יֵדָא יֵדָא) (Mishna, Edayoth, vii, 7; see the distinctions of the Gemarists in Reland, Antiq. Sacra, iv, 1; comp. Benjamin, Zuer Berechn. u. Gesch. d. jiid. Kalend. [Berl. 1817]; Ideler, ut sup. p. 587 sqq.; Anger, De Temp. in Act. Ap. Ratione, i, 31 sqq.). The intercalation (יֵדָא יֵדָא) was regularly decreed by the Sanhedrim, which observed the rule never to add a month to the sabbatical year. It usually was obliged to intercalate every third year, but occasionally had to do so in two consecutive years.

The Israelitish year began, as the usual enumeration of the months shows ( Lev. xxvii, 34; xxviii, 9; Num. ix, 11; 2 Kings xxv, 8; Jer. xxxix, 2; comp. 1 Macc. iv, 52; x, 21), with Abib or Nisan (see Esth. iii, 7), subseuent to and in accordance with the Mosaic arrangement (Exod. xii, 2), which had a retrospective reference to the departure out of Egypt (Ex. xii, 2; see Bähr, Synbolik, ii, 659). Yet as we constantly find this arrangement spoken of as a festal calendar, most Rabbinical and many Christian scholars understand that the civil year began, as with the modern Jews, with Tisri (October), but the ecclesiastical year with Nisan (Mishna, Rosh Ḥesh-banach, i, 3; Josephus, Ant. i, 9, 3. See also Rosenmüller, on Exod. xii, 2; Hitzig, Jekuth. p. 385; Seyffarth, Chronol. Sacra, p. 84 sqq.). But this distinction is probably a post-exilian reckoning (Hävernick argues against its inference from Ez 3, 1), which was an accommodation to the time of the arrival of returned exiles in Palestine (Ezra iii, 1 sqq.; Neh. vii, 72; viii, 1 sqq.), and later fell into harmony with the Seleucid era, which dated from October (see Beney, Monatsnam. p. 217; and comp. 1 Macc. iv, 52, x, 21; 2 Macc. xv, 87). Yet this has little countenance from the enactment of the festival of the seventh new moon ( Lev. xxiii, 34; Num. xxix, 1-6), which has in the
Mosaic legislation certainly a different import from the Rabbinical ordinance (see Vriemote, Observ. Misc. p. 284 sq.; Gersdes, De Festo Clongras [Daizb. 1700; also in his Exercit. Acad.]) See New Moon. Nor does the expression "in the end of the year" (יָמִּים תִּמְנָא) with reference to the Feast of Tabernacles (Exod. xxviii, 10), favor this assumption (see Iger, De sabb. p. 182, n. 2.); the preceding verse (Exod. xxviii, 7, 9) physicians (Job xxi, 25, as well as the custom of many other nations (Credner, et sup. p. 209 sq.), are very precarious argument. Nevertheless, it is clear that even in the pre-exilic period of the theocracy, the autumn, as being the close of the year's labor, was often regarded in the agrarian portion of Palestine (Isaiah lxxiv, 1; 458 sq.; see Dresde, Amas. Juda. ex Antiqu. Illust. [Lipa. 1766; merely Rabinic]; Selden, De Ame Civit. Vett. Heb. [Lond. 1644; also in Ugolino, Thesaur. xvii]; Nagel, De Calendario Vett. Ebr. [Aldinga, 1746]). Seyfarth maintains that even prior to the destruction of Jerusalem in the first year of the first moon (Zelebrahim, d. deutsch. morgend. Gelechisc. ii, 244 sq.). The prevailing belief, however, that they had from the first such a year has been of late combated by Böttcher, Probl. alt. Geschriftk. p. 283; De Infernus, i, 125 and Credner (Joni, i, 20, sq.) most stoutly by Seyfarth (Chronol. Sacra, p. 36 sq.) Credner holds that the Israelites originally had a solar year of thirty-day months and that this was exchanged for the lunar year when the three great festivals were accurately determined, i.e., about the time of king Hezekiah and Josiah (on the contrary, see Von Bohlen, Genesis, p. 105 sq.; Benley and Stern, Uber die Monatennamen, p. 5 sq.). Seyfarth, however, ascribes the solar year to the Jews down to about 200 B.C.

A well-defined and universal era was unknown among the ancient Hebrews. National events are sometimes dated from the departure of the Israelites from Egypt (Exod. x, 1; Numb. xxxii, 38; 1 Kings vii, 1), usually from the accession of the kings (as in Kings, Chron., and Jer.), later from the beginning of the exile (Ezek. xxxiii, 21; xi, 1), Jeremiah reckons the Captivity according to the years of Nebuchadnezzar (xxxv, 1; iii, 12; 26 sq.; but the 20th lunar month in the post-exilic books date according to the regnal years of the Persian masters of Palestine (Ezra iv, 26; vi, 15; viii, 7 sq.; Neh. ii, 1; v, 4; xiii, 6; Hag. i, 2, 11; Zech. vii, 1). But as Syrian vassals the Jews adopted the Greek (1 Macc. i, 10) or Seleucid era (רומא לְשׁוֹן, era contractum, since it was used in contracts generally, Arab. karkarykh dha-kerfis), which dated from the overthrow of Antiochus Nicana (Ant. xvi, 2; Bar. xxv, 1), and began with the autumn of B.C. 312 (see Ideler, Handb. d. Chronol., i, 448). This reckoning is employed in the books of the Macabees, which, however, singularly differ by one year between themselves, the second book being about one year behind the first in its dates (comp. 1 Macc. vi, 16 with 2 Macc. vi, 21; 1 Macc. vi, 20 with 2 Macc. xiii, 1), from which it would seem that the author of 2 Macc. had a different epoch for the era. Seleuc, from the author of 1 Macc., with the latter of whom Josephus agrees in his chronology. Inasmuch as 1 Macc. always counts by Jewish months in the Seleucid era (i, 57; iv, 52, 59; vii, 45; xiv, 27, xvi, 14), and these are computed from Nisan (x, 21; xvi, 14)—the second book likewise counts by Jewish months (i, 18; x, 5, xv; xvi, 57; on the contrary x, 21)—we might suppose that the former begins the Seleucid era with the spring of B.C. 312, while the latter begins it with the autumn of B.C. 311 (Seyfarth, Chronol. Sacra, p. 20).

Hermann, De Aera Seleucid. et Regum Syriae Successione (Kil. 1732). Still another national reckoning is given in 1 Macc. xiii, 41 sq., namely, from the year of the deliverance of the Jews from the Syrian yoke, i.e., seven years after Seleucus I Nicator (Ant. B.C. 145). Josephus, Ant. iii, 6, 6), and this era appears upon Parthian coins (Eckhel, Doctrina Numm. Vett. i, 483 sq.). On other Jewish eras see the Mishna (Gittin, viii, 5). See Year.

2. Month (יָמִּים), lit. new, sc. moon; seldom and more Aramaic יִשְׁמָעֵל, the moon). The months of the Hebrews, as stated above, were lunar (as appears from the foregoing names), and from the new moon as ocularly observed by the synodic lunar months had to be reckoned to the 14th min. 3 [strictly 282] sec. (Ideler, Chronol., 485). This is certain from the post-exilic period (Mishna, Rosh Hashanah, i, 5 sq.), but for pre-exilic times various conjectures have been hazarded (see above). The length of the lunar month in the later period depended upon the day when the appearance of the new moon was announced by the Sanhedrim (see a similar reckoning in Macrobr. Sat. i, 15, p. 273 ed. Bip.), which thus made the month either twenty-nine days (יִשְׁמָעֵל, i.e. short) or thirty days (יִשְׁמָעֵל, i.e. full), according as the day was included in the following or the preceding month. The general rule was that in one year not less than four nor more than eight full months would occur (Macrobr. Sat. i, 18; Arb. i, 20; Bar. xxv, 1), and the appearance of the lunar to the solar year was by intercalation (יִשְׁמָעֵל), so that whenever in the last month, Adar, it became evident that the Passover, which must be held in the following month, Nisan, would occur before harvest, i.e. not at the time when the sun would be in Aries (Josephus, Ant. iii, 10, 5), an entire month (Va. dar) was skipped. But when Adar was the first month the intercalary year (יִשְׁמָעֵל, which, however, according to the Gemara, did not take place in a sabbatic year, but always in that which preceded it; nor in two successive years, nor yet more than three years apart). See Anger, De Temp. in Act. Ap. Ratione, p. 80 sq.

Prior to the exile the individual months were usually designated by numbers (the twelfth month occurs in 2 Kings xxvii, 27; Jer. iii, 8; Ezek. xxviii, 1; comp. 1 Kings iv, 7); yet we find also the following names: Ear-month (יָמִּים), Exod. xiii, 4; xxviii, 15; Deut. xvi, 1, etc.), corresponding to the later Nisan; Bloom-month (יִשְׁמָעֵל) 1 Kings vi, 57, the second month; Rain-month (יִשְׁמָעֵל), vi, 38, the eighth (connected by Benley, p. 182, with the word יִשְׁמָא, see the Talmudic interpretation cited by him, p. 16); Fresh-month (יִשְׁמָא, vii, 2), the seventh; all of which seem to be more appellatives (see Benley and Stern, Uber die Monatennamen einiger alten Volker [Ber. 1860], p. 2). After the exile the months received the following names (Gemara, Pesach, xiv, 2; Targ. Sheni on Esth. iii, 7 sq.; comp. Mishna, Shekal. iii, 2; 1. Nisan (יִשְׁמָא), Neh. ii, 1; Esth. iii, 7), the first month, in which the Passover (ו. ו) was held (and in which the vernal equinox fell, Josephus, Ant. iii, 10, 5), corresponding, in general to our April (Ideler, Chronol. 1, 491), and answering (Josephus, Ant. iii, 10, 5; War, v, 3, 1) to the Macedonian-Syrian Xanthicus, also (Ant. ii, 14, 6) to the Egyptian month Pharnautius, which last, however, was March 27-April 26 of the Julian calendar (Ideler, ut sup. p. 143); 2. Tyros (יִשְׁמָא) Chronon. x, 22; 3. Strons (יִשְׁמָא), Esth. viii, 9; Sozou, Bar. i, 8; 4. Tamudis (יוֹנָת), 5. Ab (יוֹנָת), 6. Elah (יוֹנָת), Neh. vi, 15; Elad, i, 14; Macc. xiv, 27), the last month of the civil year in the post-exilic age (Mishna, She'beth, x, 2; Erebain, iii, 7); 7. Tishri (יוֹנָת), in which the festivals of Atonement and Tabernacles fell
TIME

412

TIME

(also the autumnal equinox): 8. Marchehadn (מרחשון יב), Maaseywan or Maaseywan, Josephus, Ant. i, 3, 8; 9. Kislev (כסל), Neh. i, 1; Zech. vii, 1; Xaol, 1 Mac. i, 54); 10. Tebet (תבêt, Esth. ii, 16); 11. Shabbat (שבת), Zech. i, 7; S. ßêrêr (סערה, Mac. xvi, 14); 12. Adar (אדר), Esth. iii, 7; vii, 12; Adar, 2 Mac. xcv, 37); 13. Vê-Adar (ו-אדר), or second Adar (שׁוֹדֵי אַדָּר or שׁוֹדֵי אַדָּר). Occasionally, however, the months were newly numbered in the post-exilic period likewise (Hag. i, 1; ii, 1 sq.; Zech. i, 11; vii, 19; Neh. vii, 72; viii, 3, 14; Dan. x, 4; 1 Mac. ix, 3, 54; x, 21; xii, 51). On the origin and signification of those names, see Gesenius, p. 946; Gessner, p. 947. From the fact that the second book of Maccabees and Josephus reckon according to the Syro-Macedonian months (Diocarsus, Xanthicus, etc.) it does not follow that the Jews adopted this calendar in the Seleucid era. In 2 Mac. the Egyptian months (Ephra, Pochon) are named. See Potts in the Hal. Lit.-Zent. 1889, No. 46-50; Carpozov, Appar. p. 356 sq.; Michaelis, Comment. 1768-68, Oblat. p. 16 sq.; Langhausen, De Memvi Vett. Hebr. Lunarii (Jen. 1718; also in Ugelino, Theaur. xvii); Ideler, Chronol. i, 448 sq., 509 sq. See Month.

3. Week (שבת, lit. seven). This division of the synodal lunar month into seven days (whereas the Hebrews reckoned the week in the Solar cycle of seven days among other Semitic peoples and the Egyptians, Ideler, Chronol. i, 178; ii, 473); but only among the Israelites was this arrangement associated with cosmogony, with law, and with religion itself, so as to enter into real civil life and form the basis of the whole cycle of festivals. See Sabbath. But ordinarily, days rather than weeks (as also among the Greeks and Romans) constituted the conventional mode of computing time (but see Lev. xii, 5; Dan. x, 2 sq.). In the post-exilic period the reckoning by weeks became more customary, and at length special names for particular week-days came into use, enumerated after the formula יָמִי, or יָמָוָי, יָמָוָי, or יָמָוָי, etc. (Mark x, 2, 9; Luke xiv, 1; Acts xx, 7; 1 Cor. vii, 2; see also, Eppian. Her. lvii, 12, 2; also in Chal. with יָמִי or יָמָוָי; see also Otho, Lex. Robb. p. 273. The word יָמִי does not occur in the New Test.; see also Ideler, Chronol, i, 481). The astronomical derivation of the week naturally grows out of the obvious fact (Chronol. i, 60) that the moon changes about every seven (properly seven and three eighth) days, so that the lunar month divides itself into four quarters. Hence nations which have no historical relation in this respect nevertheless agree in the observance (Chronol. i, 88). The days of the week were named long before the Christian era on regular astrological principles from the seven planets (Lubbe, Apsiph. p. 393 sq.), which (according to Dion Cass. xxxviii, 18) was an Egyptian invention. They began with Sat-urn's day (Saturday), inasmuch as Saturn was the outermost planet, but among the Jews this day (the Sabbath) was the last of the week, and so the Jewish or Christian week commences with Sunday. But these heathenish names were never in general use among the Jews (see Buh, Symbolii, 158 sq.). Weeks or heptads of years belong, among the Jews, to the prophetic poetry; but in one instance they occur in a literal sense in prose (Dan. vii, 24-27) as was also among the Romans such annum hediomades were known (Gell. iii, 10; Censorin. De Die Nat. xiv). See Week.

4. Day (יָמִי, so called from its heat; יָמָוָי). The civil day (יָמִי, 2 Cor. xi, 25) was reckoned by the Hebrews from sundown to sundown (Lev. xxvii, 92); most other ancient nations computed time according to the month's course (Yllny, ii, 79; Tacit. Germ. c. xi; Cæs. B.G. i, 62; 18); also among the Romans such annum hediomades were known (Gell. iii, 10; Censorin. De Die Nat. xxiii); but before the exile they seem to have not divided the day into special or well-defined portions beyond the natural divisions of morning (יָמִי; see the definition for the Temple-service in the Mishna, Timid, iii, 2), noon (יָמִי, Gen. xliii, 16; Deut. xxviii, 29; comp. דֹּלֶה, Gen. xviii, 1; 1 Sam. xi, 11; and יָמִי, Prov. iv, 18), and evening (יָמִי, comp. also יָמָוָי, the morning and evening breeze), which were in general use, as among the modern Arabs (Nisibeir, Bedouin, p. 108 sq.). During the exile the Jews appear to have adopted the division into regular hours (Chal. יָמִי) (Dan. iv, 16; v, 5; 2 Esdr. vi, 24), as (according to Herod. ii, 109) the twelve hours of the day originated among the Babylonians; and in the New Test., the hours are frequently enumerated. As, however, every natural day was divided into twelve hours (John xi, 9; see Ideler, Chronol. i, 84 sq.), they must have been unequal at different seasons of the year, since in the latitude of Palestine the longest summer day lasts from about four A.M. to eight P.M. (Mayr, Res. iii, 15), being about four hours longer than the shortest. The hours of the day (for those of the night, see Night-watch) were naturally counted from sunrise (cock-crowing, בקיעת הַנַּחַל) was a designation of time observed in the Temple, Mishna, Timid, i, 2; whence the third hour (Matt. xx, 3; Acts ii, 15) corresponds about to our nine o'clock A.M. the time when the market-place was full of men, תֶּלֶת, Tobit iv, 15; see Epsiphan. Her. lvii, 12; see also Epsiphan. Her. lvii, 12; see also, Epsiphan. Her. lvii, 12; see also Otho, Lex. Robb. p. 273. The word יָמִי does not occur in the New Test.; see also Ideler, Chronol, i, 481). The Oriental Asiaties, especially the Babylonians (Herod. ii, 109, Vitruv. ix, 9), had from early times sundials (horologia solaria) or shadow-measures (Pliny, xxxvi, 15); and hence, from the intercourse with Babylon, this useful contrivance may have been introduced into Palestine even before the exile. At all events, something of the kind seems to be meant by the "degrees of Ahaz (אַהַּז, Isa. xxxviii, 8; comp. 2 Kings xx, 9), either an obelisk which cast its shade upon the steps of the palace, or perhaps a regular gnomon with degrees marked on it (Targ. Jonath. נִצָּת אַהַּז; Symmachus, ἁρματον; Jerome, horologium; see Salmas. Ad Soln. p. 447 sq.; Martini, Abhandl., e.d. Sonnenuhr der Alteren Welt. Leipz. 1772); also De Horologio Vet. Sciocris (Amst. 1777). The Romans after U.C. 595 used water-clocks (clepsydras, Vitruv. ix, 9; Pliny, vii, 60) for the watch-room of post-courses (Veget. Mil. iii, 8) and for regulating the continuity of speaking (Philo, Opp. ii, 597; Becker, Gallus, 187). Whether this derived among the Jews in the time of Christ, we know not (Zellert, De Horologio Caesaris [Altoldf. 1721], does not touch the point); but they could not have been ignorant of some means of measuring time, whether dials or water-clocks, since the latter are in frequent use in the modern East (Catt. 1788). Flinders, Ancient Egyptian Life and Manners (Lond. 1865); id. Assyri.-Babylonian Measures of Time (ibid. eod). See Calendar.
TIMNATH-HERES

TIMNATH (Heb. Tímán, Tímánath, Tímánath-sérah; Gen. xxxvi. 22; 1 Chron. i. 89), the name of a woman and also of a man.

1. (Sept. Qôcupna.) A concubine of Eliphas, son of Esau, and by him mother of Amalek (Gen. xxxvi. 12; named [apparently only] in 1 Chron. i. 86 [by an ellipsis] as a son of Eliphas); probably the same as the sister of Lot; and daughter of Seir the Horite (Gen. xxxvi. 22; 1 Chron. i. 89). B.C. considerably post 1683.

2. (Sept. Ṭwamāv; A. V. "Timnah"). The first named of the Esauite "dukes" or sheiks in Mount Seir (Gen. xxxvi. 40; 1 Chron. i. 51). B.C. long post 1683.

TIMNÁH (Heb. Tímánáh, Tímánah, portion), the name of several places in Palestine, which appears in the original, either simple or compounded, in several forms, not always accurately represented in the A. V. We treat under this head only the simple name, reserving the compounds for a separate article. See also TIMNA.

1. The place near which Tamar entreated Judah in the field (Gen. xxxviii. 13; 16, 17; 2 Sam. xi. 4, 5; Heb. with נ directive, Tímâtkah, según; Sept. Qôcupna; Vulg. Thamathuah; A. V. "to Timnah"). It had a road leading to it (ver. 14), and as it lay on high ground (ver. 12), it probably was the same with the Timnah in the mountain district of the tribe of Judah (Jos. xv. 57; Sept. Ṭwamāv v. r. Ṭwamāvā; Vulg. Thamana). As it lay in the same group with Ziph, Ziphon, and Carmel, south of Seir the Horite (Num. xxvii. 2, 7; 1 Chron. vi. 26, 27; Num. Comment, ad loc.), it may perhaps be identical with a ruined site upon a low hill on the west of the road between Ziph and Carmel, "called Üm el-áMOD ('mother of the pillar'). Foundations and heaps of stones, with some cisterns, cover a small tract of ground, while two or three ruined houses mark the site probably of a village church, and give occasion for the name" (Robinson, Bibl. Res. ii., 192; comp. p. 629).

2. A town near the north-west border of Judah, between Beth-hemesh and Ekron (Josh. xv. 10; Sept. Ayí v. r. Nôzq; Vulg. Thamana). It is doubtless the same with the same name in Dan (Josh. xix. 43, 48; Heb. with מ paragogy, Tímâtkah, según; Sept. Qôcupna; Vulg. Thamana; A. V. "Timnah"). "In the vicinity of Ekron; and likewise with the residence of Samson's first wife (Judg. xiv. 1, 2, 5; Heb. likewise with מ appended; Sept. Qôcupna; Vulg. Thamana; A. V. "Timnath"); Josephus, Ṭwamâvá, Ant. v. 8, 5), which lay on the Philistine edge of the Shephelah (Judg. xiv. 1); and both are therefore the same place, and not the towns of the tribe of Abash (2 Chron. xxviii. 18; Sept. Qôcupna; Vulg. Thamana). At this last date it had suburbs adjoining ('villages'); and in Samson's day it contained vineyards, haunted, however, by such savage animals as indicate that the population was but sparse. It was on higher ground than Ashkelon (Judg. xiv. 19), but lower than Zorah, which we may presume was Samson's starting-point (xiii. 25). After the Danites had deserted their original allotment for the north, their towns would naturally fall into the hands of Judah, or of the Philistines, as the continual struggle between them might happen to fluctuate. In the later history of the Jews, Timnah must have been a conspicuous place. It was fortified by Bacchides as one of the most important military posts of Judea (Ṭwamâvā, 1 Mac. ix. 50), and it became the head of a district or topharchy, which was called after its name, and was reckoned the fourth in order of importance among the fourteen into which the whole country was divided at the time of Vespasian's invasion (Ṭwamâvá, Josephus, War, iii. 3, 5; see Pliny, v. 14). Eusebius and Jerome (Onomast. s. v. Ṭwamâvā, "Timnath") confounded it with the Timnah of Judah's adventure with Tamar, but say that it still existed as a large village near Diospolis on the road to Jerusalem.

According to Schwartz (Palest. p. 106), it is likewise mentioned in the Talmud (Sotah, fol. 10 b). The modern representative of all these various forms of the same name is probably Timneh, a deserted village about two miles west of Beth-shean (Beth-shan), but in the broken undulating country by which the central mountains of this part of Palestine descend to the maritime plain (Robinson, Bibl. Res. ii. 842; Thomson, Land and Book, ii. 861).

Tîmnâth-îhères (Heb. Tîmnâth Chêres, Chêresh; Gen. xxviii. 7, 8; 1 Chron. ii. 53; Thumachat; Judg. ii. 9), or Tîmnâth-sûrah (Heb. Tîmnâth-Sûrah, Sûra, Sûrah; Gen. xxviii. 7, 15; 1 Chron. ii. 53; Thumachat Suara; Tûram ch'ere; Vulg. Thamathuath Saura et Tûram ch'ere; Jos. xix. 5; xxiv. 30; Josephus, Ṭwamâvá, Ant. v. i. 29), the name (varied only by the transposition of the last two consonants of the latter part) by which the city and burial-place of Joshua was known. The Jews adopt Heres as the real name; interpret it to mean "the sun," and see in it the name of the sun-god. Joshua and his people stood still, which is to them the greatest exploit of Joshua's life, as they state that the figure of the sun (temunath ha-chere) was carved upon the sepulchre (Rashi, Comment, ad loc.). Others (as Fürst, i. 442), while accepting Heres as the original form, interpret that word only as a "sun," and the word "Heres" as an original word of the soil. Others, again, like Ewald (Gesch. ii. 347, 8) and Bertheau (On Judges), take Sûrah to be the original form, and Heres an ancient but unintentional error. It was the spot which at his own request was presented to Joshua after the partition of the country was completed (Josh. xix. 30), and in "the border of which he was buried" (xxiv. 30). It is specified as "in Mount Ephraim on the north side of Mount Gaash." Timnath-sûrah and the tomb of its illustrious owner were shown in the time of Jerome, who mentions them in the Epitaphium Paula (§ 15). Beyond its being south of Shechem, he gives no indication of its position, but he dismisses it with the following characteristic remark, a fitting tribute to the simple self-defender of the great soldier of Israel: "Satisque mirata est, quod possidetor possessi- sionum sibi montana et aspera delegit." Hebrew tradition, in accordance with the above Rabbinical interpretation, tells that the city of which Sûrah was the seat is said by rabbi Jacob (Carmoly, Itinéraires, p. 186), Hap-Parchi (Asher, Benj. of Tudela, p. 434), and other Jewish travellers down to Schwarzer in our own day (Palest. p. 151), to be about five miles south of Shechem (Nabül). This is doubtless the present Keft-Hârût, or Keft-Hârût, which is about four miles east of the distance S.S.W. of Nablûs. The modern village has three sacred places—one of Nebî Nûn, i.e. the tomb of Nun; the second, Nebi Lusha, i.e. the tomb of Joshua; and the third, Nebi Kif, i.e. the tomb of the "division by lot" (Conder, Tent-Work in Palestine, i. 78). Another and more promising identification has, however, been suggested in our own day by Dr. Smith (Bibl. Sacra [1848], p. 478 sqq.). In his journey from Jïfina to Mejdel-Yaba, about six miles from the former, he discovered the ruins of a considerable town by the name of Tîmneh on a gentle hill on the left (south) of the road. Opposite the town (apparently to the south) was a much higher hill, in the north side of which are several excavated sepulchres, which in size and in the richness and character of their decorations resemble the so-called "Tombs of the Kings" at Jerusalem. The mound or tell stands on the south bank of a deep valley, surrounded by desolate hills, and reached only by a cleft in a sheer cliff, by a cave; to the south-west is a beautiful and immense oak-tree, called by the natives Sheik et-Teim, "the chief, the servant of God." South of the tell the hillside is hollowed out with many tombs, most of which are choked up. One of these has a porch with two rude pilasters, and along the façade are over two hundred
niches for lamps; the trailing boughs of the bushes above hang down picturesque ly, and half cover the entrance. Within are three kokim, or cells, and through the central one it is possible to creep into a second chamber with only a single grave. Other tombs exist farther east, one having a sculptured façade; but the tomb described is the one popularly supposed to be that of Joshua (Conder, _sup. c. 228). See _Joshua_.

_Tim'nite_ (Heb. ḫimmî, ḫimmî; Sept. ΘημεïaΣευκ v. r. Θημουï), a designation of Samson's son's father-in-law, from his residence in Timnah (Judg. xv, 6).

_Tīm'oon_ (Tīmōw', a common Greek name), the fourth named of the seven, commonly called "deacons" [see _Deacons_], who were appointed to act as almoners on the occasion of complaints of partiality being raised by the Hellenistic Jews at Jerusalem (Acts vi, 5). A.D. 29. Like his colleagues, Timon bears a Greek name, from which, taken together with the occasion of their appointment, it has been inferred with much probability that the seven were themselves Hellenists. Nothing further is known of him with certainty; but in the _Synopsis de Vida et Morte Propheta rum, Apostolorum, et Discipulorum Domini_, ascribed to Dorotheus of Tyre (Bibl. Mat. Patram. iii, 149), we are informed that he was one of the "seven-and-twenty" disciples (the catalogue of whom is a mere collection of four New Testament names), and that he was regarded as bishop of Bost ra ("Bostra Arabum"), where he suffered martyrdom by fire.

Timoteans, a section of the Alexandrian Monophysites (q. v.), so named from Timoteus _Aphurius_, a bitter opponent of the canons of Chalcedon. During the patriarchate of Proterius, Timoteus established schismatical assemblies in Alexandria, having persuaded a few bishops and monks to join him in his secession from the communion of the patriarch. On the death of the emperor Marcian, he succeeded in obtaining consecration from two heretical and exiled bishops, and Proterius was murdered by the partisans of the usurping patriarch on Good-Friday, A.D. 457. After maintaining his position for three years, he was banished to the ancient Cherson, near Sebastopol, but was recalled by the emperor Basiliscus, and took possession of the patriarchal throne of Alexandria in 470. The opinions of Timoteus and his party went the full length of extreme Eutychianism, and in some of his writings he seems to write as if he himself did not exist (May, _Nova Collect. vii_, 257, 304, 305), he is found saying that the nature of Christ is one only—that is, divine; that in the first starting-point of conception by his mother he had one substance with human nature, but that he was not born of the Blessed Virgin in the ordinary way of a human virgin, but could not have been preserved. This form of Eutychianism thus repudiated the reality of Christ's human nature, and was practically identical with the opinion of the Docetists.

_Timoth'ees_ (Τιμόθεος, honoring God, a frequent name in Greek and Roman history; see Athen. x, 419; xiv, 626; Livy, xlii, 67; Pliny, vii, 57; xxxiv, 19, 94; xxxvi, 4, 9), the name of three Jews (such, at least, by assumption), who occupied the central place in the Ammonites (1 Macc. vi, 9), who was defeated on several occasions by Judas Maccabaeus (ver. 6, 11, 34-44). B.C. 164. He was probably a Greek adventurer (comp. Josephus, _Ant. xii_, 8, 1) who had gained the leadership of the tribe. Thus Josephus (_Ant. xii_, 8, 1) identifies him with "Tim'mon, a son of Aaro n," mentions one "Zeno, surnamed Cotyias, who was despot of Rabbah" in the time of Hyrcanus (I).

2. In 2 Macc. a leader named Timoteus is mentioned as having taken part in the invasion of Nicanaor (vii, 30; ix, 5). B.C. 166. At a later time he made preparations for a second attack on Judas, but was driven to a stronghold, Gaza, which was stormed by Judas, and there Timoteus was taken and slain (2 Macc. 4-57). It has been supposed that the events recorded in this latter narrative are identical with those in 1 Macc. vi, 5-8, an idea rendered more plausible by the similarity of the names of Jazer and Gazara (in Lat. _Ga zaser, Jazare, Gazara_). But the name Timoteus was very common, and it is evident that Timoteus the Ammonitic leader was not slain at Jazer (1 Macc. v, 34); and Jazer was on the east side of Jordan, while Gaza was almost certainly the city as Gaza (1 Macc. ii, 23; Gazara; Jazzer). It may be urged further, in support of the substantial accuracy of 2 Macc., that the second campaign of Judas against the first-named Timoteus (1 Macc. v, 27-44) is given in 2 Macc. xii, 2-24 after the account of the capture of Gaza and the death of the satrap of Egypt. We may add that all the differences in the narratives are blunders in 2 Macc. (De _Fide Liber. Macc. _§_xxxix.), and this in he is followed by Grimm (On _2 Macc. _xx, 24, 32). But, if any reliance is to be placed on 2 Macc., the differences of place and circumstances are rightly taken by Patri cius to mark different events (De _Liber. Macc. _§_xxxii., p. 259).

3. The Greek form of the name of TIMOTHEUS (q. v.), the special follower of Paul (Acts xvi, 1; xviii, 14, etc.). He is called by this name in the A.V. in every case except 2 Cor. i, 1; Phil. i, Heb. xiii, 25, and the episa cles addressed to him (1 Tim. i, 2, 18; vi, 20; 2 Tim. i, 2).

_Tim'othy_ (Τιμόθεος, i. e. TIMOTHEUS [q. v.], as the name is given in the A. V. Acts xvi, 1; xvii, 14, 15; xviii, 3; xix, 22; xx, 4; Rom. xvi, 21; 1 Cor. iv, 17; xvi, 10; 2 Cor. i, 19; Phil. i, ii; ii, 19; Col. i, 1; 1 Thess. i, 1; iii, 26; 2 Thess. i, 1), one of the most interesting of Paul's converts of whom we have an account in the New Testament. Finally we have tolerably copious details of his life and relations in the frequent references to him in that apostle's letters to the various churches, as well as in those addressed to him personally.

1. _Hes. Hier._, 1. 67, the disciple of Paul, and son of one of those mixed marriages which, though condemned by stricter Jewish opinion, and placing their offspring on all but the lowest step in the Jewish scale of precedence, were yet not uncommon in the later periods of Jewish history. The children of these marriages were known as _mesokleres_ ("bastards"), and stood just above the Nethinim. This was, however, _cateris paribus_. A bastard who was a wise student of the law was, in theory, above an ignorant high-priest (Gem. _Heros. Horayoth_, fol. 84, in Lightfoot, _Hor. Heb._ in _Matt. xxiii, 14_; and the education of Timothy (2 Tim. iii, 15) may have helped to overcome the prejudice which the Jews would naturally have against him on this ground. The mother was a Jewess, but the father's name is unknown; he was a Greek, i. e. a Gentile, by descent (Acts xvi, 1, 5). If in any sense a proselyte, the fact that the issue of the marriage did not receive the sign of the covenant would render it probable that he belonged to the class of half-converts, the so-called _Prosleities_ of the _Scape_, not those of Righteousness, if such a class as the former existed. See _Prosleity._

The absence of any personal allusion to the father in the Acts or Epistles suggests the inference that he must have died or disappeared during his son's infancy. The care of the boy thus devolved upon his mother, Eunice, and her mother, Lois, who are both mentioned as sincere believers (2 Tim. i, 5). Under their training his education was emphatically Jewish.

From a child he learned (probably in the Sept. version) to read the _LXX_. The language of the Acts leaves it uncertain whether Lystra or Derbe was the residence of the devout family. The latter has been inferred, but without much likelihood, from a possible construction of Acts xx, 4, the former from xvi, 2, (see Neander, _Fluss_ and _Leit._ i, 298; Alford and Walford, _Comment._ p. 291). The absence of any indication of the existence of a synagogue makes this devout consistency more noticeable. We may
think here, as at Philippi, of the few devout women going from the synagogue of a noisy river-side oratory (Conybeare and Howson, i, 211). The reading ἐφ' ἱνα in 2 Tim. iii, 14, adopted by Lachmann and Tischendorf, indicates that it was from them as well as from the apostle that the young disciple received his first impression of Christian truth. It would be natural that a character thus fashionably brought together would find its epitaph in a female pen. A continuation far from robust (1 Tim. v, 28), a morbid shrinking from opposition and responsibility (iv, 12-16; v, 20, 21; vi, 11-14; 2 Tim. ii, 1-7), a sensitiveness even to tears (i, 4), a tendency to an ascetic rite which he had not strength to bear (1 Tim. v, 28), united, as it often is, with lowliness, even to the point of what Routh calls a "feminine" despair, is like the editor's dissertation De Neokrateis, Ἠπισκόπους, by Bonius, in Hase, Thessalonicis, vol. ii) from "youthful lusts" (2 Tim. ii, 22) and the softer emotions (1 Tim. v, 2)—these we may well think of as characterizing the youth as they afterwards characterized the man.

2. His Conversion and Ordination.—The arrival of Paul and Barnabas in Lycaonia (Acts xiv, 6) brought the message of glad tidings to Timothy and his mother, and they received it with "unfeigned faith" (2 Tim. i, 5). A.D. 44. If at Lystra, as seems probable from 2 Tim. i, 4, may be the "short circuit prepared for him a life of suffering" (ver. 22). From that time his life and education must have been under the direct superintendence of the body of elders (ver. 23). During the interval of three years between the apostle's first and second journeys, the youth had greatly matured. His zeal, probably his asceticism, became known both at Lystra and Iconium. The mention of the two churches as united in testifying to his character (xvi, 2) leads us to believe that the events after his apostleship of Corinth, to the extent that he had already been employed in what was afterwards to be the great labor of his life, as "the messenger of the church," and that it was his tried fitness for that office which determined Paul's choice. Those who had the deepest insight into character and spoke with a prophetic utterance pointed out to him (1 Tim. i, 18; iv, 14), as others had pointed before to Paul and Barnabas (Acts xiii, 2), as specially fit for the missionary work in which the apostle was engaged. Personal feeling led Paul to the same conclusion (xvi, 3), and he was solemnly set apart (the whole assembly of the elders laid their hands upon him) to do the work, and possibly to bear the title, of evangelist (1 Tim. iv, 14; 2 Tim. i, 6; iv, 5). Iconium has been suggested by Conybeare and Howson (i, 289) as the probable scene of the ordination.

A great obstacle, however, presented itself. Timothy, though inheriting, as it were, from the noble side (Wattstein, ad loc.), and therefore reckoned as one of the seed of Abraham, had been allowed to grow up to the age of manhood without the sign of circumcision, and in this point he might seem to be disclaiming the Jewish blood that was in him and choosing to take up his present nature (ver. 4). Had he, by reason of his position, it would have been utterly inconsistent with Paul's principle of action to urge on him the necessity of circumcision (1 Cor. vii, 18; Gal. ii, 3; v, 2). As it was, his condition was that of a negligent, almost of an apostate, Israelite; and, though circumcision was nothing, and uncircumcision was nothing, it was a serious question whether the scandal of such a position should be allowed to frustrate all his efforts as an evangelist. The fact that no offence seems to have been felt hitherto is explained by the predominance of the Gentile element in the churches of Lycaonia (Acts xiv, 27). For many years, therefore, the Jews, who had already shown themselves so ready to attack, and then the scandal would come out. They might tolerate a heathen, as such, in the synagogue or the church, but an uncircumcised Israelite would be to them a horror and a portent. With a special view to their feelings, much less to any sacrifice which little, who had refused to permit the circumcision of Titus, "took and circumcised" Timothy (xvi, 8); and then, as conscious of no inconsistency, went on his way distributing the decrees of the council of Jerusalem, the great charter of the freedom of the Gentiles (ver. 4).

Henceforth, one may suppose, to be the constant companion. Not since he parted from Barnabas had he found one whose heart so answered to his own. If Barnabas had been as the brother and friend of early days, he had now found one whom he could claim as his own by a spiritual passage (2 Tim. i, 2). He calls him "son" (2 Tim. i, 6); the great name of "faith" (ver. 2): "my beloved son" (1 Cor. iv, 17); "my workfellow" (Rom. xvi, 21); "my brother" (which is probably the sense of Υςταμενον ο δοκιμος in 2 Cor. i, 1).

3. His Evangelistic Labors and Journeys.—Continuing his second missionary tour, Paul now took Timothy with him, and, accompanied by Silvanus, and probably Luke also, journeyed at length to Philippi (Acts xvi, 12), where the young evangelist became conspicuous at once for his filial devotion and his zeal (Phil. ii, 22). His name does not appear in the account of Paul's work at Thessalonica, and it may be that he remained some time at Philippi, and then acted as the representative of the members of that church sent what they were able to give for the apostle's wants (iv, 15). He appears, however, at Berea, and remains there when Paul and Silas are obliged to leave (Acts xvi, 14), going on afterwards to join his master in Greece (Acts xvi, 21; iv, 22). Meanwhile he is sent back to Thessalonica (ibid.), as having special gifts for comforting and teaching. He returns from Thessalonica, not to Athens, but to Corinth, and his name appears united with Paul's in the opening words of both the letters written from that city to the Corinthians (1 Thess. i, 1; 2 Thess. i, 1). Dr. Wordsworth infers from 2 Cor. ix, 11 and Acts xviii, 5 that Timothy brought contributions to the support of the apostle from the Macedonian churches, and thus released him from his constant labor as a tent-maker. Here, also, he was apparently active as an evangelist (2 Cor. i, 19), and on Paul's probable proconsular and娶象, devoted the duty of baptizing the new converts (1 Cor. i, 14). Of the next four or five years of his life we have no record, and can infer nothing beyond a continuance of his active service as Paul's companion.

When we again meet with him, it is as being sent on his missionary work (Acts xix, 21-24). We hear of his troubles and sufferings even at this early stage of his life. It is probably in the period of his first work that, after accomplishing the special work assigned to him, he returned by the same route and met Paul according to a previous arrangement (ver. 11), and was with him when the second epistle was written to the Church of Corinth (2 Cor. i, 1). He returns with the apostle to that city, and joins in messages of greeting to the disciples whom he had known personally at Corinth and who had since found their way to Rome (Rom. xvi, 21). He forms one of the company of friends who go with Paul to Philippi and then sail by themselves, waiting for his arrival by a different ship (Acts xx, 2). He accompanies Paul in the latter's second visit to Jerusalem, and what became of him during Paul's imprisonment at Caesarea, are points on which we must remain uncertain. The language of Paul's address to the
elders of Ephesus (ver. 17–25) renders it unlikely that he was then left there with authority. The absence of his name from ch. xxvii in like manner leads to the conclusion that he did not share in the perilous voyage to Rome in 62 (ver. 13), and became sick shortly, soon after his arrival in Rome, and was with him when the epistles to the Philippians, to the Colossians, and to Philemon were written (Phil. i, 1; ii, 19; Col. i, 1; Philem. 1). All the indications of this period point to incessant missionary activity. As before, so now, he is to precede the personal grace of the apostle, inspecting, advising, reporting (Phil. ii, 19–28), caring especially for the Macedonian churches as no one else could care. The special messages of greeting sent to him at a later date (2 Tim. iv, 21) show that at Rome also, as elsewhere, he had gained the warm affection of those among whom he ministered. Among those most eager to be thus remembered to him we find, according to a fairly supported hypothesis, the names of a Roman noble, Pudens (q.v.), of a future bishop of Rome, Linus (q.v.), and of the daughter of a British king, Claudia (Williamson, Claudius and Pudens; Conybeare and Howson, ii, 59; Alford, Encyc. in Greek Test. iii, 104). It is interesting to think of the young evangelist as having been the instrument by which one who was surrounded by the fathomless impurity of the Roman world was called to a higher life, and the names which would otherwise have been lost in the mists of time (Martial, i, 82; iv, 18; v, 14; vi, 53; raised to a perpetual honor in the salutations of an apostolic epistle. An article (They of Caesar's Household in Journ. of Class. and Sacred Philology, No. x, questions this hypothesis, on the ground that the epigrams are later than the epistles, and that they cannot have joined the name of Pudens with heathen customs and vices. On the other hand, it may be urged that the bantering tone of the epigrams forbids us to take them as evidences of character. Pudens tells Martial that he does not like his poems.” "Oh, that is because you read too many at a time” (iv, 29). He begins by saying that the person addressed has joined him, however, in an autograph copy, then, do you?” (vii, 11). The slave En-or Eucloupolus (the name is possibly a wilful distortion of Eubulus) does what might be the fulfillment of a Christian vow (Acts xviii, 18), and this is the occasion of the suggestion which seems most damnable (Martial, v, 49). Martial gives this interpreters a language in iv, 52; vi, 58, the language of a more real estate than is common in Martial (comp. some good remarks in Galloway, A Clergyman’s Holidays, p. 34–49).

To the close of this period of Timothy’s life we may probably refer the imprisonment of Heb. xiii, 25, and the stoning of his “companion” the “worthless” and “unworthy to be likened to that of the Great Confessor before Pilate (1 Tim. vi, 13). Assuming the genuine- ness and the later date of the two epistles addressed to him (see below), we are able to put together a few notices as to his later life. It follows from 1 Tim. i, 8 that he and his master, after the release of the latter from his imprisonment, revisited the proconuscal Asia; that the apostle then continued his journey to Macedonia, while the disciple remained, half reluctantly, even weeping at the separation (2 Tim. i, 4), at Ephesus, to check, if possible, the outgrowth of heresy and licentiousness which had sprung up there. The time during which he was thus to exercise authority as the delegate of an apostle—a vicar apostolic rather than a bishop—was of uncertain duration (1 Tim. iii, 14). The position in which he found himself might well make him anxious. He had to rule presbyters, most of whom were older than himself, and perhaps not on equal terms with him. If he were to exercise the functions of a bishop, he must in proportion to his work (v, 17), to receive and decide on charges that might be brought against them (ver. I, 19, 20), to regulate the almsgiving and the sisterhoods of the Church (ver. 3–10), to ordain presbyters and deac- cons (iii, 1–19). There was the risk of being entangled in the political and civil strife which was rife in the great city. There was the risk of injuring health and strength by an overstrained asceticism (iv, 4; v, 23). Leaders of rival sects were there—Hymenaeus, Philetus, Alexander—to oppose and thwart him (i, 20; 2 Tim. ii, 17; iv, 14, 15). The name of his beloved teacher was no longer honored. The day of death and judgment of former days had vanished, and “Paul the aged” had become unpopular, the object of suspicion and diatike (comp. Acts xx, 37; 2 Tim. i, 15). Only in the narrow circle of the faithful few—Aquila, Priscilla, Mark, and others—who were still with him was he likely to find sympathy of a kind to which he was accustomed. He who had known how to throw open new paths in the past, knew that the apostle, knowing these trials, and with his marvellous power of bearing another’s burdens, making them his own, should be full of anxiety and fear for his disciple’s steadfastness; that admonitions, appeals, warnings, should be repeated and repeated; and other in rapid and vehement succession (1 Tim. i, 18; iii, 11; iv, 14; iv, 21; 2 Tim. i, 11). In the second epistle to him this deep personal feeling utters itself yet more fully. The friendship of twenty years was drawing to a close, and all memories connected with it throng upon the mind of the old man, now ready to be offered: the blameless youth (2 Tim. iii, 15), the holy household (i, 5), the sole son and heir to whom there was need (ver. 13). We may hazard the conjecture that he reached him in time, and that the last hours of the teacher were soothed by the presence of the disciple whom he loved so truly. Some writers have even seen in Heb. xiii, 23 a sign that he shared Paul’s imprisonment, and was released from it by the death of Nero (Conybeare and Howson, ii, 502; Neander, Pflanz. und Leit. i, 502). Beyond this all is apocryphal and uncertain.

4. Legendary Notices.—Timothy continued, according to the old traditions, to act as bishop of Ephesus (Euseb. Hist. Eccles. i, 4; 2; Carp. in waif. 1; 2 Tim. ii, 2, 3); his seat was probably the great city itself, and the so-called Tim. Episcopo Ephes. (Lips. 1755), and died a martyr’s death under Domitian or Nerva (Nicipp. Hist. Eccles. iii, 11; Photius, Cod. 254). The great festival of Artemis (the karyagwv of that goddess) led him to protest against the license and frenzy which accompanied it. The mountains were his, and he was a slave to death with clubs (comp. Polycrates and Simeon Metaphr. in Henschens Aca. Sanctorum, Jan. 24). Some later critics—Schleiermacher, Mayerhoff—have seen in him the author of the whole or part of the Acts (Olahausen, Commentar., ii, 612).

A somewhat startling theory as to the intervening period of his life has found favor with Calmet (s.v. "Timothée"), Tillemon (ii, 147), and others. If he continued, according to the received tradition, to be bishop of Ephesus, then he, and no other, must have been the "angel" of that Church to whom the message of Rev. ii, 1–7 was addressed, it may be argued, as in some degree confirming this view, that both the praise and the blame of that message are thus harmonize with the impressions as to the character of Timothy derived from the Acts and the Epistles. The refusal to acknowledge the self-styled apostles, the abhorrence of the deeds of the Nicolaitans, the unwearied labor, all this belongs to "the man of God" of the Pastoral Epistles. Nor is the fault less characteristic. The strong language of Paul's entreaty would lead us to expect that the temptation of such a man would be to fall away from the glow of his "first love," the zeal of his first faith. The promise of the new beginning that Paul "has laid up for him, as an inheritance, as that implied in the language of the apostle (2 Tim. ii, 4–6). This conjecture, it should be added, has been passed over unnoticed by most of the recent commentators on the Apocryph (comp. Alford and Wordsworth, ad loc.). The French "Neron Churchs of Asia," p. 64, connects the "angel" of Rev. ii, 1–7 with the "higher angel" who, with the generation to which he be-
TIMOTHY, FIRST EPISTLE TO 417 TIMOTHY, FIRST EPISTLE TO

longed, had passed away when the Apocalypse was
written. It must be remembered, however, that, at the
timothy, the bishop of any single diocese, but the superintendent
of many churches. This, however, may in its turn be
traversed by the answer that the death of Paul may have
made a great difference in the work of one who had hitherto been
employed in travelling as his representative. The special charge committed to him in the
Pastoral Epistles is a unique event in the history of the
Church, and unusually important. The Pauline authorship of
the letters is attested by a great many of the fathers and
clerics, as well as by a number of other ancient writers.

An additional fact connected with the name of Timo-
thy is that two of the treatises of the Pseudo-Dionysius
the Areopagite are addressed to him (De Hierarch.
Cael. i. 1; comp. Le Nourry, Disser. c. ix, and Halioix,
Quisiv. iv in Migene’s edition).

5. Literature.—In addition to the works above cited,
see Klauck, De Timo. Moprop. (Vittemburg, 1718); Zeelen,
De Timo. Confessore (Lubeck, 1783); Hausdorf, De Ordina-
tione Timo. (Vittemburg, 1745); Witsius, Miscell. Spec., ii,
498; also his Exercit. Acad. p. 316 sq.; Mosheim, Einleit.
loc. in P. Cas. (Hamburg, 1758); Lessing, Einleit.
vi, 349 sq.; Heydenreich, Leben d. Timotheus, in
Tischherr’s Memoria, VIII, ii, 19-76; Evans, Script.
Bibl. vol. I; Lewin, St. Paul (see Index); Plumptre, Bi-
ble Educator (see Index); and especially Howson, Com-
panions of St. Paul (Lond. 1861). See Paul.

TIMOTHY, FIRST EPISTLE TO. This is the first
of the so-called Pastoral Epistles of Paul, and therefore
in treating it we shall adduce many points, especially those
relating to its authenticity, etc., which are applicable to
two, and indeed to all three, of them. See Paul.

1. Authorship.—The question whether these epistles
were written to Timothy alone or to two, or three, within
the last half-century, hardly any answer but an affirmative
one was thought possible. They are found ascribed to
Paul in the Peshito version (2d century), in the
Muratorian fragment, and in the catalogue of Eusebius, who
places them among the ὑμηταιογείματα. The cata-
louges of Athanasian, of the Laodicean Council (364), of Cyril,
of Epiphanius, and of Jerome contain them, and ascribe
them to the apostle. Reminiscences of 1 Tim. occur in
Clem. Rom. (Epist. 1 Cor. xxii): “Let us draw nigh to
him: ... lifting up pure and undefiled hands” (comp.
1 Tim. i, 8); in Polycarp (Ad Philippien, c. 4): “The
vow which we have made to God, that is, that we
brought nothing into this world, and can carry nothing
out, let us put on the armor of righteousness” (comp.
1 Tim. vi, 7, 10); and in the letter of the Church at
Vienne and Lyons: “But the fury of the enemy chiefly
fell on Attalus, a pillar and ground of our Church” (Eusebius, Hist. Eccle., v. 1; comp. 1 Tim. iii, 15). To
2 Tim. Ignatius seems to allude when he writes to Poly-
carp (c. 6): “Please him whose soldiers ye are, and from
whom you receive pay” (comp. 2 Tim. ii, 4); and Poly-
carp (Ad Philippien, c. 5): “He has promised us that if
we walk worthy of him, we shall reign with him” (comp.
2 Tim. ii, 11, 15). The apostle to Titus Ignatius
alludes (Ad Troll. c. 8): “Whose behavior is itself a
great lesson of instruction.” (The word for “be-
havior,” καρδιάννα, occurs in the New Test. only in Tit.
i, 3). Likewise Clem. Rom. (Ep. i, 2): “Ye were ready
for every good work” (comp. Tit. iii, 8). In 2 Tim. we
have Ignatius again (Ad Herr. i, 1): “They introduce vain genealogies, which, as the apo-
stle says, ‘minister questions, rather than godly edify-
ing, which is in faith’” (comp. 1 Tim. i, 4); in Clem.
Alex. (Strom. ii, 383): “Concerning which the apostle
writes, ‘let them keep the deposit’” (comp. 2 Tim. iv, 20, 21); and in Tertull. (De Præscript., Hær., c. 25): “And this word Paul has used to Timothy, ‘to Timothy, keep the deposit’” (comp.

bid). To 2 Tim. in Ireneus (Ad. Herr. iii, 3, 8): “The
apostles delivered the episcopate to Linus; ... of which
there are many testimonies still preserved” (comp. 2 Tim. iv, 21); and in Tertul.
(Scopp. c. 18): “Exulting (i. e. Paul) in the prospect of it, he writes to Timothy, ‘I am poured out as a drink-
offering; and the time of my departure is at hand’”
(comp. 2 Tim. iv, 6). To the epistle to Titus in Ire-
neus (Ad. Herr. iii, 3, 4): “The apostles would not even in word communicate with those who adnurated
the truth, as Paul says, ‘A heretic after the first
admonition reject, knowing that such a one is perverse’
etc. (comp. Tit. iii, 10, 11); in Clem. Alex. (Admon. ad Gen.
p. 6): “For as that divine apostle of the Lord says,
‘The servant who is not faithful, shall be thrown into
tomorrow’s darkness’” (comp. Tit. ii, 11-13); and in Tertull. (De Praes. c.
6): “Paul, ... who suggests that ‘a heretic after the
first admonition is to be rejected as perverse’” (comp.
Tit. iii, 10). See also Terrull. (Ad Ussorem, i, 7), Irene-
eus (Ad. Herr. iv, 16, 3; ii, 14, 8). Parallelisms, im-
plying quotation, in one or two cases of this kind,
are found likewise in Ignatius, Ad Magm. c. 8 (1 Tim.
i, 4); Polycarp, c. 4 (comp. 1 Tim. vi, 7, 8); Theoph-
ilius of Antioch, Ad Autol. iii, 126 (comp. 1 Tim. ii, 1,
2). Later testimony is so abundant that it is needless
to adduce it. Thus the external testimony, indirect
and direct, points to the continuous authorship of the
epistles, as the apostolic teaching, or of letters written by him, on
the hypothesis that they had been sent forth after his death
by some over-zealous disciple, who wished, under the
shadow of his name, to attack the prevailing error of the
time (Eichhorn, ibid.). One writer (Schott, Itaale.
Hist.-crit., p. 284) ventures on the hypothesis that Luke
was the writer. Beur (Die Kogeniæm Pastoral-Briefe,
here as elsewhere more daring than others, assigns them
to no earlier period than the latter half of the 2d
century, after the death of Polycarp in A.D. 167 (p. 188).
On this hypothesis 2 Tim. was the earliest, 1 Tim.
the latest of the three, each probably by a different writer
(p. 72-76). They grew out of the state of parties in the
Church of Rome, and, like the Gospel of Luke and the
Acts, were intended to mediate between the extreme
Pauline and the extreme Petrine sections of the
Church (p. 38). Writing from the data supplied by the Epistle
to the Philippians (the earliest of the Pastoral letters),
to the Ephesians, and to the Hebrews, 1 Tim.
attests the divinity of Christ, and 2 Tim. speaks
names of Titus, and lastly of 1 Tim, aimed, by the insertion
of personal incidents, messages, and the like, at giving to
their compilations an air of version (p. 70). It
will be seen from the above statement that the ques-
tion of the authorship is more than usually important.
There can be no solution as regards the epistles
like that of an obviously dramatic and therefore legitimate
personation of character, such as is possible in rela-

X.—D 0
TIMOTHY, FIRST EPISTLE TO 418 TIMOTHY, FIRST EPISTLE TO

ation to the authorship of Ecclesiastes. If the Pastoral Epistles are not Pauline, the writer clearly meant them to pass as such, and the animus decipendi would be there in its most flagrant form. They would have to take their place with the Pseudo-Clementine Homilies, or the Pseudo-Ignatian Epistles. Where we now see the traces, full of life and interest, of the character of "Paul," we should be more ready to recognize only the tricks, sometimes skilful, sometimes clumsy, of some unknown and dishonest controversialist. Consequences such as these ought not, it is true, to lead us to suppress or distort one iota of evidence. They may well make us cautious, however, in examining things that admit of wider the premises, not to take the premises themselves for granted. The task of examining is rendered in some measure easier by the fact that, in the judgment of most critics, hostile as well as friendly, the three Pastoral Epistles stand on the same ground. The intermediate hypotheses of Schleiermacher (erst) and Credé (Eisele, in N. T.), who looks on Titus as genuine, 2 Tim. as made up out of two genuine letters, and 1 Tim. as altogether spurious, may be dismissed as individual eccentricities, hardly requiring a separate notice. In dealing with objections which take a wider range, we are meeting those also which are confined to one or two out of the three epistles.

(1) Objections to these Epistles in General.—The chief elements of the alleged evidence of spuriousness in the three Pastoral Epistles may be arranged as follows.

1. Language. — The style, it is urged, is different from that of other Pauline Epistles. There is less logical continuity, a want of order and plan, subjects brought up, one after the other, abruptly (Schleiermacher). Not less than fifty words, most of them striking and characteristic, are found in these epistles which are not found in Paul's writings. (See on these Gegensätze by Conzmann and Schleiermacher, Eisele.) The formula of salutation (χαίρε, λυπέω, εὐφρονία), half-technical words and phrases like ύπατεία and its cognates (1 Tim. ii, 2; iii, 16; vi, 6 et al), παρακαταθέναι, εὐθυμία, ζωή, δόξα, λόγος (1 Tim. i., 11, 13, ii. 3, 11, 14; 2 Tim. iii., 11, 16), the use of ηὐκολοιos, as the distinctive epithet of a true teaching—these and others like them appear here for the first time (Schleiermacher and Baur). Some of these words, it is urged, χαύρων, ἔκτισθαι, σωφρ., φῶς ἀπόστολον, belong to the Gnostic terminology of the century.

On the other side it may be said (1) that there is no test so uncertain as that of language and style thus applied; how uncertain we may judge from the fact that Schleiermacher and Neander find no stumbling-blocks in 2 Tim. and Titus, while they detect an un-Pauline character in 1 Tim. A difference like that which marks the speech of men divided from each other by a century may be conclusive against the identity of authorship; but, short of that, there is hardly any conceivable diversity which may not coexist with it. The style of one man is stereotyped, formed early, and enduring long. The authorship on first sight, an unknown name, the same words recur. That of another changes, more or less, from year to year. As his thoughts expand, they call for a new vocabulary. The last works of such a writer, as those of Bacon and of Burke, may be florid, redundant, figurative, while the earlier were almost meagre. The Pastoral Epistles, so far as we understand them, are not a solitary thinker, or a strong assertor of his own will, will he tend to the former state. In proportion to his power of receiving impressions from without, of sympathizing with others, will be his tendency to the latter. Apart from all knowledge of Paul's character, the alleged peculiarities are too slight in proportion as the man is a solitary thinker. With that knowledge we may see in them the natural result of the intercourse with men in many lands, of that readiness to become all things to all men, which could hardly fail to show itself in speech as well as in action. Each group of his epistles has, in like manner, its characteristic words and phrases. (2) If this is true generally, it is so yet more emphatically when the circumstances of authorship are different. The language of a bishop's charge is not that of his letters to his private friends. The epistles which Paul wrote to the churches as societies might well differ from those which he wrote to individuals. The bishop and his influential friend, to his own "true son." It is not strange that we should find in the latter a Luther-like vehemence of expression (e.g. εἰκαστημερισμοί, 1 Tim. iv., 2; διαπαρακηρυσσεῖτο δι' ἐνεπηρτήματος τῶν νοιῶν, vi., 5; σωφρονίσαι ἐμφανίζεται, 2 Tim. iii., 6), mixed sometimes with words and phrases that are not without a keen sense of humor, and the capacity, at least, for satire (e.g. γραφοῦσι μὴδένου, 1 Tim. iv., 7; φιλαράκι καὶ πιεριγος, v., 18; τυφώσκως, vi., 4; γαστεῖρες ἀρταί, Tit. i., 12). (3) Other letters, again, were dictated to an amanuensis. These have every appearance of having been written by his own hand, and this can hardly have been without its influence on their style, rendering it less diffuse, the transitions more abrupt, the treatment of each subject more concise. In this respect it may be compared with the other two autograph epistles, these of Galatians and Ephesians. A list of words given by Alford (vol. iii. Proleg., vii.) shows considerable resemblance between the first of these two and the Pastoral Epistles. (4) It may be added that to whatever extent a forger of spurious epistles would be likely to form his style after the pattern of the recognized ones, so much might not be able to distinguish the genuine from the spurious, or even to extend the diversity which has been dwelt on is, within the limits that have been above stated, not against, but for, the genuineness of these epistles. (5) Lastly, there is the positive argument that there is a large common element, both in the ideas and words, between these epistles and the others. The grounds of faith, the law of life, the tendency to digress and go off at a word, the personal, individualizing affection, the free reference to his own sufferings for the truth, all these are in both, and by them we recognize the identity of the writer. The coincidence can hardly be true within the limits of this article, but its weight will be felt by any careful student. The coincidences are precisely those, in most instances, which the forger of a document would have been unlikely to think of, and give but scanty support to the perverse ingenuity which sees in these resemblances a proof of compilation, and therefore of spuriousness.

2. Anacronism.—It has been urged (chiefly by Eichhorn, Eisele, p. 315) against the reception of the Pastoral Epistles that they cannot be fitted into the records of Paul's life in the Acts. To this there is a threefold answer. (1.) The difficulty has been enormously exaggerated. If the dates assigned to them must, to some extent, be conjectural, there are, at least, two hypotheses in each case (infra) which rest on reasonably good grounds. (2.) If the difficulty were as great as it is said to be, the mere fact that we cannot fix the precise date of three or one of the Epistles, or that the author's travels and journeys we have, after all, but fragmentary records, ought not to be a stumbling-block. The hypothesis of a release from the imprisonment with which the history of the Acts ends removes all difficulties; and if this be rejected (Baur, p. 67), as itself not resting on sufficient evidence, one of these critics, in a wide gap of which we know nothing. It may at least claim to be a theory which explains phenomena. (3.) Here, as before, the reply is obvious, that a man composing counterfeit epistles would have been likely to make them square with the acknowledged records of the life.

3. Ecclesiasticism.—The three epistles present, it is said, a more developed state of Church organization and doctrine than that belonging to the lifetime of Paul. (1.) The rule that the bishop is to be "the husband of
TIMOTHY, FIRST EPISTLE TO 419 TIMOTHY, FIRST EPISTLE TO

one wife" (1 Tim. iii, 2; Tit. i, 6) indicates the strong opposition to second marriages which characterized the 2d century (Baur, p. 118-120). (2) The "younger widows" of 1 Tim. v, 11 cannot possibly be literally widows. If they were, Paul, in advising them to marry, would be excluding them from the society of other widows, and from all chance of sharing in the Church's bounty. It follows, therefore, that the word χήρα is used, as it was in the 2d century, in a wider sense, as denoting a consecrated life (Baur, p. 42-49). (3) The rules affecting the relation of the bishops and elders indicate a hierarchical distribution of the churches, in which one Roman bishop became dominant in the Church of Rome in the post-apostolic period, but foreign altogether to the genuine epistles of Paul (Baur, p. 80-89). (4) The term οἰκονόμους is used in its later sense, and a formal procedure against the heretic is recognised, which belongs to the 2d century rather than the first. (5) The upward progress from the office of deacon to that of presbyter, implied in 1 Tim. iii, 13, belongs to a later period (Baur, loc. cit.). (6) On 2 Tim. i, 6; ii, 2, see below.

"It is not difficult to meet objections which contain so large an element of mere arbitrary assumption. (1) Arguments that there are slight omissions and elisions in the rule which should not be put to the right one, the rule which makes monogamy a condition of the episcopal office is very far removed from the harsh, sweeping censures of two other second marriages which we find in Athenagoras and Tertullian. (2) There is no shadow of proof that the "younger widows" of 1 Tim. v, 10 are assimilated to the "second epistles of Paul" in the middle of the 2d century. (3) There are no lateral developments of the Ignatian Epistles and other writings of the 2d century. They are in entire agreement with the language of Paul (Acts xx, 17, 28; Phil. i, 4). Few features of these epistles are more striking than the absence of any high hierarchical system. (4) The word οἰκονόμους has its counterpart in the αὐτοκράτορος of 1 Cor. xv, 19. The sentence upon Hymenaeus and Alexander (1 Tim. i, 20) has a precedent in that of 1 Cor. v, 5. (5) The best interpreters do not see in 1 Tim. iii, 13, 15, the "second" epistles of Paul (comp. Elliptic, ad loc., and see Deacon). If it is there, the assumption that such a change is foreign to the apostolic age is entirely an arbitrary one. 4. Hesarrhology.—Still greater stress is laid on the indications of a later date in the descriptions of the false teachers noticed in the Pastoral Epistles. These point, it is said, unmistakably to Marcion and his followers. In the ἀντίδειας τῆς ἁγιάζουσας γυναῖκος (1 Tim. vi, 20) there is a direct reference to the treatise which he wrote under the title of ἀντιτιθέμενος, setting forth the contrast between the Old and New Test. (Baurn, 261). The "genealogies" of 1 Tim. i, 4; Tit. iii, 9 in like manner point to the sons of the Valentinians and Ophites (ibid., p. 12). The "forbidding to marry, and commanding to abstain from meats," fits in to Marcion's system, not to that of the Judaizing teachers of Paul's time. The καταλόγος of 1 Tim. i, 8 implies a denial, like that of Marcion, of its divine authority. The doctrine that the "resurrection was past already" (2 Tim. ii, 18) was thoroughly Gnostic in its character. In his eagerness to find tokens of a later date everywhere, Baur sees in the writer of the Pastoral Epistles a false accretion of a Gnostic character, but does not in part infected with their teaching, and appeals to the doxologies of 1 Tim. i, 17; vi, 15, and their Chrisology throughout, as having a Gnostic stamp on them (p. 28-33).

Carefully elaborated as this part of Baur's attack has been, it is, perhaps, the weakest and most capricious of all. The false teachers of the Pastoral Epistles are predominantly Jewish, οὐκοδιδοκαλοι (1 Tim. i, 7), belonging altogether to a different school from that of Marcion, giving heed to "Jewish fables" (Tit. i, 4) and "disputes connected with the law" (iii, 9). Of all monotheists of the first few centuries, it is more difficult to say than that which finds in οὐκοδιδοκαλοι Antinomian teachers, and in οὐκ αντιστατον Antinomian doctrine (Baur, p. 17). The natural suggestion that in Acts xx, 39, 41 Paul contemplates the rise and progress of a like perverse teaching; that in Col. ii, 8-23 we have the same combination of Judaism and Gnosticism which in a self-styled way was discovered in the 2d century (1 Tim. vi, 20) or φιλοσοφία (Col. ii, 8), leading to a like false asceticism, is set aside summarily by the rejection both of the speech and the epistle as spurious. Even the denial of the resurrection, we may remark, belongs as naturally to the mingling of a Sadducee element with an Eastern mysticism as to the teaching of Marcion. The self-contradictory hypothesis that the writer of 1 Tim. is at once the strongest opponent of the Gnostics, and that he adopts their language, need hardly be refuted. The whole line of argument, indeed, first misrepresents the language of Paul in these epistles, and then, when it has been shown that all the language from the 1st century of even the germ of the teaching which characterized the 2d (comp. Neander, Ἰησοῦν καὶ ἴησους, i, 401; Heydenreich, p. 64).

(II.) Special Objections to the First Epistle.—The most prominent of these are the following: 1. That it represents the Church as a light in the darkness of the 2d century, with other notices of him in Paul's epistles to regard him. Here he appears as little better than a novice, needing instruction as to the simplest affairs of ecclesiastical order; whereas in the First Epistle to the Corinthians, written earlier than this, we find him (iv, 17) described by Paul as a "beloved son and faithful in the Lord, whom shall bring you into remembrance of my ways which be in Christ, as I teach everywhere in every Church:" and in 1 Thess. i, 1-8 we are told that the apostle had sent him to Thessalonica to establish the believers there, and to comfort them concerning their faith. If Timothy was so well able to regulate the churches at Corinth and Thessalonica, how, it is asked, can it be supposed that a short while afterwards he should require such minute instructions for his conduct as this epistle contains? To this it may be replied, (1) that in visiting Corinth and Thessalonica Timothy presided in the absence of Apostles, and received, ill or well, received from him minute instructions as to how he should proceed among those to whom he was sent; so that the alleged difference in the circumstances of Timothy when sent to Corinth and when left in Ephesus disappears; (2) it does not necessarily follow from the injunctions given to Timothy in this epistle that the writer regarded him as a novice, for they rather respect the application of general principles to peculiar local circumstances than set forth instructions such as a novice would require: and (3) it is not to be forgotten that the Apostle designed through Timothy to present to the Church a large body of truth, which should be useful to it in all ages of its existence.

2. It is objected that after the Church at Ephesus had enjoyed the apostle's instructions and presidency for three years it could not have been, at the time this epistle is supposed to have been written by Paul, in such ignorance of ecclesiastical arrangements as the injunctions here given would lead us to suppose. But what is there in the epistle that necessitates such a supposition? It contains many directions to Timothy how he should conduct himself in a church, some of which are applicable to an apostle of the first rank, but there is nothing that leads to the conclusion that they were all intended for the benefit of the Church at Ephesus, or that the state of that Church was such as to require that injunctions of this kind should be given for its sake alone. Timothy's sphere of evangelistic effort extended greatly beyond Ephesus; and this epistle was
TIMOTHY, FIRST EPISTLE TO 420

TIMOTHY, FIRST EPISTLE TO

designed at once to guide him as to what he was to do in the churches which he might be called to regu-
late, and to supply his authority for so doing. Be-

sides, does it not naturally occur that such minute in-
junctions are just as such a person forgiving this epistle at a later period in Paul's name would be most likely to avoid?

3. The absence of allusions to events in Timothy's history has been alleged against the Pauline origin of this epistle. A strange objection—and as untenable as strange—can be seen by a reference to the fol-

lowing passages: i. 18; iv. 14; v. 23; vi. 12.

4. It is alleged that the writer of this epistle has made such a mistake as Paul could not have made when he classes Alexander with Hymenæus (1 Tim. i. 20) as a false Christian, whereas we know from 2 Tim. iv. 14 that he was not a Christian at all. But where is the shadow of evidence that the Alexander mentioned in 1 Tim. i. 20 is the same person with the Alexander mentioned in 2 Tim. iv. 14? Was this name so uncommon in Ephesus that we must needs suppose a blunder where a writer speaks of one so called as a heretic simply because, in other passages, mention is made of one so called who was not a heretic? Nothing can be more ob-

vious than that there were two Alexanders, just as there might have been twenty, known to the apostle and Timothy; and that of these two one was a heretic and troubler of the Church at Ephesus, and the other prob-

ably a member of this church. The view of the Test.

ates is not warranted by the evidence given.

5. In 1 Tim. i. 20 mention is made of Hymenæus as a heretic whom the writer makes Paul say he had ex-

communicated; but this is a mistake, for in 2 Tim. ii.

17 we find Hymenæus still a member of the Church at Ephesus, and such a mistake could not have been made by Paul. Here, however, it is assumed without proof (1) that the Hymenæus of the one epistle is the same as the Hymenæus of the other; 

(2) that, being the same, he was still a member of the same Church; and 

(3) that it was impossible for him, though excommu-
nicated, to have returned as a penitent to the Church and to have become prominent in it. Here are three hypotheses on which we may account for the fact referred to, and, until they be all excluded, it will not follow that any blunder is chargeable upon the writer of this epistle.

6. In 1 Tim. vi. 18 the writer refers to our Lord's good companions at Pontus, Philetæ. Now of this we have a record in John's Gospel; but, as this was not written in Paul's time, it is urged that this epistle must be as-

cribed to a later writer. It is easy to obviate any force that may appear to be in this remark by the consider-

ation that all the prominent facts of our Lord's life, and especially his family, are familiarly known by oral communication to all the Christians before the gospels were written. Though, then, John's gospel was not extant in Paul's time, the facts recorded by John were well known, and might therefore be very naturally referred to in an epistle from one Christian to another. Of our Lord's confession before Pilate we may readily suppose that Paul, the great advocate of the spirituality of the Messiah's kingdom, was especial-

ly fond of making use of.

7. The writer of this epistle, it is affirmed, utters sen-

timents in favor of the law which are not Pauline, and teaches the office of good works in such a way as to be incompatible with Paul's doctrine of salvation by grace. This assertion we may safely meet with a point-

ed denial. The doctrine of this epistle concerning the law is that it is good if it be used προς κατάλογον, as a law, for the purposes which a moral law is designed to serve; and that, therefore, it is not contrary to apostolic doctrine and practice. Romans and Galatians, where the apostle maintains that it is a law in itself and for its own ends the divine law is holy, just, and good, and becomes evil only when put out of its proper place and used for purposes it was nev-

er designed to serve (Rom. vii. 7-12; Gal. iii. 21, etc.). What the writer here teaches concerning good works is also in full harmony with the apostle Paul's teaching in his acknowledged epistles (comp. Rom. xii.; Eph. v.

and vi, etc.); and if in this epistle there is not formal exposition of the Gospel scheme, but rather a dwelling upon personal duties, the reason may easily be found in the peculiar character of this pastoral epistle—an epistle of official councils and exhortations to a minister of Christ.

8. De Wette asserts that 1 Tim. iii, 16 bears marks of being a quotation from a confession or symbol of the Church, introduced by the usual formula "For in the Church..." But what marks of this does the passage possess? The be-

ower is, the use of the word ἐφάπαξ καθήκονται, a technical word, and the word used by the ecclesiastical writers to designate something in accordance with orthodox doctrine. This is true; but, as technical words are first used in their proper sense, and as the proper sense of ἐφάπαξ καθήκονται perfectly suits the passage in question, there is no reason for supposing any such later usage as De Wette suggests. Besides, his argument tells both ways, for one may as well assert that the ecclesiastical usage arose from the terms of this passage as affirm that the passage was borrowed from ecclesiastical usage.

9. The writer of this epistle quotes as a part of Scripture a passage which occurs only in Luke x, 7; but as Luke had not written his gospel at the time Paul is supposed to have written this epistle, and as it is not found in any of the Old Testament, the writers to quote from each other in the way they quote from the Old Testament, we are bound to suppose that this epistle is the produc-

tion of a later writer. But does this writer quote Luke x, 7 in the manner alleged? The passage referred to is iv. 18, where we have first a citation from Deut.

xxv. 4, introduced by the usual formula "For in the Scrip-
ture saith," and then the writer adds, as further con-

firmatory of his position, the saying of our Lord which is supposed to be quoted from Luke's gospel. Now we are not bound to conclude that this latter was added by the writer as a part of Scripture. It may be re-
garded as a remark of his own, or some such proposi-
tion, expression, or as a well-known saying of Christ's, by which he confirms the doctrine he is establishing. We are under no necessity to extend the formula with which the verse is commenced so as to include in it all that the verse contains. The τὰν αὐτή, by itself will not jus-
tify this addition. It is very possible that they got the use of sain alone rather leads to an opposite conclu-

sion, for had the writer intended the latter clause to be regarded as a quotation from Scripture as well as the former, he would probably have used some such formula as τὰν αὐτήν ἐν ἡμεῖς (comp. Heb. ii. 13).

10. It is affirmed that the injunction in v. 23 is so much beneath the dignity of an apostle that we cannot suppose it to have proceeded from such a writer as Paul. But what is there in such an injunction less dignified than in many injunctions of an equally famil-

iar nature scattered through Paul's epistles? And in what is it incompatible with the apostolic character of one sustaining it should enjoin upon a young, zealous, and active preacher, whom he esteemed as his own son, a careful regard to his health; the more espe-

cially when, by acting as is here enjoined, he would vindi-
cate Christian liberty from those ascetic restraints by which the false teachers sought to bind men, and so occup-

y space with any remarks upon them. We may leave unnoticed also those objections to this epistle which are mere repetitions of those urged against the first, and which admit of similar replies.

1. In iii, 11, the writer enumerates a series of per-

secutions and afflictions which befell him at Antioch.
TIMOTHY, FIRST EPISTLE TO 421 TIMOTHY, FIRST EPISTLE TO

Iconium, and Lystra, of which he says Timothy knew. Would Paul, it is asked, in making such an enumeration, have committed the mistake of referring to persecutions before his connection with Timothy, and have said nothing of those which he endured subsequently, and of which Timothy must have known, while of the former he might be ignorant? But there is no mistake in the matter. Paul has occasion to refer to the knowledge Timothy had of his sufferings for the Gospel. Of some of these he had occurred before Timothy's connection with him, while others had occurred while Timothy was his companion and fellow-sufferer. Of the latter, therefore, Paul makes no specific mention, feeling that to be unnecessary; but of the former, of which Timothy could know only by hearsay, but which might be of down to him into the heart, he has not omitted to perceive that any interesting point in Paul's previous history would be unknown to his "dear son in the faith," he makes specific enumeration. This fully accounts for his stopping short at the point where Timothy's personal experience could supply the remainder.

2. The declaration in iv, 7, etc., is incompatible with what Paul says of himself in Phil. iii., 12, etc. But respect must be had to the very different circumstances in which the apostle was when he wrote these two passages. In the one case he viewed himself as still engaged in active work, and having the prospect of service in the future, as well as the immediate present, very near to death, and shortly about to enter into the presence of his master. Surely the same individual might in the former of these cases speak of work yet to do, and in the latter of his work as done, without any contradiction.

3. In i, 6 and ii, 2 there are pointed allusions to ecclesiastical ceremonies which betray a later age than that of Paul. This is said without reason. The laying-on of hands in the conferring of a ἱεραρχία was altogether an apostolic usage; and the hearing of Paul's doctrines was what Timothy, as his companion in travel, could easily enjoy, without our needing to suppose that the apostle is here represented as acting the part of a professor in a school of theology.

Full particulars on this discussion will be found in the introductions of Alford, Wordsworth, Huther, Davidson, Wiesinger, and Hug. Conybeare and Howson (Acts i. 6). I have inserted a table to summarize both of the objections to the genuineness of the epistles and of the answers to them, and a clear statement in favor of the later date. The most elaborate argument in favor of the earlier date is to be found in Lardner, History of Apost. and Evangel. (Works, vi, 315-372). See also the introduction to this volume, especially the words of the learned man, Bertholdt, Guericke, Schott, etc.; Schleiermacher, Uebcr den sogenannten ersten Brief des Paulus an den Timothes, ein kritisches Sendeschreiben an J. C. Gass (Berl. 1867, 12mo); Plane, Bemerkungen über d. ersten Paulin. Brief an d. Tim. (Göt. 1886, 8vo); Beckhaus, Spekimen zum Oeuv.-lexicon, de Vocabula Literal. Ἱεραρχίας in I. ad Tim. Ep. Paulinum obvista, ut et in ejus nihilo detractuslibris (Lingeis, 1810, 8vo); Curtius, De Tempore quo prior Pauli ad Tim. Epist. exarata sit (Berol. 1828, 8vo); Otto, Die geschicht. Verhältnisse der Past.-Briefe (Leips. 1880, 8vo).

II. Date.—The direct evidence on this point is very slight. (a.) 1, 3 implies a journey of Paul from Ephesus to Macedonia, Timothy remaining behind. (b.) The age of Timothy is described as νεότυς (iv, 12). (c.) The general resemblance between the two epistles indicates that they were written at or about the same time. (d.) They have been maintained as fulfilling these conditions.

1. The journey in question has been looked upon as an unrecorded episode in the two years' work at Ephesus (Acts xix, 10). This conjecture has the merit of bringing the episode within the limit of the authentic records of the apostles' ministry. It has been maintained as fulfilling these conditions.

2. This journey has been identified with the journey after the tumult at Ephesus (Acts xx, 1). Against this conjecture is the palpable fact that Timothy, instead of remaining at Ephesus when the apostle left, had gone on to Macedonia again (Acts xix, 29). The hypothesis of a possible return is traversed by the fact that he was with Paul in Macedonia at the time when 2 Cor. was written and sent off. To obviate this objection, it has been suggested that Paul might have written this epistle immediately after leaving Ephesus, and the second to the Corinthians not before the concluding period of his stay in Macedonia; so that Timothy might have visited him in the interval. This appears to remove the difficulty, but it does so by suggesting a new one; for, how, on this supposition, are we to account for the apostle's delaying so long to write to the Corinthians if the former letter had been written a few weeks before? Concerning the state of the Corinthian church, Paul was led to address them? It may be asked, also, if it be likely that Timothy, after receiving such a charge as Paul gives him in this epistle, would so soon have left Ephesus and followed the apostle.

An attempt has been made by Otto (Die geschichtl. Verhältnisse, p. 23 sqq.) to avoid the difficulty in 1 Tim. i by translating it thus, "As I in Ephesus exhorted thee to stand fast, so do thou, as thou goest to Macedonia, enjoin on some not to adhere to strange doctrines," etc. The passage is thus made to refer to Timothy's going to Macedonia, not to the apostle's, and the occasion of his going is referred to the journey mentioned (Acts xix, 21, 22), with which the visit to Corinth mentioned (1 Cor. iv. 17; xvi. 10), is made to synchronize. The date of 1 Tim. is thus placed before that of 1 Cor. All this, however, rests on a rendering of 1 Tim. 3, which, in spite of all that has been learned disquisition, its author has failed to vindicate.

3. The journey in question has been placed in the interval between Paul's first and second imprisonments at Rome. In favor of this conjecture as compared with the preceding is the internal evidence of the contents, which, on the whole, is unfavorable to the later date. The circumstances warned are present, dangerous, portentous. At the time of Paul's visit to Miletus in Acts xx, i.e., according to those hypotheses, subsequent to the epistle, they are still only looming in the distance (ver. 30). All the circumstances referred to, moreover, imply the prolonged absence of the apostle. The truth of the matter has become lax, heresies rife, the economy of the Church disordercd. It was necessary to check the chief offenders by the sharp sentence of excommunication (1 Tim. i, 20). Other churches called for his counsel and directions, or a sharp necessity took him away, and he hastens on, leaving behind him, with full delegated authority, the disciple in whom he must confide. The language of the epistle also has a bearing on the date. According to the two preceding hypotheses, it belongs to the same periods as 1 and 2 Cor. and the Epistle to the Romans, or, at the latest, to the same group as Philippians and Ephesians. In that case the divisions of the language are somewhat difficult to explain. Assume a later date, and then there is room for the changes in thought and expression which, in a character like Paul's, were to be expected as the years went by.

The objection that the position thus assigned are the following (1 Tim. i. 1). Against this the epistle itself is not a matter of history. We have elsewhere, however,
TI MO T H Y, FIRST EPISTLE TO 422 TI MO T H Y, FIRST EPISTLE TO

added the evidence as being entirely satisfactory.
See PAUL. (2) As the evidence that the apostle took such a journey between his first and second imprisonments is not conclusive, and must be admitted that the hypothesis built upon it as to the date of this epistle rests at the best on somewhat precarious grounds. On the other hand, we know that the apostle did purpose extended tours on his contemplated release from the first imprisonment (Rom. xv, 20, 28), and that a. travelling to Asia. Of all this Paul was not infallible in his anticipations, and we have positive evidence that he did revisit Ephesus (2 Tim. iv, 12; comp. 15, 20). (4) It is opposed by what Paul says (ver. 12), from which we learn that at the time this epistle was written Timo-
thy was in danger of being despised as a youth; but this would hardly be said of him after Paul's first imprison-
ment, when he must, on the lowest computation, have been thirty years of age. In reply to this, it is sufficient to say that this was young enough for one who was to exercise authority over a whole body of brothers, many of them in the same position in the church. (5) This hypothesis seems to assume the possibility of churches remaining in and around Ephesus in a state of defective arrangement and order for a greater length of time than we can believe to have been the case. But arguments of this kind are highly insecure, and cannot weigh against historical statements and in-
ferences. On the whole, therefore, we decidedly incline to this position for the journey in question.
The precise date of the first epistle we have, never-
theless, no means of fixing. In Phil. ii, 24 the apostle expresses a hope of visiting that Church shortly. Car-
ry on the next verse, he would proceed to Macedonia, whence we must suppose him passing into Asia, and visiting Ephesus (A.D. 60). Thence he may have taken his proposed journey to Spain (Rom. xv, 24, 28), unless he took advantage of his proximity to the West to do so direct from Rome. After this, and not before his martyrdom (A.D. 64), this epistle seems to have been written.
III. Place.—In this respect, as in regard to time, 1 Tim. leaves much to conjecture. The absence of any local reference but that in i, 3 suggests Macedonia or some neighboring district. In A and other MSS. in the Peschi, Ethi-
opic, bohemian, and syriac, it is in ref. 34, [s]. In the
station as the place whence it was sent: but this appears to have grown out of a traditional belief resting on very insufficient grounds (and incompatible with the conclusion which has been adopted above) that this is the epistle re-
ferred to in Col. iv, 16 as that from Laodicea (Theophyl.
ac loc.). The Copitic version, with as little likelihood, states that it was written from Athens (Huther, Einl. etc.).
IV. Object and Contents.—The design of the first epistle is partly to instruct Timothy in the duties of that office with which he had been intrusted, partly to supply him with credentials to the churches which he might visit, and partly to furnish him guidance to the churches themselves.
It may be divided into three parts, exclusive of the introduction (i, 1, 2) and the conclusion (vi, 20, 21).
In the first of these parts (i, 3—20) the apostle reminds Timo-
thy generally of his functions, and especially of the duties of the office in reference to the teachers, who were anxious to bring the believers under the yoke of the law. In the second (ii—vi, 2) he gives Timothy particular instructions concerning the orderly conducting of divine worship, the qualifications of bishops and deacons, and the proper mode of behaving him-
self, with a view to the duties (v, 23) of the apostolate.
Discourses against some vices to which the Christians at Ephesus seem to have been prone.
V. Structure and Characteristics.—The peculiarities of language, so far as they affect the question of author-
ship, have already been noticed. Assuming the genu-
ineness of the epistle, some characteristic features com-
on to them both remain to be noticed.
1. The ever-deepening sense in Paul's heart of the Divine Mercy, of which he was the object, as shown in the insertion of λόγος in the salutations of both epistles, and in the γὰυςσυν of 1 Tim. i, 16.
2. The abruptness of the thought in the second epistle. From first to last there is no plan, no treatment of sub-
jects carefully thought out. All speaks of strong flow-
ing emotion, memories of the past, anxieties about the future.
3. The abundance, as compared with Paul's other epis-
tles, of Old-Test. references. This may connect itself with the fact just noticed, that these epistles are not argumentative, possibly also with the request for the "books and parchments" which had been left behind (2 Tim. iv, 15). He may have been separated for a time from the βιβλία παραμένεσα, which were commonly his companions.
4. The conspicuous position of the "faithful sayings" as taking the place occupied in other epistles by the Old-Test. Scriptures. The way in which these are cited as authoritative, the variety of subjects which they cover, is a peculiarity; and the same is true of the prophecies of the Apostolic Church which had most impressed themselves on the mind of the apostle, and of the disciples generally. 1 Cor. xiv shows how deep a reverence he was likely to feel for such spiritual utterances. In 1 Tim. iv, 1 we have a distinct reference to them.
5. The tendency of the apostle's mind to dwell more extensively on the universality of the redemptive work of Christ (1 Tim. ii, 3—6; iv, 10); his strong desire that all the teaching of his disciples should be "sound" (εὐαισθητή), commending itself to minds in a healthy state; his fear of the corruption of the church by heretical sub-
version.
6. The importance attached by him to the practical details of administration. The gathered experience of a long life had taught him that the life and well-being of the Church required these for its safeguards.
7. The recurrence of doxologies (1 Tim. i, 17; vi, 15, 16; 2 Tim. iv, 18), as from one living perpetually in the presence of God, to whom the language of adoration was as his natural speech.
VI. Commentaries.—The following are the exegetical helps on both epistles to Timothy exclusively; to a few of the most important of which we prefix an asterisk: *J. Reynolds, Expositors Megandis, Expositionis Coniunctionis: Wittich, Expositio (Argent. 1549, 8vo); Artocrates, Schola-
(Stuttg. 1545; Basle, 1546, 8vo); Calvin, Commenta-
rius (Genev. 1548, 4to; in French, ibid. 1563, fol.; in English by Tomson, Lond. 1579, 4to; by Pringle, Edinb. 1686, 8vo); Aleiost, Disputatio (Lips. 1550—51, 2 vols. 8vo); D'Espence [Rom. Cath.]; Commentarius (1st Ed. Lutet. 1561, fol.; 1568, 8vo; 2d Ed. Par. 1564, fol.); Maj-
or, Expositiones (Vittemb. 1563—64, 2 vols. 8vo); Hyper, Commentarius [includ. Tit. and Phil.]. (Tigr. 1582, fol.); Magalani [R. C.]; Commentarius [includ. Tit.]: (Lugd. 1609, 4to); Soto [R. C.]; Commentarius (includ. Tit.): (Par. 1610, fol.); Stewart [R. C.]; Commentarius (Ingol. 1610—12, 2 vols. 4to); Weinrich, Commentarius (Lips. 1618, 4to); Schleutets, Observationes [includ. Tit. and Philh.]. (Francof. 1624; Vittemb. 1630, 4to); Ger-
hard, Adnotationes (Gen. 1648, 1666; Lips. 1712, 4to); Natten, Disputatio (Utræb. 1655, 4to); Habert [R. C.]; Expositio (Utræb. 1655, 4to; 2d Ed. 1667, 4to); Daillé, Exposition [French] (Gen. 1659—61, 3 vols. 8vo); Cocceius, Commentarius (L. B. 1667, 4to); Gar-
gon, Openinge (Leyden 1706, 1719, 4to); Hulse, Openinge (Rotterdam 1727, 4to); *Mosheim, Erklärung (Hamb. 1756, 4to); Zacherius, Erklär. (Leips. 1755, 8vo); Hesse, Er-
läuter. (Göttinger Expositio an apost. Tit.); Hesse, Erklär. (Göttinger Expositio an apost. Tit.); Hesse, Erklärt. (Leips. 1785, 8vo); Tit.: (Hamb. 1826—28, 2 vols. 8vo); Flatt, Vorles. [includ. Tit.]: (Tib. 1831, 8vo); Baumgarten, Aeschel.,
TIMOTHY, SECOND EPISTLE TO 423 TIMOTHY, SECOND EPISTLE TO
to. (Berl. 1837, 8vo); Leo, Commentarius (Lipa. 1837-49, 2 vols. 8vo); Matthies, Erklär. [includ. Tit. (Greifsw. 1846, 8vo); Mack [R. C.], Commentarius [includ. Tit.] (Tübing. 1841, 4to); *Schmoller, Untertruch, etc. (from the Danish, Jen. 1846, 8vo); Paternina, Commentarius [includ. Tit.] (London. 1848, 18mo); Rudolph, De Origine, etc. (Gotting. 1852, 8vo); *Elliott, Commentary [includ. Tit.] (London. 1856; Bost. 1866, 8vo); Mangold, Die Irräther, etc. (Marbo, 1856, 8vo); Ynke, Aasmeerlingen (Utr. 1859, 8vo); *Otten, Die Verhältnisse, etc. (Leipa. 1866, 8vo); Beck, Erklär. (Leipa. 1879, 8vo).

On the first epistle alone there are the following: Cruciger, Commentarius (Argent. 1854, 8vo); Physico, Explanatio [includ. Leviti.] (Basil. 1854, 4to; 1896, 8vo); Venator, Distributions (ibid. 1855; Lip. 1818, 8vo); Melanchton, Exeget. [includ. Tit. in I and II (Vie. 1757, 4to); Hessels [R. C.], Commentarius ( Lipsan. 1568, 8vo); Chytymus, Exegetico (Franco. 1569, 8vo); Denues, Commentarius (Genev. 1768, 8vo); Dibudd, Commentarius (Hanov. 1898, 8vo); Meeltheer, Commentarius [includ. Eph. and Phil.] (Norib. 1828, 4to); Schmid, Paraphrasis (Hamb. 1851, 1894, 4to); Fleischmann, Commentarius (Tub. 1750); Pius, De Tempore, etc. (Jean. 1797, 4to); Schieriemacker, Sondereh. [etc. Berl. 1807, 8vo]; Planck, Bemerk. etc. (Götting. 1808, 8vo); Beckhaus, De fries Agyeog. etc. (Ling. 1810, 8vo); Wegscheider, Erklär. (Götting. 1810, 8vo); Curtius, De Tempore, etc. (Berol. 1828, 8vo). See Erisius.

TIMOTHY, SECOND EPISTLE TO. This follows immediately the first in the New Test. The questions of genuineness and style have already been considered there. As in the case of the first epistle, the chronological questions are the most difficult to answer satisfactorily.

1. Date.—It is certain that the second epistle was written while the author was a prisoner (i, 8, 16, 17; ii, 9; iv, 21), at Rome, we may (for the present) assume; but the question arises, was it during his first or his second imprisonment? The latter.

In favor of the first, the most weighty consideration arises out of the fact that the apostle appears to have had the same individuals as his companions when he wrote this epistle as he had when he wrote the epistles to the Ephesians, Philippians, and Colossians, and that he still addresses the churches as the leaders of the links in the chain of his imprisonment at Rome. "At the beginning of the imprisonment," says Hug, who has very forcibly stated this argument in favor of the earlier hypothesis, "when the Epistle to the Ephesians was written, Timothy, who was not one of Paul's companions on the voyage to Italy (Acts xxvii, 2), was with him at Rome." If Paul had his name in the address with which the epistle commences, as he always did when Timothy was at his side. Timothy afterwards arrived; and, accordingly, at the outset of the epistles to the Colossians and Philemon, his name appears with the apostle's (Col. i, 1; Philem. 1); secondly, Luke was Paul's companion (Col. iv, 14; Philem. 24); thirdly, Mark was likewise with him (Col. iv, 10; Philem. 24); fourthly, Timothy was then Paul's διάκονος and letter-bearer, and, in particular, was sent to Asia (Eph. iv, 21; Col. iv, 7, 8). All these circumstances are presented in the Second Epistle to Timothy. (1) Timothy was not with Paul at first, but was summoned to his side (2 Tim. iv, 21); (2) Luke was with him (ver. 11); (3) he wishes Mark to come with Timothy, so that he must have been with him in the course of his imprisonment (ver. 11); (4) Timothy was with him in the course of his imprisonment and was sent to Asia (ver. 12). Now, in order to suppose that Paul wrote this epistle to Timothy during a second imprisonment at Rome, we must assume that the circumstances of both were exactly the same, etc. We must also assume that Paul at both times, even in the latter part of Nero's reign, was permitted to receive friends during his confinement, to write letters, dispatch mes-sengers, and, in general, to have free intercourse with everybody* (Introduction [Fosdick's transl.], p. 556, etc.).

2. On the other hand, the difficulties lying in the way of this seem insuperable. Hug's reasoning assumes that the epistle must have been written in the early part of the apostle's imprisonment, else Timothy could not have been absent at the time of its composition. But that this is utterly inadmissible the following considerations show: (1) When Paul wrote to the Colossians, the Philippians, and the Ephesians, Demas was with him; but he wrote this epistle to Timothy, Demas had forsaken him, having loved this present world and gone to Thessalonica (iv, 10). (2) When Paul wrote to the Ephesians, Colossians, Philippians, and Philemon, he was in good hopes of a speedy liberation from his imprisonment; when he wrote this epistle to Timothy, he had lost all these hopes, and was anticipating death as near at hand (ver. 6-8). (3) At the time this epistle was written Paul had been, if not oftener, at least once, before the bar of the emperor, when he had offered his apology (ver. 16). (4) Tychicus, the bearer of the letters to the Colossians, had been at Rome before this epistle to Timothy was written (ver. 12). (5) At the time the epistles to the Colossians and Philemon were written, Aristarchus was with Paul; by the time this was written, Aristarchus had left Paul (ver. 11). All these circumstances forbid our supposing that this Second Epistle to Timothy was written when the apostles in epistles above named; that is, in the early part of Paul's first imprisonment at Rome.

Shall we then, assign the epistle to a later period of that same imprisonment? Against this also lie difficulties. Before we can admit it, we must suppose that Timothy and Mark, who did not accompany Paul to Rome, had shortly after followed him thither, and, after remaining awhile, left Paul, and were again requested by him in this epistle to return; that during the interval of their absence from Rome, Paul's first trial had occurred; and that, ye, as before, he not only, as appeared before his judges, he had written to his friends in terms intimating his full confidence of a speedy release (Phil. i, 25; ii, 24; Philen. 22). These circumstances may perhaps admit of explanation; but there are others which seem to present insuperable difficulties in the way of the supposition that Paul wrote this epistle during the second period of Paul's first imprisonment at Rome. (1) Paul's imprisonment, of which we have an account in the Acts, was of a much milder kind than that in which he was at the time he wrote this epistle. In the former case, he was permitted to lodge in his own hired house, and guard by soldiers; in the latter, he was in such close confinement that Onesiphorus had no small difficulty in finding him; he was chained, he suffered evil even unto bonds as a malefactor, his friends had mostly deserted him, and he had narrowly escaped destruction from the Roman tyrant (Acts 16, 6-18; ii, 1-5, 7, 8, 18). (2) In iv, 18 he requests Timothy to bring with him from Troas some books, parchments, etc. which he had left at that place. If we suppose the visit here referred to the same as that mentioned in Acts xx, 5-7, we must conclude that these documents had been allowed to be sent to the apostle to lie at Troas for a space of at least years, as that length of time elapsed between the visit to Troas, mentioned by Luke, and Paul's first imprisonment at Rome. This is surely very unlikely, as the documents were plainly of value to the apostle; and if by ἐνδέχεται in this passage, he meant a cloak or other garment, it certainly could not have been sent when it might have been of service, and the sending so anxiously for it when it could be of little or none, as the apostle's time of departure was at hand, must be allowed to be not a little impossible. (3) In iv, 2 Paul speaks of having left Trophimus sick at Miletus. Now this could not have been on the occasion referred to in the Acts xx, 15, for subsequent to that Trophimus was with the
TIMOTHY, SECOND EPISTLE TO 424 TIN

Paul at Jerusalem (Acts xxii, 29). It follows that Paul must have visited Miletus at a subsequent period; but he did not visit it on his way from Jerusalem to Rome on the occasion of his first imprisonment, and this, therefore, strongly favors Demas hypothesis foretold, consequently, to be corrected, and immediately antecedent to the writing of this epistle. The attempt to enfeebles the force of this by translating αὐτοὶ τῶν ἅγ. ν. "they left," etc., and understanding it of messengers from Ephesus coming to visit Paul, is ingenious, but can hardly be admitted, as not being at all answerable to the sense, but subject to a verb where the context itself naturally supplies one. (4.) In iv, 20, the apostle says "Erasatus abode in Corinth." Such language implies that shortly before writing this epistle the apostle had been at Corinth, where he left Erasatus. But before his first imprisonment Paul had been at Corinth for several years, and during the interval Timothy had been with him, so that he did not need to write to him at a later period about that visit (Acts xxi, 4). Hug contends that ἡμεῖς simply expresses the fact that Erasatus was then residing at Corinth, without necessarily implying that Paul had left him, but would the apostle in this case have used the aorist? 3. It thus appears that the number of special names and incidents in the second epistle make the chronologi- cal data more numerous. We propose here, by way of summary, and in part recaptulation, to bring together, as far as possible, the doctrines in this epistle, and to see whether other facts each connects itself, and to what conclusion it leads as to the conflicting theories of an earlier and later date, (A) during the imprisonment of Acts xxviii, 90, and (B) during the second imprisonment already spoken of.

(1.) A parting apparently recent, under circumstances of special sorrow (i, 4)—not decisive. The scene at Miletus (Acts xxi, 8) suggests itself, Acts xvi, 5. The parting referred to in Tim. 1, 3 might meet B. (2.) A general description of the apostle even by the dis- creet Athenaeus. Nothing in this Epistle relates to anything like this before the imprisonment of Acts xxviii, 90. Everything in Acts xix, x and xx, and not less the language of the Epistle to the Ephesians, speaks of general and strong affection. This, therefore, so far as it goes, must be placed on the side of B. (3.) The position of Paul as suffering (i, 12), in bonds (i, 9), expecting "the time of his departure" (iv, 6), and Paul himself (i, 15, 6). Epil in all cases of the apostle surrounded by many friends, and is hopeful and confident of release (Phil. 1, 22; Phil. 32). (4.) Onesiphorus, and of services rendered by him both at Rome and Ephesus (i, 16-18), not decisive again, but the tone is rather for man long absence, and not the habitual mode of his life, and the order of the names suggests the thought of the ministrations at Ephes- sus being what Onesiphorus was to them. It is true, too, the mention of the "household," instead of Onesiphorus himself, may imply his death in the interval. This, therefore, tends to B rather than A. (5.) The abandonment of Paul by Demas (iv, 10)—strongly in favor of B. Demas was with the apostle when the epistle to the Colossians (iv, 14) and Philemon (v, 24) were written. Tim. 3 must therefore, in all probability, have been written after them; but the place is as we have been all compiled by the mention of Mark, for whose coming the apostle is anxious and while he is at Col. iv, 13, to place it at an earlier age. The above qualifying words ("all but") might have been omitted but for the fact that in Paul's possession that Demas, of Demas's forsaken Paul repented (and returned (Lad. v, 368). (6.) The presence of Luke (iv, 11) agrees well enough with B. Luke is most perfectly compatible with B. (7.) The request that Timothy would bring Mark (iv, 11) seems at first, compared as above with Col. iv, 14, to sup- port the supposition with the mention of Demas, tends decidedly to B. (8.) Mention of Titus as sent to Ephesus (iv, 12), as connected with Eph. vi, 21; 22; Col. iv, 7, in favor of A, yet, as Tychicus was continually employed on special missions, Paul may have sent Titus away in either. (9.) The request that Timothy would bring the cloak and books left at Troas (iv, 13). On the assumption of A, Paul would have written to Troas in the winter; if in the spring four or five years before, during which there would probably have been opportunities enough for his receiving it where he had left it. In this case, too, the circumstances of the journey present no trace of the haste and suddenness which this implies, if Paul had left Ephesus in the whole, then, this must be reckoned as in favor of B. (10.) "Alexander the coppersmith did me much evil," "greatly forward," not a "blasphemer." The words (iv, 16) are taken by a Jew of this name in the upper part of Acts xix, and the natural connection of the ἀρέτια, alung with the arti- cles: (11.) The change of the speech by the apostle, to make us answer the question as to the identity; and if it were the same, the hypothesis of a later date only requires us to assume what was possible enough, a renewal of communication with Demas and the friends of Christ. (12.) The abandonment of the apostle in his first defence (Acts xx, 1), and his deliverance "from the mouth of the lion" (Acts xx, 31), not decisively a positive argument against either hypothesis, but, like the mention of Demas in (iv, 10), must belong, at any rate, to a time much later than any of the other facts written from Rome (Acts xix, 1). (12.) "Erasatus abode at Corinth, but Trophimus I left at Miletus sick" (iv, 20) old language, as in Acts xxvi, 20. This implies a comparatively recent visit to both places. If, however, the letter were written during the first imprisonment, then Trophimus had not been left at Miletus, but had gone on with Paul to Jerusalem (Acts xx, 29), and the mention of Erasatus as remaining at Corinth would have been unnecessary to the addressee who had left that city at the same time as the apostle (ibid. xx, 4). The conjecture that the "leaving" referred to took place during the voyage of Acts xxvi is purely arbitrary, and at variance with verses 5 and 6 of that chapter. (13.) "Hasten some to come before winter." Assuming A, the presence of Timothy in Phil. 1, 18; Col. 1, 1; Phil. 1 might be regarded as the consequence of this; but then, as the Epistles show, there are also serious difficulties in supposing this epistle to have been written be- fore those three. (14.) The quotations from Esbuls, Pudens, Linus, and Claudius. Without laying much stress on this, it may be said that the absence of these names from all the epistles which, which, were written after the one to Corinth, would be difficult to explain. B leaves it open to conjecture that they were converts of some meaner sort. They are mentioned, too, as knowing Timothy, and this implies, as at least probable, that he had already been at Rome, and that this letter was consequently later than those to the Philippians and Colossians.

On the whole, it is believed that the evidence pre-ponderates strongly in favor of the later date, and that the epistle, if we admit its genuineness, is therefore a strong argument for believing that the imprisonment of Acts xxviii was followed by a period, first of renewed activity, and then of suffering.

II. Place.—On this point the second epistle is free from the conflict of conjectures. With the solitary ex- ception of Böttger, who suggests Cesarea, there is a consensum in favor of Rome, and everything in the cir- cumstances and names of the epistle leads to the same conclusion. The name of Paul as"hended to Nicopolis (1 Th. iii, 12), and thence convey- ed to Rome, where this epistle was written, shortly be- fore his death. Where Timothy was at the time it is impossible to say; most probably at Ephesus.

II. Object and Contents.—The design of the second epistle is partly to inform Timothy of the apostle's try- ing circumstances at Rome, and partly to utter a last warning voice against the errors and delusions which were corrupting and disturbing the church. It consists of an inscription (i, 1-5); of a series of exhortations to Timothy, to be faithful in his zeal for sound doctrine, patient under affliction and persecution, careful to maintain a deportment becoming his office, and diligent in his endeavors to counteract the unhal- lowed efforts of the false teachers (i, 6; iv, 8); and a conclusion in which Paul requests Timothy to visit him, and sends the salutations of certain Christians at Rome to the bishop and presbytery of the apostle himself to some believers in Asia Minor.

IV. Commentaries.—The following are the special exegetical helps on the whole of the second epistle ex- clusively: Barlow, Exposition (Lond. 1624, 4to; 1632, fol.); Hall, Commentary [on ch. iii and iv] (ibid. 1656, fol.); Bridgman, Commentaries; Tr-star of John (1760, fol.); Frisch, Commentary (1828, 8vo). See Epistle.

Tin (טינ, bedil, from.CONFIG, to divide; so called ap- parently from its separation as an alloy [Isa. ii, 25]; Sept.
TIN

Among the various metals found among the spoils of the Midianites, tin is enumerated (Num. xxxi. 22). It was known to the Hebrews, and was abundant in Judah (Isa. vi. 10). In ancient times, tin was used for making vessels and other objects of value. The Hebrews knew how to smelt it, and were skilled in making tin vessels. The use of tin as a metal is mentioned in the Bible (Isa. xlv. 11).

TINDEL

In Homer's time, the Greeks were familiar with it. Twenty layers of tin were in Agamemnon's cuirass given him by Cinyres (Homer, Ili. xx. 20), and twenty layers of tin were used to plate the shield (Ili. xxv. 26; Ezek. xxvii. 20). The metals of Tyre were supplied with it by the ships of Tarshish (Ezek. xxvii. 12). It was used for plumbata (Zech. iv. 10, margin—"stone of tin"). In the Hebr. it, and was so plentiful as to furnish the writer of Ecclesiastes (xlvii. 16) with a figure by which to express the value of Solomon, whom he despises: thus: "Thou didst gather gold as tin, and didst multiply silver as lead."

In the Homeric times the Greeks were familiar with it. Twenty layers of tin were in Agamemnon's cuirass given him by Cinyres (Homer, Ili. xx. 20), and twenty layers of tin were used to plate the shield (Ili. xxv. 26; Ezek. xxvii. 20). Copper, tin, and gold were used by Hephastus in welding the famous shield of Achilles (Ody. xviii. 474). The fence round the vineyard in the device upon it was of tin (Ody. 564), and the ozen were wrought of tin and gold (Ody. 574). The greaves of Achilles, made by Hephastus, were of tin beaten fine, close-fitting to the limb (Ody. 612; xxii. 592). His shield had two folds or layers, of tin between two outer layers of bronze and an inner layer of gold (Ody. xx. 271). Tin was used in ornamenting chariots (Ody. xiii. 508), and a cuirass of bronze overlaid with bronze and tin is mentioned in Ody. xxiv. 325. No allusion to it is found in the Odyssey. The coating of tin in a swelling-pot is mentioned by Hesiod (Theog. 862).

Tin is not found in Palestine (Kitto, Phys. Hist. of Palest. iii. p. lxxiii). Whence, then, did the ancient Hebrews obtain their supply? Only three countries are known to possess any considerable quantity of it: Spain and Portugal, Cornwall and the adjacent parts of Devonshire, and the islands of Junk, Ceylon, and Banca, in the Straits of Malacca" (Kenrick, Phoenicia, p. 212). According to Diodorus Siculus (v. 46), there were timbers of tin in the territory of Phoenicia, on the coast of Syria, and to the east of Arabia, but the metal was not exported. There can be little doubt that the mines of Britain were the chief source of supply to the ancient world. Mr. Cooley, indeed, writes very positively (Maritime and Island Discovery, i. 181), "There can be no difficulty in determining the country from which tin first came into Egypt. Tin is in itself a material principal export of India: it is enumerated as such by Arrian, who found it abundant in the ports of Arabia at a time when the supplies of Rome flowed chiefly through that channel. The tin-mines of Banca are probably the richest in the world; but tin was undoubtedly brought from the British rocks for the West at a later period." But it has been shown conclusively by Dr. George Smith (The Casketries, Lond. 1868) that, so far from such a statement being justified by the authority of Arrian, the facts are all the other way. After examining the commerce of the ports of Abyssinia, Arabia, and India, it is abundantly evident that, "Instead of its coming from the East to Egypt, it has invariably been exported from Egypt to the East" (p. 23).

With regard to the tin obtained from Spain, although the metal was found there, it does not appear to have been produced in sufficient quantities to supply the Phoenician markets. Position (in Strabo, iii. 147) relates that in the country of the Artabri, in the extreme north-west of the peninsula, the ground was bright with silver, tin, and white gold (mixed with silver), which were brought down by the rivers; but the quantity thus obtained could not have been adequate to the demand of the Phoenicians. The tin, therefore, was much more secured for mining in Spain is little more than a square mile (Smith, Casketries, p. 46). We are therefore driven to conclude that it was from the Casketries, or tin districts of Britain, that the Phoenicians obtained the great bulk of this commodity. Lewis, Hist. Surinam, 2nd ed., 1786, and Strachey, Anon. Act. of the Anc. p. 451), and that this was done by the direct voyage from Spain. It is true that at a later period (Strabo, iii. 147) tin was conveyed over

land to Marseilles by a thirty days' journey (Diod. Sic. v. 9); but Strabo (iii. 175) tells us that the Phoenicians alone carried on this traffic in former times from Gades, concealing the passage from Spain on the occasion, when the Romans followed one of their vessels in order to discover the source of supply, the master of the ship ran upon a shoal, leading those who followed him to destruction. In course of time, however, the Romans discovered the passage. In Ezekiel, "the trade of tin in is spoken of as to Tarshish, as 'the merchant for the commodity, without any mention of the place whence it was procured' (Cassierides, p. 74); and it is after the time of Julius Caesar that we first hear of the ancient trade in Marseilles.

Pliny (vi. 36) identifies the cassiteres of the Greeks with the plumas album or condicium of the Romans, which is our tin. Sambucus, he says, is obtained from an ore containing lead and silver, and is first to become melted in the furnace. The etymology of cassiteres is uncertain; but it is doubtless the same as the Arabic term kasir. From the fact that in Sanscrit kasitra signifies "tin," an argument has been derived in favor of India being the source of the ancient supply of this metal, but too much stress must not be laid upon it. See Lead. The name of some metal has been read in the Egyptian sculptures as khasis, which may refer to it as the metal of the gods. The Hebrew word refers to its principal use in making brass, which is a well-known feature of the art at a very remote period of Egyptian history. A bronze, apparently cast, has been found bearing the name of Pharaoh Pepi of the sixth dynasty, who reigned certainly five centuries before the Exode. In Egypt and Assyria bronze was generally made of tin, and that on the west of Egypt, and not with the principal exports of India: it is enumerated as such by Arrian, who found it abundant in the ports of Arabia at a time when the supplies of Rome flowed chiefly through that channel. The tin-mines of Banca are probably the richest in the world; but tin was undoubtedly brought from the British rocks for the West at a later period. But it has been shown conclusively by Dr. George Smith (The Casketries, Lond. 1868) that, so far from such a statement being justified by the authority of Arrian, the facts are all the other way. After examining the commerce of the ports of Abyssinia, Arabia, and India, it is abundantly evident that, "Instead of its coming from the East to Egypt, it has invariably been exported from Egypt to the East" (p. 23). With regard to the tin obtained from Spain, although the metal was found there, it does not appear to have been produced in sufficient quantities to supply the Phoenician markets. Position (in Strabo, iii. 147) relates that in the country of the Artabri, in the extreme north-west of the peninsula, the ground was bright with silver, tin, and white gold (mixed with silver), which were brought down by the rivers; but the quantity thus obtained could not have been adequate to the demand of the Phoenicians. The tin, therefore, was much more secured.

TINDEL(1), Matthew, one of the successors of To
tand Shaftesbury in the school of English divines or freethinkers, was born at Devonshire, in Devonshire, about 1657. He was educated at Lincoln and Exeter colleges, Oxford; took his A.B. in 1676; shortly after was elected fellow of All-Souls', and was admitted doctor of laws at Oxford in 1686. He retained his fellowship during the reign of James II by professing the Roman Catholic faith; he afterwards recanted, however, and, adopting revolutionary principles, went to the other extreme, and wrote against the nonjurors. He now became an advocate, and sat as judge in the court of delegates, with a pension from the crown of £200 per annum. Some time afterwards, considerable attention was drawn to him by his work entitled The Rights of the Christian Church (1706-7, 8vo), and the ensuing controversy; but the production which has rendered his name a memorable one was his Christianity as Old as the Creation (1730), which provoked replies from Mr. Warburton, Leland, Foster, and Conybeare. Dr. Middleton in his annual edition of this controversy, as may be seen in that article, but the most effective answer, though its very existence seems to have been forgotten, was that embodied in the Appeal of William Law, published in 1740. Tindal's line of argument was mainly coincident with Shaftesbury's, that the immutables of the Bible were evolved at the breast, and that no external revelation can have any authority equal to the internal: this he supported.
by much learning and show of argument, to which War-
burnt thought he had replied by the mass of learned
 evidence contained in his Legation. William Law,
 making no account of literary evidence, replied by
 his strong proofs of the infallibility of the popes and
 the final recovery of mankind; a book remarkable for
 close argument and for its many fine illustrations, but now
 obsolete in certain fundamental principles. Tindal died
 in London, Aug. 16, 1738, and was interred in Clerken-
 well Church. Mr. Tindal also wrote, An Answer concern-
ing the Power of the Magistrates and the Rights of Man
 Kind in Matters of Religion (Lond. 1697, 8vo) :— A
 Defence of the Rights of the Christian Church (ibid. 1709, 2
 pts. 8vo) :—The Nation Vindicated (ibid. 1711; pt. ii,
 1712) :—War with Priestcraft, or the Freethinker's Islet
 (ibid. 1792, 8vo), a burlesque poem.

Tindal, Nicholas, nephew of the preceding, was
 born in Devonshire in 1667 ; graduated A.M. from
 Exeter College in 1718, and was chosen fellow of Trinity
 College. He entered holy orders and became vicar of
 Great Waltham, Essex, and rector of Alverstoke, Hamp-
 shire. In 1740 he obtained the living of Colbourne,
 Isle of Wight, and soon after became chaplain of Green-
 wich Hospital. He died in 1744. Among his works are
 A Relation of the Death of the Clock (Lond. 1765, 12mo) ;
 a translation of Rapin's History of England, with a
 Continuation from 1688 to the Accession of George II
 (1744-47, in weekly Nos.) :—Antiquities, Sacred and
 Profane (Lond. 1727, 4to; in Nos., never completed,
 vol. i. See Allibone, Dict. of Brit. and Amer. Authors,

Tingstäd, Johan Adolph, a Protestant divine, doc-
 tor of theology, and bishop of Strängnäs, in Sweden,
 where he died Dec. 10, 1837, is the author of De Ortu et
 Cognitione Linguarum Orientalium (Greifswalde, 1788),
 and many other works in his own language;
—A miniborder of Philologiens und Criticos ad Vaticinium
 Habacucii (Upsala, 1795) :—Supplementum ad Lexicon
 Hebr. Specimina Academica (ibid. 1808):—De tolfamrâvet
 Skrifter af gamla Testamentets Propheter (Strängnäs, 1815);
—Klugalinger af Prophet Jeremiah (ibid. 1826) ;
—Gudsverdforsvaller (3d ed. Ibid. 1818) :—Philok.
 Amárkningar óver strödda Ställen i gamla Test. Grund.
 spruk (ibid. 1824). See Winer, Handbuch der theol. Li-
 teratur, i, 123, 225; ii, 804; Fürst, BBL, Judi. iii, 482;
 1859). Tinker, Reuben, a missionary of the Presbyterian
 Church, was born at Chester, Mass., Aug. 6, 1799. He
 received a theological education at Amherst College in
 1827, and at the Auburn Theological
 Seminary in 1830; and in November of the same
 year was ordained by the Mountain Association, with a
 view to his becoming a missionary of the American
 Board at the Sandwich Islands. He reached the islands
 at a somewhat critical period, being, in spite of all exist-
 ing difficulties, the cause of the Gospel was rapidly ad-
 vancing. In 1834 it was resolved to publish, in the na-
 tive language, a semi-monthly newspaper devoted to
 the interests of religion, and he was appointed to con-
duct it. In 1838 he dissolved his relations with the
 board, and established himself, with the approval of his
 brethren, at Koloa, on the island of Kani, where he
 labored until he departed for his own country in 1840. In
 September, 1845, he was installed pastor of the First
 Presbyterian Church in Westfield, Chautauqua Co., N.Y.,
 where he continued to labor till near the close of his
 life. He died June 25, 1854. Mr. Tinker was an elabo-
 rative preacher, a self-sacrificing missionary, and a fast
 and firm friend. After his death appeared Sermon by
 Rev. Reuben Tinker, Missionary at the Sandwich Islands;
 with a Biographical Sketch by M. L. P. Thompson, D.D.
 (Buffalo, 1856, 12mo). See Sprague, Annales of the Amer.
Pulpit, iv, 770; Allibone, Dict. of Brit. and Amer. Au-
 thors, s. v. (J. L. S.)

TIPPSAH

Time (or Chippeawayan) Version. This lan-
guage is quite different from that which is called Chip-
peway or Ojibbeway; it is spoken in the Hudson's Bay
 Territory, near Fort Simpson, and over a vast tract of
 country, probably the better part of the Okanogan
. The Rev. W. W. Kirkby, of the Church Missionary Society, has
 translated the gospels according to Mark and John,
 which have been printed in the syllabic character, and
 circulated among those for whom they were designed
 since 1870. (B. P.)

Tinnehmeth. See Molk ; Swan.

Tintoretto, Il, or Giacomo Robusti, a distin-
guished painter, was born at Venice in 1518, and died
 to Ridolfo, in 1554. After being instructed in the rud-
iments of design, he became a pupil of Titian, with whom
 he studied for a short time only; it being generally
 stated that Titian dismissed him, being jealous of his
 talents and progress. He was not discouragcd, but re-
solved to become the head of a new school. Over his
 door he wrote, " Michael Angelo's design, and the color-
ing of Titian." He made a special study of light and
 shade, and of the human form both by living models
 and by anatomy. Though he possessed many ex-
cellences, his sovereign merit consisted in the animation
 of his figures, and he maintained his powers to a great age,
 dying at Venice in 1594. His three greatest pictures, according to his own
 estimate and that of others, are, The Crucifixion, in the
 Church of San Rocco; The Last Supper, now in the
 Church of Santa Maria della Salute; and Il Serio, or
 the Venetian Slave, condemned to martyrdom by the
 Turks, invoking the protection of St. Mark. Some of
 his works are of enormous size, the Crucifixion being
 forty feet long, the Israelites worshipping the Golden
 Calf and The Last Judgment each about sixty feet
 high. One of his last productions was his Paradise,
 in the hall of the great palace-chamber of San Marco.
 Tintoretto wroUc so fast, and at so low a price, that
 few of the other painters in Venice could secure em-
 ployment. The churches and halls of the different
 communities are overloaded with his productions. See
 Spooner, Biog. Dict. of the Fine Arts, s. v.

Tiph'ahah (Heb. Tiph'ahah, Θηφαάς, from θηφ, to
 ford, this being the usual crossing-place of the Eu-
 phrates [Strabo, xv, 1, 20]; Sept., Θηφάς, v. S. Sap.,
 Vulg., Thapsai, Θαψαί) is mentioned in 1 Kings
 xvi, 24 as the limit of Solomon's empire towards the
 Euphrates, and in 2 Kings xv, 16 it is said to have
 been attacked by Menahem, king of Israel, who "smote
 Tiphahah and all that were therein, and all the coasts
 thereunto were subdued:" the word is almost un-
tended, at any rate in the former passage, is that the
 Greeks and Romans knew under the name of Taps-
cus (Θαψαχος), situated in Northern Syria, on
 the western bank of the Euphrates, not far above Carche-
 mish. Taphusac was a town of considerable im-
 portance in the ancient world, Xenophon, who saw it in
 the time of Cyrus the younger, calls it " great and pros-
 perous" (μεγάλαι και εὐσωμην, Anab. i, 4, 11). It
 must have been a place of considerable trade, the land
 traffic between East and West passing through it, first
 on account of its ford-way (which was the lowest upon
 the Euphrates), and then on account of its bridge
 (Strabo, xvi, 1, 20); while it was likewise the post
 where goods were both embarked for transport down
 the stream (Q. Curt. x, 1), and also disembarked from
 boats which had come up it, to be conveyed on to their
 final destination by land (Strabo, xvi, 3, 4). It is
 a fair conclusion that Solomon's colonisation of the place
 was connected with his efforts to establish a line of
 trade with Central Asia directly across the continent,
 and that Tadmor was intended as a resting-place on
 the journey to Taphusac. Taphusac was the place at
 which armies marching east or west usually crossed the
 "Great River." It was there that the Ten Thousand
 first learned the real intentions of Cyrus, and, consent-
Tippelskirch, Frederick von, a Protestant theologian, was born at Königsberg, March 5, 1802. For a number of years chaplain to the Prussian ambassador in Rome, was in 1837 called to Giebichenstein, near Halle, and died in the year 1866. He published sermons and other writings, for which see Zuchold, Biblioth. Thol. ii, 1841; Winer, Handbuch der theol. Literatur, ii, 196, 804; Hauck, Theol. Jahrbücher, iii, 602. (B. P.)

Tippett (Lat. Lirippium), a narrow garment or covering for the neck and shoulders; a kind of hood woven over the shoulders, which was fastened round the neck by a long pendant appendage called the lirippo. This latter portion was generally dropped during the 16th century, and only the hood was worn. The lirippo lingered in the hat-band, and is used at funerals. The tippets of this lirippo had rounded necks by sliplines, connected to distinguish it from the squared terminations of the stole; they were worn hanging down in front by canons, but by monks behind, by way of distinction. The tippets disappeared from the hood in the time of Henry VII. The manner of wearing the modern hood or the liturate's tippet is obliterated, but it is supposed by some that the coat of ribbon on the crest of the hood is, in imitation of the tippet, and in the same position. See Lee, Gloss. of Liturgy. Terms, s. v.; Walcott, Sacred Archaelog. s. v.

Tippstaff, an officer of the Court of Queen's Bench, attending the judges, with a wand or staff of office tipped with silver, to take prisoners into custody. A similar officer was attached to the ancient Star-chamber Court.

Tira (Heb. Tira', תירה, Sept. Θηρας; Vulg. Thiras), the youngest son of Japheth (Gen. x. 2). B.C. 2564. Among the Zemarites only (see Gen. x. 2, Targum Pseudo-Jon. and Jerna. on Gen. loc. cit.; Targ. on 1 Chron. i. 5), the occasional rendering Persia probably originated in a corruption of the original text. The correspondence between Thrace and Tiras is not so complete as to be convincing; the gentile form ὤπερ, however, brings them nearer together. There is no direct evidence on ethnological grounds to placing the Thraciaces among the Japhetic races (Bochart, Phalex, iii. 2; Michaelis, Spicileg. i. 55 sq.). Their precise ethnic position is, indeed, involved in great uncertainty; but all authorities agree in their general Indo-European character. The evidence of this is circumstantial rather than direct. The language has disappeared, with the exception of the ancient names and the single word bricā, which forms the termination of Mesebramia, Selymbria, etc., and is said to signify "town" (Strabo, vii. 319). The Thratic stock was represented in later times by the Gete, and these, still later, by the Daecani, each of whom inherited the old Thratic tongue (ibid. 308). This circumstance throws light on the subject; for the Dacian language has also disappeared, though fragments of its vocabulary may possibly exist either in Wallachian dialects or perhaps in the Albanian language (Diefenbach, Or. Eur. p. 68). If Grimm's identification of the Gete with the Goths was established, the Teutonic affinities of the Thraciaces would be placed beyond question (Geach. d. deutsch. Spr. i. 178); but this view does not meet with general acceptance. The Thraciaces are associated in ancient history with the Pelasgians (Strabo, ix. 401), and are said to stand in connexion with the names in common (ibid. xiii. 590); in Asia Minor they were represented by the Bithynians (Herod. i. 28; vii. 75). These circumstances lead to the conclusion that they belonged to the Indo-European family, but do not warrant us in assigning them to any particular branch of it. Other explanations have been offered of the name Tiras, of which we may notice the Agathayreii, the first part of the name (Agayre) being treated as a prefix (Knobel, Volkertafel. p. 129); Taurus and the various tribes occupying that range (Kalisch, Comm. p. 246); the river Tyrrhus (Dioscoris), with its cognominal inhabitants the Tyrrhenians (Euseb. Hist. Eep. ii. 29, 48; Comm. p. 194); and, lastly, the maritime Tyrrheni (Tuch, in Gen. loc. cit.). See Ethnography.

Tiratha (Heb. Tiraṭi, תִּרְחַת, partial from some unknown Pēr, Tirath [a gate (Genesius) or fissure (Furtw.)]; Sept. Ἀποσαβίας v. r. Ἀπασαβίας and Τασαβία; Vulg. conventes), the designation of one of the three families of Sibbes residing at Jabez (1 Chron. ii. 55), the others being the Shimeathites and Suchathites. The passage is hopelessly obscure, and it is perhaps impossible to discover whence these three families derived their names. The Jewish commentators, playing with the names, have given various fanciful interpretations; but thus, "They called them Tirtham, because their voices when they sang resounded loud (בַּשׁ; and Shimeathites
because they made themselves heard (יוֹדָה) in the law.

TIRE (an old English word for dressing the head, see Plumptre, Bible Educator, iv, 211) is used (both as a verb and a noun) to translate, in the A.V., three Hebrew words and one Greek: בִּרְיָה (in Hiph.), to make good, i. e. ornament, sc. the head (2 Kings ix, 90); בְּרִיָּה, ped (Ezek. xxxiv, 20), a turban (בִּנְכָּת, etc.); כְּהלַר (Isa. iii, 18), creases (ornament; Judg. vii, 21, 36); περία (Jude, 8; xvi, 8), a miter or head-band. See HEAD-DRESS. The third of these terms probably represents a pendent diak, worn by women on the head, and similar articles are still hung on camels′ necks among the Arabs. "The kumaraḥ (noon) is an ornament formed of a thin plate of gold, embossed with fanciful work or Arabic words, and having about seven little flat pieces of gold called barak attached to the lower part; or it is composed of gold with diamonds, rubies," etc. (Lane, Mod. Egypt, ii, 401). Lieut. Cooker thinks that the "round tires like the bosom of Jazan were like the strings of coin which form part of the head-dress of the modern Samaritan women (Ten-Talk in Palestine, ii, 244). See ORNAMENT.

Tirhakah [many Tir'kakah] (Heb. Tir'kakah, Τίρκαχ, of Ethiopian derivation; Sept. θαραξίν v. r. θαραξίτα and θαράξ; Vulg. Tharcus), a king of Cush (Sept. βασιλέας Αἰγύπτων, A.V. "king of Ethiopia"), the opponent of Sennacherib (2 Kings xix, 9; Isa. xxxvii, 9). While the king of Assyria was "warring against Libnah," in the south of Palestine, he heard of Tirhakah's advance to fight him, and sent a second time to demand the surrender of Jerusalem. This was near the close of B.C. 713, unless we suppose that the expedition took place in the twenty-fourth instead of the fourteenth year of Sennacherib, which would bring it to B.C. 706. If it were an expedition later than that of which the date is mentioned, it must have been before B.C. 697, Hezekiah's last year. But, if the reign of Manasseh is reduced to thirty-five years, these dates would be respectively B.C. cix, 658, and 678, and these numbers might have to be slightly modified if the fixed date of the capture of Samaria, B.C. 720, be abandoned. See HEZEKIAH. Wilkinson supposes (i, 138) that Tirhakah occupied the throne of Egypt from B.C. 710 to 688. Rawlinson gives the date B.C. 690 (Herod. i, 392). Dr. Hineks, in an elaborate article, argues for this latter date, and supposes Tirhakah, after a reign over Egypt of twenty-six years, to have retired to Ethiopia B.C. 664 (Journal of Sci. Lit. Jan. 1864). See CHRONOLOGY. According to Manetho's epitomist, Turaos (Tapa-koç), or Taruos (Tapece), this was the third and last king of the XXXVth dynasty, which was of Ethiopians, and reigned eighteen (Afr.), or twenty (Eux.) years. From one of the Apis-Tables we learn that a bull Apis was born in his twenty-sixth year and died at the end of the twentieth of Pammetchus I of the XXVith dynasty. Its life exceeded twenty years, and no Apis is stated to have lived longer than twenty-six. Taking that as the standard of age, the Tirhakah's accession B.C. 695, and assign him a reign of twenty-six years. In this case we should be obliged to take the later reckoning of the Biblical events, were it not for the possibility that Tirhakah ruled over Ethiopia before becoming king of Egypt. In connection with this it should be observed that as earlier Ethiopian of the same dynasty is called in the Bible "So, king of Egypt," while this ruler is called "Tirhakah, king of Ethiopia," and that a Pharaoh is spoken of in Scripture at the period of the latter, and also that Herodotus (iii, 141) represents the Egyptian opponent of Sennacherib as Sethos, a native king, who has however, been a vassal under the Ethiopian. See So. It is deserving of remark, and strongly favors the view of those writers who maintain that during considerable periods Ethiopian dynasties ruled in Egypt, that from the time of Shishak to that of Tirhakah and it is of Ethiopians that we read in Scripture as having hastily furnished the hosts which marched to battle out of Egypt. While Shishak is called king of Egypt, his army is declared to have been composed, not of Egyptians, but of Libims and Sukkim and Ethiopians (2 Chron. xii, 8). We subsequently read of Zerah the Ethiopian leading an army of Ethiopians and L. Pams against Asa (xvi, 8). We now find that while Pharaoh of Egypt may have made great promises, it is the Ethiopian king Tirhakah who alone brings an army into the field. In the reign of Pharaoh-necho, the Egyptian army seems to have been made up of Ethiopians and Libyans (Jer. xlv, 9). The natural inference is that, during this long period, the military power of Egypt was at a low ebb. At the time we are now speaking of, Rawlinson supposes Egypt to have been subject to Ethiopia (Herod. i, 391). In this he is not quite correct, however, because it is more inferior to it in strength and spirit, but it was, at least, nominally independent at this time, though it may have fallen soon after under the power of the Ethiopian king. That Tirhakah was actually king of Egypt at some time is strongly maintained. There is nothing in Scripture to prevent our supposing that he became so in consequence to the period when it speaks of him. Indeed, in the position in which it places him, at the head of a large army in Egypt, with no Assyrian enemy to dread, it pictures a situation which would tempt an ambitious soldier to extend his power by dethroning an inefficient or irreligious monarch of Ethiopia, therefore of his time would seem to have been. Wilkinson (i, 188-192) supposes that he at first ruled over Upper Egypt, while Sethos held the sovereignty of the lower country; that he came to the Egyptian throne rather by legal succession than by usurpation; and that he did actually fight a resistance against Sennacherib and overthrow it in battle. Scripture, however, expressly ascribes the overthrow of the Assyrian to the supernatural interposition of God (2 Kings xix, 35). Herodotus (ii, 141) does not mention Tirhakah at all, but only speaks of the king of Egypt, and mentions the overthrow of the Assyrian army very much in the way that crafty priests might pervert the actual occurrence as recorded in Scripture. It is quite possible that Tirhakah may have led his army in pursuit of the Assyrians after their mysterious midnight overthrow; may have captured prisoners and treasure; and this would be quite sufficient ground for any identification of him on the Theban sculptures. If, as is probable, he became king of all Egypt, there seems strong reason for agreeing with much, at least, of Strabo's account of him (lib. xv) as having extended his conquests into Europe. The Assyrian power was effectively checked by the ruin of its army and the divisions of its reigning family. At the head of a great army which had come forth to fight the Assyrians, and now found itself without a foe, there is every reason why Tirhakah may have extended the Egyptian power as far as any Egyptian king before him. If Tirhakah did come into actual conflict with the Assyrian Pharaoh, it would make Tirhakah's army in the Nile delta, the only Egyptian army in Egypt, as many writers maintain, it must have been upon another occasion than that mentioned in Scripture (see Josephus, Ant. x, 1, 4). It is, however, more
TIRHANAH
probable that Scripture has sketched in a few words the entire matter, and that the variations from it are the effect of ignorance or design. The invasion of As-
aryia had probably Egypt and Ethiopia as its ultimate object, but in the account of Scripture the Assyrian hosts are only mentioned in its way to the accomplishment of its purpose. See SENNACHERIB.
The name of Tirhakah is written in hieroglyphics Teharka (or Coptic Tarkha). His successful opposition to the power of Assyria is recorded on the walls of a Theban temple, for the Medes. The headless figure of an Assyrian king, and the captives he took (Tev-
vor, Egypt, p. 71). At Jebel Berki, or Napat, he con-
structed one temple and part of another. Of the events of his reign little else is known, and the account of Megasthenes (ap. Strabo, xv, 688, where he is called "Tezordon the Ethiopian," Tepheonos à Aişeoj), that he railed Sessati in as a warrior and reached the Pillars of Her-
cules, is not supported by other evidence.
Hieroglyphic See Wilkinson, Anc. Egypt, i, 140 sq.;
Cartouch of Tirhakah, Brugsch, Hist. of Egypt, ii, 256 sq. See ETHIOPIA.
Tiria (Heb. Tiri'a, ציריה, fear; Sept. Τιρία v. Θαρχαῖα; Vulg. Thiria), third named of the four sons of Jabez and the tribe of Judah (1 Chron. iv, 16). B.C. apparently cir. 1618.
Tirinias, Jacob, a Jesuit, was born at Antwerp in the year 1580. In 1600 he entered the Order of the Jesuits, was appointed professor of exegesis, superior of the Dutch Mission, and died July 14, 1636. He published, Biblia Magna, cum Commentariis Gargari, Estini, Menochiti, et Tirinii (Paris, 1643, 5 vols. fol.)—Commentarii in Sacra Scripturam, cum Chronicum Sacrum æe Prolegomenis de Antiquis Ponderibus et Monetis ac de Menariorum de Cursographia Terræ Sanctæ (Antw. 1682, 3 vols. fol.; 1645, fol.; Lyons, 1646; Venice, 1688; Augsburg, 1704). See Winer, Handb. der theol. Literatur, i, 186, 188; ii, 804; Fürst, Bibl. Jud. iii, 423; Theol. Umschau, vi, 184 (B. P.).
Tiróns (nearh loced recettte), a name sometimes given to cattelizmen (q. v.).
Tiriones, or CONGREGATION OF TIRION. This order of monks was founded at Tirion, near Poitiers, in 1109, by Bernard d'Abbeville. See BERNARD OF TIRION. The first monastery was abandoned in 1114, and another built on the river Tirion. It was soon filled with monks, and before long the order had under its control sixty-five abbeys and priories and eleven diocesan parishes. Bernard required the strictest observance of the Benedictine rule; and so great was the self-denial of the monks that at times they were hardly supplied with the necessaries of life, one loaf of bread being deemed sufficient for the daily portion of four men. Notwithstanding these au-
sterities, the number increased in three years to five hun-
dred, and the fame of Bernard's sanctity had spread to foreign countries. Henry I of England sent the monas-
ytery an annuity of fifteen marks of silver in perpetuity, besides 500 marks yearly during his life, and built a magnificent dormitory. The king of France gave to it the territory of Savigny. Thibaud de Bois presented it with two priories, and built for it an oratory. Money and other valuable gifts were offered at its shrine, and at the death of its founder, in 1116, it was in a most flourishing condition. At the time of its greatest prosperity there were under its control eleven abbeys, forty-four priories, and twenty-nine parishes, scattered over France, England, and Scotland. In 1269 the Abbey of Tirion was added to the possessions of the Congregation of St. Maur, and from that time the Ti-
riones ceased to exist as a separate organization. See Helyot, Ordres Religieux, iii, 674.
Tirzah. See Wink.
Tirzah, Leto, a German scholar, apparently of Jewish extraction, who lived in the 18th century, is the author of Disseratio de Characterem Antiquitum apud Hebraeos ante Exordium Usu (Prague, 1759)—Fundamenta Linguae Sanctae (ibid. 1766)—Hand-Lexikon der jüdisch-deutschen Sprache, etc. (ibid. 1778)—Disserat.
atio de Caracterem Fereos, in quibus olim a Judaeis gentia sunt, codicibusque antiquioribus (ibid. 1778)—Disseratio an Lingua Hebraica Omnium Antiquissimam Primum Huendea, etc. (ibid. 1778)—Grammatica Heb. ; prac-
Tirzatha' [most Tirzatha] (Heb. always with the article, 'la-Tirzatha, la-Tirzatha, Ṭaḥa; hence the Sept.
gives the word 'Aṣṣathoù, [2 Sam. xxv, 24]), Ezer ii, 68; Neh. vii, 65, and 'Aṣṣarāsāh, Neh. x, 1; Vulg. Aṣsathorah), the title of the governor of Judaea under the Persians, derived from Genesisus from the Persian root tash, signifying "stern," "severe." He compares the title Gestermmer Herr, formerly given to the magistrates of certain of the imperial cities of the empire, with this expression, "most dread (sovereign)." It is added as a title after the name of Nehemiah (viii, 9; x, 1 [Heb. 2]); and occurs also in three other places (Ezra ii, 68, and the repetition of that account in Neh. vii, 65-70), where probably it is intended to denote Zerub-
babel, who had held the office before Nehemiah. In the margin of the A. V. (Ezra ii, 68; Neh. vii, 65; x, 1) it is rendered "governor;" an explanation justified by Neh. xii, 26, where "Nehemiah the governor," יִהוּד (Yehudâh, probably from the same root as the word we write pachâ, or pasha), occurs instead of the more usual expression "Nehemiah the Tirzatha." This word, יִהוּד, is twice applied by Nehemiah to himself (v, 14, 18), and by the prophet Haggai (i, 1; ii, 21) to Zerubbabel. Ac-
cording to the Assyrian (2 Kings xviii, 24; Isa. xxxvi, 9), Babylonian (Jer. ii, 57; Ezek. xxii, 6, 13; see also Ezra v, 3, 14; vi, 7; Dan. iii, 5, 27; vi, 7 [Heb. 8]), Median (Jer. ii, 28), and Persian (2 Chron. xxxii, 19) monarchs (v, 1, 8) monarchs. Under this last we find it applied to the rulers of the provinces bor-
erized by the Ephraim (Ezra viii, 36; Neh. ii, 7, 9, 11, 7), and to the governors of Judaea, Zerubbabel and Nehemiah (comp. Mal. i, 8). It is found also at an earlier period in the times of Solomon (1 Kings x, 15; 2 Chron. ix, 14) and Benhadad king of Syria (1 Kings xx, 24), from which last place, compared with others (2 Kings xviii, 24; Isa. xxxvi, 9), we find that military commands were often held by these governors; the word, indeed, is often rendered by the A. V., either in the text or the margin, "captain." By thus briefly ex-
amining the sense of Pechâh, which (though of course a much more general and less distinctive word) is given as an equivalent to Tirshâ, we have no difficulty in forming an opinion as to the general notion implied in it. We have, however, no sufficient information to enable us to explain in detail in what consisted the special peculiarities in the title or designation that distinguished the Tir-
shatha from others of the same class, governors, captains, princes, rulers of provinces. See GOVERNOR.
Tirzah (Heb. Tirtzâh, צירית, delight; Sept. Θεσσα v. r. [in the case of No 2] Θησσα and Θεσσα; Vulg. Theresia), the name of a woman and also of a place. See also CYRUS; TITIZE.
1. The last named of the five daughters of Zelophe-
had, of the tribe of Manasseh, whose case originated the
TIRZAH

TIRZAH

law that in the event of a man dying without male issue his property should pass to his daughters (Numb. xxvi, 38; xxvii, 1; xxxvi, 11 [where she is named second], Josh. xvii, 18), not to Zelophehad.

2. Joshua, v. 17; Sept. ; Z condolences, i.e. 7 Zaradah, and of his successors, Baasha (xxv, 21, 38), Elah (xvi, 8, 9), and Zimri (ver. 15). It contained the royal sepulchres of one (ver. 6), and probably all the first four kings of the northern kingdom. Zimri was besieged there by Omri, and perished in the flames of his palace. He was succeeded by Tibni, who continued to reside there at first, but after six years he left it to his son Ahab (q. v.), at that time raised to the vice-royalty, and removed to a new city which he built and named Shomron (Samaria), and which continued to be the capital of the northern kingdom till its fall. Once, and once only, does Tirzah reappear, as the seat of the conspiracy of Menahem ben-Gaddi against the wretched Shallum (2 Kings xxv, 14, 16); but as so soon as his revolt had proved successful, Menahem removed the seat of his government to Samaria, and Tirzah was again left in obscurity. Its reputation for beauty throughout the country must have suffered. It is stated that it is in this sense that it is mentioned in the Song of Solomon, where the juxtaposition of Jerusalem is sufficient proof of the estimation in which it was held—"Beautiful as Tirzah, comely as Jerusalem" (Cant. vi, 4). The Sept. ( ) and Vulg. ( ) do not, however, take for a proper name in this passage. Its occurrence here on a level with Jerusalem has been held to indicate that the Song of Songs was the work of a writer belonging to the northern kingdom. But surely a poet, and so ardent a poet as the author of the Song of Songs, may have been sufficiently independent of political considerations to go out of his own country—if Tirzah can be said to be out of the country of a native of Judah—for a metaphor.

See CANTICLES.

Ezechieus ( ) mentions it in connection with Menahem, and identifies it with a "village of Samaritans at Batanea." There is, however, nothing in the biblical record to indicate that Tirzah and the Israelish monachs was on the east of Jordan. Josephus merely mentions it ( ), and others place it in Mannassah. Lightfoot (Chorograph., Cant. c. 88) sees it on the Jericho road, and Tirzah and Bethul are to the same; for he says that "if Shechem and Tirzah were not one and the same, it would appear that Jeroboam had removed when his son died from where he was when he first erected his idols (comp. 1 Kings xii, 25; xiv, 17). It does not appear to be mentioned by the Jewish topographers, or by any of the Christian travelers of the Middle Ages, except Brocardus, who places "Thersa on a high mountain, three leagues (lesseve) from Samaria to the east" (Descrip. Terra Sanct. vii, 18). This is the direction of the hill country of the Nabhâs, which was visited by Robinson (Isra. Rest. iii, 302) and Van de Velde in 1825 (Sur. and Pal. iii, 334). The town is on an eminence, which towards the east is exceedingly lofty, though, being at the edge of the central highlands, it is more approachable from the west. The place is a large hill, but there are many obvious marks of antiquity (Robinson, Later Rest. p. 302). Lieut. Conder, however, suggests the identity of Tirzah with a "mud hamlet" called Telârâ, twelve miles east of Jabs, which he found to have been once a place of importance, judging from the numerous rock-cut sepulchres, huge and mound graves, and fine olives around, and the monument of good masonry, apparently a Roman tomb. The position is beautiful, and the old main road leads to the place from Shechem. (Ten-Work in Palest, 1, 108).

TISCHENDORF, LEBEGOTT FRIEDRICH CONSTANTYN von, the most prominent scholar in the department of New-Test. philology, was born in 1810 in Lauenfeld, in Saxony. Having been prepared at the gymnasium at Plauen for the university, he entered, at Easter, 1834, aged nineteen, the halls of Leipzig. Here Gottfried Hermann and Georg Benedict Winer were among his teachers. At the close of 1836 he received a prize medal for an essay on Doctrina Pauli Apostoli de Vi Mortis Christi Satisfactoria, which he published at Leipzig in 1837. A second prize was awarded to him in the year 1838 on Disputatio de Christo, Puno Viva, sine de Loco Evang. Joann. c. vi, vv. 51-59, Contra Sacrae Historiae in Fasti Antiqui. (ibid.) (1838) he in the same time, he took his degree of doctor of philosophy. In 1840 he published Dissertatio Critica et Exegetica de Ev. Matt. c. xxi, 16 sq., and was promoted as licentiate of theology; in the same year he qualified as privat-dozent of theology by publishing De Recensimibus quas dictam Novi Testamenti Rutine Potissimum habita Scholast. (ibid.; reprinted in the Prolegomena to the Greek Testament published in 1841). In this essay, as Kahnis rightly remarked, he gave to the world the programme of his theological future. In October, 1839, he began to prepare a critical hand-edition of the Greek text of the New Testament, which is now under the title Novum Testamentum Graece: Textum ad Fidem Antiquorum Textum Recens. Brevem Apparatu Criti. una cum Varia Lectionibus Elzev., Knappiti, Scholasti, Lichmanni subjunctis, etc. (ibid.). In 1840 Tischendorf went to Paris. The library there contained a celebrated palimpsest. A manuscript of the Bible from early in the 5th century had been cleaned off in the 12th century, and used for writings of Ephraem Syrus. What no mortal had been able to do before, Tischendorf did, and with the aid of chemical reagents he completely restored the original text. The University of Breslau acknowledged his merit by bestowing on him the title of doctor of theology. Meanwhile he also collated the Paris manuscripts of Philo for Prof. Grossmann at Leipzig, and the only remaining manuscript of the 60th book of the Basilicae for Dr. Heimbach at Jena. F. Didot, the publisher, bargained with Tischendorf for a reissue of his Leipzig edition of the Leipzig edition of the New Testament, and then abbe Jager, a professor in the Sorbonne, begged him to edit a Greek text that should conform as nearly as possible to the Vulgate, which was also published in the same year. In 1841 and 1842 he visited the libraries in Holland, London, Cambridge, and Oxford. Early in 1843 he returned home to Paris, and devoted himself to the study of the Codex E of the gospels at Basle. In Italy he stayed more than a year, and used his time in the best possible manner. When his Italian researches were completed, he prepared to start for his first Eastern journey in 1844, which he repeated again in 1858 and 1865. On his third journey, in 1869, he discovered the famous Codex Sinaiticus. After his return he was made ordinary professor of the Leipsic University, and a special chair of sacred paleography was made for him. From this time on, he spent the remainder of his life in publishing the results of his amassed materials, collected on his different journeys, of which he would speak further on. On May 6, 1873, he was seized with apoplexy; he recovered somewhat from the attack, but in November, 1874, the malady grew worse, and on Dec. 7, 1874, he passed away. His funeral took place on the 10th, at which Dr. Ahlefeld, Kahnis, Luthardt, and others made addresses. Probably no theological ever received so varied and so many signs of distinction, academic and civil. He was a Russian noble, a Saxon privy-councillor, knight of many orders, doctor of all academic degrees, and member of both the Slavonian and Russian societies. Then, in 1855, king Friedrich Wilhelm IV of Prussia (brother of the present emperor of Germany) said to him, "You
17, 28: 2 Kings i, 3; 8, ix, 36). The following explanations have been given of this obscure epithet:

1. The name naturally points to a place called Tishbi, Tishbe or Tishbah, as the residence of the prophet. Indeed, the word בִּיתִיב, which follows it in 1 Kings xvii, 1, and which in the received Hebrew text is so pointed as to mean "from the residents," may, without violence or grammatical impropriety, be pointed to read "from Tishbi." This latter reading appears to have been followed by the Sept. (v. 1 Θεῷ τὴς Θεοῦ, 1 in Θεοῦ), Josephus (Ant. viii, 18, 2, πέλαγος Θεοῦ, and the Targ. יְתֶבֶנָא, "from out of Toshaph"); and it has the support of Ewald (Iisch. iii, 468, note). It is also supported by the fact, which seems to have escaped notice, that the word does not in this passage contain the י which is present in each one of the places where בִּיתִיב is used as a mere appellative noun. Had the י been present in 1 Kings xvii, 1, the interpretation "from Tishbi" could never have been proposed.

Assuming, however, that a town is alluded to as Elijah's native place, it is not necessary to infer that it was itself in Gilead, as Epiphanius, Adrianomus, Castell, and others have supposed. Elijah's imagination rendered it in the A. V. rendered by the general term "inhabitant," has really the special force of "residing" or even "stranger." This and the fact that a place with a similar name is not elsewhere mentioned have induced the commeneters, geographers, and lexicographers, with few exceptions, to adopt the name "Tishbi" as referring to the place Tannan (Therzi) in Naphtali, which is found in the Sept. text of Tobit i, 2. The difficulty in the way of this is the great uncertainty in the way of that passage is involved—an uncertainty quite sufficient to destroy any dependence upon it as a topographical record, although it bears the traces of having originally been extremely minute. Bunsen (Bibelwort, note to 1 Kings xvii, 1) suggests in support of the reading "the Tishbi from Tishbi of Gilead" (which, however, he does not adopt in his text) that the place may have been purposely so described, in order to distinguish it from the town of the same name in Galilee.

2. But בִּיתִיב has not always been read as a proper name referring to a place. Like בִּיתָם, though exactly in reverse, it has been pointed so as to make it mean "the stranger." This is done by Michaelis in the text of his interesting Bibel für Urglehrer—Der Fremdling Elia, einer von den Fremden, die in Gilead wohnhaft waren;" and it throws a new and impressive air around the prophet, who was so emphatically the champion of the God of Israel. But this suggestion does not appear to have been adopted by any other interpreter, ancient or modern.

The numerical value of the letters בִּיתִיב is 712, on which account, and also doubtless with a view to its correspondence with his own name, Elias Levita entitled his work, in which 712 words are explained, Sepher Tishbi (Bartocci, i, 146). See EKILIAH.

TISIO (L. TISIO) BONVESUTO, called Il Garofolo, an eminent painter of the Ferrarese school, was born in 1491, received his first education under Domenico Panetti, and next studied with Niccolò Soriano at Cremona, and next under Boccaccio Boccaccino. He went to Rome in 1549, where he remained fifteen months, and then travelled through various Italian states, in quest of employment, to settle down in Rome. Persuaded, however, by the licitations of Panetti and by the commissions of duke Alphonso, he remained in his native place, Ferrara. His death took place in 1559. The works of Tisio are extremely valuable, and scarcely to be found outside of Italy. Among them we note, Murder of the Innocents, Resurrection of Lazarus, and Taking of Christ, in the Church of St. Francis at Ferrara; St. Peter Martyr, in the Church of the Dominicans; Visitation of the Virgin, in the Palazzo Doria. See Spooner, Biog. Dict. of the Fine Arts, s. v.

TISI, or rather TISNI (תִּסִּי, from תִּסְכָּה, to begin), was the Rabbinical name of the first month of the civil and the seventh month of the ecclesiastical year, in which fell the festival of Atonement and that of Tabernacles, and in the latter the practice of the Sektah begins; it is the month of the river Ekhaim, that is, the month of streaming rivers, which are filled during this month by the autumnal rains. It corresponds with our September-October. Tisi is one of the six names of months found in Palmyra inscriptions, which, with other evidences, renders it very probable that this month began at the equinox, as it does the month of Iyyohu (March), in a great series, which were extensively in use in the eastern parts of the world (see Benfey and Stern, Uber die Monatsnamen einiger alten Volker [Berlin, 1886]). See MONTH.

TITAN (TITAN, usually in the plur. TITANER, of uncertain derivation). These children of Uranus (Heaven) and Gaia (Earth) are (see TITANS), according to the earliest Greek legends, the vanquished predecessors of the Olympian gods, condemned by Zeus to dwell in Tartarus, yet not without retaining many relics of their ancient dignity (Iesch. Prom. Vinct. passim). By later (Latin) poets they were confounded with the kindred Gigantes (Giant) and Okeanos, iii, 12, 19, 24; and the traditions of the primitive Greek faith died away; and both terms were transferred by the Sept. to the Reaphim of ancient Palestine. See GIANT. The usual Greek rendering of Reaphim is indeed Θαύματος (Gen. xiv, 5; Josh. xii, 4, etc.), or, with a yet clearer reference to Greek mythology, θαύματος (Prov. ii, 18; ix, 18) and Θαύματος (Synmexh. Prov. ix, 18; xii, 16; Job xxvi, 5). But in 2 Sam. v, 18, 22 "the valley of Reaphim" is represented by η κόλπος τῶν τεταράων instead of η κόλπος τῶν γιγαντῶν (1 Chron. xi, 15; xiv, 9, 13); and the same rendering occurs in a Hexap. text in 2 Sam. xxiii, 13. Thus Ambrose defends his use of a classical allusion by a reference to the old Latin version of 2 Sam. v, which preserved the Sept. rendering (De Deo, iii, 14, 4, "Nam et gigantes et vellem Titamum prophetici sermonis series non refugit. Et Esias Siremus . . . dixit.") It can therefore occur occasion no surprise that in the Greek version of the triumphal hymn of Judith (xvi, 7) "the sons of the Titans" (woi triárwov: Vulg. filii Titans; old Lat. filii Dathan; f. Tela; f. bellatorum) stands parallel with "high giants," υψίθραυς θαύματος, where the original text probably had θαύματος and not θαύματος. The word has yet another interesting point of connection with the Bible; for it may have been from some vague sense of the struggle of the infernal and celestial powers, dimly shadowed forth in the classical myth of the Titans, that several Christian fathers inclined to the belief that Tharos was the mystic name of "the beast" indicated in Rev. xiii, 18 (lrenaeus, v., 30, 8, "Divinum putatur apud multis esse hoc nomen . . . et ostentationem quandam continet ullaion . . . et alias autem et antiquum, et aede dignum et tyrannicum nominem . . . ut ex mulis collegiisam ne forte Titas vocetur qui veniet").

TITANIDES, in Greek mythology, were the children of Uranus and Gaia. There were twenty-two of them—namely, Oceanus, Oceanus, Adamas, Opticon, Angetis, Ceus, Andes, Hyperion, Cius, Olympus, Japetus, Zeus, and Kronus (Saturn); Tethys, Rhé, Themis, Mnemosyne, Phoebe, Dione, Tithe, Thrace, Euryphase. They represented the various elements and powers of nature and still engaged in wild combat. Uranus had thrown his first son, the Hecatonhires (the fifty-armed), Briareus, Cottus, and Gyes (also Gygess), and the Cyclopes Arges, Steropes, and Brontes, into Tartarus. Gaia became angry of so many efforts of the gods against her offspring, and rebelled against her father, and for this purpose gave to Kronus a hook, with which he emasculated him (Uranus). All save Oceanus participated in the rebellion. Uranus
was dethroned, those pining in Tartarus liberated, and Kronos acknowledged as ruler, who, however, subjected again those who had been liberated to the tortures of Tartarus, with the Hecatechires as their guards. Titans was also the name of the divine beings descended from the Titans, sometimes called Titanides, as Prometheus, Hephaestus, and so forth, and who subdued and held captive, who has since become very common to designate the god of the sun. A peculiar saying was that Bacchus was born of the Titans. Bacchus is here represented to be the power of vegetation, which is broken by the satanic powers of the infernal region.

Tithè (τήθε, maasér; Sept. and New Test. ἡθή, occasionally ekasor or imikasor; Vulg. decemina; plur. τίθηθεν, ai ekirasor; decima; from τίθημι, ten; Targum נְסָרָה, נְסָרָא נַרְנְרָא, the tenth part both of the produce of the land and of the increase of the flock, enjoined in the Mosaic law to be devoted by every Israelite to the servants of the sanctuary, and to the hospital meals provided on the festivals for the poor and needy (Lev. xxvii, 30–33; Num. xviii, 21–32; Deut. xii, 5–18; xiv, 22–29; xxvi, 12–14). The following treatment of the subject relates to Jewish tithes from Biblical and Rabbinic times. 1. The Mosaic Law respecting Tithes. — The first enactment respecting tithes ordains that the tenth of all produce and of all animals is to be devoted to the Lord; that the prelial or vegetal tithe may be redeemed if one fifth is added to its value; and that the mixed or animal tithe, which is redeemable, is to be taken as it comes, without any selection, and without attempting to effect any change, else the original animal and the one substituted for it are both forfeited to the sanctuary (Lev. xxvii, 30–33). In the second mention of the tithe it is enacted that it is to be given to the Levite, who receives in return for these services the tithe, since they were excluded from sharing in the division of the land of Canaan; that they are allowed to consume the tithe wherever they please (רְבִּעיִם נְשָׁרַיִם), and that from the tithe thus received they are to give a tenth to the Aarones or priests (Num. xviii, 21–32). In the third legislation on this point it is further commanded that the tithe be to be paid on the produce of the second year; that this vegetable tithe, together with the firstlings of the flock and herd, is to constitute the social and festive repast in the place of the sanctuary; that in case the sanctuary is too far off, the tithal produce is to be converted into money, which is to be taken to the Levite and paid in full on the day of the annual entertainment, and that the Levite is to share with the family in this social meal. It is, moreover, ordained that at the end of every third year this vegetable tithe (רְבִּעיִם נְשָׁרַיִם) is not to be taken to the metropolis, but is to constitute hospitable and charitable meals at home, to which the Levite, the stranger, the fatherless, and the widow are to be invited (Deut. xii, 5–7; xiv, 22–29). The tenth part of the produce of the second year; that this vegetable tithe into entertainments for the poor is again enjoined in xxvi, 12–15, where it is also ordered that every Israelite shall make an excusatory declaration that he has conscientiously performed the tithal command.

It will be seen that the book of Deuteronomy only mentions the second or vegetable tithe as well as its triennial conversion into the poor tithe, omitting altogether the first or Levitical tithe; while the books of Leviticus and Numbers, which discuss the Levitical tithe, pass over in silence the second or feast tithe. Tithes given rise to various theories among modern critics. Thus Ewald will have it that the Deuteronomist, writing during the period of the Jewish monarchy, when the Levitical tithe, as enjoined in Leviticus and Numbers, could no longer be continued as a regular rate in consequence of the new taxes imposed by the sovereigns, endeavored to bring the tithe back to its original form of a voluntary offering (Die Alterthümer des Volkes Israel, p. 346). Knobel (Comment. on Lev. p. 419, 590) regards Deut. xvi, 11; xiv, 22–29; xxvi, 12, as proceeding from the later Jehovistic legislator who lived towards the end of the kingdom of Judah, and who substituted a tithal system of the triennial vegetable and animal tithe, which was no longer practicable, the triennial vegetable tithe which was to be devoted to the hospitable meals whereunto the Levites, together with the stranger, widow, orphans, and poor, were to be invited, owing to Bishop Colenso (The Pentateuch and the Book of Joshua Critically Examined, pp. 476, 478), who also regards the enactments in Leviticus, Numbers, and Deuteronomy as referring to one and the same tithe, finds "the most complete contradiction between the two sets of laws." Against these theories, however, it is urged that — a. The tithe enactment in Deuteronomy has nothing whatever to do with the one in Leviticus and Numbers, and is therefore neither intended to contravene nor supersede it. b. The Deuteronomist presupposes the existence and force of the Levitical tithe as the fixed income of the ministers of the sanctuary, and designs the second tithe to be found as the complement to the triennial vegetable tithe as substituted in place of the original Levitical tithe, we are shut up to the prepostorious conclusion that the only provision made by the Deuteronomist for the Levites is an ample meal once in three years. c. The mention of the second tithe by the Deuteronomist as tithing to the Levite is connected with the fixing of the central sanctuary, the rites and regulations of which he alone discusses. d. The post-exilian practice of the Jews shows beyond the shadow of a doubt that the nation for whom these tithal laws were passed understood the enactment in Deuteronomy as referring to a second tithe as a free gift, side by side with the first or Levitical tithe enjoined in Leviticus and Numbers (Tobit i, 7; Josephus, Ant. iv, 8, 22; Mishna, Maaser Shevi). This also sets aside the objection urged by some that a double tithe would be too heavy and unbearable a tax. For if the Jews did not find it so in later times, when under the rule of foreign sovereigns, and paying heavy rates to them, surely they could not have found the double tithe too grinding an oppression during the independence of the State, especially when it is remembered that the second tithe was devoted to festive repasts of the respective families at which the Levites, the strangers, the widows, orphans, etc., were simply guests.

From all this we gather: 1. That one tenth of the whole produce of the soil was to be assigned for the maintenance of the Levites. 2. That out of this the Levites were to dedicate a tenth to God for the use of the high-priest. 3. That a tenth of one-tenth, or the second tithe, was to be applied to festival purposes. 4. That in every third year either this festival tithe or a third tenth was to be eaten in company with the poor and the Levites. The question thus arises, were there three tithes taken in this third year, or is the third tithe only the second tithe under a different name? That there were two yearly tithes seems clear, both from the general tenor of the directions and from the Sept. rendering of Deut. xxvi, 12. But it must be allowed that the third tithe is not without support. a. Josephus distinctly says that one tenth was to be given to the Levites as a gift, which shows that the Levites were applied to feasts in the metropolis, and that a tenth besides these (רְבִּעיִם נְשָׁרַיִם) was every third year to be given to the poor (Ant. iv, 8, 8, 22). b. Tobit says he gave one tenth to the priests, one tenth he sold and spent at Jerusalem, i.e. commuted according
TITHE

to Deut. xiv, 24, 29, and another tenth he gave away (Tobit i, 7, 8). c. Jerome says one tenth was given to the Levites, out of which they gave one tenth to the priests (δέκατον τὴς ἀκροασίας); a second tithe was applied to festival purposes, and a third was given to the poor (παροικός τῆς θείας) (Com. on Ezech. xli, 1, 565). Spencer thinks there were three tithes, and that with Maimonides he thinks there were only two complete tithes, but that in the third year an addition of some sort was made (Spencer, De Leg. Hebr. p. 727; Jennings, Jewish Ant. p. 183).

On the other hand, Maimonides says the third and sixth tithes' second tithe was shared between the poor and the Levites, i.e. that there was no third tithe (De Jour. Pauv. vi, 4). Selden and Michaelis remark that the burden of these three tithes, besides the first-fruits, would be excessive. Selden thinks that the third year's tithe denotes only a different application of the second, or festival, tithe, and Michaelis that it meant a surplus after the consumption of the festival tithe (Selden, On Tithes, ii, 18; Michaelis, Lives of Moses, § 192, iii, 143, ed. Smith). Against a third tithe may be added Rolando, Ant. Hebr. p. 539; Jahn, Ant. § 389; Godwyn, Moses and Aaron, p. 136, and Carpozon, p. 621, 622; Keri, Bibl. Arch. § 51, i. 307; Saulschütz, Hebr. Arch. i, 70; Winer, Rechtemord, b. v. "Zehute."

Of these opinions, that which maintains three separate and complete tithings seems improbable as imposing an excessive burden on the land, and not easily reconcilable with the other directions; yet there seems no reason for rejecting the notion of "two yearly tithes when we recollect the special promise of fertility to the soil conditional on observance of the commands of the law (Deut. xxix)." There would thus be, (1) a yearly tithe for the Levites; (2) a second tithe for the festivals, which last would, every third year, be shared by the poor. Michaelis thinks (op. cit. p. 299) that the tithe which Michaelis thinks is spoken of as likely to be converted to the king's use under the regal dynasty (I Sam. viii, 15, 17; Michaelis, Lives of Moses, i, 299). Ewald thinks that under the kings the ecclesiastical tithe system reverted to what he supposes to have been its original free-will character.

II. Classification of and Later Legislation upon the Tithes. It will be seen from the above description that the tithes are divisible into four classes. As the anxiety to pay them properly called forth more minute definitions and further expansion of the Pentateuchal encomiums, it was necessary to give the most important practices which obtained during the second Temple in connection with each of these four classes of tithes.

1. The Levitical, or first tithe (תֵאֱלָה הַבָּשָׂם). This tithe was paid after both the first-fruit (יִנְכוּר וּרְשָׁם) and the priestly heave-offering (תַּנְחָם וּרְשִׁים) had been separated, the amount of which, though not fixed in the Mosaic law, was generally one fiftieth of the produce (comp. Exod. xiii, 19; Deut. xxi, 1, etc., with Mishna, Bikkurim; Numb. xviii, 4; Deut. xvii, 4, with Mishna, Terumot, iii, 7; iv, 3; Maimonides, Iad Ab. 1.6; Chezak, Hilchot Mathanath Aniym, vi, 2). As the Mosaic law does not define what things are subject to this tithe, but simply says that it is to consist of both vegetables and animals (Lev. xxvii, 30 sq.), the Jewish canonists enacted that as to the produce of the land "whatsoever is not eaten at the end of the year is not titheable till it is ripe for food" (Mishna, Masseroth, i, 1). It is to be seen that this definition embraces even the smallest kitchen herbs and aromatic plants; and that it explains the remark of our Saviour that tithe was paid of mint, dill, and cummin, which he, however, did not condemn, but, on the contrary, said, "These ought ye to have done" (Matt. xxiii, 23; Luke xi, 42; comp. Mishna, Masseroth, i, 2-8).

The animals subject to this Levitical tithe are still more indefinitely described in the Pentateuchal statute, which simply says, "As to all the tithe of herds and flocks, whatsoever passeth under the rod shall be hallowed unto the Lord" (Lev. xxvii, 29). It will be seen that this law does not say whether the tenth is to be paid of the newly born animals, whether it includes those newly purchased or exchanged, whether it is payable if a man has less than ten cattle, or at what age of the animals the tithe is to be taken. The spirit of the law was to prevent people had therefore most minutely to define these points so as to make the tithe law practicable. Hence the following canons obtained: All animals are titheable except those which are born of heterogeneous copulation (comp. Deut. xxii, 9), which are damaged, which have come into the world irregularly, or which are bequeathed of their mother; which have been purchased or received as presents. They are only titheable when there are ten newly born of the same kind, so that the offspring of oxen and small cattle must not be put together to make up the requisite number, nor are even the parts of those which are killed together which are not more than sixteen years, though they belong to the same kind. Sheep and goats may be tithe unto the Lord, because they have all been born in the same season (Mishna, Bekoroth, ix, 3, 4). The tithe is to take place three times in the year, about fifteen days before each of the three great festivals. (a) On the first of Nisan, being fifteen days before Passover; (b) on the first of Sivan, being only five days before Pentecost, because the small number of animals born between these two festivals could not suffice for the celebration of Pentecost if the second tithe term were to be fifteen days before this festival; and (c) on the twenty-third instead of the first of Tisri, which is, properly speaking, fifteen days before Tabernacles, because the first of Tisri is the Feast of Trumpets, or New Year. See Festival. Those which were born in the month of Elul were tithe by themselves (ibid. Bosh. Shosh. i, 1, with Bekoroth, ix, 5, 6). On each of the three occasions the herds of every owner extending over a pasture-ground not exceeding sixteen Roman miles were collected together into one fold, while those beyond the prescribed limits formed a separate lot. In the pen wherein the herd was thus gathered a small door was made which only allowed one animal at a time to pass through, while the owner placed himself at this narrow opening, holding a rod or staff in his hand wherein he counted each animal as it made its exit from the fold till he came to the tenth, which he marked with red color, saying, "This is the tithe" (ibid. Bekoroth, x, 7). The command "whatsoever passeth under the rod" (Lev. xxvii, 32) was thus literally carried out.

2. The priestly tithe, also called tithe of the tithe (תֵאֱלָה הַבָּשָׂם), the heave-offering of the tithe (תַּנְחָם וּרְשִׁים), ιερωσυνία ἁπαράκτου (Philo, De Nom. Munit, or ἑτεροτοκία (Jerome, on Ezech. xli). This tithe had to be separated by the Levite from the tenth he had received from the Israelite. It had to be given to the priest in Jerusalem, and before the Levite had reserved the rate paid to him. It had, moreover, to be a tenth part of the very tithe which the Levites received, and was therefore subject to the same laws and regulations to which the Levitical tithe was subject. After the Babylonian captivity, when the Levites were divided (see below), this so-called tithe of tithes necessarily ceased. Hence the priests, instead of receiving a tenth of the Levitical tithe as heretofore, took their share directly from the people (Heb. vii, 5). See Schurer.

3. The second tithe (תֵאֱלָה הַבָּשָׂם, ἑτεροτοκία). This festival tithe could not be sold, nor given or received as a pledge, nor used as weight, nor exchanged,
but might be given away as a present (Mishna, Maaseer Sheni, i, 1). If the distance to the national sanctuary was so great as to preclude the possibility of conveying it in kind, it might be converted into specie, and the money could only be expended in the metropolis in ordinary articles of food, drink, and ointment for the festival meals or festival sacrifices which were eaten at the national repast (Bikkurim, 1:7; iii, 2: Chagigah, 1:3). There were storeroomes (קַרְבוֹת) in one part of the Temple, under the superintendence of priests and Levites, in which the tithe was kept (2 Chron. xxxiii, 11-14; Neh. x, 88, 39; xii, 14; xii, 12; Josephus, Ant., viii, 3, 8).  

4. The triennium, or poor tithe (זְבָעָה, παράσκοιν), also called the third tithe (זְבָעָה, τρίτη τέκτων, Sept., Deut. xxvi, 12), because it was properly the second tithe converted into the poor tithe, to be given to and consumed by the poor at home, instead of conveying it to the metropolis to be eaten by the owner. As every seventh year was a fallow year not yielding a regular harvest, it was enacted that the second tithe should be eaten in Jerusalem by the owner thereof and his guests in the first, second, fourth, and fifth years of the septennial cycle, and be given to him to the chosen sanctuary. Though the first and second years were to be paid in Palestine in the sabbatical year, when all was in common [see Sabbathal Yeke], yet the land of Egypt, Ammon, and Moab had to pay them for the support of the poor of Israel, because the Sabbath of the soil was not observed in these countries, while the Babylonions, Edom, and even the second tithe (Mishna, B. Ḳaṭan, iv, 3; Maimonides, Iad Ha-Chezkota, Hilchot Mathanath Ania, vi, 5).  

III. Origin and Obsercerence of the Tithal Low.—Without inquiring into the reason for which the number ten (q.v.) has so frequently been preferred as a number of selection, in the case of tithes, we may deride ḥekka from ḥekka (De X. 10, 181), both sacred and secular, voluntary and compulsory, we may remark that the practice of paying tithes obtained among different nations from the remotest antiquity. Thus the ancient Phoenicians and the Carchamitians sent tithes annually to the Tyrian Hercules (Diod. Sic, xx, 14; Justin, xviii, 7); the southern Arabs could not dispose of their income before paying a tenth thereof to the priests at Sabata in honor of their god Sabas (Pliny, Hist. Nat. xii, 32); the ancient Pelagians paid a tithe of the produce of the soil and the increase of their herds and flocks (Thucyd. iv, 34), and the Athenian sold and the Hellesponts consecrated to their deities a tenth of their annual produce of the soil (Xenop. HEL, i, 7, 10, 10) of their spoils (Herod. v, 77; iv, 81; Xenop. Anab. v, 3, 4; Hellen, iv, 3, 21; Dio, Sic. xi, 33; Pausan. iii, 18, 4; v, 10, 4; x, 10, 1; τάς ἔκκες τῶν παραγωγῶν τών ζωᾶς κα- περίων; Harpocrate, s. v. ἔκκεας; and Knobel, Comment. on Lev. xxiii, 30). Among other passages the following may be cited: 1. Macc. xi, 35; Herod. i, 172; Diod. Sic. xii, 12; Polyb. ix, 30; Cicero, Ver. ii, 3, 6, and 7 (where tithes of wine, oil, and "minute fruges" are mentioned); Pro Leg. Mancd. 6; Plut. Ages. ch. xix, p. 398; Pliny, Hist. Nat. xii, 14; Macrobi. Sat. iii, 6; Rose, Inser. Gr. p. 210; Gibbon, iii, 301, ed. 1781, p. 17, 2; it is said that the house of Shadrach, Meshach, and Abednego was tithed and offered to a deity, and a feast made of, which the people of the district partook, in Xenop. Anab. v, 3, 9, answering thus to the Hebrew poor man's tithe-mentioned above.  

In Biblical history the two prominent instances of early occurrence are: 4. At the outset of the history of the land of Israel, the tenth of all his property, according to the Syrian and Arabic versions of Heb. vii, and Rashi in his Commentary, but, as the passages themselves appear to show, of the spoils of his victory, to Melchizedek (Gen. xiv, 20; Heb. vii, 2, 6; Josephus, Ant. i, 10, 2; Selden, On Tithes, 435
TITHE

2. Jacob, after his vision at Luz, devoting a tenth of all his property to God in case he should return home in safety (Gen. xxvii, 22). These instances bring us in contact with a system of the tithe, more or less analogous to another previous to the Mosaic tithe system. There can therefore be no doubt that, like many other Pentateuchal ordinances, the inspired legislator adopted the tithe law into the divine code because he found that, with some modifications, this primarily voluntary tax was a proper stipend for the servants of the sanctuary, and that it would, at the same time, be a means of promoting pilgrimage to the national sanctuary on the great festivals, and social intercourse between the rich and the poor.

During the monarchy, the payment of tithes was neglected, and it seems that the kings claimed them for themselves (1 Sam. viii, 14, 15, 17; with 1 Macc. ii, 53). It was, however, re-established at the restoration of religion by the pious Hezekiah (2 Chron. xxxi, 5, 6, 12), and after the return of the Jews from the Babylonian captivity (Neh. x, 38; xii, 44; xiii, 5, 12), when material alterations and modifications were made in the tithe law owing to the altered state of the commonwealth and to the disposition of the Levites and laymen. Only 341 or 560 Levites returned at first from the Babylonian captivity, with about 37,319 laymen; while with Ezra only 38 Levites came back, with 1896 laymen; and there can be little doubt that the disposition continued among those who returned afterwards, as well as in the gradual and natural increase of the nation. There were thus 97 laymen to 1 Levite, while the tithe of 9 laymen amounted to as much as was left for each private family; and if we take 10 laymen to 1 Levite, as the latter had to pay a tenth to the priest, the tithe when duly paid by all the people yielded ten times as much as the Levites required. On the other hand, there were in Judaea, after the return from Babylon, a disproportionately large number of priests, since, exclusive of those who had no register (Ezra ii, 62), 4298 of them came with Zerubbabel—i.e., twelve or thirteen times more than Levites—and two whole families, besides separate individuals, came with Ezra. These could not possibly have subsisted upon the legal dues (Neh. x, 36–39). In addition to the miserably provided priests, there were the 612 Nethinim who came back, but not all had registers (Ezra ii, 2, 3); Neh. vii, 60), for whom no provision whatever existed. Ezra had therefore to take the superabundant tithe from the Levites for the support of the priests and the Nethinim. Hence Josephus distinctly tells us that the priests received tithes in later times (L. E. 15, Ant. xii, 5, 1, 20; x, 7, 1, 9; xiv, 4, 1, 22). It is evident that the levying of the tithe between the priests and the Levites which is evidently alluded to when the Talmud says that Ezra transferred the tithes from the Levites to the priests as a punishment for their tardiness in returning from exile (Kethuboth, 26 a; Cholâl, 191 b; Yehemoth, 86 b; Sotath, 47 b), for it could not possibly mean that he took the whole tithe away from the Levites, since that would be at variance with other records (comp. Ezra x, 38, 39; Neh. xiii, 10, 13; Tobit i, 7, with Tossephoth on Kethuboth, 26 a), and would leave the Levites with nothing to do, and visit the gods. Levites who did return with the punishment deserved by those who remained behind. It is, moreover, owing to this distribution of the Levitical tithe effected by Ezra that the tithe was afterwards divided into three portions, one of which was given to the priest and the other to the Temple storehouse, and the third portion was distributed in Jerusalem among the poor and the needy chanter (יָשֵׁרָן) = doctors of the law (Jerusalem Sotath, ix, 11; Jerusalem Mosaic Sheni, v; 15; Babylon Yeimoth, 96 b).

The tithes were paid in the form of all tithes, as well as the storehouses, which already existed in the time of Hezekiah for the reception of the tithes (2 Chron. xxxi, 11–14), were now better organized than ever. To achieve the purpose intended by Ezra in the new division of the tithe, it was absolutely necessary that the cultus and the distribution of tithes should take place under the careful superintendence of a body consisting of both priests and Levites. Such a board was therefore duly appointed, and it was ordained that at least one portion of the tithes should be taken to Jerusalem for the support of the ministering Levites.

During the period of sadducean degeneracy and Greco-Jewish ascendancy in Palestine, the tithes were again discontinued; but at the rise of the Pharisaism the strict payment of a tenth was made one of the two essential conditions exacted from every individual who desired to become a chaburah (חַבּוּרָה) = member of this association. The reason for this is given in the article PHARISAISM.

IV. Literature.—Mishna, tractates Maaserot, Maaser Sheni, and Rekuvoth, ix, 1, 8; and the Gemara on these Mishna; Maimonides, Yad Ha-Chashah, Hilchote Mathaneth Aynin, vi, 1–17; Hilchote Maaser and Maaser Sheni; Selden, The History of Tithes (1618); Hostinger, De Decimis Judaeorum (L. B. 1718); and other monographs, dealing with the cultus of the sanctuary, allude to this subject. See also, B. Q., 2, 10; 1, 2; Leib R. Nachman of Breslav, N. N. 5, 227; id., 6, 176; id., 2, 176; id., 6, 176;id., 2, 176; Spitzer, Der Legat in Hebr牢牢 (Cantuhrigie, 1727), lib. iii, c. x; ii, 720, etc.; Michaelis, Commentaries on the Laws of Moses (Eng. transl., London, 1814), art. xcvii, iii, 141, etc.; Herzfeld, Gesch. des Volkes Israel (Northhausen, 1853), i, 62 sq., 188 sq.

TITHES (Angle-Saxon, teotha, a tenth), a tenth part of the produce of the land, which, by ancient usage, and subsequently by law, is set aside for the support of the clergy and other religious uses. In the Christian dispensation the very circumstance of the existence of the clergy is supposed by many to imply a certain fixed provision for their maintenance. This obligation has been put forward in ecclesiastical legislation from the earliest period. The Apostolic Canons, the Apostolic Constitutions, St. Cyprian on the Unity of the Church, and the works of Ambrose, Chrysostom, Augustine, and the other fathers of both divisions of the Church, abound with allusions to it. In the early Christian Church the custom of consecrating to religious purposes a tenth of the income was voluntary, and it was not made obligatory until the Council of Tours in 567. The second Council of Macon, in 585, enjoined the payment of tithes under pain of excommunication; and Charlemagne, by his capitulare, formally established the practice within those portions of the ancient Roman empire to which his legislation extended. The laws of Gratian, of 434, made it a duty to pay both tithes and taxes. In England, too, the payment of tithes is very ancient; and the laws of the Conquest order the terce and the tithe to be paid in the form of a voluntary offering at Easter, or some other period of the year. The law exempted mines, quarries, wild animals, game, fish, and also tame animals kept for pleasure, and not for use or profit. England has a more arbitrary distinction in great and small—the former being tithes of grain, hay, wood, etc.; the second being the other kind of prudential, as well as...
as all personal and mixed tithes. The great tithes of a parish belonged to the rector, and the small tithes to the vicar. Tithes were originally paid in kind, as the tenth sheaf, the tenth lamb; but the inconvenience and trouble involved in this mode of payment led to the adoption of other methods. This was done either by the assessment of an annual income of land, or by the assessment of an actual produce, or by a money payment mutually agreed upon; by a partial substitution of payment of money, or as when a person contributed a smaller amount of produce, but free from the expense of harvesting, etc.; or by the payment of a bulk sum in redemption of a tithe. The amount of the yield might be, so that the land became tithe-free. By 1 Elizabeth, c. 19, and 18 Elizabeth, c. 10, such alienations of tithe-payment were restricted to a term of twenty-one years, or three lives.

Originally convents occupying lands in England paid tithes to the parochial clergy; but by a decree of Pachal II they were exempted from such payments in regard to lands held by themselves in their own occupation. This exemption was confined by subsequent legislation to the four orders, Templars, Hospitals, Cistercians, and Premonstratensians, and after the fourth Council of Lateran, A.D. 1215, only in respect of lands held by them before that year. At the Reformation many of the forfeited Church lands when sold were held free of tithes.

These partial exemptions, and the fact that the tithes were a tax for the support of the clergy of the Established Church, made it very unpopular with those who were obliged to pay, especially so to Dissenters. A measure of commutation became absolutely necessary, but, although recommended as far back as 1822, did not become law until 1838. Various statutes for England or Ireland have since been enacted regulating the payment of tithes (6 & 7 William IV, c. 71; 2 William IV and 1 Victoria, c. 69; 1 and 2 Victoria, c. 64; 2 and 3 Victoria, c. 82; and 5 and 6 Victoria, c. 54). Their object for England is to substitute a money rent-charge, varying on a scale regulated by the average price of grain for seven years for all the other forms of payment. In Ireland the settlement was effected by a commutation of tithe into a money rent-charge three fourths of the former value. The Disestablishment Act of 1869 abolished tithes and created a common fund for the support of the Protestant Episcopal Church and clergy. In France tithes were abolished at the Revolution, and this exemption is enjoyed by the Church in various countries. In the Canadian provinces of Quebec, tithes are still collected by virtue of the old French law, yet in force there. In the United States, tithes are exacted by the Mormon hierarchy. See Bingham, Christ. Antiq. b. v, ch. v, § 1 sq.

TITIAN, or TIZIANO VECCELLIO, one of the greatest of Italian painters, and the prince of colorists and portrait-painters, was born in the territory of Venice, at Capelo Cadore, in 1475. His early passion for art was carefully cultivated by his parents, who placed him under the instruction of Antonio Rossi of Cadore. At the age of 14 he was sent to Treviso, and became the pupil of Sebastiano Zucatti. He studied in the school of the Bellini, first with Gentile and afterwards with Giovanni, with whom he was fellow-pupil with Giorgione, his own future rival. On the death of Giorgione, Titian rose rapidly in favor, and was soon afterwards invited to the court of Alphonso, duke of Ferrara. In 1529 the Senate of Venice employed him to decorate the hall of the council-chamber; and in 1530 he went to Bologna and painted a portrait of Charles V, which had come to be crowned by pope Clement VII. About this time he was invited to the court of the duke of Mantua, and in 1542 was invited to Rome by pope Paul III at Ferrara, by whose interest he was invited to Rome, but was obliged to decline by reason of previous engagements with the duke of Urbino. He went to Rome in 1548, where he was received with marks of great distinction, and where he met Mi-

chael Angelo. Declining the office of the leader seal, he returned to Venice, only to receive an invitation from Charles V to visit the court of Spain, and reached Madrid in 1550. Here he became a gentleman of the emperor's bedchamber, a count palatine of the empire, received the Order of St. Jago, and had bestowed upon him an annual pension and decacs. In 1554, after a residence of ten years at Madrid, he returned to Venice, which he soon left for Innspruck. Returning again to Venice, he continued there until his death, of the plague, Aug. 27, 1576. There is no list of the works of Titian, and it would not be an easy task to make one. One of his grandest achievements is the Assumption of the Virgin. From 1520 to 1530 the most celebrated of his works were, St. Peter Martyr:—Victory of the Venetians over the Janissaries:—and St. Sebastian. Other noted paintings are, An Announcement (1557):—Descent of the Holy Ghost upon the Apostles (1541):—Sacrifice of Abraham (cod):—David and Goliah (cod):—Death of Abel (cod):—The Virgin (1543):—San Tiziano (cod). Among the religious works which he executed for Philip II of Spain are, The Last Supper:—Christ in the Garden:—St. Margareet with the Dragon:—and a Martyrdom of San Lorenzo. The Academy of Venice contains his Assumption and Presentation of the Virgin, and the palace of the Prince of Venice in the same city The Entombment of Christ. In the Escurial is a Last Supper, upon which he labored seven years; in the Uffizi Gallery, A Virgin and Child with Saints; and in the Vatican, Christ Crowned with Thorns. See Northcote, Life of Titian (Lond. 1830, 2 vols.); Creaney, Life of Titian (1872); Spooner, Biog. Dict. of the Fine Arts, &c.

Title is the rendering in the A. V. of "πους, trévin, a pillar or cippus set up as a sepulchral sign, 2 Kings xxiii, 17, or as a "waymark," Jer. xxxi, 21; "sign," Ezek. xxxix, 15; and of ἁρμα, Lat. titulus, a tablet with a superscription (John xix, 19, 20), set up by Pilate over Christ's cross (q. v.).

TITLE, in the canon law, is that by which a cleric holds his benefice. In Church records and deeds, it is a Church to which a cleric was ordained, and where he was to reside. It is also applied to a cure of souls and a ministerial charge. Augustine says that the title of the cross was written in Hebrew for Jews who gloried in God's law; in Greek, for the wise of the nations; in Latin, for Romans, the conquerors of the world. Hence churches were called titles, not only in the sense that the clergy took titles from them which fixed them to particular cures, but as dedicated to the Crucified. The appellation is first used by the Council of Braga (573). A title was also a right to serve some Church from which an ordained cleric took his title, a name derived from the titles of the martyr's tombs, at which service was originally said, and so called for the reasons given above, or the fiscal titulus which marked buildings belonging to the sovereign, and thus also churches dedicated to the King of kings. The earliest title was St. Pudentiana, now called St. Francis. The Roman cathedral had, in 42, a title or parish church attached to it by pope Pius I. The Council of Lateran (1179) enforced ordination on a distinct title.

TITLE to orders in Episcopal churches. This is best explained by quoting the 33d canon of the Established Church of England:

"It has been long since provided by many decrees of the ancient fathers that none should be admitted, either descan or priest, who had not first some certain place where he might use his function: according to which examples we see that the bishops of Rome were admitted into sacred orders except (1) he shall at that time exhibit to the bishop of whom he desirous imposition of hands, and (2) he shall have exhibited his ecclesiastical preferment then void in the college; or (5) shall bring to the said bishop a true and undoubted certificate that either (a) he has been of some minor church or convensm church, where he may attend the care of souls, or (2) of some minor collegiate church, or (3) of some minor collegiate church therein also situate, where he may execute his ministry;
or (4) that he is a fellow, or in right as a fellow: or (5) a conduct or charter, and some sort of college or Ox- ford, except he be a master of acts of five, standing that liveth of his own charge in either of the universities; or (2) except by the bishop himself that doth ordain him minister he be shortly after to be admitted either to some benefice or enfranchisement then void. And if any bishop shall have any particular ordinance by which he hath none of these titles as is aforesaid, then he shall keep and maintain him with all the charge ordinary till he have paid of or enforced the ecclesiastical living; and if the said bishop refuse so to do, he shall be suspended by the arch- bishop, being assisted with another bishop, from giving orders by the space of a year.

In the Protestant Episcopal Church of the United States, canon 19 of 1829, "of the titles of those who are to be ordained priests," declares:

"No person shall be ordained priest unless he shall produce to the bishop a satisfactory certificate from some church, parish, or congregation that he is engaged with them, and that they will receive him as their minister; or unless he be examined and approved by some missionary society recognised by the General Convention; or unless he be engaged as a professor in the seminary of some college, academy, college, or other seminary of learning duly incorporated" (Dejugal of the Canons, p. 30).

See Eden, Thol. Dict. s. v.; Hook, Church Dict. s. v.

TITLIT (diminutive of titl, an old English word signifying the mere trifle (see Plumptre, Bible Educator, iv, 21), is used in the A. V. (Matt. v, 18; Luke xvi, 17) as a rendering for espasia, a little horn, hence a point (e.g. of a sailyard. Lucan, Narciss. 4; Polyb. xiv, 10, 11; of an island, Philostr. bip. Soph. i, 21, 2); in the New Testament a title of a Hebrew legal document as distinguished from, and, i.e. the slightest distinction (see Philo, in Macc. p. 984 b). See Jor.

Tittmann, Johann August Heinrich, a German divine, was born at Langensalza, Aug. 1, 1778. He studied at Wittenberg and Leipzig, and in 1796 became one of the theological professors in the latter of these universities. He died Dec. 30, 1831. His writings are numerous, and belong to various departments of sacred science. The following only need to be specified here: Theolog. Enzyklop. (1798);--De Synonymia N. T. (1829), the second part of which was edited after his death by Becher (1832); the whole, with some appended dissertations, translated into English by Craig (Edinb. Bibl. Cabinet [1833-37, 2 vols.]); and his edition of the Greek Testament (1831) with an appendix on the occultism of the critics. (1820-24). His polemical writings, in which he labors to reconcile theology with philosophy, and to defend evangelical truth against rationalism, are the most valuable productions of his pen.

Tittmann, Karl Christian, father of the preceding, was born at Gossbachau, near Grimma, Aug. 20, 1744. He was appointed deacon at Langensalza in 1770, professor of theology and provost at Wittenberg in 1775, and general superintendent there in 1784. In 1789 he was made Kirchenrat and superintendent at Dresden, and died there, Dec. 6, 1820. He was a man of cultured and elegant rather than powerful mind, and was deeply imbued with pious feeling and evangelical character. These characteristics are apparent in his Meletena Sacra sine Comment, Exercitio-critical in Evang. Joannis (Lips. 1816), a work full of good thoughts, good sense, and genuine piety, but deficient in critical acumen and exegetical ability. It has been translated into English by 2 vols. of the Edinburgh Bibl. Cabinet. In his Opuscula Theologica (1803) are some dissertations of an exegetical character. Perhaps his best work is his Tractatus de Evangelistic Gnostico in N. T. frustra Qussinia (Lips. 1778).

TITULAR BISHOPS are bishops with no stated charge, but who are bishops in portibus infidelium. The custom arose in the 12th and 13th centuries in the assigning of bishops to those parts which, though once Christianized, had at length fallen under Saracen dominion. The Church of Rome adopts the same custom, and has bishops of Tarsus, Ephesus, Aleppo, etc. This Church has 229 titulars. The primitive Church had no one about to be ordained at large, but should have a specific charge. "This rule concerned bishops as well as the inferior clergy: for the summation of the former ages, as the Panormita calls titular and upstart bishops, were rarely known in the primitive Church."

Titulus, the Latin name given to early churches, as if in contradistinction to the martyria, or those erected over the graves of martyrs. See Martyr. Messa. In the Middle Ages were usually reserved for the care of presbyters, who took their titles from them. Why they were called tituli is not exactly agreed among learned men. Baroniuses says that it is because they had the sign of the cross upon them, by which sign or title they were known to belong to Christ. See TRULL.

Ty'tus (Grecized T i o ρ o , a common Latin name, e.g. of the celebrated Roman emperor, whose triumphal arch [q. v.] still stands in Rome; once in the Apocrypha [2 Macc. xi, 84] of a Roman ambassador to the Jews [see Mal'ius], a noted Christian teacher, and fellow-laborer of Paul. He was of Greek origin (possibly a native of Antioch), but was converted by the apostle, who therefore made him his own son in the faith (Gal. ii, 3; Tit. i, 4). This is all that we know of his early history. The following is an account of his later movements and of the epistle to him. King (Who was St. Titus? [Dublin, 1858, 8vo]) tries to identify him with Timothy.

1. Sources of Information.---Our materials for the biography of this companion of Paul must be drawn entirely from the notices of him in the Second Epistle to the Corinthians, the Galatians, and to Titus himself, combined with the Second Epistle to Timothy. He is not mentioned in the Acts at all. The reading Tiıpov (Acts xviii, 7) is too precarious for any inference to be drawn from it. Wieseler thinks it is a slight stress upon it (Chromat, des apot. Zeital. [Got. 1848], p. 204), but this is in connection with a theory which needs every help. As to a recent hypothesis that Titus and Timothy were the same person (King, Who was St. Titus? [Dublin, 1858]), it is certainly ingenious, but quite untenable (see 2 Tim. iv. 10). The same may be said of the suggestion of Mürck (Meining, 1861), that Titus of the epistles is the same person with Silvanus, or Silas, of the Acts, although there is nothing that absolutely forbids such an identification.

2. His Known Journeys.---Taking the passages in the epistles in their natural order of the events referred to, we turn first to Gal. ii, 1, 3. We conceive the journey mentioned here to be identical with that (recorded in Acts xv) in which Paul and Barnabas went from Antioch to Jerusalem to the conference which was to decide the question of the necessity of circumcision to the Gentiles (A.D. 47). Here we see Titus in close association with Paul and Barnabas at Antioch. He goes with them to Jerusalem. He is, in fact, one of the rei 2Δωξος of Acts xv, 2, who were deputed to accompany them from Antioch. His circumcision was either not insisted on at Jerusalem, or, if demanded, was firmly resisted (1 Tim. i, 5). He is very emphatically spoken of as a Gentile (Ἐξαρπαζομαι), by which is most probably meant that both his parents were Gentiles. Here is a double contrast from Timothy, who was circumcision by Paul's own directions, and one of whose parents was Jewish (xvi, 1, 9; 2 Tim. i, 5; iii, 15). Timothy was sent on this occasion to have been specially a representative of the church of the uncircumcision.

It is to our purpose to remark that, in the passage cited above, Titus is so mentioned as apparently to imply that he had become personally known to the Gal- tinians and the Corinthians; and in the case, again, of two other circumstances, viz. that the Epistle to the Gal- tinians and the Second Epistle to the Corinthians were
probably written within a few months of each other [see Galatians, Epistle to], and both during the same year. There has been much discussion about when and how we obtain fuller notices of Titus in connection with Paul.

After leaving Galatia (Acts xviii, 23), and spending a long time at Ephesus (xix, 1-xx, 1), the apostle proceeded with his missionary work. Here he was expected to meet Titus (2 Cor. ii, 13), who had been sent on a mission to Corinth. In this hope he was disappointed [see Titus], but in Macedonia Titus joined him (vii, 6, 7, 13-15). Here we begin to see not only the above-mentioned fact of the mission of this disciple to Corinth, but also the personal affection which subsisted between Paul and Titus (compare 2 Cor., vii, 5-9, ver. 7), but also some part of the purport of the mission itself. It had reference to the immorality at Corinth rebuked in the first epistle, and to the effect of that first epistle on the offending Church. We learn, further, that the mission was so far successful and satisfactory: οὐκ ἔμειναν τῶν ἰμάτων ἵππαστόν (ver. 7), λυτρίζεται ἡ μεθάναν (ver. 9), τὴν πυκνόν ἰμάτων ὑπακοήν (ver. 15); and we are enabled also to draw from the chapter a strong conclusion regarding the warm zeal and sympathy of Titus, his grief for what was done, and his desire to visit the Corinthians in person (ver. 13). These final words are finally converted through Paul's instrumentality; this must be the meaning of the phrase γνώσεις τικόνων, which occurs so emphatically in the opening of the epistle (ver. 4). Next we learn the various particulars of the responsible duties which he had to discharge in Crete. He is to complete what Paul had been obliged to leave unfinished (ἰδίᾳ τὰ λειτουργία ἑαυτοῦ, ver. 5), and he is to organize the Church throughout the island by appointing presbyters in every city. See Gortyna; Lasca. Instructions are given as to the suitable character of such presbyters (ver. 6-9); and we learn, further, that we have here the repetition of instructions previously furnished by word of mouth (ὡς ἔγω σει συστάξαμεν, ver. 5). Next he is to control and bridle (ἱστορίμεθα, ver. 11) the restless and mischiefvous Judeans, and he is to be peremptory in so doing (ἐλθέ τινας ἀποστόλως, ver. 13). Injunctions in the same spirit are reiterated (ver. 13). He is to urge the duties of a decorous and Christian life upon the women (ii, 3-5), some of whom (προμακάριστως, ver. 3), possibly, had something of an official character (καὶ δαδακενεκε, ἵνα συνιερατίσηται τὰς γυν.: ver. 5, 4). He is to be watchful over his own conduct (ver. 7); he is to impress upon his disciples the necessity of their position (ver. 9, 10); he is to check all social and political turbulence (iii, 1), and also all wild theological speculations (ver. 9); and to exercise discipline on the heretical (ver. 10). When we consider all these particulars of his duties, we see not only the confidence reposed in him by the apostle, but the need there was of determination and strength of purpose, and therefore the probability that this was his character; and all this is enhanced if we bear in mind his isolated and unsupported position in Crete, and the lawless and immoral character of the Cretans themselves, as testified by their own writers (i.e. See Chrysostom). The notices which remain are more strictly personal. Titus is to look for the arrival of Crete at Artemas and Tychicus (iii, 12), and then he is to hasten (στοιχέωαν) to join Paul at Nicopolis, where the apostle is proposing to pass the winter (ibid.). Zenas and Apelles are in Crete, or expected there; for Titus is to send them on their journey, and supply them with whatever they need for it (ver. 13). It is observable that Titus and Apelles are brought into juxtaposition here, as they were before in the discussion of the mission from Ephesus to Corinth.

The movements of Paul, with which these later instructions to Titus are connected, are considered elsewhere. See Paul; Timothy. We need only observe here that there would be great difficulty in inserting
the visits to Crete and Nicopolis in any of the journeys recorded in the Acts, to say nothing of the other objections to giving the epistle any date anterior to the voyage to Rome. See Titus, Epistle to. On the other hand, there is no difficulty in arranging these circumstances, if we suppose Paul to have travelled and written after being liberated from Rome, while thus going on an errand of some importance. Light in the eye of many, as Paley has well called the affinity of this epistle and the first to Timothy. Whether Titus did join the apostle at Nicopolis we cannot tell. But we naturally connect the mention of this place with what Paul wrote at no great interval of time afterwards, in the last of the Pastoral Epistles, 2 Tim. iii. 10; yet Dalmatia lay to the north of Nicopolis, at no great distance from it. See Nicopolis. From the form of the whole sentence, it seems probable that this disciple had been with Paul in Rome during his final imprisonment: but this cannot be asserted confidently. The touching words of the apostle in this passage might seem to imply some reproach, and we might draw from the conclusion that Titus became a second Demas: but, on the whole, this seems a harsh and unnecessary judgment.

3. Traditio Close of his Career.—Whatever else remains is legendary, though it may contain elements of truth. Some are connected with the island of Dalmatia, and he is said to have been an object of much reverence in that region. This, however, may simply be a result of the passage quoted immediately above: and it is observable that of all the churches in modern Dalmatia (Neales, Ecclesiastical Notes on Dalm., p. 175) not one is dedicated to him. The traditional connexion of Titus with Crete is much more specific and constant, though here again we cannot be certain of the facts. He is said to have been permanent bishop in the island, and to have died there at an advanced age (Euseb., Hist. Eccles. iii. 4, 2; Theodoret, Ad i Tim. ii. 7; Jerome, in Rom., V. Vit. Sanct. 87). The modern capital, Candia, appears to claim the honor of being his burial-place (Cave, Apostolici, 1716, p. 42). In the fragment De Vita et Actis Titi, by the lawyer Zenas (Fabricius, Cod. Apoc. N. T. ii. 891, 882), Titus is called bishop of Gortyn; and on the old site of Gortyn is a ruined church, of ancient and solid masonry, which bears the name of St. Titus, and where service is occasionally celebrated by priests from the neighboring hamlet of Metropolis (Falkener, Remains in Crete, from a MS. History of Candia, by Osorio Bells, p. 28). The cathedral of Megalos-Church of the island is dedicated to this saint. Lastly, the name of Titus was the watchword of the Cretans when they were invaded by the Venetians; and the Venetians themselves, after their conquest of the island, adopted him to some of the honors of a patron saint; for as the response after the prayer for the Doge of Venice was "Sancte Marce, tu nos adjuta," so the response after that for the duke of Candia was "Sancte Tito, tu nos adjura" (Pashley, Travels in Crete, i. 6, 175). The day on which Titus is commemorated is Jan. 4 in the Latin calendar, and Aug. 25 in the Greek.

But there must not be unnoticed the striking though extravagant panegyric of Titus by his successor in the see of Crete, Andreas Cretensis (published, with Amphilochius and Methodius, by Combefis, Paris, 1644). This panegyric has many excellent points, e.g. it incorporates the very important passages from the Second Epistle to the Corinthians. The following are stated as facts. Titus is related to the promont of the island: among his ancestors are Minos and Rhadamantus (oi Ις Δικαίων). Early in life he obtains a copy of the Jewish Scriptures, and learns Hebrew in a short time. He goes to Judea, and is present at the occasion when the sacred ark takes place before that of Paul himself, but afterwards he attaches himself closely to the apostle. Whatever the value of these statements may be, the following description of Titus (p. 156) is worthy of quotation: ο τριήμερον τούς Κριτος ιεραδομές σύμμηκτος του θηρίου το το πίστωσε ειρήμα· των ενεγκλιμάτων ενεργητήν ο ανέγρησε σάλπηρε το ψυφιλι του Παιλον γλώσσα απόκρυπτα. See Walch, De Titu Viro Apostol. (Jen., 1741); also in his Miscellan. Sacra (Amst., 1744), p. 708 sqq. See also Grotius, Constantes honorum, 28. Titus, Epistle to. This is the third of the so-called Pastoral Epistles of Paul, following immediately after those to Timothy.

I. Authenticity.—In this respect there are no specialities in this epistle which require any very elaborate treatment. On the contrary, the tone is so much in that of the other Pastoral Epistles that we have no right to doubt that Paul wrote this letter to Titus. But Origen mentions some who excluded 2 Tim, but kept 1 Tim. with Titus. Schleiermacher and Neander invert this process of doubt in regard to the letters addressed to Timothy, but believe that Paul wrote the present letter to Titus. Creder, too, believes it to be genuine, though he pronounces 1 Tim. to be a forgery, and 2 Tim a compound of two epistles.

To turn now from opinions to direct external evidence, this epistle stands on quite as firm a ground as the others of the pastoral group, if not a firmer ground. We have no specialities in regard to its date and references in Ireneus, C. Hares, i. 16, 3 (see Tit. iii. 10); Clem. Alex. Strom. i. 350 (comp. Tit. i. 12), and iii. 5, 4; by Tertull. De Praecl. Har. c. 6 (comp. Tit. iii. 10, 11), and Adv. Marc. v. 21; and by Origen, in many places (Lardner, Works, vol. ii. 8vo); to say nothing of earlier allusions in Clement's TractATUS (see the Tract. 47 (see Tit. iii. 4), which can hardly be doubted; Theoph. Ad Autol. ii. 95 (see Tit. iii. 5); iii. 126 (see ver. 1), which are probable; and Clem. Rom. 2 Cor. i (see ibid.), which is possible.

As to the internal features, we may notice, in the first place, that the Epistle to Titus has all the characteristic features of the other Pastoral Epistles. See, for instance, παρευρέσθαι ή λόγος (i. 9, 8), ἄγαν πλούς ἀδιάδικα (i. 9, i, 1; comp. i. 13; ii. 8, σωφρονισταί, σωφρονίσμα, σωφρόνων (i. 8, ii. 5, 6, 12), σωφρόνησις, σωφρίς, σωφρίς, (i. 3, 4, ii. 10, 11, 19; iii. 4, 5, 7), ἢπαταική μίσχοι (i. 19; comp. iii. 9), ἡπιστασία (i. 10), ὠδανία (i. 1, 4), ἀλογος (ii. 5; in i. 4 the word is doubtful). All this tends to show that this letter was written about the same time and under similar circumstances with the other two. But on the other hand, this epistle has marks in its phraseology and style which it has no right to claim to the general body of the Epistles of Paul. Such may fairly be accounted for by the following: εἰπεργάσθη λο γίπτους τίνα μία (i. 3); the quotation from a heathen poet (ver. 12); the use of ἀδόκιμος (ver. 16); the "going off at a word" (σωφρίς . . . ἐπιθυμία γάρ . . . σωφριστὰς . . . ii. 10, 11); and the modes in which it differs from that of the apostolic (ver. 18) and of other judicious (iii. 5-7) come to the surface. As to any difficulty arising from supposed indications of advanced hierarchical arrangements, it is to be observed that in this epistle ψευδόμενος and ἐπισκόπος are used as synonymous (i.e. κατασκοπήσεις πρεσβύτηρος . . . ἐτά γάρ των ἐπισκόπων. . . i. 6, 7, just as they are in Gal. iii. 7. On the use of the address, see the address in Acts i. 11 (see Acts 17, 28). At the same time, this epistle has features of its own, especially a certain tone of abruptness and severity, which probably arises partly out of the circum-
stances of the Cretan population [see Crete], partly out of the character of Titus himself. If all these things are put together, the phenomena are seen to be very unlike those which would be expected, to say nothing of the general overwhelming difficulty of imaginings who could have been the writer of the Pastoral Epistles, if it were not Paul himself.

To the objections of the German critics, founded upon the difficulty of ascertaining the proper date of this epistle, the best reply will be furnished by ascertaining, if possible, when and where the epistle was written (see below); but even should we fail in this, it would be strange were we to relinquish our conviction of the authenticity of an ancient writing simply because possessing very imperfect information as to many parts of the alleged author's history, the date of which is uncertain when he was in circumstances to compose it.

II. Date. The only circumstances stated in the epistle itself calculated to aid us in determining this question are, that at the time it was written Paul had recently visited Crete (i, 5); that he was about to spend the winter in Nicopolis (iii, 12); and that Apollo was about to visit Crete, on his way to some other place (ver. 13). There are three hypotheses that have been formed in order to meet these facts, especially the first, namely Paul's visit to Crete.

1. We learn from the Acts of the Apostles that Paul visited Crete (Acts xvii, 14; xvi, 21) and that he went to Rome (vi, 2), but the shortness of his visit at that time, the circumstances under which it was made, and the improbability of his expecting to spend the ensuing winter at Nicopolis, place it out of the question to suppose that it was to this visit he refers in this epistle. As this is, however, the only visit recorded by Luke, in rejecting it we are forced to suppose another visit, and to find some period in the apostle's life when it was probable that such a visit was paid.

2. It has been thought by Hug that the period referred to in Acts xviii, 18, 19 admits of our placing this visit to Crete within the time of Paul, at that time, was on his journey from Corinth to Palestine, but on some account or other landed at Ephesus. This leads to the suggestion that the apostle must either voluntarily have departed from the usual course in order to visit some place lying between Corinth and Ephesus; or that he must have been on some official errand. The course he was to be meant to pursue. In either case the probability of his visiting Crete at that time is strong. We find, from the above statement made by Paul in this epistle, that Apollo, if at this time on his way from Ephesus to Corinth (Acts xviii, 24, 27; xix, 1), was to touch at Crete on his way to Rome; and it has been assumed, renders it not improbable that it was customary for ships sailing between these two ports to call at Crete by the way; and Paul may have availed himself of this practice in order to visit Crete before going to Palestine. Or he may have sailed in a ship bound directly from Corinth to Palestine, and have been driven out of his course, shipwrecked on Crete, and obliged to sail thence to Ephesus as his only remaining method of getting to his original destination—a supposition which will not appear very improbable when we remember that Paul must have suffered several shipwrecks of which Luke gives no account (2 Cor. xi, 25, 26); and that his getting to Ephesus on his way from Corinth to Palestine is a fact for which, in some way or other, we are bound to account. (Paul evidently, however, took that route as the only one of general travel, there being no vessel sailing direct from Corinth to Cesarea or Antioch.) It was while staying at Ephesus that Hug supposes Paul to have written this epistle.

As confirmatory of this theory, we may adduce the two other facts above referred to as mentioned in the epistle itself, viz. the visit of Apollo to Crete, and Paul's intention to winter at Nicopolis. From Acts xix, 1 we learn that the long exile which Paul had undergone in Ephesus (iv, 22) was over, whence he had gone from Ephesus, Paul was en- gaged in a tour through the upper coasts (viz. Phrygia and Galatia; comp. Acts xviii, 23), which ended in his return to Ephesus. This tour was commenced after the Apostle had visited Crete and Ephesus (Acts ii, 19, 24). It appears, therefore, that Paul left Antioch much about the same time that Apollo reached Corinth. But Apollo went to Corinth from Ephesus, Paul went to Jerusalem from Ephesus. At this city, therefore, they may have met; and before leaving it Paul perhaps wrote this epistle, and gave it to Apollo to deliver to Titus at Crete, on his way to Corinth.

Further, Paul went up to Jerusalem to keep the feast; after which he visited Antioch, and then travelled for some considerable time in Upper Asia. He, therefore, is supposed to have spent the winter somewhere in Asia Minor. (Comp. Acts xix, 21.) It is said that on his return passage through that region. Now there was a town named Nicopolis, between Antioch and Tarsus, near to which, if not through which, Paul must pass on his way from Antioch to Galatia (Strabo, xiv, 465, ed. Casaubon, fol. 1087). May not this have been the very place referred to in Tit. iii, 12? In such a locality it was quite natural for Paul to desire to spend the winter; and as Titus was a native of Asia, it would be well known to him, especially if he knew what route the apostle designed to pursue. All this, it is held, supports the hypothesis that Paul wrote this epistle before leaving Ephesus.

Another circumstance alleged in favor of this hypothesis is the close resemblance in sentiment and phraseology between this epistle and the first Epistle to Timothy. This resemblance is so close, and in some particulars so peculiar, that we are naturally led to conclude that both must have been written while the same leading ideas and forms of expression were occupying the apostle's mind. Now the first Epistle to Timothy is held by the maintainers of this theory to have been written after Paul had left Ephesus the second time to go into Macedonia, that is, about two years and a half after the period when Hug supposes the Epistle to Titus to have been written. To some this may appear too long a time to justify any stress being laid upon the similarity of the two epistles in this question of their respective dates; but when it is remembered that during the interval Paul had been dealing at Ephesus with very much the same class of occasions as those of which both parts of both epistles refer, and that both are addressed to persons holding the same peculiar office, the force of this objection will be weakened.

Against this date, on the contrary, may justly be adduced the many precarious, and (as above seen) some positively impossible, circumstances which render it not improbable that Paul, while on his way from Corinth to Palestine, which he was in haste to reach by a given day (Acts xviii, 18, 20, 21), could have found time to stop at Crete, found numerous churches there (Tit. i, 5), and leave Paulus in their charge. Nor have we any evidence that on the voyage in question Paul was accompanied by Titus; nor yet that the individuals mentioned in iii, 12, 13, were at that time so located with reference to Paul and Titus. For these and other reasons, this hypothesis must be discarded as too problematical throughout.

3. As to the time and place and other circumstances of the writing of this epistle, the following scheme of filling up Paul's movements after his first imprisonment will satisfy all the conditions of the case: We may suppose him (possibly after accomplishing his long-projected journey to Greece he visited Ephesus) to have gone there from thence, first to Macedonia and then to Crete; during the former to have written the First Epistle to Timothy, and after returning from the latter to have written the Epistle to Titus, being at the time of despatching it on the point of starting for Nicopolis, to which place Paul says he was going at 'Stil. viii, 12.'
been finally apprehended and taken to Rome, whence he wrote the Second Epistle to Timothy. Other possible combinations may be seen in Birks (Iloves Apocoloer, at p. 291, note 301), and in Wordsworth (Greek Testament, iii, 418, 421). It is an unhoped mistake to endeavor to insert this epistle in any period of that part of Paul's life which is recorded in the Acts of the Apostles. There is in this writing that unmistakable difference of style (as compared with the earlier epistles) which associates the Pastoral Letters with one another, and with the latest period of Paul's life; and it seems strange that this should have been so slightly observed by good scholars and exact chroniclers, e. g. Archd. Evans (Script. Huy. iii. 327-383) and Wieseler (Chronol. des apost. Zeitl., p. 4), who, approaching the subject very differently, agree in holding the foregoing theory (No. 2) that this letter was written at Ephesus (between 1 and 2 Cor.), when the apostle was in the early part of his third missionary journey (Acts xix.). See Paul; Titus.

III. Design and Contents.—The task which Paul had committed to Titus, when he left him in Crete, was one of no small difficulty. The character of the people was unstable, insincere, and quarrelsome; they were given to greediness, licentiousness, falsehood, and drunkenness, in no ordinary degree, and the Jews who had settled among them appear to have even gone beyond the natures in these respects. Paul at this time was anything but a religious officer which Titus had to sustain when commissioned to carry forward the work which Paul had begun, and to set in order the affairs of the churches which had arisen there, especially as heretical teachers had already crept in among them. Hence Paul addressed to him this epistle; the main design of which is to direct him how to discharge with success the duties to which he had been appointed. For this reason the apostle dilates upon the personal qualifications of Church officers and members, and their functions, with such local allusions as rendered these directions especially pertinent. After the introductory salutation, which has marked peculiarities (1, 1-4), Titus is enjoined to appoint suitable presbyters in the Cretan Church, and specially such as shall be sound in doctrine and able to refute error (ver. 5-9). The apostle then passes to a description of the coarse character of the Cretans, as testified by their own writers, and the misuse and abuse of Judaism by the Jews among the Christians of the island (ver. 10-16). In opposition to this, Titus is to urge sound and practical Christianity on all classes (ii, 1-9), on the older men (ver. 2), on the older women, and especially in regard to their influence over the younger women (ver. 5-9), on the younger men (ver. 6, 8), and on the younger slaves (ver. 5-9), while that he himself is a pattern of good works (ver. 7).

The grounds of all this are given in the free grace which trains the Christian to self-denying and active piety (ver. 11, 12), in the glorious hope of Christ's second advent (ver. 13), and in the atonement by which he has purchased us to be his people (ver. 14). All these lessons Titus is to urge with fearless decision (ver. 15). Next, obedience to rulers is enjoined, with gentleness and forbearance towards all men (iii, 1, 2), these duties being again rest upon our sense of past sin (ver. 3), and on the gift of new spiritual life and free justification (ver. 4-7). With these practical duties are contrasted, those idle speculations which are to be carefully avoided (ver. 8, 9); and with regard to those men who are positively heretical, a peremptory charge is given (ver. 10, 11). Some personal allusions then follow: Artemas of Tychicus may be expected at Crete, and on the arrival of whom they Titus is to make haste and settle the apostle at Nicopolis, where he intends to winter: Zenus the lawyer, also, and Apollon, are to be provided with all that is necessary for a journey in prospect (ver. 12, 13). Finally, before the concluding message of salutation, an admonition is given to the Cretan Christians, that they may be held to the duties of practical useful piety (ver. 14, 15).

IV. Commentaries.—The following are the special exegetical helps on the whole of this epistle exclusively: Mégander, Expositio (includ. Tim.) (Basil. 1506, 8vo); Willich, Expositio (Lips. 1549, 8vo); Hoffmann, Commentarius (Frac. 1541, 8vo); Comenius, Commentarius Nota (Norib. 1546, 8vo); Ailesius, Explicatio (Lips. 1550, 8vo); Esquenius (Rom. Cath.), Commentarius (Par. 1568, 8vo); Humullus, Expositio (Marp. 1587, 1604; Vitembl. 1610, 8vo); Rhodomann, Commentarius (Jen. 1587, 8vo); Maglian (R.C.), Commentarius (Frac. 1588, 8vo); Commentarius (includ. Tim.) (Par. 1610, 8vo); Taylor, Commentarius (Camb. 1619, 4to; 1658, 8vo); Scultetus, Observationes (includ. Tim. and Phil.) (Frac. 1624; Vitembl. 1630, 4to; Goupil (R. C.), Paraphrasis (Par. 1644, 8vo); Daille, Sermones (Fr.) (ibid. 1655, 8vo); Hobert (R.C.), Expositio (includ. Tim. and Phil.) (ibid. 1656, 8vo); Wallis, Expositio (Oxon. 1657, 8vo); Fecht, Expositio (Rost. 1692, 1700, 4to); Rappolt, Observationes, (in his Opp. i, 781); Breithaupt, Exercitatio (Hall. 1708, 4to); Outhoff, Verklaerung (Amst. 1704, 4to); Zentgraf, Commentarius (Arg. 1706, 4to); Gebhardt, Paraphrasis (Gryph. 1714, 4to); Kochmei, Verklaerung (Utr. 1724, 4to); Vitringa, Verklaerung (Franck. 1728, 4to); Rampach, Erklarung (includ. Gal.) (Gies. 1739, 4to); Van Haven, Commentatio (Hall. 1742, 4to); Hurter, Commentarius (Schafl. 1744, 4to); Mosheim, Erklärung (ed. Von Einen, Stend. 1793, 4to); Kimol, Explicatio (Lips. 1798, 4to); Van den Ess, Commentatio (L. B. 1825, 8vo); Paterson, Commentaria (includ. Tim.) (Lond. 1848, 1850); Graham, Commentarius (ibid. 1850, 12mo). See also Epistle.

Titus, bishop of Bostora, in Arabia, was driven from his see, under Julian, A.D. 362; returned under Valentinian; and died about A.D. 371. He wrote Contra Manichceos Lib. III, which is extant in a Latin translation in Biblioth. Patr. tom. iv. A Discourse On the Necessity of Public Prayer, and a Commentary on Luke, in Latin, have been published under his name, but are questioned.—Mosheim, Eccles. Hist. i, 248. See Herzog, Real-Encycl. s. v.

Titus, Flavius Sabinus Vespasianus, emperor of Rome, was the eldest son of Vespasian and Flavia Domitilla, and was born at Rome, Dec. 30, A.D. 40. He was educated at the court of Nero with Britanicus, and hence acquired some false moral principles which afterwards led him into many excesses. He was in charge of a legion of the Roman forces in the last war of the Jews, and on his father's elevation to the imperial throne, he prosecuted the war to a successful close, sharing the honors of a triumph jointly with Vespasian. On his own elevation to the throne, he reformed his habits, and became celebrated for his virtues and popularity. He died Sept. 13, A.D. 81, in the third year of his reign. His career is given by the ancient historians Suetonius and Tacitus, and his connection with the Jews by Josephus. Monographs on him have been written in Latin by Jung (1761), and in French by Rol-land (1830).

Coin of Titus commemorating the Capture of Judea.
To'ah (Heb. To'ach, תֹּאך, locally; Sept. Thoou v. r. Ooovii and Θοῦοι; Vulg. Thoah), son of Zuph and father of Elieel in the genealogy of Heman the Levitical musician (1 Chron. vi. 34 [Heb. 19]); elsewhere called by the similar name Tobi (1 Sam. i. 1), or the different one (1 Chron. vi. 26) Nahath (q. v.). See Samuel.

Tob (Heb. Tob, תּוב, good, as everywhere; Sept. Teb; Vulg. Tob), the name of a region or district (גִּלְעַד; Sept. γῆ; Vulg. terræ; A.V. "land") into which Jephthah withdrew when expelled from home by his half-brethren (Judg. xi. 3), and where he remained, at the head of a band of freebooters, till he was brought back by the sheiks (גִּלְעַד) of Gilead (ver. 5). The narrative implies that the land of Tob was not far distant from Gilead; at the same time, from the nature of the case, it must have lain out towards the eastern deserts. It is undoubtedly mentioned again in 2 Sam. x. 6, 8 as one of the petty Ammonite kingdoms or states which supported the Ammonites in their great conflict with David; but in that passage the A.V. presents the name littoriam as Ish bor (q. v.), i.e. man of Tob, meaning, according to a common Hebrew idiom, the "men of Tob." After an immense interval it appears again (Tobios or Tobias) in the Maccaean history (1 Macc. xx. 13), and was then the abode of a considerable colony of Jews, numbering at least a thousand males. See Tobiah. In 2 Macc. xii. 17 its position under the name Tobshir (q. v.) is defined very exactly as at or near Charax; 750 stadia from the strong town Caspia, though, as the position of neither of these places is known, we are not thereby assisted in the recovery of Tob. The Targum and Aramaic render it simply "good land," while Kimchi and Ben-Gerson look upon Tob as the name of the lord or owner of the land. Eusebius and Jerome make it a country, but say nothing of its situation (Onomast. s. v.). Ptolomy (Geogr. v. 19) mentions a place called Tagatha as lying to the south-west of Zobah, and therefore possibly to the east or north-east of the country of Ammon proper. In Steph. of Byzantium and in Echeko (Doctr. Nuum. iii, 352) the names Tobai and Tobeni occur. The name Tell Dobbe (Burehhardi, Syria, April 26), or, as it is given by the latest explorer of those regions, Tell Dibbe (Wetstein, Map), attached to a ruined site at the south end of the Leja, a few miles north-west of Kenavat, and also that of Ed-dob, some twelve hours east of the mountain El-Kuleib, are both suggestive of Tob. According to Schwarz (Pudser, p. 200) the Talmud identifies it with a Gentile town called Sanaa or Chephon, somewhere on the south-east shore of the lake of Tiberias; perhaps the Hippus (q. v.) so often mentioned by Josephus.

Tob-adoni'jah (Heb. Tob Adonijah, תּובאדוֹניָה, good in Adonijah; Sept. Toiaiothianim v. r. Toiaiothianim; Vulg. Thobedonius), last named of the nine Levites sent by Jehoshaphat through the cities of Judah to teach the law to the people (2 Chron. xvii. 8). B.C. 910.

Tobey, ZALMON, a Baptist minister, was born in Norfolk, Conn., July 27, 1791. His parents were Congregationalists. He pursued his collegiate studies for a time at Williams College, and then became a member of Brown University, where he graduated in the class of 1817. In the fall of this year, he was ordained to the work of the ministry in Canaan, Conn., and in the following spring became pastor of the Baptist Church at Fruit Hill, Providence, R. I., where he remained five years (1818-23). He became pastor of the Fourth Baptist Church, Providence, Sept. 2, 1823, where he continued for about ten years (1823-33). During this period he fraternized chiefly with the Freewill Baptists, the Church of which he was pastor largely sympathizing with him. After being disconnected with the regular Baptists for several years, he returned to that body. His subsequent pastorates were in Bristol, R. I., for three years; Colebrook, Conn., for five years; and Pawtucket, R. I., for seven years. In the spring of 1851 he removed to Warren, R. I. He preached as occasion offered in and around Warren for several years. He died in Norfolk, Conn., where he was visiting his relatives, Sept. 17, 1868. See Rev. Dr. H. Jackson, Funeral Sermon. (J. C. S.)

Tobi'ah (Heb. Tohibah, תּובָה [since Tob 2 Kgs. ii. 19], goodness of Jehorah; Sept. Toiaia v. r. Toiaia; Vulg. Tobis, Tobis), the name of two men. See also Tobiah; Tobilah.

1. A person whose "children" were a family that returned with Zerubbabel, but were unable to prove their connection with Israel (Ezra ii. 60; Neh. vii. 62). B.C. ante 536.
TOBIAH

2. A base-born ally of the Samaritans who played a conspicuous part in the rancorous opposition made by Sanballat the Moabite and his adherents to the rebuilding of Jerusalem under Nehemiah, B.C. 446. With an affection of scorn, after the manner of Remus in the Roman legend, they looked on the constructions of the new hopeful and growing Jewish community with derision and contemptuous anger. They said, “Even if a fox go up, he will break down their stone wall” (Neh. iv, 8). The two races of Moab and Ammon found in these men fit representatives of that hereditary hatred to the Israelites which began before the entrance into Canaan and was not extinguished when the Hebrews had ceased to exist as a nation. The horrible story of the origin of the Moabites and Ammonites, as it was told by the Hebrews, is an index of the feeling of repulsion which must have existed between these hostile families of men. In the dignified rebuke of Nehemiah it received its highest expression: “Ye have no portion, nor right, nor memorial in Jerusalem” (Neh. ii, 20). But Tobiah, though a slave (ver. 10, 19), unless this be a title of opprobrium, and an Ammonite, found means to ally himself with a priestly family, and his son Johanan married the daughter of Meshullam the son of Berechiah (ver. 18). He himself was the son-in-law of Shechaniah the son of Arach (ver. 17), and these family relations created for him a strong faction among the Jews, and may have had something to do with the stern measures which Ezra found it necessary to take to repress the intermarriages with foreigners. Ezra, however, roundly condemned the high-prist of the house of Eliashib who had married a daughter of Sanballat (xiii, 28). In xiii, 4 Eliashib is said to have been allied to Tobiah, which would imply a relationship of some kind between Tobiah and Sanballat, though its nature is not mentioned. The evil had spread so far that the leaders of the people were compelled to retrace their religious antipathies by reading from the law of Moses the strong prohibition that the Ammonite and the Moabite should not come into the congregation of God forever (ver. 1). Ewald (Gesch. iv, 173) conjectures that Tobiah had been a page ("slave") at the Persian court, and, being in favor there, had been promoted to satrap of the Ammonites. But it almost seems that against Tobiah there was a stronger feeling of animosity than against Sanballat, and that this animosity found expression in the epithet “the slave,” which is attached to his name. It was Tobiah who gave venom to the pitting scorn of Sanballat (Neh. iv, 2). He was accused by the high-priest of Nehemiah (ver. 5); it was Tobiah who kept up communications with the facts Jews, and who sent letters to put their leader in fear (ver. 17, 19); but his crowning act of insult was to take up his residence in the Temple in the chamber which Eliashib had prepared for him in defiance of the Mosaic statute. Nehemiah’s patience could no longer contain itself, “therefore,” he says, “I cast forth all the household stuff of Tobiah out of the chamber,” and with this summary act Tobiah disappears from history (xiii, 7, 8). See NEHEMIAH.

TOBIAH, BEN-ELIZEKHER, a Jewish writer, who flourished at Mayence, A.D. 1107, is the author of a commentary on the Pentateuch and the five Megillot, i.e. the Song of Songs, Ruth, Lamentations, Ecclesiastes, and Esther. This commentary, the proper title of which is Lekcuk Tob (לֶּכֶךְ תוֹב), is so inlaid to his name, as is evident from the quotations made by Aben-Exra and Rashbam—but which is erroneously called נֵכֶקֶד נִכֶּקֶד נָכָּקֶד, consists both of excerpts from the ancient expository works, such as Sahpa, Saphra, Tanchuma, etc., and of an attempt at a grammatical explanation of the text. A portion of it, embracing the commentaries on Leviticus, Numbers, and Deuteronomy, was first published at Venice in 1546. With a Latin translation it was republished in Ugone’s Thesaurus Antiquitatum Sacrarum (ibid. 1764-89), vol. xv, xvi. Excerpts of the commentaries on the five Megillot were published by A. Jellinek (Leips. 1855-58). The whole MS. is in the Bodleian Library at Oxford (Cod. Uri 124). See First, Bibl. Judi. iii, 427; Grätz, Gesch. d. Juden, vi, 159; Kitto, Cyclop. s. v.; Etheridge, Intro. to Heb. Literature, p. 235, 406; De Rossi, Dizionario Storico (German transl.), p. 914; Zahn, Gottesd. Vorträge, p. 298-299 (B. V.).

TOB¡as (τωβ¡ας), the Greek form of the name Tobiah or Tobijah, as it occurs of two men in the Apocrypha.

1. The son of Tobit, and central character in the book of that name. See Tobit, Book of.

2. The father of Hyrcanus, apparently a man of great wealth and reputation at Jerusalem in the time of Seleucus Philopator (2 Macc. iii, 11). B.C. cir. 187. In the high-priestly schism which happened afterwards (see MENELAUS), the sons of Tobias took a conspicuous part (Josephus, Ant. xii, 5, 1). One of these, Joseph, who raised himself by intrigue to high favor with the Egyptian court (ibid. 4, 2), has been supposed that this is the Hyrcanus referred to in 2 Macc. iii, 11; and it is not impossible that, for some unknown reason (as in the case of the Maccabees), the whole family were called after their grandfather, to the exclusion of the father’s name. On the other hand Joseph was a high-priest of successive generations makes it more probable that the Hyrcanus mentioned in Josephus was a nephew of Hyrcanus in 2 Macc. (comp. Ewald, Gesch. d. Volkes Israel, iv, 809; Grimm, Ad Macc. loc. cit.).

TOB¡e, the name of a district (τα τωβ¡ων v. τωβ¡ων; Vulg. locu Tobin), where, in the time of the Maccabees, was an extensive colony of Jews (1 Macc. xvi, 18); probably identical with the land of Tob (v, q.v.) mentioned in the history of Jephthah (Judg. xi, 3, 5).

TOB¡el¡ah (τωβ¡ελ¡α), for Heb. νεκρως ουκ εξηγηθη, goodness of God; comp. Tobiel, the father of Tobit and grandfather of Tobias (Tobit i, 1).

Tob¡iah (Heb. Tob¡ybyh, νεκρως ουκ εξηγηθη once (Zech. vi, 10) in the prolonged form Tob¡ybyhu, νεκρως ουκ εξηγηθη, goodness of Jehováh, the name of two men. See also TOBIAH, TOBIAS.

1. (Sept. Tob¡is¡e¡c, but some MSS. omit; Vulg. Tob¡his). The eighth named of the nine Levites sent by Jehoshaphat to teach the law in the cities of Judah (2 Chron. xviii, 8). B.C. 910.

2. (Sept. oi χρησμου αεις; Vulg. Tob¡cis). Second of the three or four representative men of the Jewish captives in the time of Zechariah, in whose presence Nehemiah the commissary was crowned with the crown of silver and gold and put them on the head of Joshua the high-priest (Zech. vi, 10, 14). B.C. 519. Rosenmuller conjectures that he was one of a deputation who came up to Jerusalem from the Jews who still remained in Babylon with contributions of gold and silver for the Temple. But Maurer considers that the offerings were presented by Tobijah and his companions, because the crowns were commanded to be placed in the Temple as a memorial of their visit and generosity. See ZECHARIAH.

TOB¡t (Sept. Tob¡t¡s, Tob¡t¡r, Tob¡t¡r; Vulg. Tob¡tas; Vet. Lat. Tob¡t, Tob¡s, Tob¡s), the son of Tobit and father of Tobias (Tobit i, 1, etc.). The name appears to answer to רְבִי תֹּב, Tobijah, which occurs frequently in later times (Fritzsche, Ab Tob, 1, 1), and not (as Welte, Einleitung, p. 65) to רְבִי תֹּב, Tobijah; yet in that case Tobijah, according to the analogy of רְבִי, would have been the more natural form. The etymology of the word is obscure. Iten translates it simply “my goodness”; Fritzsche regards it as an abbreviation of רְבִי תֹּב, comparing Malychi (Luke iii, 24, 28), רְבִי, etc. (Ab Tob, loc. cit.). The form in the Vulg. is of 100 weight against the old Latin, except so far as it shows the reading of the Chaldaic text which Jerome used, in
which the identity of the names of the father and son is directly affirmed (i, 9, Vulg.). See Tourt, Book of.

TOBIT, BOOK OF, one of the deuterocanonical books of the Old Testament, standing in most editions of the original Bible between the books of Judith and Esther; and in the Hebrew Bible between the books of Judges and Ruth, but in the English Bible between 2 Esdr. and Judith. It is chiefly interesting for the insight which it gives us into the superstitious notions of the Jews during the period of the Apocrypha.

1. Title.—In the Greek the book is called simply Tobis (Τωβίς), in the old MSS. As a later time the opening words of the book, Βιβλίον λυγών Τωβίς, were taken as a title. In Latin MSS. it is styled Tobias, Liber Tobit, Liber Tobies (Sabatier, p. 706), Tobit et Tobias, Liber utrosque Tobies (Fritzsche, Einleitung, § 1). In the A. V. it is superscribed “The book of the words of Tobit, who, in the time of Enemesser (Shalmaneser), king of the Assyrians, was led captive out of Thinebe, which is at the right hand of Kydios of Nephthalim in Galilee, above Aser.” The word Tobit is probably a Hebrew form תובית, signifying goodness, a name very appropriate in a narrative of virtuous suffering, yet rewarded.

2. Design and Contents.—The object of this book is to show that God, in his mysterious providence, permits some calamities to befall his most virtuous men, in order that, by the endurance of suffering, they may be prepared for, obeying his commands, that he at the same time exercises a special care over them in the midst of their sufferings, vouchsafes them a happy issue out of all their trials, and holds them up to the world at large as pattern of patience under tribulations, as such who have been deemed worthy of being tried and purified, and who have demonstrated that the effectual and fervent prayer of a “righteous man availeth much.” The method adopted by the writer for working out this design will be seen from the following analysis of the book itself.

Tobit, a Jew of the tribe of Naphtali, who strictly observed the law and remained faithful to the Temple-service at Jerusalem (i, 4-8), was carried captive to Assyria by Shalmaneser. While in captivity he exorted himself to relieve his countrymen, which his favorable position at court (συγγενής, i, 18, “purveyor”) enabled him to do, and at this time he was rich enough to lend ten talents of silver to a countryman, Gabacl of Rages, in Media. But when Sennacherib succeeded his father, Shalmaneser, the fortune of Tobit was changed. He was accused of burying the Jews whom the king had put in prison. He fled to Media and took with him Anna, and his son Tobias, by flight. On the accession of Esar-haddon, he was allowed to return to Nineveh, at the intercession of his nephew, Achiacharus, who occupied a high place in the king’s household (i, 22); but his zeal for his countrymen brought him into a strange misfortune. As he lay one night with the court of his house, being unclean from having buried a Jew whom his son had found strangled in the market-place, sparrows “muted warm dung into his eyes,” and he became blind. Being thus disabled, he was for a time supported by Achiacharus, and after his departure (read οργά-νοις, i, 40), the only daughter of Gabacl, also sought help from God against the reproaches of her father’s household. For seven young men wedded-to her had perished on their marriage-night by the power of the evil spirit Asmodeus (q. v.); and she thought that she should “bring her father’s old age with sorrow unto the grave.” (ii, 10). So Raphael was sent to deliver both from their troubles. In the meantime Tobit called to mind the money which he had lent to Gabacl, and dispatched Tobias, with many wise counsels, to reclaim it (ch. iv). On this Raphael (under the form of a kinsman, Azarias) offered himself as a guide to Tobias on his journey; and this they consented to; “for the young man’s dog with them,” and Anna was comforted for the absence of her son (ch. v). When they reached the Tigris, Tobias was commanded by Raphael to take “the heart, and liver, and gall” of “a fish which leaped out of the river and would have devoured him,” and instructed how to cut it up. In his first two aunts were found, for Sara, Raphael said, was appointed to be his wife (ch. vi). So when they reached Ecbatana, they were entertained by Raguell, and, in accordance with the words of the angel, Sara was given to Tobias in marriage that night, and Asmodeus was “driven to the utmost parts of Egypt.” where “the angel bound him” (ch. vii, 1). After this Raphael recovered the loan from Gabacl (ch. ix), and Tobias then returned with Sara and half her father’s goods to Nineveh (ch. x). Tobit, informed by Anna of their son’s approach, hastened to meet him. Tobias, by the command of the angel, applied the fish’s gall to his eye; and Raphael instructed him to return, and restore the eye to Tobit. After this Raphael, addressing to both words of good counsel, revealed himself, and “they saw him no more” (ch. xii). On this Tobit expressed his gratitude in a fine psalm (ch. xiii); and he lived to see the long prosperity of his son (xiv, 1, 2). After his death Tobias, according to the measure of the Spirit’s revelation, “before he died he heard of the destruction of Nineveh,” of which “Jonas the prophet spake” (xiv, 15, 4).

3. Historical and Religious Character of the Book.—1. There are three theories about the reality of this story.

(1) The opinion that this book records proper history was universally held by the Christian Church up to the time of the Reformation, and has even since been maintained by bishop Gray (A Key to the O. T. p. 620, etc., ed. 1857), Welte (Einleitung, p. 84 sq.), Scholz (Einleitung, ii, 50, ed. 1866). The support of this opinion may be urged, a. The minute account which it gives of Tobit’s tribe, his pedigree, place of birth, the time in which he lived, his family, his condition and employment, his captivity, poverty, blindness, recovery, age, death, and place of burial (i, 1, 2, 8, 12, 13, 20, 21; vi, 11; xiv, 13, 14, 15, 18); b. The rightness of the historical remarks about the Assyrian kings (i, 2, 13, 15, 21), without deriving the names Ενεμεσάρης (= Shalmaneser) and Σαχαρδονίς from the Old Testament, as well as the correctness of the geographical points (i, 14; ii, 21; iii, 7; vi, 1, 11); c. The impossibility of tracing the passage from one place to another of the Test, prototype, and of explaining them on the hypothesis of fiction. The obscure place Thibie is given as Tobit’s place of birth (i, 2), and many minute particulars of his life are described which have in themselves nothing whatever to do with the plot, and which can only be accounted for on the reality of the events.

On the other hand, Bertholdt (Einleitung, § 579) has given a summary of alleged errors in detail (e. g. i, 1, 2, “Naphtali,” comp. with 2 Kings xv, 29; vi, 9, Rages, said to have been founded by Sel. Nicator), but the question turns rather upon the general complexion of the history than upon minute objections, which are often capricious and rarely satisfactory (comp. Welte, Einleitung, p. 84-94).

(2) The opinion that it is a moral fiction was first thrown out by Luther (Vorrede aufs Buch Tobia [Bible, ed. 1584]), and has since been maintained by Rainold (Censor, i, 720), J. A. Fabricius, Buddeus (Hist. Eccl., i, 491), and others. (3) The other opinion, which is held by the laity of his house. For seven young men wedded-to her had perished on their marriage-night by the power of the evil spirit Asmodeus (q. v.); and she thought that she should “bring her father’s old age with sorrow unto the grave.” (ii, 10). So Raphael was sent to deliver both from their troubles. In the meantime Tobit called to
urged—a. The narrative is completely isolated; and though the events pretend to have occurred before and shortly after the fall of Nineveh (B.C. 606), no other document written at a later period refers to them. It bears a strong likeness to the tales of the Thousand and One Nights, with the obvious exception that the writer has clothed his narrative in the language of the Old Testament, a pleasing style, and with a good deal of power. But he is clearly

TOBIT, BOOK OF

TOBIT, BOOK OF 446

TOBIT, BOOK OF 446

of the Old Testament, and belongs to a later age. c. The form, spirit, and tone of the narrative show that it belongs to a very late period. The doctrine of good and evil spirits (iii, 8; vi, 14; viii, 3; xii, 1), the ascription of human lusts to spirits (vi, 4), and the notion of seven principal seraphs bringing the prayers of the pious before the Divine throne (xii, 12, 15), the marriage instrument (יִבְּנָּהֵל), and the legal benediction pronounced over the wedded pair (vii, 13, 14), are of post-Babylonian origin.
d. The stories of the angel Raphael in a human form giving a false account of himself as being a kinsman of Tobit (v, 12), of Tobit becoming blind in both eyes by the falling of some dung of sparrows (ii, 10), and of the marvelous fish (vi, 2-3) are beyond all matter of fact. The modes of opposing evil spirits and curing blindness betray a superstitious or trifling mind. The angel is made to feign himself a man, a Jew of a family known to Tobit, and to be the voucher for the false charms which are introduced. Although the extraordinary character of the details, as such, is no objection against the reality of the occurrences, yet it may be fairly urged that the character of the alleged miraculous events, when taken together, is alien from the general character of such events in the historical books of Scripture; while there is nothing exceptional in the story of the preservation of the life of the case of Daniel, which might serve to explain this difference.

(3.) The view that the narrative is based upon a real occurrence preserved by tradition, but poetically embellished to suit the spirit of the time in which it was written, is maintained by Arnold, Deresch, Ilgen, Keil, etc. The fact that there are different recensions and embellishments of the story, and that the Midrash Tan"chuma (pericope יִבְּנָּהֵל) gives an independent version of it, seems to show that it was traditionally handed down from the time when the occurrence took place. It is quite possible that some real occurrences, preserved by tradition, furnished the basis of the narrative, but it does not follow by any means that the elimination of the extraordinary details will leave behind pure history (so Ilgen). As the book stands it is a distinctly didactic narrative. Its point lies in the moral lesson which it conveys, and not in the incidents. The incidents furnish lively pictures of the truth which the author wished to inculcate, but the lessons themselves are independent of them and that we can any weight be laid on the minute exactness with which apparently unimportant details are described (e.g. the genealogy and dwelling-place of Tobit, i, 1, 2; the marriage festival, viii, 20; xi, 18, 19, quoted by Ilgen and Weitzel), as proving the reality of the events, for such particularity is character-

lic of Eastern romance, and appears again in the Book of Judith. The writer in composing his story necessarily observed the ordinary form of a historical narrative.

2. The religious character of the book is one of its most important and interesting features, inasmuch as it shows the phases of faith which obtained prior to the advent of Christianity, and the extent to which the writings of the Old Testament, in the New Testament. Few probably can read the book in the Sept. text without assenting to the favorable judgment of Luther on its merits. Nowhere else is there preserved so complete and beautiful a picture of the domestic life of the Jews after the Return. There may be symptoms of a tendency toward the fixing up of the same age, thus, yet the works are painted as springing from a living faith. The devotion due to Jerusalem is united with definite acts of charity (i, 6-8) and with the prospect of wider blessings (xii, 11). The giving of alms is not a mere scattering of wealth, but a real service of love (i, 16-17; ii, 1-7; iv, 7-11, 16), though at times the emphasis which is laid upon the duty of exaggeration (as it seems) from the special circumstances in which the writer was placed (xii, ii, 9; xiv, 10). Of the special precepts one (iv, 15; בְּשַׁדְּוִי נֶפֶשׁ בְּשַׁדְּוִי) contains the negation of the golden rule of conduct (Matt. vii, 12), which in its partial form is found among the maxims of Confucius.

But it is chiefly in the exquisite tenderness of the portraiture of domestic life that the book excels. The parting of Tobias and his mother, the consolation of Tobit (vii, 10), the anxiety of the fathers of the family (x, 1-7), the son's return (ix, 4; xii), and even the unjust suspicion of the sorrow of Tobit and Anna (ii, 11-14) are painted with a simplicity worthy of the best times of the patriarchs. Almost every family relation is touched upon with a feeling of affection. The sense of the parent, and child, kinsmen, near or distant, and master and servant, is presented in the most varied action, and always with life-like power (i, 22; ii, 10-14; v, 14, 15, 17-22; vii, 3-8, 16; viii, 4-8; x, 1-7; x, 1-13; xii, 1-5, etc.). Prayer plays the whole conduct of life (iv, 19; v, 17, 19, 5-8, etc.). and even in the case of David there is confidence that in the end all will be well (iv, 6, 14, 19), though there is no clear anticipation of a future personal existence (iii, 6).

The most remarkable doctrinal feature in the book is the prominence given to the action of spirits, who, while they are conceived to be subject to the passions of men and material influences (Amoebus), are yet not affected by bodily wants, and manifested only by their own will (Raphael, xii, 19). Powers of evil (אֱיֹמָו, πνεῦμα παχούν, iii, 8; vii, 14, 17, 14) are represented as gaining the means of injuring men by sin, while they are driven away and bound by the exercise of faith and prayer (viii, 3, 5). On the other hand, Raphael comes among men as "the healer" (comp. Dilman, Das Buch Henoch, c. 20), and, by the mission of God (iii, 17; xii, 18), restores those whose good actions he has secretly watched (xii, 13, 19), and "the remembrance of whose name he has brought them before the Holy One" (xii, 12). This ministry of intercession is elsewhere expressly recognised. Seven holy angels, of whom Raphael is one, are specially described as those "which present the prayers of the saints, and which go in and out before the glory of God" (xii, 15). It is characteristic of the same synthetic view which was being to interpose between God and man that singular prominence is given to the idea of "the glory of God," before which these archangels appear as priests in the holiest place (viii, 15; xii, 15); and in one passage "the angel of God" (v, 10, 21) occupies a position closely resembling that of Moses (Exod. xxxii, 31; Num. xii, 8, 13, etc.). Elsewhere blessing is rendered to "all the holy angels" (xi, 14, καλεοιμνημον as contrasted with καλεοιμνημον; comp. Luke i, 42), who are themselves united with "the elect" in the duty of praising God forever (vii, 15).
This mention of "the elect" points to a second doctrinal feature of the book, which shares with Baruch alone of the Apocryphal writings, the firm belief in a glorious restoration of the Jewish people (xiv, 5; xiii, 9–18). But the restoration contemplated is national, and not personal. The context (v, 14) is described as "consecrated and built for all ages" (i, 4), its feasts are "an everlasting decree" (ver. 6), and when it is restored "the streets of Jerusalem shall say ... Blessed be God which hath exalted it forever" (xiii, 18). In all there is not the slightest trace of the belief in personal restorations and immortality of the dead. The contexts of Tobit and Job, but from the outline which has been given it is obvious that the resemblance is only superficial, though Tobit ii, 14 was probably suggested by Job iii, 9, 10, while the differences are such as to mark distinct periods. In Tobit the sorrows of those who are afflicted are laid at once in prayer before God, in perfect reliance on his final judgment, and then immediately relieved by Divine interposition. In Job the real conflict is in the soul of the sufferer, and his relief comes at length with humiliation and repentance (xiii, 6). The one is thought out in thoughtless maxims translated into touching incidents. The contrast of Tobit and Judith is still more instructive. These books present two pictures of Jewish life and feeling, broadly distinguished in all their details, and yet mutually illustrative. The one represents the exile prosperous, the other the exile stricken. The Temple and its sudden dangers, cherishing his national ties, and looking with unshaken love to the Holy City, but still mainly occupied by the common duties of social life; the other portrays a time of reproach and peril, when national independence was threatened, and a righteous cause was to be justified beyond repugnance. The Temple gives the popular ideal of boldness of living, the other of courage in daring. The one reflects the current feeling at the close of the Persian rule, the other during the struggles for freedom.

IV. Original Language, Versions, Condition of the Text, etc. — 1. The whole composition of the book shows that it is of Palestinian origin, and hence many have assumed that the languages in which the traditional story was first written down were Hebrew and Aramaic. Indeed, Jerome tells us that he made his Latin version from the Aramaic in one day, with the assistance of a Jew who helped him "very much"; and from one who "dictated to him the import thereof in Hebrew" (Exiguita, etc). The one is the more surprising in view of the fact that one of the difficulties in the Greek text can be removed on the supposition of a Hebrew original. Thus εκεινοι τοις άρτοις σου ιντ ιν τών σιών τών εικανάς (iv, 17), which has no sense, seems to be a mistranslation of τοίς άρτοις των εικανών; and the translator, by a transposition of the last two letters, having read ιντινό instead of ιντροινό, as is evident from the antithetical clause, "and give it not to the wicked," in harmony with the traditional injunction ἐν τῷ πάσῳ πάθει, γεννήθη εἰς τὸ μέτωπον τοῦ διακόνου τῷ θείῳ τῷ θείῳ, it is not lawful to strengthen the hands of the transgressor. So also και εἴσελέγοντας Τυωμας τῆς γυναικος αὔτοις (ix, 6) may be accounted for on the supposition that it is a mistranslation of the Hebrew יָשֵׂם לְאָתוּנָה תַּנֵּא הָאָהֶל הָאָהֶל; the correct rendering of it requires that either Gabael should be taken as the subject — i.e., "he (i.e., Gabael) soluted Tobias with his wife" — or that both Tobias and his wife should be the subject — i.e., "and Tobias and his wife saluted" — i.e., the two comers, Azarias and the servant. See also v, 11, 12, 18; vi, 9; and for the Hebraizing style, iv, 13; xii, 19. Wette, Einbl. § 310; Grätz, Gesch., iv, 462 (2d ed.).

On the other hand, superior cleanness, simplicity, and accuracy of the Sept. proof text conclusive is that this is nearer the original than any other text which is known, if it be not, as some have supposed (Jahn and Fritzschel [1846, 1859], the original itself), the arguments which have been brought forward to show that it is a translation are far from conclusive. The supposed contradictions between different parts of the book, especially the change from the first (i–iii, 6) to the third person (iii, 7–xiv), from which Igen endeavored to prove that the narrative was made up of distinct Hebrew documents, carelessly put together, and afterwards rendered by one Greek translator, are explicable on other grounds; and the alleged mistranslations (iii, 6; iv, 19, etc.) depend rather on errors in interpreting the Greek text than on errors in the text itself. The Sept. in the sense in which it is taken from the classical standard, is not more so than some books which were undoubtedly written in Greek (e.g. the Apocalypse); and there is little, if anything, in it which points certainly to the immediate influence of an Aramaic text. (iv, 4, τέσσαρα τῶν γεώργον τῆς ανάξιας; xiv, 21; κακόν οὖν τὸ αὐτόν; i, 13, ἔνθα τιμήτω; xiii, 25, καὶ τιμήτω; xiv, 7, ti μεζα; xvi, 15, τίνα σα λέγων μακεδον δέδοικα; xiv, 3, προσεσίτω φοβίζεσα, etc.) To this it may be added that Origen was not acquainted with any Hebrew original (Ep. ad Afr. 13); and the Chaldee copy which Jerome used, as far as its character can be ascertained, was evidently a later version of the story. On the other hand, there is no internal evidence against the supposition that the Greek text is a translation. The Greek offers some peculiarities in vocabulary: i, 6, προ-τοκουρία, c. e. ὅ σταρχή τῶν κοινών, Deut. xviii, 4; i, 7, ἐκκρατίζωμα; i, 21, ἐκκρατίζων; i, 27, στραγγα-λαμών, etc.; and in construction, xiii, 7, ἡ γαλαξία τῆς μεγαλοσύνης; xiv, 3, ἐκκρατίζων τινὶ; vi, 19, προσεσίτω τινὶ, etc.). But these furnish no argument on either side.

2. There are extant different Greek, Latin, Syriac, and Hebrew texts of this book, differing more or less from each other, but not sufficiently to have detracted from the excellence of the Greek, as has been said by some, by the very fact that they are in use; but yet, on the whole, so far alike that it is reasonable to suppose that all were derived from one written original, which was modified in the course of translation or transcription.

Besides the Greek text of the Sept., which was adopted into this version because it was that of the Greek Church, there is a recension, one fragment of which (i, 1–2) is contained in the Cod. Sinaiticus (or Cod. Frid. Augustm. ed. Tischendorf [Leips. 1846]), and another (vi, 9–xiii) in the last three MSS. (144, 106, 107) of Holms and Tischendorf.

Of Latin translations we have the ante-Hieronymian version, which was first published by Sabatier (Bibliorum Sacrorum Latinarum Versionum Antiquae, 1748) from two MSS. of the 8th century, and which, according to the investigations of Fritzsche (p. 10 sq.), is mostly made from the received Greek text, but in many places (e.g. xii, 19, 21; vii, 15–18; viii, 14–17; xii, 6–9, 11–22; xiii, 6–18) also from the common text, while x, 1–xi, is from a mixture of both texts. In this edition of the Vetus Latina, Sabatier also published, in the form of notes and as various readings, two other codices, one being of the same age as the MS. Sinaiticus and the other belonging to the library of St. Germanus (No. 15), and concluding (xii, 12) with Explicit Tobit juxta; and the other belonging to the Vatican (No. 7). The text of the latter differs so materially from the other MSS. that it is regarded as an independent version, though emanating from the same Greek source. It is less barbarous and
more fluent in style, as well as more explicit in its renderings, and it is to be regretted that it has survived as a fragment, containing only i, 1–vi, 12 (Bibl. Lat. ii, 706).

There also existed another Latin version, as is evident from a difference in form which this traditional story assumed in a different part of the country. The treatment of the text in this recension is very arbitrary, as might be expected from the above account which Jerome gives of the mode in which it was made; and it is of very little critical value, for it is impossible to distinguish accurately the different elements which are incorporated in it. It is evident that in this process Jerome made some use of the Old Latin version, which he follows almost verbally in a few places: i, 3–6; iv, 6, 7, 11, 25, etc.; but the greater part of the version seems to be an independent work. On the whole, it is more concise than the Latin, but it contains interpolation and changes, many of which mark the aceticism of a late age: ii, 12–14 (parallel with Job); iii, 17–20 (expansion of iii, 14); vi, 17 sq. (expansion of vi, 18); ix, 11, 12; xii, 18 (“et quia acceptas eras Deo, necesse fut tur tentatio probaret te”).

Three recensions are made from the two different recensions of the Greek; i, 1–vii, 9 being a translation of the common Greek text of the Septuagint, while vii, 10, etc., is from a text represented by the above-named three MSS. (44, 106, 107) of Holmes and Parsons, according to the marginal annotations in Usher’s MS.

Neuhauer has lately discovered a Chaldean version among the MSS. of the Bodleian Library, which may prove to be a copy of that to which Jerome refers as the basis of his version.

There are four Hebrew versions of this book, the one first published in Constantinople, 1517; then with a Latin translation by Paul Fagius, and adopted in Walton’s Polyglott (Lond. 1657), vol. iv. It is a free translation of the common Greek text, made by a learned Jew in the 12th century. The second is that first published with a Latin translation by Sebastian Munster (Basle, 1542; then again in 1549, 1566, 1568), and has also been used by Adam of Bremen’s Polyglott. The Hebrew version is more in harmony with the Vetus Latina; and the author of it, who was a Jew, is supposed to have flourished in the 5th century. The third Hebrew version was made from the common Greek text by J. S. Fricke (Leips. 1809); and the fourth is by J. Siebenborn, published in Frankfort and Weissenheim, 1840, with a supplement of a Latin-German translation, a Hebrew commentary, and an elaborate Hebrew introduction.

As to the versions of the Reformation, Luther made his translation from the Vulgate; the Swiss-Zurich Bible (1511) is also from the Vulgate. Coverdale (1535), as usual, followed the Zurich version [see Coverdale]; and he again was followed by Matthew’s Bible (1537), Lord Cromwell’s Bible (1539), Cranmer’s Bible (1540), and the Bishops’ Bible (1568). The Geneva version (1560) is the first made from the Greek, and our present A.V. (1611), as in most cases, followed the Geneva version, though this was interpolated by James I.

3. The first complete edition of the book was by Ilyn (Die Gesch. Tobis’s mit einer Einleit. verschen [Jen. 1800]), which, in spite of serious defects due to the period at which it was published, contains the most full discussion of the contents. The edition of Fritzsche (Exeget. Hebr. u. T. 1853), while it gives many scholarlike, but leaves some points without illustration. In England the book, like the rest of the Apocrypha, seems to have fallen into neglect.

V. Author, Date, and Place of Composition.—As xii, 20 tells us that Raphael, before his disappearance, commanded Tobit and his son Tobias to record the events of their lives; and, moreover, since Tobit, in the first three chapters, speaks in the first person, while (ch. xiii) his prayer is introduced by the statement Kai Twai-βία έγκαθη προσευχή εις σαλαβίαν και εις τούς, the Church Fathers, and others, who make it by submitting that it was compiled from the memoirs of Tobit and Tobias; while Igen maintains that i, 1–iii, 7; xiii, 1–8, were written by Tobit in Assyria, B.C. 689; iii, 8–xii, 2–22; xiv, 1–15, were written in Palestine, B.C. 280; and that from these two Hebrew documents the Chaldean version was made B.C. 120, which Jerome translated into Latin. Modern critics, however, conclude, from the whole complexion of the book, its angelology, theology, etc., that it is a post-Babylonian production, and that it was written by a Palestinian Jew. But these critics differ very materially about the precise date when the book was compiled, as will be seen from the following table:

But though internal evidence leaves it beyond the shadow of a doubt that the book was compiled after the Babylonian captivity, yet the arguments adduced by Grütz, (Geschichte, iii, 406, 21 ed.) to prove that it was written after the destruction of the Temple, and during the persecutions of Hadrian, are inconclusive. The reference to the destruction of the Temple (xiii, 19, 18; xiv, 18) was probably to refer to the events that took place in the reign of Zedekiah, when Nebuchadnezzar took Jerusalem and burned the sanctuary (2 Kings xxxv).

The other remark of this learned historian—viz. that the bread of heathens (άρης τον ιερόν επεστραφής = συνήθείς τον), of which Tobit speaks (ver. 1, 10), was first interdicted shortly before the destruction of the Temple by Titus—is based upon restricting the term áρης to actual bread, whereas it has been shown that it was probably an emblematic expression long before the Christian era (comp. Dan. i, 5). Indeed, the book is singularly devoid of the stringent Halachic expansions of the Mosaic enactments which obtained in later times: it contains no allusion whatever to the rewards in a future life, and has no reference to the particular forms in which these rewards appear at the time of Christ, traces of which might naturally be expected in it if it had been written in or after the time of Christ.

It is therefore most probable that the book was written B.C. 250–200.

VI. Canonicity and Authority.—Like the other deutero-canonical books, Tobit was never included in the canon by the synagogue. This is established beyond the shadow of doubt, not only from the list of the Hebrew Scriptures given by the Jews themselves in the Talmud (Baba Batra, 14), but from the oldest catalogues of the canon furnished by Christian fathers, such as Melito, Origen, etc. Indeed, Origen distinctly states that neither Tobit nor Judith was ever received by the Jews as Sacred Scripture—Εξώτων το τω Τοβίτ και τω Ζωδαίας (Eph. ad Afric. § 18; comp. De Orat. i, 14).

It was, however, different in the Greek church, where the text of the Sept. was received as canonical. There appears to be a clear reference to it in the Latin version of the Epistle of Polycarp (c. 10, eleemosyna de morte liberat; Tobit iv, 10; xii, 9). In a scheme of the Ophites, if there be no corruption in the text, Tobiai appears among the prophets (Iren. i, 30, 11). Forming part of the contents of this version, Clement of Alexandria quotes Tobit iv, 15; xii, 8, as taken from προθεσθε.
Scripture (Strom. ii, 23, 189). But though Origen himself also quotes it as Scripture, yet it is ranked by Christians among such as were read to the catechumens, and contains a plainer and less elevated doctrine (In Numb. Homil. xx). Even Athanasius, when writing without any reference to the Canons, speaks of it as Scripture (Apok. c. Arius, § 11, σε γραφαίναι, Tobit xii, 7); but when he gives a formal list of the sacred books, he definitely excludes it from the canon, and places it with other Apocryphal books among the writings which were "to be read by those who were but just entering on Christian life, and desirous of being instructed in the rules of piety" (Ep. Fest. p. 1177, ed. Migne). This distinction, however, between canonical and apocryphal afterwards disappeared, to a great extent, in the Greek Church, as is seen from the fact that Bar-Henraes places Tobit among the sacred books in his Homocanon of the Antiochene Church (Mai, Script. Vet. Nova Collecta, 58; comp. Frischeus, p. 18).

In the Latin Church Tobit was regarded with greater sacredness. Cyprian often quotes it as Holy Writ (De Opere et Moneamone Liber). Hilary cites it to prove the intercession of angels (I. c. pass., § 7), and tells us that some of his predecessors had added both the other two and twenty canonical books to make up their canon of four and twenty books (Prov. in Ps. xxvii). Lucifer quotes it as authoritative (Pro Athan. i, 871). Augustine includes it with the other Apocrypha of the Sept. in the books which he says the Church received (De Doctr. Christ. ii, 8). This is expressed still more distinctly in the Speculum (p. 1127, C., ed. Par. 1886): "Non sunt omniemini et hi [libri] quos quidem ante Salvatoris adventum constat esse conscriptos, sed eos non receptos a Judaeis recipi tamen ejusdem Salvatoris beneficium. Quamvis proinde se profanant eorum manus, et quidem in omnia profana converts, a viis sanctis et sanctis profanatur in sanctam Eucharistiam, et Tobit. In this Augustine was followed by the mass of the later Latin fathers. Ambrose, in especial, wrote an essay on Tobias, treating of the evils of usury, in which he speaks of the book as "prophetic" in the strong term (De Tobit. 1, 1; comp. Urs. vii, 4). Jerome, however, followed by Ruffinus, maintained the purity of the Hebrew canon of the Old Testament, and, as has been seen, treated it very summarily. The third Council of Carthage (A.D. 397), Innocent I (405), and the councils of Florence (1499) and Trent (1563) declare that it canonical. It was proscribed in the Roman Missal and in the Missal of Sarum there is a proper mass of Raphael, the archangel, and it is ordered in the preface rubric that the office be celebrated for pilgrims, travelers, sick persons, and domestics. This is followed by two short prayers, one addressed to God and the other, declared to be that of Raphael (comp. Arnold, Dissertation auf Astrazoeas). As to the Reformed Church, though Luther was the first who separated the deuterocanonical from the canonical books, yet he entertained the highest opinion of the book of Tobit. If it is history," says the great Reformer, "it is true fountain of history; but if fiction, it is indeed right beautiful, wholesome, profitable fiction, and play of an ingenious poet. . . It is, therefore, profitable and good for us Christians to read this book as the production of an excellent Hebrew poet, who treats not on frivolous, but solid, matters" (Vorrede zum Buche Tobit, in his translation of the Bible, ed. 1534). In the Anglican Church the book of Tobit is looked upon with still greater favor.—iv, 7—16 is quoted in the Homilies as the counsel of the holy father Tobit (On Aims-benta, pt. i); iv, 10 is cited as a lesson taught by "the Holy Ghost in Scripture" (σήμερα, pt. ii); and xii, 9 is adduced to show that Tobit's deeds are to be imitated (On the life of Tobit, vii, 3). Indeed, in the old liturgies with prayer is of great efficacy" (Of Fastiing, pt. ii). Passages of Tobit are also incorporated in the liturgy; iv, 7—9 are among the passages used at the offertory; iii, 3, according to the Latin Vulgate, is introduced into the litany; vi, 17, according to the Vulgate, is alluded to in the preface to the Marriage Service; while in the prayer following immediately after the verses and responses in the same service in the First Book of Prayer of Edward VI, the following sentence is used: "And as thou didst send the angel Raphael to Tobie and Sara, the daughter of Raguel, to their great comfort, so vouchsafe also to send them thy blessing upon these thy servants" (Farker Society's ed. p. 131). VII. Commentaries.—The following are the special exegetical helps on this Apocryphal book: Fagius, Tobit Liber (Iyny, 1542, 4to; also in the Lond. Polyglot, 1657, fol.); Münster, יַעֲנֹשׁ יַעֲנֹשׁ (Basle, 1652, 1549, 1556, 1568, 4to; also in Walton's Polyglot); Dusina, Tobias (Perugia, 1568, 4to; also in the édition de Paris, 1568, 4to); Senarius, Tobias (In Libro Tobiae, Judit. etc., Mainz, 1588); Drezel, Tobias Illustratus (Munich, 1611, 12mo); Sanctius, In Libros Ruth, Tobit, etc. (Lud. 1628, fol.); Justinian, Tobias Illustratus (Col. 1629, fol.); Van Maarden, Tobias Delineatus (Antw. 1631, fol.); Bišoć Njovnjo Twir, etc. (Thessalonica, 1838, 4vo); Mazzoni, Franciscopap. e. Mail. 1601, 1754, 4vo; by Augusti (Leips. 1804, 8vo); Apel (Ibn. 1806, 8vo); Celadara, Commentarius in Tob. Hist. (Lud. 1644, fol.); Anon. Tobii, Judit. et Esther, avec Explication (Paris, 1688, 8vo); Van der Hardt, Enigma Tobiasi, etc. (Helmont, 1728, 4to); Adem, יְהָשֵׁב יְהָשֵׁב (Amst. 1736, 8vo); Sabatier, Liber Tobit (in the Tetus Latina [Par. 1751, fol.; vol. i]; Seller, Pred. lib. d. B. Tobitii (Munich, 1770, 8vo); Peter, de sanct. Tobitico libro (Leips. 1772, 8vo); Bauer, Das B. Tobias erklärt (Brabl.-Wurtbt. 1776, 1793, 12mo); Eichhorn, Ue. d. B. Tobitii (in his Bibliothek, ii, 410—440 [Leips. 1787—1800]); Igen, Die Gesch. Tobis (Jen. 1800, 8vo); Höfner, Historia Tobitae Gracce (Vientob. 1802, 4to); Derener, Tobos, Judit. u. Seth. erklärt (in the Minn. in 8vo); Paur, Das B. Tobias bearbeitet (Leips. 1817, 8vo); Van Ess, Liber Tobias (Tob. 1822, 8vo); Fränkel, Das B. Tobias (in his Ḥašāmim ve-nifḥeōm [Leips. 1880, 8vo]). Siebenberger, יְהָשֵׁב יְהָשֵׁב (Heb. translation and commentary [Warsaw, 1838, 8vo]); Guttmann, Die Apok. des A. T. (Altona, 1841, 8vo); Cittadino and Bottari, Libri di Tobii, Giuditta, e Ester (Ven. 1844, 8vo); Frischeus, Die Bücher Tobit und Judith (vol. II of the Kurzgez. comp. Handb. [Leips. 1858, 8vo]); Heusch, Das B. Tobias erklärt (Freib. 1857, 8vo); Sengelmann, Das B. Tobias erklärt (Hamb. 1857, 8vo). Tobler, Titus, a German writer known for his researches in Palestine, was born June 25, 1806, at Stein, in the canton of Appenzell, Switzerland. He studied at Zurich and Vienna, was promoted as doctor of medicine in Wurtzburg, and, after spending a time in Paris, returned in 1827 to his native place and settled there as a physician. In 1835—36 he travelled in Palestine for mere medical purposes (comp. Lustres sa Mosryand) (Zurich, 1839, 2 vols.), but he soon became so interested in the topographic—geographical exploration of the Holy Land that he undertook a second journey in 1845. See his Bethlehem (St. Gall, 1849); — Plun von Jerusalem (St. Gall, 1850); — Goldphaut, (1851); — Die Schönquelle and der Oelberg (1852); — Denkblätter aus Jerusalem (1858, 2d ed. 1856); — and especially Topographie von Jerusalem u. seinen Umgebungen (Berlin, 1858—54, 2 vols.); — Beitrag zur medicin. Topographie von Jerusalem (ibid. 1855). He undertook a third journey, and published as the result, Jahresberichte von Jerusalem (1859); — "Die Wandering nach Palästina" (1855). In 1865 he went for the fourth time, but on account of the cholera he soon returned and published Nazareth in Palästina, nebst Anhang der vierten Wandering (Berlin, 1864). Besides these works, he published, De Locis Sanctis, quae parumam variis uocibus traduntur (Gießen, 1844); — "Die Wandering nach Palästina" (1855).
TODD

Geogr. Palæstina ab Amo CCCCXXXIII usque ad annum M (Dresden, 1875). Tobler died Jan. 21, 1871, at Munich. The interesting life of this man will be found in Hein's Dr. Titus Tobler, der Palästinaführer: Ein app.
pancellor. Grabmale des i. L. Lyceum, etc. Nach kläglichem der quieten Bemühren (Zurich, 1879). (B. P.)

To’chen (Heb. T’zhon, heb. task or measure [as in Ezek. v. 18; xxxv., 11;]. Sept. Tʾzhōnîn v. r. Tʾzhōnîn; Vulg. Tochon), one of the towns of the tribe of Simeon (1 Chron. iv. 32); probably the same elsewhere (Josh. xv, 24) called Telem (q. v.) or Telaim (1 Sam. xv, 4).

Todd, David, a Congregational minister, was born at West Hanover, Pa., Nov. 5, 1821. He left home at the age of fifteen to attend the preparatory school of Oberlin College. After finishing his collegiate studies there, he entered the theological department, and passed through the prescribed course. He commenced his labors in Illinois, supplying the churches of Knox and Ontario, ten miles distant from each other. In these places he gathered permanent congregations and organized churches. He was ordained at Victoria, Aug. 18, 1847. In 1849 he was called to Streator, La Salle County, and tendered the charge of a Congregational Church, where he labored with success until 1863, when he accepted a call to Pine Bluffs, Ark. He remained there until 1865, when, his health failing, he found it necessary to return to his Northern home. On his return he resumed his work as pastor, and finished his course of laborful pastorate and pulpit preaching, held in high esteem by the Church and community. He died at Granville, Ill., Aug. 10, 1874. (W. P. S.)

Todd, Henry John, an English clergyman, was born in 1768, and educated at Hertford College, Oxford, whence he proceeded as A.M. in 1786. He became a minor canon of Canterbury Cathedral soon after. In 1792 he was presented to the vicarage of Milton, near Canterbury, and subsequently lived in the house of All-hallows, Lombard Street, London. He was appointed by the archbishop keeper of the MSS. at Lambeth; and in 1820 he was presented, by the earl of Bridgewater, to the rectory of Settrington, in Yorkshire. In 1830 he was collated by the archbishop of York to the prebend of Hushawte in that cathedral church; and, finally, in 1832, he was appointed archdeacon of Cleveland. He died at Settrington, Yorkshire, Dec. 24, 1845. He wrote, Some Account of the Deans of Canterbury (Cant. 1793, 8vo);—Catalogue of Books in the Library of Christ Church (ibid. 1802, 8vo);—Catalogue of the Archepiscopal Library in the Library of Lambeth Palace (Lond. 1812, fol.);—Original Sin, Free-eveil, Regeneration, Faith, etc., as vested in Certain Declarations of our Reformers (ibid. 1818, 8vo);—Indications of our Authorized Translation and Translators of the Bible (ibid. 1819, 8vo);—Observations on the Metrical Versions of the Psalms made by Sternehold, Hopkins, and others (ibid. 1819, 8vo; 1822, 8vo);—Memoirs of the Life and Writings of the Right Rev. Brian Walton, Bishop of Chester (ibid. 1821, 2 vols. 8vo);—Account of Greek MSS., Chiefly Biblical, etc. (ibid. 1823, 8vo);—Archbishop Cranmer’s Defence of the Doctrine of the Sacrament of the Lord’s Supper (ibid. 1824, 8vo);—Life of Edward Ligonier, Milver, and Butler (ibid. 1825, 8vo);—Of Confession and Abolition, and the Secrecy of Confession (ibid. 1828, 8vo);—Life of Archbishop Cranmer (ibid. 1831, 2 vols. 8vo);—Authentic Account of our Authorized Translation of the Bible and other Translators, etc. (ibid. 1834, 12mo);—(ibid. 1835, 8vo). See English Cyclopedia. Biography, etc.; Allibone, Dict. of Brit. and Amer. Authors, etc.

Tod, Hugh, a learned English divine, was born at Blencow, Cumberland, in 1658. He became a charity scholar of Queen’s College, Oxford, in 1672; fellow of University College, Dec. 23, 1678; A.M. and chaplain to bishop of Carlisle, July 2, 1678. In 1685 he was appointed one of the four chaplains to Bishop of Carlisle, and at the same year obtained the vicarage of Stanwix, which he resigned in 1688. He resigned his residencehip in 1720, and died in 1728, being vicar of Penrith and rector of Arthurst.-He published, Description of Sweden (1680, fol.);—Life of Dr. John (1684)—Mission (1701, 4to);—Sermon, etc. (1711, 4to).

Tod, James Henthorne, D.D., an Irish clergyman, was born in Dublin, April 23, 1805; graduated at Trinity College, and became a fellow there in 1831. He was also regius professor in, and librarian of, the University of Dublin; treasurer and preceptor of St. Patrick’s Cathedral, and president for five years (the usual term) of the Dublin Academy. He is one of the founders of the Irish Archaeological Society. His death took place June 28, 1869. He published, Historical Tablets and Medallions, etc. (1828, 4to);—Discourses on the Prophecies relating to Antichrist in the Writings of Daniel and St. Paul; Donellen Lecture (Dubl. 1840, 8vo; 1842, 8vo);—Six Discourses on the Prophecies relating to Antichrist in the Apocalypse of St. John; Donellen Lecture (ibid. 1846, 8vo);—Remarks on the Roman Dogma of Infinitude (ibid. 1848, 8vo);—Historical Memoirs of the Successors of St. Patrick and Archbishops of Armagh (ibid. 1861, 2 vols. 8vo);—The Irish Romanists in the Library of Trinity College, Dublin, etc. (Lond. and Camb. 1865, 8vo). See Allibone, Dict. of Brit. and Amer. Authors, etc.

Tod, John, (1), a Presbyterian minister, was a graduate of Nassau Hall in 1749, and was taken on trial by the New Brunswick Presbytery, May 7, 1750. He was licensed Nov. 15, and went to Virginia. A call was laid before the Presbytery May 22, 1751, and he was ordained on 1753, he was installed, by Hanover Presbytery, pastor of Providence Church in Louisa County, Va. Davies delighted in him, and speaks of him as his favorite friend, relying on his judgment in cases of importance. Todd wrote to Whitefield in 1755, giving an account of the wonderful work of God in his congregation. Col. Gordon said, after hearing him, that he never heard a sermon, but one from Mr. Davies, with more attention and delight. He obtained from the Rev. Dr. Gordon, of Steupee, near London, scientific apparatus and valuable books, which he gave to aid Trangulavia University in founding a college. He was a man of great piety, and eminently useful in edifying the Church. He died July 27, 1753. (W. P. S.)

Tod, John (2), D.D., an eminent Congregational minister, was born at Rutland, Vt., Oct. 9, 1800; graduated at Yale College in 1822, spent four years at the Anover Theological Seminary, and was ordained and settled at Groton in 1827. He was settled over the Edwards' Farm, Northampton, Mass., and was connected with the Congregational Church, Philadelphia, Pa., in 1836; and the First Congregational Church, Pittsfield, Mass., from 1842 to 1872. He died in Pittsfield, Aug. 24, 1873. He was one of the founders of the Mount Holyoke Female Seminary, and for several years president of the trustees of the Young Ladies Institute of Pittsfield. His degree of D.D. was conferred upon him by Williams College in 1845. The following are some of his numerous publications:—Lectures to Children (Northampton, 1884, 16mo), with translations and extended circulation;—Student's Manual (ibid. 1885, 12mo);—Index Rerum (ibid. 1884, 4to);—Life of a Rural School Teacher (ibid. 1885, 8vo);—Truth Made Simple (ibid. 1889, 18mo);—The Young Man (ibid. 1843, 18mo);—Simple Sketches (Pittsfield, 1843, 2 vols. 16mo);—Stories of the Shorter Catechism (Northampton, 1850-51, 2 vols. 18mo);—The Daughter at School (ibid. 1885, 12mo);—Questions in the Psalms (ibid. 1885, 18mo);—Questions on the Life of Moses; Questions on the Books of Joshua and Judges (ibid. 1853);—The Bible Companion (Philadelphia, 188o).—Future Punishment (N. Y. 1883, 2mo);—Hints and Thoughts for Christians (ibid. 1867, 12mo);—Women's Rights;—Questions for Christians (ibid. 1869, 12mo);—Old-fashioned Love (1870). See Allibone, Dict. of Brit. and Amer.
TODD, John, a Congregational minister, was born in New Haven, Conn., March 20, 1713, and graduated at Yale College in 1732. After studying theology a few months, he commenced preaching and was licensed at East Haddam, Oct. 24, 1740. During 1740 and 1751, a pestilence prevailed among his people, taking off many of his substantial friends and supporters. He continued his labors until the last year of his life, which ended Feb. 24, 1781. Mr. Todd published a Sermon, Young People Warned (1740);—Election Sermon (1749);—and a Collection of Psalms and sermons on the death of his wife. See Sprague, Annals of the Amer. Pulpit, i, 383.

Tedd, Nathaniel, a Presbyterian minister, was born at Bowley, Essex Co., Mass., Jan. 27, 1780; graduated at Brown University in September, 1800; studied theology privately; was licensed by Philadelphia Presbytery, Oct. 19, 1803; ordained pastor of the Presbyterian Church in Schenectady, N. Y., in 1805, where he labored with great success for several years. He was afterwards teacher and pastor at Woodbury, N. J.; thence successively principal of an academy at Westchester, Harrisburg, Lebanon, Millburn, and Beaver, Pa., and for many years of a classical school in Allegheny City, Pa. He spent the greater part of his life in teaching, and died July 8, 1887. See Wilson, Presb. Hist. Almanac, 1888, p. 152.

Todros, ben-Joseph, Ha-Levy Abulafia, a celebrated Cabalist, was born in 1234 at Toledo, and died about 1300. He occupied a high position as physician and financier in the court of Sancho IV, king of Castile, and was a great favorite of queen Maria de Molina. When this royal pair met Philip IV, the fair, king of France, in Bayonne (1290), he formed one of the cortege; and his advocacy of his theocry established for the doctrines of the Cabala a kindly reception from the French Jews. His writings on the Cabala are, An Exposition of the Tabudic Hagadot, entitled רבי טדרוס ניוצרי: A Commentary on Psalm cxxx:—A Commentary on the Pentateuch, in which he propounds the tenets of the Cabala. These works, however, have not yet been published. See Gritz, Gesch. d. Juden, vii, 204 sq.; Steinschneider, Cath. Libr. Heb., in Bibl. Rodl. 2677—2680; De Rossi, Dizionario Storico, p. 815 (Germ. transl.); Ginsburg, The Kabbalah, p. 111; Fürst, Bibl. Jud., iii, 428. (B. F.)

Togaromah (Heb. Togaromah', תוגרומך, [briefly תוגרומך, Gen. x, 13, of uncertain derivation; Sept. θογρομᾶ π θογρομᾶ, etc.; Vulg. Thogarmum), third named of the three sons of Gomer (the son of Japheth), his brothers being Ashkenaz and Riphath (Gen. x, 13; 1 Chron. i, 6). B.C. post 2518. The descendants of Togaromah are mentioned among the merchants who trafficked with Tyre, the house of Togaromah being said to trade "in its fairs with horses, and horsemen, and mules" (Ezek. xxvii, 14). They are named with Persia, Ethiopia, and Libya as followers of Gog, of the land of Magog, the chieftain of Meshech and Tubal, or, as it may be rendered (making the Hebrew Rosh, for chief, a proper name, as it is in the Sept. P'ωρ, and as the Jews say it ought to be rendered), the prince of Rosh or Russia, Meshech or Mohelk, and Tubal or Topolok (xxxxviii, b, 6), supposed by some to mean the prince or power of Russia, and by others, the prince of the country of Russia, Moscow, and Tobolok. Togaromah is said to be of the north quarters, and Gog is represented as a guard to it, possibly professing to guard it, or offering to it a protectorate (ver. 7). The Jews say that by Togaromah, or the house of Togaromah, we are to understand the Turks. Togarma, therefore, as it is given (see and in form תוגרומך) has been thought by some to mean Turkomans, or the Turkoman hordes from whom the Turks have sprung. Togaromah, however, as a geographical term, is connected with Armenia, and the subsequent notices of the name (xxvii, 14; xxxvii, 6) accord with this view. Armenia was, according to Strabo (xii, 15, 5; 15, 529), distinguished by the production of good horses (comp. Xenoph. Anab. i, 6, 4; Herod. vii, 103, 15); the countries of עשו and ירמ (Mervu), and also יירבע, were contiguous to Togaromah (Josephus, Ant. i, 1, 6). The name itself may possibly have reference to Armenia, for, according to Grimm (Gesch. d. deutsch. Spr., ii, 825), Togaromah comes from the Sanscrit toka, "tribe," and Arm = Armenia, which he further connects with Hero- midon the son of Mannus. The most decisive statement respecting a topographical relation in ancient literature is furnished by Herodotus, who says that they were Phrygian colonists, that they were armed in the Phrygian fashion, and were associated with the Phrygians under the same commander (Herod. vii, 73). The remark of Eudoxus (Steph. Byza. s. v. Αρμε-νία) that the Armenians assemblid in many respects in language (γν ωρ γο αρμανο γραφα) tend in the same direction. It is hardly necessary to understand the statement of Herodotus as implying more than a common origin of the two peoples; for, looking at the general westward progress of the Japhetic races and the current position which Armenia held in regard to their movements, we should rather infer that Phrygia was colonized from Armenia than vice versa. The Phrygians were indeed reputed to have had their first settlements in Europe, and thence to have crossed into Asia (Herod. vii, 73); but this must be regarded as simply a retrograde movement of a section of the great Phrygian race in the direction of their original home. The period of this movement is fixed subsequently to the Trojan war (Strabo, xiv, 680), whereas the Phrygians appear as an important race in Asia minor at a far earlier period (id. vii, 321; Herod. vii, 6, 11). There is little doubt that they occupied once the dominant race in the peninsula, and that they spread westward from the confines of Armenia to the shores of the Egean. The Phrygian language is undoubtedly to be classed with the Indo-European family. The resemblance between words in the Phrygian and Greek tongues was noticed by the Greek themselves (Plato, Cratyl. p. 410), and the inscriptions still existing in the former are decidedly Indo-European (Rawlinson, Herod. i, 666). The Armenian language presents many peculiarities which distinguish it from other branches of the Indo-European family; but these may be accounted for partly by the character of the country, and partly by the large amount of foreign admixture that it has experienced. In spite of this, however, no hesitation is felt by philologists in placing Armenian among the Indo-European languages. (Pot, Gymn. Forsch. introd. p. 82; Dieffenbach, Oryg. Europ. p. 63.) With regard to the ancient inscriptions at Van, some doubt exists; some of them, but apparently not the most ancient, are thought to bear a Turkishian character (Layard, Nin. and Bab. p. 402; Rawlinson, Herod. i, 652); but, even were this fully established, it fails to prove the Turanian character of the population, inasmuch as they may have been introduced by foreign conquerors. The Armenians themselves have associated the name of Togaromah with their early history in that they represent the founder of their race, Halt, as a son of Thorpom (Moses Choren. i, 4—9, 11). See Herod. Choren. See Morse's Ancient Geography, edidit, Lat. vert. notisque illustr. W. et G. Whistonii (London, 1781); Heeren, Iden. i, 1, 805; Michaelis, Spicilegium Geographicum, i, 67—78; Klaproth, Travels, ii, 64. See ARMENIA.

Toggenburg War, the name given to an outbreak between Protestants and Catholics in Toggenburg (or Tockenbury), a district of the canton of St. Gall, Switzerland. The dispute between the Toggenburgers and the abbots of St. Gall, Leodegar Bürgisser, appeared at
TOHU

first to be purely political, and related mainly to the labor in road-building, which the abbot had enforced upon those under his jurisdiction. At first even Catholic localities, such as Schwyz, took part with the Toggenburgs against the abbot, but the latter, after a series of ascertainable differences. But the confessional differences soon led to serious disturbances. In the lower country, especially in Hennau, the majority were Catholics. About Easter, in 1709, they closed the church against the evangelical party, and the result was a scuffle, in which many were wounded. Also, at this treatment, the Protestants sought shelter in the neighboring churches, but, encouraged by their neighbors of Oberglatt, they returned in a week to Hennau, and sought to enter the church. The Catholic priest refused them, but, seeing the Protestants assembled in large numbers in the churchyard, counselled submission. But the Protestant minister was at this moment felled to the earth by a stone, and a severe struggle ensued. The priest was roughly handled, but was rescued by a member of the council, and one of his followers killed. The Reformed preacher, a native of Basle, was recalled, and a citizen of Zurich substituted, who was obliged to disguise himself for fear of the Catholics. The Catholic priest, after an absence of six weeks, was restored to his parish, under the protection of the abbot. The different cantons now took sides with the contending parties, and party feeling ran very high. Attempts were made, however, to conciliate. An attempt to settle the matter in Berlin Buchoden, May 29, 1709, arbitrators were appointed, and proceedings begun; but all in vain. In the spring of 1712 the war broke out. It began in Toggenburg. The city of Ywil, to which the forces of the abbot had retired, was captured; the commander, Felber, was most shamefully betrayed by his own people, and his corpse was thrown into the Sihl. Nabholz, at the head of the victors, marched to St. Gall, and seized the Thurgau and the Rhine valley. Meanwhile, the theatre of the war extended to the shores of the Reuss and the Aar. A murderous conflict, "the battle of the bushes," gave the Bernese abloody victory. The city of Baden surrendered to Zurich, and was allowed to retain its Catholic worship, but did not dare to interfere with the erection of a Reformed Church outside of the walls of the city. Through the interference of pope Clement IX, the fire of war, which seemed about to be extinguished, was roused; while the matter was being delib- erating, the Catholic cantons of Schwyz, Unterwalden, and Zug, to the number of 4000, stormed the village of Sims. Bloody battles were fought in the vicinity of Lake Zurich, and at Bellenschantze. In Lucerne, the government was saved by an uprising of the people to enter into the war. The Catholic forces were driven to the war, about 12,000 strong, assembled at Muray. The Bernese were encamped at Vilmergen, and the great battle was fought on St. James's Day, July 25, and was not decided until six P.M., when the victory of the Reformers was complete. The peace, which was concluded in August at Aarau, provided religious liberty for Toggenburg. See Hagenbach, Hist. of the Church in the 18th and 19th Cent., iii, 34 sq.

TOHU (Heb. To'chu, תוטווע, lovely; Sept. Θοιου v. r. Θοιου; Vulg. Thou), son of Zuph and father of Elihu among the ancestors of Samuel (1 Sam. i, i); probably the same elsewhere called TOAM (1 Chron. vi, 34) or NATHAN (q. v.) (Genev. 26). TOI (Heb. To'v, תוד in Sam., but in Chron. TO'i, Heb. Tou', תוד, both meaning ering; Sept. Θοιον v. r. Θοιον and Θοιον; Josephus, Θοιον; Vulg. Todi), the king of Hamath on the Orontes, who, after the defeat of his powerful enemy the Syrian king Hadadezer by the army of David, sent his son Joram, or Hadoram, to congratulate the victor and do him homage with presents of gold and silver and brass (2 Sam. viii, 9, 10; 10, 10). David made an alliance with Hadadezer, and had wars with Tou', and Ewald (Gesch. iii, 199)

conjectures that he may have even reduced him to a state of vassalage. There was probably some policy in the conduct of Toi, and his object may have been, as Josephus says it was (Ant. vii, 4), to buy off the conqueror with the vessels of uncertain workmanship (εἰς τὴν ἄρχαν κατανάλωσιν) which he presented.

Tokens (telēre), bits of load or of pewter, or cards, given to the members of a Church in full communion, which they hand to the elders as they approach the Lord's table. The object is to keep out those who are not known, or who are under scandal, or for other purposes of deemed unworthy workmanship (εἰς τὴν ἄρχαν κατανάλωσιν) which he presented.

TO'la (Heb. Tola', תולא), a worm, as in Exod. xvi, 29; Sept. Θολαδ v. r. Θολαθ, etc.; Vulg. Thorla), the name of two Hebrews.

1. The first-born of Issachar (Gen. xli, 13; 1 Chron. vi, 1). B.C. 1856. He had six sons (vii, 2), who became progenitors of families known collectively as the Tolaithes (Numb. xxvi, 23), and these in David's time mustered 22,600 fighting soldiers (I Chron. xi, 52).

2. Judge of Israel after Abimelech (Judg. x, 1). He is described in that passage as "the son of Puah, the son of Dodo, a man of Issachar." In the Sept. and Vulg. he is made the son of Abimelech's uncle, Dodo (Ἰσχυρός) being considered an appellative. But Gideon, Abimelech's father, was a Manassesite. Tola judged Israel for twenty-three years (B.C. 1819-1596) at Shamir in Manasseh ( Judges x, 15). The name Josephus does not mention him (Ant. v, 7, 6); but (as Whitson remarks) inasmuch as the total of the years there agree, his name seems to have fallen out of our copies. See JUDG.

TO'lad (Heb. To'lad, תּוֹלַד, birth; Sept. Θολάδ v. r. Θολάθι; Vulg. Tholades), one of the towns in the tribe of Simeon in David's time (1 Chron. iv, 29); probably the same elsewhere (Josh. xii, 30) called E'TOLAD (q. v.).

TO'la'ite (Heb. To'lati, תולאתי, patrimonious; Sept. Θολαθί; Vulg. Tholathites), the general name of the descendents of Tola (q. v.) the son of Issachar (Numb. xxvi, 29).

Toland, JOHN, one of the founders of modern deism, was born Nov. 30, 1669 or 1670, in the most northern isle of Ireland. His Christian-name was James Junius, but after his master ordered him to be called John, which name he retained ever after. From the school at Redcastle, near Londonderry, he went, in 1687, to the College of Glasgow, and after three years' stay there visited the University of Edinburgh, where he was made A.M. in June, 1690. He afterwards went to the University of Oxford, which he supported by some eminent Dissenters in England. After a residence there of two years, he returned to England, and went to Oxford, which place he left in 1693, and went to London, whence he returned to Ireland in 1657. But so strong was the feeling aroused by his deistic notions and his own imprudent conduct that he soon returned to London. He accompanied the earl of Mac- clesfield to Hanover in 1701, and also made an excursion to Berlin, at which latter place he remained for some time, and then returned to England. In the spring of 1707 he again visited Germany, Holland, etc., reaching England in 1710. He died at Putney, near London, March 11, 1722. Of his many treatises we notice, Christianity not Mysterious (Lond. 1696, 8vo), which elicited at least fifty-four replies—An Apology for Mr. Toland (ibid. 1697)—An Anti-mor, or a Defence of Milton's Life, etc. (1699, 8vo); this attack upon the canon of the New Testament was answered by Samuel Clarke, Jeremiah Jones, Stephen Nye, and John Richardson—Socinianism Truly Stated (1705)—Dissertations dum: Ailedmonden et Origines Judaeicae (1709, 8vo)—Nasareus (ibid. 1718, 8vo)—History of the Druids (Mont- rouse, 1814, 8vo), etc. See Allibone, Dict. of Brit. and American Authors, s. v.; Chalmers, Bibio. Dict. a. v.; Contemp. Rev. June, 1869.
TOLBANES

Tolbanes (Sept. Tolbhanes, Vulg. Tolbanes), a corrupt Grecized form (1 Esdr. ix. 25) for the name Telem (q. v.) of the Hebrew text (Ex. x. 24).

Toledo, Councils of (Concilium Toledoense). These councils, of which there were twenty-four, were held in the city of Toledo, in the province of the same name, in Spain. Toledo is the seat of a diocese, which has a cathedral, founded in 1258, and completed in 1492; a founding hospital, founded by cardinal Mendoza in 1494; and a theological seminary.

I. The First Council of Toledo was held on Sept. 1, 400, under Paternus, the bishop. The reason for assembling this council, which was the first of the bishops, was the troubles and disturbances caused by the heresy of the Priscillianists, which sprang up towards the close of the 4th century. Nineteen bishops, from all the Spanish provinces, attended. Many of the sect of the Priscillianists who presented themselves were received back into communion with the Church after having abjured their errors. In this council the bishop of Rome is, for the first time, spoken of simply by the title of "pope." Twenty canons were also published.

1. Permits to admit married men to the office of deacon were revoked, and only virgins will observe canonical vows.

2. Forbids to admit to any higher order than that of sub-deacon a man who has publicly done penance, and even revokes the administration of the anointing of the sick.

3. Enacts that a sub-deacon, marrying a second time, shall be reduced to the rank of porter or reader, and shall live to fulfill the office of porter; and the Good Lord will hold him accountable if he marry a third time, he shall be separated from the Church for two years, and then be admitted to lay communion only.

4. Deprives all priests and clerks who, having been appointed to any church in town or country, do not assist diligently at mass.

5. Permits clerks whose wives do not lead a decent life to bind them or shut them up, and to make them fast; forbids them to eat with them until they have done penance.

6. Forbids a clerk to leave his own bishop in order to attach himself to another.

7. Warns that they shall attend the other offices of the Church, but who do not communicate, that they must either receive the holy communion, or take place among the penitents, upon pain of excommunication.

8. Orders that any one who shall have received the holy eucharist without eating it shall be driven from the Church as guilty of sacrilege.

9. Excommunicates a married man keeping a concubine; but permits unmarried men to do so. Allows either a wife or a concubine to receive holy communion.

10. Restricts the consecration of the chalice to the bishop, and restrains priests from consecrating a deacon or subdeacon to the bishop at Easter, in order to receive it from him.

See Mansi, Concil. ii. 1229.

II. The Second Council of Toledo was held about 447, during the papedom of Leo I, against the Priscillianists. Nineteen bishops attended, who condemned the heresy and the followers of Priscillian in a formulary of faith directed against all heresies, to which eighteen anathemas are attached. See Mansi, Concil. iii. 1465; Baronius, ann. 447, § 17, etc.

III. The Third Council of Toledo was held May 17, 581; Montanus, bishop of Toledo, presiding over seven other bishops. Five canons were published.

1. Relates to the treatment of children offered by their parents to be brought up for holy orders. Other relatives to the clergy, the preservation of church property.

In this council Toledo is, for the first time, spoken of as a metropolitan see. See Mansi, Concil. iv. 1784.

IV. The Fourth Council of Toledo was held May 8, 589; Leander, the primate of Seville, presiding over seventy-two bishops, from the different provinces under the rule of King Recaredus, who attended in person. These canons were also divinely present. The main object of the council was to confirm the conversion of the Goths who had abandoned Arianism, and who here presented a confession of faith, in which they declared their assent to the first four ecumenical councils, and anathematized the principal errors of the Arian party.

Twenty-three canons were published, and many anathemas directed, as against other heresies and evils, so against those who deny the procession of the Holy Ghost from the Father and the Son, and those who refuse to anathematize the council of Ariminum.

2. Directs, that according to the king's wish, the Constantinopolitan creed shall be sung by the people in every church on Thursday, twenty-four days before the Lord's Prayer in the euchological office.

3. Relates to the rule of continence to be observed by heretical bishops and priests. Forbids them to desert the church, when reconciled to the Church, as well as all clerks.

4. Orders that some portion of Holy Scripture shall be read daily at the services of priests, to prevent idle conversation.

5. And 11. Relate to the reception of ordination without penance; forbids the bishop to ordain without first cutting off the hair of the penitent, if a man, or changing his attire, if a woman.

14. Forbids Jews to have Christian women for wives or concubines.

15. Leave it to the bishop to fix the endowment to be given to a newly founded church.

Forbids to say anything but psalms at the funerals of the religious.

See Mansi, v. 997.

V. The Fifth Council of Toledo was held May 17, 597; sixteen bishops attended; two canons only remain, and the subscription of thirteen bishops only appear.

1. Orders that priests and deacons who will not observe the law of continence shall be degraded, shut up in a cloister, and put to penance.

2. Forbids the bishop to appropriate to himself the revenues of any church, or any member in his diocese, and declares that they belong to the ministering priest.

See Mansi, v. 1608.

VI. The Sixth Council of Toledo was held in 610; Aurusius, bishop of Toledo, presiding over fifteen bishops. The primacy of the see of Toledo over all the churches of Carthagina was established, and subsequently confirmed by an edict of king Gundemar.

See Mansi, v. 1620.

VII. A national council was held in this city on Dec. 9, 635, assembled from the whole of Spain, and that part of Gaul which was in subjection to the Goths; Isidore of Seville presided, sixty-six archbishops and bishops being present; among them were the metropolitans of Narbonne, Merida, Braga, Toledo, and Tarragona. Seventy-five canons were published.

1. Contains a profession of faith upon the subject of the Blessed Trinity and the incarnation.

2. Directs that the same words of a prayer and of a psalmody shall be observed throughout the kingdom, and the same manner of celebrating mass.

3. Orders that a provincial council shall be held annually, if possible; otherwise a council in each province.

4. Relates to the management of holding synods, and of some length. It orders that on the second day of the synod the church shall be cleared before sunrise and all the doors shall be shut; and that priests shall enter first and take their seats in a circle, according to the date of their consecration; then the priests shall discharge them, who are ordered to stand in sight of the bishops, and, last of all, the laity and notaries. This done, the door is directed to be shut, and silence and devotion enjoined upon all. Then the archdeacon, standing up, shall bid them pray; upon which all shall prostrate themselves upon the floor, and, after private prayer mingled with hope and tears, one of the bishops shall rise up and say a prayer, to which an answer Amen. All having risen up, when their places are filled, an all shall read the canons relating to the holding of councils, and the metropolitan shall invite the bishops to proceed to business. orders the synod to proceed to another matter until the first has been disposed of. Any clerk or layman desiring to appeal to the council is enjoined to mention his cause to the metropolitan archdeacon, who shall declare it to the council. No bishop is allowed to leave the synod before the others shall have the council be dissolved until everything is settled.

5. Directs that metropolitan shall consult together before Ephesians are to be published, for the removal of sin from, and to prevent schism.

6. Approves of leaving the question about single and twice immersion open; but orders single immersion to be practiced throughout the kingdom, to prevent schism.

7. Orders that the Passion be preached on Good-Friday, and that the people, in an audible voice, ask forgiveness of their sins. In the same year, that is, 642, an edict was published, from sin, they may worthy celebrate the great festival of Easter, and partake of the holy eucharist with a pure heart.
8. Deprives of the Easter communion those who break their fast on Good-Friday before sunrise, excepting being made in favor of old and sick persons and children.

9. Relates to the benefaction of the caudles, etc., on Easter-eve.

10. Is directed against an abuse then prevalent in many churches in which the Lord's Prayer was said on Sundays only; orders all clerks to say it daily at the office, either openly or privately.

11. Forbids to sing the Hallelujah during Lent.

12. Orders that immediately after the epistle the gospel shall be sung and to be followed by the Litanies, which in some churches were improperly sung after the epistle.

13. Condemns the opinion of those who deemed it wrong to sing hymns composed by men in honor of the apostles and the name of Christ, taken out of Holy Scripture nor authorized by tradition.

14. Orders that the canticle Benedicta Opera Omnis be sung on Sundays and fast-days at mass at the outset of the chancel (in pulpos).

15. Orders, under pain of excommunication, that at the end of each psalm shall be sung, "Honor be to the Father," etc., and not merely "Glory be," etc.

16. Excommunicates those who refuse to acknowledge the inspiration of the Apocalypse, and also those who refuse to read it in church from Easter to Pentecost.

17. Enumerates the cases in which persons may not be admitted to holy orders.

18. Is directed against ignorance in the clergy; requires them to be acquainted with Holy Scripture and the canons.

19. Orders that a priest when appointed to any parish shall receive the office of the rural vicar-bishop, and that when the priests attend the litany or synod they shall give account to the bishop of their manner of celebrating the mass, and any thing that shall be done.

20. Forbids the bishop to take for his own share more than one third of the revenue of the churches within his diocese.

21. Expresses that thirty years' possession shall give a bishop the right to dispose of a Church in the diocese of another bishop if in the same province.

22. Forbids the deacons to pretend to the privileges of the presbyter and to sit in the first places.

23. Forbids them to wear two stoles, which it declares to be unfit for even a bishop or priest; directs them to wear three or five stoles and other officers, correcting those who infringe the rules, etc.

24. Enacts that monks forsaking the monastic state in order to marry and settle in the world shall be brought back and put to penance.

25. Prays the Jews to profess Christianity; with regard to the compulsory conversions under king Sisbeertus, it allows that they should continue to be confessed and received, because they had received baptism, chrism, and the holy eucharist.

26. The following nine relate to the Jews, and to Christians who had apostatized to Judaism.

27. The sixth and following eight relate to the case of slaves.

28. Anathematizes all who conspire against regal authority.

VIII. The Eighth Council of Toledo was held in 636, under king Chintila, Eugenius, bishop of Toledo, preceding; twenty-two bishops in all were present. Nine canons were published, of which

1. Orders public litanies every year for three days, beginning the last day of the Easter octave and concluding on the second Sunday, in case the latter days were to be observed in the week following.

All the others relate to the prince and the strengthening of his powers, etc. See Mansi, v. 1735.

X. Held Jan. 9, 636, under Silva, metropolitan of Narbonne, in the third year of the reign of king Chintila. Fifty-two Spanish and Gallic bishops were present, either in person or by deputy. Eighteen canons were published.

3. Enacts that for the future no king should ascend the throne without making a vow to defend the Catholic faith and the rights of the bishops, and pronounces anathema against those who should violate this oath.

4. Orders that persons who, after having been admitted to penance, quit that state and resume the secular dress shall be arrested by the bishop, and compelled to perform their course of penance, whether they will or no.

Floury observes that this is the first time that we find mention of this compulsory penance, which evinced entire ignorance of the sound practice of antiquity. See Mansi, v. 1740.

X. The Tenth Council was held about 646, under king Chintasuinthus, by twenty-eight bishops present and the deputies of eleven who were absent. Six canons were published.

1. Allows the bishop, or any other priest who may be present, to complete the celebration of the sacred mysteries of the Church, even after the ordinary time, through sickness; excommunicates those who, without such cause, leave the celebration unfulfilled, or who celebrate after having partaken of the slightest particle of food.

See Mansi, v. 1803.

XI. This council was held in 658, under Orontius of Merida; the king, Rosasuinthus, being present, and fifty-two bishops, with the deputies of ten absent. The prince reads his profession of faith, in which he acknowledged the first four euchumenical councils. Twelve canons were published.

1. Contains a definition of faith.

2. Condemns all oaths and vows to commit evil actions.

3. Condemns all persons guilty of simony.

4. Condemns those who forswear the episcopal or sacerdotal order, in order to be able to profit by the holy office unwillingly; orders those who so return into the world and marry to be shut up for life in a monastery.

5. Forbids ordination of ignorant clerics.

6. Excludes from the Easter communion and from the privilege of eating meat for twelve months those who break the Lenten fast.

7. Confirms the canons of a former council concerning the Jews.

Besides the bishops and deputies present, we find among the three ambassadors from Spain, one ambassador from Toledo, and sixteen counts. After the subscriptions there is a synodal decree concerning the disposition of the king's property, and an edict of the king confirming it. See Mansi, vi. 394.

XII. The Twelfth Council of Toledo was held Nov. 2, 656, Eugenius, the bishop, presenting; sixteen bishops attended, and seventeen canons were published, most of which tend to repress the abuses committed by bishops in the administration of Church property.

11. Forbids to confer orders upon the slaves of the Church except they have been first set free by the bishop.

12. Forbids the presence of the bishops, who, being added to the assemblies of the Christians on all Jewish festivals.

See Mansi, vi. 451.

XIII. Held Dec. 1, 656, under Recceasuinthus; twenty-three bishops were present, among whom were Eugenius, the metropolitan of Toledo; Fugitius, the metropolitan of Seville; and St. Fructuosus, the metropolitan of Braga; five bishops who were absent sent deputies. Seven canons were published.

1. Orders all the bishops of the Western Church to conform to the use of the Roman rites in the liturgy in the Metropolitan Church.

2. Forbids to suffer priests who are at variance to approach the altar or to receive their offerings.

See Mansi, vi. 459.
XX. This council was held Nov. 9, 694. The subscriptions of the bishops present are lost. Eight canons were published.

1. Directs that, during the three days preceding the opening of the council, no one, whether on pain of death or duration such a strict fast ought to be observed, nothing shall be discussed which does not refer to matters of faith, morals, and ecclesiastical discipline.

2. Ordains that bishops, following the example of our Lord, shall wash the feet of the poor on Holy Thursday.

3. Condemns to excommunication and perpetual imprisonment those who, from a vile and wicked superstition, shall say the office of the mass for the dead for the living, in order by so doing to cause their death.

See Mansi, vi, 1861.

XXI. This council was held Nov. 21, 829, by John, archbishop of Toledo. Eight canons were published, in the preface to which it is ordered that they shall be observed together with those which the legate William de Gundi, bishop of Sabino, had made in the Council of Valladolid (1822). These canons, among other things, order bishops to attend the synods, and relate to the conduct and dress of clerks; forbid priests to demand anything for masses said by them, but allow them to receive voluntary offerings; forbid to say more than one mass in a day, except on Christmas day. See Mansi, vi, 1712.

XXII. This was held in 839 by Zigidius, archbishop of Toledo, six bishops being present. Five canons were published.

1. Forbids to ordain any illiterate person.

2. Provides that in cathedral or collegiate churches some shall be compelled to study theology, the canon law, and the liberal arts. See Mansi, vi, 1790.

3. Orders all rectors to keep a list of such of their parishioners as are of age, in order to effect the observation of the canon "contrastricse sexae.

See Mansi, vi, 1809.

XXIII. (Also called Council of Aranda.) Held Dec. 5, 1473, in the borough of Aranda, by Alphonse de Carille, archbishop of Toledo. This council was numerously attended, and twenty-nine canons were published.

1. Orders that provincial councils shall be held bimonthly and diocesan synods annually.

2. Orders curates to instruct their flocks in the principal articles of the faith.

3. Forbids to promote to holy orders persons ignorant of Latin.

4. Forbids to receive a clerk from another diocese without letters from his bishop.

5. Forbids ecclesiastics to wear mourning.

6. Forbids the punishment of incompetent clerks.

7. Forbids the consecration of prebends on persons ignorant of Latin, unless, for good cause, the bishop shall consecrate them with the consent of the diocesan council.

8. Forbids the price of spiritual goods.

9. Forbids the celebration of marriages at uncanonical times.

10. Forbids the celebration of marriages between persons of different conditions.

11. Relates to the dress of bishops and clerks; forbids them to wear clothes made of red, green, and white silk, shoes, and other clothes, except to the order of the diocesan council.

12. Sets the conditions of marriage in the diocesan councils.

13. Forbids the celebration of marriages at uncanonical times.

14. Forbids the celebration of marriages between persons of different conditions.

15. Forbids the price of spiritual goods.

16. Relates to the dress of bishops and clerks; forbids them to wear clothes made of red, green, and white silk, shoes, and other clothes, except to the order of the diocesan council.

17. Sets the conditions of marriage in the diocesan councils.
Toledo (French Tole), Francisco de, a Spanish cardinal, was born at Cordova, Nov. 10, 1592. His education was gained at the University of Salamanca, and, after receiving his degree, he taught philosophy in the same institution. In 1588 he joined the Jesuits, and was sent to Rome to teach theology. Pius V, admiring his eloquence and his services in the higher office in ordinary, and Toledo held the position under four succeeding popes. At the same time he was councillor of the Inquisition, and was employed in many ecclesiastical embassies. Among others, he went to Germany to urge a league with Poland against the Turks. Clement VIII gave him the cardinal's hat in 1593. Toledo died at Rome, Sept. 14, 1596. His works are chiefly commentaries: In Jovannis Evangelii (Rome, 1588):—In XII Capita Evangelii secundam Lucam (Venice, 1601, fol.).—In Epistolam Pauli ad Romanos (Rome, 1602, 4to).—Summa Casuum Conscientiae (ibid. 1602; Lyons, 1630, 4to); See Antonio, Bibl. Hist. Nova; De Thou, Hist. sui Temp.—Hoefler, Nouv. Biog. Generale, a. v.

Toledo, Roderigo de, an eminent Spanish ecclesiastic, was born at Rada, in Navarre, about 1170. He was sent to Paris to complete his education, and on his return he attached himself to Sancho V, king of Navarre, and was employed in the peace negotiate with Alfonso VIII of Castile. Procuring the favor of Alfonso, he was appointed by him bishop of Siguenza, and was afterwards made archbishop of Toledo. He showed great zeal in the frequent wars with the Moors, often directing in person inroads upon the Mohammedan territory. Nor did he have any less zeal for learning; he persuaded Alfonso to found the University of Salamanca. At the Fourth Lateran Council he not only handed the fathers in elegant Latin, but gained over the secular nobles and ambassadors by conversing with each of them in their mother tongue. He died in France in 1217, after attending the Council of Lyons convoked by Innocent IV. He wrote several historical works, most of which are still unread. His Relia in Hispanic Gestarum Chronicon (Granada, 1645) is an invaluable production. It was subsequently published in a collection entitled Hispanic Illustrata, by Andreas Schott (Frankl. 1605, 4 vols. fol.). He also wrote, Historiar Arabum, published in vol. ii. of Andreas Schott's collection (1600); and subsequently (1625) by Erpenius, as an appendix to his Historia Saracenica of Georgius Elmacin. He wrote a history of the Ostrogoths, of the Huns, Vandals, Suevi, Alans, and Silingi, published by R. Bell, in the collection entitled Rerum Hispanicumum Scriptores Aegroti (Frankl. 1579, 3 vols. fol.).—also Breviarium Ecclesiae Catholicae, and others still unedited.

Toledoth Jeshu (תולדות ישוע), i.e. History of Jesus). Under this title a Jewish apocryphal work, or rather libel, is extant, purporting to give the history of Jesus. It first became known to Christians in the 15th century, and the Latin version is called the authorless and in itself is not known. In reality, we have two such books, each called Toledoth Jeshu, not recensions of an earlier text, but independent collections of the stories circulating among the Jews relative to the life of Christ. The name of Jesus, which in Hebrew is Joshua or Yehoshua, is in both contractions into Jeshu by the dropping of an Ain, יי for יי. Elias in Tishbi, s. v. "Jeshu," says, "Because the Jews will not acknowledge him to be the Saviour, they do not call him Jesus, but reject the Ain and call him Jeshu." Rabbi Abraham Perizol, or Farrissol, in his book Moggen Abraham, c. 55, says, "His name was Jesha, but as rabbi Moses Maimonides has written it, and as we find it throughout the Talmud, it is written Jeshu. They have carefully left out the Ain because he was not able to save himself." By omitting the Ain, the Cabalists gave a signification to the name. In its curtained form it is composed of the letters Jud, Shin, Vav, which are taken to stand for יי יי יי, i.e. "his name and remembrance shall be extinguished." This is the reason given in the Toledoth Jeshu.

The Toledoth Jeshu was known to Luther, who condemned it in his Schm Hemphoras (see his Werke [Hemberg, 1566], v. 509-535), as the following passage (p. 515) will show: "The proud evil spirit carries on all sorts of mockery in this book. First he mocks God, the Creator of heaven and earth, and his Son Jesus Christ, as you may see for yourself, if you believe as a Christian that Christ is the Son of God. Next he mocks us, all Christendom, in that we believe in such a Son of God. Thirdly, he mocks his own fellow-Jews, telling them such disgraceful, foolish, senseless, gross, as of brazen dogs and cabbage-stalks and such like, enough to make all dogs quiver with fear. If you stand at such a pack of idiotic, blustering, raging, nonsensical fools. Is not that a masterpiece of mockery which can thus work all three at once? The fourth mockery is this, that whoever wrote it has made a fool of himself, as we, thank God, may see any day." Voltaire also knew the work; for in his Lettres sur les Juifs (Oeuvres, i, 69, p. 86) he says, "Le Toledos Jeschu est le plus ancien écrit Juif qui nous ait été transmis contre notre religion. C'est une vie de Jesus-Christ, toute contraire à nos Saints Évangiles: elle paraît être du premier siècle, et même écrite avant les évangiles. H e evidently intended to identify this with the one mentioned by Justin Martyr in his colloquy with Tryphon, xvii, 108. Of the two widely differing recensions of this book of unknown authorship, the first edition was published by Wagensell, in his Pela Ignea Satones, etc. (Altdorf, 1681); the second by Huldreich, at Leyden, in 1709, under the title Historia Jeschua Nazorei, a Judaeis Blasphemata Corrupta. Neither can boast of an antiquity greater than that, at the outside, the 12th century. It is difficult to say, with certainty, which is the earlier of the two. Probably both came into use about the same time, and the second certainly reflects the Germano for it appeals of Worms in the Germanic manner. According to the first, Jesus was born in the year of the world 4671 = B.C. 910, in the reign of Alexander Janneus (B.C. 106-79). According to the second, he was born in the reign of Herod the Procyete, i.e. B.C. 70-4. A commonplace Talmudic legend is the same as to prove that they were drawn up at a very late date, and by Jews singularly ignorant of the chronology of their history. As to the contents, its blasphemies are too gross and grotesque to need further notice. Being a late and detestable compilation, put together out of fragmentary Talmudic legends, all which Jews themselves have regarded it as utterly contemptible.

Besides the editions of Wagensell and Huldreich, see Clemens, Die geheimhalten oder sogenannten apocryph
TOLERATION

TOLLNER

The allowance given to that which is not approved. The Church, as the depository and dispenser of religious truth, cannot bring within the range of its theory the allowance of that which it holds to be an error. The Church of England holds (Art. vii) that if a subject of the public conscience and of any man that anything should be believed as an article of the faith, or be thought requisite or necessary to salvation, which is not read in Holy Scripture or may not be proved thereby. But if any man profess what is clearly contrary to that which the Church has laid down as an article or the faith, then, in the Church's view, he professes what is contrary to the Scripture, and there can be no warrant for allowing that which is contrary to Scripture. The Church, however, while refusing any allowance to error, may refrain from denunciation and persecution of those who hold erroneous doctrines. — Hook, Church Dict. s. v. See Prosecution.

TOLERATION, Acts of. Previous to 1668 the statute law of Great Britain (see 55 Eliz. and 22 Car. II) forbade the public exercise of any other religion than that of the Church of England. The Toleration Act (1 Will. and Mary, c. 18) frees from the penalty of nonconformity those who take the oaths of allegiance and supremacy, and who subscribe to such a declaration as the popery of 22 Car. II, c. 1, reserving in force 25 Car. II, c. 2 and 13 Car. II, c. 1, the acts, that is, for preventing dangers which may happen from popish rebels, and for preserving the king's person and government by disabling papists from sitting in Parliament. It did not relieve Dissenters from previous fines as required members of town corporations, and all persons holding office under the crown, to receive the sacrament of the Lord's supper according to the usage of the Church of England, which were continued in force until 1829, when they were repealed by the 9 Geo. IV, c. 17. Preachers taking the oaths and subscribing the Articles of Religion, except xxxiv, xxxv, xxxvi, and the clause respecting the power and authority of the Church, are freed from the penalties of the Act of Nonconformity; and Baptist preachers are excepted under Art. xxvii touching infant baptism. Quakers, upon making a declaration of adherence to and subscribing a profession of Christian belief, are exempted from the oaths and enjoy the privileges of other Dissenters.

By the 19 Geo. III, c. 44, Protestant Dissenting ministers and schoolmasters are exempted from the subscription to the articles on making and subscribing a declaration that the Scriptures contain the revealed will of God, and are received as the rule of doctrine and practice. By the 53 Geo. III, c. 106, the provisions of the Act of Will and Mary, also those of 9 and 10 Will. III respecting the denial of the Trinity, were repealed, the common law with respect to impugning the doctrine of the Trinity not being altered. By the 55 Geo. IV, c. 155, the Five-mile and Conventicle acts, and an Act relating to Quakers (18 and 14 Car. II, c. 1), are repealed; all religious assemblies of fewer than twenty persons become lawful without registration; those of more than twenty persons are to be registered and certified; and a fine of ten pounds is laid upon any two or more persons who shall assemble and congreagation assembled for worship. By 9 Geo. IV, c. 17, the Test and Corporation acts are repealed, and a declaration substituted in lieu of the sacramental test. See Blunt, Hist. of Doct. s. v.; Hook, Church Dict. s. v.

TOLLET (or Toltenaus). See Toltox.

TOLL. (ןלמ, Ezra iv, 20, or [Chald.] נלמ, iv, 13; viii, 24, tribute) so called from being measured or appornented], as Neh. v, 4) is strictly a tax for passing along a highway or other thoroughfare. See Tax; Tribute. In the Roman period taxes were collected along the roads or along the navigable waters by the postesies, or custom-houses, and were levied on the persons or property of those who had houses or booths built for them at the foot of bridges, at the mouth of rivers, and by the seashore, where they took toll of passengers that went to and fro. For this purpose they used tickets or seals, which, when a man had paid toll on one side of a river, were given him by the publican to show to him that sat on the other side that it might appear he had paid on. On these were written two great letters, larger than those in common use. Modern Oriental usages illustrate the custom referred to in Matt. ix, 9. Arriving at Persepolis, Mr. Morier says, "Here is a station of rahdars, or toll-gatherers, appointed to levy a toll upon kalfke, or caravans of merchants, and who in general exercise their office with so much brutality and extortion as to be exasperated by all travellers. The collections of the toll are farmed, consequently extortion ensues; and, as most of the rahdars receive no other emolument than what they can exact over and above the prescribed dues from the traveller, their insolvency is accounted for, and a cause sufficiently powerful is given for their insolence, on the one hand, and the detestation in which they are held, on the other. Baf-gah means the place of tribute, and rahdar is rendered in a strict sense a script of custom, and perhaps it was from a place like this that our Saviour called Matthew to follow him." See Custom.

RECEIPT OF. At Smyrna the miriji sits in the house allotted to him, as Matthew sat at the receipt of custom (or in the custom-house of Capernaum), and receives the money which is due from various persons and commodities entering the city. "The exactness and rude behavior of these men," says Mr. Hartley, "are just in character with the conduct of the publicans mentioned in the New Test. When men are guilty of such conduct as this, no wonder that they were detested in ancient times as well as publicans and in modern times as are the miriji." See Publican.

TOUllNER, JOHANN GOTTLIEB, a German theologian, was born Dec. 9, 1724, at Charlottenburg. He completed his studies at the Orphanage and the University of Halle under the guidance of Baumgarten, Knipp, Michaelis, Wolff, and Meillet, and then became private tutor and military chaplain. In 1760 he was made professor of theology and philosophy at Frankfort-on-the-Oder. He delivered four lectures each day, wrote numerous learned books—his practice being to write upon one while dictating to an amanuensis the contents of another. The latter was a parochial work, into which there was a conscious preparation and entered into most intimate and direct relations with his numerous students. He was accustomed to conduct devotional meetings after the ending of the public services of the Sabbath, and to train the students in homiletical and catechetical duties. During much of his public life his health was infirm. Extreme torments sometimes came over him when about to ascend the pulpit, and rendered it impossible for him to preach: and upon these followed asthma and a racking cough, to which he finally succumbed at the age of forty-nine years. He died Jan. 30, 1774, while uttering the word "Overcome."

Of Toller's writings, the following may perhaps be regarded as of chief importance: Gedanken von der wahren Lehre in d. dogm. Theologie (1759); — Grundriss der dogm. Theologie (1768); — Grundriss der Moral- Theologie (1773); — Grundriss der Hermeneutik (1778); — Grundriss der Dogm. Theologie. Oder ther- tige Geschorn Christs (1778); — Theologische Untersuchungen (1778). He occupied entirely orthodox ground in theology, though the ethics of Christianity held the foremost place in his thoroughly practical mind, and though he held far-reaching concessions to rationalism. With reference to confessions of faith he was independent, and with reference to the contradic-
tions of his time he stood midway between the extremes. The school of Spener and Francke had gradually come to assume a position of hostility, or at least indifference, towards science, and over against it there was the scholastic or philosophical school of the Wolf-"flian type, which undertook to demonstrate everything mathematically. Töllner regarded both extremes as overstrained, and adopted the scientific method, which regarded all dogmatic truths as constituting a science, i.e., a learned and comprehensive knowledge, and which attempted a logical explanation of every fact without the employment of any illustrations whatsoever.

Professoren des 18ten Jahrhunderts (Leips.1818), XIV, ii; Wetzter u. Welte, Kirchen-Lex. s. v.; Herzog, Real-Encyklop. s. v.

Tomasi, Jacopo Filippo, an Italian prelate, was born at Padua, Nov. 17, 1597; instructed by Benedetti of Legnano; afterwards entered the congregation of the regular canons of St. George, in Alga; and received the degree of doctor at Padua in 1619. He went to Rome, and was ordained, and consecrated especially by Urban VIII, who would have appointed him to a bishopric in the island of Candia. At his own request, this was exchanged for the see of Città Nuova, in Istria, to which he was consecrated in 1642. There he remained until his death, in 1654. He wrote, Illustrationis Virochini Ac Antiquitatum Italiae Historiae Curae, 4 vols. (Padua, 1634) — Titus Livii Patavinus (ibid., 1630, 4to). — Pietrarcha Redivivus Integrae Poetae Collebrinam V. J. Amorosi, Eo Ceolus Echilboes (ibid., 1635, 4to). — Christo- siuma Famulis Casparianis Fludela Veneta Epistolae et Orations Pusthama (ibid., 1636, 12mo). — De Domitria de Talevpi Votis (ibid., 1639, 4to). — Lusus Cerata Epistolae, cam Notia, etc. (Padua, 1640, 12mo). — Bibliotheca Patavina Manuscripta, etc. (ibid. 1659, 4to). — Bibliotheca Veneta Manuscripta, etc. (Utin. 1656, 4to).

Tomb (תומבע, a tumulus, Job xxii, 32; elsewhere "stack" or "shock" of corn; מָמוֹס, מְמֵי, or מְמֹסִים, usually "sepulchre"). The most conspicuous objects in Palestine to this day are its tombs, called, according to the person commemorated, or the purpose of commemoration, kever, or masser, or sery. One does not find this to be the case throughout Europe, where tombs are not usually conspicuous; but in Egypt and Syria they meet the eye in all directions, and are, with a few exceptions, Mohammedan erections. In Egypt, the tombs of the ancient pharaohs are the principal objects of interest. In the valley of the Nile at Thebes, the tombs of the kings and the nobility are so numerous that they are sometimes called "the buried city." In Syria, the tombs of the crusaders, and of the more modern Christians, are very remarkable and interesting. In the Sinaitic desert there are some interesting graveyards, dotted with unhuman stones and adorned with the retem, or broom; and one of these places of sepulture is known as Turbet-el-Yahhūd, the graves of the Jews. There is only one conspicuous monument in it, Kubor Nebi Harûn, the "tomb of the prophet Aaron," on Mount Hor. But soon after entering Palestine you find tombs in all directions. At Hebron you have the tomb of Abraham and the patriarcha in the well-known cave of Machpelah, marked or rather concealed by a Moslem mosque. On one of the eastern hills, seen from the heights above Hebron, you have the tomb of Lot; farther on, the tomb of Rachel; and then, as you approach Jerusalem, the tomb of David, outside the modern city, and the tomb of Samuel, on a height above Giblon, somewhat concealed. To all this, add the famous cave of the kings, near Hebron. As you traverse the land you meet with these monuments in all positions—the tomb of Jonathan near Sidon, and even the tomb of Abel a little farther north!

Besides these conspicuous objects, there are others less visible, but quite as remarkable. At Hebron there is a place called Convent, in which ancient and curious tombs cut in the rock, with loculi on all sides, which are probably patriarchal, or at least Jewish. Around Jerusalem there are numerous tombs, many of them remarkable for their beauty, their size, their peculiar structure. See JerUSALEM. Almost all of these are Jewish and give us a good idea of the number of the Jews to be buried. Whoever could afford to chose the rock, not the earth, for the covering of his body, and preferred to have his body deposited on a clean rocky shelf, not let down into and covered over with the soil. Hence our ideas of burial are not the same as those of the Jews. According to us, there is always the letting down into the earth; according to them, there is the taking possession of some stony chamber for the last sleep. Hence the expression "buried with him by baptism into death" would not to a Hebrew suggest immersion, as it seems to do to us, and to the Christian symbol of baptismal burial would be associated with the Lord's own tomb.

The first mention of a kever, or burying-place, in Scripture is in Gen. xxiii, 4, where Abraham asks the sons of Heth for the "possession of a kever," receiving for answer, "In the choice of our kebers bury thy dead." After this there is frequent mention of these sepulchres, and some of them are specially singled out for notice. Yet Machpelah was the most memorable; and we know not if ever a tomb was more touchingly and poetically described than by Jacob on his death-bed in Egypt, when looking back on the land from which he was driven into exile; his vision of his future home, he points as with his finger to the well-known patriarchal burying-place—"There they buried Abraham and Sarah his wife; there they buried Isaac and Rebekah his wife; and there I buried Leah" (Gen. xliv. 31). We have also Kibroth-hatavasah, the graves of lust, in the wilderness (Num. xxi, 8); the tomb of Joash in Ophrah, where Gideon was buried (Judg. viii. 22); the tomb of Manoah between Zorah and Eshtaol, where Samson was buried (xvi. 31); the tomb of Zeruiah (her husband) in Bethlehem, where Asahel was buried (2 Sam. ii, 32); the tomb of Abner in Hebron (iii, 24, 12); the tomb in Gilgal of Ahishophel's father, where his suicide son was buried; the paternal and maternal tomb in Gilead, in which Barzillai sought burial (xix, 37); the tomb of Kish in Zelah, where the bones of Saul and Jonathan were deposited (xxi, 14); the tomb of the old prophet in Bethel (1 Kings xii, 30); the tomb of Elisha in Dothan; the tomb of Jesus (Matt. xxvii, 59); the tombs of the "children of the people," in the valley of the Kidron (xxiii, 6); the "Mount," "near" Bethel (ver. 16); the tombs or tombs of David (Neh. iii, 16); the tombs of the kings of the 2 Chron. xxvi. 20. The New-Test. references to "tombs" are chiefly in reference to the place of the resurrection, and is called sometimes παλατος (Matt. xxviii. 61), sometimes μειδα, μειδα (Luke xxiii. 55), and sometimes μειδα (John xxi. 41).

At this day the tombs of Syria are either like our own, underground, as at Hebron, Tiberias, and the valley of Jeohophath; or above ground, in artificial excavations in the rock, as in the ride south of Jerusalem (Acedama), the tombs of the prophets on Olivet, the tombs of the kings and judges north and north-west of the city; or entirely above ground, as the tomb of Rachel, of Abasheal, of Samson, and of Michal.

All (in Jewish ages) who could bear the cost seem to have chosen the rocky excavation for sepulture, as in the case of Joseph of Arimathaea. This is evident from such a passage as Isa. xxiii, 16, addressed to Sheba the treasurer, "What hast thou here, and whom hast thou taken death? He that is slain is not for thee now. As thou carriest the dead, cast it on the edge of the rock, that graveth an habitation for himself in a rock?" It is supposed by Lowth, Scott, Alexander, etc., that Sheba was a foreigner, and that the questions what and whom refer to this, implying that he had no right to such a place, and that he rather desired, or bought, the privilege, so that, as no Gentile could inherit the land, none could obtain such a place for a tomb as he could
call his own. The question then would be, “What connection have thou with Israel that thou assumest one of Israel's special privileges?” Possibly, however, he was only a person of low origin from a distant part of the country, and of ungodly principles, who vainly thought to establish for himself a name and a place in Jerusalem.

The large tombs, such as those of the kings and judges, have no inscriptions; but the flat stones in the valley of Jehoshaphat have their epitaphs, some of considerable length in Hebrew, with the title "שְׁלוֹם" (sho'el) at the top, that word meaning originally a cippus or pillar (2 Kings xxiii, 17; Ezek. xxxix, 10), and in Talmudical Hebrew denoting a sign or mark (Levi, Legum Sacrae, vol. v, s. v., Carpzov, Notes on Goodwin, p. 645). This last writer tells us that the use of such a mark was specially to warn off passers-by lest they should contract uncleanness by touching the grave. For this end, also, the tombs were whitewashed every year on the 15th of Avar (Lamy, Apparatus Biblicus, I, xiv). See SURGHIAN.

Tomb, John, a learned Baptist divine, was born at Bewdley, in Worcestershire, in 1608, and graduated at Magdalen Hall, Oxford. There he gained such a distinction for ability and learning that he was appointed, in 1624, catechetical lecturer, which position he held for about seven years. He then, we may presume, took orders and went to Worcester, and after that to Leominster, Herefordshire, of which he had the living. Being obliged to leave it in 1641 by the king's soldiers, he went to Bristol, where the parliamentary general, Fiennes, gave him the living of All-Saints'. The next year he removed to London, when he made known his scruples respecting infant baptism; and not only made no conversions among the clergy, but, being appointed preacher at Fenchurch, his congregation refused him both hearing and stipend. He accepted a call from Temple Church, where he remained four years, when he was dismissed for publishing a treatise on infant baptism. After this he went to Bewdley, and there formed a Baptist church, while he continued minister of the parish, and had also the parsonage of Ross given to him. This last he resigned on being made master of Ledbury Hospital; and, his parishioners at Bewdley having forsaken him, he was restored to his first living at Leominster, and these two he held till the Reformation. He died at Salisbury, May 22, 1676. He published many tracts against infant baptism, Romanists, and Socinians.

Tombstone is a mark of a grave, or a monument, to remind the passer-by that a person is buried beneath. In the earliest ages a heap of stones, or a single upright stone, such as the megalith, seems to have marked the resting-place of the dead. Among the early Britons the cromlech—that is, two or three stones standing upright, with one or more across them on the top—was a common form of tomb. But contemporary with them was the simplest of all structures, the mound of earth.

When the Romans came, they brought over with them, among other customs, their modes of burial. Considering the time of their occupation, the remains of their tombs belonging to this period are not so numerous as might be expected; but still there are several, and in most cases they consisted of a single stone with an inscription commonly addressed to one or more of the heathen gods. A few instances of stone coffins of this period have been found, as at York. To this kind of tomb, or rather stone coffin, the name of sarcophagus is usually applied.

The Saxon marks of interment were probably mounds of earth only; and it is only by the nature of the pottery or other implements and articles of dress found in the graves that the burial-places of the Saxons can be distinguished from those of the Britons. Of course among the later Saxons, when Christianity prevailed and they were buried in the church-yard, more lasting memorials were erected, though, with the exception, perhaps, of a few doubtful fragments, we have no examples to refer to.

The sepulchral monuments throughout the Middle Ages were of great importance from an architectural point of view; and, while we find them following the prevailing style, we frequently find also that to them was lavished the most elaborate work possible. The examples which remain to us are those which were placed within the church. No doubt there were many tombs of no mean design or work placed in the church-yard, but they have, for the most part, perished.

Of the former we have many of the 12th century (some, perhaps, of the 11th). The covers of these were at first simply coped, afterwards frequently ornamented with crosses of various kinds and other devices, and sometimes had inscriptions on them; subsequently they were sculptured with recumbent figures in high-relief, but still generally diminishing in width from the head to the feet to fit the coffins of which they formed the lids. Many of the figures of this period represent knights in armor with their legs crossed; these are supposed to have been either Templars, or such as had joined, or vowed to join, in a crusade to the Holy Land. The figures usually had canopies, which were often richly carved over the heads, supported on small shafts which ran along each side of the effigy, the whole worked in the same block of stone. This kind of tomb was sometimes placed beneath a low arch or recess.
formed within the substance of the church wall, usually about seven feet in length, and not more than three feet above the coffin, even in the centre. These arches were at first semicircular or segmental at the top, afterwards obtusely pointed; they often remain when the figure or brass, and perhaps the coffin itself, has long disappeared and been forgotten. On many tombs of the 18th century there are plain pediment-shaped canopies over the heads of the recumbent effigies, the earliest of which contain a pointed trefoil-arched recess. Towards the end of the century, these canopies became gradually enriched with crockets, finials, and other architectural details.

In the reign of Edward I the tombs of persons of rank began to be ornamented on the sides with armorial bearings and small sculptured statues within pedimental canopied recesses; and from these we may progressively trace the peculiar miniaute and enrichments of every style of ecclesiastical architecture up to the Reformation.

Altar, or table tombs, called by Leland “high tombs,” with recumbent effigies, are common during the whole of the 14th century. These sometimes appear beneath splendid pyramidal canopies, as the tomb of Edward II in Gloucester Cathedral, Hugh le Despenser and Sir Guy de Brian at Tewkesbury; or flat testoons, as the tombs of Edward III and Richard II at Westminster, and Edward the Black Prince at Canterbury. Towards the middle of the 15th century the canopies commenced, and in the earlier part of the 14th prevailed, of inlaying flat stone with brasses; and sepulchral inscriptions, though they had not yet become general, are more frequently to be met with. The sides of these tombs are sometimes relieved with niches, surmounted by decorated pediments, each containing a small sculptured figure, sometimes with arched panels filled with tracery. Other tombs about the same period, but more frequently in the 15th century, were decorated along the sides with large square-panelled compartments, richly foliated or quatrefoiled, and containing shields.

Many of the tombs of the 15th and 16th centuries appear beneath arched recesses fixed in or projecting from the wall, and enclosing the tomb on three sides. These were constructed so as to form canopies, which are often of the most elaborate and costly workmanship: they are frequently flat at the top, particularly in the later period. These canopies were sometimes of carved wood of very elaborate workmanship; and sometimes the altar-tomb of an earlier date was at a later period enclosed within a screen of open-work, with a groined stone canopy, and an upper story of wood, forming a mortuary chapel or chantry, as the shrine of St. Frideswide at Christ Church, Oxford.

In the early part of the 16th century the monuments were generally of a similar character to those of the preceding age; but alabaster slabs with figures on them, cut in outline, were frequently used. The altar-tombs with figures in niches, carved in bold relief, were also frequently of alabaster, which was extensively quarried in Derbyshire. Towards the middle of this century the Italian style of architecture had come into general use; Wade’s monument, in St. Michael’s Church, Coventry, 1556, is a good example of the mixture of the two styles which then prevailed.

In the two following centuries every sort of barbarism was introduced on funeral monuments: but the ancient style lingered longer in some places than in others. The tomb of Sir Thomas Pope, founder of
Tomline, George, D.D., a prelate of the Church of England, was educated at St. John's College, Cambridge, from which he graduated in 1822. After having served for several years as minister of St. Matthew's Chapel, Spring Gardens, Westminster, he was nominated, in 1842, to the bishopric of Gibraltar, which extends over Malta and the neighboring islands. He died at Gibraltar in 1863. See Amer. Quart. Church Rev., April, 1868, p. 154.

Tomlinson, Joseph Smith, D.D., a minister of the Methodist Episcopal Church, was born in Georgetown, Ky., March 15, 1802. He was educated at the Transylvania University, and was licensed to preach before his graduation in 1825. He was appointed professor of mathematics and natural philosophy of Augusta College the same year, and also admitted to the traveling connection. In due time he was ordained both deacon and elder. After having served some time as professor of Augusta College, he was chosen its president, and held the office until the institution ceased to exist in 1859. He subsequently was elected to a professorship in the Ohio Wesleyan University, Delaware, Ohio, but did not accept it, though he acted as agent for the institution for two years. He then accepted a professorship in the Ohio University at Athens, and after a year's service was chosen its president. This he declined because of ill health. Subsequently, he was invited to the presidency of the Springfield High-school and of the State University of Indiana, both of which he declined under the conviction that the state of his body and mind disqualified him for them. He died at Neville, Ohio, June 4, 1868. Dr. Tomlinson was a man of superior accomplishments; as a preacher and pulpit orator, his high reputation was well founded; and his religious life was pure and consistent. See Sprague, Annals of the Amer. Pulpit, vii, 706.

Tommasi, Giuseppe Maria, a learned Italian cardinal, and son of Julius Tommasi, duke of Palmia, was born at Alcata, Sicily, Sept. 14, 1649. He entered the society of the Theatines, and cardinal Alabani, when he became pope, appointed him first qualificator of the Holy Office, then consultant of the Congregation of the Rites, and lastly cardinal (May 18, 1712). This last honor he did not long enjoy, as his death occurred Jan. 1, 1713. In the Vatican and other libraries Tommasi discovered many manuscripts of special importance in ecclesiastical history, and published, Codices Sacramentorum Nongentis Anmis Vetustiores (1680, 4to), a collection of MSS.:—Responsoria et Antiquiora (1686). See Chalump, Biog. Dict. s. v.; Hoefer, Nouv. Biog. Générales, s. v.

Tongan Version. The Tonga dialect, belonging to the Polynesian or Malay languages, is spoken in Tonga, or Tongatoo, the largest of the Friendly Islands. In 1850 it was estimated to contain 9000 inhabitants, of whom considerably more than half had been converted to Christianity, the Protestants among them numbering 6000. As early as 1797 the London Missionary Society had sent nine missionaries to that island, but they had to give up that station on account of the ferocious disposition of the natives. The agents of the Wesleyan Missionary Society were at length enabled, in 1826, to settle peaceably in Tonga, and they now extend the blessings of Christian instruction to all the islands of this archipelago. At first only detached portions of Scripture with 10,000 copies, was undertaken in the year 1847, the version of the New Test, was completed, and an edition of 4000 copies left the mission press at Vava. A new edition, consisting of 10,000 copies, was furnished in 1852 by the British and Foreign Bible Society; and, owing to the rapid circulation of this edition, another with 10,000 copies was undertaken in 1857, under the editorial care of the Rev. Thomas West. In the same year the preparation for translating, printing,
TONGS

etc., of the Old Testament was commenced, which was completed in 1863. As to the results of the dissemination of the Word of God, we may notice that up to March 31, 1878, 28,180 copies, either in part or in whole, were circulated. (B.P.)

Tongue is the rendering, in the A.V., of two Heb. words: 1. נַבְרָה, nachar, melkach'ya'min (1 Kings vii, 49; 2 Chron. iv, 21; Isa. vi, 6), or נַבְרָה, nachar, melkach'ya'min (Exod. xxxv, 38; xxvii, 23 ["snuffer"]; Numb. iv, 9), both from מַבְרָה, nachar, to take, andsignifying prop. pincers, either for holding cofors or for trimming a lamp [see Snuffer]; and 2. דְּבַרָה, debarah, an axe (q. v.), as rendered in Jer. x, 8, from דְּבַרָה, debarah, to fell a tree.

Tongue (דְּבַרָה, debarah, γλῶσσα) is used in Scripture in various senses.

1. It stands, literally, for the human tongue (Judg. vii, 5; Job xxiv, 4; Ps. xxxiii, 20; xxxix, 1, 9; li, 14; lxvi, 17; Prov. xv, 2; Ezek. xiv, 12; Mark vii, 35, 36; Luke i, 64; 24; Rom. iii, 13; 1 Cor. xiv, 9; James i, 26; iii, 5, 6, 8; 1 Pet. iii, 10; Rev. xvi, 10; Eccles. vii, 6; Wisd. x, 21; 2 Macc. vii, 4), and so for the tongue of the dog (Psa. lxviii, 23), of the viper (Job xv, 16), of idols (Baruch vi, 9); the tongues of the seven brethren cut out (2 Macc. vii, 4; 10; comp. Prov. xix, 30). Various explanations have been offered why (in the passage first cited above) Gideon's three hundred followers should have been selected because they lapped water out of their hands, standing or perhaps moving onward, while they stayed and "bowed down to drink" were rejected. Josephus says that the former thereby showed their timorousness and fear of being overtaken by the enemy; and that these poor-spirited men were chosen on purpose to illustrate the power of God in the victory (4 nt, v, 3).

On Mark vii, 36, 35, Dr. A. Clarke offers the interpretation that it was the drab and stammering man himself who put his own fingers into his ears to Intimate his deafness; spat or emptied his mouth that the Saviour might look at his tongue; touched his own tongue to Intimate that he could not speak; looked up to heaven as implying divine air; and given to deny his distress under his affliction; and that our Saviour simply said, "Be opened." (Commentary.) This explanation certainly clears the passage of some obscurities.

James iii, 8, Dr. Macknight translates, "But the tongue of men no one can subdue;" that is, the tongue of other men, for this little is exhorting the Christian to subdue his own (comp. ver. 13). He observes that Ecumenius read the passage interogatively, as much as to say, "Wild beasts, birds, serpents, marine animals, have been tamed by man, and can no man tame the tongue?"

2. It is personified. "Unto me every tongue shall swear," that is, every man (Isa. xiv, 28; comp. Rom. xiv, 11; Phil. ii, 11; Isa. liv, 17). The tongue is said to rejoice (Acts ii, 26); to meditate (Psa. lii, 2); to hate (Prov. xxxi, 28); to be bridled (James i, 26); to be tamed (iii, 8; comp. Ecclus. xxxii, 18, etc.). It is apos- tonical (Psa. xiv, 2; Prov. xxvi, 21; 28; Ecclus. xxiii, 18; Prov. xxv, 8), and a proper thing to have a tongue. It is used as an instrument of knowledge and instruction (Job xxxii, 11; Isa. vi, 1; 4; Job, xvi, 6). On "the confusion of tongues," see Babel; Ethnology; Language, etc.

4. For a particular language or dialect spoken by any particular people. "Every one after his tongue" (Gen. x, 11; xxviii, 4; Exod. x, 22; Dan. i, 4; John v, 27; Acts i, 10; 4, 8, 11; xxvi, 14, 1; Cor. xii, 10; xiii, 1; xiv, 2; Rev. xvi, 16).

5. For the people speaking a language (Isa. lxvi, 18; Dan. iii, 4, 7; etc.; Rev. v, 9; vii, 9; x, 11; xix, 4; xxiv, 6; xviii, 15).

6. It is used figuratively for anything resembling a tongue in shape. Thus, "a wedge of gold," literally a "tongue" (Job. xvi, 21, 24; γλῶσσα μια μαχαίρι; Vulg. regula auran). The French still say, un lingot d'or, "a little tongue of gold," whence, by corruption, our word "ingot." The bay that looketh southward, literally "tongues" (xxv, 3; xviii, 19); a "tongue of fire" (Isa. v, 20; comp. Acts ii, 3; Isa. xii, 15).

7. Some of the Hebrew idioms, phrases, etc., formed of this word are highly expressive. Thus, "an evil-speaker" (Psa. cxxi, 11; γλῶσσα ποιήμα, literally a "man of tongue," comp. Ecclus. vii, 8, and see Ecclus. x, 11, Hebrew, or margin); a "froward" or rather "false tongue" (Prov. x, 31; γλῶσσα μια μαχαίρι, literally "a tongue of revolvements"); a "wholesome tongue" (Prov. xxv, 4; γλῶσσα ἑλεάς, literally "the healing of the tongue," reconciliation, etc.; Sept. Ιασον γλῶσσον, γλῶσσα πλακαδίας; a "backbiting tongue" (Prov. xxv, 23; γλῶσσα μια μαχαίρι, literally) "the slow of speech" (Exod. iv, 10; γλῶσσα μια μαχαίρι; literally "heavy of tongue," unfit to be an οἰκονόμος, βραβευόμενος; contrast Ecclus. iv, 29); "the tongue of the stammerer" (Isa. xxxii, 3); i.e. rude, illiterate (comp. xxxiv, 5; 6; on Is. xxx, 11), see Louth, notes on ver. 9-12; and afterwards the wild rendering of the vulgate; "a sin with the tongue" (Ecclus. xx, 18; xxvi, 8), i.e. use inadver- tent or unguarded speech; "they bend their tongues, their bowa, for lies" (Jer. ix, 8), i.e. tell determined and malicious falsehoods; "they sharpen their tongues" (Psa. civ, 3), i.e. prepare to cut the flesh (comp. lvi, 4); "to smooth the tongue" (Jer. xxiii, 31), employ flattering language: "to smile with the tongue" (Jer. xviii, 18), i.e. to traduce—if it should not be rendered, "on the tongue," alluding to a punishment for false witness; "to lie in wait with the tongue" (Ecclus. vi, 14); "to stick out the tongue" (Isa. xlix, 2), i.e. to mock; "against any of the children of Israel shall not a dog move his tongue" (Exod. xi, 7), i.e. none shall hurt them; but both Sept. and Vulg. have "not a dog belonging to the children of Israel shall howl," which, as opposed to the "great cry" in Egypt over the first-born, means, not one of the children of Israel shall have cause to woe (Josh. x, 21; Judith xi, 9). "To hide under the tongue means to have in the mouth, whether spoken of hidden wicked- ness (Job xx, 12; comp. Psa. x, 7) or delicious language (Cant. iv, 11); "the word of God in the tongue" denotes inspiration (2 Sam. xxiii, 2); "to divide the tongue" (Prov. x, 27) i.e. to rage (comp. Lxx. 10); "the blood of kindness" (Isa. xlix, 13), i.e. a sign of fury, despair, and torment (Rev. xvi, 10).

9. Some beautiful comparisions occur. "An evil tongue is a sharp sword" (Psa. lvi, 4); the "tongue of the wise is health" (Prov. xii, 18); "like choice silver" (v, 20), i.e. his words are solid, valuable, sincere.

10. "The noise of the tongue is specified in great variety: flattery (Psa. v, 9; Prov. xxviii, 83); backbiting (Psa. xxx, 8), literally "run about with the tongue" (Prov. xxv, 29); deceit (Psa. i, 19); unrestrained speech.
Tongues, Confusion of. The Biblical account of this is given in the usual anthropomorphic style of Scripture in Gen. xi, 1-9, and has been the occasion of much discussion and speculation. To inquire into the date of this part of Genesis would lead us into a long discussion: it may be sufficient to express an opinion that the indications of x, 12 perhaps (strangely ignored by most writers), and ver. 18 certainly, seem to point to an age much before that of Moses. See below. We propose under the present note to treat the subject under two aspects, the historical and the linguistic, referring the reader to other and kindred articles for further details on this disputed question.

1. The Event. The part of the narrative relating to the present subject thus commences: "And the whole earth, or land, γῆς was of one language [or ἵππος, ἵππος] and of one speech [or words, τῆς ὁμογενίας]." The journey and the building of the tower are then related, and the divine determination to confound the language that they may not understand one another's speech. The scattering of the builders and the discontinuance of the building of the city having been narrated, it is added, "Therefore is the name of it called Babel, because the Lord did there confound the language of all the earth, and [for] from thence did the Lord scatter them abroad upon the face of all the earth" (Gen. xi, 9). 

1. Character of the Injunction. An orderly and peaceful distribution and migration of the families descended from Noah had been directed by divine authority and carried into general effect. But there was a part of mankind who would not conform themselves to this wise and benevolent purpose. This rebellious party, having discovered a region to their taste, determined to remain in it. They built their houses in congruity, and proceeded to the other method described for guarding against any further division of their compact. This was a measure of rebellion against the will of the government. The omniscient and righteous God therefore frustrated it by inflicting upon them a remarkable affection of the organs of speech, which produced discord and separation.

At the same time, we cannot dogmatically affirm that this infraction was absolutely and visibly miraculous. It is an undeniable character of the scriptural idiom, especially in the Old Test., that verbs denoting direct efficacy are used when only mediate action is to be understood, or permission, or declaration. Instances are numerous, e.g. "God caused me to wander" (Gen. xx, 13); "I have given the law and have numbered them" (xxvii, 37); "hardening of wicked men's hearts" (Exod. vii; Isa. vi, etc.); "I will come up into the midst of them" (Exod. xxxiii, 5). All such declarations are perfectly true. The infinitely Wise and Holy and Powerful worketh all things according to the counsel of his own will, as much when his operation is through the instrumentality of rational creatures and the free exercise of their own faculties as when there is a miraculous intervention. Shuckford inclines at least to the opinion that the whole was the result of natural and moral second causes, fulfilling the purposes of the Most High (Connect. of Hist. i, 130-133). This view, however, does not seem to meet adequately the judicial character of the passage.

Still it is unnecessary to assume that the judgment inflicted on the builders of Babel amounted to a loss, or even a suspension, of articulate speech. The desired object would doubtless have been attained by any language possessed the most exquisite eloquence, this inestimable gift would be of little use to him, as salvation, if he be without charity. See Macknight, Notes on 1 Cor. xiv; Ousbanas, Comment. on Acts ii, 4; Neander, Hist. of the Apostolic Age, and in Bibl. Repos. iv, 249, etc.; Stubbs, Letters on Babel, (1796), p. 190; and Ernesti, Lect. Gr. Ehr. p. 52. See Spiritual Gifts.
individuals of the branches of Japheth. Dr. Doig, in the article "Philology," in the Encyclop., Britannicus (7th ed. 1842), has entered at some length into this question, and arrives at the following conclusion: "From these circumstances, we hope it appears that the whole mass of mankind was not engaged in building the tower of Babel; that the language of all the human race was not confounded upon that occasion, and that the dispersion reached only to a combination of 14 Hamitic and of the most productive part of the other families who had joined their wicked confederacy." Nevertheless, as this was the first occurrence of any dialectical variety, it is properly given by the sacred writer as the initial point of that wide ethnic diversity of tongues which has since gradually spread over the earth.

4. Traces of the Event.—(1) Memorandum. The history of the confusion of languages was preserved at Babylon, as we learn by the testimonies of classical and Babylonian authorities (Abydenus, Frugom, Hist. Græc. [ed. Didot], vol. IV). Only the Chaldeans themselves did not admit the Hebrew etymology of the name of their country, and of the most probable etymology of the name El (Kronos, or Saturnus), whom Diiodorus Siculus states to have been the planet most adored by the Babylonians.

The Talmudists say that the true site of the tower of Babel was not in the land of Borsippa, the Bira Nimrid, seven miles and a half from the Tigris, S.W., and nearly eleven miles from the northern ruins of Babylon. Several passages state that the air of Borsippa makes forgetful (גזרת בכר, arv maskakkach); and one rabbi says that Borsip is Balsip, the confusion of tongues (Beresit Richb, fol. 42, p. 1). The Babylonian name of this locality is Barisip, or Barzippa, which we explain by "Tower of Tongues." The French expedition to Mesopotamia found at the Bira Nimrid a clay oake, dated from Borsip the 30th day of the 6th month of the 16th year of Darius, and on the face of it was inscribed in the hypothesis of several travellers, who had supposed the Bira Nimrid to contain the remains of Borsippa.

Borsippa (the Tongue Tower) was formerly a suburb of Babylon, when the old Babel was merely restricted to the northern ruins, before the great expansion of the city, which, after: they ancient it written to the door of El (Kronos, or Saturnus), whom Diiodorus Siculus states to have been the planet most adored by the Babylonians.

This building, erected by Nebuchadnezzar, is the same that Herodotus describes as the tower of Jupiter Belus. In the Expedition in Mesopotamia, 1, 208, there is given a description of this ruin, proving the identity. This tower of Herodotus has nothing to do with the pyramid described by Strabo, which is certainly to be seen in the remains called now Babel (the Mebeliba of Rich). The temple (in its form) is written with the ideogram (bê-tê-sîh), composed of the signs for house and spirit (ani), the real pronunciation of which was probably sarraẖ, tower.

The temple consisted of a large substructure, a state in six hours. The walls were supported by five feet in height, over which were built seven other stages of twenty-five feet each. Nebuchadnezzar gives notice of this building in the Borsippa inscription. He named it the temple of the Stem Lights of the Earth, i.e. the planets. The top was the temple of Nebo, and the structure (in the substructure) was consecrated to the god Sin, god of the moon. This building, mentioned in the East India House inscription (col. IV.4), is spoken of by Herodotus (1, 181, etc.).
Here follows the Borsippa inscription:

"Nabuchodonosor, king of Babylon, shepherd of peoples, who attests the immaterial affection of Merodach, the mighty ruler-exulting Nebu; the savior, the wise recreator of the world; the god in whose hand the lottery of the liensenten without reproach, the repairer of the Pyramid and the Tower, eldest son of Nabopolassar, king of the four corners of the earth, the shepherd of the nations of the earth, the guardian over the legions of the heaven and the earth, has charged my hands with the sceptre of justice.

We say: Merodach, the great master, has created me: he has set my seal on the earth. I am Nebu, I am the god, the god of the light of heaven and the earth, the seat of Merodach, the chief of the gods; the place of the oracles, the spot of his rest, I have adored to a godship without sibling.

The Tower, the eternal house, which I founded and built, has completed its magnificence with silver, gold, copper, and brass. There I have gathered my treasure.

The first, which is the house of the earth's base, the master of the highest heaven, the master of the earth, I have highly exalted its head with bricks covered with copper.

We say for the other, that is, this edifice, the house of the Seven Lights of the Earth, the most ancient monument of Borsippa: A former king built it (they reckon forty-two ages), but he did not complete its head. Since a remote time people had abandoned it, without order expressing their words. Since that time, the earthquake and the deluge caused by the sun, the turning of the earth, the corruption of the casing had been split, and the earth of the interior had fallen, the temple of Babylon between Merodach and the sun excited my mind to repair this building. I did not change the site, nor did I take away the foundation-stone. In a former time the temple had collapsed, with bricks of portico around the crude brick masses, and the casing of burnt bricks. I adapted the circuit. I put the inscriptions in the Ka'iru in the Ka'iru in the Ka'iru in the Ka'iru in the Ka'iru.

I set my hand to finish it, and to exalt its head. As it had been in former times, so I founded, I made it; as it had been in ancient days, so I exalted its summit.

Nebo, sou of himself, ruler who exaltes Merobach, be propitious to my works to maintain my authority. Grant me a life until the remotest time, a seventh progeny, the stability of my throne, the victory of my sword, the peace of my reign, the triumph of Joseph, the master of the land. In the columns of thy eternal table, that fixes the destinies of the heaven and of the earth, bless the course of my days, increase of the years of my race.

Imitate, O Merodach, king of heaven and earth, the father who begot thee: bless my buildings, strengthen my authority. May Nebuchadnezzar, the king-repairer, remain before thy face!"

This allusion to the Tower of the Tongues is the only one that has as yet been discovered in the cuneiform inscriptions (see Expeditio en Mesiopotamice, i, 208). The story is a Shemitic and not merely a Hebrew one, and we have no reason whatever to doubt of the existence of a Babylonian Epic of the tower building elevated on the spot where the story placed the tower of the dispersion of tongues have therefore a more modern origin, but interest, nevertheless, by their stupendous appearance. See BABEL.

Historical.—The following are the principal passages of ancient authors, rescued from obscurity by the quotations of Josephus and Eusebius. It scarcely need be said that we do not adduce these fragments as authorities in any other sense than that they repeat the traditional narratives which had descended from the remotest antiquity among the people to whom they relate. The copies cited by Josephus are the fictitious appellation of some unknown author, probably about the 2d century B.C. Alexander Cornelian Polyhistor flourished about one hundred years before Christ. Eusebius was probably an Asiatic Greek, two or three centuries earlier. Abdeusus (if he was Palespatus) lived in the middle of the 4th century B.C.

Concerning this tower, and the discordance of languages, we can only say that the Sibyl and the apocryphal Joseph, say this: 'All men having one language, some of them built a very high tower, as if they proposed by means of it to cleave to the ends of the earth, by sending storms of wind, overthrew the tower, and gave to each person a peculiar language: and on this account the city came to be called Babylon' (Josephus, Antiq., i, 4, 6).

The Sibyl here quoted may be that very ancient anonymous authority to which we have obscure references (in the discourse of Theophilus to Autolycus) in X.—G o

Plutarch's Morals, in Virgil's Aeneid, and in the Stru- mata of Clemens Alexandrinus.

Alexander Polyhistor—a man of the highest celebrity for talents and attainments, in the estimation of those Greeks who were the most professed, admired, and followed—has the following passage: 'Eupolemus, in his book concerning the Jews of Assyria, says that the city of Babylon was the most ancient which they possessed, in the Deluge: that they were giants (the Greeks used this word of the Titans), and that they were, in their mythological histories, of great prowess, and defying the gods; that they also erected the tower of which history gives account, that it would reach to heaven, as the mighty power from God, and consequently the giants were scattered abroad over the whole earth' (Eusebius, Prepar. def. Jud., i, 4).

"Further, with respect to the narrative of Moses concerning the building of the tower, and how, from one tongue, to many, and from one language to many, and in the use of many dialects, the author before mentioned [Abdeusus], in his book concerning the Assyrians, gives his confirmation in these words: 'There are some who say that the first men sprang out of the earth: that they boasted of their strength and size: that they contemptuously maintained themselves to be superior to the gods: that they erected a lofty tower where now is Babylon: then, when it had been carried on almost up to heaven, the very winds came to assist the gods, and overthrew the vast structure upon its buildings. Its ruins were called Babylon, because in the building of the temple one tongue, were brought by the gods to a many-sounding voice; and afterwards, through the diversification of tongues, the name of Babylon was changed into the name of Babylonian. Moreover, the place in which they built the tower is now called Babylon, on account of the confounding of the tongues, as the Jews say, and which is commonly called confusion Babyl (Eusebius, Prepar. def. Jud., i, 4).

Abydeusus, the Grecian historian of Assyria, is known to us only by citations in Eusebius, Cyril of Alexandria, and Syncellus, but they confirm his respectability as a writer.

On the event under discussion, see the Latin monographs by Linck (Vitrum, 1656), Zobell (ibid. 1664), Schroeder (Groning. 1752), Kanne (Norinb. 1819), and in English by Wetton (London, 1732); also the literature cited by Darling, Cyclop. Bibliog. col. 179, 180.

II. Philosophical and Ethnological Considerations.—The unity of the human race is most clearly implied, if not positively asserted, in the Mosaic writings. The general declaration "So God created man in his own image, ... male and female created he them" (Gen. i, 27) is limited as to the mode in which the act was carried out by the subsequent narrative of the creation of the protoplast Adam, who stood alone on the earth amid the formless void. The world under the dominion of God, the Creator, was to create "an help meet for him" out of the very substance of his body (i, 22). From this original pair sprang the whole antediluvian population of the world; and hence the author of the book of Genesis conceived the unity of the human race to be of the most rigid nature—a unitary and historic unity, not a specific unity (for unity of species may not be inconsistent with a plurality of original centres), but a specific based upon a numerical unity, the species being nothing else than the enlargement of the individual. Such an idea be the natural meaning of the first chapters of Genesis, who taken by themselves, much more so when read under the reflected light of the New Test.; for not only do we meet with references to the historical fact of such an origin of the human race—c. e. in Paul's declaration that God "thath made one blood of all nations, and people, and languages, and nations, and made of one blood all nations of men" (Acts xvii. 26)—but the same is evidently implied in the numerous passages which represent Jesus Christ as the counterpart of Adam in regard to the universality of his connection with the human race. Attempts have indeed been made to show that the idea of a plurality of original pairs is not inconsistent with the historical facts, but the doctrine is not at all inconsistent between a view not inconsistent with, and a view drawn from, the words of the author: the latter is founded upon the facts he relates, as well as his mode of relating them; the former takes advantage of the weaknesses arising out of a concise or unmethodical style of composition. Even if such a view could be
sustained in reference to the narrative of the original creation of man, it must inevitably fail in reference to the history of the repopulation of the world in the post-diluvian age: for, whatever objections may be made to the historical accuracy of the history of the Flood, it is at least clear that the historical record involved in the universal destruction of the human race, with the exception of Noah and his family, and consequently that the unity of the human race was once more reduced to one of a numerical character. To Noah the historian traces up the whole postdiluvian population of the world; and the three sons of Noah: "and of them was the whole earth overspread" (Gen. ix. 19).

Unity of language is assumed by the sacred historian apparently as a corollary of the unity of race. No explanation is given of the origin of speech, but its exercise is evidently regarded as coeval with the creation of man. No support can be obtained in behalf of any theory on this subject from the first recorded instance of its exercise ("Adam gave names to all cattle"), for the simple reason that this notice is introductory to what follows: "but for Adam there was not found an help meet for him" (Gen. ii. 20). It was not so much the power of speech which first attracted the attention of men as the power of speech as the fact of the inferiority of all other animals to him, and the consequent necessity for the creation of woman. The proof of that inferiority is, indeed, most appropriately made to consist in the authoritative assignment of names, implying an act of reflection upon nature and familiarity, and a recognition of the offices which they were designed to fill in the economy of the world. The exercise of speech is thus most happily connected with the exercise of reflection, and the relationship between the inner act of the mind (λόγος ἑλθατέργος) and the outward expression, a relation in which the divine Originator is depicted as being, as such, handed down from father to son by the same process of imitation by which it is still perpetuated. Whatever divergences may have arisen in the ante-diluvian period, no distinction of them, inasmuch as their effects were obliterated by the universal catastrophe of the Flood. The original unity of speech was restored in Noah, and would naturally be preserved by his descendants as long as they were held together by social and local bonds. The confusion of tongues and the dispersion of nations are spoken of in the Bible as contemporaneous events. "So the Lord scattered them abroad" is stated as the execution of the divine counsel "Let us find our language." The divergence of the various families into distinct tribes and nations ran parallel with the divergence of speech into dialects and languages, and thus the tenth chapter of Genesis is posterior in historical sequence to the events recorded in the eleventh chapter. Both passages must be taken into consideration in any disquisition on the early fortunes of the human race. We propose, therefore, to inquire, in the first place, whether the phenomena of language favor the idea that there was once a time when the whole earth was of one speech and language; and, in the second place, whether the ethnological views exhibited in the Mosaic table accord with the evidence furnished by history and language, both in regard to the facts recorded in it and in the general scriptural view of a historical, or, more properly, a gentilic, unity of the human race. These questions, though independent, yet exercise a reflexive influence on each other's results. Unity of speech does not necessarily involve unity of race, nor yet ewise versa; but each is essential to the capacity of the other. Fore the arguments derived from language, physiology, and history may ultimately furnish a cumulative amount of probability which will fall but little below demonstration.

(A.) The advocate of the historical unity of language has to encounter two classes of opposing arguments:

one arising out of the differences, the other out of the resemblances, of existing languages. On the one hand, it is urged that the differences are of so decisive and specific a character as to place the possibility of a common origin wholly out of the question; on the other hand, that the diversity of the languages is evidence of a historical unity, but may be satisfactorily accounted for on psychological principles. It will be our object to discuss the amount, the value, and the probable origin of the varieties exhibited by languages, with a view to meet the first class of objections. But, before proceeding to the second, inasmuch as these, if established, would nullify any conclusion that might be drawn from the other.

A psychological unity is not necessarily opposed to a gentilic unity. It is perfectly open to any theorist to combine the two by assuming that the language of the one protoplast was founded on strictly psychological principles. But, on the other hand, a psychological unity does not necessitate a gentilic unity. It permits of the theory of a plurality of protoplasts, who, under the influence of the same psychological laws, arrived at similar independent results. Whether the phenomena of diversity of language are to be explained as the result of a common or of individually invented languages is a question which we think extremely doubtful; certainly they cannot furnish the basis of it. The whole question of the origin of language lies beyond the pale of historical proof, and any theory connected with it admits neither of being proved nor disproved. We know, as a matter of fact, that languages are invented and not discovered; and that if a community is separated, the one is formed another solely by force of imitation, and that there is no play whatever for the inventive faculty in reference to it. But in what manner the substance of language was originally produced we do not know. No argument can be derived against the common origin from the analogy of the animal world; and when Prof. Agassiz compares similarities of language with those of the cries of animals (Von Bohlen, Intro. to Gen. ii. 278), he leaves out of consideration the important fact that language is not identical with sound, and that the words, a rational being, however originally produced, are perpetuated in a manner wholly distinct from that whereby animals learn or utter their cries. Nor does the internal evidence of language itself reveal the mystery of its origin; for, though a very large number of words may be referred either directly or mediate to the original human language, the names of, for instance, the first and second personal pronouns—which do not admit of such an explanation. In short, this and other similar theories cannot be reconciled with the intimate connection evidently existing between reason and speech, which is so well expressed in the Greek language by the application of the term λόγος to each, reason being nothing else than inward speech, and speech nothing else than outward reason, neither of them possessing an independent existence without the other. As we conceive that the psychological as opposed to the gentilic unity involves questions connected with the origin of language, we can only say that in this respect it falls outside the range of our inquiry.

Reverting to the other class of objections, we proceed to review the extent of the differences observable in the languages of the world in order to ascertain whether or not they afford any evidence of common origin. Such a review must necessarily be imperfect, both from the magnitude of the subject and also from the position of the linguistic science itself, which as yet has hardly advanced beyond the stage of infancy. On the latter point we would observe that the mere number of distinct tongues and the fact that these families may yet be discovered in languages that are either unexplored or, at all events, unplaced. Meanwhile, no one can doubt that the tendency of all linguistic research is in the direction of unity. Already it has brought within the bonds of a well-established relationship languages so remote from each other in
external guise, in age, and in geographical position as Sanscrit and English, Celtic and Greek. It has done the philologist has anticipated no relationship. The lines extended, but presenting less opportunities of investi-
gation. It has recognised affinities between languages which the ancient Greek ethnologist would have classed under the head of "barbarian" in reference to each other, and even in many instances where the modern philologist has recognised no relationship. The lines of discovery, therefore, point in one direction, and fa-
vor the expectation that the various families may be combined by the discovery of connecting-links into a single family, comprehending in its capacious bosom all the languages of the world. But, should such a resolution be reached, the substratum of the languages of our origin would still remain unshaken: for the failure would probably be due to the absence, in many classes and families, of that chain of historical evidence which in the case of the Indo-European and Semitic families enables us to trace their progress for above three thou-
sand years. In many languages no literature at all, in many others no ancient literature, exists to supply the philologist with materials for comparative study: in these cases it can only be by laborious research into exis-
ting dialects that the original forms of words can, be detected amid the incubations and transmutations with which time has obscured them.

In dealing with the phenomena of language, we should duly consider the plastic nature of the material out of which it is formed, and the numerous influences to which it is subject. Variety in unity is a general law of nature, to which even the most stubborn physical substances yield a ready obedience. In the case of
language it would be difficult to set any bounds to the variety which we might a priori expect it to as-
sume. For, in the first place, it is brought into close contact with the spirit of man, and reflects with amaz-
ning fidelity its endless variations, adapting itself to the expression of each feeling, the designation of each ob-
ject, the working of each cast of thought or stage of reasoning power. Secondly, its sounds are subject to external influences, such as peculiarities of the organ of speech, the result either of natural conformation, of geographical position, or of habits of life and asso-
ciations of an accidental character. In the third place, it is generally affected by the state of intellectual and social culture of a people, as manifested more especially in the presence or absence of a standard literary dialect, and in the processes of verbal and syntactical structure, which again react in the very core of the word and produce a still further multiplicity of roots and meanings. Lastly, it is subjected to the wear and tear of time and use, obliter-
ating, as in an old coin, the original impress of the word, reducing it in bulk, producing new combinations, and occasionally leading to singular interchanges of sound and idea. The varieties resulting from the mod-
ifying influences above enumerated may be reduced to two classes, according as they affect the formal or the radical elements of language.

(1) Widely as languages now differ from each oth-
er in external form, the raw material (if we may use the name for such phenomena) which they have sprung appear to have been in all cases the same. A multitude of significant monosyllabic roots underlies the whole structure,

supplying the materials necessary, not only for or-
dinary predication, but also for what is usually termed the "growth" of language out of its primary into its modern form. It is in the nature of things to manifest itself quite clearly in order that we may not be led to suppose that the elements of one language are in themselves ended with any greater vitality than those of another. Such a distinction, if it existed, would go far to prove a specific difference between languages, which could hardly have been the case with the ideas of origin. The appearance of vitality arises out of the manipulation of the roots by the human mind, and is not inherent in the roots themselves.

1. The proofs of this original equality are furnished by the languages themselves. Adopting for the present the threefold division of languages into root, inflexional, and agglutinative, and inflecting languages, we shall find that no original element exists in the one which does not also exist in the other. With regard to the isolat-
ing class, the terms "monosyllabic" and "radical," by which it is otherwise described, are decisive as to its character. Languages of this class are wholly unac-
ceptable of grammatical mutations; there is no formal distinction between verb and noun, substantive and ad-
jective, preposition and conjunction; there are no in-
fections, no case or person terminations of any kind; the bare root forms the sole and whole substance of the language. In order to establish the two distinct points—(1) that the formal elements represent roots, and (2) that the roots both of the formal and the radical elements of the word are monosyllabic. Now it may be satisfactorily proved by analysis that all the component parts of both inflecting and agglutinative languages are reducible to two kinds of roots, predicative and pronominal—the for-
mer supplying the material element of verbs, substanti-
tives, and adjectives; the latter that of conjunctions, prepositions, and particles; while each kind, but more particularly the pronominal, supplies the formal element, in other words, the termination of verbs, substant-
tives, and adjectives. Whether the two classes of roots, predicative and pronominal, are further reducible to one class is a point that has been discussed, but has not as yet been established (Bopp, Compar. Gram, § 105; Müller, Lectures, p. 209). We have further to show that the roots of agglutinative and some inflecting languages are monosyllabic. This is an acknowledged character-
istic of the Indo-European family: monosyllabism is, indeed, the only feature which its roots have in com-
mon; in other respects they exhibit every kind of va-
riation, from a uniliteral root, such as *3s (Ire), up to com-
binations of five letters, such as sexual (ascendere), the

total number of admissible forms of root amounting to
no less than eight (Schleicher, § 206). In the Semitic
family monosyllabism is not a prima facie character-
istic of the root; on the contrary, the verbal stems ex-
hibit bicolon in such remarkable uniformity that it would lead to the impression that the roots also must have been bisyllabic. The bisyllabism, however, of the Semitic stem is in reality triconsonantalism, the vowels not forming any part of the essence of the root, but being wholly subordinate to the consonants. It is true that in the study of the triconsonantal and even a quad-
iconsonantal root may be in certain cases monosylla-

But, further, it is more than probable that the triconsonantal has been evolved out of a biconson-
antal root, which must necessarily be trisyllabic if the consonants stand, as they invariably do in Shemitic roots, at the beginning and end of the word. With re-
gard to the agglutinative class, it may be assumed that the same law which we have seen to prevail in the iso-

cating and inflecting classes prevails also in this, hold-
ing as it does an intermediate place between those op-
posite poles in the world of language.

The next division of 2. From the consideration of the materials of language, we pass on to the varieties exhibited in its struc-
ture, with a view to ascertain whether in these there exists any bar to the idea of an original unity.

(1) Reverting to the classification already noticed, we have to observe, in the first place, that the principle on which it is based is to point the difference between the predicable and the relational or inflectional elements of a word. In the isolating class these two are kept wholly distinct; relational ideas are expressed by juxtaposition or by syntactical arrangement, and not by any combination of the roots. In the aggluti-
native or combinational class, the principal or predicative theme by a mechanical kind of junction, the individuality of each being preserved even in the combined state. In the inflecting class the june-
tion is of a more perfect character, and may be compared to a chemical combination, the predictable and relational elements being so fused together as to present the appearance of a single and indivisible word. It is clear that there exists no insuperable barrier to original and forming as it were, of their own, that every inflecting language must once have been agglutinative, and every agglutinative language once isolating. If the predictable and relational elements of an isolating language be linked together, either to the eye or the ear, it is rendered agglutinative; if the material of forming postulates an instrument as one were, eliminating, if necessary, the sounds that resist incorporation, the language becomes inflecting. (2.) In the second place, it should be noted that these three classes are not separated from each other by any sharp line of demarcation. Not only does each possess, in a measure, the quality predominant in each other, but, moreover, each graduates into its neighbor through its bordering members. The isolating languages are not wholly isolating; they avail themselves of certain words as relational particles, though these still retain elsewhere their independent character; they also use composite, though they do not, as is not the case with the agglutinative, are not wholly agglutinative; the Finnish and Turkish classes of the Ural-Altaic family are in certain instances inflectional, the relational adjunct being fully incorporated with the predicative stem, and having undergone a large amount of attrition for that purpose. Not only are there considerable effects of agglutinational influence on the Ural-Altaic languages, especially on the Finnish-Turkish; Hebrew, for instance, abounds with agglutinative forms, and also avails itself largely of separate particles for the expression of relational ideas; our own language, though classed as inflectional, retains nothing more than the vestiges of inflection, and is in many respects an approximation to the language of that class. While, therefore, the classification holds good with regard to the predominant characters of the classes, it does not imply differences of a specific nature. (3.) But, further, the morphological varieties of language are not confined to the exhibition of the single principle hitherto described. A comparison between the westerly branches of the Ural-Altaic, on the one hand, and the Indo-European, on the other, belonging respectively to the agglutinative and inflected classes, will show that the quantitative amount of synthesis is fully as prominent a point of contrast as the qualitative. There is much to be said for the view that the terms may be more perfect in the Indo-European, but it is more extensively employed in the Ural-Altaic family. The former, for instance, applies to its verbal stems the notions of time, number, person, and occasionally of interrogation; the latter further adds suffixes indicative of negation, hypothesis, causatives, reflexivness, and other similar ideas, whereby the word is built up tier upon tier to a marvellous extent. The former append to its substantial stems suffixes of case and number; the latter adds governing particles, rendering them post, and instead of the predicative stem, and avails itself synthetically with the predicative stem. If, again, we compare the Semitic with the Indo-European languages, we shall find a morphological distinction of an equally diverse character. In the former the grammatical category is expressed by internal unity in those cases where the latter leaves them to the suffixes. So marked a distinction has not unnaturally been constituted the basis of a classification, wherein the languages that adopt this system of internal formation stand by themselves as a separate class, in contradistinction to those which either use terminological additions for the same purpose or substantiate them synthetically with inflectional forms (Bopp, Compar. Gram, i, 102). The singular use of preformatives in the Coptic language is, again, a morphological peculiarity of a very decided character. Even within the same family, say the Indo-European, each language exhibits an idiosyncrasy in its morphological character whereby it stands apart from other members with a decided impress of individuality. The inference to be drawn from the number and character of the differences we have noticed is favorable, rather than otherwise, to the theory of an original unity. Starting from the same common ground of monosyllabic and uninflected language, it seems to be a special line of development, following an original impulse, the causes and nature of which must remain probably forever a matter of conjecture. We can receive, indeed, in a general way, the adaptation of certain forms of speech to certain states of society. The agglutinative into a language of this instance, seen to be specially adapted to the nomadic state by the prominence and distinctness with which they enunciate the leading idea in each word, an arrangement whereby communication would be facilitated between tribes or families that associate only at intervals. We might almost imagine that these languages derived their impress of uniformity and solidity from the monotonous steps of Central Asia, which have in all ages formed their proper habitat. So, again, the inflectional class reflects cultivated thought and social organization, and its languages have hence been termed "state" or "political." Not only, then, are the monosyllables and suffixes suited to the most primitive state of thought and society, wherein the family or the individual is the standard by which things are regulated (Miller, Philos. of Hist., i, 285). We should hesitate, however, to press this theory as furnishing an adequate explanation of the arrangement of the different languages, for the Indo-European languages attained their high organization amid the same scenes and in the same nomad state as those wherein the agglutinative languages were nurtured, and we should rather be disposed to regard both the language and the higher social status of the former as the concurrent results of a higher mental organization.
terms "pound" and "head" are used collectively after a numeral. We may again cite the peculiar manner of expressing the genitive in Hebrew. This is effectuated by using the corresponding form of the governing noun in the status constructus, or using the relative pronoun with a preposition before the governed noun. The first of these processes appears a strange inversion of the laws of language; but an examination into the origin of the adjuncts, whether prefixes or suffixes in the language, for the indication of the genitive will show that they have a more intimate connection with the governing than with the governed word, and that they are generally resolvable into either relative or personal pronouns, which serve the simple purpose of connecting the two words together (Garnett, Eropean, p. 244). The latter end may be gained by connecting the words in pronunciation, which would lead to a rapid utterance of the first, and consequently to the changes which are witnessed in the status constructus. The second or periphrastic process is in accordance with the general method of expressing the genitive; for the expression "the Song which is to Solomon" strictly answers to "Solomon's Song," the latter representing (according to Bopp's explanation) a combination of the demonstrative ea and the relative ya. It is thus that the varieties of construction may be shown to be consistent with unity of law, and that they therefore furnish no argument against a common origin.

As a matter of fact, moreover, most of these characteristics of the English language do not arise from any constitutional inequality of vital energy. Nothing is more remarkable than the compensating power apparently inherent in all language, whereby it finds the means of reaching the level of the human spirit through a faithful adherence to its own guiding principle. The isolating languages being shut out from the manifold advantages of verbal composition, attain their object by multiplied combinations of radical sounds, assisted by an elaborate system of accentuation and intonation. In this manner the Chinese language has framed a vocabulary fully equal to the demands made upon it; and though this mode of development may not commend itself to our notions as the most effective that can be devised, yet it plainly evinces a high susceptibility on the part of the linguistic faculty, and a keen perception of the correspondence between sense and sound. The absence of inflectional forms in the English language does not interfere with the expression even of the most delicate shades of meaning in a sentence; a compensating resource is found partly in a multiplicity of subsidiary terms expressive of plurality, motion, action, etc., and partly in strict attention to syntactical arrangement. The agglutinative languages, again, more than in any other, are able to make the necessary allowance of elasticity and expansiveness of the Indo-European family; but they are eminently synthetic, and no one can fail to admire the regularity and solidity with which its words are built up, suffix on suffix, and, when built up, are sufficiently in harmony with the variety of sound by the law of poetic harmony. The Semitic languages have worked out a different principle of growth, evolved, not improbably, in the midst of a conflict between the systems of prefix and suffix, whereby the stem, being, as it were, enclosed at both extremities, was precluded from all external increments, and the whole formative force was, as it were, as could be effected by a modification of its vowel-sounds. Whatever may be the origin of the system of internal inflection, it must be conceded that the results are very effective, as regards both economy of material and simplicity and dignity of style.

fixing the meaning of this word. The following observations is to show that the formal varieties of language present no obstacle to the theory of a common origin. Amidst these varieties there may be discerned manifest tokens of unity in the original material out of which language was formed, in the stages of formation through which it has passed, in the general principle of grammatical expression, and, lastly, in the spirit and power displayed in the development of these various formations. Such a result, though it does not prove the unity of language in respect to its radical elements, nevertheless tends to establish the probability of this unity; for if all connected with the forms of language be referred to certain general laws, if nothing in that department owes its origin to chance or arbitrary appointment, it surely favors the presumption that the same principle would extend to the formation of the roots, which are the very core and kernel of language. Here, too, we might attempt to find the grammar and the laws of some kind or other, producing results of a uniform character; here, too, actual variety may not be inconsistent with original unity.

(II) Before entering on the subject of the radical identity of the languages, we must express our conviction that the time has not yet arrived for a decisive opinion as to the possibility of establishing it by proof. Let us briefly review the difficulties that beset the question. Every word as it appears in an organic language, whether written or spoken, is resolvable into two distinct elements, which we have termed predicables and formal, the first being what is commonly called the root, the second the grammatical termination. In point of fact, both of these elements consist of independent roots; and in order to prove the radical identity of two languages, it must be shown that they agree in both respects, that is, in regard both to the predicables and the formal roots. As a matter of fact, however, the predicable elements (consisting, for the most part, of pronominal bases) exhibit a greater tenacity of life than the others; and hence agreement of inflectional forms is justly regarded as furnishing a strong presumption of general radical identity. Even foreign elements are forced into the form of the words of the language they are adopted, and thus bear testimony to the original character of that language. But though such a formal agreement supplies the philologist with a most valuable instrument of investigation, it cannot be accepted as a substitute for complete radical agreement: this would still remain to be proved by an independent examination of the predicables. The difficulties connected with these latter are many and varied. Assuming that two languages or language-families are under comparison, the phonological laws of each must be investigated in order to arrive, in the first place, at the primary forms of words in accordance with which they occur, and, in the second place, at the corresponding forms in the language which constitutes the other member of comparison, as has been done by Grimm for the Teutonic as compared with the Sanscrit and the classical languages. The generative power of sound, as we may term it, must be followed up by a genealogy of the corresponding words in the form of sound and sense in two terms being of no value whatever, unless a radical affinity be proved by an independent examination of the cognate words in each case. It still remains to be inquired how far the ultimate accordance of sense and sound may be the result of onomatopoeia, of mere borrowings, or of a possible mixture of languages on equal terms. The final stage in etymological inquiry is to decide the limit to which comparison may be carried in the primitive strata of language—in other words, how far roots are independent, as compared with roots, and reduced to yet simpler elementary forms. Any flaw in the processes above described will, of course, invalidate the whole result. Even where the philologist is provided with ample materials for inquiry in stores of literature ranging over long periods of time, his task is one of the most arduous, good each link in the chain of agreement; and yet in such cases the dialectic varieties have been kept within some degree of restraint by the existence of a literary language, which, by impressing its authoritative stamp on certain terms, has secured both their general use and their extended integrity, whereas no literary language exists, as is the case with the general rule of languages.
in the world, the difficulties are infinitely increased by the combined effects of a prolific growth of dialectic forms of various kinds, and the process of this growth is itself progressive. Whether, under these circumstances, we may reasonably expect to establish a radical unity of language is a question which each person must decide for himself. Much may yet be done by a larger induction and a scientific analysis of languages that are yet comparatively unknown. The tendency hitherto has been to enlarge the limits of a “family” according as the elements of affinity have been recognised in outlying members. These limits may perchance be still more enlarged by the discovery of connecting-links between the language-families, whereby the criteria of relationship with the unconnected families discovered amid the manifold appearances of external diversity.

Meanwhile we must content ourselves with stating the present position of the linguistic science in reference to this important topic. In the first place, the Indo-European languages have been reduced to an acknowledged and well-defined relationship: they form one of the two families included under the head of “inductive” in the morphological classification. The other family in this class is the so-called Semitic, the limits of which are not equally well defined, inasmuch as it may be extended over what are termed the noble Semitic languages, including the Egyptian or Coptic. The criteria of the proper Semitic family (i.e. the Aramaic, Hebrew, Arabic, and Ethiopic languages) are distinctive enough; but the connection between the Semitic and the Egyptian is not definitely established. Some philologists incline to claim for the latter an independent position, intermediate between the Indo-European and Semitic families (Büsen, Phil. of Hist., i. 185 sq.). The agglutinative languages of Europe and Asia are combined by Prof. M. Müller in one family named “Turanian.” It is conceded that the family bond in this instance is a loose one, and that the agreement in roots is very partial (Lectures, p. 290-292). Many philologists of high standing, and more particularly Pott (Ungleich, d. mensch. Ressen, p. 232), deny the family relationship altogether, and break up the agglutinative languages into a great number of families. Certainly it is that within the Turanian circle there are languages—such, for instance, as the Ural-Altaic—which show so close an affinity to one another as to be entitled to form a separate division, either as a family, or a subdivision of a family; and, this being the case, we should hesitate to put them on a parity of footing with the remainder of the Turanian group. The group again, differs so widely from the other members of the family as to make the relationship very dubious. The monosyllabic languages of South-eastern Asia are not included in the Turanian family by Prof. M. Müller (Lectures, p. 290, 292), apparently on the ground that they are not agglutinative; but as the Chinese appears to be connected radically with the Burmese (Humboldt, Verschied., p. 368), with the Thibetan (Phil. of Hist., i. 393-395), and with the Ural-Altaic languages (Schoett, in Abh. Ab, Berl. 1861, p. 172), it seems to have a good title to be placed in the Turanian family. The language(322,775),(684,824)

Even within this circle the difficulty of proving the identity may be infinitely enhanced by the absence of materials through which we can trace the transmission of these materials are found in anything like sufficiency, viz. the Indo-European and the Semitic, and even these furnish us with no historical evidence as to the earlier stages of their growth. We find each, at the most remote literary period, already exhibiting its distinctive character of stem- and word-formation, leaving us to infer, as we best may, from these phenomena the processes by which they had reached that point. Hence there arises abundance of room for difference of opinion, and the extent of the radical identity will depend very much on the view adopted as to these earlier processes.

If we consider the possibility of establishing the same etymology propounded by the analytical school of Hebrew scholars, it would not be difficult to establish a very large amount of radical identity; but we cannot regard as established the prepositional force of the initial letters, as stated by Deltzach in his Jekhur (p. 166, 173, note), still less the correspondence between the initial letters of Greek and Latin words (p. 170-172). The striking uniformity of bisyllabism in the verbal stems is explicable only on the assumption that a single principle underlies the whole; and the existence of groups of words differing slightly in form, and having the same radical sense, shows that this principle was one not of composition, but of euphonism and practical convenience. This presumption is still further favored by an analysis of the letters forming the stems, showing that the third letter is in many instances a reduplication, and in others a liquid, a nasal, or a syllable, introduced either as the initial, the medial, or the final letter. The Hebrew alphabet admits of a classification based on the radical character of the letter according to its position in the stem. The effect of composition would have been to produce, in the first place, a greater inequality in the length of the words, and, in the second place, a greater equality in the use of the various organic sounds.

Many supposed instances of etymological correspondence have been falsely based on the analytical tenets; but there still exists a considerable amount of radical identity which appears to be above suspicion.

Under Etymology, Comparative, we have given a list of terms in which that identity is manifested. After deducting whatever may be due to fanciful or accidental agreement, there still remain many instances which cannot possibly be explained on the principle of onomatopoeia alone. These are therefore evidence of the common inheritance of the Indo-European and Semitic families. Whether this agreement is, as Renan suggests, the result of a keen susceptibility of the onomatopoetic faculty in the original framers of the words (Hist. Gén., i. 465) is a point that can neither be proved nor disproved. But even if it were so, it does not follow that the words were not framed before the separation of the families. Our list of comparative words might have been much enlarged if we had included comparisons based on the reduction of Semitic roots to a bisyllabic form. A list of such words may be found in Deltzach, p. 172, 177-180. In such cases, the order of consonants and numerals, the identity is but partial. We may detect the t sound, which forms the distinctive sound of the second personal pronoun in the Indo-European languages, in the Hebrew 'attāh, and in the personal terminations of the perfect tense; but the s, which is the prevailing sound in the first personal pronoun in the former, is supplanted by a n in the latter. The numerals šesh and sheba, for “six” and “seven,” accord with the Indo-European forms: those representing the numbers from “one” to “five” are possibly, though not evidently, identical. With regard to the other language- families, the evidence of the facts that have already made, that we should attempt the proof of their radical identity. The Ural-Altaic languages have been extensively studied, but are hardly ripe for com-
TONGUES, CONFUSION OF

parison. Occasional resemblances have been detected in grammatical forms and in the vocabularies; but the value of these remains to be proved, and we must await the results of a more extended research into this and other cases of related languages.

(B.) We pass on to the second point proposed for consideration, viz. the ethnological views expressed in the Bible, and more particularly in ch. x of Genesis, which records the dispersion of nations consequent on the confusion of tongues.

(1.) The Mesopotamian Table does not profess to describe the process of the dispersion; but, assuming that dispersion as a fact accomplished, it records the ethnic relations existing between the various nations affected by it. These relations are expressed under the guise of a genealogy; the ethnological character of the document is, however, clear both from the names, some of which are gentilic in form, as Ludim, Jebusite, etc., others geographical or local, as Mizraim, Sidon, etc., and, again, from the formulary which concludes each section of the subject, "after their families, after their tongues, in their countries, and in their nations" (ver. 5, 20, 81). Incidentally, the table is geographical, not chronological; but this arises out of the practice of designating nations by the countries they occupy. It has, indeed, been frequently surmised that the arrangement of the table is purely geographical, and this idea is, to a certain extent, favored by the possibility of explaining the names Shem, Ham, and Japheth, the first signifying the "high" lands, the second the "hot" or "low" lands, and the third the "broad," undefined regions of the north. The three families may have been so located, and such a circumstance could not have been unknown to the writer of the table. But neither internal nor external evidence satisfactorily proves such to have been the leading idea or principle embodied in it, for the Japhethites are mainly assigned to the "isles" or maritime districts of the west and north-west, while the Shemites press down into the plain of Mesopotamia, and the Hamites, on the other hand, occupy the high lands of Canaan and Lebanon. We hold, therefore, the geographical as subordinate to the ethnological element, and avail ourselves of the former only as an instrument for the discovery of the latter.

The general arrangement of the table is as follows: The whole human race is referred back to Noah's three sons, Shem, Ham, and Japheth. The Shemites are described last, apparently that the continuity of the narrative may not be further disturbed; and the Hamites stand next to the Shemites, in order to show that these were more closely related to each other than to the Japhethites. The comparative degrees of affinity are expressed by the distance of the coiling, such as in the cases of Elishah and Tarshish, Kittim and Dodanim (ver. 4), and partly by representing a genealogical descent, as when the nations just mentioned are said to be "sons of Javan." An inequality may be observed in the relative genealogical lines, which, in the case of Japheth, extends only to one, in Ham to two, in Shem to three, and even four degrees. This inequality clearly arises out of the varying interest taken in the several lines by the author of the table, and by those for whose use it was designed. We may lastly observe that the recurrence of the same name in two of the lists, as in the cases of Lud (ver. 13, 22) and Sheba (ver. 7, 28), possibly indicates a fusion of the races.

a. The identification of the Biblical with the historical or classical names of nations is by no means an easy task, particularly where the names are not subsequently noticed in other records. In these cases, comparisons with ancient or modern designations satisfactorily proves such to have been the case of Kiphath compared with Rapes Montes, or Mash compared with Mutus Mons, great doubt must exist as to the ethnic force of the title, though such as several nations may have successively occupied the same district. Equal doubt arises where names admit of being treated as appellatives, and so of being transferred from one district to another. Recent research into Assyrian and Egyptian records has, in many instances, thrown light on the Biblical titles. In this way we find Meshech and Tubal noticed under the forms Mesach and Tubal-Capit, while Javan appears as the appellation of Cyprus, where the Assyrians first met with Greek civilization. In the latter the name Phut appears under the form of Punt, Hitite as Khita, Cush as Kebah, Canaan as Kann in Egyptian.

1. The list of Japhethites contains fourteen names, of which seven represent independent and the remainder affiliated nations, as follows:

(i.) Gomer, connected ethnically with the Cimmirri, Cimmri (9), and Cyns; and geographically with Cretans. Associated with Gomer are the following:
   (a) Ashkenaz, generally connected with Lake Asseni
   in Bithynia, but by Knobel with the tribe Ash, As, or Asenei in the Caucasian district. On the whole, we prefer Hass' suggestion of a connection between this name and that of the Asseni, later the Euxine Phanai.
   (b) Riphath, the Ruperi Montes, which Knobel connects etymologically and geographically with Car
   pates, the "great" land of the west.
   (c) Togarmah, undoubtedly Armenia, or a portion of it.

(ii.) Magog, the Scythians.

(iii.) Meda, Media.

(iv.) Javan, the Ionians, as a general appellation for the Hellenic tribes with whom are associated Lake Assen
i in Bithynia, but by Knobel with the tribe Avast, Av, or Oesnites in the Caucasian district. On the whole, we prefer Hass' suggestion of a connection between this name and that of the Asseni, later the Euxine Phanai.

(b) Turish, at a later period of Biblical history, cer
   tainly connected with Tarsus, in Cilicia, to which, however, there are objections as regards the table, 
   partly from the too extended area thus given to the 
   Median world, and partly because the Cilicians were 
   Phoenician, and consequently not a Japhetic settle
   ment. Knobel compares the Tyurs, Turhenis, and 
   Tripoli of Italy; but this is precarious.

(c) Kittim, the town Cium in Cyprus.

(d) Daram, the Dardani of Iliaria and Missyas: Do
   dona is sometimes compared.

(v.) Tubal, the Tibors in Pontus.

(vi.) Meshech, the Mocest in the north-western part of 
   Armenia.

(vii.) Tiras, perhaps Thracia.

2. The Hamitic list contains thirty names, of which three represent independent and the remainder affiliated nations, as follows:

(i.) Cush, in two branches, the western or African repre
   sentatives, Ethiopia, the Kesh of the old Egyptian, and the eastern or Faetic being connected with the names of the tribe Canaati, the district Caucasia, and the province Asts or Astsia of the Caucasus, with Cush that Cush mentioned:
   (a) Seba, the Sabari of Yemen in South Arabia.
   (b) Havilah, the district Khaldan in the same part of the region.
   (c) Sabtah, the town Sabatha in Hadramut.
   (d) Sasmam, the town Synam or Synam in the south-eastern coast of Arabia, with whom are associated the Cushites of the Sudan.
   (e) Sheba, a tribe probably connected ethnically or commercially with the one of the same name already mentioned, but located on the west coast of the Persian Gulf.
   (f) Dedan, also on the west coast of the Persian Gulf, where the same perhaps still survives in the island Daden.

(vi.) Saba, perhaps the town Samsi or Samsi on the coast of the Indian Ocean easternward of the Persian Gulf.

(vii.) Nimrod, a personal and not a geographical name, the representative of the Eastern Cushites.

(ii.) See the modern, the two Miers, i.e. Upper and Lower Egypt, with whom the Cushites are connected.

(a) Ludim, according to Knobel, a tribe allied to the Semitic, but not to Egypt; others compare the river Lud (Pliny, v, 9), and this Lud was a ber tribe on the Syriac.

(b) Anamor, according to Knobel, the inhabitants of the Delta, which would be described in Egyptian by the term sennenit or senneniti, "northern district," converted by the Hebrews into Amanite, and then to Ammorite, from the Hebrews, meaning the inhabitants of Memphis.

(c) Naphtuh, variously explained as the people of Noboth, i.e. the northern coast district (Bochart), and as the Nabatian tribe of Phutah, meaning the inhabitants of Memphis.

(d) Penn, the People of Egypt, the name being ex
   plicated as meaning in the Egyptian "the south" (Knobel).

(e) Canahim, Canaani Mons, Cannaoti, and Canaan,
eastward of the Delta (Knobloch; the Colchians, according to Bochart, but this is unlikely).

(e.) Probably the most probable context of the "Ps. of Egypt" is the inscriptions known as the "Ps. of Egypt" (Cappadocia and the Cappadocian alphabet)

(f.) The "Ps. of Egypt" is the inscriptions known as the "Ps. of Egypt" (Cappadocia and the Cappadocian alphabet)

(g.) The "Ps. of Egypt" is the inscriptions known as the "Ps. of Egypt" (Cappadocia and the Cappadocian alphabet)

(h.) The "Ps. of Egypt" is the inscriptions known as the "Ps. of Egypt" (Cappadocia and the Cappadocian alphabet)

(i.) The "Ps. of Egypt" is the inscriptions known as the "Ps. of Egypt" (Cappadocia and the Cappadocian alphabet)

(j.) The "Ps. of Egypt" is the inscriptions known as the "Ps. of Egypt" (Cappadocia and the Cappadocian alphabet)

(k.) The "Ps. of Egypt" is the inscriptions known as the "Ps. of Egypt" (Cappadocia and the Cappadocian alphabet)

(l.) The "Ps. of Egypt" is the inscriptions known as the "Ps. of Egypt" (Cappadocia and the Cappadocian alphabet)

(m.) The "Ps. of Egypt" is the inscriptions known as the "Ps. of Egypt" (Cappadocia and the Cappadocian alphabet)

(n.) The "Ps. of Egypt" is the inscriptions known as the "Ps. of Egypt" (Cappadocia and the Cappadocian alphabet)

(o.) The "Ps. of Egypt" is the inscriptions known as the "Ps. of Egypt" (Cappadocia and the Cappadocian alphabet)

(p.) The "Ps. of Egypt" is the inscriptions known as the "Ps. of Egypt" (Cappadocia and the Cappadocian alphabet)

(q.) The "Ps. of Egypt" is the inscriptions known as the "Ps. of Egypt" (Cappadocia and the Cappadocian alphabet)

(r.) The "Ps. of Egypt" is the inscriptions known as the "Ps. of Egypt" (Cappadocia and the Cappadocian alphabet)

(s.) The "Ps. of Egypt" is the inscriptions known as the "Ps. of Egypt" (Cappadocia and the Cappadocian alphabet)

(t.) The "Ps. of Egypt" is the inscriptions known as the "Ps. of Egypt" (Cappadocia and the Cappadocian alphabet)

(u.) The "Ps. of Egypt" is the inscriptions known as the "Ps. of Egypt" (Cappadocia and the Cappadocian alphabet)

(v.) The "Ps. of Egypt" is the inscriptions known as the "Ps. of Egypt" (Cappadocia and the Cappadocian alphabet)

(w.) The "Ps. of Egypt" is the inscriptions known as the "Ps. of Egypt" (Cappadocia and the Cappadocian alphabet)

(x.) The "Ps. of Egypt" is the inscriptions known as the "Ps. of Egypt" (Cappadocia and the Cappadocian alphabet)

(y.) The "Ps. of Egypt" is the inscriptions known as the "Ps. of Egypt" (Cappadocia and the Cappadocian alphabet)

(z.) The "Ps. of Egypt" is the inscriptions known as the "Ps. of Egypt" (Cappadocia and the Cappadocian alphabet)
TONGUES, CONFESSION OF 473

TONGUES, CONFESSION OF

hor. remained (xxiv, 10; xxvii, 83; xxix, 4 sq.), while the two branches, represented by Abraham and Lot, the son of Haran, crossed the Euphrates and settled in Canaan and the adjacent districts (xii, 5). From Lot sprang the Moabites and the Amorites (Gen. xiv, 6; Deut. ii, 22; Num. xxii, 5-33); from Abraham the Ishmaelites through his son Ishmael (xxv, 12), the Israelites through Isaac and Jacob, the Edomites through Isaac and Esau (ch. xxvi), and certain Arab tribes, of whom the Midianites are the most conspicuous, through the sons of his concubine Keturah (xxiv, 1-18).

The most important geographical question in connection with the Terachites concerns their original settlement. The presence of the Chaldees in Babylonia at a subsequent period of scriptural history has led to a supposition that they were a Hamitic people, originally belonging to Babylonia, and thence transplanted in the 7th and 8th centuries to Northern Assyria (Rawlinson, Herod. i, 319). Others think it more consistent with the general direction of the Terachite movement to look for Ur in Northern Mesopotamia, to the east of Haran. That the Chaldees or, according to the Hebrew, Nahav, or Nahavah, the name of the neighborhood is indicated by the name Chessed as one of the names of Nahor (Gen. xxii, 22), and possibly by the name Arphaxad itself, which, according to Ewald (Gesch. i, 378), means "fortress of the Chaldees." In classical times, we find the Kassim still occupying the mountains on the borders of Babylonia, the occupations of which, as the name had under the names Chaldei ( Xenoph. Anab. iv, 3, 1-4) and Gordyri or Corduchi ( Strabo, xvi, 747), and here the name still has a vital existence under the form of Kurd. The name Kassim is explained by Oppert as meaning "two rivers," and thus as equivalent to the Hebrew Nahorah and the classical Mesopotamica ( Zert. d. morg. Gen. xi, 137). We receive this explanation with reserve; but, so far as it goes, it favors the northern locality. The evidence for the antiquity of the southern settlement is lesened if the term Koldai does not occur in the Assyrian inscriptions until the 9th century B.C. (Rawlinson, i, 449). But whether we conceive the original seat of the Chaldees to have been in the north or in the south, they moved along the course of the Tigris until they reached Babylon, where we find them dominant in the 7th century B.C.

Whether they first entered this country as mercenaries, and then conquered the country as rulers (Gen. xiv, 1-23), or as "people of the ages" (Gen. xii, 68), must remain uncertain; but we think the suggestion supported by the circumstance that the name was afterwards transferred to the whole Babylonic population. The sacerdotal character of the Chaldees is certainly difficult to reconcile with this or any other hypothesis.

Returning to the Terachites, we find it impossible to define the geographical limits of their settlements with precision. They intermingled with the previously existing inhabitants of the countries intervening between the Red Sea and the Euphrates, and hence we find an Arab and an Esh, a Chessed among the descendants of Nahor (Gen. xxii, 21, 22), a Dedan and a Sheba among those of Abraham by Keturah (xxv, 8), and an Amalek among the descendants of Esau (xxxvi, 12). Few of the numerous tribes which sprang from this stock attained historical celebrity. The Israelites must of course be excepted from this description; so, also, the Nabataeans, if they are to be regarded as represented by the Nebathe of the Bible, as to which there is some doubt (Quatremère, Mélanges, p. 59). Of the rest, the Moshites, Ammonites, Midianites, and Edomites are chiefly known for their hostilities with the Israelites, and the point in which the migration of the Edomites was perpetuated in the name Hebrew, as referring to their residence beyond the river Euphrates (Josh. xxiv, 8).

d. Besides the nations whose origin is accounted for in the Bible, we find other early populations mentioned in the course of the history without any notice of their ethnology. In this category we may place the Horim, who occupied Edom before the descendants of Esau (Deut. ii, 12, 22); the Amalekites of the Sinaiic peninsula; the Zuzim and Zanzzim of Perea (Gen. xxxvi, 17); the Rephaim of Bashan, and of the valley near Jerusalem named after them (Gen. xiv, 5; 2 Sam. v, 18); the Emims eastward of the Dead Sea (Gen. xiv, 5), the Avim of the southern Philistine plain (Deut. ii, 20); and the Anakim of Southern Palestine (Josh. xi, 21). The question arises whether these tribes were Hamitic or whether they resulted from an earlier population which preceded the entrance of the Hamites. The latter view is supported by Knobel, who regards the majority of these tribes as Semites, who preceded the Canaanites, and communicated to them the Semitic tongue (Falkert, p. 204, 315). No evidence can be adduced in support of this theory, which was probably suggested by the double difficulty of accounting for the name of Lud and of explaining the apparent anomaly of the Hamites and Terachites speaking the same language. Still less evidence is there in favor of the Turanian origin, which, we would presume, was assigned to these tribes by the Jews with the view to accord with a current theory that the first wave of population which overspread Western Asia belonged to that branch of the human race (Rawlinson, Herod. i, 645, note). To this theory we shall presently advert; meanwhile, we can only observe, in reference to these statements, that, in accordance with that view, together with the Canaanites, they probably belonged to the same stock ( comp. Numb. xii, 22; Judg. i, 10). They may, perchance, have belonged to an earlier migration than the Canaanitish, and may have been subdued by the later conquerors; but this would not necessitate a different origin. The names of these tribes in their abodes, as instanced in Gen. xiv, 5; Deut. ii, 23; Numb. xiii, 22, bear a Semitic character (Ewald, Gesch. i, 311), and the only objection to their Canaanitish origin arising out of these names would be in connection with Zammumim, which, according to Renan ( Hist. Gén. p. 33, note), is formed on the same principle as the Greek Βασανικος, and in this case implies, at all events, a dialectical difference.

(II.) Having thus surveyed the ethnological statement contained in the Bible, it remains for us to inquire how far they are based on, or accord with, physiological and linguistic analogies. Kohn's system of the threefold division of the Mosaic table is founded on the physiological principle of color, Shem, Ham, and Japheth representing respectively the red, black, and white complexions prevalent in the different regions of the then known world (Falkert, p. 11-19). He claims etymological support for this view (= "dark") and Japheth (= "fair"), but not in respect to Shem; and he adduces testimony to the fact that such differences of color were noted in ancient times. The etymological argument weakens rather than sustains his view; for it is difficult to conceive that the principle of classification would be embodied in two of the names, and not also in the third: the force of such evidence is wholly dependent upon its uniformity. With regard to the actual prevalence of the hues, it is quite consistent with the physical character of the districts that the Hamites of the south should be dark, and the Japhethites of the north fair; and, further that the Hamites should hold an intermediate place in color as in geographical position. But we have no evidence that this distinction was strongly marked. The "redness" expressed in the name Edom probably referred to the soil (Stanley, Sinai, and Pal. p. 67); the Berithrus Mare referred to its peculiar fertility in respect to the presence of some vegetable substance, and not that the red Shemites bordered on it, the black Cushites being equally numerous on its shores: the name Adam, as applied to the Shemitic man, is ambiguous, from its reference to soil as well as color. On the other hand, the Phoenicians (assuming them to have
reached the Mediterranean seaboard before the table was compiled) were so called from their red hue, and yet are placed in the table among the Hamites. The assumption is thus made that a certain Semitic deity Typhon is of little value until it can be decisively proved that the deity in question represented the Semmites. This is asserted by Renan (Hist. Gên. i, 38), who endorses Knobel's view so far as the Semmites are concerned, though he does not accept his general theory. The linguistic difficulties connected with the Mosaic table are very considerable, and we cannot pretend to unravel the tangled skein of conflicting opinions on the subject. The primary difficulty arises out of the Biblical narrative itself, and is consequent of old standing—the difficulty, namely, of accounting for the evident identity of language spoken by the Semitic tribes and the Canaanites that the Terachites and the Hamitic Cananites. Modern linguistic research has rather enhanced than removed this difficulty. The alternatives hitherto offered as satisfactory solutions—namely, that the Terachites adopted the language of the Canaanites, or that of the Terachites that of the Terachites—are both inconsistent with the enlarged area which the language is found to cover on each side. Setting aside the question of the high improbability that a wandering nomadic tribe, such as the Terachites, would be able to impose its language on a settled and powerful nation like the Canaanites, it would still remain to be explained how the Terachites and the Canaanites who did not come into contact with the Terachites, acquired the same general type of language. On the other hand, assuming that what are called Semitic languages were really Hamitic, we have to explain the extension of the Hamitic area over Mesopotamia and Assyria, which, according to the table of tongues, the general opinion of ethnologists, belonged wholly to a non-Hamitic population. A further question, moreover, arises out of this explanation, viz., What was the language of the Terachites before they assumed this Hamitic tongue? This question is answered by J. G. Müller, in Herzog's Real-Encyklop. xiv, 298, to the effect that the Semmites originally spoke an Indo-European language—a view which we do not expect to see generally adopted.

Restricting ourselves, for the present, to the linguistic question, we must draw attention to the fact that there is a well-defined Hamitic and Semitic literature, and that many theories, which obliterate this distinction must fall to the ground. The Hamitic type is most highly developed, as we might expect, in the country which was, par excellence, the land of Ham, viz. Egypt; and whatever elements of original unity with the Semitic type may be preserved, practically the two were as distinct from each other in historical times as any two languages could possibly be. We are therefore not prepared at once to throw overboard the linguistic element of the Mosaic table. At the same time, we recognise the extreme difficulty of explaining the anomaly of Hamitic tribes speaking a Semitic tongue. It will not suffice to say, in answer to this, that these tribes were Semmites; for again the correctness of the Mosaic table is vindicated by the differences of social and artistic culture which distinguish the Semmites proper from the Phoenicians and Canaanites. In any event, the formative elements are characterized by habits of simplicity, isolation, and adherence to patriarchal ways of living and thinking; the Phoenicians, on the other hand, were eminently a commercial people; and the Canaanites are identified with the massive architectural erections of Babylonia and Syria. Thus, equally extended ideas of empire and social progress.

The real question at issue concerns the language, not of the whole Hamitic family, but of the Canaanites and Cushites. With regard to the former, various explanations have been offered—such as Knobel's, that they acquired a Semitic cult to the expense of the Ammonite tongue represented by the Rephaim, Zaimim, Zamumimm, etc. (Volkert, p. 315); or Bunsen's, that they were a Semitic race who had long sojourned in Egypt (Phil. of Hist. i, 191)—neither of which is satisfactory. With regard to the latter, the only explanation to be offered is that a Semitic identity has been discovered in the name of an isolated Hamitic population, the result being a combination of Cushitic civilization with a Semitic language (Renan, Hist. Gên. i, 322). Nor is it unimportant to mention that peculiarities have been discovered in the Cushite Semitic of Southern Arabia which suggest a close affinity with the Egyptian, and that the Semitic tribes, however, without expectation that time and research will clear up much of the mystery that now enwraps the subject. There are two directions to which we may hopefully turn for light, namely, Egypt and Babylonia, with regard to each of which we make a few remarks.

1. That the Egyptian language exhibits many points of resemblance to the Semitic type is acknowledged on all sides. It is also allowed that the Semitic languages are of a valuable character, being observable in the pronouns, numerals, in agglutinative forms, in the treatment of vowels, and other such points (Renan, Hist. Gên. i, 84, 85). There is, moreover, an equal degree of agreement among scholars as to the deductions to be drawn from these resemblances. While many recognize in them the proofs of a substantial identity, and hence regard Hamitism as an early stage of Semitism, others deny, either on general or on special grounds, the probability of such an identity; and high authorities like Bunsen on the former side (Phil. of Hist. i, 186-189; ii, 3), and Renan (Hist. Gên. i, 86) on the other, not to mention a long array of scholars who have adopted each view, it would be presumption dogmatically to assert the correctness or incorrectness of either. We can only point to the possibility of the identity being established, and to the further possibility that connecting-links may be discovered between the two extremes, which may serve to bridge over the gulf, and to render the use of a Semitic language by a Hamitic race less of an anomaly than it is at present considered.

2. Turning eastward to the banks of the Tigris and Euphrates, and the adjacent countries, we find ample materials for research in the inscriptions recently discovered, the examination of which has not yet yielded undisputed results. The Mosaic table places a Semitic Cushitic population of Assyria and Babylonia in Egypt and Elam, and a Cushitic in Babylon. The probability of this being ethnically (as opposed to geographically) true depends partly on the age assigned to the table. There can be no question that at a late period Assyria and Elam were held by non-Semitic, probably Aryan, conquerors. But if we carry it back to the time when the Cushites first settled in the land, it may have been different; for though Elam is regarded as etymologically identical with Iran (Renan, Hist. Gên. i, 41), this is not conclusive as to the Persian language of the early times. Sufficient evidence is afforded by language that the basis of the population in Assyria was Semitic (ibid. i, 70; Knobel, pp. 154-166); and it is by no means improbable that the inscriptions belonging more especially to the neighborhood of Susa may ultimately establish the fact of a Semitic population in Elam. The presence of a Cushitic population in Babylon is an opinion very generally held on linguistic grounds; and the presence of a Semitic identity is said to exist between the old Babylonian and the Melki language, a Semitic tongue of an ancient type still living in a district of Hadramaut in Southern Arabia (Renan. Hist. Gên. i, 60). In addition to the Cushitic and Semitic elements in the population of Babylonia and the adjacent countries, the presence of languages not yet inferred from the linguistic character of the early inscriptions. We must here express our conviction that the ethology of the countries in question is considerably clouded by the undefined use of the terms Turanian; Scythian, and so like. It is frequently difficult to distinguish the genial type of the Semitic and Cushitic tongues, as an ethnic sense, as opposed to ethnographic, or in an ethnic sense. The presence of a certain amount of
TONGUES, CONFUSION OF 475 TONGUES, CONFUSION OF

Turanianism in the former does not involve its presence in the latter sense. The old Babylonian and Susian inscriptions usually identify the Turanian tribes as the later ones, but this is only a proof of their belonging to an earlier stage of the language, and does not of itself indicate a foreign population; and if these early Babylonian inscriptions graduate into the Semitic, as is asserted even by the earliest of the Turanian theory (Rawlinson, Herod. i, 442, 445), the evidence of the ethnological Turanianism cannot possibly be inferred. Added to this, it is inexplicable how the presence of a large Scythian population in the Achemenian period, to which many of the Susianian inscriptions belong, could escape the ancient historians. The only evidence of Turanian tribes noticed by Herodotus in his Persian empire are the Parthians and the Sace, the former of whom are known to have lived in the north, while the latter probably lived in the extreme east, where a memorial of them is still supposed to exist in the name Scasid, representing the ancient Scasactens. Even with regard to these, Scythic may not have been the name they may have belonged to the Scythians of history (the Skolots), for whom an Indo-European origin is claimed (ibid. iii, 197). The impression conveyed by the supposed detection of so many heterogeneous elements in the old Babylonian tongue (ibid. i, 442, 444, 446, notes not favorable to the general results of the researches.

With regard to Arabia, it may safely be asserted that the Mosaic table is confirmed by modern research. The Cushitic element has left memorials of its presence in the south in the vast ruins of Mareth and Sina (Rey- man, Hist. Gens. i, 318), as well as in the influence it has exercised on the Himyaritic and Mahri languages, as compared with the Hebrew. The Joktanid element forms the basis of the Arabian population, the Semitic character of whose language needs no proof. With regard to the Islamic element, it is not possible to give a linguistic proof of its existence, but it is confirmed by the traditions of the Arabs themselves.

It remains to be inquired how far the Japhetic stock represents the linguistic characteristics of the Indo-European and Turanian families. Adopting the two-fold theory of the former, suggested by the Turanian name itself, into the eastern and western; and subdividing the eastern into the Indian and Iranian, and the western into the Celtic, Hellenic, Ilyrian, Italian, Teutonic, Slavonic, and Lithuanian classes, we are able to assign Madai (Media) and Togarmah (Armenia) to the Iranian; and Javan (Java) and Usski as the Iranian and Hellenic; Great Britan or the Celtic; and Dao- nin, also, conjuncturally, to the Ilyrian. According to the old interpreters, Ashkenaz represents the Teutonic class, while, according to Knobel, the Italian would be represented by Tarshish, whom he identifies with the Etruscan; the Slavonian by Magog; and the Lithuanian possibly by Tiras (Volkert, p. 68, 90, 130). The same writer also identifies Rip hath with the Gauls, as distinct from the Cymry or Gomer (p. 45); while Kittim is referred to him by not improbably to the Carians, who at one period were predominant on the islands adjacent to Asia Minor. In this respect, the identity of Carian varieties is strong, but in no instance approaches demonstration. Beyond the general probability that the main branches of the human family would be represented in the Mosaic table, we regard much that has been advanced on this subject as highly precarious. At the same time, however, that the subject is an open one; and that as there is no possibility of proving, so also, there is none of disproving, the correctness of these conjectures. Whether the Turanian family is fairly represented in the Mosaic table may be doubted. Those who advocate the Mongolian origin of the Scythian would naturally regard Magog as the representative of this family; and even those who dissent from the Mongolian theory may still not unreasonably conceive that the title Magog applied broadly to all the nomad tribes of Northern Asia, whether Indo-European or Turanian. Tubal and Meshech remain to be considered: Knobel attributes the former to the Scythian, and the latter to the Ligurians (p. 111, 119); and if the Finnish character of the Basque language were established, he would regard the Iberians as certainly, and the Ligurians as probably, Turanians—the relics of the first wave of population which is supposed to have once overspread the whole of the European continent, and of which the Romans in the north, and the Basques in the south, are the sole surviving representatives. The Turanian character of the two Biblical races above mentioned has been otherwise maintained on the ground of the identity of the names Meshech and Muscovite (Rawlinson, Herod. i, 652).

(III) Having thus reviewed the ethnic relations of the nations who fell within the circle of the Mosaic table, we propose to cast a glance beyond its limits, and inquire how far the present results of ethnological science support the general idea of the unity of the human race, which underlies the Mosaic system. The chief and in many instances the only instrument at our command for ascertaining the relationship of nations is language. In its general results this instrument is thoroughly trustworthy, and in each individual ease to which it is applied, a strong prima facie evidence; but its evidence, if uncorroborated by other proofs, is not unimpeachable, in consequence of the numerous instances of adopted languages which have occurred within historical times. This drawback to the value of the evidence of language will not materially affect our present inquiry; inasmuch as we shall confines ourselves as much as possible to the general results.

The nomenclature of modern ethnology is not identical with that of the Bible, partly from the enlargement of the area, and partly from the general adoption of language as the basis of classification. The term Semitic is indeed retained, not, however, to indicate a descent from Shem, but the use of languages adopted by that which was current among the Israelites in historical times. Hamitic also finds a place in modern ethnology, but as subordinate to, or co-ordinate with, Semitic. Japhetic is superseded mainly by Indo-European or Turanian. The various sub-branches of nations, which find no place under the Biblical titles are classed by certain ethnologists under the broad title of Turanian, while by others they are broken up into divisions more or less numerous.

1. The first branch of our subject will be to trace the extension of the Semitic family, as connected to it in the Bible. The most marked characteristic of this family, as compared with the Indo-European or Turanian, is its inelasticity. Hemmed in both by natural barriers and by the superior energy and expansiveness of the Aryan and Turanian races, it retains to the present day the status quo of early times. The only direction in which it has exhibited any tendency to expand has been about the shores of the Mediterranean, and even here its activity was of a sporadic character, limited to a single branch of the family, viz. the Phoenicians, and to a single phase of expansion, viz. commercial colonies. In Asia Minor the dissimilarity of Semitic presence in Cilicia, which was connected with Phoenicia both by tradition (Herod. vii, 91) and by language, as attested by existing coins (Gesenius, Mom. Phoen. iii, 2); in Pamphylia, Pisidia, and Lycia, parts of which were occupied by the Solyms (Pliny, v, 24; Herod. i, 173), whose name bears a Semitic character, and who are reported to have spoken a Semitic tongue (Eusebius, Prepar. Ec. ix, 9), a statement confirmed by the occurrence of other Semitic names, such as Phonix and Cabalia, though the subsequent preponderance of an Aryan population in these same districts is attested by the existence of the Phrygian again in Caria, though the evidence arising out of the supposed identity of the names of the gods Osago and Chrysoreus with the Osageus and Χρυσόραυς of Sanchoni-

476

athan is called in question (Renan, Hist. Gén. i, 49); and, lastly, in Lydia, where the descendants of Lud are located by many authorities, and where the prevalence of the Semites ever occupied any portion of the plateau of Asia Minor may be doubted. In the opinion of the ancients the later occupants of Cappadocia were Syrians, distinguished from the mass of their race by a lighter hue, and hence tersus Leucouery (Strabo, xii, 542); but this statement is traversed by the evidences of Aryanism afforded by the names of the kings and deities, as well as by the Persian character of the religion (ibid. xvi, 738). If, therefore, the Semites ever occupied this district, they must soon have been brought under the dominion of Aryan conquerors (Dienbach, Orig. Europ. p. 44). The Phoenicians were ubiquitous on the islands and shores of the Mediterranean; in Cyprus, where they have left tokens of their presence at Citium and other places; in Crete; in Malta, where they were the original settlers (Diod. Sic. v, 12); on the mainland of Greece, where their presence is be- tokened by the name Cadmus; in Samos, Same, and Samothrace, which bear Semitic names of Hesiod in I. and Tenedos, once known by the name of Phoinice; in Sicily, where Panormus, Motya, and Solitae were Semitic settlements; in Sardinia (ibid. v, 35); on the eastern and southern coasts of Spain; and on the north coast of Africa, which was lined with Phoenician colonies from the Syrtes Major to the Pillars of Hercules. They must also have penetrated deeply into the interior, to judge from Strabo's statement of the destruction of three hundred towns by the Pharsanians and Nigritians (Strabo, xvi, 626). Still, in none of the countries we have mentioned did they supplant the original population; they were conquerors and settlers, but no more than this.

The bulk of the North African languages, both in ancient and modern times, though not Semitic in the proper sense of the term, so far resemble that type as to have obtained the title of sub-Semitic. In the north the phonetic features appear with the phonetic features of the syllable Mus in the name Marcus, etc., to be allied to the modern Berber; and the same conclusion has been drawn with regard to the Libyan tongue. The Berber, in turn, together with the Touarick and the general body of the Northern African dialects, is closely allied to the Syrian and Egyptian, and hence the title of Hamitic, or, according to the more usual nomenclature, sub-Saharan (Renan, Hist. Gén. i, 201, 292). Southward of Egypt the Semitic type is reproduced in the majority of the Abyssinian languages, particularly in the Greek, and in a less marked degree in the Amharc, the Sabo, and the Galli; and Semitic influence may be traced along the whole east coast of Africa as far as Mozambique (ibid. i, 336-340). As to the languages of the interior and of the south, there appears to be a conflict of opinions, the writer from whom we have borrowed, denies any names of resemblance to the Semitic type, while Dr. Latham asserts very con- fidently that connecting-links exist between the sub- Semitic languages of the north, the Negro languages in the centre, and the Baffu languages of the south; and that even the Hottentot language is not so isolated as regards its linguistic connections (Mag. de Beaufort, p. 134-149). Bunsen supports this view so far as the languages north of the equator are concerned, but regards the southern as rather approximating to the Turanian type (Phil. of Hist. i, 178; ii, 20). It is impossible as yet to form a decided opinion on this large subject.

The interference of the Arends branch, which yet to be noticed, namely, whether we can trace the Semitic family back to its original cradle. In the case of the Indo- European family this can be done with a high degree of probability; and if an original unity existed between these stocks, the domicile of the one would necessarily be the home of the other. As of the Indo-European family, and traditions favors this assumption, and possibly the frequent allusions to the east in the early chapters of Genesis may contain a reminiscence of the direction in which the primeval abode lay (Renan, Hist. Gén. i, 476). The position of this abode we shall describe presently.

2. The Indo-European family of languages, as at present constituted, consists of the following nine classes: Indian, Iranian, Celtic, Italian, Albanian, Greek, Teutonic, Lithuanian, and Slavonic. Geographically, these classes may be grouped together in two divisions, Eastern and Western; the former comprising the first two, and the latter the seven remaining classes. Schleicher's analysis supplies what we have termed the Western into two, the South-west European and the North European; in the former of which he places the Greek, Albanian, Italian, and Celtic; in the latter, the Slavonian, Lithuanian, and Teutonic (Compend. i, 9). Prof. M. Müller combines the Slavonian and Lithuanian classes in the Windic, thus reducing the number to eight. These classes exhibit various degrees of affinity to each other, which are described by Schleicher in the following manner: The earliest deviation from the common language of the family was effected by the Slavono-Teutonic branch, which is supposed to have occurred, which separated what we may term the Graeco-Italic-Celtic branch from the Aryan. The former held together for a while, and then threw off the Greek (including probably the Albanian), leaving the Celtic and Italian still connected: the final division of the latter two took place after another considerable interval. The first-mentioned branch—the Slavono-Teutonic—remained intact for a period somewhat longer than that which witnessed the second bifurcation of the original stock, and then divided into the Teutonic and Slavono-Lithuanian, which latter finally broke up into its two component elements. The Aryan branch similarly held together for a lengthened period, and then bifurcated into the Indian and Iranian. The conclusion Schleicher draws from these linguistic affinities is that the more easterly of the European nations, the Slavonians and Teutons, were the first to leave the common home of the Indo-European race; they were followed by the Celts, Italiants, and Greeks; and that the Indian and Iranian branches were the last to commence their migrations. We feel unable to accept this conclusion, which appears to us to be based on the assumption that the antiquity of a language is to be measured by its ap- proximate number of strophes and verses. The position of the representatives of the different language-classes, we should infer that the most westerly were the earliest immigrants into Europe, and therefore probably the earliest emigrants from the primeval seat of the race; and we believe this to be confirmed by linguistic proofs of the high antiquity of the Celtic branch compared with the other branches of the Indo-European family (Bunsen, Phil. of Hist. i, 188). The original seat of the Indo-European race was on the plateau of Central Asia, probably to the westward of the Bolor and Yarkhans ranges. The Indian branch can be traced back to the slopes of Himalaya by the geographical allusions in the Vedic hymns (Müller, Lectures, p. 201); in confirmation of which we may adduce the circumstance that the sole tree for which the Indians have an appellation in common with the western nations is the Pomegranate (Pott, Flora, p. 201). The southern slope of that range (Pott, Flora, p. 119). The westward progress of the Iranian tribes is a matter of history, and though we cannot trace this progress back to its fountain-head, the locality above mentioned best accords with the traditional belief of the Aryan yaraks. The language of the Aryan yaraks has yet to be noticed, namely, whether we can trace the Semitic family back to its original cradle. In the case of the Indo-European family this can be done with a high degree of probability; and if an original unity existed between these stocks, the domicile of the one would necessarily be the home of the other. As of the Indo-European family, and traditions favors this assumption, and possibly the frequent allusions to the east in the early chapters of Genesis may contain a reminiscence of the direction in which the primeval abode lay (Renan, Hist. Gén. i, 476). The position of this abode we shall describe presently.

The Indo-European family of languages, as at present constituted, consists of the following nine classes: Indian, Iranian, Celtic, Italian, Albanian, Greek, Teutonic, Lithuanian, and Slavonic. Geographically, these classes may be grouped together in two divisions, Eastern and Western; the former comprising the first two, and the latter the seven remaining classes. Schleicher's analysis supplies what we have termed the Western into two, the South-west European and the North European; in the former of which he places the Greek, Albanian, Italian, and Celtic; in the latter, the Slavonian, Lithuanian, and Teutonic (Compend. i, 9). Prof. M. Müller combines the Slavonian and Lithuanian classes in the Windic, thus reducing the number to eight. These classes exhibit various degrees of affinity to each other, which are described by Schleicher in the following manner: The earliest deviation from the common language of the family was effected by the Slavono-Teutonic branch, which is supposed to have occurred, which separated what we may term the Graeco-Italic-Celtic branch from the Aryan. The former held together for a while, and then threw off the Greek (including probably the Albanian), leaving the Celtic and Italian still connected: the final division of the latter two took place after another considerable interval. The first-mentioned branch—the Slavono-Teutonic—remained intact for a period somewhat longer than that which witnessed the second bifurcation of the original stock, and then divided into the Teutonic and Slavono-Lithuanian, which latter finally broke up into its two component elements. The Aryan branch similarly held together for a lengthened period, and then bifurcated into the Indian and Iranian. The conclusion Schleicher draws from these linguistic affinities is that the more easterly of the European nations, the Slavonians and Teutons, were the first to leave the common home of the Indo-European race; they were followed by the Celts, Italiants, and Greeks; and that the Indian and Iranian branches were the last to commence their migrations. We feel unable to accept this conclusion, which appears to us to be based on the assumption that the antiquity of a language is to be measured by its ap- proximate number of strophes and verses. The position of the representatives of the different language-classes, we should infer that the most westerly were the earliest immigrants into Europe, and therefore probably the earliest emigrants from the primeval seat of the race; and we believe this to be confirmed by linguistic proofs of the high antiquity of the Celtic branch compared with the other branches of the Indo-European family (Bunsen, Phil. of Hist. i, 188).

The original seat of the Indo-European race was on the plateau of Central Asia, probably to the westward of the Bolor and Yarkhans ranges. The Indian branch can be traced back to the slopes of Himalaya by the geographical allusions in the Vedic hymns (Müller, Lectures, p. 201); in confirmation of which we may adduce the circumstance that the sole tree for which the Indians have an appellation in common with the western nations is the Pomegranate (Pott, Flora, p. 119). The westward progress of the Iranian tribes is a matter of history, and though we cannot trace this progress back to its fountain-head, the locality above mentioned best accords with the traditional belief of the Aryan yaraks. The language of the Aryan yaraks has yet to be noticed, namely, whether we can trace the Semitic family back to its original cradle.
reached their respective localities can only be conjectured. We may suppose them to have successively crossed the plateau of Iran until they reached Armenia, whence they might follow either a northerly course across Asia to the Sea of Ararat, or a direct westerly one along the plateau of Asia Minor, which seems destined by nature to be the bridge between the two continents of Europe and Asia. A third route has been surmised for a portion of the Celtic stock, viz., along the north coast of Africa, and across the Straits of Gibraltar, by the shores of the Mediterranean Sea (Pliny, xxvi, 28, 148); but we see little confirmation of this opinion beyond the fact of the early presence of the Celts in that peninsula, which is certainly difficult to account for.

The eras of the several migrations are again very much a matter of conjecture. The original movements belong, for the most part, to the anti-historical age, and we can do no more than note the period at which we first encounter the several nations. That the Indian Aryans had reached the mouth of the Indus at all events before B.C. 1000 appears from the Sanscrit names of the articles which Solomon imported from that country. See INDIA. The presence of Aryans on the Semitic frontier is as old as the composition of the Mosaic table; and, according to some authorities, is proved by the names of the confederate kings in the age of Abraham (Gen. xiv, 1; Renan, Hist. Gén., i, 61). The Aryan Medes are mentioned in the Assyrian annals about B.C. 590. The Persians, by the time of Herodotus (v, 65), were a well-known people, and had already spread to the borders of the sea. The Teutonic elements of later date, for they were supplanted by the Greeks. The Teutonic invasion of Europe is due, both in the case of the Helenes and the Teutonic Masses, to the fact that the latter had crossed the Hellespont and the Dardanelles, and established themselves on the shores of the Baltic, long before the dawn of history, and the Italians had reached their quarters at a yet earlier period. The Celts had reached the west of Europe at all events before, probably very long before, the age of Hecataeus (B.C. 500); the last remains of the tribes on the shores of the Black Sea, or whatever there about that period, according to Bunsen's conjecture (Phil. des Hist., i, 152). The Teutonic migration followed at a long interval after the Celtic: Pytheas found them already seated on the shores of the Baltic in the age of Alexander (Pliny, xxxvii, 11), and in the course of their advance themselves, by which amber was described, to that district, belongs to them (Dienischb, Orig. Europ., p. 359). The earliest historical notion of them depends on the view taken of the nationality of the Teutones, who accompanied the Cimmeri on their southern expedition in B.C. 116, and who, by the time of the destruction of Troy, had penetrated as far as the Hellespont (Hesiod, Theog. 279), and, from which the name Wend is probably descended. The designation of Slavii or Slavari is of comparatively late date, and applied specially to the western branch of the Slavonian stock. The Lithuanians are probably represented by the Galindes and Sudens of Ptolemy (iii, 5, 21), the names of which tribes have been preserved in all ages in the Lithuanian district (Dienischb, p. 202). They are frequently identified with the Aesti, and it is not impossible that they may have adopted the title, which was a geographical one (= the east men): the Aesti of Tacitus, however, were Germans. In the above statements is contained the problematical identifications of the Northern stocks with the earlier nations of history: we may here mention that the Slavonians are not unfrequently regarded as the representatives of the Scythians (Skolots) and the Sarmatians (Knobel, Volkerk. p. 69). The writer whom we have just quoted places the Lithuanians as the first conquerors of the Agathyris (p. 130). So, again, Grimm traced the Teutonic stock to the Gaeta, whom he identified with the Goths (Geach, d. deutsch. Spr., i, 178).

It may be asked whether the Aryan race were the first-comers in the lands which they occupied in historic times, or whether the aboriginal population, indigenous to them, has disappeared under the pressure of the conquerors? With regard to the Indian branch this question can be answered decisively: the vestiges of an aboriginal population, which once covered the plains of Hindostan, still exist in the southern extremity of the peninsula, as well as in isolated localities elsewhere, as for example in the Deccan, or the Sertaneja, or certain other parts of the country. Not only this, but the Indian class of languages possesses a peculiarity of sound (the lingual or cerebral consonants) which is supposed to have been derived from this population and to betoken a fusion of the conquerors and the conquered (Schleicher, Compendi, i, 141). The languages of the eastern population are of the Uralic or Dene (Müller, Lect., p. 399). We are unable to find decided traces of Turanians on the plateaus of Iran. The Sace, of whom we have already spoken, were Scythians, and so were the Parthians, both reputed descent (Justin, xii, 1) and by habits of life (Strabo, xi, 513); but we cannot positively assert that they were Turanians, insomuch as the term Scythian was also applied, as in the case of the Skolots, to Indo-Europeans. In the Caucasian district the Iberians and others may have been Turanian in early as in later times; but it is difficult to unravel the entanglement of races and languages in that district. In Europe there exists in the present day an undoubted Turanian population eastward of the Baltic, viz., the Finns, who have been located there certainly since the time of Tacitus (Germ. 46), and who probably at an earlier period had spread more to the southward, but had been gradually thrust back by the advance of the Teutonic and Scythian or Slavonic nations (Dienischb, Orig. Europ., p. 359). There exists, again, in the South a population whose language (the Basque, or, as it is entitled in its own land, the Euskara) presents numerous points of affinity to the Finnish in grammar, though its vocabulary is wholly distinct. We cannot consider the Teutonic or the Baltic tribes as yet thoroughly and fully established, and we are therefore unable to divine the ethnic affinities of the early Iberians, who are generally regarded as the progenitors of the Basques. We have already adverted to the theory that the Finns in the North are perhaps connected in this way with the Eastern, or Scythian, or Slavonic, or even with the Turanian element of Turan, and have its name to the province of Galatia, is now represented linguistically by the insignificant populations among whom the Welsh and the Gaelic or Erse languages retain a lingering existence. The Italian race, on the other hand, which must have been well-nigh annihilated by, or absorbed in, the overwhelming masses of the Northern hordes, has imposed its language outside the bounds of Italy over the peninsula of Spain, France, and Wallachia. But, while the races have so intermingled as in many instances to lose all trace of their original individuality, the broad fact of their descent from one or other of the branches of the Indo-European family remains unaffected. It is, indeed, impossible to affiliate all the nations whose names appear on the roll of history to the existing divisions of that family, in consequence of the absence or the obscurity of ethnological criteria. Where, for instance, shall we place the Alans and the Astures, the Ostrogoths and the Visigoths? The Pityrians approximate perhaps to the Greek, and yet it differs from it materially both in form and vocabulary (Rawlinson, Herod. i, 666); still more is this the case with the Lycian, which appears to possess a vocabulary wholly distinct from its kindred languages (Greek, 587–587). The Keltic is ranged under the Iranian division; yet this, as well as the lan-
TONGUES, CONFUSION OF 478
TONGUES, CONFUSION OF

The languages prevalent in the mountainous district answering to the ancient Pontus are equally peculiar (Diefenbach, *Orig. Europ.*, p. 51). For this very reason we encounter in the extensive region of Armenia, reputed by Herodotus (*v.* 3) the most powerful nation in the world, the Indians excepted; yet but one word of their language (*bría* = "town") has survived, and all historical traces of the people have been obliterated. It is true that they are represented in later times by the *bríans* whom the authors of the *navagia* may trace down to the Iazyge of Hungary and Podlichia, in which latter district they survived until the 10th century of our era (Smith, *Dict. of Geogr.*, ii, 8), and then they also vanish. The Albanian language presents a problem of a different kind: materials for the study of its history are plentiful, but the necessary conclusions have as yet been drawn from them. The people who use this tongue (the *Skëtopërs*, as they call themselves) are generally regarded as the representatives of the old Illyrians, who in turn appear to have been closely connected with the Thracians (Strabo, vii, 316). Justin (xii, 1) speaks of a people residing in Illyria and on the shores of the Hellespont; it is not, therefore, improbable that the Albanian may contain whatever vestiges of the old Thracian tongue still survive (Diefenbach, *Orig. Europ.*, p. 68). In the Illyrian peninsula the Ilirian tongue remains as great an enigma as ever: its Indo-European character is supposed to be established, together with the probability of its being a mixed language (Bunsen, *Phil. of Hist.* i, 83-88). The result of researches into the Umbrian language, as represented in the Eugubine tablets, the earliest of which date from about B.C. 400; into the Sabellian, as represented in the Gelasian Vatican tablets; and into theOcean, of which the remains are numerous, have decided their position as members of the Italic class (*ibid.* i, 90-94). The same cannot be asserted of the Messapian or Iapygian language, which stands apart from all neighboring dialects. Its Indo-European character is affirmed, but no ethnological conclusion can as yet be drawn from the scanty information afforded us (*ibid.*, i, 94).

Lastly, within the Celtic area there are ethnological problems which we cannot pretend to solve. The Ligurians, for instance, present one of these problems: were they Celts, but belonging to an earlier migration than the other peoples of the same name? They could be regarded to a Welsh original, but on this great reliance can be placed, as it would be in this case a local (= coastmen) and not an ethnic title, and might have been imposed on them by the Celts. They evidently hold a posterior place to the Iberians, inasmuch as they are said to have driven a section of this people across the Alpes into Italy. That they were distinct from the Celts is asserted by Strabo (ii, 128), but the distinction may have been no greater than exists between the British and the Gaelic branches of that race. The admixture of the Celts and Iberians in the Spanish peninsula is not evident. The author of *Latham* attempts to explain on the ground that the term Celt (*Klærn*) really meant Iberian (*Ethon. of Eurl.*, p. 35). That such questions as these should arise on a subject which carries us back to times of hoar antiquity forms no ground for doubting the general conclusion that we can account ethnologically for the population of the European continent.

3. The Semitic and Indo-European families cover, after all, but an insignificant portion of the earth's surface: the large areas of Northern and Eastern Asia, the numerous groups of islands that line its coast and southwards, which are known under the general name of the immense continent of America itself, stretching well-nigh from pole to pole, remain to be accounted for. Historical aid is almost wholly denied to the ethnologist in his researches in these quarters; physiology and language are his only guides. It can hardly, therefore, be matter of surprise that we may find here neither the conclusive nor even a reasonable degree of probability, on this part of our subject. Much has been done; but far more remains to be done before the data for forming a conclusive opinion can be obtained. In Asia the languages fall into two large classes—the monosyllabic and the agglutinative. The former are represented ethnologically by the Chinese, the latter by the various nations classed together by Prof. M. Müller under the common head of Turanian. It is unnecessary for us to discuss the correctness of his view in regarding all these nations as constituting one single family. Whether we accept or reject his theory, the fact of a gradation of linguistic types and of connecting-links between the various branches remains unaffected, and for our present purpose the question is of comparatively little moment. The monosyllabic type apparently betokens the earliest stage in the development of language, and it is to define these branches and we should therefore assign a chronological priority to the settlement of the Chinese in the east and southeast of the continent. The agglutinative languages fall geographically into two divisions, a Northern and Southern. The Northern consists of a well-defined group, or family, designated by the German ethnologists as the Ural-Altaian. It consists of the following five branches: (1) The Tungusian, covering a large area, east of the river Yenisei, between Lake Baikal and the Tunguska. (2) The Mongolian, which prevails over the Great Desert of Gobi, and among the Kalmucks, wherever their language is spoken. (3) The Chukchi, covering the west coast of the Arctic Ocean, between the White Sea in the west and the river Anabar in the east. (5) The Finnish, which is spoken by the Finns and Lapps; by the inhabitants of Estonia and Livonia to the south of the Gulf of Finland; by various tribes about the Volga (the Tcheremissians and Mordvinians) and the Kama (the Votakes and Permiens); and, lastly, by the Magyars of Hungary. The Southern branch is subdivided into the following four classes: (1) The Tamulian, of the south of Hindostan. (2) The Tatarian (Tajik). (3) The Bhoti (Nepal and Bhotian), and the Lohitic languages east of the Brahmapootra. (4) The Tai, in Siam, Laos, Anam, and Pegu. (4) The Malay, of the Malay peninsula, and the adjacent islands; the latter being the original settlement of the Malay race, whence they spread in comparatively recent times across the Pacific.

The early movements of the races representing these several divisions can only be divined by linguistic tokens. Prof. M. Müller assigns to the Northern tribes the following chronological order: Tungusian, Mongolian, Turkish, and Finnish; and to the Southern division he refers the Bhoti, the Bhotians, the Tamulians, and the Brahmapootra (Phil. of Hist. i, 481). Geographically it appears more likely that the Malay preceded the Tai, inasmuch as they occupied a more southerly district. The later movements of the European branches of the Northern division can be traced historically. The Turkish race
TONGUES OF FIRE

479

TONGUES, GIFT OF

comenced their westerly migration from the neighbor- 
hood of the Altai range in the 1st century of our æra; 
in the 6th they had reached the Caspian and the Vol- 
gi; in the 11th and 12th the Turkomans took posses- 
sion of the area, and in the 13th the Osmanli made their first appearance in Western 
Asia; about the middle of the 14th they crossed from Asia Minor into Europe; and in the middle of the 15th they had established themselves at Constantinople. 
The Finnish race is supposed to have been origi- 

nally settled in the Urals, and the theory that they have migrated westward to the shores of the Baltic, which they had reached at a period anterior to the Christian æra; in the 7th century a branch pressed southward to the Danube, and founded the kingdom of Bulgaria, where, however, they have long ceased to have any na- 
tional existence. The Ugrian tribes, who are the early 
representatives of the Hungarian Magyars, approached Europe from Asia in the 5th and settled in Hungary in the 9th century of our æra. The central point from which the various branches of the Turanian family radiated would appear to be about Lake Baikal. With regard to the ethnology of Oceanica, and the means by which we can say little. The languages of the former are generally 
connected to the Malay class (Bunsen, Phil. of Hist. ii, 114); but the relations, both linguis- tic and ethnological, existing between the Malay and the black, or Negrito, population, which is found on many of the islands in the South China Sea, are so far from fav- ored with the supposed connection that the later immi- nation in language is far greater than in physiology (Latham, Essays, p. 218, 219; Garnett, Essays, p. 310), and in certain cases amounts to identity (Kennedy, Es- says, p. 85); but the whole subject is at present involved in obscurity. The polysynthetic languages of North America are regarded as emanating from the Mongolian stock (Bunsen, Phil. of Hist. ii, 111), and a close affinity is said to exist between the North American and the Kamchadal and Corean tongues on the opposite coast of Asia (Latham, Miss and his Migrations, p. 185). The conclusion drawn from this would be that the popula- tion of America entered by way of Behring's Strait. Other theories have, however, been broached on this subject. It has been conjectured that the chain of is- 
lands which stretches across the Pacific may have con- 
ducted a Malay population to South America; and, 
again, an African origin has been claimed for the Caribs of the West Indies. In the absence of trustworthy informa- 

They were appearances of tongues which were luminous, but did not 

bend, and the disciples were burned with fire. The season so regarded was suitable for the introduction of another and related æra, the inauguration of the Gospel economy: and anew God reveals himself by analogous manifestations. "Suddenly there came a sound from heaven as of a rushing mighty wind; It was like the roar of the tempest; but instead of proceeding from any point of the compass, it descended from heaven. Here, as in the wilderness, was the voice of God, a voice full of majesty. And there appeared unto them cloven tongues as of fire, and it sat upon each of them." Here we have the fiery attribute of Sinai. But now it takes the form of tongues, to denote that God while speaking was endowing with speech, and that his voice like echoing thunder would multiply itself through the reverberating media on which it fell. The tongues were cloven, but into what number of divisions we are not informed. As happens with the various flames of
The giving of the gifts, however, was to be governed by strict rules. The Spirit of God was to be the source of the gifts, and the church was to be guided by the Holy Spirit. The gifts were to be given in obedience to the will of God, and the recipient was to receive them in faith and confidence. The gifts were to be used for the service of the church and for the glory of God.

The gifts were to be distributed according to need, and the recipient was to be guided by the Holy Spirit. The gifts were to be used for the service of the church and for the glory of God. The gifts were to be used for the service of the church and for the glory of God. The gifts were to be used for the service of the church and for the glory of God.

The gifts were to be distributed according to need, and the recipient was to receive them in faith and confidence. The gifts were to be used for the service of the church and for the glory of God. The gifts were to be used for the service of the church and for the glory of God. The gifts were to be used for the service of the church and for the glory of God.

The gifts were to be distributed according to need, and the recipient was to receive them in faith and confidence. The gifts were to be used for the service of the church and for the glory of God. The gifts were to be used for the service of the church and for the glory of God. The gifts were to be used for the service of the church and for the glory of God.

The gifts were to be distributed according to need, and the recipient was to receive them in faith and confidence. The gifts were to be used for the service of the church and for the glory of God. ty-five, after the number of the sons of Noah (Gen. x) or the sons of Jacob (ch. xlvii), or one hundred and twenty, after that of the disciples (comp. Barouion, An- nol, i, 197). Most were agreed in seeing in the Pente- cost 'a gift of tongues' as recorded in the second book of the Acts, the witness of a restored unity. "Penna lingua- gurium disparisi hominibus, donum linguaurar dispenser in unum populum collegit" (Grotius, ad loc.).

We notice incidentally that parables have been sought in Isaiahist history. For example, there had been, it was maintained, a parable of the original Pentecost (Schneckenburger, Beiträge, p. 8, referring to Bux- torf, De Synag., and Philo, De Decl.). The later rabbiners were not without their legends of a like "baptism of fire." Nicodemus ben-Gorion and Jochanan ben- Zachai, men of great holiness and wisdom, went into an upper chamber to express their grief, and the house began to be full of fire (Lightfoot, Harm. iii, 14; Schött- gen, Hor. Heb. in Act. ii). Again, with regard to the more important phenomenon, it deserves notice that there are analogies in Jewish belief. Every word that went forth from the mouth of God on Sinai was said to have been translated into human speech by the sons of men (Wettstein, On Acts ii); and the beth-kol, the echo of the voice of God, was heard by every man in his own tongue (Schneckenburger, Beiträge). So, as regards the power of speaking, there was a tradition that the great rabbinists of the Sanhedrim could speak all the languages of the world.

The following are some of the direct arguments urged in favor of a literal view of the Pentecostal endowment: "(a) The power in question was virtually promised to the apostles by the very duty assigned them: They were enjoined 'to go and teach all nations, baptizing them in the name of the Father, and of the Son, and of the Holy Ghost.' They were to be witnesses for Christ 'in Jerusalem, and in all Judea, and in Samaria, and to the uttermost parts of the earth.' But how could they instruct remote tribes whose phraseology was a Babel to them, unless they were divinely qualified for the work? (b) This power was in keeping with the occasion. The old economy was characterizedistically ritualistic. It addressed the eye, and made an impression by its superb ceremonial. The Christian dispensation was to be simple, and its strength would lie in the preaching of the word. To speak with other tongues was to be misunderstood, was to be a sign that the exigency which rendered it appropriate. Judaism was local—made purposely restrictive to preclude amalgama- tion with the heathen. Now there was to be cathi- olicity, and what could better symbolize it in Christian agency than a competence to instruct the whole world, to communicate the word to all men in all places? (c) We never read of foreign tongues creating any impediment to the spread of the Gospel, or requiring laborious application for the acquisition of them. If we look into modern missionary reports, we meet with a great deal about learning the languages of natives. Why is there nothing of the kind in the New Test., unless because they were acquired supernaturally? (d) The account in Acts ii is explicit, and allows of no uncertain- tainty or evasion. The speakers were Galileans, capable at most of expressing themselves in Greek, Latin, and Hebrew; and a multitude of foreigners from a great many regions had themselves accosted as in the land of their birth. If the apostles spoke just as they might have been expected to speak, and with no more compass of expression than suited their condition and his- tory, why should any astonishment have been produced by their attainments? But the multitude were còn- fessedly astonished, not merely at the doctrines propounded, but, specifically, because every man heard them speak in his own lan- guage. How came Galileans, they asked, to be such linguists? to be so familiar with languages alien to their annals? There is here an obviousness of meaning which no sublety or sophistry can ever explain away."

X—H N

Widely diffused as this view of the Pentecostal gift has been, it has been thought by some, in some points at least, that it goes beyond the data with which the New Test. supplies us. Each instance of the gift received in the record of the events of the Babel, the witness of a restored unity. "Penna lingua- gurium disparisi hominibus, donum linguaurar dispenser in unum populum collegit" (Grotius, ad loc.).

We notice incidentally that parables have been sought in Isaiahist history. For example, there had been, it was maintained, a parable of the original Pentecost (Schneckenburger, Beiträge, p. 8, referring to Bux- torf, De Synag., and Philo, De Decl.). The later rabbiners were not without their legends of a like "baptism of fire." Nicodemus ben-Gorion and Jochanan ben- Zachai, men of great holiness and wisdom, went into an upper chamber to express their grief, and the house began to be full of fire (Lightfoot, Harm. iii, 14; Schött- gen, Hor. Heb. in Act. ii). Again, with regard to the more important phenomenon, it deserves notice that there are analogies in Jewish belief. Every word that went forth from the mouth of God on Sinai was said to have been translated into human speech by the sons of men (Wettstein, On Acts ii); and the beth-kol, the echo of the voice of God, was heard by every man in his own tongue (Schneckenburger, Beiträge). So, as regards the power of speaking, there was a tradition that the great rabbinists of the Sanhedrim could speak all the languages of the world.

The following are some of the direct arguments urged in favor of a literal view of the Pentecostal endowment: "(a) The power in question was virtually promised to the apostles by the very duty assigned them: They were enjoined 'to go and teach all nations, baptizing them in the name of the Father, and of the Son, and of the Holy Ghost.' They were to be witnesses for Christ 'in Jerusalem, and in all Judea, and in Samaria, and to the uttermost parts of the earth.' But how could they instruct remote tribes whose phraseology was a Babel to them, unless they were divinely qualified for the work? (b) This power was in keeping with the occasion. How came Galileans, they asked, to be such linguists? to be so familiar with languages alien to their annals? There is here an obviousness of meaning which no sublety or sophistry can ever explain away."
TONGUES, GIFT OF

prophecy, but all inspiration itself. It is a suspicious
uestos of the message, which are not in the
in its spirit, which really opposes the miraculous altogether,

(2) Accordingly, some interpreters have advanced an
notion of the difficulty by changing the charac-
ter of the gift in such a way as not to infer antation
notated by the speakers, but in the impression pro-
uced on the hearers. Words which the Galilean disciples
uttered in their own tongue were heard by those who
listened as in their native speech. This view we find
adopted by Gregory of Nyssa (A Spir. Sacrat., dis-
cussed, but not required, by Gregory of Nazianzus
(Orat. c. xlvii), and reproduced by Erasmus (ad loc).
A modification of the same theory is presented by
Schneckenburger (Beiträge), and in part adopted by
Olshausen (loc. cit.) and Neander (Fyannus, u. Leh.,
15). The phenomena of somnambulism, of the so-
called mesmeristic midst, are referred to as
analogous. The speaker was su support with his hearers; the lat-
their imagination could not have assumed.

There are weighty reasons against this hypothesis.
(a) We are told in the narrative of the Galilean
Acts ii, 4, “They began to speak with other tongues,
(b) It at once multiplies the miracle and degrades its
character. Not the one hundred and twenty disciples,
but the whole multitude of many thousands, are in this
case the subjects of the gift. The gift no longer connects
itself with the words of the Holy Spirit, but has no
moral force and is no true grace in the definitions
of St. Paul and St. James. The gift is not the

(7) Questions as to the mode of operation of a power
above the common laws of bodily or mental life, may
be ascribed to a region where our words should be “wary and few.”
There is a risk of seeming to reduce to the known
order of nature which is by confession above
and beyond it. In this and in other cases, however, it may
be possible, without irreverence or doubt—following the
manner in which Scripture itself gives us—to trace in
what way the new power did its work, and brought
about such wonderful results. It must be remembered,
then, that in all likelihood similar words to those which
they then uttered had been heard by the disciples be-
fore. At every feast which they had ever attended
from their youth up, they must have been brought in
what they heard, still less to reproduce it; now,
they had the power of speaking clearly and
freely.

The gift of tongues, the ecstatic burst of praise,
is definitely asserted to be a fulfillment of the
prediction of Joel ii, 28. The twice-repeated burden of that
prediction is, “I will pour out my Spirit,” and the effect
on those who receive it is that “they shall prophesy.” We
may see, therefore, in this special gift, which is
analogous to one element at least of the
prophecy of the Old Test.; but the element of teaching is,
as we have seen, not prominent. In 1 Cor. xiv the gift of
tongues is placed lower, (cii, 5) in this the words of the
verse which Scripture itself gives us—to trace in
what way the new power did its work, and brought
about such wonderful results. It must be remembered,
then, that in all likelihood similar words to those which
they then uttered had been heard by the disciples be-
fore. At every feast which they had ever attended
from their youth up, they must have been brought in
what they heard, still less to reproduce it; now,

(8) The words spoken appear to have been pri-
marily determined, not by the will of the speakers, but by
the Spirit which “gave them utterance.” The outward
intelligence of the language as well as the
language of the tongues was heard is not in the
language of the Spirit. When they were heard by others, it was chiefly
as proclaiming the promise, the mighty and great works
of God (μεγάλης). What they uttered was not so
much a warning or reproof or exhortation, but a promise

TONGUES, GIFT OF

case, too, the exercise of the gift is at once connected with, and distinguished from, "prophecy" in its New Testament sense.

3. The first epistle to the Corinthians supplies fuller data. The spiritual gifts are classified and compared, arranged, apparently, according to their worth, placed under regulation. This fact is in itself significant. The recognition of the gift from tongues in the Divine Spirit, they say, are not therefore exempted from the control of man's reason and conscience. The Spirit acts through the calm judgment of the apostle or the Church, not less, but more, authoritatively than in the most rapturous and wonderful utterances. The facts which may be gathered in this case are briefly these: (1.) The phenomena of the gift of tongues were not confined to one Church or section of a Church. If we find them at Jerusalem, Ephesus, Corinth, by implication at Thessalonica also (1 Thess. v, 19), we may well believe that they were frequently recurring wherever the spirits of men were passing through the same stages of experience. (2.) The comparison of gifts in both the lists given by Paul (1 Cor. xii, 8-10, 29-30) places that of tongues, and the interpretation of tongues, lowest in the scale. They are not among the greater gifts which men are to covet earnestly (ver. 31; xiv, 5). As forms of a life quickened and raised above, where before it had been dead and dumb, the apostle could wish that "they all spake with tongues" (ibid.), could rejoice that he himself "spake with tongues more than they all" (ver. 18). It was good to have known the workings of a power raising them above the common level of their consciousness. They belonged, however, to the childhood of the Christian life, not to its maturity (ver. 20). They brought with them the risk of disturbance (ver. 23). The only safe rule for the Church was not to "forbid them" (ver. 39), not to "quench" them (1 Thess. v, 19), lest when translated into expression when they were not the first utterance should be crushed and extinguished too; but not in any way to covet or excite them. (3.) The main characteristic of the "tongue" (now used, as it were, technically, without the epithet "new" or "other") is that it is unintelligible unless interpreted (ἐρμηνεύεται, to translate in course). The man speaks mysteries, for instance, praises, blesses, thanks, in the tongue (ἐν πνεύματι as equivalent to εν γλώσσῃ, 1 Cor. xiv, 15, 16), but no one understands him (ἐκβιάζεται). He can hardly be said, indeed, to understand himself. The πνεῦμα in him is acting without the co-operation of the νοῦς (ver. 14). He speaks not to men, but to himself and to God (1 Cor. xiv. 25). In spite of this, however, the gift might, and did, contribute to the building-up of a man's own life (1 Cor. xiv, 4). This might be the only way in which some natures could be roused out of the apathy of a sensual life or the dulness of a formal ritual. The ecstasy of adoration which seemed to many madness might be a refreshment unspeakable to one who was weary with the subtle questionings of the intellect, to whom all familiar and intelligible words were fraught with recollections of controversial bitterness or the wanderings of doubt (comp. a passage of wonderous power as to this use of the gift by Irving, Morning Watch, v, 78). (4.) The peculiar nature of the gift leads the apostle into what appears at first a contradiction. "Tongues are for a sign, not to believers, but to those who do not believe; yet the effect on unbelievers is not that of attracting, but repelling. A meeting in which the gift of tongues was manifested would seem to a heathen visitor, or even to the plain common-sense Christian (the ἱδών, the man without a χρισμόν, to be an assembly of madmen. The history of the day of Pentecost may help us to explain the paradox. The tongues as a sign meant one of Jesus' presence, and the evidences of his not the limit of their spiritual powers. They disturb, startle, awaken, are given εἰς τ. ἱερατισμὸν (Chrysost. Hom. 36, in 1 Cor.), but they are not, and cannot be, the grounds of conviction and belief (see Col. iv. v., viii). One of the necessary consequences of the equilibrium between the understanding and the feelings. Therefore it is that, for those who believe already, prophecy is the greater gift. Five clear words spoken from the mind of one man to the mind and conscience of another are better than ten thousand of these more startling and wonderful phenomena. (5.) There remains the question whether these also were "tongues" in the sense of being languages, of which the speakers had little or no previous knowledge, or whether we are to admit here, though not in Acts ii, the thought which see in them only unusual forms of speech (Black), or inarticulate sounds, or all but inaudible whisperings (Wieseler, in Olshausen, ad loc.). The question is not one for a dogmatic assertion, but it is believed that there is a preponderance of evidence leading us to look on the phenomena of Pentecost as representative. It must have been from them that the word tonge derived its new and special meaning. The companion of Paul and Paul himself were likely to use the same word in the same sense. In the absence of a distinct notice to the contrary, it is probable that the gift would manifest itself in the same form at Corinth as at Jerusalem. The "divers kinds of tongues" (1 Cor. xiv. 29), the "tongues of men" (xiii, 1), point to differences of some kind, and it is at least easier to conceive of these as differences of language than as belonging to utterances all equally wild and inarticulate. The position maintained by Lightfoot (Herm. of Gosp. on Acts 19), that the gift of tongues consisted in the power of speaking and understanding the true Hebrew of the Old Test., may appear somewhat extravagant, but there seems ground for believing that Hebrew and Aramaic words had over the minds of Greek converts at Corinth a power which they failed to exercise otherwise, when translated into expression when they were not the first utterance. There was probably, in whole or in part, in that language. Thus, the "Maranatha" of 1 Cor. xvi, 22, compared with xii, 3, leads to the inference that the word had been spoken under a real or counterfeit inspiration. It was the Spirit that led men to cry ἀβα, as their recognition of the fatherhood of God (Rom. viii, 15; Gal. iv, 6). If we are to attach any definite meaning to the use of tongues of angels in 1 Cor. xiii, 1, it must be by connecting it with the words surpassing human utterance which Paul heard as in Paradise (2 Cor. xii, 4), and these, again, with the great Alleluia hymn of which we read in the Apocalypse (Rev. xiv, 1-6; Stanley, loc. cit.; Ewald, loc. cit., in loc.); the words like Hosanna and Sabaath in the worship of the Church, of the Greek formula of the Kyrie Eleison in that of the nations of the West, is an exemplification of the same feeling operating in other ways after the spiritual power had ceased. (6.) Here also, as in Acts ii, we have to think of some peculiar style of enunciation as frequently characterizing the exercise of the "tongues." The analogies which suggest themselves to Paul's mind are those of the pipe, the harp, the trumpet (1 Cor. xiv, 7, 8). In the case of one "singing in the spirit" (ver. 15), but not with the understanding also, the strain of ecstatic melody must have been all that the listeners could perceive. To "sing and make melody" is specially characteristic of those who are filled with the Spirit (Eph. v, 19). Other forms of utterance less distinctly musical, yet not unmusically applied, we may transfer in the "cry" (Rom. viii, 15; Gal. iv, 6) and the "indefinite groanings" (Rom. viii, 26) which are distinctly ascribed to the work of the Divine Spirit. To those who know the wonderful power of man's voice, the organ of his spirit, the strange, unearthly charm which belongs to some of its less distinctly musical influence even of individual words thus uttered, especially of words belonging to a language which is not that of our common life (comp. Hilar. Diacon. Comm. in 1 Cor.
it will not seem strange that, even in the absence of a distinct intellectual consciousness, the gift should take its place among the means by which a man "built up" his own life, and might contribute, if one were present, to convert utterances, to "ify" others also. Neander (Phaµa. u. Lec. i, 15) refers to the effect produced by the preaching of St. Bernard upon hearers who did not understand one word of the Latin in which he preached (Opp. ii, 119, ed. Mabillon) as an instance of this. Like phenomena are related of St. Anthony of Padua and St. Vincent Ferrer (Acta Sanctorum, July 24 and April 5), of which this is probably the elucidation. (Comp. also Wolff, Curae Philolog. in Nov. Test., Acta ii.)

(7.) Connected with the "tongues," there was, as the words just used remind us, the corresponding power of interpretation. It might belong to any listener (1 Cor. xiv, 27). It might belong to the speaker himself when he returned to the ordinary level of conscious thought (ver. 13). Its function, according to the view that has been here taken, must have been twofold. The interpreter had first to catch the foreign words, Aramaic or others, which had mingled, more or less largely, with what was said in the usual tongue, and then to find some new order in what seemed at first to be without either; to follow the loftiest flights and most intricate windings of the enraptured spirit; to trace the subtle associations which linked together words and thoughts that seemed at first to have no point of contact. Under the action of the Holy-Ghost, the whole service of the church was to be carried on in the "tongues" and the other gifts. The "tongues" might become a treasure-house of deep truths. Sometimes, it would appear, not even this was possible. The power might be simply that of sound. As the pipe or harp, played boldly, the hand struck at random over the strings, but with no doctrine, no musical interval, warned the condition of distinguishable melody, so the "tongues," in their extremest form, passed beyond the limits of interpretation. There might be a strange awfulness, or a strange sweetness as of "the tongues of angels;" but what it meant was known only to God (ver. 13-17).

(8.) It is probable that, at this later period, and in the Corinthian Church (which appears, from other indications, to have been a decidedly sensuous one), the gift in question had somewhat degenerated from its Pente payment purity into a demonstrative form, in which the human fancy and nervous susceptibilities were given play, instead of receiving normal manifestations of what was essentially and truly a divine impulse. The history of modern religious excitements affords abundant illustration of this tendency.

4. As to other indications in early times we may remark:

(1.) Traces of the gift are found, as has been said, in the epistles to the Romans, the Galatians, the Ephesians. From the Pastoral Epistles, from those of Peter and John, they are altogether absent, and this is in itself significant. The life of the apostle and of the Church has passed into a calmer, more normal state. Wide truths, abiding graces, these are what he himself lives in and exalts others to rest on, rather than exceptional χαράματα, however marvellous. The "tongues" are already "ceasing" (1 Cor. xiii, 8), as a thing belonging to the past. Love, which even when "tongues" were mightiest, he had seen to be above all gifts, has become more and more, all in all, to him.

(2.) It is probable, however, that the disappearance of the "tongues" was gradual. As it would have been impossible to draw the precise line of demarcation when the προφητεία of the apostolic age passed into the διάδοχον, it must be done incompletely in the Church, and there must have been a time when "tongues" were still heard, though less frequently, and with less striking results. The testimony of Ireneus (Adv. Hær. v, 6) that there were brethren in his time "who had prophetic gifts, and spoke through the Spirit in all kinds of tongues," though it does not prove, what it has some-times been alleged to prove, the permanence of the gift in the individual, or its use in the work of evangelizing (Wordworth, On Acts ii), must be admitted as evidence of the existence of phenomena like those which we have met with in the Church of Corinth. For the most part, however, the whole power of interpretation of the Church was supplied by the "hymns and spiritual songs" of the succeeding age. In the earliest of these, distinct in character from either the Hebrew psalms or the later hymns of the Church, marked by a strange mixture of mystical names and half-coherent thoughts (such, e. g., as the hymn with which Alexandria ends his Παλαισσύνδης, and the earliest Sibylline verses), some have seen the influence of the ecstatic utterances in which the strong feelings of adoration had originally shown themselves (Nitzsch, Christl. Lehrh., ii, 268).

After this, within the Church we lose nearly all traces of them. The mention of them by Eusebius (Comm. in Pat. Hier.) is vague and uncertain. The tone in which Chrysostom speaks of them (Comm. in 1 Cor. xiv, in 1 Cor. xiv) is that of one who feels the whole subject to be obscure, because there are no phenomena within his own experience that can be compared with it. The whole tendency of the Church was to maintain reverence and order, and to repress all approaches to the ecstatic state. Those who yielded to it took refuge, as in the case of Tertullian (intraus. in sects outside the Church. Symptoms of what was then looked upon as an evil showed themself in the works of Origen, which are full of ecstatical cries, words passionate but of little meaning, almost convulsive gestures—and were met by Chrysostom with the sternest possible reproof (Hom. in Isa. vi, 2 [ed. Migne, vi, 100]).

It thus appears that the miraculous gifts of the first days bestowed upon the Church for a definite purpose were gradually but quickly withdrawn from men when the apostles and those who had learned Christ from their lips had fallen asleep. Among these supernatural powers we can well believe that the earliest withdrawn were those new tongues first heard in their strange sweetness on that Pentecostal morning, needing then no interpreter; those tongues which during the birth-throes of Christianity gave utterance to the rapturous joy and thankfulness of the first believers. They were a power, however, which, if misused, might lead men—as history has unhappily shown—into the grossest errors, and mordid imaginings, a condition of thought which would utterly unfit men and women for the stern and earnest duties of their several callings—in a world, a life unreal and unhealthy. Therefore that chapter of sacred history which tells of these communings of men with the unseen, that beautified with unearthly glories of the lives of the brave witnesses who first gave up all for Christ, was closed up forever when the "tongues" had done their work (see De Wette, Apostelgech. p. 23-26). III. Ancient and Modern Quasi-Parallels. A wider question of deep interest presents itself. Can we find in the religious history of mankind any facts analogous to the manifestation of the "tongues?" Recognising, as we do, the great gap which separates the work of the Spirit on the day of Pente costal from all others, both in its origin and its fruits, there is, it is believed, no reason for rejecting the thought that there might be like phenomena according to its phase, as has been seen (as one of an ecstatic state of partial or entire unconsciousness, the human being, as it were, swayed by a power above itself; (b) the utterance of words in tones startling and impressive, but often conveying no distinct meaning; (c) the use of languages which the speaker was of himself unable to converse in.
1. The history of the Old Test. presents us with some instances in which the gift of prophecy has accompanied those of this nature. The word includes something more than the utterance of a distinct message of God. Saul and his messengers came under the power of the Spirit, and he lies on the ground all night, stricken with the inspired visions of the Lord. And in the chant of the company of prophets, or pouring out his own utterances to the sound of their music (1 Sam. xix, 24; comp. Stanley, loc. cit.).

2. We cannot exclude the false prophets and diviners of Israel from the range of our inquiry. As they, in the time of the Judges, were foretold by the Lord, there were who truly bore the name, so we may venture to trace in other things that which resembled, more or less closely, what had accompanied the exercise of the divine gift. And here we have distinct records of strange, mysterious intimations. The ventrilouquist wizards (oi γνώσταιοι τοῦ ποιμήντας γλῶσσας) the low voice with which the true prophets announced the word which had spoken (Jer. xxiii, 1; comp. Gesenius, Theol. a. v. 293).

3. The quotation by Paul (1 Cor. xiv, 21) from Isa. xxviii, 11 ("With men of other tongues [ἐν άλλοις γλώσσαις] and other lips will I speak unto this people") has a significance of which we ought not to lose sight. The common interpretation sees in that passage only a declaration that those who had refused to listen to the prophets should be taught a sharp lesson by the lips of alien conquerors. Ewald (Prophet, ad loc.), dissatisfied with this, sees in the new teaching the voice of thunder striking the ears of the people. They came into contact with the phenomena of the "tongues" present to his mind, saw in them the fulfilment of the prophet's words. Those who turned aside from the true prophetic message should be left to the darker,"stammering," more mysterious utterances, which were in the older what the "tongues" were in the later Ecclesia. A remarkable parallel to the text thus interpreted is found in Hos. ix, 7. There also the people are threatened with the withdrawal of the true prophetic insight, and in its stead there is to be the wild delirium, the ecstatic madness of the counterfeit (comp. especially the Septa, ὁ προφήτης ὁ παραστητικός). The Pythons and the Sibyls are as if possessed by a power which they cannot resist. They labor under the afflatus of the God. The wild, unearthly sounds ("ne mortale sonans"); often hardly coherent, burst from their lips. It remained for interpreters to collect the scattered utterances, and to give them shape and meaning (Virgil, Ec., iv, 438).

5. More distinct parallels are found in the accounts of the wilder, more excited sects which have, from time to time, appeared in the history of Christendom. Terrullian (De Amin. c. 9), as a Montanist, claims the "revelationum charismata" as given to a sister of that sect. They came to her "inter dominicas sollemnia;" she was, "per escaenias, in spiritu," conversing with angels, and with the Lord himself, seeing and hearing mysteries ("sacramenta"), reading the hearts of men, prescribing remedies for those who needed them. The movement of the mendicant orders in the 12th century, the propheto-seers of the 13th century, the sects in the West, the enthusiasm of the Jesuits, are not to be easily accounted for. The disciples of George Fox, that of the Jansenists in France, the revivals under Wesley and Whitefield, those of a later date in Sweden, America, and Ireland, have, in like manner, been fruitful in ecstatic phenomena more or less closely resembling those which we are now considering.

6. The history of the French prophets at the commencement of the 18th century presents some facts of special interest. The terrible sufferings caused by the Revocation of the Edict of Nantes were pressing with intolerable severity on the Huguenots. The persecuted flocks met together with every feeling of faith and hope strung to its highest pitch. The accustomed order of worship was broken, and laboring men, children, and female servants spoke with rapturous eloquence as the messengers of God. Beginning in 1686, then re-appearing at intervals of time (see p. 590). By violence in 1700, it soon became a matter of almost European celebrity. Refugees arrived in London in 1706 claiming the character of prophets (Lacy, Cry from the Desert; Peyrat, Pastors in the Wilderness.). An Englishman, John Lacy, became first a convert and then a leader. The convulsive ecstatic utterances of the sect drew down the ridicule of Shaftesbury (On Enthusiasm). Calamy thought it necessary to enter the lists against their pretensions (Caveat against the New Prophets). They gained a distinguished proselyte in Sir R. Bulkeley, a pupil of Bishop Fell's, with no inconsiderable learning, who occupied an important place among their proceedings. His letter, which reminds us of that of Henry Drummond among the followers of Irving (Bulkeley, Defence of the Prophet). Here, also, there was a strong contagious excitement. Nicholson, the Baxter of the sect, published a confession that he had found himself unable to resist it (Falsehood of the New Prophets), though he afterwards came to look upon his companions as "enthusiastic impostors." What is specially noticeable is that the gift of tongues was claimed by them. Sir R. Bulkeley declares that he had heard Lacy repeat long sentences in Latin, and another speak Hebrew, though, when not in the Spirit, they were unable to translate them. The characteristic thought of all the revelations was that they were the true children of God. Almost every oracle began with "My child!" as its characteristic word (Peyrat, i, 235-318). It is remarkable that a strange revivalist movement was spreading nearly at the same time through Silesia, the chief feature of which was that boys and girls of tender age were almost the only subjects of it, and that they too spoke and prayed with a wonderful power (Lacy, Relation, etc., p. 31; Bulkeley, Narrative, p. 46).

7. The so-called Unknown Tongues, which manifested themselves first in the west of Scotland, and afterwards in the Caledonian Church in Regent Square, present a more striking phenomenon, and the data for judging of its nature are more copious. Here, more than in most other cases, there were the conditions of long, eager expectation fixed brooding over one central thought, the mind strained to a preternatural tension. Suddenly, now from one, now from another, chiefly from women, devout but illiterate, mysterious sounds were heard. Voices which at other times were harsh and unpleasing became, when "singing in the Spirit," perfectly harmonious (Cardale, Narratives, in Morning Watch, ii, 877, 878). See the independent testimony of archdeacon Stopford. He had listened to the "unknown tongue," and had found it "a sound such as I never heard before, unearthly and unaccountable." He recognised precisely the same sounds in the Irish revivals of 1859 (Work and Counterwork, p. 11). Those who spoke, men of known devotion and accustomed to witness to their inability to control themselves (Baxter, Narrative, p. 5, 9, 12), to their being led, they knew not how, to speak in a "triumphant chant" (ibid. p. 46, 81). The man over whom they exercised so strange a power has left on record his testimony, that to him they seemed "as if they consisted of nothing but the voice of the Lord" (Baxter, Narrative, p. 9, 12). The movement was not, he believed, that the "tongues" of the apostolic age had been as the archetypal melody of which all the Church's chants and hymns were but faint, poor echoes (Oli-phant, Life of Irving, ii, 208). To those who were
without, on the other hand, they seemed but an unintelligible gibberish, the yells and groans of madmen (newspapers of 1881, pustin). Sometimes it was asserted of known Italian, Greek, Hebrew—were mingled together in the utterances of those who spoke in the power (Baxter, Narrative, p. 138, 134). Sometimes it was but a jargon of mere sounds (ibid.). The speaker was commonly unable to interpret what he uttered. Sometimes the office was used by himself and his own priest. In the following summary of the history of the whole movement is given in Mrs. Oliphant's Life of Irving, vol. ii. Those who wish to trace it through all its stages must be referred to the seven volumes of the Morning Watch, and especially to Irving's series of papers in The Gifts of the Spirit in vol. iii. pp. 191, 192. Whatever other explanation may be given of the facts, there exists no ground for imputing a deliberate imposture to any of the persons who were most conspicuous in the movement.

8. In certain exceptional states of mind and body the powers of memory are known to receive a wonderful and abnormal strength. In the delirium of fever, in the ecstasy of a trance, men speak in their old age languages which they have never heard or spoken since their earliest youth. The accent of their common speech is altered. Women, ignorant and untaught, repeat long sentences in Greek, Latin, and Hebrew, which they have never heard, without the least degree of understanding or intending to remember them. In all such cases the marvellous power is the accompaniment of disease, and passes away when the patient returns to his usual state, to the healthy equilibrium and interdependence of the life of sensation and of thought (Abelcombe, Intellectual Powers, p. 140—141; Winslow, Obscure Diseases of the Brain, p. 337, 360, 374; Watson, Principles and Practice of Physic, i, 128). The mediæval belief that this power of speaking in tongues belonged to those who were possessed by evil spirits rests, obviously, upon like psychological phenomena. Peter Martyr, Loc. Communes, i, 10; Bayle, Dict. s. v. "Granadier".

We refer to the above singular phenomena of modern times not as genuine samples of the scriptural glossolalia, but as illustrating some of the physical and mental symptoms with which they were accompanied. In many instances, no doubt, the Biblical facts have been merely imitated, and in others they have exercised unconsciously a reproductive power. See Wieseler, in the Stud. et. Krit. 1888, iii, 703; 1889, ii, 483; iii, 792; 1891, 639 sq.; 1897, i, 55; also the monographs cited by Vollers, in his dissertation.

IV. This subject is not merely curious and interesting, but full of practical moment. 1. It shows how well the Gospel message was accredited in its first promulgation. It fixes attention on the high consequence of preaching the Gospel; of declaring its message with a glowing, burning earnestness, and of obtaining the live coal which is to kindle the heart from off God's altar. 2. Inasmuch as the tongues of fire appear to have rested on private Christians as well as on apostles, and on women as well as men—for no distinction, no exception, is made in the narrative—we are admonished that all are bound in the measure of their ability to speak for God, to let no corrupt communication proceed out of their mouth, but that which is good to the use of edifying, that it may minister grace unto the hearers. 3. At the same time we are warned that the tongue might be had in its integrity while the fire was not. Paul himself was much aware of that he could speak with tongues more than they all, felt the need of being prayed for by saints, with "all prayer and supplication in the Spirit, that utterance might be given him, that he might open his mouth boldly to make known the mystery of the Gospel." 4. We learn from the apostle that the knowledge and charity were better than this physical endowment, as having a more abiding character.

Tonsure (Lat. tonsurā, shaving) is a name given to the distinguishing mark of the clergy of the Romish Church, formed by shaving off some of the hair. The custom is said to have been introduced in Italy by St. Boniface in the 8th century. At an earlier period it was censured as unbecoming spiritual persons, on the ground of its being among the tokens of penance. Albasinus notes, "it was customary to use shaving even to baldness, and sprinkling the head with ashes, as signs of sorrow and of mourning; but the priests of God were not to be thus treated;" which shows that the ancients then knew nothing of this as a ceremony belonging to the ordination or life of the clergy. The ancient tonsure, therefore, was not a shaven crown, for Jerome, Ambrose, and others, equally inveigh against this as a ceremony of the priests of Isai; it was only an imitation on the monks and clergy to wear decent and short hair, as is evident from all the canons that appoint it. The tonsure in early times was called corona clericula, and the clergy coronati, not, however, from their shaven crowns, but from the form of the ancient tonsure, which was made in a circular figure by cutting away the hair a little from the crown of the head and leaving a circle hanging downwards. At first the lowest church servants wore their hair short as a mark of servitude, and the monks, out of humility, imitated them, and in the 6th century the clergy adopted the fashion.

The form of the tonsure varied in different churches, and the varieties of it are of some historical interest. That of the Roman Church, called the "Tonsure of Peter," consisted of shaving the crown as well as the back of the head, so that there remained a circular ring or crown of hair. This was the form in use in Italy, Gaul, and Spain. In the Scottish (or Irish) tonsure, which was in use in Ireland, in North Britain, and in those parts of Germany in which the Irish missionaries had preached, the entire front of the head was shaved, of which a part was left hanging and of which the rest was cut off. This tonsure was called the "tonsure of James," and sometimes of "Simon the Magician." The Greeks and other Orientals shaved the whole head. The supposed derivation of the Irish form of tonsure from the apostolic times led to its being held both in Ireland and Britain, as well as other churches of Irish foundation, to be of the most vital importance, insomuch that the introduction of the Roman form was almost the occasion of a schism.

As to the significance of the tonsure, the catechism of the Council of Trent says that it was intended to signify that the ministers of religion are bound to comport themselves as to carry about them the figure and likeness of Christ. Anthony, archbishop of Florence, says, "The shaving on the upper part of the head signifies that they ought to have a mind free for the contemplation of divine things. The tonsure over the ears denotes that they ought not to have dull senses, or be involved in worldly matters, which are designated by the hair. But the cut of the hair in form of a circle designates the royal dignity which they have, because they ought to regulate themselves and others according to the virtues." The circle formed at the back of the head by the tonsure is considered as the person rises in ecclesiastical dignity. Originally the tonsure was merely a part of the ceremonial of initiation in orders, and was only performed in the act of administering the higher order; but about the 7th century it came to be used as a distinct and independent ceremony, so that a tonsured person is to be considered in itself as an order, and to be added to the list of what are called "minor orders." The now received opinion of Catholic writers is that tonsure is not an order, but only a preparation for orders. Concealment had already been forbidden in Edgar's code, and in 1096, by a hope, Petrus Damascensis, who claims that the clergy covered it out of sight with hair laces. See Bingham, Christ. Antiq. bk. vi, ch. iv, § 16,
TOOKOE 487 TOOTII

The Hebrew word is by some derived from מָשָּׁה (masah), "to change" or "to repeat," because the teeth are changed, or replaced by others; but it better comes from מָשָּׁה (masah), "to sharpen.

So likewise the Greek δόκω (dokow) is said to be quasi δοξά (doxa), "to eat," and the Latin denu, quasi edens, "eating." But the three words are probably all primitives, and the latter two at least are etymologically connected with the English tooth.

In the singular this term occurs first with reference to the literal member itself in man, the loss of which, by violence, is specified by Moses, in illustration of his law concerning talionis, "tooth for tooth" (Exod. xxii, 24). This outrage occurring between freemen (or between an Israelite and a foreigner, Lev. xxiv, 20), seems to have led to the other cases of maiming, most probably of a pecuniary compensation, and under private arrangement, unless the injured party proved exorbitant in his demand, when the case was referred to the judge, who seems addressed in Deut. xix, 21. The Targum of Jonathan renders the words, "the price of a tooth for a tooth," (Exod. xxii, 24), Levi, xxiv, 20, and Deut. xix, 21 (comp. Josephus, Ant. iv, 8, 35, and see the art. PUNISHMENT in Cyclopædia); but if a master inflicted this irreparable damage upon a servant, i.e. slave, of either sex, he was punished by the absolute loss of the slave's services (Exod. xxii, 27). The same law applied if the slave was a Gentile, notwithstanding the national glosses of the Jewish doctors (Selden, De Juris Nat. et Gent, iv, 1, 468). Our Lord's comment upon the law (Matt. v, 38), which was much abused in his time (Horne, Introdt. ii, 577, 6th ed.), prohibits no more than retaliation upon the tyrant (Hv. pavorum), not such a
defense of our innocence as may consist in words, but private revenge, and especially with such a disposition as actuated the aggressor, with impetuous rage or hatred. His exhortations relate rather to those injuries which cannot be redressed by the magistrate or by course of law; these we should bear rather than resort to revenge (see Rosenmüller, Grotius, and Whiby, ad loc.). Indeed, the hermeneutics of our Lord's precepts in his Sermon on the Mount require much knowledge, care, and discrimination, in order to avoid a prima facie interpretation of them, which has often been given, at variance with his intention, subversive of the principles of natural justice, and productive of false ideas of Christian duty.

In Ps. iii, 7 we have תּוּבָא, for the human jawbone; for that of an ass (Judg. xv, 15, 17, śayawת, "maxillam, i.e. mandibulum," which becomes מָשָּׁה in ver. 19, הַלָּכֹשׁ תּוּבָא, "maxilum dentem in maxilla asini") [see SAMSON]; and for that of levithan (Job xi, 14, כְּחַלְּכוֹל, maxillam), See JAW. A "broken (or rather "bad," תּוּבָא," that is, decayed; Vulg. dena putrida) tooth" is referred to in Prov. xxv, 19, as furnishing a similitude of "the mouth of a faithful man in the time of trouble." "The teeth of beasts," or rather "tooth," תּוּבָא, is a phrase expressive of devastation by wild animals; thus, "I will send the tooth of beasts upon them" (Deut. xxxii, 24), (דֹּוֹרָא יֵשָּׁבָּה, doro sa yeshabah, dientes bestiarum; comp. 2 Kings xvii, 25).

The word is sometimes used metaphorically for a sharp cliff or summit of a rock (Job xxxix, 28); thus, "The sharp steeple and abideth upon the tooth of the rock," יִשְׁבַּה יֵשָּׁבָּה (yishbah yeshabah, "incoaxen, vuphus). So also (1 Sam. iv, 4), "a sharp rock on the one side and a sharp rock on the other side," יִשְׁבַּה יֵשָּׁבָה (yishbah yeshabah, quasi in modum dentium scopulat); these eminences were named Bozez and Seneh.

II. TEETH, תּוּבָא, shina'ya'im (dorote), is found in the dual number only, referring to the two rows, yet used for the plural (1 Sam. ii, 13). The word occurs first with reference to the literal organs in man (Gen. xii, 12), "His teeth shall be white with milk," which the Sept. and Vulg. understand to mean whiteness greater than that of Porcius, i.e., white as milk, (I. c., dento coronata). Also (1 Sam. iv, 4), (2 Kings xvi, 38; Prov. xiv, 26; Cant. iv, 2, vi, 6). Although מָשָּׁה may be the general word for teeth, yet the Hebrews had a distinct term for the molars, or jaw teeth, especially of the larger animals; thus מָשָּׁה (mashah, Job xxxiv, 17; Psa. ivi, 4; Prov. xxx, 14; Joel ii, 6); and by transposition "tooth" (Psa. ivi, 6, מָלָא, mala, and molares). The apparent teeth of the leviathan (gyrus dentum) are, however, called מָשָּׁה (mashah, Job xli, 14). Ivory, 'elephants' teeth,' 1 Kings x, 22, is simply מָשָּׁה (mashah, Sept. omits; Vulg. dentes elephantorum); מָשָּׁה in Latin is sometimes so used. In 2 Chron. ix, 21 the word is מָשָּׁה (mashah; δοντες λεβησίας, euror), where מָשָּׁה evidently denotes a tooth, but the signification of the latter part, עב, is unknown, and Genesius thinks that the form of the word may be so corrupted as to disguise its original meaning. May it not be of foreign origin, imported with the material from Ophir? See IVORY.

In other passages the reference to teeth is metaphorical; thus, "a flesh-hook with three teeth," that is, prongs (1 Sam. ii, 13). See HOOK. "The teeth of lions" is a symbol of the cruelty and rapacity of the wicked (Job iv, 10). "To take one's flesh into one's teeth" signifies to gnaw it with anguish (Exod. xiii, 14; comp. Rev. xvi, 10). "The skin of his teeth," with which Job says he had "escaped" in his affliction, is understood by the Vulgate. Of the lips—"derelicta sunt tantummodo labia circa dentes mesce;" but Genesius understands it as a proverbial expression, meaning, I have scarcely a sound spot
in my body. "To smile upon the jaw-bone" and "to break the teeth" mean to disgrace and to disable (Psa. iii, 7; comp. Mic. vi, 13; 1 Kings xxv, 35; Lam. iii, 90). The "teeth" are also used to express "spears and arrows" (Psa. liv, 4; comp. 1 Sam. xxiv, 9). To break the teeth of such persons means to disable them (Psa. lxi, 6). To escape the malice of enemies is called an "escape from their teeth" (cxxxiv, 6; Zech. ix, 7). Oppression is compared to "jaw-teeth like swords, and grinders like knives" (Prov. xxx, 14). Beautiful teeth are compared to "sheep newly shorn and washed" in Cant. iv, 2; vi, 6; but the remaining part of the comparison, "whereof every one beareth twins, and none is barren among them," is much better rendered by Le Clerc, "all of them twins, and none hath lost his fellow."

To break the teeth with gravel stones is most likely a periphrastic metaphor for inflicting the harshest disappointment (Lam. iii, 16). "Iron teeth" are the symbol of destructive power (Dan. vii, 7, 19). A nation having the teeth of lions, and the cheek-teeth of a great lion, denotes one which devours with irresistible force (Joel i, 6; comp. Ecclus. xxi, 2; Rev. ix, 8). "Prophets who bite with their teeth, and cry Peace," are greedy and hypocritical prophets (Mic. iii, 5). "To take away blood out of the mouth, and abominations from between the teeth," means to rescue the intended victims of cruelty (Zech. ix, 7). "Cleanliness of teeth" is a periphrasis for Ammonite acclaim (Amos iv, 13). Symmachus and Theodotion, caesari- cians. Goubling of teeth means, properly, grinding the teeth with rage or despair. The Hebrew word so rendered is פָּרַט (Job xvi, 9; Lam. ii, 16; Psa. xxxv, 16; lxxxxii, 12; cxxi, 10); it is invariably rendered in the Sept. בְּרֵימַת, and in the Vulg. infrenor, freno, frendo (see also Acts vii, 54; Ecclus. lii, 20). It is said of the epileptic child (Mark x, 15), τὴν τούτος ὁδονάς, strident dentibus. The phrase ὁ δὲ μέρος τῶν ὀδονῶν is in the Vulg. "stridor dentium" (Matt. viii, 12; xiii, 42, 50; xxi, 2; xxiv, 31; lxxv, 30; Luke xi, 28). Suidas defines μέρος τῶν ὀδονῶν συγκροτομημένον ψιχήν. The phrase "lest thou gnash thy teeth" (Ecclus. xxx, 10) is γεμάτοις τῶν ὀστίων σοι. "To cast in the teeth" is an old English phrase (for the Hebrew has no such idiom), signifying to reproach; thus "the thieves who were crucified with Jesus cast the same in his teeth," ὁδονος ὁδονος, (Matt. xxvii, 40). See also the Bible and Prayer-book version of Psa. xlii, 11. לְבָד הַיָּאָה, "a sharp thrashing instrument having teeth," literally "edges" (Isa. xii, 15). The action of acids on the teeth is referred to in the proverb "the fathers have eaten sour grapes, and the children's teeth are set on edge" (Ezek. xvii, 2); ἔγωγος, obsturavit (Prov. x, 26).

Toparchy (τοπαρχία, government of a district), a term applied in one passage of the original of the Apoc. (Rev. i, 1) to denote three districts to which elsewhere (x, 30; xi, 34) the name υπάτος is given, as also in Josephus (Ant. xiii, 4, 9). In all these passages the English version employs the term "governments." The three "toparchies" in question were Aphrima (Αφριμάτα), Lydda, and Ramath. They had been detached from Samaria, Perea, and Galilee, respectively, in some time before the war between Demetrios Soter and Alexander Balas. Each of the two belligerents endeavored to win over Jonathan, the Jewish high-priest, to their side, by allowing him, among other privileges, the sovereign power over these districts without any payment. The consideration which the Maccabees considered for the toparchy Lydda of which Pliny speaks (v, 14) is situated not in Perea, but on the western side of the Jordan. Aphrima is considered by Grotius to denote the region about Bethel, captured by Abijah from Jeroboam (2 Chron. xiii, 19). Ramath is probably the famous stronghold, the design of obtaining which led to the unfortunate expedition of the allied sovereigns Ahab and Jehoshaphat (1 Kings xxii). Pliny (v, 14) mentions ten toparchies in Judaea, and so does Josephus (War, iii, 8, 5). The "toparchies" seem to have been of the nature of the modern Turkish agaı̇, and the passages in which the word τοπαρχία occurs all harmonize with the view of that functionary as the aga, whose duty would be to collect the taxes and administer justice in all cases affecting the revenue, and who, for the purpose of enforcing payment and preserving discipline, might command the whole military force. He would thus be the lowest in the hierarchy of a despotic administration to whom troops would be intrusted; and hence the taunt in 2 Kings xviii, 34, and Isa. xxiii, 9 (Sept.): πὸς ἀποστρέφας τὸ πρόσωπον τῷ Γαμά (Γαμά), "captain") τοπαρχῶν ἠνώς, τῶν δύναμεων τοῦ κυρίου μου τῶν Δαυίδονες...—How wilt thou resist a single toparch, one of the very least of my lord's slaves?" But the essential character of the toparch was that of a fiscal officer, and his military character is altogether subordinate to his civil. Hence the word is employed in Gen. xli, 34 for the "officers over the land" (,:), "overseer," who were instructed to buy up the fifth part of the produce of the soil during the seven years of abundance. In Dan. iii, 3, Theodotion uses the word in a much more extensive sense, making it equivalent to "saturate" (Nερρεια, "wise"), and the English version renders the original by "princes;" but the original word here is not the same as in Gen. iii, 27, and not the word of one of which cases a subordinate functionary is contemplated.

Topaz (τόπαζος, píidakh', apparently of non-Heb. etymology; Sept. τόπαζον; Vulg. topas, tosias), a gem which was the second stone in the first row of the high-priest's breastplate (Exod. xxvii, 17; xxxix, 10). It was one of the jewels that adorned the apparel of the king of Tyre (Ezek. xxviii, 13); it was the bright stone that garnished the ninth foundation of the heavenly Jerusalem (Rev. xxi, 20). In Job xxxvii, 19, where wisdom is contrasted with precious articles, it is said that "the píidak of Ethiopia shall not equal it." It is, according to most ancient versions, the topaz (τόπαζον; Josephus, τόπαζος), which most of the ancient Greek writers describe as being of a golden yellow color (Strabo, xvi, 710; Diod. Sicc. iii, 39); while Pliny (Hist. Nat. xxxvii, 82) states that its color is green. The topaz of the ancient Greeks and Romans is generally thought to be our chrysolite, while their chrysolite is our topaz. Chrysolite, which is also known by the name of olivine and peridots, is a silicate of magnesia and iron; it is so soft as to be scratched at once with the nail, with which it was formerly polished. It may have been used to determine whether the píidak in the high-priest's breastplate was the yellow topaz; but that it was a topaz there is little reason to doubt. In the passage cited from Job the píidak is connected with Cush; and as the name Cush includes Southern Arabia and the Arabian Gulf, it is possible that the word píidak doubtless has some connection with the Arabian Cush. Pliny and others, that the topazes known to them came from the Topaz Island in the Red Sea (Hist. Nat. xxxvii, 8; comp. xii, 29), whence it was probably brought by the Phenicians (comp. Ezek. xxviii, 18). See Ern- owia. Pliny adds, in explanation of the name, that the island is surrounded at low tide with mists, which led to its being surrounded by fog, and was, in consequence, often
sought for by navigators; and that hence it received its name, the term "topazin" signifying, in the Triglo-
dyte tongue, "to seek." (7) It may be noted, however, that Bohlen seeks the origins of the Hebrew word in the Sanscrit language, in which pita means "yellowish," "pale," and, as Ges-
seu remarks, the Greek τοπαζον itself might seem to come from the Hebrew תופס by transposition into תופס (Theesaur. p. 1101). See Braunsch, De Ve-
stitu, p. 508; Hofmann, Mineral. i, 387; Pareau, Com-
ment, on Job, p. 333; Ritter, Erdkunde, ii, 675. See GEM.

To'phel (Heb. id. דפ, mortar; Sept. Topha; Vulg.
Tophet), a place mentioned in Deut. i, 25 as a boundary (? on the N. E.) of the great Sinaic desert of Paran. It has therefore been with great probability identified with Tutfiek (comp. Schwartz, Palest. p. 210) on a wady of the same name running north of Bozra towards the north-west into the Ghôr and south-east corner of the Dead Sea (Robinson, Bibl. Res. ii, 570). This latter is a moist fertile region, having many springs and rivulets
flooding into the Ghôr, and large plantations of fruit-
trees, whose figs are exported. The bird κατη, a kind of partridge, is found there in great numbers, and the stockin pastures in herds of forty or fifty together (Burchardt, Holy Land, p. 405, 486). The brook Tuf-
feik is not precisely the same as the so-called kirbi, the
more re-

To'phet (Heb. Top'heth, דפ, spittle, as in Job xvii, 6; i.e. abominable, or, perhaps, place of burning; Jer. vii, 22 [second time]; xix, 11, 12; with the art., 2 Kings xxiii, 10 ["To'pheth"]); Jer. vii, 31, 32; xix, 6, 15, 14; once Tophet', תופת', Isa. xxx, 33; Sept. To-
phi, תופס, and ῥφος; Vulg. Topheth, Tophet), a place
near Jerusalem, where the ancient Canaanites, and after-
wards the apostate Israelites, made their children to pass the fire to Moloch (comp. Psa. civ, 38; Jer. vii, 31). It is first mentioned, in the order of time, by Isaiah, who alludes to it as deep and large and hav-
ing an abundance of fuel (xxx, 33). He here evidently
calls the place where Sennacherib's army was destroyed
Tophet, by a metonymy; for it was probably overthrown as a consecrated place. It is a name from Jerusalem, in the opposite side of it, since Neb is mentioned as the last station from which the king of Assyria should threaten Jerusalem (x, 32), where the prophet seems to have given a very exact chronographic description of his march in order to attack the city (Lowth's Transl. notes on xxx, 31, 33). In the reformation of religion by king Jo-
siiah, he caused Topheth to be defiled in order to sup-
press idolatry (2 Kings xxiii, 10). The means he adopt-
ed for this purpose are not specified, whether by throw-
ing all manner of filth into it, as well as by overthrow-
ing the altars, etc., as the Syriac and Arabic versions
seem to understand it. The prophet Jeremiah was or-
dered by God to announce from this spot (xiv, 14) the
approaching captivity, and the destruction both, by the
siege of the city and by famine, of so many of the peo-
ple, whose carcasses should be heaped burried, as that
it should "no more be called Tophet, nor, the name of the
son of Hinnom, but the valley of slaughter" (vii, 31, 32; xix, 6, 11-14). In all succeeding ages blood has flowed there in streams; corpses, burned and unburied, have filled up the hollows; and it may be that underneath the modern gardens and terraces lies not only the debris of the city, but the bones and dust of millions—
Romans, Crusaders, Moslems. Once the royal music place where Solomon's singers, with voice and
instrument, regaled the king, the court, and the city; then the Temple of Baal, the high-place of
Moloch, resonating with the cries of burning infants;
then (in symbol) the place where is the wailing and
groaning of the sheol, which John was told was to be
seen of his choicest vassals; then degraded and defiled till
it becomes the place prepared for "the King," at the
sound of whose fall the nations are to be shake (Ezeck.
xxxvi, 18); and as Paradise and Eden passed into Baby-
lon, so Tophet and Ben Hinnom pass into Gebehna and
the lake of fire. These scenes seem to have taken hold
of Milton's mind; for three times over, within fifty lines,
it refers to "the opprobrious hill," the "hill of scandal," the
"offensive mountain," and speaks of Solomon making
his grave in
"The pleasant valley of Hinnom, Tophet hence And Gebehna called, the type of hell." See GEMMA.

The name Tophet was commonly supposed to be de-
sired from tỐḇp, or drum, from the drums used to drown
the cries of the children when made to pass through the
fire to Moloch. This was a received Jewish opinion.
But there are other derivations; that, for example, of
Jerome, who from the root to open (נפ) ascribes to it the
sense of latitude; of Rosenmuller, who connects it with
different root (נפ), and takes it to mean pleasant-
cess; of Gesenius, who, from a Persian root, finds the
sense of inflaming, burning; of Rödiger (in Gesen. The-
saur. s. v.), who takes it in the sense of "fire," a view sub-
stantially concurred in by Böttcher, Hitzig, and Thenius,
though derived in a different manner. This is, perhaps,
the most probable proposition, as it seems to be direct-
ly applicable to the place. See Böttcher, De Infer., i, 80, 85; Panecius, De Tophet (Vitae. 1694).

Tophet lay somewhere east or south-east of Jeru-
salem, for Jeremiah went out by the sun-gate, or east gate, to go to it (xix, 2). It was "in the valley of the son of Hinnom" (vii, 31), which is "by the east gate" (xiv, 2). Thus it was not identical with Hinnom, as some have written, except in the sense in which Par-
dise is identical with Eden, the one being part of the other. It was in Hinnom, and was, perhaps, one of its
chief groves or gardens. It seems also to have been part
of the great cemetery in which were buried perhaps a
little to the south of the present Birket el-Ham-
ra. The New Test. does not refer to it, nor the Apocry-
pha, nor yet Josephus. Jerome is the first who notices
it; but we can see that by his time the name had dis-
appeared, for he discusses it very much as a modern
commentator would do, only mentioning a green and
fruitful spot in Hinnom, watered by Siloam, where he
assumes it was: "Delubrum Baal, nemus ac lucus, Siloe
fontibus irrigatus" (in Jer. vii.). Eusebius, in his Ono-
mutation, under the word ῥφος, says, "In the suburbs
of Jerusalem is a place so called Tophet, which is
adjacent the fuller's pool and the potter's field, or the
parcel of ground Acheldamach." Many of the old
travellers (see Felix Fabri, i, 391) refer to Tophet, or
Toph, as they call it; but they give no information as
to the locality. Every vestige of Tophet, name and
grove, is gone, and we can only guess at the spot;
yet the references of Scripture and the present features
of the locality enable us to make the guess with the
tame tolerable nearness as we do in the case of
Bethsemane or Scopus. For an account of the modern
aspect of the place, see Robinson, Researches, i, 202 sq.;
Kitto, Physical History of Palestine, p. 122 sq. See JERUSAL.

Tolad'yay, Augustus Montague, an English cler-
gymman, was born at Farnham, Surrey, Nov. 4, 1740, and
received his rudimentary education at Westminster
School. It being necessary for his father to visit Ire-
land to pursue some claims to an estate, he accompanied
her there, and was entered at Trinity College, Dublin,
A. D. 1755, from which he graduated. He received orders June 6, 1762, and, after some time, was inducted into the
living of Broadhembury, Devonshire; but on account of his
health settled in London in 1775, where he officiated in the
chapel of the French Calvinists, Leicester Fields. He died Aug. 11, 1779; and, agreeably to his
request, was buried in the Churchyard Church of St. Tophet. The
name of Mr. Toplady rests chiefly upon his controversial

writings against the Methodists, and a few hymns, Against Wesley he may be said to have had a confirmed antipathy, and employed ridicule as well as argument in opposing his opinions and conduct. He published, The Doctrine of Absolute Predestination Stated and As-

sured, viii. (1723); a long and learned Letter to Rev. John Wesley (1770);—More Work for Rev.
John Wesley (1772, 8vo);—Historical Proof of the Do-
ctrinal Calvinism of the Church of England (1774, 2 vols. 8vo);—The Scheme of Christian and Philosophical Necessity (1775, 8vo), in opposition to John Wesley's Theological System;—in Subject-Hymns for Public and Private Worship (1776, 1787, 12mo)—Dy-

ing Avocato (1778), etc. He was for some years editor of The Gospel Magazine. His works were published after his death by his executor (1783, 8vo), with an enlarged Memoir (1925, 6 vols. 8vo). One of his most cul-

eterbated hymns was:

“Rock of ages, cleft for me,
Let me hide myself in thee,” etc.

See Allibone, Dict. of Brjt. and Amer. Authors, s. v.; Tyerman, Life and Times of John Wesley, iii, 139, 190, 210; Belcher, Historical Sketches of Hymns, p. 248; 250. Christopher, Hymn-writers and their Hymns, p. 46-49.

Topographical Terms. We have had continual occasion in this Cyclopedia to point out the great accuracy with which these are used in the original languages of the Scripture, especially the Hebrew, although often obscured by the want of exactness and uniformity in the A. V. It is our purpose under the present head to present a general view of such terms, referring for details to the respective articles. Much has already been done in this direction by Dean Stanley in the appendix to his work on Sinus and Palestine. See Geography.

A. LAND.

1. Tracta (including especially depressions, levels, and barrens).

1. Eneik (&#8220;h24), a valley, used in general (Num. xxv, 29; Josh. viii, 13; xiii, 18; Judg. i, 19, 24; vi, 13; 1 Sam. vi, 13; Bethlehem; 2 Sam. xvii, 18) "a vale"; 1 Kings xx, 28; 1 Chron. xiii, 15; Jer. xxvii, 20; 40, 41; 51, 15; II Chron. xxv, 20; Amos vii, 5; Jer. xi, 18; Ps. xcvii, 4; Pr. xxv, 4; or specifically "valle of Sodom" (Gen. iv, 8, 9, 10); "valley of Sheave" (ver. 17), "vale of Hebron" (xxiv, 14), "valley of Achor" (Josh. vii, 30; xv, 7; Jer. ii, 3; Hag. ii, 13); "valley of Asa-

zon" (Josh. xiii, 13); "valley of Rephaim" (xxv, 16, 17); 2 Sam. vi, 10; xxii, 13; 1 Chron. xi, 16; xxiv, 13; 2 Chron. xvi, 1; Judg. vi, 23; viii, 1, 8; Hosea i, 5: probably also 1 Sam. xxvii, 1; 1 Chron. i, 7; "valley of Kezib" (xxvii, 21), "valley of Siloam" (xxvi, 21), "valley of Elah" (xxi, 10), "valley of Gibeon" (xxx, 4), "valley of Jehoshaphat" (Joel iii, 12, 12), "valley of Decision" (ver. 14), "Beth-emek" (xxvii, 27).

2. Ge (Nero or 2), a ravine (A. V. invariably "valley"), used generally (Psa. xxvii, 4; Isa. xxxv, 11, 14; xiv, 1; Jer. ii, 13; Ezek. vi, 2; Mic. ii, 6; Zech. iii, 10, 20, and specifically of Moab (Num. xvi, 10; Deut. iii, 19; iv, 46; xxv, 6, 6), Hinnom (Josh. xv, 8, 20; 21, 26; 2 Chron. xxx, 18; Neh. vii, 30; Jer. vi, 31; Acts xxiv, 25, xxv, 33); prob. Isa. xi, 5: also "valley-gate." Chron. xxiii, 15; Neh. xi, 18, 18, 13; Zeph. iii, 9, 17; Zech. i, 17, 20; Zechar. (1 Sam. xviii, 13; 1 Kings xxiv, 15; 2 Kings xvii, 17; 2 Chron. xxxvii, 18; Salt (2 Sam. xvi, 22); 2 Kings xiv, 17; 1 Chron. xvii, 12; 2 Chron. xxxvii, 18; 2 Kings xxiv, 17; Chronicles); "valley of Jehoshaphat" (Joel iii, 12, 12), "valley of Decision" (ver. 14), "Beth-emek" (xxvii, 27).

3. Ge (2), a date, namely, of Kirjathaim (Num.
xxvii, 36, and the kings (Gen. xiv, 17; 1 Sam. xviii, 13 thine and without倒是)

4. Metallurgy (&#8220;8232; or 9999) or a dell (Zech. i, 8).

5. Hithe (Hithip &#8221;22), a broad plain between mountains, used generally (Deut. vii, 10; xii, 11; Ps. civ, 8; Is. xii, 13, 14, 14, 14; ver. 13), specifically: "valley of Jericho, valley of Eschol," valley of Lebanon (Num. xxvii, 36; vs.): 2 Kings xxv, 29; Zech. x, 11; "valley of Ono" (Neh. vi, 3); "valley of Dura" (Amm i, 5).
There remain the two distinctive terms for a stony promontory or mountain-top, or for the contents of such a rock: -

12. **Tar** (תָּר), Chald. and Arab. Tur, a rock or outstanding block of stone whether fixed or boulder, of frequent occurrence (A.V. "rock"), both literally (Deut. xv, 23; Josh. ii, 4; 2 Kings ix, 25; Isai. xix, 10; 16, 6, etc.) and in only a few cases referring to the height of the rock (Num. xxiii, 1; Psai. i, 2, etc.); in one case, presumed to be a "summit" rather than a rock, is specifically applied to Horeb (Exod. xvii, 6), the rock of Oreb (Judg. vii, 25; Isa. x, 36), and is an element of the names Habukkah-Hazzirim (8 Sam. ii, 16), and Boeth-bor (Josh. v, 36).

In connection with *Tar* twice occurs the peculiar term *V’r’ (בָּר'), a hole or "cleft" (Exod. xxxii, 29; Isa. ii, 21).

13. **Sel'a (סֵלָה), a cliff or abrupt and elevated rock, especially in personification (Psa. xvii, 2; xxi, 9, etc.), and as a parallel with *Tar* (Psa. xxxii, 2, 5; lxxviii, 19, 16; Isa. vi, 21, etc.). In the A.V. it is loosely rendered "rock," "stone," etc. It is applied generally to the spot in Kadesh whence Moses brought forth water (Num. xx, 6, 10; 13, Neh. iv, 18; Psa. lxxviii, 20), and Jezreel-manhelekh (1 Sam. xxix, 28) also as a proper name, e.g., to Tir (Isa. xx, 15). But with the art., Isa. xi, 15, etc.

In exclusive connection with *Sel’a* are found the following descriptive terms: Chagasisim (חָגָסֵי), chama (Cant. ii, 14; Jer. xi, 16; Obad. 3), Selph (סֵלֶף), a cliff (Judg. xiv, 8, 11; Isa. ii, 21; Zeph. iii, 8), Tecokishch (תָּכָקֶש), a bold spot, as the summit of a rock exposed to the drying sun (Neh. iv, 18; Ezek. xxxiv, 7, 5; xxxvi, 4, 14; 2Kgs. i, 22), cranny of the rock (Jer. xii, 1, 4; xxxv, 10); and Sel’ka (סֵלֶקה), a tootl or sharp edge or a cleft in a rock (Isa. xxxv, 28; 1 Sam. iv, 4, 5); also as a proper name (vii, 16).

B. WATER.

1. Flowing (including the valley or bed through which it courses): of these the first two are the most general and distinctively descriptive.

11. Khadish, the Alludian river (as almost always rendered in the A.V.), the Arab. nahar; used generally in the poetical books of watercurses and of the sea (Job xiv, 11; xxxi, 17; xxxii, 11; xxxiv, 11, xli, 12; Psa. xxxv, 4; xlv, 5; xlix, 13, 16; lxvi, 3; lxxiv, 8; lxvi, 19; lxvi, 21; lxviii, 11; 14; Jer. ii, 18; Isai. xxv, 2, 3; xxxii, 21; xl, 11; lxx, 22; xli, 13; 16; lii, 12; li, 14; also a stream of fire (Dan. vii, 10); and specifically to some of the great rivers of Mesopotamia and Egypt (Gen. ii, 10, 13, 14; xv, 15; Exod. xvii, 8, 9; 7, 5; 2 Kings v, 23; 9, 2; 10, 18; 31, 13; Isai. xvii, 1, 5, 6; Jer. xvi, 19, 21, 31, 36; Isai. xvii, 1, xi, 5, 6; Jer. xvi, 10, 11; Dan. vi, 3; 4; Zeph. ii, 3, 13; Ezek. xiii, 12; Joel. ii, 12; Zech. i, 10), or in connection with the Tigris (Armen-Nohrham, Gen. xxii, 10; Deut. xxxiv, 4; Gen. xxii, 10; title of the Josh. v, 14; 15). It is, as it were, the sea of the desert; never the Jordan (unless, perhaps, that or the Dead Sea intended); and always the river with the art. it specifically designates the Ephraimites, either alone (Gen. xxxi, 21, 35; xlix, 10; Ezeki. xxviii, 21; Josh. iii, 14; xxxii, 8; Psa. lxxxvii, 16), or in combination with the other great river, the Nile (Ex. xxvii, 14; 1 Kings vi, 24, 34; xv, 15; 1 Chron. ix, 14; xix, 16; 3 Chron. ix, 10; Neh. ii, 7; 9, 3; Isai. x, 11; xxxi, 8, 12; xxxiii, 12; xxxvii, 1, 19; 16; Jer. xi, 2, 6, 10); while in the plural it apparently denotes the canals or branches of the same river (Psa. lxxxiv, 20; lxxxvii, 17; Isai. xiii, 27, 2; Ezek. xxxvi, 4, 15). In the remaining terms, which in the imagery of the East, are applied to the various parts of a river: Yd' (יָד), a "hand" or side, either right or left (Numm. xiii, 29; Deut. xi, 37; Judg. xxi, 30; Saphad' (סַפָּה), a "lip" or brink of a river or of the sea (Gen. xxiv, 17, 11; xiv, 17, 17; Exod. ii, 5, vi, 14; xxiv, 5; Deut. ii, 25; iv, 14; Josh. vi, 2, 12, 12; 1 Kings iv, 29; ix, 26; 2 Kings ii, 13; 2 Chron. viii, 17; Ezek. xxxvi, 6, 12, 7, 18, 19; Dan. vii, 5, and so of the moulus of the sea of Solomon (1 Kings iv, 25); and Lashb' (לַשְׁבָה), a "tongue" or bay (Josh. vi, 2, 5, 5, 14, 9; lxxi, 19; Isai. x, 15; Godh' (גֹּדֵת), banks of the Jordan (Josh. iii, 16, 15, 18, 14; 1 Chron. x, 16; or of the Ephraimites, Isai. viii, 7); Kareth (כָּרֶחֶם), the extreme limit or end (1 Sam. xiv, 27), whether of a river (Josh. vii, 5; xv, 19), of the water (iii, 8, 10), or of a rock or a cleft (viii, 22), and so of a country (Gen. xxiv, 26; xix, 30, 40).


TORGAU, CONVENTION OF

scriptions of locality, which, to a modern Occidental, often seem vague and casual, are generally found, when carefully scanned, to be remarkably precise and graphic, a fact which later travellers are beginning to appreciate. Instances of this abound in the dooms-day book of Joshua, and many of them have pointed out under the art. Town. A question of much practical importance has arisen respecting the lists of towns in the various tribes given in that book, whether they are arranged in geographical order. The presumption, growing out of the minute character of the delineation, evidently copied from some memorandum of survey, is in favor of such accuracy, and this is confirmed by the fact now well recognised by commentators, that the list of nations mentioned in Acts ii, 9-11 proceeds regularly from the East to the West. Lieut. Conder, in his papers in the Quatr. Reports of the "Pal. Explor. Fund," bases many of his proposed identifications of places on this theory, which he elaborately defends. We are inclined, however, to doubt its trustworthiness for that purpose, as the Oriental mind is not so uniformly methodical as this view implies; and we have found very frequent reason to depart from such a rule in the indications of identification that we have pointed out under the various places named.

Torr. See Turtle.

Torah (fully Massēkoth Sēpher Torah, מַסְכּוֹת ספר תורה), or Treatise of the Law, is a Talmudic treatise containing enactments as to the manner in which, and the material on which, the law is to be written. The five chapters of this treatise consist of full information, especially the first and fourth; the former containing some notices concerning the Sept., the latter bearing on the sacred text. As to the Sept., see, under that head, Talmudic Notices concerning the Septuagint, in this Cyclopa. The fourth chapter gives the passages in which the word מַסְכּוֹת denotes the Deity or has a different signification. These differences are also noticed in correct editions of the Hebrew text by the words שָׁיֵם and לֹא, i.e. holy or profane, thus enabling the student at once to discern whether מַסְכּוֹת should be translated God or gods, or judges, etc. This treatise has been edited, with six others, by Erlewine (Philadelphia, Main, 1881), under the title תהלים השטרו: also with the Latin title, Septem Libri Talmudici Parvi Hieronymiani quas nunc primum secundum MS. e Bibliotheca Clarissimi Carmoni Onolodi, edid. (B. P.)

Torch is the occasional rendering in the A. V. of מַשְׁמַר, lappid (Zech. xii, 6), which usually signifies (and is translated) a lamp; and so לֹא, (John xviii, 3). In Nah. ii, 3 [Heb. 4] it represents מַשְׁמַר, pelsenah, which rather signifies iron. See Steel. The distinction in the East between a torch and a lantern (q. v.) is not very marked, as both are often but forms of flambeau. See Lamp. A flaming torch is sometimes quoted as the symbol of great anger and destruction (Zech. xii, 6). So also Isaiah (vii, 4) compares Rezin, king of Syria, and the king of Israel, two bitter enemies to Ahaz, king of Judah, to "two tails of smoking firebrands." See Firebrand.

Tordesillas, Moses, a Jewish writer who flourished in 1373 at Avila, in Spain, is the author of רביה של brunette, in which he critically examines 123 passages of the Old Testament, regarded by the Christians as Messianic. This work originated through a controversy which he had had with a Jewish convert at Avila: and, for the benefit of the congregations of Avila and Toledo, he collected all the material, which he laid down in his רביה של brunette, forming the second part of a work bearing the general title רביה של brunette, the first part of it being entitled רביה של brunette. See Fürst, Bib. Jud. iii, 435; De Rossi, Dizionario Storico (Germ. transl.), p. 317 sq., and Biblioth. Jud. Antich. p. 26. (B. P.)

Torgau, Convention of. Among the German Reformers there was considerable difference of opinion on various subjects, which opinions were advanced and supported with great earnestness. All good men friendly to the new Church were desirous of a termination of so many bitter contests, because it was manifest that the papists turned them to their own advantage. After an unsuccessful endeavor to bring about a settlement of these controversies by a conference at Altenburg, it was thought best that a formula or book should be drawn up by wise and moderate theologians, in which these controversies should be examined and decided. James Andreae, a theologian of Tubingen, was appointed to this work in 1659. This business was hastened by the conduct of Kaspar Peucer, son-in-law of Melancthon, who, with others, endeavored in 1570 to abolish throughout Saxony the doctrine of Luther respecting the Lord's supper, and introduce instead that of Calvin. In 1571 they expressly declared their dissent from Luther respecting the doctrine of the supper and the person of Christ; and, the better to accomplish their wishes, they introduced into the schools a catechism drawn up by Peucer, and favorable to the doctrine of Calvin. Accordingly the elector Augustus summoned a convention of theologians at Torgau in 1574. Having clearly learned the views of the Crypto-Calvinists, as they were generally called, he treated them with severity, imprisoning some and banishing others. After various consultations, James Andreae especially, in a convention of many divines assembled at Torgau, by order of Augustus, drew up the treatise designed to bring peace to the Reformed Church, and which received the name of the Book of Torgau. This book, after being
examen and amended by many theologians, was again submitted to certain select divines assembled at Germany, and resulted in the famous Formula of Concord (q. v.). See Musheim, Ecclesiastical History, V, iii, 151 sq.

Torquemado, Alonso Mongrovejo, St., a Spanish prelate, was born at Mayorga in 1508, and studied at Valladolid; he was ordained a priest while still in his youth, and was destined for a clerical life. From this he was called, in 1575, to the College of San Salvador. In 1580 he was made archbishop of Lima; he was consecrated at Seville, and immediately departed for Peru. He entered Lima May 24, 1581. The diocese covered a large extent of territory, but did not enjoy a reputation of community and devotion very commensurate to his character; but Torquemado determined to make a tour of it in person. He sent evangelists into the remote districts, and did all in his power to elevate the Indians, who became much attached to him. His liberality was great, and crowds of poor people would wait at his door for alms. His knowledge of the language rendered access to the people easy, and his labors were incessant. But the fatigue of his long journeys and the warm climate proved fatal, and Torquemado died during his third episcopal tour, March 28, 1606. He was beatified by Clement XI in 1679, and canonized in 1726. See Precott, Conquest of Mexico, V, 3; Pinto, Vida de Don Torquemado, Archbishop of Lima (Madrid, 1658); Hoefner, Nouv. Biog. Générale, s. v.

Torquemado, or Torquemada, was born in 1492, and was a monk of the Order of St. Dominick at Torquemada, Spain, and prior of the monastery of Santa Cruz at Segovia. He was appointed by Ferdinand and Isabella inquisitor-general in 1483, and confirmed in that post Oct. 17 of that year by pope Innocent VIII, who gave him the title of "confessor of sovereigns." In the course of sixteen years he gave evidence of his piety in less than a thousand victims, besides executing nearly as many in effigy, condemning ninety thousand to perpetual imprisonment and other severe punishments, and expelling from Spain above eight hundred thousand Jews. In his later years his authority was curtailed by the appointment of four colleagues by order of pope Alexander VI. He died at Avila, Sept. 16, 1498. See Hoefner, Nouv. Biog. Générale, s. v.

Torquemada, Tomas de, the first inquisitor-general of Spain, was born in 1492, and was a monk of the Order of St. Dominick at Torquemada, Spain, and prior of the monastery of Santa Cruz at Segovia. He was appointed by Ferdinand and Isabella inquisitor-general in 1483, and confirmed in that post Oct. 17 of that year by pope Innocent VIII, who gave him the title of "confessor of sovereigns." In the course of sixteen years he gave evidence of his piety in less than a thousand victims, besides executing nearly as many in effigy, condemning ninety thousand to perpetual imprisonment and other severe punishments, and expelling from Spain above eight hundred thousand Jews. In his later years his authority was curtailed by the appointment of four colleagues by order of pope Alexander VI. He died at Avila, Sept. 16, 1498. See Hoefner, Nouv. Biog. Générale, s. v.

Torrone, Lelio della, professor in the Rabbinc College at Padua, was born in the year 1804. When sixteen years of age he was teacher in Turin, and in 1826 he was appointed preacher there. When, in 1827, the Rabbinc school was opened at Padua, he was appointed to this chair. He died in 1855, and in 1878, Torre wrote in German, Italian, French, and Hebrew. Of his publications we mention, Specchio, o sia Torah Sotnica delle Congregazioni Ebraiche secondo le Regole dell' Analogia, etc. (Padua, 1829); Die Einfluß der Forschung auf die Geschichte der Juden (ibid. 1841); Della Società del Basso Ebraico, etc. (ibid. 1842); — Della Condi- zione degli Ebrei sotto l'Impero Germanico nel Medio Evo (ibid. 1842); —I Salmo Volgarizati in Teatro Massoretico, etc. Istituti con Argomenti e Note (Vi- ennna, 1845); —La Confi- dence des Païres, Nuove Traduzioni, etc. (2d ed. Padua, 1862). See Fürst, Bibl. Jud., iii, 435 sq.; Kayserling, Bibliothek jüdischer Kan- selredner, in Hebräisches u. literarisches Beiblatt zu der Gesammtheit der Juden, etc. (Berlin, 1868), p. 28; Servi, in Educat. torrre lernend..., 1845, 1872.
Hence he was translated to the metropolitan church of Mechlin, where he died, in 1595. Torrientius founded a college of Jesuits at Louvain, to which he left his library, coins, etc. In 1622 he wrote Latini Poëma (Antwerp, 1624; reprinted by Plantin), he wrote Commentaries upon Suetonius (1592) and Horace (1608, 4to).

Torrey, Joseph, D.D., a Congregational divine, was born at Rowley, Mass., Feb. 2, 1797; and graduated at Dartmouth College in 1816. After studying theology at Andover, he became in 1819 pastor of a Congregational Church at Royalton, Vt. In 1827 he accepted the professorship of Greek and Latin in the University of Vermont, which position he retained until 1842, when he was chosen professor of intellectual and moral philosophy. This chair he occupied until his death, at Burlington, Vt., Nov. 26, 1867. He was president of the university from 1863 to 1865. Mr. Torrey was the author of a posthumous volume of Lectures:—A Theory of Art (1875);—editor of the Remains of President James Marsh (1843);—Select Sermons of President Worthington Smith (1861); to both of which he preface carefully prepared Memoirs;—and translator of Neander's Geschichte der christlichen Kirche und Religion (Boston, 1854, 5 vols.). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Torrey, Reuben, a Congregational minister, was born at Weymouth, Mass., April 3, 1789, and was a graduate of Brown University in the class of 1816. He was licensed to preach in 1817 by the Rhode Island Congregational Consecration, and, while pursuing his theological studies, preached more or less in different places. He was ordained in May, 1820, and became pastor of the Congregational Church in Eastford, Conn., where he remained for twenty years (1820-40). On resigning, he acted as supply of the pulpit of the Church in North Madison, Conn., for two years (1841-43) and for the next five years (1843-48) was pastor of the Church in Prospect, Conn. Subsequently he was pastor for seven or eight years in the Church in North Madison, Conn., and in 1852 removed to Elmwood, a part of Providence, R. I., to take charge of a Church newly formed in that section of the city. His pastorate with this Church continued for eight years (1852-60). The remainder of his life was spent in Providence, where he died, Sept. 22, 1870. (J. C. S.)

Torrigiano, Pietro, a celebrated Italian sculptor, was born at Florence about 1472. He studied the antiquities in the gardens of Lorenzo the Magnificent in company with Michael Angelo; but, becoming jealous of the growing distinction of the latter, he assailed him so violently that he was obliged to leave Florence. He went to Rome, where he was employed by pope Alexander VI; but he afterwards gave up his profession, and became a soldier under the duke of Valentino, and also under Vitelli and Piero de’ Medici. He again returned to his profession, and, executing several bronze figures for some Florentine merchants, accompanied them to England. He was employed by Henry VIII in erecting the tomb of Henry VII in Westminster Abbey, which was completed in 1519, and it is supposed, the tomb of Margaret, countess of Richmond, in Henry VII’s Chapel. He left England finally in 1519, and visited Spain, where he executed several pieces of sculpture for conventa, etc., and, among others, a group of the Virgin and Infant. This was so beautiful that the duke de Arco was induced to make a liberal payment. Disappointed in receiving a large quantity of copper coin, amounting to only thirty ducats, he seized a mallet and shivered the work into a thousand pieces. The duke accursed him to the Inquisition as a sacrilegious heretic for destroying a figure of the Holy Virgin. Torrigiano was condemned, but avoided the ignominious end which awaited him by starving himself. He died in 1522. See Spone, Bibl. Dict. of Fine Arts, s. v.

Torrolese ( roma), so called, according to Genesis, from moving slowly; Sept. d phochothos d χα- ριας; Vulg. crocodilus occurs only in Lev. xi, 29 as the name of some unclean animal. Bochart (Hieroz., ii, 463) with much reason refers the Heb. term to the kindred Arabic dhab, a large kind of lizard, which, from the description that is given by Damir, appears to be the Psaumusaurus scincus, or Monitor terrestris of Cuvier (Regne Anim., ii, 28). This lizard is the warm-blooded of the Arabs, i.e. the land-reptile (V. terrus arnwmusius), in contradistinction from the warm-blood, i.e. the water-lizard (Monitor Niloticus). It is common enough in the deserts of Palestine and North Africa. It is probably the phochothos χαριας of Herodotus (iv, 192) and Dioscorides (ii, 71), or perhaps their σαραγως, the Scelus officinallis. See SMITH. The land-monitor (Psaumusaurus scincus) is a lizard three or four feet in length, which, living in the sandy and rocky wastes, subsists on the beetles and other small animals that are found in such arid situations. It is of a yellowish or dusky tint, with darker green spots and bands, and with yellow claws. Travistan, however, thinks the animal in question is the "Uromastix epi- nicea, a large species of lizard very common in the deserts and sands of North Africa and Arabia. It is also well known in the Judean wilderness, living in holes of the rocks and burrowing in the sand. It sometimes attains the length of two feet. Its most peculiar character is its powerful spiny tail, broad and massive, and incrust with close rows of stout prickly scales. This is its weapon of defence, which it uses with effect against its assailant. Its color is grass green, spotted with brown, but darker when irritated. It has a slow and awkward gait, turning its head from side to side with great caution as it walks. It rarely bites, but when it does nothing will induce it to relinquish its grasp. It feeds chiefly on beetles, but will attack larger animals, even chickens, when in confinement. It is eaten by the Arabs’ (Nat. Hist. of the Bibl., p. 250). See LIZARD.

The same Hebrew word ᾳτα ḥ, translated "covered [wagons]" in Num. vii, 3, and the same idea seems to be prominent in Isa. lviii, 20, where our translators have rendered it "littera." According to Genesis, it means in both these passages a sedan or palanquin (so called from being gentry borne). See LITIC. Several kinds of the palmulous or Palestine and the surrounding regions. Among the land-tortoises the bordered tortoise (Testudo marginata), probably the χελώνα χαριας of Aristotle—a little species closely resembling the common T. Grega—replaces this latter in Egypt and the coast of Barbary; and a near ally, T. Mauritanica, extends throughout North Africa and Western Asia, from Algiers to the Caspian. Besides
TORTOSA, COUNCIL OF

Water-tortoise of Palestine (Emys Carpica). These are very marsh-tortoises (Emys, etc.) are common in the marshes of some of those regions and are particularly troublesome to horses wading or drinking (see Wood, Bible Animals, p. 507 sqq.). See ZOOLOGY.

Tortosa, COUNCIL OF (Concilium Dertuanse). This council was held in Tortosa, a cathedral city of Catalonia, Spain, in 1429, by Peter, cardinal de Foix. All the prelates and many ecclesiastics of the kingdoms of Aragon and Valencia, and of the principality of Catalonia, attended. The king's letters-patent confirming the liberties and immunities of the Church were read, and at the end of the fourth session twenty canons were approved and published.

4. Orders that all benefited clerks and ecclesiastics in holy orders shall keep breviaries, in order that they may say the office privately when hindered from attending in the choir.

5. Forbids the elevation of unworthy persons to holy orders.

6. Orders curates every Sunday to teach by catechising some part of the things necessary to be known by Christians in order to salvation, which it declares to be as follows: (1) What they ought to believe, contained in the articles of the faith. (2) What they ought to pray for, contained in the Lord's Prayer. (3) What they ought to keep, contained in the ten commandments. (4) What they ought to avoid, viz. the seven mortal sins. (5) What they ought to desire, viz. the joys of Paradise. (6) What they ought to fear, viz. the terrors of hell.

7. Orders neophytes to bring their children to church within eight days after their birth, in order that they may receive baptism.

15. Forbids the delegates of the holy see to go beyond their commission.

See Mansi, Concil. xii. 406.—Landon, Manual of Councils, s. v.

Torture (Lat. tortura, to twist) is pain inflicted as a judicial instrument for extracting evidence from unwilling witnesses or confessions from accused persons. The practice is an ancient one. In ancient Athens slaves were always examined by torture, and their evidence seems on this account to have been deemed more valuable than that of freemen. Any one might give up his slave to torture, or demand that of his opponent, and a refusal to do so was considered as a strong presumption against a person. No free Athenian could be examined by torture, and it was not inflicted upon Roman freemen or citizens until the time of the emperors. Then it was sometimes inflicted upon even freemen to extract evidence of the crime of lex majestas, and thus it became a part of the Code of Justinian. Hence it was adopted during the Middle Ages by all European states in which the Roman law was the basis of legislation. It was adopted early and extensively by the Italian municipalities. In Germany elaborate apparatus for its infliction existed, not merely in the dungeons of the feudal castles, but in the vaults beneath the town-halls of Nuremberg and Ratisbon, where the various implements used are yet to be seen. It continued to be practiced in the prisons of Germany until they were visited by Howard, in 1770. It ceased to be a part of the judicial system in France in 1789; and in Scotland it was still in frequent use after the Restoration, and was only abolished by 7 Anne, c. 31, sec. 5. In Russia it was done away with in 1801. In the United States it has never been reckoned an adjunct of judicial examination.

The first instance we have of its use in England is in 1316, in aid of the ecclesiastical law, during the struggle between pope Clement V and the Templars. Ed-

ward II, when requested to sanction the infliction of torture by the inquisitors in the case of certain Templars accused of heresy and apostasy, at first refused, but, on a remonstrance by the Clement, by a bull to the council, and on the recommendation of the council the inquisitors were authorized to put the accused to torture, but without mutilation or serious injury to the person or effusion of blood. During the Tudor period, the council assumed the power of directing the torture, in the interests of the Tower, and other officers against state-prisoners and occasionally also against persons accused of other serious crimes. Under James I and Charles I torture was less resorted to, and only in state trials. It was inflicted for the last time in May, 1640. The worst application of torture was found in the hands of the Inquisition. In 1791 pope Innocent IV called on the secular powers to put to the torture persons accused of heresy in order to extract confessions against themselves and others. The necessity of secrecy in the proceedings led to its extensive adoption, and to refinements of cruelty in its use before unknown. See Inquisition.

The inhumanity of torture have been many and various. The scourge was the usual instrument of torture among the Romans, who also made use of the equeulums, a sort of upright rack, with pincers added to tear the flesh, etc. The most celebrated instrument was the rack, known in the south of England, and in the 2d century, was used in the Tower by the duke of Exeter, constable of the Tower. The "boot" was the favorite French instrument of torture. In this rings of iron were pressed around the legs, and wooden wedges driven between them and the flesh until the muscles were reduced to jelly. Among other means of torture were the "thumb-screw," "iron galutantes," the "little eace," a narrow cell in which the prisoner was confined for several days, and in which the only position possible was one which cramped every muscle; the "scavenger's (properly Skevington's) daughter," the invention of Sir William Skevington, an instrument which compressed the body so as to start the blood from the nostrils and often from the hands. The torture by water, crucifixion, the fastening of limbs to trees which were forced into proximity to each other and then suffered to fly apart, and pouring melted lead into the ears, are but a few of the means by which punishment has been inflicted.

See Barum, Romanism as It Is (Index); Jardine, On the Use of Torture in the Criminal Law of England (Lond. 1839, 8vo); Maclaurin, Introduction to Criminal Trials; Nicolas, Si la Torture est un Moyen Sûr à Vérifier les Confessions (1845); Seigneur, Sur la Question chez les Grees et les Romains; Mittermaier, Das deutsche Straesserfahren, vol. i. See TORMENTOR.

Towwood Excommunication. After the skirmish at Airnmoor and the execution of Cameron, Cargill, during a field-preaching at Towwood, near Stirling, publicly excommunicated the king, the duke of York, the duke of Monmouth, the duke of Lauderdale, the duke of Rothes, General Dalziel, and Sir George Mackenzie. According to tradition, Rothes, during a dangerous sickness the following year, sent for some of the Presbyterian ministers, and in a fit of remorse confessed the justice of the sentence. The duke of Hamilton added, "We bainish these men, and yet when dying we send for them."

Tosaphoth (חיכוי) denotes those additions or supplementary glosses to Rashi's (q. v.) commentary on the Talmud which are found along with the latter in every edition of the Talmud. The disciples of Rashi, when they found that their master's expositions could be extended and improved, set about this work of exposition immediately after his death, filling up every gap, and using up every scrap which the master had left. Out of reverence for him, they would not
put down their opinions in an independent manner, but denominated them τὰ προσθήκαια, additions, and hence they were called Tossiphists. The first Tossiphists were his two sons-in-law, R. Meier ben-Samuel and Jehudah ben-Nathan, the latter called by way of abbreviation Ḥiram, ר"יחר; his three grandsons, R. Isaac, R. Samuel, and R. Jacob Tam, sons of R. Meier, who are respectively called from their initials Ḥiram, ר"יחר; R. Shalom, ר"שלום, and R. Tam, ר"תא; and, lastly, R. Isaac ben-Asher of Spires, called Ḥiram, ר"יחר; R. Rabbi Yehudah, ר"רבי יהודה, also a relative of Rashbi.

The latter is called רבי יהודה תלמידו, or the Tosippist קין סיוון. Besides Joseph Hen, the sons of Joseph Porat, son of Samuel ben-Meier; Isaac ben-Nathan, son of Don-piare, also called Isaac the Elder, a nephew of R. Tam; Samuel ben-Natranai, called Ḥarshat, הרשח; Isaac ben-Mordecai, of Augsburg; Isaac Halabau ben-Jacob, of Prague, etc. They are enumerated by Zunz in his Zur Geschichte und Literatur (Berlin, 1845, p. 29 sq.), where the student will find all necessary information. (B. P.)

Tosi, Joseph, a Roman Catholic theologian, was born in Rome about 1444. He was educated in Styria. In 1486 he received holy orders, and in 1491 was consecrated at Vienna as doctor of theology. In the same year he was called professor of dogmatics to Grätz, where he remained until the year 1488. He then went to Vienna and lectured until the year 1471, when he was appointed confessor and dean of the university to the bishop of Vienna. He published, Lectures on the Syllogism Errors of the Papal Encycl. dated Dec. 8, 1864 (Vienna, 1865):—Ueber Religionsphilosophie und Wissenschaft, Darwinismus und den Ursprung des Menschen (Grätz, 1865). Comp. Literarischer Handwörter für das kathol. Deutschland, 1866, p. 59, 158; 1873, p. 326. (B. P.)

Tostado, Alonso, a Spanish prelate, was born at Madrigal in 1400. He studied in Salamanca, and at the age of twenty-two received his degree. He was elected to the chair of theology, and soon gained a wide reputation. In 1431 he was sent to the Council of Basle, and by some of his utterances attracted the attention and condemnation of the holy see. In 1443 he was ordered to appear before an assembly of theologians at Sienna, and was convicted of unsound doctrine. On his return to Spain, through the intercession of the king, he received the bishopric of Avila, and was also member of the Council of Castile. He died near Avila Sept. 3, 1465. His works are numerous, and a large number were published at Venice 1457, 24 vols. fol.; they consist of mystical commentaries on the lives of the saints in the Bible and on Matthew. Besides these are Comentario sobre Ezequiel (Salamanca, 1506):—Confesionario (Logroño, 1520). See Viera y Clavijo, Elogio de Alonso Tostado; Antonio, Bibl. Hist. Vetus.—Hoefer, Nouve. Biogr. Générale, s. v.

Total Abstinence. See Temperance.

Toil (1 Chron. xxvii, 9, 10). See Tof.

Toile, Council of. See Togo, Council of.

Toulmin, Joshua, D.D., an English Unitarian minister, was born in London May 11, 1740. Educated at a Dissenting academy, he became minister of a Dissenting congregation in Colyton, Devonshire, and in 1765 of a Baptist congregation in Taunton. Afterwards he adopted Unitarian views from Harvard College in 1794, and in 1804 was chosen one of the ministers of the Unitarian congregations in London, at Birmingham, formerly presided over by Dr. Priestley. Here Dr. Toulmin continued his labors until his death, July 28, 1815. He was an able preacher and an industrious writer. He wrote, Sermons to Youth, etc. (Homity, 1770, 12mo; 2d ed. Taunton, 1789, 8vo):—Memoirs of F. Socinus (London, 1777, 8vo):—Dissertations on the History of Christendom (1785, 8vo):—Review of the Life of John Hiddle (1789, 8vo; 2d ed. 1791, 8vo):—History of the Town of Taunton (1791, 4to):—Sermons

TOULOUSE, COUNCILS OF (1810, 8vo):—Historical View of the Protestant Dissenters in England under King William (1814, 8vo):—Besides single sermons, works on baptism, etc. See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Darling, Cyclop. Bibl., s. v.

Touleuse, Councils of (Concilium Tolosanum). These councils, generally held in Toulouse, a city of France, capital of the department of Haute-Garonne, and situated on the Garonne. It has in it the very remarkable Church of St. Sernin, a masterpiece of Romanesque architecture, recently restored by Viollet-le-Duc. The Church of the Cordeliers was erected in the 13th century, and destroyed by fire in 1671.

I. The first Council of Toulouse was held Sept. 13, 1056, eighteen bishops being present. Rambaldus, archbishop of Aries, and Pontius, archbishop of Aix, presided. Thirteen canons were published.

1. Forbids simony.
2. Forbids any fees for consecrating a Church.
3. Forbids all buying and selling of Church preferment.
4. Enacts that, if a clerk have entered upon the monastic state in order to obtain an obby, he shall be compelled to continue the religious life, but shall be entirely excused from the honor he coveted.
5. Orders that their monks follow the rule of St. Benedict in their manner of life, food, dress, etc. Any abbot violating (corrupting) these institutions to be corrected by his own bishop.
6. Enjoins celibacy upon priests, deacons, and other clerks holding ecclesiastical dignities; offenders to be deprived.
7. Forbids, under pain of excommunication, lay persons to speak in the Name of God, to curate the Temporal to 13, 15, 17, 18, 19, 20. Relate to the payment of Church dues and tithes.
8. Forbids, under pain of excommunication, all intercourse with heretics and excommunicated persons, unless for the purpose of converting them and bringing them back from their evil ways.

In this council Berenger, viscount of Narbonne, made complaint of the conduct of archbishop Guifroi, accusing him of giving away the lands appertaining to the Church of Narbonne to those who had borne arms for him. The event of his complaint is unknown. See Mansi, Cons. ix, 1084.

II. The second council was held July 5, 1119, pope Calixtus II presiding, assisted by his cardinals, and the bishops and abbots of Languedoc, Gascony, and part of Spain. Sixteen canons were published.

1. Is directed against the buying and selling of holy orders or livings.
2. Is directed against the followers of Peter de Bruis, a sect of heretics, on the ground that the secular authorities shall repress those who affect an extreme pietty, counterfeit the holy sacrament of Christ's body and blood, incite the clergy to prelude, and other ecclesiastical disorders, and lawful marriage; directs that they shall be driven out of the church as heretics.
3. Forbids to make slaves of free persons.
4. Excommunicates monks, canons, and other clerks who quit their profession, or who allow their beard and hair to grow after the fashion of the people of the world. See Mansi, x, 866.

III. Held in 1161, convoked by the kings of France and England, who were present. One hundred bishops and abbots of the two kingdoms attended, and solemnly recognised Alexander III as pope, to the exclusion of Victor IV. See Mansi, x, 1406.

IV. The Fourth Council of Toulouse was held in September, 1229. The archbishops of Narbonne, Bordeaux, and Auch were present, with many other bishops and abbots. Raymond, count of Toulouse, with several lords, attended; also the seneschal of Carcassonne, and the two convents of Toulouse. Forty-five canons were published for the extinction of heresy and the re-establishment of peace.

The first five enact that the archbishops, bishops, and exempted abbots shall appoint in every parish a priest and two or three laymen of good character, who shall take an oath constantly and minutely to destroy heretics in houses, caves, and every place in which they may be hidden. After the fact is proved, the person accused shall be brought before the bishop, the lord of the place, or his bailiff.
6. Orders that the house in which any heretic shall be discovered must be burned.

8. Forbids to punish any one as a heretic before the bishop has given his sentence.

10. That no one who have of their own accord recanted shall not be suffered to remain in their own villages, but shall be carried to some place free from all suspicion of the Romish faith, and there be constrained to wear their own clothes, and their own dress, and to be in their own houses; forbids to intrust them with any public office, etc.

11. Orders that such as pretend to be converted through fear of death, or from any other motive, shall be shut up, in order that they may never again commit the same.

12. Orders every man above fourteen years of age, and every woman above twelve, to adjure heresy, to make open profession of the Roman faith, and to swear to hunt out the heretics. This to be repeated every two years.

14. That no one shall be allowed to be present at the newly arrived upon confession of the court in presence of the whole community, to confess to their own priest three times a year, and to receive the holy communion at Christmas, Easter, and Whitsunday; those who neglect to do so to be considered as heretics.

15. That the laity have to have in their possession any copy of the books of the Old and New Testament, except the Psalter and such portions of them as are contained in the breviary or the hours of the Blessed Virgin; most strictly forbids these works in the vulgar tongue.

16. Declares all wills to be void which are not made in the presence of the priest or his vicar.

20. Forbids to absent one's self from church on Sunday.

24. Orders, according to the following plan:--on Christmas-day, feasts of St. Stephen, St. John the Evangelist, St. John the Baptist, St. Paul, and St. James; on Ascension-day, feasts of the Ascension, the Annunciation, and the Nativity of the Virgin Mary; on Easter:--the two days after Easter, the Sunday preceding Easter; Whit-Sunday, the day after Whit-Sunday, feasts of the Nativity of St. John the Baptist, and theFeast of the Holy Cross; the three days after Whit-Sunday, feasts of the Nativity of St. Mary Magdalene, St. Lawrence, St. Martin, St. Nicholas, and the Dedication of St. Mary; on the feast of St. Michael, and the feasts of the dedications of every church and of all saints to whose honor churches have been built.

25. Forbids to have in possession of castles and other fortified places to marry men who are enemies to the faith and to peace.

41. Orders judges to receive bribes.

Orders that counsel be provided gratis for the poor.

See Mansi, xi, 425.

53. This council was held in May, 1590, by the cardinal de Joyeuse, archbishop of Toulouse, assisted by the bishops of St. Papoul, Riez, and Lavaur, and the deputies of the bishops of Lombez, Pamiers, Mirepoix, and Montauban. Various regulations were made relating to the duties of bishops, chapters, benefited clerks, priests, and others; they also embrace the following subjects:--the number of clergymen, fees, vows, seminaries, hospitals, excommunications, residence, etc.---Mansi, xv, 1787. See Landon, Manual of Councils, s. v.; Hagenbach, Hist. of Doctrines, i, 143.

TOUP, Jonathan, an English clergyman and emigrant critic, was born at St. Ives in December, 1718; and, after a preparatory education in that town, to the school of Mr. Gurney, of St. Mary, removed to Exeter College, Oxford, where he took his degree of A.B. He was received at Pembroke Hall, Cambridge, in 1756. In 1760 he was appointed to the rectory of St. Martin's, and in 1774 he was installed prebendary of Exeter. In 1776 he was vicaraged to the vicarage of St. Mary's. He died Jan. 19, 1783. His classical publications include the following:

Emendationes in Statudum, etc. (London, 1780, 8vo; pt. ii., 1764, 8vo; pt. iii., 1766, 8vo;---Epistolae Critica ad Celerberrimum Virum Gulielmum Episcopum Glocersetrensum (ibid. 1767, 8vo;---Corona Posterioris, sive Appendicula Notarum atque Emendationum in Secretarys, etc. (London, 1770, 8vo;---D. Longini Omina quae extant Gr. et Lat. recensuit, etc. (Oxon. 1778, 8vo, with later editions). See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Chalmers, Biog. Dict. s. v.

TOURNÉLY, Honoré, a French Roman Catholic divine, was born Aug. 28, 1858, at Antibes. He received his early education at a seminary which he entered at a very early age. He was of poor stock, and, when only pre-

TOURNON, François de, cardinal d'Ostia, was born at Tournon in 1485. At the age of twelve he took the habit of the regular canons of St. Augustine at the Abbey of St. Anthony in Dauphiny. Francis I gave him the Abbey of Chaise-Dieu, and in 1517 made him archbishop of Embrun. In 1525 he became archbishop of Bourges, and in 1527 he was made cardinal, and increased with every year. Francis I loaded him with benefices and offices, and employed him in political and ecclesiastical intrigues.
soon after rose to the dignity of dean of the College of Cardinals. He was one of the principal negotiators of the Treaty of Madrid in 1526, and was actively engaged in bringing about the Peace of Cambrai. During the quarter between Henry VIII of England and the holy see, Tournon proposed concessions to Clement VII, which, if they had been accepted, would have prevented the whole Reformation in England. When Charles V invaded Provence, Tournon was made lieutenant-general of the French army, and directed the operations of the war. He represented France at the Conference of Nice, and in 1508 signed the treaty which gave France ten years of peace. Tournon was a bitter enemy of reform in whatever shape it might come, and stained his reputation by his bloody attacks upon heresy. The terrible persecution of the Vaudois was in great part of his instigation. At the death of Francis I he fell out of favor, and under Henry II was obliged to return to Rome. In his new diocese of Lyons he carried on a fearful persecution against the Calvinists. At the death of Henry II he returned to France, and was called to the councils of the queen mother. His appearance was the signal for new rigors, and he endeavored to obtain the return of the Jesuits, to whom he gave his college of Tournon. He had great influence over Charles IX, and what terrors may not be due to this fact? Tournon died at the abbey of Saint-Germain-des-Prés on April 22, 1562. He had little time, among his political affairs, to attend to letters, and left no works behind him. See Fleury-Ternau, Hist. du Cardinal de Tournon; L. de Saint-Martin, Hist. de l'Édit; de Thou, Hist. et Temp.—Hoefer, Nouv. Biog. Générale, s. v.

**TOURS, COUNCILS OF (Concilium Tyronense).** These councils were held in Tours, department of Indre-et-Loire, France. It is the seat of an archbishopric, and the archbishop resides here in a palace of uncommon beauty. It formerly contained the celebrated cathedral of Tours, which was destroyed in 1793, and of which only two towers remain.

I. The first council was held Nov. 18, 461, by St. Perpetius, archbishop of Tours, assisted by nine bishops. Thirteen canons were made for the restoration of the ancient discipline.

1 and 2. Enjoin celibacy upon bishops, priests, and deacons.

3. Forbid them to live, or be on terms of too great familiarity, with any woman.

4. Forbid a clerk to marry a widow.

5. Excommunicate those who renounce the ecclesiastical state.

6. Is directed against those who marry or offer violence to virgins consecrated to God.

7. Deprives of communion bishops who get possession of the bishopric of another, or who promote the clerics of another bishop.

8. Condemns them who fall away from a state of penance after having entered upon it.

9. Deprives of communion bishops who get possession of the bishopric of another, or who promote the clerics of another bishop.

10. Denominations made contrary to the canons to be null.

11. Condemns ecclesiastics who leave their own church and go to another diocese without their bishop's Leave.

12. Condemns clerics who leave their diocese to travel without letters from their bishop.

13. Condemns usury in clerics; allows other business and employment.

Mansi adds to these thirteen canons six others (Concil. iv., 1049).

II. Held Nov. 17, 566; convoked by order of king Chilperic, and composed of nine bishops, among whom were Germanus of Paris, Prætextatus of Touss, and Euphronius of Tours, who presided. Twenty-seven canons were published.

1. Orders provincial councils twice a year.

2. Ordinates to place the body of Jesus Christ upon the altar after mass, and orders that all shall be placed under the cross.

3. Ordains that the laity come to close the altar with the clerks during the service; but allows them, and women also, to enter the sanctuary for private prayer at other times, in order to receive the communion.

4. Orders each Church to maintain its own poor, that they may not be obliged to wander about.

5. Forbids clerks and lay persons to give letters commendatory (epistolium), and allows this to bishops only.

6. Ordains married bishops to live with their wives as with sisters.

15. Orders that monks who leave their monastery in order to marry shall be excommunicated from their orders, and put to penance; and that the aid of the secular powers shall be entertained in order to effect this.

17. Orders that preaching should take place during the three Rogation days and during the whole of Whitsun week; from that time to August 1, three days in each week; during September and October, three days in each week; and during December every day till Christmas. Again, on the first three days of January; and from Easter to Whitsun, three days in each week.

22. Allows hymns composed by an author of respectability to be used at the holy office, besides those of St. Ambrose.

27. Declares that bishops taking any fee, etc., for ordination are to be regarded not merely as guilty of sacrilege, but even as heretics.

See Mansi, v., 851.

III. Held in 813, by order of Charlemagne, for the purpose of re-establishing ecclesiastical discipline. Fifty-one canons were published.

1. Orders the people to be faithful to the emperor, and to pray for his preservation.

2. Orders bishops to give themselves to the study of the Holy Scriptures, and especially the gospels, and epistles of St. Paul, and to try to learn them by heart.

3. Orders bishops to converse with the canons and the pastoral of St. Gregory.

4. 5. And 6. Order that they shall preach frequently; that they shall send out their clergy in their respective dioceses to the poor and strangers, affording them both bodily and spiritual food.

7. Forbids priests to be present at plays and games and all immodest exhibitions.

8. Forbids priests to administer indifferently the Lord's body to boys and any chance persons, lest they be in sin, and so receive the greater damnation.

9. Forbids priests to administer the holy eucharist to women in their own houses.

10. Forbids priests to eat and drink in taverns.

11. And 23. Forbid to give the veil to young widows, without good evidence of their sincere love of a religious life, and to virgins under twenty-five years of age.

12. Orders that prayer be made kneeling at all times, except on Sundays and during Easter.

13. Warns the faithful not to make a noise when entering church, not to talk when there, and to keep all bad thoughts out of their minds.

14. Forbids to hold pleadings in churches or church-paroches.

15. Forbids to hold pleadings or markets on Sundays.

16. Is directed against the wicked habit of swearing.

17. Orders persons to communicate at least thrice a year, unless hindered by some great crime.

See Mansi, vi., 1259.

IV. Held in 1055, by Hildebrand, the Roman legate (afterwards Gregory VII), and cardinal Geraldus. In this council Berenger was called upon to defend his opinions; but, not being able to do so satisfactorily, he retracted, and made a public confession of the true faith, which he signed; whereupon the legate, believing him to be sincere, received him into communion. See Mansi, x., 1089.

V. Held in 1060, by cardinal Stephen, the Roman legate, and ten bishops. Ten canons were made; the first four condemn simony.

6. Declares that those bishops, priests, and deacons who, although they are not guilty of simony, refused to abstain from the exercise of their functions, being at the time in a state of incontinence, should be irrecoverably deposed.

See Mansi, x., 1108.

VI. Held in Lent, 1096, by pope Urban II, who presided. The decrees of the Council of Clermont were confirmed. The pope received into favor king Philip (who had been excommunicated for forsaking Bertrado, his lawful wife), upon his humble making satisfaction. See Mansi, x., 1109.

VII. Held May 19, 1163, in the Church of St. Maurice, by pope Alexander III, assisted by seventeen cardinals. There were also present, besides Louis VII, king of France, one hundred and twenty-four bishops, four hun-
TOURS, COUNCILS OF 502

TOUSSAIN

dred and fourteen abbots, and an immense multitude of others, both ecclesiastics and laics. These prelates were assembled from all the provinces in subjection to the kings of France and England; some few of them also were Italians, who had declared for Alexander. Amongst the English prelates was Thomas, archbishop of Canterbury, who was received by the pope with extraordinary honors, all the cardinals present, except two in immediate attendance upon Alexander, being sent beyond the city walls to meet him. The archbishop of Canterbury sat on the right hand of the pope, the archbishop of York on the left. The immediate object of the council was the condemnation of the synods of Pisa and Lodi, convoked by the emperor Frederick. Ten canons were published.

2. Condemns usury among the clergy.
3. Is directed against the Abilìnegenes, and forbids all intercourse with them; forbids even to give them a retreat or protection, or to buy and sell with them.
4. Forbids to let churches to priests for an annual rent.
5. Forbids monks to leave their cloisters in order to practice medicine or to learn the civil law.
6. Declares all ordinances made by Octavianus, and other heretics or schismatics, to be null and void.

See Mansi, x, 1411.

VIII. Held June 10, 1236; Jehu de Mayenne, archbishop of Tours, presiding. Fourteen canons were published.

1. Forbids the crusaders or other Christians to kill or injure any infidel, whether in plunder or battle, or in any way; also orders the secular judges to give up to the ecclesiastics all persons whom they may have seised on account of any crime.
2. Orders that all wills be put into the hands of the bishop or archdeacon within ten days after the death of the testator.
3. Denounces those who have two wives living, declaring them to be infidels, and orders that they shall be tied up in public, unless they can pay a heavy fine; orders priests to publish every Sunday in church the sin of having two wives.
4. Orders the bishops to instruct and to provide for the subsistence of the new converts from Judaism and heresy.

See Mansi, xi, 506.

IX. Held in 1239, by Jehu de Mayenne, archbishop of Tours, and his suffragans. Thirteen canons were published, "with the approbation of the holy council;" the use of which expression in this case shows that the approbation was not confined to the pope and his legates.

1. Orders that the bishop shall appoint three clerks, or three secular judges, in every parish, who shall take an oath to report faithfully concerning all scandals in morals, faith, etc., to the bishop in good time.
2. Forbids to receive any thing for the administration of the sacraments: without prejudice, however, to pious contributions.
3. And 4. Forbid curates and rectors to excommunicate their parishioners of their own authority.
4. Forbids clerks and monks to retain any female servants in their houses or priories.

See Mansi, xi, 565.

X. Held Aug. 1, 1292, by John de Monseareau, archbishop of Tours, who presided. Thirteen canons were published.

1. and 2. Are directed against needless lawsuits.
3. Forbids clerks and monks to frequent taverns.
4. Excommunicates those who steal or burn the church-books and injure the furniture.
5. Orders the observance of customary processions.
6. Forbids the punishment of usurers according to the canon of Lyons.
7. Is directed against those who hinder the payment of tithes.

See Mansi, xi, 1183.

XI. A general assembly of the French clergy was held, by order of Louis XII, in September, 1510, on account of the sentence of excommunication passed against him by pope Julius II. The object of the council was to discuss the question how far it was necessary for Louis to respect the spiritual weapons of the Church, when in the hands of an adversary who used them only to further injustice, and in matters purely temporal. Eight questions were discussed. The following are the most important:

1. Is it allowable for a prince, in defence of his person and property, not only to repel injustice by force of arms, but to seize the lands of the Church in the possession of the pope, his declared enemy, not with any view of retaining them, but in order to cripple the pope's means of injuring him? Answer in the affirmative.

2. Is it allowable for a prince, on account of such declared hatred, to break all connexion with the pope, to withdraw from the obedience of the latter, the pope having stirred up other princes to make war upon him, and urged them to break all connexion with him? Answer: No, it is lawful to withdraw from obedience, not, however, altogether, but so far as the defence of the prince's temporal rights shall render necessary.

3. This withdrawal from obedience being supposed, how is it to be carried out? To this question the council replied with regard to his subjects, and the prelates with regard to other ecclesiastics. In all those matters in which recourse is usually had to the secular arm, particularly to those matters which are necessary to keep to the ancient common rights, and the Pragmatic Sanction taken from the decrees of the Council of Basie.

5. If the pope should attach extraordinary attention to justice, or even to the appearance of right, employs arms and artifices, and public censures against the prince, and seeks to protect and defend him, ought the latter to be deserted? Answer: that such censures are altogether null, and not binding in law.

See Mansi, xiii, 1481.

XII. Held in September, 1583, Simon de Maillé, the archbishop, presiding; the bishops of Angers, Nantes, Saint-Brieux, Rennes, and Quimper, and the deputies of those of Saint-Malo and Mants, were present.

A petition was read, which it was proposed to present to the king, representing to him the impossibility of the execution of the decrees of Trent in his state; also another petition to the pope, to induce him to remedy certain abuses in the church. The council, by a formal act of faith, to be signed by all the secular clergy, was drawn up, and regulations were made to prevent simony. In consequence of the prevalence of the plague in Tours, the prelates adjourned the council to Angers.

See Mansi, xv, 1001.

TOUSI, COUNCILS OF (Concilium Tullense, or apud Saponaros), were held at Tousi, a place in the diocese of Toul.

I. This council was held in June, 856. Charles the Bald and the sons of the emperor Lothair were present. Thirteen canons were published, of which the first treats of the reconciliation of Charles and his brother Louis. The sixth relates to a charge of treason brought by Charles the Bald against Venilon, bishop of Sens. Canon 8 relates to the case of the Breton bishops who had been guilty of schism in separating from their metropolitan. The tenth contains certain dogmas relating to grace (originally put forth in the first six councils of Venet, in the Synod of Quercy), concerning which there arose a great contention among the bishops present. Synodal letters were addressed to Venilon, the Breton bishops, and the bishops of those fiefs to whom secular persons whose unbridled licentiousness had caused extreme disorder. See Mansi, Concil, viii, 574.

II. The second Council of Tousi (also called Concilium Tullense, or Tussiacense) was held in 869. Forty bishops from fourteen provinces attended. Five canons were published, directed against robbery, perjury, and other crimes, then very prevalent. Although only forty bishops were present, these canons are signed by fifty-seven, the decrees of councils being often sent to the bishops who were absent for their signature.

1. Is directed against invaders of sacred things.
2. Orders that the incontinence of virgins or widows consecrated to God.
3. On perjury and false witnesses.
4. Against theft, and others guilty of various crimes.
5. Concerning vagabond clerks and monks.

A synodal letter was also drawn up, addressed to the invaders of ecclesiastical rights and property, and the plunderers of the poor. See Mansi, viii, 702.

TOUSSAINT, or Tussana, Dianf, a French Protestant minister, was born at Montbéliard, in the department of Doubs, July 15, 1541. After some education in his native place, Toussaint went to Basle in 1556, where he studied two years. He then spent two years in Tübingen, applying himself to belles-lettres, philosophy, and divinity. Finding himself indifferent.
TOW

entirely acquainted with the French language, he went to Paris in 1559, and, after a residence of a year, went to Orleans, where he taught Hebrew for some time, and, being admitted into the ministry, officiated in the Church there. While in Orleans he was frequently exposed to dangers arising out of the war between the Catholics and Protestants, but escaped them and finally reached Heidelberg, whither he had been invited by Frederick III. The prince afterwards employed him in visiting the Reformed churches in his dominions. On the death of the elector in 1576, his son, Casimir, in writing to Neustadt, made him superintendent of the churches there, and, on the death of Ursinus, professor of divinity. In 1578 he presided at a synod assembled by Casimir for the purpose of establishing conformity in doctrine and discipline, and of assisting the exiles of the palatinate. When the prince became regent in 1588, he removed to Heidelberg, and employed Tassouin in promoting the Reformed religion. In 1586 he was appointed to succeed Gryneus, first professor of divinity at Heidelberg; and in 1594 was chosen rector of the university. He died January 10, 1602, and was buried in the university chapel. His publication of works, in many volumes, 4to and folio, are principally commentaries on various parts of the Bible, and defences of particular doctrines of the Reformed Church. His life was published by his son Paul under the title Vita et Obitus Daniellis Tassuinii, etc. (Heidelberg, 1603, 4to).

Tower is the rendering in the A. V. of the Heb. words (1) נָשַׁע, ne'orth (so called as being shaken off from flax in hatching), refuge (Judg. xvi, 8) (2) נָשַׁע, pishkîh (Isa. xiii, 37), flax (as elsewhere rendered). See LEXICON.

Towel (l'wton, for Lat. latetum, a linen cloth, John xiii, 4, 5) was the apron worn by servants and persons in waiting (see Galen, De Comp. Med. c. ix; Sueeton. Calig. 26). See APRON.

Tower is the rendering in the A. V. of the following Heb. and Gr. words: 1. נָשַׁע, נָשַׁע, and נָשַׁע (Sept. תַּלַע), from נָשַׁע, to "search," "explore," a searchor or watcher; and hence the notion of a watch-tower. In Isa. xxxii, 14 the tower of Ophel is probably meant (Neh. iii, 28). (2) נָשַׁע, and נָשַׁע or נָשַׁע (פִּסְפָּר, turris), from נָשַׁע, to "become great," a lofty tower; used sometimes as a proper noun. See MIGDOL. 3. נָשַׁע (פִּשְׁפָּר; muni
tio), a strong fortification; only once "tower" (Hab. ii, 1). See EGYPT. 4. םָג (אֹלֶקֶד, do
nus), only in 2 Kings v, 24. See OPHEL. 5. נָשַׁע, usually "corner," twice only "tower" (Zeph. i, 16; iii, 6; יָהוּד, angulus). 6. נָשַׁע (סָסָסָס; specula), "watch-tower." See MIZPAH. 7. הָבָר (קִשְׁרָמָא; robar), "a refuge," only in poetry. See MISHAP. 8. פִּרְסָך, the general term in the New Test. See FOR
tification.

Isolated watch-towers or fortified posts in frontier or exposed situations are mentioned in Scripture, as the tower of Edar, etc. (Gen. xxxvi, 21; Mic. iv, 8; Isa. xxii, 3, 5, 8, 11; Hab. ii, 1; Jer. vi, 27; Cant. vii, 4); the tower of Lebanon, perhaps one of David's "garrisons" (nêshbî, 2 Sam. vii, 6; Räumer, Palest., p. 29). Such towers or outposts for the defence of wells, and the protection of flocks and of commerce, were built by Uzziah in the pasture-grounds (midbar) [see DESERT], and

by his son Jostiam in the forests (choroethim) of Judah (2 Chron. xxxvi, 10; xxxvii, 4). Remains of such fortifications may still be seen, which, though not perhaps of their original antiquity, yet very probably have succeeded to more ancient structures built in the same places for like purposes (Robinson, Bibl. Res. ii, 81, 86, 180; Roberts, Sketches, p. 98). Besides these military structures, we read in Scripture of towers built in vineyards as an almost necessary appendage to them (Isa. v, 2; Matt. xxii, 33; Mark xii, 1). Such towers are still in use in Palestine in vineyards, especially near Hebron, and are used as lodges for the keepers of the vineyards. During the vintage they are filled with the persons employed in the work of gathering the grapes (Robinson, Bibl. Res. i, 218; ii, 81; Martineau, East. Life, p. 434; De Saulcy, Traveler, i, 456; Hackett, Illustr. of Scripture, p. 163, 171). See LOOM.

Mural towers were in all antiquity built as part of the fortifications of towns, especially at the corners of the walls and the gates (2 Chron. xiv, 7; xxvi, 9, 15; xxxii, 5; 1 Mach. v, 55; xiii, 38, 43, etc.; comp. Isa. xxiii, 8; xxx, 26; Ezek. xxvi, 4, 9; see Pliny, H. N. vii, 22, 1). Also in the interior of cities towers served as citadels (Judg. ix, 46 sq.). Jerusalem (q. v.) was especially provided with towers of this description, many of which had special names (Neh. iii, 11, 12; 38; Jer. xxxi, 8, etc.). Those on the walls and at the gates were used for sentries (2 Kings ix, 17; xvii, 9; xxvi, 8; Ezek. xxvii, 11). The Temple (q. v.) was likewise supplied with numerous towers. The "tower in Siloam" (q. v.) (Luke xix, 4) was probably some mural defence near that fountain. See GATE; WALL.

Ancient Assyrians Attacking Mural Towers with Turreted Engines.

Among many ancient nations, especially the Babylonians, towers were employed in the siege of cities, as appears from the prophet's account of the divination used by the king of Babylon to determine his line of march into the kingdom of Judah: "At his right hand was the divination for Jeremiah, to open the mouth in the slaughter, to lift up the voice with shouting, to appoint battering-rams against the gate, and to build a tower (Ezek. xxii, 22). See Battler
ning-Ram. In the Maccabean age, towers borne on elephants were used to carry warriors in battle (1 Mach. vi, 37; comp. Pliny, H. N. xi, 58; structure elephants-ruin hurmeri?). In Roman sieges the tower (vina, from the vine-branches with which it was often thatched) ran on wheels along an artificial causeway (agger), was proverbial (Luke xxix, 45). See MOUNT.

In the figurative language of Scripture, towers are
used for defenders and protectors, whether by counsel or strength, in peace or in war (Psa. xlviii, 10; Is., 3). See WAIL.

TOWER IN CHRISTIAN ARCHITECTURE. Any attempt to particularize the various kinds of towers which have been adopted by different nations in former ages would far exceed the scope of this work; the following observations, therefore, are chiefly confined to those which were in use in the Middle Ages in England and the adjacent parts of Europe, and more especially to the towers of churches. Among the Greeks and Romans, towers were employed of various forms and for different purposes, but by no means so abundantly as in after-ages, and in general they appear not to have been so lofty as those of medieval date. The tower of Andronicus Cyrrhestes, called also the Temple of the Winds, at Athens, is octagonal; at Autun, in France, a considerable part of a large and lofty square tower of late Roman work exists. The tower for the use of bells is supposed not to have been introduced till the 8th century, and hence the term campanile, applied to the Italian towers. See SPIRE.

In the Middle Ages the towers of castles were numerous and of striking character. During the prevalence of the Norman style the keep often consisted of a large rectangular tower, with others of smaller size attached to the angles, and these last mentioned generally rose higher than the main building, as at the White Tower of London and the castles of Rochester and Guildford. The keep tower of Conisburgh Castle, in Yorkshire, which is of the latest Norman work, is circular, with large buttresses on the outside; in other examples, especially in those of later date, the keep towers are of various forms, often irregular, apparently so constructed as being considered best adapted to the peculiarities of the sites, and the systems of defence in use at the periods of their erection. Besides these main towers, many others, which, though of less magnitude than the keep, were often of very considerable size, were employed in different parts of fortifications, especially at the entrances, where the gateways were generally flanked by towers projecting considerably before the main walls; these were pierced with loop-holes and ocula, and were commonly surmounted with machicolations. See TRACERY.

Church-towers of all dates are greatly diversified, not only in their details, but also in general proportions and form; they are occasionally detached from the building to which they belong, but are usually annexed to it, and are sometimes placed in almost every possible situation except about the east end of the chancel. In all cases their use was for hanging the bells, and hence the name belfr. Large churches have often several towers, especially when the plan is cruciform; and in this case there are generally two at the west end, and one, of larger dimensions, at the intersection of the transepts, as at the cathedrals of Canterbury, York, and Lincoln. Ordinary parish churches have usually but one tower. In some examples, where there is an entrance to the church through the lower story of a tower, it is made to form a porch with an open archway on one side, as at Cranbrook, and many other churches in Kent; or on three sides, as at Newnham, Northamptonshire. In towns, towers are sometimes placed over public thoroughfares, and in such situations are built on open archways. It is not unusual to find church-towers which batter, or diminish upward: these are generally of Norman or Early English date; but in some districts, as in Northamptonshire, this mode of construction was continued to a later period.

The towers belonging to the style described in the article SAXON ARCHITECTURE (q.v.) are square and massive, not of lofty proportions, and apparently never were provided with stone staircases. Some of them are considerately ornamented, as at the churches of Barnack and Earl's Barton, Northamptonshire; and others are very plain, as at St. Michael's, Oxford, and St. Benet's, Cambridge: the tower of the Church of Sompting, Sussex, which belongs to this style, terminates with a gable on each of the four sides, and is surmounted by a wooden spire; but whether or not this was the original form may be doubted.

In some parts of Great Britain circular church-towers are to be found. These have sometimes been assumed to be of very high antiquity, but the character of their architecture shows that they commonly belong to the Norman and Early English styles. They are built of rough flints, generally of coarse workmanship, with very little ornament of any kind, and that little, for the most part, about the upper story: one of the best examples is that of Little Saxham Church, Suffolk. Plain round towers in the counties of Norfolk and Suffolk are of all periods: the only materials readily accessible being flints, and these not admitting of square corners, the towers were built round, and this practice is continued even to the present day.

Norman towers are generally square, and of rather low proportions, some being much more than their own breadth above the roof of the church, and sometimes not so much. They generally have broad flat buttresses at the angles, and are usually provided with a stone staircase carried up in a projecting turn, corresponding to one of the angles; this is very commonly rectangu-
lar externally, but the form is not unfrequently changed towards the top, especially if the turret is carried up the whole height of the tower: occasionally polygonal Norman towers are to be met with, as at Ely Cathedra-
l. In Normandy a few examples of village church-
towers of this style exist, which are capped with py-
ramidal stone roofs, like low square spires, but in gen-
eral the roofs and parapets are additions of later date.
Many Norman towers are very considerably ornamented,
the upper stories being usually the richest, while others
are very plain. Good specimens remain at St. Alban's
Abbey; the cathedrals of Norwich, Exeter, and Winches-
ter; Tewkesbury Abbey; Southwell Minster; the church-
es of St. Peter, Northampton; St. Clement, Sandwich;
Ifly, Oxfordshire; Stewkley, Buckinghamshire, etc.

In Early English towers much greater variety of de-
sign and proportion is found than in those of prior date.
The prevailing plan is square, but some examples are
octagonal, and occasionally the upper part of a square
tower is changed to an octagon. Projecting stair-tur-
rets are almost universal, though they are frequently so
much masked by buttresses as to be in great measure
concealed. Many towers in this style are of lofty pro-
portions, while others are low and massive. The best ex-
amples are generally more or less ornamented, and some

In the Decorated and Perpendicular styles towers
differ very considerably both in proportions and amount
of enrichment, and considerable diversity of outline and
effect is produced by varying the arrangement and form
of the subordinate parts, such as windows, buttresses,
pinnacles, etc.; but in general composition they do not dif-
fer very materially from Early English towers. Many are
very lofty, and others of low propor-
tions; some highly enriched, and some
perfectly plain; a large, and probably
the greater, number are crowned with
parapets, usually with a pinnacle at each
corner, and sometimes with one or two oth-
er, commonly of rather smaller size,
on each of the sides; many, also, terminate
with spires, or, espe-
cially in the Perpen-
dicular style, with
lanterns. Decorated
towers remain at Lin-
coln Cathedral; the
churches of Hecking-
ton and Caythorpe,
Lincolnshire; New-
ark, Nottingham-
shire; Finedon,
Northamptonshire; St. Mary's, Oxford, etc. Perpen-
dicular towers are very numerous in all parts of the
kingdom, especially in Somersetshire. Among such as
are best deserving of attention may be mentioned those
at Canterbury, York, and Gloucester cathedrals; and the
churches at Boston and Louth, Lincolnshire; Kettering,
Northamptonshire; Cirencester, Gloucestershire; Great
Malvern, Worcestershire; and that at St. Mary Magdalen College, Ox-
ford.

Towers, Joseph,
LL.D., a Dissenting
minister, was born in
Southwark, London, in
1737, and was appren-
ticed to Mr. Good-
by, printer, at Sher-
born, Dorsetshire, in
1754. He returned to
London in 1764, where
he worked at his trade,
and afterwards became
a book-seller. He was
ordained a preacher in
1774, and was chosen
pastor of a congregation at Highgate. In 1778 he
became forenoon preach-
er at a chapel in New-
ington Green. He died
in 1799. Mr. Towers was
an Arian, though closely
connected with the Unitarians. He wrote, Review of
the Genuine Doctrines of Christianity (Lond. 1768, 8vo);
1778, 8vo);—British Biography (1766-72, 7 vols. 8vo;
1773-80, 10 vols. 8vo [vols. i-vii by Towers; viii-x by a
clergyman]);—Vindication of the Political Opinions of
Locke (1775);—Memoirs of Frederick the Great
(1788, 2 vols. 8vo; 1795, 2 vols. 8vo).
TOWERS, GABRIEL D.D., a learned English divine, was a native of Middlesex, and became a commisser of Queen's College, Oxford, in 1632, where he was elected fellow of All-Souls', and entered holy orders at about the same time. He was first preferred to the rectory of Welwyn, in Hertfordshire, and took his degree of D.D. in 1677. An April, 1692, he was induced into the living of St. Andrew Undershaft, London, to which he was presented by King William III. He died in October, 1697, and was interred at Welwyn. His works are, A Brief Account of Some Expressions in St. Athanasius's Creed (Oxford, 1663, 4to);—An Explanation of the Decalogue, or Ten Commandments, and an Explanation of the Catechism of the Church of England (London, 1676-78, 4 pts. fol.);—Of the Sacraments in General, etc. (ibid. 1686, 8vo);—Of the Sacrament of Baptism in Particular among the Heathen and Jews, etc. (1678, 8vo). See Chalmers, Biog. Dict. s. v.; Allibone, Dict. of Brit. and Amer. Authors, s. v.; Darling, Cyclop. Bibl. s. v.

Towgood, Michael, an English Dissenting minister, was born at Axminster in 1708, became pastor at Moreton-Hampstead, Devon, in 1726, and at Exeter, where he died in 1792. He wrote, Dissenter's Answer (London, 1739, 8vo);—Dissenting Gentleman's Answer to Rev. Mr. White (1746-48, 6th ed. 3 vols. 8vo);—Essay on Charles I (1748; new ed. 1811, 12mo);—Discussions on Christian Baptism (1759; new ed. with notes, etc., 1815, 12mo);—Towgood, Dict. of Brit. and Amer. Authors, s. v.; Manning, Life and Writings of Towgood (1792); Skeats, Hist. of Free Churches of England, p. 419 sq.

Towgood, Richard, an English prelate, was made dean of Bristol in 1667, and died in 1668. He published a Sermon on Acts viii, 8 (London, 1676). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Town (not carefully distinguished in the A.V. from "city," which latter is the usual rendering of "τοῦτον," occasionally "town:" this latter is also the translation, at times, of "τούτων," prop. a wall, as usually rendered, "τας πόλις," a village, as generally rendered; and so εἰς γόμας in the New Test. [more distinctly κυριοτοιοίςς Mark i, 38]; "a daughter," sometimes fig. employed; "δηλον," only in the phrase ἡθον-χαίρ [q. v.]; "unawled towns," means rather open country. The first mention of such collective residence occurs early in the antediluvian history (Gen. iv, 17), but we are not to think, in the case of such primitive "cities," of anything more than a mere hamlet, the nucleus, perhaps, of an eventual metropolis. Towns, however, appear in the history of the patriarchs as strong central points of the agricultural tribes in nomadic regions. They were therefore enclosed with walls, and thus each town was originally a fortress (see Numb. xxxii, 17; hence the term "κόλος, literally a fort, applied to ἄγομας Tyre, Josh. xix, 29; 2 Sam. xxiv, 7,) such as the cities which the Israelites captured and demolished under Joshua. For this purpose eminences and hills (comp. Matt. v, 14) were naturally selected as more commanding and secure sites (see König, De Montibus, Urbium Antiquitas, Sedibus [Annenberg, 1795]), a precaution which Palestine, with its varied surface and exposed situation, especially supplied. Among the larger cities (see John vi, 5) there now little, however, of the exact architectural style of its cities, with the exception of Jerusalem. In modern times Oriental towns are built very wide-spread, and often include extensive open spaces, gardens, etc. (see Theronot, ii, 114; Beckingham, p. 35, 353; Tavernier, i, 169; Rosenmuller, Morgen, iv, 336 sq.). e.g. Damascus (Kümpfer estimates less than as more of a day's ride in, Am. Eccl. p. 163). This specialty applies to the larger cities of Asia, such as Babylon and Nineveh, which encircled an area of many miles (see Ritter, Erdk. vii, 903). The gates of the cities were closed (Josh. iii, 5; 1 Judg. xvi, 7; 1 Sam. xi, 7; 1 Kings iv, 12; Ps. xxviii, 13; etc.) with folding-doors, "θυραίον," etc., with brazen or iron bars ("σπάνος," etc.) and were surrounded by turrets (2 Sam. xvii, 32), which were guarded by sentries (ver. 24 sq.). In these the governors and judges held their sittings, and a more or less extensive square ("τεριτας") which, however, does not always mean an open place, but sometimes a wide [παράκες] street, Gen. xix, 2; Judg. xix, 15, 17, 20 adjoined [εξορα κα., 9; Neh. viii, 1, 8, 16; 2 Sam. xxii, 13; 1 Chron. xxxiii, 6; Job xix, 27; Cant. iii, 5; etc.] where the market and public incuba- tions were held (Gen. xlix, 1; comp. ἀγορας, Josephus, Life, 22). The streets (Josephus, [Acts xvii, 17; Isa. iii, 25; Jer. xxxix, 21, etc.; [πορευματος, Cant. iii, 2; Eccles. xii, 4, etc.; οἰκουμενα, Matt. vi, 5; xii, 19; Acts x, 15, etc.) were not so narrow (yet see κεραυνος applied to those of Jerusalem in Josephus, War, vi, 8, 6) as in modern Oriental towns (Maur- drell, p. 172; Olearius, p. 291; Russegger, i, 867; Robinson, i, 38; iii, 697), where, as in Acre (Mariet, p. 246), scarcely two laden camels, or in Damascus (Schubert, xvi, 29) almost a single person can pass (Josephus, War, vii, 5, 151). The streets of Hebrew antiquity (at least in the large towns) had names, which were sometimes taken from those of the kind of trade carried on therein (Jer. xxxvii, 22; comp. ἀγορας, Josephus, War, vi, 8, 1, like modern bazaars; Russell, Διαφες, i, 39 sq.; Harmer, i, 245 sq.; Arrievx, i, 56; Ker Porter, i, 406, 407). They were occasionally paved in the later period (Josephus, Ant. xv, 9, 6; xvi, 5, 3; xx, 9, 7); in earlier times (comp. Iaide, Orig. xv, 16) we find notice of paving in the court of the Temple (2 Kings xvi, 17). From 1 Kings xx, 34 it would seem that kings sometimes constructed for royal impress (comp. Am. Joseph. ii, 301 sq.). Aqueducts (πανδοκας) were built in Jeru- salem before the exile (2 Kings xx, 20; Isa. vii, 3; xxii, 9; for Pilate's undertaking see Josephus, Ant. xviii, 3, 2; comp. War, ii, 17, 9; Robinson, ii, 166 sq.) other cities were supplied by springs (see Josephus, Ant. xviii, 13, 5) and cisterns, the latter, at times, of very ex- pensive construction (War, vii, 8, 3). See War. As to the varied condition of cities in pre-exilic times we have only disconected notices. The oldest one of the land were destroyed by a natural or miraculous combustion in Abraham's time (Gen. xix, 24 sq.). During the conquest by the Israelites many were destroyed (Josh. xi, 24) and those which were in part rebuilt (Judg. i, 26; 1 Kings xvi, 24) and embellished (Judg. xv, 28; 2 Kings xii, 25; xv, 17; xxvii, 20; comp. 2 Chron. xvii, 5). The Chaldean invasion made (especially in the case of Jerusalem) many changes, and during the exile most of the cities were deserted. The Syrian wars under the Maccabees wasted or destroyed several (see 1 Macc. v, 44, 65; ix, 62). Others, however, especially Jerusalem, were fortified, and castles and citadels were built (ver. 50; xii, 38; xiii, 33; xv, 7, 39, 40; Josephus, War, iv, 7, 2; Ant. xiii, 16, 5). During the Roman period cities especially multi- plied, chiefly under the patronage of the Herodian family; but many of them were largely occupied by Gentiles, with their heathenish theatres, gymnasium, stadia, and temples (ibid. xv, 5, 2; xvii, 2, 1 and 3, xx, 9, 4, etc.). Fortifications and towns also increased (ibid. xvi, 9, 4; War, vii, 6, 3). The post-exilic topography of Palestine is necessarily a single table line, which is mention in the Old Test.; some of them, however, may have existed earlier. The district of Galilee was especially rich in towns and villages, which amounted in all to two hundred and four (Life, 45). See Palestine.

The names of Palestinian cities were almost invariably of a relatively significant, as appears from the present situation and configuration of the land (e.g. Ains, fountain; Beth-
TOWN

lehem, bread-producing; Gibeon, elevation; Mizpah, look-out; Ramah, height; many of them, accordingly, used with the article). Numbers of these are compounded, e.g. with דִּשְׁנָה (house; see Rödiger, De Arab. Libror. Hist. Interpret. p. 21, דִּשְׁנָה or דִּשְׁנָא (city), נִיסָּה (court), נִיסָּה (valley), נַבָּה (meadow), נַבָּה (well), נַבָּה (spring), and in the post-exilian period with נַבָּה (village); those with בּּלֶּה (Baal) appear to have been of Canaanitish origin (see Panofski, Ueb. d. Einfluss der Gottheiten auf Ortsnamen [Berl. 1842]). Some are of dual (Khirbatim, Jerusalem, Dothan) or plural form (Khiri, Ichabod, Gehinn; in one case (Beth-horon) we have the distinction of upper and lower villages. Several places of the same name are distinguished by the name of the tribe added (see Matt. ii, 1, 5; xxii, 11; Luke iv, 31). In Roman times, especially under the Herods, many old names were displaced by others of Greek or Latin origin (e.g. Diospolis, Neapolis, Sebastia, Caesarea, Tiberias; later Ελλατικαπολιτονα), some of which have still survived (comp. Ammian. Mar. xiv, 8), while the most of them have again yielded to the older appellation (comp. Josephus, War i, 4, 2; Ant. xiii, 13, 3; see Reland, Palest. p. 567), or to an imitation in Arabic of a similar sound (Balad, modern of the Wanderer, p. 31). See Names.

A distinction between walled towns and open villages is not uniformly maintained in the Old Test., although in the later period they began to be distinguished (see דְּרוֹם, Ezek. xxxviii, 11; דְּרוֹם, Neh. xi, 25; comp. דְּרוֹם, Num. xxv, 25, 32; Josh. xv, 45; Judg. xi, 26; Neh. vi, 25; דְּרוֹם, 2 Sam. xx, 19; see Gesenius, Monum. Pharn., ii, 263; a metropolis or province is called דְּרוֹם in the Talmud, Maas. Shenii, iii, 4, etc.). The New Test., however, makes such distinctions (Mark i, 38; comp. Matt. x, 11; Mark vi, 56 [viii, 27]; Luke viii, 13, 22; Acts viii, 22; εξωθησα, e.g. Bethphage (Matt. xxii, 22), Bethany (John xi, 1), Emmaus (Luke xxiv, 13), Bethlehem (John vii, 42); but πόλις, e.g. Nazareth, Caerupnea, Nain; but these terms are used loosely, and the compound κωμωπολίς even occurs. So, likewise, Josephus uses πόλις and κωμάς almost interchangeably (see Life, 45; Ant. xxi, 6, 2), and he occasionally employs the diminutive πολυκώμας (Ant. xiv, 2, 1). In general, however, κωμάς (village) chiefly denotes the places whose name is compounded with בּּלֶּה (Gesenius, Theaur. ii, comp. 707). The Talmudists (but comp.Megillah, i, 8; Erubin, v, 6) distinguish places thus: דְּרוֹם, cities with defences; דְּרוֹם, towns without fortifications; דְּרוֹם, villages (Lightfoot, Hor. Hebr. p. 599 sq.).

Reland gave the first extensive list of the localities of Palestine (in his Palestina), which might be greatly enlarged from the Talmud (see Baba Bachatii, ii and iii; Baba Met支柱, i, 5). See TOPOGRAPHICAL TERMS.

On the municipal government of the pre-exilian Palestine no definite information remains; there are judges (סנה) and overseers (השׂנָה) both named as officers (Deut. xvi, 18), but the latter title is not clear; and elsewhere the elders appear as civil authorities. In post-exilian times the magistrates of Palestinian cities are called councillors (בּוֹטֹל, Josephus, Life, 12, 18, 54, 61, 68), at whose head, as it would seem, stands a ruler (דִּשְׁנָה, ibid. 27; War, ii, 21, 3). But from these are to be distinguished the Roman magistrates in multum, who had their seat in certain towns, and probably had civil jurisdiction over a particular district (Life, 9, 11, 17; Ant. xiii, 7, 4). On the civil law in cities see the Mishna (Shankhed, i, 1 sq.). See GOVERNMENT.

The gates of cities were guarded during the day by sentinels, who looked out from the turret on the walls into the distance (2 Sam. xviii, 24 sq.; 2 Kings ix, 17 sq.; comp. Ezek. xxvii, 11), and either with the voice or with a horn gave the news (Jer. vi, 17; Ezek. iii, 6). Night patrols are also mentioned (Cant. iii, 8). Of lighting the streets, however, there is no trace, as in western towns (Becker, Gallus, i, 333 sq.). See WATCH.

The mile-stones (still extant, Roman 80 B.C.) set up along the roads to indicate the distance of one town from another belong to Roman times (see Ideler, in the Schrift. d. Berl. Akad. 1812, hist. class. p. 134 sq.). On this point, and on the geographical position of towns, there are only incidental notices in the canonical books (see Gen. xiii, 8; Judg. xxii, 19, etc.), and clearer indications appear in the books of Maccabees, and particularly in Josephus (see Life, 12, 24, 51, etc., collated by Reland, Paellst. ii, c. 6; comp. Mishna, Maas. Shenii, v, 2); but it is not till the time of Eusebius and his Latin editor, Jerome (in his Onomasticon), that we get definitive data on these points; while the later itineraries (namely, the Itinerar. Antonini [not the emperor of that name] and the Itin. Hierosol. [both edited by Wesseling, Amst. 1738, 4to]) and Abufleda (Tabula Syrina) give full and exact details on the subject, which, however, have to be supplemented and corrected by modern comparison and measurements. See Names.

Town-clerk (γραμματεύς, a scribe, as elsewhere often rendered) is the title ascribed in the A. V. to the magistrate at Ephesus who appeased the mob in the theatre at the time of the tumult excited by Demetrius and his fellow-craftsmen (Acts xix, 35). The other primary English term translated "scribula" except those from the Vulg. (Wycliffe, the Rheims), which render "scribe." A digest of Böckh's views, in his Staatswissenschaft, respecting the functions of this officer at Athens (there were three grades of the order there), will be found in Smith's Dict. of Class. Ant. e. v. "Grammatica." Thanasiou, in "Nea Ephesia," at Ephesus, was, no doubt, a more important person in that city than any of the public officers designated by that term in Greece (see Creswell, Dissertations, iv, 152). The title is preserved on various ancient coins (Wetstein, Nors. Test. ii, 886; Ackermann, Numismat. Illustrationes, p. 55), which fully illustrate the rank and dignity of the office. It would appear that what may have been the original service of this class of men, viz. to record the laws and decrees of the state, and to read them in public, embraced at length, especially under the ascendancy of the Romans, to the discharge of a much wider sphere of duty, so as to make them, in some instances, in effect the heads or chiefs of the municipal government and even high-priests (Deyling, Observ. iii, 383; Krebs, Decreta Rom. p. 802). They were authorized to preside over the popular assemblies and submit votes to them, and are mentioned on marble's as acting in that capacity. In cases where they were associated with a superior magistrate, they succeeded to his place and discharged his functions when the latter was absent or had died. "On the subjugation of Asia by the Romans," says Baumstark (Paulus, Enecylog. iii, 949), "γραμματεύς were appointed there in the character of governors of single cities and districts, who even placed their names on the coins of their cities, caused the year to be named from them, and sometimes were allowed to assume the dignity, or at least the name, of ἀρχηγός." See Schwartz, Dissertat. de θρακάριοι, Magistratu.

TOWNSEND 509

TRACHONITIS

Tour in Italy in 1850, with an Account of an Interview with the Pope at the Vatican (1850, 8vo). See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Darling, Cyclop. Bibl. Eng. v.

Townsend, John, an English Dissenting minister, was born March 24, 1757, in the parish of Whitechapel, County of Middlesex. He was educated for five years at Christ's Hospital, and was then apprenticed to his father. Having received some religious impressions from the preaching of the Rev. Henry Peckwell, he offered himself as a member in the Tabernacle, and commenced public teaching in some of the villages around London, but soon received an invitation to supply the Independent meeting at Kingston, where he was ordained, June 1, 1781. After three years Mr. Townsend quitted Kingston and settled at Bermondsey, where he commenced his official duties at midsummer, 1784, and in which situation he continued to labor in his Master's vineyard till the period of his death, Feb. 7, 1826.

Mr. Townsend was one of the founders of the London Missionary Society. He also aided in the formation of the Tract Society, the British and Foreign Bible Society, the London Female Penitentiary, the Irish Evangelical, the Society for the Conversion of the Jews, the Congregational School (raised entirely by his influence), the Fund for the Relief of Aged Ministers, and especially the Asylum for the Deaf and Dumb, which, if we are not mistaken, he was instrumental in establishing by his exertions. His sober, solid, judicious hints and observations were always listened to with profound attention, and his advice, which was never officially offered, was always acceptable. As a preacher he was distinguished by good sense and sound doctrine, commanding himself to the conscience and the heart by a clear and judicious exhibition of divine truth. His principal works are, Three Sermons (1797, 8vo) — Nine Discourses on Prayer (2d ed. Lond. 1799, 8vo) — Hints on Sunday-schools and Itinerant Preaching (1801, 8vo) — single Sermons (1788-1806). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Townsend, Joseph, an English clergyman, was born at Much Lesw, in Essex, in 1695; was educated at Oxford, where he took his degree of A.M. in 1739; was ordained priest in 1742; became vicar of Hatfield Peverel in 1746; senior proctor of the university, and rector of Bithfield, Staffordshire, in 1749; and rector of Malpas in 1751, where the rest of his life was spent. In 1791 he was made archdeacon of Richmond, and in 1798 was offered the professorship of divinity at Oxford, which he declined. He died April 15, 1792. His most important works are his Discourses on the Four Gospels, chiefly with regard to the Peculiar Design of Each, and the Order and Places in which they were Written, published in 1778, which has passed through three editions; and his Discourse on the Evangelical History from the Internment to the Resurrection of our Lord (1792). His collected works were issued in 2 vols. 8vo (Lond. 1810), edited by Ralph Churton, A.M. See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Ritto, Cyclop. s. v.; Chalmers, Biog. Dict. s. v.

Toller, Henry, a learned Puritan divine, was born near North Tawton, Devonshire, in 1629; was educated at Exeter College, Oxford, and was chosen fellow in 1628. Having taken orders, he was engaged in moderating, reading to novices, and lecturing in the chapel. He was adverse to overturning the establishment of the Church, and in 1643 declined to be one of the assembly of divines. He remained at Oxford, where he preached at Christ Church before the king, and at St. Mary's before the Parliament. He was appointed in 1646 to take his degree of D.D., but declined. Dr. Hakewell, the rector, having left the college, the government devolved on Mr. Toller, as sub-rector, who manfully opposed the illegality of the parliamentary visitation, and claimed the rights and privileges of the college. In March, 1647-48, he was cited before the parliamentary visitors to answer the charge of "continuing the common prayer in the college after the ordinance for the directory (the new form) came in force; also for having sent for and admonished one of the students for refusing to attend the chapel prayers on that account." He replied, in effect, "that these matters referred to the discipline of the college, and that they could be submitted to no other visitors than those mentioned in the statutes," meaning the bishop of Exeter. The visitors ordered him to be ejected. Mr. Toller, being a member of the session of the college for some time, and they expelled him from the college and university in June, 1648. He refused to surrender the keys of the college, there being no rector to whom he could legally give them, as a consequence he was imprisoned. After a while he was allowed to remain in his rooms in the college, and to enjoy the profits of a travelling fellowship for three years. On the strength of this he went to Holland and became minister to the English merchants at Rotterdam. He died there Sept. 11, 1650. Mr. Toller published a few occasionals sermons, Directions for Religious Life, etc. (1650, 8vo) — Dicta et Facta Christi et quinque Evangelistarum collecta (1653, 8vo).

Trachonitis (τραχωνίτης) is mentioned in the Scriptures only in describing the political divisions of Palestine at the time of John the Baptist's first public appearance: "Philip was then tetrarch of Ituraea and the region (περιοχή) of Trachonitis."

Although Trachonitis is a distinct and well-defined province, yet it appears that in this passage the phrase "region of Trachonitis" is used in a wider sense, and included two or three other adjoining provinces. As considerable misapprehension has existed among geographers regarding Trachonitis, and as the boundaries of it have not at first clearly ascertained by the researches of recent writers, it may be well in this place
to give a brief résumé of the ancient notices of the province, and then to show how they can be applied in setting aside modern errors and establishing correct views.

Josephus states that Us, the son of Aram, founded Trachonitis and Damascus, which "lay between Palestine and Coele-Syria" (Ant. i, 6, 4). His next reference to it is when it was held by Zenodorus, the bandit chief. Then its inhabitants made frequent raids, as their successors do still, upon the territories of Damascus (Ant. xv, 10, 1). Augustus took it from Zenodorus, and gave it to Herod the Great, on condition that he should repress the robbers (Ant. xvi, 9, 1). Herod bequeathed it to his son Philip, and his will was confirmed by Cæsar (War, ii, 6, 8). This is the Philip referred to in I Macc. xvi, 23. After a period it passed into the hands of Herod Agrippa (War, iii, 3, 5). After the conquest of this part of Syria by Cornelius Palma, in the beginning of the 2d century, we hear no more of Trachonitis.

From various incidental remarks and descriptions in Josephus's writings, the position of Trachonitis in relation to the other Transjordanian provinces may be ascertained. It lay on the east of Gaulanitis, while it bordered on both Auranitis and Batanæa (War, iv, 1, 1, 20, 4). It extended farther north than Gaulonitis, reaching to the territory of Damascus (Ant. xv, 10, 3, and 10, 1; War, iii, 10, 7). Ptolemy locates the Trachonitic Arabs along the base of Mount Abadamas, (111' 15") and he includes this mountain in the province of Batanæa, of which Sacaæa was a chief town (Geog. v, 15). Strabo states that there were two Trachons (μυαγωναί), and he groups Damascus and Trachon together, and states that the latter country is rugged and wild, and the people daring and warlike. (Geog. iii, 14, 2, speaking of Kenath, calls it a city of Trachonitis near Bozrah (Ονοματ. s. v. "Canath"); and the writers of the Talmud extend Trachon as far as Bozrah (Lightfoot, Opp. ii, 478; comp. Jerome, Ονοματ. s. v. "Ituraeæ"; Reland, Palast, p. 109 sq.).

From these statements, compared with the results of modern research, the exact position and boundaries of this ancient province can be determined. It extended from the southern confines of Damascus, near the bank of the River Awaj (Pharpar), on the north, to Busrah (Busra and Bozrah), on the south. Bozrah was the eastern chief city, and consequently the province was as well known along the southern end of Trachon. The province of Gaulanitis (now Jaulan) was its western boundary. Batanæa has been identified with Ard el-Bathanyeh, which embraces the whole ridge of Jebel Haurân, at whose western base lie the splendid ruins of Kenath, one of the most important cities of this province (Josh. xii, 17). A third town was said to be called "Canath" ("Kenath"). Consequently the ridge of Jebel Haurân formed the eastern boundary of Trachon, which extended southward to Busrah in the plain, near the south-western extremity of the range (Porter, Damascus ii, 299 sq.; also in Journal of Soc. Lit. for July, 1864). The region thus marked out embraces the modern district of the Lejah, which may be considered the nucleus of Trachonitis; also the smooth plain extending from its northern border to the ranges of Khîyârah and Mânia. The rocky strip of land running along the western base of Jebel Haurân, and separating the mountainous region from the smooth expanses of Auranitis, was likewise included in Trachonitis. This may explain Strabo's two Trachons. In the ruins of Musmeih, on the northern edge of Lejah, Burchhardt discovered a Greek inscription which proves that that city was Pheno, the ancient capital of ancient Trachon (Travels in Syria, p. 117; see also Preface, p. xi).

At first sight it might appear as if Trachon, or Trachonitis (Τραχωνίτις και περιβάλλον τόπος), were only a Greek name applied to one of the subdivisions of the ancient kingdom of Bashan; yet there is evidence to show that it was founded by the Jews, and was of more ancient origin, descriptive of the physical nature of the region. Τραχωνίτις signifies rough and rugged; and Τραχωνίτις is "a rugged region" (τραχος και περιβάλλον τόπος), and peculiarly applicable to the district under notice. The Hebrew equivalent is Αργοδ (Αργοδ), "a heap of stones," from אֶרֶץ (אֶרֶץ), which was the ancient name of an important part of Og's kingdom in Bashan. The identity of Trachon and Argoed cannot now be questioned. It was the capital of the Argoed, or the name of the Jewish place mentioned in the Bible as the site of the town, and the name of the place in the Talmud. The ancient name is still preserved in the ruins, which are called Αργοδ by the inhabitants. This is the place mentioned by the Talmud as the resting place of the prophet Nahum (Jer. xxx, 2). The city is said by Josephus to be called in Hebrew Θαεμία (Θαεμία) or Σαμία (Σαμία), which is the modern Samaa, a village about three miles south of the town. The ruins are built on a hill, on the left bank of the Jabbok, and extend for about a mile and a half. The ancient city was situated on the eminence, and this is the most elevated part of the town. The site is not at all a difficult one, but it is a most important one, commanding a view of the whole plain and the surrounding country. The town is situated on a hill, and is surrounded by a wall of stone, which is still standing in many places. The ground above is almost a plain, but it is covered with
rugged rocks, and is difficult of access, except when a guide points out the paths. These paths do not run in a straight line, but have many windings and turns" (4 M. xvi, 10, 1).

The character of the inhabitants remains unchanged as the features of their country. They are wild, lawless robbers, and they afford a ready asylum to murderers, rebels, and outlaws from every part of Syria. It seems to have been so in Old-Test. times; for when Absalom murdered his brother, he fled to his mother's kindred in Geshur (a part of Trachon), "and was there three years" (2 Sam. xvi, 37, 38). See GESHUR.

It is a remarkable fact that the great cities of Argober, famed at the time of the Exodus for their strength, exist still. The houses in many of them are perfect. The massive city walls are standing; and the streets, though long silent and deserted, are in some places complete as those of a modern town. The city gates, and the doors and roofs of the houses, are all of stone, bearing the marks of the most remote antiquity. It is not too much to say that, in an antiquarian point of view, Trachon is one of the most interesting provinces in Palestine (Porter, Bashan's Giant Cities; Burckhardt, Travels in Syria; Graham, in the Journal of R. G. S. vol. xxviii.; and Camb. Essays, 1858; Wetzstein, Reisebericht über Haarran und die Trachonen). Such as desire to compare with the above account the views previously set forth by geographers may consult Lightfoot, loc. cit.; Reland, Palast., p. 108 sq.; Cellarius, Geogr. Ant. ii, 617 sq. See also QANUN.

Tract, a psalm, or portion of a psalm, sung in the Latin mass instead of the Gradual, on fixed days, from Septuagesima to Easter, after the Epistle. At the time at which the Church is commemorating the passion of our Lord, this Tract is slowly chanted in lieu of the joyful Gradual. It is called the Tract, as some ritualistic writers affirm, because it is drawn out in a slow and solemn strain. It is said that the psalm or hymn chanted by one voice was the Tract, and when the singer was interrupted by the choir his part was known as the versicle, and the portions allotted to them were called responsories. See Lee, Gloss. of Liturgy, Terms, s. v.; Walcott, Sac. Archology, s. v.

Tractarianism. See ENGLISH CHURCH; OXFORD TRACTS; PUSEYISM.

Tractator, the name given in the early Church to preachers or expounders of Scripture; his sermon or treatise being called Tractatus. See Bingham, Christ. Antig. bk. xiv; ch. iv, § 1.

Tractatus, the Latin name for a sermon, discourse, etc.

TractITION, a name sometimes given to the circular letters of metropolitans summoning the bishops to a council. These circular letters were a legal summons, which no bishop of the province might disobey under pain of suspension, or some such canonical censure. See Bingham, Christ. Antig. bk. ii, ch. xvi, § 17.

Tracts and Tract Societies. The term tract, although etymologically signifying something drawn out (Lat. tractus), has long been employed in the English language to designate a short or condensed treatise in print. It has primary reference to the form of publication, and is usually applied only to unbound sheets or pamphlets. Thus, a treatise on any topic may be published either in a book or tract form, the tract being much cheaper than the book, but also much more liable to be injured or destroyed. While many political, scientific, and other tracts have been published, yet the vast majority of publications known as tracts are of a religious character. So generally is this true that the word tract used without qualification rarely suggests any other kind of publication. It has a popular appeal. To some extent the idea has been employed by propagandists of error, but far more generally by lovers of truth and by persons willing to make sacrifices for its promotion. Had only miscellaneous tracts been published, or had the publication of tracts on religious subjects only taken place in an accidental or unsystematic manner, there would have been no occasion for this article.

I. Occasion and Character of the Tract Movement.—There has, in fact, arisen a great Christian enterprise having for its object the publication and dissemination of religious tracts. This enterprise, like the Gospel itself and other of its auxiliaries, has from small beginnings grown to vast proportions and commanding influence. Although its history is chiefly limited to the last one hundred years, it has already come to be considered one of the cardinal agencies of Christian propagation, to be ranked with the school of missions, school enterprises, and serving as a powerful auxiliary to both. Although asserting no specific divine appointment, it nevertheless claims to be authorized by inspired analogies. The sacred books both of the Old and the New Testaments were issued and circulated as separate treatises or tomes, and so the tract, in its most approved formal model, may be said to be a bound volume of tracts.

The principle involved is that of giving truth a permanent and available expression in written or printed language, thus enabling it to survive the voice of the missionary and to reach the living without the presence of the man who could never have access. God, from the beginning, appointed language as the medium of communication between himself and man, as well as between man and man. He spoke to our race, not only through the hearing of the ear, but also through the perceptions of the eye, thus consecrating both spoken and written language to the office of religious instruction. In giving a written law, he not only provided for the moral guidance of the generation to whom it was first addressed, but for all subsequent ages, while he also continued to teach and admonish men by the voice and the pen of prophets and holy men. The unit of successive persons, the unit of the spoken language, was to be used in preaching, the chosen disciples of our Lord were inspired to write narratives of the life, miracles, and death of him who was the eternal Word, together with the acts and letters of the apostles embodying the instructions which they had personally received from the Lord himself, and which were thus handed down to those who should come after them. Spoken language has the advantage of instant readiness, wherever there is a tongue to speak and an ear to hear. It can also be varied with circumstances, and, adapted to the special wants and changing perceptions of men, it is addressed in the vernacular language. On the other hand, written language is available at all times and in all places. It can be cheaply multiplied and scattered on the wings of the wind. It also endures from age to age, while living speakers die. Great as was the personal influence of the apostles through the agency of spoken language, the influence of their writings has been infinitely greater. Their voices expired with their natural life, but their written speech was immortal. It survived all persecutions. It became embodied in many languages, and was diffused in every direction. It has come down through the centuries. It has been taken up by the modern printing-press, and having been translated into hundreds of tongues and dialects, is now multiplied more rapidly than ever before for the benefit of the present and succeeding generations. By this adjustment of Providence, the apostles, though dead, yet speak, and will continue to speak to increasing millions while the world endures. And so, in this age where tracts may not only receive their teachings, but become partners and propagators of like precious faith. They may echo the truth which has made them free in their own forms of expression and with new adaptations to the ever-changing states of affairs.

A peculiarity of written language is that its dissemination challenges co-operation from many not called to the office of preaching. Copyists, printers, purchase-
ers, and distributors may in their several spheres cooperate to bring the truth of God by means of it into contact with human hearts. The tract enterprise, in fact, employs and combines for a common purpose many and various persons, who may have produced and started on a career of usefulness, there must first be a writer imbued with the spirit of truth and love, and willing to labor with his pen, in order to express his thoughts in language at once attractive and impressive. Then there must be a pecuniary investment sufficient to carry on the enterprise. The task of publication, although possible to individuals, is best performed by public institutions, like the existing tract societies, which, having a corporate existence, live on through their founders die. Such societies can develop and carry out great systems of effort, which their projectors may only live to initiate. Superadded to the publication of tracts, in order to their extended usefulness, there must be co-operative and systematic agencies for their proper and continuous dissemination among readers. When this complicated machinery of moral and spiritual influence is appropriately organized, the humblest Christian may connect himself with these relations with it and be a helper to its highest success. Henceforth there is a great grand partnership of results, in which those who write, who print, who circulate, and who read may rejoice together.

As an illustration of the endless form of influences which results from a single instance of bringing religious truth in a printed form to the attention of the unconverted, the following facts are condensed from authentic documents. In the latter part of the 18th century, a good man, known as Dr. Sibbes, wrote a little book entitled The Bond of Reed. A copy of this book, sold by a peddler at the door of a lowly cottage in England, was the agency of the Christian awakening of Richard Baxter, who was born in 1615. "The additional reading of a little piece of Mr. Perkins' work On Repentance, borrowed from a servant," says Baxter, in a sketch of his own life, "did further inform me, and once more firm me; and thus, without any means but books, was God pleased to resolve me for himself." Thus brought to the knowledge and experience of the truth, Baxter became one of the most earnest preachers and prolific writers of any age. He died in 1691, having published more than three hundred and ninety-three of his works—The Call to the Unconverted and The Saints' Everlasting Rest—have passed through countless editions both in England and America, and, doubtless, will continue to be widely read in English-speaking countries while time endures. Of the full extent of the influence of the tracts of the present day no adequate estimate, but here and there links in the chain of sequences can be discovered. Philip Doddridge, when young, borrowed the works of Baxter, and in due time became the author of the Rise and Progress of Religion in the Soul, a work which led William Wilberforce to seek for pardon through the Redeemer. Wilberforce's Practical View of Christianity was the instrument employed by the Holy Spirit to lead to repentance and a true faith in Christ Legh Richmond, the writer of The Young Cottager, The Dairyman's Daughter, and various other tracts. Mr. Richmond was a laborious and zealous member of the Religious Tract Society of London. His tracts above named have been translated into many languages, and have been instrumental, under the blessing of God, in the conversion of many precious souls. Only two days before his summons to a better world, he received a letter from another member of the same society, one of the leading men of the Church of England; this letter was addressed to a clergyman, by the perusal of his tract The Dairyman's Daughter. Nearly half a century has since passed away, but the tract has lived on, and, by the help of printers, donors, and distributors, has continued to do its work; while many of those converted through its influence have become active agents in starting agencies of influence, destined to work on with ever-increasing and multiplying power. Volumes might be filled with incidents illustrating the utility and power of tracts as an agency of evangelization and religious influence both in Christian and pagan lands. In fact, judging from the results of the vast number of them, it may be safely said that the work of the Christian tract organizations, no branch of Christian activity has been more uniformly productive of the best results than tract-distribution.

While the tract enterprise may thus be spoken of in its separate character, it should be borne in mind that the success of all depends on the cooperation of all. Just as much as the human element is essential to the success of any scheme of action are in connection with Church work at home and missionary effort abroad; consequently its best fruits will doubtless be found in the great day to have been the joint product of many forms of Christian activity. It may be confidently urged that Christian work in connection with the use of religious tracts is practicable to a greater number of people of every age and circumstance in life than any other generally recognized agency of usefulness. Comparatively few are called to be ministers or missionaries. Many cannot be Sunday-school teachers. But who cannot be the bearer and sender of a tract?—we, indeed, cannot, with a comparatively little sacrifice, circulate many tracts through channels of business, in public thoroughfares, through the mails, and, what is better than any other way, by personal presentation?

The present is a reading age, and while, on the one hand, it is important to antagonize the evils resulting from bad reading in all its forms, on the other hand, there is no community in which many persons may not be found who will have little, if any, good reading that is not brought to them by the hand of benevolence. He that searches them out stands bestow'd upon them good gifts in the form of Christian tracts and books, accompanied, if need be, with other acts of kindness, will seldom fail of doing good; but he who adds to the tract earnest Christian inquiry or conversation will do still greater good, and in many instances secure an interest in such a manner as can hardly be obtained by the use of good gifts in the form of Christian tracts and books.

In the pulpit the minister is chiefly limited to his own thoughts and expressions. In the use of tracts he may avail himself of the best thoughts, the largest experience, and the most judicious and faithful use of the best men who have used their pen for the glory of God. His own spoken words may vanish with the breath which utters them. At most, they are not likely to be long remembered; but the printed pages which they scatters may remain to be perused when the giver is dead, and may even descend to coming generations. In preaching, the minister is limited to his own personal efforts, and can only address those who come to hear him. In his pastoral work he is at liberty to seek out the people; and often the present of a tract or a book will secure for him the friendship and the interested attention of those who write, read, or speak. Here the combinations, one with another, with which to defend the citadel of Christian truth, and to assault the positions of the adversary.

In the publication of tracts the minister is chiefly limited to his own thoughts and expressions. Here the combinations, one with another, with which to defend the citadel of Christian truth, and to assault the positions of the adversary.
work to be confined to a few. Specially appointed tract committees and visitors have their duties, which should neither be omitted nor excused; yet no individual should consider his or her personal responsibility relieved by that, but his duties must be carried out. The Society, in order to the full accomplishment of tract-distribution as a means of evangelical effort in any community, both systematic and occasional, public and individual, exertions must be put forth. The periodical distribution of tracts through districts and towns is very important, but it has disadvantages. For instance, in the district at large, there is no time for sufficient personal conversation with different characters; besides, many will not listen to the voice of a stranger. If the Christian acquaintances of such persons should give them tracts as tokens of friendship, and follow up the gift with affectionate warning and exhortation, the end would be more effectually gained. Thus it is that individual Christians, in their several circles of acquaintance and business, have a work to do in which well-selected tracts may furnish invaluable aid.

II. History of Initial Tract Enterprises.—Aside from the applications of the Holy Scriptures in fragmentary or tract form, the use of tracts as an agency of religious usefulness dates from the dawn of the Reformation in Europe. Long before the invention of printing, the early Reformers sent out their little tracts to awaken and instruct the people who still sat under the shadow of their ancient ignorances. The belief in the divine authority of the Scriptures and the desire to attain to a knowledge of them were the means of extensive usefulness. He sent out more than one hundred volumes, small and great, besides his translation of the Bible. Notwithstanding many of his works were burned and people were forbidden to read them on pain of death, yet they spread far and wide. Like seeds of truth borne by the wind, they lodged on the soil of the Continent, and brought forth fruit there in after-years. Works produced by the writers of that period, although extensively useful, were greatly hindered in their circulation by the size and expensive of the manuscript form in which they were issued.

The invention of printing in the 15th century removed many formidable obstacles to the diffusion of truth, and greatly stimulated the literary efforts of those who were striving to reform the Church. Luther appeared, and by his powerful writings and those of his associates, many of whom were teachers, errors in which they previously knew nothing better. The efforts of the later Reformers are thus characterized by one of their opponents: "The Gospel of these days do fill the realm with so many of their noisome little books that they be like to the swarms of locusts which did devour the fruit of the ground; many of them are small and thin, and are not worth the cost of the paper upon which they were written; many of them are short, and are not worth the cost of the ink with which they were inscribed; and many of them are costly, and are not worth the cost of the parchment with which they were written." (The Chemist Repository Tracts.)

III. Tract Societies distinctively so-called.—The time had now arrived for broader and more thoroughly organized movements in behalf of the tract enterprise. The Religious Tract Society of England was incorporated May, 1799. Rev. George Burder, Rowland Hill, Matthew Wilks, Joseph Hughes, and others were among its organizers. A rule of the society, like that of Mr. Wesley, before noted, provided that its membership "consist of persons subscribing half a guinea or upwards annually." The society was placed upon a basis of broad catholicity. Its object was defined to be the publication of "those grand doctrinal and practical truths which have in every age been mighty through God in converting, sanctifying, and comforting souls, and by the influence of which men may have been enabled, while they lived, to live to the Lord, and when they die to die unto the Lord." It is impossible to give in this article a detailed history of any of the societies enumerated; and general and special notices must suffice. But in the briefest notice of the Religious Tract Society of London, it is not too much to say that in the eighty years of its existence it has maintained and preserved evangelical principles announced by its founders in the beginning. In so doing it has accomplished its objects on a grand scale and to an unforeseen extent. An accidental event of the most interesting character grew out of the operations of the Religious Tract Society in the third year of its existence. It was no less than the
preliminary step towards the organization of the British and Foreign Bible Society—the parent Bible Society of the world. See Bible Societies.

For a score of years the business of the Religious Tract Society was a moderate extent that a small hired depository sufficed for its transaction. From 1820 the business so expanded as to require the occupation of enlarged premises in Paternoster Row, where, in 1843-44, its present commodious buildings were erected. The design of the society contemplated the double purpose of sale and gratuitous distribution. Both phases of its work were therefore limited to its supply of funds. Its only income, at first, was from the annual subscriptions of its members. But by degrees, and as necessity required, additions were made from other sources, such as congregational collections, auxiliary societies, life-memberships, legacies, and special donations. As the operations of the society increased, new and varied forms of action were developed, including not only sales through depositories, but by hawkers or peddlers throughout the provinces. Donations were made not only of tracts, but of assorted libraries to soldiers' barracks, to emigrant and convict-ships, to workhouses, to coastguard stations, to missionaries' families, to clergymen, to schoolmasters, and city missionaries, to be used for loaning to persons in destitute circumstances. During the present century the following statistics have been published concerning the publication of the tracts in the ordinary form. Subsequently it began to enlarge the variety as well as the number of its publications. Broadside, handbills, children's books, periodicals adapted to different ages and classes, monthly volumes, standard works, and even commentaries on the Scriptures came in turn to be regularly and constantly issued under the imprint of the society. From active work in different parts of Great Britain, the society was led to extend its work into foreign fields. Such an extension had not been originally contemplated, but nevertheless took place in the order of years. In the 1850's the society published only sixty-six different tracts in the ordinary form. It embraced branch societies at Copenhagen, and in the German, French, and Dutch. As was to be expected, the foreign prisoners, when released, carried more or less of the tracts they had received to their own countries, and thus, to some extent, created a demand for more and similar publications in those countries. About the same time the adherence of the society to the leading of the representative evangelical Christians in most of the nations of Europe. Soon afterwards the enterprise of foreign missions began to be extended to various pagan nations. By similar processes, the work of the Religious Tract Society has been expanding and enlarging ever since, with a prospect of continuous expansion and usefulness in time to come.

The Reports of the society from year to year have been replete with interesting details, not only of progress, but also of results; and yet it may safely be inferred that the good which has been directly and indirectly accomplished through its instrumentality has not half been told. Eternity only can reveal the full extent of influences that have been so far-reaching, and in many instances so remote from ordinary human observation. A few items, condensed from the society's official documents, may serve as partial indications of the magnitude to which its operations have reached, and the growth of its operations have grown. The society has printed important tracts and books in one hundred and twenty different languages and dialects. Its present annual issues from its own depositories and those of foreign societies, through which it acts, are about sixty-three millions, and its aggregate issues during eighty years past has been about two thousand millions. It has operated with every Protestant Christian mission in the world. It has assailed popery on the Continent of Europe, Mohammedanism in the East, and paganism of various forms in heathen lands. It has given a Christian literature to nearly all the nations of the world. Its publications have passed the wall of China, and have entered the palace of the Celestial emperor. They have instructed the princes of Burmah, and opened the self-sealed lips of the devotees in India. They have gone to the sand and to the rock, to the desert and to the wilderness. They have taught the Jews, and spread the Gospel to the Greek; while in the home land they have continued to offer the truths and consolations of religion to soldiers, to sailors, to prisoners, to the inmates of hospitals, and, in short, to rich and poor in every circumstance of life. In the year 1825, the Religious Tract Society celebrated its semi-centennial jubilee. In connection with that interesting event, a large jubilee fund was raised to increase the usefulness of the society. A jubilee memorial volume was also published, setting forth in an able and interesting manner the history of its first fifty years of work and progress. When, in the year 1895, the society shall celebrate its centennial, a still grander showing of results may be expected.

The additional tract societies of Great Britain, aside from merely local organizations, are not numerous. The largest of these, the following is principal: The Religious Tract and Book Society of Scotland (Edinburgh). The primary organization of this society dates back to 1798. It is a publishing society, and for many years had a feebly existence. About 1856 it adopted a system of colportage similar to that of the American Tract Society, and, since that period, has greatly multiplied its influence and usefulness. It embraces branch societies at Glasgow and Aberdeen, and employs some two hundred colporteurs. The Stirling Tract Enterprise, founded in 1848, is chiefly a publishing institution, issuing both tracts and periodicals. The Dublin Tract Society issues tracts in large numbers. The Monthly Tract Society, London, was instituted in 1837.

In passing from Great Britain to other countries, the number of tract societies is found to be very great. For the most part, they combine publication with distribution, receiving aid from the Religious Tract Society of London, and often have branch societies in their several localities. It is therefore deemed sufficient to give the title and date of organization, omitting details of history and statistics, although in many instances of great interest.

CONTINENT OF EUROPE.—Tract Society of Norway and Denmark, 1798; Stockholm Evangelical Society, 1815; Religious Tract Society of Sweden, 1819; Copenhagen, 1820; Stuttgart Tract Society, 1813; Prussian Tract Society, Berlin, 1815; Tract Society of Wupperthal, 1814; Lower Saxony Tract Society, Hamburg, 1820; Tract Society of Leipsic, 1821; The Netherlands Tract Society, 1821; The Belgian Tract Society, 1825; The Belgian Evangelical Tract Society, 1823; Evangelical Tract Society of France, 1825; Religious Book Society of Toulouse, 1835; Tract Society of Berne, 1839; Tract Society of Basel, 1840; Tract Society of Neuchatil, and Geneva, 1848; Evangelical Society of Geneva, 1848; Religious Society of St. Gall, 1848; Religious Society and Tract Society, 1854; Tract and Book Publishing House of the Methodist Episcopal Church, Bremen, 1860.

INDIA.—The Tract Society at Nagore, Trivnaor, 1849; Calcutta Book and Tract Society, 1838; Tract Society of Madras, Bellary, Beira, Bombay, Surat, and Be,"1559, 1854; Tract Societies of Calcutta, Al
dee, Chinnar, and Quilon, 1830-39; Tract Societies of Mirzapore, Vizagapatam, Cuddapah, Neyyar, and Manganese, 1850-42; Tract Societies of Pondicherry, Trincomalee, and Colombo, 1863; Ceylon Christian Ver
culars, 1865; Tract Society of the Wesleyan Religious Society and Tract Society, 1860; North India Tract Society, Allahabad; Punjab Religious Book Society; The Christian Union of Java, 1863; Tract Society of Mauritius, 1834; Burmah Bible and Tract Society, 1861.

CHINA.—From the beginning of Christian missions in China there have been a number of religious tracts that have been diligently prosecuted. To that end nearly every separate mission has served as a publishing agency of greater or less extent. Almost all the missions have re
TRCTS AND TRACT SOCIETIES 515 TRACTS AND TRACT SOCIETIES received from the tract societies of England and America aid for their work of publication. In 1878 the Chinese Religious Tract Society was chartered. It is composed of representative missionaries of various churches, and proposes to organize auxiliaries and local societies in their respective missionary fields. 

JAPAN.—Active measures are in progress for the preparation and diffusion of Christian tracts and books in Japan. The work here was first formally commenced in 1878. The society, organized in 1878 as the Japanese Religious Tract Society, has, since its establishment, published tracts, books, and a religious newspaper. It is now controlled by the Religious Tract Society of Japan, and its efforts are confined to the dissemination of literature among the various missions aided by the principal Bible and Tract societies of England and America.

AUSTRALIA.—Tract Society of Sydney, 1828; Tract Society of Van Diemen's Land, 1837; Religious Tract Society of Victoria, 1852; Victoria Tract Distribution Society, 1858.

NEW ZEALAND.—New Zealand Tract Society, 1859; Wellington Tract Society, 1864.

SOUTH AFRICA.—Cape Town Auxiliary Tract Society, 1869; South African Ladies' Tract and Book Society, 1882.

Western Africa.—Tract Society of Sierra Leone; Tract Society of New Providence, 1857.

It is not within the design of this article to give the history of the tract societies enumerated; but it is proper to remark that various modifications have taken place in the form and style of society in the early days of the American organization. In several instances primary associations have been merged in the formation of more important societies, while others have continued under new names and with modified forms of action. With increasing experience, the tendency has been to centralize the work of publication in a few strong societies, and to multiply the agencies of distribution outward from the great centres of publication. A few examples of combination and reconstruction may be noted. The New England Tract Society, organized in 1814, became in 1825 the American Tract Society, having its location in New York, and three years later, it was merged into the American Tract Society which was organized in New York in 1825. The last-named arrangement was consummated none too soon, as great confusion had arisen from having two publishing societies of the same corporate name. The Baptist General Tract Society, organized in Washington in 1824, was subsequently transferred to Philadelphia, and in 1840 became, with enlarged designs, the American Baptist Publication Society. The New York Methodist Tract Society, organized in 1817, subsequently became incorporated as the Tract Society of the Methodist Episcopal Church.

As a counterpart to the above sketch of the rise and development of the Religious Tract Society of London, and as a specimen illustration of results from about half a century's operations of a similar American organization, the following facts are condensed from official publications of the American Tract Society: The society has a large and commodious building in Nassau Street, New York, with twenty steam-presses, tens of thousands of stereotype plates, and every facility for composing, printing, binding, storing, and issuing its own publications, to the number of 4,000 books, 30,000 tracts, and 20,000 pamphlets. It has also a capital to abate, in fixing the prices of books, what otherwise would have to be added for rent of buildings hired, and for the profits of trade. It numbers on its list about 6,000 distinct publications, including, besides tracts and handbills of various kinds, 1,240 volumes of biography, history, and helps to Biblical study. Among what are called its home publications, 1,584 distinct issues are in foreign languages, viz. German, French, Spanish, Italian, Portuguese, Swedish, Welsh, Dutch, Danish, Finnish, and Hungarian, designed for immigrants coming to the United States. Its home publications in the English language, 28,000,000 volumes, besides about 3,000,000,000 pages of tracts, have been issued. Of its periodicals, several of which are illustrated and printed in the highest style of typography, over 5,000,000 are yearly issued to 550 subscription-holders; and the society has become the chief仰助 for its faithful and systematic prosecution of the work of colportage. By its agents, employed chiefly in frontier and destitute sections of the country, it has within a period of forty years done a work equal to that of one man for more than 5000 years. It has sold, in addition to more than 11,000,000 volumes, and donated 3,000,000 to destitute persons and families. It has made more than 12,000,000 visits to families; in about 1,000,000 of which no religious book was found, with the exception of Bibles in about one third of the number. It has thus done much to meet the moral and religious wants of our frontier population in advance of schools and churches. It is accustomed to make grants each year of fifty thousand dollars' worth of its publications for circulation in prisons and hospitals, in Sabbath-schools and mission-schools, in cities and remote and lonely hamlets, to soldiers and to sailors on our inland waters, and in hundreds of forward-bound vessels for every one that goes to sea. The foreign work of the society has been chiefly accomplished through donations of money granted to missionaries in seventy different foreign stations. By means of some $700,000 thus appropriated, the society has printed, in 145 different languages and dialects, not less than 421 distinct volumes of publications, including 640 volumes. Thus "fruits of the society's sowing may be found in almost every land—from Russia to the Cape of Good Hope, and from China in the East to Hawaii in the West."

As a summary showing of the work accomplished by a distributing tract society, the following items are copied from the Report of the New York City Mission and Tract Society for 1880:

The total amount expended in fifty-three years, $1,170,--

In addition to the above sum expended in the regular missionary operations of the society, more than $100,000 have been raised for building mission stations and chapels.

The detailed statistics of the tract enterprise in its various forms of action would fill many volumes with facts of intense interest, and form a just basis not only of admiration for its past attainments but of expectation for its expanding and multiplying influence in the years and centuries to come.

**IV. COLLATERAL PUBLISHING ORGANIZATIONS.**—Before proceeding to enumerate the more important of them, some words of explanation seem necessary. In the development of the early American tract movements, various kinds of organizations have been found necessary or expedient. Only a few have become great publishing institutions, and no other one has attained such a magnitude of operations as that of the Religious Tract Society of London. Nevertheless, societies for the effective and appropriate distri-
TRAYS AND TRACT SOCIETIES 516

TRACY

bution of tracts have been found essential to the object of the enterprise as a whole. They have worked in more limited spheres, but have proved indispensable to the highest forms of success. Religious reading, when merely printed, has no more value than other merchandise. A single tract, brought home to a religious reader, and published more for God and humanity than millions of pages resting upon the shelves of a depository. Societies, therefore, that circulate religious publications, and especially by the agency of skilful and sympathetic Christian workers, deserve high respect. Not all of them have the specific name of tract society. Some of them have mingled the work of Bible and tract distribution. Some have adopted colportage as their chief form of work, while others have devoted their energies largely to other forms of evangelization. In this state of the case, it may not be possible to give a complete list of all the societies that have been organized to promote the circulation of religious tracts. Still less possible would it be to give, within a convenient space, the full historical data of all such institutions. Fortunately, however, numerous details are quite unnecessary, since specimen sketches like those given here are sufficient to describe the principal institutions and their auxiliaries, whether conducted on a larger or smaller scale.

As to plan of organization, there are two classes of tract and book publication societies. One class represents united Christian effort in the sense of being made up of the members of different churches. The other is denominational in the sense of separate church action. These two classes of societies, though distinct from each other, are by no necessity antagonistic. They may, and usually do, simply represent different modes of accomplishing the same or similar objects. We refer in our ensuing to the pre-eminence and catholicity of the Religious Tract Society, denominational action has generally limited itself to the work of dissemination, there is at least one important example of separate church action—it is that of the Wesleyan Methodist Church. By that body the joint enterprise of tract and book publication and circulation has been continued from the time of its inception by the Rev. John Wesley in the first half of the 18th century. The publications of the Wesleyan book-room embrace a large assortment of tracts, a variety of periodicals, and a large list of religious books. A due proportion of its tracts and books has been prepared and printed in foreign languages, in adaptation to the wants of the various mission fields of that Church. Book affairs constitute a standard topic of business at the annual meeting of the Conference, which officially appoints a publishing agent and the requisite editors. It also appoints a tract committee charged with the duty of promoting the circulation of tracts by means of auxiliary and loan societies and suitable grants. As a branch of church work, cities, villages, and country neighborhoods are divided for consecutive and periodical visitation by tract-distributors. In America, some societies have gone yet more perfect, and maintain publication societies both of tracts and books on a similar plan, although few are as thorough in the work of dissemination.

The Society for Promoting Christian Knowledge, founded in London in the early part of the present century, deserves in several respects a closer alignment of the publishing tracts societies of England. It issues, chiefly on business principles, a large assortment of books adapted to juvenile, Sunday-school, and popular reading, all of which have for their object at least indirect Christian influence, besides many thousands of religious tracts.

In connection with facts heretofore stated, it must be borne in mind that the Sunday-school unions (q.v.) of the United States have to a large extent provided the Sunday-school tracts and books used by the different churches, and thus covered an important department of publication embraced within the operations of the Religious Tract Society of London. Besides these, several denominational religious publishing houses have grown up, in which vast numbers of tracts, books, and periodicals are printed.

The object of most of these is the Book Concern of the Methodist Episcopal Church, which was a direct outgrowth of Mr. Wesley's publishing enterprise in England, mentioned above. It was begun in Philadelphia by official action of the Church in 1789, and in 1804 was removed to New York, where its principal establishment has since remained. It has branch publishing-houses in Cincinnati, Chicago, and St. Louis, together with depositories in most of the large cities.

Corresponding in character to the above are the American Baptist Publication Society and the Presbyterian Board of Publication, both located in Philadelphia. All the institutions thus far named publish more or less books and tracts on the subject of temperance. But in 1866 the National Temperance Society was organized in New York, for the express purpose of providing a cheap and sound literature on all subjects relating to theoretical and practical temperance. The editor for the celebration was the Rev. J. Melancton Sargent. It may be numbered among the tract and book publishing institutions of the United States. Its publications, already six hundred in number, are circulated to some extent through Sunday-schools, but more extensively through auxiliary temperance organizations in all parts of the land. It may thus differ this from small tracts less than a century ago, a vast system of tract and book publication in the interest of Christianity has sprung up and spread abroad its influence in most of the countries and languages of the world.

V. The literature of the subject is as yet chiefly to be found in the annual reports of the various societies and institutions above enumerated. The Jubilee Memorial Volume of the Religious Tract Society (Lond. 1850, 700 pp. 8vo) is a specimen of many similar volumes that will hereafter be forthcoming from that and other societies. (D. F. K.)

Tractus. See Tract.

Tracy, Bernard Destult de, a French ascetic writer, was born Aug. 25, 1720, at Paray-le-Fraisal, near Moulins. At the age of sixteen he joined the Theatines, and passed his whole life in retirement and piety. He died in Paris, Aug. 14, 1878. He is the author of several works on practical religion and the biographies of saints, for which see Hoefer, Nouv. Biog. Générale, a. v.

Tracy, William, D.D., a Presbyterian minister, was born at Norwich, Conn., June 2, 1807. He went to Philadelphia and united with the Church in February, 1827. Being induced, by the advice of Rev. John L. Grant, to study for the ministry, he accordingly entered Williamsport Academy, and from thence Williams College, graduating in the theological course on the 20th of May, 1830. He was licensed to preach in 1835, and was ordained by the Philadelphia Presbytery as an evangelist. Having devoted himself to the work of foreign missions, he sailed for India, and, having reached Madras, he went to the Madura district, his field of labor, in 1837. He established a boarding-school at Tirumangalam, which grew to a high-grade seminary, having fifty pupils. Here he spent twenty-two years of his life, and educated more than 250 young men. He prepared many text-books in theology and science, and gave important aid in revising the Tamil Bible. In November, 1877, his youngest son and wife joined him and his mother in India as missionaries, to share their labors and their home,
but his work was done. After the Sabbath which he spent in the sanctuary, he was attacked with rheumatic
cripns and diarrhoea, which brought him rapidly to the end, and he died at Timna-purum, Nov. 28, 1877.

Trade. See Mechanic; Merchant.

Traditio (et Reddito) Symboli (delivery of the
symbol) is the term used by early Church writers in reference to the practice generally adopted of re-
quiring baptized persons to repeat the Creed and the Lord's Prayer, in which they had previously been in-
structed. In the case of infants the sponsors at first re-
pected these formulæ on behalf of the child for whom they assumed the responsibility. Afterwards, in the Middle Ages, the Romish Church began to dispense with this usage, and to satisfy itself with the priest's repeating them.

There is still a remnant of this practice in some coun-
tries: sponsors are subjected to a catechetical exami-
nation by the minister previously to their admission.

Tradition (wędawęs), Jewish. The Jews pretend that, besides their written law contained in the
Pentateuch, God delivered to Moses an oral law, which was handed down from generation to generation. The various decisions of the Jewish doctors or priests on points which the law had either left doubtful or passed over in silence were retained; and, as a provision against their traditions. They did not commit their numerous traditions (which appear to have been a long time in accumulating) to writing before their wars against the Romans under Hadrian and Severus. The Mishna, the Gemara, and perhaps the Masorah were collected by the rabbis of Tiberias and later schools. See RABBINISM. Many of their false traditions were in direct opposition to the law of God; hence our Saviour often reproached the Pharisees with preferring them to the law itself. He also gives several instances of their superstitious ad-
herence to vain observances, while they neglected essen-
tial things (Matt. xx; 2; 33; Mark vii; 1-3). The only way in which we can know satisfactorily that any tra-
dition is of divine authority is by its having a place in
those writings which are generally acknowledged to be the
genuine productions of inspired men. All tradi-
tions which have not such authority are without value, and tend greatly to detract and mislead the minds of men (2 Thess. ii; 15; iii; 6).

In this respect, however, a notable division existed
among the Jews themselves, which has been transmitted to the modern representatives of the two great par-
ties. The leading tenet of the Sadducees was the ne-
eglect of the observance of a portion of the laws. The
Pharisees asserted, so the Sadducees denied, that the Israelites were in possession of an oral law transmitted to them by Moses. The manner in which the Phari-
sees may have gained acceptance for their own view is noticed elsewhere in this work [see PHARISEE]; but, for an equitable estimate of the Sadducees, it is proper to bear in mind emphatically how destitute of histori-
ical evidence the doctrine was which they denied. That
document is, at the present day, rejected, probably by al-
most all, if not by all, Christians; and it is, indeed, so foreign to their ideas that the greater number of Chris-
tians have never even heard of it, though it is older than Christianity, and has been the support and con-
solation of the Jews under a series of the most cruel and wicked persecutions to which any nation has ever been exposed during an equal number of centuries. It is likewise now maintained all over the world by those who would call the ancient Jews a people barren of intellect, and inable to know the kind of arguments by which, at the present day, in a historical and critical age, the doc-
trine is defended. For this an opportunity has lately been given by a learned French Jew, grand-rabbi of the circumcision of Colmar [Klein, La Judaïsma, ou la France et la Tolérance, [Mülhausen, 1862], who shock-defined as a fact the existence of a Mosaic oral law. To do full justice to his views, the original work should be perused. But it is doing no injustice to his learning and ability to point out that not one of his arguments has a positive bearing on the subject of the tradition only on the inconceivability (as will be again noticed in this article) that a divine revelation should not have ex-
pliably proclaimed the doctrine of a future state of re-
wards and punishments, or that it should have promul-
gated laws left in such an incomplete form and requiring so much explanation and so many additions as the
laws in the Pentateuch. Now arguments of this kind may be sound or unsound; based on reason or illogical;
and for many they may have a philosophical or theo-
logical value; but they have no pretense to be regard-
ed as historical, inasmuch as the assumed premises, in which he invests the majesty of the Divine Su-
preme Being, and the manner in which he would be likely to deal with man, are far beyond the limits of historical verification. The nearest approach to a his-
torical argument is the following (p. 10): "In the first place, nothing proves better the fact of the existence of the tradition than the belief itself in the tradition. An entire nation does not suddenly forget its religious code, its principles, its laws, the daily ceremonies of its
worship to such a point that it could easily be persuad-
ed that a new doctrine presented by some impostor is the true and only explanation of its law and has always existed. It is impossible to persuade any such people that it represents the Israelites as a stiff-necked people im-
patient of the religious yoke; and would not be attrib-
uting to them rather an excess of docility, a too great condescension, a blind obedience, to suppose that they suddenly consented to troublesome and rigorous innova-
tions which some persons might have wished to im-
pose on them some fine morning? Such a supposition destroys itself, and we are obliged to acknowledge that the tradition is not a new invention, but that its birth goes back to the origin of the religion; and that, trans-
mitted from father to son as the word of God, it lived in the heart of the people, identified itself with the blood, and was always considered as an inviolable au-
thority."
But, if this passage is carefully examined, it will be seen that it does not apply a single fact worthy of being regarded as a proof of a Mosaic oral law. In-
dependent testimony of persons contemporary with Mo-

ses that he has transmitted such a doctrine would be historical evidence; the testimony of persons in the next generation as to the existence of such an oral law which their fathers told them came from Mo-

ses would have been secondary historical evidence; but the belief of the Israelites on the point twelve hundred
years after the death of Moses, on no such immedi-
ate testimony, be deemed evidence of a historical

fact. Moreover, it is a mistake to assume that they who deny a Mosaic oral law imagine that this oral law was at some one time as one great system introduced suddenly among the Israelites. The real mode of conc-
ceiving what occurred is far different. After the return
from the Captivity, there existed probably among the
Jews a large body of customs and decisions not con-
tained in the Pentateuch; and these had practical au-
thority over the people long before they were attrib-
uted to Moses. The only phenomenon of importance requiring explanation is, not the existence of the cus-
toms sanctioned by the oral law, but the belief accept-
ed by a certain portion of the Jews that Moses had di-
vinely revealed those customs as laws to the Israelites.
To explain this historically from written records is im-
possible, from the silence on the subject of the very

very scanty books which previously existed; and the

written between the return from the Captivity in B.C.556 and
that uncertain period when the canon was finally closed,
which probably could not have been very long before the
death of Antiochus Epiphanes, B.C. 164. For all
this space of time, a period of about three hundred and
seventy years, the authority of the written books of the
ation of Henry VIII to the present day, we have no He-
TRADITION 518 TRADUCIANISM

brev account, nor, in fact, any contemporary account, of the history of the Jews in Palestine, except what may be contained in the short works entitled Ezra and Nehemiah. In this dehth of historical materials, it is idle to attempt a positive narration of the circumstances under which the oral law became assigned to Moses as its author. It is amply sufficient if a satisfactory suggestion is made as to how it might have been attributed to Moses; and in this there is no difficulty. It can only be supposed that, however notoriously in ancient times laws of a much later date were attributed to Misus, Lycurgus, Solon, and Numa.

Under this head we may add that it must not be assumed that the Sadducees, because they rejected a Mosaic oral law, rejected likewise all traditions and all decisions in explanation of passages in the Pentateuch. Although they protested against the assertion that such points had been divinely settled by Moses, they probably, in numerous instances, followed practically the same traditions as the Pharisees. See SADDUCEES.

TRADITION, CHRISTIAN. In the older ecclesiastical fathers, the words παράδοσις and traditio are used to denote any instruction which one gives to another, whether oral or written. In the New Test. also, and in the classical writers, παράδοσις and trudare signify, in general, to teach, to instruct. In this wider sense, tradition was divided into scripta and non scripta sive oralia. The latter, traditio oralis, was, however, frequently called traditio, by way of eminence. This oral tradition was often appealed to by Ireneus, Clemens of Alexandria, Tertullian, and others of the ancient fathers, as a test by which to try the doctrines of contemporaneous teachers, and by which to confute the errors of the heretics. They describe it as being instruction received from the mouth of the apostles by the first Christian churches, transmitted from the apostolic age, and preserved in purity until their own times.

Oral tradition is still regarded by the Roman Church as a principium cognoscendi in theology, and they attempt to support their hypothesis respecting it by the use made of it by the fathers. Much dispute has arisen as to the degree of weight to be assigned to tradition generally; many, however, consider that this is an idle contention, and that each particular tradition should be tried on its own grounds. In coming to a decision on the merits of the question respecting doctrinal tradition, everything depends upon making the proper distinctions with regard to time.

In the first period of Christianity, the authority of the apostles was so great that all their doctrines and ordinances were strictly and punctually observed by the churches which they had planted. The doctrine and discipline which prevailed in those apostolical churches were, at the time, justly considered by others to be purely such as the apostles themselves had taught and established. This was the more common, as the books of the New Test. had not, as yet, come into general use among Christians; nor was it, at that early period, attended with any special liability to mistake. In this way we can account for it that Christian teachers of the 2d and 3d centuries appeal so frequently to oral tradition, either for the authority of the evidences of historical facts were far different. After the commencement of the 3d century, when the first teachers of the apostolical churches and their immediate successors had passed away and another race sprung up, other doctrines and forms were gradually introduced, which differed essentially from those of the former period. Now those innovators appealed more frequently than ever had ever been done before to apostolical tradition, in order to give currency to their own opinions and regulations. They went so far, indeed, as to appeal to this tradition as evidence not only at variance with other traditions, but with the very words of the apostles which they had in their hands. From this time forward, tradition naturally became more and more uncertain and suspicious. No wonder, therefore, that we find Augustine establishing the maxim that it could not be relied upon even in the long-distant distance from the age of the apostles, except when it was verbal and perfectly consistent with itself. The Reformers justly held that tradition is not a sure and certain source of knowledge respecting the doctrines of theology, and that the Holy Scriptures are the only principium cognoscendi. See Augustin., Calvin., Trench, vol. vii, 3; Eayre, Hist. Theol. Dict. s. v.; Cunningham, Hist. Theol. History, i, 196; Hagenbach, Hist. of Doctrines (Index); Hook, Church Hist. Dict. s. v.; Milman, Hist. of the Jews, ii, 42; Van Oosterzee, Christian Dogmatics, art. "Faith, Rule of.

TRADITION, in the Church of England, refers to customs, forms, rites, ceremonies, etc., which have been transmitted and not actually, but impliedly or necessarily, contained in the Article 84, is not to be understood as including matters of faith. The traditions for which the article requires respect and obedience are all those customs and ceremonies in established use which are not expressly named in the Scriptures, nor in the written laws or rubrics of the Church; and, therefore, not only are they not an essential part of Scripture, but they are to be regarded as additional and simply of a matter of human tradition. Among these may be mentioned the alternate mode of reading the Psalter, the custom of bowing in the Creed, the postures in various offices of the Church, the use of a doxology and collects after a sermon, the practice of pouring the baptismal water upon the head, the quantity of the elements consumed in the eucharist, etc. These, though unwritten, are not the less obligatory when ascertained to be standing customs of the Church. The article ordains that "whosoever, through his private judgment, willingly and purposely doth openly break the traditions and ceremonies of the Church which be not repugnant to the Word of God, and be ordained and approved by common authority, ought to be rebuked openly (that others may fear to do the like) as he that offendeth against the common order of the Church," etc.

Traditores (hereschers or traitors), a name applied by the ancient Christians to those Jews who delivered up their Bible and sacred utensils of the Church to the heathen in time of persecution. See Bingham, Christ. Antiq. bk. xvi, ch. vi, § 25.

Traducianism is the belief that the souls of children, as well as their bodies, are propagated from their parents, and is opposed to Creationism (q. v.) and the doctrine of the Pre-existents (q. v.). According to Jerome, both Tertullian and Apollinaris were advocates of this opinion, and the opponents of Pelagianism, in general, have been inclined to it. Since the Reformation, it has been more approved than by any other in the Lutheran Church, and that not by philosophers and naturalists merely, but also by divines. Luther himself, though he did not declare distinctly in its favor, was also inclined towards this theory; and in the Formula Concordiæ it is distinctly taught that both soul and body are propagated by the parents in ordinary generation. What has rendered the hypothesis more acceptable to theologians is its affording the easiest solution of the difficulty of children's immortality; and it seems to receive confirmation from the psychological facts that the natural disposition of children not unfrequently resembles that of their parents, and that the mental excellences and imperfections of parents are inherited nearly as often by their children as any bodily attributes. But, after all that can be said, we must be content to remain in uncertainty respecting the subject.
TRAUDICANS

A thou knowest not what is the way of the Spirit, nor how the bones do grow in the womb of her that is with child, even so thou knowest not the works of God who maketh all" (Eccles. xi. 5). See Back, Theol. Dict. s.v.; Delitzsch, Bibl. Psychology, p. 128-131; New-Englander, July, 1866, p. 475. See Soul, Origin of.

TRAUDICANS, the adherents of Traducianism (q.v.).

Traheron, Bartholomew, a learned English divine at the period of the Reformation, was born at Cornwall and educated at Oxford, either in Exeter College or Hart Hall. He travelled extensively in Germany and Italy returning to England, was made keeper of the king's library. In 1551 king Edward VI conferred on him the deanship of Chichester. This he lost on the accession of queen Mary, and, joining the English exiles in Germany, wrote all his important works there.

The time of his death is uncertain. Traheron's works are: "Pararaesia, Lib. 11; — Carmina in Mortem Henrici Dudzii; — Analysis Scoporum Johannis Cochlaei; — Exposition of a Part of St. John's Gospel (1558, 8vo); — Exposition of the Fourth Chapter of St. John's Revelation (1557, 8vo); — An Answer Made by Bartholomew Traheron to a Private Papist.

Traill, Robert, an eminent divine of the Church of Scotland, was born at Ely, May, 1642. He was educated at Edinburgh, and pursued the study of divinity with great ardor for several years. In 1666 he was obliged to secrete himself, because some copies of An Apologetic Relation, etc., were found in his mother's house; and the following year, being suspected of opposing the king, he was obliged to join his father in Holland. In 1671 he went to England, and was ordained by Presbyterian divines in London. In 1677 Mr. Traill was imprisoned for preaching privately, but was released in October of the same year. He then located at Craubrook, in Kent, but for many years afterwards was pastor of a Scotch congregation in London. He was warmly attached to the Calvinistic doctrines, and took a zealous concern in the doctrinal controversies. He died in May, 1716. He published a number of theological treatises and discourses, which for many years were printed separately, but collectively after his death (Edinb., 1745, 4 vols. 12mo; 1754, 2 vols. 12mo; Glasgow, 1776, 3 vols. 8vo; best ed. 1806, 4 vols. 8vo). See Chalmers, Biog. Dict. s.v.; Allibone, Dict. of Brit. and Amer. Authors, s.v.

Train, Arthur Savage, D.D., a Baptist divine, was born at Framingham, Mass., Sept. 1, 1812, and was a graduate of Brown University in the class of 1838. He was tutor in the university two years after his graduation, and was at the same time his theological studies under Dr. Wayland. In 1838 he was ordained pastor of the Baptist Church in Haverhill, Mass., where he had a successful ministry of twenty-three years. He was elected professor of sacred rhetoric and pastoral duties in the Newton Theological Institute in 1859, and held the office for seven years. In 1866 he accepted a call to the pastorate of the Baptist Church in Framingham, where he remained until his death, Jan. 2, 1872. Dr. Train was a trustee of Brown University from 1845 till his death. (J.C.S.)

TRAJAN, Marcus Ulpius Nerva, emperor of Rome from A.D. 98 to 117, is a noteworthy personage in the history of ancient times by reason of his personal qualities, and also as a general and ruler. He is important to the history of the Church through his connection with the persecution of the adherents of Christianity in his time. At first tolerated by the policy of the Roman rulers as a comparatively feeble though despicable existence on the loathsomest superstition of Judaism, Christianity was forced upon the notice of the emperor by the tumults excited among the populace by heathen priests, who observed the remarkable progress of that faith with alarm, and Trajan was accordingly led to issue edicts for the gradual suppression of the new teaching which threatened to destroy the old order of the gods. The administration of the younger Pliny as governor of Bithynia was complicated with matters growing out of the rapid extension of Christianity and the consequent rage of the heathen population within his province. He therefore endeavored to enforce against Christians the laws for the suppression of the really dangerous heresies (see Pliny, Epist. x. 48), but found the complaints to be so numerous and the result of the judicial investigations so unsatisfactory that he referred the whole matter to the emperor for instructions. Of this accused, many denied that they were in any way implicated in Christianity; others declared that they had returned to the old faith, and offered incense and libations before the image of the emperor and blasphemed the name of Christ. Those who avowed themselves Christians confessed to nothing of a damaging character. Their offence consisted merely in meeting before sunrise of a specified day to sing a common hymn in honor of Christ as a god, and in the assumption of a voluntary obligation, under oath, to commit no theft, robbery, nor adultery, but to keep a promise and acknowledge the possession of goods committed to their trust. The torture applied to two maids disclosed nothing more criminal than these statements. Trajan commended the governor's action, and observed that no general and definite prescriptions could be given for such matters. He added that search should not be made for suspected persons, though, if accused and convicted, they should be punished unless they interposed a denial of the charge of being Christians, and authenticated it by calling on the gods. Anonymous accusations of any sort should not be received. The execution of several Christians, among them the aged Symeon, who was the son of Clopas, and successor of James at Jerusalem, must be explained in view of the fact that the emperor was at the same time regent of the State and chief priest (pontifex maximus), and would consider it necessary to protect and preserve the religion which was so closely interwoven with the interests of the State. The same idea will apply to the case of Ignatius.

Literature.—The principal sources for the history of Trajan are Pliny the younger, Epistle, especially lib. 9; Coin of Trajan.

Tramontane (across the mountain), a term applied by the Italiacs to those dwelling north of the Alps, and especially to the ecclesiastics and professors of the canon law of Germany and France. See ULTRAMONTANE.

Trance (αθάρσας, ecstasy), a supernatural state of body and mind, the nature of which has been well conjectured by Doddridge, who defines it "such a rapture of the mind and soul that a person is apt to look out of all astonishment, and renders him insensible of the external objects around him, while in the meantime his imagination is agitated in an extraordinary manner with some striking scenes which pass before it and take up all the attention." He refers to some extraordinary instances of this kind mentioned by Gualterius in his note on Acts x, 10 (Family Expositor, ad loc. note g). Stockius also describes it as "a sacred ecstasy, or rapture of the mind out of itself, when, the use of the external senses being suspended, God reveals something in a peculiar manner to prophets and apostles, who are then taken or transported out of themselves." The same idea is intimated in the English word trance, from the Latin transitus, the state of being carried out of one's self. See Inspiration; Prophecy.

1. In the only passage (Numb. xxiv, 16) in which there is, as the italics show, no corresponding word in Hebrew, the Sept. renders בֶּלַע, a falling for בָּלַע, and the Vulg. more literally qui cadit. In the New Test. we meet with the word three times (Acts x, 10; xi, 5; xxii, 17), the Vulg. giving "excessus" in the two former, "stupor mentis" in the latter. The Greek word ἠθαρσας employed in these passages denotes the effect of any passion by which the thoughts are wholly absorbed. In the Sept. it corresponds to קָשָׁד, a "wonderful thing" (Jer. v, 30); κατακλίσις, "astonishment" (Deut. xxviii, 29), and γένεσις κατακλίσεως, a prophetic lethargy or "deep sleep" (Gen. ii, 21; xv, 12, etc.). In the New Test. it usually represents the absorbing effects of adoration (Mark v, 42; Luke v, 26; Acts iii, 10); of terror (Mark vii, 6).

2. Used as the Greek word is by Luke (Acts, ut sup.) "the physician," and, in this special sense, by him only, in the New Test., it would be interesting to inquire what precise meaning it had in the medical terminology of the time. From the time of Hippocrates, who uses it to describe the loss of conscious perception, it had probably borne the connotation which it has had, with shades of meaning for good or evil, ever since. Thus, Hesychius gives as the account of a man in an ecstasy that he does not know (οὐ ρεῖται), and speaks of it as "a change from the earthly mind (εἰς τοῦ γενόσιον συνορίους) to a divine and spiritual condition both of character and life." Tertullian (De An.
is the testimony of a German physician (Frank), who had made catalepsy a special study, that he had never met with a single case of it among the Jews (Copland, "Sexuality and Magic," p. 318). Indeed, not even the most explicit question could elicit from me in the course of a year, or any other age, the testimony of any man "common or unclean" (Acts x, xi).

To the "trance" of Paul, when his work for his own people seemed utterly fruitless, we owe the mission which was the starting-point of the history of the Universal Church, the command which made him "depart ... far hence unto the Gentiles" (xxii, 17-21). Wisely, for the most part, did that apostle draw a veil over these more mysterious experiences. He would not sacrifice to them, as others have often sacrificed, the higher life of activity, love, prudence. He could not explain them to himself. "In the body or out of the body," he could not tell, but the outer life and the inner life cast an impression of having passed in spirit into "paradise," into "the third heaven," and had heard "unspakable words" (2 Cor. xii, 1-4). Those trances too, we may believe, were not without their share in fashioning his character and life, though no special truth came distinctly out of them. Unified as they then were, but as they have seldom been since, with clear perceptions of the truth of God, with love wonderful in its depth and tenderness, with energy unremitting, and subtle tact almost passing into "guile," they made him what he was, the leader of the apostolic band, emphatically the "master-builder" of the Church, and the Purifier of the priesthood of God (comp. Jowett, Fragment on the Character of St. Paul).

Persons receiving this divine influence often fell to the earth under its influence, as in ordinary catalepsy (Gen. xvii, 3, etc.; 1 Sam. xix, 24, Heb. or margin; Ezek. i, 28; Dan. viii, 15, 16; Rev. i, 10, 17). It is important, however, to observe that in all these cases the visions beheld are also related; hence such cases are distinguished from a mere delirium animi. We find likewise in the case of Peter that "he fell into a trance" (or rather a "trance fell upon him," ἐπεβλήσατο ἐπὶ αὐτὸν ἐν κυριεύματι), during which he "saw a vision," which is therefore distinguished from the trance (Acts x, 10; comp. Paul's trance, xxii, 17; 2 Cor. xii, 2, etc.). The reality of the vision is established by the correspondence of the event. The nearest approach we can make to such a state is that in which our mind is so occupied in the contemplation of an object as to lose entirely the consciousness of the sequence of ideas—so that the order of ideas, whether belonging to the judgment or imagination, is undoubtedly attained. Hence we can readily conceive that such a state might be supernaturally induced for the higher purpose of revelation, etc. The alleged phenomena of the mesmeric trance and of clairvoyance are more or less suited to the higher purpose, may assist our conceptions of it. See Vision.

Trani, a name common to some Jewish authors, of whom we mention the following:

1. I. ISAIAH DA SA, so called after his native place Trani, a seaport town of Naples, and, by way of abbreviation, Ἱς ῎ Ια, from the initials in the Talmud, i.e. R. I. Isaiah da Trani, flourished about A.D. 1292-70. He may be considered as the founder of the school of bel-letristic, medical and traditional exegesis in Italy. He wrote not only numerous annotations on the Talmud, and theological decisions (ábbud rabbati) connected with traditional law, but also scholia (ábbud rabbati) to the Bible, which are as follows: yotetz, Scholia on the Pentateuch (Leghorn, 1789)— עַותֵּצָה, Annotations on Joshua, published, with a Latin translation by J. A. Steinmetz, under the title Esaia Comment, in Journ. seu Codice M. S. Bibl. Senat. Lips. Description et Version ad Notas Illustratae, Prorsus J. G. Abicht Eruditorum Examinis subjici (Lips. 1712)—Annotations on Judges and 1 Samuel, printed in the Rabbinical Biblia (q. v.). Besides these published commentaries, the following are amongst the more important, either by him or by others on Ezra, Cod. Opp.; a commentary on the Five Me-
TRANSCENDATIONALISM

The greatest success is reached in the exertions of human reason. In men's minds, therefore, is the highest manifestation of God. God recognizes himself best in human reason, which is a consciousness of God. And it is by human reason that the possibility of (hitherto) unthought, and so without existence, mere negation comes into consciousness; thus God is revealed in the world. After arriving at an ideal God, we learn that philosophy and religion draw us away from our little selves, so that our separate consciousness is dissolved in that of God. Philosophy is religion; and 'true religion frees man from all that is low, and from himself, from clinging to I-hood (Ichthei) and subjectivity, and helps him to life in God as the truth, and thereby to true life.' In this ablation of personal identity, we must not claim property even to our own thoughts. Hegel teaches us that God is who thinks in us; nay, think, but precisely that which thinks in us which is God. The pure and primordial substance manifests itself as the subject; and 'true knowledge of the absolute is the absolute itself.' There is but a step to take and we arrive at the tenet that the universe and God are one. The Hegelian attempt to distinguish this from the doctrine of Spinoza, but their distinctions are inappreciable; their scheme is pantheism. And as God is revealed by all the phenomena of the world's history, he is partly revealed by moral action, and consequently by sin, not less than by holiness. The true condition of the human spirit is the manifestation of the divine principle; or, rather, in any sense which can affect the conscience, there is no evil in sin - there is no sin. It was reserved for Hegel to abandon all the scruples of six thousand years, and publish the discovery - certainly the most wonderful in the history of human research - that something and nothing are the same! In declaring it he almost apologizes, for he says that this proposition appears so paradoxical that it may readily be supposed that it is not seriously maintained. Yet he is far from being ambiguous. Something and nothing are the same. The absolute of which so much is vaunted is nothing. The conclusion, which is, perhaps, already anticipated by the reader's mind, and which leaves us incapacitated for comment, is this - we shudder while we record it - that after the exhaustive abstraction is carried to infinity is search of God, we arrive at nothing. God himself is nothing, but the absolute (das Etwas).

These systems of philosophy in Germany, "that nation of thinkers and critics," have, each in its turn, influenced the science of Biblical philology; and whether it be the moralism of Kant, or the idealism of Fichte, or the deeper transcendentalism of Hegel, it makes the scriptures its dogma. Hegel's System of Philosophy, which is the apotheos of its system. When Strauss wrote his Leben Jesu, Germany was thrilled by the publication - all classes of her divines and philosophers, historians and scholars. When, as in this work of Strauss, all historical reality is denied to the gospels, and they are declared to be untruth, not derived from divine ideas, and are affirmed to describe, not a personal God or a historical Christ, but a cluster of notions intensely prevalent in Judaea; and when it is argued that the names and events occurring in the evangelical narratives are but symbols of inward emotions, and the blasphemies of pantheism are reasoned for from the union of deity and humanity in Jesus, as shadowing forth the identity of the forms vulgarly named Creator and creature, it is easily seen that the author uses the philosophy of Hegel as the great organ of perveting and decortating the records of the evangelists, especially of polluting the account of the life of Jesus, and making the apostle of the beloved disciple. Wiese, the producer of a similar mixture of boldness and impertinence, declares it impossible for any one to understand his theology unless he has mastered his philosophy. No one can comprehend the systems of Duhm, Schwartz, or Schleiermacher till be made acquainted with the philosophy which shall be propounded in his early and adventurous youth.
life beyond the grave,” says Strauss, “is the last foe which speculative criticism has to encounter, and, if it can, to extirpate.” So, to find a place for such theories, this spurious interpretation created “miraculous emolument.” It was a sad memorial of the proud and unshallowed wisdom of this world, impugning the revelation already given, delighting in every high thing that exalts itself against the knowledge of God, and exulting in withdrawing every thought from the obedience of Christ. Well might Eschenmayer speak of the “Istehristiamus” of Hegelianism. While it kissed, it betrayed, and at length proceeded to the trial and condemnation of its victim (Old and New, Aug. 1870, p. 186). See DISSIM; PARTHETISM; RATIONALISM.

Transcendentalism (trans and elementum), a term used to signify the change of the elements in one body into those of another.

Transfiguration. The Greek word μεταμορφωσις, well rendered “was transfigured,” signifies a change of form or appearance (Matt. xvii, 2; Mark ix, 2), and is so explained in Luke ix, 29, “the fashion of his countenance was altered.” This is one of the most wonderful incidents in the life of our Saviour upon earth, and one so instructive that we can never exhaust its lessons. The apostle Peter, towards the close of his life, in running his mind over the proofs of Christ’s majesty, found none so conclusive and irrefragable as the scenes when he and others were with his Master in the holy mount (2 Pet, i, 18) as eye-witnesses that he received from God the Father honor and glory, when there came such a voice to him from the excellent glory, “This is my beloved Son, in whom I am well pleased.” The apostle John likened this being given power of the glory of the Father as exhibited on that occasion (John i, 14). If we divide Christ’s public life into three periods—the first of miracles, to prove his divine mission; the second of parables, to inculcate virtue; and the third of suffering, first clearly revealed and then endured, to stone for sin—the transfiguration is placed as his baptism or initiation into the third and last. He went up the Mount of Transfiguration on the eighth day after he had bidden every one who would come after him take up his cross, declaring that his kingdom was not of this world, that he must suffer many things, and be killed, etc.

The Mount of Transfiguration is traditionally thought to have been Mount Tabor; but as this height is fifty miles from Cesarea Philippi, where Jesus last taught, it has of late been supposed to have been a mountain much less distant, namely, Mount Hermon. As there was an interval, however, of a week between this and the preceding occurrence, we may naturally conclude that a part of this time was occupied in the journey. See TABOR.

The only persons thought worthy to ascend this mount of vision were Peter, James, and John, these being a competent number of witnesses, or they being more faithful and beloved than any others. Whatever else left all to die and were buried therein, more than one other occasion as an elect triumvirate—as at the raising of Jairus’s daughter, and during our Lord’s agony in the garden. The disciples, in all probability, ascended the mountain anticipating nothing more than that Jesus, as at other times (Luke xvi, 12), were on the top of the mountain in the manner of curtains of night closed around them, they were so worn out by their labors as to sink down in sleep, till startled from their slumbers by the glory of the Lord shining round about them; for, as Jesus prayed, the fashion of his face was altered, “and his raiment was white as the snow, and his raiment was white as the light.” And behold there talked with him two men, who were Moses and Elias, who appeared in glory, and spake of his decease, which he should accomplish at Jerusalem.” Peter’s words, “Master, it is good for us to be here,” are a natural expression of rapture; and his proposal to build three tabernacles indicated his desire both to keep his Lord from going down to Jerusalem to die there, and to prolong the blessedness of beholding with open face the glory of God. Such is at least a plausible interpretation of his language, while “he wist not what to say.” It is worthy of note that Jesus made no preparations for tents for himself and his companions, his only desire being that the bestial vision might endure forever. While he yet spake, behold, a bright cloud overshadowed them—not a black cloud such as that which rested on Mount Sinai, but a cloud glistering as the Shechinah when the glory of the Lord filled the tabernacle, or as the cloud that filled the house of the Lord when the priests were come out of the holy place. “And behold a voice out of the cloud”—that is, out of the long-established symbol of Jehovah’s presence—which said, “This is my beloved Son, in whom I am well pleased: hear ye him. And when he had spoken these things, he was departed from them, and was assumed up into heaven, and were sore afraid”—like Daniel and all others who have felt themselves entranced by revelations of God. “And Jesus came and touched them, and said, Arise, and be not afraid”—showing such gentleness as proved him to be fitly named the Lamb of God. How long the glorification of our Saviour continued it was vain to inquire; but it appears from the narrative of Luke that he did not lead down his disciples till the day following that on which they had ascended the height. As they descended, he bade his disciples keep what they had seen a secret till after his resurrection, doubtless because the whole vision, to those who had not seen it, would have been a rock of offence, appearing as an idle tale. He also opened their eyes to see that Elias whom they looked for in the future was to be sought in the past, even in John the Baptist, who was clothed with his spirit and power.

The fine closing of this transfiguration, although in part wrapped up in mystery, appear to be in part plain. Among its intended lessons may be the following: First, to teach that, in spite of the calamities which the Pharisces had heaped on Jesus, the old and new dispensations are in harmony with each other. To this end the glorification of our Saviour contrasted it was vain to inquire; but it appears from the narrative of Luke that he did not lead down his disciples till the day following that on which they had ascended the height. As they descended, he bade his disciples keep what they had seen a secret till after his resurrection, doubtless because the whole vision, to those who had not seen it, would have been a rock of offence, appearing as an idle tale. He also opened their eyes to see that Elias whom they looked for in the future was to be sought in the past, even in John the Baptist, who was clothed with his spirit and power.

TRANSMIGRATION

For monographs on the transfiguration, see Volbouding, Index Programmatum, p. 47; Hase, Leben Jesu, p. 161; Bagot, On the Transfiguration (Lond., 1840); Anon. Tutor’s Teachings (ibid., 1867, 1868); also the Am. Free-will Bapt. Quarterly, Jan. 1868. See Jesus Christ.

Transfiguration—(or Jesus-) day was kept in the Western Church in the time of St. Leo, and in the Greek Church about A.D. 700. By a bull of Calixtus III, 1456 (or 1457), it was ordered to be generally observed, in memory of the victory of Humiliades and the Hungarian army over Mohammed and the Turks. In the English calendar it stands on Aug. 6. In France, after consecration, the chalice was filled with new wine, or, as at Tours, received some of the juice of the ripe grapes; and the clusters are blessed in Germany and the East on this day.—Blunt, Dict. of Theol. v.; Walcott, Sac. Arch. vol. v.

Transitorium, a term for a short anthem, or respond, in the rite of Milan, chanted after the communion of the priest.—Leo, Glos. of Litt. Terms, s. v.

Translation, Biblical. See Versions.

Translation, in ecclesiastical usage, is the removal of a bishop from the charge of one diocese to that of another. After such removal to the see, all his attestations, dates from the year of his translation (anno translationis nostri), not from that of his consecration (anno consecrationis nostri). In the early Church a bishop could not translate himself to another see without the consent and approbation of a provincial council. Some, indeed, thought it absolutely unlawful for a bishop to forsake his first see and betake himself to any other, because they looked upon his consecration to be a sort of marriage to his church, and therefore looked upon his removal to another see as spiritual adultery.

Transmigration (a passing over), in the theological acceptance of the term, means the supposed translation of the soul after death into another substance or body than that which it occupied before. The basis of this belief being the assumption that the human soul does not perish together with the body, it can belong only to those nations which believe in the immortality of the soul. But in proportion as such an idea is crude or developed, as it is founded merely on a vague fear of death, and a craving for material life, or on ethical grounds, and a supposed causal connection between this and a future life, the belief in transmigration assumes various forms. The notion, dating back to remote antiquity, and being spread all over the world, seems to be anthropologically innate, and to be the first form in which the idea of immortality occurred to man.

1. India.—It was in India, where the problems of metaphysics and ethics as connected with ontology and the destiny of the soul were elaborated to the last degree on a theistic basis, that metempsychosis was most ingeniously and extensively developed. The Hindús believed that human souls emanated from the Supreme Being, which, as it were, in a state of bewilderment or forgetfulness allowed them to become several existences and to be born on earth. The soul thus severed from the real source of its life is bound to return to it, or to become merged again into that divine substance with which it was originally one. But having become contaminated with...
sin, it must strive to free itself from guilt and become fit for its heavenly career. Religion teaches that this is done by the observance of religious rites and a life in conformity with the precepts of the sacred books; philosophy, on the other hand, says that man, if it understands the true nature of the divine essence whence it comes. So long, therefore, as the soul has not attained this condition of purity, it must be born again after the dissolution of the body to which it was allied; and the degree of its impurity at one of these various deaths determines the existence which it will assume in a subsequent life. So closely was the account of a soul's misdeeds kept that it might pass thousands of years, or kulipas (meons), in one or other of the heavens, as a reward for good deeds or self-inflicted suffering, and yet be obliged to return to earth or hell to expiate as an animal, man, or demon certain sins. To us the details of the soul's migration, as described in the religious works of the Hindûs, are only interesting as they afford a kind of standard by which the moral merit or demerit of human actions was measured in India (see Manu, Code of Laws, bk. xvi. 11). A more general doctrine of the transmigration of souls is based by Hindû philosophers on the assumption of the three cosmic qualities of sattva, i.e., purity or goodness; rajas, i.e., troubleness or passion; and tamas, i.e., darkness or sin, with which the human soul may become endowed. On the death of Manu and others, the soul elaborates a theory of the various births to which the soul may be subjected. Manu teaches that "souls endowed with the quality of sattwa attain the condition of deities; those having the quality of rajas, the condition of men; and those having the quality of tamas, the condition of beasts." The Buddhist belief in transmigration is derived from that of the Brahmanic Hindûs, and agrees with it in principle, though it differs from it in the imaginary detail in which it was worked out. To enlarge here on this difference is not necessary, and yet it will not be superfluous to point out a great distinction which separates the notions of one class of Buddhists from those of the rest, as well as from those of the Brahmanic Hindûs. While other Hindûs believe that the same soul appears at the several births, the Southern Buddhists teach that the succession of existences is a successions of different souls. In the New Testament the soul is said to be "extinguished," and nothing remains but the good and bad acts performed in life; the result of these acts becomes the seed of a new life, which soul is the natural product of the soul of the former life. This dogma is illustrated by various similes, e.g., "One lamp is kindled so as to light for a time a lamp similar with that of the latter, but, nevertheless, without this the other light could not have originated." 2. Egypt.—According to the doctrine of the old Egyptians, the human race originated after the pure gods and spirits had left the earth; and this they did because the demons, who inhabited the earth, had revolted against them, and tainted it with guilt. In order that the demons might purify themselves, the gods created human bodies, so that in them they might expiate their guilt. These earthly bodies, united to the demons, are the human race, and human life is merely intended as a means of purifying the soul. The precepts regulating the course of life are laid down by the Egyptians for this end, and the judgment after death in the palace of Osiris decides whether it has been attained or not. If it has not, then the soul must return to the earth, to renew its expiations, either in a higher grade of an earthly life, or for a shorter period. Matter was believed to be a substantial reality; and the material form that was once united with spirit in the one being of man was believed to maintain that connection so long as the material form remained. Hence the Egyptian practice of embalming the dead, to keep the passage of the soul, and in its migration after a certain period subsequent to death. Little is known of the manner in which they imagined such migrations to take place; but, to judge from their religious system, there can be no doubt that they looked upon transmigration as a necessary process of purifying the soul and preparing it for eternal life. 7. Norse.—A very poetical form of belief in transmigration is found in Germanic mythology, according to which the soul, before entering its divine abode, assumes certain forms or animates certain objects, in which it resides for a short period—as a tree, a rose, a vine, a butterfly, a pigeon, etc. 8. Among the early Christians, Jerome relates, the doctrine of transmigration was taught as a traditional and esoteric one, which was only communicated to a select few. Gnossics and Manicheans welcomed it, and the more ancient mystics of Persia had found it in a ready explication of the fall of man and...
the doctrine of evil spirits. This considerable step towards reconciling the existence of suffering with that of a merciful God was distinctly set forth by Porphyry and Plotinus, and passed, in all probability, with all the strange heresies of ‘Illumination,’ through such institutions as the Cairene House of Sight and the Knights Templars, into the wild doctrines of the obscure sects of the Middle Ages in Europe. The Taborites, an extreme branch of the Hussites, are said to have accepted the doctrine.

One great philosopher, at least, of modern times, G. E. Lessing, accounted for human progress by a species of transmigration. He argues that the soul is a simple being capable of infinite conceptions, which are obtained in an infinite succession of time. The order and manner of the acquisition of these conceptions are the senses. These, at present, are five; but there is no evidence that they have always been the same. Nature, never taking a leap, must have gone through all the lower stages before it arrived at that which it occupies now. . . . And since nature contains many substances and powers which are not accessible to those senses with which it is now endowed, it must be assumed that there will be future stages at which the soul will have as many senses as correspond with the powers of nature.

9. Modern Savages.—Probably the lowest forms of this belief are those found among some of the tribes of Africa and America, which hold that the soul, immediately after death, must look out for a new owner, entering, if need be, even the body of an animal. Some of the Africans assume that the soul will choose with predilection the body of a person of similar rank to that of its former owner, or a near relation of his. They therefore frequently bury their dead near the houses of their relatives in order to enable the souls of the former to occupy the newly-born children of the latter, and the princely souls to re-enter the princely families; and sometimes holes are dug in the grave to facilitate the soul's egress from it.

In North America some tribes slaughter their captives to feed with their blood such souls as suspense. The negro widows of Matabma are especially afraid of the souls of their husbands; for at the death of these they immediately throw themselves into the water to drown their husbands' souls, which otherwise, they imagine, would cling to them. The natives of Madagascar seem to have invented a kind of artificial transmigration; for in the hut where a man is about to die they make a hole in the roof in order to catch the outgoing soul and to breathe it into the body of another man at the point of death.

See Metempsychosis in Blackwood's Mag. xix. 511; Confessions of a Metempsychologist, in Fraser's Mag. xii. 498; Blunt, Dict. of Hist. Transportation is a term used in Scotland for the removing or translation of a minister from one parish or congregation to another.

Transubstantiation (change of substance), a word applied to the alleged conversion or change of the substance of the bread and wine in the eucharist into the body and blood of Jesus Christ at the time the officiating priest utters the words of consecration.

1. The Term.—The first to mark the use of the word was Origen, and published, in all probability, with all the strange heresies of “Illumination,” through such institutions as the Cairene House of Sight and the Knights Templars, into the wild doctrines of the obscure sects of the Middle Ages in Europe. The Taborites, an extreme branch of the Hussites, are said to have accepted the doctrine.

The Church of England never adopted the word “transubstantiation” in any formal document; and the same time that the Council of Trent was fixing it upon the Latin Church, the sacred synod of the English Church was declaring, in the 28th art. of Religion, “Paenia et vini Transubstantiati in Eucharistia ex sacris litteris probari non potest, sed apertis Scripturis verbis adversum aeternam et universalis sanctificationis doctrinam ostendi” (A.D. 1552). This part of Art. xxxviii now stands in English in the following form: “Transubstantiation (or the change of the substance of bread and wine) in the supper of the Lord cannot be proved by Holy Writ, but is repugnant to the plain words of Scripture, overthroweth the nature of a sacrament, and hath given occasion to many superstitions” (A.D. 1571).

II. The Doctrine.—In the Confession of the Synod of the fourth Lateran Council, transubstantiation is thus defined: “There is only one universal Church, beyond which no man can in any way be saved. In which Jesus Christ is the King; and the Holy Spirit and blood are really contained in the sacrament of the altar, under the form of bread and wine, being transubstantiated, the bread into the body and the wine into the blood, by divine power.” By the institution of Corpus Christi Day by pope Urban IV in 1264 and pope Clement V in 1311 at the Synod of Vienne, the doctrine in question was expressed in a liturgical form and its popularity secured. Henceforth the sacrifice of the mass formed more than ever the centre of the Catholic ritual, and reflected new glory upon the priesthood.

The change effected by transubstantiation is declared to be so perfect and complete that, by connection and concomitance, the soul and divinity of Christ coexist with his flesh and blood under the species of bread and wine; and thus the elements, and every particle thereof, contain Christ whole and entire—divinity, humanity, soul, body, and blood, with all their component parts. Nothing remains of the form and wine except the accidents. The whole God and man Christ is contained in the bread and wine, and in every particle of the bread, and every drop of the wine. The natural result of such a doctrine is the elevation of the Host far adoration, a practice unknown till the rise of transubstantiation.

It is claimed by the advocates of transubstantiation that it had the belief and approval of the early fathers of the Church. Bingham (Christian Antiquities, bk. v, ch. v, § 4) asserts that “the ancient fathers have declared as plainly as words can make it that the change made in the elements of bread and wine by consecration is such a change as destroys their nature and substance, but only alters their qualities, and elevates them to a spiritual use, as is done in many other consecrations, where the qualities of things are much altered without any real change of substance.” We give some extracts from the authorities quoted by Bingham. Thus Gregory of Nyssa (De Bapt. Christi, iii, 369), “This altar before which we stand is but common stone in its nature . . . but after it is consecrated to the service of God, and has received a benediction, it is a holy table, an immaculate altar, not to be touched by any but the priests, and the Host is the greatest reverence of all. For the bread at first is but common bread, but when once it is sanctified by the holy mystery, it is made and called the body of Christ.” Cyril of Jerusalem (Catech. Myst. iii, note 8), “Beware that you take not this ointment to be bare ointment; for it is the true bread in the eucharist, after the invocation of the Holy Spirit on the body of Christ, so this holy ointment, after invocation.
TRAPPE

's not bare or common ointment, but it is the gift or grace of Christ and the Holy Spirit, who by his presence and divine nature makes it efficacious." Chrysostom, in his famous Epistle to Corinna, explaining the two natures of Christ, said that both were in the same body, and both to be understood, said: "As the bread, before it is sanctified, is called bread, but after the divine grace has sanctified it by the mediation of the priest it is no longer called bread, but dignified with the name of the body of the Lord, though the nature of bread remain in it, and they are not said to be two, but one body of the Lord; we see the same nature residing or dwelling in the human body, they both together make one Son and one Person." When this passage was first produced by Peter Martyr, it was looked upon as so unanswerable that the Romish Church declared it to be a forgery, and it was stolen from the Lambeth Library during the reign of Queen Mary. Theodorese plainly says that the bread and wine remain still in their own nature after consecration. Augustine, instructing the newly baptized respecting the sacrament, tells them that what they saw upon the altar was bread and the cup, as their own eyes could testify to them; but what their faith required to be instructed about was that there is a true body of Christ, etc. Answering an objection, supposed to be urged, that Christ had taken his body to heaven, Augustine replies, "These things, my brethren, are therefore called sacraments, because in them one thing is understood, namely, that which is seen has a bodily appearance; that which is a spiritual fruit." He also says that "this very bread and wine are the body and blood of Christ; consequently it could not be his natural body in the substance, but only sacramentally. The natural body of Christ is only in heaven, but the sacrament has the name of his body, because, though in outward, visible, and corporeal appearance it is only bread, yet it is attended with a spiritual fruit." Isidore, bishop of Seville (A.D. 690), speaking of the rites of the Church, says, "The bread, because it nourishes and strengthens our bodies, is therefore called the body of Christ; and the wine, because it creates blood in our flesh, is called the blood of Christ. Now, these two things are visible, but, being sanctified by the Holy Ghost, they become the sacrament of the Lord's body." (De Eccles., Off. 1, 18). From the time of Paschasius this doctrine had been the subject of angry controversy. The bitter arguments were taken up by the able scholastic writer Duns Scotus, whose opinions were maintained in the 11th century by Berengarius and his numerous followers.

III. Arguments.-The doctrine of transubstantiation is defended by a literal interpretation of the words spoken by our Lord at the last supper. "This is my body," "This is my blood." From these words it is argued that there is the real bodily presence of Christ's body, which is accounted for by the miracle of a change of substance of the bread and wine. In answer, it is urged:

1. The accounts which the Romanists give of this supposed miracle are at variance with their own statement of it. In such a case, for instance, as that of the miracle of Moses' rod, every one would say "the rod was changed into a serpent" (all the attributes of this last being present), not vice versa; so that by Romanists own account it is Christ's body and blood that are changed into bread and wine. Wherever a miracle was wrought in the Old or New Test., as in the instance above alluded to, or in the turning of the water into wine at Cana, such change was obvious to the senses: the appeal, in fact, for the reality of the miracle lay to the senses. Moreover, one might admit that if a Romish priest were to assert that he had converted our Saviour's body into bread and wine, he was safe as far as the senses go, we should hold, per contra, that if he professed to have turned bread and wine into the body and blood of Christ, that body and blood ought to be clear to the senses. We had bread and wine before the consecration; we have, as to sense, bread and wine after. In the whole history of miracles, nothing of this sort has ever been known; nor can we, under such circumstances, admit that the alleged change has taken place. So contemporary notaries.-for instance, the Roland de la Roselière, says: "As the bread, before it is sanctified, is called bread, but after the divine grace has sanctified it by the mediation of the priest it is no longer called bread, but dignified with the name of the body of the Lord, though the nature of bread remain in it, and they are not said to be two, but one body of the Lord; we see the same nature residing or dwelling in the human body, they both together make one Son and one Person." When this passage was first produced by Peter Martyr, it was looked upon as so unanswerable that the Romish Church declared it to be a forgery, and it was stolen from the Lambeth Library during the reign of Queen Mary. Theodorese plainly says that the bread and wine remain still in their own nature after consecration. Augustine, instructing the newly baptized respecting the sacrament, tells them that what they saw upon the altar was bread and the cup, as their own eyes could testify to them; but what their faith required to be instructed about was that there is a true body of Christ, etc.

2. The late origin of the doctrine of transubstantiation has been alleged as one reason for its rejection, and it is certainly a point worthy of serious notice. If, however, it had been as early as the superstitious veneration for relics and images, it would have been but an ancient error.

3. It must be evident to every one who is not blinded by ignorance and prejudice that our Lord's words, "This is my body," are more figurative expressions; and that they were no more likely to be designed to be received literally than the declarations made by our Lord that he was "a vine," "a lamb," "a door," "a way," "a light."

4. Besides, such a transubstantiation is so opposite to the testimony of our senses as completely to undermine the whole proof of all the miracles by which God has confirmed the revelation. According to such a transubstantiation, the same body is alive and dead at once, and may be in a million of different places whole and entire at the same instant of time: accidents remain without a substance, and substance without accidents; and a part of Christ's body is equal to the whole. This is contrary to the end of the sacraments, which is to represent and commemorate Christ, not to believe that he is corporally present (1 Cor. ix. 24, 25).

5. The practical evil of this and of consubstantiation (q. v.) is that it leads to the paying divine adoration to a bit of bread and the like; this superstitious notion of thinking that Christ's body can be received and act like a medicine on one who is "not considering the Lord's body," etc., as, e.g., an infant, or a man in a state of insensibility.

Trapp, John, a Puritan divine, was born in 1601, and educated at Christ Church, Oxford. He was schoolmaster at Stratford-on-Avon and vicar of Weston-on-Avon from 1624 until his death, in 1669. He wrote, God's Love-Tokens (Lond. 1637, 4to):—Theologia Theologica (1638; 1649, 8vo):—Commentaries on the Scriptures, viz.: St. John the Evangelist (1646, 4to); All the Epistles and the Revelation of St. John (1647, 4to; 2d ed. 1649, 4to); All the New Testament (1647, 2 vols. 4to; new ed. 1665, 8vo); Pentateuch (1590, 4to; 2d ed. 1654, 4to); Joshua to 2d Chronicles; Proverbs, Ecclesiastes, and Song of Solomon (1650 4to); The Twelve Minor Prophets (1654, fol.); Ezra, Nehemiah, Esther, Job, and the Psalms (1656, fol. 2d ed. 1657, fol.); Proverbs to Daniel (1656, fol.)—all published together in 1662 (5 vols. fol.). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Trapp, Joseph, D.D., an English divine, was born at Cherrington, Gloucestershire, in November, 1679. Educated at first by his father, he was afterwards placed under the care of the master of New College, Oxford,
and in 1659 entered Wadham College in the same city. He was chosen a fellow of his college in 1704, and first professor of poetry in 1709. In 1709-10 he acted as manager for Dr. Sacheverell on his memorable trial, and in 1711 was appointed chaplain to Sir Constantine Phipps, lord chancellor of Ireland. In 1729 he was presented to the rectory of Dauntsey, Wiltshire, which he resigned in 1721 for the vicarage of the united parishes of Christ Church, Newgate Street, and St. Leonard's, Fostar Lane, London. He received his degree of D.D. from Oxford in February, 1727. He was, in 1733, preferred to the rectory of Harlington, Middlesex, by lord Cobbe, who was chaplain he had previously been. In 1734 he was elected one of the joint lecturers of St. Martin's-in-the-Fields. He died at Harlington, Nov. 22, 1747. Mr. Trapp was a hard student, and published numerous works, viz., Prolegomena Poetices, etc. (Oxon. 1711-19, 3 vols. 8vo), being his Latin lectures as professor of poetics and Preservatives, etc., in several discourses (collected in 1722, 2 vols. 8vo): — The Aneid of Virgil Translated into Blank Verse (1718, 2 vols. 4to): — Explanatory Notes on the Four Gospels, etc. (1747-48, 2 vols. 8vo; Oxford, 1775, 8vo; 1805, 8vo): — besides poems in the monastic, theological tracts, etc. See Chalmers, Biog. Dict. s. v.; Allibone, Dict. of Brit. and Amer. Authors, s. v.

Trappists, the members of a monastic order in the Church of Rome which is characterized by the extreme austerity of its rule. It had its origin in the Cistercian abbey of La Trappe in Normandy during the abbacy of Rancé (q. v.). This prelate had been grossly addicted to sensual pleasures, and had also evinced considerable fondness for scholarly pursuits; but his conscience became awoke at length, and he was transformed into an intense ascetic. He renounced all the benefits he possessed except that of La Trappe; and when he had repaired the buildings of that abbey, he undertook the restoration of its ancient discipline. He introduced a number of strict Benedictines, and became a monk himself and regular abbot. In 1773 he caused the members of the order to renew their vows, and imposed on them the additional obligation to preserve unchanged all his arrangements and rules.

This immutable rule obliges the Trappists to sleep on a bed of straw, with pillow also of straw, placed on a board; and in the morning must arise at eight o'clock in the morning. Eleven hours of their day are devoted to prayers and masses, the remaining hours to hard labor performed in strict silence. Scientific pursuits are forbidden. The Trappists' thoughts are to be directed only to repentance and death. His only speech, apart from hymns and prayers, is the responsive greeting "Memento mori." He maintains a constant fast in the plainness and frugality of his food, which is served upon a bare table. After supper and subsequent religious meditations and exercises, he labors for a time upon the grave he is to occupy after death, and then retires to rest — at eight o'clock in summer, and at seven in winter. The order contains laybrothers, professors, and friars dominós, i. e. temporary associates. Its garb consists of a long robe with wide sleeves of coarse grayish-white wool; a black woollen cowl with two strips a foot wide which reach down to the knees; and a hood of black leather from which are suspended a rosary and a knife, symbols of devotion and toil; and wooden shoes. In the choir a dark-brown mantle with sleeves, and a cowl of like color, are worn. The lay-brothers wear gray habits.

Rance's immoderate austerity occasioned the death of many of his order, and brought him the censure of many critics. His aversion to literary employments was also condemned, among others by Mabillon in the Traité des Études Monastiques (1811). The order did not spread beyond its original limits until after the founder's death (Oct. 12, 1700), and has never become very strong in its numbers. A female branch was instituted at Clocet, France, in 1705, by princess Louise de Condé. The revolution expelled the Trappists from France, but they established themselves in Valsainte, Freiburg, Switzerland, where a monastery founded by Augustine l'Estrange (1719) was made an abbey by Pius VI, and Augustine placed at its head. Again assailed by the French and compelled to flee, the Trappists found a temporary home in Poland. They were everywhere disliked, however, and found no settled home until after the restoration of the Bourbons in 1817, when they recouered their original abbey of La Trappe. Other stations were established, among them a female convent near London. In 1834 a papal decretal consolidated the Trappists into a Congregatio des Religiosi Cisterciens de N. D. de la Trappe. They possess settlements in Algiers and North America, but are chiefly found in France. See the Algem. Darmst. Kirchenzeitung, 1831, p. 1424; 1832, p. 90, 119; 1833, p. 1464; 1833, p. 1097; Châteauneuf, Vie de Rancé (Par. 1844); Ritzert, Orden d. Trappisten (Darmst. 1833).

In 1851 Muard founded an order of Trappist preachers in the bishopric of Sens, who established themselves in a convent near Avallon. They observe the Trappist rule and wear the habit of the order, but by dispensation are allowed to break the vow of silence and serve the Church by preaching. See Der Katholik, Sept. 1861, p. 293 sq.; Herzog, Real-Encyclop. s. v.; Helyot, Ordres Religieux, s. v.

Trank, John, a Sabattarian Puritan, was a native of Somersetshire, and, after being a schoolmaster until he was thirty-four years of age, became a preacher in London about 1617. He was at first refused ordination by the bishop of Bath and Wells, but "afterwards got orders and began to vent his opinions." He enjoined severe asceticism upon his followers, inducing them to fast three days at a time, alleging that the third day's fast would bring them to the condition of justified saints, according to the promise "after two days he will revive us; in the third day he will raise us up, and we shall live in his sight" (Hos. vi. 1). Among other precepts

TRASREDIT 529

TRASKITES. See TRASK, JOHN.

Trachithon, the name of an ancient Tyrolean family which furnished two representatives to the episcopal office in the Church of Rome. The former of these was twenty-first bishop of Vienna, and died in 1702. The latter, Johann Joseph, Count Trachithon and Falckenstein, was born in 1714 at Vienna, in which city he studied (and possibly at Rome and Sienna), became canon and provost, and in 1751 was made prince-archbishop of Vienna. He issued a pastoral letter in which he urged his clergy to prefer the presentation of necessary truths to that of merely useful truths in their sermons, and remarked that the publication of excessive sermons in the preaching of the merits of saints, while but little attention was given to the preaching of the merits of Christ. He also condemned the introduction of odd or laughable elements into the preaching. This circular occasioned great excitement, and called forth a number of apologetical and polemical treatises which were published in Lette. Hist. Eccl. xviii, 1008 sq.; Heinianus, Kirchenhist. iv, 329 sq.; and Henke, Kirchengesch. v, 292 sq. Many Protestants suspected that the archbishop had understated the tenets of his Church in order to win over un instructed Protestants, and many Romanists charged him with having been the agent of the Church in the city, and his measures were mistaken. Trachithon was influenced by the "enlightenment" of his time, but was none the less a zealous supporter of the Church of Rome. His letter was, however, productive of no special results. Maria Theresa appointed him chief director of studies in the University of Vienna and director of the Theological, and professor Benedict XIV made him cardinal in 1756. He persuaded the curia to reduce the number of festivals in his diocese. He died March 10, 1757. His pastoral letter has been translated into many languages. See Von Eichendorff, Geschichte der Kirche d. 18. Jahrh. (Leips. 1782 sq.), i, 554, 550; Schröbich, Kirchengesch. vii, 309-313; Leben d. Cardinale d. 18. Jahrh. iii, 260—Herzog, Real-Encyklop. s. v.

TRAVEL (travelling; prop. θαρακία, to hoard, ἄραις, in Scripture signifies anything collected together in stores, e.g. a treasure of corn, of wine, of oil; treasures of gold, silver, brass; treasures of coined money. Snow, winds, hail, rain, are also counted as treasures in Scripture (Gen. xlix, 26; Exod. xxvi, 7; Jer. li, 16). We read also of a treasure of good works, treasures of iniquity, to lay up treasures in heaven, to bring forth good or evil out of the treasures of the heart. Joseph told his brethren, when they found their money returned in their sacks, that God had given them in the land; Gen, xxxvi, 10). The king of Judah had keepers of their treasures, both in city and country (1 Chron. xxvii, 25; 2 Chron. xxxii, 27, etc.), and the places where these magazines were laid up were called treasure-cities. Pharaoh compelled the Hebrews to build them treasure-cities, or magazines (Exod. i, 11). Joseph's brothers, however, were afraid to address anything in great abundance, "In Jesus Christ.
are hidden all the treasures of wisdom and knowledge" (Col. ii, 3). The wise man says that wisdom contains in its treasures understanding, the knowledge of religion, etc. Paul (Rom. ii, 5) speaks of heaping up a treasure of wrath against the day of wrath; and the prophet Amos says (iii, 10) they lay up for themselves treasures of iniquity, when it was in a storehouse, which will bring them a thousand calamities. The treasures of iniquity or iniquity (Prov. x, 2) express ill-gotten riches. The treasures of iniquity, says the wise man, will eventually bring no profit; and in the same sense Christ calls the riches of iniquity the monies of unrighteousness, an estate wickedly acquired (Luke xvi, 9). Gospel faith is the treasure of the just; but Paul says: "We have this treasure in earthen vessels" (2 Cor. iv, 7). Isaiah says of a good man, "The fear of the Lord is his treasure" (xxxii, 6). On the Scripture allusions to "hid treasures" see Thomson, Land and Book, i, 195 sq.; Freeman, "Hand-Book of Bible Manners," p. 350 sq. See Stone.

Treasure (technically Heb. and Chald. שָׁרוֹת, gisbār, Ezra i, 8; vii, 21; Chald. also שָׁרוֹת, gidbār, Dan. iii, 2, 5; improb. זַקִּים, sokēn, Isa. xxii, 15, an associate, i.e. the king's intimate friend), an important officer in all Oriental courts. See King. In Dan. iii, 2, 3, the Chald. שָׁרוֹת, adarqazer (Sept. τραπεζευς, A. V. "judge"), occurs among the titles of Babylonian royal officers, and has (perhaps from the resemblance of the word to the Greek ἐγκόμος) been thought by some to mean the officers of the Turkish court in the New Testament, now called efendis, who have the charge of the receipts and disbursements of the public treasury. Generals and others conceive that the word means chief-judges (from νόμος, a judge); but Dr. Lee seems to prefer seeking its meaning in the Persian adar, fire, and gazar, passing; and hence concludes that the adargazer were probably officers of state who presided over the ordeals by fire, and other matters connected with the government of Babylon. See Judge.

TREASURER, ECCLESIASTICAL, the keeper of the treasures, e.g. the muniments, sacred vessels, relics, and valuables of a church, cathedral, or religious house. He was known by different names: sacrist, from having charge of the sacristy; cellarer, as preserving the eschatistic elements and canons for the use of the church. In the New Testament, the custos et ministrii, of the eleven apostles in Rome; the officina, in that of the Bishops in France and Germany; custos et ministeriarch in Italy; and in the Greek συμβουλευτής. The custos had charge of all the contents of the Church, but at length became superintendent of deputies, discharging his personal duties, and at last took the title of treasurer, as having charge of the relics and valuables of the Church. He is the Old-English cynereward and medieval perpetual sacrist, and now represented by the humbler sexton. Every necessary for the Church and divine service was furnished by him. The old title of custos described before the 13th century to his church-service. In the treasurer usually succeeded the chancellor, and had a stall appointed to himself. His dignity was founded at York in the 11th century; at Chichester, Lichfield, Wells, Hereford, St. Paul's, in the 12th; and at St. David's and Llandaff in the 13th. It has been commonly preserved and exercised since the Reformation, both in English colleges and cathedrals, but has fallen into disuse at York, Lincoln, and Lichfield, and at Exeter, Llandaff, and Amiens is held by the bishop. The monastic treasurer, or barser, received all the rents, was auditor of all the officers' accounts, paymaster of wages, and the works done in the abbey.—Lee, Gloss. of All. Eng. Term., s.v.; Walcott, Soc. Archæol. s.v.

Treasury (usually גזָזִים, giszit, a collection, often rendered "treasure"; sometimes Heb. רֶסֶּר, gassim [Ezra. iii, 9; iv, 1], or Chald. גַּּיְּפִים, gis sim [Ezra v, 17; vi, 17; vii, 20, "treasure-house"], a store or deposit). See also ASUPPIM. In 1 Chron. xxviii, 11, the treasury of the Temple is called יִתְנָה, ganaz (and means substantially the same as the κόπερας of Matt. xxvii, 6, namely, the hoard of money contributed towards the expenses of that edifice. The same thing, or perhaps the same kind of contribution-boxes called for this purpose were kept, is designated in the New Test. as the γαστρίακα (Mark xii, 41; Luke xxii, 1; John viii, 20), and so likewise Josephus (Ant. xix, 6, 1; Warr. v, 2), after the Sept. (Neh. x, 3; xiii, 4, 5; Esth. iii, 9). According to the rabbins this treasury was in the court of the women, where stood three reception-boxes from their form or funnel-shaped mouth, into which the Jews cast their offerings (comp. Exod. xxx, 13 sq.). See Temple.

Treat, SAMUEL, a Congregational minister, was born at Milford, Conn., in 1647 (or 1648), and graduated at Harvard College in 1669. He was ordained and settled at Eastham, Plymouth Colony, in 1672. Soon after his settlement he studied the Indian language, and devoted to the Indians in his neighborhood much of his time and attention. Through his labors many of the savages were brought into a state of civilization and order, and not a few of them were converted to the Christian faith. In 1650 he wrote a book to Increase Mather, in which he states that there were within the limits of Eastham five hundred adult Indians, to whom he had for many years imparted the Gospel in their own language. He had under him four Indian teachers, who read in separate villages on every Sabbath, excepting every fourth, when he himself preached the sermon which he wrote for them. He procured schoolmasters, and persuaded the Indians to choose from among themselves six magistrates, who held regular courts. In 1700 he began to serve the new settlement of Truro, and performed parochial duties until a church was established. After having passed, near half a century in the most beloved exertions as a minister of the Gospel, he died, March 18, 1717. He published the Confession of Faith in the Nauset Indian language, and an Election Sermon (1713). See Sprague, Annals of Amer. Pulpit, i, 183.

Treaty. See Alliance.

Treckānum, an anthem sung after the communion, before the 6th century, in honor of the Holy Trinity; called by this name in Gaul. Some think it was the Greek ἁρμόζω, harmonize, or the formation of the Holy Trinity sung after the ἁρμοζόμεθα Hymns. The latter form is mentioned by Cyril of Jerusalem, Basil, and the Mozarabic and Gallican liturgies.

Tredischi, Nicholas, an eminent ecclesiastic, was a native of Sicily, born towards the close of the 14th century, and became one of the most celebrated canons of his time. He was present at the Council of Basle, in which he took a prominent part, and was made a cardinal by Felix V in 1440.

Tree, prop. גָּדרָה, ēts (דָּרוֹפָה), also signifies wood (Exodus); in Jer. vi, 6, the fem. נֶבֶר, nib, is used. Besides this generic term, there also occur peculiar words of a more distinct signification, e.g. עֵץ, elam (1 Sam. xxii, 6; xxxi, 13; "gnome" or "tree") in Gen. xxvi, 33, which is thought to denote the damarisk or else the terebinth; נֵבֶר, eph (Isa. lix, 5; Ezek. xxxix, 14), Chald. עֵץ, ētân (Dan. iv, 10, sq.), prob. the oak (v. o.); דָּרוֹת, ēts ładā ("goodly tree"), Lev. xxiii, 40, נֶבֶר הַּיָּדָן, māḥāth ("thick tree," ver. 40; Neh. viii, 15, and בֵּית, tsitel ("shady tree"), Job xi, 21, 22), which designate rather vigorous trees in general than specific varieties. See TABERNACLES, FESTIVAL OF. For a list of all the kinds of trees (including shrubs, plants, fruits, etc.) mentioned in the Bible, see BOTANY. See Taylor, Trees of Scripture (London, 1842).
TREE OF LIFE

In Eastern countries trees are not only graceful ornaments in the landscape, but essential to the comfort and support of the inhabitants. The Hebrews were forbidden to destroy the fruit-trees of their enemies in time of war, "for the tree of the field is man's life" (Deut. xx, 19, 20). Trees of any kind are not now very abundant in Palestine. Some trees are found, by an examination of the internal zones, to attain to a very long age. There are some in existence which are stated to have attained a longevity of three thousand years, and for some of them a still higher antiquity is claimed. Individual trees in Palestine are often notable for historical and sacred associations (Thomson, Land and Book, ii, 151). See AlON-BACHETH; MEONEMI.

TRELAWNEY

for, had they been allowed to retain the use of the tree of life, it would, in their condition, have sustained them in an immortality of guilt and misery. See MILLER, De Arbore Bosi et Mali, et Arb. Vite (Lyon, 1755); Journal of Soc. Lit., Oct. 1862; Jan. and Oct. 1864. See EDEN.

Tregelles, Samuel Pridaux, LL.D., an eminent English Biblical scholar, was born at Falmouth, Jan. 30, 1813. After receiving an education at the Falmouth Classical School, he was employed in the iron-works at Neath Abbey, Glamorganshire, 1828-34, and became, in 1836, a private tutor in Falmouth. Devoting himself to the study of the Scriptures, he visited the Continent several times for the purpose of collecting the principal uncial MSS. At Rome he was permitted to see the Vatican MS., but not to copy it. He received his degree of LL.D. from St. Andrews University in 1850, and in 1853 received an annual pension of one hundred pounds. Of Quaker parentage, he became associated with the Plymouth Brethren, was an active philanthropist, and was appointed a member of the company on the revision of the A. V. of the Old Test. Dr. Tregelles died at Plymouth, April 24, 1875. He published, Englishman's Greek Concordance to the New Testament, (1839, imp. 8vo; 24 ed. 1844, imp. 8vo; Index to, 1845, imp. 8vo):—Englishman's Hebrew and Chaldee Concordance to the Old Testament, (1843, 2 vols. imp. 8vo):—Book of Revelation in Greek, etc. (1844, 8vo):—Geuenius's Hebrew and Chaldee Lexicon to the Old Testament, Scriptures, etc. (1847, 4to; last ed. 1857, 4to):—Remarks on the Prophecies of the Book of Daniel (1847, 8vo; 4th ed. with notes, 1858, 4to):—Defence of the Authenticity of the Book of Daniel, also published separately, 1829, 8vo):—Book of Revelation, Translated from the Greek Text (1848, 12mo; 1858, 12mo):—Prospectus of a Critical Edition of the Greek New Testament, etc. (Plymouth, 1848, 12mo):—On the Original Language of St. Matthew's Gospel (London, 1858, 8vo):—The Jansenists: their Rise, etc. (1847):—Lecture on the Historic Evidence of the Authorship, etc., of the Books of the New Testament, (1852, small 8vo):—Heads of Hebrew Grammar (1862, 8vo):—An Account of the Printed Text of the Greek New Testament, etc. (1854, 8vo):—The Greek New Testament, Edited from Ancient Authorities, etc. (1857-72); this last is considered his most important work:—Codex Zacynthius (1861, small fol.):—Canon Mercurianus, earliest catalogue of books of the New Testament. (Camb. and London, 1868, 4to). For full description of works, see Allibone, Dict. of Brit. and Amer. Authors, s. v.

Trelawney, Sir Harry, an English baronet, was born in 1756, and was educated at Christ Church College, Oxford. He was in succession a preacher among the Methodists, then served a Presbyterian congregation at West Loo, Cornwall, and afterwards seceded to the Dissenters. Returning to the Church of England, he obtained a rectory in the west of England, and was made prebendary of Exeter in 1789. According to Allibone, he died a Roman Catholic, at Laveno, Italy, in 1834. He published a sermon on 1 Cor. iii, 9, Ministers Laborers together with God (London, 1778, 4to). See Lond. Gen. Mag. 1834, i, 652; Allibone, Dict. of Brit. and Amer. Authors, s. v.; Darling, Cyclop. Bibl. s. v.
Tremendel, Friedrich Adolf, a German philosopher, was born at Eutin, near Lubeck, Nov. 30, 1802; and was educated at the gymnasium of his native town, and at the universities of Kiel, Leipzig, and Berlin. From 1829 to 1832 he held the office of postmaster-general Von Nagler, and in the latter year was appointed professor extraordinary of philosophy at Berlin. This position was exchanged, in 1837, for that of professor in ordinary. He was a member of the Berlin academy in 1846, and was its secretary in the "modern-philosophical" section from 1847 until his death, Jan. 24, 1872.

"On that very day the journals announced his decoration by the king as a knight of the Order of Merit, for his eminence in science and art." "The foundation of Trendelenburg's doctrine is essentially Platonic and Aristotelian. He terms his philosophy the "organic view" of the world, according to it each lower stage in existence is the basis of the higher stages, and necessarily involved in the higher. The soul is the self-realizing idea of man. God is the unconditioned, not directly demonstrable, but implied, with logical necessity; in the whole fabric of the universe and of human thought. Among Trendelenburg's works are: Elementa Logicae Aristotelicae (Berlin, 1887; 6th ed. 1868); Logische Untersuchungen (Ibid. 1840; 3d ed. 1870); Erläuterungen zu den Elementen der aristotelischen Logik (2d ed. 1881); Naturrecht auf den Grundriss aufgebaut (Ibid. 1852; 2d ed. 1868); Zur Erinnerung an F. A. Trendelenburg (Berlin, 1872); Brautschek, Adolf Trendelenburg (Ibid. 1873); Prantl, Ge¬
dächtnissrede auf F. A. Trendelenburg (Munich, 1873); Ueberweg, Hist. of Modern Phil. (see Index).

Trendelenburg, Johann Georg, a German professor of ancient languages, was born Feb. 22, 1757. For a number of years he was professor of languages at the academical gymnasium in Dantzic, where he died March 11, 1825. He published, Primi Libri Macrobius Graeco Graeco (Strassburg, 1759; 4th ed. 1834); Textus cum Versione Syriaco Collatio Instructa (reprinted in Eichhorn's Repertiurn, xx, 89); Christomathia Fluviana, sive Locs Illustris ex Flavio Josepho Deletis et Animalvivandi Influatri (Ipsa, 1768); Christomathia Hecatopita (Ibid. 1784); Commentatio in Verba Novaulinae Davidi 2 Sam. xxii, 1-7 (Gott. 1777); Die ersten Anfangsgründe der hebr. Sprache (Dantzic, 1784). See Fürst, Bibl. Jud. iii, 448; Winer, Handbuch der theolog. Literatur, ii, 807. (B. F.)

Trent, the Council of (Concilium Tridentinum), was held in Trent, a city of Tyrol, Austria, on the left bank of the Adige. It had a cathedral, entirely of marble in the Byzantine style. In the Church of St. Maria Maggiore are the portraits of the members of the council, which was held in this building. This council was first convoked June 2, 1536, by Pope Paul III, to be held at Mantua, May 23, 1537. Subsequently, the duke of Mantua having refused to permit the assembly of the council in that city, the pope prorogued the meeting to November, without naming any place. Afterwards, by another bull, he prorogued it till May 1538, and named Vicenza as the place of assembly; nominating in the meantime certain cardinals and prelates to look into the question of reform, who, in consequence, drew up a long report upon the subject, in which they divide the abuses needing correction into two heads:

1. Those concerning the Church in general.
2. Those peculiar to the Church of Rome.

When the time arrived, however, not a single bishop appeared at Vicenza; whereupon the pope again prorogued the council to Easter, 1539, and subsequently for the prorogation of the pope to order that he should signify his pleasure upon the subject. At last, at the end of three years, in the year 1542, after much dispute between the pope, the emperor, and the other princes in the Roman common as to the place in which the council should be held, the pope's proposition that it should be held at Trent was accepted; whereat the bull was published, May 29, convoking the council to Trent on Nov. 1 in that year. Subsequently he named, as his legates
in the council, cardinal John del Monte, bishop of Palestrina; the cardinal-priest of Sainte-Croix, Marcellus Cervinus; and the cardinal-deacon Reginald Pole. However, difficulties arose, which caused the opening of the council to be further delayed, and the first meeting was not held until the 10th December. The following year saw the division of this council in the history of the Reformation, and in Roman Catholic doctrine since, justifies an unusually full treatment of it here.

Session I (Dec. 13, 1545).—When the council was opened there were present the three legates, four archbishops, in twenty-two bishops, in their pontifical vestments. Mass was said by the cardinal del Monte, and a sermon preached by the bishop of Bitonte; after which the bull given Nov. 19, 1544, and that of February, 1545, were read, and cardinal del Monte explained the objects which were proposed in assembling the council, viz., the extirpation of heresy, the re-establishment of ecclesiastical discipline, the reformation of morals, and the restoration of peace and unity.

On Dec. 18 and 22 congregations were held, in which some discussion arose about the care and order to be observed by prelates in their life and behavior during the council.

On Jan. 5 another congress was held, in which cardinal del Monte proposed that the order to be observed in conducting the business of the council should be the same with that at the last Council of Lateran, where the examination of the different matters had been intrusted to Apostolic legates, who had been divided into three classes; and when the decrees relating to any matter had been drawn up, they were submitted to the consideration of a general congregation; so that all was done without any disputing and discussion in the session. A dispute in this congregation about the style to be given to the council in the decrees. The pope had decreed that they should run in this form, "The Holy Ecumenical and General Council of Trent, the Legates of the Apostolic See presiding;" but the Gallican bishops, and many of the Spaniards, insisted, that the words "the Legates of the Universal Church" should be added. This, however, the legates refused, remembering that such had been the form used in the councils of Constance and Basle, and fearing lest, if this addition were made, the rest of the form of Constance and Basle might follow, viz., "it was called immediately from Jesus Christ, and to which every person, of whatever dignity, not excepting the pope, is bound to yield obedience."

Session II (Jan. 7, 1546).—At this session forty-three prelates were present. A bull was read prohibiting the proctors of absent prelates to vote; also another, excluding all the faithful then in Trent to live in the fear of God, and to fast and pray. The learned were exhorted to give their attention to the question how the rising heresies could be best extinguished. The question about the style of the council was again raised.

In the following congregation, Jan. 18, the same question was again debated. Nothing was settled in this matter, and they then proceeded to deliberate upon which of the three subjects proposed to be discussed in the council (viz., the extirpation of heresy, the reformation of discipline, and the restoration of peace) should be first handled. Three prelates were appointed to examine the procurating papers and excuses of absent bishops.

In the next congregation the deliberations on the subject to be first proposed in the council were resumed. Some wished that the question of reform should be first opened; others, on the contrary, maintained that question arising was the most important. There were divided immediately into two lots. A third party, among whom was Thomas Campeggio, bishop of Feltre, asserted that the two questions of doctrine and reformation were inseparable, and must be treated of together. This latter opinion ultimately prevailed, but at the moment the sense of the assembly was so divided that no decision was arrived at.

In the congregation held Jan. 22, the party in favor of entering at once upon the subject of reform was much increased, but the three legates continued their opposition to their scheme. Subsequently, however, they proposed that they should always take into consideration the national interest relative to the objects of this council, and then to one relating to reform, bearing one upon the other.

On the 24th a curious dispute arose about the proper seal for the use of the council. Some desired that a new seal should be made; but the legates succeeded in having the seal of the first legate attached to the syndical letter.

Session III (Feb. 4, 1546).—In this session nothing was done except to recite the Creed, word for word.

In a congress held Feb. 22, the legates proposed that the council should enter upon the subject of the Holy Scriptures; and four doctrinal articles were presented, extracted by the theologians from the writings of Luther upon the subject of Holy Scripture, which they affirmed to be contrary to the orthodox faith.

1. That all the articles of the Christian faith necessary to be believed are contained in Holy Scripture; and that it is necessary to hold the oral traditions which the Church has received from the first to be of equal authority with the Old and New Test.

2. That only such books as the Jews acknowledged were to be read in the council, the Gospels, and the Epistles to the Hebrews, the Epistle of James, the Second Epistle of Peter, the Second and Third Epistles of John, the Apocalypse, and as the Apocalypse should be erased from the canon of the New Test.

3. That Holy Scripture is easy to be understood, and clear, and therefore a commentary is needed, but only the Spirit of Jesus Christ.

The first two articles were debated in the four following congregations. As to the first article, the congregation came to the decision that the Christian faith is contained partly in Holy Scripture and partly in the traditions of the Church. Upon the second article much discussion arose. All agreed in receiving all the books read in the Roman Church, including the Apocryphal books, alleging the authority of the catalogues drawn up in the councils of Laodicea and Carthage, and those under Ignatius I and Gelasius I; but there were four opinions as to the method to be observed in drawing up the catalogue. One party wished to divide the books into two classes—one containing those which have always been received without dispute, the other containing those which had been doubted. The second party desired to subdivide the second class into (1) books of the Latin Vulgate should be declared to be canonical and inspired.

The discussion was resumed on March 8, but not decided: the members, however, unanimously agreed that the traditions of the Church are equal in authority to Holy Scripture.

In the following congregation it was decided that the catalogue of the books of Holy Scripture should be drawn up without any of the proposed distinctions, and that they should be declared to be all of equal authority.

The authority of the Latin Vulgate (declared in the third article to be full of errors) came under consideration in subsequent congregations, and it was almost unanimously declared to be authentic. With regard to the fourth article, it was agreed that in interpreting Scripture men must be guided by the voice of the fathers and of the Church.

Session IV (April 12, 1546).—Between sixty and seventy prelates attended this session. Two decrees were read: 1. Upon the canon of Scripture, which declares that the holy council receives all the books of the Old and New Test, as well as all the traditions of the Church respecting faith and morals, as having proceeded from the lips of Jesus Christ himself, or as having been dic-
tated by the Holy Spirit and preserved in the Catholic Church by a continued succession; and that it looks upon both the written and unwritten Word with equal respect and venerates the books received as canonical by the Church of Rome, and as they are found in the Vulgate, and anathematizes all who refuse to acknowledge them as such. The second decree declares the authenticity of the Vulgate, forbids all private interpretation of it, and orders that no copies be printed or circulated without authority, under penalty of fine and anathema.

In another congregation the abuses relating to lecturers on Holy Scripture and preachers were discussed; also those arising from the non-residence of bishops. After this the question of original sin came under consideration, and nine articles taken from the Lutheran books were drawn up and offered for examination, upon which some discussion took place. Ultimately, however, a decree was drawn up upon the subject, divided into five canons.

1. Treats of the personal sin of Adam.
2. Of the transgression of that sin to his posterity.
3. Of its remedy, i.e. holy baptism.
4. Of infant baptism.
5. Of the doctrine which still remains in those who have been baptized.

A great dispute arose between the Franciscans and Dominicans concerning the immaculate conception of the Blessed Virgin. The Franciscans insisted that she should be specially declared to be free from the taint of original sin, while the Dominicans, maintaining that although the Church had tolerated the opinion concerning the immaculate conception, it was sufficiently clear that the Virgin was not exempt from the common infection of our nature. A decree of reformation, in two chapters, was also read.

November 15 (June 18, 1546).—In this session the decree concerning original sin was passed, containing the five canons mentioned above, enforced by anathemas. Afterwards the fathers declared that it was not their intention to include the Virgin in this decree, and that upon this subject the constitutions of pope Sixtus IV were to be followed, thus leaving the immaculate conception an open question.

In a congregation held June 18, they proceeded to consider the questions relating to grace and good works. Also the subject of residence of bishops and pastors was discussed. The cardinal del Monte and some of the fathers declared that the delinquencies which had arisen to the non-residence of bishops, while many of the bishops maintained that they were to be attributed to the multitudes of friars and other privileged persons whom the pope permitted to wander about and preach in spite of the bishops, who, in consequence, could do no good even if they were in residence.

In the congregation held June 30, twenty-five articles, professedly drawn up from the Lutheran writings on the subject of justification, were proposed for examination. Some of these articles seem well to have merited the judgment passed upon them; thus, among others,

5. Declares that repentance for past sin is altogether unnecessary for life.
6. The fear of hell is a sin, and makes the sinner worse.
7. The doctrine of justification by faith is mediating between reason and, and sorrow for, past sin makes a man a great sinner.
8. Faith alone is required; the only sin is unbelief; others are commanded not forbidden.
9. He who has faith is free from the precepts of the law, and has no need of works in order to be saved: nothing that I do can be so evil that it can either accuse or condemn him.
10. No sin separates from God's grace but what is incomprehensible.

8. At this time the three ambassadors of the king of France arrived—viz. Durec, Lignieres, and Pierre Danze. The last mentioned delivered a long discourse, in the course of which he endeavored to prove the contrary, in order to attack the privileges of the kingdom and Church of France.

In a congregation held Aug. 20, the subject of justification was again warmly discussed, as well as the doctrine of Luther concerning free-will and predestination. Upon this subject, every person was required to state the books received as canonical by the Church of Rome, and as they are found in the Vulgate, and anathematizes all who refuse to acknowledge them as such. The second decree declares the authenticity of the Vulgate, forbids all private interpretation of it, and orders that no copies be printed or circulated without authority, under penalty of fine and anathema.

In another congregation the abuses relating to lecturers on Holy Scripture and preachers were discussed; also those arising from the non-residence of bishops. After this the question of original sin came under consideration, and nine articles taken from the Lutheran books were drawn up and offered for examination, upon which some discussion took place. Ultimately, however, a decree was drawn up upon the subject, divided into five canons. These decrees were mainly composed by cardinal Sainte-Croix, who bestowed infinite pains upon them; at least one hundred congregations were held under the subject. Afterwards they returned to the consideration of the reformation of the Church, and to the question about episcopal residence. Most of the theologians present, especially the Dominicans, maintained that residence was a matter not to be necessarily binding, but of discipline and opinion. The Spaniards held the same opinion. The legates, seeing that the discussion tended to bring the papal authority and power into question, endeavored to put a stop to it.

November 17 (Jan. 13, 1547).—In this session the decree concerning doctrine was read; it contained sixteen chapters and thirty-three canons against heretics.

These chapters declare that sinners are brought into a state to receive justification when excited and helped by grace, and believing the word of God, they freely turn to God, believe all that he has revealed, especially that the sinner is justified by the grace of God, given to him through the redemption of Jesus Christ; and when, acknowledging their sinfulness and filled with a salutary fear of God's justice, yet trusting to his mercy, they consent and submit to God's will, they are justified and are thereby enabled to them for the sake of Jesus Christ, and therefore begin to love him as the only source of all righteousness, and to the things through which they have conceived against them, i.e. through that repentance which all must feel before baptism: in short, when they resolve to be baptized, to lead a new life, and to follow the commandments of God.

After this the decree explains the nature and effects of justification, saying that it does not consist merely in the remission of sin, but also in sanctification and inward renewal. The causes of justification are divided into two kinds: the efficient cause is God himself, who, of his mercy, freely washes and sanctifies the soul which he justifies and unites to himself, who is the pledge of our inheritance; the intentional cause is the sacrament of baptism, without which no one can be justified; and, finally, the formal cause is the grace of God which is the direct righteousness by which he is righteous in himself, but that by which he makes us righteous; i.e. with which being enrolled we become renewed persons, who are not merely accounted righteous, but are made really so by receiving, as it were, righteousness in ourselves, each according to the measure given to us at the will of the Holy Spirit and in proportion to the proper disposition and co-operation of each. Thus the sinner, by means of grace, becomes righteous, a friend of God, and an heir of everlasting life; and it is the Holy Spirit who works this marvellous change in him by forming holy habits in his heart—habits of faith, hope, and charity—which unite him closely to Jesus Christ and make of him a partaker of all the graces of Christ. Having been already, although justified, to imagine himself exempt from the observation of God's commandments. No man may dare, much less presume, to attribute to himself, as if it were possible for a man, even after justification, to keep his commandments; since God, through nothing impossible, but with the commandment he desires us to do all that we can, and to seek for aid and grace to enable us to fulfill that which in our natural strength we cannot do.

The decree further teaches upon this subject that no one may seek or expect any other justification than that by means of faith and innocence, in order to assure himself of being among the number of the elect and predestinated to eternal life, as, if, having heard the truth, they were justified, it would be impossible for them to withdraw again, or, at least, if, falling into sin after justification, he must of necessity cease again; and that, with this special revelation from God, it is impossible for any one who are those whom he has chosen. It also teaches the same of persons whom he has bestowed infinite pains upon; those least who persevere to the end shall be saved; that no one in
TRENT, COUNCIL OF

1. Anathematizes those who maintain that the seven sacraments are all portions of the doctrine of cliff.
2. Anathematizes those who maintain that any one sacrament is of more worth than another.
3. Anathematizes those who deny that the sacraments confer grace ex opere operato, i.e. by their own proper virtue.
4. Anathematizes those who deny that baptism, orders, and confirmation imprint an ineffaceable character.
5. Anathematizes those who assert that the sacraments are the work of Satan.
6. Anathematizes those who assert that the ministers perameter, and the people themselves, and not the minister, administer the sacraments.
7. Anathematizes those who deny that the intention of the minister to do what the Church does is necessary to the effectual administration of the sacraments.
8. Anathematizes those who assert that the minister of Christ, and the priest, male and female, may preach God's word and administer the sacraments.
9. Anathematizes those who assert that the ministers of the Church may change the prescribed form.
10. Anathematizes those who assert that real and natural water is not necessary in baptism.
11. Anathematizes those who maintain that the Church of Rome does not teach the true doctrine on the subject of baptism.
12. Anathematizes those who deny the validity of baptism conferred by those who have been ordained by the Pope and not by the bishop of the place.
13. Anathematizes those who maintain that the baptized need only believe, and not keep the law of God.
14. Anathematizes those who maintain that the baptized infants are not to be reckoned among the faithful.
15. Anathematizes those who deny that baptized infants must be baptized in infancy, or else be of no avail.
16. Anathematizes those who maintain that persons baptized in infancy should, when they come of age, be asked whether they are willing to ratify the promise made in their infancy.

These chapters were accompanied by thirty-three canons, which anathematized those who held the opinions specified in them contrary to the tenor of the doctrine contained in the chapters.

Besides this decree, another was published in this session, relating to the Reformation, containing five chapters upon the subject of residence.

It renewed the ancient canons against non-resident prelates, and especially against the unaffecting dignity, being absent for six months together from his diocese, without just and sufficient cause, and deprived of the fourth part of his revenue; and that if he be away during the rest of the year, he shall lose another fourth; and if his absence be prolonged beyond this, the metropolitan shall be obliged to proceed against him, and to require his resignation. It also anathematized those who maintain that the Pope, when he is in the chair, is subject to any examination, or can be required to give any account of the administration of his church.

The decree then goes on to treat of the reform of ecclesiastical residence, and of the visitation of chapters, and their proceedings. It declares that no bishop or dean can perform any episcopal function whatever out of their own dioceses without the consent of the bishop of the place.

Before the seventh session a congregation was held, in which it was agreed to treat in the next place of the sacraments, and thirty-six articles, taken from the Lutheran books, were proposed for examination, after which thirty canons upon the subject were drawn up viz., thirteen on the sacraments in general, fourteen on baptism, and three on confirmation. They relate to their number, their necessity, excellence, the manner in which they confer grace, which they declared to be ex opere operato, i.e. that the sacraments confer grace upon all those recipients who do not, by mortal sin, offer a bar to its reception; e.g. grace is conferred by baptism upon infants, although they bring with them no pious affection.

In the council of Trent, the sacrament of baptism was anathematized.

After this the question of reformation was discussed; amongst other things, it was debated whether a plurality of benefices requiring residence is forbidden by the divine law.

Session VII (March 3, 1647).—In this session the thirty canons already noted relating to the sacraments were further considered, and the following were adopted:

Among the thirteen on the sacraments in general were the following:

Secondly, the decree of reformation, containing fifteen chapters, relative to the election of bishops, pluralities, etc., was passed.

In a congregation which followed, the question of transferring the council to some other place was discussed, a report having been circulated that a contagious disease had broken out in the city of Trent.

Session VIII (March 11, 1647).—In this session a decree was read transferring the council to Bologna, which was approved by about two thirds of the assembly; the rest, who were mostly Spaniards or other subjects of the emperor, strongly opposed the translation. The emperor complained much of the transfer of the council, and ordered those who opposed it to remain at Trent, which they did.

Session IX (April 21, 1547).—In the first session held at Bologna, the legates and thirty-four bishops were present. A decree was read postponing all business to the next session, to be held on June 2 ensuing, in order to give time for the prelates to arrive.

Session X (June 2, 1547).—At this session, however, there were but six archbishops, thirty-six bishops, one abbot, and two generals of orders present; the rest continuing to sit at Trent. It was deemed advisable to prorogue the session to Sept. 15 ensuing; but the quarrel between the pope and the emperor having now assumed a more serious aspect, the council remained suspended for four years in spite of the solicitations made by the German bishops to the pope that the sessions of the council might continue.

In 1549, Paul III died, and the cardinal del Monte having been elected in his place, under the name of Julius III, he issued a bull, dated March 14, 1551, directing the re-establishment of the Council of Trent, and naming as his legates, Marcellus Crescenzi, cardinal; Sebastiano Pighino, archbishop of Siponto; and Aloysius Lipyus, bishop of Varese, and others.
and that the next session should be held on Sept. 1 following.

Session XII (Sept. 1, 1551).—In this session, an examination was held in the name of the presidents of the council, in which the power and authority of ecclesiastical councils were extolled; then followed a decree declaring that the subject of the eucharist should be treated of in the next session. Afterwards, the earl of Montfort, ambassador from the emperor, demanded to be admitted to the council, which was agreed to. James Amyot, the ambassador of Henry II of France, presented a letter from his master, which, after some opposition, was read; it explained why no French bishop had been permitted to attend the council. Afterwards, Amyot, on the part of Henry, made a formal protest against the Council of Trent, in which he complained of the conduct of Julius III.

In the congregation following, the question of the eucharist was treated of, and ten articles selected from the doctrine of Zwingli and Luther were proposed for examination.

1. That the body and blood of Christ are present in the eucharist, not as a mere figure, but really.
2. That the Lord's body is eaten, not sacramentally, but only spiritually and by faith.
3. That the real incarnation takes place in the eucharist, but a hypostatic union of the human nature of Christ with the bread and wine.
4. That the eucharist was instituted for the remission of sins only.
5. That the body of Christ in the eucharist is not to be adored, and that to do so is to commit idolatry.
6. That the holy sacrament ought not to be kept; and that no person may communicate alone.
7. That the body of Christ is not in the fragments which remain after communion; but it is so present only during the time of receiving, and not afterwords.
8. That it is sin to refuse to the faithful the communion in both kinds.
9. That it is sin under one species is not contained the same as under both.
10. That faith alone is required in order to communicate; that confession ought to be voluntary, and that communion at Easter is not necessary.

In another congregation the question of reform was discussed, the subject of episcopal jurisdiction was brought forward, and a regulation drawn up concerning appeals. No appeal from the judgment of the bishop and his officials was allowed, except in criminal cases, without consulting with civil judgments; and even in criminal cases it was not permitted to appeal from interlocutory sentences until a definitive sentence had been passed. The ancient right of the bishops to give sentence in the provincial synods was not, however, restored, as is left to the right of the council by means of commissioners delegated in partibus.

Session XIII (Oct. 11, 1551).—The decree concerning the eucharist was read Sept. 13, and was contained in eight chapters.

1. Declares that after the consecration of the bread and wine, our Lord Jesus Christ, very God and very Man, is visibly, truly, and substantially present under the species of these sensible objects; that it is a sin to endeavor to put a metaphorical sense upon the words in which the Lord instituted the holy sacrament; that the Church has always believed the actual body and the actual blood of Christ with his soul and his divinity, to be pre-existing under the species of bread and wine after consecration.
2. That each kind contains the same as they both together do, for Jesus Christ is entire under the species of bread, and under the smallest particle of that species, as also under the species of wine, and under the smallest portion of it.
3. That in the consecration of the bread and wine there is an art, operation and change of the whole substance of the bread into the substance of our Lord's body, and of the wine into the substance of his blood; which change has been truly and properly termed "transubstantiation."
4. That the worship of Latrun is rightly rendered by the faithful to the holy sacrament of the altar.
5. That there are three modes of communing (1) and the manner of the several modes of communing. They do who receive in will and by faith; (2) both sacramentally and spiritually, as they do who actually receive, and with faith and proper dispositions.

To this decree there were added eleven canons, anathematizing those who held certain heretical doctrines on the subject of the holy eucharist, and especially those of Luther and his disciples. The fourteenth council, composed for examination in the congregation held Sept. 2.

Thus, can. 1 condemns the opinion contained in the first of those articles; can. 3, that contained in art. 2; can. 8, that contained in art. 5; can. 4, that contained in art. 7; can. 5, that contained in art. 8; can. 6, that contained in art. 10; can. 7, that contained in art. 6; can. 9, that contained in art. 2; can. 9, that contained in art. 10; can. 10, that condemned those who deny that the priest may communicate alone; and can. 11 condemns those who maintain that fasting and confession, is a sufficient preparation for the communion.

Afterwards, a decree of reformation, containing eight chapters, was read; the subject of it was the jurisdiction of bishops.

In a congregation held after this session, twelve articles on the subjects of penance and extreme unction were examined, taken from the writings of Luther and his disciples. In a subsequent congregation the deacons and canons upon the subject were brought forward, together with a decree in fifteen chapters on reform.

Session XIV (Nov. 25, 1551).—In this session the decree upon penance, in nine chapters, was read.

1. States that our Lord chieflly instituted the sacrament of penance when he breathed upon his disciples, saying, "Receive ye the Holy Ghost," etc.; and the council condemns all who deny that it is necessary to acquaint the penitent with the words our Lord communicated to his apostles and to their successors the power of remitting or retaining sins after him.
2. That in this sacrament the priest exercises the function of judge.
3. That the form of the sacrament, in which its force and virtue resides, is contained in the words of the administration pronounced by the priest, "receive ye the Holy Spirit," etc.; that the penitent acts as a witness; and that the confession, which are, as it were, the matter of the sacrament.
4. That the power of remission is an inward grace, necessary to the remission of sins; and that for, and against, the sin committed, accompanied by a firm resolution to cease from it in future. With regard to the matter of the sacrament, called confession, arising merely from the shame and disgracefulness of sin, or from the fear of punishment, the council declares that if those contrite, contained in the articles approved, and excluded the desire to commit sin, it is a gift of God and a motion of the Holy Spirit; and that, far from being a hypocrisie and a greater sin, it disposes him (dispens) to obtain the grace of God in the sacrament of penance.
5. That the desire to commit sin, which is by nature, makes it necessary for the penitent to confess his sins, which, by diligent self-examination, can be brought to remembrance. With regard to the matter of the sacrament, it declares that it is necessary to confess them, and that they may be expiated in many other ways.
6. As to the minister of this sacrament, it declares that the power of binding and loosing is, by Christ's appointement, given to his Church; that this power is necessary to be exercised sparingly and not merely in declaring the remission of sins, but in the judicial act by which they are remitted.
7. As to the reserved cases, it declares it to be important to the maintenance of good discipline that certain atrocious crimes should not be absolved by every priest, but that the council should be consulted; and that this power is necessary to be exercised according to the several cases.
8. That we can make satisfaction to God by self-imposed inflictions, and by those which the priest prescribed, as well as by bearing patiently and with a penitential spirit the temporal sorrows and afflictions which God sends to us.

In conformity with this decree, fifteen canons were published, containing the matters of extreme unction and the opposite doctrines. After this, the decree upon the subject of extreme unction, in three chapters, was read.

It stated that this union was appointed by our Lord Jesus Christ as a true sacrament of the New Test.; that it is pleasing and consistent with the faithful by James, and that the use of it is instigated by Mark. That the matter of the sacrament is the oil consecrated by the bishop, and that the oil is to be piped to the faithful and to the sick person, and be applied to the wounds within him, and to the wounds in God's mercy, and sometimes to restore the health of the body, when such renewed health can advantage the salvation of the soul. That anointing of the sick is the sacrament of extreme unction in this sacrament. That this sacrament ought to be given to those who are in danger of death; but that if they recover, they may receive it again.
The council then agreed upon four canons on the subject, with anathemas.

1. Anathematizes those who teach that extreme uncion is not a true sacrament instituted by Jesus Christ. Of these the devil does not confer grace, nor remit sin, nor comfort the sick.

2. Anathematizes those who teach that the Roman rite may be set aside.

3. Anathematizes those who teach that the ipsis deturpatis, of whom James speaks, are old persons, and not priests.

After this the question of reform came before them, and from various causes upon the subject of episcopal jurisdiction were published.

1. Forbids the granting of dispensations and permissions by the court of Rome to the prejudice of the bishop’s authority.

2. Forbids bishops in partibus infidelium, upon the strength of their privileges, to ordain any one under any pretext without the express permission of, or letter dispensation from, the ordinary.

3. Gives bishops power to suspend clerks ordained without proper examination or without their license.

4. Orders that all secular clerks whatever, and all regulars living out of their monasteries, shall be always, and in all cases, not admitted to function in the churches of those who are not in subordination to any ecclesiastical orders, benefices, etc.

5. Checks the interference of prelates in the dioceses of others.

6. Forbids the perpetual union of two churches situated in different dioceses.

7. Directs that benefits belonging to the regulars shall be given to regulars only.

8. Directs that no one shall be admitted to the religious life whose name has been irrevocably enjoined on him in subjection to the superior.

9. Declares that the right of patronage can be given only to those who have built a new church or chapel, or who endow one already built.

10. Forbids the bishops to make their presentation to any one but to the bishop, otherwise the presentation to be void.

In a congregation held Dec. 23 the sacrament of orders was considered, and twelve articles taken from the Lutheran writings were produced for examination. Subsequently eight canons were drawn up condemning, as heretics those who maintained the following propositions:

1. That orders is not a true sacrament.
2. That the priesthood is the only order.
3. That there ought to be no hierarchy.
4. That the consent of the people is necessary to the validity of orders.
5. That there is no necessity in the Church of the existence of a college of priests.
6. That this sacrament does not confer the Holy Spirit.
7. That bishops are not by divine appointment nor superior to priests.

Session XV (Jan. 25, 1555).—In this session a decree was read to the effect that the decrees upon the subject of the sacrifice of the mass and the sacrament of orders, which were to have been read in this session, would be deferred until March 19 under the pretense that the Protestants, to whom a new safe-conduct had been granted, might be able to attend.

In the following congregation the subject of marriages was treated of, and thirty-three articles thereon were submitted for examination.

The disputes which arose between the ambassadors of the emperor and the legates of the pope produced another cessation of the council. The Spanish bishops and those of the kingdoms of Naples and Sicily, as well as all the other legates of the emperor, wished to continue the council; but those, on the other hand, who were in the interests of the court of Rome did all they could to prevent its continuance, and were not sorry when the report of a war between the emperor and Maurice, elector of Saxony, caused most of the bishops to leave Constantinople. Meanwhile, the theologians arrived, and urged the ambassadors of the emperor to obtain from the fathers of the council an answer to certain propositions, and to induce them to engage in a conference with them; but of which, however, the legates, upon various pretenses, eluded.

Session XVII (May 26, 1559).—One hundred and twelve bishops and several theologians were present.

The bull of the pope having then been published, the pope’s bull declaring the council to be suspended was read in this session. This suspension lasted for nearly ten years; but on Nov. 29, 1560, a bull was published by Pius IV (who succeeded to the papacy upon the death of Julius III, in 1555) for the reassembly of the council at Trent on the following Easter-day; but from various causes the reopening of the council did not take place until the year 1562.

Session XVIII (Jan. 18, 1652).—One hundred and twenty bishops and several theologians were present.

The bull of the pope and a decree for the continuation of the council were read; the words “proponentibus legislatia” inserted in it passed in spite of the opposition of four Spanish bishops, who represented that the clause, being a novelty, ought not to be admitted, and that it was, moreover, injurious to the authority of ecclesiastical councils.

In a congregation held Jan. 27 the legates proposed the examination of the books of heretics and the answers to them composed by Catholic authors, and requested the fathers to take into their consideration the construction of a catalogue of prohibited works.

Session XIX (June 4, 1562).—The chief part of the bull upon the pope’s brief was read, who left to the council the care of drawing up a list of prohibited books. After this a decree upon the subject of the books to be prohibited was read, inviting all persons interested in the question to come to the council, and promising them a hearing.

In congregations held on March 2, 3, and 4, they deliberated about granting a safe-conduct to the Protestants, and a decree upon the subject was drawn up.

On March 11 a general congregation was held, in which twelve articles of reform were proposed for examination, which gave rise to great dispute and were discussed in subsequent congregations.

Session XX (May 14, 1562).—In this session nothing whatever passed requiring notice, and the publication of the decrees was postponed to the following session.

Immediately after this session the French ambassadors arrived, and their instructions were curious, and to the following effect:

That the decisions which had taken place should not be reserved for the pope’s approval, but that the pope should be compelled to submit to the decision of the council, unless such decisions were necessary to the welfare of the Church in its head and in its members, as had been promised at the Council of Constance, and in that of Basel, but never before. That no annates should be abolished, and that all archbishops and bishops should be obliged to reside; that the council should make arrangements with respect to dispensations, so as to remove the necessity of sending to Rome. That the sixth canon of Chalcedon should be observed, which prohibits bishops to ordain priests without appointing them to some specific charges, so as to prevent the increase of useless ministers, etc.

On May 26 a congregation was held to receive the ambassador of France. The Sieur de Pibrac, in the name of the king his master, in a long discourse, exhorted the prelates to labor at the work of reformation, promising that the king would, if needful, support and defend them in the enjoyment of their liberty.

Session XX (June 4, 1562).—In this session the promoter of the council replied to the discourse delivered by Pibrac in the last congregation; after which a decree was read proroguing the session to July 16.

In the following congregation five articles upon the subject of the holy eucharist were proposed for examination.

1. Whether the faithful are, by God’s command, obliged to receive in both kinds?
2. Whether Jesus Christ is received entirely under one species as the body of the army?
3. Whether the reason which induced the Church to...
giving the communion to the laity under one kind only still oblige the cup to be administered. But among the strongest
advocates for granting the petition was the bishop of the Five Churches, who implored the prelates to have compassion
on the masses, and to pay some regard to the pressing entreaties of the emperor. On the other hand, the patriarchs of Aquileia and Venice, and the Latin patriarchs in Rome, were in favor of granting it. But the latter maintained that by giving way to them the people
would be rather confirmed in the error of supposing that the body only of our Lord is contained under the species of bread, and the blood only under that of wine; that if they gave way now, other nations would require the same, and that it would further lead to the requirement of the abolition of images, as being an occasion of idolatry to the people. Other bishops, supporting this opinion, reminded the assembly that the Church had been led to forbid the use of the cup from a fear lest the consecrated wine should be spilled or turn sour, and that the former accident might hardly be remedied when the holy sacrament is carried long distances and by bad paths. The archbishop of Rossano, the bishops of Cava, Almeria, Imola, and Rieti, with Richard, abbot of Preval, at Genoa, were also among those who spoke in favor of absolutely refusing the cup. On the eve of the twenty-first of July, the decree with which this subject was
left to the pope to act as he thought best in the matter, the numbers being ninety-eight for the decree and thirty-eight against it. The discussion lasted altogether from Aug. 15 to Sept. 16.

Session XXII (Sept. 17, 1562).—One hundred and eighty prelates, with the ambassadors and legates, were present at this session. The doctrinal decree touching the sacrifice of the mass, in nine chapters, was published. It was to the following effect:

1. Although our Lord once offered himself to God the Father by dying upon the altar of his cross, in order to obtain the redemption of the world, he did not cease to offer himself after the manner of the Church, since his priesthood did not cease at his death, in order that he might live with his Church a visible sacrifice (such as the nature of man requires), by means of which the bloody sacrifice of the cross might be represented at the last supper, on the same night that he was betrayed, in the execution of his office as a priest forever after the order of Melchizedek, he offered his body and blood to the Father under the species of bread and wine, and gave the same to his apostles; and by these words, "This do in remembrance of me," commanded the prelates to offer the like sacrifice, as the Catholic Church has always believed and taught.

2. As Jesus Christ who once offered himself upon the cross with the shedding of his blood is contained and immodulated without the effusion of blood in the holy sacrament, in the same manner that the mass, this same sacrifice is truly and properly, and by it we obtain mercy and forgiveness; since it is the same Jesus Christ who was offered upon the cross, upon the table and in the host. The only difference is in the manner of offering. And the mass may be offered, not only for the souls of the faithful who are alive, but also for those who, being dead, are not yet made pure.

3. Although the Church sometimes celebrates masses in honor and in memory of the saints, the sacrifice is still offered to God alone, for she only implores their protection.

4. The Church for many ages past has established the sacred canon of the mass, which is pure and free from every error, and contains nothing which is not consistent with what is contained in the words of our Lord's words, the traditions of the apostles, and the patristic liturgy of the holy popes.

5. The Church, in order the better to set forth the majesty of so great a sacrifice, has established certain customs—by which the things that are laid before others and has introduced certain ceremonies—as the benediction, lights, incense, ornaments, etc., after the traditions of the Church.

6. Although it is to be desired that at every mass all the faithful should communicate, not only spiritually, but also physically, and nevertheles there must be a certain condemnation private masses in which the priest only communicates, but, on the contrary, approves and authorizes them, for they are celebrated by the proper minister in behalf of himself and the faithful.

7. The Church has always considered that the priest shall mix water with the wine, because there is reason to believe that our blessed Lord did so, and because both blood and water come from his side; which sacred mystery, by the use of this mixture, is remembered.
8. Although the mass contains much to edify the people and not judge it by the surface, it should not be celebrated in the vulgar tongue, and the Roman Church has preserved the use; nevertheless, the clergy should at times, and only at times, explain to the people some part of what they have read to them.

9. Anathematises, in nine canons, all those who deny the truth and practice the abuse of the three articles proposed in the congregation following the twenty-first session, viz. the 5th, 6th, 9th, 10th, 11th, 12th, 13th, 14th, and 15th (which see).

Then followed a decree concerning what should be observed or avoided in the celebration of mass:

Bishops are ordered to forbid and abominate everything which had been introduced through avarice, irreligion, or superstition, such as pecuniary demands for the first communion, or other contributions made under the name of alms; vassalage and unknown priests were forbidden to celebrate, also those who were notorious evildoers; no masses were to be said in private houses; all music of an impure and lascivious character was forbidden in churches, and those who used such music were to be excommunicated; any person was forbidden to say mass out of the prescribed hours, and otherwise than Church form prescribed. It was also ordered that the people be told to come to church on Sundays and holidays at least.

In the third place, the decree of reformation was read, containing eleven chapters:

1. Orders that all the decrees of the popes and the council relating to the life, morals, and requirements of the clergy should be observed, under the original and even greater penalties.

2. Kinetics that bishops are to be given only to those persons who have the qualifications of the canons, and who have been at least six months in holy orders.

3. Permits bishops to appropriate the third part of the revenue of the prebends in any cathedral or collegiate church for the instruction of the canons, and who have been at least six months in holy orders.

4. Declares that no one under the rank of subdeacon shall have any voice in the chapter; that all the members shall conform their proper offices.

5. Kinetics that dispensations extra curiam (i.e. granted anywhere out of the court of Rome) shall be addressed to the ordinaries, and shall have no effect until they shall have testified that they have not been obtained surreptitiously.

6. Treats of the care to be observed in proving wills.

7. Orders that legates, nuncios, patriarchs, and other superior judges shall observe the constitution of the pontiff in XV beginning "Romana," whether in receiving appeals or granting prohibitions.

8. Orders that bishops, as the delegates of the holy see, shall be the executors of all pious gifts, whether by will or otherwise; that to them it shall pertain to visit hospitals and religious communities and all prelates, except those under the immediate protection of the king.

9. Directs that to those whom the care of any sacrilegious matter shall be given, they shall be held bound to give account of their administration yearly to the ordinary, unless the original foundation require them to account to another.

10. Declares that bishops may examine notaries, and forbid them the exercise of their office in ecclesiastical matters.

11. Enacts penalties against those who usurp or keep possession of the property of the Church, and pronounces anathemas against them.

With respect to the concession of the cup to the laity, the council declared, by another decree, that it judged it convenient to leave the decision to the pope, who would act in the matter according as his wisdom should direct him.

In a congregation certain articles relating to the reformation of morals were discussed, and the theologians were instructed to examine eight articles on the subject of the sacrament of orders. This occupied many congregations, in one of which a large number of the prelates, chiefly Spaniards, demanded that there should be added to the seventh canon, concerning the institution of bishops, a clause declaring the episcopate to be of divine right. An attempt was made to stifle the discussion, but John Fonseca, a Spanish theologian, among others, entered boldly upon the subject, declaring that it was not, and could not be, forbidden to speak upon the matter. The question was left to be decided by the bishop elected by Jesus Christ, and thus by divine right, and not merely by a right conferred by the pope. The discussion of this question proved highly disagreeable at Rome, and the legates received instructions on no account to permit it to be brought to a decision. However, in subsequent congregations the council was renewed, and on the 20th of October, in the congregation of Oct. 18, the archbishop of Granada insisted upon the recognition of the institution of bishops, and their superiority to priests, juris divino.

The same view was taken in the following congregation by the archbishop of Braga and the bishop of Seville. The pope, however, on the 23rd of November, declared that one hundred and thirty-one present, voted in favor of the recognition of the divine institution and jurisdiction of bishops. According to Fra Paolo, the number amounted to fifty-nine. The dispute was, however, by no means ended. On the 20th the Jesuit Lainez, at the instigation of the legates, gave a powerful speech in opposition to the view taken by the Spanish bishops, denying altogether that the institution and jurisdiction of bishops were of divine right. However, powerful as was his speech, he was answered by the bishop of Paris so effectually that the legates, to their great discomposure, saw the views of the Spanish prelates gain ground. The latter then declared formally that unless their demand were granted, and the order and jurisdiction of bishops declared in the canon to be juris divino, they would thenceforth absent themselves from all the congregations and sessions.

It should be known that the cardinal of Lorraine arrived at Trent with several French prelates, and was received with honor. In a congregation held Nov. 23, he read the letter of the king of France to the council, in which he strongly urged them to labor sincerely to bring about a sound reformation of abuses, and to restore its pristinely divine glory to the Catholic Church by bringing back all Christian people to one religion. After the letter was finished the cardinal delivered a speech, strongly urging the necessity of proceeding speedily with the work of reformation, in which he was followed by Du Ferrier, the king's ambassador, who spoke his mind freely.

All this time little progress had been made with the canons and decrees that when Nov. 26, the day fixed for holding the twenty-third session, arrived, it was found necessary to prolong it. After this, in the following congregations, the subject of the divine right of bishops was again discussed, when the French bishops declared in favor of the views held by the Spaniards.

At the beginning of the year 1563 the French ambassadors presented their articles of reformation under thirty-two heads. Their principal demands were as follows:

6. That no person should be appointed bishop unless he were of advanced age, and of good character and capacity.

7. That all curates should be nominated unless they were of good character and abilities.

9. That bishops, either personally or by deputy, should preach on every Sunday and festivals, besides Lent and Advent.

10. That all curates should do the same when they had a sufficient audience.

12. That incautious bishops, abbots, and canons should resign their benefices, or appoint coadjutors.

14. That all pluralities whatever should be abolished, without any consideration of compatibility or incompatibility.

16. That steps should be taken to provide every beneficed cleric with a revenue sufficient to enable him to live decently and to exercise hospitality.

17. That the gospel should be explained to the people at mass, and that after mass the priest should preach to the people in the vulgar tongue.

18. That the ancient decrees of pope Leo and Gelasius on contraception, which had been introduced by the Council of Trent, should be adhered to.

19. That the efficacy of the sacraments should also be explained to the people, and that before their administration, the people should be instructed by Jesus Christ, and thus by divine right, and not merely by a right conferred by the pope. The discussion of this question proved highly disagreeable at Rome, and
TRENT, COUNCIL OF 540

TRENT, COUNCIL OF

27. That bishops should take in hand no matter of im-
portance without the advice of their clergy, and that
such decisions should be applied to continual residence.

28. That no sentence of excommunication should be
pronounced upon any without a full and learned syn-
dicate, and that a probability of malice must be
only for grievous faults. That bishops should be de-
sired to give benefit rather to those who drew back from re-
ception of doctrine and sought for a refuge in private
matters, and bring things to an end, it was resolved to
omit altogether all notice of the institution of bishops
and of the authority of the pope, and to erase from the
decree concerning residence whatever was obnoxious to
either party. They then fell to work upon the decree
concerning the reform of abuses.

Session XXXIII (July 15, 1563).—At this session 208
prélates, besides the legates and other ecclesiastics,
were present, with the ambassadors of France, Spain, Portu-
gal, etc. The sermon was preached by the bishop of
Paris, who seems to have contrived in it to give offence
to all parties. After the sermon, the bulls authorizing
Morone and Navager to act as legates for the pope were
read, together with the letters of the king of Poland,
the duke of Savoy, and the queen of Scotland. Lastly,
the decrees and canons drawn up during the past congrega-
tion were brought before the council. The decree upon
the sacrament of orders, in four chapters, was read,
and eight canons on the sacrament of orders were published,
which anathematized,

1. Those who deny a visible priesthood in the Church.

2. Those who maintain that the priesthood is the only
order.

3. Those who deny that ordination is a true sacrament.

4. Those who deny that the Holy Spirit is conferred by
ordination.

5. Those who deny that the unction given at ordination
is necessary.

6. Those who deny that there is a hierarchy composed
of bishops, priests, and ministers in the Catholic Church.

7. Those who maintain the superiority of the pope,
or that they alone can perform certain functions which
priests cannot, and those who maintain that orders con-
ferrd without the consent of the people are valid.

8. Those who deny that bishops called by the author-
ity of the pope (qui auctoritate Romani pontificis aemountmir)
are true and lawful bishops.

After this the decree of reformation was read, contain-
ing eighteen chapters, on the residence of bishops, and
on other ecclesiastical affairs.

In the following congregations the decrees concern-
ing marriage were discussed, and it was unanimously
agreed that the law of celibacy should be continued
binding.

Moreover, twenty articles of reformation, which the
legates proposed, were examined; and during the dis-
cussion letters were received from the king of France,
in which he declared his disappointment at the meagre
measure of ecclesiastical reform proposed in these arti-
cles. Some of these were of a pastoral character, and
were in full agreement with the princes. Shortly after,
nine of the French bishops returned home, so that fourteen
only remained.

On Sept. 22 a congregation was held, in which the
ambassador Du Ferrier spoke so warmly of the utter in-
sufficiency of the articles of reformation which the legates
had proposed, and of their conduct altogether, that the
congregation broke up suddenly in some confusion.

To fill up the time intervening before the twenty-
fourth session, the subjects of indulgences, purgatory,
and the reservation of masses, were discussed and
brought to a conclusion, in order that decrees on these matters
might be prepared for presentation in the twenty-fifth session.

Session XXIV (Nov. 11, 1563).—In this session the
de cree of doctrine and the canons relating to the sacra-
mement of marriage were read.

After establishing the indissolubility of the marriage
bonds, Holy Scripture adds that Jesus Christ, by his
passion, merited the grace necessary to confirm and
sanctify the union betwixt man and wife. That the apocry-
phal men are not to be blamed for this when they say, "Hoc
love your wives, as Jesus Christ loved the Church;" and,
shortly after, "whoever shall presume to enter into a
marriage shall be deprived of all grace conferred by it, and
that, accordingly, the holy fa-
TRENT, COUNCIL OF

there, councils, and universal tradition rightly teach us to regard marriage among the sacraments of the new law. There are twelve canons, with anathemas, upon the subject.

1. Anathematizes those who maintain that marriage is not a true sacrament.
2. Anathematizes those who maintain that polygamy is permitted to Christians.
3. Anathematizes those who maintain that marriage is unlawful only within the degrees specified in Leviticus.
4. Anathematizes those who deny that the Church has power to add to the impediments to marriage.
5. Anathematizes those who maintain that marriage is lawful only in the dark, ill-considered, or voluntary union on either side.
6. Anathematizes those who deny that a marriage contracted, but not consummated, is annulled by either of the parties taking the religious vow.
7. Anathematizes those who maintain that the Church err in holding that the marriage tie is not broken by adultery.
8. Anathematizes those who maintain that the Church errs in separating married persons for a time in particular cases.
9. Anathematizes those who maintain that men in holy orders, or persons who have taken the religious vow, may marry.
10. Anathematizes those who maintain that the married state is preferable to that of virginity.
11. Anathematizes those who maintain that it is superfluous to forbid marriages at certain seasons.
12. Anathematizes those who maintain that the censure of civil courts is not due to the ecclesiastical authorities.

After this a decree of reformation was published relating to the same sacrament, containing ten chapters.

1. Forbids clandestine marriages; orders curates to publish the names of the parties about to contract marriage on three consecutive festivals in the Church during the solemn masses; orders that two or three witnesses be present at the marriage, and declares all marriages to be null which are not solemnized in the presence of the clergyman of the parish, or of some other priest, having his permission or that of the ordinary.
2. Treats of the impediments to marriage, which were in some respects relaxed, i.e., the impediments to marriage between a godparent and godchild and the parents of the godchild was removed; also that between the person administering baptism and the person baptized, or his or her parents.
3. And 4. Also refer to the relaxation of the impediments.
4. Those who wilfully contract marriage within the prohibited degrees are sentenced to be separated without any hope of obtaining a dispensation.
5. Marriage to be allowed between a raverisher and the woman ravished while she remains in his power; if, however, when she is at liberty, she consents, they may be married with the rest and all annulling and abettor, to be nevertheless excommunicated.
6. Care to be taken in committing wanderers to receive the sacrament of marriage.
7. Forbids, whether married or single, to be excommunicated, unless they have been divined against three months. The women, after three months, to be driven out of the diocese unless they obey.
8. Forbids all masters, magistrates, etc., under anathema, to compel those under their control to marry against their own inclinations.
9. Confirms the ancient prohibitions to celebrate marriages between Advent and Epiphany, and between Ash Wednesday and the octave of Easter.

After this a decree, containing twenty-one articles, upon the reform of the clergy was read, setting forth the duty of bishops to visit their dioceses; to preach in person or by deputy; relating to dispensations, sacraments, visitations, pluralities, etc.

Session XXV and last (Dec. 3 and 4, 1563).—At this session the decrees concerning purgatory, the invocation of saints, and the worship of images and relics were read.

1. Of Purgatory.—Declares that the Catholic Church, following Holy Scripture, has always disserted, and still teaches, that there is a purgatory, and that the souls therein are assisted by the suffrages of the faithful and by the sacrifice of the Mass.

Orders all bishops to teach, and to cause to be taught, the true doctrine on the subject.

2. Of the Invocation of Saints.—Orders bishops and others concerned in the teaching of the people to instruct them in the true doctrine, and to excommunicate, or deprive of their relics, and the lawful use of images, according to the doctrine of the Church, the consent of the fathers, and the decrees of the Church; to teach them that the saints offer up prayers for men, and that it is useful to invoke them, and to have recourse to their prayers and help. It further orders all the people to maintain that the saints' rest ought not to be invoked, that they do not pray for men, that it is idolatry to invoke them, that it is contrary to Holy Scripture, etc., and that their relics and their tombs ought not to be venerated.

On the subject of images, the council teaches that those of our Lord, the Blessed Virgin, and of the saints are to be placed in churches; that the right to receive due veneration, not because they have any divinity or virtue in them, but because honor is thus reflected upon those whom they represent. By means of these representations the people are instructed in the mysteries of the faith, and by seeing the good deeds of the saints, are led to pray to God and endeavor themselves to do likewise.

The council then proceeds to anathematize all who hold or teach any contrary doctrine.

Lastly, in order to remedy abuses, it declares that if in any scriptural painting the Divinity is represented under any figure, the people should be warned, and that it is not intended that the Divinity can be seen by mortal eyes; further, that all things tending to superstition in the invocation of saints, the worship of their relics, and the right use of images should be done away with; that care must be taken not to profit the festivals of the saints, etc.; that no new images or relics should be admitted without the bishop's consent, and that any other abuses should be rectified by the bishop and provincial council.

These decrees were followed by one of reformation, consisting of twenty-two chapters, which relate to the regular clergy. After this another decree, containing twenty-one chapters, on general reformation, was read.

A decree was also published upon the subject of indulgences to this effect, that the Church, having received from Jesus Christ the power to grant indulgences, and having through all ages, used that power, the council declares that their use shall be retained as being very salutary to Christian persons and approved by the holy councils. It then anathematizes all who maintain that indulgences are useless, or that the Church has no power to grant them. At the same time, it declares that the ancient customs of the Church be adhered to, and that they be granted with care and moderation, forbidding altogether their trafficking.

Further, the council exhorted all pastors to recommend to the observance of all the faithful whatever had been ordered by the Church of Rome, established in this council, or in any other council of the holy councils, and to impress upon them especially the due observance of the Mass and festivals of the Church.

The list of books to be proscribed was referred to the pope, as also were the catechism, missal, and breviaries.

Then the secretary, standing up in the midst of the assembly, demanded of the fathers whether they were of opinion that the council should be concluded, and that the legates should request the pope's confirmation of the decrees, etc. The answer in the affirmative was unanimous with the exception of three. The cardinal-pope Morone then dissolved the assembly amid loud acclamations.

In a congregation held on the following Sunday, the fathers affixed their signatures to the number of two hundred and fifty-five—viz., four legates, two cardinals, three patriarchs, twenty-five archbishops, one hundred and sixty-eight bishops, thirty-nine proctors, seven abbots, and several canons and secular clergy.

The acts of the council were confirmed by a bull bearing date Jan. 6, 1564. The Venetians were the first to receive the Tridentine decrees. The kings of France, Spain, Portugal, and Poland also received them in part; and they were published and received in Flanders, in the duchies of Naples and Sicily, in part of Germany, in Hungary, Austria, Dalmatia, and some part
of South America, also among the Maronites. The Churches of England, Ireland, Scotland, Russia, Greece, Syria, Egypt etc., reject the authority of this council.

In France the Council of Trent is received generally as its doctrine, but not consistently as its decrees. Various regulations which were deemed incompatible with the usages of the kingdom, the liberties of the Gallican Church, the concordat, and the just authority of the king, were rejected (see Mansi, Concill. xiv, 725; Landon, Manuel des Conciles, v i.).

Liturgia. The history of the Council of Trent was written chiefly by two able and learned Catholics—Frat Paolo Sarpi, of Venice, an almost semi-Protestant monk, Istoria del Concilio Tridentino (Lond. 1619; translations in French and German; Eng. transl, by Brent, ibid. 1678), in opposition to the papal court, and (against him) cardinal Sforza Pallavicino, Istoria del Concilio di Trento (Rome, 1656-57, 2 vols. fol.).

The canons and decrees of the council were first published by Paul Manutius (Rome, 1646), and often since in different languages. The best Latin edition is by Le Plat (1779), and by Schulte and Richter (Leips, 1855), and the best English edition is by Rev. J. Waterworth, with a History of the Council (Lond. 1848). The Catechism, an authorized summary of the faith drawn up by order of the council, appeared at Rome in 1566. The original acts and debates of the council, as prepared by its secretary, bishop Galgani (or had his large fol.), were deposited in the Vatican Library, and remained there unpublished for more than three hundred years, until they were brought to light, though only in part, by Aug. Theiner, in Acta Gemina SS. Ecum. Concili Trid. nunc primum integre edita (Lips, 1874, 2 vols.). The most complete collection of the official documents and private reports bearing upon the council is that of Le Plat, Momms. ad Histor. Conc. Trident. (Louvain. 1781-87, 7 vols.). New materials were brought to light by Meunand (1884 and 1846) from the M.S. history by cardinal Paleotti; by Sicel, Actenstücke aus gotterKirchenarch. (Vicenza, 1872); and by Dr. Döllinger, Ungedruckte Berichte und Tagebucher zur Geschichte des Conc. von Trient (Nördlingen, 1876, 2 pts.). Among Protestant historians of the Council of Trent are Salignac (1741-45, 3 vols.); Dauz (1846); Buckley (Lond. 1832); and Bungener (Paris, 1854; Eng. transl. by the translator). According to Schaff, History of the Croeds of Christendom (1876), i. 90 sq. See, in general, also Cunningham, Hist. Theol. (see Index); Hagenbach, Hist. of Doctrines (see Index); Mosheim, Eccles. Hist. vol. iii (Index). In particular see The Council of Trent and its Proceedings (Press, Bonn, 1883); Scholl, Archiv für die Kath. Kirche, xxvii, 39 and 185; Pallavicino, Istoria del Conc. di Trento (Monteprag, 1844, 3 vols. 8vo); Dupin, Hist. du Conc. de Trente (Brussels, 1872, 2 vols. 4to); Salig, Vollst. Hist. des Tr. Conc. (Halle, 1741, 3 vols. 4to); Courayer, Hist. de la Reception du Conc. de Trente (Amst. 1756). See Councils.

Trent, an office for the deal in the Latin Church, consisting of thirty masses on thirty consecutive days.

Trepalium, a name given to the rack used for examining a prisoner. See canons 33. Council of Tarragona, presbyters and deacons were forbidden to stand at the Trepalium while persons were tortured. See Bingham, Christ. Antiq. bk. xvii, ch. v, § 84.

Trespass (πλατύνωμα) is an offence committed, a hurt, or wrong done to a neighbour; and partsake of the nature of an error or slip rather than of deliberate contraries. Under the law, the delinquent who had trespassed was of course bound to make satisfaction: but an offering or oblation was allowed him to reconcile himself to the Divine Governor (Lev. v. 6, 15). Our Saviour teaches us that whoever does not forgive the trespasses of a fellow-man against himself is not to expect that his Saviour in heaven will forgive his trespasses (Matt. vi. 14, 15).

This sacrifice was offered for individuals only, and chiefly for such transgressions as were not punishable by the laws of the State (vii, 19). The victim sacrificed was different on different occasions.

1. A trespass-offering was brought when a person did not inform of a crime committed by another (v. 1); when a person had touched any unclean object, and had omitted the sacrifice of purification (ver. 2); when a person had, through forgetfulness, neglected to fulfil his rash vow. In each of these cases the offering was a ewe or a she-goat; or, if the sacrificer were poor, it might consist of doves or fine flour, without oil and incense (ver. 3-5). When a person had, through mistake, applied to a common purpose anything which had been consecrated to a holy use (ver. 10, 16; xxii, 14), or had in any way violated an engagement, or denied stolen property, or concealed any lost thing which he had found. In these cases the offering was a ram, and the restoration of the alienated property, with one fifth of the value; in the former case the postponement, in the latter to the owner or his heirs (vi, 2-7). 8. When any person had, through ignorance, done something forbidden, the victim was a ram (v. 17, 18). 4. When a man had a criminal connection with a betrothed female, and she fell pregnant, he himself, or his parents, contracted an idolatrous marriage, the victim was a ram (Exra x, 19). So also a Nazarite who had contracted defilement by touching a dead body (Numb. vi, 9-12), and a leper who had been healed, were to bring a lamb for a trespass-offering (Lev. xiv, 12, 24). In this offering the victim was slain on the side of the altar, the blood sprinkled round it, and the pieces of fat burned upon it. See Sin-offering.

Among the Hebrews trespass-offerings, like all other expiatory sacrifices, were symbolical representations of the great work, for the effecting of which the Messiah was promised to fail men perpetual (Psa. xi. 6, 8; Heb. viii, 5; ix, 14, 26, 28; x, 5, 10). As it was the design of the Mosaic law to remind the Hebrews that they were guilty of sin and liable to death, so every sacrifice was a memorial of this mournful truth, as well as a type of the work of our Redeemer. When a Hebrew had committed a trespass he was to bring a lamb to be slain, and the transgression was thus as admitted an expiation, he had to offer the requisite sacrifices before he could be restored to his civil privileges. With this a mere worldly-minded Hebrew was content; but, as no mere animal sacrifice could make atonement for sin, to the Hebrews as a nation, since the time of the Mosaic law, it was a type of something spiritual. It reminded him that his sins had not only excluded him from the divine favor, but that he deserved death and subsequent agony; it directed him to the need of a sacrifice for sin ere God would forgive his transgression; and it assured him that, just as he before he had been restored to his civil and political rights, so by faith in the great sacrifice for sin on the part of the lamb of God might he be restored to the divine favor, and to a place in that spiritual kingdom of which the Hebrew nation was the type. See PROPHETICAL SACRIFICES.

Treuenfels, Abraham, a Jewish rabbi and doctor of philosophy of Germany; was born at Detmold in the year 1818. After finishing the gymnasium at that place, he went, in 1837, to Hannover, where he studied under Dr. Adler (now chief rabbi of England). In 1839 he pursued a course of studies at the Bonn University, and completed his Rabbinical education at Frankfort. In 1844 he was appointed rabbi at Weilburg, in Nassau, and in 1849 was called to Steitten, where he died. Jan. 3, 1878. He published, 2277, kleine Genesis und die noch vorhandenen Bruchscher- derselben, griechisch und deutsch, und mit Anmerkungen, in der Literaturblatt des Orient, 1846, No. 129—Über
TREVES, COUNCILS OF

den Rhetorico des Flavius Josephus (1849). But his literary activity was chiefly displayed in the Israelitische Tische, which he published in connection with Dr. M. Rahmer. (B.P.)

TREVES, COUNCIL OF (Concilium Treverensium), take their name from Treves, a town of Rheinisch Prussia, in which they were held. The town is situated on the right bank of the Moselle, and had in 1871 a population of 21,442. It is a decayed place, noted for its ultramontanism. The cathedral contains many relics—the principal one being the Holy Coat of Treves—and Roman remains. It has a pious seminary, a gymnasium, and a museum of valuable antiquities—among the famous Codex Aureus, or MS. of the Gospel in gold letters, presented to the Abbey of St. Maximin by Ada, sister of Charlemagne.

I. The First Council was held in 498. The legate Marinus, the archbishop of Treves, and several bishops here communicated Hugh, count of Paris, and two pretended bishops, made by Hugo, the pseudo-archbishop of Rheims. See Mansi, Concil. ix, 632. See INGELHEIM.

II. The Second Council was held in 1548 by John, count of Isenburg, archbishop of Treves, who presided. This council was a decree against simony and against the clergy were published. See Mansi, Concil. iv, 606.

III. The Third Council was held by John, archbishop of Treves, in 1549. Twenty canons were published. 1. Forbids to believe, hold, or teach any other than the Roman doctrine. 2. 3. 4. of preachers. 6. Orders that the homily be duly said by clerks, and that those who cannot attend at the time in the choir shall say them privately.

7. Of the celebration of the mass. 8. Of the number of festivals, and gives a list of those which shall in any case be retailed. 11. 1. Of the religious and their houses. 16. Of the immunity of churches. 19. Of the life and departure of the clergy. 20. Provides that the heads of monasteries and colleges, and others of the clergy, shall be supplied with a copy of these canons.

See Mansi, xiv, 705.

TREVES, HOLY COAT OF. See HOLY COAT OF TREVES.

TREVETT, Russell, D.D., a clergyman of the Protestant Episcopal Church, was a native of New York. He was ordained in 1841, became professor of languages in St. James's College, Maryland, in 1843, and occupied the same position in St. John's College, Annapolis, Md., being elected thereto in 1855. Subsequently he became rector of St. James's Church, North Salem, N. J., a position which he held at the time of his death, March 3, 1865. See Amer. Quar. Church Rev. July, 1865, p. 521.

TRIAL, a term used in Scripture only in the sense of testing (usually some form of ἑπετύπωσεν or ἑπετύπησεν: but once ἀνεπετύπωσεν, Job ix, 25, elsewhere "temptation" [q. v.], and so ἀνεπετύπωσεν, Heb. xi, 36; ἐπετύπωσεν, "very trial," 1 Pet. iv, 12, lit., "burning, as elsewhere rendered), to denote painful circumstances into which persons are brought by divine Providence with a view to illustrate the perfections of God, bring, to light the real character of those who are thus tried, and by the influence of these circumstances, which shows the transitory nature and uncertain tenure of all earthly advantages, to promote their eternal and spiritual interests. See TEMPT.

TRIAL, CHURCH. See EXCOMMUNICATION.

TRIAL, FORENSIC (denoted in Heb. by ἑπετύπωσεν, to hold a court, while ἐπετύπωσεν is the sentence rendered by the judge, whether favorable or adverse, both terms being usually rendered "judgment" in the A. V.; Gr. ἐπτύμων). Originally the head of the family was the umpire among the Hebrews, with the power of life and death (comp. Deut. i, 18). Later the elders (q. v.) succeeded to a similar authority. According to the Mosaic law, there were to be judges in all the cities, whose duty it was to exercise judicial authority over the surrounding neighborhood. Weighty causes were submitted to the supreme ruler. Originally trials were everywhere summary. Murder cases did not allow for any more formal or complicated method of procedure. He was, nevertheless, anxious that strict justice should be administered, and therefore frequently inculcated the idea that God was a witness (Exod. xx, 21; xxi, i-9; Lev. xix, 15; Deut. xxv, 14, 15). In ancient times, the forum or place of trial was in that gate of cities (Gen. xxxii, 10; Deut. xxi, 19). In the trial the accuser and the accused appeared before the judge or judges (xxv, 1), and both the implicated parties stood up. The witnesses were sworn, and in capital cases also the parties concerned (1 Sam. xiv, 57-59; Matt. xxvi, 68). In order to establish the accusations, two witnesses were necessary, and, including the accuser, three. The witnesses were examined separately, but the accused person had the liberty to be present when they gave their testimony (Numbers xxxi, 30; Deut. xvii, i-15; Mark xxxv, 59). The sentence was pronounced soon after the completion of the examination, and the criminal, without any delay, even if the offense was a capital one, was taken to the place of punishment (Joh. viii, 22; 1 Sam. xxvii, 8; 1 Kings ii, 23). See L'Emeureur, De Legibus Hebreworum Formenibus (Lugd. 1657); Ziegler, De Juribus Judæorum (Vittem, 1884); Benny, Criminali Judiciis, Vol. i (Louv. 1890), 191-285.

The following remarks respecting certain special instances of judicial proceedings in the New Test. are calculated to set them in their true legal light.

1. The trial of our Lord before Pilate was, in a legal sense, a trial for the offence lexæ majestate— one which, under the Julian law, following out of the twelve tables (Digest, iv, 1, 3), would be punishable with death (Luke xxii, 38; John xix, 12, 15). See JESUS CHRIST.

2. The trials of the apostles, of Stephen, and of Paul before the high-priest were conducted according to Jewish rules (Acts iv, 27; vi, 12; xxii, 30; xxiii, 1). See STEPHEN.

3. The trial, if it may be so called, of Paul and Silas at Philippi was held before the duumviri, or, as they are called, στρατηγοὶ, priori, on the charge of innovation in religion—a crime punishable with banishment or death (Acts xvi, 29).

4. The interrupted trial of Paul before the proconsul Gallio was an attempt made by the Jews to establish a charge of the same kind (Acts xviii, 12-17, see Conybeare and Howson, i, 492-496).

5. The trials of Paul at Cesarea (Acts xxiv, xxv, xxvi) were conducted according to Roman rules of judicature, of which the procurators Felix and Festus were the recognised administrators. (1) In the first of these, before Felix, we observe (a) the employment by the plaintiffs of a Roman advocate to plead in Latin [see ORATOR]; (b) the postponement (ampliatio) of the trial after Paul's reply (see Smith, Dict. of Class. Antiq. s. v. "Judex"); (c) the free custody in which the accused was kept, pending the decision of the judge (Acts xxiv, 23-26).

(2) The second formal trial, before Festus, was probably conducted in the same manner as the former one before Felix (xxv, 7, 8), but it presents two new features: (a) the appeal, appelatio or proserimento, to the emperor by Paul as a Roman citizen. The right of appeal ad populum, or to the tribunes, became, under the empire, transferred to the emperor, and, as a citizen, Paul availed himself of the right of which he was entitled, even in the case of a provincial governor. The effect of the appeal was to suspend the cause at once before the emperor (see Conybeare and Howson, ii, 350; Smith, ut sup. s. v. "Appellatio;" Digest, xlix, 1, 4).

(b) The conference of the procurator with "the council" (Acts xxv, 12). This council is usually explained as the assembly of the assessors, who sat on the bench with the praetor as consiliarius (Sueton. Tib. 33; Grotius,
TRIAL SERMON

But, besides the absence of any previous mention of any assessors (see below), the mode of expression ἅμα οἱ ἀνωτάτοι ἄρχοντες seems to admit the explanation of conference with the deputies from the Sanhedrim (τῷ ἕπισκόπῳ). Paul's appeal would probably be in the Latin language, and would require explanation on the part of the judge to the deposition of accusers before he carried into effect the inevitable result of the appeal, viz., the dismissal of the case so far as they were concerned. See Paul.

6. We have, lastly, the mention (Acts xix, 38) of a judicial assembly which held its session at Ephesus, in which occur the terms δικαστήριον (i.e. εὐθείας) δικαστήριον and ἀδίκαστρον. The former denotes the assembly, then sitting of provincial citizens forming themselves, who were judges of the case, the δικαστήριον, selected "judges," to sit as its assessors. The ἀδίκαστρον would be the judicial tribunal composed of the proconsul and his assessors. In the former case, at Cæsarea, it is difficult to imagine that there could be any conventus and any provincial assessors. There the only class of men qualified for such a function would be the Roman officials attached to the procurator; but in Proconsular Asia such assemblies are well known to have existed (Smith, Dict. of Class. Antiq, s.v. "Provincia").

Early Christian practice discouraged resort to heathen tribunals in civil matters (1 Cor. vi, 1). See PUNISHMENT.

Trial Sermon. See TRIALS.

Trials, the name given in ecclesiastical diction to those discourses delivered before the presbytery by students who have finished their course, and are seeking to be licensed to preach. These discourses are a sermon, a lecture, a homily, an exegesis or exercise with additions, and a thesis. There are also examinations on systematic theology and practical piety, on Church history, and on the Greek and Hebrew Scriptures.

Triangle Controversy. This was a dispute occasioned by the Triangle, a book by Samuel Whelpdale (1816) against limited atonement, inability, and immediate imputation. The controversy led to the trial of Albert Barnes and of Lyman Beecher for alleged heresy, and finally to the disapproval of the Presbyterian Church in 1837. See Hagenbach, Hist. of Doct. ii, 442.

Tribe (ἔθνος and ἐθνικός), both originally meaning a rod or branch; ἡ ἐθνική is the name of the great groups of families into which the Israelite nation, like other Oriental races, was divided. The modern Arabs, the Hebrews, the Persians, and the Moors on the northern shores of Africa, are still divided into tribes. The clans in Scotland are also analogous to the tribes of the ancient Israelites. The division of a nation into tribes differs from a division into casts, since one is a division merely according to descent, and the other subdivides it into a number of families, each of which is in a different degree of importance in the general body of the nation. There occurs, however, among the Israelites a caste also, namely, that of the Levites. In Gen. xlix the tribes are enumerated according to their progenitors: viz., 1, Reuben, the first-born; 2, Simeon, and 3, Levi, inferior in order of birth; 4, Judah, whose brothers shall praise; 5, Zebulon, dwelling at the haven of the sea; 6, Issachar, the strong; 7, Dan, the judge; 8, Gad, whom a troop shall overtake, but who shall vanquish at last; 9, Asher, whose bread shall be fat; 10, Naphtali, giving goodly words; 11, Joseph, the fruitful bough; 12, Benjamin is for the least of the twelve tribes of Israel (see Allin, Prophecies of the Twelve Tribes (Lond. 1855)). In this enumeration it is remarkable that the subsequent division of the tribe of Joseph into the two branches of Ephraim and Manasseh is not yet alluded to. After this later division of the very numerous tribe of Joseph, the two branches of Ephraim and Manasseh had taken place, there were, strictly speaking, thirteen tribes. It was, however, usual to view them as comprehended under the number twelve, which was the more natural, since one of them, namely, the caste of the Levites, did not live within such exclusive geographical limits as the other tribes, for they exchanged their nomadic migrations for settled habitations, but dwelt in towns scattered through all the other twelve tribes. It is also remarkable that the Ishmaelites, as well as the Israelites, were divided into twelve tribes; and that the Persians also, according to Xenophon, were divided into twelve tribes; 2, 4, 4, 4. Among other nations also occur ethnological and geographical divisions, according to the number twelve. From this we infer that the number twelve was held in so much favor that, when possible, doubtful cases were adapted to it. An analogous case we find even for a later period, when the spiritual presidents of the Christian εὐκάρποι, or the apostles, who were, after the death of Judas, the election of Matthias, and the vocation of Paul, really thirteen in number, were, nevertheless, habitually viewed as twelve; so that wherever, during the Middle Ages, any division was made with reference to the apostles, the number twelve, and not thirteen, was adopted, whether applied to the halls of theological libraries, or to the great barrels of costly wines in the cellar of the civic authorities at Bremen. Concerning the arrangement of these tribes on the earth through the winding of their encampments about the camp, and in their occupation of the land of Canaan, see the cognate articles, such as Exode; Encampment; Genealogies; Levites; Wandering; and the names of the several tribes. We confine ourselves here to two points.

1. The "Lost Tribes."—This has been an inexhaustible source of theologico-historical charlatanism, on which there have been written so many volumes that it would be difficult to condense the contradictory opinions advanced in them within the limits of a moderate article. Suffice it to say that there is scarcely any human race soojjins, living a primitive and wandering, less connected between the Chinese and the American Indians, who have not been stated to be the ten tribes which disappeared from history during and after the Babylonian captivity. If the books written on the ten tribes contained much truth, it would be difficult to say where they are not. The truth, however, to the matter seems rather to be as follows. After the division of the Israelites under Jeroboam and Rehoboam into the two kingdoms of Judah and Israel, the believers in whom the feelings of ancient theocratic legitimacy and nationality were preeminent, and especially the priests and Levites, who were connected by marriage with the sanctuary at Jerusalem, had a tendency to migrate towards the visible centre of their devotions; while those members of the tribes of Judah and Benjamin who had an individual hankering after the foreign fashions adopted in Samaria, and the whole kingdom of Israel, had a tendency externally to unite themselves to a state of things corresponding with their individuality. After the political fall of both kingdoms, when all the principal families connected with the possession of the soil had been compelled to emigrate, most Israelites who had previously little feeling for theocratic nationality gradually adopted the customs and other connections with the nations by which they were surrounded; while the former inhabitants of the kingdom of Judah felt their nationality revived by the very deprivation of public worship which they suffered in foreign lands. Many of the pious members of those tribes which had not been so much affected joined the returning colonies which proceeded, by permission of the Persian monarchs, to the land of their fathers. However, these former members of the other tribes formed so decidedly a minority among the members of the tribe of Judah that henceforth all believers and worshippers of Jehovah were called בֵּית יִשְׂרָאֵל, 'Israelites, Jews.' Thus it came...
TRIBE

On the north, beginning at the northern bay of the Dead Sea (which formed the eastern boundary), where the Ark of the Lord rested in the time of Joshua, xv, 14-15; and inversely in xvii, 14-20; obliquely across the plain of the Jordan to Beth-hoglah (Ai-atha), thence to and including the north-western boundary of Wady Dabus; thence (westerly) in the direction of Debr which must therefore be placed on the west side of Wady Dabus (now called El-Kheira), where last described, as expressed by coming) from the valley of Achor, thence northwardly through the northern half of Jebel el-Fuseh (Beth-shean, evidently included) as being in front of the ascent to Adamamin (apparently lying on the hills skirtimg the Jordan just west of Gilgal, to which place it must be referred by the word el-Fuseh), then to the west of Jebel el-Fuseh; Adamamin (probably at ed-Dem near es-Samir) being further described as lying on the south side [sic] of Beth-shean, and to the waters of En-nesheem (probably the "fountain of the apostles," on the road between Bethania and Jericho; and thence between the towns of Tiberias and Mount Moriah, which David purchased, and north of Jer-USAH (Jesus), which he conquered, and then acquired both for Ju-SAM (Joshua) and, through the survey of the region by the author of the work, the "waters of quicksilver." "Now these are the days of the eastern boundary of the trans-Jordanic tribes (east of the river of Jordan), from the south side of the river, near Kairbeh, to the flat and barren area stretching towards Jericho, filled with chalk, the Debr, and the Jordan. Bethus, Beth-shan, and Aroth-shophan (near Jericho) (Numm. xxxii, 39); thence entire south of Gilgal (Josh. xiv, 25) directly west, down the wads of Jericho and Beersheba, including the wad of Beersheba (now Be'th groups), and the Aroth-shophan (near Jericho) (Numm. xxxii, 30), but including Beersheba and Beeth (Beth-shan), which is near Beersheba, and the Beeth (Beth-shan) (now discovered in Jebel Neba) (xxxii, 30); Josh. xiv, 17); thence westwards along the Jordan to the place of beginning (ver. 23).

3. GAD. —On the south, following the northern line of Hebron from the Jordan to the eastern boundary of the trans-Jordanic tribes (at Jebel el-Kahfa); thence north-eastwards along the eastern boundary of the trans-Jordanic tribes (around the northern brow of Jebel el-Zeraa) (to a point opposite Jeresh (Jerusa) between Jebel Zaera and Jebel Kafaka); thence in a north-westerly direction across the region of Gilgal (Josh. xiii, 30, 31), passing near Mahanaim (xxxv, 29) (Mahan), to the southern extremity of the sea of Galilee (Gen. xxvii), with the Jordan as the eastern boundary.

4. MANASSEH EAST. —On the south, following the northern line of Gad to its intersection with the eastern boundary of the trans-Jordanic tribes (at the mouth of the Arnon valley between Jebel Zaera and Jebel Kafaka), thence in a north-westerly direction across the region of Gilgal (Josh. xiv, 30) (i.e., the Haarun), so as to include Edrei (which may be Draa or Der) (ver. 31), and so on north-westwards to the vicinity of Mount Hermon (ver. 11) (i.e., Jebel ebeh-Shekik, where the northern line probably followed the present boundaries of the Arab clans along the top of the Hermon range to its junction with Wady el-Telm at Her-USAH (Herophilus), where it joined the northern line of the trans-Jordanic tribes at the "entrance into Hamath" (Numm. xxxvii, 6); thence southerly along the sources of the Jordan from Banias and the sources of Wady el-Telm, thence across the Jordan, crossing the Lake of Merom, the upper Jordan, and the sea of Galilee, to the place of beginning (ver. 10-13).

4. JUDAH. —On the south, the boundary line of Canaan, beginning on the border of Edom, at the southern point of the Dead Sea, southward (along the Ghor) past the wad of Wady el-Bedeen, thence north-eastwards through Wady el-Jebel or the Wady el-Arabah, to the vicinity of Kadesh-barnes (Ai-welbeah or Ai-haush) (Josh. xvi, 1-3; Numm. xxxiv, 1), following the boundary of Canaan (perhaps through Wady Firkheh) (where we may assign a location to Adar of Hazar-adar-teraphim, or Hazar-hader-teraphim, or Hazar-merheb, or Hazar-mar, or Hazar-mar), thence southwardly to Karkar, where the boundary appears to have been definitely fixed by the ancient Elusaa; thence north-west (perhaps by Wady en-Abyhia) to the "river of Egypt" (or El-Arish), and so on to the northern boundary of the trans-Jordanic tribes; the Jordan, as forming the boundary of Palestine (Josh. xvi, 8, 4, 15; Numm. xxxiv, 4, 6). See X. M M

Digitalized by Google
the third comprising nine towns (two of which, as above, were afterwards set off as a distinct district on the north side of the tribe), situated east of the last group and south of the preceding, in the middle of the territory inhabited by the Philistines; the fourth comprising five principal Philistine towns, situated on the extreme west of the tribe (excluding real towns in Dan, and Gath-miteh in the "valley"). The highland district, or "mountains," was likewise divided into five principal groups, containing eleven chief towns, situated along the border of Simeon in the middle; the second containing nine towns (in the east of the hill country of the south part of the tribe around Hebron; the third containing ten metropolitan towns, situated along the border of Judah from the extreme north of the tribe to the extreme south, and embracing six principal cities, situated immediately north of the two last groups, as far as Jerusalem, on the extreme north of the tribe; the fourth only two metropolitan towns, situated in the northern mediterranean angle between the last-named group and the south part of the tribe, which embraced the desert tract or "wilderness" along the Dead Sea, and included six chief towns (Beth-arabah being in Jebeljarm, in the southeast of the Negev (at ver. 59) of eleven cities (namely, Tekoa, Bethlehem, Phugor, Rimon, Kikut, Tamar, Saris, Kinger, and Naphtali). In the extreme southwest, reaching as far as the Dead Sea (Kulum, Saris, and Gallim being in Benjamin).  

5. Simeon.—This tribe had a portion set off from the northern tribes of Israel as shown in the map, embracing some seventeen or twenty cities (according as we make several in the list identical or different), of which only two or three appear to be of any considerable size, namely, Beer-sheba (probably Bhus-es-Saba), Moladah (perhaps El-mil), and Hormah (or Zephath, near Jeusalem). Present indications show that they all lay on the extreme south of Judah, and we shall therefore probably be far from correct if we draw the direct line between Judah and Simeon west by north from the Dead Sea to Masada, up Wady Sebbeh, thence across in the same direction to Eilat, south of Arad (Tell Arud) and Jattil (Attire), to the junction of Wady Khamileef with Wady Kutil; thence still in the same direction to the highest point of the remnant of the mounts of Judah; thence west by south (along Wady Sheerah) to the Mediterranean, a short distance south of Gaza (Guzzar).  

6. Benjamin.—On the north, following the boundary of Ephraim (Josh. vi. 1-3, 6, 7; xvii. 11-13, beginning at Jordan opposite Jericho, and extending to the north of the wady Nadwah), thence (across the plain of the Jordan along this wady) to the northward of Jericho (ver. 12) (so as to include Zemarim (perhaps Abdon), ver. 23); thence northward (ver. 12) by the water east (i.e. north-east) of Jericho (xvi. 1) (perhaps Lake el-Atun, which discharges its water in that direction), through the mountains (xvii. 12, 13) desert (xvii. 1) of Beth-aven (Beni-sinim), that extends from north of Mount Hermon south-eastward through the wady Sabin of Maanah (or Ma'adha), that appears as well as any to the plain north-west of Jebel Karmit (Mt. Quarantania), the northern part of which would partake almost as much as to the south (xvii. 23, 24, 25) Ophrah (perhaps et-Taybeh) and Ophrah (probably Sihon) (probably up to the south of the southern part of the Neaurah (xvii. 1, Naaraithanon) on the way, which lay east of Beth-el (1 Chron. vii. 28) (perhaps Lake Mejjej), thence south-west along the wady el Bettinf, which being included in Benjamin, the expression "to the side of Luz southward" (Josh. xviii. 11) must be interpreted as indicating that the line ran between Bethel on the south and the ancient site of Luz a little to the north, the two spots being distinguished in Josh. xvi. 5, although occupying the same site, thence (directly south-west along the Nablus road, west of Beriah (Beerenchoth), passing Archi (alleged perhaps at the ruined Ibrakh (called also Ataroth-arad or Ataroth-Addar), in a lower spot near the hill on the south side of the river (Gen. xix. 30), yet with the same interval to the east of this last place (xvi. 5), and at the southern extremity of this part of the line between Ephraim and Benjamin, thence north-eastward as far from Beth-horon the upper (ver. 5), and west of Naanah on that part of the same line near the Jordan (i.e. between the Jordan and Naanah) to the nearest possible point to some site (for but one place the name seems to be designated, since these descriptions are of the east and west as well as of the south boundary of Ephraim [the first two clauses of ver. 6, and the whole of ver. 5, however, refer to the position of the boundary, admitting, although he confesses himself unable to clear up the difficulties of the passage], reckoned first (ver. 5, 6 last clause) western, and then eastern, and more minutely over the same line and eastward to the Jordan) directly east of Beth-horon (or Bethon) to the town of Atharim (xvi. 11) to the south of the road from Jaffa to Jerusalem; and in that case we must locate the "hill south of Bethel" and the valley of the Wady el Bettinf at the north side of Wady Sauleman, through which this road ran between the hill country of Judah and Ephraim, which description must be understood, "composed of the border of the sea" appears to signify (as some copies of the Hebrew text have it) a borderless tract of land (perhaps westerly direction), and again south-easterly to Kirjath-jearim (this forming the western side, where it joined the boundary of Judah and Benjamin, and then back to the Jordan, and so up to the point of beginning.  

The towns of this tribe enumerated in Josh. xviii. 21-28 appear to belong to the north-western part of the tribe, on the twelve in ver. 21-24 lying north and east of Jerusalem, while the fourteen others occupy the more southern and south-eastern part of this tribe. These cities, therefore, of the tribes of Judah and Benjamin, Kirjath-jearim was really (eventually) within the limits of the adjoining tribes.  

7. Dan. —This tribe was bordered by the Mediterranean on the west, and by the tribes of Judah on the south, Benjamin on the east, and Ephraim and the tribe of Zebulun on the north, and ended, bounded by the Mediterranean, the western and the northern parts of Palestine, within the limits of the tribe of Dan. The only portion unidentified is the northern boundary, which will be considered under Ephraim.  

The description of the tribe of Dan and the northern boundary of the northern tribe of the tribe of Benjamin and the Jordan the eastern boundary. The southern boundary has been already defined from the Jordan westward as far as Ashteroth-k ithkam, or the point to the west of the Japho road, in the vicinity of Japhleti (perhaps situated at Beit-Eula; but this word should probably be rendered Japhleti, the name of a town, as elsewhere, instead of Japhileth (1 Chron. vi. 25, 26), although it is difficult to explain their existence in this location), to Beth-horon (or Bethorinch, a city on the north, northerly i.e. in a general north-westerly direction) to the Mediterranean (probably by way of the Japho road, or Japhleti road, or the way to the west of this city, which appears to have been the point in the other passages where it is mentioned do not help to fix the locality more definitely); lastly, the northern boundary is bounded by the Jordan in the direction of the description of the southern boundary (Josh. xvi. 5, last clause of 6, and whole of verse 7).  

The northern boundary (the account in Josh. xvi. 7, with the exception of the first name, must be transposed so as to connect immediately with the description of the south of the border at xvi. 5), beginning at the Jordan (probably at the mouth of Wady Pousall), passed westward (up this wady, otherwise called Wady Mududeh, or Bendar el Sallal; Bendar-salluh (ver. 6) (probably the present Aan-Farwa), thence north-westerly to Tappasah (xvii. 7) (probably the Belad el-Taffeh or of Aruf) mentioned by some travelers on the coast of Shechem), thence northerly to Michmethah (xvii. 6, 7) (apparently at the intersection of the line with Ephraim and the line with the Mediterranean) (Josh. xvi. 7), Mechma (or Mechina, Asher (ibid.) (probably represented by the modern Yaqib: thence the line is only given in general terms as extending to the east of Gethsemane, and then the boundary is continued (Josh. xvi. 9) (do doubt the present Nahal-Palakia, which is the principal marsh stream in that region).  

8. Northern Tribes.—The boundaries of this tribe are given with great distinctness, and must be in part collected from the contiguous portions of Ephraim, and although some towns were set off in addition to its proper territory (Josh. xvi. 11). From the meandering, the northern boundary, meandering at Car-in (for Dor, below Carmel), is included (ibid. xvi. 20), and following the edge of the mountain (probably along the precipitation of Michmethah (Gen. xvi. 7, 11) Megiddo (Leju), Yasba (Ta'annik), but so as to exclude (xvi. 21), it continues to be a sharp line to the west of Miss Giblou and Little Hermom, so as to include En-dor (Endur) (xvi. 22), a short section (xvi. 22) to Nahor (Nahor furn. Naoura, Nahor, Sonam (xix. 10), nor Tabor (ver. 21)). thence (with another sharp curve) south-east (probably down Wady el Betizin, or the Wady Jaffeh, xvi. 11), to the Jordan, which formed the eastern boundary.  

9. Northern Tribes.—This tribe was hemmed in on the south by Manasseh, and on the north by Zebulon, leaving only the Jordan as a natural boundary on the east (Josh. xix. 17).  

10. Jezreel.—The lines of this tribe are difficult of interpretation (Gen. xix. 17), the territory of this tribe is prophetically described as being suitable for maritime purposes, and as extending along the coast and mountains, the meaning of which latter describes part of the land of Phœnicia, which latter "wasting people a communication with the river Karolam". In Josh. xix. 10-15, the boundaries are definitely laid down thus: Be-
TRIBE

TRIBUTE

TRIBUNAL (X), 3αδίκον, both literally signifying "pressure or straits" expresses in the A.V. much the same as trouble or trial, importing afflicting dispensations to which a subject is either way of punishment (see Judg. x. 14, Matt. xxvi. 21, 22, Rom. i. 9, 2 Thess. i. 6) or by way of trial (see John xvi. 33; Rom. vii. 2; 2 Thess. ii. 20).

TRIBUR (Concilium Triburenum), COUNCILS OF. Tribur was a royal residence near Mayence, where several Church councils were held.

1. The first council was held in 855. Twenty-two bishops were present, including Habit, archbishop of Mayence; Herman, archbishop of Cologne, and Rat- boose, archbishop of Mainz. The bishops are mentioned, with many of the chief lords of his kingdom.

5. Declares that, with the king's consent, it is ordered that all his nobles shall seize those who refuse to perform the above-mentioned duties, and punish them according to the law, and to render the money required to the bishop.

4. Requires the manner of disposing of the pecuniary manumitted for wounding a priest: if the latter be avenged, the whole belongs to him; if he be dead, it is to be divided into three parts, one for his church, one for his bishop, and one for his relations.

5. Imposes five years' punishment for killing a priest, during which time he shall not eat meat or drink wine, except on Sundays and festivals. At the end of five years he might be admitted into the Church, but not to communion, until the expiration of five years, during which he was to fast three days in the week.

10. Allows the bishop to retain for burial.

11. Forbids chalices and patens of wood.

12. Ordains that water be mixed with the wine in the chalice, but that there be twice as much wine as water.

13. Prohibits from Scripture that no fee may be taken for

14. Restricts the solemn celebration of baptism to Easter and Whitsun. It is ordered that the division of tithe into four portions: 1, for the bishop; 2, for the clerk; 3, for the poor; and, 4, for the fabric.

15. Requires that the dead be buried, if possible, at the cathedral church; if not, at the church belonging to a monastery, in order that they might benefit by the prayers of the monks; otherwise in the church to which they pay tithes.

16. Proves from Scripture that no fee may be taken for burial.

17. Forbids to bury laymen within the church.

18. Prohibits chalices and patens of wood.

19. Orders that water be mixed with the wine in the chalice, but that there be twice as much wine as water.

20. Prohibits from the home, and enacts penalties against those who cause the death of Christians by enchainments.

See Mansi, Concil. ix. 458.

21. The second council convened in October, 1076.

The pope's legates, with several German lords and some bishops, assembled in council, debated concerning the deposition of the emperor Henry IV., in consequence of which he passed into Italy, and, after the most humiliations concessions, obtained absolution from the pope, Jan. 25, 1077. See Mansi, Concil. i. 355.

TRIBUTE (prop. δόσις, φόρος), an impost which one prince or state agrees, or is compelled, to pay to another, as the purchase of peace or in token of dependence. In the Scriptures we find three forms of this requirement. See TAX.

1. Native (Hebrews acknowledged no other sovereign than God; and in Exod. xxx, 12, 15, we find they were required to pay tribute unto the Lord, to give an offering of half a shekel to "make an atonement for
their souls." The native kings and judges of the Hebrews did not exact tribute. Solomon, indeed, at the beginning of his reign, levied a tribute from the Canaanites and others who remained in the land and were not of Israel, and compelled them to hard service (1 Kings ix, 21-23; 2 Chron. viii, 9); but the children of Israel were exempted from that impost, and employed in the more honorable departments and offices of his kingdom. Towards the end of his reign, however, he appears to have imposed tribute upon the Jews also, and to have compelled them to work upon the public buildings (1 Kings v, 13, 14; ix, 15; xi, 27). This had the effect of gradually alienating their minds, and of producing that discontent which afterwards resulted in open revolt under the leadership of Jeroboam. The prophetic comment of that, "Thy father made our yoke grievous," said the Israelites to Rehoboam; "now, therefore, make thou the grievous service of thy father and his heavy yoke which he put upon us lighter, and we will serve thee" (xii, 4). See ASSESSMENT.

2. Foreign.—The Israelites were at various times subjected to heavy taxes and tributes by their conquerors. After Judah was reduced to a Roman province, a new poll of the people and an estimate of their substance was made by order of Augustus, in order that he might more correctly regulate the tribute to be exacted (Josephus, Antiq. xxvii, 15). This was a capital-tax levied at so much a head, and imposed upon all males from fourteen, and all females from twelve, up to the age of fifty years (Ulpian, Digest, de Census, lib. iii; Fischer, De Numism. Census).

The Assyrian Turins, or Chief of Tribes. The Aramean Turins. See RABBABIA. See TAXING.

To oppose the levying of this tribute, Judah the Gau-lonite raised an insurrection of the Jews, asserting that it was not lawful to pay tribute to a foreigner, that it was a token of servitude, and that the Jews were not allowed to acknowledge any for their master who did not worship the Lord. They boasted of being a free nation, and of never having been in bondage to any man before. These sentiments were extensively promulgated, but all their efforts were of no avail in restraining or mitigating the excesses of their conquerors. See JUDAS.

The Pharisees, who sought to entangle Jesus in his talk, sent unto him demanding whether it was lawful to give tribute unto Caesar or not; but, knowing their wicked designs, he replied, "Why tempt ye me, ye hypocrites?" "Render unto Caesar the things which are Caesar's, and unto God the things that are God's." See PENNY.

The apostles Peter and Paul severally recommended submission to the ruling powers, and incited the duty of paying tribute, "to whom tribute is due" (Rom. xiii, 1-8; 1 Pet. ii, 13).

III. The Temple Tax.—The payment of the half-shekels (= half-stater = two drachma) was (as has been seen above), though resting on an ancient precedent (Exod. xxxi, 9), in the character of a fixed annual rate, of late origin. It was proclaimed, according to Rabbinic rules, on the first of Adar, began to be collected on the 15th, and was due, at latest, on the 1st of Nisan (Mishna, Shekalim, 1, 7; Surenhusius, p. 260, 261). It was applied to defray the general expenses of the Temple, the morning and evening worship, the incense, wood, showbread, the red heifers, the scape-goat, etc. (Mishna, Shekal. loc. cit.; in Lightfoot, Hor. Heb. on Matt. xxii, 24). After the destruction of the Temple it was sequestered by Vespasian and his successors, and transferred to the Temple of the Capitoline Jupiter (Josephus, War, vii, 9). See TEMPLE.

The explanation thus given of the "tribute" of Matt. xxi, 24, is beyond all doubt, the true one. To suppose, with Chrysostom, Augustine, Maldonatus, and others, that it was the same as the tribute (ἀπαρτήριον) paid to the Roman emperor (Matt. xxii, 17) is at variance with the distinctness of Josephus and with the fact that it takes away the whole significance of our Lord's words. It may be questioned, however, whether the full significance of those words is adequately brought out in the popular interpretation of them. As explained by most competent critics, our Lord did not refer to our Lord of his divine Sonship, an implied rebuke of Peter for forgetting the truth which he had so recently confessed (comp. Wordsworth, Alford, and others): "Then are the children (παιδες) free;" Thou hast owned me as the Son of the Living God, the Son of the Great King, of the Lord of the Universe, in whose name men pay the Temple-tribute; why, forgetting this, dost thou so hastily make answer as if I were an alien and a stranger? This explanation, however, hardly does justice to the tenor of the language. Our Lord had not been present at the preceding Passover, and had therefore failed to pay the temple-tax at the regular time as the custom of his family. Hence he was waited upon in Galilee for that purpose, with some apprehension, perhaps, on the part of the collectors, that he might excuse himself for some reason, or at least neglect to pay. In his reply he asserts his just claim to exemption, not as an alien, but precisely because he was a member of the theoretic family in the highest sense. He was exempt on the broad constitutional ground that a king's son belongs to the royal household for whom tribute is collected, and not by whom it is rendered. Inasmuch as the tax was for the Temple service, Jesus, who was the son of the Lord of the Temple, was required to be exempted from the temple tax in common with other descriptions of persons. There is no reason to suppose that the tribute was collected exclusively in Roman coins, or that the tribute-money was a description of coin different from that which was in general circulation. See PENNY.

TRIBUT-MONEY (διαφροντος, the Temple-tax levied upon all Jews (Matt. xvii, 24); and likewise (ἀπαρτήριον) the money collected by the Romans in payment of the taxes imposed upon the Jews (xxii, 15). The piece shown to our Saviour at his own request (in the latter passage) was a Roman coin, bearing the image of one of the Caesars, and must have been at that time current in the Temple, and paid in payment of the tax in common with other descriptions of money. There is no reason to suppose that the tribute was collected exclusively in Roman coins, or that the tribute-money was a description of coin different from that which was in general circulation. See PENNY.

As regards the half-shekel of silver paid to the Lord by every male of the children of Israel as a ransom for his soul (Exod. xxx, 13, 15), colonel Leake says "that it had nothing in common with the tribute paid by the Jews to the Roman emperor. The tribute was a denarius, in the English version a penny (Matt. xxii, 17; Luke xx, 24); the duty to the Temple was a drachma, or drachmon, two of which made a stater. It appears, then, that the half-shekel of ransom had in the time of our Saviour been converted into the payment of a drachmon, or two of their drachmon formed a stater of the Jewish currency." He then suggests that the state drachmon was the one which was a tetradrachm of the Ptolemaic scale, though generally below the standard weight, like most of the extant specimens of the Ptolemites; and that the drachmon paid to the Temple was therefore of the same monetary scale. Thus, "say he," the duty to the Temple was converted from the half-shekel to the whole of a Ptolemaic drachmon, and the tax was nominally raised in the proportion of about 105 to 65;
but probably the value of silver had fallen as much in the two preceding centuries. It was natural that the Jews should have revived the old name shekel, and applied it to their stated, and equally so that they should have added the scale of the neighboring opulent and powerful kingdom, the money of which they must have long been in the habit of employing" (Appendix, Nusmata Hellenicum, p. 2, 3). See DUDACHLM.

Tricarium (τρίκαριον), a three-branched taper, so arranged that the wicks of each, though distinct, blend into one flame. With this the Oriental bishops sign the book of the gospels during certain services of the Greek Church.

Trichotomy (threefold division) is the theory according to which man is divided into three parts—body, soul, and spirit. This is thought by many to be the apostolic classification of our nature (1 Thess. v. 23). Generally soul and body are opposed; but spirit, so contrasted, is the highest portion of our nature, alloying it to God, and on which His Spirit works. Soul (in the German sense) is the lower portion, the region of appetitute, instinct, and of much besides which we have in common with the lower creation. This idea throws light on many passages of Scripture. The body mediates between the soul and the external world, the soul between the spirit and body, and the spirit between both and God. This view of man's nature would have it not to have been so keenly opposed by Tertullian, and so slighted even by Augustine, and had not Apollinaris adopted it to illustrate his erroneous view of our Lord's nature. He denied spirit, in this human sense, to Christ, but held that its place was occupied by the Divine Spirit. It was held by Luther, as it still is by the more evangelical part of the Lutheran Church. The Reformers, however, did not consider spirit and soul as different substances, but only as different attributes or operations of the same spiritual essence. See SOUL, SPIRIT.

Tridentine (of or belonging to Trent). The term is applied to the celebrated council of the 16th century, and to that part of the Church Universal which accepts the decrees and canons of the Council of Trent (q. v.).

Tridentine Profession of Faith, or the Creed of Pius IV, is a summary of the doctrines of the Council of Trent, suggested by that council, prepared by a college of cardinals under the supervision of pope Pius IV, and issued by him, Nov. 13, 1564. It consists of twelve articles, including the Nicene Creed (q. v.), and is put in the form of an individual's act of faith, and sworn oath. It is required of all Roman Catholic priests, and public teachers in seminaries, colleges, and universities. It is also used for Protestant converts to the Roman Catholic Church, and hence called the "profession of converts." The 10th article reads, "I acknowledge the holy Catholic Apostolic Roman Church as the mother and mistress of all churches; and I promise and swear true obedience to the bishop of Rome as the successor of St. Peter, prince of the apostles, and as the vicar of Jesus Christ." See Latin text in the two papal bulls of Nov. 1, 1545, Dec. 9, 1564, and in Denzinger's Enchiridion, 292-294; also a history of the same by Mohnike, Urkundliche Geschichte der Professio Fidei Tridentina (Gieffswald, 1822). See TREFT, COUNCIL OF.

Triennial Visitations, a visitation which is held once in three years. In England it is the custom to hold episcopal visitations at such intervals.

Triers, Ecclesiastical. A parliamentary ordinance was passed in 1654 appointing thirty-eight commissions to the office of triers: they were chosen by Cookwell, and were to sit in Westminster Hall. They were not nearly so independent, though some Presbyterians were joined with them. They were appointed to try all ministers that came for institution and induction, and without their approval none were admitted. The opinion of Baxter is that they were of essential service to the Church. He says they saved many congregations from ignorant, ungodly, and intemperate teachers—men who designed nothing more in the ministry than to repeat a sermon as readers say their prayers, and to patch up a few good words together to talk the people asleep on Sunday, and all the rest of the week go with them to the ale-house, and harden them under the name of men who either preached against a holy life, or preached as men that were not acquainted with it. They had power to eject scandalous, ignorant, and insufiicient ministers and schoolmasters.

Triglaw, in Slavonic mythology, was the supreme god of the Servians, Wendis, Poles, partly also of the Ruten islanders, Pomeranians, Prussians, and Lithuanians. He was, as his name indicates, triple-headed, and therefore represented the Slavonic trinity. The priests proclaimed Triglaw as the one supreme sovereign of heaven, earth, and the infernal regions. He was represented veiled, in the greatest temple at Stettin, as a celebrated man with three heads. A large army of priests served him, and taught that he, being long-suffering and kind-hearted, veiled his face so as not to see the evil deeds of men, and seldom made his appearance on earth, but taught his priests his will and commands, and by means of his holy black steed he distributed oracles, etc. This Being governed by his hoofs the whole population, and no one would have dared to do anything to which it did not give favorable signs. His temple, made of huge wooden posts covered with cloths, contained the largest part of all the spoils of war. Vast riches were heaped up here, and the superstitious dread of the people was a surer protection than marble or granite, perhaps, would have been. The religious and political campaigns of the pagans were the means of destroying all these temples, and closed to the world the inspection of the idols of their gods.

Trim, Council of. Trim is the town of Meath, situated on the river Boyne, about twenty-seven miles north-west of Dublin. It contains a national school, besides other public institutions; a handsome Roman Catholic Cathedral, the remains of which are Trim Castle; and the Yellow Tower, a part of St. Mary's Abbey, rebuilt by the De Lacy's in the 13th century.

The council was held on the Sunday after St. Matthew's Day (1291). Nicholas M'Murie, archbishop of Armagh, presided. The four archbishops, all the suffragans, the bishops of the cathedral church and its deans, and the other orders and degrees of the clergy, unanimously agreed in this synod to maintain and defend each other in all courts, and before all judges, ecclesiastical or secular, against all lay encroachments upon, and violations of, their rights, liberties, or customs; and further, to incline those of their messengers, executors of their orders, etc., who might receive loss or damage in the performance of their duty. Other articles of agreement were drawn up, pledging them to mutual co-operation in enforcing sentences of excommunication, etc. See NO, Hist. of the Irish Church, p. 17.
Trimmer, Sarah, a zealous promoter of religious education in England, was born at Ipswich, Jan. 6, 1741. She was carefully educated, and while a resident of London passed her time in the society of Dr. Johnson, Dr. Gregory Sharp, and other eminent persons in the literary world. To her reading she was directed by her father. Becoming a mother of a large family of children, her current of thought was turned to education. Having experienced great success in the plan of educating her own family, she naturally wished to extend that blessing to others, and this first induced her to become an author. She strenuously opposed the current of French and German infidelity and a lax education independent of the history and truths of revelation. She was also an early promoter and supporter of Sunday-schools. She died Dec. 13, 1810. Of her works, we refer to the last London edition: _Abrudgment of the New Test._ (1852, 18mo)---_Abridgment of the Old Test._ (1850, 12mo)---_Help to the Unlearned in the Study of the Holy Scriptures._ (1805, 8vo; 2d ed. 1850, 2 vols. 12mo)---_New and Comprehensive Lessons on the New Test._ (1849, 18mo)---_New and Comprehensive Lessons on the Old Test._ (1849, 18mo)---_Prayers and Meditations._ (1842, 12mo; 2d ed. 1860)---_Sacred History._ (1782-85, 6 vols. 12mo; 1841-49, 2 vols. 12mo)---_Scripture Catechism._ (1851, 2 vols. 12mo)---_The Economy of Charity._ (1786; revised 1801)---and many other works on history, education, etc. See Chalmers, _Bibl. Dict._ s. v.; Allibone, _Dict. of Brit. and Amer. Authors._ s. v.

**Trimmell, Charles,** bishop of Norwich and Winchester, was born at Ripon, Yorks, Dec. 37, 1668. He graduated with honor at Winchester College, and in 1688 was appointed preacher at Rolls. In 1691 he was installed prebendary of Norwich, in 1694 presented by the earl of Sunderland to the rectory of Bodington, and in 1698 installed archdeacon of Norfolk. About this time he was made chaplain in ordinary to queen Anne. Having no parochial duty in 1705, he for some time took charge of St. Giles's parish, Norwich; and in October, 1706, was instituted to St. James's, Westminster. In January, 1707, Mr. Trimmell was elected bishop of Norwich, and in August, 1721, he was transferred to the bishopric of Winchester. He died Aug. 15, 1729. He had a very serious turn of mind, and performed the duty of every station with the greatest exactness. His public life was characterized by great moderation and firmness of spirit. "He was a lover of peace and order both from judgment and inclination; and, being a sincere friend to the Church of England, he constantly avowed those principles of toleration and indulgence which make that Church the glory of the Reformation." Bishop Trimmell published fifteen single _Sermons, Letters, Charges,_ etc. (1697-1718).

**Trine Baptism.** A mode of administering the sacrament, which was so universal in the primitive Church that some entertain no doubt of its being derived from apostolic tradition. The person baptized was thrice immersed, or water was thrice poured on him, in the name of the three persons of the Godhead. The reason of trine baptism was manifest: the three immersions showed the distinction of the three divine Persons, although the baptism was only one, in the name of the undivided Godhead—"one baptism for the remission of sins." Thus in baptism the unity of the Divine Nature and the distinction of the three Persons are clearly implied and set forth. The first who departed from this usage was Eunomius the Arian. Trine baptism was according to the fifth apostolical canon, the bishop or presbyter who baptized with one immersion being ordered to be deposed. In the 6th and 7th centuries one immersion in baptism was substituted by some in Spain for the ordinary rule of the Church, the Council of Toledo (A.D. 688, canon 6) allowing single immersion in Spain, to avoid heresy; but this immersion lasted for only a short period, the early usage being restored, and remaining the rule of the Western Church. Single immersion has never been authorized by the Eastern Church. See Blunt, _Dict. of Doct. and Hist. Theol._ s. v.; Landon, _Manual of Councils,_ p. 582.

**Trine-Goed Controversy.** In the churches over which Hinemar (q. v.), archbishop of Rheims, presided, he forbade the singing of the last words of a very ancient hymn—_Te trinum Deitatis unitatem proessum_ ("Of thee, trine Deity, yet one, we ask")—on the ground that this phraseology subverted the simplicity of the Divine Nature, and implied the existence of three Gods. The Benedictine monks would not obey this mandate of Hinemar; and one of their number, Ratramnus, wrote in defence of a trine Deity. Godeschalcus, hearing of this dissension while in prison, sent forth a paper, in which he defended the cause of his fellow-monks. For this he was accused by Hinemar of Tritheism, and was confuted in a book written expressly for that purpose. But this controversy soon subsided; and, in spite of Hinemar's efforts, the words retained their place in the hymn. See Mosheim, _Ch. Hist._ bk. v, ch. ii, p. 94.

**Trinitarian Brothers, or Order of the Most Holy Trinity for the Redemption of Captives,** was founded by St. John of Matha, who was born at Faucon, Provence, in 1154. When he first celebrated divine service, after his ordination, he beheld a vision of an angel in white, having a cross of red and blue on his breast, and in his hands, crossed over each other, rested on the heads of two slaves who knelt on each side of him. He, with another holy man, Felix de Valois, arranged the institution of a new order for the redemption of slaves. They went to Rome, and received the approval of Innocent III in 1196. They assumed the white habit, having on the breast a Greek cross of red and blue. They returned to France, and received from Gaucher de Chatillon lands in the province of Valois. The pope also gave them at Rome the church and convent of S. Maria della Navicella, on the Monte Celio. Honorius III confirmed their rule, and in 1267 Clement IV approved of a change in their rules permitting them to purchase meat and own horses. They had at one time two hundred and fifty convenues in France, three in Spain, forty-three in England, fifty-two in Ireland, besides others in Portugal, Italy, Saxony, Hungary, and Bohemia. In 1504 the Barfooted branch of this order was begun by Jean Baptiste de la Conception in the convent of Valde, Spain. He was granted a bull by Clement VIII in 1598.
TRINITARIAN SISTERS

TRINITY

to establish a reform in his order and lead them back to the original practice. The founders of the Trinitarians placed themselves under the protection of St. Radegunda, queen of Clothaire V of France, who afterwards took the religious habit and founded a monastery at Moissac. See Jameson, Leg. of Monastic Orders, p. 217 sq.; Migne, Dict. des Ordres Relig. s. v.

Trinitarian Sisters. This order was founded at Valence in 1619, and constituted a convent in 1696. They received letters patent from Louis in 1712, and were registered in Parliament in January, 1728. They established two hospitals, which were in 1802 devoted to the care of aged men and women. They have been quite flourishing since 1887. See Migne, Dict. des Ordres Relig. s. v.

Trinitarian Nun.

Trinitarians. A general name for all Christians who hold the doctrine of the divine Trinity (q. v.).

Trinity. The doctrine of the Trinity in the godhead includes the three following particulars, viz. (a) There is only one God, one divine nature; (b) but in this divine nature there is the distinction of Father, Son, and Holy Ghost, as three (subjects or persons); and (c) these three have equally, and in common with one another, the nature and perfection of supreme divinity. It was the custom in former times for theologians to blend their own speculations and those of others with the statement of the Bible doctrine. It is customary now to exhibit first the simple doctrine of the Bible, and afterwards, in a separate part, the speculations of the learned respecting it.

1. The Biblical Doctrine.—It has always been allowed that the doctrine of the Trinity was not fully revealed before the time of Christ, and is clearly taught only in the New Testament. Yet, while it is true (1) that if the New Testament did not exist we could not derive the doctrine of the Trinity from the Old Testament, alone, it is equally true (2) that by the manner of God's revelation of himself in the Old Testament, the way was prepared for the more full disclosure of his nature that was afterwards made. But (3) respecting the intimate connection of these persons, or respecting other distinctions which belong to the doctrine of the Trinity, there is nothing said in the Old Testament. While in each particular text allusion is made to a trinity or plurality in God, yet these texts are so many in number and so various in kind that they impress one with the opinion that such a plurality in God is indicated in the Old Testament, though it is not fully developed or clearly defined.

(1) The texts of the Old Testament may be arranged in the following classes:

1. Those giving the names of God in the plural form, and thus seeming to indicate a plurality of his nature, of which בִּשְׁמוֹ, בְּנִי אֵל, בְּנֵי אֶל, etc. are cited as examples; but as these may be only the pluralis majestatis of the Oriental languages, they afford no certain proof.

2. Texts in which God speaks of himself in the plural. The plural in many of these cases can be accounted for from the use of the plural noun בְּנֵי אֶל, etc. Philo thinks (De Opif. Mundi, p. 17) that in the expression "Let us make man" (Gen. i, 26), God addresses the angels. It is not uncommon in Hebrew for kings to speak of themselves in the plural (1 Kings xii, 9; 2 Chron. x, 9; Ezra iv, 18). In Isa. vi, 8 God asks, who will go for us (v. 52), where the plural form may be explained either as the pluralis majestatis, or as denoting an assembly for consultation.

3. Texts in which יהוה (Jehovah) is distinguished from יהוה (Elohim). These texts do not, however, furnish any decisive proof; for in the simplicity of ancient style the noun is often repeated instead of using the pronoun; and, from Jehovah may mean from himself, etc. Further, the name יהוה (Elohim) is sometimes given to earthly kings, and does not, therefore, necessarily prove that the person to whom it is given must be of the divine nature.

4. Texts in which express mention is made of the Son of God and of the Holy Spirit.

(a) Of the Son of God.—The principal text of this class is Ps. ii, 7, "Thou art my son; this day have I begotten thee;" comp. Ps. lxxii, 1; lxxxix, 27. This Psalm was understood by the Jews and by the writers of the New Testament to relate to the Messiah. But the name Son of God was not unfrequently given to kings; it is not, therefore, nomen essentiae, but dignitatis Messiacae. The passage would then mean, "Thou art the king (Messiah) of my appointment; this day have I declared thee such." In this psalm, therefore, the Messiah is rather exhibited as king, divinely appointed ruler and head of the Church, than as belonging to the divine nature.

(b) Of the Holy Spirit.—There are many texts of this class, but none from which, taken by themselves, the personality of the Holy Spirit can be proved. In these texts the term Holy Spirit may mean (1) the divine nature in God; (2) a particular character or excellence, such as omnipotence, knowledge, or omniscience; (3) the divine agency, which is its more common meaning. Isa. lxxvi, 16, "And now Jehovah (the Father) and his Spirit (Holy Ghost) hath sent me" (the Messiah), is supposed to teach the whole doctrine of the Trinity. But the expression "and his Spirit" is used by the prophets to mean the direct, immediate command of God. To say, then, the Lord and his Spirit hath sent me is the same as to say, the Lord hath sent me by a direct, immediate command.

5. Texts in which three persons are expressly mentioned, or in which there is a clear reference to the number three (Num. vi, 24; Psa. xxxviii, 6; Isa. vi, 3). But the repetition of the word Jehovah in the one text is not an undeniable proof of the Trinity; and in the other, the word of his mouth means nothing more than his command; and in the last text the threefold repetition of the word Holy may have been by three choirs, all uniting in the last words, "The whole earth is full of thy glory."

Thus it appears that none of the passages cited from the Old Testament, in proof of the Trinity, are conclusive when taken by themselves; but, as was before stated, when they are taken in connection, they convey the impression that at least a plurality in the godhead was obscurely indicated in the Jewish Scriptures.
TRINITY

(II) Since we do not find in the Old Test. clear or decided proof upon this subject, we must now turn to the New Test. The texts relating to the doctrine of that which the Father, Son, and Holy Spirit are mentioned in connection, and those in which these three subjects are mentioned separately, and in which their nature and mutual relation are more particularly described.

1. The first class of texts, taken by itself, proves only that there are the three subjects named, and that there is a difference between them; that the Father in certain respects differs from the Son, etc.; but it does not prove, by itself, that all the three belong necessarily to the divine nature, and possess equal divine honor. In proof of this, the second class of texts must be adduced. The following texts are placed in this class:

Matt. xviii, 18-20. This text, however, taken by itself, would not prove decisively either the personality of the three subjects mentioned, or their equality or divinity. (a) The subject into which one is baptized is not necessarily a person, but may be a doctrine or religion. (b) The person in whom one is baptized is not necessarily God, as 1 Cor. i, 13, "Were ye baptized in the name of Paul?" (c) The connection of these three subjects does not prove their personality or equality. We gather one thing from the text, viz. that Christ considered the doctrine respecting Father, Son, and Holy Spirit, as essential to the salvation of human beings; because he requires all his followers to be bound to a profession of it when admitted by baptism into the Church.

1 Pet. i, 2: "Elect according to the foreknowledge of God the Father, through sanctification of the Spirit, unto obedience and sprinkling of the blood of Jesus Christ." From what is here said of the Holy Spirit, it does not necessarily follow that he is a personal subject; nor, from the predicates here ascribed to Christ, that he is necessarily divine. This passage, therefore, taken by itself, is insufficient.

2 Cor. xiii, 14, "The grace of the Lord Jesus Christ, and the love of God, and the communion of the Holy Ghost, be with you all." Here we might infer, from the parallelism of the third member of the passage with the two former, the personality of the Holy Spirit; but we could not justly infer that they possessed equal authority.

John xiv, 26 offers three different personal subjects, viz. the Comforter, the Father, and Christ; but it is not sufficiently proven from this passage that these three subjects have equal divine honor, and belong to one divine nature.

John ix, 15, 17 has been considered a very strong proof-text for the whole doctrine of the Trinity. But though three personal subjects are mentioned, viz. the voice of the Father, the symbol of the Holy Spirit, and Christ, yet nothing is here said respecting their nature.

John v, 7, 8 are generally admitted to be spurious; and, even if allowed to be genuine, they do not determine the nature and essential connection of the three subjects mentioned.

2. We now turn to the second class of texts, viz. those in which the Father, Son, and Holy Ghost are separately mentioned, and in which their nature and mutual relation are taught. These texts prove (a) that the Son and Holy Spirit, according to the doctrine of the New Test., are divine, or belong to one divine nature; and (b) that the three subjects are personal and equal.

(1.) The Deity of the Father.—When the term Father is applied to God, it often designates the whole godhead, as 1 Cor. i, 3, i Cor. vii, 10; 1 Cor. viii, 4-6; John xvii, 1-3. He is often called Θεός καὶ Πάριπος, i.e. Θεός ο Πάριπος, or Θεός δι ινν Πάριπος, as Gal. i, 4. All the arguments, therefore, which prove the existence of God prove also the deity of the Father.

(2.) The Deity of Christ.—To prove the deity of Christ we present three classes of texts.

(a.) The following are the principal texts in which divine names are given to Christ.

John i, 1, 2. Christ is here called Θεός (the Word), which is a title very commonly given to the Messiah by the Jews (see Matt. xvi, 16; Luke ix, 20; Matt. xxvii, 40; Luke xxxii, 33; see also Mark xiii, 32; 1 Cor. xv, 28); [2] the higher nature of Christ (John v, 17 sq.; x, 36, 38; xx, 31; Rom. i, 3, 4; [3] he is also called the Son of God (Luke i, 35), to designate the immediate power of God in the miraculous production of his human nature.

(b.) Texts in which divine attributes and works are ascribed to Christ. It is not necessary to find texts to prove that all the divine attributes are ascribed to Christ. These attributes cannot be separated; and if one of them is ascribed to Christ in the Bible, the conclusion is inevitable that he must possess all the rest. The following attributes and works are distinctly ascribed to Christ in the Scriptures:

[1.] Eternity (John i, 1; vii, 58; xvii, 5; Col. i, 17).
[2.] Creation and preservation of the world (John i, 1-3, 10, 11; John iii, 10, 11; John xviii, 10; Ps. cxii, 26 is quoted and applied to Christ); ii, 10).
[3.] Omniscience is ascribed to Christ (Phil. iii, 21; omniscience (Matt. xi, 27). He is described as the searcher of hearts, etc. (1 Cor. iv, 5).

(c.) Texts in which divine honor is required for Christ. The following are the principal texts of this class: John v, 28, "All men should honor the Son, even
TRINITY

553

loosophizing Christians substituted another theory on
the subject of the Trinity, which, however, was none
the less from their philosophical ideas than from
the instructions of the Bible. Among the
writers of this class was Praxeas, of the 2d century,
who contended that the Father, Son, and Spirit
were not distinguished from each other as individual
subjects; but that God was called Father, so far as he
was creator and governor of the world; Son (Hiosc),
so far as he had endowed the man Jesus with extraordinary
powers, etc. He, in accordance with this view, denied
any higher, pre-existing nature in Christ; and with him
agreed Artemon, Notetus, and Beryllios of Bosra.
Sabellius regarded the terms Father, Son, and Holy Spirit
as merely symbolizing different divine works, and various
modes of divine revelation.

In the following table the writers of the first three
centuries on the subject of the Trinity are ranged ac-
cording to their opinions:

Among the terms introduced in the discussion of
the doctrine of the Trinity during this period the following
are the most common, viz. (1) Trias, introduced by
Theophilus of Antioch in the 2d century, and often used
by Origen in the 3d century. Tertullian translated it
into Latin by the word trinitas, of which the English
word is an exact rendering. (5) Oiosis, trizostas.
These terms were not sufficiently distinguished from
each other by the Greek fathers of the 2d and 3d cen-
turies, and were often used by them as entirely synonym-
ous. By the word trizostas, the older Greek fathers
understood only a really existing subject, in opposition
to a nonentity, or to a merely ideal existence; in which
sense they also do not unconditionally use the word oiosis.

We call attention to the following as shedding light
upon the practice of the Church during this period.
Pliny, a judge under Trajan, in the beginning of the
2d century took the confessions of some accused Chris-
tians, and says, "They declared that they were used to
meet on a certain day before it was light, and, among
other parts of their worship, sing a hymn to Christ as
their God." Polycarp (Ep. ad Phil. n 12) joins
God, the Father and the Son, the one together, the other
in grace and benediction upon men. Justin Martyr answering,
in his Second Apology, the charge of atheism brought
against them by the heathen answers, "That they wor-
shipped and adored still the God of righteousness and
his Son, as also the Holy Spirit of prophecy, Athe-
ism and paganism assert this charge by which they
struggle to sadden and destroy all the glory of its
name, was commonly received by most of those fathers
of the 2d and 3d centuries who assented, in general, to
the philosophy of Plato. Another class of learned, phi-

As they honor the Father; Acts i, 24; vii, 59; 2 Cor.
iii, 8, where Christ is approached in prayer; and those
in the book of the Psalms. Christ the text of the
Old Testament. This phrase of the honor and worship of God,
e. g. Heg. 6, from Isa. xxvii, 7; also Rom. xiv, 11 from
Isa. xlv, 3; Phil. ii, 10; 2 Cor. v, 8-11; 2 Tim. iv, 17, 18.

The third point in the discussion of this doctrine
is the personality and divinity of the Holy Spirit; for
a full discussion of which see Holy Ghost.

II. History of the Doctrine—Respecting the manner
in which the Father, the Son, and the Holy Ghost make
one God, the Scripture teaches nothing, since the sub-
ject is of such a nature as not to admit of its being ex-
plained; but it belongs to theologians to consider and
speculate as merely dependent upon these general doc-
trines, and to try in their attempts to illustrate it they
have pursued various methods.

As Held by the Primitive Christians—For the first
age the Scripture is sufficient evidence of the Chris-
tians' practice. But, not to insist upon the precept of
honoring the Son as they honored the Father; or the
form of baptism, in which they were commanded to
join the Father, Son, and Holy Ghost in one act of
worship; or the injunction to believe in the Son as they
believed in the Father, let reference be made only to
their examples and practice. Stephen, the apostle, when
he was sealing his confession with his blood, prayed to
Christ, "Lord Jesus, receive my spirit," and
"Lord, lay not this sin to their charge" (Acts viii, 59,
60). Paul asserts that he baptized only in the name of
Christian (1 Cor. i, 13). Notice also his constant use of
the name of Christ in invocation. There is the well-
known fact that the early believers were known as
those who called on the name of Christ (Acts ix, 14, 21;
1 Cor. i, 2; 2 Tim. ii, 22).

As Held in the 2d and 3d Centuries—Towards the end
of the 1st century, and during the 2d, many learned
men came over from both Judaism and paganism to
Christianity. These brought with them into the Chris-
tians' schools of theology their Platonic ideas and phra-
sesology, and they especially borrowed from the phi-
losophical writings of Philo. As was very natural,
young thinkers, in their philosophizing re-
specting the Trinity, principally to the Logos; connect-
ing the same ideas with the name Hiosc as had
been done before by Philo and other Platonists. Differing
on several smaller points, they agreed perfectly in the
following general views, viz.: the Logos existed before
the creation of the world; he was begotten, however,
not by the Father, but by God. By this Logos the
Neoplatonists understood the infinite understanding of
God, belonging from eternity to his nature as a power,
but that, agreeably to the divine will, it began to exist
out of the divine nature. It is therefore different from
God, and yet, as begotten of him, is entirely divine.
By means of this Logos they supposed that God at first,
created, and now preserves and governs, the universe.
Their views respecting the Holy Spirit are far less
clearly expressed, though most of them considered him
a substance emanating from the Father and the Son,
and as such a power divine in nature. These
philosophical Christians asserted rather the di-
riness of the Son and Spirit, and their divine origin,
than their equal deity with the Father. Justin Mar-
ty expressly declares that the Son is in God what
the understanding (wiosc) is in man, and that the Holy
Spirit is the Logos of the Father, as the Logos of the
Son is called Logos. The name, by which Arrianism in the later
name, was commonly received by most of those fathers
of the 2d and 3d centuries who assented, in general, to
the philosophy of Plato. Another class of learned, phi-
the Father must be regarded as really distinguished from the Son, and the Holy Spirit as distinguished from both. The persons of the Father, the Son, and the Holy Spirit, and the question in what distinction between them properly consists, not having been discussed, these subjects were left undetermined by the decisions of councils and symbols. Different opinions prevailed, and learned men were left to express themselves according to their convictions.

Origen and his followers maintained, against the Sabellians, that there were in God τρεῖς ὑποστάσεις (three persons), but μία οἰκία (one substance) common to the three. Few had as yet taught the entire equality of these three persons, but had allowed, in accordance with the Sabellianism, that all the belonging to the divine nature, was yet subordinate to the Father. In the beginning of the 4th century, Alexander of Alexandria, and Athanasius, his successor, attempted to unite the hypotheses of Origen and Sabellius, thinking that the truth lay between the two extremes. Athanasius stated the personal distinction of the Father and the Son to be that the former was without beginning and unbegotten, while the latter was eternally begotten by the Father, and equally eternal with the Father and the Spirit.

Arians, about 328, disputed the doctrine taught by Athanasius and Origen, and with it, and so favored the Sabellian theory. As the controversy proceeded, Arians declared, in opposition to Sabellius, that there were not only three persons in God, but that these were unequal in glory (διέσχει τιν ρήμα τιν θεόν); that the Father alone was supreme God (διά τὸν θεόν), and God in a higher sense than the Son; that the Son derived his divinity from the Father before the creation of the world, and that he owed his existence to the divine will; and that the Holy Spirit was likewise divine in a sense inferior to that in which the Father is so. In opposition to all the Arian, and various other theories,Athanasius maintained the doctrine of the Trinity, and succeeded, at a general council at Nice in 325, in having a symbol adopted which was designed to be thenceforward the only standard of orthodoxy. This symbol was confirmed by the council held at Constantinople in 381, under Theodosius the Great. The distinctions established at Nice and Constantinople were often re-enacted at various succeeding councils. Many urged, in opposition, that tritheism (q. v.) was the inevitable consequence of the admission of these distinctions, but they, nevertheless, remained in force. The council adopted the word ὑποστάσεις (consubstantially), explaining some of them as present, some as past, some finally generated from the nature of the Father, and is therefore in all respects equal to him, and no more different, as to nature, from God than a human son is from his father, and so cannot be separated from the Father. All that they meant to teach by the use of this word was that the Father, Son, and Holy Spirit had the divine nature and divine perfections so in common that one did not possess more and another less; without asserting, however, that there were three Gods: in short, that in the Godhead there were tres distincti, unilate esse entiae conjuncti. See CREES, NICENE.

The characteristics by which the distinctions of the Trinity may be distinguished from each other under this view belong to two classes.

(1.) Internal ("characteres interni"). These are distinctive signs arising from the internal relation of the three persons in the Godhead to each other, and indicative of their nature. These distinctions are derived from the names Father, Son, and Spirit, and from some other Bible phraseology: (a) The Father generates the Son, and emits the Holy Spirit, generat Filium, spiritut Spiritum Sanctum; and possesses, therefore, as his personal attributes, generatio et generationis; (b) The Son generates the Father—Filii est generari non generare. The Son, therefore, possesses as his personal attributes filiatio, generatio passiva; and also, as he is supposed to emit the Spirit in conjunction with the Father, spiritatio ac- •cepta. Of the same nature as these personal attributes are generatio or generationis, and generationes, which are generated, but proceeds from the Father and the Son—Spiritus Sanctus est, nec generans nec generari, sed procedere. In regard to the Holy Spirit, there was nothing decided, during the first three centuries, by ecclesiastical authority respecting his nature, the characteristics of his person, or his relation to the Father and the Son. Nor was anything more definite, with regard to his nature and his relation to the other persons of the Trinity, than what has already been stated, established by the council at Nice, or even by that at Constantinople. To believe in the Holy Ghost—to eiν συναι συναι διαθήκη—was all that was required in the symbol there adopted. But there were many, especially in the Latin Church, who maintained that the Holy Spirit did not proceed from the Father only, but also from the Son. They appealed to John xvi, 13, and to the texts where the Holy Spirit is called the Spirit of Christ. (Spiritus Christi, e. g. vii. 31.) To this doctrine the Greeks were, for the most part, opposed, because they did not find that the New Testament ever expressly declared that the Spirit proceeded from the Son. It prevailed, however, more and more in the Latin Church; and when in the 6th and 7th centuries the Arians urged it as an argument against the equality of Christ with the Father, that the Holy Spirit proceeded from the Father only, and not from the Son, the Catholic churches began to hold more decidedly that the Holy Spirit proceeded from both; and insert the adjacent Filioque after Patre in the Symbolum Niceno-Constantinopolitanum.

(2.) External ("characteres externi"). These are characteristics of the persons of the Trinity arising from the works of the Deity relating to objects extrinsic to itself, and called opera externa, sine ad extra. They are twofold: (a.) Opera Detαι economica, those institutions which God has founded for the salvation of the human race. The Father sent his Son to redeem men (John iii, 16. 17), and gives or sends the Holy Spirit (xiv. 26). The Son is sent from the Father, etc., and sends the Holy Spirit from the Father (xvi. 26). The Holy Spirit formed the human nature of Christ (Luke i. 38) and anointed it (Acts x, 38), i. e. endowed it with gifts; and is sent into the hearts of men, and carries them forward towards moral perfection. (b.) Opera Detαι attributica, such divine works as are common to the three persons, but which are frequently ascribed to one of the three. To the Father are ascribed the decree to create the world, the Sanctification of the Son, but generally, the actual creation and the actual sanctification of it. To the Son, also, the creation, preservation, and government of the world are ascribed; also the raising of the dead and judgment. To the Holy Spirit are ascribed the immediate revelation of the divine will to the prophets, the continuation of the great work of salvation commenced by Christ, and the communication and application to men of the means of grace.

4. History of the Doctrine since the Reformation. Nearly all the writers upon the subject of the Trinity since the Reformation belong to some one of the general classes already mentioned. We present several theories which are maintained by some or other of the modern schools of theology.

(1.) Some have attempted to illustrate and explain this doctrine by philosophy; and not a few have gone so far as to think they could prove the Trinity a priori, and that reason alone furnishes sufficient argument for its truth. Others, again, look to reason for nothing more than a means of arriving at this faith of the Church with patience and constancy. In the latter class may be placed Philip Melancthon, who, in his Lecti Theologici, thus explained the Trinity: "God from his infinite understanding produces thought, which is the image of himself. To this thought he imparts a spiritual existence, which, bearing the impress of the Father, is like unto the Father, and hence called by John λόγος. This illustration of the Trinity was received without offence or suspicion, until
TRINITY

the heresy which lurks beneath it was detected and ex-
posed by Falcius. The latest attempt to explain the
Trinity in this manner may be found in the Berliner
Monatschrift, Sept. 1789, § 280, in an article written
by a rabbi of Prague, who refers to the accidents of
space, viz. length, breadth, and thickness, as an illustra-
tion of the Trinity. Among those who supposed that
the Trinity could be mathematically proved were Bar-
tholomew Heckerman, in his Systema Theologicum;
Peter Poiret, and Daries, who published an essay In qua
Plurititas Personarum, Methodo Mathem-
aticorum, Demonstratur (Leovardiae, 1738, 8vo).

(2.) Others have expressed themselves so boldly on
the subject of the Trinity that they have seemed to ap-
proximate towards tritheism; in which class we may
mention Matthew Gribaldus of Padua, in the 16th
century, who maintained that the divine nature consisted
of three equally eternal spirits, between whom, however,
he admitted a distinction in respect to rank and perfec-
tions.

(3.) Some modern writers have inclined to adopt the
Sabellian theory, among whom were Servetus (q. v.),
Grotius, Stine Soccre; Stephen Nye, Doctrine of the
Trinity (Lond. 1701). In this class we place the hy-
pothesis of Le Clerc, that the Father, Son, and Holy
Spirit designate the different modifications of the di-
vine understanding, and the plans which God forms.
This is the error into which Weigel and Jacob Böhme
fell; they say that God created one substance; and have as
explained the Trinity as to lose the idea of three divine
persons, for which they have substituted either three
distinct powers or attributes (as Meier, Seiler, Claudius,
and Tüldner), or a threefold agency in God—three eternal
actions distinct from each other (as S. G. Schlegel, Kant,
Tieftrunk, Duth, Schelling, de Wette, and Fechner).

(4.) The Arius theory has also found advocates among
Protestant theologians, especially those of the 18th cen-
tury (e. g. Whiston, Harwood, and Wettstein); but the
system which has met with the most approbation is that
more refined subordination of God, taught by Samuel
Clarke, Scripture Doctrine of the Trinity (Lond. 1712).

(5.) The Socinians or Photinians. The founder of this
sect were Lælius Socinus and his nephew Faustus
Socinus (q. v.), who brought over considerable numbers
to their doctrine in Poland and Transylvania.

A new theory on the Trinity was proposed by Dr. Ueberreiter, in his Worten von Gotts Dreyeinigkeit (Augustburg, 1777, 8vo). He en-
deavored to unite the three theories—the Arian, Sabel-
lian, and Nicene—by making a distinction between tri-
nitas essentiva, the internal threefold distinction neces-
sary to the divine nature, and trinitas ecclesie,
the three persons revealed to us in the work of redemption.

It is proper to say that "the conclusion is obvious that,
while we are taught by the Scriptures to believe in
two equal subjects in the Godhead, who are de-
scribed as persons, we are still unable to determine in
what manner or in what sense these three have the di-
vine nature so in common that there is only one God" (Knapp, Christ, Theology, § 34-44). See PERSON.

III. Practical Value of the Christian Doctrine of the
Trinity.—The idea of a triune being—Father, Son, and
Holy Ghost—seems to be preconceived, but to the recipient of the practical advantages of the doctrine of the Trinity in
quite a different manner: not as serving merely to prove
another proposition without being also true in itself, but
as aiding us in arriving at the knowledge of God's na-
ture with an efficacy which is essentially inherent to its
object. The practical advantage may not be considered
either as not true or lofty enough, or not good
and holy enough, or not essentially active enough; these
may be considered as possible faults of a given system
of deism. So long, then, as it distinguishes only between
God and the world, and not between God himself, it re-
tains all the contradictions necessary to the concept of
the one and the other, or to deny the existence of an absolute being. An ab-
olute safeguard against atheism, polytheism, panthe-
ism, or dualism cannot be found except in the doctrine of
the Trinity; for the distinction existing between the
Divine Being and the world is better made and observed
as an absolute one; the world is worshiped by the trine God,
or by those who do not. Those monotheistic systems
which were the most strenuously opposed to the idea of
a Trinity, such as Judaism and Mohammedanism, have,
by reason of their dryness and emptiness, led to the
greatest pantheism.

From the doctrine that the Word, who was God, be-
came flesh, follows the necessity of considering God as
personally united with sinless humanity, but at the same
time, also, the necessity of drawing a clear distinction
between the divine essence and mere human nature.

Consider the Trinitarian system as a solution; even when
we do not consider that the Primitive Church did not, for
a long time, recognize these three persons but as only
ěděněτσπ, ῥωυτήστισ, etc.

The Latin Church alone has, since Augustine, sancti-
tioned the expression persona in the Symbolum Qui-
cunque. Augustine himself said, yet, "Tes personas, si
lit dicendae sunt." Some consider the Trinity as essen-
tial to constitute the perfect personality, and employ the
metaphysics of consciousness as an analogical proof there-
of (see Schneider, Clineet, drei geistliche Gespräche ü. d.
Personen d. Gotttheit [1834]). Others refuse to recog-
nize the real personality of God in any but one of the so-
called hypostases, namely, in the Logos, the Son. Such
Christian theologians of all times have made a certain rational understanding of this mys-
tery possible, and found it necessary. It is even es-
nentially necessary for the Biblical theologian to recog-
nize in the notion of the Logos—who is with God and is
God, the preceptive image of God, the inmost spirit of
God who knows a Godhead in a Godhead, the true and
whole Trinitarian system of Divine Being. For those only retain the trace of Bibil-
ical theology who, in all attempts at explaining it, keep
in view the notion of the self-knowledge and self-love
of God, or of the distinction between the self-revealing
and self-revealing God. Twentieth century has largely
expanded the notion of Trinity, and has attempted to
perfect it, but to the recipient of the practical advan-
tages of the doctrine of the Trinity in quite a different manner: not as serving merely to prove
another proposition without being also true in itself, but
as aiding us in arriving at the knowledge of God's na-
ture with an efficacy which is essentially inherent to its
object. The practical advantage may not be considered
either as not true or lofty enough, or not good
TRINITY (HEATHEN NOTIONS) 556 TRIPOLIS

nite, and this he finds in the primordial, creative thought of God. But revelation cannot take place except through discerning beings, and finite beings cannot know God save in himself, but this process presents the three notions of God, Logos, and Spirit, yet forming still but one goad. Such as God reveals himself, such, however, he is. This leads us to another consideration, viz. that the ego, in order to possess a real, living personality, must not only become duly contradistinguished within itself, but the third process reflectively act on itself as a third subject, and be conscious of itself as being a perfect image of self. This manner of treating this mystery, by analogy, is neither accidental nor gratuitous, since, according to Scripture, human nature is also analogous to the divine. Tertullian and Augustine had themselves established their theorems already on this basis.

IV. Literature.—This is immensely copious. We can here refer only to a few leading authorities. See Baur, Hist. of Doctorats; Burra, The Trinity (Chicago, 1874); Cunningham, Hist. Theol., i. 267; Lamson, Origin of Trinity, in随手 Christianum und die Verehrung (Berlin, 1784, 8vo); Marxenecke, Grundrissen der christl. Dogm. p. 129, 370 (ibid. 1819); Mattison, The Trinity and Modern Aristianism (1880); Morus, Protestantism, Mose-heim, Leben Servos (Helmst. 1748, 8vo); Meier, Historie des Christentums (Berlin, 1826, 8vo); Sailer, Theorie des Weim (Spottels, 181, 8vo); Walch, Historia Controversiae Grecorum Latinorumque de Processione Spiritus Sancti (Jena, 1751, 8vo); Ziegler, Geschichtsentwicklung des Dogmas vom heiligen Geist. For further literature see Biblioth. Sac. (1846-70), indexes; J. x.-xxx; Dantz, Wörterb. der theolog. Literatur, n.s. "Trinität." Darling, Cyclop. Bibl., cols. 268, 1446, 1719-1722; Poole, Index to Period. Lit. s. v. "Trinity."

TRINITY, HEATHEN NOTIONS of. In examining the various heathen philosophies and mythologies, we find the evidence of a belief in a certain sort of trinity, and yet something very different from the Trinity of the Bible.

In the Egyptian mythology, the powers of the Supreme Being as the producer, the producing, and the produced were symbolized by deities who were respectively the Father, the Mother, and the child of an as yet undistinguishable power. Every Egyptian town had its local triad, and the most famous was the great Theban triad of Amen-ra, Maut, and Khousa. Sometimes the king himself, as a god, made the third member of the triad. These combinations of divine properties must not be confounded with the dogma of a trinity either of creator, preserver, and destroyer, as in Hindu mythology, or of Creator, Redeemer, and Sanctifier of the Christian faith. The Babylonian mythology offers a trinity, each member of the triad having his own wife or consort. At the head of this trinity stands Annu, representing abstract divinity. He appears as an original principle; the primeval chaos, the god of time, and the world—unchanged matter issuing from the fundamental principle of all things. A companion deity with Annu is Hea, god of the sea and of Hades. He is lord of generation and of all human beings; he animated matter and rendered it fertile, and in time the universe with life. The third member of this triad was Bel (Elu, Eau, Kaptu), the demiurgus and ruler of the organized universe. There were also second and third trinities descending from the first, but becoming more and more defined in character, and assuming a decidedly sidereal aspect.

According to Strabo (l.c. 550), the Greeks believed that God first produced the ideal world, i.e., his infinite understanding conceived of the existence of the world, and formed the plan of creation. The real world was then formed after this ideal world as its model; and this was done by uniting the soul of the world with matter, by which the world was created, and a world was formed. —guided, pervaded, and held together by this rational soul. The three principles of Plato were (a) the Supreme God, whom he calls Παράγον (b) the divine understanding, which he calls νοῦς, Λόγος, σωφρυόν, σοφία; and (c) the soul of the world. These views are developed in his Timaeus, etc. The Neo-Pythagoreans eagerly embraced these ideas of Plato, and during the 2d and 3d centuries seemed to labor to outdo another in explaining, defending, and more fully developing them. They not only widely differ from Plato, but often disagree among themselves in their mode of thinking and in their phraseology.

While the Jews who resided in Palestine were satisfied with their Pharisaic-Rabbinic theology, and looked for their Messiah as a religious reformer, this was not the case with those residing elsewhere, who had been educated under the influence of the Grecian philosophy. These abandoned the expectation of a future Messiah, or regarded his kingdom as entirely of a moral nature. Among them the theory of the Λόγος was found as early as the 1st century. The Λόγος they regarded as existing before the Creation, and as the instrument through whom God made all things. See Knapp, Christ. Theol. p. 145 sq.; Lenormant, Child, Magic, ch. ix.; Smith, Child. Account of Genesis; Tholuck, Die speculative Trinitätslehre der neueren Orientalen (Berlin, 1826, 8vo).

TRINITY, FRATERNITY OF THE, a religious society instituted at Rome by Philip Neri in 1548. They had charge of the pilgrims who were constantly coming to Rome from all parts of the world. Pope Paul IV gave them the Church of St. Benedict, near which they built a large hospital, and in which there was also a college of twelve priests for the instruction of pilgrims.

TRINITY Sunday, the octave day of the feast of Pentecost. The introduction of this day into the calendar is of comparatively recent date, it being established by pope Gregory XI, A.D. 1374. It is probable that the custom of many Christians against the use of images in the 8th and 9th centuries may have been the first cause of the appointment of a distinct day for meditating upon the nature of the Holy Trinity in unity, or the one true God, as distinguished from all idols. The reason for its late introduction is that in the creed of the Church, and in its psalms, hymns, and doxologies, great prominence was given to this doctrine, and it was thought that there was no need to set apart a particular day for that which was done every day.

TRIPHYSITES (from τρίσι, three, and φυσικ, nature), those divines who, at the fourteenth and fifteenth councils of Toledo, A.D. 686, 698, carried their opposition to the Filioque and Monothelite to an extreme that they declared a belief not only in Christ's distinct divine and human natures, but also in a third nature resulting from the union of the two.

TRIPEL, a window of three lights. Many such occur in the First Pointed style, the centre light being usually longer or more elevated than the two side lights.

TRIPOLIS (ι Τρυπολής), the Greek name of a city of great commercial importance, which served at one time as a point of federal union for Aratus, Sidon, and Tyre (hence the name the threefold city), which each had here its special quarter. What its Phoenician name was is unknown; but it seems impossible that it was Καθυτής, and that this was really the place called Ḳe-dib (5). Ka'dith is the Greek form of the Syrian Kreduka, "the holy," a name of which a relic still survives to feel in the Nahr-Kadish, a river that runs through Tarabila, the modern representative of Tripolis. All ancient federations had for their place of meeting some spot connected with the ancient city. The south of Tripolis was a promontory which went by the name of θηρί προστεμον.
TRIPOLIS

It was at Tripolis that, in the year B.C. 351, the plan was concocted for the simultaneous revolt of the Phoenician cities and the Persian dependencies in Cyprus against the Persian king Ochus. Although aided by a league with Nectanebus, king of Egypt, this attempt failed, and in the sequel a great part of Sidon was burned and the chief citizens destroyed. Perhaps the importance of Tripolis was increased by this misfortune of its neighbors, for soon after, when Alexander invaded Asia, it appears as a port of the first order. After the battle of Issus, some of the Greek officers in Darius's service retreated thither, and not only found ships enough to carry themselves and eight thousand soldiers away, but a number over and above, which they burned in order to preclude the victor from an immediate pursuit of them (Arrian, ii, 139). The destruction of Tyre by Alexander, like that of Sidon by Ochus, would naturally tend rather to increase than diminish the importance of Tripolis as a commercial port. When Demetrius Soter, the son of Seleucus, succeeded in wresting Syria from the young son of Antiochus (B.C. 161), he landed there and made the place the base of his operations. It is this circumstance to which allusion is made in the only passage in which Tripolis is mentioned in the Bible (2 Macc. xiv, 1). The prosperity of the city, so far as appears, continued down to the middle of the 6th century of the Christian era. Dionysius Periegetes applies it to the epitaph lexaria in the 8th century. In the Peutinger Table (which probably was compiled in the reign of the emperor Theodosius), it appears on the great road along the coast of Phoenicia, and at Orthosia (the next station to it northwards) the roads which led respectively into Mesopotamia and Cilicia branched off from one another. The possession of a good harbor in so important a point for land traffic doubtless combined with the richness of the neighboring mountains in determining the original choice of the site, which seems to have been a factory for the purposes of trade established by the three great Phoenician cities. Each of these held a portion of Tripolis surrounded by a fortified wall, like the Western nations at the Chinese ports; but in A.D. 543 it was laid in ruins by the terrible earthquake which happened in the month of July of that year, and overthrew Tyre, Sidon, Berytus, and Byblos as well. On this occasion the appearance of the coast was much altered. A large portion of the promontory Theoprosopon (which in the Christian times had its name, from motives of piety, changed to Lithoprosopon) fell into the sea, and, by the natural breakwater it constituted, created a new port, able to contain a considerable number of large vessels. The ancient Tripolis was finally destroyed by the sultan El-Mansur in A.D. 1289, and the modern Tarabulus is situated a couple of miles distant to the east, and is no longer a port. El-Myna, which is perhaps on the site of the ancient Tripolis, is a small fishing village. Tarabulus contains a population of fifteen or sixteen thousand inhabitants, and is the centre of one of the five pashaliks of Syria. It exports silk, tobacco, galls, and oil, grown in the lower parts of the mountain at the foot of which it stands, and performs, on a smaller scale, the part which was formerly taken by Tripolis as the entrepot for the productions of a most fertile region (Diod. Sic. xvi, 41; Strabo, xvi, 2; Vossius ad Mela, i, 12; Theopanes, Chronographia, sub anno 6943). For the modern place, see Pococke, ii, 146 sq.; Maundrell, p. 96; Buckhards; p. 168 sq.; Porter, Handbook, p. 542; Biderker, Palestine, p. 509 sq. (where a map is given). See PHOENICIA.

TRISAGION

The Tripych, a picture with two folding-doors, set over alters. The centre panel usually contains the chief subject. In the illustration (from the pencil of Mr. A. Welby Pugin) the tripych is a kind of cupboard with folding-doors, containing a throne figure of the Virgin Mary crowned, and holding her divine child on her lap. A figure of Peter on one side and of Paul on the other are painted on the inner panels of the doors.

TRISACRAMENTARIANS, a controversial name given to those reformers who maintained that there are three sacraments necessary to salvation, viz. baptism, the Lord's supper, and absolution. This opinion was held by some Lutherans at Leipzig, and was authoritatively set forth as a doctrine of the Church of England in the Institution of a Christian Man (1662).

TRISAGION (προσευχή, thrice holy) was so called because of the thrice repeating "Holy, holy, holy, Lord
God of hosts," in imitation of the seraphim in the vision of Isaiah. The original of this hymn was "Holy, holy, holy, Lord God of hosts! heaven and earth are full of thy glory, who art blessed forever. Amen." Thus it is in the Constitutions, and frequently in Chrysostom. Afterwards the Church added some words to it, and sang it in this form: "Αγνως δ' Θεος, ἀγνως Θεονους, ἀγνως Θεονους ἂν, ἀγνως Θεονους μιας, ἀγνως Θεονους συν, ἀγνως Θεονους ολους, ο λούς Θεονους πολυς, ο δειπνος Θεονους χρυσος, ο λογος Θεονους αινης, ("that was crucified for us"). This was done to oppose the heresy of the Theopaschites (q. v.), which was, in effect, to say that the whole Trinity suffered, because this hymn was commonly applied to the whole Trinity. To avoid this inconvenience, Calandio, bishop of Antioch, in the time of Zeno the emperor, made another addition to it of the words "Christ our King," reading it thus: "Holy God, holy Mighty, holy Immortal, Christ our King, that we crucified for us, have mercy on us." These additions occasioned much confusion in the Eastern Church, while the Constantinopolitans and Western Church stiffly rejected them. It was chiefly sung in the middle of the communion service, though sometimes it was used on other occasions. After the preface this hymn was always sung, and, according to Cyril of Jerusalem, Chrysostom, and the second Council of Vaison, also at all masses, matins, lente, or of the dead.—Bingham, Christ, Antig. bk. xi, ch. ii, § 3.

Trisantia, a mediaval term for (1) a cloister, or (2) a place of retreat for religious persons where meditations are made.—Lee, Gloss. of Liturgy, Terms, s. v.

Triscildiae, a sect of Sabellian heretics mentioned by Philaster (Her. c. xxii), Augustine (Har. c. lxxxiv), and Prædatænianum (Har. c. lxxvii) as maintaining the opinion that the divine nature is composed of three parts, one of which is named the Father, the second part the Son, and the third the Holy Ghost; and that the union of these three parts constitutes the Trinity. Philaster, in condemning this heresy, uses expressions very similar to some in the African hymn, "Enco esto vera persona Patris quas misit Filium, et est vera persona quæ adventit de Patre, et est vera persona Spiritus quæ Filio et Patre miserat est."}

Triumph (usually τριφτι and τριφτας). Almost all ancient nations celebrated success in war by a triumph, which generally included a gorgeous procession, a display of captives and spoils, and a solemn thanksgiving and sacrifice to the gods. Among the Egyptians, the triumph of a king returning from war was a grand solemnity celebrated with all the pomp which the wealth of the nation could command (Wilkinson, Anc. Egypt i, 272 sq.). The Assyrian sculptures abound with similar representations. See Sennacherib.

The Hebrews, under the direction of inspired prophets, celebrated their victories by triumphal processions, the women and children dancing, accompanying their steps with various musical instruments (see Judg. xi, 34-37), and singing hymns of triumph to Jehovah, the living and true God. The song of Moses at the Red Sea, which was sung by Miriam to the spirited sound of the timbrel (Exod. xvi, 1-21), and that of Deborah on the overthrow of Barak (Judg. v, 1-31), are majestic examples of the triumphal hymns of the ancient Hebrews. Triumphal songs were uttered for the living (1 Sam. xviii, 6-8; 2 Chron. xx, 21-28) and elegies for the dead (2 Sam. i, 17-27; 2 Chron. xxxv, 25). The conquerors were intoxicated with joy, and the shout of victory resounded from mountain to mountain (Isa. xiii, 1-2; xi, 9; xxv, 7, 8; Ezek. xiii, 4-5; Jer. i, 20; Ezek. vii, 21; Nah. i, 15). Monuments in honor of victory were erected, and the arms of the enemy were hung up as trophies in the temples (1 Sam. xxi, 9; xxxi, 10; 2 Sam. viii, 13; 2 Kings xi, 10). Indignities to prisoners formed a lead-
Ancient Assyrian King in Procession after Victories.

Triumphs among ancient nations generally; and among the Assyrians and Babylonians atrocities were frequently practiced, such as maiming, binding [see Eye], and killing, especially in the case of rebel princes. See Captive. To put one’s foot upon the head or neck of a conquered foe was an ancient, though somewhat barbarous, custom, marking the complete subjection of the vanquished party. Many representations of this custom appear among the monumental remains of antiquity; and, following the prevailing usage in this respect, we find Joshua ordering the five kings of the Canaanites, who had taken refuge in a cave, to be brought out that his captains might come one after another and put their foot on the necks of the prostrate princes (Josh. x, 24). Literally this usage does not appear to have been much practiced by the covenant people, but it forms the ground of many figurative representations in the prophetic Scriptures (Psa. cx, 1; Isa. lx, 14; 1 Cor. xv, 26). See Foot, Neck.

Among the Greeks, it does not appear that triumphs were accorded to victorious generals, but conquerors occasionally entered their native cities attended by their victorious soldiers bearing branches of palm. Such processions became very common under the successors of Alexander the Great, particularly the Seleucids of Syria and the Ptolemies of Egypt, who are generally believed to have been the inventors of the toga palmata, or robe adorned with representations of palm-trees interwoven into its fabric. It is clearly to the Greco-Syrian form of triumph that the apostle John alludes in the Apocalypse, when he describes those who had overcome by the blood of the Lamb standing “before the throne, clothed with robes, and palms in their hands” (Rev. vii, 9).

Next to the Egyptians, the Romans were chief among ancient nations in attributing importance to a triumph, and exerting themselves to bestow a gorgeous brilliancy upon the triumphal procession. The highest honor which could be bestowed on a citizen or magistrate was the triumph or solemn procession in which a victorious general passed from the gate of the city to the Capitol. He set out from the Campus Martius, and proceeded along the Via Triumphalis, and from thence through the most public places of the city. The streets were strewn with flowers, and the altars smoked with incense. First went a numerous band of music, singing and playing triumphal songs; next were led the oxen to be sacrificed, having their horns gilt and their heads adorned with fillets and garlands; then followed the spoils taken from the enemy, carried in open wagons, or on a species of bier called feretrum, around which were displayed the golden crowns sent by allied and tributary states. The titles of the vanquished nations were inscribed on wooden frames; and images or representations of the conquered countries and cities were exhibited. The captive leaders followed in chains, with their

Roman Triumph.
children and attendants; after the captives came the licutors, having their fasces wreathed with laurel, followed by a great company of musicians and dancers, dressed likewise. A cloak covered the head of the manumitted slave, the midst of whom was a pantomime, clothed in a female garb, whose business it was with his looks and gestures to insult the vanquished. A long train of persons followed, carrying perfumes; after whom came the general, dressed in purple, embroidered with gold, wearing a crown of gold set on his head, which had been laureled in his right hand, and in his left an ivory sceptre with an eagle on the top, his face painted with vermilion, and a golden ball hanging from his neck on his breast. He stood upright in a gilded chariot adorned with ivory, drawn by four white horses, attended by his relations and a great crowd of citizens, all clothed in white. It was creditable to Roman morality that a public slave accompanied the conqueror in his chariot, to remind him of the vicissitudes of fortune, and to present to him, in the midst of all his glory, the remembrance of the varied changes and chances of mortality. The conqueror's children sometimes accompanied him, and sometimes rode in a second chariot, escorted by the lieutenants and military tribunes who had served in the war. The consuls, senators, and other magistrates followed the general's chariot on foot; and the whole procession was closed by the victorious army, drawn up in order, crowned over their heads, decorated with the gifts which they had received for their valor, and singing their own and their general's praises. See Smith, Dict. of Class. Antig. s. v. See Titus (Emperor).

Paul makes frequent allusions to such triumphal processions (Col. ii. 15; Eph. iv. 8), with which he compares the triumphs of Christ's followers in spreading abroad, in every place, the perfume of the gospel of salvation (2 Cor. ii. 14–16). Our Saviour's triumphal entry into Jerusalem (Matt. xxvi. 1–9) was a token of his royal character (see the monographs in Hase, Leben Jesu, p. 181).

Triumphus, Augustinus, an Augustinian hermit-monk who was a native of Ancona, attended the University of Paris for a time, and was present at the Council of Lyons in 1274. He also sojourned at Venice while engaged in the publication of several small books in honor of the Virgin, and at Naples, where he became the favorite of kings Charles and Robert, and where he died in 1298, at the age of eighty-five years. A number of unpublished writings with his pen are yet extant. We note one On the Ecclesiastical Power, addressed to pope John XXII (August, 1473):

Trivet, Nicholas, an English Dominican monk, was born at Norwich about 1298. He was educated at Oxford and Paris, and became prior of English houses of his order. He died in 1328. He was the author of Annales Sex Regum Angliae, cum Continuatione ut et A. Marivaultheins Chronicon, etc. (Oxon. 1719–23, 2 vols. 8vo). He left many MSS. on various subjects of philosophy as well as a Commentary on Seneca's Tragedies, etc. See Chalmers, Biog. Dict. s. v.; Allibone, Dict. of Brit. and Amer. Authors, s. v.

Trivulzi, the name of several cardinals of Italian extraction, but of French association in the diplomatic movements of their age. See Hoefer, Noue. Dog. Général, s. v.

1. Agostino was the nephew of Antonio (1); became dean in 1517, archbishop of Reggio in 1520, and successively bishop of Bobbio (1519–21), Toulon (1524), Asti (1528), Bayeux (1529), and Brugnato (1535); and died at Rome, March 30, 1548.

2. Antonio (1) was born at Milan in January, 1457, and after various diplomatic services was made bishop of Como in 1467, and cardinal in 1501. He died at Rome, March 18, 1508.

3. Antonio (2), nephew of the following, was made successor of his uncle Agostino as bishop of Toulon in 1528, and cardinal in 1557. He died June 26, 1559.

4. Scaramuccio, a learned lawyer, was made professor of canon law at Paris in 1491, and in 1499 counsellor of Louis XII. He became cardinal in 1517, bishop of Coma in 1508, and afterwards of Piacenza (1522–26). He died at the monastery of Magazzuno, near Verona, Aug. 9, 1527.

Troas (Trōas). The city from which Paul first sailed, in consequence of a divine intimation, to carry the Gospel from Asia to Europe (Acts xxiv. 11) — where he rested for a short-time on the northward road from Ephesus (during the next missionary journey), in the expectation of meeting Titus (2 Cor. ii. 12, 13); where, on the return southwards (during the same missionary journey), he met those who had preceded him from Philipi (Acts xvi. s. 6) — and remained a week, the close of which (before the journey to Assos) was marked by the raising of Eutychus from the dead during the protracted midnight discourse; and where, after an interval of many years, the apostle left (during a journey the details of which are unknown) a cloak and some books and parchments in the house of Carpus (2 Tim. iv. 13) — deserves the careful attention of the student of the New Testament, and is memorable as a relic of the famous city of Troy.

The full name of the city was Alexandria Troas (Liv. xxxvi. 42), and sometimes it was called simply Alexandria, as by Pliny (Hist. Nat. v. 38) and Strabo (xiii. 589), sometimes simply Troas (as in the New Testament and the Ant. Itin.). See Wesseling, p. 384). The former part of the name indicates the period at which it was founded. It was first built by Antigonus, under the name of Antigonia Troas, and peopled with the inhabitants of some small Greek cities. Afterwards it was embellished by Lysimachus, and named Alexandria Troas. Its situation was on the coast of Mysia, opposite the south-east extremity of the island of Tenedos. The name Troas strictly belongs to the whole district around Troy. Under the Romans it was one of the most important towns of the province of Asia. It was the chief port of arrival and departure for those who went by sea between Macedonia and the western Asiatic districts; and it was connected by good roads with other places on the coast and in the interior. For the latter see the map in Leake's Asia Minor, and in Lewin's St. Paul, i. 81.
The former cannot be better illustrated than by Paul's two voyages between Troas and Philippi (Acts xvi, 11, 12; xx, 6), one of which was accomplished in two days, the other in five. At this time Alexandria Troas was a colony with the Jus Italicum. This strong Roman connection can be read on its coins. The Romans had a peculiar feeling connected with the place, in consequence of the legend of their origin from Troy. Suetonius tells us that Julius Cæsar had a plan of making Troas the seat of empire (Ces. 79). It may perhaps be inferred from the words of Horace (Carm. iii, 5, 57) that Augustus had some such dreams. Even the modern name Eski-Stambul or Eski-Istamboul ("Old Constantinople") seems to commemorate the thought which was once in Constantine's mind (Zosim. ii, 30; Zonar. xiii, 9), who, to use Gibbon's words, "before he gave a just preference to the situation of Byzantium, had conceived the design of erecting the seat of empire on this celebrated spot, from which the Romans derived their fabulous origin."

The ruins at Eski-Stambul are considerable. The most conspicuous, however, especially the remains of the aqueduct of Herodes Atticus, did not exist when Paul was there. The walls, which may represent the extent of the city in the apostle's time, enclose a rectangular space, extending above a mile from east to west, and nearly a mile from north to south. The harbor (Conybeare and Howson, St. Paul, i, 293) is still distinctly traceable in a basin about 400 feet long and 200 broad.—Smith. Descriptions in greater or less detail are given by Pococke, Chandler, Hunt (in Walpole's Memoirs), Clarke, Prokesch, Richter (Waldfahrten, p. 462), Olivier, Fellows, and the latter travellers mentioned in Murray's Handbook for Turkey in Asia, p. 153-159. The vicinity has recently become noted for the discovery of what are presumed to be the ruins of ancient Troy at Hisarlik by Schliemann (Troy and its Remains [Lond. 1875]). See also Maclaren, Plain of Troy (Edinb. 1868); Meyer, Gesch. von Troas (Leips. 1877).

Trogyllium (Trogyllion), the rocky extremity of the ridge of Mycale, which is called thus in the New Test. (Acts xx, 15) and by Ptolemy (v, 2), and Trogyllium (Trogyllion) by Strabo (xiv, 636). It is directly opposite Samos (q. v.). The channel is extremely narrow, Strabo (loc. cit.) makes it about a mile broad, and this is confirmed by the Admiralty charts (1830 and 1855). Paul sailed through this channel on his way to Jerusalem at the close of his third missionary journey (Acts xx, 15). The navigation of this coast is intricate; and it can be gathered from ver. 6, with subsequent notices of the days spent on the voyage, that it was the time of dark moon. Thus the night was spent at Trogyllium. It is interesting to observe that a little to the east of the extreme point there is an anchorage which is still called St. Paul's Port. Pliny refers to three small islands lying about Trogyllium, and names them Sandalion, Psilon, and Argennion (Hist. nat. v. 37). The port where Paul anchored is generally considered to be that
it had worn so jauntily since the revival of letters. The Council of Trent, while reviewing every article of Roman theology, having stated in its canons the fundamental articles of Christian faith with a clearness that was indeed much needed, gave strict instructions to all the licensed preachers of their Church, and so enabled them to assume a new appearance of sound faith, at least in those particulars which would contrast not only with their former heterodoxy, now to be concealed, but with the open heterodoxy of certain fugitive Italian Protestants. These persons found congenial society among the Jews in Poland, who, while heroically adhering to the letter of the Mosaic law, had nevertheless not accepted the more fully unfolded verity of Christian revelation. Heretics they were in the eye of Rome, and the persecution that haunted them drove them at once into the arms of the Polish Karaites; for, like them, and even more than they, these protesters against Rome hated tradition and all human authority. Like the Karaites, they were sturdy Monotheists in the same narrow sense. They outran Arius in the race of unbelief. Their own Socinian left his name, as did Sadok had left his; and Socino, with his principal followers, chose Poland to be at once their asylum and their citadel. From that time it became the centre of Socianism in Europe. In Poland the Jew and the Christian both enjoyed religious liberty, and for once the most orthodox of the Israelites and the least orthodox of the Christians could fraternize on one point, and on only one." One of those Jews was Isaac. He was brought up in the study of Talmudism as a branch of Jewish learning, and in the faith of the Karaites, cold withal, until quickened and elevated under the impulse of persecution. Young Isaac, to whom Hebrew was vernacular, was also literally educated in the Latin and Polish languages. In these languages he read the chief controversial writings, as they were issued by their eminent authors, against the Church of Rome. He carefully studied the Catholic-Polish version of the Bible, made by Leonard from the Vulgate, which appeared in Cracow in 1561, and again in 1575 and 1577; the Calvinistic-Polish version, called the Radzivil Bible, and published in 1563; and the Socinian version, made also from the original texts, by the celebrated Simon Budny, which was published at Nienburg in 1579, as well as the writings of Nicholas Paruta, Martin Chechowiz, and Simon Budny, the heads of Unitarianism in Poland. As all these sects, who differed from each other on almost every other point, agreed in their attack upon the Jews and their faith, the rabbi set to work on a confession of Christianity. He read the New Test. in Budny's version, with the cool and orderly habit of a hard-working student. Every passage on which he could fix a doubt or hazard a denial was marked as it stands in the sacred book, and for the purpose of controversy. The entire stock of anti-Christian cavils with which educated Jews, at least, are familiar, combined with the objections of the Socinians, were brought to bear on the New Test. by direct attack on all the leading sentences in relation to the person, life, and ministry of Christ. The work, written in Hebrew, under the title of Confirmation of the Faith, ממחושן, and which has a world-wide celebrity, Isaac finished in 1593, when sixty years of age. The work is interesting for its quotations from some little-known Christian and polemical works in the Polish language, and because it has been made use of by critical writers upon the New Test. from Voltaire to Strauss; for the former acknowledges, in his Milanges, iii, 344: "Il a rassemblé toutes les difficultés que les incrédules ont proclamées depuis... Enfin, incrédules les plus déterminées n'ont presque rien allégé qui ne soit dans ce rempart de la foi du rabbin Isaac." The book is divided into two parts—the first, which is devoted to an examination of the objections raised by Christians against
TROLLE 563 TROPHIMUS

Judaism, and which is subdivided into fifty chapters, discusses very minutely the interpretation of the Mes- sianic passages of the Old Test., and their application to Christ as the predicted Messiah; while the second part is taken up with a critical examination of the state- ments of the Hebraic and Christian historians of the new Test. Troki died in 1594. His work was first published by Wagenseil, with a Latin translation, in his collection of The Fiery Darts of Satan (Te De Igmata Satanae) (Al- dorf, 1681), from a MS. obtained from an African Jew, which was imperfectly copied 1074 sq. of this vitiated text without the Latin translation appeared in Amsterdam in 1717, and in Jerusalem in 1845. The best edition, however, is that edited by rabbi D. Deutsch, with a German translation (Sothcr, 1865). Besides this German translation, there is another by M. Celling (Hamb. 1831-35). It was translated into Spanish by Isaac Abha, and into Italian by M. Luzzatto. The work has also been refuted by Muller, Consequatio Libri Chissak Emma, comprised in his Judiasmus ex Rabbinorum Scripturis Detectus, etc., Refutatus (ibid. 1644); by Gous- set, Termio Controversus adversus Judaon, Oppositus R. Isaac Chissak Emma (Dordrecht, 1689), which, how- ever, was not satisfactory to the duke Louis of Orleans (d. 1752), who wrote another refutation; by Gebhard, Centum Loca N. T. Vircicciadu adversus Chissak Emma (Greiswald, 1699); Storr, Evangelische Glaubens- kraft, Gegen das Werk Chissak Emuna (Tub. 1701); and finally, by Knecht (in his De Evangelica The- ologia (2d ed. Lond. 1786). See Wolf, Bibl. Hebr. iv, 639 sq.; Hoefer, Nouv. Bibl. Générale, xxvi, 10; Fürst, Bibl. Jud, ii, 138; iii, 448. De' Rossi, Dizionario Storico (German trans.), p. 320 sq.; bibl. Biblioth. Antiquitatis, p. 42 sq.; Kitto, Cyclopa. s.v.; Steinheuser, Cistal. Libr. Heb. in Bibl. Bodl. coll. 1, and his Jewish Literature, p. 212; Etheridge, Introd. to Hebr. Lit. p. 444; Rule, Hist. of the Karaites Jews, p. 170 sq.; Basnage, Hist. des Juifs (Taylor's transl.), p. 772; Geiger, Isaac Troki, ein Apologist des Judend. im Ende des 18. Jahrhunderts. (B. F.)

Trolle, Gustavus, a Swedish prelate, descended from an ancient Swedish nobility family, was born near the close of the 15th century, and became archbishop of Upsala Oct. 30, 1514, but was besieged in his palace by an old family enemy; and, although reinforced by the interdict and troops of pope Leo X, he at length fell in battle on the island of Fionia, and died at Gottorp, nov. 10, 1515. After the death of his stormy career see Hoefer, Nouv. Bibl. Générale, s. v.

Tromm (Van der Trommen, Lat. Trommius), Abra- ham, a learned Protestant divine of Holland, was born at Groningen, Aug. 23, 1683, and studied the classics, philosophy, and theology in that university. He trav- eled through Germany, Switzerland, France, and Eng- land, and his first studies was appointed curate at Haren. In 1671 he was invited to the pastorate of Groningen, and continued there until his death, May 29, 1719. John Martinius, of Dantzic, having begun a Concord- ance of the Old Testament in Flemish, Tromm completed it (Amsterdam. 1685-92, 2 vols. fol.). He also published a Greek Concordance of the Septuagint (Amsterdam, 1718, 2 vols. fol.), which has remained a standard work.

Troachin, Louis, a Swiss divine, was born at Geneva, Dec. 4, 1629, and after studying theology there and at Saumur, he traveled abroad and then became preacher at Lyons in 1654. In 1661 he was made pro- fessor of theology in Geneva, where he died, Sept. 8, 1705. He was noted for his mildness during the Calvin- aristic contest of his time.

Troachin, Theodore, a learned Swiss divine, father of the preceding, was born at Geneva, April 17, 1582. He was well educated, visited foreign universi- ties, and on his return to Geneva, in 1606, he gave such proof of his learning that he was chosen professor of the Hebrew language. He was made minister in 1608, and created rector of the university in 1610. In 1616 he was by the peace of Basle. He was sent from Geneva to the Council of Dort, where he displayed his great knowledge in divinity, and a moderation which was highly applauded. For several of his works see Hoefer, Nouv. Bibl. Générale, s. v.; Herzog, Real-Encyclop., s. v.

Trop is, in the A. V., especially employed as the rendering (sometimes "band," etc.) of κυρίος, geldi, which means a marauding party, in the forays for which Palestine has always been notorious, especially beyond the Jordan (Gen. xliv. 19; 1 Sam. iii. 22; xxii. 30; xxx. 8; Job xiv. 12; Ps. xviii. 29; Jer. xviii. 22; Hos. vi. 9; vii. 1; Mic. v. 1).

Tropæa (τροπα), the names of churches erected in honour of martyrs, or dedicated to them. The reason of the name is found in the reported appearance of the cross to Constantine, and in the labarum on which, according to Eusebius, were inscribed the words τοῦ σταυ- ροῦ τροπαιοῦν.

Tropæae, or sequence, are verses sung before the holy Gospel in the mass. They are a kind of prose, written by the priests as a species of unconnected and as yet un- recognised law of metre. They were introduced at the close of the 9th century. Four only are found in the Roman missal. See Sequence.

Trophimus (Τρόφωμος, nutriens) a Hellenistic Christian, who with others travelled with the apostle Paul in the course of his third missionary journey, and during parts of it was left behind, as he too was returning from Macedonia towards Syria (Acts xx. 4). A.D. 54. From what we know concerning the collection which was going on at this time for the poor Christians in Judea, we are disposed to connect him with the business of that contribution. Both he and Tychoicus accompanied Paul from Macedonia as far as Asia (Δύσ- της τῆς Ἀσίας, loc. cit.), but Tychoicus seems to have re- mained there, while Trophimus proceeded with the apostle to Jerusalem. There he was innocent of the tumult in which Paul was apprehended, and from which the voyage to Rome ultimately resulted. Cer- tain Jews from the district of Asia saw the two Chris- tian missionaries together, and supposed that Paul had taken Trophimus into the Temple (xxxi. 27-29). From this passage we learn two new facts, viz. that Trophi- mus was a Gentile, and that he was a native not simp- ly of Asia, but of Ephesus. A.D. 67. From the latter phrase now elapses, during which we have no trace of either Tychoicus or Trophimus; but in the last letter written by Paul, shortly before his martyrdom, from Rome, he mentions them both (Ταῖς ἀνθρώποις τῆς Ἐφεσοῦ, 2 Tim. iv. 12; Τρόφωμον ἀνέλιπον ἐν Μιλήτῳ ἀπε- ποντον, ver. 20). From the last of the phrases we gather simply that the apostle had no long time before been in the Levant, that Trophimus had been with him, and that he had been left in infirm health at Mile- tesus. Of the further details we are ignorant; but this we may say here, that while there would be consid- erable difficulty in accommodating this passage to any part of the recorded narrative previous to the voy- age to Rome, all difficulty vanished on the supposition of two imprisonments, and a journey in the Levant between them. Trophimus was no doubt at Miletus on the occasion recorded in Acts xx. 15-28, but it is most certain that he was not left there. The theory also that he was left there on the voyage to Rome is preposterous; for the wind forced Paul's vessel to run direct from the south-west corner of Asia Minor to the east end of Crete (xxvii. 7). We may add that when Trophimus was left in sickness at Miletus, whenever that might be, he was within easy reach of his home friends at Ephesus, as we see from xx. 17.
TROPEI

Trope, COUNCIL OF (Concilium Troesleianum), was held in Troesle, a small village near Soissons, France. It assembled June 26, 908, Herive, archbishop of Rheims, presiding. The decrees of this council are signed by twelve prelates, and are contained in fifteen chapters: they are in the form rather of long exhortations than of canons, showing the pitiable condition of the Church.

1. Orders due respect to the Church, to clerks, and to monks.
2. Relates to the reform of abuses in monastic institutions.
3. Anathematizes those who pillage the Church.
4. Anathematizes those who injure and persecute the clergy.
5. Is directed against those who refuse tithes.
6. Against rapine and robbery, and orders restitution.
7. Is directed against the violent abduction of women, and incest.
8. Forbids priests to have women in their houses.
9. Exhorts all Christians to charity, and to avoid luxury and excess.
10. Forbids perjury and oath-breaking.
11. Is directed against passionate and litigious persons.
12. Against liars and homicidio.
13. Denounces those who plunder the property of bishops, and their dependents.
14. Contains an exhortation to all the faithful to abstain from sin and to do their duty.

See Mansi, Concili. ix, 520.

TROPEI, MARTIN, professor of Hebrew at Wittenberg, where he also died, April 8, 1556, was born at Hildesheim, in 1509. He studied at the University of Hebraica Universitatis (Hafniæ, 1627, and often); excerpts from his grammar were published by Baldovinii, Gezelius, Mitternacht, and Mylius—Deutschofstrützungeon Panta Mountanum inens Gemoriun (Wittenberg, 1683).—Nouv. Text. Sac. cum Versio Nicaeae in Diversa Editionum Commentaria, Paris, 1688; and in Laetitia recett. M. Tr. (Cöthen, 1621). See Fürst, Bibl. Jud. iij, 449; Winer, Handbuch der theol. Literatur, i, 85; ii, 808; Steinschneider, Bibliogr. Handb. p. 141. (B. P.)

TROTH (trath), a word occurring in the Prayer-book only in the marriage service, thus, "And thereto I plight thee my troth," that is, "thereto I most solemnly pledge thee my truth and sincerity." Near the end of the same service the minister says that the persons now married have "pledged their troth each to other," i.e. have promised to be true and faithful to each other.—Stanton, Dict. of the Church, s. v.

TROUGH (πτόκης, shéketh, from πτόκος, to drink), a vessel of wood or stone for watering animals (Gen. xxiv, 15; xxv, 20; xxxiv, 21; xxvii, 27); Gen. xxx, 58, 41). It is employed for the same thing. See also KNEADING-TROUGH.

TROY, JOHN THOMAS, D.D., an Irish prelate, was born near Portarlington, in the county of Dublin, and at the age of fifteen went to Rome, where he became a Dominican, and finally rector of St. Clement's in that city. In 1770 he was elected bishop of Osorsy. In January, 1770, he promoted very spirited circulations against the outrages of the Whiteboys, and in October excommunicated them. In 1786 he was promoted to the see of Dublin. In November, 1787, he issued his pastoral directions to his clergy, in which he strictly prohibited the future celebration of midnight masses. In 1791 he issued his Pastoral Directions on the Duties of Christian Citizens. He died May 11, 1823. See D'Alton, Memoirs of the Archbishops of Dublin, p. 480.

TROYES, COUNCIL OF (Concilium Troesleianum), were held in Troyes, France, a city which has a splendid Gothic cathedral, founded in 1208; the Church of St. Urban, founded by Pope Urban II., and the Cathedral of the Holy Virgin of England was married; the Church of Sainte-Madeleine, containing a stone roof—loft of great beauty; and a public library of 110,000 volumes.

TROPICI

Tropic is one of the two brethren who, with Titus, conveyed the Second Epistle to the Corinthians (2 Cor. viii, 16, 24). They were, like Titus, one of the few Gentiles who accompanied the apostle; an Ephesian, and therefore likely to have been sent by the apostle from Ephesus with the first epistle, or to have accompanied him from Ephesus now; he was, as is implied of 'this brother,' whose praise was in all the churches, well known, so well known that the Jews of Asia [Minor?] at Jerusalem immediately recognised him; he was also especially connected with the apostle on this very mission of the collection for the poor in Judea. Thus far would appear from the description of him in Acts xx, 29. From xx, 29 it would appear that he was with Paul on his return from this very visit to Corinth" (Commentary on Corinthians, 2d ed. p. 492).

The traditional story that Tropici was one of the seventy disciples is evidently wrong; but that part of the legend which states that he was beheaded by Nero's orders is possibly true (Memor. Gr. iii, 57).

Tropicis (ρωποτρία) were a sect of heretics who held that our Lord acquired a body of flesh by conversion of the substance of the godhead into the substance of flesh; an opinion which arose in the latter time of the Arian controversy among those who, maintaining the true divinity of the Son of God, and rightly desiring to maintain his sinlessness, were perplexed by the erroneous assumption that the human body, as such, is and cannot but be the seat of sin. To avoid the impiety of attributing a sinful body to our Lord, they devised the tenet that the body of Christ is consubstantial with the divinity, which passes into the sinless person in a more definite proposition that the substance of the Word is converted into the substance of flesh, and that the flesh in being in the man is thus called human. This heresy was first dealt with by Athanasius (Epistle to Eusebius), A.D. 370. Apollinaris was at the head of those who denied the true incarnation of Christ, asserting the general proposition that the Son of God did not assume that which in man is the seat of sin; and varied applications of this proposition were made by his followers. A belief in the possibility of the conversion of the godhead into flesh almost necessitates the reception of the Cabalistical doctrine that all matter is an emanation from God. Athanasius remarks that Valentinus fancied the flesh to be a part of Deity, and so concluded that the passion was common to the whole Trinity. Fabricius remarks that the heresy is confuted by Tertullian. The Council of Constantinople, which decided that the two natures in Christ are united dπερατως.

Tropological Interpretation is where a moral signification is given to a passage. An illustration will explain this sense. In Deut. xxv, 4 we read, "Thou shalt not mingle the ox when thou teameth out the corn." Paul (1 Cor. ix, 9) quotes this precept of the law, adding, "Now we are God's ministers, as are also you." But is saith he altogether for our sakes? For our sakes, no doubt, this is written."—Blunt, Dict. of Doctrines, s. v.

See HERMETICISTS.
TRUBER

TRUCE OF GOD

I. Held Oct. 25, 867. About twenty bishops, from the kingdoms of Charles and Lothaire, were present, who wrote a long letter to pope Nicholas I, in which they gave the history of the affair of Ebbo, and of the priests whom he had ordained. They, moreover, besought the pope not to interfere with Bonomus by his predecessor, and not to permit, in future, the deposition of any bishop without the intervention of the holy see. This was in accordance with the principles of the false decreals of the pope. See Mansi, Concil. viii, 986.

II. Held 1567, by pope John VIII, who presided over thirty bishops. The former had come into France to escape from the violence of Lambert, duke of Spotedto. In the first session, the pope exhorted the bishops to compassionate the injuries which the Roman Church had suffered from Lambert and his accomplices, and to excommunicate them. The prelates, however, declined to act until the arrival of their brethren. In the second session, John read an account of the ravages committed by Lambert, after which the council declared him to be worthy of death and anathema. The archbishop of Arles presented a petition against bishops and priests in vio- lence for another man against persons deserting their wives in order to marry other women. In the third session, the bishops declared their consent to the pope's propositions. Hincmar of Leon, whose eyes had been put out, presented a complaint against his uncle, and demanded to be judged according to law. Hincmar of Rheims required that the cause might be delayed, to give him time to reply to the complaint. Further, the sentence of con-demnation passed against Formosus, formerly bishop of Porto, and Gregory, a nobleman, was read, anathema-tizing them without hope of absolution; as also were the canons (middle) of the translation of bishops, viz., those of Sardica, Africa, and of pope Leo. Seven canons were published.

1. Orders that temporal lords shall show due respect to bishops, and that they shall not sit down in their presence-except when invited.

2. Forbids to receiveaceous accusations against any person.

III. Held in 1104, by the legate Richard, bishop of Albano, whom Paschali II had sent into France to absolve king Philip. The council was very numerous, and among those present we find Ivo of Chartres, Hubert, bishop of Sens, accused of simony, cleared himself by oath. The election of the abbot Godofre, by the people of Amiens, to the bishopric of that town was approved, and, in spite of the abbot's resistance, he was compelled to consent to it. See Mansi, Concil. x, 738.

IV. Held in 1107, by pope Paschali II, who presided. The main object of this council was to excite the zeal of men for the Crusade, besides which sentence of excommunication was denounced against those who should violate the Truce of God. The freedom of elections of bishops was asserted and established, and the condemnation of investitures repeated. Several German bishops were on various accounts suspended. Mansi (Concil. x, 754) adds five canons to those usually attributed to this council.

1. Orders that any one receiving investiture at the hands of a layman shall be deposed, as well as the persons ordaining or consecrating him.

V. Held Jan. 13, 1128, by the legate Matthew, bishop of Albano, assisted by the archbishops of Rheims and of Reims, and by Bernard, St. Stephen, and other abbots. A rule was drawn up for the Order of the Templars, instituted in 1118, prepared by authority of the pope and of the patriarch of Jerusalem. In this council the white dress was given to the Templars. See Mansi, Concil. x, 922.

Truber, PRIMUS, a notable personage in the Reformation in Germany, was consecrated to the priesthood by Peter Bonomus, bishop of Trieste, and took charge of the parish of Lack in 1527. In 1531 he became a canon of Laibach, where the new doctrine was already promulgated, and soon afterwards he took ground in opposition to the Church of Rome. He was assailed by the clergy and the government, but protected by the nobles of his district. Bishop Bonomus, of Laibach, was deposed by his predecessor, and not to permit, in future, the deposition of any bishop without the intervention of the holy see. This was in accordance with the principles of the false decreals of the pope. See Mansi, Concil. viii, 986.

He died in 1578, by pope John VIII, who presided over thirty bishops. The former had come into France to escape from the violence of Lambert, duke of Spotedto. In the first session, the pope exhorted the bishops to compassionate the injuries which the Roman Church had suffered from Lambert and his accomplices, and to excommunicate them. The prelates, however, declined to act until the arrival of their brethren. Further, the sentence of condemnation passed against Formosus, formerly bishop of Porto, and Gregory, a nobleman, was read, anathematizing them without hope of absolution; as also were the canons (middle) of the translation of bishops, viz., those of Sardica, Africa, and of pope Leo. Seven canons were published.

1. Orders that temporal lords shall show due respect to bishops, and that they shall not sit down in their presence except when invited.

2. Forbids to receive anonymous accusations against any person.

III. Held in 1104, by the legate Richard, bishop of Albano, whom Paschali II had sent into France to absolve king Philip. The council was very numerous, and among those present we find Ivo of Chartres, Hubert, bishop of Sens, accused of simony, cleared himself by oath. The election of the abbot Godofre, by the people of Amiens, to the bishopric of that town was approved, and, in spite of the abbot's resistance, he was compelled to consent to it. See Mansi, Concil. x, 738.

IV. Held in 1107, by pope Paschali II, who presided. The main object of this council was to excite the zeal of men for the Crusade, besides which sentence of excommunication was denounced against those who should violate the Truce of God. The freedom of elections of bishops was asserted and established, and the condemnation of investitures repeated. Several German bishops were on various accounts suspended. Mansi (Concil. x, 754) adds five canons to those usually attributed to this council.

1. Orders that any one receiving investiture at the hands of a layman shall be deposed, as well as the persons ordaining or consecrating him.

V. Held Jan. 13, 1128, by the legate Matthew, bishop of Albano, assisted by the archbishops of Rheims and of Reims, and by Bernard, St. Stephen, and other abbots. A rule was drawn up for the Order of the Templars, instituted in 1118, prepared by authority of the pope and of the patriarch of Jerusalem. In this council the white dress was given to the Templars. See Mansi, Concil. x, 922.

Truber, PRIMUS, a notable personage in the Reformation in Germany, was consecrated to the priesthood by Peter Bonomus, bishop of Trieste, and took charge of the parish of Lack in 1527. In 1531 he became a canon of Laibach, where the new doctrine was already promulgated, and soon afterwards he took ground in opposition to the Church of Rome. He was assailed by the clergy and the government, but protected by the nobles of his district. Bishop Bonomus, of Laibach, was deposed by his predecessor, and not to permit, in future, the deposition of any bishop without the intervention of the holy see. This was in accordance with the principles of the false decreals of the pope. See Mansi, Concil. viii, 986.
great festivals of the Church, or from the evening of Thursday in each week to the morning of Monday in the week ensuing, the intervening days being consecrated as particularly holy—Thursday as the day of our Lord's ascension; Friday as that of his Passion; Saturday, when he rested in the grave; and Sunday, the day of his resurrection. In 1334 it was opposed by the bishop of Cambray. Later it was extended to nearly all the more important fasts, feasts, and holy seasons of the Church. England (1425) and Italy adopted the custom, which was further confirmed by the second and third Lateran councils (A.D.1139,1179). A change in the dispositions of men so sudden, and one which proposed a resolution so unexpected, was considered as miraculous, and the respite from hostilities which followed upon it was called the "Truce of God." This cessation from hostilities during three complete days every week allowed a considerable space for the passions of the antagonists to cool, and for the people to enjoy a respite from the calamities of war, and to take measures for their own security. The triumph of legal over feudal government eventually did away with the institution and the necessity for it. See Trench, Medieval Church History, p. 424 sq.

TRUE, CHARLES K., D.D., an eminent Methodist Episcopal divine, was born in Portland, Me., Aug. 14, 1809. The family afterwards removed to Boston. He graduated at Harvard University in 1832, having been converted at the Eastham camp-meeting while connected with that college, and immediately commenced preaching in the vicinity, being among the first Methodist preachers at the opening of denominational services in Newton Upper Falls, established through the faithful endeavors of Marshall S. Rice. His early efforts awakened great attention. His personal appearance was attractive, his voice pleasant, his address graceful, and his discourses often very eloquent. He was ordained in 1833, and continued for 38 years an agent of the New England Education Society in 1834, and became the first principal of the Amenia Seminary in 1835. He entered the New York Conference in 1836, and had a memorable experience, both in the conference and in his charge at Middletown, Conn., in the anti-slavery controversy, having early taken very pronounced grounds on the question. In 1838 he was transferred to the New England Conference, and stationed at Lynn. He remained, filling appointments with much acceptability, in Boston and vicinity until 1855. During this period he wrote a number of intellectual and moral science in Wesleyan University. He became again a member of the New York Conference in 1860, but re-entered the New England Conference in 1866. From 1870 to 1873 he was a financial agent of the Wesleyan University, and was a member of the New York East Conference until his death, which occurred suddenly, June 20, 1878. During his last years he was connected with one or two of the charitable societies whose offices are in New York city, and supplied the pulpit of charges in the New York East Conference not far distant from his home. Dr. True wrote a text-book of logic, and another on the reasoning process of a historical character. He was a man of fine abilities, an original thinker, with marked repose of mind and manner, self-reliant, and with just enough eccentricity to give an original flavor to his opinions. He was a good preacher, at times powerful in discourse, and particularly effective in exposition. See Minutes of Annual Conferences, 1873, p. 30 sq.

TRUE Reformed Dutch Church is an organization which grew out of the secession of the Rev. Solomon Froleigh, D.D., in 1822. He was a professor of theology, a man of erudition, and pastor of the two congregations of Hackensack and Schraalenburg, N. J., which he carried with him. His secession was the culmination of difficulties of long standing, in which he was subjected to censure for aggression upon a neighboring Church. He refused to submit to the authorities of the Church. A number of disaffected ministers united with him, together with portions of their churches. The grounds alleged for their separation were that the Dutch Church had been erroneous in doctrine, lax in discipline, and corrupt in practice. The confusion, strife, and troubles produced by this conflict were long and bitter. The "True Reformed Dutch Church" retains the standards of the Church which it left, and declares that it alone keeps them in their purity. It holds no fellowship with any other denomination, refuses to co-operate with the benevolent religious institutions of the age, and is generally antinomian in sentiment and practice. The churches of this sect are less than twenty in number, small, feeble, and dwindling away with the survivors of the original tracts. They are located in New Jersey and New York. For full accounts, reference is made to their pamphlet entitled Reasons Assumed by a Number of Ministers, Elders, and Deacons for Declaring Themselves the True Reformed Dutch Church in the United States of America. See also Corwin, Manual of the Ref. Church in America; Hare, History of the Reformed Church in America; Taylor, Church and Temporalship of Bergen, very full and accurate. (W. J. R. T.)

TRULLO, COUNCIL OF, the name by which the sixth Council of Constantinople (q. v.) is called, from the circumstance of its having been held in the domed chapel of the palace.

TRUMBULL, Benjamin, D.D., a Congregational minister, was born in Hebron, Conn., Dec. 19, 1735, graduated at Yale College in 1758, and was ordained December, 1760, pastor at North Haven, where he remained until his death, Feb. 2, 1820. He published, A Discourse Delivered at Freeman's Meeting (1775):—A Plea in Vindication of the Connecticut Title to the Contested Lands lying West of the Province of New York, A address to the Public (1776):—An Appeal to the Public respecting the New England Churches (1787):—In the interest of Religion (1807):—Twelve Discourses on the Divine Origin of the Scriptures (1810):—A General History of the United States, etc. (ed.):—Two Pamphlets on the Unlikeness of Marrying a Wife's Sister (ed.):—A Complete History of Connecticut (2 vols. 1797, 1818):—and several occasional Sermons. See Sprague, Annals of the Amer. Pulpit, i, 584.

TRUMBULL, Robert, D.D., a distinguished Baptist minister and scholar, was born in Whiteburn, Linlithgowshire, Scotland, Sept. 10, 1809. He was brought up as a Presbyterian. Having graduated at the Glasgow University, he attended the theological lectures of Drs. Chalmers and Dick in Edinburgh, having among his fellow-students Robert Pollock, who became the author of The Course of Time. While pursuing his theological studies, he changed his sentiments on the subject of Christian baptism, and connected himself with a Baptist Church. For a year and a half he preached in Westmancote, Worcestershire, England. In 1833 he came to this country, and for two years was pastor of the Second Baptist Church in Danbury, Conn., when he was called to the pastorate of the First Baptist Church in Detroit, Mich., where he remained two years, and then became pastor of the South Baptist Church in Hartford, Conn. In all these churches his labors were greatly blessed. For two years he continued in Hartford, and then accepted a call in 1839 to what is now the Harvard Street Church in Boston, where his six years' (1839-45) ministry added greatly to the strength of the Church. In July, 1845, he returned to Hartford, to take the pastoral charge of the First Baptist Church in that city. His connection with the Church in that city minister continued for twenty-four years. "Under his earnest and faithful ministry the Church enjoyed a succession of revivals and constant accessions, till it became in numbers, beneficence, and influence one of the strongest in the denomination." The unusually long pastorate of Dr. Trumbull closed in 1869. It was not his wish
TRUMPET.

again to become a permanent pastor. For more than two years he preached in New Haven, supplying the pulpit of a mission chapel in Dwight Street one year, and another year preaching in a chapel in the northwestern part of the city. Dr. Trumpull was chosen in 1872 secretary of the Connecticut Baptist Convention. In this capacity he served for the remainder of his life, performing a work for the feeble Baptist churches in Connecticut the value of which cannot be overestimated. His memory is cherished with warm affection in the community and state which he so long blessed by his Christian ministry. For a little more than five years he devoted himself with great zeal to his work, and saw it abundantly successful. He died at Hartford, Nov. 20, 1877. Dr. Trumpull was a voluminous writer, considering the amount of ministerial work he performed during his life. Among his published writings were the following: *Olympia Morata* (1842) =VINET's *Vital Christianity*—a translation (1846) = *Genius of Scotland* (1847) = *Pulpit Writers of France and Switzerland* (1848) = *Genius of Italy* (1849) = *Theophany, or the Manifestation of God in Christ* (1851) = *VINET's Miscellaneities* (1852) = *Life Pictures* (1857). He edited also *William Hamilton's Discourses on Philosophy, Literature, and University Reform*. He was the editor of the *Christian Register* for two years. See Christian Secretary, Nov. 28, 1877. (J. C. S.)

**Trumpet** (αὐλὴ ν., 1 Cor. xv, 22; 1 Thess. iv, 16). See TRUMPET.

Trumpet is in the A.V. usually the rendering of one or the other of the two Hebrew words detailed below; but besides this it occasionally stands as the representative of the following: ֶבֹּלָה, yobel, Exod. xix, 13, the jubilee (q. v.) trumpet; ֶתָּכָלָה, takhol, Ezek. vii, 14, prop. the blowing of the trumpet. See TRUMPETS. FEAST OF.

1. נַחֲלָתָה (Sept. נַחֲלָתָה, Vulg. tuba), an onomatopoetic word, like the Lat. *tatarantara*, from the quivering reverberation of its sound, was the straight trumpet (Josephus, Ant. iii, 12, 6; Jerome, ad Hos. v, 8; Buxtorf, Lex. a. v.), and is the term used in Numb. ii, 2, 5, 10; xxxi, 6; 2 Kings xi, 14 ("trumpeter," in first occurrence); xiii, 18; 1 Chron. xiii, 8; xv, 24, 28; xvi, 6, 42; 2 Chron. v, 12, 13; xiii, 12, 14; xv, 14; xx, 28; xxxiii, 13; xxix, 26, 37, 28; Ezra iii, 10; Neh. xiii, 51; Ps. xciv, 6; Hos. v, 8. There were originally two such, which the priests used on festive occasions (Numb. xv, 2 sq.; comp. xxxi, 6; 2 Kings xii, 18). Later (in David's time) the instruments were of a richer character (1 Chron. xxv, 34; xvi, 42; 2 Chron. v, 12 sq.; xxix, 20; for a conjecture as to their form, see Sommer, *Bibl. Abhandl.* i, 39 sq.). Similar ones were employed in the year of jubilee (2 Kings xi, 14), and for popular proclamations (Hos. v, 8); comp. Rosellini, *Mom. II.*, iii, 32; Wilkinson, ii, 262. The form of this trumpet is indicated in the sculpture on the Arch of Titus at Rome (see Reland, *Spolia Templi Hieros.* p. 184 sq.) and on coins (Frohlich, *Anul.* Synod. p. 90, pl. 15, fig. 17 and 18), and it appears to have emitted a clear, shrill tone (comp. Hoskold, i, 86), adapted to a *alarum* (_variation). See MUSICAL INSTRUMENTS.

2. ἀρχαῖον, shophar (Sept. usually σάλινον, Vulg. bucina), was the curved trumpet or horn (Lat. *litus*) for signals; and is the word elsewhere rendered "trumpet" in the A.V. ("cornet," 1 Chron. xxv, 28; 2 Chron. xv, 14; Ps. xciv, 6; Hos. v, 8). It was sounded in the year of jubilee (Lev. xxv, 9; the Talmudic New-year's Day, *Megilla*, *Bab.* Jud. 20, 3; *Shamash*, iii, 3), in battle (Job xxxix, 25 [28]; Jer. iv, 5; vi, 1), and by sentinels (Ezek. xxxiii, 6); and had a loud (Isa. liii, 1) tone like a thunder-peal (Exod. xix, 16, 19). Some writers fail to distinguish this from the preceding kind of trumpet (Credner, Joel, p. 194 sq.; Hoffmann, in Warneken, *Hebr. Alterth.* p. 588 sq.; both instruments are named in the same connection in 1 Chron. xxv, 28; 2 Chron. xv, 14; Ps. xciv, 6; Hos. v, 8 (see Zenger, *De Bucina* [Lips. 1712]). Jerome (on the passage last cited) clearly distinguishes the shophar: "Buccina pastoralis est et cornu recurrens efficitur, unde et proprium Hebraeis sophar, Graece *sparax,* appellatur." According to the Mishna (*ut sup.*), however, the shophar was sometimes straight and at others crooked (see Doughtai *Al. *i, 99 sq.). Curved horns (as of oxen or sheep) are still common in the synagogue under the same name (αὐλην); according to the Gemara (*Shabb. xxi, 1, 1), the shophar originally denoted only the curved horn, and not until the downfall of the Jewish polity was it confounded with the נַחֲלָתָה. The second Temple contained thirteen boxes (in the court of the women), shaped like (straight) trumpets (σαλινον), for the deposition of alms (Mishna, *Shkelul.* vi, 5). The horn with which the year of jubilee was ushered in is technically called (as above observed) נַחֲלָתָה, fully נַחֲלָתָה מִן כָּלָה, or נַחֲלָתָה מִן כָּלָה (Josh. vi, 4 sq.); and the force of breath required to sound it is denoted by the term נַחֲלָתָה, to draw out (see Winer's *Simons Lex.* p. 894, 584; comp. Gräser, *Kathol. Mose,* i, 107 sq.). See CORNET.

As above intimated, the Lord commanded Moses to make two trumpets of beaten silver, for the purpose of calling the people together when they were to decamp (Numb. x). They chiefly used these trumpets, however, to proclaim the beginning of the civil year, the beginning of the sabbatical year (Lev. xxiii, 24; Numb. xxix, 1), and the beginning of the jubilee (Lev. xxv, 9, 10). Josephus says (Ant. iii, 12, 6) that they were near a cubit long, and had their tube or pipe was of the thickness of a common flute. Their mouths were no wider than just admitted to blow into them, and their ends were like those of a modern trumpet. There were originally but two in the camp, though afterwards a
TRUMPETS, FEAST OF

great number were made. In the time of Joshua there were seven (Josh. iii, 4), and at the dedication of the Temple of Solomon there were one hundred and twenty priests that sounded trumpets (2 Chron. v, 12). The following particulars concerning the use of trumpets in the Temple will be useful, and are collected chiefly from Lightfoot’s Temple Service. The trumpets were sounded especially by the priests, in the Levitical choir, but apart, and opposite to the Levites, on the other side of the altar, both parties looking towards it—the priests on the west side and the Levites on the east. The trumpets did not join in the concert, but were sounded during certain regulated pauses in the vocal and instrumental music. The manner of their blowing with their trumpets was first a long plain blast, then a blast with breakings and quaverings, and then a long plain blast again. . . . The priests did never blow but these three blasts went together. . . . The Jews do express these three several soundings that they made at one blowing by the words (translated) ἄν ψων ὥστε ἐν ζήτον, sanctify a fast, call a solemn assembly. Some have supposed that it was intended to introduce the seventh or sabbatical month of the year, which was especially holy because it was the seventh, and because it contained the Day of Atonement and the Feast of Tabernacles (Exod. xxiii, 24; Buxt- tort, Syn. Jud. c. 24). The Hebrew and Samaritan writers regarded it as a memorial of the giving of the law on Sinai (Phil. opp. v, 46, ed. Tauch. Basil in Ps. xxxvi; Theod. Quast. xxxii in Lev.). But there seems to be no sufficient reason to call in question the common opinion of Jews and Christians, that it was the festival of the New-year’s-day of the civil year, the first of Tisri, the month which commenced the sabbatical year and the year of jubilee. If the New-moon Festi- val was taken as the consecration of a natural division of time, the month in which the earth yielded the last ripe produce of the season, and began again to foster seed for the harvest of the future, must of necessity have been estab- lished as the first month of the year. The fact that Tisri was the great month for sowing might thus have easily suggested the thought of commemorating on this day the finished work of creation, when the sons of God shouted for joy (Job xxxvii, 7). The Feast of Trumpets thus came to be regarded as the anniversary of the birthday of the world (Mishna, Ṭashḥash. i, 1; Hupfeld, De Fest. Heb. ii, 13; Buxtort, Syn. Jud. c. 24). It was an odd fancy of the rabbins that on this day, every year, God judges all men, and that they pass be- fore him as a flock of sheep pass before a shepherd (Ḥose. vi. 2). See New Moon.

TRUST in God signifies confidence or dependence upon him. This trust ought to be—1. Sincere and unreserved, not in idols, in men, in talents, riches, power, in ourselves part and in him part (Prov. iii, 5-6); 2. Universal—body, soul, circumstances (1 Pet. v, 7); 3. Perpetual (Isa. xxxvi, 4); 4. With a lively expectation of his blessing (Mic. vii, 7). The encourage- ment we have to trust in him arises—1. From his lib- erality (Rom. viii, 32; Ps. lxviii, 11); 2. His ability (James i, 17); 3. His relationship (Ps. ciii, 13); 4. His promise (Isa. xxxix, 18); 5. His conduct in all ages to those who have trusted him (Gen. xviii, 15; Ps. xxxvii, 25). The happiness of those who trust in him is great, if we consider, 1. Their safety (exxv, 1); 2. Their courage (xxxiv, 1); 3. Their peace (Isa. xxxvi, 8); 4. Their character and fruitfulness (Ps. i, 3); 5. Their end (xxvii, 37; Job v, 26). See Faith.

TRUST-deeds are forms of conveyances of real estate specifying some trust for which the property is held. At an early period of his history Wesley published a model deed for the settlement of chapels, to the effect that the trustees, for the time being, should per- mit Wesley himself, and such other persons as he might from time to time appoint, to have the free use of such
premises, to preach therein God's word. After his death, and that of Charles Wesley and William Grimshaw, the chapel was to be held in trust for the sole use of such persons as might be appointed at the yearly conference of the people called Methodists, provided that the said persons preached no other doctrines than those contained in Wesley's _Notes on the New Test._ and in his four volumes of _Sermons_. This was followed, on Feb. 28, 1784, by the _Deed of Declaration_, explaining the words "yearly conference of the people called Methodists." This _Deed of Declaration_ is recognised in the trust-deeds of all the chapels built by the Wesleyans. In the Methodist Episcopal Church it is directed that the following trust-clause shall be inserted in each deed: "In trust, to be kept, and maintained as a place of residence for the use and occupancy of the preachers of the Methodist Episcopal Church in the United States of America who may, from time to time, be stationed in said place, subject to the use and discipline of said Church; and by the Annual Conference within whose bounds said premises are situate. In trust, that said premises shall be held, kept, and maintained as a place of residence for the use and occupancy of the preachers of the Methodist Episcopal Church in the United States of America who may, from time to time, be stationed in said place, subject to the use and discipline of said Church, and by the Annual Conference within whose bounds said premises are situate."

_TRUSTEES_ are Church officers appointed for the purposes of holding the legal title to Church property, and of taking care thereof. In the different branches of Methodism there are some differences of provision, but in general principles they are the same. The Methodist Episcopal Church the _Discipline_ says, "Each board of trustees of our Church property shall consist of not less than three nor more than nine persons, each of whom shall be not less than twenty-one years of age, two thirds of whom shall be members of the Methodist Episcopal Church." Where the Church has not received a legal act of incorporation or charter, and where the law of the state does not specify any particular mode of election, "the trustees are elected annually by the Fourth Quarterly Conference . . . upon the nomination of the preachers of the Quarterly Conference or the presiding elder of the district, or the state or territory directs the mode of election, that mode must be strictly observed; and where charters of incorporation are obtained, they specify the particular qualifications and time of election of these officers."

The trustees have the charge of all repairs to be made on Church property, and of all financial matters pertaining to its preservation; are directed by the _Discipline_ to make an annual report to the Fourth Quarterly Conference of the amount and value of the property, expenditures and liabilities, etc., and are held amenable to the Quarterly Conference for the manner in which they perform their duty. By the action of the General Conference of 1876 trustees are forbidden to "mortgage or encumber the real estate for the current expenses of the Church."

TRUSTEES, GENERAL BOARD OF. The General Conference of the Methodist Episcopal Church, in 1864, appointed a committee of seven to report a plan of trusteeship. The report of the committee was adopted, and is called the _Plan_ of trusteeship. The General Conference appointed a board whose headquarters should be at Cincinnati, and which was incorporated with the title of "the Board of Trustees of the General Conference of the Methodist Episcopal Church in the United States," and its charter was granted July 11, 1865. According to the _Discipline_, "The duty of the board shall be to hold in trust, for the benefit of the Methodist Episcopal Church, any and all donations, bequests, grants, and funds in trust, etc., that may be given or conveyed to said board, or to any be- nevolent object, and to administer the said funds, and the proceeds of the same, in accordance with the direction of the donors," etc.

_TRUTH_, conformity to fact.

1. It has been distinguished by most _philosophical_ writers, according as it respects being, knowledge, and speech, into

(1) _Veritas entis_, or truth of the thing. The foundation of all truth is in truth of being—that truth by which a thing is what it is, by which it has its own nature and properties; and has not merely the appearance, but reality, of being. Philosophy is the knowledge of being; and if there were no real being—that is, if truth could not be predicated of things—there could be no knowledge.

(2) _Veritas cognitionis_, or truth of knowledge. Truth, as predicated of knowledge, is the conformity of our knowledge with the reality of the object known; for, as knowledge is the knowledge of something, when a thing is known as it is that knowledge is formally true. To know that fire is hot is true knowledge. Objective truth is the conformity of the thing or object known with true knowledge.

(3) _Veritas verbi_, or truth of the sign. This consists in its adequateness or conformity to the thing signified. The truth and adequacy of signs belong to enunciation in logic.

2. _Scientific truth_ consists in the conformity of thoughts to things; and _moral_ truth lies in the correspondence of words with thoughts; while _logical_ truth depends on the self-consistency of thoughts themselves.

3. Truth, in the strict _logical_ sense, applies to propositions, and nothing else; and consists in the conformity of the declaration made to the actual state of the case. In its _etymological_ sense, truth signifies that which the speaker means it to be the fact. In the _philosophical_ sense, it is opposed to a _lie_, and may be called _moral_. Truth is not unfrequently applied to arguments, when the proper expressions would be "correct," "conclusive," "valid." The use of truth in the sense of _reality_ should be avoided. People speak of the truth or falsity of facts; whereas, properly speaking, they are either real or fictitious. It is the statement that is true or false.

4. _Necessary_ truths are such as are known independently of inductive proof; are those in which we not only learn that the proposition is true, but that it must be true; are those the opposite of which is inconceivable, contradictory, impossible. _Contingent_ truths are those which, without doing violence to reason, we may conceive to be otherwise.

5. _Absolute_ truth is the knowledge of God, the ground of all relative truth and being. All relative truth is partial because each relation presupposes something which is not relative. As to relative truth is partial in another sense, because the relations known to us are affected by relations which we do not know, and therefore our knowledge even as relative knowledge is incomplete as a whole and in each of its parts. At the same time, relative knowledge is real knowledge; and if it were possible habitually to realize in consciousness that it is partial, it would be strictly true so far as it goes. See Blunt, _Dict. of Hist. Theol._ s. v.; _Fleming_, _Vocab. of Philos. Sciences_, s. v.

6. In scripture language, eminently, God is truth; that is, in him is no fallacy, deception, perverseness, etc. Nor is _Jesus Christ_ himself, as God the Son, the true way to God, the true representative, image, character, of the Father. The Holy Spirit is the Spirit of truth, who communicates truth, who maintains the truth in believers, guides them in the truth, and who hates and punishes falsehood or lies, even to the death of the transgressor (Ps. xxii, 51; John xiv, 6, 17; Acts v, 4). Especialy is truth a name given to the religion of
Jesus, in opposition to that of the Jews and that of the heathen. As contrasted with the Jewish system, it was the "truth" in the sense of "reality", as distinguished from the "emblems," symbols, representations, of that reality; from the "shadow of good things to come," contained in the Levitical law; in this sense it is that the apostle tells us "the law was given by Moses, but grace and truth came by Jesus Christ." As contrasted with paganism, Christianity was truth opposed to falsehood; to theology the concept of a God was not true, but was not even supposed as true: it not only deserved no faith, but it demanded none. Jesus inaugurated a new way of propagating a religion, by inviting converts not to conform to its institutions, but to "believe" and to let their actions be agreeable to truth: nothing, then, was more natural than that Christianity should receive names expressive of this grand peculiarity, the truth and the faith. See Whately, Essays on Difficulties of St. Paul, essay i.

Tryphon'sa (Τριφωνα, luxuriosus), a person mentioned in connection with Tryphosa (q. v.), the two being Christian women at Rome, who, among those that are enumerated in the conclusion of Paul's letter to that city, receive a special salutation, and on the special ground that they are engaged there in "laboring in the Lord" (Rom. xvi, 12). A.D. 55. They may have been sisters, but it is more likely that they were fellow-deaconesses, and among the predecessors of that large number of official women who ministered in the Church of Rome at a later period (Eusebius, Hist. Eccl. vi, 48); for it is to be observed that they are spoken of as at that time occupied in Christian service (τραχυκοσά), while the salutation to Persis, in the same verse, is connected with past service (ηρειοικασαν). We know nothing more of these two sister-workers of the apostolic time; but the name of one of them occurs curiously, with other names familiar to us in Paul's epistles, in the Apocryphal Acts of Paul and Thecla. See Thecla's Legend. There Tryphena appears as a rich Christian widow of Antioch, who gives Thecla a refuge in her house, and sends money to Paul for the relief of the poor (see Jones, On the Canon, ii, 371, 380). It is impossible to discern any trace of probability in this part of the legend.

It is an interesting fact that the columbaria of "Cesar's household" in the Via Latina, near the Porta S. Sebastiani, contain in the name Tryphon, as well as other names mentioned in this chapter, Philogos and Julia (ver. 15), and also Amplias (ver. 8). See Wordsworth, Tour in Italy (1862), ii, 173.

Tryphon, an eminent man, who was seized as a Christian and imprisoned at Nice, about A.D. 50, in company with another, named Respicius. They were soon after put to the rack, which they bore with admirable patience for three hours, and uttered the praises of the Almighty the whole time. They were then exposed naked to the severity of the open air, which bemumbed all their limbs, as it was in the very depth of winter.

Tryphon (Τριφων, a not unfrequent Greek name of the later age), a usurper of the Syrian throne. His proper name was Diodattus (Strabo, xvi, 2, 10; Appian, Syr. 68), and the surname Tryphon was given to him, or, according to Appian, adopted by him, after his accession to power (Livy, E.iti. liii, iv). He was a native of Cariana, a fortified place in the district of Apamea, where he was brought up (Strabo, loc. cit.). In the reign of Alexander Balas he was attached to the court (Appian, loc. cit., δολοσ των βασιλιων; Diodor. Fr. xxi, ap. Muller, Hist. Gr. Romani, ii, 17, σπαργ-για; 1 Mac. xi, 89, των παπατ Αλεξανδρει; but towards the close of his reign he seems to have joined in the conspiracy which was set on foot to transfer the crown of Syria Ptolemaic to the Greek sun, moon, and stars [see Appian, loc. cit.]). After the death of Alexander Balas he took advantage of the unpopularity of Demetrius II to put forward the claims of Antiochus VI, the young son of Alexander (1 Macc. xi, 39), B.C. 145. After a time he obtained the support of Jonathan, who had been alienated from Demetrius by his ingratitude, and the young king was crowned (B.C. 144). Tryphon, however, soon revealed his real designs on the kingdom, and, fearing the opposition of Jonathan, he gained possession of his person by treachery (xii, 39, 50), and after a short time put him to death (xiii, 25). As the way now seemed clear, he murdered Antiochus, and seized the supreme power (ver. 31, 32), which he exercised, as far as he was able, with violence and rapacity (ver. 34). His tyranny again encouraged the hopes of Demetrius, who was engaged in preparing an expedition against him (B.C. 141), when he was taken prisoner (xiv, 1-3), and Tryphon retained the throne (Justin, xxxvi, 1; Diodor. Leg. xxi), till Antiochus VII, the brother of Demetrius, drove him to Dora, from which he escaped to Orthosia, in Phoenicia (1 Macc. xv, 10-14; 37-39), B.C. 139. Not long afterwards, being hard pressed by Antiochus, he committed suicide, or, according to other accounts, was put to death by Antiochus (Strabo, xiv, 5, 2; Appian, Syr. 68, άντρικος κτένιν ... συν πνημ ραλλων; Josephus (Ant. xiii, 7, 2) adds that he was killed at Amapea, the place which he made his headquarters (Strabo, xvi, 2, 10). The authority of Tryphon was evidently partial, as appears from the growth of Jewish independence under Simon Macabaeus, and Strabo describes him as one of the chief authors of Cilician piracy (xiv, 3, 2). His name occurs on the coins of Antiochus VI, and he also struck coins in his own name. See Antiochus; Deme- trius.

Coin of Tryphon.

Tasab. See Tortoise.

Tasbiyans (from ΝΣ, a host) were those who worshipped the heavenly hosts, that being one of the earliest forms in which idolatry appeared. This species of idolatry first prevailed in Chaldaea, whence it spread over all the East, passed into Egypt, and thence found its way into Greece. The sun, moon, and stars were believed to be a divine intelligence, who exercised a constant influence for good or evil upon the destinies of men. See Sabians.

Tsiriph (תִּשְׁרֵיפָה), or anagram, is a Cabalistic rule according to which various words are formed by the change of any word into others by the transposition of the component letters. Thus נָעַרְעַנְקֵנּ, “in the beginning,” has been anagrammatized נָעַרְקֵנְנַעְרַנְק, “a coven- ant of fire,” to accord with Deut. xxxiii, 2, “his right hand, and his mighty arm shall go before them.” In a Cabalistical book entitled דֶּבֶּרַע תִּשְׁרֵיפָה, upwards of seventy combinations of this single word are formed by R. Simeon ben-Jochai. The Cabalists say that because the Hebrew letters are spiritual, and simple figures, they can therefore be construed in different ways; but this can be done in any language. Thus Herbert anagrammatized the Virgin Mary into Army, as seen in the following two lines:

“How well her name an Army does present,
In whom the Lord of hosts did pitch his tent!”

Tsoskhapa, a Thibetan reformer and monk, was born A.D. 1355, in the district of Amdo. He strictly prohibited ordinary tricks and pretended miracles ofocha, and by the aid of his own intuitions and the systematic study of the ancient religious and mystical schools of modern Buddhism. He also published most comprehensive works. His innovations were never universally acknowledged. His followers, however, called Galyupa, or Galdupa, are the most numerous, and wear a yellow garb, the others having chosen to wear blue.

Tubal (Heb. Tobal), לַעֲבָל in Gen. x, 2; Ezek. xxxii, 26; xxxiii, 1, of uncertain signification: Sept. Θωβαλ, except in Ezek. xxxiii, 1, where Alex. Θωβαλ; Vulg. Tobal, but in Isa. lxvi, 19, Italia). In the ancient ethological tables of Genesis and 1 Chron. Tubal is reckoned with Javan and Meshech among the sons of Japheth (Gen. x, 2; 1 Chron. i, v). B.C. post 2514. The three are again associated in the enumeration of the sources of the wealth of Tyre: Javan, Tubal, and Meshech brought slaves and copper vessels to the Phenician markets (Ezek. xxvii, 13). Tubal and Javan (Isa. lxvi, 19), Meshech and Tubal (Ezek. xxxii, 26; xxxviii, 2; xxxix, 1), are nations of the north-western limit of the Biblical world, and the tribes of the north, or the Dariuses, as Darius son of Xerxes under the command of Aries. The son of Darius (vii, 78). The Moschi and Tubaleni, moreover, are “constantly associated, under the names of Moschi and Tupid, in the Assyrian inscriptions” (Sir H. Rawlinson, in Rawlinson’s Herod., i, 535). The Tiberi were said by the scholar on Aplionn Rhodius (ii, 1010) to have been a scythian tribe, and as well as the Moschi are probably to be referred to that Turanian people who in very early times spread themselves over the entire region between the Mediterranean and Euphrates, and the Persian Gulf and the Caucasus (Rawlinson, Herod., i, 535).

In the time of Sargon, according to the inscriptions, Ambris, the son of Khuliyaha, was hereditary chief of Tu-
TUBAL-CAIN
572 TÜBINGEN SCHOOL, THE OLD

cined to identify with the Huns (Phaleg, iii, 12). They
may, perhaps, take their name from Cnōe, the modern
Unieh, a town on the south coast of the Black Sea,
not far from Cape Yassh, and so in the immediate
neighborhood of the Targum of the Sea. The
Joseph on 1 Chron. (ed. Wilkins) נ revealing is given
as the equivalent of Tubal, and Wilkins renders it by
Bithynia. But the reading in this passage, as well as
in the Targums of Jerusalem and of Jonathan on Gen. x,
is too doubtful to be followed as even a traditional
authority. See ETHNONE.

Tubal-cain (Heb. Tu'bal Ka'y'in, תּוּבֵל כָּעִין, ap-
parently of foreign etymology; Sept. θείσα; Vulg.
Tuval) was, according to Genesis, the first man who
Lamech, who is named by his wife Zillah (Gen. iv, 22). B.C. cir. 7800. He is called a "forger of every cutting instrument of copper and iron." The Jewish legend of later times associates him with his father's song. "Lamech was blind," says the story as told by Rashi, "and Tubal-cain was leading him; and he saw Cain, and he appeared to him like a wild beast, so he told his father to draw his bow, and he slew him. And when he knew that it was Cain his ancestor, he smote his hands together and struck his son between. So he smote him, and his wife withdrew from him and he consolates them." In this story Tubal-cain is called the "smith" of Cain. Rashi apparently considers the name of Tubal-cain an appellative, for he makes him director of the works of Cain for making weapons of war, and connects "Tubal" with בּעל, tobél, to season, and so to prepare skillfully.

He appears, moreover, to have pointed it בּעל tobél, which seems to have been the reading of the Sept. and Josephus. According to the writer last mentioned (Ant. i, 2, 2), Tubal-cain was distinguished for his prodigious strength and his success in war.

The derivation of the name is extremely obscure. Hasse (Entdeckungen i, 87, quoted by Knobel on Gen. iv, 22) identifies Tubal-cain with Vulcan; and Buttman (Mythol. i, 164) not only compares these names, but adds to the comparison the Ταύρος of Rhodes, the first workers in copper and iron (Strabo, xiv, 651), and Dwellam, the demon smite of the Scandinavian mythology. Gesenius proposed to consider it a hybrid word, compounded of the Pers. تابال, talbal, iron slag, or scorria, and the Arab. كام, a smith; but this etymology is more than doubtful. The Scythian race Tubal, who were copper and iron-workers (Strabo, xiv, 18), naturally suggest themselves in connection with Tubal-cain.

Tubéni'i (Τουβένια; Alex. Τουβένια; Vulg. Tu-
bemer). The "Jews called Tubeni" lived about Chra-
rax, 750 stadia from a strongly fortified city called Cas-
pis (2 Macc. xxii, 17). They were doubtless the same
who are elsewhere mentioned as living in the towns of
Toubius (A.V. "Tobius"), which again is probably the
same with the Tob (q. v.) of the Old Test.

Tübingen School, The OLD. The origin of this
school, which became so noteworthy a factor in the de-
velopment of Protestant theology during the latter half
of the 18th century, is associated chiefly with the per-
sonality and influence of G. C. Storr (q. v.), professor of
theology in the University of Tübingen, and, at a later
day, court-preacher at Stuttgart. This scholar gather-
ed about him a number of pupils, whom he impressed
with the broad culture and thorough and comprehen-
sive learning as well as logical arrangement and ex-
traordinary clearness of his lectures, and whom he cap-
vitated by his evident piety, dignified demeanor, and un-
vexed and unperturbed manner. A dominant charac-
ter, whether as a man or a scholar, were, however,
wholly of the objective class. His piety was not the
expression of profound religious feeling, but of rigidly
earned and conscientious principle; and as his heart
lacked fervor, so his intellect was deficient in imagina-
tion and the true speculative quality. The age in
which he lived was a period of unrest. The orthodoxy
of Brentius and Jakob André, was beginning to loosen
its hold upon the times. J. W. Jüger, the learned chancel-
lor (1702-20), had ventured upon the innovation of
introducing a more liberal and systematic method in theology
than that which in the previous age had prevailed. Pfaff and Wieland also broke from the polemical methods of orthodoxy, and sought to impart greater simplicity and life to theological in-
struction. In another direction, the so-called enlight-
enment or neology of the 18th century was gaining
prominence and power, and was rejecting not merely
the form but the substance, of the orthodox teaching. Storr
was not able to deny that the crisis which had come
upon theology had its origin in very adequate
causes; but he could not fully accept all its results, and
therefore assumed a position midway between the con-
tending parties, so as to be able to retain much of the
sub-
stance of the old orthodox theology while adopting much
of the methods of the new. He endeavored to base his
teaching wholly on the Scriptures, and for that purpose
brought together a mass of isolated passages to serve
as the basis of his theology; but he had no conception
of the organic unity of Scripture, of its living combi-
nation into separate principles, and of a consequent ge-
genetic unfolding of scriptural truths. Baur strikingly
remarks that Storr recognized no canon, but only pas-
gages, of the Scriptures. His system was furthermore
impaired by the Pelagianizing tendency of his mind, which
led him to tone down the contrast between the funda-
mental principles of sin and of redemption, and to make
grave concessions to neology with regard to the doc-
trines of the atonement and of the person of Christ.
His great object was to render Christianity plausible to
the destructive criticism of his time; and the endeavor
to realize that object occasioned his bearing a certain
innocent indecision and anxiety of mind, that his
theology is made to seem forced and constrained.
Great attention is given to the discussion of unimportant
and particular ideas, while the thought of a connected and
organic system of Christianity has no proper recogni-
tion in his system. This disposition upon subordinate
details is apparent in all his works, and especially in his criticism of Kant's "Religion inner-
halb der Grenzen der reinen Vernunft," and in the works he aimed against the "accommodation hypothesis" of
Semler, Teller, and others. It was his misfortune to
incur the enmity of the Church and that of literature. Storr's disposition toward doctrine which had enabled him
to discover the gradual development of scriptural truth.
His system of Christian dogmatics and ethics aims to
be simply a bringing-together and connecting of the
results of exegesis; and this aim is realized by the mo-
dcular-like isolation of particular points. Baur con-

gours as to justify the above criticism of Baur that Storr
had no authoritative rule, but only a fragmentary view
of Scripture. In this way he gave expression to the
principle of the authority of Scripture upon which he
professed to erect his entire system.

The school of Storr was, more particularly, composed
of Johann Friedrich Platt, Friedrich Gottlieb Stüsskind,
and Karl Christian Platt, all of them pupils, successors,
and in part colleagues of Storr in the theological facul-
ty (for a more particular notice of these scholars, see the
articles under their names). The older Platt was an acute and learned man, exceedingly conscientious and

careful, naturally cheerful, but infirm in body and

greatly afflicted by repeated sorrows, in consequence of
which he developed a measure of irritability and mel-
ancholy in his disposition. He left lectures on Chris-
tian ethics and on the Pauline epistles, which were pub-
dlished by his friends. Stüsskind was the last domin-
ating and elevating influence in scientific activity chiefly to the elucidation of funda-
mental questions in doctrines and apologetics consid-
ered with reference to the philosophy current in his
day. Against Kant and Fichte he discussed the office
and the limitations of reason, and against Schelling he
endeavored to secure the theistic conceptions.

His investigations in the line of doctrine were chiefly
concerned with the idea of the possibility of the forgiveness of sins, or, in other words, of the remission of penalty. He also discussed, in a fragmentary way, the theology of Schleiermacher (see Stüskind, Vermachtes Schriften, 1831). His leading personal traits were great intellectual penetration and energy, the tendency towards the reform, with sternness of manner and the utmost conscientiousness of spirit. He was a master in logic, bold and confident in debate, the dialectician of his school. His ability was nevertheless impaired by the lack of speculative power and depth. The younger Flatt was rather a master of the disciple and should be a teacher. His earliest work attempted to prove that the Kantian theory of atonement, according to which the forgiveness of sins is determined by, and consequent on, the measure of moral reformation, is not the only reason, but also the only allowable, view under the New Test. He was induced to retract the teachings of that book, and in time became wholly identified with the tendency of Storr and the elder Flatt.

The peculiarity of these theologians lay in the abstract theism beyond which they were not able to advance by reason of the want of true philosophical sense. They were inclined to the theory of the gaps and weaknesses of transcendental speculation, but failed to attain to a living apprehension of their own theism; and, while they defended their theory of revelation with the utmost tenacity, they rendered that theory thoroughly intolerable to reason by numerous provisions, explanations, and modifications, applicable to everything which is peculiar to their teaching, and indicates what is, more than any other feature, the characteristic of their school.

Affiliated to this school, though less closely than the men already named, was Ernst Gottlieb Bengel, professor of patristic and church history. This scholar passed beyond the ordinary favorable attitude of the school of Storr in his fondness for Socinian views, and was also a Kantianizing, rationalizing supranaturalist. So firmly was he intranced in such views that he steadily refused to be influenced by any new tendency which the changing philosophy of a new age might bring to bear upon theological inquiry. He scarcely indicated that he knew of the existence of Schleiermacher, and prevented the appointment of Bockshammer—who had written an unusually able work on the freedom of the will—to the faculty as the successor of Flatt. Bockshammer’s departure from the old plan to which Bengel was committed. Other adherents of this school, as Steudel, Christian Friedrich Schmid, etc., remained more faithful to the Storian ideas in some respects, but were, on the other hand, gradually led away from the traditional position of the Tubingen school through the influence of the theology of Schleiermacher. New men, new tendencies, new methods, have taken the place of the old, not only with respect to the external fact, but even as regards the results of what was at one time a noteworthy factor in the development of theological science. The Tubingen school has produced, upon the whole, effects much less important to such development than its prominence would seem to warrant. See Herzog, Real-Encyklop., s. v., and the various names mentioned in this article in Herzog and this Cyclopaedia.

TUBINGEN SCHOOL, THE NEW. A very different era was inaugurated in the University of Tubingen on the appointment of F. C. Baur (q. v.) as professor of theology in 1826. He began to attack the objective positions of Christianity through the Pauline epistles, seeking to prove that they were not genuine, and pointed out alleged discrepancies between them and other parts of the New-Test. history. His theory, which is summed up in his work on the apostle Paul, is, in brief, that, taking the epistles to the Galatians, the Romans, and the Corinthians especially as guides, we find therein "exposed the fact that there were two parties in the early Church, the Pauline and the Petrine. These struggled for supremacy, and the conflict was a long one. Peter was a thorough Jew, and his side predominated even after the death of the principal combatants. Judaism was the cradle of Christianity; and the latter was only an unresisted change of the former. But it was not an offset as yet, for Christianity was essentially Jewish all through its first historic period. The canonical writings of the New Test., which constitute the chief literature of the first two centuries, are the literary monument of Christianity while it was unresisted and undetached from Judaism. These writings are the mediating theology of those distant days. The Petrine party was very strong until the middle of the 2d century, when it was obliged to yield to, or rather harmonize with, the Pauline. Many causes contributed to bring the two factions together. There was an absence of growth quite incompatible with their respective strength. Alone, they were almost unable to bear the storm of persecution. Finally, for the sake of security and propagation, they laid down their weapons and united under one banner. From this union came the subsequent growth of Christianity. The shape it took was that the Church had been written in the interest of one or the other of these parties. Since the enmity has been destroyed, their literary productions must be considered in the light of history. The Church is therefore much mistaken in attaching importance to the Scriptures, for they were written for a time to apply to everything which is peculiar to their teaching, and indicates what is, more than any other feature, the characteristic of their school.

It is obvious how destructive to the essential faith of Christians were these positions, and yet it is wonderful that they were broached with so much assurance, although based upon so trifling a comparison of circumstances. Nevertheless, a number of circles of disciples clustered around Baur, and they enjoyed his leadership until his death, in 1860. But the writings of both the master and his school were quickly answered by the best theologians of Germany, such as Thiersch, Dorner, Leckler, Lange, Schaff, Bleek, Hase, Bunsen, and ‘Ischendorff. Yet the effects of the insinuations, suspicions, and criticisms of Baur were for a long time a serious hindrance to the truth. The authors of the movement were disciples of the Hegelian philosophy. Their aim was to explain the origin of Christianity by natural causes alone. In this endeavor they but reproduced in a new form that of Bockshammer’s, destroyed by Baur. The primitive doctrine of supranaturalism was again defended by an appeal, as of old and ever, to facts of the inspired records and the instinctive convictions of humanity. Yet some of its champions in this contest were themselves unconsciously infected more or less by the insinuating influences of the new scepticism, and were led to make concessions which later and sounder theologians have seen to be unnecessary and untenable.

Meanwhile, the attack upon the fundamental documents of Christianity performed in still more virulent form by D. F. Strauss (q. v.), on his appointment to the theological faculty of Tubingen in 1828, and culminated in his famous Leben Jesu, which boldly impugns the historical truth of the Gospel itself. For the discussion of the controversy resulting, see MYTHICAL THEORIES OF CHRISTIANITY. Strauss has turned in against these negative views, even in Tubingen itself, so that what has recently been known as "the Tubingen theology" is likely soon to be a thing of the past. See Hurst, Hist. of Rationalism, p. 280 sq.; Cook, Monday Lectures, ser. i; Fisher, Supernat. Origins of Christianity. See also J. F. Kautzsch's Die Paulinische Theologie der Stauferzeit.

TUCH, JOHANN CHRISTIAN FRIEDRICH, a Protestant divine of Germany, was born Dec. 17, 1806, at Quedlinburg. Having prepared himself for the university at the gymnasium in Nordhausen, he went in 1828 to Halle, where he attended the lectures of Gesenius. Here he also commenced his lectures on Oriental lan-
TUCHER

TUCHER 

574

TUCKER

TUCHER, Carl Gottfried von, a famous jurist of Germany, was born May 14, 1798, at Nuremberg. He studied jurisprudence at Erlangen, Heidelberg, and Berlin, and after having occupied several professorships in his profession, he removed to Berlin, Feb. 17, 1877. He is known as the author of the following hymnological works: Schats des evangelischen Kirchenganges, der Melodie und Harmonie nach, aus den Quellen des 16. und 17. Jahrhunderts geschöpft, etc. (Stutt. 1840) — Schats des evangelischen Kirchenganges im ersten Jahrhundert der Reformation (Leips. 1846, 2 vols). (B. P.)

TUCKER, Abraham, a metaphysical writer, was born in London in 1705, and was educated at Bishop's Stortford School and Merton College, Oxford. He studied for a while at the Inner Temple, but was not admitted to the bar. He died in 1774. He published, Free-will, Free-knowledge, and Fate: a Fragment by Edward Search (London, 1758, 8vo):—Man in Quest of Himself; or a Defence of the Individuality of the Human Mind or Self, etc., by Cathcart Comment, Gen. (1768, 8vo). His great work, however, is The Light of Nature Pursued, by Edward Search (1768-78; Cambridge, Mass., in 8vo, with many appendices, and lastly reprinted, 1805). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

TUCKER, Elijah W., a Congregational minister, was born at Dorchester, Mass., March 31, 1810. He was converted at the age of twenty, graduated at Brown University in 1838, and at Andover Theological Seminary in 1841, and labored at South New Market, N. H., in 1841 sq; Chatham, Mass., in 1846 sq; Essex, Conn., in 1855; Goshen, Conn., 1858-59; Preston, Conn., 1858-65; and Northfield, Conn., in 1865, until his death, July 6, 1866. Mr. Tucker was a direct, earnest preacher, and a sympathetic, watchful pastor. Revivals resulted from his labors in almost every field. See Cong. Quarterly, 1867, p. 46.

TUCKER, Eliza, D.D., a Baptist minister, was born at Rensselaerville, Albany County, N. Y., Dec. 24, 1794. His early education was limited. He began to preach in 1816, and was ordained pastor of the Baptist Church of Coventry, Chenango County, N. Y., Aug. 19, 1821. Here he continued with great success until Aug. 12, 1827, when he became pastor of the Church at Freedom, N. Y. He was afterwards pastor of the First Baptist Church in Buffalo from September, 1831, until October, 1846; then of the Second Baptist Church of Rochester, N. Y., until May, 1841; and of the Oliver Street Baptist Church, New York city, until 1846. In 1851 his health became very much impaired, and he began travelling in the hope of improving it, but died Dec. 29, 1853. He was the eldest of six brothers, five of whom entered the ministry. Dr. Tucker published a Sermon Delivered at Fredonia on the Ordination of Mr. Jonas Handy (1826). See Sprague, Annals of the Amer. Pulpit, vi, 667.

TUCKER, Jonas, D.D., a learned English divine, was born at Laugherne, Carmarthenshire, in 1711. He was educated at St. John's College, Oxford, and in 1737 became curate of St. Stephen's Church, Bristol, and was subsequently appointed minor canon in the cathedral of that city. On the death of Mr. Ratcliffe, he became rector of St. Stephen's, and in 1758 was created dean of Gloucester. Mr. Tucker was an able advocate of the great political questions of the day, and was bold and determined in the principles which he advocated. He died Nov. 4, 1799. He wrote, The Elements of Commerce and Theory of Taxes (Bristol, 1755, 4to); Six Sermons (1772, 12mo)—four tracts, etc.—on political and commercial subjects (Glouceces, 1774, 8vo)—besides Treatises, etc. See Chalmers, Biog. Dict. s. v.; Allibone, Dict. of Brit. and Amer. Authors, s. v.

TUCKER, Levi, D.D., a Baptist minister, was born in Scholario County, N. Y., July 6, 1804. He studied theology at the Hamilton Institution, graduated June 8, 1829, and on the same day was ordained pastor of the church at Deposit, N. Y. In the summer of 1831 he accepted a call to settle at Bloxley (now West Philadelphia), Pa., where he labored with great success, acting also for a while as agent of the Baptist Educational Society of that state, until the spring of 1836, when he removed to Cleveland, O. After remaining there seven years, he was for a while pastor of the Washington Street Baptist Church in Buffalo, and on Dec. 29, 1848, became pastor of the Bowdoin Place Church, Boston. His health having become greatly impaired, he resigned his charge in November, 1859, and took a journey to England, France, Italy, and Egypt, whence he returned in the early part of August, 1858, and died on the 23d of the same month. See Sprague, Annals of the Amer. Pulpit, vi, 786.

TUCKER (or TOOKER), William, D.D., a learned English divine of the 16th century, was born at Exeter. He was educated at New College, Oxford, and was admitted perpetual fellow in 1577. In 1585 he was promoted to the archdeaconry of Barnstable, in Devonshire. He was eventually made chaplain to queen Elizabeth. Dr. Tucker afterwards became prebendary of Salisbury, and took his degree of D.D. in 1594. He was made master of the church at Oxford in 1601, and was installed dean of Lichfield, Feb. 21, 1604. He died at Salisbury, March 19, 1620. Dr. Tucker was esteemed an excellent Greek and Latin scholar. He was an able divine, a person of great gravity and piety, and well read in curious and critical authors. His publications are, Charisma, see Robilham Samulium Gratia, etc. (Lond. 1597, 4to), a historical defence of the power of royalty to cure the king's evil:—Of the Fabric of the Church and Christians Living (lub. 1604, 8vo):—Singuilar Certamen cum Martino Becano Jesuita (lub. 1611, 8vo), written in defence of James I against Beaus, see Chalmers, Biog. Dict. s. v.; Allibone, Dict. of Brit. and Amer. Authors, s. v.

TUCKERMAN, Joseph, D.D., a Unitarian minister, was born in Boston, Mass., Jan. 18, 1778, and graduated from Harvard College in 1798. After devoting himself to the study of theology, under Rev. Thomas Thacher of Dedham, he was ordained and installed as pastor in Chelsea, Nov. 4, 1818. While at Chelsea, his attention was directed to the mental and moral improvement of seafaring men, and in the winter of 1811-12 he founded the first society for the religious and moral improvement of seamen. In 1816 Mr. Tuckerman visited England in search of health, but soon returned without having experienced much apparent advantage from his tour. He resigned his charge at Chelsea in 1826,
preaching his farewell sermon on Nov. 4. He imme-
mediately entered upon his work as minister at large in
Boston, devoting himself to the visitation of the poor
and destitute for the remainder of his life. In 1833 he
again went to Europe, returning in the following year.
He engaged in his business at home until his death on
April 29, 1840. He published a large number of Ser-
mons, Letters, Essays, etc. (1800-38). See Sprague,
Answ. of the Amer. Pulpit, viii, 345.
Tuckney, Anthony, a learned Nonconformist di-
vine of England, was born at Kirton, Lincolnshire, in
September, 1599. He was matriculated at Emanuel
College, Cambridge, at fourteen, received his degree of
A.M. in 1616, and was chosen fellow of his college three
years after. In 1627 he took his degree of B.D., and
became assistant to the famous vicar John Cotton, upon
whose departure he was chosen to the vicarage. When
the assembly of divines met at Westminster, Mr. Tuck-
ney was one of the two nominated for the county of
Lincoln, and was appointed minister of St. Michael
Quene's, Cheapside. In 1645 he was appointed master
of Emanuel College, but did not entirely reside on this
employment until 1648, when, being chosen vice-cham-
celor, he removed with his family to Cambridge, and
took his degree of D.D. the year after. In 1653 he was
chosen second vicar of John's, and the next year regius
professor of divinity. At the Restoration complaints
were made by royalists against Mr. Tuckney, who re-
signed both positions June 22, 1661, receiving a pension
of £100 per year. The rest of his life he spent in re-
tirement, mostly in London. Although appointed com-
missioner at the Savoy Conference, he never attended it.
In the time of the plague he lived at Colwich Hall, near
Nottingham, where he was troubled and confined, but
was discharged in a few months. Upon the passage of
the Five-mile Act he removed to Oundle, and thence to
Warnington, Northamptonshire. After the fire of
London he removed to Stockton, Leicestershire, and
then to Tottenham, and in 1669-70 to Spitaldyke, where
he died in February, 1670. He wrote, Sermon on Jer.
xxii. (22. (Lond. 1643, 4to):—Five Sermons (1656, 12mo):
—Forty Sermons (1678, 4to), published by his son:—
Letters, etc. See Chalmers, Biog. Dict. s.v.; Allibone,
Dict. of Brit. and Amer. Authors, s.v.
Tudehope, Archibald, a Presbyterian minister,
was born at Paisley, Scotland, Aug. 19, 1801; graduated
at the University of Glasgow in April, 1822; studied
theology at the Divinity Hall of the Relief Synod in
Paisley; was licensed by the Relief Presbytery of Glas-
gow in 1828, and ordained pastor of the church in An-
noon in Dunbartonshire, Scotland, Oct. 14, 1828. In 1846
he emigrated to the United States, and became pastor
of the Ninth Presbyterian Church, Philadelphia, where
he remained till 1849. He died Dec. 6, 1861. He was
an instructive preacher, and his sermons to children
were specially successful efforts. See Wilson, Preb.
Hat. Almanac, 1863, p. 214.
Tudela, Benjamin (also Jonath.) or, the famous Jew-
ish traveller of the 12th century, is known for his researches
on the state of the various colonies of the Hebrew
people, both in the East and in the West. From 1165
to 1173 he travelled in several countries in Europe, Asia,
and Africa, and published his results in his Massoath, or
Itinerarium of Benjamin. Among Christians the book has
been twice translated, and also published in Latin. The
two main errors in dates and names when he does refer to Gentile history;
and, thirdly, the farther he advances from home, the
more wonderful are his reports concerning the numbers
and wealth of the Jews. These considerations have indi-
cated every one of his translators to believe that he
never quitted Spain, but made a compilation of all the
travellers' tales he could gather respecting foreign lands.
On the other hand, Gibbon (Decline, v, 845, Milman's ed.)
remarKs, "The errors and fictions of the Jewish rabbis are
not sufficient grounds to deny the reality of his travels."" He
visited in May, 1174. His investigation has certified the
reality of the voyage, and the actual truth of many of its
details, which are, however, mixed up with much that is
funny, and accompanied by many incredible tales. This
curious book of travels was edited, with a Latin translation,
by Arias Montanus at Antwerp in 1622, and by L'Emperour at Leyden in 1633; with an
English translation it was published in Puchen's Pil-
griims (Lond. 1625, ii, 1437); by Harris, in Collection of
Voyages and Travels (ibid. 1744-48), i, 546-555; by
Gerrons (ibid. 1784); by Pinkerton, in his Collection of
Voyages and Travels of the World (ibid. 1804-14), vol. vii;
and in Bond's Early Travels in Palestine (ibid. 1848, p.
63-126). The best edition is that of Asher, The Itinerary
of Rabbi Benjamin of Tudela (translated, etc.; vol. i,
biography and translation, Lond. and Berl. 1840; vol. ii,
notes and essays, ibid. 1841). A French translation is
given in Bergeron, Collection de Voyages, faits principai-
lement en Asie, dans les XIVe, XVIIe, et XVIe Siecles (the Hague, 1735, 2 vols.); by Barratier
(Amst. 1784, 2 vols.); another transl. appeared at Paris in 1830; a
Dutch transl. by Bara (Amst. 1666); and a German
transl. in Jewish characters by Arichib (Frankl-on-the-M.
1741). See Frirt, Bibl. Jud. i, 117 sq.; De Rossi, Dicio-
Juden, vi, 214; Braunschweiger, Gesch. d. Juden in d.
289, 371-420; Jost, Gesch. d. Judenth. u. s. Secten, ii, 54;
iii, 363; Bassev, Histoire des Juifs, p. 617 (Taylor's trans.
); Da Costa, Israel and the Gentiles, p. 288 sq.;
Lind, History of the Jews in Spain, p. 67; Finn, Sephar-
dim, p. 210 sq.; Etheridge, Introduction to Hebrew Lit-
erature, p. 259; Adams, History of the Jews (Bost., 1812), i, 288 sq. (B. P.)
Tudor, Salathiel, a Methodist Episcopal minister,
was born in Bedford County, Pa., in 1789. Converted
when a youth, he labored as a local preacher for eleven
years, and was received on trial in the Pittsburgh Con-
ference in 1827. In 1829 his health declined; in 1830
he was a superannuate, and he died Nov. 26 of the same
year. As a preacher he was acceptable and useful.
"His end was peaceful and glorious." See Minutes of
Annual Conferences, 1832, p. 159.
Tudor Flower. See Tudor Style.
Tudor Rose. A conventional representation of the
rose, found in Third-pointed architectural work, both in
wood and stone carvings, adopted in honor of the Tudor
Style.
Tudor Style. This name is used by some writers
on Gothic architecture, but they do not agree in the
application of it. It is variously employed to
designate the Perpendicular style throughout its continu-
ance—the latter period of this style—and the mixed
style which sprung up on the decline of Gothic archi-
teue, usually called Elizabethan. The term is not
very extensively used, and is most commonly under-
stood to mean late Perpendicular work, and Henry
VII's Chapel at Westminster is looked upon as the
most perfect specimen in this style. The Tudor Flower
is a flat flower, or leaf, placed upright on its stalk,
much used in Perpendicular work, especially late in the

Tudor Style.
style, in long suits as a crest or ornamental finishing on cornices, etc. The examples differ considerably in detail, but the general effect does not vary much.

Tueshime Elder, in Lamism, is the name for one of the seven sanctuaries which are placed upon the altar in front of the idol. It is a drawing, upon a gold backing, presenting an ambassador of the heavenly kingdom and also the god of the temple.

Tuet, Esprit Claude, a French ascetic author, was born about 1745 and died about 1787, and was the writer of a number of religious tracts and sermons, for which see Hoefer, Nouv. Biog. Générale, s.v.

Tufa, a porous stone (called travertine when compact) found in calcareous streams, and used, from its lightness, in vaultings, as at Bredon and Canterbury.

Tuff-taffeta, a kind of inferior silk used in church hangings.

Tuiscon, in German mythology, was an earth-born god, from whom all Germans are said to have sprung. He was highly esteemed by his son, man. The Druids sacrificed human beings to him. According to the accounts given by Cesar, these sacrifices were made not only in Gaul, but also about the whole of Gaul. Some hold him to be a historic person, others a personified idea.

Tukkiyim. See Peacock.

Tukudh Version. This version is of a very recent date; and the translation of the four gospels and the epistles of John into that dialect was undertaken by the British and Foreign Bible Society, at the request of the Church Missionary Society, and was made in the year 1872 by the Rev. E. McDonald, who had been laboring among the people with much success. As to the dialect itself, it is spoken by a tribe of Indians on the river Yucan, on the confines of the Arctic region. Mr. McDonald, who had been laboring there for the last sixteen years, has reduced the language to writing, and in his translating efforts has had the assistance of a native Christian. The syllabic characters which were adopted in the Cree version were first tried, but the unusually large number of syllables in the language obliged the translator to fall back upon the Roman characters. The following, taken from the report of the British and Foreign Bible Society for the year 1873, will be of interest to the student: 

"The Tukudh tribe, which is often known by the name of Loucheurz, from a peculiarity in the eyes of some of the natives, is small, not including more than about eight hundred, nearly the whole of whom are under Christian instruction. Their numbers, however, are now increasing, and it is probable that some neighboring tribes will be incorporated with them, and thus add considerably to the community. Like most of the North American Indian tribes, the Tukudh Indians have among themselves certain religious beliefs on which it is not impossible to build up the pure theology of the Bible. Their name Tukudh signifies 'naughty people.' When the geographical position of Mr. McDonald's station at Fort Macpherson is considered, it will not be wondered at that these people are living in primitive simplicity. The edition requested is to consist of five hundred copies, and some of the gospels it is proposed to bind separately. The expense of the work will be large and the readers few; but when a language has been reduced to written form, and Christian men capable of translating the Scriptures are available, the committee deem it a matter of clear duty to go forward in printing the Word of God, even though by separatively it may be benefited by their labors." According to the report for 1878, about 810 copies altogether have been circulated among these people. (B. P.)

Tulchans, or Tulchan Bishops. A tulchan was the effigy of a calf, or rather it was a stuffed calf-skin, set up before a cow when she was milked, under the belief that the animal thereby yielded her milk more freely. The custom has long been discontinued. Under the regent Morton, and after 1572, attempts were made to introduce bishops into the Presbyterian Church of Scotland. The men who consented to take the title had bound themselves, as the price of their elevation, to receive only a small part of the revenues, the rest going to Morton and his lordly colleagues. Such bishops were called tulchans by the people. The first tulchan was John Douglas, appointed to the see of St. Andrew's. Patrick Adamson, who afterwards himself became a tulchan, said in a sermon: "There be three kinds of bishops—my lord bishop, my lord's bishop, and the Lord's bishop. My lord bishop was in the papistry; my lord's bishop is now, when my lord gets the benefit, and the bishop serves for nothing but to make his title sure; and the Lord's bishop is the true minister of the gospel.

Tulisco, in Prussian mythology, were priests of a lower order, belonging to none of the three higher classes of Gravitas, Siggones, and Wurkaites. The care of the sick rested with them, whom they either prepared for death, or sought, with their scanty knowledge, to cure or to alleviate their sufferings. They resided among the populace in villages, and were therefore not esteemed very highly.

Tulla Intoon and Halitorkin. According to the Finnish creed, each man bore within him from his birth a divine spirit who was his inseparable companion for life. This spirit became more closely united to its subject in proportion as the latter tore himself away from earthly things to retire into the sanctuary of his native church, there to meditate upon the divine. As the church was also the spirit's temple, the priests had their temples of the soul, therefore, aspired to a transcendent beauty (tulla intoon), to a great spirit of existence of the soul (tulla halitorkin), in which he became like the spirit dwelling in him and entirely identified with it. He used artificial means, e.g. intoxicating drugs, in order to attain to this state of excitement.

—Lenormant, Chaldean Magic, p. 264.

Tulloch, James, a Scotch Congregational minister, was the first Dissenter who settled in Scotland. He was tutored by Rev. Mr. Ewing of Glasgow, and sent out under the auspices of the Society for Propagating the Gospel at Home. Mr. Tulloch was settled over the Congregational Church at Buxter in 1808, and did much in establishing new churches and propagating the Gospel. He died on the 26th January, 1862. See (Loud.) Cong. Year- book, 1864, p. 247.

Tully, George, an English divine, was educated at Queen's College, Oxford, and died rector of Gateside in 1697. He was a zealous writer against popery, and was suspended for a sermon he preached and published in 1686. "He was the first clergyman who suffered in the reign of James II in defence of our religion against papish superstition and idolatry." He is best known as the author of Discourse on the Government of the Thoughts (1693-94, 8vo). See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Hook, Eccles. Biog. s. v.

Tully, Thomas, a learned English divine, was born in the city of Carlisle July 22, 1620; he entered Queen's College, Oxford, in 1634, and obtained a fellowship. In 1642 he was created A.M., and became master of the grammar-school at Tetchbury, in Gloucestershire. He afterwards returned to his college, and became a noted tutor and preacher there. He died Jan. 14, 1676.

Tulu, or Tuluvu, is the ancient and proper dialect of the long narrow tract of land now called Canara, situated westward of Mysore, between the range of the Western Ghats and the ocean. Owing to the long subjection of Canara to the turmoors of the Moguls, the Canarese language is now chiefly spoken by the higher classes in the province, while the Tulu still continues the vernacular of the common people, especially in South Canara. In idiom and structure it closely resembles the Malayalam language, and it is written in the same char-
TUM

TUNKERS

ster. In 1834 a missionary station was established by the German Missionary Society at Mangalore, the capital of Canara. In 1844 a translation of the New Testament was made, which was published in 1852. See Bible. English Version.

Tum. Among the Egyptians the sun was considered in each phase a different god, having its peculiar name, attributes, and worship. Thus the sun during its nocturnal existence was Tum; when it shone in the meridian, it was Ra; when it produced and nourished life, it was venerated as Kheper. Since, according to the Egyptians, the night precedes the day, Tum was considered to have been born before Ra, and to have issued alone from the abyss of chaos.—Leunormant, Chaldæan Magic, p. 81 sq.

Tamanurong, in the mythology of the Marqueesas, was a goddess who descended from heaven and was immediately made queen by the people, who were charmed by her beauty. She married the then reigning sovereign, and gave birth to a son, who was able to speak immediately after his birth.

Tumblers, a name given to the Tunkers (q. v.) in ridicule of their peculiar motions while undergoing the rite of baptism by immersion.

Tundley, Ralph, an English Congregational minister, was born at Alton, Staffordshire, in 1793. He was converted in the course of a visit to the Druze, and was much influenced by the doctrines of the society. He was interested in Sunday-school work, and at the earnest solicitation of the Church at Alton he became their pastor and ministered to them until his death, Feb. 22, 1863. See (London) Cong. Year-book, 1864, p. 247.

Tunic, or Tunicle, a term applied to several articles of clerical dress. (1.) A dress worn by the subdeacon, made originally of linen, reaching to the feet, and then of inferior silk, and narrower than the dalmatic of the deacon, with shorter and tighter sleeves, and devoid of the stripes or embroidery of that vestment. For some centuries, however, the assimilation has grown so complete as to render the slightest difference between them almost imperceptible. Bishops wore both the tunic and dalmatic at pontifical mass. (2.) The parece tunica, or cotta, a linen habit reaching to the knees, used at all kinds of services by simple clergymen and others; it differed from the rochet, in being fuller. Amaliarius speaks of a blue tunicle of jacinth color, or subscalce, worn by the bishop (Rupertus says sub the chamasil) as emblematical of the seamless robe of Christ. (3.) A dress worn by monks. See COAT.

Tunicle-ball, a ball of crystal to which tassels were attached, hanging from the shoulders of mediæval dalmatics.

Tunicle-cape, a cloak for holding the tunic and dalmatic, and differing in shape from those crests which contained the cope and chasubles of a sacristy.

Tunis, Jewish Mission at. As early as the year 1833, the London Society for the Propagation of the Gospel among the Jews commenced missionary operations in Tunisia. The first missionary to that place was the late Rev. Dr. F. C. Ewald, who arrived there June 30. He found a Jewish population from 80,000 to 40,000, all living in their own quarter. There was also a large number of Roman Catholics, who had their own church and convent, a Greek community with church and priest, and about fifty Protestants without the means of grace. Mr. Ewald at once commenced divine services, which were attended by almost entire Protestant. The Jews being accessible in that place, opportunities were afforded to the missionary to preach unto them the word of God. The Bible in Hebrew was eagerly sought after and bought by them, and thus the work could be carried on. In 1855 Mr. Page, who succeeded Dr. Ewald, established a school there, which proved a great success. Owing, however, to the removal by cholera of Mr. Page from the scene of his labors, mis-

Tunisia, French Terek, to "zip"). A sect of German-American Baptists, called by them the Penn Yan. Their name is sometimes erroneously spelled Dunkers. The sect is said to have been founded by Alexander Mack at Schwarzenau, Westphalia, in 1708. Driven from Germany, some of them emigrated to America in 1719, and settled in Pennsylvania. They formed a settlement of their own near Philadelphia, and the association is known as the sect of Conrad Pocysel. Here they built a town in the form of a triangle, the houses being three stories in height, and each of them a kind of monastery. They dressed much in the style of monks and nuns, men and women lived in different houses, and they used a vegetable diet, practicing considerable mortification. Although marriage was not forbidden, when couples married they were required to remove from Ephrata. They subsequently settled in Ohio, Indiana, Maryland, Virginia, and several other states. Their doctrines are similar to those of the Mennonites (q. v.), and in dress and manners resemble the Friends. They use the kiss of charity, feet-washing, laying-on of hands, anointing the sick with oil: are opposed to war, and will not engage in lawsuits. They hold love-feasts, and an annual meeting about Whitsonday, which is attended by their bishops, teachers, and representatives chosen by the association. The universal redemption, though not an article of faith, is commonly held by them. Some of them are strict sabbatarians, observing Saturday as their day of rest. They oppose statistics, which they believe to be a sin of pride, and, therefore, trustworthy statements as to their numbers cannot be given; they are supposed for divine service, and number about 100,000. By reason of their quiet and peaceable lives they have retained a name which was given to them at first, of "The Harmless People."

For the denomination there are now published four weekly papers—the Primitive Christian, the Gospel Preacher, the Brethren at Work, and the Christian Christian. This last is published at Berlin, Pa., by the liberals among the Brethren or Tunkers; and its position is defined in the Independent of May 8, 1879) as follows:

"We are in full accord with the Church on all Gospel doctrines. Our differences with it do not consist in being worthy of comparison with a divine injunction. In fact, we do not regard a custom one hundred or five hundred years old, whether it is original or not, as having any claims upon the attention of Bible Christians. We believe in the "eternal gospel," as well as in the "good news to all nations.""
in a very friendly and respectful manner, until he died, Nov. 18, 1559. Tunstall's principal writings are, in Latin: "Liberis Ecclesiae Aurea Americae," 1554; "De Arte Suppartandi" (Lond. 1592, 4to); "Sermones de Royal Superiority" (Lond. 1559, 4to); "De Suntitutio; et Sanguinis Domini Jesu Christi in Excusari (Lutet. 1554, 4to); "Compendium Libri Ecclesiarum Apostolicarum" (Paris, 1554, 8vo); "Contro Impios Blasphematores Dei Propagationes" (Antwerp, 1555, 4to); "Godly and Devout Prayers in English and Latin, etc." (1558, 8vo). See Chalmers, Biog. Dict. s. v.; Allibone, "Dict. of Brit. and Amer. Authors, s. v.

Tunstall, James, D.D., an English divine, was born about 1710, and educated at St. John's College, Cambridge, of which he afterwards became fellow and tutor. In 1739 he obtained the rectory of Sturmer, Essex, and two years later was elected public orator of the university, and was appointed chaplain to Potter, archbishop of Canterbury. In 1744 he was created D.D. at Cambridge; was afterwards collated to the rectory of Great Cornard, and presented to the vicarage of Thetford, both of which he resigned in 1757 for the valuable vicarage of Rochdale, Lancashire, where he remained until his death, March 28, 1772. His writings are, "Epistola ad Virum Eruditem Congrega Middlelon, etc." (Camb. 1741, 8vo); "Observations on the Present Collection of the House of Commons, and the House of Lords, to the Rise of the House of Commons" (May 29, 1746); "Vindication of the Power of the State to Prohibit Clannish Marriages, etc." (1755); "Marriage in Society Stated, etc." (1755); "Lectures on Natural and Revealed Religion" (published after his death, in 4to). See Chalmers, Biog. Dict. s. v.; Encyclopedia Cyclop. s. v.

Tuonela was, according to the Finnish belief, the river of the country of the dead.—Lenormant, Châl. Magic, p. 258.

Tuoni, was the father of Kivutar, or Kipu-girl, the Finnish goddess of diseases.—Lenormant, Châl. Magic, p. 259.

Tu quoque, in the mythology of the Hottentots, is the evil spirit causing harm and misery, for whom numerous sacrifices are offered for the purpose of relieving the Hottentots, whom he is said to persecute.

TuRa, or TuRRA, COSIMO, (Cosimo da Ferrara), an Italian painter, was born at Ferrara in 1406. He was a disciple of Galasso Galassi, and was court-painter in the time of the duke Borso d'Este. He died in 1469. Turra worked both in oil and fresco, and painted in the dry, Gothic style then prevailing. Among his paintings are, "Annunciation and Nativity," in the cathedral; "Arrest of St. Eustace," Monastery of San Guglielmo; "Virgin and Saints," Church of San Giovanni; "Christ Praying in the Garden," at the Cappuccini; "Madonna with Saints," Berlin Museum. See Spooner, Biog. Hist. of Fine Arts, s. v.

Turban. Though it is presumable that in a climate like that of Palestine the inhabitants did not expose themselves to the cold of winter or the heat of summer without some covering for the head, there is no certain evidence that any such was in common use. The Hebrews have several words by which articles of head-dress are designated, but they all apparently belong to coverings which were either official or merely ornamental, with the exception of those used by the military.

In the Pentateuch two kinds of head-coverings are mentioned as forming part of the priest's dress, the ἄραιον of the high-priest, and the ἄραιον of the common priests; the former of which was probably a sort of tiara, while the latter may have been a turban, but was more likely a bonnet with a high cap of a flower-like shape, such as are found among Orientals in the present day (Bihlr, Symbolik des mos. Cult. ii, 60). As these head-
coverings (A. V. "bonnets") were expressly designed for "glory and for beauty" (Exod. xxviii, 40), they evidently give us no idea of what was commonly worn upon the head by the people. In the ceremony prescribed for the drinking of the waters of jealousy, the priest is directed to loose ("cased") the woman's head,—i. e. to let her hair fall down loosely (Num. vi, 18); and in the law concerning the leper it is prescribed that his head shall be loosed ("cased"); phraseology which seems to indicate that it was customary in the Mosaic times to bind the head with a band or fillet, such as we see represented on the Egyptian and Assyrian monuments. On the other hand, from the stress that is laid in the law concerning the Nazarite on his suffering his locks to grow, and his hair thus abounded when he was wearing the crown of God on him (Lev. xiii, 45), it seems fair to infer that the cropping of the hair, and perhaps also the shaving of the head and the wearing of some covering (it may be of artificial hair, as among the Egyptians), was common among the people.

In the other books the terms which occur designating head-dress, besides those which are regal, such as diadem and tiara [see Crowns], and those which are military [see Armor], are the following:

1. £gev, tunicus. This term occurs three times in the Old Test. (Job xxix, 14; Isa. xiii, 8; Zech. iii, 5). In all these cases the usage of the word shows that it refers, not to an ordinary article of dress, but to one which was ornamental and for display. It was probably a turban, the word being derived from £gev, to roll round or wind. Schleusner (De Vest. Mueller. Heh. p. 364) endeavors to prove from the Arabic that this word means a narrow strip wound round the head; but his instances only prove that the Arabic ninef and ninefa denote a small band, or the hem of a garment. In Isa. iii, 22 the fem. temsphatka is used of a female head-dress worn for ornament.

2. £gev, prs. This word is used of the head-dress of distinguished persons, both male and female (Isa. iii, 20; ixi, 8, 10; Ezek. xxiv, 17, 23; xlv, 18). In Exod. xxxix, 28 it is used of the priest's head-dress, as also in Ezek. xlv, 18. In all the other instances it indicates an article of holiday costume. Saalschütz suggests that the §er was probably the hat or bonnet, proper to this order, so called from the £gev the ornamental head-band wrapped round it.

3. `seve, tepharith, frond. £gev, to circle, a circle or diadem (Isa. xxviii, 5); or it may have been a piece of fine muslin wound round the turban for ornament, such as the Orientals still use.

4. `gry, argh. (Prov. i, 9; iv, 9). Some regard this as a species of fillet by which the head was bound; but it probably means rather a girdle or wreath of flowers.

The examination of these terms has failed to convey to us any information respecting the ordinary every-day costume for the head of the Hebrew people. Probably they were wont simply to throw some part of their dress over their heads when they had occasion to expose themselves to the weather, or, in more remote times, to clad their heads, as do the Arabs of the present day, reserving such articles as those above named for holiday or festive occasions (Jahn, Biblische Archäologie, i, ii, p. 116; Saalschütz, Arch. der Hebr. ii, 22).

See Head-Dress.

Turchi, Alessandro, called Veronese, also L'Orretto, an Italian painter, was born at Verona (according to Fonzio) about 1508. When a lad his master was the Venetian, Felice Riccio, who took him into his study, and carefully instructed him. Leaving Riccio, he went to Venice, where he studied with Carlo Cagnali, and then proceeded to Rome. Here he made his home until his death, in 1648. Turchi excelled in the choice and distribution of his colors, and in his handling which he introduced a reddish tint which much enlivens his pictures. At Rome he painted some altar-pieces and other pictures for the churches, the most esteemed of which are in the Church of La Concezione. Among his other principal works at Rome are, The Flight into Egypt, in San Romualdo; The Holy Family, in San Lorenzo; and St. Carlo Borromeo, in San Carlo ai Catinari. Turchi was also to be met with in the Piazza del Popolo, of the Forty Martyrs, in San Stefano; and his Pietà at La Misericordia. See Spooner, Bibl. Hist. of Fine Arts, s. v.

Turlck, Anthony, a Methodist Episcopal minister, was a native of New York State, and of Dutch descent. He was received into the travelling connexion in 1739; "a holy and devout man, indefatigable and successful in his labours, exerting great afflictions, temptations, and trials," but with "increasing sweetness in communion with God" towards his end, and victory in death. He died March 13, 1803. See Minutes of Annual Conferences, i, 109.

Turibio (Turrih), St., is said to have been born Nov. 16, 1558, of good family. Every Christian perfection distinguished him in early youth. He was educated at Valladolid and Salamanca, was made preside of Granada by Philip II, and subsequently became archbishop of Lima, in South America, though still a layman. He was consecrated in 1581, and proceeded to initiate an excellent administration, during which he founded several secondary institutions, and an endowed diocesan and provincial synod, travelled in the execution of his duties over the entire country, and displayed great devotion during a contagious pestilence. He is credited with the miraculous cure of several persons who were sick, and with at least one successful raising of the dead to life. He died at Santa, Nov. 23, 1606. It is said that his body was brought, undisputed, to Lima after a whole year had passed since his decease, and that it continued to work miracles. He was accordingly beatified in 1679 by Innocent XI, and canonized by Benedict XIII in 1726. See Weitzer u. Weite, Kirchen-Kalender, 1728, p. 147; Herweg, Real-Encyclop. s. v.

Turin, Consul of (Conciliat Turinense), was held at Turin, Italy, in 398, or, according to others, in 401, to settle certain differences which had arisen among the Gallican prelates. The bishops of the province of Aix,Proculeus of Marseilles, Simplicius of Vienne, and the bishop of Arles were present. As Turin was at that time under the metropolitan of Milan, it is conjectured that Simplicius was the Metropolitans convocated:

1. The first question settled in the council was that of Proculeus of Marseilles, who (although that see was not in the province) desired to be recognised as metropolitan of the province of Narboine. The council, for the sake of peace, granted to Proculeus personally, but not to his see, the right of primacy which he claimed, declaring, however, that after his death the metropolitan should be a bishop of the province itself.

2. The council took into consideration the differences between the archbishops of Arles and Vienne, both of which were dependent on the primacy of Vienne. Gaul. The decision was that he of the two who could prove his city to be the metropolis of the province as to civil matters should be considered as the lawful metropolitan, and in the meantime they were to be excommunicated to live in peace.

3. The excuses of the bishops Octavius, Ursion, Ren- migius, and Triferus were considered. The council was accused of having conferred orders irregularly and uncanonically. The council declared that, in this case, indulgence should be granted to the four bishops; but that, in future, any bishops so violating the ancient decrees of the Church should be deprived of the right of ordaining, and that all of them who should be so ordained should be deposed. This canon was confirmed in the Council of Riez, A.D. 439.

Several other regulations relating to the affairs of the Church were also made, and eight canons in all published. See Mansi, Concili, ii, 1156.—Landon, Manual of Councils, s. v.
Turkey is the largest Mohammedan empire of the world, containing extensive possessions in Eastern Europe, Western Asia, and Northern Africa. Including the provinces in Europe and Africa which are virtually independent, and only pay an annual tribute to the Turkish government, the Turkish empire, in 1880, had an area of 2,302,000 square miles, and 47,000,000 inhabitants. In consequence of the treaty of Berlin in 1878, Turkey had to recognize the entire independence of Roumania and Servia, and to consent to the occupation of Bosnia and Herzegovina by the government of Austria. Moreover, Bulgaria and Eastern Roumelia have become virtually independent of Turkish rule, leaving to the Turkish government only a small territory in Europe which is fully under its control. In Africa, Egypt and Tunis are likewise independent in point of administration. Deducing the dependencies, the Turkish government at present rules over a territory of 1,043,000 square miles, with a population of 23,500,000. In June, 1890, the Supplementary Conference at Berlin declared that in order to carry out the provisions of the treaty of Berlin concerning the rectification of the frontier between Turkey and Greece, Turkey ought to cede to Greece a territory containing about 8292 square miles and 400,000 inhabitants.

[Note by the Editor.—For the purpose of enabling our readers to understand more fully the present complicated boundaries of Turkey, we insert a map based upon the one recently issued by Stanford, of Charing Cross, London. It will be perceived that, in consequence of the late Russo-Turkish war, Turkey has lost far more than half her European possessions, which are to be bounded henceforth by the Balkan Mountains instead of the River Save and the eastern Carpathian chain. Roumania, Bulgaria, Servia, Bosnia, and Montenegro are wholly severed from her. Bulgaria has lost a slice of her territory in the north, given to Servia, and another on the north-east, given to Roumania. Montenegro has gained a slice on the north-west from Bosnia, and another on the south-east from Turkey. Bosnia, including the part of Croatia formerly in Turkey, together with Herzegovina, has been occupied by Austria, and is not likely to be restored to Turkey. Greece gains a part of Albania and Thrace; and Roumania that part of Roumania (bounded by the Fruth and the Danube) adjoining Servia (which she already held). In Asia Russia also acquires a district of Armenia adjoining Berlin. Besides, there is created a quasi-independent district of Eastern Roumelia, within the above narrowed limits of Turkey. Turkey in Europe virtually now consists merely of a part of Roumellia and a part of Albania. The interior changes in territory and population made by the Berlin treaty are stated as follows in the London Almanac. Estimates of other statistics vary considerably from these figures.]

Roumania, in exchange for the territory ceded, is called upon to surrender 3570 square miles, with 140,000 inhabi-

Map of Turkey in Europe, showing the Territorial Changes made by the Treaty of Berlin.
Turkey

The former volumes of this Cyclopaedia have special articles on Bulgaria, Egypt, Roumania, Servia; and on some of the Eastern Churches which are wholly or chiefly Turkish. Jackobsen, Baross, Jalilow, and Maronitis. In the present article, after giving such preliminary information of a general character as the intense interest at present prevailing on the Oriental question seems to demand, we treat, more particularly, of the religions of Turkey proper, so far as they have not yet been discussed in the special articles which have just been referred to.

1. Geographical and Ethnological Features. — The geographical position of the Turkish empire is peculiar, and would, under a strong government, be most advantageous. It connects Europe with Asia, Asia with Africa, and the interior of Asia with the Christian world. It has an extensive seacoast, which is indented by numerous gulfs and bays, and embraces many excellent harbors. Some parts of this coast were in former times the seat of a very flourishing commerce, which would undoubtedly be revived under favorable circumstances. Almost the entire territory, which is subject to direct Turkish rule is noted for its fertility; but Turkish misrule has not only arrested, but diminished, its productiveness. By far the greater portion of the Turkish possessions is situated in Asia. The European possessions have always been much smaller, but as they contained the capital and seat of government, they have hitherto been of much greater political importance. This importance has, however, of late been greatly reduced by the territorial losses which Turkey has sustained by the last Eastern war and the treaty of Berlin. The African part of the Turkish empire consists almost wholly of tributary states; and the farther the territory of one of these states, Egypt, is extended, the smaller becomes the hold the Turkish government has on it. Although ruling over portions of Europe, Asia, and Africa, Turkey is really an Asiatic power. While the Turks hold the rule, the empire contains a majority of the total population only in the Asiatic possessions. Even Asiatic Turkey can hardly be said to be an Ottoman land, for the bulk of the people are descendants of the old Seljuk Turks who have been subjected by the Ottoman Turks. In the African dependencies the Turks are hardly represented at all, and in Europe they are almost everywhere in a minority. According to an elaborate article on the ethnographical relations of Turkey in Petermann's Geographische Mittheilungen, 1876, No. 7, the Turks are to be found as a compact population only in three regions, the capital and seat of government, Thrace, and Varno. These three sanjaks formed part of the vilayet of the Danube. They are less numerous in the Rhodope Mountains. On the shores of the Egean Sea and the Sea of Marmora, and on the south-east shore of the Black Sea, they are greatly outnumbered by the Greeks, especially in the Dardanelles. If it is not a remarkable fact that all the sanjaks which contain the most compact Turkish population are now subject to the semi-independent principalities of Christian Bulgaria and to the Christian governor of the autonomous province of Eastern Roumelia. The aggregate number of the Ottomans in the sanjaks of Eastern Roumelia, Servia, Romania, and Heresegovina, is estimated at about 2,000,000. Exclusive of these provinces, over which the authority of the sultan is not likely to be ever restored, the number of Osmanlis will barely reach 1,000,000 in a total population of about 5,000,000. In Asia the Turkish race is supposed to number more than 17,000,000, though some of these inhabitants are of other races; but this number embraces many old tribes who have been totally absorbed and merged in the Turks. The Turcomans, who live chiefly in Northern Mesopotamia, and number about 100,000, belong to the same race as the Turks. Up to the time of the late Eastern war, the bulk of the population of the European dominions of Turkey was made up of five non-Turkish tribes—Roumanians, Servians, Bulgarians, Greeks, and Albans. The Roumanians, who chiefly inhabit the principality of Roumania, where they number about 5,000,000, have long been semi-independent, and are at present a free state, dependent on the treaty of Berlin. Only about 200,000 remain subject to Turkish rule. Outside of Roumania and Turkey, Austria has a Roumanian population exceeding three millions. West and south of the Roumanians we find two branches of the Slavic race, the Servians and the Bulgarians. The Servians embrace the inhabitants of the principalities of Servia and Montenegro, and of Bosnia and Heresegovina. Both Montenegro (q. v.) and Servia (q. v.) are now independent states; Bosnia and Heresegovina have been placed under Austrian administration, and are likely to become soon a part of the Austrian empire, and to form a portion of the aristoocracy, after the conquest of the country by the Turks, became Mohammedans, in order to save their property and their privileges, but they continue to speak the Servian language. Outside of the present and former dominions of the sultan, Austria has a Servian population of about 190,000, called Croatians, Slavonians, Dalmatians, and Slovenians. The large majority of the Servians belong to the Greek Orthodox Church; but in Austria and in Bosnia there is also a large Roman Catholic element. According to a recent work by Klaic on Bosnia (Agram, 1876), written in the Croatian language, the population of Bosnia is divided, as regards the religious denominations, into—Orthodox Greek Church, 646,678, or 48.4 per cent.; Mohammedans, 480,596, or 35.9 per cent.; Roman Catholics, 207,119, or 15.5 per cent.; and Jews, 3000, or .2 per cent.; but in regard to race, 1,231,598 of this population are Slaves, only 3900 Osmanli Turks, 50,000 Albanians, and 11,000 gypsies. The Servians of all the different denominations in Austria and the former Turkish dominions are now only awakening to the full significance of the fact that their common language makes them joint members of one nationality, and a strong movement is already at work to unite some future time all these members into one state as has been set in. Although the Mohammedan Bosnians are strongly opposed to this union movement, as well as to the annexation of their province to Austria, the rule of the Osmanli Turks over the Servian nationality may be said to be at an end.

The second Slavic race of European Turkey is the Bulgarians. They occupy the country south of the Danube, their southern ethnic boundary being a line passing through the towns of Nissa, Prisrend, Ochrida, Kastoria, Niagara, Salonica, Adriapole, and Burgas, on the Eastern sea, and from Varna, on the Black Sea, estimated at from three to four millions. After four centuries and a half of oppression, they were considered at the beginning of the 19th century the most wretched people of Europe. Then a marvellous awakening began. See Bulgaria. In spite of all oppression, they laid the found of a nation and, in 1878, laid the foundation of the Independent Kingdom of Servia, and re-established the independence of their national church. The treaty of San Stefano, March 3, 1878, between Russia and Turkey, provided for the establishment of Bulgaria as a tributary Ottoman principality and a national militia. The principality thus constituted was to extend over the greater part of Eastern Roumelia, Servia, Bosnia, and Heresegovina, and from the Danube nearly to the Egean Sea, taking in about fifty miles of the Egean coast. It would have included all the pre-
dominantly Bulgarian districts, both north and south of the Balkans, containing an aggregate of 78,400 square miles and an estimated population of between five and five and a half millions. The Bulgarian despot would have been the dominant race, a considerable number of Turks, Servians, and Greeks would have been merged in the Bulgarian majority. The treaty of Berlin of July 15, 1878, greatly modified this plan. The tributary principality of Bulgaria, as constituted by the treaty of Berlin, embraced 13,660 square miles and about 1,860,000 inhabitants. The Bulgarian districts south of the Balkans were constituted as the autonomous province of Eastern Roumelia, the governor of which must be a Christian, but is appointed by the Turkish government with the consent of the treaty powers. Eastern Roumelia has a total area of about 500,000 square miles and 850,000 inhabitants, of whom about 600,000 are Bulgarians, 150,000 Greeks, and 70,000 Turks. The aggregate population of Bulgaria and Eastern Roumelia reaches about 3,000,000, of whom fully 2,500,000 are Bulgarians, and the remainder mostly Turks and Greeks. The Mohammedan population is estimated at from 800,000 to 950,000, but only two thirds of them are of Bulgarian descent. The Bulgarians, generally, were greatly dissatisfied with the provisions of the treaty of Berlin, and a strong movement began at once for a reunion of the Bulgarian and Roumelian districts, which can hardly fail to beere long successful, and result in the emancipation of the entire Bulgarian population from Turkish rule.

The Greeks, or Hellenes, have a numerical preponderance in the southern part of European Turkey, especially in Thessaly, Epirus, Southern Macedonia, and the islands, the most important of which is Crete. They are the most civilized among the Christian races of Turkey. Their number is estimated at about 1,000,000 in European and 1,000,000 in Asiatic Turkey. The people of the predominantly Greek districts expressed a desire to reunite these districts to the independent kingdom of Greece, and the government of that kingdom was established in January, 1879, an attempt to occupy these districts. The attempt had, however, to be abandoned at the request of the great powers. The Congress of Berlin expressed a desire that the frontier between Greece and Turkey should be rectified to the advantage of the former power, and offered the mediation of the great powers in case Turkey and Greece should be unable to agree. As this agreement was not reached, the supplementary congress held in Berlin in June, 1880, designated the new frontier between the two states. In Asia, they had a large territory comprising a great part of the coast of Asia Minor, from which the Turks are steadily retiring before them, and it is believed by many that a vigorous Greek kingdom in Europe would soon find a legitimate field of expansion along the coast of Asia no less than that of Europe.

The Albanians occupy the country south of the Servians and Bulgarians, and north of the Greeks. Their number is estimated at from 1,200,000 to 2,000,000. More than one half of them have embraced Islam, though it is said that many of the Mohammedan Albanians remain secretly Christians. They are divided into three main tribes, one of whom is the largest, with about 150,000, and the other two are of more moderate size. The Roman Catholics. In the frontier districts the Albanians are greatly mixed with Servians in the north and with Greeks in the south. They opposed with great vigor thecession to Montenegro by the Turkish government of the territories inhabited by them, and declared an intention to oppose no less vigorously thecession of some of their southern districts to Greece. The Albanians are the only one of the five non-Turk nationalities of European Turkey which shows some kind of attachment to the Ottoman government. This must partly explain the predilection of the Albanians for Mohammedanism, and partly by their determination not to be absorbed by Servians and Greeks. The increasing consolidation of Servians, Bulgarians, and Greeks will, however, cut them off from Constantinople, and make it impossible for them to remain a Turkish province.

A curious fact in the relation of the different races that people European Turkey is the irregular manner in which they are distinguished and mingled. "No locality," says Baker, in his Turkey, "can be found where the population is exclusively of the same nationality; but a rival race crops up here and there, and justifies its presence by its hardihood, and by the fact that the majority of the population are Bulgarians; but among them in considerable numbers are Turks, Greeks, Circassians, and gypsies. In another quarter the majority are Albanians, but they again have to bear the friction of Bulgarians, Wallachians, Greeks, and Turks; and so on all over the country." Each of these nations has its own language, religion, and customs; and it therefore follows that the difficulty of governing the mass lies in a direct ratio to the number of races represented in it." This irregular distribution of races has, however, been considerably affected by the close of the Ottoman era, when, especially, large numbers of Turks and Bulgarians left their endangered homes, and emigrated to districts predominantly inhabited by coreligionists. The Austrian consul Sax (in Österreichische Monatschrift für den Orients, 1878) estimates the number of those who from the spring of 1877 to the close of 1878 changed their residence at more than one million.

II. Origin and Political History.—The Turks are first heard of in history when they emerged from the regions of Central Asia, and emigrated, early in the Christian era, to the neighborhood of the Aral and Caspian seas. In the 6th century they formed an alliance with the Roman emperor Justin II; in the 7th they began to learn the Mohammedan religion at the hands of the Saracens. After their conversion to Mohammedanism they rapidly rose in power and influence. One branch, the Seljuk Turks, which, after the death of their founder, Altan-Turk, in 1071, subdivided into two others, the Cilician and the Witans, was the conqueror of the whole of Asia Minor, and the conqueror of the Ottoman Empire.

Under Malek Shah, the grandson of Seljuk, the dynasty of the Seljukian Turks was in the 11th century the greatest power in Asia. They gradually pressed their conquering power to the west, and this time a more special and crying persecution of the Christians began. After Malek’s death, the empire was divided into smaller states, which became rivals, and were finally extinguished in the 13th century by the irruption of the Moguls under Genghis Khan. Then the history of the Ottoman Turks and the Seljuk Turks is one of constant warfare, of which the union of them is made at the beginning of the 18th century, when they emigrated, under the name of Oghuz Turks, from the main body in Khurasan, Persia, to the mountains in Armenia, whence a part removed and settled near Angora, still acknowledging the suzerainty of the Seljukian sultan of Iconium. Partly at the expense of the Greeks, partly at that of other Turkish emirs or princes, the leaders of this band, Ergörhurul and his son Othman, or Osman, gradually grew in power. Othman became the most powerful prince in Western Asia, and rose to unassailable dominion, his followers taking the name by which this branch of the Turks has ever since been ignominiously known, that of Ottoman, or Osmanli. Shortly before the death of Othman, in 1326, his armies took Broua, which became the Asiatic capital of the Ottomans. With Othman’s son, Orkhan, the Ottoman empire begins. For a time the empire was divided into two branches, the Seljuk sultan, though he continued to bear the inferior title of emir. During his reign Gallipoli, in the Thracian Chersonesos, the first acquisition of the Turks in Europe, was conquered, in 1357, and all of Western Asia occupied. He imposed upon the conquered Christian nations or tribes the trinity of the Ottoman, the Mohammedan, and the Janizaries, who for three centuries constituted the strength of the Ottoman armies.

TURKEY

In the reign of Murad I, the successor of Orkhan, Adrianople was taken, which became the European capital of the Ottomans till they captured Constantinople. When the Turks overran Europe, a vast empire was almost limited to a quadrangle extending from Constantinople to Adrianople, and from the Black Sea to the Archipelago, to a small part of the coast near the Peloponnese, and the larger portion of the Peloponnese. The bulk of what subsequently became European Turkey consisted of the empire of Servia, extending from the Danube to the Peloponnese, and bounded on the west by Bosnia and the Adriatic Sea; and of the kingdom of Bulgaria, extending from the Danube to Adrianople, bounded on the east by the Black Sea. This frontier between the Bulgarians and the Turks was constantly changing. When the Turks began to get a foothold, Widdin and Sophia were the nearest Bulgarian towns to the frontier. At this time the power of Servia began to go down after the death of Stephen Dushan, its greatest ruler, and Bulgaria began to split up into three separate kingdoms. Thus both were unable to resist the advancing Turks. In 1366 the Bulgarian city of Philippopolis was taken. About 1371 the chief of the three Bulgarian kingdoms, that of Tarnovo, became tributary. For a while a Slavic confederation, under the Bosnian king Stephen, won some successes; but in the battle of Kosovo, in 1389, the federated Bosnians, Servians, Bulgarians, and Wallachians were utterly defeated. Two or three years later, Servia and Wallachia became tributary, and the greater part of Bulgaria was conquered. Murat's son, Bajazet I, was the first to exchange the humbler title of emir for that of sultan, and also the first who attacked Constantinople. The progress of the Turks was arrested by the stunning defeat which they suffered in 1402 at Angora, at the hand of Timur, the famous Tamerlane; but they recovered their power under Bajazet's grandson, Murad II (1421–51), who conquered the Peloponnese, Corinth, Patras, Nauplia, and other places, which were held by the powerful and well-armed fleet, the Greek and Turkish, which was the backbone of the Greek navy. In 1453 the Ottoman Turks were defeated by the fleet of the Greek emperor John Cantacuzenus. In 1457, the Turks occupied the town of Crete. In 1461, the Christian empire of Trebizond, in Asia, in 1466, Caraman, in 1479, the Peloponnese, which at that time belonged to the Venetians. In 1480, Otranto, in Italy, was captured, and the design was openly avowed to conquer all of Western Europe and to exterminate Christianity. But Mohammed's death, in 1461, put an end to these schemes; for the Christian powers, at first, were not able to make any headway. The advance of the Ottoman empire was ever made west of the Adriatic. The conquests of Mohammed gave to the Turkish empire about the same extent it had before the battle of the East ern war. In the whole of the Balkan peninsula only the small mountain district of Montenegro has kept its independence to our own times. Selim the Inflexible (1512–19) warred against Mohammedan enemies, and annexed Syria and Egypt to his dominions. From the last of a line of nominal caliphs Selim obtained a cession of his rights, and ever since the Ottoman sultans have been acknowledged as chiefs of their religion by all Mussulmans of the Sunnite sect. During the reign of Suleiman II (1519–66) the empire attained the greatest extent it has ever had. The larger portion of Hungary was annexed; a Turkish pasha ruled at Buda; and the princes of Transylvania, Moldavia, and Wallachia, and the Habsburgs of Bohemia, were taken from the Knights of St. John, and a large tract of land in Asia from the Persians. With the death of Suleiman the decline of Turkish power began. The reign of Selim II, the Drunkard (1666–74), was marked by the first great reverse of the Ottoman arms—the overrunning of most of Greece by the Austrians, and the capture of Athens. The Ottoman Turks were defeated by the Venetians at the battle of Lepanto, in 1571. No last ing conquests of importance were made from this time, except the islands of Cyprus and Crete. The frontier on the north towards Hungary, and in later times towards Russia, went steadily back. The succession of great rulers was stopped. The powers of the sultan became less and less. In the reign of the famous Selim the Superb, a sultan was, for the first time, murdered. In the latter half of the 17th century the Turks began to lose their hold on Hungary. The battle of St. Gotthard, in 1664, was the first great overthrow of the Turks by land. At the end of the 17th century the Turks had been at war with all their Christian neighbors, and they had lost territory at all points except one. In a war against Poland they had gained Podolia; they had lost, besides Hungary, the Peloponnese, and Azof. All of these territories, inclusive of Podolia, were given up by the treaties of Turin, 1699, and of Karlowitz, in 1699, marks a point in the decline of the Ottoman empire, and the Turks were for the first time compelled to treat with the Christian powers of Europe on equal terms. The wars against Austria, which, with breaks from time to time, had gone on since the battle of Mohacz, 1526, by which the Turks established their rule over Hungary, were ended by the peace of Sistova in 1791. The result was that Hungary was freed from the Turk, but that Servia and Bosnia were left in his clutches. The frontier established by that peace has remained almost unchanged. The most dangerous of all the foreign enemies of the Turks proved to be Austria, which, between Russia and the Turks began in the middle of the 17th century, and the two countries have ever since appeared as irreconcilable hereditary foes whose inerminable conflict could only be ended by the destruction of the one or the other. The wars between Russia and Turkey put on a very distinctive character when Peter the Great, in 1696, took Azof, the key of the Black Sea. From the time that Mohammed the Conqueror took the Genoese possessions in the Crimea, the Black Sea had been wholly under the power of the Turks. When Azof fell into the hands of the Russians, it remained for a great time the point of content for Ottoman power and countries. A new stage in the history of these wars is marked by the famous treaty of Kainarji of 1774, which ended the first war of Catherine II against the Turks. This treaty for the first time brought the Ottoman power into some measure of dependence. It gave Russia a firm foothold on the Black Sea, and the important right to remonstrate in behalf of Wallachia and Moldavia, in case of any breach of their privileges by the Turks.

The most prominent feature in the Turkish history of the 19th century is the successful revolt of the subject Chinese against their master. This war of independence began in Servia in the first years of the new century. It was at first a rising against local tyrants who defied the authority of the sultan, but it soon became a war of independence. In 1826 the independence of the country was recognised by Turkey, which was only to receive an annual tribute, and for some time retained the right of keeping garrisons in certain fortresses. The Greek war of independence began in 1821. Finding himself unable to subdue both Greece and Servia, the sultan had to apply for help to the Russians, who had been on friendly terms with the Turks. When these terms were broken, the sultan was forced to make war on Russia. The Turks were defeated at the battle of Navarino. In 1827, the battle of Navarino, the Turkish and Egyptian fleet, and compelled the sultan to sign the treaty of London. The Ottoman Empire (1899), Turkey had not only to acknowledge the independence of Greece, but the almost complete independence of Moldavia and Wallachia, whose hospodars thereafter held office for lifetime, and to cede several fortresses on the coast of the Black Sea to the Ottoman Empire. In 1827, the Turks were in introducing important reforms, and in 1828 exterminated the Janissaries; but while his reforms did little good to the Christians, they set his Mohammedan subjects
against him. There were Mohammedan revolts in Albania and Bosnia, which were put down in 1831 and 1832; but more important was the rebellion of Mehmet Ali of Egypt, who conquered Syria and other Asiatic possessions of the sultan, and seemed to threaten the very existence of the empire, when (1840) four of the great Christian powers of Europe concluded the treaty of Adrianople. The Sultan Mehmet had declared war on his Asiatic conquests. In the Crimean war (1853–55), Turkey would probably have been crushed by Russia but for the interference of England, France, and Sardinia in its behalf. By the treaty of peace in 1856, the powers which signed it—France, Austria, Great Britain, Prussia, and Russia—declared the Sultan Suleiman the Magnificent and the Porte was admitted to partake in the advantages of public law and the European concert. This concession was made to the Porte in recognition of the khati-khuluyum (Feb. 18, 1856), a proclamation which promised to the Christians equal civil rights, but which the Porte found itself no more able to carry out than a preceding reformatory edict, the khati-sherif of Gulhane of 1853. The approaching collapse of Turkey became more and more apparent. Terrible massacres of Christians in Damascus and Mount Lebanon led, in 1860, to a French intervention. In 1861 Moldavia and Wallachia united themselves, in spite of the treaty of Paris and of the protest of the Porte, into one state, called Roumania. A powerful impulse was given to the aspiration of the Christians for freedom by the complete victory of the nationality principle in Italy and Germany. As the Italians and Germans had re-established an Italian kingdom and a German empire, the Turks and the Greeks hoped that the Turks would express a wish for a union with Greece, the Serbians began to dream of the re-establishment of a large Serbian empire, the Bulgarians of a Bulgarian kingdom, the Roumanians of severing the last tie of connection with Turkey. The first movement in this direction was the declaration of independence in Crete, which was suppressed in 1869. The powers which had signed the treaty of Paris held a special conference and recognised the demands of the Porte as just. In 1867 the demand of Servia that the Turkish garrisons be withdrawn from all the Servian fortresses was granted. In 1872 the sultan conceded to the khedive of Egypt two important attributes of sovereignty, the direct hereditary succession and the authorization to make loans. On July 6, 1875, an insurrection broke out in Herzegovina, which gradually kindled the great Eastern war. A series of joint steps were taken by the great powers of Europe to redress the wrongs of Turkey. They feared the reform of Europe threatened by the Christian insurgents. The most important were, the note of count Andrassy of Dec. 30, 1875; the Berlin Memorandum of May 14, 1876; the Constantinople Conference from December, 1876, to January, 1877; and the London Protocol of March 21, 1877. On April 24 Russia declared war, and at the beginning of 1878 Turkey was utterly crushed. In the peace of San Stefano of March 3, 1878, Turkey had to recognise the entire independence of Roumania, Servia, and Montenegro, to cede some additional territory to Servia and Montenegro, to consent to the establishment of an independent principality of Bulgaria. In the case of Bulgaria, these stipulations were considerably modified by the treaty of Berlin of July 13, 1878, as has already been stated. Bosnia and Herzegovina were placed under Austrian administration, and to Greece the annexation was promised. The introduction of the reforms formally demanded by the great powers of Europe was again promised, and their execution placed under the guarantee of the great powers. A few weeks before (June 4, 1878), Turkey had concluded a secret treaty with England. By this instrument it was promised that in the event of the Asiatic dominions of the sultan as long as Russia would not return its conquests in Armenia. In return, Cyprus was placed under English administration, and the Porte pledged itself to carry through administrative reforms in the Asiatic possessions. Thus Turkey appeared in an entirely helpful position, and, so far as the European powers were concerned, in a state of total decay. Among the European powers, only one—the Tory government of England—occasionally used its influence in behalf of the Turkish government. The fall of the Tory ministry in 1880, and the access to power of the Liberal party, which had always expressed its sympathy with the Christian nationalities of the Balkan peninsula, especially with the Greeks, deprived the Mohammedan government of its last hope. As the Turks had been unable to agree with the Greek government about the promised rectification of frontier, the powers signed a new treaty. Thus the Sublime Porte was invited to a meeting of special conference at Berlin in June, 1880, and designated the districts which, in their opinion, should be ceded to Greece. The vital power of Turkey appears to be exhausted. A constitution drawn up by Midhat Pasha, and proclaimed Dec. 28, 1876, which promised to the population very extensive rights, failed to make any impression either at home or abroad. The Parliament which met in March, 1877, attracted more attention by its novelty than by its work.

III. National Characteristics and Governmental Policy.—Comparing Turkey with the other states of Europe, we are struck with one very remarkable distinction. In all the other countries of Europe the bulk of the people have learned that they have a common country, and that, however widely their opinions may differ, and however much they may dislike the existing government, they have important interests in common. The Turks have never become a nation. After subjecting many tribes of different race and religion, the exclusive aim of the sultans has been to keep them in subjection, and to extort from them as high a tribute as possible. The effect of Turkey's rule has therefore been most blighting upon every interest of her subjects. Morally, physically, and morally, the Turks are the rulers and the subject races have sunk, under the combined influence of a false, fanatical, and sensual religion, a bigoted, selfish, and imbecile régime, and an ignorant, fatalistic, and effete philosophy, to the lowest possible point of civilized communities. Corruption reigns in every department of state, and superstition in every form of society. The ruling class, being Turks and Moslems, feel no sympathy with the natives, who are largely Christian and of different races from themselves. Extortion, bribery, chicanery, and treachery have for ages characterized the government, until it has become a festering ulcer and a burning shame to the whole world. Under the influence of intrigue and jealousies among the other European powers, each of which has been anxious to outwit the rest in seizing upon the spoils of "the Sick Man's estate," Turkey would have been dismembered long ago by foreign influence, or have collapsed in utter ruin by its internal rottenness. England has been largely chargeable for maintaining, by her diplomatic policy, this eyesore and blot upon the map of the world.

Several large territories are but very loosely connected with the empire. Tunis, in Africa, considers itself as a vassal state of the sultan, but without any definite obligation, not even that of paying an annual tribute. Formerly there were two other states of this class, Algeria and Tripoli; but the former has been conquered by France, and the latter has recently come under the direct authority of the sultan. The vassal states which are left have only an annual tribute to pay, and are autonomous, were, in 1878, Roumania and Servia, in Europe; Samos, in Asia; and Egypt, in Africa. In 1878 Roumania and Servia became entirely independent, and Bulgaria was erected into a tributary vassal state. In the autonomous province of Eastern Roumelia, the power of the sultan has been almost reduced to the right of appointing a governor. By the old law of succession, which has been left unchanged by the constitution of 1876, the crown is inherited, according to seniority, by the male descendants.
of Othman, sprung from the imperial harem. The harem is considered a permanent State institution. All children born in the harem, whether offspring of free women or of slaves, are legitimate and of equal lineage, but the last-born in either case is regarded as the eldest son by the eminence of the house. If there are no uncles or cousins of greater age, it has not been the custom of the sultans for some centuries to contract regular marriages. A special feature attending the accession of new sultans to the throne has been the slaughter of brothers and other near kinsfolk who were suspected of zeal. Until very recently the will of the sultan was not limited by any law. The precepts of the Koran were regarded as the fundamental law of the empire. The legislative and the executive authority were exercised in the name of the sultan by the grand vizier as head of the temporal government, and the Sheik-El-Islam as the head of the Church. The constitution of 1876 pretended to make the sultan a constitutional monarch, and to provide for the exercise of the legislative and judicial powers after the model of the West European states; but the constitution thus far (1880) is almost a dead letter. Several Christians, however, have of late held the position of Minister of State. The financial affairs of the government are in a condition of thorough and hopeless disorganization, and the time of the empire's complete dissolution cannot be distant.

IV. Mohammadism.—The Turks have been a Mohammedan people from the 10th century, and have ever since been considered as a Mohammedan nation by all the surrounding states. The sultan is regarded as the head of the Sunniite Mohammedans [see Sunnite], not only in Turkey, but as far as the Sunnite form of Mohammedanism extends. Church and State are so intimately united in Turkey that the judicial and the priestly power are vested in the same office, the Umara, who regards the Koran as the sole authority for the decision of ecclesiastical as well as civil causes. "The administration of justice in Turkey is now divided into two parts—that of the Sheri, wherein all judges are Musulmans, and that of the Nizâmdeh, composed of Christians and Musulmans. The head of all the courts of the Sheri is the Sheik el-Islam, who sanctions all their judgments. The judicature of the Sheri is composed of a high court of appeal (Arts-odag), divided into two chambers (Sudur), one for Turkey in Europe, and one for Asia. At the head of every court is a cazi-asker, like the high judge. The cazi-asker is assisted by fourteen honorary chief-judges. In the hierarchy of the Ulema the mollahs rank next to the cazi-asker, and after them the cadisse. The first rank in the mollahs are the Constantinople, nine in number, and who sit in the court Sheri, at the capital, and act as a sort of Supreme Court of the mollahs. At its head is the moltah of Stamboul. The second rank in the Mevlevizet, which numbers fifty-seven titles. The mollah, when on duty, serves only a year, and then returns to the roll" (Baker, Turkey). Turkish education, until recently, was also in close connection with the State religion. It was organized by Sultan Mohammed I (1451–81), the greatest soldier-statesman that the Ottoman empire has produced. He established elementary schools called mekteb, scattered over his empire in every town and in almost every Mohammedan village, and numerous public schools or colleges of higher order, which were called medresas, in distinction from the mekteb, or elementary schools. The medresas went through ten regular courses of grammar, syntax, logic, metaphysics, philosophy, the science of tropes, the science of style, rhetoric, geometry, and astronomy. The taker of a degree in these subjects receives the title of doktor, which has now been replaced by the term sofia. The degree entitles him to the mastership of one of the minor public schools; but in that case he renounces the prospect of becoming a member of the Ulema, or of any of the higher educational appointments. For this it is necessary to go through a much longer course, only to pass several examinations. Incentives to work are given in the honors and endowments which are conferred. The Ulema supplies all the professors of the high-schools, who are called medresis, and from the same order are chosen all the ministers of justice, including the grand vizier and the cabinet. The actual priesthood of Turkey takes a very inferior position in the State. The ministers of public worship are called imama, who officiate at public prayers, and sheiks, or preachers. But the fact that the appointments to the priesthood are allotted to the holders of minor degrees does not mark on the part of the Turks, any want of respect for their faith. It only arises in consequence of the legal profession being so intimately connected with the Church as exponents of the law of the Koran that they, in fact, form the senior branch of the hierarchy. Dervishes, or Mohammeden monks, are very numerous and are divided into a number of sects. See Derviscis. The Vacosf, or Church property, which belongs to the mosques and other religious institutions and to benevolent foundations, is administered by a special department of the State called the Ekkayf, and consists of two classes: 1st. Property or its produce actually belonging to such ecclesiastical establishments, and held and received on their account by the Ekkayf; and 2d. Property owned by private persons, but lapsing, in default of direct heirs of the owner, to the Ekkayf, and subject, in the meantime, to a small yearly contribution payable to that department; but an owner of Vacosf property has the right to file a complaint against selling it to a person having such heirs, and so preventing it, for the time, from falling into the Ekkayf. By a recent law a private person holding Vacosf property can, on payment of certain fees to the government, have it converted into what is called malihe, a title which gives the holder a fee simple of the land, to deal with as he pleases, to leave it by will, and, in default of his doing so, it passes to his next heir.

Trustworthy statistics on the religious denominations of Turkey cannot yet be obtained. E. G. Ravenstein, in an article on the population of Turkey, in the Journal of the Statistical Society (Lond., 1877), estimates the total population of Europe, exclusive of Roumania and Servia, but inclusive of Bosnia and Bulgaria, at 9,661,000, which he distributes as follows among the religious denominations:

A Servitan statistician, Jakabith, gives the following estimates of the population of Europe: **Christians** in Turkey proper, 2,484,501; in Eastern Roumelia, 655,776; in Bosnia, 780,576; in Bulgaria, 1,195,248; total, 5,020,978. **Mohammedans** in Turkey proper, 1,883,460; in Eastern Roumelia, 859,434; in Bosnia, 400,635; in Bulgaria, 760,267; total, 3,403,463. **Jews** in Turkey
proper, 55,018; in Eastern Rumelia, 3969; in Bosnia, 6968; in Bulgaria, 8959; total, 74,914. Total population of European Turkey, 8,495,178. According to these authorities, the aggregate number of Mohammedans in European Turkey is estimated at from 15,700,000 to 16,600,000, that of Christians of all denominations at about 8,000,000, that of the Jews at about 200,000. The aggregate population of the African dependencies, owing to the rapid expansion of the Egyptian dominions of late years, was estimated, in 1890, at 20,500,000 nearlings. A neighborly spirit still existed when the Copts of Egypt were Mohammedans. See MOHAMMEDANISM.

V. The Christian Churches of Turkey.—Although the Turks, after the conquest of the Balkan peninsula, displayed all the horrors of Oriental despotism, they did not aim at the extermination of the Christian religion. There is probably no country of Christian Europe which has not imposed, at some time in the course of its history, more severe penalties upon the profession of a dissenting Christian creed than the Turks have done upon the profession of Christianity. The Christians, in their civil relations, found themselves greatly oppressed, but the Turks did not meddle with the internal affairs of the churches. The influence which they usurped by the appointment of the high dignitaries in the Eastern churches was inspired by considerations not of power or proselytism, but of greed. The social advantages which the Christians of the Greek Church had been induced nearly the whole population of Albania, the entire nobility of the Bosnians, and large numbers of the Bulgarians and other Christian tribes to adopt the religion of the conquerors; but the immense majority of the population of the European dominions of Turkey and large numbers in Asia continued to adhere to the several Christian churches. As the military power of Turkey began to wane, Russia, France, and other powers claimed, and received by treaty, the right of protectorate over the Turkish subjects professing the national religion, thus obtaining redress for their injuries. In 1828, the sultan, by the hattı-sherif of Gulhane, proclaimed the equality of Christians and Moslems before the law. The provisions of this charter of religious liberty were renewed and extended by sultan Abdul-Mejid in the charter called the hattı-humayun, promulgated in February 1839. A similar charter was issued by the sultan in the treaty of Paris as the consideration on which the powers admitted Turkey to the company of European states, and guaranteed to it its rights as an independent and inviolable power. The new Turkish constitution of December, 1876, promised to the professors of the Greek Church full equality of civil rights and immunities. In the first Turkish parliament, which met in 1877, all the religions of the empire were fairly represented. Thus among the deputies returned from Constantinople were five Turks, four Christians, and one Jew; and of the Christians, one was a Greek, one a Roman Catholic Armenian, and two Gregorian Armenians. In 1878 the treaty of Berlin (art. 62) placed the establishment of the principle of religious liberty to its fullest extent under the guarantee of all the great powers of Europe. When the Turks completed the conquest of the Balkan peninsula, they designated the aggregate of the Christian elements as rahi (berd), while the different tribes were distinguished as millet (nation). The Mohammedan Turks were, however, so strongly inclined to confound Church and State that they viewed the several millets as so many religious communions. Mohammed II, after the capture of Constantinople, made the patriarchs, bishops, and all the clergy of the patriarchal see subject to the imperial government, and the patriarchs of the Eastern, or Greek Church. The civil functions of the patriarch were shared in different degrees by the subordinate bishops, and thus the entire hierarchy of the Greek Church appeared as the actual administrator of the civil interests of the people, and subject to the influence of the Pope. The Greek Church is generally in favor of the Papal authority of the Pope. Besides the millet of the Greeks, there are others for the Armenians, United Armenians, Latins, Protestants, and Jews. Their organization is similar to that of the Greeks. The secular jurisdiction of the Armenian patriarch included the Jacobites. A fast day is observed by the present Christian population of Turkey, see above.

1. The Greek Church.—When the Turks took, in 1453, possession of Constantinople, the foremost episcopal see of the Eastern Church became subject to their rule. The patriarch of Constantinople had gradually become the virtual head of the Eastern Church, when the patriarchate of Rome became for the West. See GREEK CHURCH. When the termination of ecclesiastical communion between the patriarchs of Rome and Constantinople became a fixed fact, all of the Orthodox Eastern churches looked upon the patriarch of Constantinople as the most eminent bishop of the Orthodox churches, although many of them, like the churches of Russia, were entirely independent of his jurisdiction. As long as there was a shadow of hope that the Eastern Roman empire would be aided by the Catholic Church of Western Europe in its resistance to the advance of the Turks, several patriarchs of Constantinople had assumed a readiness to reunite with Rome. To the bulk of the clergy and the laity the idea of such a reunion was extremely distasteful, and after the conquest of Constantinople it was entirely abandoned. The sultans claimed the same rights with regard to the appointment of the patriarchs that the emperors of Rome had claimed. As early as the year 1493, the sultan of Turkey compelled the patriarchs of Constantinople, and the Eastern Church submitted to the demand. Georgius Scholarius, who was elected patriarch soon after the conquest of Constantinople, and assumed the name of Gennadius, accepted from sultan Mohammed II the investiture as patriarch of New Rome. The sultan, however, by the hattı-sherif of 1641, absolved himself from any responsibility for the elections of the patriarch, and finally compelled him to resign, notwithstanding the petitions of the faithful in his behalf. The next patriarch, Joseph, was banished by the sultan because he had refused to acknowledge the unlawful marriage of a Mohammedan minister with the daughter of an Athenian prince. Patriarch Simon, also living in the second half of the 16th century, was the first who offered to the sultan one thousand ducats for the patriarchate. This money for the confirmation of the new patriarch is called barbatan or peksemen; and it has been paid ever since. The number of ducats was constantly increased, and the Turkish government generally showed a disposition to sell the patriarchate to the highest bidder, and to vacate it as often as possible. Only a few of the patriarchs were allowed to remain in office for a long term; generally, after holding it for a few years they were removed for reasons of civil right or they were banished, throttled, or degraded. The habit of the patriarch to purchase the confirmation by the sultans had a most disastrous influence upon the Church. The Simonistic corruption descended from the patriarchs to the archbishops and bishops, who had to pay heavy sums for their consecration, and, in return, tried to indemnify themselves by extorting as much money as possible from their people. For political reasons, the external form of the Church was changed as little as possible; but in consequence of the corruption prevailing in the high places, the Church fell into great decay. The greater part of the clergy, who were generally destitute of a higher education, showed but little sympathy with the people; and when the government conferred upon them some privileges, they looked with indifference upon the heavy taxes which oppressed the laity. Little resistance was even made by the clergy against the forced labor, to which the body of the clergy, as well as the clergy and the militia corps formed by the children of Christians, who were taken away from their parents, educated as fanatical Moslems, and used for the compulsory extension of Mohammedanism. In some of the provinces the power of the Christian people to resist the proselytism of the Turks greatly decreased the influence of the Church in Albania, where the Christian population decreased
from 350,000 to 50,000 during the period from 1620 to 1650. Among the apostates were even many priests and monks. The subsequent history of the Greek Church of Turkey does not offer many points of great interest, yet it is rich in events. The prolonged conflict of the Ottoman Porte in a number of treaties the official promise to protect the Christian religion and the Christian churches, and made itself chiefly felt in behalf of the coreligionists of Russia, the Orthodox Eastern Church. Between Constantinople and Rome an entire estrangement of Constantinople extended and developed throughout the 17th century the patriarch Neophytus II of Constantinople was believed to be favorable to a union with Rome; but no formal negotiations were opened, and none of the following patriarchs of Constantinople has shown any leaning in that direction. All the invitations and overtures that were made by the popes were rejected by the patriarchs of Constantinople, with a firm and decided refusal: thus, in 1848, an invitation from Pius IX, addressed to the entire Eastern Church, for a corporate union with Rome, and another in 1869, addressed by the same pope to the Greek bishops to attend the Vatican Council, were promptly and firmly declined in Constantinople and throughout the Greek Church. In the Asiatic part of Turkey the patriarch Athanasius IV of Antioch, who was elected in 1866, joined the communion of Rome, and was followed by a part of the clergy and laity. Thus arose the United Greek Church of Turkey [see Greek Church, Chap. II.], which in 1872 obtained from the pope recognition over all parts of the Turkish empire. In the 18th century both the Lutheran and the Calvinistic theologians endeavored to establish friendly relations with the Greek Church, and entered into correspondence with several patriarchs of Constantinople. The Lutherans were successful in their attempts by the gift of books. The Calvinists completely gained over to their side the most gifted patriarchs that have ever occupied the see of Constantinople, Cyril Lucar (q. v.), who went so far as to transmit to Geneva the form of a Calvinistic confession of faith, that it has been ascribed to the patriarch, who was strangled, and whose memory was exalted by the Oriental patriarchs, this attempt, too, came to an end, and the Greek Church in Turkey, as well as in other countries, has kept aloof from all corporate negotiations with Protestant churches. In the 19th century the attempts made by the Anglicans and Episcopal churches of the British isles and the United States to establish intercommunion with the various Episcopal churches of the East, led to friendly correspondence between the patriarchs of the Greek Church, on the one hand, and the archbishop of Canterbury and of York, on the other hand. In the summer of 1875, the two leaders held an interview. In 1874 and 1875, between Oriental, Anglican, and Old-Catholic theologians, the Greek Church of Turkey was also represented by several theologians. See Russia.

Until the establishment of the independence of Greece, the Turkish empire comprised nearly all the Greek churches of the world, except those of Russia and Austria-Hungary. Among the bishops of the Greek Church the patriarch of Constantinople holds the highest rank. He alone is invested by the Turkish government with the attributes of civil head of the entire Church. In regard to ecclesiastical jurisdiction, he is, however, only the head of the patriarchate of Constantinople, the other three patriarchs (of Antioch, Jerusalem, and Alexandria), as well as the metropolitan of Cyprus and the abbot of Mount Sinai, being independent of him. The three patriarchs named receive in their berat, or official document, the same privileges as the patriarch of Constantinople; each of them has his own patriarchal synod, which fills the see in case of vacancy. An attempt made by the patriarch of Constantinople to appoint the patriarchs of the other sees led, from 1845 to 1845, to a violent controversy between the patriarch of Constantinople and the Greek Patriarchal Synod of Jerusalem, in which the latter remained victorious. The three patriarchs communicate, nevertheless, with the Turkish government through the patriarch of Constantinople, and are not even allowed to come to the capital without his permission. The aggregate number of these patriarchs is considered small, and all the remaining of the Greek churches of Turkey was until recently under the immediate jurisdiction of the patriarch of Constantinople. The establishment of the kingdom of Greece, in 1821, virtually severed the connection of the churches of the kingdom with the patriarchate of Constantinople, on whom they had formerly been dependent. The entire independence of the Church of Greece was, however, not proclaimed until 1833, when a synod of the bishops of Greece met for this purpose at Nauplia, and the formal recognition of the independence by the patriarch of Constantinople did not take place until 1866. Servia and Roumania were virtually as independent of the patriarch of Constantinople in ecclesiastical affairs as they were of the sultan in politics. The establishment of their entire political independence, in 1878, entails the complete severance of their ecclesiastical connection with Constantinople. The Bulgarians, although agreeing in doctrine with the Eastern Orthodox Church, were, until 1767, independent of the jurisdiction of the patriarch of Constantinople, having a primate and patriarch of the national Bulgarian Church at Ochrida; but in 1767 the last patriarch abdicated, and, by the joint efforts of the Tsar of Servia, Russia, given over to the jurisdiction of the patriarch of Constantinople, the Bulgarian Church was not only placed under the spiritual jurisdiction of the Greek patriarch, but entirely denationalized. Their bishops and priests were dispossessed, their sees and parishes were occupied by Greeks, their monasteries and schools were plundered, and the reverse was the case in Turkey; the Bulgarians communities; but the greatest blow of all was struck in the elimination of the Bulgarian language and literature from all the educational establishments. A strong educational movement for re-establishing the rule of the Bulgarian Church in the Turkish Church set in about 1840. It made at once rapid and steady progress in the province of education, and at length, in 1870, led to the reorganization of a national Bulgarian Church. Notwithstanding the most desperate opposition to the Bulgarian movement by the patriarch of Constantinople and the Bulgarians the majority of the Bulgarians flocking to the Bulgarian Church, in order to yield to the Bulgarians so far as to issue a firman which constituted, under the title of The Bulgarian Exarchate, a separate spiritual administration, comprising, in its jurisdiction the towns and districts of Ruschuk, Silistra, Shumen, Trytova, Sophia, Vratsa, Vratza, etc., with the exception of about twenty villages and three towns), the sanjak of Slivnitz (except a few villages), the district of Sisipol, the town of Philipopolis, the district of Stanimaka (with the exception of a few villages), and the metropolitan diocese of Philippopolis (except a few monasteries). The firman further provided that the powers of the exarchate be defined by an organic code, which was to be in conformity on all points with the established laws and religious principles of the Orthodox Church; but to exclude entirely, on the other hand, all interference, direct or indirect, on the part of the patriarch, with monastic affairs, and merely subject to the election of the exarch and the bishops. The exarch was to be named by imperial berat. He was to be bound, in conformity with ecclesiastical rules, to commemorate the name of the patriarch of Constantinople, and the synod of the exarchate was to be bound to submit to the same pontiff, the patriarch of Constantinople. Although the patriarch of Constantinople at first excommunicated all who availed themselves of the firman and connected themselves with the Bulgarian exarchate, the latter rallied more and more all members of the Orthodox Church in the Balkan states, who were influenced by the Pontificium of Berlin of 1878, which provided for the establishment
of a tributary principality of Bulgaria, and an autonomous province of Eastern Roumelia, in both of which countries the Bulgarians are the predominant race, made the claim to be received in the Greek question on the basis of independence of both the sultan and the patriarch of Constantinople, and cannot fail to complete, ere long, the organization of a national Bulgarian Church, comprising all the Orthodox Christians who speak the Bulgarian language, and enjoying an independence equal to the national churches of Russia, Greece, Roumania, and Servia. The jurisdiction of the patriarch of Constantinople is thereby restricted to those Christians of the Eastern Orthodox Church who are of the Greek nationality. See Russian-Greek Church.

The office of the patriarch is intended to be held by the occupant for life; but the Porte may remove him on account of high-treason, and the synod may ask the Porte for his removal on account of bad administration and of heresy. Charges of the first class are very frequent; and as it is the pecuniary interest of Turkish officials to have the patriarchs removed as often as possible, they are always found willing to co-operate in such removal. Depositions of patriarchs are therefore very frequent. The patriarch is assisted by a "Holy Synod" (Eleos), which consists of from ten to twelve metropolitans, besides the patriarch, its president. The patriarch has the right to select them, with the exception, however, of the metropolitans of Heraclea, Cyzicus, Nicomedia, and Chalcidon, who are members ex officio, and among whom, as they are so near the capital, the patriarchal seal, which consists of four parts, is divided. As the keepers of the patriarchal seal must always be present in Constantinople, the four metropolitans occupy a peculiar position, which the Porte recognizes by specially enumerating them in the berat of the patriarch. The patriarch has no right to send them to their dioceses. He may increase the number of the members of the synod, but is not allowed to reduce it below ten. It is customary for eight of the metropolitans who are members of the synod to be present at Constantinople. They are called "the prominent" (ýepeprav), and are addressed as "the holy old ones" (ýeowýçov). In 1847, the Porte desired to add to the synod, for all questions not relating to the discipline of the Church, three lay members—the grand vizier and the bishops of the principal dioceses of Samos, Vegorides; and a rich merchant of Chios, Pechiari, generally called Messesini; but the synod opposed the plan so strongly that it was abandoned by the Porte. According to a habit which is expressed in the name, it is the custom of the synod to meet four times a year, and all the business is transacted by solemn synods; the synod alone has judicial and punitive power over the patriarch; and the deposition of the patriarch by the Porte, except in cases of high-treason, takes place only at the request of the Holy Synod. The most important right of the synod is the election of a new patriarch. The patriarch's jurisdiction is limited to the provinces inhabited by Greeks and subjects of no other faith. The synod is assisted by a chancellor and a registrar, who take care of the archives; besides these, the synod has its own ecclesiastical hospital, and supports a Greek college, which is attended by pupils of all the Christian churches. The synod also maintains a printing-office, and publishes a gazette; it is assisted by a government fund, and is exempt from the poll-tax, but sustains a certain tax on the fruits and wine which are brought into the capital from the provinces. It manages the Church property, and has the power of collecting taxes, and keeps the seals of all the monasteries. It has its own seal, consisting of four pieces, one of which is kept by the patriarch of Constantinople, and the other three by metropolitans elected by the synod. The sessions of the synod are generally held on Sundays and holidays, and the sittings are secret; there is no need for their execution a firman of the sultan. When a new patriarch is to be elected, the members of the synod, and the archbishops and bishops present at the time in Constantinople, assemble at the synodicon, or patriarch's palace, which is situated in the Fanar, or Bazaar, of the Greek quarter. This assembly designates by acclamation, and the shout of ááóáó (worthy), the candidate of its preference. The election, being thus completed, the minutes are signed by all present, and an official report is made to the Porte, which then orders the berat to be drawn up. This official berat, for which the synod is responsible, enumerates all the rights belonging to the patriarch and the synod. On the day after the election, the new patriarch officially visits the grand vizier, who presents him with a magnificent suit of clothes, consisting of a cu´ław (a long silken robe), a cloak, a black capuchon, and a patriarchal hat; moreover, with a finely wrought patriarchal staff and a white horse. The patriarch pays also to the other ministers of the Porte an official visit. Soon after these visits follows the intonization, an act of great simplicity, which is performed by the metropolitan of Heraclia. The ecclesiastical rights of the patriarch are very extensive. He has superior jurisdiction over all the metropolitans, the bishops of the synod, and all the members of the synod. He has supreme jurisdiction in all affairs relating to marriage and wills. Complaints against bishops can be decided by the government only with the concurrence of the patriarch. The arrest of a Greek prelate requires the consent of the patriarch, and the permission of his officers. He has the right, without restraint, to excommunicate any member of the church; to deny ecclesiastical burial, etc. He enjoys the privilege of consecrating the holy oil, and has in all dioceses the right of the stiroprepia, i.e., the right, at the foundation of a church or a monastery, to erect a cross on the spot where the altar is to stand, and thereby to subject to his control such church or convent. The civil jurisdiction which the patriarch enjoys as the head of the "Greek nation" (which means, in the official language, all the members of the Eastern Church), is in some respects more comprehensive because it extends also over the other patriarchal dioceses. This power, however, is on the wane. As has already been indicated, the non-Greek nationalities have either achieved their entire independence of Turkish rule, or, like the Bulgarians, have received temporal concessions, which give them a connection with the patriarch of Constantinople, whose jurisdiction, ecclesiastical as well as civil, will be restricted to the Church members of the Greek nationality. The patriarch has his own court, before which especially cases of minor importance are brought, not only between Greeks and Greeks, but also between Greeks and people of other churches, even between Greeks and Turks. An appeal can, however, be had from the patriarch's court to the Turkish courts. The revenue of the patriarch is considerable. He inherits the property of metropolitans, bishops, priests, monks, and nuns who die without leaving a will. If there are no legal heirs, the property passes into the hands of the patriarch; he may bequeath the patriarch up to one third of their property. Other sources of revenue are the fees for ordination, the tax on the installation of metropolitans and bishops, the annual contributions from the bishops and from the convents which are immediately subject to the patriarch, the income of ecclesiastical churches, and the income of the bishop and each layman of his diocese, the fees of his chancellor, fees for every marriage and burial, etc. The patriarch has the right to have all these dues collected by special commissaries, who, if necessary, can invoke the aid of the government officials. The patriarch is exempt from all the ordinary taxes, and is subject only to the decrees of the government as a special tax, and to make frequent presents to the ministers. The patriarch is assisted in
The administration of the patriarchate by a number of officers. They are divided into two choirs—one at the right, and the other at the left. The former consists of three sections, each of which embraces five persons, and is therefore called a πιστικός. All these offices were formerly held by members of the nobility, and the temporal possessions of those which required an ordination or had the superintendence of convents, were in the hands of the noble Greek families, the so-called Phanariote. The occupants had a vote at the election and deposition of the patriarch. At present, most of these offices are more titles. The only office which has an important political position and considerable influence is the grand logothete (μεγάλος λογοθέτης), or the grand keeper of the seal. He is elected by the patriarch and Holy Synod from among the Greek nobles for lifetime. He is confirmed by the Porte, and can only be removed by the concurrent action of both powers. The patriarchate conducts through him all negotiations with the Porte relating to its secular privileges; and all the official communications from the patriarch to the Porte pass through his hands. He has the right to countersign all synodal resolutions relating to the appointment of metropolitanans and bishops, and he receives certain fees for drawing up the official documents. See Patriarchs.

The three patriarchs of Alexandria, Antioch, and Jerusalem are not subject to the ecclesiastical jurisdiction of the patriarch of Constantinople, but are co-ordinate to him. The reason is that they are appointed and confirmed upon them the same rights, and each of them has a synod which has the same rights as the Synod of Constantinople. They are inferior to the patriarch of Constantinople only in so far as they have no civil jurisdiction. The patriarch of Alexandria has jurisdiction over the Greek churches of Egypt, Libya, Arabia, and Nubia; the patriarch of Antioch, who reside in Damascus, over those of Syria, Cilicia, Mesopotamia, Isauria, and other Asiatic provinces; the patriarch of Jerusalem, who resides at Galata, a suburb of Constantinople, over those of Palestine. The aggregate territory of the three patriarchates is enormous, but small compared with that of Constantinople. Metropolitans with suffragan bishops are rare in the Turkish empire. The name metropolitan or archbishop is generally only a title which confers a higher dignity than the title bishop, but not a greater jurisdiction. The title of metropolitan is especially given to the bishop of the largest Greek city. As bishops must be unmarried, they are generally taken from the monasteries. If a layman is to be ordained a bishop, he has first to take all orders up to priesthood, and then can receive the episcopal ordination only after the expiration of thirty days. The candidate must be at least thirty years of age, and at his ordination three bishops must be present. Bishops are bound to reside in their dioceses; and if a bishop is absent from his diocese for more than six months, except it be by order of the patriarch, he is deposed. The bishop has entire control of the property of the diocese, and can impose taxes upon his diocesans. Without his permission, no convent can be built within the diocese. The revenue of metropolitans and bishops is derived from the same sources as that of the patriarch. They receive annual contributions from the priests and the laity of the diocese, besides fees and inheritances. The income of many bishops is considerable. The metropolitan and bishops have also an influential position in the political administration of the empire, as they are, in virtue of their office, members of the administrative councils, by which the reins of the vilayets are assisted. In 1866, patriarch Gregory VI and the Holy Synod imposed a tax the amount of which was equal to 100,000 liras a year, which was to be used to establish in their dioceses an ecclesiastical committee, after the model of the one existing in Constantinople, for consulting on the spiritual interests of the dioceses. All the diocesan committees send reports to Constantinople, and these receive advice. The committees consist of not less than three members, who are selected from among the educated, virtuous, and zealous clergy. One member of the committee has to examine the candidates for ordination, and to instruct and guide the confessors. A second member has to superintend the printing and the sale of books, the ecclesiastical discipline, and the spiritual interests of the monasteries. He is appointed without his permission. The third member superintends education and preaching. The secular clergy are mostly uneducated and poor, and, to support themselves and their families, they often carry on some trade, cultivate a farm, and perform other manual labors. The number of priests is not limited by the councils, and on every Sunday and holiday collections are taken up for the purpose. The koja bachi, or chief of the congregation, administers the financial affairs, and has, in particular, to take care of the support of the priests, the churches, and the schools. No one can be admitted to a male or female seminary without an examination, or before being ten years of age. Besides the monks and nuns who live in convents, there are cremites on Mount Athos, and anchoress in Macedonia. See Monks, Eastern.

The number of metropolitanans and bishops who were subject to the patriarchs of Constantinople before the churches of Roumania, Servia, and Bulgaria had severed their connection with him amounted, according to Silbermagl (Verfassung sämmtlicher Kirchen des Orients [1865]), to 181, of whom 92 belonged to Europe, 21 to Asia, and 68 to the Asiatic provinces. In consequence of the decay of the Turkish empire, and the loss of the western provinces, the dioceses are now no longer subject to the jurisdiction of the patriarch, which, ere long, may be restricted to the dioceses in which the people are of the Greek nationality. Under the patriarch of Antioch were 12 dioceses, and to this patriarchate also belonged the archbishop of Cyprus, who is exempt, and has under his jurisdiction 6 suffragan bishops. Under the jurisdiction of the patriarch of Jerusalem are 14 archbishops and bishops, under that of Alexandria 4. The population of the patriarchate of Alexandria is reported as only 500 souls; that of Jerusalem is 15,000; while the patriarchate of Antioch comprises 29,000 families. The total population connected with the Greek or Orthodox Eastern Church of Turkey, after the great territorial changes made in 1878, was estimated at 3,800,000 (see Applonia's Annual Cyclopedia, 1878, art. "Greek Church"); but of this number only a small part belongs to the Bulgarian dioceses of Eastern Roumelia, which have no longer any ecclesiastical communion with the patriarch of Constantinople. Of the convents of the Church, which are still numerous, the most celebrated are those on Mount Athos (q. v.). Of late, education has begun to make great progress among the population connected with the Greek Church. Two theological seminaries have been established, one on the island of Chalki, near Constantinople, and the other at Jerusalem; and no one is henceforth to be appointed as bishop who has not been educated at one of these institutions, or is not fully up to the standard of the education there imparted. A flourishing teachers' seminary, according to the German model, has been established at Salonika, in Macedonia. See Eastern Church.

2. The Armenian Church.—For more than three hundred years nearly two thirds of ancient Armenia has been under the rule of Turkey [see Armenia]; and, therefore, although the head of the Church (the catholics of Echmiadzin) is now a subject of Russia (q. v.), the large majority of the adherents of the Armenian Church are still to be found in Turkey. Among the Armenian bishops of Turkey, the patriarch of Constantinople, who is the highest bishop in the hierarchy, can only be appointed by the catholics of Echmiadzin. An Armenian diocese was established at Constantinople as early as 1807. Archbishop Joachim of Bursa, was raised to the rank of patriarch of Constantinople in 1461 by the Sultan Mohammed II, and he was at the same time appointed the civil head of the Armenian nation. The
patriarch is elected by the notables and the prominent clergymen of the Armenian community of Constantinople, and is confirmed by the Porte. Formerly the Armenian bankers had the ascendency in this assembly, but the chief notables from the churches are now the chiefs of the Turkish government obtained the leading influence. The patriarch is entirely dependent upon these laymen, who appoint a coadjutor, or have him removed by the Turkish government, whenever they please. The new patriarch has to make a profession of faith, which consists of nine articles of which designation of the patriarch the vicar of Christ. The benediction which the patriarch receives from the Porte confers upon him a direct power over the priests and laity of his diocese. Like the catholicos, he has the right to ordain bishops and to consecrate the holy oil. With the exception of the patriarch of Jerusalem, he can appoint metropolitan and bishops throughout Turkish Armenia; remove, exile, and recall them; divide or unite their dioceses. The entire property of the Church is under his control; in the administration of it he is, however, limited by the lay synod, which consists of twenty members elected by the people and confirmed by the Porte. Moreover, he is assisted in the exercise of his ecclesiastical functions by a clerical synod consisting of his officials. As he has also civil jurisdiction, he has, like the Greek patriarch, his own court and a patriarchal prison. He is the civil head not only of the Armenian nation, but also of the Army. In the case of the basileus, all between the Turkish government and the Armenians pass through his hands; and even the Armenian patriarch of Sis and the bishops not directly subject to his jurisdiction receive their benedictions through him. Like the Greek patriarch, he enjoys a number of honorary rights and exemptions from taxes; but in return, he has to pay an annual tribute to the Porte. His revenue consists chiefly of taxes of installation and annual contributions from bishops; fees for ordination, for the holy oil, for marriages; inheritances and donations. Besides the patriarch of Constantinople, the Armenian Church of Turkey has patriarchs at Sis, in the vilayet of Adana, at Jerusalem, and at Aghtamar, on the island of Van. The first patriarch of Sis was elected in 1440, when the clergy of Sis, after the death of the catholicos Joseph III, feared lest the residence of the patriarch, which had been at Sis since 1254, might be removed to Echmiadzin. In 1839 another Sis patriarch was expelled from Sis, and the Sis bishops of the Turkish government of Constantinople, the patriarch of Sis hurriedly proceeded, conjointly with the people of Sis, to the election of a catholicos. The bishops and vartabeds met, however, in 1441, at Echmiadzin, and elected as catholicos the monk Hyrakos, who was almost generally recognised by the Armenians, but, in order to get a permanent patriarch, the privilege was conferred upon Sis to be governed by a patriarch, on condition, however, that he receive the holy oil from the catholicos as a sign of his submission. The condition was accepted, and from that time Sis has had its own patriarch. According to a concordat concluded between the catholicos of Echmiadzin and the patriarch of Sis, the jurisdiction of the latter was to extend over the Armenian churches of Cilicia, Syria, Egypt, and Palestine; but, as the bishops of Jerusalem made himself independent in the middle of the 17th century, his jurisdiction since been limited to the Armenian churches of Armenia Minor, Cappadocia, and Cilicia. The patriarch of Sis has the title "Patriarch and Primate of Armenia Minor and the Armenians who are in Cilicia, Syria, and Palestine, Min- ister of the Right and of the Throne of St. Gregory the Illuminator." The patriarchate of Jerusalem has been in existence since the middle of the 17th century, when the catholicos Philophenos conferred upon the archbishop of Jerusalem the right of consecrating, himself, the holy oil; and the archbishop consequently assumed the title of patriarch, and began to receive the bishopric of Jerusalem. However, ceased long ago to exercise these functions; and his powers have been greatly curtailed, as the patriarch of Constantinople calls him to account when he pleases. In order to guard as much as possible his own independence, the patriarch procures from the Porte a number of bishops with whom he supports in Constantinople an agent of his own. He has to pay an annual tribute, not only to the Porte, but to the pasha of Damascus. He is elected by his suffragan bishops, and has his residence in the monastery of St. James at Jerusalem. His income is derived from the revenue from the same sources as those given for the bishopric of Constantinople, and the presents from the pilgrims to Jerusalem, constituting an element of special importance.

In 1114 bishop David of Tornik made himself patriarch of Aghtamar, in Lake Van, and assumed the title catholicos. The schism has continued to the present day; but the patriarchate is of little importance, since its jurisdiction extends hardly any farther than Lake Van. The patriarch is elected by the bishops and clergy under his jurisdiction, and is supported by the revenue of the monastery on the island of Aghtamar.

The metropolitans, or archbishops, are not distinguishable from the bishops by any greater jurisdiction, but only by some honorary rights. The catholicos can only be elected out of their number. The bishops are regularly elected from the unmarried vartabeds, and only occasionally, and by special permission of the catholicos or the patriarchs, from the monks, according to the example of the Church of Rome. The bishop of Jerusalem is generally elected by the clergy and the heads of families, and after the election he is presented for confirmation to the catholicos or the patriarchs, who appoint several (generally three) bishops for examining the candidate. It is required that he be fifty years of age, of legitimate descent from the father and mother's side, and well versed in the Holy Scriptures and the canonical law. Many of the metropolitans and bishops have no dioceses, but live in convents, and there hold the office of archimandrite. Many of them are at the same time vartabeds. The patriarch of Constantinople, according to the regulations made by the provincial council on Nov. 20, 1830, has under his jurisdiction 18 archbishops, or metropolitans, and 35 bishops. The patriarchate of Sis embraces three towns and forty villages. Towards the close of the 16th century the patriarch of Sis still had 29 archbishops and bishops under his jurisdiction. The patriarch of Jerusalem embraces the churches of Palestine, Syria, Akra, and Tripolis. His residence, in the monastery of Mar Yakub on Mount Zion, was built in the 11th century, belonged to the Armenians as early as 1288, and has been in their undisputed possession since 1666. Besides the patriarch of Sis, 5 suffragan bishops and more than 100 priests live in the monastery. The total number of suffragan bishops is reported to be 14. The diocese of the patriarch of Aghtamar comprises two towns and thirty villages. In the second half of the 17th century he had under his jurisdiction from 8 to 9 bishops residing in the monasteries on the shore of Lake Van. The population connected with the Armenian Church is estimated at about 2,400,000, of whom about 400,000 are in the European dominions of Turkey. See ARME-

NIA N CHURCH.

3. Oriental Catholic Churches. Besides the Greeks and Armenians, Turkey has two other Oriental churches the so-called Nestorians and Jacobites. Both have been fully treated in former volumes of this Cyclopaedia. See Jacobites; Nestorians.

4. The Roman Catholic Church in Turkey. There are only a few Roman Catholic congregations in the provinces of the Turkish empire which have always been in connection with the Church of Rome. They are chiefly to be found in Albania. The foundation of other congregations dates from the time of the crusades, which established the Latin Church on a permanent footing. See also in the Roman Church and in the Mediterranean States.
cial intercourse between the Balkan peninsula and the Catholic nations of Western Europe increased the number of Latin congregations in all the large cities of the empire. Finally, the unceasing efforts of the numerous missionaries who, as the Church of Rome has supported in all parts of the empire have won over fractions of all the various Oriental Christian denominations in which the empire abounds. These fractions have been allowed by the pope to retain a number of national and ecclesiastical peculiarities; and, while they have adopted the doctrines of the Roman Catholic Church, recognise the pope as the head of the Church Universal, and must be recognised themselves, in the fullest sense of the word, as part of the Roman Catholic Church, they appear, especially in consequence of the retention at divine service of a rite different from the Latin, as a kind of semi-independent division of the Church. A correct view of the actual strength of the Roman Catholic Church in the Turkish empire is best obtained by reviewing the several rites separately.

The Latin rite embraces the Roman Catholics of all these nations except the United Armenians, who form their own civil church. The head of the Latin rite is a layman, who has the title Vettii (representative). He is assisted by four deputies of the Latin population, with whom he constitutes a permanent council called the Latin Chancery. The functions of this council are similar to those of the patriarchate in the Venetian and Greek churches. 

(1.) The Latin Rite.—A Latin patriarchate was established at Constantinople in 1203, in consequence of the crusades. The occupant received a rank next to the pope. When Constantinople, in 1453, became the residence of the sultan, the Latin patriarch transferred the seat of the patriarchate to Venice, and sent to Constantinople as their representative a vicar, who for a long time was only a monk. When the Catholics, in consequence of their increasing number, applied, for a bishop, the Propaganda prevailed upon the patriarch to appoint an assistant bishop for Constantinople, and to pay him a regular stipend. A Latin patriarchal vicar, sometimes suffragan of the patriarch. After some time, the Propaganda found it necessary to appoint, in its turn, an apostolic patriarchal vicar. When, after the middle of the 17th century, the patriarch took up his residence at Rome, and the patriarchate of Constantinople became a mere titular see, the diocese of Cessidium, which was conferred upon a prelate residing in Rome, the apostolic vicar was invested with full jurisdiction over all Catholics of the Latin rite. The population of his diocese, which extends over Thrace and the opposite coast of Asia Minor, is estimated at about 15,000, or 25,000 inhabitants of the Latin rite. The former archbishopric of Sophia, which had before the late war a Latin population of about 8000, and of the diocese of Nicopolis, which had a population of about 3000, are no longer under Turkish rule. Both the towns of Sophia and Nicopolis lie within the new principality of Bulgaria. A considerable portion of the archbishopric of Scopia, or Uskub, in Macedonia (now the western part of Roumelia) has been annexed to Servia. The whole diocese numbered before the war about 8000 Catholics of the Latin rite. Before the enlargement of the principality in 1878, the entire Roman Catholic population, numbering about 4000 persons, was included in the diocese of Belgrade and Semendria [see Servia], which belonged as a suffragan see to the ecclesiastical province of Antivari. The two vicariates apostolic of Moldiva and Wallachia, numbering in 1878 an aggregate Roman Catholic population of 114,000, now belong to this diocese. There are two vicariates of Bosnia and Herzegovina, which embrace the entire Roman Catholic population in the two provinces after which they have been called, were in 1878, by the treaty of Berlin, placed under Austrian administration. The Catholic population in these counties is enormously increased by the northern and north-western districts of Bosnia, which before the conquest of the country by the Turks belonged to Hungary. The bishop of Bosnia died, in consequence of the Turkish conquest, to Hungary, and established his residence at Teszevar. The occupant of this see still has the title bishop of Bosnia and Sinj, and it has been included in the jurisdiction of a foreign prelate, a vicar apostolic was appointed for the Catholics of the Turkish provinces. The Catholic population is estimated at about 149,000, that of Herzegovina at 42,000. In the European provinces remaining under Turkish rule the Roman Catholic Church has the greatest strength in Albania. There are two ecclesiastical provinces in Albania, Antivari-Scutari and Durazzo. The latter has no longer any suffragan see, and consists only of the archdiocese of Durazzo. The archdiocese of Antivari and the diocese of Scutari were united in 1867, at which time they had an aggregate Roman Catholic population of about 33,000. The suffragan sees of Antivari and Durazzo are Sappa, Pulati, and Alessio, all in Albania, with an aggregate population of about 42,000. The diocese of Belgrade, in Servia, which has already been referred to, also belongs to this ecclesiastical province. The island of Sado, which belongs to Asia Minor, has still an episcopal see, although the number of Roman Catholics is less than one thousand. It is a suffragan see of the archdiocese of Naxos, which belongs to the kingdom of Greece. In the Middle Ages, while this island was under Venetian rule, it was a free, autonomous bishopric, and the Roman Catholic population was numerous; but during the Greek war of independence nearly the entire Christian population was exterminated or sold into slavery. The population of Cyprus, which in 1878 was placed under English administration, has rapidly increased during the last twenty years, and the Roman Catholic Church there numbers about 10,000 Catholics of the Latin and Greek rites, and 3000 Maronites. The flourishing city of Smyrna, in Asia Minor, has an archdiocese with about 15,000, nearly all of whom live in the capital. The archbishopric in this city was restored in 1818 after several centuries of persecution. The see of the diocese of Canda, which, after being long conferred as a title in partibus infidelium, was restored in 1874. Besides these dioceses, the Church of Rome has an archbishop of Babylon, who resides at Bagdad. For the Roman Catholics of Jerusalem, who were formerly under the jurisdiction of the patriarchate of Antioch, an archbishopric was established in 1847, the occupant of which received the title of patriarch. The number of Roman Catholics in Palestine is estimated at about 15,000. Two "apostolic delegations" have been established, one called "Asiatic Turkey," and embracing Mesopotamia, Kurdistans, and Armenia Minor, and the other apostolic vicariate of Aleppo and Asia Minor. The number of Roman Catholics in all these dioceses and ecclesiastical districts is small, but the bishops and the comparatively numerous orders display a considerable activity among the Christians of the Oriental rites. Several Catholic communities have been collected in the commercial towns of the Arabian coast. They are administered by the apostolic vicar of Aden. The number of Catholics in the African dependencies of Turkey is small, but is increasing by immigration from Catholic countries of Europe, especially France and Italy. The French population residing in Egypt in 1877 amounted to 17,000, the Italian to 13,900, the Austrian to 6300; the large majority of all these are Catholics. The patriarchate of Alexandria, like that of Antioch in Asia, is now a mere title conferred upon an Italian prelate who resides in Rome. For the 25,000 Catholics of Tunis the Church has an apostolic vicariate, and for the 3000 of Tripoli a prefect apostolic.

(2.) The Armenian Rite.—The Church of Rome began to gain a firm footing among the Armenians at the time of the crusades. See ARMEAN CHURCH. Although the bulk of the Armenians shun all ways of union with Rome, considerable numbers accepted the union, and, retaining the rites of the national Church,
were organized into a United Armenian Church. The Mechitarists (q. v.) have gained for this ecclesiastical community a greater literary distinction than can be claimed for the other Christian churches in Turkey. In regard to their political rights, the United Armenians were subject to the jurisdiction of the patriarch of the National Armenian Church until pope Pius VIII, in 1830, succeeded, with the aid of France and Austria, in making them independent. He erected at Constantinople the see of an archbishop-primate for the Catholic Armenians, who was to be immediately subject to the holy see. At the appointment of the first primate the pope appears to have taken into consideration the national wishes, and to have conceded to them the right to propose three candidates for the vacant see, from whom the people were to choose the one whom they desired. These three candidates were an Armenian, Anto, a papal nuncio, and Hassan as successor of the primate, without consulting the nation. By a brief of April 30, 1850, pope Pius IX erected the towns of Anycra, Artvin, Brousa, Erzurum, Isphahan, and Trebizond into episcopal sees of the United Armenians, and made them suffragans of the Armenian archbishop of Constantinople. The same brief appointed the bishops of these sees without consulting the nation. The United Armenian nation gave its consent to the establishment of the sees, but refused to recognize the bishops, because they had not previously been consulted. After some time, they yielded this point also, in order to prevent a schism; and the Turkish government, through the mediation of France, gave to the new bishops the necessary benediction. When the pope established the see of an archbishop-primate at Constantinople, it was intended to confer upon him also the secular jurisdiction over the Catholic Armenians; but the Porte did not recognize the primate, and the church was governed by a patriarch of 1831, a priest of the Order of Mechitarists with the title of prefectura nationalis. At the request of the French ambassador, after some time, a patriarch was appointed, but without any ecclesiastical functions, and having only those secular rights which are connected with the offices of the Greek and the Gregorian-Armenian patriarchs. The patriarch was to be elected by the United Armenian community, and to be confirmed by the Porte. He was to be assisted by a council of administration consisting of twelve members, who were likewise to be elected by the nation and to be confirmed by the Porte. Thus the Pope, by the mediation of the Greeks, assumed the jurisdiction over all the United Eastern churches; but, in consequence of the religious controversies and inner dissensions which arose, the patriarch lost the right to represent the other Catholic nationalities at the Porte, and this right passed over to the see of the Latins. In 1851, at the synod of Eupatoria, the Pope of Rome was elected also patriarch of Cilicia, and assumed as such the name Anthony Peter IX. Thus for the first time the highest ecclesiastical dignity of the United Armenians, the patriarchate of Cilicia, was united in one person with the civil headship of the United Armenian nation which was attached to the office of the primate of Constantinople. Simultaneously with confirming the new patriarch, pope Pius IX, in July, 1867, issued the bull Reverentia, which abolished the rights that hitherto the United Armenians had enjoyed with regard to the appointment of their patriarchs and their bishops, and reserved for the pope rights hitherto not exercised by him. The opposition which at once manifested itself against this bull led in 1870 to an open schism. The opponents secured the assistance of the Turkish government; Hassan was exiled from Constantinople and eventually arrived in France. A synod of the exiled Armenian clergy elected a patriarch of the United Armenians. Besides, a number of bishops sympathizing with Kupelian were appointed for United Armenian dioceses. Notwithstanding repeated excommunications by Rome, the party headed by Kupelian remained in opposition to the pope, and associated itself with that of the Greeks in Western Europe. The Kupelians continued for many years to enjoy the patronage and active support of the Turkish government, but never succeeded in bringing over to their side the majority of the United Armenian laity. In 1876 a general amnesty, granted by the new sultan, Mutsafer, was renewed. In 1888, the Pope appointed Illumit Hassan to return to Constantinople. The schism continued, however, until 1879, when the efforts made by the papal delegates and the ambassador of France secured the submission of Kupelian and the other bishops of the opposition, and the entire end of the schism.

(3.) Other United Oriental Churches. The Roman Catholic Church has also gained over the entire tribe of the Maronites, as well as portions of the Nestorians and the Jacobites in Asia, and of the Copts in Egypt. The United Nestorians are generally called Chaldeans, while the United Jacobites are designated United Syrians. These last are numerous. See also the articles MARONITES; CHALDEANS; COPTES; JACOBITES. The aggregate number of these religious denominations is not large. The number of Chaldeans (inclusive of the congregations in Persia) is estimated at from 20,000 to 30,000, that of the Syrians at from 9000 to 20,000, that of the Copts at 10,000. From 1870 to 1879 almost the entire community of the Chaldeans, including their patriarch, Andu, and all their bishops, was in a state of open rebellion against Rome. The patriarch desired to extend his jurisdiction over the Chaldeans of St. Thomas in British India, who, like the Chaldeans of Persia, are subjects of the Indian government. Rome objected to this, desiring the Christians of St. Thomas to remain as heretofore under the jurisdiction of the vicar apostolic of Verapoli, who is of the Latin rite. The Chaldeans, moreover, protested against the Roman bull, issued in 1869, which forbade the patriarch to ordain bishops without the previous approbation of the pope. The Chaldeans had possessed and exercised this right from the time when they joined the communion of Rome, and they denied the right of the pope to abolish it without their consent. The patriarch and the bishops long resisted all the efforts made by Rome. One of their bishops visited India and was received by a large portion of the Christians of St. Thomas to place themselves under his jurisdiction, and withdrew from that of the Latin vicar apostolic of Verapoli. At length, however, they relented in their resistance; and, after the death of patriarch Andu, the pope succeeded, in 1879, in securing the submission of the Chaldeans. The election of a new patriarch who declared himself willing to concede all the demands made by Rome. See THOMAS (ST.), CHRISTIANS OF.

(4.) Protestantism. The most important Protestant churches in the Turkish empire are under the care of the American Board of Missions in the United States, and the Rev. Levi Parsons were appointed by the American Board in 1818 missionaries to Palestine, and arrived at Smyrna in 1820. In the next year Mr. Parsons went to Jerusalem. A printing-press, designed to print books for Turkey, was set up at Malta by the Rev. Daniel Temple in 1829, and the press was removed in 1838 to Smyrna. The Rev. Messrs. William Goodell and Isaac Bird were stationed at Beirut, where they began the Syrian mission in 1825, and opened schools the next year. In the same year the circulation of the Scriptures was forbidden to the government. The press was suspended for nine years after the death of Mr. Fisk, in 1825, and the mission in Syria was suspended for a short time in 1828. It was soon resumed; the Rev. William Goodell was appointed to Constantinople, and a deputation was sent to visit the Armenian populations in the empire. The Armenians of the exiled Greek church elected a patriarch and ecclesiastics at Constantinople in 1831, and was at first welcomed by them. Schools were opened near Constantinople, and in 1834 stations were established at Trebizond and Brousa. The Greek and Armenian ecclesiastics became jealous of the progress of the missions, and closed them; but in 1839 the new sultan made the first of a series of concessions of religious liberty. In 1841 the
Rev. Cyrus Hamlin opened a school at Bebek, near Constantinople, which was the beginning of what is now Robert College.

Churches were formally organized at Constantinople, Alexandria, and Trebizond in 1846. In the next year, the Protestants were recognized by the government as an independent community, and in 1850 they were accorded a charter, placing them on the same basis as the other Christian communities of the empire. In 1866 the sultan granted, and in 1860 formally proclaimed, the full rights by which with a board of trustees the equality of all religious rights were conferred upon all classes. The missions in Syria were transferred to the Board of Foreign Missions of the Presbyterian Church in the United States of America in 1870. The churches of the American Board are distributed through a territory extending from Mosul, on the Tigris, to Monastir, in Macedonia. They are arranged into four missions, which are known as the Eastern Turkey (Armenia), Central Turkey (embracing the country south of the Black Sea), Western Turkey (Asia Minor), and European Turkey (Constantinople, Eastern Roumelia, Bulgaria, and Macedonia) missions, and include 90 churches with 7,900 members. The Presbyterian Church has 12 churches in Syria, with 716 communicants. The Synod of the Reformed Presbyterian Church of North America has a station at Latakia, with 94 members; the Free Church of Scotland has two missionaries, with 36 members; an independent society has in Syria, of the Friends have 14 members, all in Syria. The Rev. Samuel Gobat, an agent of the Church Missionary Society, went to Palestine in 1841, and was afterwards appointed bishop of Jerusalem. He founded schools, which passed in 1877 under the control of the Church Missionary Society. This society has 12 native Protestant congregations in Palestine, having 1,108 members. Other societies engaged in Palestine are the London Missionary Society, the Jewish Mission of Berlin, the Crischona Mission, and the Kaiserwerth Deaconesses' Association.

The Methodist Episcopal Church has a mission in Bulgaria, begun in 1857, which included, in 1878, 5 stations, 38 members, and 13 probationers. The Disciples of Christ appointed a missionary to Constantinople in 1878. The mission of the United Presbyterian Church of North America in Egypt, after twelve years of development, has 9 churches and 947 communicants. The Protestant churches have in all the empire about 858 preaching-places, more than 100 ordained missionaries with as many churches, and about 10,000 communicants. Besides these, the Jewish mission societies of the Church of England and the Free Church of Scotland, and the Irish Presbyterian Church have stations and schools at Alexandria, Smyrna, Beiruth, Constantinople, Salonica, Adrianople, and Rustchuk. The Protestant religious work is supplemented by efficient schools of every grade. The American Board has 300 common-schools, 16 boarding-schools for girls, and 12 seminaries and training-schools, with a total attendance of more than 11,000 pupils; the Presbyterian Mission in Syria has 84 common-schools, 3 high-schools, and 2 female seminaries, with a total of 4097 pupils, a college, and a theological seminary; the Reformed Presbyterian Mission has 476 day-school scholars; the Society of the British Syrian Schools and Bible Mission, 80 schools and 3000 scholars; and in Syria proper, not including Palestine or Asia Minor, there are 11,000 children in evangelical schools, of whom about one half are girls. In Palestine, there are under the control of the Church of England, the Society for the Propagation of the Gospel, and the British and Foreign Bible Society, 39 Protestant schools, which are attended by Mohammedan, Jewish, Druse, and Samaritan pupils. The United Presbyterians in Egypt have 39 schools, with 8199 pupils, and 6 theological students in the training-schools. The English Church schools at Cairo and Damietta have 258 pupils. In the mission schools, of those of the Synod of Scotland return 1702 Jewish and other than British pupils. At the Syrian Protestant College of the Presbyterian Mission at Beiruth instruction is given in the English language, while the Arabic is taught as a classic. The college has a faculty of 8 professors, and a board of trustees, of which had 28 students in 1877, and which has sent out several graduates, who are practicing as physicians in different parts of the empire. Robert College, near Constantinople, is not immediately connected with any Church organization, but is under Protestant direction, and is supported by a board of trustees composed of citizens of the United States. It has a faculty of 15 instructors, including American, European, Armenian, Bulgarian, Greek, and Turkish professors, and registered, in 1878-79, 151 students, among whom fifteen nationalities and all the religions prevailing in the empire were represented. Instruction is given in the usual collegiate subjects, and in fifteen ancient and modern languages. The college has a library of 6000 volumes. Central Turkey College, at Aintab, is also an independent Protestant institution, in which instruction is given in the branches of science and literature, the English, Turkish, and Armenian languages.

The American Board has a press at Constantinople, and the Presbyterians have one at Beiruth, at both of which religious, educational, and scientific books are published in the languages of the people. The Arabic Bible published at Beiruth is circulated in all Mohammedan countries; the Greek edition, of the friends, is circulated in all the languages spoken in the empire. The whole number of copies of books, tracts, etc., printed at the press of the American Board from the beginning of its operations to 1878 is 2,249,354, comprising a total of 225,989,988 pages, in the Armenian, Armeno-Turkish, Greek-Turkish, 2,300 students, and language of the people; and the whole number of pages printed on the Presbyterian press from the beginning to 1879 is 183,795,027.

The organization of Protestant churches has been generally confined to other than Mussulman populations—chiefly to the Bulgarians, and Armenians. It was until recently a capital offence, by the Turkish law, for a Moslem to become a Christian. More attention is now given to the evangelization of the Turkish population; but the number of Protestant Turks is still very insignificant. The Protstants have acquired a right of resident capacity which the community among whom they live, and have gained their esteem and confidence to a degree that is rarely accorded to persons professing a strange religion. See SYRIA, MISSIONS IN.
also a curious sect of Jews at Salonica called Memim, which signifies "turncoat." They believe in the fourteen sects of Judaism, which Miller in his life became with his followers Mohammedans; but these, again, have their religious differences, and are divided into three sects. They are still Jews at heart, but their trifling with two creeds makes them despised and looked down upon. They marry among themselves only, and live together in a particular quarter of the town. There are others of the same sect in parts of Russia. At Salonic they are Mohammedans in public and Jews in private life. The Jews have no hierarchy, but each congregation is independent, and is governed by its own chief rabbi; but they have a representative head at Constantinople, who, in the dispute of the faith of the Israelish nation in the empire. The khakhambashi at Constantinople has a court or council to assist him in administering both ecclesiastical and civil law. It is divided into two parts—first, the Megillas-i-irshadani, or spiritual council, composed of six grand rabbins, which, as its name implies, deals with questions relating to the Jewish religion; and, second, the Megillas-i-yemamani, or civil council, which deals with questions of civil law, and assists the Turkish courts in any questions relating to Jews. The same organization applies to each grand rabbi, who, in his turn, is assisted by two similar councils. As the Jewish law, like that of the Mohammedan, is explained by the teaching of the sacred books, the establishment of these councils forms a ready means of arriving at a judgment on all religious and civil cases arising in the Jewish community. The khakhambashi takes rank immediately after the Greek and Armenian patriarchs. The Jewish population of the Turkish empire is estimated at 138,000. The poorer are entirely dependent upon the liberality of the upper classes for education and relief in case of want, and the obligation is met in a most commendable spirit. They possess an institution called the 'Universal Israilish Alliance,' with which, in conjunction with the administration of education, etc. In 1875 the alliance had twenty-one schools throughout the empire, which gave instruction to 2094 children of both sexes, and of this number 809 were admitted gratuitously. The teachers of these schools are educated in the Rabbinical Seminary at Paris, and they give their pupils instruction in foreign languages and all the elements of a first-class education. The elementary schools, or talmudora, are crowded with children of both sexes, who are simply taught to read and write" (Baker). The estimates of the Jewish population in the Turkish empire vary greatly. It has already been mentioned that Baker gives his work on Turkey, gives the total number as 138,000, and that in the Asiatic possessions they are supposed not to exceed 50,000. The Servian statistician Jakabitch estimates the Jews in the immediate European possessions at only 55,000, distributed as follows among the several vilayets: Constantinople, 22,943; Adrianople, 18,492; Salonica, 7409; Monastir, 2566; Kossovo, 1238; Yanina, 4085; Creté, 3200—total, 55,018. The same statistician gives the number of Jews in Roumelia at 3965, in Bosnia at 6068, in Bulgaria at 8599—total in the Balkan provinces 18,634. In the African dependencies, the Jews are chiefly represented in Tunis, where they are supposed to number 45,000 souls. See Jews.

There are a number of sects peculiar to Turkey. The most prominent among them are the Auransias (q. v.) and the Devis. The number of gypsies is estimated at about 300,000.

VII. Literature.—For information on the religious denominations of Turkey, see Baker, Turkey (London and N. Y. 1878); Audouard, L’Orient et ses Peuples (Paris, 1867); Zur Helle von Samo [a Mohammedan dervish, precursor of the Ascetic, or Diplomat provisional state of the Kösher or Moslem emperors of the Ottoman Reiches (Vienna, 1877)]; Ubechini, Études Historiques sur les Populations Chrétienes de la Turquie d’Europe (Paris, 1867). (A. J. S.)

**Postscript.—** Since the above was in type, the political situation of Turkey has undergone no material change. The Turks at all times have much opposition to carrying out the provisions of the treaty of Berlin that a naval demonstration by the great European powers in the Archipelago became necessary in order to compel the surrender to Montenegrin of Dulegino, a seaport of Albania, on the Adriatic. Meanwhile both Greece and Turkey have been preparing for another war. While their military preparations, both parties declaiming the mediation of the other powers; but as none of these seemed disposed to aid either of the contestants, the latest advices (April, 1881) are that a compromise of the boundary question will bepeaceably effected (by the absolute cession to Greece of certain small points of dispute). The present important event is the partition of Bosnia and Herzegovina (Thessaly, as suggested by Turkey and recommended by the other governments), and that thus a new lease of life, for a short time, will be granted to the Turkish rule in Europe.**

**TURKEY, VERSIONS OF.** There exist a great many translations of the Scriptures which are used throughout the Turkish empire, but do not properly belong to Turkey alone, as the following list of versions, furnished to us by the Rev. Dr. A. W. Thomson, agent of the British and Foreign Bible Society at Constantinople, will show: Albanian, Gheg. | Judæo-Polish.
---|---
Arabic | Kardish.
Armenian, Ararat. | Kurdish, Armeno.
Armenian, Modern. | Meliss.
Assyrian | Roumanian.
Bulgarian, General. | Russ, Modern.
Bulgarian, Eastern. | Servian.
Bulgarian, Western. | Srylic, Modern.
Croatian | Turkish.
Greek, Modern. | Turkish, Armeno.
Hebrew | Turkish, Greek.
Judæo-German. | Turkish, Greek.

These versions have already been treated, more or less, in separate articles, or will be found in their proper order in the Supplement. Some of the most important translations—such as the Arabic, Turkish, Bulgarian, and Armenian—have been prepared entirely by American missionaries; and it is very interesting to know how their work is appreciated and regarded by scholars of other countries. The British Quarterly Review, in its January number, 1878, after speaking of the work done by Americans in the Turkish empire in respect to the Bible, literature, art etc., observes that "the moral, religious, and intellectual practice, and the improved condition of woman, thus goes on concerning the Bible translations:"

"The most important contribution, however, which the Americans have made to the literature of Turkey is found in the various versions which they have made of the Christian Scriptures. These translations are worthy of special notice, because, apart from the religious influence of the Scriptures, they are making a marked impression upon the intellectual life of the various nationalities of Turkey. Fifty years ago there was no version of the Scriptures in any one of the modern languages of that country. The task of making these translations was not an ordinary one. Regard must be had, on the one hand, to the uneducated classes—the style must be such that the common people would readily understand the meaning; on the other hand, in regard to the educated classes—the style must be sufficiently elegant and idiomatic to commend itself to the taste of those who are proud of the literary excellence of their ancient tongues. The Americans may fairly claim that they have succeeded in this difficult task, in respect, at least, to four of the important languages of the country. We refer to the modern Armenian, the Arabic, the Turkish, and the Bulgarian. The Turkish versions have varied somewhat, according to the department to which they were adapted, and we do not see why the Greeks, or the Osmanli Turks, could not with profit make use of the Arabic, or the Osmanli Turkish. The preparation of the entire Bible in the Aramaic-Turkish language is a tremendous work. A Turkish language written with the Armenian character was the life-work of the late William Goodell, D.D. The Rev. Dr. Higgins appears to have given many promisses of a medical version of a session of the Scriptures in the Arabo-Turkish, or Turkish written with the Arabic character; while at the present time a permanent version of which the Rev. Dr. Riggers is chairman, is engaged in an attempt to rectify all the Turkish versions of the Bible, and form one which may meet with the approval of all.
TURKEY, VERSIONS OF

The translation of the Scriptures into Arabic is the result of the labors of two accomplished American scholars—Rev. Robert D. and Rev. D.D. and Rev. D.D. We are assured by many who are capable of judging that this Arabic version of the Scriptures is worthy of the highest respect, and that it reflects great credit on the scholarship of the translators. The same is said of the translations of the Bible that have been made into modern Armenian by Rev. D.D. We cannot forbear quoting an extract from a letter from Dr. Riggs in regard to the time spent on this branch of his work: "In regard to the Armenian Bible," he says, "it is largely devoted to the Armenian and Bulgarian translations of the Bible. In the Armenian translations there were two small editions, intended partly to supply the existing demand and partly to secure criticalism and to leave room for correction. There is a considerable difference of opinion among scholars as to which of the two editions I gave most of my time for seven years, and to the Armenian more than half my time for eleven years. How long our committee will take to complete the Turkish version it is quite impossible to say. We spent a year on the four gospels. When we remember that these translations are all made from the original Hebrew and Greek; and when we remember, also, that the translations, when put in their permanent form, have been commended by the best Arabic, Turkish, Bulgarian, and Armenian scholars of Turkey; and when we recall, also, the great obstacles which the translators met in the first line through the press at Constantinople and Beirutt, we cannot refrain from expressing our appreciation, not only of their scholarship, but of the perseverance, diligence and steadfastness of purpose; and we are convinced that generations of men yet to come will join in this hearty commendation."

This speaks well of the work performed by these American scholars. For reasons stated above, we have confined ourselves in this article to the Turkish version properly so called, and to its transcription into the Armenian and Greek characters.

Tartar and the Scyghow, in its numerous dialectic varieties, is more or less diffused through the vast regions which extend from the Mediterranean to the frontiers of China, and from the shores of the Frozen Ocean to Hindustan. The nations to which this language is vernacular have acted an important part in history, and though their power has now declined, and the Crescent has fallen like a star from heaven, yet a member of this race still occupies the throne of Constantine. The peculiar dialect of this language to which the name of Turkish is generally, by way of pre-eminence, applied is spoken in European Turkey by the Turkish, and in Asia Minor by the Turks, and this language which can be employed as a general medium of communication with all the various kindsred of people inhabiting European and Asiatic Turkey. The most ancient Turkish alphabet is the Ougour, from which the Mongolian is derived; but the modern Turks use the Arabic alphabet, the pronunciation of which alphabet consists of thirty-three letters, twenty-eight of which are Arabic, four are Persian, and one is peculiar to the Turkish. Like most Oriental languages, Turkish is written and read from right to left. Two versions of the Scriptures in kindred dialects of the Turkish language have been composed about the same period. One of these versions, executed by Seaman, and printed in England in 1666, will be noticed in the Supplement, under KARASS. The other, comprising both the Old and the New Test., was the work of Ali Bey, whose history is rather remarkable. His original name was Albertus Bergius; he was born in Poland, in the beginning of the 17th century, and while a youth was stolen by the Tarts and sold as a slave in Constantinople. After having spent twenty years in the scraglio, he publicly embraced Mohammedanism, at the same time assuming the name of Ali Bey. He was then a Mohammedan, but he was not satisfied. He went to Constantinople, and there he turned Mohammedan IV, and was said to be thoroughly conversant with seventeen languages. At the suggestion and under the direction of the famous Levin Warner, then Dutch ambassador at Constantinople, Ali Bey was induced to translate the catechism of the Church of England into Turkish, and afterwards betook himself to the translation of the entire Scriptures into Turkish. The study of the sacred volume was not without effect on the translator; for it is recorded that Ali Bey entertained thoughts of returning to the Christian Church, and was only prevented by death from accomplishing his design. When the version was nearly finished and ready for printing, it was sent by Warner to Leyden to be printed. It was deposited in the archives of the university of that city, and there it remained for a century and a half, until Baron Von Dize, formerly Russian ambassador at Constantinople, drew the attention of Europe to this long-neglected translation. He offered to send Ali Bey to the MS. to the committee of the British and Foreign Bible Society; and, meeting with great encouragement to prosecute his design, Dr. Dize immediately addressed himself to the revision of the Old Test. When four books of the Pentateuch were revised he died, and the work of revision was transferred by the committee to Kieffer, professor of the Turkish language at the University of Paris and interpreting secretary to the king of France. The new editor disapproved of the plan pursued by his predecessor, particularly his insertion of vowel-points, and he therefore commenced the work anew, agreeing to the authorization of the committee in the New Test. He followed the text of the MS. implicitly, without collating it with the original Greek; and thus several errors in the text were inserted in the printed copies, which were, however, soon detected, and gave rise to a printed correction. The committee, immediately on discovering the errors, were examined and corrected by a sub-committee, and Prof. Kieffer commenced a laborious and thorough revision of the text by collating every portion, not only with the original, but with the English, German, and French versions; with the Tartar of Seaman, and of the Scotch missionaries at Kassa; with the versions of Erpenius and of Martyn; and with those in the London Polyglott. The revision was carried on from 1820 to 1828, when the entire Bible, with the embodied corrections, was completed, and obtained the attestation of the most eminent Orientalists in Europe. The work was printed by Pede and Kieffer in 1828, and the original MS. was afterwards returned to Leyden. An edition of the Turkish New Test., carefully revised by Mr. Turabi under the superintendence of Dr. Henderson, was completed by the society in 1838. A subsequent revised edition was printed in 1857. A new and improved edition, by Dr. Schaufus, was published in 1861, and the New Test. was printed in 1866. In 1867 the Psalms followed, to which were afterwards added the Pentateuch and Isaiah. These are, at present, the parts published of Dr. Schaufus's translation. The entire Bible was completed in 1873. "This work," says the "Aannual Report of the British and Foreign Bible Society for the year 1873, is of a somewhat extraordinary character, requiring rare powers of scholarship for its execution. It has occupied many years, and the translator has devoted to it the most conscientious and untiring application. It has been the one thing to which his mind and learning have been consecrated. The question has been frequently mooted, and is again under discussion, whether a distinct translation in Turkish is to be published with exclusive reference to the Osmanis, or whether one and the same text may not be made available both for Osmanis and for other nationalities speaking the Turkish tongue, but reading to different characters. The latter was the object proposed when the translation of Dr. Schaufus was commenced; but the views of the translator became modified in the very early stages of his work, and he has aimed to adapt his translation in style to the taste of the Osmanis, believing that the Osmanis speaking Turkish is too coarse and degraded to be met by a version acceptable to the Osmanis. It is, moreover, alleged that the different nationalities employ the same terms frequently in widely different senses. This view does not elicit the sympathy or endorsement of many of the missionaries, who still hold to the theory
TURKEY, VERSIONS OF

that one text should suffice for all classes, and that two versions would be injurious to the cause of divine truth, on the ground that it might, with some show of propriety, be objected that Professor Buxtorf had an able hand and a rich one, and another for the poor and unlearned. It is further contended that the necessity for distinct texts does not exist; that the style of Turkish spoken by the Christian populations has materially improved in dignity, although not level with that of the Quaranic style. It is added, that the translators have taught them to something higher by means of a version of the Scriptures in pure idiomatic Turkish, without being cast in too lofty and artificial a mould. In order to bring the whole question to some practical and satisfactory solution, it is proposed that a new committee be formed to include the best Turkish scholars of the day, Dr. Schaffler shall be president, and to which the examination of his translation shall be submitted; and that authority be given to call in the aid of such literary offenders as may be judged desirable. The committee of joint revisers was formed; but, states the Report for 1874, "after a short experiment the venerable translator (Dr. Schaffler) resigned his position on the Board of Revisers, and handed over the MS. of the Old Test. to the agents of the British and Foreign and of the American Bible Society, at whose expense the translation has been made. It is proposed that Professor Buxtorf has one Bible that the forthcoming Turkish Bible will be based on Dr. Schaffler's work, so that if he should have to regret that the whole will not be printed exactly as it leaves his hand, yet he will enjoy the satisfaction of knowing that he has contributed in a pre-eminent degree to this work, which was the fondest object of his later years; and that his name will go down to future generations associated with one of the hardest tasks ever attempted—the translation of the whole Bible into Osmanli Turkish. " As to the work of the committee, we read in the Annual Report of the British and Foreign Bible Society for the year 1879 that the translation of the New Testament has been completed, and the version may be fairly considered a new translation. The committee began their work in June, 1873, and the last words of the Old Test. were written at eleven o'clock on May 25, 1878. The object of the committee was to produce a complete Bible for the Turks, which would be simple in language and idiom, and intelligible to the uneducated and acceptable to the learned. The committee was composed of the Rev. Dr. Schaffler (who soon retired from the committee), Dr. Riggs, the Rev. R. H. Weakley, and the Rev. G. F. Herrick, and these called to their help the Rev. John Anderson, pastor of the Roman Catholic Church, and two Turkish scholars, one of whom soon withdrew, and was replaced by a very learned man from the banks of the Tigris. One of these Turkish assistants became a first fruit of the new version. The New Test. was first printed (Constantinople, 1877), and a second edition, in smaller form, was ready in time to send to Russia for the Turkish prisoners; and the printing of the Old Test. was completed in December, 1878. The Turkish government, to prevent the publication of the version, insisted that each copy should bear the imprimitur of the Imperial Council of Public Instruction, so that the copies go forth with the permission of the Turkish government; and what was meant for a hindrance has turned out to the furtherance of the work. The American Bible Society has shared with this society the labors and expenses of this great work. As to the MS. of Dr. Schaffler, which, as has been stated above, was handed 40 years ago to the British and Foreign Bible Society, the translator has completed his final revision. "The parts," states the same report, "were not ready in time to be used by the revision committee, as had been intended. The MSS. of the Old Test. (except the Pentateuch and Isaiah already published) are now deposited in the British and Foreign Bible Society, House, New York, to the joint account of the British and Foreign and the American Bible Society." 

II. Turkish-Armenian. This is, properly speaking, a Turkish version, but printed in Armenian letters, and accommodated to the dialectic peculiarities which prevail among the Armenians of Asia Minor. A Turkish version in their peculiar dialect, and written in their characters, was commenced in 1815 by an Armenian archimandrite named Seraphim, in concert with another Armenian. An edition of five thousand copies of the Testament was printed at St. Petersburg in 1819. Mr. Leaves, the British and Foreign Bible Society, devoted much time and trouble to the preparation of a revised edition. The work was afterwards taken up by the missionaries of the American Board of Missions; and in 1843 the entire Scriptures were printed in Smyrna at the expense of the American Board. The translation was revised by the Rev. W. Goodell. Subsequent editions of the Armenian-Turkish Scriptures have been printed at the American Mission press on behalf of the British and Foreign Bible Society.

III. Turkish-Greek This, like the preceding version, is Turkish, but printed in Greek letters. In 1782 the Psalms, translated into Turkish by Seraphim, metropolitan of Karamania, were printed in Greek letters; and in 1810 a Turkish version of the Acts and Epistles was printed in the same character at Venice. In consequence of inquiries instituted in 1818 by Dr. Pinkerton, respecting the manuscript of the ancient Lydia, Caria, Lycia, Phrygia, Pisidia, Cilicia, and Lycaonia, it was ascertained that these poor people are all Greeks or Armenians, acquainted with no language but that of their Turkish masters. As they were unable to read or write except in their native characters, the British and Foreign Bible Society published the Turkish Testament in Greek letters, the translation having been made by Moses Goodell and Bird. This edition was printed at Constantinople in 1828. In order to make it more conformable to the provincial mode of speaking Turkish which prevails among the Greek translation of Dr. Anderson, Mr. Leaves, agent of the society, undertook a new and revised version, assisted by Mr. Christo Nicolaides, of Philadelphia, who joined Mr. Leaves in 1832, and from that period to 1839 was uninterruptedly employed in the undertaking. The printing of the entire Bible was commenced at Smyra, and afterwards transferred to Athens. In 1865 the Psalms, revised with great care under the editorial superintendence of the Rev. Dr. Riggs, passed through the press; and in 1870 the whole Bible, with marginal references, was published in Constantinople. See, besides the Bible of Every Land, the Annual Reports of the British and Foreign Bible Society, published by that society, The Bible Work of the World (London. 1879). (B. P.)

Turpinia, the French name for the Brethren of the Free Spirit (q. v.). The origin of the word is unknown, though it is thought to be connected with wolfish or predatory habits.

Turner, Daniel, an English Baptist minister, was born at Blackwater, Hertfordshire, March 1, 1710. He first settled at Reading, and after devoting some years to school-teaching, became, in 1748, pastor of the Baptist Church in Abingdon, Berkshire, which position he filled till his death, Sept. 5, 1758. Many of his publications were highly approved; among them were, Compass of Moral Religion (1758, 8vo) — Letters Religious and Moral (1766, 8vo) — Meditations on Scripture (Abing. 1771, 12mo) — A Synopsis of the Leading Principles of the Essays on Religion (1780, 2 vols.; Oxford, 1783, 2 vols., 12mo) — Expositions on Scripture (London, 1790, 8vo), See Chalmers, Biog. Dict. s. v.; Allibone, Dict. of Brit. and Amer. Authors, s. v.

Turner, Francis, an English prelate of the 17th century, received his education at Winchester School, graduated at New College, Oxford, April 14, 1659, and took his degree of B.A. in the same year. He received in 1668 his degree of D.D. July 6, 1669, and in the following December was collated to the prebend of Sneating, in
TURNER 597

St. Paul's. He succeeded Dr. Dunning to the see of Chichester, and followed him in the mastership of St. John's College, Cambridge, April 11, 1670. In 1683 he was made dean of Windsor; was consecrated bishop of Rochester, Nov. 11; and Aug. 23, 1684, was translated to the bishopric of Ely. He was one of the six bishops who were deprived of their sees byishop Sancroft, Dec. 1700, 1695, in refusing to read the Declaration for Liberty of Conscience, and with them was committed, June 8, to the Tower, but was acquitted on the 29th. Refusing to take the oath when William and Mary ascended the throne, he was deprived of his bishopric, and lived in retirement till his death, Nov. 3, 1707. He wrote, The Vindication of the late Archbishop Sancroft and his Brethren, etc.—Aims and animosities on the Naked Truth:—Letters to the Clergy of his Diocese:—Brief Memoirs of Nicholas Ferrar (2d ed. 1837, 12mo):—Sermons (1861—86). See Bliss's Wood, Athen. Oxon. iv, 540; Burnett, Own Times; Macaulay, Hist. of England, ch. xiv, xvii, xviii; Chalmers, Biog. Dict. s. v.; Allibone, Dict. of Brit. and Amer. Authors, s. v.

TURNER, James (1), a Presbyterian minister, was born in Bedford County, Va., May 7, 1759. He was converted in 1789, licensed to preach in 1791, and ordained and installed as colleague pastor with the Rev. James Mitchell, July 22, 1798, in what was then called the Peaks of Otter Congregation. He also took charge of the New London Congregation. Here he spent the whole of his ministerial life, and died, Jan. 8, 1828. He was exceedingly attractive as a preacher; a man of real genius; acknowledged to be unrivaled among the clergy of Virginia in his power over the passions of men. See Sprague, Annals of the Amer. Pulpit, iii, 581; Foote, Sketches of Virginia, 2d series.

TURNER, James (2), an English Congregational minister, was born at Oldham, March, 1782. He was educated at Rotherham College, and ordained at Knutsford in 1808, which place became the chief centre of his exertions. He was for years secretary of the British and Foreign Bible Society and the Cheshire Union of Independent Ministers. His judgment and clearness of mind were often consulted in private business, and great confidence was reposed in him. He died May 22, 1863. See (Lond.) Cong. Year-book, 1864, p. 248.

TURNER, Jesse H., a Presbyterian minister, was born at Warrenton, Jan. 1, 1817, was educated in Hampden Sidney College, Va.; studied theology in the Union Seminary, Prince Edward, Va.; was licensed by Hanover Presbytery and ordained by the same in 1813. He began his labors as a missionary in Richmond, Va.; he subsequently preached at Fayetteville, N. C.; Manchester, Ten. County, and Hanover County, Va. He died at Oldham, March 13, 1863. He was a sincere, good man, and successful as a preacher. See Wilson, Presb. Hist. Almanac, 1867, p. 454.

TURNER, Joseph M. W., an English painter, was born at 26 Maiden Lane, Covent Garden, London, April 20, 1775. He became a student, in 1795, of the Royal Academy, and as early as 1796 was elected an associate of the Academy, becoming three years after a full academician. In 1807 he was elected professor of perspective, but failed on account of literary qualifications. He travelled in Scotland, France, Switzerland, and the Rhine countries, and paid three visits to Italy. He died at Chelsea, Dec. 13, 1851. He bequested a noble collection of his works to the nation, and they were placed in a room in the National Gallery. Among his many works we notice, The Fifth Plague of Egypt:—Tenth Plague of Egypt:—A Holy Family. He also wrote a poem, The Fulfilments of Hope. See Ruskin, Modern Painters; Thackeray, Life of Turner (Lond. 1862, 2 vols.; new ed. 1874).

TURNER, Nathaniel, a Congregational minister, was born at Norfoik, Conn., in 1771; graduated at Williams College in 1798; studied theology with Dr. Catlin; was ordained over the Church in New Marlborough, Mass., in 1799; and died May 25, 1812. See Cong. Quarterly, 1859, p. 46.

TURNER, Peter, an English Congregational minister, was born at Wolverhampton in 1808. His parents were Wesleyans, and it was in connection with that body that he began to labor, at the age of eighteen, as a local preacher. He continued a liberal and zealous member of the community, and in 1842 was admitted to the Independents, and in 1851 accepted the pastorate of the Independent Church at Evesham, Worcestershire. In 1856 he removed to Southampton, and labored with the Congregational Church until his death, July 26, 1861. Mr. Turner was very devoted to his people and his pulpit ministrations were highly prized by all who knew him. See (Lond.) Cong. Year-book, 1862, p. 257.

TURNER, Samuel Hulbeart, D.D., an eminent Episcopal clergyman and scholar, was born in Philadelphia, Pa., Jan. 23, 1790, and graduated at the University of Pennsylvania in 1807. He was ordained deacon in 1811, and priest in 1814; was pastor of a church at New Haven, Conn., from 1814, where he was professor of Greek and Hebrew literature, and in 1816, when he was professor of history in the General Episcopal Seminary, New York, Oct. 8, 1818. He continued with the institution during its stay in New Haven, Conn., and returned with it to New York in 1821. On Dec. 19 he took the chair of Biblical learning and interpretation, and studied the Scriptures, and resigned under his health, Dec. 21, 1831. He was also professor of Hebrew language and literature in Columbia College from 1831. He was the author of Notes on the Epistle to the Romans (N. Y. 1824, 8vo):—with Dr. Whittingham, Introduction to the Old Testament, trans. from the Latin and German of John John (1827, 8vo):—Introduction to Sacred Philology and Interpretation, trans. from the German of Dr. G. J. Planck (Edinb. 1834, 12mo):—Companion to the Book of Genesis (N. Y. 1841, 8vo):—Biographical Notices of Some of the Most Distinctly Adherents, 8vo, 1847, 12mo):—Travel and Observations Illustrative of the New Testament (1848, 12mo):—Essays on Our Lord's Discourse, etc., John vi (1851, 12mo):—Thoughts on the Origin, Character, and Interpretation of Scripture Prophecy (1852, 12mo):—Epistle to the Hebrews, in Greek and English (1852, 8vo):—Epistle to the Hebrews (1853, 8vo):—Sacred Euphemisms (1856, 8vo). See Autobiography of Samuel H. Turner, D. D. (1862, 12mo); Amer. Quar. Church Rev. 1862, p. 734; Allibone, Dict. of Brit. and Amer. Authors, s. v.

TURNER, Sharon, an English author, was born in London, Sept. 24, 1768. After many years' practice as an attorney in the Temple, he retired, in 1829, to Winchmore Hill, where he resided until a few weeks before his death, which occurred in London, Feb. 13, 1847. Mr. Turner is best known by his History of England from the Earliest Period to the Death of Elizabeth, etc. (Lond. 1799-1805). He also wrote, History of Henry VIII, etc. (1836, 4to):—History of the Reigns of Edward V, and Henry VII, etc. (1892, 4to):—Sacred Meditations and Devotional Poems by a Layman (1810, 12mo):—The Sacred History of the World, etc. (1852, 3 vols. 8vo). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

TURNER, Thomas, D.D., an English divine, was born at St. Giles, Huckfield, in 1591. He was educated at St. John's College, Oxford, and in 1623 was presented by his college to the vicarage of St. Giles's in Oxford. Land, when bishop of London, made him his chaplain, and in 1629 collated him to the prebend of Newington, Church of St. Paul, and in October following to the chancellorship of the same church. Charles I made him his own chaplain, and appointed him one of his chaplains in ordinary, giving him the rectory of St. Olave, Southwark, with which he held the rectory of Fetcham, Surrey. At the request of Charles I he accompanied that prince to Scotland to
be crowned. In 1641 he was preferred to the dean-
ry of Rochester, but on the death of the king he
was stripped of his prebends and treated with in-
dignity. At the Restoration he entered the deanery
of Canterbury, August, 1660. He died in October,
1672.

Turner, William, an English divine, was born
near Broad Oak, Flintshire, and for some time previous
to going to Oxford he was an inmate of the house of
Philip Henry, father of Matthew, the commentator.
He took his A.M. at Edmund Hall, Oxford, June 8,
1675. Becoming, afterwards, vicar of Walborton,
in Sussex, he resided there in 1697; but the date of
his death is uncertain. He published, a History of All
Religions (Lond. 1685, 8vo.): Complete History of the
Most Remarkable Providences, etc. (1697, 5th.). “This
curious collection ranks with the similar performances
of Clark, and Wanley in his History of the Little World,
but is superior perhaps to both in selection and conci-
ceness.”

Turner, William Hindley, an English Congre-
gional minister, was born at Beeston, Leeds, in 1787.
He was educated at Rotherham College, and became an
exceedingly popular preacher. Mr. Turner's first settle-
ment was at Bury, and after seven years' efficient
work he removed to Hindley, where he built up a prosperous
and mainly ministry. In 1802 growing infirmities led
him to resign the stated ministry. He was a disin-
interested, devoted, and faithful minister of Christ. He
died Dec. 8, 1866. See (Lond.), Cong. Year-book, 1870,
p. 514.  

Turpinus, in ancient Italian mythology, was the king
of the Rutuli, and a son of Damus and Venilia, who was
a niece of queen Amata, wife of Latinus. Her daughter
Lavinia, having been destined by fate to Æneas, was
the subject of dispute between the Trojans and the
Latins, in which the former were victorious. Turinus,
after many wild battles, was finally killed in a duel
with Æneas.

Tertu-pline-tree (τριτυλις Ἐος, τριτυλις Ἁσα; Vulg.
terebinthus) occurs only once, viz. in the Apocrypha
(Eccles. xxiv, 16), where wisdom is compared with the
“tertulphine-tree that stretcheth forth her branches.”
The Ῥιπτυλις Ἐος or Ῥιπτυλις Ἁσα of the Greeks is the
Pistacia terebinthus, terebinth-tree, common in Palestine
and the East, supposed by some writers to represent
the elah (ףֶלַח) of the Hebrew Bible. See OAK. The
terebinth, though not generally so conspicuous a tree in
Palestine as some of the oaks, occasionally grows to a
large size. See Robinson (Bibl. Res. ii, 222, 223), who
thus speaks of it. “The buttin” (the Arabic name of
the terebinth) “is not an evergreen, as often represent-
ed, but its small lance-shaped leaves fall in the au-
tumn, and are renewed in the spring. The flowers are
small, and followed by small oval berries, hanging in
clusters from the tree to five inches long, resembling much
those of the vine when the grapes are just set. From
incisions in the trunk there is said to flow a sort of
transparent balsam, constituting a very pure and fine
species of turpentine, with an agreeable odor like citron
or jessamine, and a mild taste, and hardening gradually
into a transparent gum. In Palestine many trees are
said to be known of this product of the buttin!” The tere-
binth belongs to the natural order Anacardiaceae, the
plants of which order generally contain resinoso secre-
tions. See TEREBINTH.

Turpin (or Telpin), a French prelate of the 8th cen-
tury, of whose early history nothing definite is known,
was a monk of St. Denis, and became bishop of Rheims
probably in 758, after a long opposition by Milon. He
was one of the twelve French bishops present in 769 at
the council called at Rome by pope Stephen to condemn
the antipope Constantine. About 786 Turpin founded
a chapel dedicated to St. Denis, which afterwards became
an abbey. See Nov. Sept. 2, 900.

binth belongs to the natural order Anacardiaceae, the
plants of which order generally contain resinoso secre-
tions. See TEREBINTH.

Turpin, Thomas D., a Methodist Episcopal minis-
ter, was born in Somerset County, Md., June 30, 1805.
He was converted Sept. 8, 1828; licensed to preach Sept.
12, 1827; admitted on trial in the travelling connection
Feb. 7, 1829, and was appointed to Union Circuit; in 1830,
to Pendleton; in 1831, to the Savannah mission; in 1832,
to the Black Swamp Circuit; in 1833, to May and New
River; in 1834, to the Watmomate and John's Island
mission and Orangeburg Circuit; in 1835, to Poo Dee;
in 1836, to Laurens; in 1837, again to Pendleton; and
in 1838, to the Cambridge and Flat Woods mission,
where he died, July 26, 1838. See Minutes of Annual
Conferences, ii, 555.

Turquoise, a Persian gem of a peculiar bluish-
green color, which was very generally used in the Mid-
dle Ages for the adornment of every species of sacred
vessel, e.g. the chalices, ciborium, altar-cross, mitre,
and pastoral staff.

Turret, Toulret, or Turrette, a small tower:
the name is also sometimes given to a large pinnacle.
Turrets are employed in Gothic architecture for various
purposes, and are applied in various ways; they also differ
very greatly in their forms, proportions, and decorations.
In many cases they are used solely for ornament; they
are also often placed at the angles of buildings, especially
castles, to increase their strength, serving practically as
corner buttresses. Occasionally they carry bells or a
clock, but one of the most common uses to which they
are applied is to contain a novel, or spiral staircase: for
this purpose they are usually found attached to church-
towers, forming an external projection, which very fre-
quently terminates considerably below the top of the
tower; but in some districts turrets of this kind generally
rise above the tower, and are finished with a parapet
or small spire. Turrets of all dates are sometimes per-
fectly plain and sometimes variously ornamented, ac-
cording to the character of the prevailing style of archi-

TURRETINI

ing the Instituttio Theol. Elenchica, were reprinted at Edinburgh in 1847 sq.

Jean Alphonse Turrénot, or François, was born in 1671, and became the pupil of the Cartesian Chouet and of the Armenianizing Louis Tronchin (q. v.) at Geneva. In 1691 he went to Holland to study church history under Spanheim, and in 1692 he visited England, where he became acquainted with Newton and acquired the English language. On his return to the Continent he sojourned for a time in Paris, and was admitted to the society of men like Bossuet, Mabillon, Malebranche, etc. He availed himself of this opportunity to study Arabic under the tuition of the abbé Languema. In Geneva he was received into the ministry at the age of twenty-two, and soon afterwards into the Venerable Compagnie des Parleurs. His ability as an orator at once commanded attention. He was accustomed to follow the English practice of presenting to the view a leading truth or duty; but he made the application of his discourse with greater unce- mony than the English speakers cultivated, and by thus combining the methods of the Genevan and the English pulp it he became the originator of a new method. The arrangement of his sermons was natural and logical, his statement clear and manner dignified. In 1697 he was made professor of church history, and in 1701 became rector of the academy. The latter honor was conferred upon him ten times, to which fact we are indebted for ten important addresses delivered on the successive days of promotion. He followed Tronchin, in 1705, as pro- fessor of systematic theology, though retained in his own (historical) chair. He wrote upon almost the whole of dogmatics, and connected with these labors exegetical lectures on parts of the New Test.

The influence of Turrénot was especially apparent in the management of the enterprise to bring about the abrogation of the Helvetic Consensus as a binding formula. He kept it before the Venerable Company, the council, and the Two Hundred until a majority were gained over to that project; and he induced Wake, archbishop of Canterbury, to urge the abroga- tion upon leading men throughout Switzerland, and also to persuade the king of England to press his appeal to the cantons in behalf of the same measure. He was also prominent in promoting fraternal relations between Lutherans and Reformed Christians in Geneva, in recognition of which fact he was made a member of the Royal Academy of Berlin, and awarded a gold med- al by the Prussian king.

The principal theological works of Turrénot, from which his tendency may most readily be learned, are, Nubes Testum pro Moderato et Pacifico de Rebus Theol. Judicium et Instituenda inter Protestantas Concordia (1725), with a dissertation on the fundamental articles he describes as "quorum cognitione atque fide a Dei gratiam salutemque obtin- deniam necessaria est". This dissertation exposed Turrénot to attack from two different directions: first, from the Jesuit De Pierre, Lyons, 1728, who sought to show that the later Church had no right to renounce the communion of the Church of Rome than that of the Lutheran Church; and, second, from Crin- sons, Protestant pastor of Bionnes, 1727. A second and more important work is his Cognitiones et Dissertations Theologicae, in which he displays a liberal type of orthodoxy, though still retaining the emphases of the natural theology in genuine Reformed fashion, but holds that revealed religion has for its object merely the sup- plplementing and completing of what natural religion

lecture, the upper part being the most enriched, and not unfrequently formed of open-work. In the Norman style the lower part is usually square, and this form is sometimes changed to a polygon or circle. Few turrets of this date retain their original terminations, but they appear to have been often finished with low spires, either square, polygonal, or circular, according to the shape of the tur- ret. In the Early English and later styles they are most usually polygonal, but are sometimes square, and oc- casionally circular. The upper terminations are very various; in the Early English style spires prevail, but in the Decorated and Perpendicular not only spires, but parapets, either plain, battlemented, panelled, or pierced, and pinnacles are used. The peculiar kind of turrets often found attached to small churches and chapels, which have no towers to receive the bells, is designated by the term Bell-gable. See Spires; Towers.

Turrénot, the name of a family of theologians of Geneva, whose ancestor, Francis Turrénot or Turretini, the son of a gonfalonier of Luco, was expropriated on account of his religion. He came to Geneva in 1579. Among his descendants three men deserve mention in this place.

1. Benedictus was born in 1588 at Zurich, became pastor at Geneva in 1612, and professor of theology in 1618. In 1620 he represented the Church of Geneva at the national synod of Alais, which introduced the decrees of Dort into France, and in the following year he was sent to Holland and the cities of the Hanseatic League to solicit aid towards fortifying Geneva, a task in which he was eminently successful. He died in 1631, leaving to the world a number of sermons and theological writings. See Leis, Allgem. hist. Lexikon, xviii. 375.; Senebier, Hist. lit. de Genera, ii. 186.

2. François was born in 1623, became pastor of the Italian congregation at Geneva, and in 1658 professor of theology. He was sent to Holland on a similar mission to that formerly undertaken by his father, Benedicto. He is particularly known as a zealous opponent of the theology of Saumur [see Amyraut], and defender of orthodoxy in the sense of Dort. He was also one of the originators of the Helveticus Consensus (q. v.). He left numerous works, the more important of which, includ-

TURTLE

teaches. He recognises the existence of mysteries in revealed religion, but zealously rejects foreign and scholastic additions in theology. With respect to the doctrine of the divine decrees, he avoids, as he does everywhere, all extreme statements, but lays hold on the elements of practical utility in the teaching. With reference to the doctrine of Divine Providence, he represents it by the analogy of the active power of a man. He followed that philosopher also in his rejection of innate ideas. The Cognitiones contained much apologetical material, and earned for their author an honorable place among apologists (see Pelt, Encyclop. p. 391). The form in which his apologetical ideas were given to the French readers by Vernet of P. P. should be noted, revised and altered, in the first editions with the author's consent, as Vernet claimed; but the improvement progressed with each successive edition, and Vernet clearly reveals the delam of the 18th century in his work.

In 1725 Turrutini was commissioned to deliver the so-called Clôture des Promotions, an address in the French language, together with the charge prescribed by the laws for the occasion, when the Two Hundred and the General Assembly of citizens were to elect the principal magistrates of the State. The twenty-five addresses which he delivered to these bodies were highly commended because of the striking and practical ideas with which they were filled. He also took active part in the improvement of the liturgy, in the ordering of week-day services, in the publication of a new edition of the French New Test. (1736), in the forming of a society for the religious instruction of youth, and finally in the introduction of the public confirmation of catechumens. He rendered important services to the churches of Hungary, Transylvania, the Palatinate, and the Waldenses, and maintained an extensive correspondence with Switzerland, England, Holland, Germany, etc. George II of England and his consort honored him with expressions of their favor, and employed him in works of benevolence. His last years were disturbed by the troubles of Geneva in 1734. He died May 1, 1787. After his death were issued from the press his Comment. Theoret.-pract. in Ep. ad Thessalon. (Basle, 1739) — Prælectiones on Roman xi (Geneva, 1741)— and a tractate on the exposition of Scripture (Berlin, 1776). A complete edition of his works appeared in 1775.

Turrini, in the mythology of the Finns, was a god of war and hunting, living in steep rocky caverns, and was worshipped as the god of the nation.

Turtigóra (or Turtita) (tower-bearer or towered), in Roman mythology, was a surname of Cybele.

Turselin (Lat. Tursellinus), Horace, a learned and indefatigable Jesuit of Rome, was born in 1546, and taught rhetoric in that city twenty years, and was rector of several colleges. He promoted the study of belles-lettres in his society, and died at Rome, April 6, 1599. His principal works are, Life of St. Francis Xavier (best ed. 1596, 4to). — History of Loretto (8vo). — Treatises on the Latin Particles: Abridgment of Universal History from the Creation to 1598, etc. (best editions are those which have a continuation by father Philip Briet, 1618-61. The best French translations are by abbé Lagneau, Paris, 1787, 4 vols. 12mo).

Turritina, a monk of Caen, in Normandy, who, in 801, was sent over to England and installed first Norman abbot of Glastonbury Abbey. Through his influence, William I granted the abbey a charter, restoring its lost lands, and confirming all its privileges. In a general council, he opposed the assumptions of Giso, bishop of Wells, and was so successful that Giso had to go to Glastonbury and there have decided the question of jurisdiction over the two minor monasteries, Muchelney and Etheling. Turritina then turned his attention to the internal arrangements of the abbey, but by his introduction of foreign practices brought about insubordi- nation among the monks. French soldiers were brought in, who slew some of the monks while in the sanctuary. Turritina was obliged to retire to Normandy in disgrace. William II permitted him to return to the abbey on payment of five hundred pounds in silver, but he seems not to have stayed there. See Hill, English Monasticon, p. 247, 248, 292.

Turtle, or Turtle-dove (ψυχοδί, τόρην, so called, no doubt, in imitation of its cooing note: ρουγώων), occurs first in Scripture in Gen. xv, 9, where Abram is commanded to offer it along with other sacrifices, and with a young pigeon (ζωτίδ, gozad.). In the Levitical law a pair of turtle-doves or of young pigeons are constantly prescribed as a substitute for those who were too poor to provide a lamb or a kid, and these birds were admissible either as trespass, sin, or burnt offering. In one instance, the case of a Nazarite having been accidentally defiled by a dead body, a pair of turtle-doves or young pigeons were specially enjoined (Num. vi, 10). It was in accordance with the provision in Lev. xii, 6 that the mother of our Lord made the offering for her purification (Luke ii, 24). During the early period of Jewish history there is no evidence of any other bird except the pigeon having been domesticated; and up to the time of Solomon, who may, with the peacock, have introduced other gallinaceous birds from India, it was probably the only poultry known to the Israelites. To this day enormous quantities of pigeons are kept in dove-cotes in all the towns and villages of Palestine, and several of the fancy races so familiar in this country have been traced to be of Syrian origin. The offering of two young pigeons must have been one easily within the reach of the poorest, and the offerer was accepted according to what he had, and not according to what he had not. The admission of a pair of turtle-doves was, perhaps, a yet further concession to extreme poverty; for, unlike the pigeon, the turtle, from its migratory nature and timid disposition, has never yet been kept in a state of free domestication; but, being extremely numerous, and resorting especially to gardens for nidification, its young might easily be found and captured by those who did not even possess pigeons.

Turtur. A species of woodpecker seen in Switzerland.
It is not improbable that the palm-dove (Turtur ἀγγειακός, Temm.) may, in some measure, have supplied the sacrifices in the wilderness, for it is found in amazing numbers wherever the palm-tree occurs, whether wild or cultivated. In most of the oases of North Africa and Arabia every tree is the home of two or three pairs of these tame and elegant birds. In the crown of many of the date-plants five or six nests are placed together; and sportsmen have frequently, in a palm-grove, brought down ten brace or more without moving from their post. In such camps as Elinn a considerable supply of these doves may have been obtained.

From its habit of pairing for life and its fidelity for its mate, the dove was a symbol of purity and an appropriate offering (comp. Pliny, Nat. hist. x, 91). The regular migration of the turtle-dove and its return in spring are alluded to in Jer. viii, 7, "The turtle and the crane and the swallow observe the time of their coming;" and Cant. ii, 11, 12, "The winter is past . . . and the voice of the turtle is heard in our land." So Pliny, "Hyeme mutis, a vere vocalibus;" and Aristotle, Hist. Nat. ix, 8, "Turtle-doves spend the summer in cold countries, the winter in warm ones," although elsewhere (viii, 5) he makes it hybernate (φανετί). There is, indeed, no more graceful proof of the return of spring in Mediterranean countries than the voice of the turtle. One of the first signs of spring to migrate northward is the turtle-dove, while other songsters are heard chiefly in the morning or only at intervals, immediately on its arrival pours forth from every garden, grove, and woodshed its melancholy yet soothing ditty unceasingly from early dawn till sunset. It is from its plaintive note, doubtless, that David, in Ps. cxiv, 14, pouring forth his lament to God, compares himself to a turtle-dove.

From the abundance of the dove tribe and their importance as an article of food, the ancients discriminated the species of Columba more accurately than of many others. Aristotle enumerates five species, which are not all easy of identification, as but four species are now known commonly to inhabit Greece. In Palestine the number of species is probably greater. Besides the rock-dove (Columba livia, L.), very common on all the rocky parts of the coast and in the inland ravines, where it remains throughout the year, and from which all the varieties of the domestic pigeon are derived, the ring-dove (Columba palumbus, L.) frequents all the wooded districts of the country. The stock-dove (Columba amara, L.) is as generally, but more sparingly, distributed. Another species, allied either to this or to Columba livia, has been observed in the valley of the Jordan, perhaps Col. leucomela, Vig. (see ibid. i, 35). The turtle-dove (Turtur ariel, L.), is, as has been stated, most abundant, and in the valley of the Jordan an allied species, the palm-dove, or Egyptian turtle (Turtur Aegypticus, Temm.), is by no means uncommon.

This bird, most abundant among the palm-trees in Egypt and North Africa, is distinguished from the common turtle-dove by its ruddy chestnut color, its long tail, smaller size, and the absence of the collar on the neck. It does not migrate, but, from the similarity of its note and habits, it is not probable that it was distinguished by the ancients. The large Indian turtle (Turtur galatea, Temm.) has also been stated, though with a patch of peculiarly colored scutellate feathers on the neck, or with a collar of black, and have often other markings on the smaller wing-covers. The species Columba Turtur, with several varieties merely of color, extends from the west of Europe through the north of Africa to the islands south of China. The turtle-dove of Palestine is specially the same; but there is also a second, we believe local: both migrate farther south in winter, but return very early, when their cooing voice in the woods announces the spring.—Kitto. See Schlatter, De Turtur. (Hal. 1738); Tristram, Nat. Hist. of the Bible, p. 217 sq.; Wood, Biblici Animales, p. 419 sq. See Dove.

Turtle, John, a Wesleyan missionary, was born in the County of Suffolk, England, June 9, 1798. He was converted in 1811, commenced to preach in 1815, at Thetford, and in 1817 he received his appointment for the Bahamas, W. I. His first circuit was Eleutheria; next, New Providence; and after that, successively, Turk's Island, Habour Island, Abaco, Jamaica (1829), Abaco, Eleutheria, and Turk's Island, where he died, Aug. 16, 1825. Mr. Turtle cut short his life by his indescribable labors. He had natural abilities of a high order, and a spiritual life of beauty and consistency. See Wesleyan Meth. Mag. 1828, p. 217; Wesleyan Minutes, 1826.

Turton, Thomas, D.D., a bishop of the Church of England, was born in Yorkshire in 1782. He became a pensioner of Queen's College, Cambridge, in 1801; two years thereafter he removed to St. Catharine's College (then known as Catharine Hall), from which he graduated in 1805. In 1806 he was elected a fellow of his college, and in 1807 became a tutor. In 1822 he was appointed Lucasian professor of mathematics, and in 1826 accepted the college living of Gingham-man-Crunch, in the County of Norfolk; but was recalled to the university in the following year by his election to the regius professorship of divinity. In 1830 he obtained the deanship of Peterborough, which office he filled until 1842, when he was appointed dean of Westminster. In 1854 he became the bishop of Ely. He died at his residence in London, Jan. 7, 1864. As a controversialist, Dr. Turton has been rarely surpassed. His taste in fine arts was exquisite, and he was the composer of several excellent pieces of Church music. See American Quar. Church Rev. April, 1864, p. 157.

Turton, William, an English Wesleyan missionary, was born in the island of Barbadoes, W. I. His father was a planter. His first labors were on the island of Antigua. In 1798 he received an appointment for St. Bartholomew from the English Conference. In 1800 he was sent to New Providence, and labored for the rest of his life in that and adjacent islands. He died at Nassau, May 10, 1818, aged fifty-seven. He was a faithful toiler. See Wesleyan Meth. Mag. 1821, p. 8, 81; Wesleyan Minutes, 1818.

Tutanus, in Roman mythology, was a deity who was implored in times of peril and danger for help and protection.

Tutani, Bartolommeo, an engraver on wood, who is said to have executed some cuts marked with a Gothic monogram of his initials. Bartch describes only one first bird to migrate northward, the turtle-dove. He died at Nassau, May 10, 1818, aged fifty-seven. He was a faithful toiler. See Spooner, Biog. Hist. of the Fine Arts, s. v.
TUTULINA

602 TWELFTH DAY OF THE MONTH

Tutulina, in Roman mythology, was a goddess who was said to care for the fields of corn and grain. She had an altar and a pillar in the circus—no temple, however, as she could only be worshipped in the open air.

Tutulina was associated with St. Gall and St. Gall, a Christian missionary, was consecrated as a bishop by the great teachers Notker Balbutus and Radbert of St. Gall, and associated with them in friendship and in the work of making St. Gall the foremost seat of the arts and sciences in their day. He was of gigantic stature and full of joyous humor; a magister and preacher according to the theologians, but none the less a born artist and unquestoned genius. Driven into the world by his artist nature, he nevertheless preserved his pious simple and blameless life. In the monastery itself his strength and geniality determined his position. He was its butler and sacristan, and also the host and companion of visiting strangers, serving in the latter capacity down to A.D. 912.

The Irish bishop or presbyter Mark, and his nephew Moengal (the latter preferably called Marcellus by the monks), visited St. Gall in the middle of the 9th century; and Moengal instructed Tutulio, among others, in the art of music, and until he became a proficient composer. As an instrumentalist and vocalist he captivated the ear and the heart. He became himself a teacher of music, and in a separate room gave regular instruction to the sons of the nobility in the use of stringed instruments. Nor did he confine himself to the only genuine art of his day, but his finest laurels were still gathered in that field. He imitated the Scottish custom of associating instrumental music with vocal in the worship of the Church, and carried it further. Some of the instruments used in the small chapel of St. Gall are pictured in old MSS. which are still extant. His own most especial creation were the so-called tropes, i.e., ornamental melodic additions, with texts, to the hymns of the mass, and particularly to its Introit, which were intended to impart a specifically festive character to the hymns for festal days.

His Christmas trope Hodie Canzamus is well known. These tropes were widely received and used throughout the Church, and were perpetuated, under various modifications, down to the 17th century. He also composed hymns and litanies (see the St. Gall MSS. Nos. 37 and 380).

The genius of Tutulio was displayed with equal force in the arts of painting, sculpture, and architecture. He had the sagacity to work within the range of indigenous motives as well as from Roman and Byzantine models and after a traditional type. His fame extended widely, and made it the fashion to procure works from his hand. A statue of the Virgin Mary, erected by him at Metz, was wrought in so exalted a manner as to give sufficient proof of the talent with which he worked. The statue of St. Gall itself was his instructor. Of his carvings the ivory tables which "Charlemagne kept under his pillow are especially celebrated. They passed into the hands of archbishop Hatto of Mayence, then into those of Solomon, abbot of St. Gall, and from him into the possession of the monastery. One of them was smooth, and upon its upper surface Tutulio carved the Virgin between four angels, while its lower surface received a portrayal of the legend of St. Gall, in which the saint gives bread to his obdient bear in reward for his labor of bearing wood for fuel. Stumpf, the ancient Swiss chronicler, mentions also an aeronautical chart of brass upon which the orbits of the heavenly bodies were beautifully marked, as having been one of Tutulio's masterpieces and as being still in existence in his day. It is now, however, lost. On Tutulio's death he was buried in a church which was dedicated to his name, and called by his name; and he was venerated as a saint. The documents of the 11th and 12th centuries always speak of him as a saint; but his worship was soon lost.

Tuttle, Amos C., a Presbyterian minister, was born at Monckton, Va., July 28, 1800. He pursued his preparatory studies at the Academy at Middlebury, and was graduated at Middlebury College in 1827; studied theology privately; was licensed by the Addison County Association June 30, 1829; ordained by an ecclesiastical council Oct. 30, 1829; and became stated supply of the Church in Whitehall, N.Y., Sept. 1, 1830. In 1832 he became pastor of the Congregational Church in Hartford, N.Y.; in 1836 he accepted an agency for the Auburn Theological Seminary; in 1837 became pastor of the Presbyterian Church in Fayetteville, Onondaga Co., N.Y.; in 1841, of a church at Liverpool, N.Y.; in 1844, of the Congregational Church in Sherburne, Chenango Co., N.Y.; in 1856, of the Church in Paw Paw, Van Buren Co., Mich.; in 1859, of the Church in Lapeer, Mich., where he labored until his death, Sept. 24, 1862.

Mr. Tuttle was a man of more than ordinary mind, well educated, and popular as a preacher. See Wilson, Prefab. Hist. Almanac, 1863, p. 308.

Tuttle, Jacob, a Presbyterian minister, was born at New Fairfield, Conn., N. J., Aug. 24, 1786. He was educated at the Bloomfield Academy, N. J.; studied theology privately; taught at the Academy at Newton, Sussex Co., N. J., from 1817 to 1820; was licensed to preach by the Presbytery of New Jersey April 27, 1820; ordained and installed pastor of the West Milford Church, Passaic Co., Aug. 14, 1821; and removed to Ohio in 1832, where he engaged in home missionary labors, planting several churches, and was everywhere honored as a true man of God. He died Jan. 6, 1866. He was a successful minister, full of concern for his hearers, and honored of God. See Wilson, Prefab. Hist. Almanac, 1867, p. 394.

Tuttle, Samuel Lawrence, a Presbyterian minister, was born at Bloomfield, N. J., Aug. 25, 1815. He was converted in 1830; pursued his academical studies in Newark, N. J.; graduated at the College of New Jersey in 1836; studied theology at the Auburn Seminary, N. Y.; was licensed by the Newark Presbytery Oct. 8, 1849; ordained pastor of the Caldwell Church, N. J., March 9, 1841; was in the employ of the American Bible Society from 1849 to 1854; became pastor of the Madison Church, Morris Co., N. J., Jan. 3, 1854; agent of the American Bible Society for Western New York from 1862 to 1867; and assistant to the General Assembly until his death, which occurred April 16, 1866. Mr. Tuttle was an eloquent preacher.

The Rev. Dr. Taylor, one of the secretaries of the American Bible Society, gave it as his opinion that there was no person so thoroughly and minutely acquainted with the history and workings of the Bible Society, as he. See Wilson, Prefab. Hist. Almanac, 1867, p. 327.

Tuttle, Timothy, a Congregational minister, was born at East Haven, Conn., Nov. 29, 1781. He graduated at Yale College in 1808; studied theology with Rev. David Smith of Durham, Conn.; commenced preaching at Durham, N. Y.; and was ordained over the Church in Westford, Conn., in 1811. Here he labored until his death, June 6, 1864. Mr. Tuttle was plain in appearance and manners, yet a man of godly sincerity and of considerable influence. He was an instructive preacher. See Cong. Quar. Rev. 1864, p. 501.

Twelfth-day, (1) the feast of Epiphany, being the twelfth day after Christmas; (2) the old Christmas-day.

TWELFTH DAY OF THE MONTH. In the evening service of the Church of England for the twelfth day of any month, the hymn after the second lesson, beginning "God be merciful unto us," etc., is omitted, because it comes in the regular psalm for the day, and would thus occasion an unnecessary and useless repetition.—Stanton, Dict. of the Church, s. v.
TWELFTH-NIGHT, the eve of the festival of the Epiphany, which occurs exactly twelve days after the feast of Christmas.

TWELFTH-TIDE. See EPHIPPANY.

Twella, Leonard, a learned English divine, was educated at Jesus College, Cambridge, where he proceeded A.B. in 1704. In 1733 the University of Oxford conferred on him the degree of A.M. by diploma, an approbation probably of his Critical Examination, etc. He was at that time vicar of St. Mary's, Marlborough, but in 1737 was presented to the united rectories of St. Matthew's, Friday Street, and St. Peter's, Cheap. He was also a prebendary of St. Paul's, and one of the lecturers of St. Dunstan's-in-the-West. He died at Worcester, Dec. 13, 1742. In his lifetime were: A Critical Examination of the Late New Text and Version of the Testament, in Greek and English (1731; 2 vols. 8vo.); — A Vindication of the Gospel of St. Matthew (1735, 8vo.); — An Answer to the Inquiry into the Meaning of Dommoniacs in the New Testament (1737, 8vo.); — Answer to the Further Inquiry (1738, 8vo.). After his death, his Sermons at Boyle's and lady Moyer's lectures were published for the benefit of his family (1748, 2 vols. 8vo.). See Chalmers, Biog. Dict. a. v.; Allibone, Dict. of Brit. and Amer. Authors, a. v.; Nichol, Ed. Anc.; id. Illustr. of Liter.

Twelve. This number was sacred among the Jews on account of the number of the months of the year, or (as some think) of the signs of the zodiac. It was symbolical of just proportion, beauty, and stability. It is sometimes used in the general sense of a dozen: thus, Jeroboam's garment is said to have been rent into twelve pieces (1 Kings xi. 30), and Elah's horse to have ploughed with twelve yoke of oxen, etc. See NUMBER.

Twesten, August Detlev Christian, a Protestant divine of Germany, was born April 11, 1789, at Gilteckstadt, in Holstein. He studied theology and philosophy at Kiel, and in 1812 went to Berlin, where he became one of the earliest followers and an intimate personal friend of Schleiermacher. For some time he was professor of languages in one of the colleges at Berlin, but in 1814 he went back to Kiel as professor of theology and philosophy. After the death of Schleiermacher, in 1834, he was called to Berlin to succeed his teacher in the chair of systematic divinity. In 1860 he was appointed rector of the university, and died Jan. 8, 1876. As a writer, Twesten was the least prolific of all the more eminent German divines. This was owing partly to a certain timidity and conscientiousness, and partly to an unwillingness to publish anything which he had not first thoroughly searched and mastered, and for which there seemed to him no urgent need. He wrote an analytical logic, a critical edition of the three ecumenical creeds, and an unbarred Augustsburg Confession, essays on Heccius Illyricus, on Schleiermacher's Ethicé, etc. But his main work is his Forschungen über die Dogmatik der evangelisch-lutherischen Kirche (Hamb., 1857, 2 vols. 8vo.), in which he developed its ultimate principles with great and abiding excellences: "for he is, perhaps," says Schaff, "the clearest thinker and writer among all the systematic divines of Germany. He possesses the gift of didactic exposition and analysis in an eminent degree. His learning is always accurate, minute, and thoroughly digested; his style transparent, smooth, and polished." The volumes which were published contain — the first, the introductory chapters on religion, revelation, inspiration, the authority and inspiration of the Scriptures, the use of reason, the history of dogmatic literature; the second embraces only the doctrine of morality, the history of the Christian Church in the division of the world, and angelology. As to his theological standpoint, it is, according to Schaff, "Schleiermacher's system passing over into Lutheran orthodoxy under a modernized form, or the Lutheran scholasticism of the 17th century revived, enlarged, and liberalized by the scientific influence of Schleiermacher and the tolerant spirit of the evangelical union." See Theol. Universal-Lex. a. v.; Zuchold, Bibl. Theol. ii., 1558; Schaff, Germany, its Universities, etc., p. 320 sq. (B. P.)

Twichell, Pliny, a Presbyterian minister, was born at Athol, Worcester Co., Mass., Feb. 25, 1805. He was educated at Washington College, Pa.; studied theology in Asbury Seminary, N. Y.; was licensed by the Grosse See Presbyterian in 1828 and ordained as an elder in 1832. In 1842 he was installed pastor of the Presbyterian Church in Wyoming, N. Y., in 1841. Here he labored for fifteen years, until 1856, in which year he took charge of East Bethany Church, where he preached until his death, Sept. 15, 1864. See Wilson, Presbyterian Almanac, 1865, p. 180.

Twilight, Alexander L., a Congregational minister and teacher, was born at Corinth, Vt., Sept. 23, 1785. By his own exertions he put himself through Randolph Academy and Middlebury College, graduating in 1823. He taught four years in Peru, N. Y.; was licensed to preach by the presbytery in Flattsburg in 1827; taught and preached one year in Vergennes, Vt.; and for eighteen years was principal of the grammar-school in Brownnington, Vt., and again from 1832 to 1855. From 1847 until 1852 he taught in Shipton and Hatley, Ontario. He was ordained in Brownnington in 1829, and supplied the pulpit there for many years, but was never a regular pastor. He died June 19, 1874. His great work was as a teacher; in this he was successful and influential. He pursued his purposes with undeviating energy, and built up his pupils in both character and knowledge. He was an able and often eloquent preacher. See Cong. Quar. Rev. 1867, p. 281.

Twing, Thomas, a learned Anglican divine, was born in 1714, and educated at Sidney College, Cambridge, being contemporary in that university with Gray, Mason, and Bate. Mr. Twing was well versed in the composition, harmony, and history of the art and science of music. In 1760 he took his degree of A.B., and that of A.M. in 1762. He became rector of White Notley, Essex, in 1768, and of St. Mary's, Colchester, to which he was appointed by the bishop of London, in 1770. He died Aug. 6, 1804. Sound learning, polite literature, and exquisite tastes in all the fine arts lost an ornament and defender in the death of this scholarly and worthy divine.

Twiiss, William, D.D., a distinguished Nonconforming Calvinistic divine, was born at Newbury, Berkshire, England, in 1755. He was educated at, and became subsequently a fellow of, New College, Oxford. He became chaplain to princess Elizabeth, afterwards queen of Bohemia. After this he was appointed to the curacy of Newbury. In 1768 he was elected proctor of the University of Divinity. He confined himself with great thoroughness to the study of theology, and produced numerous works, among which are the following: — Vindicta (1631, 4to.); — Vindicia Gratiae, Potestatis, ac Providentialis (Amst., 1632, 4to.); — Dictato- riate de Scieniifis Medico, tribus Libris absoluta (fol.); — Moraliy of the Fourth Commandment (Lond. 1641); — Triticum on Reprobration (1645, 4to.); — Riches of God's Love to Vessels of Mercy Consistent with his Absolute Hatred, or Reproduction of Vessels of Wrath (Oxf. 1658, fol.). This work was strongly recommended by Dr. Owen, De Causa Dei contra Pelagium. He left a number of works in MS. His death occurred July 20, 1646.

Two. This number is sometimes used in Scripture in a symbolical sense: it typifies the connection between the magistracy and the ministry in the persons of Moses and Aaron. The two tenets of infallibility, which were learned in Egyptian and Babylonian bondage; the Old and New Tests.; the Jewish and Christian dispensations; and, among the early fathers, the divine and human natures of Christ. Several of the early heretics endeavored to introduce the Persian dualism into the
TWOMBLY

Christian system, and they therefore declared that the number two had a more mystic sanctity than any oth-
er. Traces of this delusion may be found so late as the 9th century of the Church. See NUMERI.

TWOMBLY, ISAIAH S., a Presbyterian minister, was
born at Charlestown, Mass., Sept. 1, 1817. He was edu-
cated at the Westmore and Groton, Mass., Academy, and at
the Theological Seminary in 1825; was licensed by Cincinnati
Presbytery the same year, and ordained at Athens Pres-
bytery pastor of the Church in Troy, O. He afterwards
became pastor of the Church at Pomeroy, O., where he
died, Oct. 31, 1860. He was a thorough scholar, and an
excellent and impressive preacher. See Wilson, Fred.
Hist. Almanac, 1862, p. 196.

Twyne, Brian, an English divine, was born in
1579, and admitted a scholar of Corpus Christi College in
1594. He was admitted probationer fellow in 1605,
and, entering into holy orders, took the degree of B.D.
in 1610. In 1614 he was made Greek reader of his col-
lege, in which office he acquitted himself with credit,
but left his college in 1622. He was afterwards pre-
vented to the vicarage of Rye, Sussex, but passed most of
his time at Oxford in reading, writing, and contempo-
ration. He died in St. Aldeate's, July 4, 1644. He pub-
lished Antiquitates Academiae Ozeniensis Apologia, etc.
(Oxon. 1636, 4to).

Tyrant Council of (Concilium Tyaneum), was held in
367 at Tyana, a town of Asia Minor. There were
present in this council Eusebius of Cesarea in Cappa-
docia, Athanasius of Ancyra, Pelagius of Laodicea, Greg-
ory Nazianzen the elder, and many others who had de-
clared their belief in the consubstantiality of the Son
at Antioch in 363. The letters of pope Liberius and the
bishops of Italy, Sicily, Africa, and Gaul were read,
which had been written to wipe out the disgrace at-
tached to them on account of the Council of Arimi-
num. Eustathius of Sebaste, formerly deposed, was re-
established; and a synodical letter written to all the
bishops of the East, exhorting them to testify in writ-
ing their rejection of the acts of Ariminum, and their
adherence to the faith of Nicea. See Mansi, Concil. ii,
806.

Tychacum, the original name of a Temple of Fort-
tune at Antioch, which was turned into a church, and
called by the name of Ignatius by theodosius. See

Tyché, in Greek mythology, is identical with For-
tuna, a good fortune. Findes calls her a daughter of
Jupiter. She possessed at Thebes, and at numerous
other places, temples and monuments.

Tyché, in Egyptian mythology, is one of the four
protecting domestic spirits which are allotted to each
human being during the period of life.

Tychicus (Τυχικο». for τυχεις, fateful), a com-
paign of Paul on some of his journeys, and one of his
fellow-labours in the work of the Gospel. A.D. 54-64.
(1.) In Acts xx. 4, he is one of those who ac-
compained the apostle through a longer or shorter por-
tion of his return journey from the third missionary cir-
cuit. Here he is expressly called (with Trophimus)
a native of Asia Minor (Ασίας των); but while Tychi-
clus went with Paul to Jerusalem (Acts xx. 29), Tychicus
was left behind in Asia, probably at Mileitus (xx.
15, 38).
(2.) How Tychicus was employed in the inter-
val before Paul's first imprisonment we cannot tell;
but in that imprisonment he was with the apostle again,
as we see from Col. iv, 7, 8. Here he is spoken of, not
only as a brother," but a faithful minister and follow-
servant in the Lord;" and after his death was made
familiar to the Colossians the present circumstances of
the apostle (παρακολουθή
τον και των εκ
καθίσματος). From this we gather that diligent
service and warm Christian sympathy were two features
of the life and character of Tychicus. Colossus was in
Asia; but from the fact that of Onesimus, who is men-
tioned immediately afterwards, it is said, ις επι
Τυχίκου, whereas Tychicus is not so styled, we natu-
然 infer that the latter was not a native of that city.
These are no mere names, the bearer of which is in the
language concerning Tychicus in Eph. vi, 21, 22 in
very similar, though not exactly in the same words.
It is the more important to notice this passage care-
fully, because it is the only personal allusion in the epistle,
and as of some consideratior Bat there is a legendary value
for its authenticity. If this was a circular letter, Tychi-
cus, who bore a commission to Colossus, and who was
probably well known in various parts of the province
of Asia, would be a very proper person to see the letter
duly delivered and read. (4.) The next references are
in the Pastoral Epistles, the first in chronological order
being Tit. iii, 12. Here Paul (writing possibly from
Ephesus) says that it is probable he may send Tychicus
to Crete, about the time when he himself goes to Ni-
copolis. (5.) In 2 Tim. iv, 12 (written at Rome during
the second imprisonment) he says, "I am herewith send-
ing Tychicus to you. Be on your guard in the matter
with Dr. Wordsworth, so to render ευγενετάω, though
Bp. Elliott's suggestion is also worth considering, that
this mission may have been connected with the carry-
ing of the first epistle. (See their notes on the pas-
sage.) However this may be, we see this disciple at
the end of the work, at the beginning of the work,
locally with Asia, while also co-operating with Paul.
We have no authentic information concerning Tychicus
in any period previous to or subsequent to these five
scriptural notices. The tradition which places him af-
headers as bishop of Chalcodon in Bithynia is appar-
ently of no value. But there is much probability in the
conjecture (Stanley's Cornishian, 2d ed., p. 489) that
Tychicus was one of the two 'brethren' (Trophimus
being the other) who were associated with Titus (2 Cor.
7vii, 16-24) in conducting the business of the collection
for the poor Christians in Judea. As arguments for
this view we may mention the association with Trophi-
mus, the probability that both were Ephesians, the oc-
currence of both names in the Second Epistle to Timo-
thy (see 2 Tim. iv, 20), the chronological and geographi-
cal agreement with the circumstances of the third mis-
ionary journey, and the general language used concern-
ing Tychicus, Colossians and Ephesians. See Asia a
EPHESUS; TROPHIMUS.

Tychó, in Greek mythology, was a demon similar to
Comalus, generally found represented in company
with Priapus.

Tychonius, a Donatist of the 4th century, who dis-
played an impartial and sincere desire to arrive at the
truth with respect to the controversy between his sect
and the Church. He is described as having been learn-
ed in the Scriptures, tolerably acquainted with history
and with secular literature, and zealously interested in
the affairs of the Church. He regarded the Church as
the sole divinely provided remedial institution, into
which all men must enter if they would attain to sal-
vation; and therefore held that the moral state of the
members cannot destroy the value and efficiency of the
Church. He was also consistent in protesting against
the relapsism of persons who became Donatists. His
views were attacked as heretical by the Donatist Par-
menian (q. v.), and drew forth an epistle from August-
ine. Tychonius was accused of being a Chiliast, but
the charge is probably untrue. A single work from his
pen remains, the Liber Septem Regula, first published
1772), vii, 107-129. The work is designed to serve as
a guide to the interpretation of the Scriptures, and some
of its rules are still followed by some expositors: e.g.,
the sixth, De Recapitulatione, which teaches that the
same thing is sometimes repeatedly narrated or de-
TYCHSEN, Olaus Gerhard, a German scholar and professor, was born Dec. 14, 1784, at Tondern, a town in Slieswich. He studied the classical and Oriental languages in the gymnasium of Altona, with the exception of Arabic, which he acquired from a merchant whose business had caused him to reside during many years in North Africa. He finished his theological course at Halle, and was soon afterwards appointed a teacher in G. A. Franke's Orphanage. While he was employed in the English, Hindu, and Amharic languages, he acquired a knowledge of the Talmud from a rabbinical tutor (Schulz). His favorite study, however, was the Rabbinical Talmud, in which language he was so proficient as to be able to speak and write with great ease. He was, in April, 1789, appointed missionary to the Jews and Mohammedans, and travelled in that capacity through North Russia, South Russia, Denmark, Norway, but without accomplishing anything. In the synagogue at Altona his sermon even earned for him a severe beating. In 1780 Tychsen went to the University of Bützow, in Mecklenburg, as magister lege, and remained there until Bützow was united with the University of Rostock and transferred to the latter place, where he likewise removed thither. He died Dec. 30, 1815. Tychsen had gained a great reputation, as is attested by his election to numerous societies and by many flattering testimonials; but his reputation respected simply the extent, and not at all the thoroughness, of his knowledge. He possessed solid acquisitions only in the Rabbinical, and joined with them a keen eye and considerable skill for the detection of foreign written characters; but he was deficient in judgment, ready to ventures the most improbable hypotheses, and anxious for notoriety. He is consequently important only as a Talmudist, a numismatist, and a Hebrew lexicographer. His correspondence with Kenyon and Bayer directed attention to him more than any other incident of his career, and it afforded evidence of all the traits described above—his wide learning, obstinate orthodoxy, and want of critical judgment. In this dispute he wrote, Tentamen de Statu Hodierni Codicem Hebraicum, ed. M. S. S. Gelehrten (Rost, 1772, 8vo), in support of the Masoretic text:—Hebrefies Tentamen, etc. (1774) and a supplement (1776). He insisted that the Greek versions had been made from a Hebrew text written in Greek characters, and advocated the non-singular theory that the Samaritan Pentateuch had been copied from a Hebrew-Jewish (Masoretic) text with the vowel-points—the latter in Disputatio Hist.-phil.-crit. de Pent. Samarit. (Bützow, 1765, 4to). In 1779 he published a work to demonstrate the spurious character of all Jewish coins bearing Jewish or Samaritan characters, including those of the Maccaedese period, which drew forth a reply from the Spanish Jesuit Bayer and occasioned a protracted dispute. In the study of Arabic coins Tychsen rendered service real, and began the systematic study of Oriental numismatics. He showed himself a master in the deciphering of inscriptions (see Erklärung der Inschriften) in the 1793, 4to of the K. d. n. n., in the Mechil-Scheweta, Gelehrten Bréifige, 1780, Nos. 2, 45, 45, and the Interpr. Inscript. Cyfric. in Marm. Templ. Patriarch. S. Petri Cathedra (Rost, 1787). Tychsen also published editions of Al-Makrizi: Al-Makrizi Hist. Monetae Arab. e Cod. Escorial. (ibid. 1797, 8vo); and Textus de Legatione Arab. Ponderibus & Memoriae (Ed. 1800, 8vo). His Elementa Arabi-
and pungent preacher, and he especially delighted in doctrinal themes. About this time Prof. N. W. Taylor, of Yale Divinity School, enounced views which were regarded by many New England theologians as unsafe and unwise. Dr. Tyler was his principal opponent, and the long and able discussion which followed belonged to the history of controversy. To offset the influence of the New England theology the young preachers that time in the state, the Theological Institute of Connecticut was founded at East Windsor in 1833, and Dr. Tyler was chosen its president and professor of theology. He held these positions until his resignation, July 16, 1837. He died at East Windsor, after only a few hours' sickness, May 30, 1838.

Dr. Tyler was a man of humble and sincere piety, and of a genial and sympathetic nature. In his theological opinions he did not embrace pure Calvinism, but as modified by Edwards and his school. He was in full sympathy with the traditional theology of New England, and was a straightforward controversialist, avoiding metaphysical speculations and verbal subtleties. In forming his system he began, not with mind, but with the Bible, and he looked for no advances in theology except such as come from a richer Christian experience. His writings are permeated by a spirit of practical advice, and are directed to some of the chief principles and objects of his system.

Tyler, Edward Royall, a Congregational minister, was born at Guilford, Va., Aug. 3, 1800. He was the son of chief-justice Tyler, two of whose sons became ministers in the Protestant Episcopal Church and one in the Presbyterian. Edward was converted while a clerk in a counting-house in New York, and under the ministry of Dr. Spring. He graduated at Yale College in 1822, studied theology, and was ordained pastor of the South Church in Middletown, Conn., in 1827. Here he was successful in building up the Church, but ill-health induced his resignation in 1832. He was next pastor in Colebrook, Conn., 1833-36. For a year Mr. Tyler was agent of the American Anti-Slavery Society, and from 1838 to its discontinuance in 1842 he was editor of the Connecticut Observer. In 1843 the New-Englander was established under his proprietorship and editorship, and he continued in connection with it until his death, except during the periods of his prostration through illness. He died Sept. 28, 1848. Mr. Tyler contributed two articles to the first six volumes of the New-Englander (see these enumerated in that periodical, vi, 607). His other publications were, Slavery a Sin per se: — Lectures on Future Punishment (Middletown, 1829, 12mo) — Holiness Always Precedent to Sin: a Sermon (New Haven, 1829, 8vo). This opposed the position of some of the metaphysical divines of New England, that God sometimes preferred sin to holiness: — The Doctrine of Election: a sermon (New Haven, 1831, 8vo) — The Congregational Catechism (ibid. 1844, 18mo). Tyler's writings are able, and some were thought at the time to be unsurpassed in their treatment. They are especially noticeable under the depressing influence of disease. "He was by nature, by culture, and by the grace of God, one of the best sort of men, in whom the elements of character are embodied by faith and sanctified by devotion. We have

seen his uncomplaining patience, his uniform cheerfulness, his kindness and sympathy, his generous impulses, his childlike piety." See New-Englander, 1848, p. 603 sq. (by L. Bacon); Cong. Quar. Rev. 1866, p. 287.

Tyler, James Endell, an English clergyman, was born at Monmouth in 1789. He was educated at Oriel College, Oxford, where he became fellow, dean, and tutor. Presented to the rectory of St. Giles-in-the-Fields, London, in 1815, he became canon residuary of St. Mary-le-Strand in 1845. He died in 1852. He wrote, Indices Attici (Lond. 1824, 12mo) — Oaths, their Origin, Nature, and History (1834, 8vo) — Conversations of a Father with his Children (5th ed. 1840, 2 vols. 18mo) — Primitive Church Worship (1840, 8vo) — A Father's Letter to his Son on the Church (ibid. 1840, 12mo) — The English and Non-English Churches (ibid. 1844, 8vo) — Image-worship of the Church of Rome (1847, 8vo) — Meditations from the Fathers of the First Five Centuries (1849, 2 vols. 12mo) — Rector's Address to his Parishioners (1851, 8vo) — Christian's Hope in Death — Sermons (1852, 8vo). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Tyler, Joseph D., a clergyman and instructor of the Protestant Episcopal Church, was born at Brattleboro, Vt. He graduated at Yale in 1829, and pursued a theological course at Alexandria, Va. His organs of hearing having become impaired by disease, he became connected with the Defe-and-Dumb Institution, at Richmond, Conn., and subsequently became principal of the Deaf- and-Dumb Institution of Virginia. He died at Staunton, Va., Jan. 28, 1892. He was an excellent scholar, and made some graceful contributions to the literature of the day. See Amer. Quar. Church Rev. 1892, P. 142.

Tyler, William, a Congregational minister, was born at Attleborough, Mass., Jan. 7, 1780, and was educated at Brown University in the class of 1800. For some time after leaving college he was engaged in secular pursuits. Having decided to study theology, he placed himself under the tuition of Rev. Dr. Emmons, of Franklin, Mass., and was licensed to preach in 1818. He was ordained in 1819 as junior pastor of the Congregational Church in South Weymouth, Mass., soon becoming sole pastor. He remained thirteen years in this place (1819-32). He removed to South Hadley Falls, Mass., in 1833, and was pastor of the Church in that place several years. He then went to Forest Hill, Conn., and became a missionary, performing missionary service, under the direction of the Home Mission Society, in the interior of Massachusetts, having his residence at Amherst. He removed to Northampton, Mass., in 1847, and became the editor of the Courier, published in that place. For several years he resided at Becket, by B. L. and was a member of St. Paul's church. In 1854 he attended the convention which met in 1853 to revise the State Constitution. He removed to Auburndale, Mass., in 1863, where he spent the remainder of his life, and where he died Sept. 27, 1875. "He was well instructed," says Prof. Gammell, "in theology, and was particularly interested in local history and antiquities, and on these subjects he was a frequent contributor to magazines and newspapers." (J. C. S.)

Tympanum, the triangular space between the horizontal and sloping cornices on the front of a pediment in classical architecture; it is often left plain, but is sometimes covered with sculpture. This name is also given to the space between the door and the wall, the entrance of a doorway, etc., in medieval architecture, when the top of the opening is square and has an arch over it; this arrangement is not uncommon in England in Norman work, and on the Continent is to be found in each of the styles. Tympanums of this kind are occasionally perfectly plain, but are generally ornamented with carving or sculpture. In Continental work the subjects are usually arranged in tiers one above another, and often embrace a great number of figures. Also when an arch is surmounted by a gable-moulding or triangular hood-
he was in return to pray for the souls of the abbot’s father and mother. Tyndale, a leaving England went first to Hamburg. It is often said that from Hamburg he proceeded to Wittenberg, where he met Luther, who had now thrown off the last vestige of popish thraldom, and that there he completed his translation of the New Testament. This statement is apparently not correct, for during 1524 he seems to have remained at Hamburg, and in 1525 he appears to have been first at Cologne and then at Worms. At Cologne Tyndale seems to have commenced to print his first edition in 4to, but after ten sheets were printed the work was interrupted, and the translator and his coadjutors betook themselves to the Lutheran city of Worms, where the quarto was finished, and an octavo edition also issued from the press (1525). The prologue to the quarto has been republished under the name of A Pathway to the Scriptures. The translator’s name was attached to neither of the two editions, and he assigns a reason for this omission in his Wicked Mammon, published in 1527. Copies of these versions early found their way into England. In 1526 Tunstall, bishop of London, culminated his prohibition of them, and within two years a number of them, illicitly printed, nay, some were purchased by the bishop in Antwerp, and burned at St. Paul’s Cross. Warham and Wolsey were also dreadfully enraged, and Sir Thomas More was employed to denounce Tyndale, but his genius was foiled in the attempt, and Tyndale won a victory over the learned chancellor. Of the first edition only a fragment now exists, and of the second only two copies, one of them imperfect. Two editions were afterwards printed at Antwerp, and found their way to England in vessels laden with grain. Endevors were made to seize Tyndale and punish all who had assisted him, but he removed to Worms in Hesse, in 1529, and published there a book of great value—The Obedience of a Christian Man. The result of all the English opposition was that, as Foxe expresses it, “copies of the New Test. came thick and threefold into England.” We find Tyndale again at Antwerp in 1529, during which year a fifth edition was printed; the four books of Moses were also translated, printed each at a separate press, and put into circulation. The enemies of the translator endeavored to decoy him into England, but he was too wary to be so easily entrapped, for he well knew what displeasure Henry VIII felt at his tact called The Practice of Prelates. The general idea was to prevent any circulation of the book. The martyrdom of Frith, Tyndale set himself to revise and correct the version of the New Test., and it was soon thrown off, with this remark in the preface, “Which I have looked over again with all diligence, and compared with the Greek, and have weded out of it many faults.” But his enemies in England, whose power had been shaken by the copious circulation of the English New Test., were the more enraged against him, and conspired to seize him on the Continent, in the name of the emperor. An Englishman named Philips betrayed him, and, acting under some pretended appointment, the authentically seized, him, in the house of Pointz, his friend, and conveyed him to Vilvoorden, twenty-three miles from Antwerp, Pointz, who had with difficulty escaped himself, made every effort for him, but in vain. The neighboring University of Louvain thirsted for his blood. Tyndale was speedily condemned, and on Friday, Oct. 6, 1536, in virtue of a recent Augsburg decree, he was led out to the scene of execution. On being fastened to the stake, he cried, in loud and earnest prayer, “Lord, open the eyes of the king of England,” and then was first strangled and afterwards burned. The merits of Tyndale’s work, and the influence, however, of those who enjoy the English Bible—for their authorized version of the New Test. has his for its basis. He made good his early boast that ploughboys should have the
Word of God. His friends all speak of his great simplicity of heart, and commend his abstemious habits, his zeal, and his industry; while the early imperial procurator prosecuted him styles him homo doctus, plus et bonus. The works of Tyndale and Frithe were collected and published (Lond. 1831, 3 vols. 8vo). For information respecting Tyndale, his writings, and editions of his translations of the Testament, Pentateuch, etc., see Blais's Wood, Athen. Oxon. i. 94; Fox, Acta et Mon.; Bong. Brit. Tyndareus, in Greek mythology, was the husband of the renowned Leda, and was king in Sparta, from which he was driven with his brother Icarus. Hercules placed the fleeing brothers again in possession of their kingdom. Pausanias saw his grave in Lacedemonia before the temple of Jupiter Cosmetes (iii, 17, 4).

Tyndarides, in Greek mythology, was a surname of the Dioscuri.

Tyndarion, in Greek mythology, was a surname of Helen.

Tyndall, Dudley A., a clergyman of the Protestant Episcopal Church, was born in Prince George County, Md., in 1825. He graduated at the University of Pennsylvania in 1848; studied at the Alexandria (Va.) Theological Seminary; became deacon in 1846 and priest in 1849; was first settled as a clergyman in Columbus, O., and afterwards was rector of Christ Church, Cincinnati; in 1854 was pastor of the Church of the Epiphany, Philadelphia, where he remained one year, resigning and organizing a new parish called the Church of the Covenant, of which he was minister at the time of his death, which occurred at Brookfield, near Philadelphia, April 19, 1858. See American Quar. Church Rev. 1858, p. 944.

Type. I. Name.—The Greek word τύπος, from which our type is derived, denotes primarily a blow, then the mark left by a blow, then a mark or print of any kind, then a figure or image, and finally a mould or model, representing the original from which something else has taken its form, or as indicating the form which something not yet existing may assume. In the New Testament, the word occurs in several of these senses, and in some passages with a shade of meaning peculiar to itself. In John xx, 25 it is used to denote the mark which the nails made in our Lord's hands and feet; in Acts vii, 43 it means a copy or image; in ver. 44 and Heb. viii, 5 it signifies a model after which something is made; in Rom. vi, 17 it denotes a mould from which a form is derived; in ver. 14 it conveys the idea of one person presenting some analogy to another person; and in several places it means an example which others may follow (1 Cor. x, 6, 11; Phil. iii, 17; 1 Thess. i, 7; 2 Thess. iii, 9, etc.).

As used by theologians, the word type has received a special technical meaning not exactly equivalent to any of these usages, though approaching to that of Rom. vi, 17. When Adam is said to be the type of Christ, they mean by it any object, whether office, institution, person, or action, by means of which some truth connected with Christianity was prefiguratively foretold under preceding dispensations. Such an object the apostles call a σχῆμα, a shadow or adumbration of that which is to come; see Gal. ii, 15; Heb. viii, 5. This shadow became a type because it presented the model or representation of something yet future. Sometimes, also, the term παραβολή is used with a similar meaning (Heb. ix, 9; xi, 19).

II. Fundamental Principle.—There are certain notions which must be assumed as lying at the basis of typology.

1. Spiritual truths, ideas, thoughts, may be represented by material symbols, whether actions, institutions, or objects. This the usage of all nations establishes. More especially was this a favorite method of commu- nicating thought among the imaginative Orientals; in general, it is found to prevail most in the earlier stages of a people's history, while as yet the use of objects that appeal to the senses is more effective than the use of written documents. In Scripture, frequent instances of spiritual truths thus symbolized are met with; as, for instance, the placing of the hand under the thigh for confirmation of an oath; the boring of the ear of the servant who declined to avail himself of the liberty brought by the year of jubilee; the rending of the garments in token of grief; and such acts as those of Abijah when, in announcing to Jeroboam the succession of the ten tribes from the house of Solomon, he tore his garment into twelve pieces and gave to Jeroboam ten (1 Kings ix, 29); that of Elisha when he indicated to the king of Israel the victories which by divine help he should obtain over the Syrians by commanding him to shovel earth into the window over the door of which he had placed his hand on the king's hand (2 Kings xiii, 14-19); and those of Jeremiah and Ezekiel when they were signs to the people (Jer. xix, 1-11; Ezek. xii, 3-16).

2. Such symbolical representations may be employed to convey religious truth. This usage we find also to have prevailed among all nations, especially in the earlier stages of their history. Among the Jews it was abundantly used; not, however, according to human caprice or ingenuity, but always in obedience to the express ordinance of God. The symbolical observances of the Old Testament were introduced into the service of God, it may be presumed, were also of divine appointment, on the general principle that, as God alone can declare what worship he will receive, it is only as he appoints that any service can be properly offered to him.

3. The true religion has in all ages been essentially the same, so that the truths symbolized by the institutions of the earlier dispensations are identical with those more directly and fully made known to us under the Christian dispensation. The substantial identity of the patriarchal and Mosaic religions with the Christian must be assumed in all attempts to argue from the Old Testament to the New Testament, and to determine who are its interpreters, i.e., who receive these books as divines. From this it necessarily follows that what was taught by symbol under the ancient economies as part of religious truth will be found identical with what is taught in of religious truth under the new dispensation.

4. The religion of Jesus Christ is one resting on the facts of his personal appearance and work. Out of these all its truths flow directly or indirectly; and to these they all have respect. Hence the truths taught symbolically to the Old-Test. saints, being identical with those of Christianity, must also rest on, and have respect to, these facts.

5. A twofold character was thus of necessity given to the religious institutions of the ancient economies. They were primarily symbolical of religious truth. They were secondarily predictive of facts in the future on which these truths rested.
by means of analogy or resemblance those facts in the mediatorial work of Christ on which these truths rest. This definition involves the following elements:

1. A type is an institute or act. We use these terms in a mediatorial sense, as applied to infant and afterward formal organizations and religious offices, but times, places, implements of religious service; and under the latter not only rites and ceremonies, but special acts or series of acts determined by the proper criterion to be typical. By this definition, however, persons and things simply as such are excluded. A person or a thing simply as such, cannot possess a symbolical character; and cannot be the σχάλη, or prefigurative sign, of another person or thing, much less of a fact or series of facts. A person may sustain a typical office or may perform a typical act, and a thing may be used in a typical service or ceremony, but in and by itself it cannot be a type. This sets aside a whole host of types which the ingenuity of interpreters has constructed out of the historical personages of the Old Testament. That many of these sustained typical offices and performed typical acts is admitted; but that they were in themselves— in their proper individual personality—types of our Lord, we cannot believe. The assertion, indeed, is to us unintelligible except in a sense which would be profane and untrue—viz. that their personal character and conduct were a representation of the character and conduct of our blessed Lord. It is true that for a time the early Gentile church, which was the majority of the New Testament has been pleased. But we are unable to find a solitary instance in the New Testament of any historical character—mentioned in the Old Testament, being brought forward as having been personally a σχάλη of Christ or his work. In one passage, indeed, Adam is called a τύπος of Christ, but τύπος is not there equivalent to σχάλη; and, even if it were, it would not follow that it was Adam as a person who was the type of Christ, for the apostle is speaking throughout that context of our first parent in his official, federal, or representative character. The words of Peter also (1 Pet. iii. 21) have been cited as showing that a simple historical occurrence may be the type of a Christian truth; but, whatever the apostle may mean in that passage by calling salvation by baptism the αἰώνιον τῆς σωτηρίας of Noah's salvation by the ark, he certainly cannot mean that the latter was a divinely appointed prefiguration of the former. The truth to be driven home is that an analogy subsists between the two, whereby the one is fitted to illustrate the other. The strongest case in favor of the opinion we are opposing is our Lord's representation of himself as the true bread of which the manna was the prefiguration. We cannot understand this prefiguration of the manna as a type of him. Still it was the manna, not as a natural phenomenon, but as a special and peculiar provision made by God for the feeding of the people, that was the type of Christ; and in this divine appointment we find what reduces this under the head of proper types.

2. A type is an institute or act appointed by God, and by him adapted to the end it is designed to serve. Knowing what in due time was to be exhibited to men by the mission and work of his Son, God could not only predict it in words, but also give by means of symbolical acts and institutes such representation of it as would, in some measure at least, bring before the minds of the ancient saints a lively idea of it. As God alone could do this, it is on his appointment that the whole must rest. "To constitute one thing the type of another, as the term is generally understood in reference to infant and afterward formal organizations, there is more resemblance. The former must not only resemble the latter, but must have been designed to resemble the latter. It must have been so designed in its original institution. It must have been designed as something preparatory to the latter. The type as well as the antitype must have been preordained; and they must have been preordained as constituent parts of the same general scheme of Divine Providence. It is this previous design and this preordained connection which constitute the relation of type and antitype" (Marsh, Lect. on Antitype, on the Typology of the New Testament). Formerly the earlier typologists this condition was neglected, and resemblance was made the sole criterion of the relation between an event or person of the Old Test, and a fact or doctrine of the New Test, as type and antitype. A once popular book written on this plan is that of M'Eachen, On the Types and Antitypes, p. 152, the Old Test. But the principle has been carried out to the wildest extent in a work entitled The Typical Testimony to the Messiah, by Micahah Hill (London, 1862).

3. Each act or institute designed by God to serve as typical possessed a symbolical as well as a predictive character. This follows from the position that a type is a sensible emblem or prefigurative token of some spiritual truth, which itself rests upon certain events yet future, but of which events a certain degree of knowledge is possessed by those to whom the type is exhibited. In all such cases a twofold impression is conveyed to the mind in the type, that a particular truth already known is symbolically indicated; and, in the second place, that those events on which that truth depends shall certainly take place. In the testimony of God concerning his Son there are two points—one of fact, and one of doctrine—on both of which the New Testament insists. There is no doubt that we believe that testimony in all its fulness. What God calls us in the Bible to believe is, first, "the truth," and, secondly, that "truth as it is in Christ Jesus." With regard, for instance, to the doctrine of salvation by the atonement, there is, first, the general principle that such a mode of salvation is revealed, practicable, and intended by God; and, secondly, the matter of fact that such an atonement has really been presented by our Lord Jesus Christ and accepted by the Sovereign and Judge of all. Now it was, of course, the same under the Old Testament dispensation: there were both the doctrine to be announced and the fact to be predicted before a complete statement of saving truth could be laid before the mind; and it was only as both of these were apprehended that the belief of a Jew in the truth became full and intelligent. Hence every type contained at once a symbol of the truth and a prediction of the fact.

4. In the sense of the Hebrew term נָשִׁית, or נָשָׁתָן, a sign of a general truth, and a memorial that in due season the event on which that truth rested would take place. Thus, for instance, in the case of sacrifice, there were both a symbol and a prediction. The slaying of the animal and the burning of its flesh were emblems of the facts to be accomplished, and the manner of the slaying of the type was designed so that animal had become deserved death and subsequent agony, as well as of the general truth that God's plan of saving men from that desert was by the substitutionary sufferings of another. All this, however, would have been of no avail to the sin-burdened Israelite, who knew well that no mere animal could make atonement for the sins of man, had not that act prefigured and predicted the great sacrifice for sin on the part of the Lamb of God. But, pointed forward to this, his faith obtained an object upon which to rest, and he was enabled to rejoice in the salvation of God. So, also, with regard to the immediate consequences of sacrifice. When a Jew had committed a trespass against the Mosaic law, he had to offer certain sacrifices before he could enjoy his civil and political rights. Immediately, however, on presenting these, he stood rectus in curia; he was acquitted of the sin he had committed, and restored to his civil rights. More, however, the carnal and worldly Jew was content. But to the pious believer all this was only the symbol and type of something spiritual. It reminded him that his sins against God had made him guilty and excluded him from the divine favor; it directed him to the need of a sacrifice for sin ere God would forgive his transgression; and it
assumed him that, just as by sacrifice he had been re-
stored to his place in the Jewish State, so by the great
sacrifice he might be restored to the divine favor, and
to a place in that spiritual kingdom of which the Jew-
ish nation was the type.

4. Though resemblance to that which it is designed
to predigre does not constitute the only, or even the
primary, condition of a type; 'tis obvious that this
must form a very important element in the adaptation
of the type to serve its designed end. Hence we may
expect to find some obvious analogy not only between
the symbol and that which it symbolizes, but also be-
tween the divinely appointed act or institute and that
which it was designed to predigre.

On this point there must be a similarity or
analogy between the type and the antitype, so there is
also a disparitv or dissimilitude between them. It is
not in the nature of type and antitype that they should
agree in all things; else, instead of similitude, there
would be identity. Hence the apostle, while making
Adam a type of Christ, shows how infinitely the
latter excelled the former (1 Cor. xv. 47). So the
priests of old were types of Christ, though he infinitely
excelled them both as to his own person and as to the
character of his priesthood (see Heb. vii, viii, ix. x).
Chrysostom observes (Hom. x, ch. 9) that he who
must be made god in the antitype, he must be made
man in the type in the antitype. Hence the distinction
must be observed between total and partial
types. This distinction Ecumenius also draws in com-
ment on Heb. vii, p. 829. He says: 'Ο τέσσερις ου
κατα πάντα ιοντι ειτι τυλική φυσις (και κατος διά
θεου, και παραπτωμι μελλον) αλλ', επεται,
εισφοβε η εμεν το καθολικον, ινδυλθαιση—'A type does
not express that which it represents in every minute
particular, for then, instead of similitude, there would
be identity, but it contains certain outlines and assimila-
tions of the antitype." Cyril of Alexandria, in Apos
vi, p. 313, also observes on this subject: 'Ο τέσσερις
ου διάθεσις, μόρφωις ει τι μάλλον της διάθεσις εισφο-
η—'A type is not the very truth itself, but its representa-
tion.

IV. Relation to Other Modes of Teaching.—Having
thus indicated the nature of a type, we would now point
out the difference between this mode of teaching
divine doctrine to other modes employed in Scripture more or less akin
to it.

1. Relation to Prophecy.—Type stands related to
prophecy as its parallel. Like it, it teaches a present
truth, and announces a future fulfilment of it; like it,
also, it has in its capacity of a type one definite mean-
ing and one definite fulfilment, to both of which it was
intended and designed to point. The difference be-
tween a prophecy and a type lies only in this, that
the former teaches by words, the latter by things; the
former, that is, by an artificial combination of signs, the
latter by a sonical representation of the whole truth
at once. A word is the symbol of an idea; a type is
the symbol of some principle or law, and the prediction
of some general fact in the economy of redemption.
See Prophecy.

2. Relation to Parable.—From the word παράβολα
being used to designate a type, it may be inferred that
the connection between the two is intimate. A type,
in fact, may be viewed as a sort of actet parable. Let
us suppose, for instance, that our Lord, instead of de-
scribing in words the conduct and circumstances of the
prodigal son, had, by the help of suitable actors and
scenes, made the whole to pass before the eyes and ears
of his auditors, the lesson would have been conveyed
to them much in the same way as the truth concerning
himself was conveyed to the ancient Jews by the typi-
cal rites of the Mosaic economy. In neither case is
the lesson new, nor fully to be understood without an eluci-
dation of the word; the mere announcement of the
truth, vividly a truth, otherwise reasonable or familiar,
upon the minds of those to whom it is presented. There
is this difference, however, between such a representation
and a type—that the former, being merely doctrinal,
would be exhilarating in its impress of present truth,
while the latter would, with the doctrine, incorporate
a prophetic reference to some great event yet to hap-
pen on which the doctrine was based. See Parable.

3. Relation to Comparison.—The New-Test. teachers
occasionally, for the sake of illustrating their meaning,
introduce a comparison. Due to the well-known fact
in the history of the Jewish people, between which
and the point they are discussing there exists some ob-
vious analogy. In this way our Lord makes use of
the fact of Moses' erecting the brazen serpent in the
wilderness for the purpose of illustrating his own character
as a deliverer. He is to be "lifted up as the serpent be-
lieved in him should not perish, but have everlasting
life" (John iii, 14, 15). On another occasion he in-
istuted a comparison between his own case, as about
to be consigned for a season to the tomb, and that of Jo-
nah, who had been "three days and three nights in the
belly of the fish" (Matt. xii, 40). From this it has been
naturally concluded that these events, and others alluded
to in the New Test. in a similar manner, were real types
and figurations of the facts they are brought to illus-
trate. It is obvious, however, that there is a great dif-
ference between a historical event—whether occurring
during the days of the nation, or more remotely in the
position of the divine power, and which a subsequent
writer or speaker may make use of to illustrate, by com-
parison, some fact or doctrine of which he is treating—
and a symbolic institute expressly appointed by God to
predigre, to those among whom it was set up, certain
great transactions in connection with that plan of re-
formation which, in the fullness of time, was to unfold
to mankind. In the two cases above referred to there
is the absence of any express evidence that the events
recorded possess any other than a simple historical char-
acter. In the case of the brazen serpent, indeed, we have
divine approbation; but, along with the approbation,
we have the specific mention of the purpose for which it was
set up, which was not to teach any religious truths at
all, or to form any part of religious worship, but simply
that it might act as an instrument of cure to the Isra-
elites who were bitten by the fiery flying serpents.
See BRAZEN SERPENT. Yet even in this case it is clear
from the whole tenor of the narrative that the act was
significant of more than a mere physical remedy; and
our Lord's reference to the event confirms its higher
import. It is also possible that such a thing as the
brazen serpent might possess a symbolical character;
but if any man, besides the Lord, thereby refers to that
character, and that it was a symbol of Christ, it will be
incumbent upon him, in the first place, to show some
evidence in favor of his inference, and, in the next, to
explain how it should come to pass that the express sym-
bolical antithesis of the Messiah, the serpent, could form
depart of an institute intended to predigre his work as the
Saviour of men. As to the case of Jonah, we do not find
in it so much as the appearance of anything typical;
and, indeed, it would have been very strange had God
caused the prophet to perform an action typical of the
burial and resurrection of Christ, under circumstances in
which the prophet and the unconsciousness of the
operation by it except himself. A type is an acted lesson—
a visible representation of invisible truths. To its util-
ity, therefore, spectators are as indispensable as actors;
and where the former are not present, to say that God
appoints the latter to go through their performance is
to charge him with doing something in vain. See
Similitude.

4. Relation to Allegory.—An allegory, says bishop
Marsh, "according to its original and proper meaning,
denotes a representation of one thing which is intended
to excite the representation of another thing." Adoption
of this definition, it is true, is somewhat uncommon,
but there must be a difference. The term allegory is
in some use, and allegory and similitude are closely allied.
In both there is an original representation which has a meaning of its own,
and there is the use of that for the purpose of calling up
to the mind the conception of another thing analogous to the former. The two, however, are very distinct. They differ in two respects: the one is that the subject of an allegory is a mere historical event occurring in the ordinary course of things, whereas a type is an act or incident inspired by God and therefore of importance; the other is, that the allegorical sense is a fictitious meaning put upon a narrative for the sake of illustrating something else, whereas the explanation of a type is its true and only meaning, and is added solely for the sake of unfolding that meaning. Thus Paul, in order to explain the doctrine of the twenty-sixth allegory the anedocte of Sarai and Hagar as recognized by him for making Sarai represent the Abrahamic or new or everlasting covenant, and Hagar the Sinaic or old covenant (Gal. iv. 24, 25). In the same way he allegorizes the fact of the water from the rock following the Israelites through the wilderness, speaking of it as representing Christ in the blessings he confers upon his church (1 Cor. x. 4). These allegorizations (ἀλληλογραφίαμεν) are only comparisons without the form; and their use is obviously merely to explain one thing by another. The radical difference between the exposition of a type and an allegorical intellectualization of history, is apparent from the use which the apostle makes of them respectively. His allegorizations are mere illustrations on which, by themselves, nothing is built; whereas his typical explanations are all brought forward as forming the basis of arguments addressed to those who, admitting the type, were not pledged to the admission of the truth it contained. See TYPHANS.

V. Interpretation of Types. — As a general rule it may be laid down that we should always expect to find in the anijtive type something higher and more glorious than in the type (Chrysost. in Genes. Hom. 35: μη πιστεύειτε ἃ εἴναι τουρα νικάντα ἐν τίς γήν ἀληθεύεις εἰς μικρότερα ήχου τάς τοῦ διάλογος συμβαίνουσαν.) This follows from the nature of the case. If for the design of a type be by outward symbols to foreshadow spiritual truths, it follows that, in proportion as the thing signified is more valuable than the mere sign, and as things spiritual and eternal are more glorious than things material and transitory, the type must be inferior in value and in majesty to that which it is designed to prefigure.

More specific rules having reference especially to the Mosaic ritual are:—1. The symbolical ritual, as a whole and in its individual parts, can set forth only such ideas and truths as accord with the known, and elsewhere clearly announced, principles of Old-Test. theology. 2. An accurate knowledge of the outward constitution of each symbol is an indispensable condition of its interpretation; for, as the sole object of the symbol is to convey spiritual truth by sensible representations, to attempt to discover the former before we understand the latter is to endeavor to reach an end without using the means. 3. The first step in the interpretation of a symbol is the explanation of its name; for, as this is generally given with a direct reference to the idea symbolized, it forms itself a sort of exponent of the symbol to which it is prefixed. 4. A symbol has always the same fundamental meaning, however different may be the objects with which it is combined. Thus, for instance, the act of purification has the same symbolical meaning, whether it is performed upon a person or an animal, or upon a material object. 5. In interpreting a symbol, we must throw out of view all that is not properly connected by the laws of its physical constitution, and that does not serve to help out the symbolical representation. Symbols have often accessories of two kinds: the one consisting of such as are in themselves symbolical, and which go to make up the sum total of the representation; the other, of such as are, from the nature of things, required by the material objects composing the symbol for their continued existence. Thus, in the case of the candlestick in the sanctuary, it was provided that it should have branches and knobs and flowers, and also that it should be supplied with snuffers and muff-flakes. Now, of those accessories the former are indispensable to its serving the purpose for which it was designed—that of giving light; but they, having each a symbolical meaning, added to the symbolical effect of the whole; whereas the latter were merely required in order to prevent the lights from dying out for want of cleaning. Keeping this distinction in mind, we must not make a hasty jump into the explanation of the Mosaic ritual. Everything, in fact, of which it was composed was a symbol, with the single exception of such things as the earthly, physical condition of the substance or persons employed rendered indispensable. Nay, even these, from belonging to a typical institute, such as the nation of Israel was, acquired a sort of secondary typical character; just as the ordinary events of Israelitish history have for the same reason a spiritually doctrinal character. See SYMBOL.

VI. Types and Prophets. — In tracing out who and what typified or shadowed forth Christ and his salvation under the antediluvian, patriarchal, and Mosaic dispensations, we must be careful not to substitute the suggestions of our own imaginations for the intimations of Scripture. We must endeavor to learn the mind of God as to what actually constitutes a type, either by the express declarations of Scripture, or by the obvious analogies which subsist between things under the Gospel and its antecedent dispensations. Thus guarding ourselves, we may notice the various types by which God was pleased, at all times, in a sense, to preach the Gospel to mankind.

1. Among individual persons, before the law, Adam, Enoch, Noah, Melchizedek, Abraham, Isaac, and Joseph were eminently typical of Christ, but only in certain relations. Again, under the law, Moses, Joshua, Samson, David, Solomon, Elijah, Elisha, Jonath, Zerubbabel, and Joshua the high-priest were, in many points, singularly typical of Christ.

2. The first-born, the Nazarites, prophets, priests, and kings were typical orders of persons.

3. Under the head of things typical may be noticed: Jacob's ladder, the burning bush, the pillar of cloud and fire, and, in the opinion of some, the manna, the rock, and the brazen serpent.

4. Actions typical were: the deliverance out of Egypt, the passage of the Red Sea, the sojourn in the wilderness, the passage over the Jordan, the entrance into Canaan, and the restoration from Babylon.

5. Rites typical were: circumcision, various sacrifices, and sordy purifications.

6. Places typical were: the land of Canaan, the cities of refuge, the tabernacle, and the temple.

The above types were designed to shadow forth Christ and his blessings of salvation; but there were others also which pointed to our misfortune without him. There were ceremonial uncleanesses: the leprosy, for instance, was a type of our national pollution.

Typheus=Typhon (q. v.).

Typhon (Typhos, Typhothon, Typhoons, and Typhaon), in Greek mythology, was a monster of remote antiquity, at one time thought to have been a destructive gale of wind, at another time represented as a giant of
the earth, ejecting volcanic flames. Homer places him in the country of Arim, buried in the earth, which Jupiter strikes with lightning. Hesiod represents Typhon and Typhoens as two different and distinct beings. Typhon is the son of Typhoens, a mighty wind, who with Echidna begets the dog Orthrus, Cerberus, the Lernian hydra, and Chimera. Typhoens is the youngest son of Tartarus and Gea, with one hundred dragon-heads, frighteningly sparkling eyes, and hideous voice. He attempted to gain sovereignty over gods and men, but Jupiter bound him with lightning, and he now lies under Etna. In Egyptian mythology Typhon is the Greek name for the evil spirit represented by the dog-star, originally the influence that brought to Egypt the blessing of a yearly overflow of the banks of the river Nile, without which the corn he hired it out to the Christians or gave them the Isis and Osiris came into practice, the dog-star was designed to be the destroyer of the life of nature by heat, and now Typhon became an evil god, whose names and titles upon monuments were destroyed, because he was believed to be the enemy and persecutor of Osiris (q. v.). Typhon owned Nephtys as his wife, who by him gave birth to Anubis. His real Egyptian name is stated differently as Set or Sutekh.

Typhrestus, in Greek mythology, was the son of Sperchius, after whom a city in the Trachinian province was named.

Typhon (Gr. Τύφων), a Greek term for (1) a book of rubrics; (2) a selection from the Psalter; (3) a Sunday service in the Oriental Church.

Tyris, In Norse mythology, is one of the supreme deities of Norse mythology, as son of Odin and Frigga, and brother of Thor. As the god of boldness, wisdom, and strength, he was implored by the Heliards as well as by the Skaldians for his favor, and was worshipped with Thor and Odin. At the end of the world he will combat with the hell-dog Garm, and every will kill the other. Several antiquarians are inclined to identify him with Tuiscon.

Tyranus (Τιτανός, sovereign), the name of a man in whose school or place of audience Paul taught the Gospel for two years, during his sojourn at Ephesus (see Acts x ix, 9). A.D. 02, 52. The halls or rooms of the philosophers were called ἐκκλησία among the later Greeks (Liddell and Scott, s. v.); and as Luke applies that to the auditorium in this instance, the presumption is that Tyranus himself was a Greek, and a public teacher of philosophy or rhetoric. He and Paul must have occupied the room at different hours; whether he used it in (either case he must have been friendly to them) is left uncertain. Meyer is disposed to consider that Tyranus was a Jewish rabbi, and the owner of a private synagogue or house for teaching (_resume βεβαίως). But, in the first place, his Greek name, and the fact that he is not mentioned as a Jew or proselyte, disagree with that supposition; and, in the second place, as Paul replied to this man's school after having been compelled to leave the Jewish synagogue (Acts xix, 9), it is evident that he took this course as a means of gaining access to the heathen; an object which he would naturally seek through the co-operation of one of their own number, and not by associating himself with a Jew or a Gentile adherent of the Jewish faith. In speaking of him merely as a certain Tyranus (Τιτανός του, Luke indicates certainly that he was not a believer at first; though it is natural enough to think that he may have become such as the result of his acquaintance with the apostle. Hensen (Der Apostel Paulus, p. 218) throws out the idea that the hall may have belonged to the authorities of the city, and have derived its name from the original proprietor. See Seelen, De

Ancient Insular Tyre.
visited the site of Pale-tyrus can seriously sup-
pose that any rock on the mainland can have given rise to the name. To escape this
difficulty, Hengstenberg makes the suggestion that Paletyrus meant Tyre that formerly ex-
isted, "quae quondam fuit," and that the name was introduced after the de-
struction of the greater part of it by Nebu-
chadrezzar, to distinguish it from that part of
Tyre which continued to be in existence (De Robus Tyyriotum, p. 26). Mo-
vern, justly deeming this ex-
planation unlikely, suggests that the ori-
iginal inhabitants of the city on the mainland
possessed the island as part of their territory, and named their city from the characteristic
features of the island, though the island itself was not then inhabited (Das phoenizische Alter-
thum, II. i, 178). This ex-
planation is possible; but oth-
er explanations are equally possible. For
example, the Phoenician name of it may have
been the Old City, and this may have been translated "Palestynus" in Greek. Or, if the in-
habitants of the mainland migrated to the island, they may after-
wards, at some time or
other, have given to the
city which they left the name of Old Tyre, without its being necessarily implied that
the city had ever borne simply the name of Tyre.
Or some accidental circumstance, now beyond the reach of conjecture, long have led to the name. This again
would tally with the remark of Grote, who observes (loc. cit.) that perhaps the Phoenician name which the
city on the mainland bore may have been something resembling Palestynus in sound, but not coincident in
meaning. It is important, however, to bear in mind that this question regarding Palestynus is merely ar-
chaeological, and that nothing in Biblical history is affected by it. Nebuchadrezzar necessarily besieged the
portion of the city on the mainland, as he had no vessels with which to attack the island; but it is rea-
sonably certain that, in the time of Isaiah and Ezekiel the
heart or core of the city was on the island. The
city of Tyre was consecrated to Hercules (Melkarth),
who was the principal object of worship to the inhab-
itants (Quintus Curtius, iv. 2; Strabo, xvi, 757); and
Arrian, in his History, says that the temple on the isl-
and was the most ancient of all temples within the
metropolis (Ar. H. I. 10). It cannot be doubted, therefore, that the island had long been inhabited.
With this agree the expressions as to Tyre being "in
the midst of the seas" (Ezek. xxvii, 25, 26); and even the threat against it that it should be made like the
top of a rock to spread nets upon (see Des Vignoles, Carthage de l’Histoire, Statue [Berlin, 1798], I, 20).
As, however, the space on the island was limited, it is
very possible that the population on the mainland may have exceeded the population on the island (see Mov-
er, loc. cit. p. 81).

2. Connection with Sidon.—Whether built before or
later than Palestynus, the renowned city of Tyre, though
it laid claims to a very high antiquity (Isa. xxviii, 7; Herod. ii, 14; Quintus Curtius, iv, 4), is not mentioned
either in the Iliad or in the Odyssey; but no inference can be legitimately drawn from this fact as to the
existence or non-existence of the city at the time when those poems were composed. The tribe of Canna-
mites that inhabited the small tract of country which may be
called Phoenicia proper was known by the generic
name of Sidonians (Judg. xviii, 7; Isa. xxxii, 2, 4, 12; Josh. xiii, 6; Ezek. xxxii, 30); and this name un-
doubtedly included Tyrians, the inhabitants being of the
same race, and the two cities being less than twenty
English miles distant from each other. Hence when
Solomon sent to Hiram king of Tyre for cedar-trees out
of Lebanon, to be hewn by Hiram’s subjects, he reminds
Hiram that “there is not among us any that can skill
to hew timber like the Sidonians” (1 Kings v, 6).
Hence Virgil, who, in his very first mention of Carthage,
expressly states that it was founded by colonists from
Tyre (Aen. i, 12), afterwards, with perfect propriety and
consistency, calls it the Sidonian city (ibid. l. 671,
678; iv, 545; see Des Vignoles, loc. cit. p. 25). In like
manner, when Sidonians are spoken of in the Homeric
poems (U. vi, 590; xxiii, 748; Od. iv, 84; xvii, 424),
this might comprehend Tyrians; and the mention of
the city Sidon, while there is no similar mention of Tyre, would be fully accounted for—if it were necessary to account for such a circumstance at all in a poem—by Sidon's having been in early times more flourishing than Tyre. Tyre was often distant from the land and Tyre is not mentioned in the Pentateuch; but here, again, though an inference may be drawn against the importance, no inference can be legitimately drawn against the existence, of Tyre in the times to which the Pentateuch refers. See Sidon.

3. General Character.—As already intimated, Tyre was composed of two distinct parts or towns in historical times: the one situated on the mainland, or continental Tyre, and one on the island opposite, from four to thirty stadia (Pliny, Strabo) distant from each other. According to Pliny, the circumference of both was reckoned at about nineteen Roman miles, the island-town comprising about twenty-two stadia. The town on the shore was called Palæstyrus, not from its having been founded before Island-Tyris—for this, indeed, we may assume to have been the first of the two (Reland, Vitringa, Hengstenberg, etc.)—but from the circumstance of its having achieved a high renown long before its much less favorably situated island-sister. Constantly exposed to earthquakes and deluges—occupying a space naturally circumscribed, and rendered still more so by the ejections necessary for the purple-fisheries and mint—Tyre never spared the means of exporting and import by caravans that belonged to the opposite city, Island-Tyris was by far inferior in importance. In fact, only one (the western) part of the island had been built up over to the time of Hiram, the contemporary of Solomon—viz. the "Old Town" (rō dēru), which probably served as harbor, a place for arsenals and magazines, to Palæstyrus, that by this time had sent out colonies already to Tartessus and the northern coast of Libya. The other part of the island, or rather a small island by itself, which has now ceased to be such, and which was first joined to the dēru as the "New Town" by Hiram, had till then probably been inhabited only by the priests attached to the sanctuary of Melkart. Besides these two there was a third town or suburb, the Eurychorus (esplanade), formed by means of substructions on the eastern side of the rock. Palæstyrus, extending from the river Leontes on the north to the Ras-al-Ain on the south, covered with all its only part of the whole area of the ancient strip of land, and lay in one of the most fertile and blooming plains of Phœnicia (comp. Hos. ix, 13, נִצָּבָה נְצָב כִּי בָּיָם פַּה שָׁוָא, "planted in a pleasant place;" or William of Tyre, "Fer
tilitate precipua et amoenitatis quasi singularis, habet
planiitem sibi continentur divitis glebe et opimis soli," xiii, 3). It was watered by several aqueducts, which carried the stream from the fountain-group situated in the plain itself (head of the well, Ras-al-Ain), not only through the whole territory of the continental city, but, probably by means of subterranean pipes, also into the island-city. Without this supposition it would hardly be credible how the latter, which, up to the siege by Shalmaneser (before the 8th century), had subsisted on rain-water only collected in cisterns and open canals (יוֹדָם יָּרָם) from the Ras, could have stood the long sieges by Nebuchadnezzar (thirteen years) and of Alex
tander, who naturally stopped the overground supplies, without apparently once suffering from want of water. Possibly we may, in a certain annual rite called the "Wedding of the land-water to the sea-water," still kept up by the inhabitants, see a faint reminiscence of this only part of the whole area of the ancient royal pal
cela and the first sanctuary of Hercules, though the most celebrated one lay on the island opposite. The happy mixture of land and sea scenery thus exhibited by the two cities in the time of their prosperity is graphically described by Nonnus, a learned Egyptian native of the middle of the 4th century: "The sailor furrows the sea with his oar, as the plough
man the soil; the lowing of oxen and the song of birds answer the deep roar of the main; the hamadryad among the tall trees hears the voice of the nereid calling to her from the waves; the breezes from Lebanon, while it cools the rustics at his midday labor, speeds the sailor seaward." "O Tyrus," exclaims the prophet (Ezek. xxvii, 5, etc.), "thou hast said, I am of perfect beauty; thy borders are in the midst of the sea, thy builders have perfected thy beauty." The poets call her "a virgin bathing in the sea, a Tartessus-ship swimming upon the waves, an island on shore, a city in the sea withal," etc. Above all, however, Nonnus makes his Indian hero get into ecstasies at the "primeval fountains, especially those where the water . . . rushes out of the depths of the earth, returns every hour," and he mentions three distinct sources or water-nymphs—"Abarisca, the fertile; Kalirrhoe, the sweet; and Drosera, the rich and bridal one."

The description of Tyre in the prophecy of Ezekiel (xxvii, 10) receives striking illustration from what we believe to be its earliest coins. These coins were held to be most probably of Tyre or some other Phœnician city, or possibly of Babylon, on numismatic evidence alone, by Mr. Burgon, of the British Museum. They probably date during the 5th century B.C.—they may possibly be a little older—but it is most reasonable to consider them as of the time of, and issued by, Darius Hystaspis. The chief coins are octadrachms of the earlier Phœnician weight, bearing, on the obverse, a war-galley beneath the towered walls of a city, and, on the reverse, a king in a chariot, with an incuse goat be
eath. This combination of galley and city is exactly what we find in the description of Tyre in Ezekiel,
TYRE

for it is indisputable that the tribe of Asher never possessed the Tyrian territory. According to the injunctions of the Pontaetuchi, indeed, all the Canaanitish nationsought to have been exterminated; but, instead of this, the Israelites dwelt among the Sidonians or Phoenicians, and it was said of32, and never seem to have had any war with that intelligent race. Subsequently, in a passage of Samuel (2 Sam. xxiv, 7), it is stated that the enumerators of the census in the reign of David went in pursuance of their mission to Tyre, among other cities, which must be understood as an indication that Tyre was subject to David's authority, but merely that a census was thus taken of the Jews resident there.

2. But the first passages in the Hebrew historical writings, or in ancient history generally, which afford glimpses of the actual condition of Tyre are in the book of Samuel (2 Sam. v, 11), in connection with Hiram, king of Tyre (B.C. 980-947) sending cedar-wood and workmen to David, for building him a palace; and subsequently in the book of Kings, in connection with the building of Solomon's temple. One point at this period is particularly worthy of attention. In distinction to the Tyrians, who, at least from the beginning, were commercial cities out of Phoenicia in the ancient and modern world, Tyre was a monarchy, and not a republican; and, notwithstanding its merchant princes, who might have been deemed likely to favor the establishment of an aristocratic commonwealth, it continued to the period of the Hebrew monarchy to remain a representative form of government, retaining its final loss of independence. Another point is the skill in the mechanical arts which seems to have already been attained by the Tyrians. Under this head, allusion is not specially made to the excellence of the Tyrians in felling trees; for, through vicinity to the forests of Lebanon, they had learned, as naturally have become skilled in that art as the backwoodsmen of America. But what is peculiarly noteworthy is that Tyrians had become workers in brass or copper to an extent which implies considerable advancement in art. In the enumeration of the various works in brass executed by the Tyrian artists whom Solomon sent for, there are dildies, palm-trees, oxen, lions, and cherubim (1 Kings vii, 28-45). The manner in which the cedar-wood and dr-wood were conveyed to Jerusalem is likewise interesting, partly from the similarity of the sea voyage to that which may otherwise be called on, and partly by giving a vivid idea of the really short distance between Tyre and Jerusalem. The road was taken in boats to Joppa (2 Chron. ii, 16; 1 Kings v, 9), a distance of less than seventy-four geographical miles. In the Mediterranean, during summer, there are times when this voyage along the coast would have been perfectly safe, and when the Tyrians might have reckoned confidently, especially at night, on light winds to fill the sails which were probably used on such occasions. From Joppa to Jerusalem the distance was about thirty-two miles, and it is certain that by this route the whole distance between the two celebrated cities of Jerusalem and Tyre was not more than 106 geographical, or about 122 English, miles. Within such a comparatively short distance (which by land, in a straight line, was about twenty miles shorter), it would be easy for two sovereigns to establish personal relations with each other, more especially when they were inhabitants of the same land (Judg. i, 31). The Tyrians, in one direction, was the southern boundary of Phoenicia. Solomon and Hiram may frequently have met, and thus laid the foundations of a political alliance in personal friendship. If by messengers they sent riddles and problems for each other to solve (Josephus, Ant. viii, 6, 3), they had, on several occasions, a keen encounter of wits in convivial intercourse. In this way, likewise, Solomon may have become acquainted with the Sidonian women who, with those of other nations, seduced him to polytheism and the worship of Astarte in his old age. Similar remarks apply to the circumstances which may have previously occasioned the strong affection of Hiram for David (1 Kings v, 1). However this may be, it is evident that under Solomon there was a close alliance between the Hebrews and the Tyrians. Hiram supplied Solomon with cedar-wood, precious metals, and workers in gold and silver; and Hiram had his own city at Ophir; and, while on the other hand, Solomon gave Hiram supplies of corn and oil, cedè to him some cities, and permitted him to make use of some havens on the Red Sea (ix, 11-14; 26-28; x, 22). Under Hiram, Tyre not only attained to its fullest glory and renown among the maritime states of the ancient world, but was also protected by the capital city, so largely bordered by him into three distinct towns, received its fullest share of palaces, temples, and public edifices, and its two roadsteads and two harbors probably date from this period. It is at this period also when the joint trading expeditions to Ophir are recorded to have taken place, in which the Tyrians furnished the pilots and mariners. Hiram himself seems altogether to have been a very refined, pious, and peaceful monarch. Hardly any wars are recorded during his lifetime, and his reported interchanges of problems with the "wisest of mankind" points to his renown as a judex sapientissimus. These friendly relations survived long after the dissolution of the commonwealth of the ten tribes, and a century later Ahab married a daughter of Ethbaal, king of the Sidonians (xvi, 31), who, according to Menander (Josephus, Ant. viii, 13, 2), was a daughter of Ethbaal, king of Tyre. Hiram was followed, according to Menander (in Josephus) and Theophrastus, by Balexartus, whose four sons reigned after him for short periods. First came Abaldastatus (993-981), who, in consequence of a palace revolution, was followed on the throne for twelve years by a son of his nurse—a period of internal sedition and general lawlessness having intervened. The latter, according to Justin tells us all the free citizens of Tyre were murdered by the slaves. Astartus, the eldest son of Balexartus, succeeded to the government, and ruled from 918 to 907, when a third brother, Astyarmus, was made king. He was murdered nine years later by Phalecias, his youngest brother, who, after a brief reign of nine months, was put to death by Ethbaal, priest of Astarte, in whose family the kingdom henceforth became hereditary. This Ethbaal, the Ethbaal of Scripture, whose daughter was married to Ahab, is called by Josephus "king of Tyre and Sidon," a statement of his synonymy which Tyre and Astarta in the same day. The drought reported to have taken place in Judaea under Ahab seems to have also touched Phoenicia, and such was Ethbaal's piety that at his supplication thunder-claps were heard, followed by copious rains. It was chiefly before his time that the temple of Tyre (888-860), which Tyre speeded to spread its colonies as far as Africa, Spain, etc.—owing, in the first instance, probably to the danger of life and uncertainty of circumstances to which the country had been plunged by the internal conflicts. But Ethbaal himself seems to have encouraged colonization, and, in order to prevent the overcrowding of the old cities, to have built up a number of new cities. Balezor, his son, succeeded in 865, and was followed by his son Mutton, the office of high-priest devolving on his second son, Sicharbaal. Mutton died in 853, and left two children, Elissa (Dido) and Pygmalon, who were to share the kingdom between them. The father, however, had left a will, by which Ethbaal, in his turn, was to unite the high-priesthood with the crown. To this arrangement, however, the people, averse to the supreme priestly power, demurred, and Pygmalon was declared sole king. Elissa's husband having been killed, for the sake of his treasures, by the new king, and herself being deprived of her dominion, she is said to have entered into a conspiracy with the aristocratic party, who, during the next year of Elissa's widowhood, assisted and followed by her brother Barca and the principal families of the land, to have reached Carthage (New Town, כַּרְתָּגְנָה), a colony founded some time
Tyre before the Sidonians (about B.C. 818), and to have completely rebuilt it and laid the foundation for a power which contended with mighty Rome for the empire of the sea.

4. The political existence of Palestine, Syria, and Phoenicia, which, instead of making a joint desperate stand, kept on intriguing and plotting against each other—Phoenicia, moreover, being hated and despised by her allies for her iniquitous trade in slaves kidnapped among her neighbors, chiefly in Judaea—was henceforth doomed. From this time commenced denunciations, and, at first, threats of retaliation (Joel iii, 4–8; Amos i, 9, 10); and, indeed, though there might be peace, there could not be sincere friendship between the two rival states. Henceforward, every new denunciation was being fulfilled first arose from the progressive conquests of the Assyrian monarchs. It was not probable that a powerful, victorious, and ambitious neighbor could resist the temptation of endeavoring to subjugate the small strip of land between the Lebanon and the sea, so insignificant in extent, but overrunning with so much wealth, which the Greeks called Phoenicia. Accordingly, when the king of Assyria had taken the city of Samaria, he conquered the kingdom of Israel and carried its inhabitants into captivity, he turned his arms against the Phoenician cities. At this time Tyre had reached the height of its glory. It possessed the island of Cyprus, with the valuable mines of the metal "copper" (so named from the island), and apparently the city of Sidon was subject to its sway. But the Assyrian king seems to have taken advantage of a revolt of the Cyprians; and what ensued is thus related by Monander, who translated the archives of Tyre into the Greek language (see Josephus, Ant. ix, 14, 2): "Elulasus reigned thirty-six years (over Tyre). This king, upon the revolt of the Kittaens (Cyprians), sailed with a fleet against them, and reduced them to submission. On the other hand, the king of the Assyrians attacked in succession Tyre, Sidon, and Carthage, without making peace with all, and turned back. On this, Sidon and Ace (i.e. Akkò or Acre) and Palæstyrus revolted from the Tyrians, with many other cities which delivered themselves up to the king of Assyria. Accordingly, when the Tyrians would not submit to him, the king returned and fell upon them again, the Phoenicians having furnished him with sixty ships and eight hundred rowers. Against these the Tyrians sailed with twelve ships, and, dispersing the fleet opposed to them, they took five hundred men prisoners. The reputation of all the citizens in Tyre was hence increased. Upon this the king of Assyria set off his army, pillaged the whole district, and burnt down the city of Sidon, and the country adjoining; and, as a punishment for the wrongs done by the Tyrians, who were not willing to pay the tribute which had been imposed by the Assyrians, the king caused the city of Tyre to be devastated, and carried away to his own land the artificer and sculptor which the Tyrians had furnished to the Persians for the building of their palaces and temples. So that this city was left in ruins for several years, and was rebuilt only in the time of Solomon; it came from Arabia by the Red Sea. See Ophir. Whether the Arabians, whose wealth was proverbial in Roman classical times (Horace, Od. i, 29, 1), obtained their gold by traffic with Africa or India, or whether it was the product of their own country, is uncertain; but so far as it is certain that the gold of Tyre was obtained in this manner, it will probably be cleared up in the progress of geological knowledge. On the other hand, the silver, iron, lead, and tin of Tyre came from a very different quarter of the world, viz. from the south of Spain, where the Phoenicians had established their settlement of Tarshish, or Tartessus. As to copper, we should have presumed that it was obtained from the valuable mines in Cyprus; but it is mentioned here in conjunction with Javan, Tubal, and Meshech, which points to the districts on the south of the Black Sea, in the neighborhood of Armenia, in the southern line of the Caucasus. Against these facts, if the account be true, there is no defense. Thence Tyre was supplied with wheat was Palestine. It may be added that the value of Palestine as a wheat country to Tyre was greatly enhanced by its proximity, as there was scarcely a part of the kingdom of Israel on the west of the river Jordan which was distant more than a hundred miles from that great commercial city. The extreme points in the kingdom of Judah would be somewhat more distant, but the wheat probably came from the northern part of Palestine. Tyre likewise obtained from Palestine oil, honey, and balm, but not wine apparently, notwithstanding the abundance of grapes in that region, and it was not provided for in the wine imported from Damascus, and was called wine of Helbon, which was probably not the product of the country adjoining the celebrated city of that name, but came from the neighborhood of Damascus itself (see Porter, Hand- book for Syria, ii, 495; comp. Atheneus, i, 51). The bedawin Arabs supplied Tyre with lambs and rams and goats, for the rearing of which their mode of life was so well adapted. Egypt furnished linen for sails, and doublets for other purposes, and the dyers from shellfish, which afterwards became such a source of profit to the Tyrians, were imported from the Peloponnesus (comp. the Lucumon purpuras of Horace, Od., ii, 18, 7, and Pliny, ix, 40). Lastly, from Dedan, in the Persian Gulf, an island occupied possibly by a Phoenician colony, horns of ivory and ebony were imported, which must originally have been obtained from India (Ezek. xxvii).

5. After the siege of Tyre by the Assyrians (which must have taken place not long after B.C. 721), Tyre remained a powerful state with its own kings (Jer. xxv, 22; xxvii, 3; Ezek. xxviii, 2–12), remarkable for its wealth, with territory on the mainland, and protected by a strong navy. It was one of the greatest commercial cities on account of the high wages which may be obtained by artizans in a thriving community, compared with the ordinary pay of a soldier, and Tyre had been unable to resist the demoralizing temptation. In its service there were Phoenicians from Arvad, Ecdh substance obtained through the commerce of Egypt, and the hardy mountaineers from Persia. This is the first time that the name of Persia occurs in the remains of ancient literature, before its sons founded a great monarchy on the ruins of the Chaldaean empire. Independently, however, of this fact respecting Tyrian mercenary soldiery, that nation had been preeminently the shepperd of the trade of Tyre. On this head, without attempting to exhaust the subject, a few leading points may be noticed. The first question is as to the countries from which Tyre obtained the precious metals, and it appears that its gold came from Arabia by the Persian Gulf (v, 22), just as in the time of Solomon, it came from Arabia by the Red Sea. See Ophir. Whether the Arabians, whose wealth was proverbial in Roman classical times (Horace, Od. i, 29, 1), obtained their gold by traffic with Africa or India, or whether it was the product of their own country, is uncertain; but so far as it is certain that the gold of Tyre was obtained in this manner, it will probably be cleared up in the progress of geological knowledge. On the other hand, the silver, iron, lead, and tin of Tyre came from a very different quarter of the world, viz. from the south of Spain, where the Phoenicians had established their settlement of Tarshish, or Tartessus. As to copper, we should have presumed that it was obtained from the valuable mines in Cyprus; but it is mentioned here in conjunction with Javan, Tubal, and Meshech, which points to the districts on the south of the Black Sea, in the neighborhood of Armenia, in the southern line of the Caucasus. Against these facts, if the account be true, there is no defense. Thence Tyre was supplied with wheat was Palestine. It may be added that the value of Palestine as a wheat country to Tyre was greatly enhanced by its proximity, as there was scarcely a part of the kingdom of Israel on the west of the river Jordan which was distant more than a hundred miles from that great commercial city. The extreme points in the kingdom of Judah would be somewhat more distant, but the wheat probably came from the northern part of Palestine. Tyre likewise obtained from Palestine oil, honey, and balm, but not wine apparently, notwithstanding the abundance of grapes in that region, and it was not provided for in the wine imported from Damascus, and was called wine of Helbon, which was probably not the product of the country adjoining the celebrated city of that name, but came from the neighborhood of Damascus itself (see Porter, Hand- book for Syria, ii, 495; comp. Atheneus, i, 51). The Bedawin Arabs supplied Tyre with lambs and rams and goats, for the rearing of which their mode of life was so well adapted. Egypt furnished linen for sails, and doublets for other purposes, and the dyers from shellfish, which afterwards became such a source of profit to the Tyrians, were imported from the Peloponnesus (comp. the Lucumon purpuras of Horace, Od., ii, 18, 7, and Pliny, ix, 40). Lastly, from Dedan, in the Persian Gulf, an island occupied possibly by a Phoenician colony, horns of ivory and ebony were imported, which must originally have been obtained from India (Ezek. xxvii).

See Commercial.

6. With the iron grasp of Assyria began to relax, the Chaldaean-Egyptian contest brought still greater miseries upon that unfortunate Syro-Phoenician coast, and Phoenicia, still nominally ruled by Tyre. The Phoenicians, it would appear, had allied themselves to the Egyptians, who under Psammetichus had seized upon Philistia, and were afterwards seen as having sought the favor of the new-suitor, that is to say, the new enemy of the Tyro-Palestine states. When, therefore, at Archelochus, the Egyptians had been defeated by the
Chaldeans, the latter instantly followed up their victory by occupying Syria, Palestine, and Phoenicia, and selling a great number of the inhabitants of the latter, about B.C. 605. A league having been formed between the Phoenicians and Tyre,这也 lead to a new Chaldaean expedition against them under Nebuchadnezzar (Jer. xxv, 22; xxviii, 3; lviii, 4), which ended with the destruction of Jerusalem (B.C. 588) and the reduction of the sea-coast, except Tyre. For thirteen years Nebuchadnezzar besieged it by water and by land, but with what success the crisis is still a matter of debate. Hitzig, Gesenius, Heerem, Winer, Kenrick, and others hold that the siege was a failure. It is certain that the fall of Tyre is mentioned in no ancient history—neither by Josephus, nor by the Tyrian historian Mem chambre, nor by Philostratus. Berossus, indeed, affirmed that Nebuchadnezzar "subdued all Syria and Phoenicia," but Tyre is not expressly mentioned. Nay, Jerome says persons who had examined Greek and Phoenician histories, especially the writings of Nicolaus Damascus, find no mention of the siege at all, but the reply of the father is only a return upon the perfidy of mendacity of profane writers. Jerome's own assertion is, "Deus praedixerat, hoc sufficit." The question then comes to be, whether the oracle of Ezekiel implies the capture of Tyre. The most graphic descriptions of this siege are found in Ezek. xxvi, 7-12, 17; xxviii, 2; xxix, 16, 17. The prophet's language is in the main native; solenne, and he caused his army to serve a great service against Tyre: every head was made bald, and every shoulder was peeled; yet he had no wages, nor his army, for Tyrus, for the service that he had served against it. Therefore, saith the Lord God, Behold I will give the land of Egypt unto Nebuchadnezzar, king of Babylon, and he shall take her multitude, and take her spoil, and take her prey; and it shall be the wages for his army. I have given him the land of Egypt for his labor where-with he served against it, because they wrought for me, saith the Lord God (xxix, 18-20), would seem to imply that Nebuchadnezzar had failed; that his army had put forth all its energies, till "every head was bald" by the constant pressure of the helmet, and "every shoulder peeled" by the hard labor of the trenches and siege-work, but that he had been disappointed, that he got no wages; that the expense of the city did not fall into the share of the Egyptians, but that they bore the cost of it, and did not afford him compensation "as a spoil," "as a prey," and wages for his army. But surely the author or the collector of these oracles could not so contradict himself and his own utterances as to affirm, as in xxvi, 7-21, and then deny, the capture of Tyre by Nebuchadnezzar. The whole system of the argument led by Movers and Ewald, the latter of whom says that Jerome's statement "quite agrees with the brief words of Ezekiel." It may also be replied, with Havernick, Hengstenberg, Fairbairn, and others, that the meaning is that Nebuchadnezzar, in taking the city, they found no unfitting recompense, as, according to Jerome, the inhabitants had removed all their valuable property to the island. That he took Palaestris seems certain, though there is no proof of Jerome's assertion that, in his assault upon the island, he had nearly completed a dense and vast state to throw off the foe, like a capitalization as is admitted by Niebuhr, Dunker, Kenrick, and others (Niebuhr, Gesch. Assyris., p. 216; Dunker, Gesch. des Alterthums, i. 172, Kenrick, Phoenicia, p. 900; see Pusey, On Daniel, p. 288). Moreover, Isaiah, in his oracle against Tyre, specifically declared that it should be destroyed not by the power which then threatened it, by the Chaldeans, a people "formerly of no account" (xxiii, 13). The more detailed predictions of the prophet Ezekiel were delivered a hundred and twenty years later, B.C. 588. Tyre was not taken till the fifteenth year after the captivity, B.C. 573, more than seventeen hundred years, according to Josephus, from its foundation. Its destruction must have been entire; all the inhabitants were put to the sword or led into captivity, the walls were razed to the ground, and it was made a "terror" and a desolation. It is remarkable that one reason assigned by Josephus for the destruction of the principal city is its exultation at the destruction of Jerusalem: "I shall be replenished now she is laid waste" (xxvi, 2). This clearly indicates that its overthrow was posterior to that event; and if we take the seventy years during which it was predicted by Isaiah (xxix, 15) that Tyre should be forgotten to denote a definite term (which seems the most natural sense), we may conclude that it was not rebuilt till the same number of years after the return of the Jews from Babylon. That it was continental Tyre, and not insular Tyre, which Nebuchadnezzar besieged appears from the description of the siege which we have given us by Ezekiel; for we find that the king cast up a mound against it, and erected engines to batter down the walls (Ezek. xxviii, 8-10). But that the city on the island then escaped this fate is manifest from the Phoenician histories. But as to the latter also, at least a show of submission, if not a subjection—leaving the renowned city of Tyre, upon which the whole naval power untouched—was what Nebuchadnezzer gained when he ended the "wageless" siege (comp. xxix, 17). Once more Nebuchadnezzar armed, at the end of this war, against Egypt, but Pharaoh-Apis, swiftly marching upon Phoenicia, subduing it and destroying its fleet, prevented him from making his assault; and in this expedition Apries besieged Sidon, fought a naval battle with Tyre, and reduced the whole of the coast of Phœnicia, though this could not have had lasting effects (Herod. ii, 161; Diood. i, 68, Movers, Dias phonikis Alterthum, ii, 451). The rule of Nebuchadnezzar over Tyre, though real, may have been light and in the nature of an alliance; and it may have been in this sense that Meribaal, a subsequent Tyrian king, was sent for to Babylon (Josephus, Cont. Apion, i, 21). At this time the ancient constitution of Tyre was changed. Ithobaal had been followed by Baal, but after Baal two judges (suffetes) were to maintain the dominion of the city. We hear of internal commotions—natural enough in a country and city upon which calamity after calamity had fallen in so short a time, and the existence of two parties in the commonwealth that looked respectively to Chaldeia and to Egypt for support, but were dissatisfied with the measures of the latter. In 586, while Erimosthen, the head of the Tyrian or Phoenician affairs, Cyrus captured Babylon, and thus became master also of Phœnicia, which had reverted to this power. At that time Sidon, being made the royal residence, again resumed the hegemony. 7. During the Persian domination the Tyrians were subject in name to the Persian king, and may have given him tribute. With the rest of Phœnicia, they had submitted to the Persians without striking a blow; perhaps through hatred of the Chaldees, perhaps solely from prudential motives. But their connection with the Persian king was marked by their initiative in the expedition of Xerxes against Greece (Ibid. vii, 98); and Mapê, the son of Sirom the Tyrian, is mentioned among those who, next to the commanders, were the most renowned in the fleet. It is worthy of notice that at this time Tyre seems to have been inferior in power to Sidon, which was situated on the twenty English miles distant from each other; and it was easy to
conceive that in the course of centuries their relative importance might fluctuate, as would be very possible in modern times with two neighboring cities, such, for example, as Liverpool and Manchester. It is possible, also, that Tyre may have been seriously weakened by its long struggle against Nebuchadnezzar. Under the Persian dominion, Tyre and Sidon supplied cedars, wood again to the Jews for the building of the second Temple; and this wood was sent by sea to Joppa, and thence to Jerusalem, as had been the case with the materials for the first Temple in the time of Solomon (Ezra iii, 7). Under the Persians, likewise, Tyre was visited by a historian, from whom we might have derived valuable information respecting its condition (Herod, ii, 44), but the information actually supplied by him is scanty, as the motive of his voyage seems to have been solely to visit the celebrated Temple of Melkarth (the Phoenician Hercules), which was situated in the island, and was highly venerated. He gives no details as to the city, and merely specifies two columns which he observed in the temple, one of gold and the other of emerald; or, rather, as is reasonably conjectured by Sir Gardiner Wilkinson, of green glass (Rawlinson, Herodotus, ii, 81, 82). Under the successive Persian rulers Phoenicia was allowed to retain many of its national institutions, and even a certain amount of independence, in return for which it paid a comparatively small tax and placed its again powerful fleet at the disposal of the conquerors, who entirely lacked that most vital element of naval power. Together with Philistia and Cyprus, it was incorporated under Darius Hystaspis in the fifth

with Greece and Macedonia suddenly cut off; and he accordingly summoned all the Phoenician cities to submit to his rule. All the rest of them, including Tyre and Sidon, with those of Bybus, and Sidon, complied with his demands, and the sea routes of those cities in the Persian fleet brought away their ships to join him. Tyre alone, calculating probably at first on the support of those seamen, refused to admit him within its walls; and then ensued a memorable siege, which lasted seven months, and the success of which was the greatest of all the achievements which Alexander up to that time had attempted. At that time Tyre was situated on an island nearly half a mile from the mainland; "it was completely surrounded by prodigious walls, the loftiest portion of which on the side facing the mainland reached a height not less than one hundred and fifty feet." and, notwithstanding his persevering efforts, he could not have succeeded in his attempt, if the harbor of Tyre to the north had not been blocked by the Cyprians, and that to the south by the Phoenicians. Moreover, owing to internal disturbances, Carthage was unable to afford any assistance to its parent state. For seven months Tyre sustained one of the most memorable sieges ever recorded (B.C. 332). Pyrrhus having been razed to the ground, the island-city was connected by the conqueror with the mainland by means of a mole, which, once destroyed, had to be reconstructed; and the immense fleet was collected, the ablest engineers of Phoenicia and Cyprus exercised all their skill on the construction of new batteries and other machines; while the means of defence on the part of the Tyrians were as

nomos, circle, of the empire; and up to the time of Xerxes the relations between the conquerors and the conquered were of a perfectly friendly nature. But when this king, during his short invasion, had managed to destroy the highly prized Phoenician fleet almost completely, and to this calamity added galling measures and humiliations, after which the people became so exasperated that they took part, under Sidon's leadership, in the revolt of Egypt against Artaxerxes Mænon and Ochus, about the middle of the 4th century, which ended most disastrously for the whole country, and particularly for Sidon, which, wealth and all, was fired by its own inhabitants. Tyre afterwards (320) again resumed the sway, until, after the battle on the Issus, all the Phoenician cities except herself paid their allegiance to the Macedonian warrior.

8. It was in consequence of this contumacy that Tyre was assailed for the third time by a great conqueror; and if some uncertainty hangs over the siege by Nebuchadnezzar, the results of the siege by Alexander were clear and undeniable. It was essential to the success of his military plans that the Phoenician fleet should be at his command, and that he should not be liable through their hostility to have his communications by sea
cunning as they were successful, and fearfully galling to the besiegers. At last Tyre fell under a furious double attack, and, provoked by their desperate resistance even after the town was already taken, the soldiers fired it and massacred an immense number of the inhabitants. In accordance with the barbarous policy of ancient times, 30,000 of its inhabitants, including slaves, free females, and free children, were sold as slaves (Arrian, iv, 24, 9; Diodorus, xvii, 46). Alexander replaced the population by new colonists, chiefly Carians, and soon again the exceptionally favorable position of the place regained for it part of its ancient prosperity, though its trade is said to have suffered by the vicinity and rivalry of Alexandria.

9. Polemy had, after Alexander’s death, annexed Phoenicia to his kingdom; but when, in B.C. 515, Antigonus returned from Babylon, he easily expelled his garrisons from all the Phoenician cities save Tyre, which only surrendered after an eighteen months’ siege. The boundaries of its territory at that period were: Sarepta to the north, the “Tyrian Ladder” to the south, and Kesed and Baka in Galilee to the east. Under the Macedonian successors of Alexander, it shared the fortunes of the Seleucids, who are said to have given many privileges; and there are still in existence coins of that epoch with a Phoenician and Greek inscription (Eckhel, 

ing it he says that the circumference of the city proper (i.e. the city on the peninsula) was twenty-two stadia, while that of the whole city, including Palaethus, was nineteen Roman miles (Hart. Nat. v, 17). The accounts of Strabo and Pliny have a peculiar interest in this re- spect, that they appear to consider the city of Tyre must have been when visited by Christ (Matt. xxv, 21; Mark vii, 24). It was perhaps more populous than Jerusalem; and if so, it was undoubtedly the largest city which he is known to have visited. It was not much more than thirty miles distant from Nazareth, where Christ mainly lived as a carpenter’s son. It was the greatest part of his life (Matt. ii, 23; iv, 12, 18, 18; Mark vi, 3). We may readily conceive that he may often have gone to Tyre while yet unknown to the world; and, whatever uncertainty there may be as to the extent to which the Greek language was likely to be spoken at Nazareth, at Tyre and in its neighborhood, there must have been excellent opportunities for conversation in that language, with which he seems to have been acquainted (Mark vii, 26). At an early period a Christian community was formed there (Acts xxi, 3, 7). It was early the see of a Christian bishopric, and Cassius, bishop of Tyre, bestowing his residence having been present at the Council of Cesarea towards the close of the 2d century (Reland, Palestina, p. 1054).

For a long time Tyre retained her manufactures and trade, though a mere shadow of what these once had been. The famous shipbuilding industry with regard to her dyeing produce had been a matter of national pride; and the name of Hatziran granted Tyre the title of metropolis, and it formed the principal naval station on the Tyrian coast. Once again it was fired in A.D. 198, when it took part with Septimius Severus against Pescennius Niger in their contest for the crown, and Severus gracefully bestowed upon the place, which he peopled with his third legate, the title of colonia and the Jus Italicum. Such was its elastic vitality that at the time of Constantine it again equalled all the Eastern cities in wealth and commercial prosperity. Jerome, in the 4th century, calls it the noblest and most beautiful city of Phoenicia, and expresses his astonishment at the apparent nonfulfilment of the prophecy which threatened its eternal desolation (“Ne ædificaveris ultra videtur facere questionem, quomodo non sit ædificata? quam bodie cernimus Phoenicis nobilissimam et pulcherrimam civitatem”).

11. In the 7th century took place the extraordinary Arabian revolution under Mohammed which has given a new religion to so many millions of mankind. In the years A.D. 638-638 all Syria and Palestine, from the Dead Sea to Antioch, were conquered by the caliph Omar. This conquest was so complete that in both those countries the language of Mohammed has almost totally supplanted the language of Christ. In Syria there are only three villages where Syriac (or Aramaic) is the vernacular language. In Palestine it is not the language of a single native; and in Jerusalem, to a stranger who understands what is involved in this momentous revolution, it is one of the most suggestive of all sounds to hear the passers-by daily call Moslems to prayers in the Arabic language of Mohammed within the sacred precincts where once stood the Temple in which Christ worshipped in Hebrew or in Aramaic. (As to the Syriac language, see Porter, Handbook for Syria and Palestine, ii, 561.) But even this conquest did not cause the overthrow of Tyre. It only imposed essential conditions on which peace was granted to Tyre, as to other Syrian cities, were the payment of a poll-tax, the obligation to give board and lodging for three days to every Moslem traveller, the wearing a peculiar dress, the admission of Moslems into the churches, the doing away with all the rites and all the doing away of all insulting expressions towards the Mohammedan religion, and the prohibition to ride on horseback or to build new churches (see Weid, Gesch. der Chalifen, i, 81-82). Some of these conditions were humiliating and nearly heart-breaking; but if submitted to, the lives
and private property of the inhabitants remained untouched. Notwithstanding the establishment of an imperial dyeing manufactury at Constantinople, Tyre yet retained her ancient celebrity for her purple, which was imported into Lombardy at the time of Charlemagne. Under the caliphs it enjoyed the benefits of a mild and enlightened dominion, and during the crusades was much admired both for its natural beauty and its fine edifices and its generally prosperous aspect. It again had at that time to sustain a long siege, but finally surrendered (1124), and was made an archbishopric, bestowed four years afterwards upon William of Tyre, the chronicler of the crusades. In August, 1192, it was fixed as the northern boundary of the Christian territories in Palestine, and continued to flourish, chiefly through the Venetian trade, as a commercial city until the conquest of Syria by Selim I in 1516, from which time forth its decline, further aided by the discovery of the New World and the route to Asia by the Cape of Good Hope, has been rapid and complete.

IV. Present Condition.—In the first half of the 14th century Tyre was visited by Sir John Mandeville, who says, speaking of “Tyre, which is now called Sūr, here was once a great and goody city of the Christians; but the Saracens have destroyed it in great part, and they guard that haven carefully for the fear of the Christians” (Wright, Early Travels in Palestine, p. 141). About 1610-11 it was visited by Sandys, who said of it, “But this once famous Tyre is now no other than a heap of ruins; yet have they a reverent aspect, and do instruct the pensive beholder with their exemplary frailty. It hath two harbors, that on the north side the fairest and best throughout all the Levant (which the cursours enter at their pleasure); the other choked with the decays of the city” (Purchas, Pilgrims, ii, 1393). Towards the close of the same century, in 1697, Maundrell says of it, “On the north side it has an old Turkish castle, besides which there is nothing here but a mere Babel of broken walls, pilars, vaults, etc., there being not so much as an entire house left. Its present inhabitants are only a few poor wretches that harbor in vaults and subsist upon fishing” (see Harris, Voyages and Travels, ii, 846). Lastly, without quoting at length Dr. Richard Pococke, who in 1737-40 stated (see vol. x of Pinkerton, Voyages and Travels, p. 470) that, except some janizaries, there were few other inhabitants in the city than two or three Christian families, the words of Hasselquist, the Swedish naturalist, may be recorded, as they mark the lowest point of depression which Tyre seems to have reached. He was there in May, 1751, and he thus speaks of his visit: “We followed the seashore... and came to Tyre, now called Zor, where we lay all night. None of these cities, which formerly were famous, are so totally ruined as this except Troy. Zur now scarcely can be called a miserable village, though it was formerly Tyre, the queen of the sea. Here are about ten inhabitants, Turks and Christians, who live by fishing” (Voyages and Travels in the Levant [Lond. 1766]). A slight change for the better began soon after. Volney states that in 1786 the Metawileh took possession of the place, and built a wall round it twenty feet high, which existed when he visited Tyre nearly twenty years afterwards. At that time Volney estimated the population at fifty or sixty poor families. Since the beginning of the present century there has been a partial revival of prosperity. But it has been visited at different times during the last thirty years by Biblical scholars, such as Robinson, Stanley (Sinai and Pal., p. 270), and Renan (Letter in the Moniteur, July 11, 1861), who all concur in the account of its general aspect of desolation. Mr. Porter, who resided several years at Damascus, and had means of obtaining correct information, stated in 1858 that “the modern town, or rather village, contains from 3000 to 4000 inhabitants, about one half being Metawileh, and the other Christians” (Handbook, p. 391). They are living among the broken ruins of its former magnificence, eking out a scanty livelihood upon insignificant exports of tobacco, cotton, wool, and wood. The place as it now stands was founded under the old name Sūr in 1786, and suffered very considerably during the earthquake in 1837. The remains of an ancient cathedral church probably enclose the bones of the emperor Frederick Barbarossa and of Origen. About one and a half mile distant from Tyre is the so-called Tomb of Hiram, an immense sarcophagus of limestone, popularly supposed to contain the corpse of that king. See Hiram.

The present city lies only upon the eastern part of the island, on the junction of the island and isthmus. The houses are mostly mere hovels, one story high, with flat roofs; and the streets are narrow, crooked, and filthy. Yet the numerous palm-trees and pride-of-India trees interspersed among the houses and gardens throw over the plain an Oriental charm. One of the best accounts of its present appearance is given by Dr. Robinson, who spent a Sabbath there in 1858 (Bibl. Res. iii, 395): “I continued my walk,” says he, “along the shore of the peninsula, part of which is now unoccupied except as ‘a place to spread nets upon,’ musing upon the pride and fall of ancient Tyre. Here was the little isle, once covered by her palaces and surrounded by her fleets; but, alas! thy riches and thy fame, thy merchandise, thy mariners and thy pilots, thy calkers, and the occupiers of thy merchandise that were in thee—where are they? Tyre has indeed become

TYRE, COUNCIL OF

like 'the top of a rock.' The sole tokens of her more ancient splendor—columns of red and gray granite, sometimes forty or fifty heaped together, or marble pillars—lie broken and strewn beneath the waves in the mist of the sea. A sight of the pieces of the site present no contradiction of the drear decree, 'Thou shalt be built no more.'

The downfall and permanent desolation of Tyre is one of the most memorable accomplishments of prophecy which the annals of the world exhibit. The sins which caused its ruin flit through the visions of the sacred writers upon the city. 'Because that Tyrus hath said against Jerusalem, Aha, she is broken that was the gates of the people; she is turned unto me: I shall be replenished, now she is laid waste' (Ezek. xxxvi, 2). "Because thine heart is lifted up, and thou hast said, I am a god, I sit in the seat of God, in the midst of the seas" (xxviii, 2). "The children also of Judah and the children of Jerusalem have ye sold unto the Grecians, that ye might remove them far from their border" (Joel iii, 6).

V. LITERATURE.—See, in addition to the works cited above, Cellarari Notiz, ii, 281 sq.; Hengstenberg, De Rebus Syriae; Bezae, Diatessaron (1832); Reid, Biblical Antiq. of Asia (1710); Camenz, De Nave Tyria (Viteb. 1714); Smith, Dict. of Classi. Geog. s. v.; Poulan de Bossay, Recherches sur Tyre (Paris, 1864); Thomson, Land and Book, i, 260 sq.; Gesenius, Comment, zu Jesa. i, 707 sq.; Wilson, Lands of the Bible, ii, 222; Bielenker, Palestina, p. 420 sq.; Rendle Short, The Tyrian Land, p. 954.

TYRE, COUNCIL OF. Therians, through Eusebius of Nicomedia, obtained the convocation of this council by the emperor Constantine, A.D. 385, under pretext of thereby healing the divisions which existed among the bishops; but their real intention was to oppress Athanasius. The bishops who were summoned to attend were selected by the Eusebian party, and came from Egypt, Libya, Asia, and most of the eastern provinces. The most noted were Marius of Chalcodon, Theognis of Nicea, Ursaces of Singidunameum, and Valens of Mursia; in all about sixty Arian bishops attended. There were also a few bishops present who were not of the Eusebian faction, as Maximus of Jerusalem, Macellus of Ancyra, Alexander of Thessalonica, etc. Constanine sent the count Dionysius to keep order, who, as the event showed, was completely devoted to the Eusebian cause, and by his violence destroyed all liberty of debate.

Athanasius, compelled by the order of the emperor, came to the council, attended by forty-nine Egyptian bishops, among whom were Potamon and Papnuthius. No accusation was brought against Athanasius on account of his faith; but he was arraigned for having killed his Arian persecutors by having forcibly broken into a church while Ischyrus, a pretended priest, was celebrating; and for having overturned the altar and broken the sacred chalice. He was made to stand as a criminal, while Eusebius and the others sat as his judges, against which treatment Potamon of Hyracess made a vehement protest, hearing reproaches upon Eusebius. From the very first the Egyptian bishops protested against the proceedings; but their objections were not heeded. Sozomen says that Athanasius appeared frequently before the council, and defended himself admirably, listening quietly to all the calumnious accusations brought against him, andreplying with patience and wonderful sagacity. However, his enemies, not contented with the charges which they had already brought against him, dared to impeach his purity, and introduced into the council a debauched woman, whom they had bribed to assert that Athanasius, having a family connection with the house of the charge was, however, triumphantly proved; for Athanasius having deputed one of his priests, named Thimoteus, to reply for him, the woman, who was ignorant even of the person of the holy bishop, mistaking Thimoteus for him, declared that he was the man who had offered violence to her at such a time and place. Neither were his accusers more successful in their endeavor to fix upon him the murder of Arsenius, who, in the midst of their false statements, appeared before the council alive. Foiled in both these infamous attempts, they fell into a fitter fury, and endeavored to offer violence to him, in which they were prevented by the officers of Constantine. Nothing now remained but the charge of having broken the chalice, and there being no proof ready, and the clergy of the country where the offence was said to have taken place having solemnly sworn to the falsehood of the charge, a deposition was sent to make inquiry on the spot (in the Maroeitis), composed of the most decided of his enemies. In the meantime, Athanasius, seeing that his condemnation, by fair means or foul, was resolved, withdrew from Tyre. The deputies, upon their return, declared that they had found the charge correct; and upon this statement, sentence of deposition was pronounced, on the plea of his having been convicted of a part of the accusation brought against him. More than fifty bishops protested against the acts of this assembly. See Mansi, Concil. ii, 435. See ATHANASUS.

Tyriana (Τηριανα), a native or inhabitant of the city of Tyre (Eccles. xxvi, 18). The corresponding Heb. word ("TX, Tivr") is rendered by the indirect phrase "of Tyre" in the A. V. (1 Kings vii, 14; 1 Chron. xxii, 4; 2 Chron. ii, 14; Ezra iii, 7; Neb. xiii, 16), and so likewise the Greek (1 Esdr. v, 55; 2 Macc. iv, 10; Acts xxi, 20).

Tyrimmas, in Greek mythology, was a friend of Ulysses, with whom the latter lived while on his journey from Troy to Ephirus to consult the oracle about the war. Tyrimmas had a beautiful daughter, Eripte, whom Ulysses loved, and by whom he begot a son, Euryalus.

Tyrius (i.e. the Tyrian), in Greek mythology, was an epithet of Hercules, as adored in Cyprus.

Tyronius Dux (new soldiers of God), a name given, in the early Church, to catechumens, by Tertullian (De Pendente, c. 6) and Augustine (De Fide ad Catechumen. iii, 1), because they were just entering upon that state which made them soldiers of God, and candidates of eternal life. See Bingham, Christ. Antiq. bk. x, ch. i, § 1.

Tyropoion (Τυροποιεῖν, of the cheese-makers), the name of a valley (qáqel) in Jerusalem, mentioned only by Josephus who says that the city "was built, one quarter facing the other, upon two hills, separated by an intervening valley, at which over against each other the two houses terminated." Again, "The valley of the Tyropoion, which, I have said, divided the hill of the upper town from that of the lower, extended as far as Siloam, ... a fountain whose waters are sweet and copious" (War, v, 4, 1). He also tells us that the "other hill, called Akra, which sustained the lower city," lay opposite to Mount Moriah from which it was separated by "another broad valley," and, further, that the whole city, situated on these two hills, "lay over against the Temple in the manner of a theatre" (Ant. xv, 11, 5). Notwithstanding this repeated and seemingly definite notice, the position of the valley is still a matter of dispute. Dr. Robinson, in accordance with his theory, regarded the "Valley of the Cheesemongers" as identical with the conspicuous and important one leading from the Damascus gate to the Pool of Siloam, which in all ages has been the principal drain of the internal waters of the city (Thomson, Land and Book, ii, 470; Pierotti, Jerusalem Restored, i, 19). See JERUSALEM.
TYRRHENIUS, in Greek mythology, was a son of Hercules and Omphale, or a son of Telephus and Hiera, and a brother of Tarchon; or a son of Atys and Callista, and brother of Lydia. He is said to have introduced the use of the trumpet. He colonized that part of Italy named after him at the time of his flight from Mysia because of starvation.

TYRRHENSUS, in ancient Italian mythology, was a chief shepherd of Latium, king of Italy. He was the owner of a beautiful tame deer which Silvia nursed, bathed, and ornamented with flowers. The Fury Alecto, sent from Tartarus, chased this deer, so that it came within reach of the hunter, who wounded it whereupon it fled towards home. The angry shepherd and his sons, and invisibly the Furies also, assembled the neighboring inhabitants, and this was popularly assigned as the original cause of the war which Eneas was obliged to carry on with the Latinians in Italy.

Τύρος (Τύρος), the Greek form of the name of two places in Palestine.

1. The well-known city of Tyre (q.v.), as the name is usually Anglicized, but "Tyros" in the A. V. in certain passages (Jer. xxxv. 22; xxvii. 3; xliv. 4; Ezek. xxvi. 2, 3, 4, 7, 15; xxvii. 2, 3, 8, 32; xxviii. 12; xxix. 18; Hos. ix. 13; Amos i. 9, 10; Zech. ix. 2, 3; Ezr. xii. 11. Judith ii. 28; 1 Macc. v. 15; 2 Macc. iv. 18, 32, 44, 49. 1 Macc. xiv. 47; Acts xv. 28) is attached to Jerusalem, by Josephus, as a "province between Arabia and Judaea, beyond the Jordan, not far from the country of Heshbon," where Hecuba built a strong castle, of a sumptuous character, as the centre of his power in that region (Ant. xiii. 4, 11). It has been identified in modern times with the magnificent ruins A roât-er-Énîr, four hours from Homs, which Trismgistas minutely describes as corresponding to the statements of the Jewish historian (Land of Israel, p. 529).

TYRUS, LADDER OF. See LADDER OF TYRE.

TYSON, MICHAEL, a learned English divinity, was born in the parish of All-Saints, Stamford, Nov. 19, 1740. He was educated at Benedict College, Cambridge, where he received his degrees; that of A.B. in 1764, A.M. in 1767, and B.D. in 1775. After taking his degrees, his brother, he was elected a fellow of his college. In 1766 he travelled with Mr. Gough (afterwards the celebrated antiquarian), and, after his return in the following year, was elected a fellow of the Society of Antiquaries, and in 1769 a fellow of the Royal Society. In 1770 he was ordained deacon at Whitehall Chapel, and then presented by the Right Rev. Dr. Vokes to the living of Huntingdon from his father. He was, at the same time, bursar of the college, and succeeded to the cure of St. Benedict's Church, Cambridge. In 1776 he became Whitehall preacher, and in the same year was presented by the college to the rectory of Lambourn, near Ongar, Essex. He died May 3, 1790. Mr. Tyson wrote an ode On the Birth of the Prince of Wales, and another, An Ode to Peace. He was also an excellent draughtsman and painter.

TYSENS, PETER, a Flemish painter, was born at Antwerp in 1625; and, after the death of Rubens and Vandyck, was considered one of the ablest painters of his time. He was made director of the Academy at Antwerp in 1661. "His compositions are copious and ingenious, his design more correct than is usual with painters of his country, his coloring strong, clear, and harmonious." He died, according to best authorities, in 1692. Among his works most worthy of notice are, The Martyrdom of St. John the Baptist, Church of the Capuchins, Bruges;—The Crucifixion, at the Church of the Barefoot Carmelites:—The Assumption of the Virgin, Church of St. James, Antwerp. See Spooner, Biog. Hist. of Fine Arts, &c.

TZSCHIRNER, HEINRICH GOTTLIEB, a German theologian and orator, was born Nov. 14, 1778, at Mitweida, in Saxony. He graduated at Leipzig, and in February, 1805, became an adjunct to the philosophical faculty at Wittenberg. His lectures were principally concerned with empirical psychology, and yielded fruit in the works Leben u. Einde merk, Selbstmörder nehet Abhand, Lib. d. Selbstwahr. (1805) — Uber d. moral. Indifferenzmus. —Und Verrathen goods u. Laster. He was also one of the first in Manchest in the publication of the Neue Repert, f. empir. Psychologie. The sickness of his father called him away from the university, and he became first assistant, and, after the decease of his father, deacon at Mitweida. At that time he began a history of apologetics, but published only one volume (Leips. 1790), and this was removed into the theological faculty at Wittenberg. In 1809 he removed to Leipsic, where he remained until his death, with a temporary interruption occasioned by the war of deliverance from French domination, in which he served as chaplain and gained the decoration of the green eagle. The literary fragments of his campaign is contained in the volume Ueber v. Krieger, etc. (Leips. 1815). He died Feb. 17, 1823, regrettled by the whole community of Leipsic.

Tzschriner's theological tendency was that known in his day as aestheticism, whose aim was the reconciliation of rationalism and supranaturalism. He regarded Christianity as being in its nature a religion of reason, though introduced by a supernatural revelation. See Briefe, verant, durch Reinhards Götterbäume (Leips. 1811), and Briefe eines Deutschen am Chateaubriand, etc., by Krig, his Dogmatik (published by Hase, Leips. 1814), as well as his minitual, and in 1801, by merely stating the differences of the two great opposing schools of thought in Protestant theology (see Küh, Kau, Prediger-Bibliothek, x, 1). He was rather a historian than a systematic theologian, and disposed to hide himself behind his work. He added the two final volumes to Schröck's Church History since the Reforma tion; but his principal work, according to his own judgment, is his Fall des Heidentums, published by Niedner (Leips. 1829).

The period following the Napoleonic wars and beginning with the jubilee of the great Reformation (1817), developed Tzschriner into a foremost defender of Protestantism and popular freedom. Enthusiastically inspired by the study of the great past of the Evangelical Church, he yet refused to confine himself to the letter of Luther's authority, but insisted upon the exercise of the Protestant principle of intellectual liberty. In view of the past, of the experiences of the men who had been the enthusiasm of the nation consequent on the defeat of Napoleon, and that Romanists and would-be perfec tors to Romanism charged upon Protestantism the originat ing and development of every revolutionary tendency and excess, he devoted his brilliant diction and incisive thought to the demonstration that Protestantism is capable of mastering the intelligence and fix the principles of peoples; and that it therefore tends to peace and quietness, and is more favorable to any legitimate form of settled government than Romanism. Numerous works, some of which became famous and were translated into foreign languages, were the result of this effort — e. g., Katholizismus v. Protestantismus aus dem Standpunkte der Politik (1822). He also wrote in behalf of oppressed Protestants in France, Sardinia, and Hungary (1839), and of the liberties of Greece (1821). His Protestant and inter- and inter-religious capacity, those of their appreciation of his labors in their behalf, among them the king of Denmark, who in 1826 conferred on him the Order of Danecrope.

Tzschriner had taken Reinhard for his model as a pupil orator. His sermons are occasionally models of pithy oratory. They were cast in a form which is strictly memorized, sometimes pervaded with a poetic spirit and great freshness, and characterized by the frequent use of matter drawn from Church history. His personality, voice, and manner in the pulpit gave him great power over his audiences, despite difficulties he experienced with his respiratory organs. Four volumes and several separately published Sermons by Tzschriner...
are extant. His views respecting the effect of rationalistic principles upon the preacher are contained in the article "Das die Verschiedenheit der Dogmen Systeme bei Hindernmen des Anabaptismus in Magazin für Christl. Prediger," 1825. His theory of homiletics sets forth that homiletics "is the art of edifying by mean of speech which harmonizes with the forms of beauty and excites into activity all the faculties of the soul, subject to the purpose of promoting piety and virtue, for which the Church exists" (see Röhr, ut sup. ii, 2, p. 248, "Tzschirner als Homiletiker").

Literature.—Krüg, Tzschirmers Denkmal, etc. (Leips. 1823); H. G. Tzschirner, etc. (24 ed. Ith. 1829); Goldhorn, Dr. H. G. Tzschirner, etc. (1828); Röhr, Kreis Prediger-Bibl. I, i, 126; Tittman, Memorien Tzschirners (Leips. 1829); and many others. See also Herzog, Real-Encyklop. s. v., where an extended list of Tzschirner's numerous works is given.

U.

UBaldini, Rouse, Archbishop of Paris in 1276, was noted for his cruelty as a Ghibelline chief. Having captured Ugolino and his sons of the opposite party, he shut them up in a room and left them to die of hunger.

Ubbonites, the followers of Ubbo Phillips, who constituted a moderate class among the fanatical Anabaptists of Germany in the 16th century, and originated about 1584. Ubbo was born at Leeuwarden and became a Romish priest, but with his brother, Dirk Phillips, renounced the papacy as corrupt, and joined the party of the Anabaptists, in which both became leaders. The Ubbonites agreed with the Anabaptists, with respect to the sacraments, the incarnation of Christ, and the freedom of the human will, but they did not teach that Christ's kingdom is of the earth and that the ungodly should be exterminated. They held, instead, that his kingdom is spiritual and subject to persecutions, and that it must be constantly renewed by regularly called apostles. They rejected the doctrine of divorce, and regarded themselves as the true Church. They denounced their meetings for worship "ademotions" and their ministers "ademonsters," and only taught the necessity to an effective discipline of the right use of excommunication. Both Ubbo and Dirk disapproved of the fanatical outbreak at Mühlstein, and the former acknowledged in a public confession that he heartily regretted that he had permitted himself to be deceived and that he had performed executions. He eventually separated from the sect and the party he had founded and entered the communion of the Reformed Church. He died in 1568. See Jeyring, Gründh. Hist. der T. T. und Mem. (Jena. 1728); Bergmann, De Ubbo Phillips et Ubbonis (Rost. 1795).—Herzog, Real-Encyklop. s. v.

Ubertinus, a native of the village of his birth, De Cassel, was a Franciscan monk of the 15th century, and belonged to the strict party. Upon the rigid observance of the vow of poverty, and regarded the life and work of our Saviour as constituting a mere preparation for a higher and more perfect era of the Holy Ghost. They also denounced the condition of the papacy and of the entire Church as being utterly corrupt. Ubertinus was a pupil of Peter John Olivi (died 1297), who stood at the head of his party. He defended the tenets of his party in an apology for Olivi, which is given in Waddington, Anabellin Minorgen. (Rome, 1553; anon. 1297), xxxvi, 380 sq., and was severely assailed by Pope Clement V, and many others to account for his book, and Ubertinus thereupon resolved to sever his connection with his order. Pope John XXII permitted him to enter the Benedictine convent of St. Peter at Gembours; but the monks refused to receive him, and it is said that he ultimately became a Carthusian. In the meantime, pope John had again demanded an explanation of his opinions respecting the poverty of Jesus, etc., and Ubertinus responded that Jesus could not be said to have possessed of property in any secular meaning of the words (see Wadding, ut sup. vi, 362 sq.). In addition to the above, Ubertinus wrote a sort of commentary on the Apocalypse, entitled Tractus de Septem Statibus Ecclesiae (Venet. 1516). The time and manner of his death are unknown. See Herzog, Real-Encyklop. s. v.

Ubility (Lat. ubi, "where") is the presence of one thing to another, or the presence of a thing in place. The schoolmen distinguish ubility as 1. Circumscriptio, by which a body is so in one place that its parts are answerable to the parts of space in which it is and exclude every other body. 2. Definition, as when a human spirit is limited or defined in its presence to the same place, like a human body. 3. Reptilitio, as when the Infinite Spirit is present through every portion of space. This last is sometimes called Ubiquity (q. v.), and means the Divine Omnipresence. See Krauth, Vocab. of Phil. Schol. (s. v.).

Ubiquitarians (from the technical term "ubiquity" [q. v.]), in ecclesiastical history, a sect of Christians which arose and spread itself in Germany, and whose distinguishing doctrine was that the body of Jesus Christ is everywhere, or in every place. Brentius, a follower of Luther, and one of the earliest Reformers, is said to have first broached this error in 1550. Luther himself, in his controversy with Zwingli, had thrown out some unguarded expressions that seemed to imply a belief of the omnipresence of the body of Christ; for instance, that the man Christ could be everywhere present, not that he was always everywhere present. He saw, however, that this opinion was attended with great difficulties, and particularly that it ought not to be made use of as a proof of Christ's corporeal presence in the eucharist. However, after the death of Luther, this absurd hypothesis was renewed, and dressed up in a specious and plausible form by Brentius, Chemnitz, and Andreas, who maintained the communication of the properties of Christ's divinity to his human nature. It is, indeed, obvious that every person who believes the doctrine of consubstantiation, whatever he may pretend, must be a Ubiquitarian. The doctrine again became a subject of controversy early in the 17th century, by the names of Tübingen and Gieschen, the former supporting the Ubiquitarian theory, and the latter earnestly opposing it. The Ubiquitarians are strong opponents of the Calvinistic and Zwinglian theories of the holy eucharist, and their dogmas is, in fact, a revulsion from them. See Bergert, Dict. de Théologie, s. v.; Cramer, Enzicr. Controverters. Ubiquit. (1610); Dornor, Person of Christ, I, ii, 280 sq., 422; Mosheim, Eccles. Hist. V, iii, 153 sq.

Ubiquity (Lat. ubique, "everywhere") is the opinion of some German divines that the body of Christ is present everywhere by virtue of its union with his divine nature. It was adopted in 1577 as a mode of explaining the eucharistic presence by those who compiled the Formula of Concord. The party was soon divided in opinion, some affirming that Jesus Christ during his mortal life was everywhere, others dates the ubiquity from the time of his ascension into heaven. See UBQUITARIANS.

Ublianizm, in Slavonic mythology, was a domestic god of the house, whom the negligent, lazy people authorized to make greater conveniences, and to whom they intrusted the protection of their household furniture.

Uboze, or Uboche, in Slavonic mythology, was the
name given to the spirits of the departed, who appeared in the family circles of their relatives in the form of dwarfs. They were therefore worshipped and made harmless by being made to eat and drink.
