U'cal ( Heb. Ukal, יְבָל), in some copies, Uk'al, יְבָל. According to the received text of Prov. xxx, 1, Ithiel and Ucal must be regarded as proper names; and if so, they must be the names of the names of sons of Agur, the son of Jakeh, an unknown sage among the Hebrews. But there is great obscurity about the passage. The Sept. translates τοὺς πιστωτούς Θεῷ καὶ πανίσχους; the Vulg., cum quo est Deus, et qui Deo secum moramur consorciis. The Arabic follows the Sept. to some extent. The Sept. represents Agur and Ucal as proper names, and the Syriac is corrupt, Ucal being omitted altogether. Luther represents the names as Leithiel and Uchal. De Wette regards them as proper names, as do most translators and commentators. Julius explains both as referring to Christ. The Sept. probably read בְּנֵי הָאָרָרִים. The Veneto-Greek has καὶ οὐρανοῖς = יֵבָל. Cocceius has pointed the words thus: יֵבָל יָבֵּן יְבָלָה, "I have labored for God and have obtained;" and this, with regard to the first two words, must have been the reading of J. D. Michaelis, who reads: יֶבְלֹן יָבֵּן יְבָלָה. It is not impossible, however, that the text was corrupted; and, if so, they might have been rendered "I have endeavored myself for God, and have given up the investigation," applying the words to a man who had bewildered himself with philosophical speculations about the Deity and had been compelled to give up the search. Bertheau also (Die Sprüche Sal. Einleit. xvii) sees in the words "I have weared myself for God, and have fainted" ( יְבָל יֵבְלֹן) an appropriate commencement to the series of proverbs which follow. Hitzig's view is substantially the same, except that he points the last word יֵבְלֹן, and renders, "and I became dull," applying it to the dimness which the investigation produced upon the eye of the mind (Die Spr. Sal. p. 316). Bunsen (Biblirev. i. p. clix) follows Bertheau's punctuation, but regards יָבֵּן יְבָלָה on its first occurrence, as a symbolical name of the speaker. "The saying of the man 'I have wearied myself for God; I have weared myself for God, and have fainted away.' There is, however, one fatal objection to this view if there were no others, and that is that the verb יָבֵּן, "to be wearied," nowhere takes after it the accusative of the object of weariness. On this account alone, therefore, we must reject all the above explanations. If Bertheau's point of being adopted, the only legitimate translation of the words is given by Dr. Davidson (Introd. ii. 338), "I am weary, O God, I am weary, O God, and I am become weak." Ewald considers both Ithiel and Ucal as symbolical names, employed by the poet to designate two classes of thinkers to whom he addresses himself, or, rather, he combines both names in one, "God-with-me-and-I-am-strong," and bestows it upon an imaginary character, whom he introduces to take part in the dialogue. "The name 'God-with-me,'" says Keil (Hävernick, Einl. iii. 412), "denotes such as gloried in a more intimate communion with God, and a higher insight and wisdom obtained thereby, while 'I-am-strong' indicates the so-called strong spirits who boast of their wisdom and might and deny the holy God, so that both names most probably represent a class of freethinkers who thought themselves superior to the revealed law, and in practical atheism indulged the lusts of the flesh." Both names are probably symbolical, but the exact import remains uncertain. See PROVERBS.

Ucalègon, in Greek mythology, was an inhabitant of Troy, an elder honored in the senate. His dwelling-place, called the dwelling of Thubobwas, was, with the latter, entirely destroyed by fire.

Uckewallists, one of the sects into which the old Flemings, or strict Anabaptist followers of Menno, divided. They took their name from Ucke Walas, a native of Friesland, who published his sentiments in 1637. In conjunction with John Leus, he propagated a doctrine of Universalism, in which he entertained a favorable hope of the eternal salvation of all the rest of Christ's murderers. His argument was this—that the period of time which extended from the birth of Christ to the descent of the Holy Ghost was a time of deep ignorance, during which the Jews were destitu-tute of divine light; and that, of consequence, the sins and enormities which were committed during this in-terval were, in a great measure, excusable, and could not merit the severest displays of the divine justice. He was excommunicated by the Mennonites of Groningen, and banished from the city by its magistrates, but settled down in East Friesland. This denomination strictly adhered to the doctrine of the Mennonites.

Udeus, in Greek mythology, was one of the followers of Cadmus, five of whom murdered each other. He was Grandisire of Tiresias.

Udaineaker, in Northern mythology, is the name given to that part of the land of the blessed where, with all earthly wants, all sorrows are an at end, whose inhabitants neither sickness nor death befalls. This place is in possession of king Gudmund, who was ruler of Jotunheim. This last fact it would seem to follow that Udaineaker was a paradise of the Aesir, but of the former inhabitants of Scandinavia, the Jotes.

Udall, Ephraim, a loyal Puritan divine of the 17th century, was educated at Emmanuel College, Cambridge, where he took his degree of A.B. in 1609, and that of A.M. in 1614. His preferment appears to have been the rectorcy of St. Augustine's, Watling Street, London, but the time of his admission is not stated. He was sequestered in 1643, having declared openly for episcopacy and the liturgy. He died in May, 1647. Mr. Udall published, A Coal from the Altar:—A sermon on Psal. xxvi, 11 (1629, 4to)—Communion Conscientia (1621, 4to), in which he recommends rails around the communion-table. See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Chalmers, Biog. Dict. s. v.

Udall, John, a Nonconformist divine of the 16th century, was a great sufferer on account of his nonconformity. He died in Marshalsea prison about the end of 1592. He published, Sermons (1584-89, 6 vols. 8vo)—A Defence of the Truth of the Christian Church hath Prescribed (1588, 4to), for which he was condemned to die:—Commentarius in the Lamentations of Jeremy (London 1598, 4to)—Key of the Holy Tongue, etc. (Leyden, 1588, 12mo): said to be the first Hebrew grammar in English. Respecting Udall and his works, see Fuller, Church History; Hallam, Constitutional Hist. of England; D'Israeli, Quostra of Authors; Lond. Quart. Rev. x. 104; (London) Gent. Mag. XXIII, i. 306; ii. 624; Allibone, Dict. of Brit. and Amer. Authors, s. v.; Chalmers, Biog. Dict. s. v.

Udall, Nicholas, an English clergyman, was born in Hampshire in 1564 (other says 1566), and was admitted to Corpus Christi College, Oxford, June 16, 1580, where he became tutor fellow, S. 1584. He wrote the verses for the city of London pageant at the coronation of Anne Boleyn, May, 1538; took orders in the Church of England, and was made master of Eton School in 1538. In 1543 he was charged with complicity in the robbery of some college chapel plate, and for this was restored to his former post. In 1559 he was imprisoned in the Fleet prison for being expelled from the mastership of the school. He was vicar of Brentme, Essex, from 1537 to 1544; entered the service of Queen Catherine Parr; in 1551 he became canon of Windsor; in 1552 he was transferred to the rectory of Calbourne, Isle of Wight. He was appointed head master of Wells Minister School in 1556; and died, according to some authorities, in December, 1556, but, according to a manu-
UDINE

UDINE, Giovanni da, an Italian painter (whose family name is variously called Manini, Mansi [contractions of Giovanni], and Ricamatore), was born at Udine probably in 1489. He became a pupil and afterwards an assistant of Raphael. On the sacking of Rome he died to his native city; was afterwards engaged by the Medici, and returned to Rome in the pontificate of Pius IV, where he died, 1561. He painted The Holy Virgin and Infant Christ, at Udine; and two Scripture Histories, in the archiepiscopal palace, Udine. See Spooner, Biog. Hist. of Fine Arts, s. v.

UDINE, Girolamo da, another painter of Udine, Italy, flourished about 1540. Little is known of him. There is an altarpiece, The Coronation of the Virgin, in the Church of San Francesco, Udine, bearing his signature. See Spooner, Biog. Hist. of Fine Arts, s. v.

UDINE, Martino da, called Pellegrino di San Daniele, an Italian painter, was born, according to some authorities, at Udine about 1490; others say at the Castle of San Daniele, about ten miles distant. He studied with Giovanni Bellini during that artist's residence in Udine about 1445. He executed many works for the churches and public buildings at Udine and San Daniele, among which are, St. Joseph, with the Infanta Christ and St. John, in the cathedral at Udine: Virgin, with several Female Saints and St. John the Baptist, an altar-piece in the Church of Santa Maria di Battisti—several frescoes of the Life of Christ, in the Church of San Antonio, San Daniele. See Spooner, Biog. Hist. of Fine Arts, s. v.

UDU, an Acadian deity, and possibly the same with the Assyrian Samas, god of the sun.—Lenormant, Chald. Magic, p. 17.

UDUR (the destruction), in Norse mythology, was one of the daughters of Æger and Ran.

UDVARE, The Council of, was held in 1309, under Charles I, king of Hungary, and Thomas, archbishop of Strigirov. It was decreed,
1. That the angelical salutation should be rung out at noon, or at the close of the day.
2. That the inhabitants of Buda should pay some immoral tribute which the bishop of Vienna, Stephen, claimed.
3. The constitution of cardinal Gentil were read, and an order made that a copy should be sent to every prelate in his own diocese; the other regulations have perished. See Mansi, Concil. Suppl. iii, 335.

UEBERWEG, FRIEDRICH, a German historian of philosophy, was born near Solingen, Rheinhus Prussia, Jan. 22, 1826. He studied at Göttingen and Berlin, was tutor at the university from 1852 to 1862, and was appointed professor of philosophy at Königsberg in the latter year. He died there, June 7, 1871. He wrote, The Development of Consciousness by Teachers (Berlin, 1853); System der Logik und Geschichte der logischen Lehren (Bonn, 1857; 8d ed. 1867; Eng. transl. by Thomas Lindsay, Lond. 1871); Grundriss der Geschichte der Philosophie von Thales bis auf die Gegenwart (Berlin, 1862-66, 8 vols.; English transl. by Geo. S. Morris, N. Y. and Lond. 1874, 2 vols.); History of Philosophy (N. Y. 1876); and other minor works.

U'el (Heb. Uel, 'Elen, will of God, accord. to Gesen., but for Abuel [God is father], accord. to Fürst; Sept. אוּלָא v. r. עֶלָה, Vulg. Uel, s. a. of Bani who divorced his gentle wife after the Captivity (Ezra x, 34); B. B. 430.

UGHOLLI, FERDINANDO, an Italian ecclesiastical historian, was born at Florence, March 21, 1595. After pursuing his studies with credit, he took the habit of the Cistercians, and held several honorable posts in the or-

UDLAND.

uder. He was appointed abbot of Tre Fontane at Rome, procurator in his province, and counsellor to the Congregation of the Index. Pope Alexander VII and Clement IX esteemed Ughelli, and gave him permission of five hundred crowns. He refused offers of several bishoprics. He died May 19, 1670. His principal work is Italia Sacra, sive de Episcopis Italice, et Insularum Adjacentiam, etc. (Rome, 1642-62, 7 vols. fol.; reprinted, Venice, 1717-22, 10 vols.);
—Also Lites de la Cardinales de la Cistercian Ordere, etc.

Uginda is a festival of praying observed among the Cheremisses, before harvest-time, as an occasion for asking the special blessing of the god Ageberen for an abundant harvest.

Ugolino, BLAISO, a Jewish convert of Venice, born in 1748, is best known as the editor of a stupendous work under the title Thesaurus Antiquitatum Sacrarum commentariorum Selectissimae Clarissimorum Virorum Opyaculis, in quibus Venerum Hebraorum Mores, Leges, Instituta, Ritus Sacri et Civiles Illustrantur (Venet. 1744-69, 34 vols. fol.). This Thesaurus contains what the title indicates. The republic of learning of the 17th and 18th centuries is here represented. The names of Buxtorf, Trigland, Wetzel, Heinsberger, Pfefferkornoni, Rhenferd, Bonfere, Selden, Lowth, Reland, Huet, Bochart, Cellarius, Frideaux, Clarivert, Opiz, Van Til, Carpov, Saubertius, Spencer, Deyling, Wagensil, etc., are found among the contributors to the Thesaurus, which forms a library in itself. Of course most of the works of the authors mentioned are published separately, but, being scarce, this Thesaurus will always be perused with great profit by such as have the good luck to be near great libraries which can afford to keep this stupendous work on their shelves. Besides the scholars mentioned above, the editor himself has largely contributed to this work. His translation of the Midrashim and some of the Talmudical treatises, found in vol. xiv, xv, xvi, xvii, xviii, xix, xx, are of great importance.

The following is a general index of the contents:
Vol. i treats of sacred seasons among the Jews.
Vol. ii, iii treat of Jewish antiquities.
Vol. iv and v relate to sacred geography.
Vol. vii, viii, ix, x, xi, xii, and xiii bear upon the tabernacle, temple, priesthood, and all matters connected with the same.
Vol. xiv, xv, xvi, and xvii contain translations of the Midrashim, Moed, Nevi'im, Ezra, etc., Proverbs, Psalms, and of Tanapthah, or additions to the Talmud.
Vol. xviii, xix, and xx contain translations of different Talmudical works.
Vol. xx treats of the synagogue, rites, phylacteries, and prayers of the Jews.
Vol. xxii treats of Jewish sects and proselytes.
Vol. xxiii treats of Gentile deities.
Vol. xxiv, xxv, xxvi treat of Jewish theocracy.
Vol. xxvii, xxviii, and xxix treat of Jewish civil law.
Vol. xxxvii treat of Jewish, Samaritan, and Phenician coinage.
Vol. xxxix treat of vestments.
Vol. xxx has reference to the rites of marriage, divorce, and of Biblical mediatorial laws.
Vol. xxxi and xxxii treat of Hebrew poetry and musical instruments.
Vol. xxxiii relates to mourning and burial rites and usages.
Vol. xxxiv forms a fourfold index to the whole, giving an Index Auctorum, Locorum S. Scripturarum, Dietionum Hebraicarum, and Verborum.

A complete list of the contents of the single volumes is given by Meusel, Bibliotheca Historica, i, i, 118-42; and Darling, Cyclop. Bibliog. s. v. (B. P.)

UHLAND, LUDWIG JOSEPH, a German doctor and professor of medicine, was born in Thuringen, May 15, 1779, where he also died, Dec. 15, 1809. He wrote, De Histori Restauranti post Diluv. Orbis ab Eretis Noa ex Arca usque ad Disperionem Gentium (Tub. 1761); De Ordine Veterum, qui in Sedeceem Prophet, Scripta Existant, Chronologico (ibid. 1778); —Annotationes ad Loca quaedam Veteris Historiae (Tub. 1773-80); —Annotationes in Homae Cap. ii (ibid. 1787); Cap. r, v, i-3 (ibid. 1789); Cap. r, 4-11; riri, i-6 (ibid. 1790); Cap.

UHLI

vii (ibid. 1791); Cap. ii (ibid. 1792).—Dissertatio Eretica in Hug. ii, 1-9 (ibid. 1789). See Winer, Handbuch der theolog. Literatur, i, 225-226, 236, 253; ii, 810; Fürst, Bibl. Theol. ii, 1806 sq. (B. P.)

Uhle, August Gröning, a Protestant theologian of Germany, was born Jan. 16, 1737, at Brunswick. He studied theology and philosophy at Helmstedt. For a time he instructed at the Orphanage in Brunswick, when, in 1770, he was called as pastor to the Church of St. Agatha at Hanover. In 1783 the learned society at the Hamburger Akademie elected him to the second prize for his dissertation De Jesu Christo Vero Dei Filio; and in the same year he was made member of consistory and first court-preacher. In 1794 he was appointed general superintendant, and in 1801 he was honored with the doctorate by the Göttingen University. He died May 12, 1804.

Uhe was not only very well acquainted with the ancient classical writers, but also with the writings of Hume, Robertson, Gibbon, Tillyotot, Saurin, etc. In philosophy he leaned more towards the system of Leibnitz and Wolff than that of Kant; he was less satisified with Fichte and Schelling. Among the German pulpit orators of the last century he was promised both place and writing in the learned world. See Döring, Deutsche Kanzleizinschr., p. 551. (B. P.)

Ulrich, Leberecht, a German sectarian, the head of the so-called Lightfriends (Lichtfreunde), was born Feb. 27, 1799, at Köthen. He studied theology at Halle from 1817 to 1820 under Wegscheider, was tutor at Köthen, and in 1827 he went to Prussia as pastor in Pommele, near Schönebeck. In 1841 he organized the liberal preachers’ meetings at Gnadau, which finally led to the formation of the Society of the Protestant Friends, or Lichtfreunde. Ulrich became the spiritual head of this movement, and soon obtained adherents in different countries, especially in the south of Germany. He went from place to place for the purpose of preserving the meetings held by his adherents, until, in 1845, he was forbidden to leave his parish without permission. In the same year he was called to St. Catharine’s Church in Magdeburg, where he went on in his usual way. But his low views of Christianity brought him into conflict with his consistory, until he was finally suspended from his office in September, 1847. He now left the Church and put himself at the head of a free religious congregation at Magdeburg, where he labored until March 23, 1872. Ulrich was a preacher of considerable popular eloquence and commanding talent, sincere and upright, and of an unblemished character; but his very low views of Christianity finally led him to a phalanteropeo-pantheistic naturalism, which he presented in a popular manner before his audience. Speaking of the Dissenting sects in Germany, Dr. Schaff, with regard to the Lichtfreunde, says: "It is evident that a superficial rationalism which was supposed to be dead and buried could create such a commotion in a state like Prussia, and on the classical soil of the Lutheran Reformation. But the emptiest wagons often make the greatest noise" (Germany, its Universities, etc. p. 259). It was one of the most remarkable and heretical movements under the name of "development of the history of doctrines, the Protestant Friends," as Hagenbach says, "have only a negative importance, and their place is rather in the transient story of the day than in the earnest history of religious truth" (Hist. of Doctrines, ii, 410). Ulrich wrote a great deal, and his publications consist mainly of sermons and discourses, for which see Zuchold, Biblioth. Theol. ii, 1861 sq. See also his Autobiography (Magdeburg, 1872); Theologisches Universal-Lex. s. v.; Niedner, Kirchengeschichte, p. 912 sq. (B. P.)

Ujen, in Hindú mythology, was a celebrated king in the dynasty of the Children of the Moon. He was married to Mirti, who presented him with two daughters, Mirkinda and Lashmí, two of the seven princesses that became Krishna’s first wives.

Ukko (the ancient or honorable) was the chief god of the Finns, "the celestial old man," "the god of heaven." He was the first of the trinity composed of himself, Wintämönen, and Imarinen. He appeared sometimes even as a first principle, whence his surname of Viijumala, "the supreme god." In ancient times, the secondary deities were resorted to for a cure; but, in order to complete and consolidate the work of the lesser divinities, the intervention of Ukko was needed. The cure of a wound needing the formation of new flesh was considered a regular act of creation, and therefore the help of the creative power himself was necessary.

Ukkuma, the great spirit of the Esquimaux, a being of infinite goodness, to whom they apply for the satisfying of all their wants.

Uknaaz. See KENAZ 4.

U'lai [many U'lat] (Heb. Ulay), פִּנְס [in pause פִָנְס], probably Pelihi Am-Ilaheh, i. e. "pure water," Sept. Οὐλαία; Theodotion, Οὕβαλα; Vulg. Ulat) is mentioned by Daniel (viii, 2, 16) as a river near Susa, where he saw his vision of the ram and the he-goat. It has generally been identified with the Eulaeus of the Greek and Latin geographers (Maseo. Hier. p. 18; Arrian, Esp. Al. vii, 7; Strabo, xvi, 5, 22; Pseudo, vi, 3; Pliny, H. N. vi, 31), a large stream in the immediate neighborhood of that city. This identification may be safely allowed, resting as it does on the double ground of close verbal resemblance in the two names, and complete agreement as to the situation. The Eulaeus has been by many identified with the Choaospes, which is undoubtedly the modern Kerak, an affluent of the Tigris, flowing into it a little below Kurnah. By others it has been regarded as the Kuram, a large river considerably farther to the eastward, which enters the Khor Ishanish, near modern Kerak. But it has even been suggested that it may have been the Sheepur or Shoa’s, a small stream which rises a few miles N. W. of Susa, and flows by the ruins into the Diyaf stream, an affluent of the Kuran.

1. The general grounds on which the Eulaeus has been identified with the Choaospes are as follows: with the Kerak (Salmasius, Rosenmüller, Wahl, Kitto, etc.), the mention of each separately by ancient writers as "the river of Susa," and, more especially, the statements made by some (Strabo, Pliny) that the water of the Eulaeus, by others (Herod., Athenaeus, Plutarch, Q. Curtius) that of the Choaospes, was the only river that was tasted by the Persian kings. Against the identification it must be noticed that Strabo, Pliny, Solinus, and Polybius (ap. Strabo, xv, 3, 4) regard the rivers as distinct, and that the lower course of the Eulaeus, as described by Arrian (Esp. Al. vii, 7) and Pliny (H. N. vi, 20), is such as cannot possibly be reconciled with that of the Kerkh river.

2. The grounds for regarding the Eulaeus as the Kuram are decidedly stronger than those for identifying it with the Kerakh or Choaospes. No one can compare the voyage of Nearcurs, in Arrian’s Indica, with Arrian’s own narrative of Alexander’s descent of the Eulaeus (vii, 7) without seeing that the Eulaeus of the one narrative is the Pasitigris of the other, and that the Pasi-
tigris is the Kuran is almost universally admitted. Indeed, it may be said that all accounts of the lower Eulæus—those of Arrian, Pliny, Polycletus, and Ptolemy—identify it, beyond the possibility of mistake, with the upper Eulæus, which would be no occasion for controversy. The difficulty is with respect to the upper Eulæus. The Eulæus, according to Pliny, surrounded the capital of Susa (vi. 27), whereas even the Dizful branch of the Kuran does not come within six miles of the ruins. It lay to the west, not only of the Pasitigris (Kuran), but also of the Coprates (river of Dizful), according to Diodorus (xix, 18, 19). So far, it might be the Shapur, but for two objections. The Shapur is too small a stream to have attracted the general notice of geographers, and its water is of so bad a quality that it could never have been chosen for the royal table (Geograph. Jour. ix, 70). There is also an important notice in Pliny entirely incompatible with the notion that the short stream of the Shapur, which rises in the plain about five miles to the N.N.W. of Susa, can be the true Eulæus. Pliny says (vi. 81) the Eulæus rose in Media, and flowed through Mesopotamia. Now, this is exactly true of the upper Kuran, which rises near Hamadan (Ecbatana), and flows down the district of Mahsabadan (Mesopotamia).

The result is that the various notices of ancient writers appear to identify the upper Eulæus with the upper Kuran, and the lower Eulæus, quite unmistakably, with the Shapur. A recent work in the branches of geology has suggested a satisfactory explanation. It appears that the Kuran once bifurcated at Pai Pul, about twenty miles north-west of Susa, sending out a branch which passed east of the ruins, absorbing into it the Shapur, and flowing on west to the plain in a S.S.E. direction till it fell into the Eulæus at Ahwaz (Loftus, Chaldea and Susiana, p. 424, 425). Thus, the upper Kuran and the lower Kuran were in old times united, and might be viewed as forming a single stream. The name Eulæus (Uila) seems to have applied most properly to the branch stream from Pai Pul to Ahwaz; the stream above Pai Pul was sometimes called the Eulæus, but was more properly the Choaspes, which was also the sole name of the western branch, or present course, of the Kuran from Pai Pul to the Tigris. The name Pasitigris was proper to the upper Kuran from its source to the junction with the Eulæus, from which the two names were equally applied to the lower river. The Dizful stream, which was not very generally known, was called the Coprates. It is believed that this view of the river names will reconcile and make intelligible all the notices of them contained in the ancient writers. It follows from the writing which the Persian kings drank, both at the court and when they travelled abroad, was that of the Kuran, taken probably from the eastern branch, or proper Eulæus, which washed the walls of Susa, and (according to Pliny) was used to strengthen its defences. This water was, and still is, believed to possess peculiar longevity (Strabo, xv, 3, 22; Geograph. Jour. ix, 70), and is thought to be at once more wholesome and more pleasant to the taste than almost any other.

See Porter, Travels, ii, 412; Kinneir, Persian Empire, p. 100—106; Sir H. Rawlinson, in Geograph. Jour. ix, 95—93; Layard, Bab. xxvi, 91—94; Loftus, Chaldea and Susiana, p. 424—431.

Ulam (Heb. Ulam, אֻלָּם, porch; Sept. O'i'da v.r. occasionally Ο'λαμ), the name of two Hebrews.
1. First named of the two sons of Shersh and father of Bedan in the Gileadite posterity of Manasseh (1 Chron. vi, 16, 17). B.C. cir. 1618.
2. The first-born of Eshek among the descendants of king Saul, and the ancestor of one hundred and fifty vanquished archers (1 Chron. viii, 39, 40). B.C. cir. 988.

Ulban, Christian Samuel, a Protestant theologian of Germany, was b. at Landshut, in Silesia, he studied at Jena; was appointed pastor at Heinersdorf, in Silesia, in 1737; in 1741 he was called to his native place, and in 1757 to Hamburg, where he died Aug. 27, 1776. Ulber was not only a man of great learning, but also a good pulpit orator. His numerous writings are more of an ascetical than a valuable character, but valuable indeed for their time, but less so now. They are enumerated in Diiringer, Gelehrte Theologen Deutschlands, iv, 547 sqq. (B. P.)

Ulenberg, Caspar, a Roman Catholic priest of Germany, was b. of Lutheran parents in 1549, at Lippstadt. He studied at Wittgenstein. At Cologne he succeeded in bringing back a considerable number of his, who had become a Roman Catholic, to the Lutheran Church; but in 1572 they both joined the Catholic Church, and Ulenberg was appointed teacher at Cologne. In 1575 he received holy orders, was appointed pastor at Kaiserswerth, and in 1583 was made canon of the Church of St. Matthew. From 1593 to 1615 he stood at the head of the gymnasia of Cologne, where he died as pastor of St. Cunibert's, Feb. 16, 1617. He is the author of Die Paalmen Davids in allerlei deutscbe Gesangreime gebracht (Cologne, 1582; 5th ed. 1709). See Koch, Gesch. des deutschen Kirchenleides, ii, 442 sqq. (B. F.)

Ullfils (Ulpillias, Ulfilla, or Wulflia, prob. = Vulflia, or "wolfkin"), a Gothic bishop, was b. among the Goths, in the 2nd century, or 319 (Euseb. Hist. c. 34). They have belonged to a family of Cappodacian Christians whom the Goths had carried into captivity (Philostorg, Hist. Eccl. ii, 5). Having mastered the Gothic, Greek, and Hebrew languages, he became bishop of the Goths in 341, and (according to Auxentius) in 348 settled, with Hermagoras, the legendary Constantine, in the modern Moravia, near Nicopolis. He propagated among his people the love of letters, formed an alphabet of twenty-four characters, based on the Greek, and translated into Meso-Gothic the whole Bible, excepting Kings. Ulflis was a semi-Arian, subscribed to the Creed of Mainz, 359, was charged of Nestorianism by Constantine in 380, and died while attending the Ecumenical Council of 381. Ulflis's Bible was constantly used by the Gothic people so long as they maintained their nationality, but in the 9th century it disappeared. In the latter part of the 14th century, Arnold Mercator discovered in the Abbey of Werden a fragment containing the four gospels. It was the so-called Codex Argenteus, written with silver letters on purple parchment. It is now preserved at Upsala, Sweden. Another fragment, containing nearly all the epistles of St. Paul, was discovered in 1818 on some bone preserved by cardinal Mai in the Castiglione in the Lombard chamber of the monastery of Bobbio, and published at Milan (1819—39). See Gothic Version. Among its recent editors and commentators are Gabelen, Lübbe, Massmann, and Stamm. A new edition by Bernhardt appeared at Halle in 1876. See Besell, Über das Leben des Ulfilla und die Bekehrung der Gothen (1860); Waetz, Über das Leben und die Lehre des Ulfilla (1840).

Ulfruna, in Norse mythology, was one of the nine-beautiful giant-maidens, and became mother of the god Heimdali, the guard of heaven.

Ulvin, John, a minister of the Methodist Episcopal Church, was b. in Virginia in 1792 or 1798. After preaching ten or eleven years as a local preacher, he was admitted to the Ohio Conference in 1826. He died of the cholera, near New Richmond, O., July 13, 1833. Success attended his ministry. See Minutes of Annual Conferences, ii, 276.

Ulitus, in Greek mythology, was a surname of Apollo. It is uncertain whether he carried this name as a god of desolation or preservation. To him Theseus made an offering conditioned upon his safe return from Crete.

Ullía (Heb. Ulliat', עַלָית, yoke or burden; Sept. O'ài v.r. Ο'αί; Vulg. Olla), a descendant of Asher (perhaps the son of Jethur or Ithran), and the father of four sons esteemed among the valiant chiefs of the tribe (1 Chron. vii, 39). B.C. apparently cir. 1014.
ULLAN MACHAITĖ

ULLMANN

Ullan Machaitė, in the religion of the Laimites, was a sect calling themselves the Red-Caps. They do not recognise Dalių-Lama as their head, but have their own land in the district of Kaunas. The sovereignty belongs to the emperor of China.

Uldra, in the superstition of the Norwegians, was the name of the river deity upon whom depended success and blessing in fishing. His favor was sought in like manner to that of Nipen.

Uller, in Norse mythology, was the son of the beautiful golden-haired Sif, second wife of Thor; not by Thor, however, but through a former union. Uller is mentioned as a good protector and an excellent hunter, and walks upon scales, which are indispensable in Norway, with great alacrity, so that no one is competent to keep up with him, for which he is called Weida As, the hunting Asa. In no story of Uller, that he was made king subsequent to Odin's banishment from Asgard, eventually, however, was himself banished, and slain by the victoriously returning Odin, the latest appendix is quite evident.

Ullmann, Karl, an eminent German doctor and professor of theology, was born March 15, 1756, at Epfenbach, in the Palatinate, and studied at the University of Tubingen, where he formed an intimate friendship with Ulrich Pflumm. In 1816 he took his degree as doctor of philosophy, and commenced his professional career at Heidelberg with lectures on exegesis and Church history. For ten years he stayed at Heidelberg and published during this period, Der zwende Brief Pauli Erbstück (Heidelberg, 1821):—Über den durch W. Fr. Binck aus der Ubersetzung bekannt gemachten dritten Brief Pauli an die Corinther (ibid. 1823):—De Hypostasibus (ibid. et al.):—Gregory of Nazianzum (Darmstadt, 1825; 2d ed. 1867), which, as Dr. Schaff says, is "the most complete work on the life and doctrines of this eminent divinity of the early Greek Church, who, for his able defence of the Nicene faith and the divinity of Christ, was emphatically styled the 'Theologian.'" In 1828, together with his friend Umbreit (q. v.), he also commenced the publication of the well-known Studia und Kritiken, which has been before the public ever since, and is still one of the ablest and most learned theological journals of Germany. For the first volume of this journal Ullmann wrote an essay on the Sinlessness of Jesus, which was afterwards printed separately, and published in its seventh edition in 1863 (Engl. transl. by S. Taylor, Edinb. 1870). "In its improved form," says Dr. Schaff, "it must certainly be numbered among the most valuable contributions to the apologistic literature of the Church, and is better calculated, in our judgment, to satisfy an inquiring and well-cultivated mind on the claims of our holy religion than many large volumes on the evidences of Christianity. It shows the way in which the author himself found the truth and by which many a theological student of Germany has since escaped the whirlpool of rationalism and pantheism. . . . It is impossible to read this book attentively without being edified as well as instructed, and overwhelmed with the glory of the only begotten of the Father shining through the veil of the flesh upon the eye of faith and enlightened reason." In 1829 Ullmann was called to Halle, and for about seven years he lectured, besides Church history, on symbols and dogmatics; and in 1836 he returned again to Heidelberg as professor of ecclesiastical history and Church censue. He sent there the best years of his life. When, in 1856, Ullmann was elected to the prelacy, or the highest ecclesiastical dignity of the Evangelical Church, in the grand-duchy of Baden, he withdrew from the academic chair and took his residence at Carlsruhe, devoting his whole energy to the affairs of the Church. In his position with his weight on his side, the learned Dr. Hürth, author of Symbolism of the Mosaic Worship, faithfully endeavoured to build up the Protestant Church of Baden, which was deeply undermined by theological rationalism and political red-republicanism. When, however, he was called out of retirement in 1861 from all public affairs, and died Jan. 12, 1866.

Ullmann, starting from the school of Schleiermacher and Neander, was at first somewhat latitudinarian in doctrine and too compromising in disposition, but he grew with the better spirit of the age in orthodoxy and evangelical sentiment. Thus he not only took part, while at Halle, in the efforts made against the still existing remnant of rationalism, and also used all means at the General Synod, which met at Carlsruhe in 1855, to have the rationalistic catechism heretofore in use replaced by a better one constructed on the basis of the small Lutheran and Heidelberg catechisms. Similar reforms he introduced with regard to the liturgy and the common school-books. But more than through his ecclesiastical reforms, he acquired a lasting reputation by a number of works "equally distinguished for solid and well-diffused historical information, comprehensive views, calm and clear reflection, dignified and conciliating tone, and masterly power of exhibition." Besides those already mentioned, we name his Historisch oder Mythisch (Hamburg, 1838), in which he brings out the signification of Christ's personality under a historical point of view, as an unanswerable argument to the infidel work of Strauss on the life of Jesus:—Das Wesen des Christentums (ibid. 1845; 6th ed. 1863), with a critical appendix on Feuerbach's infamous book on the essence of Christianity:—De Beryldo Boettemann's Epitome Doctrina Commentatio (ibid. 1855). But his magnum opus, which was assigned to him a rank among the first Church historians of the present century, is his Reformers before the Reformation (1841-42, 2 vols., forming also a part of Clark's Foreign Theological Library). This work "is certainly one of the strongest historical arguments for the Reformation that have yet been presented. . . . What Finfini attempted in a crude form in the infancy of Protestant historiography, and with an unmeasured polemical zeal against the Romanists of his age, Ullmann has carried out with all the help of modern erudition, in the calm, truth-loving spirit of an impartial historian, and with full acknowledgment of the great merits of Catholicism as the Christianizer and civilizer of the barbarian nations of the Dark Ages. With him the Reformation is not so much a rebellion as the flower and fruit rather of the better and deeper life of Christianity; the struggle of the maternal bosom of mediæval Catholicism. This, it is the noblest and strongest historical vindication of it" (Schaff). In these two volumes special attention is paid to the German and Dutch forerunners of the Reformation from the 16th to the 15th century, who are treated with exhaustive minuteness of detail. Here we find trustworthy and carefully sifted information on the life and theology of John Gocth, John Wessel, the Brethren of the Common Life, and the various schools of the mystics, Ruysbroek, Suso, Tauler, Thomas Kempis, the anonymous author of the curious tract on German theology, and Stephen Eggermann and early friend of Luther. The latter and principal part of the second volume contains the author's former monograph on John Wessel (Hamburg, 1834) in an improved form which leaves but little to be added. But the work of Ullmann, although very satisfactory as far as it goes, does not exhaust the subject, which would require two or three additional volumes. He leaves, however, the important preparatory movement of Wycliffe and the Lollards in England, of Huss and the Hussites in Bohemia, of Savonarola in Italy, and of what is generally called the Revival of Letters and Classical Learning by such persons as Erasmus, Agricola, and others who speak of the more negative preparatory Reformations. The Reformation by the anti-Catholic sects of the Middle Ages, es-
ULPHILAS. See ULFILAS.

ULPHILAS, See ULFILAS.

ULRIC OF AUGSBURG, in the 10th century, occupied a noteworthy position among his contemporaries both as a prince and a prelate. He was born about A.D. 880 at Augsburg, and died in 941 at St. Gall, and is buried in his basilica, which was consecrated on Christmas Day, Dec. 28, 929. In accordance with the custom of his time, he followed with his retainers the standards of the emperors Henry I and Otto I. He was influential in securing an armistice between Henry and his revolted son Duke Liutulf in 934, and in the following year he won great fame by a successful defence of Augsburg against the Magyars. He was equally zealous in the erection and adornment of churches and chapels, and in the restoration of cities, castles, dwellings, and lands. His bounty was long the only support of impoverished priests and retainers. In the administration of his diocese he was a benefactor to the poor and a patron to learning; he endeavoured to dispense justice, confer absolution, and examine the official conduct and private life of his clergy. He greatly increased the number of festivals and the pomp with which they were observed, and he was eminently zealous in the collection of relics. He was, in brief, a thorough exponent of the piety of his time, and a most faithful specimen of the militant churchman. Towards the close of his life he became more than ascetic than before, and assumed the Benedictine habit. He died July 4, 973. Soon after his decease, it was reported that miracles were wrought upon persons who visited his grave, and his memory and remains were accordingly highly venerated in Augsburg and vicinity. Provest Gerhard, who had been Ulric's constant companion in the closing years of the bishop's life, wrote a Life, in which many of these wonders are mentioned; and Ulric's successor in the bishopric, Liutulf, persuaded Pope John to confirm hisICY. The bull to this effect was issued in February, 998, and is noteworthy as the first clearly authenticated document which marks the transition from a saint-worship which grew naturally out of the solemnities of character in Christians, to a saint-worship established by the church for the effect of the people. Ulric's name is mentioned in connection with the authorship of several writings, but without satisfactory proof.

ULRIC, the name of a Swiss family noted for the theological writings of several of its members.

1. Jean Jacques (2) was born at Zurich in 1668, and died there in 1731. He studied at his native school, and also at Bremen, Franeker, and Leyden, and afterwards occupied a chair in the University of Zurich. He wrote several commentaries, two or three historical works in Latin.

2. Jean Jacques (2) was born at Zurich in 1668, and died there in 1731. He studied at his native school, and at Utrecht and Bremen, and, after travelling in Germany and the Netherlands, was engaged in ecclesiastical matters and Oriental studies. Besides sermons and dissertations, he wrote one or two historical works in French.

3. Jean Gaspar was born at Zurich in 1768, and died there in 1795. He studied at his native place, and at Utrecht and Bremen, and, after travelling in Germany and the Netherlands, was engaged in ecclesiastical matters and Oriental studies. Besides sermons and discourses, he wrote one or two historical works in French.

4. Jean Rodolph was born at Zurich in 1728, and died there in 1795. He was professor in the gymnasium there from 1763, and pastor in 1769, and was eminent for his piety and ascetic sentiments. He left several sermons and ascetic works. See Biographie Universelle, a. v.

ULTRIC, a German engraver, who flourished at Nuremberg from about 1590 to 1628. He engraved some portraits, etc., among which were twelve circular prints, one of them a Crucifixion. See Spounger, Biog. Hist. of Fine Arts, a. v.

Ulster, Synod of, the chief body of Presbyterians in the North of Ireland. See Presbyterian Churches, No. 7.

Ultimate Appeal to Scripture Authority. It is the opinion of some persons that a considerable portion of the essentials of Christianity is not to be found in Scripture, but in a supplementary tradition, which is to be sought in the works of those early fathers who were orthodox. Others, again, utterly oppose such notions; and, independently of the consideration that upon such a theory the foundations of a Christian faith and hope become almost as uncertain as the truth of the whole of the laity, and to much the greater part of the clergy, they reject the system on its own account. They acknowledge the authority of no private individual, ancient or modern, in a question of doctrine. With true respect for all who are entitled to it, and with a just acknowledgment of the valuable instruction to be derived from their works, they yet consider that, be they of what age or of what country they may, anti-Nicene or post-Nicene, Popish or Protestant, they are not to stand with them, as Christians, in place of the Holy Scriptures; or, as Christian ministers, in place of their own Church. See Faith, Rule of.

Ulysses, in Roman mythology, a name applied to those who recognise the papal claim of supremacy over every part of the Church, as well as over every sovereign within its boundaries; and also, since 1870, to those who accept the decrees of the Vatican Council. Ultramontanism dates from Gregory VII, who propounded the following claims: "Quod solus papa possit uti imperialis insigni; quod solus papa pedes omnes principes deoscelentar; quod illi liceat imperatores deponere; quod illi fidelium pacem arbitrii suam subiectum." These views are principally maintained in the Italian peninsula, but it is the tone generally adopted by English seceders. The free action of national churches is wholly superseded by such pretensions. The theory has apparently grown up from the feudal relations of the papacy and the temporal power. An assertion of authority so incompatible with catholic liberty aroused opposition on the other side of the Alps, in the Gallican and German churches, and in the Swiss cantons. Belclare's statements are important as regards papal infallibility. He sets forth the opinion of divines in four propositions: (1) "The Roman pontiff ruling any
point, even in an ecumenical council, may be guilty of heresy, and of teaching others heresy—which has \textit{de facto} happened;\footnote{The Roman pontiff may be heretical and teach heresy, if he rule anything apart from synodical assistance, and this has happened \textit{de facto};\footnote{The pope cannot in any way heretical, nor teach heresy publicly, even though he rule any point on his own responsibility alone;}} \footnote{That whether the pope can be heretical or not, he can rule nothing heretical as a point to be believed by the whole Church.} After the Council of Constance the question of the direct or indirect power of the papacy over states and sovereigns became the chief point of dispute, and everywhere assumed a national character. In Germany Febronius (bishop Houtsheim) wrote a powerful work against Ultramontanism; and in 1786, at the Convention of Ema, the archbishops of Mentz, Treves, Cologne, and Salzburg denounced it. In Italy its chief opponent in the last century was Scipione Ricci, bishop of Pistoja, who convened a synod in that city, September, 1786, and promulgated disciplinary decrees and a doctrinal exposition favoring extreme Gallicanism and Jansenism. These were partially confirmed, April 23, 1787, by an assembly of the bishops of Tuscany, but were condemned by Pius VI, in the dogmatic bull \textit{Auctorem fidei}, Aug. 28, 1794.

The practical influence of Ultramontane theories was greatly reduced during the reconstruction of southern Europe that attended the career of Napoleon I, who paid little regard to the papal claims; but the principles were still maintained, and on the Bourbon restoration they were reasserted.

Among modern assertors of the Ultramontane theory the most strenuous are English Romanists, especially neophytes. Among Continental writers are bishop Ziegler, \textit{Das katholische Glaubensprinzip}; Carové, \textit{Die alleinlegitiimierte Kirche}; Der Papst im \textit{Verhältniss zum Katholizismus}; and the abbé Lamennais in his \textit{13 Questions de la Religion}. Perhaps the greatest influence is Mühler's \textit{Symbolik} (1882). For a fuller account of the controversies to which the claims of Ultramontanism have given rise, see \textit{Immaculate Conception}; \textit{Infallibility}; \textit{Papacy}.

\textbf{Umba}, in the epic and Purânic mythology of India, is one of the principal names of the consort of Siva. She is depicted as a woman, however, while there are many more belonging to her of less frequent occurrence, as \textit{Katigyan}, \textit{Ambika}, \textit{Haimavati}, \textit{Sita}, etc. She was the younger of two sisters (Ganga being the older), and was so beautiful that she remained thirty-six thousand years in the embrace of Siva, hardly was she, however, noticed upon all the gods the curse of remaining childless. She also cursed the earth, making it constantly subject to change, and to be the wife of many husbands. In great anxiety, the gods now all turned to Brahma, who promised that heaven should not be despoiled, and that Umas elder sister, Ganga, should, by Siva, become mother of a son who should command the heavenly hosts in the great Demon-war. Thus it happened that Ganga became pregnant by Siva, and so also Uma, whereupon the latter became reconciled and withdrew the curse. Throughout the popular creed regarded Uma far more as the type of destruction than as that of divine wisdom, yet the works devoted to her praise never fail to extol her also as the personification of the highest knowledge. The myths relating to this goddess, who is worshipped in various parts of India—particularly in the Deccan—form the third part of the great \textit{Rāmāyana}, in poetical works such as the \textit{Kumarasambhava}, and in modern popular compositions. She is as Kali (q.v.) the favorite divinity of the Thugs. See Moor, \textit{Hindu Pantheon}; Muir, \textit{Original Sanskrit Texts} (London, 1860), vol. 4; the \textit{Harivandana}, translated by Langlois (Paris, 1861); the \textit{Bhagavatam}, by M. Entreman, \textit{Oedipus}, in \textit{Bibliotheca Indica}, edited by Rev. K. M. Banerjee (Calcutta, 1862).

\textbf{Kali} (after the figure in Coleman's \textit{Mythology of the Hindus}).

\textbf{Umbraculum} (a little skode), an altar canopy, more generally called the \textit{ciborium} (q.v.).

\textbf{Umbrett, Friedrich Wilhelm Carl}, an eminent doctor and professor of theology of Germany, was born April 11, 1795, at Sonneborn, near Gotha. He studied at Göttingen, where Eichhorn instructed him in Oriental languages. In 1818 he took his degree as doctor of philosophy, and commenced his academic career as a private lecturer at Göttingen. In 1829 he was called to Heidelberg as professor of theology and philosophy, where he became intimately connected with Ullmann, Rothe, and others: and where he also died, April 26, 1860. Umbrett possessed a poetical nature, and was, as he himself acknowledged, unfit for ecclesiastico-political questions. His piety had nothing to do with dogmatical hairspliing; his faith in the living personal God, as he revealed himself in Christ, his Son, and in the immortality—these were the only positions which he would not suffer to be attacked. He wrote, \textit{Commentatio exhibens Histor. Emorurum al Omrah ez Abulfeeda} (Gott., 1816); \textit{Kohlethi, des weissen Königs, Seelenkampf} (Gotha, 1818); \textit{Coelethi Speciosus de Summo Bono} (ibid., 1820); \textit{Was bleibt? Zeitgemäße Betrachtung des Königs und Friedjgers solomo, etc.} (Hamburg, 1849); \textit{Solomonis Lied von der Liebe} (Gött. 1820; 2d ed. Heidelberg, 1828); \textit{Erinnerung an das Herodot} (Heidelberg, 1829); \textit{Das Buch Hob} (ibid., 1824; 2d ed. 1829); \textit{Commentar über die Sprüche Solomon} (ibid., 1826); \textit{De Vetere Testam. Prophrétia, Chor. Antiquius, Temporis Oratoribus} (ibid. 1833); \textit{Christl. Erbauung aus dem Psalter} (Hamburg, 1835; 2d ed. 1845); \textit{Der Knecht Gottes} (ibid., 1840); \textit{Praktischer Commentar über die Propheten des alten Bundes} (ibid., 1841-46, 4 vols.; Daniel and Jonah are wanting).—Die \textit{Sünde, Bräutigam zur Theologie des A. T.} (Gotha, 1838); \textit{Der Brief an die Römer, auf dem Grunde des A. T. ausgelegt} (ibid. 1856). Besides these works, he wrote contributions to the \textit{Studien und Kritiken, Herzog's Recht-Eenkleps}, etc. See Zsch Color, \textit{Bibl. Theol. ii, 1867; Forsch. zt.} (1866); \textit{Mittelalter} (1865); \textit{Hütten, Enzyklop. xvi, 628 sq.; Theol. Univerzal-Let. s. v.; Schenkelen, Allgen. Kirscher Zeitschriften, 1880, vi;}}

UNECIRCULICISED

proach of him, robs him of his glory, is a contradiction to his will, and a contempt of his authority." The causes of unbelief are Satan, ignorance, pride, and sensuality. The danger of it is great; it hardens the heart, fills with presumption, creates impatience, deceives with error, and finally exposes to condemnation (John iii, 11).

Naturalistic unbelief is that which is indifferent and opposed to revelation. The unbelief of reason is the making our reason independent of its own needs—the re-summation of the faith of reason. See Charnock, Works, ii, 601; Case, Sermons, ser. 2; Porteus, Sermons, vol. i, ser. 2; Owen, Reasons of Faith; Hannam, Compendium, i, 26; Churchill, Essay on Unbelief; Buck, Theol. Dict. s. v.; Fleming and Krauth, Vocabulary of Phil. Sciences, s. v.

Unbloody Sacrifice, a theological term to designate the holy sacrifice of the altar.

Unchangeableness of God. See Attributes of God: Immutability.

Uncial Letters—so called as being an inch (Lat. uncia) long—characters of a large and round form used in some ancient MSS. The earliest form of an alphabet is its capitals, and the oldest Greek and Latin MSS. are written entirely in capitals. Uncial letters, which began to take the place of capitals in the middle of the 5th century, differ from them in being composed of rounded and not straight lines, and exhibiting a tendency towards greater expedition in style. Uncial writing arose as writing on papyrus or vellum became common, the necessity for more rapid execution leading to the practice of curving the lines. Its being more easily learned than the cursive style was probably the cause of its becoming the favorite mode of writing books of importance among the monkish scribes; while legal instruments, which required greater despatch, were executed by professional scribes in a corrupted form of the Roman cursive hand. Uncial writing prevailed from the 6th to the 8th, or even 10th century. The following specimens of uncial Greek and Latin writing are from a MS. of the four gospels and Acts of the Apostles in both languages, written early in the 6th century, and presented to the University of Cambridge by Theodore Beza in 1581. The passages is from John xxi, 5—signifying by what death he should glorify God.

CHMENUNT OUWANAT WAODA GEITONEN
Greek Uncial.

SIGNIFICANSQUAMORTENONORIFICABIT

Latin Uncial.

During the 6th and 7th centuries a transitional style of writing prevailed in Italy; and to some extent elsewhere, in which the letters approximated more nearly to the Roman cursive hand: this passed by a gradual transition into the minuscule manner, or small hand, which, from the beginning of the 10th century, became usual in MSS. See Silvestre, Universal Paleography (transl. and ed. by Sir W. M. Maiden, Lond. 1860); Traite de Diplomatie par deux Religieux Benedicteurs de la Congregation de St.-Maur (Paris, 1755). See Manuscripts.

Uncircumcised (לכּה, i. e. having a foreskin, ἄκροβοστίον ἤγων; and so ἀκροβοστίον, the prepuce, alone, for "uncircumcision"), a word literally denoting a heathen among the Jews. So also it is sometimes used figuratively "of uncircumcised lips," i.e. dull of speech, stammering, one whose lips still have, as it were, the foreskin, and are therefore too thick and large to bring about words easily and fluently (Exod. vi, 12, 30). So, likewise, "their ear is uncircumcised," shut up by a foreskin (Jer. vi, 10); also "their uncircumcised heart," to which the precepts of religion and piety cannot penetrate (Lev. xxvi, 12; Jer. vi, 16; Acts ii, 28; v, 1; 15; 7; vii, 50; Acts vii, 51; James i, 21; Col. ii, 13). So, also, "the foreskin of a tree," i. e. uncircumcised man being altogether of necessity for salvation." It also affirms that there are two worlds, a spiritual and material—the one to be employed by the Church, and the other for the Church under the direction of its head; and that to deny the subservience of the latter to the former is to maintain the doctrine of two principles, and to fall into the heresy of the Manichaeans. See Trench, Medieval Church Hist. p. 292.

Unbelief, the refusing assent to testimony, the withholding of due belief. According to Kant, it is the withholding of assent to that which, though objectively insufficient as a ground of cognition, is subjectively sufficient as a ground of faith. Moral unbelief is the rejection of that which, though we cannot know it, is yet morally necessary, as faith in God, freedom, and immortality. It includes," says Dr. Guise, "dissection to feel disquieted by this or that precepts against the Redeemer, readiness to give credit to any other than him, inordinate love to the world, and preferring of the applause of men to the approbation of God."

"Unbelief," says Charnock, "is the greatest sin, as it is the foundation of all sin: it was Adam's first sin; it is a sin against the gospel, against the highest testimony; a refusal to accept of Christ upon the terms of the Gospel. It strikes peculiarly at God; it is the greatest re-
fruit, the fruit of the first three years, which by the law was to be regarded as unclean (Lev. xix. 23). See CLEAN.

Unclean (usually some form of the verb שָׁבַר, which is the technical term for ceremonial pollution; עָקָרָה, impure; but occasionally פֶּתַל, naked; מַעֲבֵד, consecrated; פֶּתַל, filth; כָּוֵכל, contamination). In this article we treat of food prohibited by the Mosaic law, reserving defilements of the person for the following article. See CLEAN.

The Jews were forbidden to eat things strangled, or dead of themselves, or through beasts or birds of prey; whatever beast did not both part the hoof and chew the cud; and certain other smaller animals rated as "creeping things" (גַּנֶּשׁ); certain classes of birds mentioned in Lev. xi and Deut. xiv, twenty or twenty-one in all; whatever in the waters had not both fins and scales; whatever winged insect had not besides four legs the two hind legs for leaping; besides things offered in sacrifice to idols; and all blood or whatever contained it (saepve the blood of fish, as would appear from that only of beast and bird being forbidden [Lev. vii, 26]), and therefore flesh cut from the live animal; as also all fat of any kind excepted in making the burnt-offerings, or of the testicles, and probably wherever discernible and separable among the flesh (iii. 14–17; vii. 23). The eating of blood was prohibited even to "the stranger that sojourneth among you" (xxvii. 10, 12, 13, 14), an extension which we do not trace in other dietary precepts; e.g. the thing which died of itself was to be given "unto the stranger that is in thy gates" (Deut. xiv. 21).

As regards blood, the prohibition indeed dates from the declaration to Noah against "flesh with the life thereof which is the blood thereof," in Gen. ix. 4, which was perhaps regarded by Moses as still binding upon all Noah's descendants. The grounds, however, on which the similar precept of the Apostolic Council, in Acts xv, 20, 21, appears based, relate not to any obligation resting still unbroken on the Gentile world, but to the risk of promiscuous offence to the Jews and Jewish Christians, "for Moses of old time hath in every city them that preach him." Hence this abstinence is reckoned among "necessary things" (τὰ πινακάκες), and "things offered to idols," although not solely, it may be presumed, on the same grounds, are placed in the same class with "blood and things strangled" (ἀπεκομισθείσα εὐαλωτόν καὶ ἁμάρτω καὶ πνεκτό, ver. 28, 29). Besides, we have no objection to prohibitions against "seething a kid in its mother's milk." It is added, as a final injunction to the code of dietary precepts in Deut. xiv, after the crowning declaration of ver. 21, "for thou art an holy people unto the Lord thy God;" but in Exod. xxiii, 19; xxxiv, 20, the context relates to the bringing first-fruits to the altar, and to the "angels" who was to "go before" the people. To this precept we shall have occasion further to return.

The general distinction between clean and unclean is rightly observed by Michaelis (Smith's Transl. art. ceci, etc.) to have its parallel among all nations, there being universally the same division, the one to be eaten and the rest as the opposite (comp. Lev. xi, 47). With the greater number of nations, however, this is only a traditional usage based merely, perhaps, either on an instinct relating to health, or on a repugnance which is to be regarded as an ultimate fact in itself, and of which no further account is to be given. Thus Michaelis (as above) remarks that in a certain part of Germany rabbits are viewed as unclean, i.e. are advisedly excluded from diet. English feelings as regards the frog and the snail, contrasted with those of Continetue, supply another close parallel. Now, it is not unlikely that nothing more than the traditional code of the people, with those traditions which have descended among the Arabs, unfortified, certainly down to the time of Mohammed, and in some cases later, by any legislation whatever, so far as we know, may illustrate the probable state of the Israelite. If the law seized upon such habits as were current among the people, perhaps in quality and range, the whole scheme of tradition, instinct, and usage so enlarged might become a ceremonial barrier, having a relation at once to the theocratic idea, to the general health of the people, and to their separateness as a nation.

The main personal interest taken by Jehovah in his subjects, which is expressed by the demand for a ceremonial purity in all the acts of the Israelite as in covenant with him, regarded also this particular detail of that purity, viz. diet. Thus the prophet (Isa. lvi, 17), speaking in his name, denounces those that "sanctify themselves, that they may be unclean to idolatry," eating swine's flesh, and the abomination, and the mouse, and those "which remain among the graves and lodge in the monuments, which eat swine's flesh, and broth of abominable things is in their vessels" (lix. 4). It is clear that there was a higher lawyer to announce that "there is nothing from which a man that is holy can defile him" (Mark vii, 15). The fat was claimed as a burnt-offering, and the blood enjoyed the highest sacrificial esteem. In the two combined, the entire victim was by representation offered, and to transfer either to human use was to deal presumptuously with the most holy things. But, besides this, the blood was esteemed as "the life" of the creature, and a mysterious sanctity beyond the sacrificial relation thereby attached to it. Hence we read, "whatsoever soul it be that eateth any manner of blood, even that soul shall be cut off from his people" (Lev. xvii, 10, 14); whereas the offender in other dietary respects was merely "unclean until even" (xi, 40; xvii, 15). Blood was certainly drunk in certain heathen rituals, especially those which related to the solemnization of a covenant, but also as a pledge of idolatrous worship (Ps. xvi, 4; Ezek. xxxix, 20). Still there is no evidence that blood has ever been a common article of food, and any lawyer might probably reckon on a natural aversion effectually fortifying his prohibition in this respect, unless under some bewitching influence of superstition. Whether animal qualities, grosser appetites, and inhuman tendencies might not recur, wasouched by the Hebrews, transmitted into the partaker of the blood of animals, we have nothing to show: see, however, Josephus, Ant. iii. 11, 2. See BLOOD.

It is noteworthy that the practical effect of the rule laid down is to exclude all the corvisiva among quadrupeds, and, so far as we can interpret the nomenclature, the rupiformes among birds. This suggests the question whether they were excluded as being not averse to human carcasses, and in most Eastern countries acting as the servants of the battle-field and the gibbet. Even swine have been known so to feed; and, further, by their constancy, to be prayed for flocks and fowls. The Sibyl, in the same direction, suggests impurity, even if they were not generally foul feeders. Among fish, those which were allowed contain, unquestionably, the most wholesome varieties, save that they exclude the oyster. Probably, however, fishing was little practiced by the Israelites; and the Levitical rules must be understood as referring backward to their experience of the produce of the Nile, and forward to their enjoyment of the Jordan and its upper lakes. The exclusion of the camel and the hare from allowable meats is less easy to account for, save that the former never was in common use, and is generally regarded as refrangible, and the latter, between the desert tribes of the eastern or southern border-land, some of whom certainly had no insuperable repugnance to his flesh; although it is so impossible to substitute any other
creature for the camel as the "ship of the desert" that
to eat him, especially where many other creatures give
meat much more preferable, would be the worst economy
possible in an Eastern commissariat—that of destroying
the favored nation before God (1 Mac. 12, 68, 64; 2 Mac.
18; vii, 1). The same feeling led to the exaggeration of the
Mosaic regulations, until it was "unlawful for a
man that was a Jew to keep company with, or come
unto, one of another nation" (Acts x, 28); and with such
intensity were badges of distinction cherished that the
wine, bread, oil, and the other provisions which by
the law were declared unlawful for a Jew to eat.
Nor was this strictness, however it might at times be pushed
out to an absurdity, without foundation in the nature of the
case. The Jews, as, during and after the return from
captivity, they found the avenues of the world opening
around them, would find their interesting obstacles
unavoidably increased, and their only way to avoid
an utter relaxation of their code would lie in somewhat
overstating the precepts of prohibition. Nor should we
omit the tendency of those who have no scruples to
"despise" those who have, and to parade their liberty
at the expense of the latter, and have been so iniquitous
in the contrast by wanton tricks, designed to beguile the
Jew from his strictness of observance, and make him,
unguardedly, partake of what he abhorred, in order to
heighten his confusion by derision. One or two in-
consequential acts of this kind would drive the
latter within the intrenched walls of a universal
repugnance and avoidance, and make him seek the
safe side at the cost of being counted a churl and a
bigot. Thus we may account for the refusal of the "king's
meat" by the religious captives (Dan. i, 8), and for the
similar conduct recorded of Judith (xii, 2) and Tobit
(Tob. i, 11); and in a similar spirit Shakespeare makes
Shylock say, "I will not eat with you, drink with you,
nor pray with you" (Merchant of Venice, act i, sc. iii).
As regards things offered to idols, all who own one God
meet on common ground; but the Jew viewed the pre-
cept as despising life. But to the Jews, if not the
Gentiles, had a holy horror of even an unconscious infraction
of the law: hence, as he could never know what had re-
ceived idolatrous consecration, his only safety lay in to-
total abstinence; whereas Paul admonishes the Christian
to abstain, "for his sake that showed it and for con-
science's sake," and even when he sanctioned it was
bonded to a false god, but not to parade his conscientious
scruples by interrogating the butcher at his stall, or the
host in his guest-chamber (1 Cor. x, 25-29); and to give
opposite injunctions would doubtless, in his view, have
been "compelling the Gentiles to live as did the Jews" (Apostle,
Rom. xiv, 14).

The prohibition to "seethe a kid in its mother's milk"
had caused considerable difference of opinion among
commentators. Michaelis (art. cxx) thought it was meant
merely to encourage the use of olive-oil instead of the
milk or butter of an animal, which we commonly use in
dinners, and not what he called "a former." They will
not satisfy any mind by which the name of symbolism,
so blindly held by the Eastern devotee, and so deeply
interwoven in Jewish ritual, has once been dully seized.
Mere to the beasts is one of the under-currents which
permeate that law. To soften the feelings and humanize
the character as the higher and more general aim. When
Paul, commenting on a somewhat similar precept, says, "Doth
God care for oxen, or saith he it altogether for our sakes?"
he does not mean to deny God's care for oxen,
but to insist the rudder on the more elevated
and more human lesson. The milk was the destined
snack; for a part of the income of the JEWS was the
air," was expressive of the Gentile world, to put now
on a level with the Israelite, through God's "purifying
their hearts by faith." A sense of this, their preroga-
tive, however dimly held, may have fortified the mem-
ers of the privileged nation in their struggle with the
people of the other world. It is not a question of
whether or not a man of another race, or whose consciousnes such a use of her milk could in
nowise quicken, was based on a sentiment merely. But
the practical consequence, that milk must be foregone or elsewhere obtained, would prevent the sympathy
from being felt in the food of the flesh in milk (Mishna,

It remains to mention the sanitary aspect of the case.
Swine are said to be peculiarly liable to disease in their
own bodies. This probably means that they are more
easily led than other creatures to the foul feeding which per-
haps is to be imputed to the average heat is great, the
decomposition rapid, and malaria easily excited, this ten-
dency in the animal is more mischievous than else-
where. A measel or mezel, from whence we have "mea-
sled pork," is the old English word for a "leper," and it
is asserted that eating swine's flesh in Syria and Egypt
tends to produce that disorder (Bartholinus, De Morbvs
Bibbl. c. viii.; Wunderbar, p. 51). But there is an indif-
nectiveness about these assertions which prevents our dealing
with them scientifically. Meazel or mezel may well, in- 
deed, represent "leper," but which of all the morbid
symptoms classed under that head is to stand for, and
which disease, if any, is the same, is a problem. A para-
site disorder in man and pig are indeterminate questions.
See Leper. The prohibition on eating fat was salubri-
ous in a region where skin diseases are frequent and
virulent, and that on blood had, no doubt, a similar tend-
ency. The case of animals dying of themselves needs no
remark: the mere wish to insure avoiding disease, in
case they had died in such a state, would dictate the
rule. Yet the beneficial tendency is veiled under a cer-
emonial difference, for the "stranger" dwelling with the
Israelite was allowed it, although the latter was forbid-
den. Thus is their distinctiveness before God, as a nation,
ever put permanently forward, even where more common
traits appear to have their turn. As regards the an-
imals allowed for food, comparing them with those for-
bidden, there can be no doubt on which side the balance
of wholesomeness lies. Nor would any dietary econo-
mist fail to pronounce in favor of the Levitical dietary
of flesh and blood. Natural history, the study of pur-
pose, and yet of national distinctness, procured, how-
ever, by a minimum of the inconvenience arising from
restriction.

tionis Animalium, etc., quae in Parnos Orientalis Observa-
tae fuerant, Naturalia Curiosorum Collectio, przycker, Handbuch der ||"Alterthumskunde, vol. iv., Natural|
|History, may be consulted on some of the questions con-
|nected with this subject; also, more generally, Mai-
|nonides, De Cibis Vetibus; Reinhard, De Cibis Hebra-
|orum Prohibitis. See Foon.

Uncleaness (chiefly מַעְנָט, used in the almost
tecnic of Levitical defilement) is the term by
which, in the law of Moses, is indicated that condi-
tion which marks the temporary suspension of a Hebrew
man or woman from religious and social privileges as
a subject of the Theocracy.

1. About seventy specific cases of possible unclean-
ness are described, and others implied. Various modes
of classifying them have been resorted to. The old
and Jews distinguish two classes, according to the length
of the ceremonial suspension. The lighter class em-
braced the instances of uncleanliness for the day; the
heavier class, those of a longer period (Peshito, in Ugl.
xxv, 1488; Maimonides, Constitutiones, in Ugl. viii., 58
where the connotation of the lighter class is called
רָאָק הַקִּ֜ם הַעֲוֹרֵ֗ד, and Levantfoot, Ha comp. O. T. [Works by Pitman, ii., 127]; although he gives
four classes, according to time. Other writers (see Cor-
nelius à Lapide on Lev. xxv, 22) make also two classes,
but on a different principle: "Duxile fuit immunditiae
Hebr. Una erat peccatum, quia peccato Dei vetit, taher
et comedere carnes immundas. Talis etiam erat lata lepro-
sa, sic sita et statuta, talis erat tangerre lexopus, etc. Hae
non erant peccata, sed tantum inducent umbiraritis-
em quandam." Modern Jews profess to be bound only
by the former of these classes. The threefold classifica-
tion, however, which is indicated in the law of Moses
itself seems to be most convenient, and is most com-
monly adopted.—(a) "Every leper;" (b) "Every one
that hath an issue;" (c) "Whosoever be defiled by the
deak" (see Num. v, 2). The lawgiver, no doubt, here
refers to his own enactments in Leviticus, and under
the three generic phrases includes all the instances of
uncleanliness. (1.) He begins with leprosy, the gravest of all
instances. A minute diagnosis of this terrible malady in
its ceremonial character, and the purification which the
law prescribed, are given in Lev. xiii. See LEPROSY.

(2.) Under the second head, of uncleanness from "is-
"sues," are included all those physical emanations or
bodily discharges to which either sex is liable. They
are described in their several details in the following
passages: [1.] The woman's periodical issues in Lev.
xxv, 19-24, and irregular issues in ver. 25-27. These
were alike unclean in themselves (the former for seven
months, the latter for two), but were the same, as a para-
site disorder in man and pig are indeterminate questions.
See Leopard. The prohibition on eating fat was salubri-
ous in a region where skin diseases are frequent and
virulent, and that on blood had, no doubt, a similar tend-
ency. The case of animals dying of themselves needs no
remark: the mere wish to insure avoiding disease, in
case they had died in such a state, would dictate the
rule. Yet the beneficial tendency is veiled under a cer-
emonial difference, for the "stranger" dwelling with the
Israelite was allowed it, although the latter was forbid-
den. Thus is their distinctiveness before God, as a nation,
ever put permanently forward, even where more common
traits appear to have their turn. As regards the an-
imals allowed for food, comparing them with those for-
bidden, there can be no doubt on which side the balance
of wholesomeness lies. Nor would any dietary econo-
mist fail to pronounce in favor of the Levitical dietary
of flesh and blood. Natural history, the study of pur-
pose, and yet of national distinctness, procured, how-

four classes, according to time. Other writers (see Cor-
nelius à Lapide on Lev. xxv, 22) make also two classes,
UNCLEANNESS 635

of moral and religious mystery which underlies much of the ceremonial enactments. The havoc made by sin on our human race seems most strongly indicated by the fact that all the major classes of our natural life are affected with uncleanness. The gradations of pollution from conception to parturition, and their remarkable culmination in the birth of the female child, are wonderfully significant of the original "transgression," and of woman's first and heavier share in it (1 Tim. 2, 15; comp. with Gen. iii, 6, 16, 17).

The two periods in the mother's purificatory acts are, however, different in character. "For seven days, immediately after she is brought to bed, she lies ר"טלעט, 'in the blood of her uncleanness; but the three-and-thirty following, ר"טלעט, 'in the blood of her purifying." Although the privacy continued to the mother, she was after the seven days released from the ban of uncleanness, and did not communicate defilement to others, as in the previous period of her perfect isolation and disability. The old Jewish authorities are as usual very dogmatic on the point: 'In פֶּסְקָה, col. 4, it is written, ר"טלעט, "in the blood of her purifying;" "though she issue blood like a blood, yet she is clean." Nor doth she defile anything by touching it but what is unclean (Lightfoot, Exeget. on St. Luke [ed. Fitzman, xii, 37].

(3.) Equally noticeable, as might be expected, are the traces of this havoc as displayed in the various uncleannesses of death—the third and last of our chapters of classification; and herein we recognize the deeper implication of our human race in the ruin, above all other living beings. "By the law of Moses," says Lightfoot, "nothing was uncleanc to be touched while it was alive, but only man: a man in leprosy was uncleanc to be touched, and a woman in her separation; but dogs, swine, worms, etc., were not uncleanc to be touched till they were dead; and there were also different degrees herein; while touching a dead beast brought uncleancness for a day, touching a dead man produced the uncleancness of a week," etc. (Harm. of O. T. as above).

This gradation of defilement from contact with death is described—(a) In Lev. xi, 8, 11, 24, 26, 27, 31—36, 39, 40; xvii, 15. (b) In Lev. xxii, 4-8. (c) In Num. xix, 11, 14, 16. (d) In Num. vi, 9. In the first of these four sections, the uncleanness arises from the dead bodies of animals, fishes, birds, and reptiles. It was the shortest in duration, lasting in every case only "until even;" and it was to be terminated uniformly by the washing of the flesh. The last, prescribed ablation of the person also for "every soul that eateth which died of itself, or that which was torn with beasts." In the second section, the same defilement is described as incidental to the priests, no less than to the laity, from which they must free themselves by ablution. So much for the minor uncleannesses from the dead. Our third and fourth sections contain the instances where the major disability of seven days is occasioned by contact with human dead: "Whosoever toucheth one that is slain with a sword in the open fields, or a dead body, or a bone of a man, or a grave, shall be unclean seven days." As the defilement was deeper, so was the mode of purification more elaborate and solemn. For the details of the ceremony—the sacrifice of the red heifer without the camp; the sevenfold sprinkling of her blood before the tabernacle; the utter consumption by fire of the slain animal; the conclusion of the ceremony with the ceremonial "burning mass;" the gathering-up of the ashes; their mixture in running water for "the water of separation;" the sprinkling of this water over the unclean person, on the third and the last of the seven days; his own washing of his clothes and bathing of his person, and his final cleansing on the seventh day—see Lev. xi, 11, 13, 15, 18, 20, 24. We allude the 19th chapter of Numbers. Our fourth section describes the interruption of the Nazarine's vow by any sudden death happening in his presence. This mortalit"y "lost him" all the days of his vow which had transpired, and required for its filling expiation also the usual holocaust, the three and thirty days of waiting to shave his head, and on the morrow bring two young pigeons or two turtles to the priest, that he might present them as a sin-offering and a burnt-offering as atonement for the polluted. See PURIFICATION.

2. A few stray instances remain of a peculiar kind, which we proceed to take up as a supplementary notice. (1.) We have then under this head, first, the cases of what may be called official uncleanness. [a.] The priest who superintended the holocaust of the red heifer was rendered uncleanc until evening by the part he took in the sacred rite; from this defilement he purified himself by the washing of his clothes and the ablution of his person (Numb. xix, 7). This uncleanness was the more remarkable from the precautionary character of the law, which in other cases seemed strongly to aim at preserving the priests, as far as might be, from the incidence of ceremonial pollution (see Lev. xxx, 1-4). [b.] The man that burned the heifer was involved in the same defilement as the priest, from which he was also extricated by a similar purification (Numb, xix, 8). [c.] So again, the man who gathered the ashes of the consumed heifer was uncleanc until evening; but from this defilement he was released by being allowed simply to wash his clothes (ver. 10). Similar instances of uncleanness, arising out of official routine, occur in the ordinances of the Day of Atonement. [4.] The man who dismission the scape-goat was to wash his clothes and bathe himself before returning to the camp (Lev. xvi, 26); and like purification was required of him who burned the bullock and the goat of the sin-offering (ver. 28). [c'] Under this head of official uncleanness, we may perhaps place the abnormal case of the Israelish soldiers who slew the Midianites at the command of Moses (Numb. xxxi, 17). They were to remain defiled seven days, and cleave to their men's tents on the third and on the seventh day; cleanse their raiment, etc., with either fire or the water of separation, as the case might require, and on the last day wash their clothes (ver. 19, 20, 23, 24).

(2.) Besides these cases of official uncleanness, we find one instance occurring in the ordinary duties of the. "The last of the seven days, prescribed ablation of the person also for "every soul that eateth which died of itself, or that which was torn with beasts." In the second section, the same defilement is described as incidental to the priests, no less than to the laity, from which they must free themselves by ablution. So much for the minor uncleannesses from the dead. Our third and fourth sections contain the instances where the major disability of seven days is occasioned by contact with human dead: "Whosoever toucheth one that is slain with a sword in the open fields, or a dead body, or a bone of a man, or a grave, shall be unclean seven days." As the defilement was deeper, so was the mode of purification more elaborate and solemn. For the details of the ceremony—the sacrifice of the red heifer without the camp; the sevenfold sprinkling of her blood before the tabernacle; the utter consumption by fire of the slain animal; the conclusion of the ceremony with the ceremonial "burning mass;" the gathering-up of the ashes; their mixture in running water for "the water of separation;" the sprinkling of this water over the unclean person, on the third and the last of the seven days; his own washing of his clothes and bathing of his person, and his final cleansing on the seventh day—see Lev. xi, 11, 13, 15, 18, 20, 24. We allude the 19th chapter of Numbers. Our fourth section describes the interruption of the Nazarine's vow by any sudden death happening in his presence. This mortali"ty "lost him" all the days of his vow which had transpired, and required for its filling expiation also the usual holocaust, the three and thirty days of waiting to shave his head, and on the morrow bring two young pigeons or two turtles to the priest, that he might present them as a sin-offering and a burnt-offering as atonement for the polluted. See PURIFICATION.

3. Some few historical instances of uncleanness, and more of purification, are mentioned both in the Old Test. and the New Test. As being, however, applications only of some of the statutes which we have given above, we shall refrain from adding them here, except one case, which is important because it led to the enactment of a proviso in the latter, and, in the law, to the mention of the dead body of a man, that they could not keep the Passover on that day. They stated their difficulty to Moses and Aaron, the former of whom referred it to the Lord, and obtained from him a statute allowing a supplemental celebration of the Passover for such as were incapacitated in the manner in which it was usually celebrated on a distant journey (Numb. ix, 6-12). See PASSOVER.
In contrast with this relief was the inflexible penalty threatened against all wilful neglect of the various rites of purification prescribed in the law. The fullest formula of that penalty is found in the Pentateuch: "The man that shall be unclean and shall not purify himself, that soul shall be cut off from among the congregation [or, as it runs in ver. 13, 'from Israel'], because he hath defiled the sanctuary of the Lord." That this exclusion meant death is evident from Lev. xvi. 26, and xx. 9 (see Michaelis, Laws of Moses [Smith's transl.], iv. 45, and Kell on Gen. xxvii. 34). Jehovah, the theocratic king and Holy God, who had his own ways of "cutting off" the disobedient, is pleased to include in his sentence of exclusion the reason for its infliction—"because he hath defiled the sanctuary of the Lord." This is in direct accordance with the principle by which the Divine Legislator repeatedly spoke of his laws: "Ye shall be holy; for I the Lord your God am holy" (Lev. xix. 2, and frequently elsewhere), and it was the recognition of these saintly duties which always characterized the pious Israelite. "God" (says the psalmist, Psa. lxxxix. 7) "is greatly to be feared in the assembly of the saints in the heavens, which is likewise the word used in the formula of Leviticus; the phrase רָאָה יְהוָה also, which occurs in ver. 5 of this psalm, is the frequent designation of the political organization of the Israelites), and to be had in reverence of all them that are about him." The Mosaic ritual on uncleanness illustrates much of the phraseology of the Psalms and the prophets, and (what is more) many statements in the New Test, not only in obvious comparisons, as in the Epistle to the Hebrews, but in oblique phrases, such as in Eph. v. 26, 27, where the apostle, "speaking of Christ's washing the Church, that he might present it to himself 'without spot or wrinkle,' etc., seemed to allude to the Jews' exceeding great seriousness in their washings for purification" (Lightfoot, who quotes Maimonides in Midrash, III, 6, 927). In conclusion, we must refer to the notices of purification which occur in the New Test. These are of three kinds—(a) the legitimate instances, such as that of the Virgin Mary (Luke ii. 22), the leper (Mark i. 44), the Nazarite (Acts xxii. 25, 28), all of which make express reference to the law; (b) some unauthorised cases, such as the traditional and Pharisaical washings of the hands (Matt. xv. 2), and of tables, cups, and platters (Mark vii. 4), all which the Lord condemned in strong terms as superstitious encroachments on the divine law; (c) the doubtful cases, such as the case of the sons of Phelet (1 Kings xi. 20), which Kalkins placed before the Passover (John xi. 55), and the discussion mentioned in John iii. 25. "Their controversy," says Lightfoot, "was partly about the pre-eminance of the Judicial washings and the evangelical baptism—and here the Jews and John's disciples were at opposition, and partly about the pre-eminance of John's baptism and Christ's—and here the Jews would kiss him on in the contestation" (Works [ed. Pitman,], vi. 67). 4. Our object in this article has been to collect the scriptural laws on uncleanness and purification, we have presented the Jewish tradition that the talmudic laws of Purification may be discovered by the curious on such subjects by a careful use of the indexes to the works of Lightfoot, Schötgen (Hore Heb. et Talmud.,) and Surenhusius (Mishna). Dr. Wotton, in his work on the Mishna (i, 180-170), has analyzed the Seder Taharah, or Order of Purification, and contains the traditional and scriptural treatment of the subject of our article. "In this order," says Wotton, "more than in any of the rest, the true Pharisaical spirit which our blessed Lord so severely reprehends in Matt. xv. and Mark vii is plainly and fully seen." We subjoin the names of the chief "titles" or persons of this order: 1. Kalamos, treasurer; 2. Kobolos, treasurer—treating of pollutions from the dead; 3. Negaim, plagues—of leprosy; 4. Paraah, the red heifer; 5. Taha-roth, purifications—relating to lesser uncleannesses which last but a day; 6. Mkeath, collections of water for the cleansing baths, etc.; 7. Niddah, menstrual pollutions; 8. Tahara, for men that have seminal uncleannesses; 9. Tidhah Tom, washed law in above; and 11. Yadaim, hands—the constitutions in which title have no foundation in the written law. See Talmud. UNCLEANNESS. UNCTION (anointing), an ecclesiastical ceremony which consists in the application of sacred oil to a person or thing. In the Roman Catholic Church there are several of these ceremonies, which are described below. See ANOINTING. 1. Untication of an Altar.—This consists in anointing with holy oil the five crosses of an altar-slab by the bishop who consecrates it. The Latin formula is as follows: "Consecratur et sanctificatur hoc sepulchrum. In nomine Patris, et Filii, et Spiritus Sancti. Pax huic domui." This rite has been abolished in the Church of England since the Reformation. See CHURCH. 2. Untication of the Baptist.—Some, but not all, of the ancient ritualists mention an uniction preceding baptism, and used by way of preparation for it. It was called κατακορονσία λατρίων, the "unction of the mystical oil." It was consecrated by the bishop, with the prayer that "God would sanctify the oil in the name of the Lord Jesus, and grant it spiritual grace and efficacious power, that it might be subservient to the remission of sins, and the preparation of men to make their profession in baptism, that such as are baptized therewith to be saved freely, without all impurity, might become worthy of the initiation according to the command of our only begotten Son." Men were thus anointed that they might be partakers of the true olive-tree, Jesus Christ; and the exercised oil was a symbol of their partaking of the fatness of Christ, and an indication of the flight and destruction of the adverse power. See Brigham, Chist. Antiq. bk. xi, ch. ix, § 2, 3. See BAPTISM. 3. Untication of the Confirmed.—This is anointing with holy oil those confirmed. In the Roman Church the formula runs thus: "Signo te signo crucis et confirmo te chrismus romanus." In the Protestant Church, Filii, et Spiritus Sancti. Amen." In the Church of England this rite was abolished at the Reformation, and in the Scottish Episcopal Church, as well as in the Protestant Episcopal Church of the United States, no unction is now used. See CONFESSION. 4. Untication of a Priest.—This is anointing with holy oil a person promoted to the priesthood. This rite is peculiarly Latin. When using the holy oil, the bishop who ordains prays thus: "Consecrate et sanctificare digineris, Domine, manus hias per istam unictionem et nostram beneficitionem. Amen. Ut quæcumque bene- dictionis, sanctificationis, consecrationis, secretum, et sanctificatur, in nomine Domini nostri Jesu Christi. Amen." There is no such consecration in the
UNION, EXTREME

Greek form for bestowing the priesthood. See CONSECRATION.

5. Union of the Sick. See EXTREME UNCTION.

UNION. EXTREME. See EXTREME UNCTION.

UNION IN PREACHING is that gracious assistance or supply of theological truth which quickens and illumes, gives a glow to the feelings, and imparts such a spiritual tone to the preaching of the Word as renders it efficacious in making the truth convincing and authoritative. See SPIRIT (HOLY), BAPTISM OF.

Undergird (υπόγραμμων, lit. to gird under the breast, 2 Mac. iii. 19; comp. ιλαριῶν, V. H. s. 22), a nautical expression (Acts xx. 38) for the adroit act of passing cables around the middle of a ship in order to strengthen it (so Polybius, xxvii. 3, 8; Appian, Bell. civ. c. 91; Plato, Rep. p. 616). See SHIP.

Underhill, James Evan, an English Wesleyan missionary, was a native of Staffordshire. He was appointed to Jamaica, W. I., by the Conference of 1817. His diligence in study and knowledge of Methodist doctrine and discipline qualified him to give instruction and manage wisely the affairs of his charges. He died of fever at Morant Bay, Jamaica, Sept. 24, 1821, in the twenty-seventh year of his age. He was much beloved by his people. See Minutes of Wesleyan Conference, 1822.

Undersetter (καρθήν, a shoulder, as usually rendered), an appendage to the laver (q. v.) in the Temple of Solomon (1 Kings vii. 80, 81), consisting, according to Keil (Comment. ad loc.) of props running up from the body of the vehicle and holding the basin between them.

Underwood, Alvan, a Congregational minister, was born at West Woodstock, Conn., Sept. 8, 1777. He graduated at Brown University in 1798, studied theology with Rev. Dr. Sanger, and was ordained pastor in his native place in 1801, dismissed in 1803, and thereafter supplied for nearly ten years various churches, particularly those in Westford and South Killingly, and finally, for a year or more, his former charge in Woodstock, where he died, April 4, 1838. He published a few sermons and tracts. See Cong. Quarterly, 1861, p. 355.

Underwood, Henry Beman, a Congregational minister, son of Rev. Almon Underwood, was born at Poughkeepsie, N. Y., Dec. 25, 1839. He studied at Monson Academy, Mass., graduated from Williams College in 1862, and from Andover Theological Seminary in 1865, after having spent two years in the Union Theological Seminary, New York. He was pastor of the First Congregational Church, Ill., Jan. 19, 1866, and was acting pastor there until the following year, when he began preaching at East Longmeadow, Mass., remaining two years. His next field of labor was Marlborough, N. H.; then Baxter Springs, Kan. In 1871 he was installed pastor of the church at Hillborough Bridge, N. H., in which position he remained for one year and four months. The last charge which he held was at Algonia, Ia., where he became acting pastor in 1878, and died Sept. 2, 1875. See Cong. Quarterly, 1876, p. 436.

Underwood, Joseph, a Congregational minister, was born at Bradford, Vt., Oct. 2, 1756. He acquired his preliminary education at Kimball Union Academy from 1817 to 1820, and at Chesterfield Academy in 1821, and graduated from Bangor Theological Seminary in 1824. His ordination occurred at New Sharon, Me., and he was pastor there from 1826 to 1831. During 1827-30 he was also serving as acting pastor at East Otis, Mass., at the First Church, North Augusta from 1828 to 1833. He was installed pastor at Williamsburg, Me., in 1833, and remained there two years, during which time he was also acting pastor at Sebec. The two following years he served as a home missionary in Foxcroft, Dover, Atkinson, Milo, and Cambridge. In 1834 he moved to Bangor and served the First Church, North Augusta from Feb. 22, 1837, remaining there two and a half years. At Millport and Veteran, N. Y., he was installed pastor in 1841, and was dismissed in 1843. As acting pastor, he preached at Hardwick, Vt., for two years, and then, in December, 1846, he was installed there, continuing in charge until 1857, 1858. During the following year he was acting pastor at Burke, Vt.; from 1860 to 1866 at Barnet; and from 1870 to 1872 he again served the church at Burke. After the last date he resided, without charge, at Hardwick, of which town he was a representative in the Vermont Legislature in 1866, 1868, and 1870. He died July 5, 1876. See Cong. Quarterly, 1877, p. 426.

Undine (from unda, "wave"), in mediæval superstition is a water-sprite, corresponding nearly to the nymphs of classical mythology. Paracelsus has given several minute rules what to do and how to act when one has happened to marry an Undine, and Friedrich de la Motte Fouqué has treated the subject in a German tale entitled Undine.

Ungar- Several of the water-gods of the ancient Accadian mythology have names beginning with Un- gar, as Ungal-aba, "the king of the wave;" Ungal-abbab, "the king of the sea;" Ungal-a-riada, "the king of the river." See Lenormant, Chald. Magic, p. 184.

Unghans, John. See John, PRESTER.

Unger, Salomon Gottlob, a Protestant divine of Germany, was born April 25, 1752, at Nieder-Pollnitz, near Weida, and died June 16, 1818, at Colléda, in Thueringia. He wrote Anmerkungen auf ein Buch von der Weisung Davids und der Stärke ihres Be- weises für die Gottlichkeit und Messianität Jesu (Leips., 1784);—De Auctoritate Librarium V. T. in Familia Dei (ibid. 1785);—Die Schriften des alten Bundes, etc. (ibid. 1787);—De Servante Salomonio, Jos. zi, ex, et xiii, 6, Memoriae Posthuma (ibid. 1808);—Lutheri Auctoritatem Librarium Mosia opud Christianos Vindebro (ibid.). See Fürst, Bibl. Jud. iii, 461; Winer, Handb. der theolog. Literatur, i, 829, ii, 811. (B. P.)

Unngwetter, Reinhardt Christoph, a Protestant theologian of Germany, was born at Marburg, Jan. 25, 1715. He studied in his native place, and when twenty-one years old he publicly defended his dissertation De Studio Prophektico sobre Imbundendo. After completing his studies, he went to Cassel in 1736, and until the year 1778 he was actively engaged in pastoral duties. While on a visitation in his function as superintendent and member of consistory, he was paralyzed, and was thus deprived of the power of preaching, but being unable to preach, yet he performed the duties connected with his ecclesiastical position, and died Dec. 31, 1784. He published, Erklärung des Briefes des heiligen Jakoba (Lemgo, 1754);—Commentatio de Theoile Tempori Serva- niae (Hersfeld, 1755);—Versuch einer freien Übersetz etzung der beiden Briefe Petr und der drei Briefe Joha- nns (Frankfort, 1757);—Predigten über wichtige Glaubenswahrheiten und Lebenspflichten (Cassell, 1780-81, 2 vols.). See Döring, Gelehrte Theologen Deutschlands, iv, 551 sq. (B. P.)

Unhallowed Uses. In the consecration of a church or chapel among the Episcopalians, the building is said to be consecrated to the honor of the sacrament, the ordinary, and common uses." The word "unhallowed," as here used, does not mean simply such things as are morally evil, impure, and contrary to the spirit of religion, which is the popular sense, but strictly all such purposes as are not hallowed, merely sacred, and consecrated to holy purposes. See Stanton, Dict. of the Church, s. v.

Uniates are Eastern Christians in external communion with the see of Rome, and are most numerous in those provinces which formerly belonged to Poland. When Sigismund III was elected to the crown of Poland, being a zealous agent of the Jesuits, he at once took measures for reconciling the Polish Church to Rome. His plans were so successful that the archbishop of Kiel summoned a synod at Brest, in Lithuania, to
UNICORN 638 UNICORN

whom he presented the necessity and advantages of a union with Rome. The clergy favored the project, but it met the strong opposition from laity, and could not then be carried into effect. At a synod which met at the same place Dec. 2, 1594, the archbishop and several bishops gave their assent to the scheme of union which had been proposed at the Council of Florence, thus recognizing the Filioque, or double procession of the Son and the Holy Ghost, and acknowledging the supremacy of the pope. They stood out, however, for retaining the use of the vernacular Slavonic in the celebration of divine service for the ritual and discipline of the Eastern Church. On the return of the bishops sent to Rome to announce this event, the king, in 1596, convened the synod at Trent for the publication and introduction of the union. This was met by a public protest on the part of the opposite party, which repudiated the acts of the Uniates, and declared their unalterable attachment to the ancient Church of their country and to the patriarchate of Constantinople. Sigismund deprived them of their churches and convents, and forbade the propugnatio of Greek doctrines in his dominions. This division of the Church continued in full force until the partition of Poland, in 1772, at which time between two and three millions of the Uniates gave up their allegiance to Rome and returned to the Eastern Church. In 1839 2,000,000 more were received back, but there are still about 300,000 in Russia and 3,000,000 in Austria. See Krasinski, Reform in Poland; Mouravief, Hist. of the Church of Russia; Neale, Patriarchate of Alexandria.

Unicorn is the invariable but unfortunate rendering in the A. V. of a Heb. word which occurs nine times in three slightly varied forms (צָּבָן), re'em, Numb. xxiii., 22; xxviii., 8; plural (צַהֲבֵנִים), re'emim) Psa. xxix., 6; Isa. xxxiv., 7; (צָּבָּנִים), re'emim, Psa. xlii., 10; (צָּבָּן), re'em, Job xxxix., 9, 10; and (צָּבָן), re'em (only with plural (צַהֲבֵנִים), re'emim, Psa. xxii., 11; never with the article; Sept. pe- 

1. Scriptural Characteristics. The great strength of the re'em is mentioned in Numb. xxiii., 22; Job xxxix., 11; his having two horns in Deut. xxxii., 17; his fierce nature in Psa. xxii., 21; his indomitable disposition in Job xxxix., 9-11; the active and playful habits of the young animal are alluded to in Psa. xcviii., 6; while in Isa. xxxv., 6, 7, where Jehovah is said to be preparing "a sacrifice in Bozrah," it is added, "Re'emim shall come down, and the bullocks with the bulls." The following is a close rendering of Job's famous description of this animal (xxix., 9-12):

"Will Re'em be disposed to serve thee? How wouldst thou lodge on thy bed? Canst thou tie Re'em in a farrow (with) his brad? Will he perchance harrow valleys after thee? Will thou trust in him, because vast [is] his force; Or leave to him thy labor? Will thou believe in him, that he will return (home) thy seed, or (tuto) thy threshing-plot gather [it]?

II. Modern Attempts at Identification. The re'em of the Hebrew Bible has little to do with the one-horned animal mentioned by Ctesias (Indica, iv, 25-27), Kela (Nat. Anim. xvi, 20), Aristote (Hist. Anim. ii, 2, 8), Pliny (Hist. Nat. iv, 81), or the one described by Greek and Roman writers (Solini: 55; Nicola. H. E. ix, 19), as is evident from Deut. xxxii., 17, where, in the blessing of Joseph, it is said, "His glory is like the firstling of his bullock, and his horns are like the horns of a re'em (צָּבָן), not, as the text of the A. V. renders it, "the horns of unicorns." The two horns of the re'em are "the ten thousands of Ephraim and the thousands of Manasseh"—the two tribes which comprised the greatest part of Joseph, as two horns from one head. This text puts a one- horned animal entirely out of the question, and in consequence, disposes of the opinion held by Bruce (Trav. v, 69) and others, that some species of rhinoceros is denoted, or that maintained by some writers that the re'em is identical with some one-horned animal said to have been seen by travelers in South Africa and in Thibet (see Barrow, Travels in South Africa, i, 312-318; Aes- 

otic Journal, xi, 164), and identical with the veritable unicorn of Greek and Latin writers.

Little, however, can be urged in favor of the rhinoceros, for, even allowing that the two-horned species of Abyssinia (B. bicornis) may have been an inhabitant of the woody districts near the Jordan in Biblical times, this pachyderm must be out of the question, as one would have been forbidden to be sacrificed by the law of Moses; whereas the re'em is mentioned by Isaiah as coming down and leading the bullocks and rambling steers. One horned animal. "Omnia animalia," says Rosenmüller (Schol. in Is. loc. cit.), "ad sacrificia idonea in unum congregatur." Again, the skipping of the young re'em (Psa. xxix., 6) is scarcely compatible with the habits of a rhinoceros. Moreover, this animal, when un molested, is not great or strong in respect of much strength but it is conceivable that it ever existed so plentifully in the Bible lands, or even would have allowed itself to be sufficiently often seen so as to be the subject of frequent attention, the rhinoceros being an animal of retired habits.

2. Bochart (Hieros., ii, 355) contends that the Hebrew re'em is identical with the Arabic rım, which is usually referred to the Oryx leucoryx, the white antelope of North Africa, and at one time, perhaps, an inhabitant of Palestine. Bochart has been followed by Rosenmüller, Winer, and others.

But with regard to the claims of the Oryx leucoryx, it must be observed that this antelope, like the rest of the family, is harmless unless wounded or hard pressed by the hunter; nor is it remarkable for the possession of any extraordinary strength. Figures of the oryx frequently occur on the Egyptian sculptures, "being among the most frequently tattooed by the Egyptians, and in great numbers in their preserves" (Wilkinson, Anc. Egypt., i, 227, ed. 1854). Certainly this antelope can never be the fierce indomitable re'em mentioned in the book of Job (see Lichthein, Ueb. d. Antikon des nord. Afrikas, 1829). See Antelope.

3. Anthera Bicornis (A. N. M. S. Afr., iii, 8 [London, 1644]), with much better reason, conjectures that some species of Ursus, or wild-oX, is the re'em of the Hebrew Scriptures. He has been followed by Schultens (Comment. in Jobus xxxi., 9, who translates the term by Bos sylvest - trius: this learned writer has a long and most valuable note on this question), Parkhurst (Heb. Lex. a. v. Dan.), Maurer (Comment. Job, loc. cit.), Dr. J. H. Voelkers (Sud. Hist. of the Bible), and by Cary (Notes on Job, loc. cit.).

Considering that the re'em is spoken of as a two-horned animal of great strength and ferocity, that it was evidently well known and often seen by the Jews, that it is mentioned as an animal fit for sacrificial purposes, and that it is frequently associated with bulls and oxen, we think there can be no doubt that some species of wild-ox is intended. The allusion in Psa. xci., 10, "But thou shalt lift up, as a re'em, my horn," seems to point to the mode in which the Bovidae use their horns, lowering the head and then tossing it up. But it is impossible to determine what particular species of wild-ox is signified. At present there are numerous examples of any wild bovine animal found in Palestine; but negative evidence in this respect must not be interpreted as affording testimony against the supposition that wild
cattle formerly existed in the Bible lands. The lion, for instance, was once not unfrequently met with in Palestine, as is evident from Biblical allusions; but no traces of living specimens now exist there. Dr. Roth found lions' bones in a gravel bed of the Jordan some few years ago; and it is not improbable that some future explorer may succeed in discovering bones and skulls of some huge extinct Ursus, allied, perhaps, to that gigantic ox of the Hercynian forests which Caesar (Bell. Gall. vi. 20) describes as being of a stature scarcely below that of an elephant, and so fierce as to spare neither man nor beast should it meet with either. "Notwithstanding assertions to the contrary," says Col. Hamilton Smith (Kittto, Cyclop. art. "Reem"), "the ox and the bison were spread anciently from the Rhine to China, and existed in Thrace and Asia Minor; while they, or allied species, are still found in Siberia and the forests both of Northern and Southern Persia. Finally, though the buffalo was not found anciently farther west than Araroria, the gigantic Gaur (Bisus gaurus) and several congeneres are spread over all the mountain wildernesses of India and the Sherff Alwady; but a further colossal species roams with other wild bulls in the valleys of the Atlas. We figure Bisus caufrons, a species which is believed to be still found south-west of the Indus, and is not remote from that of the Atlas valleys." See WILD BULL.

Wild Bull (Bisus caufrons).

4. Russell (Alleppe, ii, 7), Robinson (Bibl. Rev. ii, 412), and Gesenius (Theoenar. s. v.) have little doubt that the buffalo (Bulbusa buffanis) is the r*em* of the Bible; and this opinion is shared by Dr. Ritson, Hengstenberg, and other commentators. Although the Chainsa, or tame buffalo, was not introduced into Western Asia until the Arabian conquest of Persia, it is possible that some wild species (Bulbusa arme, or B. brachyceros) may have existed formerly in Palestine. See BUFFALO.

III. The Unicorn Proper.—1. Legendary Notices.—Throughout classical antiquity (as seen above) vague notions of a true unicorn prevailed. In the Stsos dpuos of Ctesias, which were larger than horses—white, with a horn on the forehead a cubit long, which were very swift and strong, not ferocious unless attacked, and then irresistible, so that they could not be taken alive—we can trace the original of the familiar form that figures in the English national heraldic shield. Aristotle and Herodotus follow Ctesias, and Strabo gives the unicorn a deer-like head. Oppian makes it a bull with undivided hoofs and a frontal horn; and Caesar, who puts it in the Hercynian forest, gives its single horn palmate branches like those of a deer. Pliny draws the portrait with the greatest attention to details. It was a most savage beast, generally like a horse, with the head of a deer, the feet of an elephant, the tail of a boar, a deep bowing voice, and a single black horn, two cubits long, projecting from the middle of its forehead. See the Ann. and Mag. of Nat. Hist. Nov. 1862.

Although the medallistic history of the kings of Macedon (Havercampius, Gen. Hist., [in the Dutch language]) furnishes no coins bearing a single-horned goat, it is still asserted by Maillot and others that such was to be found among their emblems; but this was most probably after the Macedonian conquest; for a single-horned ibex appears on the bas-reliefs of Che el-Minar; another occurs on a cylinder; and one cast in brass, supposed to have been the head of a Macedonian standard, was found in Asia Minor, and presented to the Antiquarian Society of London. If mysterious names were readable by the canons of pictorial definition, the practice of imagining horns to be affixed to the most sublime and sacred objects would be most evident from the radical meaning of the word cherub, where the notion of horns is everywhere blended with that of "power and greatness." See ChUAMANus. There were also horns at the corners of altars—the beast with ten horns in Daniel, etc. (ch. vii). In profane history we have the goat-head ornament on the helmet of the kings of Persia, according to Ammianus, more probably Ammon horns: such Alexander the Great had assumed; and his successors in Egypt and in Persia continued a custom even now observed by the chief cabassiers of Ashantee, who have a similar ram-head of solid gold on the front of their plumpy war-caps. Indeed, from early antiquity Greek and Ionian helmets were often adorned with two horns; among others, the head of Seleucus I (Nicator) appears thus on his coins. The practice extended to metal horns being affixed to the masks or chaffrons of war-horses (so coins of Seleucus Nicator) and of elephants (Antiochus Soter); and they form still, or did lately, a part of the barbed horse-armour in Rajasthan. Triple-horned and becrowned helmets are found on early Gallic and Iberian coins; they were again in use during the chivalrous ages; but the most remarkable, the horn of strength and dominion, is seen elevated on the front of the helmet impressed on the reverse of the coins of the tyrant Tryphon, who, in his endeavors to obtain Syria, was at war with Antiochus Sidetes during the era of the Maccabees, and was not likely to omit any attribute that once belonged to its ancient kings. See HORN.

2. Scientific Descriptions.—In later times the fancy ran riot in describing and figuring the unicorn, and no one who attempted a Historia Naturalis thought his work complete without full particulars concerning this interesting beast. As some of the descriptions of the ancients were a little inconsistent with each other, and as the materials were too valuable to allow any to be sacrificed, different species of unicorn were established, in the copiousness of which the most fastidious student might satisfy his choice. Thus there were the wald-esel, the meer-wolf, the ox-hoofed unicorn, the camel-hoofed unicorn, the sea-unicorn (not the cetacean so-named), the two-horned wald-esel (one horn behind the other), and several others, all of which are duly

Unicorn (Rhinoeceros stunt).
Admitting that there is abundance of chaff in all newborn human society, which has been inclining the indefatigable Johnston (Hist. Nat. 1657). Amending that there be some little wheat also (see Meyer, Ueb. d. Stügthier Reem [Leips. 1796]), the rhinoceroses of India and Africa showed that a single central horn was not in itself unnatural; and the discovery of several species of this huge pachyderm in the southern parts of the latter continent has brought out some features of the old descriptions which had been assumed to be fabulous. Some years since the missionary Campbell excited much interest by sending home from South Africa the head of a rhinoceros which came much nearer that of the traditional unicorn than anything known to naturalists. It bore a single straight slender horn, projecting from the face to the height of three feet, with a small tubercle-shaped horn immediately behind this. The zoological researches of Dr. Andrew Smith, and the exploits of not a few naturalist sportsmen in the wild-beast regions lying to the north of the Cape Colony, have made us familiar with this species (Rhinoceros simus), as well as others with a similar arrangement of horns.

Unicillus, a Low-Latin term for an alms-box with a perforated cover.

Uniformity. The ecclesiastical use of this word is to denote the use of one and the same form of public prayers, administration of sacraments, and other rites, etc., prescribed by the Acts of Uniformity. The first of these was issued by Parliament during the reign of Elizabeth, and provided—for the first offence, forfeiture of one year’s profits and six months’ imprisonment; for the second offence, deprivation of all spiritual promotions and imprisonment for one year; and for the third offence, deprivation of all spiritual promotions and imprisonment for life (see stat. 1 Eliz. c. 2, § 4–8). According to the act passed in the reign of Charles II, 1662, every person obtaining preferment in the Church or universities must declare his assent to everything contained in the Book of Common Prayer. See CONFORMITY.

Unigenitus (so called from its first word, referring to the only-begotten Son), THE BULL, was an instrument which was issued by pope Clement XI, and made its appearance on Sept. 8, 1718. It was directed against the French translation of the New Testament, with notes, published by Quesnel, a celebrated Jansenist. In consequence of the disputes which this book had occasioned, it had previously been condemned in 1708; but, this step being found ineffectual, Clement proceeded to condemn one hundred and one propositions contained in the notes. The following may be taken as a specimen of the opinions denounced by this bull: “No graces are given except through faith.” The reading of the Sacred Scriptures is for all.” “The obscurity of the Sacred Word is no reason for laymen to dispense themselves from reading it.” “The Lord’s day ought to be sanctified for the works of piety, and, above all, for the reading of the sacred Scripture. It is damnable to wish to withdraw a Christian from this reading.” This bull, procured by Louis XIV and the Jesuits, produced great commotions in France. Forty Gallican bishops accepted it; but it was opposed by many other prelates, bishops, and parishes. Sixteen bishops suspended the bull in their dioceses. They were supported by the universities of Paris, Rheims, and Nantes, and by the Paris faculties of theology, law, and arts. Many of the prelates and other persons appealed in vain to a general council, and were for this reason suspended by the pope (May 12). Of the thousands who were raised against those who adopted the principles of the Jansenist Quesnel, and many of them were obliged to flee

Union with Christ, that act of divine grace by which we are joined to Christ; and is considered, 1. As virtual, or that which was from all eternity (Eph. i. 4); 2. If only, or spiritual, formed in the moment of our reception of the Holy Ghost. It is represented in the Scripture by the strongest expressions of divine language can admit of, and even compared to the union between the Father and the Son (John xvii, 21, etc.). It is also compared to the union of a vine and its branches (xxv. 4, 5); to the union of our food with our bodies (v. 56, 57); to the union of the body with the head (Eph. iv. 15, 16); to the conjugal union (v. 23, 30); to the union of a king and his subjects (Matt. xxv. 34, 40); to a building (I Pet. ii. 4, 5; Eph. ii. 21, 22). It is also represented by an identity or sameness of spirit (I Cor. vii. 17); by an identity of body (xii. 12); by an identity of interest (Matt. xxv. 40; John xx. 17). This union must be considered, not as a mere mental union only in comfort or notion; nor a physical union, as between the head and the members; nor as an essential union, or union with the divine nature; but as a mystical union pernarial (I Cor. i. 30), holy (I John iii. 24); necessary (John xv. 4); inviolable (Rom. viii. 38, 39). Some state it thus: 1. A union of natures (Heb. ii. 11); 2. Of actions, Christ’s obedience being imputed to us, and our sins reckoned to him (2 Cor. v. 21); 3. Of Office (Col. iii. 4); 4. Of sentiments towards things spiritual (Matt. xii. 34, etc.); 6. Of affection (2 Cor. v. 14); 7. Of residence (John xvii. 24). The advantages of it are knowledge (Eph. i. 18), fellowship (I Cor. i. 9), security (John xv)
UNION OF CHURCHES

felicity (1 Pet. i, 8), spirituality (John xv, 8); and, in
deed, all the rich communications of spiritual blessings
here and hereafter (Col. i, 22). The reunions of union
with Christ are: light in the understanding (1 Pet. ii, 9);
affection to him (John xiv, 21); frequent communion
with him (1 John ii, 3); the presence of the Holy Spirit;
and people (Psa. xxvii, 4; cxix); submission to his will,
and conformity to his image (1 John ii, 5). See
Dickinson, Letters, let. 17; Flavel, Method of Grace, ser.
2; Pothill, On Union; Brown, Compend, V, I.

UNION OF CHURCHES, in English law, is the com-
bining and consolidating of two churches into one. It is
said generally to be known, that in England, the
Church is rector of both, and where a conventional
Church is made a cathedral. In the first case, if two
churches were so mean that the tithes could not afford
a competent provision for each incumbent, the ordinary,
patron, and incumbents might unite them at common
law before any statute was made for that purpose; and
in such case it was agreed which patron should present
first; for though, by the union, the incumbency of one
Church was lost, yet the patronage remained, and each
patron might have a quarre impedit, upon a disturbance,
to present in his turn. The license of the king is
not necessary to a union, as is the approbation of
ad veneros; because an approbation is a mortal
and the patronage of the advowson is lost, and, by con-
sequence, all first-fruits and tithes; whereas in a union
these consequences do not follow. The three statutes
in existence relating to unions of churches are the 87
Henry VIII, c. 21; the 17 Charles II, c. 5; and the 4 and
5 William and Mary, c. 12.

UNION, CONGREGATIONAL. Conder says of such
unions, “The recent formation of the Congregational
and Baptist unions has given rise to the notion that
there exists among the Nonconformists of the present
day a disposition to abandon the principles of strict
Independence, and to adopt a new species of machinery
or organization more nearly approaching to Presbyty-
arianism. For this idea there is no foundation. These
unions differ in no other respect than in their more ex-
tended or comprehensive character from the county
unions and associations of churches which have always
existed in both denominations for similar objects. They
have no relation to a scheme of Church government;
their object is not to set up a Church or to create a
jurisdiction, but simply to facilitate a general co-opera-
tion for common and public objects of a religious na-
ture.” See INDEPENDENT.

UNION, HYPOTETICAL, is a theological term de-
vised by the old divines to express the union of the
human nature of Christ with the divine in one person.
It must be observed that this union is not consubstan-
tial, as of the three persons in one Godhead; nor physi-
cal, as soul and body united in one person; nor mysti-
cal, as between Christ and believers; but so that the
manhood subsists in the second person, yet without mak-
ing confusion, both forming but one person. See AH-
ANISM; HYPOTETICAL UNION; PERSON OF CHRI-
Si;

SABELLIAN.

Unitarianism, belief in the unity of God. In a
comprehensive sense it includes, with a part of Chris-
tendom, Jews, Mohammedans, Deists, and all who
worship not necessary to the Father, and who make the
above-mentioned term Monothelism. Within the ranks of Christendom the name Unitarian is given to those who reject the
dogma of the Trinity in its varying phases of a three-
fold or triperipheral Deity, whether three in substance or
only in person. Of this class are, and who make the essen-
tial unity of God as Creator and Father, and the created
nature and subordinate rank of Jesus Christ. Within
this range opinions about Jesus vary from those that
assign him a pre-existent and superangelic rank to an
estimate purely human. While the name strictly touches
this doctrine only, it is closely related and gives charac-
ter to the whole system of belief concerning human na-
ure and need, human life and its purpose, this world and
its meaning, and the future world and man’s destiny.

I. History of the Belief.—In the Early Church.—
Unitarianism has accompanied Christianity from the
beginning, as least as one form of its faith. Unitarians
maintain that the faith inherent in the Hebrew people
was taught by Jesus Christ and his apostles. They appeal
to Jesus as the supreme teacher of Christianity, finding
in his word and character the essence of the Gospel.
They state their chief tenets in the language of the
New Testament or on common principles: “There is
but one God, the Father;” “This is life eternal to
know thee, the only true God, and Jesus Christ whom
thou hast sent.” They hold that the doctrine of the Trinity,
so startling to Jews trained in the worship of one God
and expecting a Messiah of human lineage, would have
required a statement more explicit than any found in
the Bible record. They hold that the doctrine, at best,
is an inference from texts of obscure meaning or doubt-
ful genuineness, every one of which is separately aban-
doned by prominent Trinitarian scholars as not expres-
sively teaching the doctrine; while the Roman Catholic
holds it as an article of faith of the Church, deeming it not
clearly taught in the Bible.

Unitarians consider the doctrine of the Trinity a
gradual development, as Gentiles came into the Church
and subjected the Gospel to the influence of Oriental
speculations and Greek philosophy. The followers of
Zoroaster, teaching that the creator God of the Old
Testament possessed spirit of fire and matter, filled the
time with speculations concerning God as a superior essence creating the world
by inferior divinities. In the Platonic doctrine of the
Logos the gradual delification of Jesus, consum-
matized only by votes of successive councils of the 4th
century. A succession of testimonies meanwhile show
the continued existence of faith in the undivided unity
of God. In the latter half of the 2d century, Justin
Martyr says, “Some there are among ourselves who ad-
mit that Jesus is Christ, while holding him to be man
of men.” Still later, Tertullian says, “Common people
think of Christ, as a man.” About the year 200 Tertul-
lian was himself the first to introduce into Christian
theology the word "Trinitas", The unity of God was
expressly taught by a sect called the "Monarchians.
Some held that God the Father himself was born and
suffered in human form, and hence were called "Patri-
passiani." Others, like Irenaeus, Tertullian, and Prax
des, who came from Asia Minor to Rome; Noetus, of Smyrna; and, still later, Sabellius, a proby-
ter in the Church about A.D. 250, the most original
and profound mind among the Monarchians. The
teachings of Sabellius are variously represented by
friend and foe alike, and not now very accurately to be
known. He had followers as late as the 5th century in
Mesopotamia and in Rome. Others held that Christ
was in nature purely human, but exalted by his supe-
rior measure of divine wisdom and inspiration. Of
these were Theodotus of Byzantium, Artemon of
Rome, and Paul of Samosata. This noted teacher, bishop of
Antioch from the year 260, makes prominent the human
personality of Christ, teaching that “Christ was a man,”
“exalted to peculiar union with the divine nature by
the illumination of divine wisdom.” Deposed in 263,
his name became a synonym for heresy; and in the
next century the celebrated historian Eusebius confirms
the testimony that he taught “that Christ was in na-
ture but a common man.” Speculation and controversy
thus went forward until, in the beginning of the 4th
century, the relation of God and Christ had become a ques-
tion of supreme importance. In the famous theo-
logical struggle over the terms, whether God and Christ were of the same or only similar
nature, Arius maintained that Jesus was a created being.
He was opposed by the bishop Alexander, aided by Athi-
anasius: and the controversy waxed hot and opinion
was divided, until Constantine, recently come to the throne
as the first Christian emperor, summoned in A.D. 325 the

X.—S s
UNITARianism

Council of Nice, in which the angry storm of the three hundred theologians was quelled and Arius and his doctrines were condemned. The Emperor, in nineteen years, succeeded in forming a Council, which was the first in which the original idea of the Deity of Christ was three or four centuries gradually forming; that during this period the range of opinions concerning Jesus was as widely varied as at the present time; that two or three hundred years after the death of Christ it was still doubtful, and settled only by the majority of a council, which was then believed to be true by the Emperor. The Church of Nice, as a council, was a most important event. It is the symbol of a newly converted emperor, whether the Chris-
tian Church should regard Jesus as a person in the God-
head, or, as the apostle Peter declared him, a man ap-
proved by signs and wonders which God did by him. The Unitarian deems the whole question a corruption of the pure Gospel by philosophic speculation, and seeks, as the essence of Christianity, the practical religion taught by Jesus Christ—of love to God and man.

It may be added as a fact of interest, and one signifi-
cant of the aid rendered to Christianity by this branch of the Church, that one of the chief lights ofarianism, the Godhead of Jesus, was born near the Lower Danube at the time of the Council of Nice, and consecrated bishop at the age of thirty, devoting himself to the religious and social development of his people, familiar with the Latin, Greek, and Gothic languages, rendered his name familiar to be honored by the translation of the Bible into his native tongue, which at once helped to give lasting form to the Gothic language and to perpetuate Christianity among the Gothic people. For four cen-
turies the Goths were accompanied in their migrations by this sacred national work, portions of which still re-
main in the University was secured. Through the influ-
ence of the Nestorians, also, who may fairly be counted on the Arian side, at about the 7th century, were the first to carry Christianity to the far East, into Persia and China.

2. The Reformation reveals Unitarianism existing, and awakens it to renewed life. It accompanied Prot-
estianism from its cradle, as it had accompanied primiti-
ve Christianity. Before Luther's death it had ap-
peared in Italy, Hungary, Poland, Switzerland, Ger-
many, and England. In the contest with the pope and his hierarchy, the majority of Protestants, absorbed in the struggle for freedom, accepted, unchallenged, as their hereditary belief, the substance of doctrine of the Roman Church. Yet in every Protestant confession the dogma of the Trinity is reiterated as if on the defensive; while the testimonies of Calvin, Melancthon, and oth-
ers against the Unitarian heresy reveal its strength. Among the many who, before and after the Reforma-
tion, bore witness to their faith in persecution and death, Unitarianism has its own list of confessors and martyrs. In bishop Mant's History of Ireland is a brief account of Adam Duff, who for his denial of the Trinity was burned alive, near Dublin, in 1528. The early theolog-
ical repositories make record of a priest, William Taylor, put to death as an Arian, in England, in 1422.

Conspicuous among the Reformers were the Unitari-
ans Servetus and the Socini. Michael Servetus, born in Villanueva, Aragon, in 1569, the year of Calvin's birth, while studying law at Toulouse, heard of the con-
test between opposing parties. He was a close student of the Reformers (Calvinistic), at Basle, Bucer and Capito, at Strasburg, and Calvin, at Paris. His bold genius pushed past them in seeking a rejuvenated Christiani-

ty. Skilled in mathematics and the Oriental languages, in law, medicine, and theology, his fearless spirit of in-
quiry and his love of justice accounted for the devotion of his life to his religious speculations. "Your trinity," he de-
clares, "is a product of subtlety and madness. The Gosp-
el knows nothing of it. The old fathers are strangers to these vain distinctions. It is from the school of Greek sophists that you, Athanasian, prince of triche-
ists, have borrowed it." Such sentiments provoked bitter hostility. Zwingli denounced him as "that wicked and cursed Spaniard;" Calvin spoke of him as the "fanat-
ic" Servetus, who "has thrown all things into confu-
sion." When Servetus published his Seven Books on the Errors of the Trinity, and his more noted work on the Relatives of the Deity, the Reformed Church of Ger-

velin's view, his doom was sealed. On his flight from persecutors at Vienne, as he stopped at Geneva, Calvin caused his arrest and trial. The flames of Protestant persecution dismissed into eternity, through frightful agony, this brave soul that dared assert the absolute unity of God. Servetus expressed no re-
gret, but silently or openly approved it. See SERVET.

Ludiis Socinus, born in Siena in 1525, of distinguished ancestry, familiar with Biblical languages, an able critic, a member of the famous Vicenza Secret Religious Socie-
ty of Forty, on their dispersal fled to France, England, Holland, Poland, and at last to Transylvania, where, carrying forward his uncle's thought and work until his death in 1604, he became the more active and noted leader of Socinianism (q. v.). Less conspicuous, but with these, may be named in Germany, Cellarius, Capito, Johann Denk, Sebastian Frank, and the scholarly Ludwig Hezler, one of the ear-
liest, who, for writing against the Deity of Christ, was imprisoned by the magistrates of Constance, and suffer-
ed death in 1529; also Claudius of Savoy, George Ban-
dratza in Transylvania, Gionesi and Farnovius in Po-
land, Stephen Dolet, friend and disciple of Servetus, who, at the age of thirty-seven, was tried at the age of thirty-seven. A student rather than reformer or contro-
versialist, he yet left behind him a deep impress of his free and original thought. His nephew, Faustus Socinus, born also in Siena in 1589, was expelled from Italy at twenty, studied at Basle, visited Poland and Transylvania, where, carrying forward his uncle's thought and work until his death in 1666, he became the more active and noted leader of Socinianism (q. v.). In Italy, before the Reformation, the doctrine of the Trinity encountered dissent, the advocates of which were driven from the country, or were attracted by the larger freedom farther North. Thus went forth many to Switzerland, Germany, Hungary, and Poland; among whom were the famous Socini and the celebrated preacher Bernardo Ochino. Hundreds also were put to death, among whom were James Palologus, burned at Rome, and Sega and Guirlande, drowned at Venice. It was in this interest of reforming the faith that the society was formed in Vicenza, of forty persons of tal-
ents and learning, defending the Trinity, meetings in secret, of whom, after 1546, many were imprisoned and others suffered death. From that time there has been no recognised or organized Unitarian body of any strength in Italy, although it is believed there are many who hold this faith. The advocate Magnani has for years conducted Unitarian service at Pisa. The astronomer Filopanti has lectured in Bologna, Milan, Rome, and Naples upon Channing, the distinguished American Unitarian leader, of whom further mention will be made below. Professor Ferdinando Bracci-
forti has translated Channing's works into Italian, and has for years devoted himself to the study of Unitarianism at Reggio. Professor Sbarbaro, in the Rivista Europa of October, 1879, argues that Channing sup-
plies the form and spirit of the religion needed by the
UNITARIANISM

crewing heart of thoughtful Italy. He there says, "I have made choice of Channing as the most eloquent witness and an irrefragible proof of the new evolution of Christian thought in the world, and of the reform which is proceeding little by little beneath the roof of the old church, because in the story of his career, and in the fortunes of his books, in the marvell of their rapid diffusion in all corners of the civilized earth, to be seen the most luminous and triumphant proof of the reality of that movement which is inwardly transforming European society, and bringing about a little by little a new church under the roof of a new temple, that Church really catholic, whose frontal shall bear, without untruth, the inscription 'To the One God,' which Mazzini hailed on the façades of the Unitarian churches of Hungary." 4.

In France, reporting to a million Frenchmen, since the Partition of Dolet in Paris, no specific Unitarian movement has been known. But during the last fifty years, in the Reformed Church, which is mostly Trinitarian, has been a growing liberal party; among whom the Coquerels, father and son, Martin Paschal, Fontanes, Colani, Vincents, and the present liberal Arminian pastor is a great name. They have submitted to representation of Unitarianism. Their papers were formerly Le Réformateur, and Le Disciple de Jésus, and at present La Renaissance. Says Renan, in a brilliant essay on Channing in 1863, "France has rejected Protestantism. She is the most orthodox country in the world, because she is the most indifferent to religious matters." 5.

In Switzerland, where the early Unitarian martyrs (Hezzer, at Zurich, in 1539, and Servetus, at Geneva, in 1553) paid the penalty of their lives, the spirit of liberty in Church as in State has prevailed; and, without separate formal organization, Unitarian sentiments, from the first, have been steadily held. The Swiss Church has been committed to no dogmatic declaration, but only "to preach purely and fully the Word of God as contained in the Holy Scriptures." The Genevan Church, in general, denies the equality of the Son with the Father, and the Trinity as a person. The corresponding of the Evangelical Christendom, Feb. 1, 1875, says, "The Grand Council of Basel, on the question of the Deity of Christ, on May 2, 1781, decided in the negative by a vote of sixty-three voices against forty-eight." Étienne Chastel, professor of ecclesiastical history at Geneva, says, "It is the greatest error and the most powerful weapon of our adversaries." French Switzerland has itself produced two great liberals, Samuel Vincent and Alexander Vinet, who were largely in sympathy with Unitarian thought.

6. Holland, like Switzerland and America, always hospitable to those who are exiles for conscience, has never been hindered or to the first church. Of its two and a half million Protestants, about four fifths belong to the Reformed Church; which, again, has its two parties of Orthodox and Moderns. Since the burning of Fleckwyk, a Dutch Baptist, for his denial of the Trinity in 1598, there has been continued progress. In a popular religious work by Dr. Matthes, it is a significant fact that the chapter on God has no allusion to the Trinity; but at the close occurs a foot-note in which, with the calm spirit of the historian rather than that of the controversialist, he speaks of "the antiquated doctrine of the Trinity." The creed adopted at the Synod of Dort in 1618 has given place to the acceptance of the Bible as the standard of faith, together with the toleration and diversity of sentiment which are sure to follow.

7. Germany, that gave the world, along with Luther, some of the first Unitarian reformers, during the succeeding three and a half centuries, without any distinct church organization, the growth of Unitarianism, scholarship and philosophy, produced all shades of rationalism, from extreme orthodoxy to extreme unbelief. In South Germany, governmental statistics of 1861 report 25,000 Unitarians. Says Dr. Beard, "The Trinity subsists among the learned of Germany only in name, and in the belief of the common people, a shadow or reduced to nothing; if brought down into scriptural form it is abandoned; if converted into three "somewhats," it is no longer such as the creeds declare or their advocates recognize. The doctrine once taught and held for an essential article of Christian faith is virtually repeated and silently disclaimed." The destruction of Channing's complete works, by Sydow and Schultze, was published in Berlin in 1850. After that, the chevalier Bunsen, in his God in History, speaks of Channing as "a great Christian saint and man of God—say, also a prophet of the Christian consciousness regarding the future." The Protestant Church of Germany was dissolved by a law, passed by the Diet at Eisenach in 1865, a free Union Association, holding annual conference sessions, though not organized on a dogmatic basis and not professing Unitarianism, welcomes and cherishes fellowship and sympathy with the Uniate Church in England and America.

8. In Poland the Unitarian faith early took a firm hold and spread rapidly, aided by refugees who there found a hospitable asylum. Yet it was not without persecution at the start. In 1599, in the market-place in Cracow, was burned Katharine Vogel at the age of eighty, wife of a goldsmith and alderman, condemned for denying the Deity of Christ and affirming the divine unity. In 1592 the Bible was translated, chiefly by Unitarian scholars, into the Polish language. Hither came Faustus Socinus, around whom flocked converts from all ranks and classes of society, among them many of the nobles, who protected the Sinicism of their rights, proved especially favorable to a movement which, more than any other of the time, seemed depository of the traditions and prestige of the Romish Church. The prosperous commercial city of Racow, with its large printing establishment publishing many of the best books of the day, became its headquarters. Here was issued the famous Racovian Catechism, which became widely known and influential, and was afterwards signallly burned in London. King Sigismund II became a convert, and during his reign this party of reformers grew strong enough to form a church of their own. For seven years the father's city of Nischna, till, in 1660, prince Casimir, a cardinal and a Jesuit, coming to the throne, with unremitting persecution burned the homes of its adherents, drove them into silence, exile, or death. So effectually did he exterminate it, and with it the spirit of liberty in the state as in religion, that it may fairly be said that the Jesuit tyranny at once obliterated a church and a nation.

9. In Transylvania, Unitarianism was earliest declared by Francis David, first Unitarian pastor and bishop; and afterwards by Socinus and by Georgio Bianzata, an Italian from Piedmont, who became court physician to the Hungary. In 1565, Ulrich Zwingli, a multitude in the open streets of Thorda, asserting the Father to be the only God. By his preaching from place to place large numbers were converted, including the king himself, and nearly the whole city of Klausesburg, and many Unitarian churches were established. While persecution was not severe, leaving room for industry, Europe, Transylvania was early conspicuous for religious liberty. Four forms of Christianity—the Roman Catholic, the Reformed Evangelical, the Lutheran, and the Unitarian—were recognized by law with equal rights, with penalties for those only who should infringe the rights of others. Under this broad tolerance, Unitarianism, which was, indeed, instrumental in producing it, gained a strong foothold, which, under subsequent persecution, it has never wholly lost. Unhappily, the early toleration was of short duration. The bishop, Francis David, himself became a martyr to his faith, dying in prison in November, 1604. In 1609, the city of Nischna was burned, in which, in 1879, was celebrated in the land of his martyrdom. The Unitarians of Transylvania are said to have at one time possessed four hundred church buildings, eleven colleges, and three universities. Through the last two centuries the iron hand of Austrian and Jesuit oppression has been long and persistent. To-day the trade, agriculture, education, schools, lands, and even of civil as well as religious
UNITARIANISM

rights. They were robbed of their churches, which were transferred to the Jesuits. During the present century, they are regaining privileges and strength, and are reported as having a population of 60,000, now increasing, with a number of congregations in the United States. There are 12 professors and 300 students; two smaller colleges at Thorda and St. Kerezaur; a newspaper, The Seed-sower; and many distinguished scholars and literary men, preachers and civilians, in their ranks. Their Church government is that of Episcopacy, strongly modified by Congregationalism, the presbytery being Joseph H. Fercen's. A special intimacy of fellowship has recently been cherished and growing between them and the Unitarians of England and America. With their aid the translation of Channing's writings has been widely circulated among the people of Hungary of all sects.

10. England, though later than the Continent in receiving the Unitarian faith, was visited by Ochino, Socinus, and other reformers. In 1548, the priest John Ashton was cited to Lambeth for Arian sentiments, and saved his life only by recanting. Under a similar charge occurred several martyrdoms. George von Paris, a deacon German surgeon, once a Roman Catholic, who performed the first transplant of a human arm, was burnt at Smithfield in 1551, during the brief reign of Edward VI. During the reigns of Mary and Elizabeth, Hammond, Lewes, Ket, Wright, and many others met a similar fate. In the reign of James I, in 1611, the Unitarians of Northumberland became the last of the Smithfield martyrs; and in 1612, at Lichfield, Edward Wightman, a Unitarian Baptist, was the last martyr who was burnt for heresy in England. In the time of Cromwell, John Biddle formed in London the first English Unitarian Church, and gained the title of the father of the English Unitarians, but perished in prison for his faith. In 1640 the synods of London and York deemed it worth while to issue a special canon against Socinianism. And in 1652 the Racovian Catechism, which had been translated into English and actively circulated, was burned in London. The persecution of Unitarians has been growing worse during the century in which that in 1655 Dr. Owen writes of it, "The evil is at the door; there is not a city or town, scarce a village, in England wherein some of this poison is not poured forth." Before the close of the 17th century, London had houses of Unitarian worship. Mr. S. of Lewes has been proved to be the first Unitarian. Sir Isaac Newton is now known to have written anonymously on the Unitarian side. Locke wrote a work on The Reasonableness of Christianity, which is substantially Unitarian. The scholarly Lardner, author of The Credibility of the Gospel History, one of the ablest defenses ever written against Socinianism. These views have not only notably invaded the established Church: the testimony of Palmer in 1705 writing that there were "troops of Unitarian and Socinian writers, and not a Dissenter among them." Rev. Thomas Emlyn preached the Unitarian faith in Dublin and London. The Act of Uniformity in 1662 expelled from the Church of England two thousand ministers, mostly Calvinistic Presbyterians. Free from dogmatic tests, many of these ministers and their followers gradually became Arminian, and ultimately Unitarian. After the passing of the Toleration Act in 1689 legalizing Nonconformity, the way was opened by which the prevailing faith largely passed into Unitarianism. Half the Unitarian churches in England to-day are of this Presbyterian origin. Until 1813 the law made it blasphemy to speak against the Trinity; but a more tolerant public sentiment had long rendered the law a dead letter. Unitarianism is an old movement; but was most distinctly initiated by Dr. Theophilus Lindsey, who in 1774 resigned his charge in the Established Church and became pastor of a Unitarian congregation in Essex Street, London. A still more important apostle was the noted Dr. Joseph More at Potsdam in 1783, distinguished for his scholarship and scientific attainments, in 1755 he became pastor of a small Dissenting congregation in Suffolk, and a conspicuous champion of the humanitarian theology. Believing in the Bible as a divine revelation, and in the miracles as credentials of Christ's authority, while continuing to hold firm on the plenary inspiration of the New Testament and vicarious atonement as unscriptural, wrote to show how these doxmas came in as later corruptions of primitive Christianity, and held that Christ himself claimed to be simply a man. His views brought upon him obloquy and persecution; and, at the hands of a mob losing his boots and shoes by the violence of his eloquence, he was virtually banished from his native land. In 1792 he removed to America, gave courses of lectures in Philadelphia, which added fresh stimulus to the rising Unitarianism, but retired for his closing years to the small neighboring village of Northumberland, where he died in 1818. In 1818 the Unitarians were first placed by law on an equality with other Dissenters. For some years sharp controversy continued as to the proprietary rights in certain Church properties held by them, but claimed by orthodox Dissenters. These claims were finally silenced in favor of the Unitarian occupant by the Dissenting Chapels Act of 1844. As the present time there are reported about 350 Unitarian churches in England, mostly Congregational in Church government, and of which one fourth have been formed within the last twenty-five years. In Wales about thirty-four churches of this faith are reported; and in the Scotch Presbyterian Church New College, removed recently to London. In their interest are conducted several weekly religious papers: The Invoker, The Christian Life, The Unitarian Herald, and the new periodical The Modern Review. Their representative missionary society is the British and Foreign Bible Society, organized in 1804 and incorporated in 1825, 1826. Among the leading writers may be named (besides Priestley, Lindsey, and Belsham early in the century), more recently, Rev. John James Taylor, Charles Beard, John Hamilton Thomson, and James Martineau, one of the greatest living exponents of the higher philosophy of the spiritual monad materialism. It may be truthfully added that the movement of English Unitarianism is outgrowing the legalism and literalism of a philosophy which sharpened its earlier faith, and is reaching a broader and deeper spirituality.

11. In America, the free inquiry and open field of thought from the beginning have been favorable to Unitarian views, and the movement for spiritual liberty found special stimulus in the public sentiment following the Revolution. The Pilgrims, bringing to America the parting injunction of their pastor, John Robinson, of Leyden, "Let us walk before God's Word," organized the first Congregational churches in New England at Plymouth, Salem, and Boston upon covenants so broad and undogmatic that these have required no change in accepting the Unitarian faith. Without doubt, the prevailing sentiment was mainly Calvinistic, but the "dissidents" were Unitarianism intermingled that grew imperceptibly, until for the last century and a half the progress of Unitarianism.
rían sentiments may be distinctly traced. Dr. Gay, of Hingham, ordained in 1717, is supposed to have been the first American preacher of Unitarianism. Before the Revolution, many lawyers, physicians, tradesmen, and farmers were Unitarians, according to the testimony of some who należy adhered to this belief, not the laity only, but many of the clergy, prominent among whom was Mayhew, of the West Church, Bos-
ton. In 1768 the famous Hopkins prepared a sermon especially against what he deemed the heresy of the Boston ministers. In 1783, under the lead of their young men, elements which were eventually out-
dained, the Episcopal Church of King's Chapel in Bos-
ton expunged from its Book of Common Prayer all re-
ference to the Trinity and the worship of Christ, and thus became the first distinctively Unitarian Church in America. Its liturgy and Church organization continue substantially the same at the present time. Priestley's coming gave fresh impulsion to this faith, and the writings of Lindsey and Belsham found their way hither. In a letter to Dr. Lindsey, in London, Rev. James Freeman writes that there were "many churches in which the worship was strictly Unitarian, and some of New Eng-
land had a sort of a Unitarian form of worship and creed." In 1801 the oldest Puritan Church in America, the original Church of the Mayflower, established at Plymouth in 1620, by a large majority vote declared itself Unitarian; and with no change in its covenant, using the identical statement of faith drawn up by its Pilgrim ancestors and claiming to the same names and fellowship. Free from restraining of dogmatic creeds and tests, the New England Congregational churches were especially hospitable to inquiry and progress. By imperceptible degrees change came. In 1865 the Uni-
tarian Rev. Dr. Warner made profession of divinity at Harvard University, Cambridge. This fact created up position and controversy. In 1815 a controversy be-
tween Dr. Channing and Dr. Worcester resulted in open rupture between the Trinitarian and Unitarian Congreg-
ationalists. In 1816 the Divinity School at Cambridge was established by the Unitarians. Harvard College was in their hands, and chiefly by their influence it has main-
tained the undenominational position which it claims to-day. For ten years, from 1815 to 1825, the contro-
versy waxed hot; lines of separation were drawn, and churches and men took sides. As the churches divided the field of Unitarianism became the field of Unitarian or Unitarian ranks. Meanwhile the sect, or mi-
norities organized anew on one side or the other. The ancient churches, coextensive with its town, were divided; and in many New England towns the oldest,
est church, retaining its ancient Congregational liberty and usages, became in faith and fellowship Unitarian.

II. Organization and Present Condition.—During the eventful decade just reviewed, Rev. William Ellery Channing (born in Newport, R. I., April 7, 1780), then in the prime of manhood, with early ripeness of spiritual fruitage, became, by eloquence of tongue and pen, the conspicuous leader of the Unitarian movement. At the ordination of Jared Sparks, in 1819, as minister of the Unitarian Church in Baltimore, his discourse expropn-
ing Unitarian Christianity made a profound impression. His intense dislikc and dread of sectarianism gave to his preaching an emphasis of individualism and spirit-
ual liberty. Never permitting himself to be the devotee of a sect, to him Unitarianism owes much of its freedom from sectarian and dogmatic trammels. Less a controversialist than a devout and practical preacher, he fearlessly, yet reverently, sought the truth, brought into prominence the spiritual elements of human na-
ture, and developed those best instincts and sentiments, and made it his supreme aim to kindle the aspiration for holiness. His testi-
mony was chiefly borne to the fatherhood of God and the brotherhood of man, to the worth of human nature and blessedness of human life, to the dignity of labor and the elevation of the working classes, to spiritual freedom and the divine mission and authority of Jesus Christ. He has come to be recognized by all sects as one of the foremost of American preachers and writers, a leading champion of religious and civil freedom, of education and philanthropy, a seeker for truth, a lover of mankind, a devoted advocate of religious freedom. On April, 1880, the centenary of his birth was celebrated in London and in several of the larger cities in America, many persons of other denominations joining, and the corner-stone was laid of a memorial church at Newport, his birthplace. See CHANNING.

The older the Church the less it was not of Unitarian seeking. The Unitarian leaders were willing, in the large fellowship and free faith of Congregationalism, to maintain the unity of the Church unbroken. They would have borne their testimony to truth as they saw it, urging all others freely to do the same. The neces-
sity of separation was enforced by fellowship with-
drawn, controverted opinions put forward as tests, and by charges made that rendered it impossible to stay. After the break had come, it was with no desire to build a new sect or to prolong the bitterness of contro-
versy; it was to do their own part in the vineyard that the Unitarians went out and would bear fruit in their own way. But, from the first, their attitude has never ceased to be that Church unity is to be found, not in identity of opinion, but in personal freedom and in brotherly love; and they have declared their readiness on this broad basis to join in fellowship with all who would maintain the Christian claim to the dignity of human nature, and the discipleship by consistent lives. In the exercise of free-
dom there have always been within the Unitarian fold varieties of individual opinion, while in the same free-
dom a few have gone into the Trinitarian household and others into a position antichristian or non-Christian. On May 24, 1825, was formed the "American Uni-
canarian Unitarian Association." Its first article declares its purpose to be "to diffuse the knowledge and pro-
more the interests of pure Christianity." It was incor-
porated in 1844, with the right to hold trust funds, and has at the present time about $300,000. Without ec-
clesiastical authority, it is purely a missionary organi-
ization, using annual contributions from the churches for publishing and distributing books and tracts, sus-
taining missionaries, aiding feeble churches, and plant-
ing new ones. Its operations are mainly in the home-
land, and in foreign fields almost exclusively. As ad-
vice were small, the missionary spirit of the denomination being checked by dread of the sectarian spirit, and the benev-
olent gifts of the people taking more the direction of education and general philanthropy. But within the last fifteen years its income has greatly increased, in 1866 and 1872 exceeding $100,000, although it by no means receives all of the denominational gifts for relig-
ious missionary purposes.

On April 5, 1865, a convention, consisting of the pas-
tor and two delegates from each church or parish in the Unitarian denomination, met in the city of New York and organized a National Conference "to the end of energizing and stimulating the denomination with which they are connected to the largest exertions in the cause of Christian faith and work." Its preamble declared that "the great opportunities and demands for Christian labor and consecration at this time increase our sense of duty." The Conference then "proclaimed in the name of Jesus Christ to prove their faith by self-denial, and by the devotion of their lives and possessions to the service of God and the building-up of the kingdom of his Son." It is a representative body of pastors and delegates, chosen and meeting biennially, purely advisory in char-
acter, for the promotion of the soul's welfare. It met in September at Saratoga, open to the public, and are steadily increasing in the numbers attending, also in interest and in practical purpose and value. Since its formation, the Unitarian churches of America have given more for missionary purposes than in all their previous history. Within smaller and more convenient
territorial districts have been formed also local conferences with more frequent meetings, which have been successful in fostering fellowship and co-operation, and a more devout and earnest religious life.

Without other ecclesiastical authority, the government of their churches and their modes of worship are purely Congregational. The rites of baptism and of the Lord's supper are recognized and observed, not having mystic value or binding authority, but as having spiritual worth and influence. The denominational Year-book for 1880 reports 540 churches, of which 2 are in England, 2 in Wales, 14 in Massachusetts, and 101 mainly in the West; 400 ministers, 20 local conferences, besides a number of organizations of purely benevolent aim and purpose. Two theological schools are sustained — one at Cambridge, founded in 1816, having four professors and about twenty students, and a library of 18,500 volumes, while the large University library of 240,000 volumes is also open to its use. About $140,000 have recently been added to its endowment fund to increase its corps of professors. The Theological School at Meadville, Pa., was formed in 1844, and has four resident professors, 15,000 volumes in its library, and eighty students.

The periodsical of the denomination are the Unitarian Review, the Christian Register, now in its fifty-ninth year; The Douglass, a Sunday-school paper, all published in Boston, while several smaller organs are published elsewhere. The denomination is rich in its history, and has produced many learned Unitarians, distinguished in literature and the devout religious sentiment. The works of Channing, now widely circulated among English-speaking people all over the world, are translated in part or entire into the Dutch and German, French, Italian, Swedish, Hungarian, Icelandic, and Russian languages. There may also be mentioned among Unitarians, in English literature, Henry Ware (father and son), James Walker, Theodore Parker, Edmund H. Sears, Orrvile Dewey, William H. Furness, Henry W. Bellows, James Freeman Clarke, Frederick H. Hedge, and Andrew P. Peabody. Unitarian writers are also largely represented in the walks of history and literature in America as in England. It may be added that Unitarian sentiments are held substantially by "Universalists," "Christians," "Hickite Quakers," and "Progressive Friends."

III. Doctrinal Views. In seeking the present form of Unitarian faith, it is needless to trace the development of its essential facts. The tenets of Sabellius and Paul of Samosata and Arius, also of Servetus and the Socinii, in their special forms sharing the crudities of contemptuous thought, have largely passed away. They are not to be quoted as authority. They are simply in the line of historical process, agreeing only in the single fundamental thought that God is one, and Jesus Christ a created and subordinate being. Unitarianism is characteristically not a fixed dogmatic statement, but a movement of ever-enlarging faith. It welcomes inquiry, progress, and diversification of individual thought in the unity of spiritual fellowship. With faith in the unity of God as its key-note, it asserts the unity of all truth in nature, history, experience, and the Bible; the unity of the Church as based on character, not on dogma; and the unity of spiritual life in this world and the next. Its leading principles are, first, the freedom of all to open inquiry, and the right to believe and to obey it; and, second, that character is the test of Christ's discipleship. Unitarians declare life, not dogma, to be the essence of Christianity. They deem Christi
tivity to be essentially a reasonable religion, according with the truths of nature, instructing reason and appr

fitting the soul for his kingdom above. They refuse to formulate their belief in fixed creeds of ecclesias-
tical and exclusive authority; because these never set-
tile open questions, but only start fresh controversy;
because they limit inquiry and hinder progress; and be-
cause they are not the cause that this denomination instead of spiritual purpose, the bases and tests of fellowship. Yet, while refusing any authoritative creed statement, there is an unwritten consensus of faith in which Unitarians are substantially agreed. They believe in the one God as the Creator of the universe and Father of all souls; as the local and universal Father, desiring that not even the least shall perish; the Fatherly Friend in all worlds, who does not wait for forgiveness and favor to be purchased, but freely pours forth blessing on all who will accept it; Father of the sinner as of the saint, seeking every wanderer with his pursuing love, and punishing the erring not for his pleasure, but for their profit, that they may become partakers of his holiness.

Unitarians believe in man as naturally neither saint nor sinner; that his nature is not corrupt and ruined, but undeveloped and incomplete; that he inher-
tends qualities not as means to evil, and that he is sinned against and not himself the sinner; that it is not
good; that he needs regeneration, the unfolding and renewal of his spiritual nature, which he experiences through obedience to the truth, under that divine
fluence which is called the Holy Spirit; that, as a child of the Infinite, allied to the Supreme Goodness, he may by the cultivation of the spiritual and the spark of divinity that makes his ultimate redemption an inextinguishable hope, yet he needs to be taught and inspired of God, but with the aid of the

divine grace, which is his birthright privilege, he is able to climb to celestial summits.

Unitarians believe in the divinity of Jesus Christ, as the local and universal Son of God and Son of man. They care little for metaphysical speculation about the mystery of his nature, but emphasize his word and life as a practical help for human salvation. They hold that he is our Saviour as he became to us the Light of the World, the Fountain of Living Water, and the Bread of Life; our Saviour by illustrating the eternal principles of right, inspiring his followers to holiness, and impairing to them true life more abundantly; our Saviour so far as he leads and helps us to be large-hearted, truth-seeking, peace-loving, and to cherish the work to bear testimony to the truth, as was here not to be ministered unto, but to minister, and that he proved himself humanity's Lord and Leader by his
divine helpfulness. Under the influence of elevated views of man's spiritual nature, affirming his innate power of apprehending religious truth, Unitarianism in
declaring the humanity of Christ, does not bring Jesus down, but lifts humanity up. It asserts that Jesus was
purely human only to show that human nature itself is, in the phrase of Athanasius, homousion, of the same substance with God, and that Jesus is the best expres-
sion of that divine humanity which is the birthright and promised destiny of all souls. While they are jeal-
ous of ecclesiastical authority or dictation, and perpetu-
ally refuse to limit their belief by formula, the Uni-
tarians have, in public assembly of the American Uni-
tarian Association, and in representative meetings of their conferences, and in their official publications, confirmed their attitude of Christian discipleship, and shown that they hold themselves to be a body of be-
lievers upon the Christian foundation and within the

Christian Church. They deem the mind of Christ the
best index of Christianity. For the sources of Unitar-
ianism, their interpretation and development, they
justly be a progressive religion; that its principles, like the axioms of mathematics, are eternally true, but that its germs unfold with the increasing intelligence of man-
kind. Right belief they deem important for right liv-
ing, and they emphasize the value of righteousness as
establishing the kingdom of God on earth, and as alone
Unitas Fratrum regard them, are a denial (α) of the true divinity of Jesus Christ; and (β) of the inherent and total moral depravity of human nature. These two are not simply dogmas, but facts sustained by observation and history as well as by the plain and constant teachings of the Holy Scriptures. They are intimately correlated to each other; for if Christ be not truly divine, then there is no adequate atonement for human sin; and, conversely, if man be not essentially depraved, there is no need for a Saviour. Hence our Lord in treating with Nicodemus announced the necessity of a radical, moral change as the first and all-important condition of Christianity (John iii, 1–18). Accordingly the doctrine of a spiritual and fundamental regeneration will be found to be the true touchstone of a truly New Church, and of the Church and Christendom who lay most stress upon it prove to be the most efficient in the moral renovation of mankind. Humanitarianism alone can never be more than a negative and powerless, because a really false, view of the actual condition and relation of the race as respects their Creator and Redeemer. See HUMANITARIANS.

In the same summary manner, Unitarians reject, as being to them unphilosophical and unintelligible, the divinity of the Holy Spirit, a doctrine which all who have passed through the pangs of true contrition into the joys of conscious pardon and heavenly communion find so comforting and necessary to the explanation of their own religious experience (Rom. vi, 1–5; 1 Cor. ii, 10–14). See TRINITY.

While pointing out these, as we deem, radical defects in Unitarianism as a system of Christian faith, we nevertheless are bound to bear witness to the literary culture, social refinement, and moral virtues which Unitarians as a body have exhibited, and to their amenity and ameliorating influence in the defence of civil rights and the general cause of philanthropy. These we attribute, however, not so much to their creed as to the hereditary effect of early Puritan training and the power of a sound Christianity diffused through the community in the midst of which they live and operate. See UNITARIANISM.

Unitas Fratrum. See Moravians.

United Armenians, a name applied to those Armenian Christians who acknowledge the pope; the orthodox Armenians being called Gregorians. The Armenian rite in the Roman Catholic Church has one patriarch and primate (in Cilicia), four archbishops (at Constantinople, Alexandria, Cilicia, and Lecce), besides two in parrocius, and sixteen bishops. Their union took place from 1314 to 1444. They number some 100,000, of whom 78,000 are in Turkey and Persia (20,000 under the archbishop of Constantinople, 56,000 under the patriarch of Cilicia, and 1000 in Mount Lebanon). Austria-Hungary, in 1870, had 8279 United Armenians; Russian Caucasus and Siberia, in 1869, had 13,722. In 1872 a very considerable part of the Turkish United Armenians left the Roman Catholic communion and joined the Old Catholic movement. See ARMENIAN CHURCH.

United Brethren in Christ, the full title of a body of evangelical Christians in this country.

L. Origin.—In the year 1732, the Rev. Philip William Otterbein (q. v.), a distinguished scholar and missionary in the German Reformed Church, emigrated from Dil- lenberg, in the Duchy of Nassau, Germany, to America. Not long after his arrival in his new field of labor, he became deeply impressed with the necessity of a more thorough religious experience than he had ever before experienced. Lancaster, Pa., was his first pastoral charge, and, early in his ministry there, on a certain occasion, he passed from his pupil to his study, and there remained in earnest prayer until God, in his mercy, poured upon his soul the spirit of grace and power, and washed his scholar's breast with an unction which neither he nor his people had realized before. Having now entered, as it were, upon a new life, he was eminently fitted for a leader. He was calm, dignified, humble, and devout. After six and a half years of labor at Dillsboro, Pa., he removed to Tulpohocken, Pa., at which place he introduced evening meetings, and in them read portions of the Bible and exhorted the people to flee from the wrath to come. At this time there was not a Methodist society in America. The German churches of the land, especially, were sunk in lifelessness. The "new measures" of Mr. Otterbein brought upon him severe criticisms, if not actual persecution.

While Mr. Otterbein was engaged in enforcing experimental godliness at Tulpohocken, the Rev. Martin Boehm, a zealous Mononite, was led into the light of a new life, the "new measures of the churches" being precisely different in doctrines and modes of worship. Two awakenings were now in progress—one under the labors of Mr. Otterbein in Tulpohocken, the other led by Mr. Boehm in Lancaster County, Pa. During a "great meeting" held in a barn in that county, those two ministers met for the first time. Mr. Boehm preached the opening sermon in the presence of Mr. Otterbein. As the heart of the preacher warmed with his theme, it kindled a flame in the soul of the other. At the close of the sermon, and before Mr. Boehm could resume his seat, Mr. Otterbein arose, and, embracing the preacher in his arms, exclaimed, "We are brethren." These words afterwards suggested the name which the denomination now bears.

From this time these godly men became co-laborers, and travelled extensively through Eastern Pennsylvania, Maryland, and Virginia. In the meantime other German ministers of "like precious faith" were raised up through their labors, and numerous societies were formed in the states mentioned. It seems to have been no part of Mr. Otterbein's purpose to organize a new church. He only sought to impress upon the consciences of the people generally, and of formalists in particular, that a vital union with Christ is essential to a religious life. Providence so shaped circumstances that Mr. Otterbein, without his own seeking, was placed at the head of a new denomination.

The eminently Christian character of Mr. Otterbein, and his usefulness in founding this church, make it proper that a few sentences more be written of him. He was born at Dillenburg, Germany, March 6, 1726, and resided in his native land twenty-six years, and in America sixty-one years, dying Nov. 17, 1813, having continued his ministry to the close of his long life. He was an eminent scholar in classical attainments, and in philosophy he was equally proficient. He was held in high esteem by bishops Asbury and Coke of the Methodist Church, and assisted, by special request, at the ordination of the former. On hearing of his death, bishop Asbury said of him, "Great and good man of God! An honor to his Church and country; one of the greatest scholars and divines that ever came to America, or who were born in it."

As the work thus began grew to considerable proportions, it became very important to consider the best means of perpetuating and extending it. Conferences were therefore annually held for this purpose, beginning at Baltimore in the year 1789. In 1890 the societies gathered were united in one body, under the name of the "United Brethren in Christ," and elected Mr. Ot- terbein and Martin Boehm their superintendents or bishops. At that time there was little uniformity among the various denominations. Some were members of the Moravians, others were Mennonites, or Lutherans, and a few were Methodists. In regard to the mode of baptism, probably to meet the wishes of the Mennonites, they agreed that each man should act on his own convictions. From 1800 to 1815, the growth of the Church was steady, but not speedy. Several new conferences were formed, and the work extended westward of Alleghany Mountains.
UNITED BRETHREN IN CHRIST

At a conference held in Ohio in 1814 it was resolved to call a general council for the purpose of agreeing upon some system of discipline. It was also determined that this council should be elected from among the preachers by the vote of the people throughout the whole Church. Under this order the first General Conference was convened on June 6, 1815, at Mount Pleasant, Pa.

II. Doctrines.—At this conference the following summary of doctrine was adopted, and remains unchanged to the present time:

1. The name of God, we declare and confess before all men that we believe in the only true God, the Father, the Son, and the Holy Ghost; that we believe in the Father in the Son, and the Holy Ghost, equal in essence or being with both; that this triune God created the heavens and the earth, and all that is in them, visible as well as invisible, and furthermore sustains, governs, protects, and supports the same.

2. We believe in Jesus Christ; that he is very God and man; that he became incarnate by the power of the Holy Ghost in the Virgin Mary, and was born of her; that he is the Saviour and Mediator of the whole human race, if they with full faith in him accept the grace professed in Jesus; that this Jesus suffered and died on the cross for us, was buried, arose again on the third day, ascended into heaven, and will sit in judgment on the earth, to judge the quick and the dead.

3. We believe in the Holy Ghost; that he is equal in being with the Father and the Son, and that he comforts the faithful, and guides them into all truth.

4. We believe in the Holy Christian Church, the communion of saints, the resurrection of the body, and life everlasting.

We believe that the Holy Bible, Old and New Testament, is the word of God; that it contains the only true way to us concerning the God whom every true Christian is bound to acknowledge and receive it, with the influence of the Spirit of God, as the only rule and guide; and that without faith in Jesus Christ, the Holy Scriptures, fourfold repentance, divine, and following after Christ, no one can be a true Christian.

We also believe that what is contained in the Holy Scripture, the future is certain, in the end of the world; and that all of it be preached through Jesus Christ—shall be preached throughout the world.

We believe that the ordinances, viz., baptism, and the remembrance of the sufferings and death of our Lord Jesus Christ, are to be in use and practiced by all Christian societies; and that it is incumbent on all the children of God particularly to practice them; but the manner in which it is practiced is left to the judgment of every one, as to receive the members of their church or denomination of either their own, or in public or private. Whosoever shall make himself guilty in this respect shall be considered as a traitor of his brethren, and shall be accounted as such always.

III. Organization and Government.—The polity of the Church is outlined by the following constitution, established in 1841:

We, the members of the Church of the United Brethren in Christ, in the name of God, do, for the perfecting of the saints, for the work of the ministry, for the edifying of the body of Christ, as well as to produce and secure a uniform mode of action, in faith and practice, also to define the powers and the business of quarterly, annual, and general conferences, as recognised by this Church, ordain the following articles of constitution:

Art. I. § 1. All ecclesiastical power herein granted to make laws and establish rules of discipline shall reside in a general conference, which shall consist of elders elected by the members in every conference district throughout the society; provided, however, as the number of such shall not have stood in that capacity three years in the conference district to which they belong.

§ 2. General Conference is to be held every four years; the bishops to be considered members and presiding officers.

§ 3. Each annual conference shall place before the society the names of all the elders eligible to membership in the General Conference.

Art. II. § 1. The General Conference shall define the business of the annual conferences.

§ 2. The General Conference shall, at every session, elect bishops from among the elders throughout the Church who have not in the last four years been elected by the Church.

§ 3. The business of each annual conference shall be done strictly according to Discipline; and any annual conferences shall not be created thereunto by any, by impeachment, be tried by the General Conference.
and expended for the spread of the Gospel nearly two millions of dollars. The missionaries of the Church are scattered over many portions of the United States and territories, in Canada, Germany, and Western Africa. The Board of Education now has 12,410 in the frontier depart ment 140, and on home missions 240 missionaries.

A Women's Missionary Society was established in 1877, and has founded one mission in Germany and one in Africa.

A Church Erection Society was organized in 1869 by the General Conference. The object of this organization is to aid feeble churches in erecting houses of worship. Already many congregations have been assisted by funds raised by this society.

A Sabbath-school Association was established in 1869, and gathers by systematic annual collections a liberal sum each year to aid Mission Sabbath-schools in all parts of the denomination and in heathen lands. The Church is deeply interested in the work of saving the children, and no appliance useful to this end is withheld from them.

The literature of the Church is found chiefly in strictly church official books and periodicals. It has a publishing house at Dayton, 0., under the superintendence of the General Conference. Its net capital on the 1st of April, 1880, was $144,600.10. It is out of debt, and has a handsome balance of cash in the treasury. Its pec uliar features are in the form of high moral tone, and co mplexly well with the best of its kind everywhere. The Press issues nine periodicals, with an average aggregate circulation of 175,000 copies.

The Church of the United Brethren in Christ is not an offshoot of any other Church or churches, but bears the impress of providential upraising for the accomplishment of a special mission. It presents no new doctrine, and is distinguished mostly as an organization in which the ministry and people have an equal proportion of power, and the rulers hold office only by the authority and consent of the governed. Its history has been marked by radical reformatory ideas, which have doubtless in some degree retarded its growth in numbers. Slavery, the use of intoxicating drinks as a beverage, and the making and trading in ardent spirits, Freemasonry, and other secret societies are entirely prohibited on pain of excommunication. Its fields thus far have been in the six states in the northern half of the land. Its ministers and people are striving to maintain the old landmarks of a vital and experimen tal religion, insisting upon the witness of the Spirit and a holy heart and life. (W.J.S.)

United Christians of St. Thomas, a body of East Indian Roman Catholics, chiefly found in Travancore, at the southern extremity of India. In 1599 the Synod of Diamer (Uttoor, or Uthoor, the ancient Church of St. Thomas Christians to conform to the Church of Rome, conceding to them a modern Syrian rite. In 1633 nearly all fell away, but were soon after induced in great numbers to return, chiefly by the labors of the Barefoot Carmelites. At present more than one half are of the Latin rite, but a portion retain the Oriental rite. They are chiefly in the vicariate apostolic of Verapoly (Latin rite), reported in 1868 as having 295 priests and 233,000 members. See Thomas (St.), Christians of.

United Copts are those who, since 1732, have acknowledged the authority of the pope. They are of two classes: the Egyptian, and the Abyssinian and—in Egypt they number 12,000. In 1855 the pope appointed one of their priests vicar apostolic and bishop in partibus. See Copts.

United Evangelical Church, a denomination in Germany, formed in 1817 by a union of the Lutheran and Reformed churches. Attempts at uniting these churches in a union was made in 1599, when leading theologians of both schools held a conference at Marburg. Other conferences were held at Lepic in 1831, and at Cassel in 1661. In 1708 Frederick I of Prussia convened several Lutheran and Reformed theologians at Berlin to discuss the practicability of a union, but was successfully opposed by the Lutheran clergymen. A "Plan of Union" proposed by Klemm and Pfaff, theologians of Tübingen (1710-22), met with little favor. About the beginning of the 19th century, however, a voluntary union of the two communities was established in some parts of South Prussia, which extended in 1805 to many congregations at Cologne, Würzburg, and Munich. In 1810, king Frederick William took the subject warmly, and in 1814 drew up, chiefly with his own hands, a liturgy, which was adopted in the Royal Chapel, and authorized for use elsewhere. A royal proclamation followed, dated Sept. 27, 1817, in which the king requested the Lutherans and the Reformed through their dominions to unite in one community, and expressed his intention of taking part in a united celebration of the holy communion in the Royal Chapel at Pots dam, on Oct. 31, the occasion of the tercentenary of the Reformation. A synod assembled on Oct. 1 at Breslau, and another subsequently at Berlin; both of them readily adopted the proclamation, as did the Calvinists and Lutherans and laity throughout Prussia. A general assent was given to the movement on the day mentioned by the king, viz. Oct. 31, and not long after it was ordered that the distinctive names "Lutheran" and "Reformed" should be dropped in all official documents, and the United Evangelical Church acknowledged as the one and only religion. It soon spread beyond the boundaries of Prussia, and was adopted in Nassau, Hanover, and Bavaria in 1818, in Hesse-Cassel in 1822, and in Württemberg in 1827; but it did not extend either to Lutheran Austria, on the one hand, or to Calvinistic Switzerland, on the other. Even in Prussia the revised Service-book which the king set forth in 1821 was rejected by many congregations, and uniformity was far from being established even within the bounds of the united body. On June 25, 1850, the king directed that the Service-book should be adopted for all the churches; but a number of the Lutheran clergy refused to adopt it, and were suspended, some of them being treated with great severity, and even imprisoned.

Three parties arose in the Church. One, generally called the Confessolists, under the leadership of Prof. Dr. Hengstenberg, consisted of most of the ministers and consisted in a mere external confession and subjection to the same general Church government; and that the individual churches remained Lutheran, Reformed, or United. A second party, commonly called the Consensus party, took for its doctrinal basis the Bible and the confessions of the Lutheran and Reformed professions. It controlled the theological faculties of most of the universities, and had among its leading men Nitzsch, Tweested, Hoffmann, Niesler, Tholuck, Julius Miller, Jacobi, Dorner, Lange, Stier, Herzog, and Roth. The third, or Union, party rejected the authoritative character of the old and revised Service-books of both Lutheran and the Reformed denomination, and based themselves on the Bible simply, claiming, at the same time, the right of subjecting the authenticity of the Old and New Testa to critical examination. This party included many of the disciples of Tübingen, and liberal divines of different shades of opinion.

The persecution of the "Old Lutherans" was kept up until the death of Frederick William. A milder policy was introduced by his son, who succeeded him in 1840; and in 1845 the Old Lutherans were allowed to organize into a separate ministry, but did not receive any share of the public funds. In 1873 laws were passed substituting the principle of ecclesiastical self-government for that of the consistorial administration theretofore exercised by the State. In January and February, 1875, provincial synods met in all the eight old provinces of Germany, which assembled for the first time an extraordinary general synod met at Berlin, to make all necessary preparations for a transfer of the government
of the Church to a regular general synod. United German churches were also formed in other German states; in Nassau, 1817; the Bavarian Palatinate, 1818; Baden, 1821; and in Wurttemberg, 1827. In Austria and France a fusion of the Lutheran and Reformed churches has also many friends, but nothing practical has been as yet accomplished. In the United States a branch of the United Evangelical Church was established at St. Louis in 1840, when six German ministers organized an ecclesiastical body called Evangelischer Kirchenverein der Westen (Evangelical Church—Union of the West). This body, in 1856, was divided into three districts, and in 1866 changed its name to "German Evangelical Synod of the West." In 1870 it reported, at the General Assembly held in Louisville, as follows:

--- | --- | --- | --- | ---
162 | 300 | 12,000 | about 20,000 | about 50,000

Another branch of the United Evangelical Church was constituted in 1848, under the name of "Evangelical Synod of North America." In May, 1859, it split into two independent bodies, one of which assumed the name "United Evangelical Synod of the North-west," and the other "United Evangelical Synod of the East." Both of them united in 1872 with the "German Evangelical Synod of the West," constituting the fourth and fifth districts of this body. In 1874 the Church was redistricted by the General Conference held in Indianapolis into seven particular synods. It then numbered about 300 ministers and 40,000 communicants. The Church has a theological seminary in Warren County, Mo.; another educational institution at Eimhurst, Ill.; and three denominational papers. See Bunsen, Signa of the Times.

Hering, Geschichte der Kirchlichen Unionseruche (Leips. 1836–38. 2 vols.); Kahnle, Hist. Germ. Protestantism; Muller, Die evangelische Union (Leips. 1854); Nitschke, Urkundenbuch der evangelischen Union (Bonn, 1858); Schaff, Germany, its Theology, etc. (Philadelphia, 1857); Stahl, Die lutherische Kirche und die Union (Berlin, 1858).

United Methodist Free Church, an English branch of the Methodists which was formed in 1857, when the Wesleyan Methodist Association and the larger portion of Wesleyan Reformers amalgamated. The origin of this Church dates back to 1827, when the following document was adopted at the conference to establish a theological seminary. The Wesleyan Methodist Association retained its separate identity till 1857, when, by uniting with the Wesleyan Reformers, it became merged in the United Methodist Free churches.

The union was completed and the name adopted, in the town of Rochdale. This body is the third in historical importance of English Methodist denominations, having its seat principally in England. Only three of its circuits are in Scotland, and it has no footing in Ireland. It has missionary stations in Jamaica, Victoria, Queensland, New Zealand, Eastern Africa, and China.

The constitution of the body is democratic, the members of its annual assembly being freely chosen representatives. This assembly does not regulate the internal affairs of circuits, they being independent, except on matters of connectional import. The home circuits are divided into districts; but the district meetings do not wield any important functions. The various schemes, funds, and institutions of the body are intrusted during the year to committees which are, for the most part, elected annually. It is so with the Connectional Committee (which may be regarded as the executive of the body), with the Foreign Missionary Committee, the Chapel Fund Committee, the Superannuation Committee, and the Book-room Committee. Ashville College is governed by a body of trustees elected for life, and a committee of six elected for three years, but so arranged that two retire each year. The Theological Institute is governed by a body of trustees elected for life, and nine others chosen annually. The connectional officers are the president of the assembly, the connectional secretary, the connectional treasurer, and the corresponding secretary.

In 1877 their statistical report showed as follows:

United States of America is the full title of the principal nation on the Western continent, occupying the whole central portion of North America. See America. In this article we propose to treat of our country only in its general religious aspects, leaving its other aspects to other articles. The aboriginal religions and customs of the aborigines, see Indians (North Americanes).

1. Church History. — 1. Religious Character of the Original Settlers.—New England was originally settled by the Puritans (q.v.) from England. These were a body of devout men, who, having been driven from their own land by the corruption and seditions of Papalism, determined to establish a church free from such corruptions. Accordingly they decided to leave their own country for one that would permit them liberty of conscience in religious worship, and, after one unsuccessful attempt at departure, finally set out from the coast of Lincolnshire in the spring of 1608 for Holland. They reached Amsterdam in safety, where they passed one winter; and then removed to Leyden. Here they enjoyed that religious liberty for which they were seeking; but they were in a strange country, struggling with a strange people, who used a strange language. The love of country was still warm in their hearts notwithstanding their persecution at home, and during the ten years they remained in Holland they became thoroughly anxious to return to the allegiance of their mother country. With this end in view, they decided to go there. Arrangements were completed for their removal to America, and they landed on Plymouth Rock on Monday, Dec. 11 (old style), 1620. Their arrival occurred in the dead of winter, and they were obliged during the long and severe season that followed to undergo great privation and suffering. Diseases engendered by the rigors of the climate swept away one half of their number. But the spirit which had brought the Pilgrim Fathers to New England caused them to remain undaunted by opposition, from whatever source. These were a vigorous and determined people, with strong convictions on all points of the control of the State, the State was under the control of the Church; for a man could not hold office except he were a member of the Church; and religion lay at the basis of their political system. Notwithstanding their own bitter experience in their old home, they were intolerant of all dissent in their new abode, and they sometimes ran to great extremes of fanaticism against so-called heretics. Puritanism, however, has exerted a powerful influence for good in the development of American institutions by holding out sternly for the right in government as well as in private life.

2. Religious History of the Colony. — Rhode Island was originally settled by the Baptists, followers of Roger Williams (q.v.). In 1636, along with a few companions, Roger Williams, seeking for a refuge beyond the limits of the Plymouth colony, founded Providence Plantation, and made it a resort for all the distressed and persecuted of whatever name or sect. He was charged by the legislature of the colony with settling the borders of the Baptist communion.

Connecticut was contested ground between the English settlers of Plymouth and the Dutch of New Netherland. The Dutch, finding that the English were about to establish a colony in the valley of the Connecticut river, built a fort at Hartford called the House of Good Hope; but this was not regarded by the English as of any right belonging to the Dutch, and they proceeded to settle the country from Plymouth. In 1635 a colony of sixty persons left Boston for Connecticut, where they arrived in due time, and settled at Hartford. Shortly after, other settlements were formed, and in 1639 the leading men of New Haven adopted the Bible as their political constitution. At the Restoration in England, Connecticut obtained a royal charter, and thus became a colony free and independent in all except the name. Puritan influence was strong in the colony, and it enjoyed great prosperity and freedom from invasion.

New York was settled originally by the Dutch as a trading-post. A colony was planted on Manhattan Island (the present site of New York city), and the village was called New Amsterdam. In 1626 a considerable addition was made to the numbers of the colony by the arrival of thirty families of Dutch Protestant refugees from Flanders, called Walloons. They came to America to escape the persecutions which they had to undergo at home. The settlements were extended rapidly. New York city was the capital, and in 1666 Manhattan Island was purchased from the Indians for twenty-four dollars. There was a bond of sympathy between the Walloons and the Pilgrims of Plymouth in that they were alike refugees from persecution at home, and, furthermore, the English remembered their kindness in the war against the Dutch. A friendly intercourse was kept up. The English notified their neighbors of their own claim to the territory of the Hudson, and advised them to make good their titles by accepting deeds from the council of Plymouth. In 1604 the Dutch power in America was completely broken. All the territory possessed by Holland in this country had been granted by Charles II to his brother James, duke of York, who made haste to secure the land thus granted. A squadron was sent against New Netherland, and easily subdued the country. Thereafter the country and city passed under the name of New York. English settlers were brought in, but they lived at peace with the Dutch; even the strife of the two home governments failed to embroil the colonists of New York in a contest. From the time of the English conquest of the territory, the Episcopal Church was established by law, and was supported by the usual means of that denomination. The Dutch and English forms of worship are abundant in New York at the present time. (Dutch) Reformed churches and societies are numerous, as also are the Protestant Episcopal.

New Jersey was at first a part of New Netherland, and was settled by the Dutch, especially in the northern part in the vicinity of New Amsterdam (New York). But, on the reduction of the Dutch power to submission to the English, that portion of the territory likewise passed under the control of the duke of York. It was assigned, however, to lord Berkeley and Sir George Carteret. A liberal government was provided, and in the first assembly, held in 1668, the Puritans were in the ascendency, and the customs of New England were largely adopted in New Jersey. In 1676 the colony was divided into two sections by a line starting at the southern point of land on the left bank of Little Egg Harbor, and extending north-northwest to a point on the Delaware River in latitude 41° 40'. The territory lying east of this line was to be known as East Jersey, and remain under the control of Sir George Carteret; while that lying between the line and the point assigned to the Quakers (William Penn and others) was assigned to certain Quakers (William Penn and others) in trust for Edward Belling. The western section, being under the control of the Quakers, became a place of refuge for the persecuted of that name. Many Friends found homes here, and enjoyed great prosperity. In 1682 William Penn and some other Quakers purchased the territory of East Jersey from
Rhode Island and Connecticut, went far beyond the other colonies in securing liberty of conscience. In 1691 the patent of the Baltimores was taken away by king William III. During the following year Sir Lionel Copley assumed the government of the province, and a revolution in London, which is still called the king's accession of Scotch Presbyterians. The northern section of the state retains a large number of the followers of the early Dutch Protestants, while the central and southern portions have the descendants of the Scotch Quakers and Presbyterians.

The Quakers (Friends) were greatly pleased with the success of the Quaker colonies in New Jersey, and formed the project of establishing a free state on the banks of the Delaware, founded on the principle of universal brotherhood. After a vigorous effort, seconded by powerful friends in Parliament, he obtained a charter in 1681 by which he became proprietor of Pennsylvania. Emigrants flocked to the new colony, a liberal government was planned, the land was purchased from the Indians, and relations of friendship were established with the savages which lasted for a long period of time. It is a pleasure to look back upon the history of Pennsylvania, which had as its reign of prosperity, from the result of the rights and principles upon which the colony was founded and maintained. Immigration was encouraged by the liberal policy of the proprietors, and thousands of German Protestants, who fled from persecution at home, came and settled to the westward of the Delaware. There the Germans remain to this day, and are among the most industrious and thrifty people in the whole land. Many Huguenots also came from France and formed settlements, and Irish Protestants occupied lands still farther west. From these different classes of emigrants have sprung the various professions of religion in the bodies of land; but the Quakers and Germans have made the deepest impression upon the country, and they have had more to do in shaping the religious sentiment and policy of the people than any other.

Delaware was settled by the Swedes, Gustavus Adolphus, as early as 1638, had formed a plan of colonization, but was prevented from carrying it out by difficulties at home, and the plan was put into execution by Oxenstiern, the Swedish minister. In the early part of 1638 a company of Swedes arrived in Delaware Bay. They purchased from the Indians the country lying to the north of the Delaware and Cape Fear, and named the community New Sweden. This territory comprised the present state of Delaware and a part of Pennsylvania. But the colony of New Sweden was of short duration. In 1655 the country was entirely subdued by the Dutch, and became part of the Province of New Netherland.

The colony of Maryland was founded as a home for persecuted Catholics. Sir George Calvert, of Yorkshire, England, a man of liberal education, large experience, and a devoted Catholic, was desirous of founding a colony which should afford a home for the persecuted Catholics of his own land, and should grant equal toleration to all creeds. About the year 1639 he obtained from king Charles I a charter for a new colony on the Chesapeake, but died before the colonization began. His son, Cecili Calvert, received the charter June 20, 1632, and named the new province Maryland. His charter provided for the religious bodies of Holland and England to have equal privileges. The provisions of the charter were the most liberal that had yet been granted. Christianity was the religion of the State, but no preference was expressed for any creed. Free-trade was guaranteed, and arbitrary taxation forbidden. The power of making the laws was conceded to the representatives. Under these liberal provisions, and the prudent conduct of the officers and the colonists themselves, the enterprise was very prosperous, and the colony grew very rapidly. Religious toleration and freedom of conscience were reiterated in the legislation of the colonial Assembly, and Maryland, along with
until 1705. But the largest liberty of conscience was allowed, and a field opened for the sowing of precious seed.

South Carolina was colonized in 1670, and Old Charles-
ton founded. The present city of Charleston was laid out and plans drawn for the town of its later and larger name.

In 1686 South Carolina began to receive the Huguenots (q. v.) from France, and in a short time had more of these French refugees than any other American colony. The proprietors pledged them protection and citizenship, but, owing to the unsettled condition of their po-
itical and religious doctrines, they were kept under suspension for many years. The first general act of enfranchisement was passed in their favor in May, 1681, and their full political rights were established in 1697. In 1695 began the administration of John Archdale as governor. He was a Quaker of distinction, and ruled with such wisdom and moderation that the colony greatly prospered. He was instrumental in procuring the passage of a law by which all Christians, except the Catholics, were fully enfranchised; and the exception was made against his earnest protest. The policy of South Carolina, as well as that of her northern sister, had been one of religious toleration; hence, when the Scotch Presbyterian church was established by law, but Christians of all denominations were welcomed to her shores. The Dutch came from the banks of the Hudson, the French vine-dressers were sent by king Charles; Churchmen and Dissenters from England, Irish peasants, Scotch Presbyterians, and Huguenots, found home and welcome under the genial sun of South Carolina.

The colony of Georgia was founded as an asylum for the oppressed poor of England and the distressed Protestants of other lands. James Oglethorpe, an English cavalier and member of Parliament, obtained a charter from George II, and the settlement of the territory between the Savannah and Altamaha rivers was organized and granted to a corporation for twenty-one years in trust for the poor. This charter was dated June 9, 1732, and the new province was named Georgia, in honor of the king. The organization of the colony was on a liberal basis. Oglethorpe, who was the first governor, was a High-
Churchman, but made no distinction among the immi-
igrants who came. Swiss peasants, Scotch Highlanders, and German Protestants from Salzburg came and made their home with the English. Then came the Mor-
avians, with their religious views, and settlers from Holland, in the persons of John and Charles Wesley and George Whitefield. The labors of the Wesleyans were not pro-
ductive of any permanent results, but those of White-
field were more successful.

The colonization of Florida was first effected in 1565. Pedro Melendez, a Spanish soldier of a wicked disposi-
tion and evil habits, was commissioned by Philip II to explore the coast of Florida, conquer the country, and plant a colony in some favorable site. Melendez ar-
rived in sight of land on St. Augustine's day, but did not land until Sept. 2. The harbor and the river which enters it were named in honor of their saint. On the 8th of the same month, after the proclamation of the Spanish sovereignty and the celebration of mass, the foundations of St. Augustine were laid. This is the old-
est town in the United States, having been founded seventeen years before Santa Fe, and forty-two years before and a beginning made in building ten years later. But their dastardly leader was a cruel monster who hoped to regain the favor of his countrymen by murdering the members of a Huguenot settlement about thirty-five miles above the mouth of the St. John's River. The work was done in a most heartless manner, and the Englishman of the West Indies took it up. The blood of the unfortunate Huguenots was subsequently avenged by Dominic de Gourgues, a soldier of Gascony, who attacked successively three Spanish forts on the St. John's, captured the inmates, and afterwards hanged the principal of them.

When La Salle visited the lower Mississippi valley in 1682 he took possession of the country in the name of Louis XIV of France, giving it the name of Louisiana. A settlement was attempted by Iberville and his follow-

ers at Biloxi, in 1699. He died before the project was fairly successful, and was succeeded in command by Bienville, who was driven from his post by the Indians and compelled to take refuge on the banks of the Mississippi. In 1718, and began to build a town on the site he had formerly selected as headquarters, and named the city New Orleans. Others succeeded Bienville in the gov-
ernorship of the new territory, but he was reappointed in 1718, and remained under control of that power for thirty-eight years, but was restored in 1800, and in 1808 sold by Napo-
leon Bonaparte to the United States for $11,250,000 and the assumption of certain claims due from the French government to citizens of the United States, amounting to $3,750,000. Thus was purchased, at a cost of $15,000,000, nearly all the territory included in the present states of Louisiana, Arkansas, Missouri, Iowa, Minnesota, Dakota Territory, Nebraska, most of Kansas, Indian and bouncing territories, part of Colorado, and the whole of the Texas and the New Mexico Territory. This was afterwards divided up from time to time as the wants of the population required. The Mississippi valley, while under the control of the French, had many settlements of French Catholics, which have left their impress upon the country to a greater or less extent.

The first attempt to colonize Texas was by the French under La Salle in 1685; but this great explorer lost his life in returning towards the Mississippi during the same year, and the men who were left to hold the post established were either killed or driven away. In 1809 a trading-post at a mission was established by the Spanish, and subsequently other settlements were made by the same power. Then in 1735 a French colony was sent into Texas from the Red River. But neither the French nor the Spanish held possession of the country un molested. After the Louisiana purchase, difficulty arose between Spain and the United States as to the boundary, the United States claiming the territory west to the Rio Grande, while Spain claimed it east as far as the Sabine. This was finally settled by treaty, in which the United States guaranteed to Spain her territory west of the Sabine, in the year 1819, and Texas formed a part of it, being united under one government with Coahuila. But while Coahuila was exclusively Mexican, Texas was settled largely by colonists from the United States, generally under grants of land from the Mexican government. Thus there ex-
isted a natural rival between the Texans and the Mex-
icans, and, after much dissatisfaction with the govern-
ment of the latter, the former fought for and gained their independence in 1836. Texas was annexed to the United States in 1846.

Tennessee was originally a part of North Carolina, and was settled mainly by emigrants from that State. Kentucky belonged to Virginia, and was settled like-
wise by Virginians. The other Western States lying east of the Mississippi were included in the Territory north-west of the Ohio. The French under La Salle had explored this region, laid claim to it, and established and maintained trading-posts on the banks of the Ohio, but they finally relinquished their claim to it. A consid-
erable part of this territory was claimed by Virginia, Pennsylvania, New York, and New England under their original territorial grants; but these claims were all relinquished except a part belonging to Connecticut, called the Western Reserve, and a part in the Northwest Territory, belonging to Ohio, Indiana, and Illinois, each including about 3,700,000 acres. Emigration extended into this section from the older states, as a rule, on the lines of altitude, although there were many exceptions, and each new settlement par-
took of the characteristics of the region from which it was peopled. The first settlement in Ohio was at Ma-

LOUISIANA
rietta in 1788, formed by a colony from New England. Many localities in Southern Ohio were settled by emigrants from Virginia, while the northern section was peopled by New-Englanders. The oldest settlements in Indiana and Wisconsin were made by the French at Vincennes, Corydon, and other places in that vicinity, in 1702. Michigan and Illinois, as well as Wisconsin and Minnesota, had numerous settlements which were formed by the French Catholics in the 16th and 17th centuries. Subsequently these states, especially Michigan, Minnesota, and Illinois, were filled up largely from the New England States and New York.

Like the rest of the Mississippi valley, Iowa was explored and claimed by the French, but was a part of the Louisiana purchase, and so became the property of the United States government. The first white settlements under the authority of this government were made in 1833-34 at Port Madison, Burlington, and Dubuque. The inhabitants of Iowa have always taken high ground on all questions of civilization, education, and morals.

The Pacific Slope has received its population in recent times. The southern portion extending far towards Texas was formerly a Spanish possession, and there yet remain many Spaniards and Mexicans within those states and territories. The population of California grew up very rapidly after the discovery of gold in 1848. Miners, speculators, and adventurers rushed thither from all parts of the country, and formed a very motley crowd. Many of these remained, but by far the larger portion returned to their former homes or wandered to other lands. Oregon was included in the Louisiana purchase, and began to be settled by emigrants from the States about 1832. In 1834 the missionary colony of Dr. Marcus Whitman and Rev. Mr. Spalding entered Oregon, and in 1842 the emigration to that region was large.

The settlement of Utah constitutes a remarkable chapter in the history of our country. The Mormons (q.v.), under the leadership of Joseph Smith, made their fabled city of Salt Lake, the site of which was given to them by the government in body of considerable numbers; but their theories and habits were distasteful to the people of that state, and they were compelled to remove in 1846. They found their way across the Mississippi into Illinois, where they founded the city of Nauvoo. Here they increased to ten thousand, but were driven out. The city was burned in 1847, and the Mormons again removed, and took possession of the lands of the United States, with, seemingly, no power to check them. A new era seems to be dawning. Law-abiding and Christian people are finding homes within the limits of the territory, and a population is fast growing up whose influence will secure the execution of the laws of the land.

New Mexico was colonized by the Spaniards about the close of the 17th century. Many missions were established by the Roman Catholics and many of the Indians were converted to that faith. The mineral wealth of the country was discovered, the colonists opened and worked the mines, and enslaved the Indians for that purpose. At length the Indians shook off the power of their oppressors and drove the Spaniards from their territory; but near the close of the 17th century the latter regained a part of their former power. In 1821, along with the rest of Mexico, New Mexico became independent of Spain. This part of the country was ceded to the United States in 1848, when it was ceded to the United States. The Gadsden purchase was added in 1853, when it included all of Arizona and part of Colorado. Arizona was set off from it in 1863, and a portion of Colorado in 1865. The inhabitants are largely Mexican, Spanish, and Indians, with an increasing number of emigrants from the United States.

2. Effects of more Recent Immigration.—The United States are peculiar among all the nations of the earth, as being composed of a population entirely foreign in its origin. While other countries have been invaded and the languages of the invaders have effaced or submerged that of the natives, yet the old stock has not been entirely rooted out, but has become the basis of the succeeding race. In English history, the Anglo-Saxon united with the old Celtic stock, and the Norman with the Saxon, forming the Anglo-Norman race of the present. But in America the invaders have either been treated as aliens and intruders, and are fast declining towards extermination. The great breadth of our unoccupied lands, and the excellent opportunities for obtaining cheap homes, have rendered America a favorite resort for emigrants from all parts of the world, so that at the present time more than thirteen per cent. of our population are foreign-born. The aggregate immigration from 1820 to 1840 was 750,949; from 1841 to 1850 it was 1,713,251; from 1851 to 1860 it was 2,988,214; from 1861 to 1870 it was 2,491,461; and from 1871 to 1875 it was 2,177,108; making a total of 5,781,073; in the year ending June 30, 1880, it was 457,071 persons. Of this vast number about one fifth have been from Ireland, one fourth from England, one tenth from Scotland and Wales, four fifteenths from Germany, one thirtieth from France, the remainder (nearly one sixth) from Scandinavia, Switzerland, Italy, Austria, Spain, Portugal, Russia, Roumania, etc., with a whole one twelfth of this immigration has been from Roman Catholic countries, and, in addition to this, a large proportion of those from other countries are of the same faith. Thus we have added to our population from foreign countries a large Catholic element, besides the natives of the United States, and the rapid increase in their numbers by the ordinary methods of propagation. Among these Catholics have come many Jews (q.v.), some from choice, others because of their expulsion from their European homes, who have used their influence as far as they have been able to induce the government to their own ideas. Officers have been elected at the dictation of the priesthood, political parties and municipal governments have been under their control, and vast wealth has been amassed at the expense of the public. They have maintained their own schools, and large numbers have been taken from the public-school system of our states. They have fought hard to exclude the Bible from the public schools, and, when it was accomplished in a few instances, denounced them as godless schools. Under pretext of the right of conscience, they have sought and obtained a division of public lands for the use of the professing of their faith, and the rapid increase in their numbers by the ordinary methods of propagation.

Protestant immigrants, as a rule, have been in sympathy with our institutions from the first, and have readily fallen in with American ideas and practices. The recent accessions from the British isles have found the institutions and customs established by their ancestors, and have readily accommodated themselves to the new order. German Protestants as well as Roman Catholics have less readily Americanized. They continue, as far as possible, to use their native language and retain their German habits. They gather into communities of their own, and thus, in a degree, isolate themselves from American society. Of the great mass of Protestant immigrants who arrive here from European countries, by far the larger part are poor; but in so far as they honestly endeavor to adapt themselves to their new surroundings they make good citizens. The Jews who come among us are mainly from Germany and Switzerland, and are compelled to seek their society among their own numbers. They live together in communities, and have but little sympathy with American customs. With our Sabbath and the prevailing religion they are utterly at variance. A few infidels arrive from time to time, and join either the frontier or some other community, so much of our present system as is designed to restrain
Sabbath-desecration and preserve a wholesome regard for the laws of God. The Mormons of Utah feel it to be their interest to add to their numbers by means of converts secured in Europe. Concerning these, however, make their homes within the limits of the Mormon territory, and their influence is not felt except in the increased strength of the sect with which they have united. There have been considerable acceptions to our population in late years from China, mainly on and near the Pacific coast. The Chinese, however, do not come in large numbers and simply to improve their temporal condition, and then return to their former home. There are certain kinds of labor in which they have been engaged, and services may be had at a lower price than those of other people. Hence Chinese cheap labor has become a proverb among us, and has been the occasion of serious disturbances in various parts of California, laborers and politicians, the pretext for deeds of violence and shame. The general influence of foreign immigration upon our institutions has been most noticeable in large cities and towns, and in respect to the observance of the Sabbath and temperance. Very much who come to from foreign lands have been addicted to the use of strong drinks at home, and their improved financial condition and the absence of restraint give them opportunities for indulging their appetites and the excesses which exert a very baleful influence upon our country. The traffic in lager beer is almost entirely dependent upon our German population for its maintenance. With them the Sabbath is a holiday, and is spent in visiting beer-saloons, parks, and gardens, and picnic excursions of various kinds. Wherever they exist in sufficient numbers to exert a controlling influence, their shops are kept open on the Sabbath, and the traffic is carried on nearly as on any other day. Their example is contagious. Many Americans who first looked upon the practice with horror, in time have become so accustomed to it that they no longer feel any annoyance, and finally begin to purchase goods upon the Sabbath. In this way the former reverence for the sacred day, so nearly universal in our country, is fast passing away, so that to-day more people are found pleasure-seeking, or engaged in labor, on the Sabbath than on any other day. The evils are more especially apparent in large cities. Many of these, or at least whole wards in them, are made up almost entirely of foreigners. These become citizens while yet ignorant of the duties of citizenship, and fall under the control of unprincipled politicians, by whom the design of a free government is perverted, and the principles of morality are disregarded.

3. Denominational Organization. — The early colonists, who had never known any other relation between the Church and State than the control of the latter over the former, naturally began with the old order of things; but they soon perceived that the liberty which they sought was not consistent with such control, and they gradually abandoned it. The opposition was thus not to control the Church by law, but to emancipate conscience; and at the organization of the Federal government all were ready for a Church free from State control. See Church and State. The early settlers of Virginia brought with them the Episcopal form of service [see England, Church of England], and it was carried to other parts of the land. Out of this grew the Protestant Episcopal Church (q. v.) of this country. The Reformed (Dutch) Church (q. v.) was the outgrowth of the Dutch settlements in New York and New Jersey. The Puritans of New England retained their peculiarities, which have come down to us in the Congregationalists (q. v.). The Presbyterian churches (q. v.) of this country originated from parties of immigrants from England, Ireland, and Scotland, who settled within the limits of various colonies. These united subsequently in forming the General Assembly on the other side of the Atlantic. The Baptists (q. v.) originated among the Puritans and were banished from their midst. Their history is well given under the appropriate heads. Methodism (q. v.) in this country was propagated by the followers of Wesley. Their zeal and energy were great, and their growth rapid to a consequence. The Roman Catholics of Maryland were from England, those of Florida from Spain, those of the
UNIVERSALISM
in which he asks that the members of this body may be one, as he and the Father are one. See Neander, Hist. of the Church, i, 180, 181; Hagenbach, Hist. of Doct. i, 195; Bingham, Ch. Antig. bk. vi, ch. iii; bk. xvi, ch. i.

UNITY OF God is a term used to denote that there is but one God or self-existent being. The unity of God is argued from his self-existence, his independence, the perfection of his nature, his omnipotence, and the unity of his works of nature; the works of nature were last sight of by heathens, and maintained by Israel and in the Gospel. The Scriptures make no attempt to prove the doctrine, but assert it unequivocally. See Exod. xx, 3; Deut. iv, 35; vi, 4; Ps. 110, 10; I Cor. viii, 4, 6, etc. When the doctrine of the Trinity was first formulated, it became necessary for the Church to declare that this does not conflict with the doctrine of his unity. See Hagenbach, Hist. of Doct. i, 192, 330; Van Oosterzee, Christian Dogmatics, i, 250.

UNITY OF THE HUMAN RACE. See ADAM.

Universal Bishop, a title assumed by the Roman prelates succeeding Gregory I (590-604). The patriarchs of the Eastern Church, particularly John Chrysostom, claimed the title of ecclesiastical patriarch. This Gregory denounced as arrogant and anti-christian. The title, however, was adopted by the successors of Gregory in its original signification. See Trevor, Rome, p. 104; Schaff, Hist. of the Christian Church, ii, 528 sq. See ECCUMENICAL BISHOP.

Universal Friends, a sect which arose in Yates County, N. Y., near the close of the last century, professing to be followers of Jemima Wilkinson (q. v.), a Quakeress, who professed to work miracles, and assumed the title of "the universal friend of mankind." The sect is now almost extinct, and the Universal Friends are sometimes called Wilkinsonians (q. v.).

Universal German Library is a work begun in 1766, under the direction of Frederick Nicolai, with about fifty writers; afterwards increased to one hundred and thirty. It became at once the public organ of all those who felt called upon to lift their voice against superstition, fanaticism, and prejudice, as well as everything which was spiritually elevated or that was related to a more lively imagination and a deeper feeling. It was the highest expression of rationality. Not alone the orthodox, nor supposed enthusiasts and pietists, nor Lavater, but Goethe, and even poetry, and philosophy wherever it arose above arbitrary and secular discussion (e. g. Kant and Fichte), were spurned by this inquisitorial court as folly, blurriness, and secret Jesuitism. The moral virtue of the age was by no means converted into intolerance and bigotry. All the articles in the Library, however, were not colored by Nicolai's skepticism, for there were also many weighty opinions of worthy scholars. The work served an important purpose in bringing to the knowledge of the world the literary productions of value, and in fostering and encouraging a taste for reading. See Hagenbach, Hist. of the Church in the 18th and 19th Centuries, i, 307 sq.

Universal Redemption. See Atonement; Redemption.

Universalism. The ultimate restoration of all sinners to happiness and the favor of God is maintained by Universalists (q. v.) on the ground that the final conclusion of any soul from heaven would be contrary to the immutability of God; that the wrath of God is only exercised against sin—repentance, even in the future life, bringing about a restoration to his love. But this supposes a distinction between sin and the sinner, which is not only without foundation in the Holy Scriptures, but is contradictory to the—that we are nowhere told, as regards a future state, that God's wrath against sin will only continue so long as sin remains, but that the sinner himself who does impetently will be eternally punished.

Again, it is asserted that Scripture has no plain dog-
matic statements at all as to the possibility or impossibility of repentance after death (i.e. in hell). There are terrible threats of divine vengeance which will overtake the transgressor of the second commandment, and there are promises of a hope embracing all times, existence, and states, and the specific question at issue does not seem to be raised by Scripture. Such utterances are supposed to be contained in 1 Cor. xv, 22-28; Eph. i, 9, 10; Phil. ii, 9-11; Col. i, 19, 20. Now it may fairly be admitted that the passages cited do appear to favor Universalism, and they might have been so understood, had it been elsewhere taught in Scripture; but they are of no weight whatever in opposition to its clearest and most emphatic declarations. The apostle here says that God will be all in all—that all things shall be sub- duced to the supremacy and the rule of God. Not that every tongue shall confess that he is Lord of all. But such statements must be viewed in connection with other passages of Scripture which contradict the doctrine of universal salvation, and also according to scriptural usage and the meaning which can only be given to many parallel passages. For example, our Lord says that when lifted up on the cross (referring to the present efficacy of his atonement) he will draw all men unto him (John xii, 32). No declaration can be more positive and unequivocal than this; and yet, literally understood, it is not merely untrue, but contradictory to other very positive and unequivocal declarations. How can any one come to Christ except the Father draw him, and that they only are drawn who hear and learn of the Father (vi, 44, 45)—certainly not all men. Such is the usage of Scripture language; a thing is spoken of as being really effected to indicate the certainty of the purpose, and that every provision has been made for its accomplishment, though eventually through man's sinfulness God's benevolence may be frustrated. See PURGATORY.

Again, Christ died for all, and God would have all men to be saved—statements obviously leading to the supposition, at least, that all mankind will at last be saved. Yet in other passages of Scripture there is an apparently discordant statement that Christ died for "many," laid down his life for "the sheep," and the object of redemption is said to be to "gather together in one the children of God which are scattered abroad" (Blunt, Dict. of Theol. s. v.). These passages are to be reconciled by the theory that the provision involved is not a mere provision for the salvation of all, but its actual effect will depend upon the voluntary embracing or rejecting of it on the part of men individually. See REDEMPTION.

Dr. Chauncey's arguments in favor of Universalism (Satisfaction of All Men) are these: 1. Christ died not for all mankind, but only for a particular class; and even so, universally, and without exception or limitation, for the Sacred Scriptures are singularly emphatic in expressing this truth (John ii, 29; iii, 16, 17; Rom. v, 6; 1 Cor. xv, 3; 1 Thess. v, 10; Heb. ii, 9; 1 Pet. iii, 18; 1 John ii, 2). 2. It is the purpose of God according to his good pleasure that mankind universally, in consequence of the death of his son Jesus Christ, shall certainly and finally be saved (Rom. v, 12, etc.; viii, 19-24; Eph. i, 9, 10; iv, 10; Col. i, 19, 20; 2 Tim. i, 4). 3. As a means in order to men's being made meet for salvation, God will sooner or later, in this state or another, reduce them all under a willing and obedient submission to his moral government (Pss. viii, 5, 6; Matt. i, 21; John i, 29; 1 Cor. xv, 24-29; Phil. ii, 9-11; Heb. ii, 6, 9; 1 John iii, 8). 4. The Scripture language concerning the reduced or restored, in consequence of the mediatory interposition of Jesus Christ, is such as leads us to infer the universal humanity of mankind will be saved universally (Rev. xv, 13). The opponents, however, of Dr. Chauncey and this doctrine observe, on the contrary side, that the Sacred Scriptures expressly declare that the punishment of the finally imperfect shall be eternal (John iii, 18; Rev. xi, 18; 1 Cor. vi, 24; Mark iii, 29; ix, 48; Luke xii, 10; Eph. ii, 17; 2 Thess. i, 9; Heb. i, 4, 6; x, 26, 27; 1 John v, X.-T'r.

16; Jude xiii; Rev. ix, 8; xiv, 11, xx, 20). See HELL.

In short, severe as may seem the doctrine of eternal punishment, and however much we may naturally wish to avoid its acceptance, this is not the question we have to solve according to our inclination. We must ask, with reference to all matters connected with the future world, What has God revealed? what has he declared? The Scriptures are the ultimate appeal, and these have not been heard. We must therefore have nothing to do with any opinions upon the subject. Moreover, the same abstract arguments which are often adduced against the everlasting punishment of sin apply to its present punishment, and, indeed, against the fact of sin itself. If God loves man and loves holiness, why does he suffer him to sin at all? We are thus brought back to Butler's immortal argument, and constrained to bow to the sovereign will of the Almighty. The following judicious remarks are from Van Oosterzee, Christian Dogmatics, ii, 438:

"The duration of future punishment is most definitely represented in Holy Scripture as absolutely endless (Mark x, 10; Rev. xxii, 5). Punishment does not in itself denote absolute endlessness, it is surely a different matter when eternal pain is without any limitation associated with eternal life. Matt. xxv, 41 will here only call to mind the fact that those who maintain the contrary of restorationism can bring forward numerous and strong arguments in the name of the Lord and his will. But there, at any rate, the possibility of an endless misery is most distinctly set forth in Matt. xxi, 24, and such words as those in Luke xv, 16, Matt. xxv, 10, 41; xxvi, 24 could hardly be vindicated from a charge of exaggeration if he who had himself, and that with light of light in the outer darkness, and been able and willing to kindle it before others' eyes. In no case could such a ray be seen of an unpunished continence. But the Lord, as it were, viewed even psychologically, this latter is certainly nowhere to be looked for less than in hell a bell of sorrow and despair, not to say that the Gospel nowhere opens up to us a certain prospect of the continuance of the gracious work of God. This is the meaning of the words of grace and of love. The talks of harshest must by no means forget that sinful man is a very partial judge in his own case; that nothing less than the best and the most perfect things may be held up as the prospect of the case here supposed; and that there always will be, according to the teaching of Scripture, an equitable distinction in the rewards as well as in the punishments of the future (Luke xii, 47, 48; Rom. ii, 12 sq.). Ay, even if men might flatter themselves with a diminution or postponement of the punishments there would always be a remembrance of the incalculable mischief which they had done to themselves and others, and this would be a dark cloud before the sun of an eventual happiness. Least of all could they hope for such an end who have known God and his salvation, and who, as the apostle gratefully despised it (Matt. xi, 34; Heb. ii, 5), as to the beareth and others who, entirely without their own fault, have missed the chance of life, Holy Scripture teaches us to persuade us to believe that these should summarily, and on that account alone, be the victims of an eternal damnation. While only one class of sinners are considered here and not, as in John, 12, the Merciful One will make it known to men in some way (1 Pet. iv, 19) that they are saved, and this is a question of salvation, even in this respect, of his own government of the world; but we must take careful heed that we do not try to be more merciful and wise than he to whom, as long as it continues to be sin, is thoroughly damnable. Even in preaching the Gospel, his servants are not free to leave this dark side entirely unmentioned. The statement of it should always be joined with that of the friendly light of grace, and let the preacher take care that he does not make his hearers in the way of taking such words as unbelieving doubt by yielding to the desire to paint hell as black as possible (see further on this subject, the prospect of the sinner is that of going to his own place, i.e. to the land of his own choice, where he may still continue to dwell.

See PUNISHMENT, FUTURE.

Universalists, a Christian sect believing in the final destruction of sin and the reconciliation of all souls to God through the mediation of Jesus Christ. They claim that there is proof of the existence of such a doctrine in Universalism, and of the activity of its advocates under various names, from the introduction of Christianity to the present time. 1. Origin and History.—(1) Informal.—1. In Former Centuries. The views of Universalism after the days of the apostles are in the writings of some of the more prominent Gnostic
sects, as the Basilidians, Carpocratians, and Valentinians, about A.D. 130. The ultimate purification of the race was, according to their theories, by means of the discipline of the souls of the wicked through transmigration, according to the teaching of A.D. 184.

Universalism is taught as resulting from the prayers of the saints affected by the miseries of the damned. The Almighty is represented as granting this favor to the redeemed on account of the great love which he bears to them for their fidelity. In 185 Clemens Alexander, famous for his learning, piety, and zeal, taught Universalism on the ground of the ever-continuing freedom of the will, the deep mental and spiritual anguish occasioned by the light and knowledge of the truth until it leads to repentance, and then the harmony of the soul with God. Origen's position, abilities, and untiring efforts for the spread of the Gospel gave him great influence with his pupils, and with the Church at large, in whose councils he laid the foundations of the doctrine in addition to his position and work in the school of Alexandria. Origen, in private life, was a defender of the Church and an ardent eulogist. Origen was the first Church historian, also defending Origen's doctrines in connection with Pampilius, of the theological school at Cesarea, one of whose distinguished pupils was the celebrated Gregory Thaumaturgus, a great admirer of Origen's teaching. In A.D. 202, he wrote a defense of Universalism and an essay on God's mission in the world. In A.D. 284, Origen was made a presbyter, and at the age of 60, he was sent to his home city, Alexandria, as a delegate of the Universalist church. In A.D. 364, Titus, bishop of Bostra, wrote in advocacy of Universalism, stating that, although there are torments in the abyss of hell, they are not eternal, but that their great severity will lead the wicked to repentance and to salvation. Gregory of Nyssa, A.D. 380, also advocated Universalism on the same grounds. Contemporary with him was the justly celebrated defender of orthodoxy, Didymus the Blind, a successor of Origen in the school at Alexandria, and a zealous advocate of Universalism. Unlike Origen, who was Jerome, eminent alike for his abilities, his inconsistencies, and instability. Universalism as taught by Origen is clearly and ably set forth by Jerome in his commentaries on the epistles, and in his letters. John, bishop of Jerusalem at this period, was also an advocate of Universalism, and by opposition to Origen's teaching, Diodorus, a teacher of great repute in the school at Antioch, and afterwards bishop of Jerusalem, was also a Universalist, who, in opposition to the then general prevailing of allegorical interpretation, strictly adhered to the natural import of the text in his many commentaries on the Scriptures. He defended Universalism on the ground that the divine mercy far exceeds all the effects and all the deserts of sin. His pupil and successor in the school, Theodore of Mopsuestia, A.D. 420, called "the crown and climax of the school of Antioch," and by the Nestorians, whose sect he founded, "the interpreter of the Word of God," and whose writings were text-books in the schools of Eastern Syria, was a prominent and influential Universalist. His theory was that sin is an incidental part of the development and education of the human race; that, while some are more involved in it than others, God will overrule it for good; and that all will benefit, in great measure, in gospel blessing. He is the reputed author of the liturgy used by the Nestorians, a Church which at one time equalled in its membership the combined adherents of both the Greek and Latin communions, and which has had no rival in military zeal. In the addresses and prayers of this liturgy Universalism is distinctly avowed. Theodoret, A.D. 430, bishop of Cyprus in Syria, a pupil of Theodore of Mopsuestia, was also a Universalist, holding the doctrine on the theory advocated by the Antiochian school.

For centuries prior to this, certain opinions of Origen on pre-existence and the salvation of the devil had been in dispute and pronounced heretical by a synod; but his doctrine of the universal salvation of the human race had not been involved in this condemnation. At a local council called by the emperor Justinian at Constantinople, in A.D. 544, Origen's doctrine of universal salvation was declared heretical. Nine years later another council was held by the same authority at the same place, when condemnation was pronounced on the Nestorians, although their belief in Universalism was not mentioned. It has been common to call this an ecclesiastical bull, but without warrant (see the action of the Latin Church in refusing to recognize it or to send a legate to it). Döderlein, in his Institutes of Christian Theology, after quoting the decree of Justinian against Origen, says, "That was not the belief of all, and in proportion as any one was enlightened, the more did he cherish and defend the hope of the termination of future torments." Drexelius, in his defence of eternal punishment, gives this testimony: "That God should doom the apostate angels and men at the day of retribution to eternal torments seemed so hard and incredible as to be a doubtful thing. Detergent, a man of Christ, who was mighty in the Scriptures, and no less famous for his admirable wit and excellent learning, presumed to maintain in his book of principles that both the devils and the damned, after a certain period of years, the fire having purged or cleansed them from their pollutions, should be received to grace. Augustine and others set forth his error and condemned him for it. But, notwithstanding their condemnation, this error has found a great many in the world who have given it a kind of civil reception. The Anith, heretics so called, dispensed this error throughout all Spain under various interpretations." Gieseler, the ecclesiastical historian, says, "The belief in the inalienable capacity of improvement in all rational beings, and the limited duration of future punishment, was so general, even in the West, and among the opponents of Origen, that, even if it may not be said to have arisen from his teaching without contamination of his system, it is entirely independent of his system." And Augustine bears this testimony: "Some—nay, very many—from human sympathy commiserate the eternal punishment of the damned and their perpetual torture without intermission, and thus do not believe in it; not, indeed, that it is very terrible, but only because they cannot persuade themselves of the severe things according to their own feelings, and giving a milder meaning to those things which they think are said in them more terribly than truly." Universalism almost wholly disappeared during the period known as the Dark Ages, although there are occasional glimpse of it even in the mutilated records which the papal Church has permitted to descend to us. In the 7th century, Maximus, the Greek monk and confesser, taught Universalism; in the 8th century, the monk of Ireland was deposed from the priesthood for teaching that when Christ descended into hell he restored all the damned; while in the 9th, Abbot Symeon the eremite, a famous philosopher who stood at the head of the learned of the court of France, was a bold defender of Universalism. In the 11th century, the Albigenses were, according to papal authorities, Universalists; in the 13th century, the Church was involved in the Black Legend, in which the pope was said "that all men will eventually be saved." In the 13th century, Solomon, bishop of Bussorah, discussed the question of universal salvation, answering it in the affirmative. The Lollards in the 14th century taught Universalism in Bohemia and Austria; and at the same period a council convened by Langmann, archbishop of Canterbury,
bury, gave judgment against Universalism as one of the heresies thus taught in that province. In the early part of the 15th century, a sect called "Men of Understanding" taught Universalism in Flanders, advo-
cating it on the ground of the German Mystics, as did Thomas, De Vriendt, John Westen, and others, who have been called "the Reformers before the Re-
formation," whose writings Luther industriously studied and greatly admired.  

2. In Modern Times.—With the Reformation, Uni-
versalism made a fresh appearance early in the 16th century, chiefly among the so-called Anabaptist sects. The seventeenth article of the Augustinian Confession, 1580, was expressly framed to "condemn the Anabap-
tists, who maintain that there shall be an end to the punishments of the damned and of the devils." Denk, Hetzer, and Stanislaus Pannonius were the most emi-
nent defenders of Universalism at this period. Later in the century, Samuel Huber, divinity professor at Wittenberg, taught Universalism, it is alleged by Span-
heim; and because, says Mosheim, he would not go back to the old methods of teaching, "he was compelled to relinquish his office and go into exile. Early in the 17th century, a professor of Theology at Marburg, Professor Altorf, published "a theological and philosophical demon-
stration that the endless punishment of the wicked would argue, not the justice, but the injustice, of God." John William Petersen, at one time court preacher at Lutin, and subsequently court preacher at Friesdorff, defended Universalism with such zeal that he was cited before the consistory, and, as he could not conscientiously renounce his convictions, was de-
prived of his office and forced into private life. In his retirement he wrote and published three folio volumes on Universalism, entitled Mysterium Postracktastatis Puntiis, in which he mentions many who had defended that doctrine. The volumes appeared between the years 1700 and 1710. They opened a century of spir-
ited controversy, of which Mosheim says, "The points of theology which had been controverted in the 17th century were destined to be excite fresh disputes in the 18th, such as the eternity of hell torment, and the final restoration of all intelligent beings to order, perfection, and happiness." Dietelmair, an opponent of Uni-
versalism, wrote on its history about the middle of this century. In the preface to his work he speaks of the "eternity of hell torment" as being "sufficiently enough within the very bounds of the orthodox Church in the end of the last century and the beginning of the present." Among the defences of Universalism contained in the first vol-
ume of Petersen's work was the Everlasting Gospel, at-
tributed to Paul Siegvolk, which was but an assumed name of George Klein-Nicolai, deposed for his Universalism as preacher of Friesdorff. He published other works in defence of Universalism, but the most rapid and lasting popularity belonged to the Everlasting Gos-
pel, which in forty-five years passed through five edi-
tions in Germany. In 1726 John Henry Haug, pro-
fessor at Strasbourg, having procured the assistance of Dr. Ernst Christoph Hochman, Christian Dippel, Count De Marcey, and others, commenced the publication of the 
Berleburger Bibel, an entirely new translation and commentary of the Holy Scriptures. They made themselves familiar with all the writings of the Mystics, and in their great work taught and defended Univer-
salism from the mystical standpoint. Their work fills eight large folio volumes, the last of which was published in 1742. Strong persecution assailing them, and no printer being willing to risk his office in doing their work, they were compelled to publish their own type. They persevered, and after they had been estab-
lished was at last broken up by their enemies, the members fled to America, taking their press with them, and it was set up by Christopher Sower in German-
town, Pa. One of De Marcey's intimate friends was George De Benneville, born of French parents in Lon-
don in 1709. Before he was twenty years of age he

commenced preaching in France, where he was arrest-
ed and condemned to die, but was reprieved on the scaffold by Louis XV. Making his way into Germany, he there preached Universalism several years, and then came to America. In 1727 appeared Ludwig Gerhard's Complete System of the Evidence and Infallible Ration-
ation of All Things, together with the Baseless Opposite Doctrine of Eternal Damnation. The author was at one time professor of theology in the University of Rostock, and his publication called forth, according to Walch, no less than fourteen volumes in reply. Jung-
Stilling, in the latter part of the 18th century, an able defender of Christianity against German rationalism, was an ardent and eminent Universalist. Prof. Tho-
luck wrote, in 1855, that this doctrine "came particular-
ly into notice through Jung-Stilling, that eminent man who was a particular instrument in the hand of God for keeping up evangelical truth in the latter part of the former century, and at the same time a strong pa-
tron to that doctrine." During the present century, Universalism has made rapid progress in Germany. Olshausen says of it that it "has, no doubt, a deep root in noble minds, and is the organism of the higher reli-
gious aspirations for a fuller expression of the conception of the resurrection." Dr. Dwight wrote in 1829 "The doctrine of the eternity of fut-
ure punishment is almost universally rejected." Simi-
lar testimony was borne by Prof. Sears in 1834: "The current hypothesis is that in the middle state, interven-
ing between the resurrection and the consummation, the wicked will gradually attain to perfection; and that to all the wicked, whether men or angels, the Gospel will be preached, and that they will ultimately accept it and be restored." In Switzerland Universalism was advocated in the last century by Martin Hesse, whose Welt Unverwissenschaft was translated and republished both in England and America. In 1786 Ferdinand Oliver Pettipiece pro-
mulgated Universalism in a work entitled Thoughts on the Divine Goodness, of which several English and Ameri-
can editions have been published. Lavater, the great physiognomist, and the intimate friend and inmate of Jung-Stilling, was a Universalist. Later J. H. D. Zechkoffe advocated Universalism in his Stemden der Andacht, the favorite book with the late prince Albert, and after his death translated into English by request of queen Victoria for general circulation among her subjects. In 1849, in his last works, the late Prof. A. C. Cuppe wrote in defence of Universalism. Later in the same century, Chais de Sourcesol wrote and published in its defence. In the present century the Coquerels—father and sons Athanase and Etienne—have advocated it in the pulpit and from the press. In Scotland Rev. James Purves wrote in defence of the doctrine, and recently established a Universalist society about 1770; Rev. Neil Douglass founded another about 1800; and within twen-
ty-five years four or five others were started, largely through the instrumentality of Mr. Douglass and his successor, Rev. William Worrall. These societies are either disbanded or merged in the Unitarian churches, which in Scotland are all Universalist in their views of destiny. Prominent among the Scotch Unitarian Uni-
versalists was Dr. T. Southwood Smith, who published, in 1816, Illustrations of the Divine Government, a book that has passed through several editions. Thomas Erskine, recently deceased, was an able preacher on Universalism. At present there are a few distinctive Universalist churches and a convention in Scotland. In Wales Universalism was preached as early as 1782. In 1783 Rev. Thomas Jones, who had been educated at lady Huntington's school, became a Universalist. He subsequently travelled in America, and after being a re-
cessor of Winchester at Philadelphia for about eight years, he removed to Gloucester, Mass., and was the suc-
cessor of Murray for forty-five years. In England the Protestants, in drawing up their Forty-two Articles of Religion, in 1552, condemned Universalism. Ten years later, when the convocation
reviewed the doctrines of the Church, the number of articles was reduced to thirty-nine, omitting, among others, the one condemning Universalism. Since that time Universalism has not been a forbidden doctrine in the Church of England, but has been advocated and defended by many eminent men of the Church and nation—such men as Dr. Henry More, Sir George Stonehouse, Bp. Thomas Newton, Dr. David Hartley, William Whiston, Dr. Thomas Burnet, Revs. Frederick W. Robertson, Charles Kingsley, Stopford Brooke, and canon Farrar, and indirectly by archbishop Tillotson. The Presbyterian Parliament of 1648, which temporarily overthrew Episcopacy, passed a law against all heresies, punishing the persistent holders of some with death, and of others with imprisonment. “That all men shall be saved” was among the heresies punishable in the latter manner. This law was not long operative, for the Independents, headed by Cromwell, soon overturned the law-makers. Gerard Winstanley published a work in advocacy of Universalism only a few days after the passage of the law, which was soon followed by similar works from his pen. William Earby fearlessly preached Universalism. Richard Coppin was active in its advocacy, for his advice concerning it was sought and was several times tried for his offence. Samuel Richardson, an eminent Baptist, also wrote strongly in its behalf. Sir Henry Vane (the younger), member of the Parliament dissolved by Cromwell, and in 1638 governor of Massachusetts, was a Universalist. Jeremy Wadsworth and the English chaplains and Universalism, and published a work which has passed through several editions. Jane Lead, a Mystic, was the author of several Universalist books. Henry Brooke, a literary writer, avowed his belief in Universalism in his Fool of Quibbly, and in a poem on the Messiah. William Law, author of Serious Call to a Devout Life, declared in his Letters, “As for the purification of all human nature, I fully believe it, either in this world or some afterages.” The English literary reviews of the last century contain many notices of works in defence of Universalism.

In 1750 James Relly, who had been a preacher in Whitefield’s connection, shocked at the doctrine of reprobation, was by meditation and study led into another scheme of redemption, some of the peculiarities of which may be said to have had their origin with him. Accepting as true the common theory that all men, having sinned in Adam, have inherited eternal punishment, and that Christ had borne this infinite guilt and punishment in behalf of all who should be saved, Relly was moved to find, if possible, some ground of justice in such a scheme. The divine law explicitly declares that “the soul which sinneth, it shall die,” and that the innocent shall not suffer for the guilty. How could a transfer of human sin and penalty to Christ be consistent with that law? How could it be reconciled with equity? The divine sovereignty, without regard to inherent justice in the plan, could not account for it; for the absoluteness that could set justice aside might just as easily, and more manifestly, have been apprehended on the part of the all-powerful, in a scheme that substituted instead of transferring sin and its deserts. To say that the sufferings of Christ were merely accepted as satisfaction for human deserts, only reckoned as such, by God’s sovereign pleasure, was no adequate explanation, since they were thus only a fictitious, not a real, satisfaction; and, further, any sufferings whatsoever, even those of a man, would have answered just as well as an arbitrary acceptance of the coequal of God. The perfect consistency of God’s procedure, its absolute harmony with justice and equity, Relly found, as he claimed, in such a real and thorough union of Christ with the human nature, as had made their acts his, and his theirs. All men, he held, were really in Adam and sinned in him, not by a fictitious imputation, but by actual participation; equally so are all men in the second Adam, “the head of every man,” and he is as justly accountable for what they do as is the head in the natural body as accountable for the deeds of all the members united to that head. Accordingly Christ, in his corporate capacity, was truly guilty of the offence of the human race, and could be, as he actually was, justly punished for it; and the race, because of this union, really suffered in him all the penal guilt which he endured, and thus fully satisfied justice. There is no more, therefore, due for sin, nor any further occasion for declaring the demands of the law, except to make men feel their inability to obey, and thus compel them to an exclusive reliance on Christ the head. He has effectually completed the work of redemption in the whole world. When man believes this he is freed from the sense of guilt, freed also from all doubt and fear. Until he believes it he is, whether in this world or in another, under the condemnation of unbelief and darkness, the only condemnation now possible to the human race. In illustration and defence of this theory, Relly wrote and published several books, preached zealously in London and vicinity, and gathered a congregation in the metropolis. After his death in 1778, two societies were formed from his congregation; but both have now ceased to exist, as has the society gathered by Winthrop and the Unitarians at the present time. The Unitarians at Thom, D.D., in Liverpool in 1825. The Unitarians in England are all believers in Universalism, as are also many of the Congregationalists.

3. In America Universalism is the result of the proclamation of a variety of theories, some of them at a very early date, in Europe, and some more recently. Among the early day Universalists were John Woolman and others of the Quakers, and the Unitarians, with its philosopher, James Relly. In the early years of the present century the Unitarians in England were also believers in Universalism, as are also many of the Congregationalists.

In 1760 De Benneville, also mentioned above, came to America in 1741, expressly called of God, as he believed, to preach the Gospel in the New World. For more than thirty years he preached in various parts of Pennsylvania, Maryland, Virginia, and the Carolinas. He was not an organizer, but simply a preacher, and quite a voluminous writer, though only a few of his productions were published. For several years he was welcomed to the pulpits of the Baptists and the Friends. But in 1748, at his suggestion that Siegvolk’s Everlasting Gospel was translated into English, and published by Christopher Sower, printed, probably, on the identical press on which the Berleburger Bibel had been struck off. This edition was reviewed by Rev. N. Pomp, a German minister in Philadelphia. Alexander Mack, an eminent preacher among the Dunkers, replied to Pomp, defending Siegvolk’s views. This work was never published, but the MS. is still preserved. There was found among Dr. De Benneville’s papers, after his death in 1798, a Commentary on the Apocalypse, which was printed in German, at Leipsic, 1784. The work, a reminiscence of his in the Episcopal Church. Rev. Richard Clarke, rector of St. Philip’s in Charleston, S. C., from 1754 to 1759, was a pronounced advocate of it; as was Rev. John Tyler, rector of the Church in Norwich, Conn., who wrote a work in its defence, which was published by one or whom he had lived. Some of the Congregationalists of New England were believers in Universalism; among them Dr. Jonathan Mayhew, minister of the West Church in Boston from 1747 to 1786, who distinctly avowed his belief in it in a published Thanksgiving Sermon, Dec. 9, 1762. Dr. Charles Chauncy, of the First Church in Boston from 1727 to 1787, issued a pamphlet on the subject in 1782, which was reviewed by Dr. Samuel Materne. In 1784 his larger work The Salvation of All Men was published, a second edition following in 1787. Dr. Joseph Huntington, minister in Coventry, Conn., from 1792 to
1794, left a work in favor of Universalism, entitled *Calvinism Improved*, which was published in 1796.

(II.) Formal.—In 1770 John Murray (q. v.), who had formerly been a Methodist in Ireland and England, but more recently a convert to Universalism, came to America and commenced the proclamation of Universalism on the Rellyan theory. After itinerating a few years in various parts of the country, from Virginia to Massachusetts, he made his home in Gloucester, Mass., where, in 1778, he organized a society of Uni-
versalists, which in 1780 he removed to New York. He was the first independent Christ-
ian Church." With the exception of a few months spent in the army, as chaplain of the Rhode Island Bri-
gade, he ministered to the society in Gloucester, making occasional missionary tours through the country till 1785, when he removed to Boston, where a society had been formed in 1780, and remained there as its pastor till his death, in 1815.

In 1781 Elhanan Winchester, who had been an emi-
nent Baptist clergyman in Philadelphia, became a Uni-
versalist, and gathered a Universalist society in that city, which took the name of "Universal Baptists." As a Baptist his views were moderate. He was Calvinistic, if not wholly Arminian, and his Universalism differed in little or nothing from the present so-called evangelical doc-
trines, except in regard to the duration and design of
future punishment and the final restoration of all lost
men and angels. Fifty thousand years, which would bring the matter to a close, became the basis of his theory of the punishment of the most sinful. Mr. Win-
chester itinerated extensively, as far south as the Caro-
linas and north to Massachusetts. Like De Benneville, he was for a time welcomed to the pulpits of the Dunk-
ers, who, from their first coming to America in 1719, have been believers in universal restoration, although, in the main, holding it privately. Some of their preach-
ers were bold in its advocacy; and it was proclaimed
and defended in several of their published works, nota-
biy so by James Bolton, who, in 1789, published a pamph-
tlet on "Ephraim, Ps.," in which he censures the "Breth-
ren" for not giving greater publicity to it, asserting that "the German Baptists (Dunkers) all believe it."

About the year 1785 the Dunkers became alarmed by the preaching of some persons, now unknown, against future punishment, and finally took action that cut off John Murray from the preaching of this theory, nor his followers from the Church, and formally broke off the procla-
mation of Universalism in any form. In 1786 Mr. Win-
chester went to England, where he preached and pub-
lished books in defence of his views and established a soci-
ey. He returned to America in 1795 and died in 1798.

Contemporary with Murray and Winchester was Caleb Rich, of Massachusetts, who gathered a Universalist society in the towns of Warwick and Richmond. Mr. Rich may be said to have anticipated many of the views afterwards more fully elaborated by Hosea Bal-
lou, and probably had great direct influence in forming the opinions of the latter.

In New Jersey several Baptist preachers and their congregations became Universalists. In Pennsylvania there was a congregation of Bellyan Universalists, and the "Universal Baptists" before mentioned, in Phila-
delphia, have been in existence in Bucks and Washington counties. Rev. Abel Sarjent, minister in the latter locality, organized Universalist churches on the basis of the doctrine of the divine unity, in opposi-
tion to the Trinity, publishing the creed of those churches in the Free Universal Magazine, edited by him in 1785. Another church was organized in Boston and Universalist in the eastern portion of the country were for a long time ignorant. Rellyanism made but little progress. Mr. Murray complaining in 1787 that he knew of but one public advocate of Universalism in America who fully sympathized with him in his views.

Rev. Hosea Ballou commenced his career as a Uni-
versalist preacher in 1780. Originally a Calvinistic
Baptist, he was a Trinitarian Universalist until 1795, when he avowed his belief in Unitarian views of God and Christ; and in 1806 published his *Treatise on Atonement*, in which he combated the doctrine of vicarious sacrifice, contending that the life and death of Christ
were for the reconciliation, not of God, but of man, and avowed his belief that the punishment of the sins of mortality was confined to this life, and that if punishment were experienced in the life beyond the grave, it would be for the non-belief in God. In 1818 he had satisfied himself that there is no sin beyond the grave, and consequently no punishment after death. By 1830 Mr. Ballou's views were quite extensively held in the denomination, and some of the believers in future limit-
ed punishment seceded from the Universal Convention and established the denomination of Restora-

Although this secession was led by a few emi-
nent men, it was not considered expedient nor in any
sense called for by quite as many and as eminent be-
lievers in future retribution who remained in the old
organization. The position of these latter was that
Universalism was not, and never had been, the belief in
no future punishment, nor the belief in a brief or long-
continued retribution hereafter; but that the belief that God
would, through Christ, in his own good time, "restore
the whole family of mankind to holiness and happiness."

As there had never been entire unity of sentiment as to the time of restoration, so there had been no consistent tolerance of opinion on that as on other differences, they saw no occasion for a division on account of pre-

The "Restorationist Association" ex-
isted about eleven years, its last session being held in 1841, at which time the publication of its organ, the *Independent Christian*, ceased, and the organization became extinct as a sect. Some of its preachers returned to the fellowship of the Universalist Convention, some affiliated with the Unitarians, and others wholly withdrew from the ministry. Mr. Ballou died in 1852. His work and memory are held in reverent esteem by the entire denomination, and by none more ardently than by the many who do not accept his theory of sin and retribution.

See Ballou.

II. Organization and Government.—In the early his-
tory of Universalism in America, the first form of or-
ganization was simply into legal societies; afterwards
into churches within the societies. The only exception to this was, commencing with 1790, in Pennsylvania, where the Church became both the legal organization and the religious body of communitants. The Universal-

in Gloucester, Mass., the first organization, named
themselves together by an agreement of association in 1779, which they changed to a charter of compact in 1785, and were incorporated in 1792. Members of the society and their property being seized for payment of taxes. The church in Gloucester, the Universalists entered suits in the courts in 1782 to establish their right to exemption from taxation for the support of any other than their own minister. By reason of various delays and appeals the case did not reach a final decision till 1786, when the rights of the Universalists were established. Meanwhile Gloucester, the Universalist societies gathered in other parts of Massachusetts and in Rhode Island, desiring counsel and advice, united with the society in Gloucester in holding an association at Oxford, Mass., in 1785. The charter of compact, which was the basis of organization in Gloucester, was taken to this association, and, on being slightly amended, was recommended to the societies represented, who were also requested to take on themselves the name of "Independent Christian Society, commonly called Universalists" to keep up a correspondence with each other; and to meet annually, by delegates, for conference. The legal rights secured under the charter were in vain; the decision of the Gloucester suit seem to have accomplished all that the association aimed at, and no session was held after 1787. In the 1790s, the congregations organized in Philadelphia by Murray and Winchester became one, and, feeling the necessity of a more perfect organization of the believers at large, the move was made. The occasion was held in May of that year in Philadelphia, at which time a profession of faith and platform of government for the churches was drawn up and recommended to all the churches for their adoption. Five churches were represented in this convention, and seven preachers were in attendance. The annual meetings of this convention were all held in Philadelphia; but the distance from that city to New England was so great, and the inconveniences of making the journey were then so numerous, that in 1792 the Universalists of Boston asked and obtained permission to organize another convention for the Eastern States. This convention held its first session at Oxford, Mass., in 1793, and adopted, the following year, the Philadelphia profession and platform, and recommended them to all the churches. In 1802, churches and associations of churches having increased, and a diversity of speculative opinion prevailing, the New England convention was deemed by some to be possible, on a profession of faith, and to establish well-defined rules of government, ordination, fellowship, and discipline for the use of that body. This was accomplished in 1803, by the adoption at the session held in Winchester, N. H., of such definite rules, and of the following definitions:

"Art. 1. We believe that the Holy Scriptures of the Old and New Testaments contain a revelation of the character of God, and of the duty, interest, and final destination of mankind.

"Art. 2. We believe that there is one God, whose nature is love, revealed in our Lord Jesus Christ, by one Holy Spirit of Grace, who will finally restore the whole family of mankind to holiness and happiness.

"We believe that the knowledge of God and the happiness of man are inseparably connected, and that believers ought to be careful to maintain order and practice good works; for these things are the most acceptable and profitable of all.

"This has remained unchanged to the present time. The Philadelphia convention ceased to exist in 1809; but the New England convention, though with changes both in form of government and in name, has continued to the present, and is now "the Universalist General Convention." It is composed of clerical and lay delegates from the churches in the United States and Canada, and in churches in states and territories where no state organization exists. Every parish, to be counted in the basis of representation, must maintain its legal existence and support public worship; and every minister must be actually engaged in the work of the ministry unless disabled by age or sickness. Preachers and parishes must assent to the Profession of Belief; and no parish can settle a minister not in fellowship, nor can a minister settle over a parish not in fellowship. The convention establishes uniform rules for fellowship, ordination, and discipline, and is the final court of appeal in all cases of doubt between conventions, or between conventions and churches, or between churches and ministers; it consists of subordinate bodies; but it has no power to interfere with the affairs of a parish in the settlement or dismissal of a minister in fellowship; nor can it, under any circumstances, do more than to withdraw fellowship from those who lose their privileges. State conventions are composed of ministers in fellowship, and of delegates from parishes and churches. They can make any regulations and adopt any policy not in conflict with the constitution and laws of the General Convention; provide for the enforcement of the rules on fellowship, ordination, and discipline; and disburse funds for local missionary work. In several states associations still exist composed of counties or of neighboring parishes extending over larger territory; but, under the present laws, these have no ecclesiastical authority, and are only a medium of local conference and encouragement. Hence, the practice is to have the local legal organizations for the purpose of holding property and conducting the business necessary to the maintenance of religious worship. Aside from a required assent to the Profession of Faith, and their obtaining the fellowship of the State Convention, or, in localities where no such convention exists, the ordination of such persons as the General Convention, all parishes are Congregational in the management of their affairs, and are subject only to the civil laws of the state or territory where they are located. Churches, with the exception of those in Pennsylvania, as before noted, are the religious organizations created within the legal parish. In them the ordinances of the Gospel are administered; and the purpose of their existence is the union of believers and the quickening and increase of their religious life, obedient to the command of the Lord and his apostles. Sunday-schools are also established in the parishes, and are, while independent in the management of their affairs, chiefly watched over and directed by the Church.

III. Doctrines. — The Winchester Profession (given above) is regarded as a sufficiently full and explicit statement of the belief required in order to fellowship in the Universalist Church, and as affording the greatest latitude in the differences there might be, in the more particular statement of the general belief of Universalists of the present day may be briefly set forth as embracing the following particulars:

1. Of God. — That he is infinite in all his perfections, the Creator and Preserver of all worlds, and of all the beings that have been, are, or will be; he reveals himself by the nature teaches of wisdom and design; in conscience, which discriminates between right and wrong; and in the Holy Scriptures, and especially in his full perfection in Jesus Christ. That it is fundamental in the revelation through Christ that God is the Father of the spirits of all flesh, who brought men into being with a fixed and loving purpose that their existence should prove a final and endless blessing to them; and that while he is strictly just in his dealings with all, he never loses sight of his great purpose in their creation; and that, without violating their moral freedom, he will, through the gracious influences of the Gospel, subdue and win all souls to holiness. That his government, laws, and purpose are the same in all worlds, death in no way affecting his attitude towards men; but that he is to be found wherever sought, and will always accept and forgive all who believe on him and his words; and that in his parishes there is no distinction of sex, age, or rank; and that all worlds are in the same divine Providence; that he will make all the most perfect men and angels; that he will make all the most perfect men and angels; that he will make all the most perfect man.
only perfect way, truth, and life for man; that he is Lord both of the dead and the living, able to save to the uttermost, i.e. in all places and under all circumstances, and all who call on the name of the Lord shall be saved. He is the head of the body, the church; and the church is the fullness of him that filleth all in all. He reigneth over every creature in heaven and in earth, and under the earth, confesses him Lord, to the glory of God the Father, and God is all in all.

3. Of the Holy Spirit.—That while it is not now to be expected that God's Spirit will, as in apostolic days, be manifested in miraculous power on believers, the promise of its assistance is still fulfilled in the souls of believers, to whom the Spirit comes as the Comforter, and, as testified to by the apostle, helps their infirmities, inspires their prayers, and pours into their souls the peace of God which passeth all understanding.

4. Of Sin.—That it is never transferable, but consists in personal disobedience to the divine law, and is the greatest evil in the universe; that no necessity for it is laid on any, and that they alone receive great reward, and are manifest in the soul's consciousness of nearness to God and of approval by him; that punishment is in like manner the natural fruit of sin, alienation, a cloud between us and God, the burden and sorrow of the conscience. That while the reward is intended to keep us in love with obedience, the punishment is designed to make us feel that it is an evil and bitter thing to sin against God, and to incline us to repent and turn to our peace, possible only in holiness.

5. Of Conversion.—That conversion, regeneration, the new birth, or whatever else the turning from sin to holiness may be called, is the change effected in the will and heart of man, when, wrought upon by the gracious influences of the Gospel, he turns from his sinful loves and ways, and, drawn by the Spirit of God, seeks to consecrate a choice to Christ, he honours his name and duty; that while the commencement of such a change must of necessity be instantaneous, it is only by patient continuance in well-doing that it is completed.

6. Of Salvation.—That salvation is deliverance from the practice and love of sin, the bringing of the soul out of its bondage of error and evil into the liberty of obedience to the truth, and love to God and man; that Christ saves when he turns men away from iniquity, and that his saving work will not be completed till God's law is written in and obeyed by every heart.

7. Of Forgiveness.—That the forgiveness which God provides is not only for the past, but also for the covering of past offences from sight, and bringing them no more to remembrance against the penitent; and that this is the forgiveness which Jesus teaches us that we ought to exercise towards all who are penitent for any wrong which they have done to us.

8. Of the Church.—That the church is a spiritual body having Christ for its head, that is the covering of past offences from sight, and bringing them no more to remembrance against the penitent; and that this is the forgiveness which Jesus teaches us that we ought to exercise towards all who are penitent for any wrong which they have done to us.

9. Of the Christian Life.—That the Christian life is a life of holiness and godliness, that is, a life of righteousness, and that is the covering of past offences from sight, and bringing them no more to remembrance against the penitent; and that this is the forgiveness which Jesus teaches us that we ought to exercise towards all who are penitent for any wrong which they have done to us.

10. Of the Church.—That the church is a spiritual body having Christ for its head, that is the covering of past offences from sight, and bringing them no more to remembrance against the penitent; and that this is the forgiveness which Jesus teaches us that we ought to exercise towards all who are penitent for any wrong which they have done to us.

11. Of the Christian Life.—That the Christian life is a life of holiness and godliness, that is, a life of righteousness, and that is the covering of past offences from sight, and bringing them no more to remembrance against the penitent; and that this is the forgiveness which Jesus teaches us that we ought to exercise towards all who are penitent for any wrong which they have done to us.

12. Of the Church.—That the church is a spiritual body having Christ for its head, that is the covering of past offences from sight, and bringing them no more to remembrance against the penitent; and that this is the forgiveness which Jesus teaches us that we ought to exercise towards all who are penitent for any wrong which they have done to us.
appropriate to a loving remembrance of the members of the Church and congregation who have died during the year. On this day the churches are decorated with hall and the pews are draped in black.

4. Public Worship.—The public worship of God is conducted by Universalists in much the same manner as by Protestants generally. It consists of reading of the Scriptures, prayers, singing, and sermon. A few churches make use of a liturgy, of which several have been prepared, but most congregations have an extempore service. Baptism and the Lord’s supper are observed in all Universalist churches. The mode of the former is left to the choice of the candidate. The invitation to the latter is extended to all who may feel it to be either a duty or a privilege thus to remember the Lord. Other Sunday-school and conference and prayer meetings are regularly held in most of the churches.

V. Statistics.—The Universalists have one General Convention and twenty-four subordinate conventions, the latter being located in Alabama, Connecticut, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New York, Ohio, Oregon, Pennsylvania, Rhode Island, Vermont, Wisconsin, Canada, and Scotland. Parish organizations exist in California, Colorado, Dakota, District of Columbia, Florida, Idaho, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland, Mississippi, Nebraska, North and South Carolina, Tennessee, Texas, Virginia, and West Virginia. The total number of churches is 959, with which 42,500 families are connected; 733 churches, with a membership of 37,825; Sunday-schools, 659; teachers and pupils, 58,683; church edifices, 784; total value of parish property above indebtedness, $6,417,757; ministers, 724; licensed lay preachers, 9.

The General Convention is incorporated and empowered to “hold real and personal estate to the value of $600,000, to be devoted exclusively to the diffusion of Christian knowledge by means of missionaries, publications, and other agencies.”

The “Murray Centenary Fund,” raised in 1870, and named in honor of Rev. John Murray, the centennial anniversary of whose coming to America was then observed, amounted, at the session of the convention in 1879, to $121,794.54. A “Ministerial Relief Fund,” founded by the bequest of the late John L. Smith, was established at the same time to the amount of $607.50.

The “Theological Scholarship Fund,” consisting of returned scholarship loans, amounted to $489,32. The treasurer’s receipts from all sources, in 1879, were $19,540.74. The income of the Murray Centenary Fund is designed to aid in the education of the clergy, the whole amount being paid at the same time, and the principal to be returned to the church extension. About forty theological scholarships are continued in force each year, aggregating nearly $6000. These are expected to be repaid, without interest, at the earliest convenience of the beneficiaries after graduation and settlement, and the amounts thus returned to be invested, the income to be appropriated to future loans.

Several of the state conventions are incorporated, and in a few of them permanent funds are established. Either as held by the conventions directly, or by organizations, or in connection with the publishing, the aggregate amount of such funds, the income of which are devoted to missionary work, Sunday-school aid, and ministerial relief, is $89,578.65.

The “Woman’s Centenary Association,” now incorporated, was organized in 1869 to assist in raising the Murray Centenary Fund, to which it contributed $55,000. In addition to this, it has raised about $120,000, with which it has helped churches and schools, given relief to aged and infirm ministers and ministers’ widows, started a Memorial Chapel at Good Luck, N.J., where Murray preached his first sermon in America, and has provided a perpetual anniversary in Scotland. It has also published in circulation 3,000,000 pages of tracts, besides a large number of denominational books and papers.

The “Universalist Historical Society” was organized in 1884 for the collection and preservation of facts pertaining to the history and condition of Universalism, together with a complete library of papers on the same subject. It has a library of over 2000 volumes, now at Tufts College, College Hill, Mass. The collection embraces a complete set of the writings of the Greek and Latin fathers, many French and German works, and a nearly complete line of modern books both for and against the doctrine of Universalism.

VI. Institutions.—1. Colleges, Theological Schools, and Academies.—There are four colleges, two theological schools, and six academies under the auspices and patronage of Universalists. Tufts College, located on College Hill, Middlesex Co., Mass., was incorporated in 1832, and opened for students in 1835. Its assets are about $900,000; number of professors and teachers, 12; students, 62. Lombard University, located at Galesburg, Ill., was incorporated in 1852, and opened for students in 1853. Its assets, $175,000; professors and teachers, 6; students, 58. St. Lawrence University, at Canton, St. Lawrence Co., N.Y., was incorporated in 1856; assets, $234,850; professors and teachers, 7; students, 44. Buchtel College, Akron, O., was incorporated in 1871; assets, $250,000; professors and teachers, 10; students, 108. St. Lawrence Theological School, a department of St. Lawrence University, was opened in 1867. It has a president and professor. Under is being opened for students in 1884. Its assets are about $100,000; number of teachers, 7; of students, 80.

Green Mountain Perkins Academy, at South Woodstock, Vt., was opened in 1848; assets, $15,000; teachers, 8; students, 55. Goodard Seminary, Barre, Vt., was opened in 1868; assets, $85,000; teachers, 7; students, 76. Dean Academy, at Franklin, Mass., was incorporated in 1865; assets, $240,000; teachers, 8; students, 70. Mitchell Seminary, at Mitchellville, Ia., was opened in 1872; assets, $25,000; teachers, 9; students, 55. Total amount invested by the twelve educational institutions, $2,099,600.

2. Publishing House.—The Universalist Publishing House, located at Boston, Mass., was incorporated in 1872. Its trustees are elected by the state conventions of Maine, New Hampshire, Vermont, Massachusetts, and Rhode Island. The net assets consisting of periodical books, plates, etc., are about $81,000. The number of volumes which it has published, and of which it owns the title and copyright, is one hundred and twenty. It also issues five of the twelve periodicals published by the denomination.

3. Missions.—Missionsary work is performed in the bounds of the several state conventions; in some directly by agents or superintendents in the employ of the conventions, in others by means of local associations, and in still others by the voluntary labors of the ministry. The only foreign mission is the one sustained by the Woman’s Centenary Association.

VII. Literature.—American Universalist literature dates from the publication of a translation of Siegvolk’s Everlasting Gospel in Pennsylvania in 1758. William Pitt Smith, M.D., of New York, published a small book entitled The Universalist in 1787. Joseph Young, M.D., also of New York, published Universalism Cornered in 1788. Rev. Elhanan Winchester’s Dialogues on Universal Restoration, published in London in 1788, were republished in Philadelphia in 1791. A Treatise on Atonement, by Rev. Hosea Ballou, was published in 1865. Since that time the Universalists have published many books and tracts. The contribution of the more prominent in the various departments of denominational literature are,
UNIVERSALISTS

ii. Doctrinal and Expository: Ballou, Lecture Sermons and Select Sermons; Whittomere, Notes on the Parables; Cobb, Compend of Christian Divinity; Thayer, The Theology of Universalism; Williamson, Rudiments of Theological Science and Philosophy of Universalism; Steeere, Footprints on the Hearthway; Mayo, The Balance, or Moral Arguments for Universalism; Brooks, Universalism in Life and Doctrine; The Latest Word of Universalism, thirteen essays by thirteen clergymen.

v. Practical Religion and Consolation: Chapman, Discourses on the Lord's Prayer, Lessons of Faith and Life, Hours of Consolation, The Crown of Thorns; Adams, The Universalism of the Lord's Prayer; Bacon, The Pastor's Greetings (sermons); Ballou, Counsel and Encouragement (discourses on the conduct of life); Thomas, The Gospel Liturgy (a prayer-book for churches and families); Hanson, Manna (a book of daily worship); Quimby, Heaven's House (a comfort to all who mourn); Thayer, Over the River (a book of consolation for the sick, the dying, and the bereaved).

vii. Periodicals: The first Universalist periodical was probably that started by Rev. Elhanan Winchester, in Lebanon, Connecticut, in 1787, entitled The Philadelphian Magazine. It continued several years by Rev. William Vidler, and finally merged in the Monthly Repository. The first American Universalist periodical was The Free Universalist Magazine, published in New York and Baltimore by Rev. Abel Sarjent (1792-94). Rev. John Murray, whose friends published in Boston two volumes of a small magazine called The Berean, commenced in 1802. Several others followed, and from first to last a great many have been put before the public.

Universalism of Grace, a doctrine introduced into the French Reformed theology, under the influence of John Cameron, in the early part of the 17th century, and advocated by Amyraldus (Amyrout), Placeus, and Pajon. Cameron himself taught the imputation of Christ's pluvial charity alone, and advocated the hypothetic universalism of divine grace, which was more fully developed by Amyrout. "The peculiarity of Amyraldism," says Schweizer, "is in the combination of real particularism with a merely ideal universalism." See Hagenbach, Hist. of Doct. ii, 189, 275. See ATONEMENT.

Universalism, a term used in philosophical language, and divided into three classes, viz.: 1. Metaphysical, or "universalia ante rem," denoting those archetypal forms according to which all things were created. As existing in the divine mind, and furnishing the patterns of the divine working, these may be said to be the ideal within the ideal. 2. Physical, or "universalia in re," by which are meant certain common natures which, one in themselves, are diffused over or shared in by many—as rationality in men.

3. Logical, or "universalia post rem," denoting general notions framed by the human intellect, and predicated of many things on the ground of their possessing common properties—as tree, which may be predicated of the oak, maple, birch, willow, etc. In ancient philosophy the universalis was called predicables, and were arranged in five classes, genera, species, differentia, and accidents.

In the system of Aquinas universals are thus treated: 1. A parte mentis, or a parte intellectus, involve the theory that universals are mental only—subjective. 2. A parte rer, involve the theory that universals correspond with objective things. See Krauth and Fleming, Vocab. of Phil. Sciences, s. v.

Universe, as defined by Dr. Porter (Human Intellect, p. 846), is the collective whole, the totality of being as a unit; the world, in its philosophical or universal sense. For its origin, see CREATION; WORLD.

University, a universal school; an assembly of students of all countries, students in every branch of learning, in one general society, having their own seal and place of business. When first the term was generally used in the reign of Henry III (of England), Dur-
UNKNOW GOD

ing the 12th century there were several eminent universi-
ties in Europe. Spain and Germany had universities
of schools where the students formed part of the
Corporation. Paris and England had universities on
masters; and in Germany and France were of
either kind. See College.

Unknown God (ἀγνωστὸς Θεός, A.V. unfortu-
nately "the unknown God," instead of "an unknown
God"), the inscription observed by Paul on some site
consecrated to a deity whose name had been lost—a fact
which he ingeniously adds in his speech before the
citizens so as to procure the more splendid opportunity
he was to the knowledge of the true God (Acts xxvii, 28).
There is no evidence that it was a spot dedicated to the
worship of Jehovah, as some commentators have imagined.
See the monographs cited by Volbeding, Index Pro-
grammatum, p. 92. See Altar; Athens.

Unknown Tongue (1 Cor. xiv, 2, 4, 13, 14, 19,
27) is a gloss of the A.V.; for the Greek has simply
γλῶσσα, a tongue, obviously meaning a different living
language from that ordinarily employed by the speaker
(γλῶσσα ἑρίπα, Mark xvi, 17; Acts ii, 4). Others
understand an ecstatic utterance of abrupt, incoherent,
and unintelligible expressions which needed no interpreter.
See the monographs cited by Volbeding, Index Pro-
grammatum, p. 78. See Spiritual Gifts.

Unlearned (ἀδόγματος, unlettered, Acts iv, 13;
ἀμαθής, uninstructed, 2 Pet. iii, 16; ἀπαίτητος, un-
tutored, 2 Tim. ii, 23; ἐκτός, private, 1 Cor. xiv, 16, 23,
24; "ignorant," Acts iv, 13; "rude," 2 Cor. xi, 6). In
Acts iv, 13, the Jewish literati apply the term to Peter
and John, in the same sense in which they asked, in
regard to our Lord himself, "How knowest thou this
man letters, having never learned?" (John vii, 15). In
neither case did they mean to say that they had been al-
together without the benefits of the common education,
which consisted in reading and writing, and in an ac-
quaintance with the sacred books; but it is probable that
they were not learned men, had not sat at the feet of any
of the great doctors of the law, and had not been instructed
in the mysteries and refinements of their peculiar learn-
ing and literature. An apostle also uses it to describe
those who are little acquainted with the mind of God
and the teaching of his Spirit (2 Pet. iii, 16). The "un-
learned questions" mentioned by Paul are those which
do not tend to edification in sound and substantial
religious knowledge. See Education.

Unleavened Bread (πλάσμα, ἀνόμος), bread baked
from unfermented dough. The Hebrews early knew
the art of raising bread by means of leaven (יָנָה, אֲפָן, צֶמֶם; on the various ancient kinds of this see
Pliny, xviii, 20) prepared from the dregs or yeast of
wine, or from a mixture of flour and water, which spon-
taneously ferment if allowed to stand, and which may,
either moist or dry, be preserved for a considerable
period for this purpose (Mishna, Pesach, iii; Chalda,
i, 7; comp. Harmer, Obser. iii, 65). Sometimes they
baked bread without being leavened, especially when in
paste (Gen. xix, 3; Judg. vi, 19; 1 Sam. xxvii, 24), as
the moabitish people usually did (ibid., 227). This
was formally presented for the paschal cakes (πλάσμα,
Exod. xii, 8, 15, 20; xiii, 3, 6 sq.), and this fact
became a symbol of the festival which thence was popu-
larly designated as "the feast of unleavened bread." See
Passover. In fact, the Jews were expressly pro-
hibited from all use of leaven during the seven days of
its continuance, and even from having any leaven in
their houses (Lev. xxiv, 9; Exod. xii, 19; xiii, 7;
comp. 1 Cor. v, 7); so that they were obliged to seek
and carefully remove all traces of it on the eve of the
14th of Nisan (see Pesach, i-iii; Schöttgen, Hor. Hebr.
i, 588). They usually burned it (Pesach, i, 1), but not
in an oven; and were so scrupulous as not even to allow
domestic animals to eat it during that period (ibid.). The
sacrificial cakes of the meat-offering were also re-
quired to contain no leaven (Exod. xxix, 2; Lev. ii,
11; Num. vi, 15, 19; comp. Amos iv, 5; Mishna, Me-
cuc, v, 1; Pesach, i, 5; see Otho, Lex. Rabb. p. 227:
"a peculiar usage prevailing in the Roman ritual; see
Pestru, Quest. Rom. 109; comp. Cassaubon, on Pera, Sat.
1); on the other hand, the Pentecostal loaves, which
represented the usual food of men, were leavened (Lev.
xxiii, 17). Also the cakes which served as a basis (per-
haps by way of platter) for the thank-offering were
usually mixed with leaven (Lev. vii, 18). See Bread;
Leaven.

Un'ni (Heb. 'ūnî, יָבֵן [but text in Neh. U'mô, יָבֵן], according to Gesen., for יבנ [depressed], but ac-
curring to Fürst for יבנ [Unnish, heard of Jehovah];
Sept. variously, 'வி v. r. 'வி, 'வி, etc.; Vulg. Ani,
'ahuah), the name of two Levites.

1. One of the relatives of Heman who were appoint-
door-keepers and musicians to the tabernacle by Da-
vid (1 Chron. xv, 18, 20). B.C. 1043.

2. One of those appointed to a similar service on the
return from Babylon (Neh. xii, 9). B.C. 535.

Unni, an archbishop of the 10th century who made
a missionary tour into Denmark, and was instrumental
in establishing Christianity throughout the kingdom.
He was greatly aided by Harald, son of king Gorm, and
a convert to the Christian faith, although the king him-
self remained a pagan. See Neander, Hist. of the Church,
iii, 298.

Unfacer, a very common funeral title of Osiris
(q. v.), signifying the "Good Being."

Unpardonable Sin, or "Sin against the Holy
Ghost" (Matt. xii, 31, 32, and parallels), appears in
the first instance to have been the ascription of the ben-
cient miracles of Jesus to Satanic power; and it seems
to be unpardonable because it argued such an utter per-
version of moral sense as to place the person capable of
it beyond the province of divine grace. Similar cases of
spiritual hardening or judicial blindness are elsewhere
referred to in Scripture (Eph. iv, 18, 19; Heb. vi, 6).
See the Latin monographs on the subject by Deutsch-
mann (Viteb, 1668), Heidegger (Tig., 1676), Fastenau
(Hal, 1751), and others cited by Hase, Leben Jesu, p.
152. See BLASPHEMY; Sin.

Unself, Samuel Friedrich, a Protestant theolo-
gian of Germany, was born in 1742 at Dantzig. He
studied theology at Leipsic, where his acquaintance
with Gellert had the greatest influence upon him. From
Leipsic he went to Halle, and in his native city he was
appointed rector of St. Mary's. For twelve years he
labored as a teacher, when he was called as pastor to
Praust, not far from Dantiz. A few years later he was
called to Göttingen, where he died, May 1, 1790. He
wrote, Dissertatio de Natura Conversionis (Gedani,
1783); Dissert. de Locorum Veteris Testamenti in Nova
Accommodatione Orthodoza (Lips. 1796). See Düring,
Deutsche Kanzelprediger, p. 592 sq. (B. P.)

Unterberger, Ignatius, a German painter, was
born at Karales, in the Tyrol, in 1744. After acquiring
the elements of design from his father, he went to Rome,
at the age of 22, and studied with a brother. In
1767 he settled at Frankfort-on-the-Main, and became
the favorite painter of the minister Kaunitz. He died in
1797. Among his principal works are, the Decsent of the
Holy Spirit, in the principal church of Königsgrätz; and
Peace and Love, represented by a young girl caring a
lamb. See Spooner, Bkg. Hist. of the Fine Arts, s. v.

Unwin, William Jordan, LL.D., a Church of
England clergyman, was born at Haverstock, Glou-
seshire, Nov. 29, 1811. He was educated at Totteridge;
prepared for the ministry at Rothwell, Highbury College,
entering in 1830, and Glasgow University, which he
entered in 1838, and where he graduated in 1835, tak-
ing the two degrees of bachelor and master of arts. On
leaving Glasgow he became pastor of the Unitarian
Chapel, Chapel Woodbridge; and in 1842 min-

UNWIN
nature with that same spirit whence it emanates. They are looked upon as inspired writings. See Müller, Hist. of Anc. Sanæri Lit.; Muir, Original Sanæri Texts.

Uphold, George, M.D., D.D., LL.D., a Protestant Episcopal clergyman, was born in 1725, Green, near Guilford, England, May 7, 1796. He came to America in 1802, and settled at Albany, N.Y. In 1814 he graduated at Union College, Schenectady. In 1816 he graduated in medicine in New York, and commenced practice in Albany soon after. He soon, however, entered upon the study of theology, and was ordained minister in 1818. He was minister at Lansingburg, N.Y., from 1818 to 1820; rector of St. Luke's, New York city, from 1820 to 1828, and a portion of this time (1821-25) assistant minister of Trinity Church; rector of St. Thomas's Church, New York city, from 1828 to 1831; rector of Trinity Church, Pittsburgh, Pa., from 1832 to 1850; and was consecrated bishop of Indians in 1849. He died at Indianapolis, Aug. 26, 1872.

Upham, Charles Wentworth, an American author and Unitarian minister, was born in St. John's, N.B., May 4, 1802. He graduated at Harvard College in 1821, and at the Cambridge Divinity School in 1824, and was called in 1826 to pastorate of the Unitarian Church in Salem, from 1824 to 1844. He then left the profession on account of bronchial weakness, and engaged in various pursuits. He edited the Christian Register, travelled as agent of the Massachusetts Board of Education, was member of the Massachusetts House of Representatives in 1849. In 1854, he was elected from 1850 to 1851, was mayor of Salem in 1852, member of the National Congress from the Sixth District from 1854 to 1855, State senator in 1858, and representative from 1869 to 1869. He died at Salem, June 15, 1875. He wrote, Letters on the Logos (1828)—Prophecy as an Evidence of Christianity (1835)—Lectures on Psychocraft, comprising a History of the Salem Delusion of 1692 (1831; enlarged ed. 1867, 2 vols. 8vo)—Life of Sir Henry Vane (in Sparks's Amer. Biog. 1835)—Life of John C. Fremont (1856)—Memoirs of Francis Peabody (1869)—Life of Timothy Pickering (1867-72).

Upham, Thomas Cogswell, D.D., an American divine and author, was born at Deerfield, N. H., Jan. 30, 1799. He graduated at Dartmouth College in 1818, and at Andover Theological Seminary in 1821, when he became associate pastor of the Congregational Church in Rochester, N. H., and in 1825 professor of mental and moral philosophy in Bowdoin College, in which position he remained until 1867. He died in New York, April 2, 1872. Among his numerous works may be mentioned, Manual of Peace (1830)—Elements of Mental Philosophy (1839, 2 vols.; abridged ed. 1864)—Outlines of Disorder Mental Action (1840)—Life and Religious Experience of Madame Guyon (1847)—Life of Faith (1848)—Principles of the Interior or Hidden Life (ed.);—Philosophical and Practical Treatise on the Will (1855)—Treatise on the Divine Union (1851)—Religious Maxims (1854)—Life of Madame de Sade (1797; 2 vols.; restored by Catherine Devereux)—The Moral and Moral, written from Europe, Egypt, and Palestine (1857)—Method of Prayer (1859)—also The Absolute Religion (published posthumously in 1872).

Upham, William D., a Baptist minister, was born at Weathersfield, Vt., Feb. 13, 1810. He developed early in life a strong love for literary pursuits, and at the age of eighteen was induced to devote himself to a study of law. With this object in view, he entered Brown University in the autumn of 1831. He seems to have imbued skeptical views, and with that conceit which not unfrequently accompanies pride of intellect in young men in a course of study, he regarded Christianity as, on the whole, the most highly worthy of his serious attention. He engaged in teaching at Dedham, Mass., the winter succeeding his entrance into college, the Spirit of God ar-

Unwritten Word. "That authority to which the Romish Church could lay no claim from the purity of its members it endeavored to support during the Dark Ages by its arrogant pretensions. The Scriptures, even in the Latin version, had long become a sealed book to the people; and the Roman see, in proportion as it extended its supremacy, discouraged or proscribed the use of such vernacular versions as existed. This it did, not least from a spirit of intolerance. The Church should not mistake the sense of Scripture, nor lest the presumptuous and the perverse should reduce new errors in doctrine, and more fatal consequences in practice, from its distorted language, but in the secret and sure consciousness that what was now taught as Christianity was not to be found in the written Word of God. In maintenance of the dominant system, tradition, or the unwritten Word, was set up. This had been the article of some of the earliest heretics, who, when they were charged with holding doctrines not according to Scripture, affirmed that some things had been revealed which were not committed to writing, but were orally transmitted down. The Pharisees before them pleaded the same supposititious authority for the formalities which they added to the law, and by which they sometimes superseded it, 'making the Word of God of none effect,' as our Saviour himself reproached them. Upon this ground did the Roman clergy justify their (or rather, man's) imagination with which they had corrupted the ritual and the faith of the Western Church" (Southey, Book of the Church). See Tradition.

Unzia, a surname of Juno in Roman mythology, was the goddess of anointing. The young women in Rome are said to have anointed the doors of their future dwellings with salve before entering them, in order that nothing evil should enter their house. From this, Juno, the directress of marriages, received the same name.

Unzer, Johann August, a German physician, born April 29, 1727, and died April 2, 1799, was distinguished by his works on physiological and psychological subjects, among which may be mentioned Observations concerning the Movements of the Soul and the Imagination:—Thoughts on Sleep and Dreams:—On the Sensitive Faculties of Animated Bodies:—The Physiology of Animated Nature:—and Physiological Researches (1727-99). See Hoefler, Nouv. Biog. Générale, n. v.

Upanshad (from upa, "beneath" or "near; ni, "and," said, "to sit") is the name of those Sanscrit works which contain the mystical doctrine of the Hindu's on the nature of a Supreme Being, its relation to the human soul, and the process of creation. The object of the Upanshads is to impress the mind with a belief in one Supreme Spirit; to show that this Supreme Spirit is the creator of the world, and has not ceased to control all things. The Upanshad of Brahmans; and that the human soul is identical in...
rested his attention, and, after a severe struggle, he accepted Christ as his Saviour. By his conversion, all his life-plans were changed, and he resolved to devote himself to the service of the Lord. He became a member of the First Baptist Church in Providence, R.I., in the fall of 1832, and the Church gave him its approval in his purpose to enter the Christian ministry. Want of means compelled him to leave college at the close of his second year, and he spent the next three years in teaching in Wickford, R.I. Here he labored not only in his special vocation as a teacher, but as a Christian, and the existence of the Church in Wickford is largely owing to his toils and sacrifices. He removed to Ludlow, Vt., in 1836, and was for a time principal of the Black River Academy. He was ordained to the Gospel ministry in Ludlow in November, 1837, and in December of the following year he became pastor of the Second Baptist Church in Townsend, Vt. He secured from the outset the affection of his people, and his labors were greatly blessed. A few years only of service in the cause he so much loved were allotted to him. Four years and a few months he remained in the pastoral office, and then was called to a better world. His death occurred June 30, 1843. See Baptist Memorial, ii, 209. (J. C. S.)

**UPHAR'SIN (Dan. v, 29). See MENE.**

**U'phaz (Heb. *Uphaz*; T'PHN, signif. uncertain; Sept. Μουφατζ, Οφατζ; Vulg. Ophaz, obryzum), the name of a gold region (Jer. x, 9; Dan. x, 5), like Tarshish and Ophir (comp. Psa. xlv, 10; 1 Chron. xxxix, 4), and hence thought by most expositors to be a corruption of the latter name (so the Targum, Syriac, and Theodotion). Furth, however, suggests (Heb. Lex. s. v.) that it may be compounded of *PHN, washe*, and 1PH, pure gold; and that since it is interchanged with Sheba (Psa. Ixxxi, 15), it may be regarded as the name of a gold wash in Southern Arabia. Its resemblance to Μουφατζ (TPHN, A. V. "best") in 1 Kings x, 18 is perhaps not accidental. See ORPH.**

**Upis, in Greek mythology, was a surname of Diana. A certain tutor of Asia was also called so, and likewise a nymph of Diana. Upis was, likewise, the name of a Hyperborean woman who, with Arge, paid a tribute to Delos; for Diana, according to an oath respecting the birth of Apollo. Again, Upis was the name of the father of Diana, husband of Glauce. Lastly, it was a surname of Nemesis.**

**Upper Chamber (or Room) ( עֵּלֶּיָּה, aliyah, as in modern Arabic; 2 Kings i, 2; xxiii, 12; 1 Chron. xxxvii, 11; 2 Chron. iii, 9; "summer-parlor," Judg. iii, 23; "loft," 1 Kings xvii, 19, 23; "chamber over the gate," 2 Sam. xvii, 38; elsewhere "chamber" simply; אֶּלֶּ֑יָּה, Mark xiv, 15; Luke xxii, 12; ἐξωστρυγγυς, Acts i, 13; ix, 37, 39; xx, 8), a sort of guest-chamber not in common use, in the upper part of the house, where the Orientals received company and held feasts, and where at other times they retired for prayer and meditation.**

---

**House with an Altyah.**

*(Mark xiv, 15; Luke xxii, 12). Among the Hebrews it seems to have been on, or connected with, the flat roofs of their dwellings; in Greek houses it occupied the upper story (1 Kings xvii, 19, 22; 2 Kings iv, 10; Acts i, 13; ix, 37, 39; x, 9; xx, 8). Robinson describes the "upper room of a respectable house at Ramleh as a large airy hall, forming a sort of third story upon the flat roof of the house" (Bibl. Res. iii, 26). Jowett describes the chief room in the houses of Haveli (opposite Lesbos) as in the upper or third story, secluded, spacious, and commodious, "higher and larger than those below, having two projecting windows, and the whole floor so much extended in front beyond the lower part of the building that the projecting windows overhung the street" (Christ. Res. p. 67). From such a chamber, Eutychus, who was sitting on the window, or on an elevated divan, fell through the window into the street (Acts xx, 6-12). In 2 Kings i, 2 we are told that Ahaziah "fell down through a lattice in his upper chamber that was in Samaria." Indeed, it is likely that those accidents were by no means rare in the East. A person accommodated here can go in and out with perfect independence of the main building of the inner court, into which he probably never enters, and does not in the least interfere with the arrangements of the family. A visitor or friend is almost never accommodated anywhere else, and certainly never in the interior court (Kitto, Pict. Bible, note in 2 Kings iv, 10). Rich luxurious men are charged with stiffly multiplying chambers of this sort (Jer. xxii, 13, 14). As spoken of by the prophet, they would seem to have been both large and built for the purposes of comfort and luxury. We find accordingly frequent mention made of them in connection with kings, who appear to have used them as summer-houses for their coolness (Judg. iii, 20; 2 Kings i, 2; xxiii, 12). The summer-house spoken of in Scripture was very seldom a separate building. The lower part of the house was the winter-house, the upper room was the summer-house. If they are on the same story, the outer apartment is the summer-house, the inner is the winter-house (Thomson, Land and Book, i, 235; Robinson, Bibl. Res. iii, 417). We find the upper rooms allocated to the use of those prophets whom it was wished to honor particularly (1 Kings xvii, 19; 2 Kings iv, 10). They were also used*
in account of their size and coolness as places for assembly (Acts i, 18; xx, 8), and for similar reasons the dead were laid out in them (ix, 39). There appears to have been an upper room over the gateways of towns (2 Sam. xviii, 33), and on their roofs, as being the highest part of the house, idolatrous worship was paid to Beel (2 Kgs. ii, 19). In the loftiness of the upper room, the psalmist beautifully describes God as loving the beams of his upper chambers in the waters, and from thence watering the hills (Psa. cix, 3, 18). See Chamber; House.

Uppsala, a town of Sweden, forty-five miles north-west of Stockholm, was, during the Middle Ages, the stronghold of paganism. It was the seat of a beautiful Gothic cathedral, built from 1258 to 1435. Its interior is magnificent and richly decorated, but its exterior has suffered much from fire, notably in the conflagration of 1702. It is the finest cathedral in that region. See Neander, Hist. of the Church, iii, 292 sq.

Upton, James, a learned schoolmaster and divine of the Church of England, and editor of classical works, was born in 1670, and died in 1749.

Ur, the name of a place and of a man. There is apparently no direct connection between the titles, perhaps not even kinship of dialect.

1. The original seat of Abraham's family, whence he set out for Canaan (Gen. xi, 28, 31; xvii, 7; Neh. ix, 7). See Amarna, Ur.

2. The Name.—This is invariably "Ur of the Chaldees" (םַעְרַת בְּנֵי מֵבִיצָה, Ur Kasdim; Sept. Ὀρα τῶν Χαλδαίων; Vulg. Ur Chalcedorum [but in Neh. iiiis Kaledorum]). The oldest derivation of the word מַעְרַת is from the Heb. מַעְרַת, light, in the sense of fire (so the Targum and Jerome). This derivation is no doubt connected with the legends in the Koran and Talmud, which represent Abraham as escaping by miracle from the flames into which Nimrod or other idolatrous persecutors had thrown him (see Wagner, in the Theol. philol. i, 173). Various other etymologies have been proposed: some taking the word as מַנַּה, a mountain; some as denoting the east, or the light-bearing region; while Ewald, from the Arabic, makes it "place of sojourn," and others look to the Zendic varā, a fort (Gesen.), or the Sanscrit ur, a town, or even the Heb. הָעָר, a city (Bonomi, Ninnex, p. 41). The name, however, was probably indigenous, and belongs to the old Chaldees of the first empire, the Assyrian Urbu, and the cuneiform Hur.

II. Sites Proposed.—1. One tradition identifies Ur with the modern Orufat, in the north-west part of Mesopotamia. There is some ground for believing that this city, called by the Greeks Edessa, had also the name of Orrha as early as the time of Ioadore (B.C. cir. 150); and the tradition connecting it with Abraham is perhaps not later than Ephraem (A.D. 300-370), who makes Nimrod king of Edessa, among other places (Comment, in Gen., in Opp., i, 58, B.). According to Pococke (Description of the East, i, 159), that Ur is Edessa or Orufat, is "the universal opinion of the Jews," and it is also the local belief, as is indicated by the title "Mosque of Abraham," borne by the chief religious edifice of the place, and the designation "Lake of Abraham the Beloved," attached to the pond in which are kept the sacred fish (Ainsworth, Travels in the Track, etc., p. 64; comp. Niebuhr, Voyage en Arabie, p. 380).

2. A second tradition, which appears in the Talmud and in some of the early Arabic writers, finds Ur in Euphrates, the region of the Greek, and probably the Ereb of Holy Scripture (called Ophiy by the Sept.). This place bears the name of Huruk in the native inscriptions, and was in the country known to the Jews as the land of the Chaldeans.

3. A third tradition, less distinct than either of these, but entitiled to at least equal attention, distinguishes Ur from Warka, while still placing it in the same region (see Journal of Asiatic Society, xii, 481, note 2). There can be little doubt that the city to which this tradition points is that which appears by its bricks to have been called Hur by the natives, and which is now represented by the ruins of the modern Ur. In the neighborhood of the Euphrates, nearly opposite to its junction with the Shat el-Hi. The oldest Jewish tradition which we possess, that quoted by Eusebius from Eupolemus (Proc. Ep. ix, 17), who lived about B.C. 150, may be fairly said to intend this place; for by identifying Ur with the Babylonian city then called Hur (or orphu in marina and Chaldeopolis, it points to a city of the Moon, which Hur was—Kamar being the "moon" in Arabic, and Khauld the same lunimary in the Old Armenian.

4. An opinion unsupported by any tradition remains to be noticed. Bochart, Calmet, Bunsen, and others identify "Ur of the Chaldees" with a place of the name mentioned by a single late writer (Ammianus Marcellinus) as a "castle" existing in his day in Eastern Mesopotamia, between Hatra (El-Hadhir) and Nisibis (Amm. Marc. xxv, 8). The chief arguments for or against this seem to be the identity of name, and the position of the place between Arrapachitis, which is thought to have been the dwelling-place of Abraham's ancestors in the time of Arphaxad, and Haran (Harran), whither he went from Ur.

5. It may be added that Tuch regards Ur as a Median town called Oqrisa by Strabo (xi, 523), a view followed to some extent by Ewald, Lengerke, Ritter, and Knobel.

III. Probable Identification.—It will be seen that of the four or five localities thought to have a claim to be regarded as Abraham's city, two (or three) are situated in Upper Mesopotamia, between the Tigris and the Euphrates, and in the Sinjar range, while the other two are in the alluvial tract near the sea, at least four hundred miles farther south. Let us endeavor first to decide in which of these two regions Ur is more probably to be sought.

That Chaldeas was, properly speaking, the southern part of Babylonia, the region bordering upon the Gulf, will be admitted by all. Those who maintain the northern emplacement of Ur argue that, with the extension of Chaldean power, the name travelled northward, and became coextensive with Mesopotamia; but, in the first place, there is no proof that the name Chaldeas was ever extended to the region above the Sinjar; and, secondly, if it was, the Jews at any rate mean by Chaldeas exclusively the lower country, and call the upper Mesopotamia, or Padan-Aram (see Job i, 17; Isa. xxii, 19; xxxii, 14, etc.).

Again, there is no reason to believe that Babylonian power was established beyond the Sinjar in these early times. On the contrary, it seems to have been confined to Babylonia Proper, or the alluvial tract below Hit and Tekrit, until the expulsion of Chedorlaomer, which was later than the migration of Abraham. The conjectures of Ephraim Syrus and Jerome, who identify the cities of Nimrod with places in the upper Mesopotamian country, deserve no credit, for the names all really signified the Chaldean Proper. Moreover, the best and earliest Jewish authorities place Ur in the low region. Eupolemus has been already quoted to this effect. Josephus, though less distinct upon the point, seems to have held the same view (Ant. i, 6). The Talmudists are also on this side of the question; and local tradition, it would seem, was traced back nearly to the Hezir, make the lower country the place of Abraham's birth and early life. If Orufat has a Mosque and a Lake of Abraham, Cutha, near Babylon, goes by Abraham's name, as the traditional scene of all his legendary miracles.

Again, it is really in the lower country only that a name precisely corresponding to the Hebrew א表現 is found. The cuneiform Hur represents א表現 letter for letter, and only differs from it in the greater strength of the aspirate. Isidore's Orba ('Ophat) differs from Ur consid-
errably, and the supposed Ur of Ammianus is probably not Ur, but Adur. The Orchoe ("H'qoxû") of Southern Mesopotamia (Ptolem, Geogr. 5, 20; comp. Strabo, xvi, 1, 6), noted by later writers (Cellarius, Geogr. ii, 760; Bonomi, Nineveh, p. 439, 399), is probably different from the Olôm of Josephus and the Opoûm of Eupolemus.

The argument that Ur should be sought in the neighborhood of Arrapachitis and Seruj, because the names Arpaxad and Serug occur in the genealogy of Abraham (Bunse, Egypt Place, iii, 366, 367), has no weight till it is shown that the human names in question are really connected with the places, which is at present assumed somewhat boldly. Arrapachitis comes probably from Arrapshka, an old Assyrian town of no great consequence on the left bank of the Tigris, above Nineveh, which has only three letters in common with Arpaxad (777272773); and Serug is a name which does not appear in Mesopotamia till long after the Christian era. It is rare, if ever, that we can extract geographical information from the names in a historical genealogy; and certainly in the present case nothing seems to have been gained by the attempt to do so.

On the whole, therefore, we may regard it as tolerably certain that "Ur of the Chaldees" was a place situated in the real Chaldees—the low country near the Persian Gulf. The only question that remains in any degree doubtful is whether Warka or Mugheir is the true locality. These places are not far apart, and either of them is sufficiently suitable. Both are ancient cities, probably long anterior to Abraham. The location is plain to both, but perhaps more distinctly to Warka. On the other hand, it seems certain that Warka, the native name of which was Hurak, represents the Erech of Genesis, which cannot possibly be the Ur of the same book. See Erech. Mugheir, therefore, which bore the exact name of "Ur or Hur, remains with the best claim, and is entitled to be (at least provisionally) regarded as the city of Abraham.

If it be objected to this theory that Abraham, having to go from Mugheir to Palestine, would not be likely to take Harran (Harran) on his way, more particularly as he must then have crossed the Euphrates twice, the answer would seem to be that the movement was not that of an individual, but of a tribe travelling with large flocks and herds, whose line of migration would have to be determined by necessities of pasture, and by the friendly or hostile disposition, the weakness or strength, of the tribes already in possession of the regions which had to be traversed. Fear of Arab plunderers (Job i, 15) may very probably have caused the emigrants to cross the Euphrates before quitting Babylonia, and having done so, they might naturally follow the left bank of the stream to the Bek, up which they might then proceed, attracted by its excellent pastures, till they reached Harran. As a pastoral tribe proceeding from Lower Babylonia to Palestine must ascend the Euphrates as high as the latitude of Aleppo, and perhaps would find it best to ascend nearly to Bir, Harran was but a little out of the proper route. Besides, the whole tribe which accompanied Abraham was not going to Palestine. Half the tribe were bent on a less distant journey; and with them the question must have been, where could they, on or near the line of route, obtain an unoccupied territory. They could not directly cross the open desert between Babylonia and Palestine. Even caravans travelling from Bagdad to Damascus are obliged to take the route by Harran.

IV. Description of the Modern Locality. "Ur or Hur, now Mugheir, or Um-Mugheir, "the bitumened," or "the mother of bitumen," is one of the most ancient, if not the most ancient, of the Chaldean sites hitherto discovered. It lies on the right bank of the Euphrates, at the distance of about six miles from the present course of the stream, nearly opposite the point where the Euphrates re-
receives the Shat el-Hie from the Tigris. It is now not less than 125 miles from the sea; but there are grounds for believing that it was anciently a maritime town, and that its present inland position has been caused by the rapid growth of the alluvium. The remains of the buildings are generally of the most archaic character. They cover an oval space 1000 yards long by 800 broad, and consist principally of a number of low mounds enclosed within an escarite, which on most sides is nearly perfect. The most remarkable building is near the northern end of the ruins. It is a temple of the true Chaldean type, built in stages, of which two remain, and composed of brick, partly sun-burned and partly baked, laid chiefly in a cement of bitumen. It is in the form of a right-angled parallelogram, the long-sides of which are the north-east and south-west. One angle points due north. The lower story is supported by buttresses thirteen inches deep, and, with the exception of those at the angles, eight feet wide. The building measures 198 feet in length and 133 in breadth. The lower story is twenty-seven feet high, and has but one entrance, which is eight feet wide. The outer surface is faced with "red kiln-baked bricks" to a thickness of ten feet; but the whole interior is of sun-dried bricks. In each of the angles of this building six feet inward near the foundation, an inscribed cylinder was discovered, which appears to have served the same purpose as the documents at present deposited beneath the foundation-stones of our great buildings. These cylinders are now in the British Museum. The bricks of this building bear the name of a certain Urukh, who is regarded as the earliest of the Chaldean monumental kings, and the name may possibly be the same as that of Ormuzd of Ovid (Metam., iv. 212). His supposed date is B.C. 2000, or a little earlier. 'Ur was the capital of this monarch, who had a dominion extending at least as far north as Niffer, and who, by the grandeur of his constructions, is proved to have been a wealthy and powerful prince. The great temple appears to have been founded by this king, who dedicated it to the moon-god, Hurki, from whom the town itself seems to have derived its name. Ilgi, son of Uruk, completed the temple, as well as certain other of his father's buildings, and the kings who followed upon those continued for several generations to adorn and beautify the city. The tablets of the Chaldeans discovered at Mugheir are among the most interesting ever brought to light. These records bear the names of a series of kings from Uruk (B.C. 2230) to Nabonidus (B.C. 540), the last of the line, among others is that of Kudur-mahula, Chedorlaomer (Gen. xiv., 1). The temple was dedicated to Sin, or "the moon," which element was preserved by the Greeks in the name Mene, applied by them to the surrounding region. "The cylinder inscriptions of Mugheir are invaluable documents in confirming the historicity and truth of Scripture. They not only inform us that Nabonidus, last king of Babylon, repaired the great temple of the moon at Hur, but they also explain who Belshazzar was, concerning whom the early Bible critics have in vain endeavored to reconcile conflicting statements. In the book of Daniel (v, 50) he is alluded to as the king of the Chaldees when Babylon was taken by the united armies of the Medes and Persians. The account of Berosus does not, however, agree with that of Scripture. It states that Nabonidus, after being utterly routed in the open plain by Cyrus, shut himself up in the city of Borsippa, but was soon obliged to surrender his person to the conqueror. From Daniel, therefore, we are led to conclude that Belshazzar was the last Chaldean monarch; while Nabonidus is represented in the same capacity by Berosus. . . . Sir Henry Rawlinson's reading of the Mugheir cylinders entirely reconciles these discrepancies. The records distinctly state that Belshazzar was the eldest son of Nabonidus, and that he was admitted to a share of the government" (Lotus, Chaldeae and Susiana, p. 13; comp. Journal of Asiatic Society, xv, 260 sq.). See Belshazzar.

Ur retained its metropolitan character for about two centuries, and even after it became second to Babylon was a great city, with an especially sacred character.

Ruins of Temple at Mugheir.

The notions entertained of its superior sanctity led to its being used as a cemetery city, not only during the time of the early Chaldean supremacy, but throughout the Assyrian and even the later Babylonian period. It is in the main a city of tombs. By far the greater portion of the space within the escarite is occupied by graves of one kind or another, while outside the enclosure the whole space for a distance of several hundred yards is a thickly occupied burial-ground. It is believed that "Ur was for 1000 years a site to which the dead were brought from vast distances, thus resembling such places as Kerbela and Nejef, or Meshed Ali, at the present day. The latest mention that we find of 'Ur as an existing place is in the passage of Eupolemus already quoted, where we learn that it had changed its name, and was called Cummara. It probably fell into decay under the Persians, and was a mere ruin at the time of Alexander's conquests. Perhaps it was the place to which Alexander's informants alluded when they told him that the tombs of the old Assyrian kings were chiefly in the great marshes of the lower country (Arrian, Exp. Alex. vii, 22). The mounds that mark the site of its great temples are bare; the whole country around it is a dismal swamp. In regard to 'Ur,
as well as to Babylon, the words of Isaiah are true, "The beauty of the Chaldees' excellency shall be as when God overthrew Sodom and Gomorrah" (xiii, 19). See Lofthus, Chaldea, ch. xii; Rawlinson, Ancient Monarchies, i, 156; Jour. Roy. Geog. Soc. xxvii, 185. See CHALDEES.

2. ("rN., Ur, light; Sept. Θεός v. Θεός[στ], etc.; Vulg. Ur.) The father of Elipheal or Eliphalet, one of David's warriors (1 Chron. xi, 35). B.C. ante 1043. In the parallel list of David's warriors (2 Sam. xxiii, 54) we have the son's name thus stated, "Eliphelet son of Ahazib, the son of the Maachathite," or the Maachathite simply. The family name sounds analogous; while the above passage still more corruptly gives two persons, "Eliphai the son of Ur, Hepher the Mecherathite," which should probably be corrected so as to refer to one individual, either by the rejection of the name Hepher altogether, or its identification with one of the preceding; for the personages named before and after these in the two accounts are evidently the same, and the subjoined sum is full by counting these as one. See DAVID.

Uraettir, in Norse mythology, denotes the entire dynasty of the Trolls, Thunes, serpent-like dwarfs and giants, the Jotes, Schwazelfs, and Dockels.

Uranus, a Nesticar of Syria who applied the precepts of the mystic as the Eutychian controversies and propagated his doctrines in Persia. He succeeded in converting a considerable number of people, and was so popular with this ruler that he always had him at his table. See Mosheim, Eccl. Hist. i, 388.

Uranus (Lat. Caelus), the heaven, in Greek mythology, was the progenitor of the whole line of Greek gods. His first children were the Heavontichres (Cen timanes). Afterwards he begot, through Gia, the Cyclopes. These were imprisoned in Tartarus because of their great strength. This so moved their mother to anger that she incited her subsequently born children, the Titans, against the father, who drove him from the throne of the earth, after Kronus (Saturnus), his younger son, had, with a diamond sickle, disqualifed him for the further production of children. The sea received the mutilated organs, which gave life to Venus. From the blood which was spilled there sprang the Giants, the Furies, and the Melian nymphs. See Smith, Dict. of Gr. and Rom. Biog. and Mythol. s. v.

Urban I, pope from A.D. 223 to 230, was a native of Rome, but tradition mentions nothing worthy of note concerning him except that he persuaded several Romans not to marry. He was casually murdered himself under Alexander Severus. May 25 is dedicated to his celebration.

Urban II, pope from A.D. 1088 to 1099, previously named Odo of Lagamy, was born in Chatillon-sur-Marne, and became successively canon of Rheims, prior of Clugny, bishop of Ostia, and legate to the court of the emperor Henry IV. In the latter station he labored efficiently to insure the papal prerogative in connection with the investiture controversy. He followed Victor III as pope, and represented the Gregorian party in his administration. He succeeded in maintaining himself against pope Clement II, who was elected by the imperial party, and also in greatly extending the influence and reputation of the papacy throughout the West. In 1089 he convened a council at Rome which de nounced the ban upon the emperor, his pope, and their adherents. At the Concilium Melitense, in 1090, he denounced the deacon of the clergy, the house of the cardinal, the Council of Venice, canon 11, 723 [Venet. 1775]. He was driven from Rome by the emperor, and compelled to seek a refuge with count Roger, upon whom he had conferred the districts of Apulia and Calabria. He retaliated by renewing the ban over his enemy (1091) and forming an alliance with Conrad, the emperor's son, who rebelled and made himself king of Italy. Urban returned to Rome (1098) and from that time interfered most notably in the affairs of the world. He excommunicated Philip of France, who had driven away his queen and married Bertrada, consort of count palatine of Nevers, in the absence of the emperor. The Council of Pisa (1099) forbade the investiture of bishops by the hands of the laity of any rank whatever, and also the assumption of feudal obligations to king or other layman by any clergyman. He was not successful, however, in compelling the princes to give up their sovereignty in ecclesiastical affairs. He was eventually compelled to create counts of Sicily, his own protectorate, legate to Sicily, in order that he might be able to enforce his decree without alienating the count from his side. The Council of Clermont was also specially important as furnishing the occasion for the organization of the Crusades for the con quest of the Holy Sepulchre. Urban delivered a fiery address, which gave the stimulus for the first crusade; and the new movement so increased his own power that he became able to expel his rival from Rome and utterly destroy his influence. Other councils were held in France under his direction, in one of which, at Nantes, he released Philip of France from the ban, in recognition of his separation from Bertha. Something of regard was also paid by him to the politically important reunion of the Greek and Latin churches.

In England William Rufus proved an obstinate opponent to the papal plans, but in Spain these plans resulted in similar results, the church becoming more influential than ever. Urban's influence over matters of doctrine was less pronounced than over matters of administration; but he nevertheless caused the teachings of Berengar (q. v.) to be condemned at the Council of Piacenza, and at Clermont the practice of dipping the bread used in the sac rament in wine. In the latter council he also pronounced a general and complete absolution—a measure which from that time became pre-eminently a privilege of the pope. He assured to all Christians who should take up arms against the infidels entire forgiveness of sins, and also bestowed and inclusion among the number of martyrs, if they should fall during the campaign. The complete absolution was therefore based on the idea of the sin-extirpating power of martyrdom. Urban died June 20, 1099. See Vita et Epist. Urb. II, in Mansi, ut supra, 642-719, and the literature in Gieseler, Lehrb. d. Kirchengesch. ii, 2 (4th ed., Bonn, 1848), p. 93 sqq., 498. Herzog, Real-Enzykl. s. v.

Urban III, previously Lambert or Hubert Crielli, of Milan, was archdeacon at Bourges and later at Milan, archbishop of Milan, and cardinal. He was made pope in 1185, and is noteworthy only because of his uninterrupted and unprofitable quarrels with the emperor Frederick, for which see Gusta Treverorum (Trev., 1898), vol. i, and Gieseler, p. 96 sq. He died Oct. 19, 1187. See Herzog, Real-Enzykl. s. v.

Urban IV, pope from A.D. 1261 to 1264, named Jacob Pantaleon, the son of a shoemaker at Troyes, studied at Paris and became canon of Troyes, and afterwards bishop of Liege. Innocent IV sent him as legate to Germany, and Alexander IV nominated him patriarch of Jerusalem. His brief pontificate was disturbed by political quarrels among the great magnates. He determined to destroy the influence of the Sicilian king Manfred in the affairs of Italy, and his interference with the disputed succession of the German throne. He appointed fourteen cardinals to serve as councillors, forbade the election of Conradin, the last representative of the house of Hohenstaufen, and at the Council of Pro clear, and at the Council of Pisa (1290), and 1294), and at the Council of Pisa (1290), and 1294), he gave great distress by the simple, frank pain of excommunication, and cited Richard of Cornw allia and Alfred of Castile, the competitors for that throne, to Rome, that they might await his decision. He also despatched a cardinal-legate to England to as sert the authority of the papacy in the administration of that country; and he summoned Manfred before his tribunal, and when that king disregarded the summons
transferred his kingdom to duke Charles of Anjou. Manfred, however, resisted, and subjugated by force of arms a larger portion of the States of the Church. Urban was compelled to flee for safety to Orvieto, and afterwards to Fermo, where he died on Oct. 2, 1264. He is notable for having brought about a general observance of the Feast of Corpus Christi. His literary remains include, besides a number of bulls, a small collection of Epistola. See Mansi, Concil. xxiii, 1076 sq.; Gieseler, p. 186 sq.; and Herzog, Real-Encyclop. s. v.

Urban V, the last of the Avignon popes, reigned from 1362 to 1370. His name was William Grimard, and he had been a Benedictine monk, abbot at Auxerre in 1345, and in 1358, in Marsiliana. He was rated as a most capable canonist, and had officiated as teacher of canon and civil law in Montpellier, Avignon, Toulouse, and Paris. He succeeded Innocent VI in the pontificate, and found himself at once in difficult circumstances. In Italy Bernabo Visconti had rebelled and taken possession of several cities belonging to the Church, which could only be recovered through a treaty by which the pope pledged himself to the payment of a ransom amounting to half a million gold florins. England had refused to pay the customary tribute, and Edward III had even caused a very resolute denial of such revenues as were opposed by the Parliament to the pope's demand. The Turks were threatening danger to Cyprus. Urban sought to advance the papal interests amid these complications by means of legates, the preaching of a new crusade against the Turks, and a removal of the papal seat to Rome. Greatly to the dissatisfaction of many cardinals, the latter project was executed in 1367, the pope leaving Avignon April 30, and reaching Rome Oct. 16. He was received by queen Joanna of Naples, on whom he conferred a golden rose and a consecrated sword. The emperor John Paleologus came over to the faith of Rome and promised fealty to Urban; but the papal legate, on Oct. 15, 1369, was slay by a French cardinal, the pope returned to Avignon in Sept., 1370. Soon afterwards he died (Nov. 18), and was buried, according to his request, at Marseilles. It is to be added that Urban cultivated a strict morality, required bishops to reside in their dioceses, and zealously combated the growing simony and accumulation of benefices in the hands of individual prelates. Several of his bulls condemn, in addition, the formation of unions and the incorporation of benefices. See Mansi, xxvi, 322 sq.; Gieseler, ii, 3, 92 sq., 117 sq.; and Herzog, Real-Encyclop. s. v.

Urban VI, the first to ascend the papal chair in the period of the "great schism," was previously named Bartholomeus of Pегистone, and was a native of the city of Naples. He became archbishop of Bari and followed Gregory XI, April 8, 1378, the people of Rome having demanded an Italian pope. He attempted to reform the many and scandalous abuses which had grown up during the absence of the popes at Avignon, and did not hesitate to assail the bishops and cardinals; and having offended the clergy, he was unfortunate enough to alienate the good-will of many influential laymen, also, by his haughty and arbitrary manner. The cardinals, therefore, proceeded to elect a new pope on the plea that the election of Urban was not freely made, but was forced on the cardinals by the people. Count Robert of Geneva was the new choice, and he assumed the title of Clement VII; and as Urban retained a large body of adherents, the great schism was at once consummated. Urban was supported by Italy, England, Germany, and Poland. Queen Joanna of Naples and Sicily had acknowledged him, but was driven into an alliance with Clement by his pride and obstinacy; and he thereupon induced the heir to her throne, duke Charles of Durazzo, to invade her territories. Soon afterwards he quarrelled with Charles also, and excommunicated that prince. The cardinals, who had conspired with Charles against him, were imprisoned and tortured, and, after a time, five of them were put to death. To Ladiasius, the heir of Charles, Urban denied the possession of Naples, claiming that it was a papal fief; and he organized an expedition to defend his claim; but when his forces were defeated, he returned to Rome, October, 1388, and employed himself thereforward more especially with ecclesiastical affairs. He ordered that the Jubilee should be observed once every thirty-three years, and that its next celebration should take place in 1390. He also introduced the Feast of the Visitation of Mary into the calendar, and decreed that this festival might be celebrated on Corpus Christi Day, even during the enforcement of an interdict. He died Oct. 15, 1389, as many supposed, of poison. See Mansi, p. 609; Gieseler, p. 192 sq.; Herzog, Real-Encyclop. s. v.

Urban VII, of Genoese extraction, though born at Rome, was previously named John Baptist Castagna. He was archbishop of Rossano, member of the Council of Trent, repeatedly a legate to Germany and Spain, and, finally, a cardinal. He was elected to the papacy as the successor of Sixtus V, but died twelve days after the election, and before his consecration, Sept. 27, 1590. See Ranke, Die röm. Päpste, etc. (Berl. 1886), ii, 219 sq.; Herzog, Real-Encyclop. s. v.

Urban VIII, pope from 1623 to 1644, was a native of Florence named Mauro Barberini, and a pupil of the Jesuits. He developed a fondness for poetry, and entered the service of the papacy, in which he rose to the exalted positions of great importance. His most influential work was perhaps the promotion of the restoration of the Jesuits to France. After he had become cardinal-priest and archbishop of Spoleto, he was elected to succeed Gregory XV in the pontificate, Aug. 6, 1623. His tastes were progressive; he was one of the leaders of the new party, and he gave attention chiefly to the erection of fortifications, the enlisting of soldiers, the collecting of arms, etc. Amid the complications of the time, he at first supported the interests of France against Austria and Spain, and, in connection with Richelieu, was led even to the cultivation of relations with Protestants, so that he was not in sympathy with the Jesuitical method of enforcing the Edict of Restoration of 1629 in Germany, and directed his legate to the Diet of Ratisbon in 1630 to oppose the wishes of Austria. Complaints against this tendency were naturally raised by the Catholic princes and states, and found expression in the assembled Consistory itself. A number of cardinals even harbored the idea of convoking a council in opposition to the pope. In 1631 he inherited the duchy of Urbino, but thereby became involved in difficulties with the duke of Parma and his allies. His nepotism also contributed toward the troubles of his pontificate. Despite the adverse dip of the governments which were most zealously devoted to the interests of Rome, Urban was an unwavering defender of the traditional theory of the papacy within the Church itself. He gave effect to the canonization of the founders of the orders of Jesuits and Oratorians; beatified Francis Borgia and others; added the Collegium de Propaganda Fide (also Collegium Urbanum) to the Congregatio de Fide Cathol. Propaganda; gave to the bull In Cans Domini its present shape; abolished the order of female Jesuits; caused the publication of a new edition of the Breviary; condemned Galileo and his teachings; and in the De Eminentiori declared himself against Jansen (q. v.). He forbade the clergy to use snuff in church on pain of excommunication. Urban was not, upon the whole, illiterate. His poems consist in part of paraphrases of Psalms and passages of the Old and New Testaments, in Hora- stian manner, generally in part of the collections of different saints. They were published in Antwerp, 1634; Paris, 1642; Oxford, 1726. He was also the author of Epigrans which were published with comments by Dormulius (Rome, 1643). Urban died July 29, 1644. See Simonini, Sylva Urbaniana, etc. Gesta Urban. (Antw. 1637); Ranke, Die röm. Päpste (Appendix), iii, 498 sq., — U v
URBANE 674 URIAH

Urbanus [some Urbanus, others Urbanus] or rather Urbanus (Ojebavogiv, Græceized from the Lat. Urbanus, i. e. of the city, or urban), a Christian at Rome saluted by Paul as having been his associate in labor (των ἑρημίων άνθρωπων) in the list of those addressed (Rom. xvi., 9). A.D. 55.

Urbanianæ, one of the numerous small sects of the Donatists in Numidia, mentioned by Augustine (Crescom. iv. 70).

Urbanus, Giulio, an Italian painter, of San Danielo, studied with Pomponio Amalteo, and followed his master's theories, and formed a fresco at his request at San Danielo representing the Virgin with the Infant Christ, seated upon a throne, surrounded by Thomas the apostle, Valentine, and other saints. signed "Opus Julli Urb., 1574." See Spoerri, Bleg., Hist. of Fine Arts, s. v.

Urbino, Salomon ben-Abraham, a Jewish writer who flourished in 1440, is the author of a lexicon on the synonyms of the Old Text, entitled עדן לדר לארץ יהודה, The Tabernacle of the Congregation, in allusion to Exod. xxxii., 7. because from the congregations are expressions which differ in sound, but are like in sense (יוו בה כולם לארץ יהודה). The synonyms are divided into groups, the alphabetical order of which is determined by its most important word. Each group commences with the formula עדן לדר, i.e. the word which is put down is to teach, being made up from the abbreviation of the title of the work, viz. לדר, and is illustrated by quotations from the Old Test. and the corresponding passages from the Targum, as well as by quotations from Saadia Gaon's Arabic translation of the Pentateuch, the works of Daniel ibn-Libra, Hai Gaon, Ibn-Ganach, Ibn-Giath, Nathan ben-Jechiel, Ibn-Balasam, Nachmanides, Ibn-Saruk, etc. The lexicron was published at Venice in 1548, and is now very rare. See Fürst, Bibl. Jud. iii., 461; Du Roffi, Dizionario Storico, p. 928 (Germ. transal.); Steinerschneider, Catalogus Libr. Hebri. in Bibl. Bodl. p. 2931; Kittto, Cyclop. s. v.; Geiger, in Zeitschrift der deutsch. morgenl. Gesellschaft. (Leips. 1863), xvi., 321; Wolf, Bibl. Hebr. i., 1037, etc. (B. P.)

Urba Beâta Hierusalem. This rugged but fine old hymn, composed in dedicationes ecclesiasticæ, and of which the author is not known, belongs to the 8th or 9th century. Trench calls it "a hymn of degrees ascending from things earthly to things heavenly, and making the first to be interior, the last external, of which ascending intention in the building and the dedication of a church, with the rites thereto appertaining, was to carry up men's thoughts from that temple built with hands, which they saw, to that other built of living stones in heaven, of which this was but a weak shadow." This fine hymn, the first lines of which run thus,

"Urba beâta Hierusalem, dicitur paculis visita,

Quae consecratur in cellis vivis ex lapidibus,

Quae in angelis sanctis, velut sponsa, vestibus
e tunc vivens e caelo, nupta thalamo.

Preparata, ut sponsea cupulter Dominio

Psaltet et psaltet ex suo psaltatorio,

"has proved the source of manifold inspiration in circles beyond its own. To it we owe the "Jerusalem, my happy home!" or the same in a less common but still more beautiful form,

"O mother, dear Jerusalem!"

It has also inspired some of the singers of Protestant Germany. In the German language we have two noble hymns which at least had their first motive here. The one is that by Meyfahrt, "Jerusalem, du hochgebene Stadt!" and the other by Kosegarten, "Stadt Gottes, deren diamant'nen Ring."

In English our hymn is found in Lyra Mystica (Lond. 1869), p. 409:

"Blessed city, holy Salem,
Home of peace, by seers described;
Rising in the courts of heaven
Built of living stones and tried;
By angelic hands adorned,
As her fellows deck a bride.
Coming newly formed from heaven,
Ready for the nuptial bower,
Wedded to the Lamb forever.
As a bride in blissful hour.
All her streets know golden pavement,
Golden ramparts round her tower," etc.

Our hymn has been translated into German by Schlosser, Simrock, Rambach, and others. The original is given by Trench, Sacred Latin Poetry, p. 311; Bässeler, Auswahl altchristlicher Lieder, p. 201; Rambach, Anthologie christl. Gedichte, p. 179; Simrock, Lauda Sion, p. 322. (B. P.)

Urd, in Norse mythology, was the destiny of the past, who, with her two sisters, Wurand and Skuld, sits under the tree Yggdrasil, where they daily receive advice.

Urdaborn, in Norse mythology, is the spring of the past, at which the three deities sit; from which clear spring they daily draw for themselves new wisdom, and with whose waters they moisten the roots of the tree Yggdrasil.

Urgel, Council of. See de Urgel is a city of Spain on a plain among the Pyrenees, containing an ancient cathedral and other ecclesiastical buildings. A council was held here in 799 by Leidrade, archbishop of Lyons, whom Charlemagne had sent, together with Nefridius of Narbonne, the abbot Benedict, and several other bishops and abbots, to Felix, bishop of Urgel. They succeeded in persuading him to present himself to the king, promising him full liberty to produce in his presence those passages from the fathers which he believed to favor his notions.

Urgiher, in Thibetan mythology, is one of the supreme deities of the Lamasites, generated from a flower.

Urgiassa, in Norse mythology, is one of the nine giant maidens who were mothers of Heimdial.

U'ri (Heb. U'ri, יְרִי, feri [comp. פַּרְשָׁו]) the name of three Israelis.

1. (A. V. Eliphas; Oeiphas). The father of Bezeal, one of the architects of the tabernacle (Exod. xxxi., 20; xxxii., 22; 1 Chron. ii., 20; 2 Chron. i, 5). B.C. ante 1657. He was the tribe of Judah, and grandson of Caleb ben-Heror, his father being Hur, who, according to tradition, was the husband of Miriam.

3. (Sept. Ουταος v. r. Οὐταος). One of the gate-keepers of the Temple, who divorced his wife after the exile (Ezra x. 24). B.C. 448.

Urajh (Heb. Urijah, יְרִיעָה, εύρηκα, light [or fire] of Jehovah; occasionally [in Jer. only] in the prolonged form Uriga, יְרִיעָה, Sept. usually Oeiphas, and so the New Test. and Josephus; A. V. in some cases "Urijah" [v. r.], the name of several Hebrews.

1. The last named of the principal thirty warriors of David's army (1 Chron. xi. 41; 2 Sam. xxii., 39). Like others of David's officers (Ittai of Gath; Iahibesheth the Canaanite, 2 Sam. xxii., 8, Sept.; Zelek the Ammonite, 2 Sam. xxii., 37), he was a foreigner—a Hittite. His name (like that of his manner of speech (xi., 11) indicates that he had adopted the Jewish religion. He married Bathsheba, a woman of extraordinary beauty, the daughter of Eliam—possibly the same as the son of Ahithophel, and one of his brother officers (xxii., 34); and hence, perhaps, as professor Blunt conjectures (Coincidences, ii., 13), Uriah's first acquaintance with Bathsheba. It may be inferred from Nathan's parable (2.
Sam. xii, 3) that he was passionately devoted to his wife, and that their union was celebrated in Jerusalem as one of peculiar tenderness. He had a house at Jerusalem underneath the palace (xi, 2). In the first war with Ammon (B.C. 1053) he followed Joab to the siege, and with him he bore the daily war, and fought before the city but once (1052). He returned to Jerusalem, at an order from the king, on the pretext of asking news of the war—really in the hope that his return to his wife might cover the shame of David's crime. The king met with an unexpected obstacle in the austere, soldier-like spirit which guided and embittered the heart of Bezechiah, and he gave him a high notion of the character and discipline of David's officers. He steadfastly refused to go home, or partake of any of the indulgences of domestic life, while the ark and the host were in booths and his comrades lying in the open air. He partook of the royal hospitality, but slept always at the gate of the palace till the last night, when the king at a feast faintly endeavored to entrap him by intoxication. The soldier was overcome by the debauch, but still retained his sense of duty sufficiently to insist on sleeping at the palace. On the morning of the third day, David sent him back to the camp with a letter (as is predicted of Bezechiah) by which he was to joah to cause his destruction in the battle. Josephus (Ant. vii, 7, 1) adds that he gave as a reason an imaginary offence of Uriah. None such appears in the actual letter. Probably to an unscrupulous soldier like Joab, the absence of the king was sufficient. The deed of Joab was to overtake that of the watery, Rabbah-Ammon where the greatest force of the besieged was congregated, and thither, as a kind of forlorn hope, to send Uriah. A sally took place. Uriah and the officers with him advanced as far as the gate of the city, and were then shot down by the archers on the wall. It seems as if it had been an established maxim of Israelitish warfare not to approach the wall of a besieged city; and one instance of the fatal result was always quoted, as if proverbially, against it—the sudden and ignominious death of Abimelech at Thebez, which caused the hope of the latter being much the same. This appears from the fact (as given in the Sept.) that Joab exactly anticipates what the king will say when he hears of the disaster. Just as Joab had forewarned the messenger, the king broke into a furious passion on hearing the loss, and cited, almost in the very words with which the Hebrew is recorded ("... only variation is the omission of the name of the grandfather of Abimelech, which, in the Sept., is Ner instead of Joach.) The messenger, as instructed by Joab, calmly continued, and ended the story with the words "Thy servant also, Uriah the Hitite, is dead." In a moment David's anger is assuaged. He sends an encouraging message to Joab on the unavoidable chances of war, and urges him to continue the siege. It is one of the touching parts of the story that Uriah falls unconscious of his wife's dishonor. She hears of her husband's death. The narrative gives no hint as to her shame or remorse. She "mourns with the usual signs of grief as a widow, and then became the wife of David (2 Sam. xi, 27). See David.

2. A priest during the reign of Abaz (B.C. cir. 778), whom Isaiah took as a witness to his prophecy concerning Mahershala-shash-baz, with Zechariah, the son of Jeberechiah (Isa. viii, 2). He is probably the same as Urijah the priest, who built the altar for Abaz (2 Kings xvii, 10). If this be so, the prophet summoned him as a witness probably on account of his official position, not on account of his personal qualities; though, as the incident occurred at the beginning of the reign of Abaz, Uriah might have been the natural son of Abijah and the daughter of Athaliah. A man named Uriah, who is mentioned in 2 Kings, xiv, 19, is on the other hand, a fasted itself. When Abaz, after his deliverance from Rezin and Pekah by Tiglath-pileser, wait to upon his master new master at Damascus, he saw there an altar which pleased him, and sent the pattern of it to Uriah at Jerusalem, with orders to have one made like it against the king's return. Uriah zealously executed the idolatrous command, and when Abaz returned, not only allowed him to offer sacrifices upon it, but basely complied with all his impious directions. The new altar was accordingly set in the court of the Temple, to the east of where the brazen altar used to stand; and when the daily sacrifices were performed here by the priests, and the people, were offered upon it; while the brazen altar, having been removed from its place and set to the north of the Syrian altar, was reserved as a private altar for the king to inquire by. It is likely, too, that Uriah's compliances did not end here, but that he was a consenting party to the other idolatrous and sacrilegious acts of Abaz (see 2 Kings xvi, 17, 18; xxiii, 5, 11, 12; 2 Chron. xxviii, 23-25).

Uriah or Urijah was apparently the high-priest at the time, but of his parentage we know nothing positive. He probably succeeded Azariah, who was high-priest in the reign of Uzziah (or else Amaziah III., otherwise called Jothan), and was succeeded by that Azariah who was high-priest in the reign of Hezekiah. Hence it is probable that he was son of the former and father of the latter, it being by no means uncommon among the Hebrews, as among the Greeks, for the grandchild to have the grandparent's name to commemorate him. The priests of the line of Eleazar have been descended from that Azariah who must have been high-priest in the reign of Asa. But he has no record in the sacerdotal genealogy (1 Chron. vi, 4-15), in which there is a great gap between Amariah in ver. 11, and Shabbal, the father of Hilkiah, in ver. 10. Josephus, however, says that he was son of Jothan and the father of Jeremiah (Ant. x, 8, 6). See High-priest.

3. Urijah the son of Shemaiah of Kirjath-jearim; he prophesied in the days of Jehoiakim concerning the land and the city, just as Jeremiah had done, and the king sought to put him to death; but he escaped and fled into Egypt. His retreat was soon discovered: Eliezer and his men brought him up out of Egypt, and Jehoiakim slew him with the sword, and cast his body forth among the graves of the common people (Jer. xxvi, 20-23). B.C. 608. The story of Shemaiah appears to be an attempt of the enemy of Jeremiah to give a false reason for putting him to death; and as a reply to the instance of Micah the Morashite, which Jeremiah's friends gave as a reason why his words should be listened to and his life spared. Such, at least, is the view adopted by Rashi.

4. One of the priests (being of the family of hakkon, A. V. Koz") who stood at Ezra's right hand when he read the law to the people ("Urijah," Neh. viii. 4). B.C. 438. He is probably the same with the father of Mere-moth, one of the priests who aided Nehemiah in rebuilding the walls of Jerusalem (Ezra viii, 38; Neh. iii, 4, 21).

Uri'as (Oipias), the Greek form of the name of the priest of Ezra's time (1 Esdr. ix, 48; comp. Neh. viii, 4), and of Uriel the husband of Bathsebha (Matt. i, 6).

U'ri'el (Heb. Uri'el, "fire [or light] of God; Sept. Urjalya"), the name of three Hebrews.

2. Chief of the Kohathites of the family of Korah in the reign of David, who assisted, among other things, in the building up the ark from the house of Obed-edom (1 Chron. xv, 5, 11), B.C. 1043.

3. Uriel of Gibeah was the father of Maachah, or Michaiah, the favorite wife of Rehoboam, and mother of Abijah (2 Chron. ix, 29). Some second century writer, following the Vulgate, says she is called "Maachah the daughter of Absalom," and Josephus (Ant. viii, 10, 1) explains this by saying that her mother was Tamar, Absalom's daughter. Rashi gives a long note to the effect that Michaiah was called Maachah after the name of her daughter-in-law, the mother of Asa, who was a woman of renown, and that
URII 678 URIM AND THUMMIM

her father's name was Uriel Abishalom. There is no indication, however, that Abasamol, like Solomon, had another name, although in the Targum of R. Joseph on Chronicles it is said that the father of Maachah was called Uriel, that the name of Abasamol might not be mentioned. See MAACHAH.

III. Uriel is also named in the Apocrypha (2 Esdr. iv. 1, 36; v. 20; x 28) as an angel or archangel; and in the book of Enoch he is described as "the angel of thunder and lightning" (ch. xx), and as being "placed over all the lights of heaven" (ibxv, 3).

Urii, in Slavonic mythology, was a deity among the Wends worshiped mainly by magicians as their protector.

Uriyah (2 Kings xvi. 10, 11, 15, 16; Jer. xxvi. 20, 21, 25; c. Neh. iii. 4, 21). See URIIAH.

URIM AND THUMMIM (Heb. Urim ee-Thummim, עירים ארומים), the Anglicized form of two Hebrew words used always together [except in Num. xxvii. 21; 1 Sam. xxviii. 6, where the former occurs alone; in Deut. xxxxx, 8, where they are in the reverse order] and with the article [except in Ezra ii. 63; Neh. vii. 63] with reference to some obscure mode of divination in connection with the sacerdotal regalia (Exod. xxvii. 30; Lev. viii. 30), but concerning which ancient and modern interpreters have greatly differed. The latest elucidation of the subject may be found in Strong's "Tenths in the Wilderness" (Providence, 1888), p. 69, 95.

I. ETHEOLOGICAL IMPORT. — These words are Hebrew plurals, not proper names, but appellatives of frequent occurrence in the singular. They are generally considered to be pluralis excellentiae, denoting by a metonymy the things or modes whereby the revelation was given and truth declared.

1. In "Uri," Hebrew scholars, with hardly an exception, have seen the plural of "aton" ( צ'י , light or fire). The Sept., however, appears to have had reasons which led its authors to another rendering than that of the or its cognates. They give יי דלושך (Exod. xxvii. 30; Ex. xiv. 10), and דלור (Num. xxvii. 21; Deut. xxx. 8, where the word in Num. xxvii. 21, paraphrases it by per succedentis in 1 Sam. xxviii. 6, and gives justicum in Exod. xiv. 10, as the rendering of דלושך. Luther gives דלום. The literal English equivalent would of course be "lights;" but the renderings in the Sept. and Vulg. indicate, at least, a traditional belief among the Jews that the plural form, as in Elohim and other like words, did not involve numerical plurality. Bellarmine, wishing to defend the Volg. translation, suggested the derivation of the Hebrew from לו, to teach (Buxtorf, Diss. de Ur. et Th.).

2. Thummim. Here also there is almost a consensus as to the derivation from תמון (Tôm, perfection, completeness); but the Sept., as before, uses the closer Greek equivalent γνωσθει γνωσθει once (Ex. ii. 63), and adheres elsewhere to γνωσθει; and the Vulg. giving perfecta there, in like manner gives veritas in all other passages. Aquila more accurately choosε γνωσθει. Luther, in his first edition, gave Vehlacht, but afterwards rested in Rechit.

What has been said as to the plural of Uri implies here also. Bellarmine (ut sup.) derives Thummim from תמון, to be true. By others it has been derived from כָּפָר, contr. כָּפָר = a twin, on the theory that the two groups of gems, six on each side the breastplate, were what constituted the Urin and Thummim (R. Azarias, in Buxtorf, loc. cit.). "Light and perfection" would probably be the best English equivalents. The as-
of scriptural data, that, in some cases of defection from the established religious order, we find the ephod connected not with the Urim, but with the Teraphim, which, in the days of Laban, if not earlier, had been conspicuous in the Arabian worship. Micah the prophet, one of his own sons, and then getting a Levite as his priest, makes for him an "ephod and teraphim" (Judg. xvi, 5; xviii, 14, 20). Throughout the history of the northern kingdom, their presence at Dan made it a sacred place (ver. 30), and apparently determined Jeroboam's choice of it (1 Kings xii, 20) as a sanctuary. When the prophet Hosea foretells the entire sweeping-away of the system which the ten tribes had cherished, the point of extreme destitution is that "they shall be many days... without an ephod, and without teraphim" (Hos. iii, 4), deprived of all counterfeit oracles, in order that they may in the end "return and seek the Lord." It seems natural to infer that the teraphim were, in these instances, the unauthorized substitutes for the Urim. The inference is strengthened by the fact that the Sept. uses here, instead of teraphim, the same word (δεισαφεῖα) which it usually gives for Urim. That the teraphim were thus used through the whole period of the kingdom may be inferred from their frequent occurrence in conjunction with other forms of divination. Thus we have in 1 Sam. xv, 23 "witchcraft" and "teraphim" (A. V. "idolatry"), in 2 Kings xxiii, 24 "familiar spirits," "wizards," and teraphim (A. V. "images"). The king of Babylon, it may be usefully consulted (Ezck. xxiv, 21). They speak vanity (Zech. x, 2). See Teraphim.

III. Theories of Interpreters.—When the Jewish exiles were met on their return from Babylon by a question which they had no data for answering, they agreed to preserve the settlement of the first day till there should rise up a "priest with Urim and Thummim" (Ezra ii, 63; Neh. vii, 65). The inquiry what those Urim and Thummim themselves were seems likely to wait as long for a final and satisfying answer. On every side we meet with confessions of ignorance—"Non constat" (Kimchi), "Vetitum est (Aben-Ezra), 'Difficile est inventum' (Augustine), varied only by wild and conflicting conjectures.

1. Among these may be noticed the notion that, as Moses is not directed to make the Urим and Thummim, they must have had a supernatural origin, specially connected with a certain being upon whom the high priest consecrated (Bachman, Hottinger in Buxtorf, Dies. de Ur. et Tha. in Ugelino, xi). It would be profitless to discuss so arbitrary an hypothesis.

2. A favorite view of Jewish and of some Christian writers has been that the Urим and Thummim were in historical times some twelve stones of various natures of the tribes of Israel were engraved, and the mode in which an oracle was given was by the illumination, simultaneous or successive, of the letters which were to make up the answer (Jalkut Sifre, Zohar in Ezck. i, 103; Maimonides, B. B. ben-Nachman, in Buxtorf, loc. cit.; Dru- sius, in Critt. Soc. in Ezck. xxviii; Chrysostom, Grotsius, et al.). Josephus (Ant. iii, 7, 5) adopts another form of the same story, and, apparently identifying the Urим and Thummim with the spondylos on the shoulders of the ephod, says that they were bright before a victory, or when the sacrifice was acceptable, dark when any disaster was impending. Epiphanius (De XI. Gen. 44) and the writer quoted by Suidas (s. v. Ἐπιφανεία) present the same thought in yet another form. A single diamond (διάμακ) placed in the centre of the breast-plate gratified peace when it was bright, war when it was red, death when it was dusky. It is conclusive against this view that there was no analogy, they make unauthorized additions to the miracles of Scripture; (2) that the former identify two things which in Ezck. xxviii are clearly distinguished; (3) that the latter makes no distinction between the Urим and the Thummim, such as the repeated article lends a

3. A theory involving fewer gratuitous assumptions is that in the middle of the ephod, or within its folds, there was a stone or plate of gold on which was engraved the sacred name of Jehovah, the Shem-hammaphorah (q. v.) of Jewish Cabalists; and that by virtue of this, fitting its image, one of his own sons, and then getting a Levite as his priest, makes for him an "ephod and teraphim" (Judg. xvi, 5; xviii, 14, 20). Throughout the history of the northern kingdom, their presence at Dan made it a sacred place (ver. 30), and apparently determined Jeroboam's choice of it (1 Kings xii, 20) as a sanctuary. When the prophet Hosea foretells the entire sweeping-away of the system which the ten tribes had cherished, the point of extreme destitution is that "they shall be many days... without an ephod, and without teraphim" (Hos. iii, 4), deprived of all counterfeit oracles, in order that they may in the end "return and seek the Lord." It seems natural to infer that the teraphim were, in these instances, the unauthorized substitutes for the Urim. The inference is strengthened by the fact that the Sept. uses here, instead of teraphim, the same word (δεισαφεῖα) which it usually gives for Urim. That the teraphim were thus used through the whole period of the kingdom may be inferred from their frequent occurrence in conjunction with other forms of divination. Thus we have in 1 Sam. xv, 23 "witchcraft" and "teraphim" (A. V. "idolatry"), in 2 Kings xxiii, 24 "familiar spirits," "wizards," and teraphim (A. V. "images"). The king of Babylon, it may be usefully consulted (Ezck. xxiv, 21). They speak vanity (Zech. x, 2). See Teraphim.

III. Theories of Interpreters.—When the Jewish exiles were met on their return from Babylon by a question which they had no data for answering, they agreed to preserve the settlement of the first day till there should rise up a "priest with Urim and Thummim" (Ezra ii, 63; Neh. vii, 65). The inquiry what those Urim and Thummim themselves were seems likely to wait as long for a final and satisfying answer. On every side we meet with confessions of ignorance—"Non constat" (Kimchi), "Vetitum est (Aben-Ezra), 'Difficile est inventum' (Augustine), varied only by wild and conflicting conjectures.

1. Among these may be noticed the notion that, as Moses is not directed to make the Urим and Thummim, they must have had a supernatural origin, specially connected with a certain being upon whom the high priest consecrated (Bachman, Hottinger in Buxtorf, Dies. de Ur. et Tha. in Ugelino, xi). It would be profitless to discuss so arbitrary an hypothesis.

2. A favorite view of Jewish and of some Christian writers has been that the Urим and Thummim were in historical times some twelve stones of various natures of the tribes of Israel were engraved, and the mode in which an oracle was given was by the illumination, simultaneous or successive, of the letters which were to make up the answer (Jalkut Sifre, Zohar in Ezck. i, 103; Maimonides, B. B. ben-Nachman, in Buxtorf, loc. cit.; Dru- sius, in Critt. Soc. in Ezck. xxviii; Chrysostom, Grotsius, et al.). Josephus (Ant. iii, 7, 5) adopts another form of the same story, and, apparently identifying the Urим and Thummim with the spondylos on the shoulders of the ephod, says that they were bright before a victory, or when the sacrifice was acceptable, dark when any disaster was impending. Epiphanius (De XI. Gen. 44) and the writer quoted by Suidas (s. v. Ἐπιφανεία) present the same thought in yet another form. A single diamond (διάμακ) placed in the centre of the breast-plate gratified peace when it was bright, war when it was red, death when it was dusky. It is conclusive against this view that there was no analogy, they make unauthorized additions to the miracles of Scripture; (2) that the former identify two things which in Ezck. xxviii are clearly distinguished; (3) that the latter makes no distinction between the Urим and the Thummim, such as the repeated article lends a
URIM AND THUMMIM

6. The conjecture of Zullig (Comm. in Apoc. Exc. ii), though adopted by Winer (Italiz.,) can hardly be looked on as more satisfying. With him the Urim are bright, i.e. cut and polished, diamonds, in form like dice; the Thummim are perforated, e. being studded with stones, etc. class with inscriptions of some kind engraved on it. He supposes a handful of these to have been carried in the pouch of the high-priest's choshek, and when he wished for an oracle, to have been taken out by him and thrown on a table, or, more probably, on the ark of the covenant, according to the attributions of the pieces, according to the traditional rules known only to the high-priestly families, indicated the answer. He compares it with fortune-telling by cards or coffee-grounds. The whole scheme, it need hardly be said, is one of pure invention, at once arbitrary and offensive. It is at least questionable whether the Egyptians had access to diamonds, or knew the art of polishing or engraving them. See DIAMONI. A handful of diamond cubes, large enough to have words or monograms engraved on them, is a thing which has no parallel in Egyptian archaeology, nor, indeed, anywhere else.

7. The latest Jewish interpreter of eminence (Kaliisch, on Ezod, xxvii, 31), combining parts of the views (2) and (3), identifies the Urim and Thummim with the twelve tribal gems, looks on the name as one to be explained by a hendiadys (light and perfection = perfect illumination), and believes the high-priest, by concentrating on the attributes of the divine person represented, to have divested himself of all selfishness and prejudice, and so to have passed into a true prophetic state. In what he says on this point there is much that is both beautiful and true. Light, moon, it may be added, had taken the same view (ii, 407; vi, 278), and that given above in (3) converges to the same result. See Trancas.

8. Philo, the learned contemporary of Josephus, represents the Urim and Thummim as two images of the two virtues or powers — ἄγαθον τι καὶ ἀληθείαν. The full quotation is: Τὸ δὲ ἄγαθον (the pectoral, or breast-plate); τρεῖς γὰρ στήθος ἐπικράτει, εἰς τὸν πνεύμα ἄγαθον, ἀληθείαν, καὶ ἰδίως καὶ ἀληθείαν (De Vita Mosis, lib. iii, p. 152, t. 2, ed. Manggy). He also uses the following words (De Monearch., lib. ii, p. 824; Opp. ii, 220): 'Επι τοῦ λογίου δύον ὕψωσα καταστρέψεσθαι προσαγώρων τὸν τινὶ δείλιον τὸ καὶ ἀληθείαν. This statement of Philo has been thought by many recent interpreters to be supported by certain external evidence. It had been noticed by the old commentators that a remarkable resemblance existed between the Urim and Thummim of the Jewish high-priest and the custom recorded by Xenophon (Voy. It. xiv, 247) of the Egyptian archdruid, who was always a priest venerable for age, learning, and probity, and who opened judicial proceedings by suspending, by a gold chain hung round his neck (comp. Gen. xii, 42), an image made of a sapphire stone, which was called ἀληθεία, i.e., "truth," and with which Diodorus Siculus (i, 48, 25) says he touched (τρέπει) the party who had gained the cause. Certain traces of a similar custom among the Romans had also been adverted to—namely, that among the Vestal Virgins, at least she that was called Maxima, and who sat in judgment and tried causes as the Pontifex Maximus did, wore a similar antependium (Lipius, De Vestae et Vestales Symbola [Antv. 1603, ap. Plant.], cap. ult.). But these resemblances among the Egyptians were considered to have been derived by them from the Jews, in consequence of their correspondence with them after Solomon's marriage with Tharshah's daughter (Patrick, on Ezod. xxvii, 30). Subsequent discoveries, however, among the antiquities of Egypt lead to the conclusion that these resemblances belong to a much earlier period.

Sir G. Wilkinson says the figure of Truth which the Egyptian archdruid suspended from his neck was, in fact, a representation of the goddess who was worshipped under the dactyl, or double, character of Truth and Justice.
that the Urim and Thummim were "things well known to the patriarchs," as divinely appointed means of inquiring of the Lord (Gen. xxv, 22, 23), suited to an infantine state of religion; that the originals were preserved, or the real use at least, among the Abrahodians, and, at the reformation under Moses, were simply recognised; that the resemblances to them among the Egyptians were but imitations of this primeval mode of divine communication, as were the heathen auspices of similar means originally connected with the sacrifice of the first born.

In opposition to this view of a direct Egyptian origin of the objects in question, it has been forcibly urged (1) that the words Urim and Thummim do not, in fact, mean Truth and Justice; (2) that, with the exception of the single and undistinctive use of the term "judgment" (דעת) in connection with the κοινήν, or pontifical pectorale, there is no magisterial function of the high-priest in the cases of consultation, like that of the Egyptian archjudge; and (3) that, if such an image were intended, it is strange that no description is given to identify it, nor any prescription made as to its form or structure in the Mosaic account, as there is of all the other articles of the priestly regalia (see Keil, Commentary, ad loc.).

IV. Occasional Use.-The process of consulting the Lord by Urim and Thummim, and the forms in which the consultation was returned, are nowhere, so far as Scripture, and all we can say on the subject is from Rabbinical tradition. The rabbins say that the manner of inquiring was as follows: the priest put on his robes, and went (not into the sanctuary, where he could go but once a year), but into the sanctuary, or holy place, and stood before the curtain or veil that divided the sanctuary from the sanctuary. There he stood upright, facing towards the ark of the covenant, and behind him stood the person for whom he inquired, in a right line with the priest, facing the back of the latter, but outside the sanctuary. Then the high priest inquired of God concerning the matter required, in a low voice, like one praying half audibly, and, keeping his eyes upon the breastplate, he received by Urim and Thummim the answer to his question. Maimonides says it was not lawful to inquire by this mode for private individuals, but only for the king, or for him on whom the affairs of the congregation lay.

With respect to the mode in which the answer was returned, Prideaux, and some other Christian commentators, think that when the high-priest inquired of the Lord, standing in his robes before the vail, that an audible voice issued from the curtain of the Tabernacle, and said that the answer was given by certain letters engraved on the stones in the breastplate becoming peculiarly, prominently lustrious, in proper order, so as to be read by the high-priest into words. For instance, when David inquired of God whether he should go up to one of the cities of Judah (2 Sam. ii, 1), the answer was, "Go up," ויהיה, aleph; the letters ה, ה and the became in order prominently lustrious, and thus formed the word. These explanations evidently depend upon the Talmudic theories above written, to the form and nature of the objects themselves. See Divination.

V. Typical Significance.—The office of the high-priest and his dress, as well as the tabernacle and its furniture and service, were all typical of the Christian dispensation, or of the office and person of Christ; in whom, also, the Urim and Thummim, as well as the other types and types, Prefiguration, Manifestation, and Truth. He was the "true Light, that lighteth every man that cometh into the world" (John i, 9). "Being made perfect, he became the Author of salvation to all that obey him" (Heb. v, 9). He was "God manifest in the flesh" (1 Tim. iii, 16). He is "the Way, the Truth, and the Life" (John xiv, 6), and he "came to bear witness to the Truth" (xvii, 37). By Urim and Thummim a measure of the Holy Ghost was granted to the Jewish high-priest; Christ is a high-priest in whom are all the gifts of the Holy Ghost without measure (iii, 94). "He put on righteousness as a breastplate" (Isa. lx, 3), and by his merits and intercession as our continual High-priest, he has given to us "to put on the breastplate of faith and love" (1 Thess. v, 8). Some have seen the Urim and Thummim the object alluded to by John as "the white stone" (Φύλαξ λευκός) of the Christian mysteries (Rev. ii, 17). See Typography.

VI. Literature.—In addition to the works cited above, and those referred to by Winer (Reusswörterb. s. v.) and by Darling (Cyclopedia, Bibliograph. col. 231 sq.), there are monographs on this subject in Latin by Calov (Viteb. 1675), Wolf (Lips. 1740), Schröder (Marb. 1741), and Stieritz (Erl. 1743), and in German by Behrens (Berlin 1824) and Saulschütz (Königb. 1849). See High-priest.

Uritus, in Greek mythology, was a surname of Jupiter, who sends good winds to those at sea.

Uriya (or Oriasa) Version. Uriya, the vernacular dialect of Oriasa (q. v.), is a tolerably pure dialect of the Sanscrit, possessing some Persian and Arabic terms, borrowed through the medium of the Hindustani, with other elements of closely original composition. It is closely connected with Bengali, but greatly differing in pronunciation, for an effeminate style of articulation is prevalent in Bengal, while the inhabitants of Oriasa have a broad and almost rustic accent. The Oriya has also a written character peculiar to itself.

The first version of the Scriptures in this dialect was commenced by the Serampore missionaries in 1803, and an edition consisting of one thousand copies of the New Testament, was printed in 1811. The first edition of the Old Testament, also consisting of one thousand copies, was printed in 1819. The New Testament was soon exhausted, and a second edition of the four thousand copies, was issued in 1822, in the same year in which a mission by the General Baptist Society was established at Cuttack, the capital of Oriasa. In 1832 a second edition of the Old Testament, with the press, together with a separate edition of the Psalms. In 1838 the Rev. Messrs. Sutton and Noyes undertook a new version of the Scriptures in Oriya. Dr. Sutton commenced with the book of Genesis, and when the translation was completed he carried on both the printing and binding at Cuttack. An edition of the Old Testament, he completed for the Bible Society in 1844. In 1854 an edition of two thousand copies of the Gospel, issued from Dr. Suck's press, was also issued from the Cuttack press at the instance of the Bible Society. In the Report for 1863 we read that the New Testament has been revised, but the Old Testament has been reprinted as before. Whether Dr. Sutton completed his version or not we are unable to state. The only notice we find again concerning the Oriya version since 1863 is the statement made in the Annual Report of the British and Foreign Bible Society for the year 1873 that "the Rev. Dr. Buckley has completed the printing of a revised version of the Old Testament, at the society's expense. From the Report for the year 1879 we see that up to March 31, 1879, the British and Foreign Bible Society had disposed of 4000 Bibles and Old Testaments, 34, 000 copies of portions of the Old Testament, and 2000 copies of portions of the New Testament, or altogether of 40, 000 copies, in part or in whole, of the Oriya version. (B. T.)

Urpsperger, Johann August, a German theologian and Orientalist, was born Nov. 29, 1798, and during most of his public life was pastor and senior at Augsburg. He was possessed of great learning and penetration, and was a fearless and earnest thinker. He was also a foremost champion of evangelical truth against the attacks of the philosophical and rationalizing neologists of his country, and contributed several trenchant works to the literature of that controversy.
among them, Versuche einer genauen Bestimmung des Geheimnisses Gottes (1769–70, 4 pts.);—Kurfürstliches System der Dreietagsgesellschaft:—Traktat von dem gottlichen Ethos (1777) by one of the prominent leaders of the A.D. party of the clergy and the Roman people, and was recognised by the emperor. After a prolonged conflict, Ursinus was driven out of Italy, and went to Cologne. He returned to Italy in 1681, and renewed the agitation, but was finally banished by the Council of Aquila. He is not included in the lists of popes. See Herzog, Real-Encyklop., s. v.

Ursinus (Orosin), the name of a French family eminent from the 15th century, for its services in State and Church and historical literature. Two of them are appropriate here.

1. Jacques Jouvenel des, brother of the succeeding, was born in Paris, Oct. 14, 1410, and became successively rector of the Cathedral of Paris (1411) and archbishop of Rheims (Sept. 25, 1444); but in 1449 he resigned the latter position in favor of his brother, receiving the two dioceses of Poitiers and Fréjus. He died at Poitiers, March 12, 1457. He was occupied in several political and ecclesiastical negotiations of the time.

2. Jean Juvénal des, Jr., a prelate and historian, was born in Paris, Nov. 23, 1388, and, after studying at Orleans and Paris, became doctor in utroque iure, and enjoyed some minor offices; but was driven into exile with his parents in 1416. In 1425 he returned to Paris, and was again in favor under Charles VII, and was soon rose through lower ecclesiastical positions to the bishopric of Beauvais (1431). In 1444 he was transferred to the see of Lorraine, and in 1449 he became archbishop of Rheims, where he died, July 14, 1473. He was engaged in several diplomatic embassies, and wrote a number of ecclesiastical works, for which he saw Hoefler, Nouv. Biog. Générale, s. v.

Ursinus, Johann Heinrich, a Protestant theologian of Germany, was born at Spires, Jan. 26, 1608, and died at Ratisbon, May 14, 1667, where he had been superintendent since 1655. He is the author of Adnotatorum Sacrarum Libri Doceodici (Frankf. 1688–90, 2 vols.);—Compendium Histor. de Ecclesiast. Germanior., Origine et Progressu ad Adhesionem Domini usque ad Carolum Magnum (Nuremb. 1664);—Ecclesiast. sine de Socrate Conscio (Frankf. 1669);—Storia Conc. Conc. Juxta Diversa Tractandi Methodos Para- digmata (ibid. ed.). See Winer, Handb. der theolog. Literature, i, 307; ii, 84; Fürst, Bibl. Jud. iii, 462. (B. P.)

Ursinus (Beer), Zacharias, a German theologian of the 16th century, the friend and pupil of Melanchthon, the friend of Calvin and Peter Martyr, and one of the two authors of the Heidelberg Catechism, was born at Breslau, July 18, 1554. He accompanied Melanchthon to the religious colony of Worms in August, 1535; afterwards he went to Geneva; then to Paris, where he studied Hebrew under Jean Mercier. On his return he was called to the service of his native city, and became fourth professor of the Collegium Prius Ordinis in September, 1558; but the mildness of his views respecting the Jansenists excited the suspicion of the university, and in the following year he was deprived of his professorship and of all his rights as a citizen, and was banished from the city. He subsequently settled in the city of Liége, where he died, May 11, 1578. The name is also given to various persons, as Jean Mercier (Bibl. Jud. 1558), and Jean Juvénal des, Jr., a prelate and historian, was born in Paris, Nov. 23, 1388, and, after studying at Orleans and Paris, became doctor in utroque iure, and enjoyed some minor offices; but was driven into exile with his parents in 1416. In 1425 he returned to Paris, and was again in favor under Charles VII, and was soon rose through lower ecclesiastical positions to the bishopric of Beauvais (1431). In 1444 he was transferred to the see of Lorraine, and in 1449 he became archbishop of Rheims, where he died, July 14, 1473. He was engaged in several diplomatic embassies, and wrote a number of ecclesiastical works, for which he saw Hoefler, Nouv. Biog. Générale, s. v.

He subsequently settled in the city of Liége, where he died, May 11, 1578. The name is also given to various persons, as Jean Mercier (Bibl. Jud. 1558).
formed the principal element in the new constitution; an Anweisung auf etlicher Theologen Censur, and other works. When the Maulbronn Convention grew out of these discussions [see Maulbronn], Ursinus was one of the colleagues for the Palatinate, and demonstrated by his readiness and keenness that he was one of the ablest disputants of the time. The Württembergers having violated the agreement to refrain from publishing the proceedings, the Heidelbergers were obliged to respond; and the duty of correcting the pervasions which had gone out before the public devoted again on Ursinus. From this time onward he was involved in the controversy about the correct interpretation of Art. x. of the Augsburg Confession, in which the strict Lutherans insisted that Luther's writings, especially his polemical writings, should be considered the only guide, and endeavored to deprive all who did not hold their view of the legal standing assured to those who accepted the Confession as a statement of their faith. Weary of the endless dispute, Ursinus closed his share in the controversy in 1566, with the determination to write no more. He was worn out. His health was impaired, and he was obliged to seek relief from excessive labor by resigning the chair of dogmatics to Hieronymus Zanchius, Feb. 10, 1568. A few months later, however, a new conflict demanded his attention. George Withers, an Englishman, had defended in a dissertation at Heidelberg the thesis that the administration of ecclesiastical offices, with all its external ceremonies, was contrary to the ecclesiastical ministerium in connection with an organized presbytery; and Olevian had endorsed that opinion, while Erasmus opposed it. Each side gained adherents without being able to intimidate its opponents. Beza and Bullinger were called on for advice, and, eventually, Ursinus was required by the elector to state his views. He did this in 1569, in so candid and kindly a manner as to win approval even from those who did not accept his conclusions. The elector finally decreed the erection of presbyteries and the execution of discipline.

The accession of the elector Louis inaugurated a new order of things in the Palatinate, under which Lutheranism was able to regain its predominance. The Collegium Sopranitum was closed in September, 1577, and Ursinus was dismissed from his post. A professorship in Lausanne was at once offered him, but he declined it, and accepted, instead, a call to Neustadt, where the theology of the Reformed Church found a refuge in the Collegium Illustre Cassinirianum. He had previously published, in Latin and German, the confession of faith appended to the late elector's will (1577), and was soon afterwards commissioned, in connection with Zanchius, to draw up for the Frankfort Synod (September, 1578) a confession which should be accepted in the Reformed churches of all European countries. This office he declined on the grounds of ill-health and distrust of his ability. He began his lectures on Isaiah May 26, 1578, and subsequently participated in the conflict over the acceptance of the Formula Concordiae, having contributed the most powerful argument in opposition to that measure. He died March 6, 1588, at Neustadt. His literary remains were intrusted to Prof. Jungnitz, and he, with other friends of the departed scholar, collected and published many works which, until then, existed only in Mss., and gave the author's name to others which had previously been anonymously published. The Heidelberg Catechism, with notes, and Lectures on the Organum of Aristotle, etc., were published at Neustadt. Pareus, at a later day, issued a corrected edition of the Exposition of the Catechism (Brem. 1623, 2vo), and a complete edition of Ursinus's works was issued by Reuter, his pupil and immediate successor in the Sopranitum.

St. Ursula. (From a picture by St. Cattarina de' Vigni, in the Bologna Gallery.)
URSWIL

become his wife. She fell pierced with an arrow, which has become her peculiar attribute in artistic representations. The said soldiers immediately afterwards the massacre heavily hosts, equal in number to the murdered virgins, appeared and put the barbarians to flight. The delivered inhabitants of the city thereupon buried the fallen pilgrims, and erected to each one a stone bearing her name—the names having been obtained from Janes, a bishop, who was in the train of the pilgrims and who had formed a refuge in the town from the Christian companions. Soon afterwards Clementia, a pilgrim from Greece, having been urged in repeated dreams, erected a church among the graves in honor of Ursula and her eleven thousand companions. The sanctity of this place of burial is apparent from the fact that no other church in the city is so honored. In the bodies of baptized children, can be performed in its hallowed soil.

The origin of the Ursula legend is probably to be found in the ancient martyrlogies and saints' chronicles of a date earlier than the 12th century, the legend having been current in this form in Germany since that period, while a somewhat different version has prevailed in England. This renaissance that Maximus, the usurper in Gaul (385-388) and former commander in Britain, had required of king Dionotus of Cornwall a number of captives for his legions, and that the king at once forwarded sixty thousand virgins of common and eleven thousand of noble rank, among them his own daughter Ursula. They were driven by storms, "ad barbaras insulas appulles," and murdered by the Huns and Picts (?). The earliest mention of any similar event is found in the poetical martyrology of Oct. 21) of Wunnelbert of Prum, who died in 870 (see D'Acchery, Spicileg, ii, 54). The martyrology of the monk Ursula of St. Germain, written about 875, mentions two virgins of Cologne, "Martha et Paula, cum allis pluribus" (Acta SS. [Boll.] Jun, 7, 619), and various others of Cologne of scarcely more recent date mention eleven virgins and give their names. The massacre itself is with great unanimity attributed to the Huns, under the command of Attila. For a thorough discussion of the extent to which the legend involves credible truth we refer to Zöckler, in Hesperia Real-Encyklop., s. v. See Crombach, Ursula la Vindicata, etc. (Col. 1647, fol.), the most extensive work; id. Act. Sive Liber XII S. Ursulae Videlicet, (4to); also Vadian, Oratio de Xl Millibus Virginum (Vien. 1510); Usher in Antiq. Eccles. Brit. (Lond. 1687), p. 107 sq.; Baronius, Martyrology, Rom. ad Oct. 21; id Annali, ad an. 583, 584, 4 e 5; in Bollandists, (Antw., 1660, i, 501 sq.).

Ursulines, the name borne by the nuns and Theatines of a charitale order in the Church of Rome, which was founded Nov. 25, 1585, at Brescia by Angela Merici (q. v.), and became prominent among the benevolent orders instituted in the 16th century to impede the progress of the Protestant Reformation. Their original rule did not require ascetical retirement from the world nor the wearing of a peculiar dress. Even the obligation to chastity was rather recommended than imposed. But, after the papal confirmation of the order had been obtained (June 9, 1544), the rule became more strict. Formal congregations were organized, whose members, for the most part, lived together in convents. A girdle of leather to symbolize virginity was added to the garb. More extended measures to uniform and regulate the order were taken under the direction of cardinal Borromeo, who was from the first anxious to strengthen the order. Before the century the order had become established in France, and rapidly increased the number of its convents. The single congregation of Paris possessed over eighty such houses. In time this congregation devised a new rule which was approved by pope Paul V, and has become the model for the other French congregations of the Ursulines of the Congregation of St. Andre, Dijon, and Lyons (see Constitut. d. Religieuses de S. Urs. de la Congr. de Paris, 1648, and Reglement, 1673). It adds to the three solemn vows of Augustine a fourth, which requires the instruction of female youth. The garb consists of gray skirt, black robe, heathen girdle with iron buckle, black cloak without sleeves, a head-cloth with short white veil, and a large black thin veil over all. The French congregations originated the Ursuline order in Germany. In the time of its greatest extension the order comprised of about twenty loosely connected congregations, having, perhaps, 150 convents and 15,000 to 20,000 nuns, the maximum number of inmates being 60 nuns and 20 lay-sisters to a convent. The Ursulines are distinguished by a conscientious performance of the obligation to instruct the young. In Italy and Switzerland the congregated or non-regulated Ursulines compose the body of the order, and they observe a more ascetical rule than the regular nuns. They devote eight days annually to the spiritual exercises prescribed by Loyola, teach young girls daily, catechise adults on Sunday, visit the sick, dispense alms, and hold conferences every Friday. Their novitiate extends over three years. The different houses are almost everywhere under the direction of the diocesan bishops. See Les Chroniques de l'Ordre des Ursulines (Paris, 1676), vol. ii; Journal des Illust. Religieuses de l'Ordre de S. Urs. iv, 1840; Mayer, Ursuline Gorgi (Venecia, 1692); Helvot, Geschichte aller Kloster- u. Ritter-Orden, iv, 178 sq.; Crome, Gesch. d. Mönche-Ordens, ch. iv; Leben der Ursulinen n. S. Ursul, Real-Encyklop., s. v. The first Ursuline colony in America was founded by Marie Guyart at Quebec in 1663; and there are now convents of this order Ursuline of Trois Rivières, Canada; also at Trois Rivières and Chatham, in Canada; and in the United States at Morrisania, N. Y.; at Cleveland, Toledo, and Pay- ette, Idaho; at Springfield and Alton, Ill.; at Columbus, Savannah, and Augusta, Ga.; at New Orleans, San Antonio, Galveston, Louisville, and St. Louis. But they have ceased to exist in Italy, Switzerland, and Germany since 1871.

Uruk, in Chaldean mythology, was the name of a wicked demon, "enormous" and "multifol'd." See Lenormant, Chald. Magic, p. 3, 10.

Uru Sukhar, in Chaldean mythology, was a title of the god Bilgi, meaning "protector of the family." See Lenormant, Chald. Magic, p. 186.

Urwick, William, D.D., an Irish Congregational minister, was born at Shrewsbury, Dec. 8, 1791. He graduated at Hoxton College, and settled at Sligo; but he came into important discussions with the Roman Catholic divines, and by the brilliancy of his arguments and the overpowering force of his mind won for himself a place among the foremost defenders of the Gospel of Christ. In 1826 Dr. Urwick accepted the pastorate of York Street Chapel, Dublin, and during the long life of his public ministry was recognized as an able advocate of the religion of Christ. He was intimately associated with the Irish Evangelical Socie-
Epistola ad L. Capellum de Variis Text. Heb. Lectioomibus (1652) — Britannicarum Ecclesiæ Antiquitates (1659, fols.; enlarged ed. 1677) — and a multitude of works on the ecclesiastical and literary history of the day, and on some questions in theology. His library, for which he collected books and MSS. from all quarters, was, after his death, presented to the Dublin University, where it remains. He succeeded in obtaining six copies of the Samaritan Pentateuch and several MSS. of the Syriac version. On the death of Bishop Goudi, his friend and benefactor, Dr. Eringrton (1847, 16 vols., 8vo), with a life of the author.

Usher, John (1), an American Episcopalian minister, was born in 1689; graduated at Harvard College in 1719; studied theology; went to England for holy orders, and returned as missionary of the Society for Propagating the Gospel in Foreign Parts; and was appointed to the mission at Bristol, R.I. He died at Bristol, April 30, 1775. See Sprague, Annals of the Amer. Pulpit, v, 48-50.

Usher, John (2), son of the preceding, was born at Bristol, R.I., 1722; graduated at Harvard College in 1745; practiced law for many years; commenced reading scripture and writing of his findings in 1746; ordained by bishop Seabury in 1768, and rector of the parish until 1800. He died July, 1804. See Sprague, Annals of the Amer. Pulpit, p. 49.

Usus, in Phoenician mythology, was, according to tradition, handed down by Sanchoniathon as a brother of Hapyansiorus, who at first protected his body with hides of animals which he had killed; and when rains and winds came, and fire broke out through friction of the trees one with another, he risked himself upon a tree, whose branches he had cut off, out upon the treacherous sea. He dedicated two pillars to fire and wind, and sacrificed the blood of the animals he had slain.

Usque, Abraham, whose Christian name was Duarte Pinel, belonged to those unhappy Jewish exiles who were driven from the Spanish peninsula in 1492. He sought refuge at Ferrara, in Italy, where he established, under the name of Abraham Usque, a great printing establishment, in order to supply the Marranos with Hebrew books. He not only edited various Rabbinical works, but also published the celebrated Spanish translation of the Hebrew Scriptures entitled Biblia en Lengua Española, traducida Palabra por Palabra de la Verdadera Hebraico, por muy excelente letrados. Vistala y examinada por el Oficio de la Inquisicion, which he dedicated to Hercules II and to Maria de las Casas (Ferrara, 1533-1553). There is a great deal of dispute about this Bible, since two editions of it were simultaneously printed—the one edited by Duarte Pinel, at the expense of Gerónimo de Varías, and the other edited by Abra-

Usher, J. G. (or Uscher). James, an illustrious prelate, and a great luminary of the Irish Church, was born at Dublin, Jan. 4, 1580. He was educated at Trinity College, Dublin, being one of the first three scholars matriculated. In 1601 he was ordained; in 1609 he became chancellor of St. Patrick's, and soon after professor of divinity at the university; in 1619 he was made bishop of Meath; and in 1624 he became archbishop of Armagh and primate. During the troubles arising out of the war between Charles I and the Parliament, Usher had to leave Ireland, and was subjected to much hardship, his property being seized and his revenues distrained. He obtained the see of Carlisle in commendam, but from that but little encouragement accrued to him. He afterwards became preacher at Lincoln's Inn, and was one of the six divines allowed by Parliament to confer with Charles at Carisbrook. No man could be matched against him in debate, and during the Civil War he preached many bitter sermons against the Independents. In 1642 he removed to Oxford, but, the king's power declining, he retired to Cardiff. He was recognised as one of the greatest scholars of his time. Richelieu is said to have offered him a high position in France. He declined: a cloud hung over him throughout his latter years; he was spent in the family of lady Peterborough at Ringate, where he died, March 21, 1656. Usher was a laborious student, and amassed vast learning. His Annales Vet. et Novi Test. (1650-54, fol.) established his family as a scholar and a chronicler, and fixed the Biblical chronology. Pinel and Philip were his immediate predecessors in the family of Usque, which is adopted in the A. V. He wrote also De Gracia LXX. Versione Syntagma: —
those who did it to judicial condemnation (Prov. xxviii, 8).

The practice of mortgaging land, sometimes at exorbitant interest, grew up among the Jews during the Captivity, in direct violation of the law (Lev. xxv, 35, 38, 39; Deut. xxiii, 21). When the rate was 1 in 100 per month, corresponding to the Roman centes-

i

im usura, or 12 per cent, per annum—a rate which Niebuhr considers to have been borrowed from abroad, and which is, or has been till quite lately, a very usual or even a minimum rate in the East (Niebuhr, Hist. of Rome, iii, 57, Engl. trans. Volney, Trav. ii, 534, note; Chardin, Voy. vi, 122); but under Turkish misrule it now often reaches 40 or 50 per cent. (Conder, Tent Work in Palest. ii, 268). Yet the law of the Koran, like the Jewish, forbids all usury (Lane, Mod. Egypt, i, 132; Sale, Koran, c. 80). The laws of Menu allow 18 and even 24 per cent, as an interest rate; but, as was the law in Egypt, accumulated interest was not to ex-
ceed twice the original sum lent (Laws of Menu, viii, 140, 141, 151, Jones [Sir W. J.], Works, iii, 295; comp. Diod. Sic. i, 9, 75). This Jewish practice was annulled by Nehemiah, and an oath exacted to insure its discon-

int.

ning (Neh. v. 3—13; comp. Selden, De Jur. Nat. vi, 17, Hoffmann, Lex. s.v. "Usura"). Our Saviour denounced all extortion, and promulgated a new law of love and forbearance: "Give to every man that asketh of thee, and of him that taketh away thy goods, ask them not again." (Luke vi, 34.)

The practice of usury was severely censured by the ancient Church and strictly forbidden to the clergy. One law prohibited a usurer from ordination. Many of the ancient canons condemned it in unexpressed terms.

One of the canons of Nice says, "Forasmuch as many clergymen fear not God, offer usurious interest, and getting the Holy Scriptures (which speak of the right-

eous man as one that hath not given his money upon usury), have let forth their money upon usury, and taken the usual monthly increase, it seemed good to this great and holy synod that if any one, after this de-

cease, shall be found to take usury, or demand the prin-
cipal with half the increase of the whole, or shall invent any such methods for filthy lucre's sake, he shall be de-

grated from his order, and have his name struck out of the roll of the Church." The same practice is censured by the Apostolical Canons; the Council of Elberfeld; the first Council of the Church of Arles; the Council of Carthage; the Council of Laodicea and of Trullo. Usury was of various kinds; sometimes it was called centes-

i

im, the hundredth part of the principal being paid every month. This was allowed by the civil law, but it was generally condemned by the Church. Another form of usury was called secuplum; that is, the whole and half as much more. This was condemned by a law of Justinian and reprobated by the Church. Other forms of lower interest were allowed, such as half or third of the centesimal interest. See Bingham, Excl. Antiq. p. 200—201, 1014, etc.

Section 2. The administration of usury in the sense of receiving a reasonable rate of interest for the use of money employed in merchandise belongs to a different category, and is nowhere forbidden; nor is it more contrary to the law of love than the plying of merchandise itself for the sake of gain. Hence it is referred to in New

Test., Scripture as a perfectly understood and allowable practice (Matt. xxi, 27; Luke xix, 23)—a practice which the Jews of all ages, from the time of the Exile, when they began to be in a manner driven to commerce for their support, have felt themselves at liberty to carry on. That it may be, and often has been, carried on by the Jews in a way that conflicts with the great principles of equity, there can be no doubt; but this belongs to the abuse, not to the use, of the liberty in question, and is to be condemned on commercial as well as moral grounds. Applied to Christian times, the spirit of the old enactments regarding usury finds its fulfilment in the frank and timely ministration of pecuniary help from those who can give it to persons on whom misfortune and poverty have fallen, and, as regards commercial transactions, in the maintenance of upright and honorable dealings.

The maximum rate of interest for the loan of money was first prohibited in England during the reign of Edward the Confessor; but that law is considered to have become obsolete, as in 1126 usury was forbidden only to the clergy, and in 1185 it was decreed by the Council that "such of the clergy as were usurers and hunters after worldly gain, and for the plunder and suppression of the laity, ought to be degraded." In 1199, the last year of the reign of Richard I, the rate of inter-

est for money was restricted to 10 per cent, which contin-

ued to be the market rate until the reign of Henry VIII. In 1811, Philip IV fixed the interest that might be exacted in the fairs of Champagne at 20 per cent. James I of Arragon, in 1242, fixed it at 18 per cent. In 1490 the rate of interest in Placentia was 40 per cent. Charles V fixed the rate of interest in his dominions at 12 per cent. In 1546 the rate in England was fixed at 10 per cent.; in 1624 it was reduced to 8; in 1651 to 6; and in 1811 it was fixed in all the United States in 6. By 3 and 4 William IV, c. 98, bills not having more than three months to run were exempted from the operation of the laws against usury, and by 1 Victoria, c. 80, the exemption was extended to bills payable at twelve months. By 2 and 3 Victoria, c. 57, it was enacted that if in no cases of collection or guarantee for loan or forbearance of money above £10 shall not be affected by the usury laws. Five per cent. is still left as the legal rate of interest for money, unless it shall appear that any different rate was agreed upon between the parties. In most of the United States a certain rate of six per cent. is a free from law, and penalties are imposed for exacting a higher rate. See Loan.

U'ṭa (Oirā; Vulg. Uba), a corrupt Greek form (1 Esdr. v, 80) of the Heb. name (Ezra ii, 45) Aḥkūs (q. v.).

Utambadhen, in Hindu mythology, is the eldest

son of king Suuayambu, the progenitor of the entire generation of men. He was married to Sunadli, by whose son Druwunan, who lived 6000 years after his birth, was a saint endowed by Vishnu with wisdom, and ruled the kingdom of his father through a period of twenty-six thousand years, and was finally trans-

planted into the polar star.

Utenheim, Christofor von, bishop of Basle in the era of the Reformation, and an unconscious agent in preparing the way for that change in his diocese, was born about 1450 of an ancient and noble family; and in time became a representative of the views of Gerson (q. v.). He was made a canon at Strasbourg, and after-

wards provost; became rector of the newly founded University of Basle, master, doctor of canon law, and, it is said, general of the Order of Cluniacensians. In A.D. 1510 he was made administrator of the diocese of Basle, and in 1502 bishop. He introduced an economi-

cal administration, which enabled him to liquidate the debts of his diocese, and in time to promote the interests of learning, but which, to some extent, offended his clergy, and caused the Council of Basle to suspect him of entertaining ambitious designs. Under this he lost his re-

covering rights over the town which his predecessors had alienated for money. This dispute ended eventually in the refusal on the part of the town to pay the bishop's penury, which formed the last evidence of episcopal authority in secular matters. In spiritual and ec-

clesiastical matters, Utenheim was the first bishop to recog-

nize himself on the side of reform. In obedience to the direc-

tions of the Council of Basle, he framed synodal statutes, and convened a synod, Oct. 28, 1503, which he addressed in words of earnest exhortation and warning, to the end that a purer life among the clergy might restore
the Church to respect among the laity, and might introduce a purer morality among the people. The statutes he had prepared were then adopted; the clergy promised to conform to them, and pledged themselves to hold two synods annually, at which reports should be rendered concerning their own conduct and the moral and religious state of the people, and measures for further improvement should be devised. This endeavor was nevertheless fruitless, because opposition and disobedience from his clergy soon appeared in measure too great annually to control; but it led to the inception of a new plan for reforming the diocese, which has given this bishop a noteworthy place among the forerunners of the Reformation. In 1512 he called Capito (q. v.) to become preacher in the cathedral, and three years afterwards Geolampus, neither of them representatives of rigid Romanism, and both destined soon to become leaders in the tendency away from Rome. Erasmus was also valued by the bishop, and invited (June 13, 1517) to make Basle his home; and when Luther began his work, Utenheim rejoiced in his boldness, and read his writings with avidity. So late as 1519 Capito wrote to Luther, and the very upright bishop had promised a refuge to the Reformer in case of need, which bishop was certainly none other than Utenheim. It soon became apparent, however, that Luther's work was causing material damage to the bishop and bishopric of Basle, and the prelate thereupon promulgated a decree demanding his removal and received a coadjutor in his office. A public and notorious violation of the fast on Palm-Sunday furnished him with a desired occasion to issue a mandate forbidding the public mention of Luther and threatening punishment for all further transgressions of the law of fasting. Erasmus responded to that mandate in a circular letter addressed to the bishop, which may have restrained the latter from extreme measures, but which, nevertheless, caused his own expulsion from the town soon after Easter, 1522. It is certain that Utenheim always remained accessible to the evangelicals; but, on the other hand, he advised the Church of Zurich not to risk the second disputation set down for September, 1528, and joined the association of German bishops for giving effect to the Edict of Worms. He retained the friendship of Erasmus to the last, and permitted the latter to express his views respecting the Church very frankly. With age, ill-health, and anxiety, he retired in 1524 to Brunntut. In February, 1527, he asked to be released from his official duties, and died March 16 of that year. See Sudanas, Basilea Sacra, etc. (Brunntut, 1668); Oehl, Gesch. d. Stadt Basel, ch. iv; Erasmus, Vitaeos, Th. Moro, etc.; Scultetus, Annales ad Christianam Tempest. Lib. iv; Witschke, Wurmesen, Basler Chronik, p. 564; Letters of Herrn. Busch and Glareau to Zwingli (ed. Schuler and Schulthess), vii, i, 195-197; Banke, Deutsche Gesch. im Zeitalter d. Reformation, ii, 518; Herzog, Leben Dekolanpfoels (3, 9 sq.); Beiträge zur Gesch. Basels (1889), Anal. and Encyclopaedia, etc.; also Tonjola, Basilea und Liturgie. Diction. Appendix, p. 206.

Utgard, in Norse mythology, is the realm of Utgard, lying at the end of the world, and the land of giants and magicians. It became known from Thor's journey to Utgard.

U'ṭhāl (Oits?), the Greek form (1 Esdr. viii, 40) of the Heb. name (Ezra viii, 14) Uṭhāl (q. v.).

Utilitarianism, a term first applied to the doctrine of utility (q. v.) by John Stuart Mill, and adopted by very many since that time. The term utility was first employed to distinguish the doctrine by Jeremy Bentham. See Mill, Utilitarianism.

Utility, in ethico-philosophical terminology, is the doctrine that actions are right because they are useful or tend to promote happiness. It is thus defined by Mill (Utilitarianism, p. 9): "The creed which accepts as the foundation of morals utility, or the greatest happiness principle, holds that actions are right in proportion as they tend to promote happiness, wrong as they tend to produce the reverse of happiness. By happiness is intended pleasure and the absence of pain: by unhappiness, pain and the privation of pleasure." The fundamental objection to the doctrine is thus stated by Dr. Reid (Active Powers, essay v, ch. v.): "Agreeableness and utility are not moral conceptions, nor have they any regard with mankind; that a man does, merely because it is agreeable, is not virtue." See Fleming and Krauth, Vocab. of Philos. s. v.

Utno, Leonardo Da, an Italian Dominican, rector of a gymnasium at Bologna, chaplain to Eugene IV, and provincial of his order for Lombardy, flourished in A.D. 1444. His works consist of two series of sermons and two translations of Loci Communes Predicatores and De Legibus. See Mosheim, Church Hist. bk. iii., cent. x., pt. ii., ch. ii.

Utraquists, a name at first given to all those members of the Western Church in the 14th century who contended for the administration of the eucharist to the laity sub utraque specie, i.e. in both kinds. The name was applied especially to the Calixtines (q. v.) in the 13th century. See Fisher, Hist. of the Ref. p. 178 sq. See TAIBORUS.

Utrecht, Peace of. Utrecht is a city of the Netherlands, capital of the province of the same name, and noted for the treaties which were signed there to close the war of the Spanish Succession. The preliminary terms of the treaty between Great Britain and France were signed Oct. 8, 1711. A congress was opened at Utrecht Jan. 12, 1712. Arrangements between the two powers were completed in August of the same year. Agreement was also reached with Holland, Portugal, Prussia, and Savoy soon afterwards. Each of the contracting parties treated in its own name, and hence there were as many as nine different treaties signed April 11, 1713. Many changes were made in the possessions of the powers named, and Protestantism made substantial gain on the continent of Europe.

Utug, in Chaldean mythology, is the generic name of the inferior and malevolent spirits properly called demons. They are said to inhabit the desert and to cause diseases of the forehead. See Lenormant, Chaldean Magic, p. 88.

Uua, in Egyptian mythology, is the name of the bark or vessel in which the image of the deity Ra (the sun) was carried by the priests. See Lenormant, Chaldean Magic, p. 88.

Uwennon, COUNCIL OF (Concilium Uniosoricon), was held in 378, under Jaroslav, archbishop of Gnesen. Several statutes were drawn up for the reform, and for the discipline of the clergy, and a subsidy granted by the clergy towards the expenses of the war against the Turks. See Main, Concil. xi., 2048.

Uyenbogaert (Uytengobar, Wytengobaard), HANS, one of the most prominent and influential adherents of Arminius, after the death of that scholar a leader of the Remonstrants—an independent and earnest and yet a moderate and considerate man, ever standing a firm and upright character, and inces-
santly engaged in promoting peace among the parties of Protestantism—was regarded as the ablest and most distinguished preacher of his time among the Remonstrants. He was to avoid, as far as possible, the application of scholastic forms of reasoning and his discourses directly on the Scriptures. He was born at Utrecht in 1557, studied at Geneva under Beza, and became pastor in his native town in 1584. From this post he was dismissed in 1589, because of the moderate views he then respecting the already controverted doctrine of predestination. In 1590 he was called to the Hague, where he became chaplain to the court of the prince of Orange and tutor to his son, and acquired great reputation and influence. He united with Arminius in petitioning the States-General to convocate a synod at which the Anabaptists might defend and view against the charges continually urged against them by the Gomarists. An interview between Arminius and Gomarus was the only result of this effort, and the dispute was afterwards continued without any relaxation of its bitterness. Uytenbogaert carried himself with dignity throughout. He delivered an address before the States, in which he set before them the rights and duties they were bound to observe. He showed the inadmissibility of compulsory support of a symbol, demonstrated that the clergy itself had occasioned the troubles in the Church, and that its object was to enforce the principles of the synod of Dort. He deplored the abuse of spiritual powers. He demanded that the States should examine the questions in dispute themselves and bring them to a conclusion; that in the event of a synod being convened no decisions should be reached before the opposing party should have had opportunity to be heard; and, finally, that if fraternity between factions could not be attained, mutual toleration at least should be insured. After the death of Arminius, in 1609, Uytenbogaert was associated with Episcopius in the leadership of his party and in the Remonstrance through which they presented their doctrinal system to the view of the States of Holland and West Friesland (1610). He accompanied an embassy to Paris as its chaplain about this time, and in the following year participated with Episcopius and others in a colloquy with their opponents at the Hague in the vain hope of securing peace. In 1616, Henry Roseus entered legal complaint against him on account of a particular exposition given by him of the first points of the Remonstrance. In 1619 he presided over a Remonstrant synod at Walwyc, which fact intensified the hostility to which he was exposed. He thereupon retired to Antwerp until 1622, during which time sentence of banishment and confiscation of property was pronounced against him and against his son, Joost, in France. In 1626 he came back to Rotterdam and lived in secrecy, endeavoring to secure a revocation of his sentence and aiding with counsel and act in the measures of his party. His goods were restored to him in 1629, and in 1631 he was permitted to be present during public worship at the Hague. He was even allowed to preach a few times, but his enemies succeeded in compelling him to finally desist from exercising the functions of the ministry. He died Sept. 24, 1644. His writings are chiefly in the Dutch language. Among them are a Church History (Rotterdam, 1646); a treatise De Auctoritate Magistratus in Ecclesia (ibid. 1647); and a translation of the Confessio sive Declarationis Sententiae Pastorum. See Schröckh, Christl. Kirchengesch., seit d. Reform, (Leips. 1806), v. 226-276, and the literature there given; also Gieseler, Kirchengesch. (Bonn. 1852), iii, 21, 33; Herzog, Real-Encyklop. s. v. Uytechage, Conrad Cornelis, a Dutch scholar of the 17th century, is the author of several, of which the most important are: De Eruditione Antiquiorum (Amsterdam 1679); Quaestiones de Antiquioribus Rerum (Amsterdam 1694); De Sacra Scriptura S. Scripturarumque Robiniarum ab Xoou Punicis (ibid. 1680);—Artificium Investigand. pudd. Hebr. Hbr. Brevis, Precepta Comprehensionis Exemplique Illustratum et Compend. de Studio Routh, etc. (ibid. 1682)—Artificium Computerum, etc. (Rostock 1684); Derivatione Absolutis (ibid. ed.);—Explicatio R. Moses Matinomidae super Patrum, s. Seniorum Judaeorum. Sententiae complect, VIII Capita, ubi Pracerta Multa, cum in Theologia tum Philosophica doctrinam Explicantur (ibid. 1685). All these writings are now scarce. See Franks, Bibl. Jud. iii, 460; Steinmeier, Billedg. Handb. s. v. Muller, "Revue P. M. V. C. et Cat., ou Catalogue of Hebrew and Jewish Works (Amst. 1686), p. 327. (B. P.) Uz (Hebr. עַשׁ, "wooded," the name of three men, and also of a region. 1. (Sept. 09, v. r. 09, Vulg. Us or Huz.) First named of the four sons of Aram (Gen. x. 23), and grandson of Sem (1 Chron. i. 17, where the lineage is condensed). B. C. post 2500. 2. (Sept. 09, Vulg. Huz, A. V. "Huz.") The eldest of the eight sons of Nahor by Milcah (Gen. xxii. 21). B. C. cir. 2000. 3. (Sept. 09, Vulg. Huz). First named of the two sons of Dishan the Horite chieftain (Gen. xxxvi. 28; 1 Chron. i. 42). B. C. post 1950. 4. The Land of Uz was the country in which Job lived (Job i. 1; xxvii. 2, 11, 27; and xxviii. 2, 11, 27). As the geographical statements of the book of Genesis are undoubtedly ethnological, and in many instances also geographical, it may fairly be surmised that the coincidence of names in the above cases is not accidental, but points to a fusion of various branches of the Semitic race in a certain locality. This surmise is confirmed by the circumstance that other connecting-links may be discovered between the same branches. For instance, Nos. 1 and 2 have in common the names Aram (comp. Gen. x. 23; xxii. 21) and Masach as a geographical (design in connection with the former (1 Chron. xix. 6), and a personal name in connection with the latter (Gen. xxiii. 24). Nos. 2 and 4 have in common the names Buz and Buzite (ver. 21; Job xxxii. 22), Cheseb and Chadash (Gen. xxii. 22; Job i. 17, A. V. "Chaldeans"), Shuaah, a nephew of Nahor, and Shuheh (Gen. xxv. 2; Job ii. 11), and Kedem, as the country where abra- ham sojourned; together with his other children by Keturah, and also as the country where Job lived (Gen. xxvi. 6; Job i. 3). Nos. 3 and 4, again, have in common Eliphaz (Gen. xxxvi. 10; Job ii. 11), and Teman and Temanite (Gen. xxxvi. 11; Job ii. 11). The ethnolog- ical fact embodied in the above coincidences of names makes Job, as it appears in the light branches of the Ara- maic family, being both more ancient and occupying a more northerly position than the others, coalesced with branches of the later Abrahams, holding a somewhat central position in Mesopotamia and Palestine, and again with branches of the still later Edomites of the south, after they had become a distinct race from the Abra- hamids. This conclusion would receive confirmation if the geographical position of Uz, as described in the book of Job, harmonized with the probability of such an amalgamation. As far as we can gather, it lay either south or east-south of Palestine (Job i. 3) [see BENZ-KE- DEM], adjacent to the Sabaeans and the Chaldeans (Job i. 15, 17), consequently northward of the Southern Ar- abians, and westward of the Euphrates; and, lastly, ad- jacent to the Edomites of Mount Seir, who at one period occupied Uz, probably as conquerors (Lam. iv. 21), and whose troglodytis habits are probably described in Job xxv. 18, 19. The assimilation of the Edomites, which is to be deduced from the native lands of Job's friends, Eli- phaz the Temanite being an Idumean, Elihu the Buzite being probably a neighbor of the Chaldeans, for Buz and Chesed were brothers (Gen. xxii. 21, 22), and Biledah the Shuhite being one of the Bene-Keled, whether Zopher is to be regarded as a distinct branch in the tribe of Judah (Josh. xv. 41) may be regarded as.
problematical: if he were, the conclusion would be further established. From the above data we infer that the land of Uz corresponds to the Arabia Deserta of classical geography, at all events to so much of it as lies north of the 30th parallel of latitude. This district has in it the desert, Edom, and Moab; and is dotted over with towns which roam from the borders of Palestine to the Euphrates, and northward to the confines of Syria. See Job.

"The land of Uz" is mentioned only in two other passages of Scripture. Jeremiah in one passage (xxv, 20; Sept. Οξον.; Vulg. Aulis) groups it with Egypt, Philistia, Edom, and Moab; and is placed by some to the north, on the borders of Edom, or to afford that some of the Edomites in his days inhabited Uz (Lam. iv, 21; Oξον., Hase.). These various statements show that Uz was closely connected with Edom, and thus in general corroborate the above position. See IDEUMBA.

As to later opinions, Josephus says that Uz founded Trachonitis and Damascus (Ant. i, 6, 4). The former province lies in Bashan, and extends as far south as Bostra. It may have formed part of the land of Uz. Jerome appears to identify Uz with Damascus and Trachonitis, following Josephus (Quast. in Gen. x, 25; c. c. v, 3, 5). Bechtel makes "Uz" synonymous with the name of two of the places of the desert, confounding the Arabic Ghutah with the Heb. יָעֹשֶׁה, words which are altogether dissimilar; 2. The region of Aulis, named from Uz, the son of Nahor (Gen. xxii, 21); 3. Uz of Edom, the land of the patriarch Job (Op. v, 88). There seems to be no sufficient authority for this threefold division. The general opinion of Biblical geographers of the present day is that Uz" is the Hebrew equivalent of the term נאש (Na'ah)."
UZZAH

Isaiah (xxxii, 14), asserts that a palace was situated in the Tyropoion valley at the foot of the Temple mount, and that this was in all probability the palace of Shimea and the site of the Garden of Uzzah! See UZZAH.

Uz'zah (Heb. Uzzah', יְצֹא, strength, i. q. Uzza), which in a few passages stands instead of it; Sept. 'Oz' (and so Josephus) v. t. 'Azzā; Vulg. Ozia, the name of two Hebrews.

1. A Merarite Levite, son of Shimei (q.v. and father of Shimea (1 Chron. vi. 29 [Heb. 14]; A. V. “Uzza”). B.C. ante 1045. For a refutation of some arbitrary hypotheses of interpreters on this genealogy, see Keil ad loc.

2. One of the sons of Abinadab, in whose house at Kirjath-jearim the ark rested for twenty years. In 2 Sam. (vi, 9 in the A. V.; and in verses 6, 7, 8 in the Heb. also) he is invariably called “Uzzah”; but in 1 Chron. (xiii, 7, 9, 11) as invariably “Uzza.” The eldest son of Abinadab (1 Sam. vii, 1) seems to have been Eleazar, who was consecrated to look after the ark. Uzzah, probably, was the second, and Ahio (q.v.) the third. The latter two accompanied its removal when David first brought it to Jerusalem. (1 Chron. 15. 10-12.) Ahio apparently went before the cart—the new cart (1 Chron. xiii, 7)—on which the ark was placed, and Uzzah walked by its side. The procession, with all manner of music, advanced as far as a spot variously called “the threshing-floor” (ver. 9); “the threshing-floor of Caleb” (I Chron. vi, 41); “the threshing-floor of Na- chon” (2 Sam. vi, 6, Sept. “Nachor.”) At this point—perhaps slipping over the smooth rock—the oxen (Sept. “the calf”) stumbled (Sept. “overturned the ark”). Uzzah caught it to prevent its falling. He died immediately by the side of the ark. His death, by whatever means it was accomplished, was so sudden and awful that, in the sacred language of the Old Test., it is ascribed directly to the divine anger. “The anger of the Lord was kindled against Uzzah, and God smote him there.” “For his error,” בַּפּוּלָה יִכְנָה, adds the Hebrew text, “because he put his hand to the ark” (1 Chron. xiii, 10). Josephus (Ant, vii, 2, 4) makes the sin to be because he touched the ark not being a priest (see below). But the narrative seems to imply that there was a rough, hasty handling of the sacred censer. The event produced a deep sensation. David, with a mixture of awe and resentment, was afraid to carry the ark farther; and the place, apparently changing its ancient name [see UZZAZ, GARDEN OF], was henceforth called “Perez-Uzzaz.” The “hated,” “abhorred,” “detested” name of Uzzaz (2 Sam. vi, 8; 1 Chron. xiii, 11). See David.

Josephus distinctly says that Uzzaz was of a Levitical family (Ant, vi, 1, 4). It was because Abinadab, his father, was a Levite, no doubt, that the ark was taken into his house at Kirjath-jearim;—as it was afterwards taken into the house of Obed-edom, the Gittite, for the same reason. Nor can it be very well understood how, if Abinadab was not a Levite, his son Eleazar should have been consecrated to take charge of the ark (1 Sam. vii, 2). It is possible that Abinadab (Sept. ‘Aμανάδας, Josephus, Ἀμανάδας) was Connunander of Uzzaz, and so one of the chiefs of the Levites appointed by David to bring up the ark from the house of Obed-edom to Jerusalem. It is most reasonable to suppose that the person who had entertained the ark at Kirjath-jearim should have the honor of attending its coming-up in a pious and prosperous manner to Jerusalem; and Amminadab was a son of Uzzaz, and therefore of the family of Kohath, who were the persons appointed to bear the ark (vi, 18; Numb. iv, 15). But they were forbidden to touch the ark. It was only a priest of Aaron’s family, i.e. of the high-priest’s family, that was allowed to touch the ark (ver. 5, 15). The sin of Uzzaz, therefore, was not, as commonly represented, that of a layman or an unordained person presuming to encroach upon the office of the ministry, but, if an irregularity at all in this respect, the sin of those who, being ministers, dare to arrogate to themselves powers and prerogatives which belong only to higher officers.—Fairbairn. The whole proceeding was very disorderly, and contrary to the distinct and far from unmeaning regulations of the law, which prescribed that the ark should be carried on the shoulders of the Levites (Exod. xxv, 14), whereas here it was carried on the shoulders drawn by oxen. The ark ought to have been enveloped in its coverings, and thus wholly concealed before the Levites approached it; but it does not appear that any priest took part in the matter, and it would seem as if the ark was brought forth, exposed to the common gaze, in the same manner in which it had been brought back by the Philistines (1 Sam. vi, 18-19). It was the duty of Uzzaz, as a Levite, to have been acquainted with the proper course of proceeding; he was therefore the person justly accountable for the neglect, and the judgment upon him seems to have been the most effectual course of insuring attention to the proper course of proceeding, and of checking the growing disposition to treat the holy mysteries with undue familiarity. That it had this effect is expressly stated in 1 Chron. xv, 2, 13. See Ark.

Uz'zaz-sher'ah (Heb. Uzaz’ Sher’ah, עֶזֶזֶשֶׁרָה, ear [i. e. point] of Sherah; Sept. Ἱούδας, Vulg. Oesovera), a place in the vicinity of Bethhoron, founded or rebuilt by Sherah (q.v.), an Ephraimite (1 Chron. vii, 24). The name appears to indicate some salient feature of the surface or position. It has been thought to correspond with the present Beth Sala, which is shown in the maps of Van de Velde and Tobler as on the northern side of the Wady Suleiman, about three miles south-west of Beitur el-Tahta. It is mentioned by Robinson (in the lists in Appendix to vol. iii of Bibl. Res. [1st ed.], p. 120), and also by Tobler (Dritte Wanderung, p. 188). It is doubtful, however, if the boundary of Ephraim ever extended so far south, and hence perhaps we should prefer Beit Sherah, a village with two fountains in Wady Budrus, two and a half miles east of Beitur el-Fokha; or if both these identifications fail, possibly the modern village Saffa, in Wady Budrus, about one mile north-west of Beitur el-Tahta (Robinson, Bibl. Res. ii, 250).

Uz'zi (Heb. Ozzi, עֶזֶיזְיָ, strong [or my strength, or contr. for Uzziah]; Sept. Ozias, with occasional v. rr.; Vulg. Ozias or Azi, the name of six Hebrews.

1. First named of the six sons of Toi son of Iosech (1 Chron. vi, 5, 6, 51; Ezra vii, 4). B.C. cir. 1400. Josephus in one passage (Ant. v, 11, 6) gives his name and position correctly ("Ozias, Ozias"); but in another (Ant. viii, 1, 3) he calls either him or his son Joatham (Ἰωακίμος).

2. Second named of the five sons of Bela son of Benjamin, and, like the preceding one, chief warrior (1 Chron. vii, 7). B.C. post 1574.

3. A high-priest, son of Bukki and father of Zerahiah (1 Chron. vi, 5, 6, 51; Ezra vii, 4). B.C. cir. 1400. Josephus in one passage (Ant. v, 11, 6) gives his name and position correctly ("Ozias, Ozias"); but in another (Ant, viii, 1, 3) he calls either him or his son Joatham (Ἰωακίμος).

4. Son of Michri and father of Eleah among the ancestors of the Benjamite family in Jerusalem when the Exile (1 Chron. ix, 8). B.C. ante 536.

5. Son of Bani, chief of the Levites at Jerusalem after the Captivity (Neh. xi, 22). B.C. 586.

6. A priest, head of the "course" of Jedidiah in the time of the high-priest Joakim (Neh. xii, 19). B.C. cir. 600. He was probably the same with one of the priests who sang at the consecration of the new walls of Jerusalem (ver. 42).

Uzzi'ah (Heb. Ozziya', עֶזֶזֶיָּ, prob. for Uzziah [q. v.]; Sept. Ozias; Vulg. Ozias), one of David’s subordinate warriors, called an "Asherathite" (q. v.), probably as having come from Ashtarah beyond the Jordan. B.C. 1055. See David.
UZZI (Heb. Uzzizah, וצעי, strength of Jehovah [but in the prolonged form Uzzizya'ḥu, וצעי אח], except in 2 Kings xv, 18, 30; 1 Chron. vi, 24; Ezra x, 21; Neh. xi, 4; Hos. i, 1; Amos i, 1; Zech. xiv, 5; Sept. usually Οζαίας, but with many v. r.; Vulg. Osias or Azias), the name of five Hebrews. See also Uzzia.

2. Uzziah, son of Hilkiah, father of Shaul among Samuel's ancestors (1 Chron. vi, 24 [Heb. 19]). B.C. cir. 1515. He is apparently the same with Azariah (q. v.) the son of Joel and father of Zephaniah in the parallel list (ver. 36).

3. The tenth king of the separate kingdom of Judah, B.C. 808-756. Like No. 1 above, he is sometimes called Azariah (q. v.). By Josephus (Ant. ix, 10, 3 sq.), and in the New Test. (Matt. i, 8, 9), the name occurs in the same Greek form as in the Sept. (Οζαίας). The date of the beginning of Uzziah's reign (2 Kings xv, 1) in the twenty-seventh year of Jeroboam II is reconciled by Usher and others with the statement that Uzziah's father, Amaziah, whose whole reign was twenty-nine years only, came to the throne in the second year of Joash (xiv, 1); and by the supposition that Jeroboam's reign was reckoned from the consecration of the men of the tribe of Levi mentioned in Scripture, on his association with his father, Joash, during the Syrian war, B.C. 835. Keil, after Capellus and Grotius, more violently supposes that the number 12 is an error of the Hebrew copyists for 22, 32, or 23, so that instead of twenty-seven of Jeroboam we ought to read thirteen, fourteenth, etc.

After the murder of Amaziah, his son Uzziah was chosen by the people to occupy the vacant throne, at the age of sixteen; and for the greater part of his reign of fifty-two years he lived in the fear of God, and showed himself a wise, active, and pious ruler. He began his reign by a successful expedition against his father's enemies the Edomites, who had revolted from Judah in Jehoram's time, eighty years before, and penetrated as far as the head of the Gulf of Akaba, where he took the important place of Elath, fortified it, and probably established it as a mart for foreign commerce, which Jehoshaphat had failed to do. This success is recorded in 2 Kings (xiv, 22), but from 2 Chron. (xxvi, 1, etc.) we learn much more. Uzziah waged other victorious wars in the South, especially against the Meunim (q. v.), or people of Maan, and the Arabs of Gurbal. A fortified town named Maan still exists in Arabia Petraea, south of the Dead Sea. The situation of Gurbal (q. v.), to be found on the conjectural map of the region (see Elegant, Geol. i, 321.) Such enemies would hardly maintain a long resistance after the defeat of so formidable a tribe as the Edomites. Towards the west, Uzziah fought with equal success against the Philistines, levelled to the ground the walls of Gath, Jabineth, and Asdod, and founded new fortified cities in the Philistine territory. Nor was he less vigorous in defensive than offensive operations. He strengthened the walls of Jerusalem at their weakest points, furnished them with formidable engines of war, and equipped an army of 307,500 men with the best inventions of military art. He was also a great patron of agriculture, dug wells, built towers in the wilderness for the protection of the flocks, and cultivated rich vineyards and arable land on his own account. He never deserted the worship of the true God, and was much influenced by Zechariah, a prophet who is only mentioned in connexion with Zedekiah (2 Chron. xxxvi, 20); for, as he probably died before Uzziah, he is thought not to have been the same as the Zechariah of Isa. vii, 2. So the southern kingdom was raised to a condition of prosperity which it had not known since the death of Solomon; and as the power of Israel was gradually falling away in the last years of the kingdom, that of Judah extended itself over the Ammonites and Moabites, and other tribes beyond Jordan, from whom Uzziah exacted tribute. See 2 Chron. xxvi, 8, and Isa. xxi, 1-5, from which it would appear that the annual tribute of sheep (2 Kings iii, 4) was revived either during this reign or soon after.

The reign of Uzziah was prosperous from first to last. He began with the temple, which was less prolix than earlier structures, and was intended for the usual purposes, and not for the exhibition of novelty, a disease which, according to Gerlach (ad loc.), is often brought out by violent excitement. In 2 Kings xv, 5 we are merely told that "the Lord smote the king, so that he was a leper unto the day of his death, and dwelt in a several house," but his preservation of the priestly office is not specified. This calamity compelled Uzziah to reside outside the city, so that the kingdom was administered till his death by his son Jotham as regent. Uzziah was buried "with his fathers," yet apparently not actually in the royal sepulchres (2 Chron. xxvi, 25). During his reign an earthquake (q. v.) occurred, which, though not mentioned in the historical books, was apparently very serious in its consequences, for it is alluded to as a chronicological epoch by Amos (i, 1), and mentioned in Zech. xiv, 5 as a convulsion from which the people "fled." Josephus (Ant. ix, 10, 4) comments on Uzziah's sacrilegious attempt to offer incense, and this is likely, as it agrees with other chronological data. See AMOS.

The first six chapters of Isaiah's prophecies belong to this reign, and we are told (2 Chron. xxvi, 22) that a full account of it was written by that prophet. Some notices of the state of Judah at this time may also be obtained from the contemporary prophets Hosea and Amos, though both of these labored more particularly in Israel. We gather from their writings (Hos. iv, 15; vi, 11; Amos vi, 1), as well as from the early chapters of Isaiah, that though the condition of the southern kingdom was gloomy, yet there was no despair, and that of the northern, yet that it was by no means free from the vices which are apt to accompany wealth and prosperity. At the same time, Hosea conceives bright hopes of the blessings which were to arise from it; and though doubtless these hopes pointed to something far higher than the brilliancy of Uzziah's administration, and though the return of the Israelites to "David their king" can only be adequately explained of Christ's kingdom, yet the prophet, in contemplating the condition of Judah at this time, was plainly cheered by the thought that there God was really honored, and his worship visibly maintained, and that therefore with it was bound up every hope that his promises to his people would at last be fulfilled (Hos. i, 7; iii, 3). It is to be observed, with reference to the general character of Uzziah's reign, that the writer of the second book of Chronicles distinctly states that his lawsless attempt to burn incense was the only exception to the excellence of his administration (2 Chron. xxvii, 2). See JUDAH, KINGDOM OF.

4. Son of Zechariah and father of Athaiah, the last a descendant of Perez the son of Judah resident in Jerusalem after the Exile (Neh. xi, 4). B.C. ante 506.

5. A priest of the "sons" of Harim who returned with his Genitive wife married after the return from Babylon (Ezra x, 21). B.C. 458.

Uzziel [some Uzziel] (Heb. Uzziziel, וצעי אל, strength is God, or perhaps simply strength of God — Uzzizya'ḥu, וצעי אח, except in 2 Kings xv, 1; Sept. Οζαίας or Οζαίλα, with some v. r.; Vulg. Osias, Osias), the name of six Hebrews.

1. Third named of the five sons of Bela son of Benjamin, heads of valliant families (1 Chron. vii, 7). B.C. post 1874.

2. First named of the four sons of Kohath (Exod. vi, 18; 1 Chron. vi, 2); also father of four sons (Exod. vi, 22; 1 Chron. xxii, 12, 20; xxiv, 24), and uncle of Aaron (Lev. x, 4). B.C. ante 1658. His descendants...
were called after him (Num. iii, 19, 27; 1 Chron. xxvi, 23), Elizahian being their chief in Moses' time (Num. iii, 30), and Amminadab in David's (1 Chron. xv, 10).

3. Third named of the fourteen "sons" of Heman appointed by David as Levitical musicians (1 Chron. xxv, 4) was the same with Azarel (q. v.) the head of the eleventh band of orchestral performers (ver. 18).

4. Second named of the two sons of Jeduthun among the Levites, who, in the days of King Hezekiah, took an active part in cleansing and sanctifying the Temple after all the contaminations introduced by Ahaz (2 Chron. xxix, 14). B.C. 726.

5. Last named of the four "sons" of Iabhi, Simeonitis chiefstains who, after the successful expedition of the

tribe to the valley of Gedor, went at the head of five hundred men, in the days of Hezekiah, to Mount Seir, and smote the remnant of the Amalekites who had survived the previous slaughter of Saul and David, and took possession of their country, and dwelt there "unto this day" (1 Chron. iv, 42). B.C. 726.

6. A "son of Hashabiah, the goldsmiths," who repaired part of the walls of Jerusalem after the Captivity (Neh. iii, 8). B.C. 446.

Uzziel'ite (Heb. Uzzı'ēl, "bawm", with the art., a patronymic; Sept. Οσιαλίτης; Vulg. Osidetis or Osieiti- ter), the family designation (Num. iii, 27; 1 Chron. xxvi, 23) of the descendants of Uzziel (q. v.) the Levite. In David's time they numbered 112 adult males (xv, 10).

V.

Vакant See, the territory under the control of a bishop which has become vacant by the death or cessation of the episcopal head. In the ancient African Church it was one of the chief parts of the metropolitan province of ecclesia (q. v.), who was required to fill the vacancy within one year or give place to another. But by the 25th canon of the General Council of Chalcedon (q. v.) the metropolitan was required to fill the vacant see within three months, if possible, under pain of ecclesiastical censure. He was deposed upon the refusal to care for these sees during the vacancy, but the Council of Chalcedon provided that the revenues should be cared for by the acacronomus, or steward of the Church. See Bingham, Christ. Antiq. bk. ii, ch. xi; xv; xvi.

Vакантные Субботы, in liturgical phrase, are the four Sundays after Ember weeks (q. v.) which have no previous observance in the period of ordination on the previous night: the Sunday between Christmas and Jan. 1, because preoccupied with another office; and the fourth Sunday in Advent, because the pope gave himself to almsgiving, as on Vакантный Суббота, the day before Palm-Sunday.

Vакантиvъ (Grecized βασιλικος) is a name applied to wandering clergymen, in ancient times, who deserted their own churches and would fix on no other, but wandered about from place to place. Such persons, having neither letters dismission nor letters commendatory, and to be suspected either as deserters or as persons guilty of some misdemeanor who fled from ecclesiastical censure, were not allowed by the laws of the Church to be admitted either to ecclesiastical or lay communion. So strict were the laws of the ancient Church in reference to the inferior clergy that they might not, upon any account, remove from the Church to which they were first appointed without the consent of the bishop who ordained them. See Bingham, Christ. Antiq. bk. vi, ch. iv. See Vаканты.

Vacation, in clerical phrase, is the time from the death, resignation, or removal in any other way, of a bishop or other ecclesiastical officer, until the office is filled by another person; also the season of rest given to a minister during some part of the year.

VACATION OF A BENEFICE is the act of making vacant a rectory, vicarage, or other ecclesiastical benefice by the death, resignation, or deprivation of its legal holder.

VACATION OF A BISHOPRIC. See Vакантныe Секс.

Vaccaro, Andrea, an Italian painter who was born at Naples in 1598. He studied with Masimo Stanzioni, after whose death he was considered the ablest artist of the Neapolitan school, and was without a rival until the return of Luca Giordano from Rome with a new style. In the contest for the large altar-piece in the new church of Santa Maria dei Pianti, representing the Virgin liberating the city from pestilence, Vaccaro was successful. But Giordano soon carried all before him in art, and Vaccaro, attempting to compete with him in fresco, which he had not studied in his youth, lost his reputation. One of his best works is a Holy Family, at Naples. He died at Naples in 1670. See Spooner, Bibl. Hist. of the Fine Arts, s. v.

Vaccaro, Domenico Antonio, an Italian sculptor and architect, born at Naples in 1680. After receiving a good education he studied architecture, and attained considerable eminence. His principal works are, at Naples, the church called Di Monte Calvino, the Teatro Nuovo, the Church of San Michele Arcangelo, and other buildings; in other parts of Italy, the Tarsia Palace, at Portici; the Church of San Giovanni, at Capua, and others. See Spooner, Bibl. Hist. of the Fine Arts, s. v.

Vaccari (Lat. vacco, "a cow"), an old monastic term for a cowherd.

Vach (Sanskrit, speech), another name of Svarvasatii (q. v.), the wife, or female energy, of the Hindo god Brahma.

Vachaspati (Sanskrit, vach, "speech," and pati, "lord"), in Hindo mythology, is one of the usual names of Vrthaspati (q. v.), the director of the gods.

Vachery, a term frequently found in monastic inventories and domestic MSS, denoting a pen or enclosure for sheep.

Vacuna, in ancient Indian mythology, was a goddess of agriculture, who was worshipped after harvesting time, and was honored by rest.

Vade-mecum (Lat. vade, "go," and mecum, "with me"), a book of prayers which a person carries with him as a constant companion.

Vaeck, Alardus, a Lutheran theologian of the 17th century, is the author of Tractatus de Principio Prime Theologiae Jansenisticae:—De Judicis Controversiarum:—Contro Pontificis de Reduenda Unione Ecclesiastic. See Jöcher, Allgemeine Gelehrten-Lehren, s. v. (B. P.)

Vaga, Piriino del, an Italian artist, was born at a small village near Florence in 1500. His true name was Pietro Buonaccorsi, but he was called by the above name after Del Vaga, one of his instructors, who led him to Rome, and introduced him into the school of Raphael. At an early age he was employed to assist in the decorations of the Vatican (q. v.), executing a number of the finest frescos from the designs of Raphael. One of the earliest works of his own design and execution was the Creation of Eve, in the Church of San Marcello, which Lanzi pronounces a "most finished performance." He fled from Italy at the sacking of Rome by the Spaniards in 1527, and in 1528 arrived, in a state of distress, at Genoa, where he was employed by prince Doria in decorating his magnificent palace. It was here that he achieved his greatest distinction. He executed many works in Lucca, Pisa, Genoa, and elsewhere. Late in life he returned to Rome, where he was much employed.
by the pope, Paul III, who gave him an annuity of three hundred ducats. About 1548 he undertook the direction of the paintings for the Sala Regia [see VATICAN], but before the completion of this work he died, in 1547. See Spooner, Biog. Hist. of the Fine Arts, s. v.

Vagantes (Clerici), or Vagi. This title was, in the language of the ancient canon law, applied to clerics who were not employed in and supported by a definite office in the Church. Such "scephantalos," wandering clerics were at times very numerous, especially in countries which were not fully converted to Christianity. It was not always possible to assign a definite parish to the missionary who was sent forth to labor among the heathen population. Such Vagantes were found also in Christian lands. Sometimes they were persons ordained in order to do missionary work whom persecution or fear had compelled to return; and often they were impostors who had fraudulently secured ordination at the hands of some careless prelate. This class of persons was always disposed to traffic with its ministerial functions, not only in the way of assisting regularly indoctored clerics in their work, for pay, but also, and much more frequently, by accepting service as chaplains in the retinue of nobles, and stooping to the performance of the most menial and degrading offices. Such clerics, though they issued in church, in occasional instances, as early as the 4th and 5th centuries. The Council of Chalcedon positively prohibited the ordinatio absoluta s. voca (can. 6, χωρίωνοι συνοίκοις), and the older canons enforced the principle "Ne quis vaga ordinetur." Complaints against the Vagantes became especially numerous in the Carolingian period, and were often renewed. See the Capitulaties of 789 and 794 by Charlemagne, and comp. Concil. Mogunt. An. 847, and C. Ticenense, An. 850, in Mansi, Concil. xiv. 906, 398; Agobard of Lyons, De Prietetio et Judaeo Sinodatis; and Gelas. of Freising (Gotthelf Aschelein, iv. 25, Gesch. des Reichsorders, Lib. de Corsarum Eccles. in Baluz, Miscell. v. 89 sq.); and Tractat. adv. Simoniacos, in Martene and Durand, Thes. Nov., neced. v. 1459 sq. Bishops in the Church of Rome are forbidden to confer superior orders on a cleric who has no definite titulus beneficio, on penalty of his coming personally responsible for his support (c. 4 et 16, x. De Proph. et Dign., iii, 5; Conc. Trid. SS. xxiii, c. 23, De Ref.). The Vagantes may now be considered as having ceased to exist in that Church. See Bingham, Orig. Ecc. li. 387 sqq.; Planeck, Gesch. d. christl. Geisteslebens, s. v. Bresl., 1904 sqq.; Neander, Christ Hist. vol. ii.; Du Cloque, Glossae Med. et Inf. Latinit., vi, 1892; Herzog, Real-Enzyklop. s. v. See VACANTIVIL.

Vagnocci, Francois, an Italian painter, was a native of Assisi, where he flourished in the first part of the 16th century. There are some of his works in the churches of that city, which Lanzi says are "executed in the spirit of the old masters," i. e. somewhat dry and hard. See Spooner, Biog. Hist. of the Fine Arts, s. v.

Vagrants. See GYROVAGI.

Vagum Ministerium, a name applied to the minister who is ordained without any fixed congregation of which to take the oversight.

Vaiano (or Vajano), Orazio (sometimes written Vaiasi), an Italian painter, born at Florence about 1500. He resided a long time at Milan, where he executed many works for the churches and for individuals. See Spooner, Biog. Hist. of the Fine Arts, s. v.

Vail. In the A. V. of the Holy Scriptures this orthography has been adopted and indistinguishably with "veil," both for the piece of female apparel and for the holy screen of the Tabernacle and Temple. In this art, we propose, for the sake of convenience, to consider the latter only, leaving the dress for the heading VEIL.

The word exclusively and invariably employed for the "veil" between the holy and most holy places is γυαλίον, ψάρδειον, a fem. gerundial form from γύαλεῖν, to debar: and hence signifying separation, or screen. The Sept. renders it by καραπάναμα, which is adopted in the New Test. (Matt. xxvii. 51; Mark xv, 38; Luke xxiii, 45; Heb. vi, 19, ix, 3; x, 20). Josephus employs (Ant. iii, 5, 5) the corresponding Greek verb καραβίνωμαι. The Heb. term occurs in Exod. xxv, 33, 38; xxxiii, 7, xxxvi, 6; xxxix, 2; xxix, 35; xxxvii, 27; xxxix, 34; xl, 3, 21, 22, 26; Lev. iv, 5, 17; xvi, 2, 12, 15; xxi, 23; xxiv, 2; Numb. iv, 5; xvii, 7; 1 Chron. iii, 14.

We learn from these passages (especially Exod. xxxvi, 31) that the screen in question was a heavy piece of cloth, covered with a white linen stuff and embroidered with woolen threads of "blue, purple, and scarlet," either in a triple strand or more probably in alternate bands, and further ornamented with figures of cherubim, embroidered apparently with the needle, on one or both sides, with gold thread. This was suspended by means of silver hooks and rods upon the top of the pillars placed for that purpose in the Tabernacle, and doubtless likewise in the Temple. In the Herodian structure, as we learn from the Talmudists, the vail was double, and of very great thickness, so as to hang vertically by its own weight, and thus closely close the apartment from view. It was this piece of tapestry that was rent by the earth-quake at Christ's crucifixion (Matt. xxvii. 51, and parallels) to signify, no doubt, that the way of access to God was then opened to all (see the monographs on the event in Volbeding, Index Programmatum, p. 65). This explanation corresponds well with the meaning of the key symbol of the vail, which he says represented our Lord's human flesh torn by the atonement (Heb. x, 20). See Braschius, De Velis Tabernaculi et Templi (Viembe. 1718). See TABERNACLE; TEMPLE.

Vall, Edward J., a Presbyterian minister, was born in 1811. He entered the New York University, and after finishing the course graduated in 1841. He soon after entered the Union Theological Seminary, and graduated in 1844. In 1845 he became a stated supply in the Church at Ossianay, N. Y., where he was ordained. After remaining a year at this place, he removed to Brooklyn, N. Y., where he was without charge until 1847, when he was called to supply the pulpit of the Church at Jamesville, N. Y. In 1848 he was called to the pastorate of the Church in Babylon, L. I. He remained in this charge until 1851, when he accepted a call to Uniontown, Cal., where he remained three years, and removed to San Francisco, and was without charge three years. In 1856 he returned to New York City, and supplied the pulpit four years, when he returned to San Francisco, and died Nov. 22, 1876. (W. P. S.)

Vall, Solomon T., a Methodist Episcopal minister, was born in 1814, in Saratoga County, N. Y. He was converted in 1845; received on trial by the Iowa Conference in 1849; and after serving at Anamosa and Big Woods missions, he was, in 1851, admitted into full connection, ordained deacon, and reappointed to Big Woods mission, where he died, July 28, 1892. Mr. Vall was intellectual, pious, and a young man of great promise. See Minutes of Annual Conferences, 1852, p. 127.

Vall, Joseph (1), a Congregational minister, was born at Litchfield, Conn., July 14, 1781. He graduated with honor at Dartmouth College in 1778; studied theology privately; was licensed to preach at Lebanon in May, 1779; and ordained pastor of the Church in Hadlyme, Conn., Feb. 9, 1780, in which relation he continued fifty-nine years. He died Nov. 21, 1839. He was a good scholar, an excellent preacher, and distinguished for conscientiousness and uttering devotedness. Besides frequent contributions to periodicals, he published a poem entitled Noah's Flood (1796)—another poem entitled An Address to a Deist:—and an Ordination Sermon (1814). See Sprague, Annals of the Amer. Pulpit, iv, 26, note.

Vall, Joseph (2), D.D., a minister of the Congregational Church, son of the preceding, was born
VAILL 693 VAISHNAVAS

at Hadlyme, Conn., July 28, 1790. He graduated from Yale College in 1811, and immediately began to teach. For a time he was principal of a Protestant school in Litchfield, Conn., and for the same period had charge of a high-school in Salisbury, Conn. Meanwhile he was studying theology. His first pastorate was in Brimfield, Conn., where he was ordained and installed Feb. 2, 1814. In 1824 he accepted a call to the Second Church in Palmer, Mass., where he was installed Oct. 15. About this time Amherst College was peculiarly involved, and it was necessary to appoint some one to collect funds in aid of it. Mr. Vaill was unanimously chosen. For a long time he had been a trustee of the institution. At this time (1841) he was again pastor at Brimfield, having resigned his charge in 1837, and was loath to accept the agency, but finally consented and removed to Somers, Conn., where he resided nine and a half years, and served the Church there as pastor. At the age of sixty-four he left Somers and settled as pastor of the Second Congregational Church in Palmer, Mass., and he remained in this pastorate until Oct. 13, 1867, nearly thirteen years. His published sermons, addresses, etc., were about ten in number. His manner in preaching was energetic, and he employed gesture and emphasis effectively. In Brimfield and Somers he was chairman of the school committee, and for some years he was a trustee of the Monson Academy. While in Portland, he belonged to corporations of Bangor Theological Seminary and of Gorham Academy. The last year of his life he was elected to the Massachusetts House of Representatives, and was named a member of the joint committee on the License Law, before which he read a paper on the subject. He died at Palmer, Feb. 21, 1869. See Cong. Quar. 1870, p. 1.

Vaill, William Fowler, a Congregational minister, the son of Rev. Joseph and the father of the Rev. Thomas Scott Vaill, was born at Hadlyme, Conn., June 7, 1782. He was prepared for college by his father, and, mainly by his own exertions, supported himself at Yale College, where he graduated in 1806. He studied theology with Rev. Asahel Hooker, was licensed to preach in 1808, and for twelve years was pastor at North Guilford, Conn. In 1820 he was appointed by the United Foreign Missionary Society superintendent of a mission among the Osage Indians, then occupying the Arkansas country, where, amid trials and hardship, hope and fear, he labored fourteen years, or until the abandonment of the mission on account of the removal of the Indians farther west. He returned to New England, where he preached in various places, until he accepted a commission from the Home Missionary Society of Connecticut as missionary to Illinois. He at once went to Wethersfield, III., where he was pastor seven years, and where for twenty-seven years he made his headquarters for constant and faithful missionary toil. He died with the harness on at Wethersfield, Feb. 24, 1855. Mr. Vaill loved his work intensely, and his ardent piety carried him forward in it in labors most exhausting. See Cong. Quar. 1865, p. 422.

Vaillant, Wallehant, a Flemish painter and engraver, who was born at Lisle in 1628, and died at Amsterdam in 1677, is the author of several prints of sacred subjects from various masters, for which see Spooner, Hist. Dict. of the Fine Arts, s. v.

Vainclary. See VAINITY.

Vairagis is a Hindu term denoting persons devoid of passion, and applied to all religious mendicants who profess to have separated themselves from the interests and emotions of the world. It is used in particular to designate the mendicant Vaisnavas (q. v.) of the Ramananda class.

Vaiseshika is the name of one of the two great divisions of the Nyaya school of Hindu philosophy, agreeing with the Nyaya itself in its analytical method of treating the subjects of human research, but differing from it in the arrangement of its topics, and in its doctrine of atomic individualities, or resekas, from which the name is derived. For a time it was the ruling sect in India, and the school of which the celebrated Fastu (an ascetic, or a strict vegetarian eater) is the reputed founder of the school, although nothing is known as to his history or date. It arranges the subject-matter of his works under six podartha, or topics, as follows: (1) substance, (2) quality, (3) action, (4) generality, (5) atomic individuality, and (6) resekas, or coherences of the sectors added to these a seventh, viz. non-existence. According to this system, understanding is the quality of soul, and the instruments of right notion (knowledge from the contact of sense with its object, and inference) are treated of under the head of buddhi, or understanding. See Bibliotheca Indica (Calcutta, 1807): Coleman's Mind, Matter, Eternity (London, 1837), vol. i; Müller [Max], in Zeitschrift der deutschen morgenl. Gesellschaft.

Vaishnavas is the name of one of the three great divisions of Hindu sects, designating the worshippers of Vishnu, from which the word is derived. The common link of all the sects comprised under this name is their belief in the supremacy of Vishnu over the gods Brahma and Siva. Their difference consists in the character which they assign to this supremacy, and to the god Vishnu himself, in their religious and other practices, and in their sectarian marks. The following are the principal sects of the Vaishnavas: 1. The Ramanujas, or Sri Vaishnavas, or Sri Sampradaya, who derive their origin from Ramanuja, a celebrated reformer, native of Perumbur, in the south of India. He was born about the middle of the 12th century, and is considered by his followers as an incarnation of Siva, the serpent of Vishnu. The peculiar thing about this sect is the preparation of the meals, in which the meal, during its preparation, or while they are eating, attract even the looks of a stranger, the operation is in his stead, and the viands burned in the ground. The marks by which they are distinguished from other sects are two perpendicular lines drawn with white earth from the root of the hair to the commencement of each eyebrow, and a transverse streak connecting them across the root of the nose; in the centre is a perpendicular line, made in the foreheads, besides other marks painted on the breast and arms.

2. The Ramanandas, or Ramanavas, who derive their name from Ramananda, a descendant by discipleship from Ramanuja, who probably lived about the close of the 14th century. They are by far the most numerous class of sectaries in Guzerat, India, especially in the district of Agora, where they constitute seven tenths of the acetic population. They belong chiefly to the poorer and inferior classes, with the exception of the Rajputs and military Brahmins. The most important difference between them and the Ramanajas consists in the fact that Ramanadas abolished the distinction of castes among the religious orders, and taught that one who quitted the ties of nature and religion shook off all personal distinction.

3. The Kabirs, founded by Kabir, the most celebrated of the twelve disciples of Ramananda, belonging to the middle of the 14th century. They believe in one God, the creator of the world, but in opposition to the Vedanta (q. v.), they assert that he has a body formed of the five elements of matter, and a mind endowed with the three gunas, or qualities: he is eternal and free from the defects of human nature, but in other respects differs from other men, and the man is his living resemblance, and after death becomes his equal and associate. They have no peculiar mode of dress, and the sectarian marks are not considered important, though worn by some.

4. The Vallabharachayas, or Rudra Sampradaya, founded by Vallabha, a pupil of Amjuna, Vallabha Saha, born in 1479. The principles of the sect, as laid down by Vallabha, are as follows: (1) To secure the firm support of Vallabhacharyas; (2) To exercise chiefly the
VAISHYA 694

VALED

worship of Krishna (incarnation of Vishnu); (3) To forsake the sense of Vaidik opinion, and be a suppliant to Krishna; (4) To sing praises with feelings of humility; (5) To believe that Vallabha is a Gopu, or mistress of Krishna; (6) To swell the heart with the name Krishna; (7) To forsake his commands not for a moment; (8) To put faith in his words and doings; (9) To adopt the society of the good, knowing them divine; and (10) To see not the faults, but speak the truth. They are very ignorant and superstitious.

5. The Madhacharayas, or Brähma Sampradāyas, founded by a Brahmin named Madhavacharya, who was born in 995. The distinguishing doctrine of this sect is the identification of Vishnu with the Supreme Soul as the pre-existent cause of the universe; and this primeval Vishnu they affirm to be endowed with real attributes, and, although indefinable, to be most excellent and independent. There is also a dependent principle, a living soul dependent on the Supreme. They deny the absorption of the human soul into the universal spirit, and the loss of independent existence after death.

6. The Vaishnavas of Bengal, founded by Chaitanya, who was born at Nadiya in 1485. The most important influence of this sect is the Bhakti, or love, the doctrine of bhakti, or faith, which they declare to be infinitely more efficacious than abstraction, than knowledge of the Divine nature, than the subjugation of the passions, or anything deemed most meritorious. The bhakti, or faith, comprehends five stages: quietism, as that of a child; devotion, which entire reverence takes upon himself; friendship for the Deity; tender affection for the Deity, of the same nature as love of parents for their children; and the highest degree of affection, such passionate attachment as the Gopis felt for their beloved Krishna.

Besides these, there are many other sects of less importance. Those enumerated above are divided into smaller sects or divisions. See Wilson, Sketch of the Religious Sects of the Hindus, in Works (Lond. 1882), vol. 1; Karandas Mulji, History of the Sect of the Mahājāgas (ibid. 1865).

VAISHYA is one of the Hindu castes said to have sprung from the thigh of Brahma. They are the productive capitalists, and their duties are to keep cattle, carry on trade, lend on interest, cultivate the soil, and turn their attention to every description of practical knowledge. See INDIAN CASTE.

VAISON, COUNCIL OF (Concilium Vasanense). Vaison is a village of France, in Vauchaire, fifteen miles north-east of Orange, on the Ouvèze. Two ecclesiastical councils were held here as follows:

1. Was held Nov. 15, 442, under the bishop Auspicius. Nectarius, bishop of Vienne, was present, and publicly maintained that the Father, Son, and Holy Spirit are but one nature, one power, one divinity and virtue. Ten canons were published.

2. Declares that it shall not be necessary to examine the Gallican bishops before receiving them to communion, but that it shall be enough to be assured that they are not excommunicated.

3. Declares that the offering of penitents dying suddenly without receiving the communion may never be less than forty days, and that no mention be made of their names at the altars. It permits them burial.

4. Orders that all descendants to receive the holy chalice at Easter from their own bishops.

5. Forbids all intimacy with the enemies of religion.

6. Orders for the protection of the captives of those who, out of charity, take charge of deserted children.

See Mansi, Consil. iii. 1456.

1. Was held Nov. 5, 529. Twelve bishops attended, among whom were St. Cessarius of Arles, who presided. Five canons were published.

2. Enjoins that parish priests shall receive into their houses young readers (being single), according to the excellent custom of Italy; that they may provide for them, and teach them to chant the Psalms, and make them read and study the Holy Scriptures.

3. Declares that a priest may preach in his own parish, but that when he is ill, the deacon shall receive the homilies of the fathers.

4. Orders the frequent repetition of the Kyrie Eleison at matins, mass, and vespers: and that the Sanctus be sung three times at mass even in Lect, and in masses for the dead.

5. Orders that the verse "As it was in the beginning," etc., shall be chanted after the Gloria Patri.

See Mansi, Consil. iv. 1679.

VAL, ANDRÉ DU, a French theologian, was born Jan. 18, 1564, at Pontoise. In 1594 he was made doctor of theology at the Sorbonne, and died Sept. 9, 1638, as general-superior of the Carmelites Order at Paris. He wrote, De Suprema Romani Pontificis in Ecclesiis Potestate Disputatio: — Eleemos Labelli de Ecclesiastica et Politica Potestate: — Commentarius in Primi- mae Secundae, Primae et Secundae, et Tertiae Partes Parisii Summam D. Thomae. See Jächer, Allgemeines Gelehr- ten-Lexikon, s. v.; Winer, Handbuch der theolog. Literatur, t. 1671. (B. P.)

VALADON, le Père Zacharie, a French Capuchin and missionary, was born about 1680. He labored in Asia Minor, but is especially noted for his devotion to the suffering people during the plague at Marseilles. He died in 1746. See Michaud, Biographie Universelle (Paris, 1843-66).

VALKENBERG, LODEWYK CASPAR, a Friesian philologist, born at Leeuwarden in 1715. He studied at Franeker and Leyden; became co-rector of the gymnasium of Campen; professor of Greek at Franeker (1741); removed to Leyden as professor of the Greek language and another subject; and there he died March 14, 1796. Among his works are: De Aristotelian Judeo: — Selecta et Scholior L. C. Valkenarii in Libros quodam N. T., published by Wassenbergh (Amst. 1815, 3 vols. 8vo).

VALDES (Ital. Valdeno), Alfonso and Juan de, were twin brothers from the town of Cuenca, in Castile, and born about A.D. 1500, who in their early years became attached to the Castilian court, and, at a later day, sustained a spirit of practical devotion towards the Reformers of the 16th century and their work.

1. ALFONSO accompanied the court, in 1520, to the coronation of the emperor Charles V at Aix-la-Chapelle, and thence to Worms. From the latter town he wrote letters to friends in Spain, in which he deprecated the Church which the pope had adopted towards Luther. He had just witnessed the burning of Luther's writings at Worms when he wrote. In 1524 Alfonso was an imperial secretary of state under the grand-chancellor Gattinara; and in 1527 he began an episco- pacy correspondence with Erasmus, the great humanist, whose writings had shortly before been committed to the flames in Spain, and in whose defence he had been a most ardent advocate, as against the fanatical mob of excited monks. In the same year (1527) occurred the storming of Rome and the capture of the pope by the imperial army under the constable Bourbon; and on this event Valdes composed a dialogue intended to set forth the sentiment of the court respecting the case. The emperor could not deny his responsibility for the catastrophe, and his secretary accordingly proceeded to show that the pope himself had brought about the de- stitution of his capital by warlike agitations and disorder of the sanctuary of his own will, and also by his re- fusal to be guided by the warning counsels of judicious friends or by the indications of Providence. This com- position excited considerable interest, and led the papal nuncio Castiglione to lodge a complaint against its au- thor with the emperor; but Valdes was safe under the protection of the chancellor, and suffered no harm.
VALDES 695

VALDES

In 1530 Valdes was present with the court at the Diet of Augsburg. The breach of the Peace of Augsburg with regard to religion to him, among others, and found him inclined to promote harmony and friendliness above any of his associates. He met with Melanthon and discussed the religious situation, and was unwarred in the work of judicious mediation between the heads of the contending parties. After the public reading of the Confession of Faith, he declared that he was willing to accept it (see Campaggio, in Lämmer, Monum. Vat. p. 45); and afterwards he labored zealously to furnish it with the fullest information which the Protestants could supply in behalf of their cause. He has, nevertheless, been suspended on suspicion to the Reformation because he judged that the Confession was written in too harsh a tone, and yet more because he wrote the emperor's letter of congratulation to the Romish Switzers (Brussels, Oct. 1531) on the occasion of their victory at Cappel over the Zwinglians; but, on the other hand, the munific Alexander combs (ibid. Dec. 30, 1531) that certain persons at court are practically in sympathy with Luther and desirous that his cause should succeed, and that they laud Erasmus to the skies only because they are not allowed to speak their thoughts respecting Luther. Among these courtiers Valdes unquestionably the flair it would require, however, to obtain the imperial leave of court in 1531, though he remained in the imperial service as late as 1533. He never returned to Spain, possibly because he could not be there in safety. Francisco Enzinas (q. v.) wrote to Melanthon in 1545, "If the excellent Alonso Valdes had returned to Spain, even the emperor would have been unable to save him from the death which the monks, the satellites of the holy fathers, were preparing for him on account of his doctrina unaria in toctoribus." The time and place of his death are thus far wholly unknown.

2. JUAN (1) was physically and intellectually, strikingly like his twin brother Alonso; and, like him, he first came before the public with a dialogue, published anonymously and, at the same time, as his brother's production—probably in 1529. His piece was entitled A Dialogue between Mercury and Charon. It begins with the paradox of the Mercury's attempt to settle his quarrel with king Francis of France by a duel (see La Fuente, Hist. de España, xii, 497 sq.); but the narration is repeatedly interrupted by the introduction of newly deceased persons, who enter into the conversation, and through whom the whole obtains a political and religious character. The general corruption of the Church is censured. The ignorance and immorality of the clergy and the superstition of the people are plainly characterized, and the Scriptures and the grace of God are extolled above the adoration of relics and the Virgin Mary. The use of force as a means of converting the people was also satirized, and this as a chiefly political, and is a sort of Anti-Machiavel. The whole reveals the simplicity of a truly noble mind and the tact of a courtier. In 1531 Juan was at Rome, having come thither from Naples, and was engaged in the study of natural history. He planned a collection of characters of the Dominicans of the city of Leghorn (2d ed. Madrid, 1860), which is highly commended by writers on the literature of Spain. His chief interest, however, centred in religious reform. For it he labored incessantly with tongue and pen, and in its interest he became the centre of an association of Christians who endeavored to introduce the true religion into the kingdom of God without directly assailing the Church of the State.

In 1536 the emperor issued an edict at Naples which forbade association with persons infected with or suspected of the Languedoc heresy, under pain of death and the confiscation of property. After the emperor's departure, March 22, the viceroy forbade the preaching of Ochino (q. v.), though he was afterwards induced to permit its continuation to the end of Lent. But during this same Lenten period Valdes had a conversation with Giulia Gonzaga, the beautiful widow of the Duke of Mantua, who was much attached to the Duke, duke of Trastever, who had been powerfully awakened under the preaching of Ochino; and he had the courage to commit the substance of their conversation to paper, under the title Alphabeto Christiano (1st ed. in Italian [Venice, 1545]; 2d ed. Italian, English, and Spanish [London, 1860 sq.], consisting of only 150 copies for private distribution). In the vellum in which the law shows what we are to do, while the Gospel gives the Spirit by which to do it. He insists that the soul must choose between God and the world, and declares that persons whose outward life is entirely correct may need a reformation of the inward feelings and dispositions. Christian perfection consists in loving God supremely and our neighbor as ourselves. Monks and non-monks have only so much of Christian perfection as they have of faith and love to God. As the fire cannot refrain from giving forth heat, so faith cannot refrain from the performing of works of love. On the contrary, the fire is the full assurance of the forgiveness of sins and of salvation in Christ. The evil of sin requires a radical cure, applied at the seat of the disease, and cannot be overcome by any mere surface remedy. Giulia insists, however, upon rules by which to regulate the use of institutions of the Church, and Valdes responds that benefit may be derived from the adoration of the sacrament, from the reading of the Epistles and Gospels, and from the prayers in the mass; that masses ought to be heard except when they would interrupt works of charity; that the preaching of the Word should be humbly received. He expresses the discontents of the conversion of Santa Chiara, though she did not take the vows of the order nor exclude herself wholly from society.

It was perhaps in the same year (1536) that Valdes dedicated to the duke Gonzaga his version of the Psalms, after the Hebrew (a work never published and now lost), and in the following year The Epistle to the Romans and The First Epistle to the Corinthians (1st ed. Geneva, 1536 sq.; 2d ed. Madrid, 1860), which works reveal faithful research and sincere modesty in the author, and possess both scientific and practical value. Other works by Valdes have, almost without exception, been lost to posterity, the exception being Consideraciones Divinas, an Italian edition of which appeared in 1550 at Basle, and translations of which were made into Spanish, French, English, and Dutch during the 16th and 17th centuries.

Juan Valdes was a theologian of the first rank in ability, though largely self-trained, and though he never entered into orders. Sand, the editor of the Bibliotheca Antitradizionale (1567), speaks highly of his catalogue on the authority of a passage in a Unitarian publication of 1567, said to be cited from Valdes; but which certainly does not prove the charge of anti-trinitarianism; and very different sentiments are expressed by Valdes in the Alphabeto Christiano, p. 97, and in the Commentary on the First Epistle to the Corinthians, Considerazioni, No. 109, he confesses that the relation existing between the Father and the Son exceeds his comprehension. In his personal intercourse Valdes possessed extraordinary influence, especially among the nobles, with whom his rank brought him into contact. His manner of published, but his entire bearing full of charm. Assisted by Peter Martyr (Vermigl) of Florence, the Augustinian abbot of St. Peter ad Aram at Naples, and by Ochino and others,
he was able to beget such enthusiasm for the study of the Bible that a contemporary Neapolitan writer states that certain tenants were in the constant habit of discussing the Pauline epistles and their most difficult passages. Among his friends were also the poet Flaminio and the Reformer Pietro Carnesecchi (q. v.). Valdes died 1540. See Bohmer, Cenni Biografici sui Fratelli Giovanni e Attonio di Valdeso, 1891, in the appendix to his edition of the Considerazioni; and in, Herzog, Real-Encyklop., s. v.

Valdes, Don Juan (2) de Leal, a Spanish painter, descended from an ancient family of Austria, was born in Seville in 1515. He studied at the school of Antonio del Castillo, and afterwards removed to Seville, where he became one of the most distinguished painters of that city. He was one of the founders of the Academy there, and at the death of Murillo became its president, and was esteemed as the head of his profession. Among his numerous works may be mentioned, The Triumph of the Cross, at Seville:—The Martyrdom of St. Andrew:—and The History of the Prophet Elias, at Cordova. He died in 1691. See Spooner, Biog. Hist. of the Fine Arts, s. v.

Valdes, Don Lucas de, a Spanish painter, son of the preceding, was born at Seville in 1611. He was in- stituted a brother of the Grande and painted history and portraits with considerable reputation. Some of his works remain in the churches and public edifices of his native city. He died in 1724. See Spooner, Biog. Hist. of the Fine Arts, s. v.

Valdes, Don Sebastian Llanos de, a Spanish painter, flourished at Seville about 1600. He studied under Francisco de Herrera the elder; aided greatly in establishing the Academy of Seville, in the presidency of which he succeeded Juan de Valdes. Among his large historical works are a Mogulien, in the Church of the Recollets at Madrid:—and a picture of the Virgin surrounded by Saints and Angels (1669), in the Church of St. Thomas, Seville. See Spooner, Biog. Hist. of the Fine Arts, s. v.

Valdo. See Waldoo.

Vale. See Valley.

Valencia, Council of (Concilium Valentinum). Valencia is a town of Dauphiny, France, on the Rhone, fifty-seven miles south of Lyons. Five ecclesiastical councils have been held there, as follows:

I. Was held July 12, 574. Thirty bishops attended, of whom the names of twenty-two have reached us. It is supported that they were a general council, at least collected from the chief part of Narbonesian Gaul. The object of this council was to remedy the disorders which had crept into the discipline of the Church. Four canons were published.

1. Forbids the ordination in future of men who have had two wives, or who have married widows, but it does not insist upon the deposition of those who have been already ordained.

2. Forbids a grant of penance too easily to young women who, after consecrating themselves to God, voluntarily embrace the married state.

3. Forbids absolution until death to those who, after baptism, fall back into idolatry, or who have received a second baptism.

4. Orders that all bishops, priests, and deacons falsely accusing themselves of any crimes in order to be deposeed, and of whom the impossibility and weight of their orders shall be, in fact, no deposeed, and considered as guilty of the crimes whereupon they charge themselves. See Mansi, Concil. ii. 904.

II. Was held about 590, in defence of the doctrines of grace and free-will, against the Semi-Pelagians. See Nicaeus, loc. cit., 1679.

III. Was held Jan. 8, 855, by order of the emperor Lothaire. Fourteen bishops, with the metropolitan, attended from the three provinces of Lyons, Vienne, and Arles. The object of the council was to investigate the conduct of the bishop of Valencia, who was accused of various crimes. Twenty-three canons were published.

The first six relate to the subjects of grace, free-will, and predetermination, and reject the four canons of Quiercy upon the latter subject.

7. Relates to the elections of bishops with the unanimous consent of the clergy and people of the see.

12. Forbids the ordination of excommunicated, the singular combat to which accused persons had recourse in those times in order to prove their innocence. Directs that he who has been outlawed be treated as a murderer, and excommunicated; and that the men killed shall be regarded as a suicide, and forbidden Christian burial.

14. Enjoins bishops not to give their clergy or people causes to complain against them on account of their visitations.

15. Recommends them to lead an exemplary life.

16. Orders them to preach and instruct the people both in town and country.

17. Bids them be careful to make their visitations without burdening any one.

18. Orders the re-establishment of schools for teaching religion, literature, and ecclesiastical studies.

20. Orders care in the preservation of the Church ornaments, etc., and forbids their being put to any but their proper use.

21. Forbids bishops to exact their visitation dues when they do not make their visitations.

See Mansi, Concil. viii. 183.

IV. Was held in 1100 to examine the charge brought by the legate against Nogarlandus, or Nogardus, bishop of Autun, whom they accused of having got possession of the see by simony, and of having squandered the property belonging to it. The pope's legates, John and Benedict, cited the bishop to appear at this council, in spite of the protest of the canons, who declared that the legates had no authority to take him beyond the province, and in spite of the opposition of the archbishop of Lyons, who complained of the legate having taken the judgment of the case out of his hands. The question accordingly came before the council, and was discussed, but the further consideration of it was reserved till the Council of Pistoias. In the meantime, the bishop was suspended from the exercise of all his functions. Hugo, abbot of Flavigny, accused likewise of simony, was declared to be innocent. See Mansi, Concil. x. 717.

V. Was held on the Saturday after the Feast of St. Andrew. The legates Peter, cardinal-bishop of Albano, and Hugo, cardinal-priest of St. Sabine, convoked this council, consisting of four archbishops and fifteen bishops from the provinces of Narbonne, Vienne in Dauphiny, Arles, and Aix. Twenty-three canons were published.

3. Forbids clerks in holy orders, cathedral canons, and other beneficed persons to exercise any secular office.

6, 7. And 8. Enjoins the punishment and public denouncement of antient and mortally penitent persons.

9, 10, and 11. Relate to the Inquisition.

12. Gives to bishops the correction of sorcerers and persons guilty of sacrilege, and, in the event of their refusing to amend, enjoins perpetual imprisonment, or whatever punishment the bishops may deem right.

13. Enacts penalties against those who lay aside the cross, which they have assumed upon their dress as a token of having renounced their heresy, or who escape from prison, or despise the sentence of excommunication.

The five next refer to excommunications.

27 and 28. Fulminate excommunications against the emperor Frederick and all his adherents.

See Mansi, Concil. ix. 676.

Valencia, Council of (Concilium Valentinum). Valencia is a town of Spain, capital of the province of the same name, situated on the Guadalaviar, 190 miles E.S.E. of Madrid. An ecclesiastical council was held here in 524, under king Theodic. Six bishops attended, and six canons were published.

1. Orders that, previous to the presentation of the oblation, and before the ceremonial of the sacrament, the Gospel shall be read after the Epistle, in order that the catechumens, penitents, and even the heathen may hear the words of Christ and the preaching of the bishop.

4. Exhorts bishops to visit their sick brethren in the epidemic, in order to assist them in retiring their sl
fairs, and to attend to their funerals. In case of a bishop dying suddenly without his will, the body was to be kept until a bishop could come to celebrate his obsequies.

3. Excommunicates vagabond clerks who desert their diocese.

4. Forbids to ordain a cleric belonging to another diocese, and any person whatever who will not promise to remain in the diocese.

See Manli, Concil. iv, 1617.

Valencia. Fray Matías de, a Spanish painter, was born at Valencia in 1696. His name was Lorenzo Chafrión. He studied at Rome, returned to Valencia, afterwards went to Granada, where, being reduced to distress, he took refuge in a convent. There are some of his cabinet pictures in the collections at Valencia, and a picture of the Last Supper in the refectory of his convent. He was drowned in 1749. See Spooner, Biog. Hist. of the Fine Arts, s. v.

Valencia, Jacobo Pérez de, an anchorite, commonly called bishop of Christopoliastus, was born about 1420 at Valencia, in Spain, whence he derived his name. He became a hermit of the Order of St. Augustine, and in the answer of Questions Quaerit Animus (1519), the works were called quod amitiat arma humanitas. —Expositio Paulinum Davidis (Leyden, 1512, 1514, 1517). In his PROLEG. in Paulinum, tract. vi, he gives an amusing account of the origin of the vowel-words: "Post conversionem Constantini Magni videntes Rabbinos onem Gentiles cum tanta devotione ad Iudaei Christi conversi, per ecclesiis tanta furore prosperrarn et etiam quod infinita multitudine Judentiorum videnc manifestam veritatem per experimentiam et miracula, pariter convertebatur, et sic dieceebat questans et reditum et tributa Rabbinorum, hac iniquitate communis magnus multitudine congregatos fuisse apud Babyloniae Egypti, quot diecitur Cyper; ibique quanto majus caule potuerunt, conatos fuisse falsificare et perpetuare Scripturam a vero sensu et significatione. Inde confirmisse supra quinque vel septem puncta loco vocalium, quoque punctorum inventore fuisse Ravina et Ravasse duas doctores eorum. Addit isitos Rabbinos confirmisse libros Talmud." He died Aug. 1, 1491. See Jücher, Allg. meines Lebens—Lexikon, s. v. "Perez." Först, Bibl. Jud. iii, 466; Holy, De Bibliorum Testis Originalibus (Oxford, 1705), iii, iv, 442. (B. P.)

Valencia, in Roman mythology, according to Cicero, was the name of the second Mercurius. Some declared him to be the father of Trophonius.

Valencia, the Roman emperor, the brother and co-Augustus of Valentinian I, is important to Church history, as the political representative of Arianism in the East. He was nominated to the throne by Valentinian, March 28, 364, and assigned to the rule of the East. His first efforts were directed towards the securing of his rule against the pretensions of Procopius, whom the late emperor Julian had selected to become his successor. It is not certain that other than political motives were at work in this campaign, though Milman, basing his remark on a fragment by Eunapius, says, in Gibbon, Decline and Fall, iii, 25, "It may be suspected that the heathen and philosophic party espoused the cause of Procopius." (but comp. Ammian, Marcell. xxvi, 6-9). The next campaign of Valens was directed against the Goths, who had operated along the Danube in behalf of Procopius; but before entering on that undertaking, the emperor sought to conciliate the favor of Heaven by receiving Christian baptism; and as the rite was performed by Eudoxius, the Arian bishop of Constantinople, the event was considered a foretoken of the future course of the administration of Valens by identifying him with the Arian party and bringing him into direct conflict with the Catholic and semi-Arian sections of the Church and empire. The Gothic war was successfully completed, and was followed by a systematic persecution of the orthodox and semi-orthodox party throughout the East. A special edict was issued against monks, and military bands were sent to traverse the wilderness in which they dwelt to compel them to enter the service of the State and contribute to its support. Orthodox bishops everywhere were exiled, and historians speak of many who were drowned or otherwise put to death. The persecution was most severe where the emperor was himself present, and as the operations of the Persian king compelled his presence at Antioch, that province became the scene of the most thorough and extensive persecution. The most horrible incident of the persecution was the destruction of eighty presbyters who had been deputed to protest against the instalment of the Arian Demetrius as the bishop of Constantinople, instead of Evgavrius, the choice of the Catholics, and whom the prefect Methodius embarked in a vessel which he caused to be burned on the high seas. Curiously enough, the persecution resulted in the placing of Christian orthodoxy and heathen superstition under the same category of enemies to the emperor. The heathens had appealed to an oracle to obtain the name of the next emperor, when Valens discovered their action, and at once proceeded to enforce against them the edicts of the empire. His rigours were, however, brought to a close by the progress of events on the northern boundary of his State, where the migrating nations involved him in a war which became fatal to himself and the country. His army suffered an unexampled defeat near Adrianople (Aug. 9, 379), and he was slain. During his reign of fifteen years he had done all he could to intensify the hatred of religious parties within the empire, and he now achieved the unenviable distinction of being the first to show to foreign invaders the way into the heart of his country. The political history of his reign is, upon the whole, given with great thoroughness and fidelity by Ammianus Marcellinus and Zosimus, while the ecclesiastical may be gathered from the writings of Basil the Great and the two Gregories, Nyssae and Nazianzen. See also Tillemont, Histoire Empereurs, v, 38-39; Gibbon, ut sup.; Schlosser, Universales Histor. Leben, ii, 2, 370; the ancient histories of the Church, Socrates, Sozomen, etc.; Smith, Dict. of Gr. and Rom. Biog. s. v.; and Herzog, Real-Encyklop. s. v.

Valentia, in Roman mythology, was a goddess of health, similar to Hygeia, venerated by the city Oricum, in Umbria, as a protecting goddess.

Valentia, Gregorio de, a Spanish Jesuit, was born in 1581 at Medina del Campo, in Old Castile, and died at Rome, April 25, 1608. He is the author of De Rebus Fidelis hoc Tempo Controversia (Leyden, 1591; Paris, 1610, fol.). De Tributum Libri V (Ingolstadt, 1586); De Transubstantiat. Pania et Vini in Corpus et Nomen Christi (ibid. 1587); Disput. de Legittimo Usu Exechariae in Alterius orationem Specie (ibid. ed.). See Winger, Handb. der theol. Literatur, i, 341, 419, 430, 456, 853. (B. P.)

Valentin, Pierre, a French painter, was born at Coulommiers-en-Brie, near Paris, in 1600. He studied painting, and went to Rome at an early age, where he remained during the rest of his life. He painted the Martyrdom of St. Procopius and Martiniano (thought to be his best performance); —Decollation of St. John.—St. Peter Denying Christ; —Judith with the Head of Holofernes; —The Judgment of Solomon; and many others. He was an artist of great promise, but died in the flower of his life, in 1632. See Spooner, Biog. Hist. of the Fine Arts, s. v.
Valentine, Sr., a Roman bishop (or presbyter), was beheaded in the reign of the emperor Claudius, A.D. 270, and was early canonized. He is said to have been a man of admirable qualities, and noted for his love and charity. Feb. 14 is celebrated in his honor. The custom of choosing Valentine on that day is accounted for in various ways. By some it is said to have arisen from the fact that birds select their mates at that season; by others, from a practice prevalent at the ancient Roman festival of the Lupercalia, during the month of February, of placing the names of young women in a box from which they were drawn by young men as chance directed. A similar custom was followed throughout Europe on the eve of Feb. 14 until recently, the person chosen becoming Valentine to the one choosing for a year. See Chambers, Book of Days, i, 255. See VALENTINUS, ST.

Valentine, George M., a clergyman of the Church of England, of whose birth or early life no record remains, distinguished himself in the University of Cambridge, and graduated at Trinity College in 1829. He was ordained in the same year to the curacy of Portishead, near Bristol, where he gave himself wholly to pastoral labors for eight years. In 1837 he offered himself to the missionary committee, and in the following year sailed for Bombay, began the study of the native language, and taught a small English school. In 1839 he was married. He soon entered upon general missionary duties, and thus continued until his last sickness, which in a few weeks terminated in his death, July 23, 1846. See Christian Guardian, 1847, p. 483.

Valentine, Jesse M., a minister of the Methodist Episcopal Church, South. His early life is unknown. He was transferred from the Tennessee to the Florida Conference in 1850, and served faithfully about one year, when failing health necessitated his superannuation. He then studied medicine, and became quite successful in his practice. He entered the army of the Confederates some time in 1861, and was soon after taken sick, and died at Gainesville, Florida, in 1862. Mr. Valentine was a graduate of West Point, a fine scholar, characterized by strong, logical reasoning powers, and pure language as a preacher, and as a pulpit orator was surpassed by few. See Minutes of Annual Conferences of M. E. Church, South (1862), p. 410.

Valentinian I, Roman emperor, was the son of Comes Gratianus, and born in A.D. 321 at Cibele, in Pannonia. He succeeded Jovian on the throne in 361, and, having associated his brother Valens with himself in the empire, he assumed the government of the West. He protected the State against the incursions of the Germanic tribes, simplified and improved the internal administration of affairs, and promoted the advancement of science and general culture, thereby winning for himself an honorable place in the estimation of the world, despite the cruelties with which his life was stained. He died Nov. 17, 375. He had been reared amid Christian surroundings, and had drawn upon him the disfavor of the emperor Julian by his unflattering fidelity to his faith. On assuming the control of government he issued an edict of universal toleration in religious matters (see Cod. Theod. IX, xvi, 1, 9, ad A.D. 371), though he found it necessary to prohibit the offering of nocturnal sacrifices, as affording opportunity for political agitation, and also to forbid the sacrifice of magic; and the execution of the Edict of Tolerating contributed greatly towards the advancement of Christianity and the decline of paganism. The expression religio paganorum—the religion of peasants—occurs for the first time in a law of Valentinian of the year 368 (ibid. XVI, ii, 18). Valentinian was also tolerant towards the different parties in the Christian Church, though himself an adherent of the Nicene faith. See Ammian. Marcell. vi and xxx, 9; Smith, Dict. of Gr. and Rom. Biog. s. v.; also Herzog, Real-Encyklop. s. v.

Valentinian II, Roman emperor, was successor to his brother Gratian. The only noteworthy incident of his reign which requires mention in this place was the attempt of the heathen party, in the year 384, to recover the position it had lost. Symmachus, the prefectus urbis, demanded the restoration of the laws issued by Gratian against paganism, and insisted that the religio urbis should be kept distinct from the private religion of the emperor. He also asserted that, inasmuch as man has no knowledge of divine things, it would be best to rely on the authority of antiquity; that heathenism had made ancient Rome the mistress of the world; and that the famine of the year 383 must be regarded as a consequence of the renunciation of the ancient religion. The emperor was induced, however, chiefly through the efforts of Ambrose of Milan, to reject the demand. He was murdered by Arbogastes, May 15, 392. His mother, Justina, was a zealous adherent and defender of the Arian party. See Smith, Dict. of Gr. and Rom. Biog. s. v.; and Herzog, Real-Encyklop.

Valentinian III, Roman emperor, obtained notoriety by issuing the edict of A.D. 445, which contributed materially to the elevation of the papacy, for which see the articles Leo I and PAPACY. He also issued laws against the Manichaeans. His mother, Placidia, administered the government for him until the year 450, and afterwards he gave himself up wholly to sensual indulgences, and left the control of affairs in the hands of a eunuch. He was murdered in 455. See Smith, Dict. of Gr. and Rom. Biog. s. v.; and Herzog, Real-Encyklop. s. v.

Valentines, the followers of the Gnostic heretic Valentinus (q. v.).

Valentinus, St., the reputed apostle of Rhedia and bishop of Passau, is first mentioned, in an authentic manner, by Pez, in the biography of the younger St. Severin, § 35, in Scriptores Rer. Austriacar., i, 88. A presbyter, Lucullus, is there made to relate that a Valentine who was his abbot and teacher had ministered as bishop of Rhedia early in the 5th century, and had died on Jan. 6 of some unmentioned year. Lucullus was accustomed to observe that day in his honor. In one of the poems of Venantius Fortunatus (cir. 600) it is said that a number of churches of St. Valentine were then planted along the Inn. One hundred years later Corbinian visited the grave of the saint, near the Castle of Mais, in the Tyrolean Alps; and soon afterwards (in 730; see Aribo, in Vita Corbin., 15, in Meichelbeck, Hist., Frising. I, ii, 12) the Bavarian duke Thasilo caused Val-
VALENTINUS 699 VALENTINUS

entius's bones to be removed to Passau. The diocese and Church of Passau have since claimed the saint as their earliest incumbent and representative. The Acts of Saints from which the Bollandists give a description of this saint are not older than the 11th century; while a sheet said to have been found with his relics when they were exhumed can scarcely date further back than the 12th century. See Acts SS. Bolland. ad d.7 Jan. i, 368; Raderi Bavaria Sancta, i, 32; Retberg, Kirchengesch. Deutschlands, i, 220 sq.; comp. ii, 133.

Other Valentinians, of Rome, Interamna, Africa, and Belgium, are mentioned in the Acts SS., under Feb. 13. See also among March 16, April 14 and 29, June 2, July 16, Sept. 29, etc.—Hertzog, Real-Encyklop., s.v. It is to one of these latter, doubtless, that the popular belief of St. Valentine's Day is to be assigned. See VALENTINE, Sr.

Valentinus, the Gnostic, and the Valentinians. The birthplace and descent of this most famous of Gnostics is not known. Epiphanius states that he had learned that Valentinus was an Egyptian, and had received a Hellenic training at Alexandria (Her. xxxi, 2, sqq.). This is confirmed by Justin with the Bollandists. Justin's statement of the facts is too bare to surmise. He came to Rome in the reign of Antoninus Pius, probably soon after A.D. 140, while Hyginus was bishop, and he remained until after Anicetus succeeded to the bishopric (Irenaeus, iii, 4, 3; comp. Eusebius, H. E. iv. 10 sq.). Epiphanius says (Her. xxxi, 7) that he was a man who had become an open enemy to the Church and the head of a heretical sect, with which statement should be compared that of Tertullian, in Proscrips., c. 30, that Valentinus and Marcion had in the beginning adhered to the orthodox belief. Tertullian retains them in full membership with the Roman Church as late as the bishopric of Eucherius (with which comp. Irenaeus, ut sup.). The further story (Adv. Val. c. 4) that Valentinus, conscious of his intellectual strength and oratorical power, had hoped to be made bishop of the Church, and had turned against the Church and the truth because a confessor was preferred to him, does not complicate the assumption that disappointed ambition determined him to become a heretic.

The Valentinian system is very obscure with regard to many of its details, but its general structure and material contents are quite comprehensible. It consists in a Pie of Sons, and in the process sets forth an idealistic view of the entire course of the creation and redemption of the world. The great first cause (βασιλεύς, πάνω, πρωταρχή, πρωτάντα) produced the Nous, or Monogenes, who became the principle of all subsequent emanations (αὐρυχρήστια και παλαιστια) and was equal and similar to the Father. The Nous also manifests the Bythos, who is otherwise incomprehensible, and is in comparison with the latter the revealed God, through whom the generation and formation of the sons are mediated. With the Bythos was associated a feminine principle (τετράγωνον) named Sige (silence), though some hold that Sige and Bythos are identical, and consider him, or exalted above all syzygies; and with the Nous was associated Truth (ἀλήθεια). These formed a productive quaternity which became the origin of all things. Nous and Aletheia produced Logos and Zoe, and another tablet said that the two were the fathers of the Platonian and the Pleroma. He expressed what existed seminally in the consciousness of Nous, and it thereby received life, and obtained concrete form, in the syzygy Anthropos (primeval man) and Ecclesia. The quaternity thus became an octave (Οκτάων), and this Oktas, which constitutes the centre of gnostic development, was reinforced by a group of ten sons emanated, according to Irenaeus, from Logos and Zoe, and another from twelve from Anthros and Ecclesia, or, according to Hippolytus, the ten from Nous and Aletheia and the twelve from Logos and Zoe. The derived sons were necessarily subject to limitations, as they could have no other recognition of the Bythos than that mediated by the Nous, and as they were subject to the law of syzygies; and this necessity caused them to experience a feeling of deficient and want, which ultimately found expression in Sophia, the last of the female sons. She vehemently desired to be united with the male Logos, but was prevented by Horos (the principle of limitation and differentiation in the Pleroma, and thereupon she laid aside the thought (ἰδιόγνωσις) previously entertained and the passion resulting from her attempt. This ιδιόγνωσις πώς τε ἐξήνων σώματ εἶχεν become an abortion (ἰερομακρία), under the name of (οἰκοδομή, built without the co-operation of the male syzygies. To guard against a recurrence of the unnatural event, the Father caused a new pair of sons, Christ and the Holy Ghost, to be brought forth by the Nous, who restored harmony to the Pleroma—Christ by teaching the sons that it must suffice them to know the nature of the syzygies and the idea of the unoriginate, and that the Great Father of all is infinite and incomprehensible save as he is manifested by the Nous (they thus obtained a clear understanding of their relation to the Father, and learned that the immediate desire to be united to the Logos was to extinguish the idea of the unoriginate); the Holy Spirit by imparting to them rest and contentment, in giving them similarity of form and disposition, and making each of them to be, at the same time, what all the others were. This constitutes the completion of the Pleroma. The representation of Hippolytus varies from this, in that the Father himself became the emanation of the abortion from the Sophia brought confusion, i.e. darkening of the intellect (ἀγωνία) and formlessness (ἀναμορφή), into the Pleroma. To remove this, Christ and the Holy Ghost were produced, while Horos, or Staurus, was brought forth to be the guard and protector of the Pleroma. To celebrate the restored harmony of the Pleroma, each of the sons contributes the most beautiful and precious it contains to produce the perfect beauty, Jesus the Soter. This forms the conclusion of the heavenly drama; but in the expelled abortion the condition for a real world-process has been given. Christ gives to this abortion the form of a lower or external Sophia (μορφωμένη κατ' αἰσθήματι as contrasted with the μορφωμένη κατὰ γνῶσιν, or Achamoth, a Sophia of nature, but not of knowledge. Contact with Christ has given her no permanent ability beyond a confused desire for light; she becomes the prey of sorrow, and infinite desire, all the materials of the new world, the form of light, a lack of clear, gnostic consciousness. In response to her prayers, the Soter Jesus is sent for her support (Paraclete), and by him she is delivered from her hurtful affections and endowed with gnostic qualities. She thereupon receives into herself the light of the angels who accompany the Soter, and brings forth pneumatical fruit in their image. A second process of alienation and reconciliation is completed at this point, and, as in the former instance, in such a way that the affections eliminated from the cosmic nature become the basis of a further development, while that cosmic nature itself becomes gnostic and gnostically delimited. These eliminated affections exist in the first instances as an incorporeal klesis (βλάβης), but were soon incorporated in two substances, the hylic and the psychic. Fear became specifically psychic, sorrow hylical, despair demoniacal; and the Achamoth thus becomes the mother of all things as late as the Pleroma. The real purpose of the cosmical principle, and in her is reflected the Ogdoad of the cosmic world, which is the prototype of the cosmical. Achamoth makes use of the Demiurgo, who is the father of the psychic, the former of the hylical, and the king of all, but whose merely psychic nature deprives him of the power of being the beginning of the things, of the cosmical purpose of the cosmical development. The De- miurge forms the entire visible world, and is called Hebdomus, from the seven heavens. He is the fiery God of Deut. iv, 24, because he, as the principle of cosmical life, at the same time represents the might of
transitoriness. He constitutes man out of psychological and hydric elements, but he is not aware that the psychical has implanted in it psychological germs which the Sophia designs for further development. Such development receives a decisive impulse through the intervention of the Demiurgus, who through his creative participation, gnosically enlightens wherever any degree of receptivity exists. The Demiurgus had promised his people, the Jews, a Messiah, and in due time causes him to be born (a psychical Messiah) from Mary, through whom he passes like water through a channel. The Messiah receives psychical endowments from the Sophia, but has in himself no hydric elements which are not capable of being saved. His psychical body is, however, so marvellously constructed that it may be seen and touched, and that it may suffer. At this point the Valentinians divided into two schools—the one of which included Heracleon and Plotomy, and is known as the Italitici, which held to the psychical body and seemed to make the psychical endowment dependent on the Messiah's baptism; while the Anatotic school, to which Aionious and Are烈士anes belonged, held to a psychical body formed by the descent of the Spirit (Le. the psychical body formed by Mary in the exaltation of the Demiurgus. The passion and crucifixion of our Lord likewise receive a symboical interpretation, though the heavenly Soter is not usually allowed to participate in them. The saving process consists in the exaltation of the psychical element in man, and in the end of all things is the separation of the psychical and the psychical from the hydric. Achamoth is thereby fully released from her pain, and she returns with the Soter, who becomes her husband, and with all perfect psychical natures who have been married to the angels of the Soter, to the Pleroma to the eternal marriage feast. The Demiurgus, with all righteouse psychical natures, is lifted up to the intermediate place near to, but not in, the Pleroma, and afterwards the concealed fires break forth and consume matter and themselves. The influence of Platonic ideas is unmistakable in the structure of this system. Compare e. g. the 

Valeriskos. kalathos, and with Plato's conception of matter as the μὴ ὅραμα. The καλάθος is conceived of as the negation of existence or being, and thus serves to show the monistic character of the system, though all gnosia involves the dualistic principle of connecting with the psychical, as related to the process of the world, a negation of itself, an element of finiteness, and of effecting the necessary reconciliation only through the development of the world-process. See Ireneus, particularly bk. i and ii; Hippolytus, Ad. herv. vi, 21 sq.; Tertullian, Ad. Valentinum; Clem. Alex. Strom., and other works; Origen, especially in Joannis xiii; Epiphanius, Harr. xxx, xxxii, xxxv; Theodoret, Harr. Bab. i, 7; see also Buddensieck, in Appendix to Introduct, ad Hist. Philos. Ebr.; Massuet, in Irenaeus, diss. 1; Rossel, Theol. Schriften (Berl. 1847), p. 201 sq.; Müller, Gesch. der Kosmologie; Meth. Quar. Rev. 1880, p. 367 sq.; and Herzog, Real-Encyklop. a. s. v. See Gnosticism.

Valerian (fully Publius Licinius Valerianus), Roman emperor from A.D. 253 to 260, was at first friendly towards Christians, but in 257 began a violent persecution of them, which continued to the end of his reign. It was intended to destroy the life of the Church, especially the bishops. They were at first forbidden to convey religious gatherings under pain of imprison- ment and similar punishments; afterwards were sentenced, together with their lay adherents, to the mines; and, finally, were condemned to execution, in company with their priests, deacons, while all such senators, knights, etc., as would not renounce the Christian religion were threatened with confiscation of property and loss of life. The most noted victims of this persecution were Sixtus I of Rome and Cyprian of Carthage. In the year 259 Valerian attempted an invasion of the Persian kingdom, but was taken prisoner by the Sassanide king Sapor, and held in captivity until he died, ten years later. His son and successor, Gallienus, issued an edict of toleration in 260, which inaugurated a period of forty years of comparative peace and rest for Christianism. See Cyprian, Ep. 88, 89; Eusebius, Hist. Ecle. vii, 10, 11; Neander, Church Hist. (tr. ad loc.); Smith, Dict. of Gr. and Rom. Biog. a. s. v.; Herzog, Real-Encyklop. a. s. v.

Valerian, St., was a bishop of Cemele, in the Maritime Alps, now in the archbishopric of Embrun. He belonged to the 5th century. He attended a synod at Riez in 439, signed the address of the Gallican bishops to Leo I in 451 (see Leonis M. Opp. i, 998, 1110 sq.), and took sides with the monastery of Lerins, in 454, in its dispute with the bishops of the neighborhood. The year of his death is not known. He left twenty-nine Sermons, or Homilies, and an Epitaph ad Monochos, which were published by Sirmondus (War. 1619) and Raynauld (Lagug. 1638). Raynauld's edition is given also in Migne, Patrologia, (Par. 1854), lii. Galland furnished an additional edition of Valerian, together with a Petrus Chrysologus, in the Bibl. Max. Intr. (1774), c. 10. See Cave, Script. Ecle. Hist. Lit. i, 427; Herzog, Real-Encyklop. a. s. v.

Valerian, Domenico and Giuseppe, two Italian painters, brothers, who flourished at Rome about 1370. They were pupils of Marco Ricci, and were jointly employed in decorating churches and other public buildings.

Another Giuseppe Valerian was a Jesuit, and painted under Clement VIII several religious pictures, the best of which are in the Chiesa del Gesù.

Valerio, Samuel, a Jewish physician who flourished in the island of Corfu in the 16th century, is the author of ה' ונהור, or a commentary on the book of Esther (Ven. 1588), in which he made use of the Talmud, of Jewish and Christian exegetical works, of the philosophical writings among Jews and Arabs; ה' ונהור, or a commentary on Daniel (Jesu, ed.). See Fürst, L. des Orient, 1845, col. 505, 606; Bibl. Jud. iii, 467; De Rossi, Dizionario Storico (Ger. transl.), p. 325. (R. P.)

Valerius, Augustinus. See Valerio Augustino.

Valerianus, A sect or community of ascetics said to have been founded by Valens of Bacatha Metropoeia, an episcopal city spoken of by Epiphanius and Nicetas as being in "Arabia beyond Jordan." They were said by Epiphanius to hold some Gnostic opinions, and by St. John of Damascus to be profligate Antinomians. They practiced self-mutilation, and enforced the practice on all their adherents. See Epiphanius, De Hæres., liviii; St. John of Damascus, De Hæres., lviii.

Valerio, Francesco, an Italian painter and engraver, flourished at Venice about 1612. Little is known of his paintings, but his most important work is a set of plates of hermits, engraved for a work entitled Illustris Anachoretarum Elogia, by Jacobus Cavasius, which was published at Venice in 1612. His plates are sometimes marked Franciscus Valerigius. See Spooner, Biog. Hist. of the Fine Arts, a. s. v.
VALESIUS, 701 VALLADOLID, COUNCIL OF

Valensio, Giovanni Luigi, an Italian painter and engraver, was born at Bologna in 1561. He studied in the school of the Caracci and executed several works for the churches of his native city, such as The Scourging of Christ, in the church of Santa Maria in Piazza, and After the Resurrection of Christ, at the Church of the Meudicanti; and St. Roch Curing the Sick of the Plague, in the Church of San Rocco. He went to Rome, where he enjoyed great reputation, and where he died in 1640. See Spooner, Biog. Hist, of the Fine Arts, s. v.

Valesius (properly De Valo), Hunyay, a French antiquary and critic, was born in Paris, Sept. 10, 1663; and educated in the Jesuit College at Verdun and at Paris. He formed a connection with Petavius and Sirmond which existed while they lived. In 1622 he went to Bourges for the study of jurisprudence, and on his return spent seven years in the practice of law; but subsequently gave himself wholly to learned studies, the earliest fruit of which was his edition, with critical notes, of the extant from Polybius, Dio, Sic., etc., made by order of the emperor Constantine Porphyrogenitus, entitled Excerpta Polyb.. Dio, Sic., Nicol. Dumi... App. Alexandr... (Pet. 1634–48). Then followed his edition of the works of Priscian, Anax. Ma... Binarianus Mar... (Ibid. 1688; 2d improved ed. by his brother Hadr... 1681). These works so advanced his reputation that he was received into the circle of the foremost scholars of his time, as D'Achery, Mabillon, cardinal Barberini, Leo Allatius, Grotius, and others. He was, however, debauched of his virtue, and thereupon写了 total blindness; but, as a reader having been provided, he was enabled to prosecute his studies of the ancient church writers, and he was instructed in 1650 by the French bishops to publish a new and critical edition of their works, for which he received an annual pension. On the 1st of July, 1668, he published a work in consequence, Ense... Historia Ecclesiastica: —De Vita Constantini Lib. IV; —Oratio Constantini ad Synod... and the treatises De Donatibus, De Anastas... Translatinge LX Interpretum, De Renovat... Tyrropylogi... (Pet. 1659, 1678). In 1660 Louis XIV appointed... historiographer with a salary of 1200 livres, and cardinal Mazarin also gave him tokens of favor. In 1664, at the ripe age of sixty-one years, he married Margaret Chesneau, a young girl, and became the father of seven children. He continued to employ his time in literary pursuits; and after a few years he died, May 5, 1677. His later works included editions of the works of S...men; treatises on Athanasius, Paul of Constantinople, the sixth canon of the Council of Nice (Par. 1688); an edition of Theodoret, one of Evagrius, with extracts from Philostorgius, and of Theodore Lector (ibid. 1673; Mouy, 1679; Amstel 1695). He was planning new editions of the Latin historians of the Church when death surprised him. In Burmann, H. Vales. Emd... Libr. Quoique et de Critie Libr. Duo, are given several smaller works of Valesius, some of which had not been previously published, and also H. Valesii Vita (Par. 1677, by his brother). In Paris (1694) were also published Palestinian. See Herzog, Real-Enzyklop. s. v.

Valette, Louis, a Protestant theologian, was born May 24, 1800, in Savoy. For a number of years he was chaplain to the ambassador at Naples. In 1851 he was called to the Lutheran Church of the Vicellies at Paris, where he also acted as chaplain to the duchess of Orleans. He was soon called to the presidency of the Lutheran Consistory at Paris, which position he occupied till his death, Oct. 29, 1872. (B. F.)

Valalla. See WALALLA.

Vall, in Norse mythology, was a son of Odin, who was destined to reappear in the new heavens which the All-Father should create after the fall of Walhalla. In all other respects the name remained vague, and only in a few male names in the popular tongue, has the form Valero, Agostino, an Italian prelate, was born at Lenigo, near Venice, April 8, 1580, of a patrician family, being nephew of cardinal Navagero, who directed him in his studies at Padua. He made such progress in them that he was appointed in 1550 professor of philosophy at Venice, and in 1562 he accompanied cardinal Navagero to the Council of Trent. In 1565 he succeeded Navagero as bishop of Verona, and in 1579 pope Gregory XIII sent him to Dalmatia to visit the churches there. In 1583 he was made cardinal, and in 1586 he was appointed abbot of Forli by pope Sixtus V. In 1590 he was a member of a conclave which was appointed pope Gregory XIV. After the death of Innocent IX, the cardinals contemplated the election of Valerius to the papal throne. Clement VIII, however, who was elected in his stead, appointed him examiner of the bishops and member of the Congregatio Rerum et Indicia. In 1600 Leo XI made him bishop of Palestro, but the pope died in 1605 and the republic of Venice caused his death, which took place May 21, 1606. His writings are numerous, and are enumerated in Jöcher, Allgemeines Gelehrten-Lexikon, s. v.; also see Winer, Handbuch der theol. Literatur, ii, 61; Hoefer, Nouv. Biog. Générale, s. v. (B. P.)

Valla, Lorenzo, a Roman priest and controversialist, was born at Naples in 1410. He obtained a priest in 1431, and taught rhetoric and philosophy at Pavia and Milan, where he had bitter controversies with the Aristotelian scholastics. In 1443 he left Rome and went to Naples, where he was patronized by Alfonso I, but for whose protection the inquisitors would have burned him. After a few years he returned to Rome, where he was restored as canon of St. John Lateran. He returned to Rome and remained there until his death, in 1465. He wrote many important works, among which are De Filio Cre... Et Eius Institutionis Divin... Eloquentia Linguae Latinae Lib. VI; —In Novum Testa... Ammianus Marcellinus, et Theodorli... —Elegi... Translacione de Isidro, Herodotus, Thucydides, et.; besides several controversial works and treatises on logic. His principal works were published at Basle in 1543.

Valladolid, a learned French ecclesiastic, was born about 1565, at St. Paul, near Montbrison, of an ancient family which took its name from the village where it had lived. Having finished his early education at Bilbon, in Auvergne, he went to Avignon to study theology, and entered the Order of the Jesuits (1586), where he remained until 1597. He thereupon wrote a long essay on his success in sermonizing led him to leave Avignon, and he preached for a time in Moulin, Dijon, and Lyons. Henry IV, hearing of his talents, called him to Paris as historiographer of his reign (1605); but the Jesuits secured the royal mission, and Valladolid, in disgust, left their order, and went first to Paris and then to Rome, where he obtained of Paul V letters which secured him from further persecution (July, 1608). He preached in Paris before the court with great acceptance, and in 1609 was appointed by cardinal Grevy his canon, and in 1611 he received the abbey of St. Armand. He again became involved in trouble, however, but in 1621 he was restored to his office. He died at Metz, Aug. 13, 1638. He wrote a number of secular and religious treatises, which are enumerated in Hoefer, Nouv. Biog. Générale, s. v.

Valladolid, COUNCIL of (Concilium apud Vallatim...um), or Vallatum (Olentum). Valladolid is a well-known town of Spain (anciently called Patria), capital of a province of the same name, situated on the left bank of the Pisuerga. An ecclesiastical council was held there in 1322 by cardinal William, bishop of Savina, and legate of pope John XXII. A preface and twenty-seven canons were published by his direction, and with the approbation of the pope.

1. Orders that provincial councils be held every two years, and diocesan synods annually.
2. Orders all curates to read four times a year, in the vulgar tongue, to their parishioners the acts and brief.
VALLARSI

702

VALLEY

the decalogue, the number of the sacraments, and the
certain uses of masses.
4. Orders that Sundays and festivals be kept holy.
10. Orders that bishops shall assign limits to parishes.
11. Exports curates to exercise hospitalities.
12. Exports curates to preach before churches before a vacancy, or to present infirmities.
13. Decrees to be excommunicated, peço facto, who eat or sell meat on any fast-day.
17. Forbid secular meetings within churches, fairs, etc., in church-yards, or for fortified churches as places of defence.
20. Grants to clerks three years for study, during which time the bishop shall receive the fruits of their benefices without
out residence.
22 and 24. Excommunicate those who seize men and sell the properties of the Saracen; the Saracen; also all wizards, enchanters,
and those who consult them.
See Mans. Clement. ch. 168.

Vallarsi, Dominico, an Italian antiquarian, was
born at Verona, Nov. 13, 1702, and studied
the humanities with the Jesuits with such success that at the
age of twelve he maintained a public thesis on philos-
ophy. He afterwards entered the order, and applied himself to the study of Hebrew, Greek, and ecclesiasti-
ical history. He finally went to Rome as reviser of the
ancient languages, and there became a noted authority on the antiquities of the Middle Ages, a subject on which he wrote several works. He also edited the Opera omnia Veronae (1715, 12 vols. fol.)
and those of Tyrannus Rufinus (ibid. 1745, 4to). He

Valle, Andrea della, an Italian architect of the
16th century, was born at Padua. His principal work was
the Carthusian monastery, two miles from Padua. This structure, from its beautiful design, has been at-
distributed to Palladio. He published an edition of the
unprinted works of Palladio, in which he inserted five
plates. See Spooner, Biog. Hist. of the Fine Arts, s. v.

Valde, Geoffroy, a French daisie of the latter part of
the 16th century, was the son of the controller of the
public domain. He gave himself up to philosophical
speculations, which ended in rejecting all religious
belief. In consequence of an infidel work which he wrote,
titled La Béatitude des Chrétiens (24 ed. 1770, 8vo),
he was imprisoned, and, after trial, was hanged, and his

Valle (or Valde), Simon, a French engraver, is said to have been born at Paris about 1700. He
studied under P. Drevet, and executed several plates in a neat and tasteful style. Among them are the follow-
ing: The Transfiguration (Raphael)—St. John in the Desert (iii.)—The Flight into Egypt (Carlo Maratti)—
The Resurrection of Lazarus (Girolamo Mazzuino)—
The Finding of Moses (Francesco Romazelli) — and others. See Spooner, Biog. Hist. of the Fine Arts, s. v.

Vallemont, Pierre le Lorraine, abbe de, a French
writer, was born at Pont-Audemer, Sept. 10, 1649, of a
Norman family. He entered the religious order; was
made doctor of theology; lived successively at Rouen,
where he became an encountered opposition; at Paris, where he superintended the education of a young
noblemen; at Versailles, as prior of St. James de Bres-
sure; and finally returned to his native place, where he
died, Dec. 30, 1721. It is not known for what reason he
took the surname of Vallemont. His writings, which are of a religious character, are enumerated

Valennais, Johannes, of Autun, France, who lived in
the 16th century, is the author of Grammatica He-
braica (Paris, s. a.).—Opus de Prosodia Hebraorum in IV Libros Divinam (ibid. 1545). The first book contains
Accents of Hebrew, the second, Grammat ies and Mosis,
Loci; the third, Rhetorica, Asse. Offic. etc.; the

Valensius, Theophilus, who lived in the 17th century,
was the author of Enchiridion Linguae Sanctae e

Vallet (or Vallet), Guillaume, a French engraver,
was born in Paris in 1636. After some study of his art
he went to Rome, where he resided many years. His
plates were executed with the greatest accuracy, and his prints possess considerable merit. He died in 1704. Among his prints the following deserve mention: The Nativity; The Holy Family; Melchisedek bringing Presents to Abra-
ham; The Last Supper—all after Veronese; The Holy
Family, after Guido, also after Albano:—and several others. See Spooner, Biog. Hist. of the Fine Arts, s. v.

Vallette, William, a Methodist Episcopical minister,
studied medicine early in life; joined the Illinois
Conference in 1839; was transferred to Rock River
Conference in 1840; and in the following year was ordained
deacon. In 1840 hemorrhage of the lungs incapacitated
him for further ministerial labor, and caused his retire-
ment to Elgin as a superannuate, where he spent the
remainder of his days in the practice of medicine. He
died in 1871. See Minutes of Annual Conferences, 1872, p. 113.

Valley (also Vale), a hollow sweep of ground be-
tween two more or less parallel ridges of high land.
Vale is the poetical or provincial form. It is in the
natural situation where the center of the vale is usually
occupied by the stream which forms the drain of the high land on either side, and from this it commonly receives its name. Valley is distinguished from other terms more or less closely related—on the
one hand, from "glen," "ravine," "gorge," or "dell,"
which indicates a depression at one extremity; and
smaller than a valley; on the other hand, from "plain,"
which, though it may be used of a wide valley, is not
ordinarily or necessarily so. It is to be regretted that
with this quasi-precision of meaning the term should
not have been employed with more restriction in the
A. V. See Topographical Terms.

The structure of the greater part of the Holy Land
does not lend itself to the formation of valleys in our
sense of the word. The abrupt transitions of its crowded
rocky hills preclude the existence of any extended sweep
of valley; and where one such does occur, as at Hebron
or on the south-east of Gerizim, the irregular and un-
symmetrical positions of the enclosing hills rob it of the
character of a valley. The nearest approach is found
in the space between the mountains of Gerizim and
Ebal, which contains the town of Nablus, the ancient
Shechem. This, however, by a singular chance, is not
mentioned in the Bible. Another is the "valley of
Jezreel," the undulating hollow which intervenes be-
tween Gilboa (Jebel Fukas) and the so-called Little
Hermion (Jebel Duhu). See Palestine.

Valley is employed in the A. V. to render the follow-
ing Heb. and Gr. words. See Dale; Plain

1. ג越好 (ma'alah, to be raised, to be exalted, to be placed, to rise, to mount up, to fill up; the verb in the sense of "to rise" seems to be used of something rising above as a hill or mountain, and if we take the root of it in this sense, it is probably from the root היל (hil), "to be high, something elevated); appears to mean rather a plain than a valley, wider than the latter, though so far resembling it as to be enclosed by the sides, like the wide district between
Leban and Antilebanon, which is still called the Bekef. It
denotes a wide alluvial bottom, and its leviness is
plainly referred to in Isa. xi. 4. It is usually rendered
"valley" (Deut. viii. 7; xi. 1; xxxiv. 3; Josh. xi. 8;
17. xi. 7; 2 Chron. xxxiv. 22; Psal. civ. 8; Isa. xii. 18;
1xii. 14; Ezek. xxxvii. 1, 12; Zech. xii. 11); elsewhere
"plain" (Gen. xi. 2; Neb. vi. 2; Isa. xi. 4; Ezek. iii. 22,
19, 31); or "plain of Bashan" (Deut. iii. 10). This
Heb. term is applied to the following places:
(1) The Valley of Shinar (תנין), the rich
plain of Babylonia (Gen. xi. 2). See Shinar.
(2) The Valley of Jericho (תנין), the lower
end of the Ghôr, or plain, through which the Jordan
treated as integral parts of the books. A few MSS. of the Bible faithfully preserved the "Hebrew canon," but the great mass, according to the general custom of copyists to omit nothing, included everything which had held a place in the Old Latin. In the New Test. the only MS. discovered was the Apocryphal epistle to the Laodicceans. The text of the gospels was in the main Jerome’s revised edition; that of the remaining books his very incomplete revision of the old Latin. Thus the present Vulgate contains elements which belong to every period and form of the Latin text. The so-called Old Latin: Wisdom, Eccles. 1 and 2 Macce., Baruch. (2) Old Latin revised from the Sept.: Psalter. (3) Jerome’s free translation from the original text: Judith, Tobit. (4) Jerome’s translation from the original: Old Test. except Psalter. (5) Old Latin revised from Greek MSS.: Gospels. (6) Old Latin curiously revised: the remainder of the New Test.

2. Revision of Alcuin.—Meanwhile the text of the different parts of the Latin Bible was rapidly deteriorating. The simultaneous use of the Old and New versions necessarily led to great corruptions of both texts. Moreover, the judgement of scribes, and the confusion was further increased by the changes which were sometimes introduced by those who had some knowledge of Greek. From this cause scarcely any Anglo-Saxon Vulgate MS. of the 8th or 9th century, in all probability, is wholly free from corruptions. The most remarkable and trustworthy examples are noticed below; and in rare instances it is difficult to decide whether the text is not rather a revised Vetus than a corrupted Vulgata nora (e.g. Brit. Mus. Reg. i, E. vi; Add. 5463). As early as the 6th century, Cassiodorus attempted a partial revision of the text (Psalter, Prophets, Epistles) by a collation of old MSS. But private labor was unable to check the growing corruption, and in the 8th century this had arrived at such a height that it attracted the attention of Charlemagne. Charlemagne at once sought a remedy; and entrusted to Alcuin (c. A.D. 802) the task of revising the Latin text for public use. This Alcuin appears to have done simply by the use of MSS. of the Vulgate, and not by reference to the original texts (Ponson, Letter vii to Tirois, p. 145). The passages which are adduced by Hody to prove his familiarity with Hebrew are, in fact, only quotations from Jerome, and, if we add to this the fact that the text unerringly followed the least in one place where Jerome points out its inaccuracy (Gen. xxv, 8), the patronage of Charlemagne gave a wide currency to the revision of Alcuin, and several MSS. contain which claim to date immediately from his time. According to a very remarkable statement, Charlemagne was more than a patron of sacred criticism, and himself devoted the last year of his life to the correction of the gospels "with the help of Greeks and Syrians" (Van Ess, p. 159, quoting Theganus, Script. But. Franc. ii, 277).

However this may be, it is probable that Alcuin’s revision contributed much towards preserving a good Vulgate text. The best MSS. of his revision do not differ widely from the pure Hieronymian text, and his authority must have done much to check the spread of the interpolations which reappear afterwards, and which were so important an addition which was only introduced into the Old Latin versions. Examples of readings which seem to be due to him occur: Deut. i, 9, add. siduodinem; venissenum, for -etis; ver. 4, ascendimus, for ascendemus; ii, 24, in manu tua, in manus tuas; iv, 35, viduiti, for vivit; vi, 15, ipsi, add. aoli; xv, 9, oculos, om. oculos; xvi, 20, forte; add. remunentur; xvi, 15, om. et. But the new version was gradually deformed, though later attempts at correction were made by Lanfranc of Canterbury (A.D. 1089, Hody, p. 416), Card. Nicolaus (A.D. 1190), and the Cistercian abbé Stephenus (c. A.D. 1150). In the 18th century Correctoria were drawn up, especially in France, in which varieties of reading were discussed; and Roger Bacon complains loudly of the confusion which was introduced into the "common, that is, the Parisian, copy;" and quotes a false reading from Mark viii, 9, where the correctors had substituted confesseus for confessus (Hody, p. 419 sq.). Little more was done for the text of the Vulgate than the art of printing; and the name of Laurentius Valla (c. 1540) alone deserves mention, as of one who devoted the highest powers to the criticism of Holy Scripture, at a time when such studies were little esteemed.

V. History of the Printed Text.—I. Early Editions. It was a noble object of the Venerable Bede to have put the first book which issued from the press was the Bible; and the splendid pages of the Mazarin Vulgate (Mainz—Gutenberg and Fust) stand yet unsurpassed by the latest efforts of typography. This work is referred to about the year 1450, and presents the common text of the 16th century. Other editions followed in rapid succession (the first with a date, Mainz, 1462, Fust and Schoffer), but they offer nothing of critical interest. The first collection of various readings appears in a Paris edition of 1564, and others followed at Venice and Lyons in 1511, 1518; but cardinal Ximenes (1502-1517) was the first to revise the text, and his labors were joined by the Paulus cum quamplurimis exemplaribus venerande vestatis; sed his maxime, quae in publica Complutensia nostre universitatibus bibliotheca recreandur, quae supra octingentesimam abhine annorum litterarum Gothicis conscripta, ea sunt sinceritate ut nec apicis lapibus positae in editis deprehendit. (1) to which the credit is generally given; (2) to which the credit is generally given. The Complutensian text is said to be more correct than those which preceded it, but still it is very far from being pure. This was followed in 1528 (2d ed. 1532) by an edition of R. Stephens, who had gained the support of the emperor and of the conservative MSS. of high character and the earlier editions; but as yet the best materials were not open for use. About the same time various attempts were made to correct the Latin from the original texts (Erasmus, 1516; Pagninus, 1518-28; Card. Cajetan: Steuchius, 1529; Clarius, 1542), or even to make a new Latin version (Jo. Campensis, 1533). A more important edition of R. Stephens followed in 1540, in which he made use of twenty MSS. and introduced considerable alterations into his former text. In 1541 another edition was published by Jo. Benedictus at Paris, which was based on the collaboration of MSS. of various character, and which has been followed by the editions of the centuries which immediately followed. Vercellone speaks much more highly of the Biblia Ordinaria, with glosses, etc., published at Lyons, 1545, as giving readings in accordance with the oldest MSS., though the sources from which they are derived are not given (Vetus Lect. xci). The course of controversy in the 16th century exaggerated the importance of the differences in the text and interpretation of the Vulgate, and the confusion called for some remedy. An authorized edition became a necessity for the Romish Church, and, however gravely later theologians may have erred in explaining the policy or intentions of the Trinitarian fathers on this point, there can be no doubt that (setting aside all reference to the original texts) the principle of their decision—the preference, that is, of the oldest Latin text to any later Latin version—was substantially right.

2. The State of the Early Vulgate Versions. The first session of the Council of Trent was held on Dec. 13, 1545. After some preliminary arrangements, the Nicene Creed was formally promulgated as the foundation of the Christian faith on Feb. 4, 1546, and then the council proceeded to the question of the authority, text, and interpretation of Holy Scripture. It was desired to report upon the subject, which held private meetings from Feb. 20 to March 17. Considerable varieties of opinion existed as to the relative value of the original and Latin texts, and the final decree was intended to serve as a compromise. This was made on April 8, 1546, and consisted of two parts—the first of which cou-
tains the list of the canonical books, with the usual
anathema on those who refuse to receive it; while the
second, "On the Edition and Use of the Sacred Books," contains no anathema, so that its contents are not arti-
cles of faith. The wording of the decree itself contains
several marks of the controversy from which it arose, and
the liberal obloquies of later writers have added to it.
Affirming the authority of the "Old Vulgate," it contains no estimate of the
value of the original texts. The question decided is simply the relative merits of the current Latin versions
("si ex omnibus Latinis versionibus que circumfun-
tur...""); the reform of the liberal version must have
already been accomplished.
The object contemplated is the advantage (utilitas)
of the Church, and not anything essential to its con-
stitution. It was further enacted, as a check to the
license of printers, that "Holy Scripture, but especially
the old and common [Vulgate] edition [even without
excluding the original texts, should be printed as
correctly as possible." In spite, however, of the com-
parative caution of the decree, and the interpretation
which was affixed to it by the highest authorities, it was received with little favor, and the want of a stand-
ard text of the Vulgate practically left the question as
unsolved as before. The decree itself was not made be-
en little fitted to anticipate the difficulties of textual
criticism, but afterwards these were found to be so great
that for some time it seemed that no authorized edition
would appear. The theologians of Belgium did some-
ting to meet the want. In 1547 the first edition of
Henricus appeared at Louvain, which had very consider-
able influence upon later copies. It was based upon
the collation of Latin MSS. and the Stephanic edition
of 1540. In the Antwerp Polyglott of 1568-72 the Vul-
gate was borrowed from the Complutensian (Vercellone,
Var. Lect. cl); but in the Antwerp edition of the Vul-
gate of 1573-74 the text of Henricus was adopted, with
copious additions by readings by Lucas Brugensis. This
last was designed as the preparation and temporary sub-
stitute for the papal edition; indeed, it may be ques-
tioned whether it was not put forth as the "correct edi-
tion required by the Trinitarian decree" (comp. Lucas
Brug. ap. Vercellone, cii). But a papal board was al-
ready engaged, however desultorily, upon the work of
revision. The earliest trace of an attempt to realize
the recommendations of the council is found fifteen years after it was made. In 1561 Paulus Manutius
(son of Aldus Manutius) was invited to Rome to super-
intend the preparation of a new version of the Latin and
Greek texts (see Vercellone, Var. Lect. etc., i. prolix. xix., note), but it was currently reported that the
difficulties of publishing an authoritative edition
were insuperable. Nothing further was done to-
wards the revision of the Vulgate under Gregory XIII,
but preparations were made for an edition of the Sept.
This appeared in 1587, in the second year of the ponti-
ficate of Gregory, and was made at the special request of the chie-
ños of Jerusalen. After the publication of the
Sept., Sixtus immediately devoted himself to the pro-
duction of an edition of the Vulgate. He was himself
a scholar, and his erudition enabled him to face a
work from which others had shrank. He had felt," he says, "from his first accession to the papal throne
(1855), great grief, or even indignation (indignum fe-
rimente), that the Trinitarian decree was still unsatisfied;" and a board was appointed, under the presidency of ca-
rdinal Carafa, to arrange the materials and offer sugges-
tions for an edition. The sixteenth chapter of the text,
repeated in the corresponding suggestions of the board by
his absolute judgment; and when the work was print-
ed, he examined the sheets with the utmost care, and
corrected the errors with his own hand. The edition
appeared in 1590, with the famous titlek Ewemus
ille (dated March 1, 1589) prefixed, in which Sixtus
affirmed with characteristic decision the plenary author-
ity of the edition for all future time. "By the fulness
of apostolical power" (such are his words),"we decrees
and declare that this edition... approved by the au-
thority delivered to us by the Lord, is to be received
and held free from all errors, and have no objections
in public and private discussion, reading, preaching,
and explanation." He further forbade expressly the
publication of various readings in copies of the Vulgate,
and pronounced that all readings in other editions and
MSS. which vary from those of the revised text "are to
be regarded as erroneous, and have no authority whatever."
Such a declaration, he said, was "in keeping with our
quae hic nostrae editioni non consensuerint, nullam in
posterum fidem, nullamque auctoritatem habitura esse
decernimus". It was also enacted that the new revision
should be introduced into all missals and service-books,
and the greater excommunication was threatened against
all who in any way contravened the constitution. Had
the life of Sixtus been prolonged, there is no doubt
that his iron will would have enforced the changes
which he thus peremptorily proclaimed; but he died in
August, 1590, and those whom he had alarmed or of-
fended took immediate measures to hinder the execu-
tion of his will. Notwithstanding the temporary ap-
pearance of a new edition, the work could not be done,
but the reaction was not long delayed. On the acces-
sion of Gregory XIV, some went so far as to pro-
pose that the edition of Sixtus should be absolutely
prohibited, but Bellarmine suggested a middle course.
He proposed that the erroneous alternations of the text
and the橡胶 by which they had been made should be
"corrected with all possible speed, and the Bible reprinted under the name of Sixtus, with a prefa-
tory note to the effect that errors (aliaqua errata) had
crept into the former edition by the carelessness of the
printers. This pious fraud, or rather daring falsehood
—for it can be called by no other name—found favor
with those in power. A commission was appointed to
revise the Sixtine text, under the presidency of the
cardinal Colonna (Colonna). At first the commissioners
were not very active, and it seemed likely that a year
would elapse before the revision was completed (Ung-
ser, Rel. i. 410). The work was not delayed, and the publication of
"should be corrected with all possible speed, and the
Bible reprinted under the name of Sixtus, with a prefa-
tory note to the effect that errors (aliaqua errata) had
corrected with all possible speed, and the Bible
Revised (1592) was ready for the pope.
Clement instigated the final revision of the text
to Toletus, and the whole was printed by Aldus Manu-
tius (the grandson of his predecessor), the text of
1592 Clement VIII was raised to the pope.
Clement intrusted the final revision of the text
to Toletus, and the whole was printed by Aldus Manu-
tius (the grandson of his predecessor), the text of
1592 Clement VIII was raised to the pope.
Clement instigated the final revision of the text
to Toletus, and the whole was printed by Aldus Manu-
tius (the grandson of his predecessor), the text of
1592 Clement VIII was raised to the pope.
VULGATE

833

VULGATE

the Roman Vulgate by an apology no less needless than untrue. Another edition followed in 1593, and a third in 1598, with a triple list of errata, one for each of the three editions. Other editions were afterwards published (comp. Velarino, cit.), but with these corrections the history of the authorized text properly concludes.

The respective merits of the Sixtine and Clementine editions have often been debated. In point of mechanical accuracy, the Sixtine seems to be clearly superior (Van Ess, p. 425 sqq.), but the Vulgate has allowed himself to be misled in the estimate which he gives of the critical value of the Sixtine readings. The collection lately published by Vercellone place in the clearness the strange and uncritical mode in which Sixtus dealt with the evidence and results submitted to him. The recommendations of the Sixtine correctors are marked by singular wisdom and critical tact; and in almost every case where Sixtus departs from them he is in error. This will be evident from a collation of the readings, in a few chapters, as given by Vercellone. Thus in the first four chapters of Genesis the Sixtine correctors are right against Sixtus i, 2; 27; ii, 18, 20; iii, 1, 11, 12, 17, 21, 22; iv, 1, 5, 7, 8, 9, 15, 16, 19; and, on the other hand, Sixtus is right against the correctors in i, 15. The Gregorian correctors, therefore (whose results are given in the Clementine edition), in the main simply restored readings adopted by the Sixtine book and rejected by Sixtus. In the book of Deuteronomy the Clementine edition follows the Sixtine correctors where it differs from the Sixtine edition: i, 4, 19, 31; ii, 21; iv, 6, 22, 28, 30, 33, 39; v, 24; vi, 4, 5, 6, 9, 3; xi, 3; xii, 11, 15, 16, etc.; and every change (except, probably, vi, 4; xii, 11, 12) is right; while, on the other hand, in the same chapters there are apparently only two instances of variation without the authority of the Sixtine correctors (xi, 10, 32). But in point of fact the Clementine edition errs by excess of caution. Within the same limits it follows Sixtus against the correctors wrongly in ii, 33; iii, 10, 12, 13, 16, 19, 20; iv, 10, 11, 29, 42; vi, 8; x, 3; xi, 26; and in the whole book admits in the following passages arbitrary changes of Sixtus: iv, 10; v, 24; vi, 18; xii, 15, 32; xviii, 10, 11; xxix, 23. In the New Test., as the report of the Sixtine correctors has not yet been published, it is impossible to say how far the same law holds good. It is not only to do injustice to the interpretations of the two editions in continuous passages of the gospels and epistles will show that the Clementine, though not a pure text, is yet very far purer than the Sixtine, which often gives Old Latin readings, and sometimes appears to depend simply on patristic authority (1 c. pp. II.):

SIXTINE. vocab. JUD. surg et accep. aproprinquabit (4). de quo dictum est (tol. II.). arboris (Tert.). it. unt. toliant (It.). Galileae (It. am. etc.). ambulabas (V.). nobis homines (gat. II.). abside (5). judicio. ethicn. auth. et non Judicemini. (nolite condemnare me. caput. veniet. om. super. scribae corum. om. ragobant ut. In Domino J. et dominacionem. voc. dicimil. quod. Spiritu. mihi. virtute. in. deorum homin. pp. II.). in. mundanes. in gloriosam. in praeparatione. in catena laxa. 3. Lateris.—While the Clementine edition was still recent, some thoughts seem to have been entertained of revising it. Lucas Brugenius made important collections for this purpose; but the practical difficulties were found to be too great, and the study of various readings was reserved for scholars (Bellarmin ad Lucum). At length the controversy gave a sanction to the authorized text. Many, especially in Spain, pronounced it to have a value superior to the originals, and to be inspired in every detail (comp. Van Esch, p. 401, 402; Hody, III, ii, 18); but it is useless to dwell on the history of such extravagances, from which the Jesuits, at least, following their great champion Bellarmin, wisely kept aloof. It was a more serious matter that the universal acceptance of the papal text checked the critical study of the materials on which it was professedly based. At length, however, in 1706, Martinaux published a new and, in the main, better, text, chiefly from original MSS., in his edition of Jerome. Vallarsi added fresh collations in his revised issue of Martinaux's work; but in both cases the collations are imperfect, and it is impossible to determine with accuracy on what MS. authority the text which is given depends. Sabatier, though professing only to deal with the Old Latin, has added so many important materials for the criticism of Jerome's version, and gave at length the readings of Lucas Brugenius (J748). More than a century elapsed before anything more of importance was done for the text of the Latin version of the Old Test., when at length the fortunate discovery of the original revision of the Sixtine correctors directed the attention of Roman scholars to their authorized text. The first-fruits of their labors are given in the volume of Vercellone, already often quoted, which has thrown more light upon the history and criticism of the Vulg., than any previous work. There are some defects in the arrangement of the materials, and it is unfortunate that the editor has not added either the authorized or corrected text; but still the work is such that every student of the Latin text must be deeply interested in it.

The neglect of the Latin text of the Old Test., as a consequence of the general neglect of the criticism of the Hebrew text. In the New Test. far more has been done for the correction of the Vulg., though even here no critical edition has yet been published. Numerous collations of MSS., more or less perfect, have been made. In this, as in many other points, Bentley pointed out the true character of the text, and with others has fought. His own collation of Latin MSS. was extensive and important (comp. Ellis, Bellini Critica Scaura, xxxv sqq.). Griesebach added new collations, and arranged those which others had made. Lachmann printed the Latin text in his larger edition, having collated the Codex Palaetina for the purpose. Tischendorf has labored among Latin
MSS., only with less zeal than among Greek. Tregelles has given in his edition of the New Test. the text of Cod. Amiatinus from his own collation with the variations of the Clementine edition. But in all these cases the study of the Latin was merely ancillary to that of the Greek text. Probably, from the great antiquity and purity of the Cod. Amiatinus and Fuldaenus, there is comparatively little scope for criticism in the revision of Jerome's version; but it could not be an unprofitable work to examine more in detail than has yet been done the several phases through which it has passed, and the causes which led to its gradual corruption.

A full account of the editions of the Vulg. is given by Masch (Le Long), Bibliotheca Sacra (1772-90). The variations between the Sixtine and Clementine editions were collated by T. James, Bellum Populæ, e. Concordia Discurse (Lond. 1600), and more completely, with a collation of the Clementine editions, by H. de Bukentop, Lux de Luce, III, 315 sq. Vercellone, correcting earlier critics, reckons that the whole number of variations between the two revisions is about three thousand (Proleg. xlviii, nota).

VI. Principal MSS. of the Vulgate.---These may briefly be enumerated as follows: 1. Cod. Amiatinus, of the middle of the 6th century, the oldest and best extant; in the Laurentian Library at Florence; it contains the Old Test., except Baruch, and the New Test.: the latter has been edited from it by Tischendorf (Leips. 1850, 4to). See AMIATINE MANUSCRIPT.

2. Biblia Gothicæ Tolosanae Ecclesiae, of the 8th century, containing all the books except Baruch (Vercellone, Var. Lect. i, 84).

3. Cod. Cavernas, of the 8th century, if not earlier; contains the Old and New Test.; belongs to the monastery of La Cava, near Salerno; examined by Tischendorf.

4. Cod. Paulianus, of the 9th century, wants Baruch; at Rome (Vercellone, loc. cit.).

5. Cod. Sturianus, Cod. Vallicellusianus, of the 9th century; at Rome (Vercellone, I. c.).

6. Cod. Ottobonianus, of the 8th century, contains the Octateuch; in the Vatican (Vercellone, I. c.).

7. Biblia Carolina, of the 9th century; wants Baruch, and the two last leaves are by a later hand; in the cantonal library at Zurich.

8. Biblia Bambergensia, of the 9th century, wants the Apocalypse; it has Jerome's Epistle to Paulinus prefixed in large uncials, the rest of the MS. is masculine; in this MS. 1 John v, 7 appears (Kopp, Bilder u. Schriften der Vorzeit, i, 184). 9. Cod. Alenius, of the 9th century, containing the Old and New Test. (except Baruch); supposed to be that offered to Charlemagne at his coronation; formerly in the possession of the recluses at Montier de Grandval, now in the British Museum (Addit. 10, 546).

10. A MS. on very clean parchment, probably of the 12th century; formerly at Alderford, now at Erlangen (Niederer, Nachrichten der Kirchen-, Gelehren- und Bücher-Geschichte, x, 125).

11. A MS. of the 13th century, described in Eichhorn's Repertorium, xvii, 183 sq.

12. Cod. Fuldaenus, of the 6th century, contains the New Test., with the gospels in the form of a harmony; used by Lachmann in his edition of the Latin subj ected to his Greek New Test.; a specimen was published by Ranke (Marb. 1860, 4to).

13. Cod. Forojellensis; contains the four gospels; edited along with fragments of Mark's gospel from the Prague MS. (previously edited by Dobrowski, Fragmentum Praeven. Er. S. Marci, etc. [Prag. 1778, 4to]), and other remains of the same gospel from MSS. preserved at Venice, by Bi anchini, Append. ad Evangel. Quadrupl.

gospels in Greek, with an interlinear translation; edited in fac-simile by Rettig (Turin, 1856, 4to). There is another Greek text, which belongs beyond the limits of the gospels, of the 6th century, described by Tischendorf in the *Deutsche Zeitschrift für christl. Wissenschaft*, 1857, No. 7, and esteemed by him of great value for the text of the Vulgate (Tischendorf, *Proleg.* p. 249 sq.). See *Gall. (St.) Manuscript.*

Besides these, many codices exist both in British and Continental libraries. See *Manuscripts, Biblical.*

VII. Critical Value of the Latin Versions.—1. In the Old Test.—The Latin Version, in its various forms, contributes, as has already been seen, more or less important materials for the criticism of the original texts of the Old Testament, and is therefore to be esteemed as unparalleled in the Septem of the 16th and 17th centuries, to prove the corruption of the Hebrew or Latin text, are commonly of little importance so far as the text is concerned. It will be enough to notice those only which are quoted by Whittaker, the worthy antagonist of the *Disputation on Scripture* (*Ed. Park Soc.* p. 163 sq.).

Gen. 1, 50, om. all green herbs (in Vet. L.): III. 15, psae conteret caput tunum. There seems good reason to believe that the original reading was *psae* (comp. Vercellone, ad loc.; Den. iv. 6. 18. 188. 189).

III. 17, in opere tuo. דְּרָקִים וְְנְרָקִים for דְּרָקִים וְנְרָקִים.

iv. 16, nos. which is specially noticed in Jerome's *Quast. Hebr.*

vi. 6, adit. et praecavens in futuro. The words are a gloss, and not a part of the Vulgate text.

vii. 14, venisse septimo for septimo dixisse. So Sept. vii. 15, exspectat viat. et non evanescat. The non is wanting in the best manuscripts of the Vulgate, and has been introduced from the Sept.

theologians; 8; III. 6, 14. 59; vi. 5, 13; xvii. 16, 18; xxi. 9; xxiv. 22; xxv. 34; xxvii. 13; xxix. 12; xxxiii. 5, 28; xiv. 23, contain differences of interpretation; and in xxvii. 34, xli. 45, the Vulgate appears to have preserved important traditional renderings.

2. In the New Test.—The examples which have been given show the comparatively narrow limits within which the Vulgate can be used for the criticism of the Hebrew Text. Some versions were made at a time when the present revision was already established; and the freedom which Jerome allowed himself in rendering the sense of the original often leaves it doubtful whether in reality a various reading is represented by the peculiar form which he gives to a particular passage. In the Vulgate, as in the Septuagint, one adopts a different view. In this the critical evidence of the Latin is separable into two distinct elements, the evidence of the Old Latin and that of the Hieronymian revision. The latter, where it differs from the former, represents the received Greek text of the 4th century, and so far claims a respect (speaking roughly) as does the *Matt. xxv. 27; 7, 23; 23, prophetæ; y, 22, om. sicut; ix. 15, lugere; John iii. 8, Luke ii, 33, ἐπὶ τοὺς; iv. 12. But not rarely he leaves a false reading uncorrected (Matt. ix. 28, robis; x, 42, ἐξενομήσατο; Matt. xxv. 29; x, 21, ἐξεκοπήσατο; John iii. 10, 4; 1 Pet. iii. 22, ἐκοπήσατο; John iii. 8, 16; vi. 64. Even in graver variations he is not exempt from error. The famous pericope, John vii, 53, viii, 11, which had gained only a partial entrance into the Old Latin, is certainly established in the Vulgate. The additions in Matt. xxvii. 31, are generally or widely received by Latin copies, and Jerome left them undisturbed. The same may be said of Mark xvi. 9-20; but the "heavenly te-
timony" (1 John v, 7), which is found in the editions of the Vulgate, is, beyond all doubt, a later interpolation, due to an African gloss; and there is reason to believe that the interpolations in Acts viii, 37; ix, 5, were really erased by Jerome, though they maintained their place in the mass of Latin copies.

Jerome remarks that the interpolations in the gospels was far more complete than that of the remaining parts of the New Test. It is, indeed, impossible, except in the gospels, to determine any substantial difference in the Greek texts which are represented by the Old and Hieronymian versions. Elsewhere the differences are so small as not to be worth mentioning.

On the other hand, there are passages in which the Latin authorities combine in giving a false reading: Matt. vii, 15; viii, 10; viii, 28 (?), etc.; Luke iv, 17; xii, 23, 27, 31, etc.; Acts ii, 30, 51, 57, etc.; 1 Cor. i, 15, 22, 27, etc. On the contrary, his commentators show that he used copies differing widely from the recension which passed under his name, and even expressly condemned as faulty in text or rendering many passages which are undoubtedly part of the Vulgate. Thus in his commentary on the Galatians he condemns the additions, i, 3d, versalit non osculare; v, 21, homicidia; and the translations, i, 16, necesse, and ii, 10a, furtum suscipit (for non est possit iussus sibi); v, 9, nudicium fermentum totam massam consumptum (for modicum fermentum totam conspiscit); vi, 11, evacuatust (for cessavit); vi, 3, sejusam (seipse) sedulit (for mensam suam decipit). In the epistles, in which he gives the liberty of quoting, there are rewards of fifty readings that differ from the best Vulgate text, of which about ten are improvements (iv, 21; v, 23; vi, 3; 15, 16, etc.), as many more inferior readings (iv, 17, 26, 30, etc.), and the remainder differences of expression: malo for negam, recto pede incidunt for rectus pede incidit. Wherever such differences are found in his commentaries on the other epistles: ad Ephes. i, 6; iii, 14; iv, 19; v, 22, 31; ad Tit. iii, 15. From this it can be evident that the Vulgate text of the Acts and the epistles does not represent the critical opinion of Jerome, even in the restricted sense in which this is true of the text of the gospels. But still there are some readings which may with probability be referred to his revision: Acts xiii, 18, nones correus sustinuit for nutrit (alait) eos; Rom. xii, 11, Domino for tempor: Eph. iv, 19, illuminabit et Christus for coniungas Christum; Gal. ii, 5, nega ad horam cessionas for ad horam cessiones; 1 Tim. v, 19, add. nisi sub duabus aut tribus testibus.

3. The Vetus Latina.—The chief corruptions of the Old Latin consist in the introduction of glosses. These, like the corresponding additions in the Codex Bezae (D1), are sometimes indications of the venerable antiquity of the source from which it was derived, and seem to carry us back to the time when the evangelical tradition had not yet been wholly superseded by the written gospels. Such are the interpolations at Matt. iii, 15; xx, 28; Luke iii, 22 (comp. also i, 46; xii, 38); but more frequently they are derived from parallel passages, either by direct transcription of the manuscripts of an earlier evangelist or by the reproduction of the substance of these. These interpolations are frequent in the synoptic gospels: Matt. iii, 8; Mark xvi, 4; Luke i, 29; vi, 10; ix, 46, 50, 54; x, 2; and occur also in John vi, 56, etc. But in John the Old Latin more commonly errs by defect than by excess. Thus it omits clauses certainly or probably genuine: iii, 31; iv, 9; v, 36; vi, 23; viii, 58, etc. Sometimes, again, the renderings of the Greek text are free: Luke i, 29; ii, 15; vi, 21. Such variations, however, are rarely likely to mislead. Otherwise the Old Latin text of the gospels is of the highest value. The Greek text of early manuscripts combine with this one or two of the other ancient witnesses to support a reading which has been obliterated in the mass of authorities: Luke vi, 1; Mark v, 8; xvi, 9 sq.; and not unfrequently it preserves the true text which is lost in the Vulgate: Luke xiii, 19; xiv, 5; xv, 28.

But the places where the Old Latin and the Vulgate have separately preserved the true reading are rare, when compared with those in which they combine with other ancient witnesses against the great mass of authorities. Every chapter of the gospels will furnish instances of this agreement, which is often the more striking because it is the result of a single source. It is found in the Vulgate, while the later copies have been corrupted in the same way as the later Greek MSS.: Mark ii, 16; iii, 25 (?); viii, 15, etc.; Rom. vi, 8; xvi, 24, etc. In the first few chapters of Matthew, the following may be noticed: i, 18 (in which the vss. vii, 4, 5, 11, 40, 44; vi, 5, 13, 16, 17, 18, 19, 10, 14, 29; etc., are used); ii, 32 (vss. 1, etc., are used); no less to multiply examples which occur equally in every part of the New Test.; Luke ii, 14, 40; iv, 2, etc.; John i, 52; iv, 42, 51; v, 16; viii, 59; xiv, 17, etc.; Acts ii, 30, 51, 57, etc.; 1 Cor. i, 15, 22, 27, etc. On the other hand, there are passages in which the Latin authorities combine in giving a false reading: Matt. vii, 15; viii, 10; viii, 28 (?), etc.; Luke iv, 17; xii, 23, 27, 31, etc.; Acts ii, 19, etc.; 1 Tim. iii, 16, etc. But these are comparatively few, and commonly marked by the absence of all Eastern corroboration of evidence. It may be impossible to lay down definite laws for the separation of readings which are due to textual corruption or carelessness, or glosses; but in practice there is little difficulty in distinguishing the variations which are due to the idiocycuracy (so to speak) of the version from those which contain real traces of the original text.

8. The text of the Latin versions. The question of the text of the original Latin and the haste of Jerome's revision, it can scarcely be denied that the Vulgate is not only the most venerable, but also the most precious, monument of Latin Christianity. For ten centuries it preserved in Western Europe a text of Holy Scripture far purer than that of any other Church, and at the revival of Greek learning guided the way towards a revision of the late Greek text, in which the best Biblical critics have followed the steps of Bentley, with ever-deepening conviction of the supreme importance of the coincidence of the earliest Greek and Latin authorities.

4. Of the interpretative value of the Vulgate little need be said. There can be no doubt that in dealing with the New Test, at least, we are now in possession of means infinitely more varied and better suited to the right elucidation of the text than could have been enjoyed by the original African translators. It is a task of no small importance, no less to the Church, and at the revival of Greek learning guided the way towards a revision of the late Greek text, in which the best Biblical critics have followed the steps of Bentley, with ever-deepening conviction of the supreme importance of the coincidence of the earliest Greek and Latin authorities.

VIII. Linguistic Character and Influence of the Latin Versions.—I. The characteristics of Christian Latinity
Among the characteristics of the late stage of a language must be reckoned the excessive frequency of compounds, especially those formed with the prepositions. These are peculiarly abundant in the Latin version, but occasionally in cases it is difficult to determine whether they are not directly translated from the Septuagint version, or are derived forms: e.g. adjectio, advenir -niti, ad venera те, ререкши, пермудвей, пропорков, предузелатель, предуздатель, пропорков, предузелатель, предуздатель, пропорков, предузелатель, пропорков, предузелатель, пропорков, предузелатель, пропорков, предузелатель, пропорков, предузелатель, пропорков, предузелатель, пропорков, предузелатель, пропорков, предузелатель, пропорков, preduzelatel', descrip, Vulg.; v. 18, cecuti ceunlyti, Vulg.; v. 34, quod contradicteor, Velt.,
VULGATE

VULGATE

ou contra Vulg.; ver. 49, in propria Patris mei, Vet. L., in his quin patriae mei est, Vulg. Some words he seems to have changed constantly, though not universally: e.g. cœnus to cœnus; accommodation (comitatus); diicto (dictatus); sacrumamentum (mysterium), etc. Many of the most remarkable forms are confined to books where they are peculiar: e.g. potius: fumigabundus, illuminitat, indiscipulatus, inseparabilis; esocrumamentum (exterrimentum), gaudimonium; ordinantia; honoribentia; horrivplatio, infrasecuritas.

2. Generally it may be said that the scriptural idioms of our common language have come to us mainly through the Latin; and in a wider view the Vulg. is the connecting-link between classical and modern languages. It contains elements which belong to the earlist stage of Latin, and exhibits (if often in a rude form) the flexibility of the popular dialect. On the other hand, it has furnished the source and the model for a large portion of current Latin derivatives. Even a cursory examination of the characteristic words which have been given will show how many of them, and how many corresponding forms, have passed into living languages. To follow out this question in detail would be out of place here; but it would furnish a chapter in the history of language, fruitful in results and hitherto unwritten. Within a more limited range the authority of the Latin versions is undeniable, though its extent is rarely realized. The vast power which they have had in determining the theological terms of Western Christendom can hardly be overrated. By far the greatest part of the current doctrinal terminology is based on the Vulg., and, as far as can be ascertained, was originated in the Latin version. Prostitution, justification, sanctification, salvation, mediator, regeneratio, revelation, visitation (met.), propitiation, first appear in the Old Vulg. Grace, redemption, election, reconciliation, satisfaction, inspiration, scriptures, were devoted there to a new and holy use. Sacramentum and communion are from the same source; and from the Greek, as from the Latin. It would be easy to extend the list by the addition of orders, papacy, congregation, priest. But it can be seen from the forms already brought forward that the Latin versions have left their mark both upon our language and upon our thoughts; and if the right method of controversy is based upon a clear historical perception of the force of words, it is evident that the study of the Vulg., however much neglected, can never be neglected with impunity. It was the version which alone they knew who handed down to the Reformers the rich storehouse of the Bible; the version which was the greatest of the Reformers, and from which they had drawn their earliest knowledge of divine truth.

In more important respects, likewise, the influence which the Latin versions of the Bible have exercised upon Western Christianity is scarcely less than that of the Sept. upon the Greek churches. But both the Greek and the Latin Vulgates have long been neglected. The revival of letters, bringing with it the study of the original texts of Holy Scripture, checked for a time the study of these two great bulwarks of the Greek and Latin churches. In England, in the reign of King Edward the Sixth, when the history of Christianity than to the history of Judaism—and, in spite of recent labors, their importance is even now hardly recognised. In the case of the Vulg., ecclesiastical controversies have still further impeded all efforts of liberal criticism. The Romanist (Catholic) and Protestant (Protestant) Churches, in their respective circles, have hardly given any serious attention to the Clementine edition. It has since undergone various alterations under the care of the Irish Roman Catholic hierarchy, and has been in some respects conformed to the A. V., even in passages which controversialists of a bygone age had stigmatized as heretical, according to the literal, chronological order of the verses from the text. The original translators, however, adhered so servilely to this as to employ such barbarous words and phrases as sordom (Mark xxv, 46), zealators (Acts xx, 20), premination (Eph. iii, 11), contritament (Eiv, 30), agnition (Philxm. 16), repriptation (Heb. ii, 17), with a view to the expression of the Latin in its indigenous style. In justice, it must be observed that no case of wilful perversion of Scripture has ever been brought home to the Rheinian translators" (Scrivener, Supplement to the Authorised Version). Mr. Scrivener adds that "the Rhe-
mih divines [who were evidently men of learning and ability] may occasionally do us good service by furnishing some happy phrase or form of expression which had else escaped the diligence of their more reputable predecessors" (ibid.).

The translators observe in their preface that they religiously keep the phrases word for word, "for fear of missing or restraining the sense of the Holy Ghost to the fantasia," in proof of which they refer to such phrases as St. 4 tima kai net, τέλος (John ii, 4) which they render "What to me and thee, woman?" explaining it in the note by the phrase "What hast thou to do with me?" But in some of the modern editions of the Rheims version this rule has been departed from and the text altered into "What is that to me or thee?" (Dublin ed. i, 742). The whole passage is thus rendered and commented on by Tittmann (Meletenutata Sacra): "Munum me fac, o mea, Leave that to my cares, good mother. It is not the language of reproof or refusal, but rather of consolation and promise. This appears from the words which follow, mine hour is not yet come." And me?"
The whole passage is thus rendered and commented on by Tittmann (Meletenutata Sacra): "Munum me fac, o mea, Leave that to my cares, good mother. It is not the language of reproof or refusal, but rather of consolation and promise. This appears from the words which follow, mine hour is not yet come."

But our Lord purposely delayed his assistance, that the greatness of the miracle might be better known to all. The appellation υἱός, which was employed by our Lord on other occasions also (John xix, 26, xx, 15), was very honorable among the Greeks, who were accustomed to call their queens by this title, and may be rendered "my beloved."

Prof. Moses Stuart (Commentary on the Apocalypse, i, 119) conceives that "in the translation of μεταϕορή by σατανάς (Matt. iii, 3), the same spirit which it was operating which led one part of the Church in modern times to translate μεταφορή by δεισυνεμεν. But the Latin phrase "agere penitentiem," which is also found in the old Italic, is evidently synonymous with μεταϕορή, "to repent." And agere penitentiem, says Campbell, "is not originally a mistranslation of the Greek υἱός, renders "me.""

Dr. Lingard (ut supr.) renders it "repent." We refer to one passage more, often objected to as proving that the Vulgate was altered to serve a purpose. In Heb. xx, 11, the Vulgate reads, as the translation of προσκύνησις ἐν τῷ ἐκτὸς τῆς βαβύλου αὐτοῦ: adoravit festigium virgine ejus, "worshipped the top of his hill."

If the present reading of the Hebrew נֵבַע (Gen. xlviii, 31) be correct, the Seventy, who read it נֵבַע, "a staff," or "a sceptre," must have been in error, and were followed by the Syriac. Tholuck (Commentary on Heb.) is of opinion that the Latin translators did not (as some suppose) overlook עלון, "upon," and he considers that this preposition with the accusative might easily lead to the acceptance in which it is taken by the Vulgate, which is also that adopted by Chrysostom and Theodoret, who explain the passage as if Jacob had foreseen Joseph's sovereignty, and gave a proof of his belief in it by the act of adoration in the direction of his sceptre. This is, in Tholuck's opinion, further confirmed by the generally spread reading adoravit (his), not adoravit (his own); and he doubts if any learned writer would have permitted himself so understand the passage in the Sept. as being the more significant. But should it be admitted, with Tholuck, that "the Protestant controversialists have very unjustly designated this passage of the Vulgate as one of the most palpable of its errors," it must be borne in mind that the learned fathers of the Greek and Latin Church, and Aquila follow the present reading; to which Jerome also gives a decided preference, observing (on Gen. xlviii, 31), "In this passage some vainly assert that Jacob adored the top of Joseph's sceptre; ... for in the Hebrew the reading is quite different. Israel adored at the head of it, "Parsavi Israel ad caput lacum."" See English Versions.

X. Literature.—The chief original works bearing on the Vulgate generally are, Simon, Histoire Critique du F. T. 1678–85; id. N.T. 1689–98; Hody, De Bibliorum Textibus Originalibus (Oxon. 1708); Martinian, Hieron. Orig. (Paris, 1698), with the prefaces and additions of Vallerius (Verona, 1734) and Maffei (Venice, 1767); Bianchinii (Bianchini, not Blanchini), Vindiciae Canon. S. S. Vulg. Lat. Edit. (Rome, 1740); Bukanpoo, Lux de Luce (Bruxellis, 1710); Sabatier, Bibl. S. Lat. Vers. Ant. (Remis, 1748); Van Ess, Pragmatika-krítische Gesch. des Vulg. (Thib., 1802); Verbrugge, Versch Lichtenbergs Vulg. Lat. Bibliorum (com. i, Rome, 1860; com. ii, pars prior, 1862).

In addition to these, there are the controversial works of Mariana, Bellarmine, Whitaker, Fulke, etc., and numerous essays by Calmet, D. Schulz, Fleck, Rieger, etc.; and in the New Text, the labors of Bentley, Santif, Griss, the Protestant controversialists, and others. Dorch have collected a great amount of critical materials. But it is not too much to say that the noble work of Vercellone has made an epoch in the study of the Vulgate, and the chief results which follow from the first instalment of his collations are here for the first time incorporated in his history. See: Gesch. des der Vulgata (Sulzb. 1820); Brunati, De Vulgata (Vian. 1825); Kaulen, Gesch. der Vulgata (Mentz, 1869); Rüscher, Ital. und Vulgata (Marb. 1869). See Latin Versions.

Vulgivâsca, in Roman mythology, is a surname of Venus, as the lowly, in contrast with Urania, the heavenly. She favored the longings and desires of men which were wrongfully designated by the name of love.

Vulgate is the rendering, in the A. V., of two Heb. words: 1. נֵבַע, only (in Lev. xi, 14; Sept. νεῖ dept.; Vulg. miluius; the parallel passage, Deut. xiv, 13, has in the corresponding position נֵבַע, which may be an erroneous transference: Sept. νεῖ dept.; Vulg. isom; A. V. "glede"); or נֵבַע, дняדכ only (Deut. xiv, 13; רבד; Vulg. niwebus; Isa. xxxiii, 34; λασσομ; miluius); and 2. נֵבַע, only in Job xxxviii, 7; γυν; cultur; Lev. xi, 14; רבד; vulg. A. V. "kite." Deut. xiv, 13, Sept. omitis; Vulg. miluius; A. V. "kite.")

I. There seems to be no doubt that the A. V. translation is incorrect, and that the original words refer to some of the smaller species of raptorial birds, as kites or buzzards. נֵבַע (dayâh) is evidently synonymous with Arab. ְזָדַח, the vernacular for the "kite" in North Africa, and without the epithet "red" for the black kite especially. Bochart (Hieroz. ii, 193) explains it Pulvur niger. The Samaritans and all other Eastern versions agree in rendering it "kite." נֵבַע (oydâh) is yet more certainly referred to this bird, and, in other passages, it is right to represent. Bochart (ibid. ii, 193) says it is the same bird which the Arabs call qâpa from its cry; but does not state what species this is, supposing it, apparently, to be the magpie, the Arab name for which, however, is el-agaaq.

There are the bed different species of birds comprised under the English term vulture: the griffon (Gypus fulvus, Sav.), Arab. mereb; Heb. נֵבַע, nasher; invariably rendered "eagle" in the A. V.; and the percnoptor, or Egyptian vulture (Neophron percnopterus, Sav.), Arab. rakâm; Heb. דֶּבֲרָד, râchâm; rendered "gier-eagle" in the A. V. The identity of the Hebrew and Arabic terms in these cases can scarcely be questioned. However degrading the substitution of the ignoble vulture for the "real eagle" at the sight applies to the passages, it must be borne in mind that the griffon is in all its movements and characteristics a majestic and royal bird.
animals. It is therefore never molested by the natives, and builds its nest on trees in their neighborhood, fantastically decorating it with as many rags of colored cloth as it can collect. See GLAUX.

II. There are three species of so-called vulture known to inhabit Palestine:

1. The Lammergeyer (Gypaetus barbatus, Cuv.), which is rare everywhere, and only found in desolate mountain regions, where it rears its young in the depth of winter among inaccessible precipices. It is looked upon by the Arabs as an eagle rather than a vulture; for, though properly neither a vulture nor an eagle, it is the largest bird of prey of the old continent, and is armed, like the eagle, with formidable claws. The head is wholly feathered; its courage is equal to its powers; and it has a strength of wing probably superior to all raptors, excepting the condor. It is consequently found, with little or no difference, from Norway to the Cape of Good Hope, and from the Pyrenees to Japan. This is perhaps the black species, which is often figured on Egyptian monuments as the bird of victory, hovering over the head of a national hero in battle, and sometimes with a banner in each talon. See OSTRICH.

2. The Griffon (Gyps fulvus, Sav.), mentioned above, remarkable for its power of vision and the great height at which it soars. Aristotle (Anim. Hist. vi. 5) notices the manner in which the griffon scents its prey from afar, and congregates in the wake of an army. The same singular instinct was remarked in the Russian war, when vast numbers of this vulture were collected in the Caesars, and remained till the end of the campaign in the neighborhood of the camp, although previously they had been scarcely known in the country. “Wheresoever the carcass is, there will the eagles be gathered together” (Matt. xxiv. 29). “Where the slain are, there is she” (Job xxxix. 30). Travellers have observed this bird universally distributed in all the mountainous and rocky districts of Palestine, and especially abundant in the south-east. Its favorite breeding-places are between Jerusalem and Jericho, and all round the Dead Sea.

the largest and most powerful which is seen on the wing in Palestine, and far surpassing the eagle in size and power. Its only rival in these respects is the bearded vulture, or Lammergeyer, a more uncommon bird everywhere, and which, since it is not, like the griffon, bailing on the head and neck, cannot be referred to as nisheher (see Mic. i. 16). Very different is the slowenly and cowardly Egyptian vulture (Neophron percnopterus), the familiar scavenger of all Oriental towns and villages, protected for its useful habits, but bathed and despised, till its name has become a term of reproach, like that of the dog or the swine. The species of vulture, properly so called, have the head naked or downy, the crop external, and very long wings; they all have an offensive smell, and we know of none that even the scavenger-ants will eat. When dead they lie on the ground untouched till the sun has dried them into mummies. Late Western commentators, anxious to distinguish eagles from vultures, have assumed that the first-mentioned never feed on carcases; and, judging the whole family of vultures by the group of carrion-eaters alone, have insinuated that the latter do not attack a living prey. In both cases they are in error; with some exceptions, eagles follow armies, though not so abundantly as vultures; and vultures attack living prey provided with small means of defence or of little weight; but their talons having no means of grasping with energy, or of seriously wounding with the claws, they devour their prey on the spot, while the eagle carries it aloft, and thence is more liable to be stung by a serpent not entirely disabled than the vulture, who crushes the head of all reptiles it preys upon. See EAGLE.

If we take the Heb. ayâd to refer to the red kite (Milvus regulus, Temm.), and doyâd to the black kite (Milvus ater, Temm.), we shall find the piercing sight of the former referred to by Job (xxviii. 7), and the gregarious habits of the latter by Isaiah (xxxiv. 15). Both species are inhabitants of Palestine, the red kite being found all over the country, as formerly in England, but nowhere in great numbers, generally soaring at a great height over the plains, according to Dr. Roth, and apparently leaving the country in winter. The black kite, which is so numerous everywhere as to be gregarious, may be seen at all times of the year hovering over the villages and the outskirts of towns, on the lookout for offal and garbage, which are its favorite food. Vultures, like it seldom, unless pressed by hunger, attacks living

3. The third species is the above Egyptian vulture (Neophron percnopterus, Sav.), often called Pharaoh's hen, observed in Palestine by Hasselquist and all subsequent travellers, and very numerous everywhere.

Two other species of very large size, the crested and cinereous vultures (Vultur indicus, Smith, and Vultur cinereus, L.) although inhabitants of the neighboring countries, and probably also of the south-east of Palestine, have not yet been noted in collections from that country.

Most of the above-named species are occasionally seen in the north of Europe. The voice varies in

W.

WAJEN (or WAASSEN, or WAENEN), HANS VAN DER (1), a Dutch theologian, was born at Amsterdam, Jan. 12, 1683. He began his studies at Utrecht, whence he proceeded successively to Heidelberg, Geneva, and Basle, and returned in 1662 to his native country, as doctor of divinity, to preach in Spremendam. In 1665 he was called to Leuwarden, and in 1672 to Middelburg, but in 1677 he was forced by the intrigues of William Momsa to retire from the latter place. The same year he was made professor of Hebrew in Franeker, to which office he added (in 1689) that of university preacher and state historian. He resided with the prince of Orange as councillor until his death, Nov. 4, 1701. He enjoyed the reputation of being one of the first controversialists of Holland, and wrote, Summa Theologiae Christianae, etc. — Eucharistia Theologia Christiana. — Die Antiquitate Liturgiae Judaicae, etc. — bibliis Veritatis et Ratione de Verbo Dei, Libro Ritu- tangulari Occeserit: — De hexa Dissertatio contra Clericum, etc. See Vriemoot, Acta Academiae Philosophorum; Jücher, Allgemeines Gelehrten-Lexikon, s. v.; Fürst, Bibl. Jud. iii, 490; Biographische Universelle, s. v. (B. P.)

WAJEN, HANS VAN DER (2), son of the preceding, was born Oct. 20, 1677, at Middelburg, and succeeded his father in his literary and clerical positions. He died Dec. 9, 1716, leaving no original works. See Biographische Universelle, s. v.

WAAS, or WAST, LAT. VEDASTUS, ST., a French ecclesiastic, was born, according to some, on the borders of Perigord and Limouisin, and, according to others, at Toul. After living a hermit life near the latter place, he was ordained as priest by its bishop and made catechist of Clovis, who had just embraced Christianity (496). That prince took him to Rheims and recommended him to Remi, who nominated him as bishop of Arras (about 499), and afterwards of Cambrai (about 510). He abolished the idolatrous customs of both sees, and built churches, etc. He died at Arras, Feb. 6, 540. See Hoefer, Nouv. Biog. Générale, s. v.

WABST, CHRISTLIER GOTTVALD, a Lutheran theologian of Germany, was born Oct. 14, 1684, at Dresden. He studied at Wittenberg, was appointed deacon at Oederan in 1726, pastor at Döbelin in 1738, superintendent at Rochlitz in 1735, where he died, June 25, 1748, having in 1737 been honored with the doctorate of divinity by the Wittenberg University. He wrote, Täglicher Denkansel in geistlichen Betrachtungen: — Disputatio de divina esse in nanum Mysticalum et Mysticalum Actu: — De Intellucro Humano contra Jo. Lockhm. See Neue Zeitungen von gelehrten Sachen: Jücher, Allgemeines Gelehrten-Lexikon, s. v. (B. P.)

WÄCHLER, LUDWIG, a Protestant theologian of Germany, was born April 15, 1767, at Gotha. In 1790 he was rector at Herford, in 1794 professor of theology at Rinteln, in 1802 professor of history at Marburg, and died April 4, 1838, at Breslau, as member of consistory and professor of history. He wrote, Die Patriser Blüt, hochzeit (Leips. 1826) — Müncher's Leben u. nachgelassene Schriften (Frankfort, 1817) — Dissertatio Inauguralis de Pseudo-Philoide (Rinteln, 1788). See Fürst, Bibl. Jud. iii, 488; Winer, Handb. der theolog. Lit. i, 10, 161, 537, 892, 985. (B. P.)

WACHTER, JOHANN, a Protestant theologian of Germany, was born in 1768. In 1807 he was appointed evangelical member of consistory and superintendent at Vienna; in 1819 he became director of the Protestant Lutheran Seminary; and died April 26, 1827. In connection with K. Clemenmann, he published Allgem. prakt. Bibliothek für Prediger u. Schulschulen (Vienna, 1801—3, 2 vols.). His own Sermons were published after his death by some friends (ibid. 1828, 2 vols.). See Winer, Handb. der theolog. Literatur, ii, 37, 143. (B. P.)

WÄCHTLER, JAKOB, a Lutheran theologian of Germany, was born at Grimma, Sept. 17, 1688. He studied at Wittenberg, where, in 1666, he became adjunct to the philosophic faculty. In 1686 he was appointed arch-deacon at Oeschatz, and in 1679 superintendent at Gomern. For the same position he was called in 1687 to Bietzg, and in 1698 created doctor of divinity, and died Nov. 4, 1702. He wrote, Chiliasmus Vanitatis Demonstratio contra J. Spernum: — De Cathedra Confessioni contra Jer. Paschala, etc. See Pippin, Memoriae Theologorum; Ranft, Leben der churæsächsichen Gottesgelehrten; Jücher, Allgemeines Gelehrten-Lexikon, s. v. (B. P.)

WACK, CASPER, a German Reformer minister, was born at Philadelphia in 1792. He began the study of theology under Dr. Weyberg in his eleventh year, and received calls to the age of eighteen to the ministry. He was ordained as deacon at Oeschatz, and in 1679 superintendent at Gomern. For the same position he was called in 1687 to Bietzg, and in 1698 created doctor of divinity, and died Nov. 4, 1702. He wrote, Chiliasmus Vanitatis Demonstratio contra J. Spernum: — De Cathedra Confessioni contra Jer. Paschala, etc. See Pippin, Memoriae Theologorum; Ranft, Leben der churæsächsichen Gottesgelehrten; Jücher, Allgemeines Gelehrten-Lexikon, s. v. (B. P.)

WACK, CHARLES P., a (Dutch) Reformed minister, grandson of Casper Wack, graduated at the New Brunswick Theological Seminary in 1829. He was pastor at Caroline, N. Y., in 1831; Bellona from 1831 to 1835; Lebanon, N. J., from 1835 to 1840; Trenton (First Church) from 1841 to 1844; German Reformed Church, at the same place, from 1845 to 1852. He died in 1866. He left a large amount of MS. containing sketches of prominent ministers of the Reformed (Dutch) Church, which was used by Mr. Sprague in the preparation of

Wack, George, a minister of the German Reformed Church, was born in Bucks County, Pa., March 1, 1776. After having pursued a course of classical studies, he was taught theology by his father, then pastor in Rockaway, N. J. He was licensed and ordained in 1801. In 1802 he became pastor of churches in Montgomery and Bucks counties. In this charge he spent a long life. In 1846, in the seventyfifth year of his age, he was compelled by increasing infirmities to resign the active duties of the ministry. He died Feb. 17, 1856, after a ministry of fifty-nine years. He was a man of great simplicity of heart, which with age made him a patriarch in the Church. He was able to preach in German and English.

Wack, John J., an American minister of the German Reformed Church whose churches finally joined the Dutch communion, was born in Philadelphia, June 14, 1774, and studied theology with his brother, Casper Wack. He was pastor at Amwell, N. J., from 1798 to 1808; supplied Knowlton and Hardwick from 1798 to 1808; pastor at Canajoharie and Stone Arabia, N. Y., from 1799 to 1810; suspended an account of immorality and pro-

Wackernagel, Karl Eduard Philipp, a German Protestant hymnologist of great note, was born at Berlin, June 28, 1800, where also he studied natural sciences and philology. In 1820 he was promoted at Erlangen as doctor of philosophy, and in 1861 the University of Breslau conferred upon him the degree of doctor of divinity. He died June 29, 1877, at Dresden, where he had resided from 1860. Wackernagel was a member of different learned societies of Germany and Holland. Besides a number of works on mathematics and natural sciences, he published very important contributions to German hymnology, which made him an authority in that department. He wrote, Das deutsche Kirchenlied (Stuttgart, 1841); —Bibliographie zur Gesch. d. deutschen Kirchenliedes im 16. Jahrhundert (Frankfort-on-the-Main, 1855); —Lieder der niederrätsländischen Reformirten aus der Zeit der Verfolgung im 16. Jahrhundert (1867); —Das deutsche Kirchenlied von den ältesten Zeiten (Cottbus, 1869). Besides he published in his works the hymns of Paul Gerhard, Martin Luther, and Johann Herrman. See Zuchold, Bibl. Theol. ii, 1408; Theologi-

Waddel, James, D.D., a Presbyterian divine, celebrated for his eloquence, and immortalized by the pen of William Wirt as the "Blind Preacher," was born at Newry, in the North of Ireland, in July, 1739. He came with his parents at an early age to America, was educated at Dr. Finlay's Nottingham Academy, studied theology with the Rev. John Todd, was licensed to preach by the Presbytery of Hanover April 2, 1761, and was ordained and installed pastor of the churches at Lancaster and Northumberland, Pa., Oct. 7, 1762. In 1778 he took charge of the Tinkling Spring congregation, Va.; in 1788 he organized a congregation at Staunton, to whom he preached on alternate Sabbaths; in 1785 he removed to Louisa County, Va., to an estate which he purchased, and while there he lost his sight from cataract, but still continued to preach. It was during this period that Mr. Wirt was thrilled by his eloquence in the secluded little church in Orange County. In 1792 the degree of D.D. was conferred upon him by Dickinson College, Pa. He died in great distress, Sept. 17, 1816. The text of this letter is: Dr. Waddel's surpassing eloquence is numerous and unques-

Waddington, Edward, D.D., an English prelate, was bishop of Chichester from 1724 until his death, in 1731. He published some Sermons in 1718, 1721, and 1729.

Waddington, George, D.D., an English divine, traveller, and historian, was born Sept. 7, 1759. He was educated at the Charter-house, London, and Trinity Col-

Waddington, Moses, D.D., a Presbyterian divine, was born in Tredell County, N. C., July 29, 1770. He received a good academic education, graduated at Hamp-

Waddell, Moses, D.D., a Presbyterian divine, was born in Tredell County, N. C., July 29, 1770. He received a good academic education, graduated at Hamp-

Waddell was distinguished as an instructor. He may be justly considered as the father of classical education in the upper country of South Carolina and Georgia. As a Christian, his character was unexceptionable. He was active and constant in the discharge of his ministerial duties, and he shrank from no labor which his ecclesi-

Waddesden (or Goddames), Adam, D.D., an English Franciscan of Norwich, was professor at Oxford. He died in 1584. His Commentary on the Sentences was published at Paris in 1512. See Mosheim, Hist. of the Church, bk. iii, cent. xiv, pt. ii, ch. ii.

Waddesdon, Luke, a Roman Catholic ecclesiast, was born at Waterford, Ireland, Oct. 15, 1568. He studied theology in Portugal; joined the Franciscan Order in 1605; became professor of divinity at the University of Salamanca; removed to Rome in 1618, where he founded in 1625 the College of St. Isidore for Irish Franciscans; took part with the Jansenists in the famous controversy of that name, but retracted his views upon the publication of the papal bull of condemnation; and was procurator of the Franciscans at Rome from 1630 to 1641; and vice-commissary from 1645 to 1648. He died at Rome Nov. 18, 1657. Among his works are, The History and Bibliography of the Franciscans in the Annales Ordinis Minorum: an edition of the Works of Duns Scotos: and Scriptores Ordinis Minorum.

WADDE, Benjamin, D.D., a minister of the United Presbyterian Church, was born in Ohio County, Va., June 2, 1802. At twenty-one years of age he commenced making preparation for the ministry. He received his classical education at Wheeling Academy. After the solicitation of Rev. Dr. Samuel Findley, he went to Washington, D.C., to assist him in a grammar-school. In November, 1826, he entered the theological seminary at Pittsburgh, Pennsylvania; he graduated, and was licensed to preach at Washington April 26, 1828, and accepted a call to Jonathan Creek, Rush Creek, Thornville, and Zanesville, and the following May was ordained. He remained over this charge seven years, when he accepted a call to Oxford Creek, where his labors were greatly blessed. He remained there six years, during which time he was instrumental in founding Muskingum College. He was sent with Dr. Findley as missionary to Indiana, Illinois, Iowa, and Missouri. In 1838 he labored as a missionary at Chicago. In 1839 he took charge of a Church in Kenton, Ohio, which he remained until 1871, when he was invited by the friends of the Bible to become a common-schools to represent Hardin County in the Legislature of Ohio. He rendered satisfaction to his constituents, and maintained his character as a minister in his somewhat doubtful position. His name was a synonym of goodness. He died at Kenton in 1879. (W.P.S.)

Waddy, Samuel Douthland, D.D., an English Wesleyan Methodist minister, was born at Burton-on-Trent, Aug. 8, 1804. He was educated at the Wesleyan Academy, Woodhouse Grove, Yorkshire (1813 to 1819). In 1820 he was apprenticed to a linen-dyer in London—in an occupation uncongenial, and to a master unscrupulous. He and his fellow-apprentice—the late Samuel Warren, M.D., LL.D., author of "Memoirs of the Life of Dr. George Whitefield," and Samuel Warren, famous in Methodist history—had to sleep on the floor under the shop counter; and on account of his refusal to be implicitly in the dishonesty of his master, young Waddy was soon banished to sell goods in a damp, cold, underground department, where, no customers appearing, he commenced, by the aid of a flickering lamp, the study of medicine. His indomitable spirit was leading the way to eminence as a medical man, when his conversion (1822) gave him to the ministry (1825). His charges were Cambridge, Lynn (1826), Birmingham (1827), Gateshead (1829), Northampton (1831), Sheffield (1836), Hull (1840), Bath (1841), governorship of Wesley College, Sheffield—an institution which he had founded, and now saved—(1844-62), Chelsea (1862), Lambeth (1865), and Clifton, Bristol (1867). In 1842 he publicly opposed Sir James Graham's Factory Education Bill, and received the thanks of the Lords. During the years 1843 he had the honor of being rescued from the wreck of the "Queen," on her way to Dublin, a thrilling account of which he published in London, and reprinted in his Life. The following spring he was again sent to Ireland on a missionary deputation. In 1859 he was elected president of conference, and received his pension from Wesleyan University, Conn. For many years he was treasurer of the Children's Fund. In 1870 Dr. Waddy became supernumerary, and retired to Redland, Bristol. Like dean Swift, he "died at the top." The intellect, too active in life, lost its cunning, the memory its power. Finally, the great spirit passed away, Nov. 7, 1876.

"Seldom has a man been intrusted with an intellect at once so strong and so sprightly; seldom have the earnest student, the powerful preacher, and the effective administrator been so happily united in the same person. Waddy was a great and noble man, of strongly marked individuality, strict integrity, and high-toned honor, admirable alike in public and private life" (Minutes, 1877, p. 18). In a beautiful and masterly memorial, an inimitable piece of characterization, Rev. William Arthur thus speaks of Dr. Waddy as a preacher: "Those who best know and estimate his qualifications, best knew that the gravity, depth, and elevation, which took up the whole man when he appeared in the pulpit, were as spontaneous as the rest. He was not now the friend among friends, but the servant in the presence of his Master, whose greatness and whose goodness put him and all his fellow-servants to shame, and, at the same time, gave them cause for adoration, of which the deepest tone can never fully note the depth. He was now a messenger fraught with words of import, and bound to make their sense understood and their weight and urgency felt. Then did thought sit supreme in every chamber of the breast, and look out from the most meek, most modest, most fervent, most pungent honesty of every window of the countenance. Calm, strong, reverent, and original; acute, lofty, rich, and often deep, he unfolded his Master's message, and laid his Master's will upon the soul" (see Life, p. 342 sq.). "Dr. Waddy was the brightest and most vivid of men in society. No one that ever passed a free hour in social intercourse with him could believe that even Sydney Smith was a wittier man or uttered more, or more pungent or more brilliant, mots. Every sentence sparkled; every repartee flashed. Now graceful, now caustic, now irresistibly comic and grotesque, the play of his wit was incessant and inexhaustible" (Dr. J. H. Riggs). "Like the flashing of steel, it never gave an impression of less than the strength of steel" (Arthur). "His humor was always brilliant, never cruel; like the flame of a diamond, bright but not burning" (Simpson, in N. Y. Christian Advocate, Nov. 18, 1880).

Of Dr. Waddy's writings there were published, Exeter Hall Lecture on Sincerity (Lond. 1858):—Ex-presidential Charges (ibid. 1860)—a volume of Sermons, issued by his family:—and several Addresses, Letters, etc., preserved in his Life. See particularly a Letter to the London Times (Sept. 8, 1849) in defence of the action of the Conference, of George Whigam, G.C., in respect to the ACC, (pp. 290-291); and a Lecture on Popery (p. 364-405, Appendix). Waddy, like most of the British Wesleyan divines, could see no good in the Roman Catholic Church. He closes this able lecture with a highly rhetorical and unlimited denunciation of the hated Church, a denunciation repugnant alike to fact and charity. Dr. Waddy was the brother of Rev. Benjamin B. Waddy, and father of Samuel D. Waddy, Q.C., a prominent Liberal member of Parliament, and of Rev. John T. Waddy, of the British Conference. See Minutes of Conference (Lond. 1875), p. 17; Life of S. D. Waddy, D.D., by his youngest daughter (ibid. 1878, 12mo), a beautiful and admirably written biography; Stevenson, Hist. of City Road Chapel, p. 226.

Wade, Alpheus, a Methodist Episcopal minister, was born at Pawlet, Vt., June 14, 1801. He was converted when about nineteen, and licensed as a local preacher in 1821. In 1838 he joined the Troy Conference, and was appointed to the Luzerne Circuit. Subsequently he was sent to Tiadencias, to Otsego, to Wallingford, Shelton, and Monkton, Vt.; Northampton, N. Y. In 1847 he was supernumerated, and in 1852 was supernumerated. He died at Amsterdam, N. Y., July 26, 1868. See Minutes of Annual Conference, 1869, p. 117.

Wade, Deborah B. Lapham, an eminent Bap-
tastic missionary, wife of Rev. Dr. Jonathan Wade, was born in Nelson, N. Y., June 10, 1801. She sailed for Burmah, the field of Christian labor to which she and her husband had been designated by the Baptist Triennial Convention, June 22, 1828, and arrived at Calcutta Oct. 19, and Rangoon Dec. 5, of the same year. Soon after they reached their station, the first Burmese war broke out, and Mr. and Mrs. Wade took up their residence in Doorgapooore, about five miles from Calcutta. Here they gave themselves to the work of studying the Burmese language and fitting themselves for the missionary labor upon which they proposed to enter whenever the providence of God should prepare the way. In 1826, the war having ended, they returned to Burmah, and took up their residence at Amherst, in the month of November. Mrs. Wade devoted herself for a time to the care of the infant left by the first Mrs. Judson, and on its decrease she established and superintended a school for Burmese girls, and performed missionary labor among the Burman women. Amherst not proving to be so hopeful a place for missionary work, Mr. and Mrs. Wade removed to Maulmain, and in 1830 to Rangoon. Subsequently they went to Mergin. In all these different stations she devoted herself with that fidelity and perseverance to the work which she had undertak- en. We have read of but few persons who were more thoroughly consecrated to the service of their Master, and lived as if immediately in his divine presence. She returned to the United States in 1856 on account of ill-health of her husband. While she was absent, her presence was an inspiration, and she was the means of arousing the deepest interest in the cause of foreign missions. She spent a year and a half in her native land, and then returned to the sphere of her labor, once more to devote herself to the service of her Lord. What she accomplished during the next ten years cannot be told in a sketch so brief as this. The records of the final day, alone, will disclose it. The health of her hus- band again broke down, and she once more went back to her native land, reaching Boston July 31, 1848, and remaining in her home the remaining ten years; as useful, per- haps, at home as she had been on foreign shores in the great work to which she had consecrated all her faculties. On July 25, 1850, she again set sail for the East, and in due time stood once more on the soil of Burmah. Her missionary labors were carried on in Maulmain and Ta- toy with the same energy within a few months of the close of her life. Some time before the end of her toils was reached, she wrote to a friend, "We are old, very old, for India; and we live daily looking for the bright messenger to call us home. The dear and more and more lamented Judson once exclaimed, when near the heavenly shore, 'Oh, the love of Christ! What a beautiful study for etern- ity!' And for some time past I have had views, as never before, of the length and breadth, and height and depth, of the riches of the grace of God through Christ our Saviour; and often does my heart exclaim, 'What a beauti- ful, what a sublime study for eternity!'" The anticipated close of life came, and she entered the better world Oct. 5, 1868. She occupies a conspicuous place among the ablest and most devout female missionaries of modern times. See Baptist Missionary Magazine, xlix, 9994. (J. C. S.)

Wade, John, a Congregationalist minister, was born at Ipswich, Mass. He graduated from Harvard College in 1803; was ordained pastor of the church in Berwick, Me., in November, 1792; and died in 1793. See Sprague, Annals of the Amer. Pulpit, i, 189.

Wade, Jonathan, D.D., a distinguished Baptist missionary, was born in Otsego, N. Y., Dec. 10, 1798. He pursued his studies at Dartmouth College, and was ordained at Broadalbin, N. Y., Feb. 18, 1823; set apart as a missionary to Burmah the following May, and arrived at Rangoon in December of the same year. The war between Burmee and the English seriously deranged missionary operations. In 1827 the mission was removed to Maulmain, where Mr. Wade labored until, in 1831, he began missionary work in Arracan. His mis- sionary life, which was crowned with abundant success, covered a period of fifty years. Twice he visited his native land, in 1822 and 1847. Just before leaving the last time for the scene of his labors in the East, he said, "I have lived to see the baptism of fifteen thousand." He died at Rangoon, Burmah, June 10, 1872. See the N. Y. Examinor and Chronicle. (J. C. S.)

Wade, Joshua, an English Wesleyan minister, was born near Leeds in 1792. He was converted when fourteen years old; was sent in 1815 to Linkeard, his first charge; became a supernumerary at Banwell in 1844; removed to Kilhampton in 1845; and died at Tamariscote, near Plymouth, Oct. 24, 1874. Distingu- ished success marked his labors in some circuits. See Minutes of Wesleyan Conference, 1860.

Wadraikali (Pattugali, Bhatrigali, Pagodon), in Hindú mythology, is a powerful goddess, a daughter of Siva, born in his middle eye by the power of Vishnu. She conquered the giant Darida, who could not be slain by any man; and she even became dangerous to her own father, who hid himself in the sea when she re- turned from her combat with the great demon.

Wadsworth, Benjamin (1), D.D., an American Congregationalist minister, uncle of John W. (below), was born at Milton, Mass., in 1669. He graduated at Harvard College in 1690; was ordained in 1698, and preached at Andover, 1699-1702, and at Andover, Mass., until his death, which occurred March 16, 1787. He published numerous Sermons and theological works. See Sprague, Annals of the Amer. Pulpit, iv, 220.

Wadsworth, Benjamin (2), D.D., a Congregationalist minister, was born at Milton, Mass., July 17, 1730; graduated at Harvard College in 1758, and was ordained Dec. 31, 1758, at Davenport, Conn. He was president of Harvard College from 1725 until his death, which occurred Jan. 18, 1786. He published, Elegy on Washington (1800)— and several occasional Sermons. See Sprague, Annals of the Amer. Pulpit, ii, 31.

Wadsworth, George, an English Wesleyan preacher, was sent out by the conference in 1770. He was a plain, pious man, and for twenty-five years labor- ed in the vineyard. In 1797, being afflicted with the palsy, the conference, in the active vigor of his years, took him from his labors. He died June 12, 1797. See Atmore, Meth. Memorial, n. v.

Wadsworth, John W., a Congregationalist min- ister, was born at Milton, Mass., Aug. 6, 1708. He was the grandson of captain Samuel Wadsworth, who fell at Bloody Brook. He graduated at Harvard College in 1723; was ordained at Canterbury, Conn., in 1729; and resigned in 1741 on account of a charge of immoral con- duct brought against him. He retired to his native home, preached occasionally, and died there June 15, 1766. Tradition says that his death took place in the pulpit immediately after he had read a hymn contain- ing this verse:

"Hosanna, with a cheerful sound,
To God's upholding hand:
Ten thousand tongues raise a round,
And yest secure we stand;"

See Cong. Quar. 1859, p. 368.

Wadsworth, Lemuel, a Congregationalist min- ister, was born at Stoughton, Mass., in 1769. He gradu- ated from Brown University in 1788; was ordained pastor in Raby; now Brookline, N. H., Oct. 11, 1797; and died Nov. 25, 1817. See Sprague, Annals of the Amer. Pulpit, ii, 417.

Wadsworth, Samuel, a Congregational min- ister, brother of John W. (above), was born at Milton, Mass., July 23, 1779. In 1747 he was ordained over the Separate Church in Killingly (South), Conn., where he preached until his death, in 1762. He was "a man of an excellent gift in prayer, his conduct extraordinary..."
vily religious, and his conversation very heavenly." See Cong. Quar. 1861, p. 184.

Wadsworth, Thomas, an eminent Nonconformist divine, was born at St. Saviours, Southwark, England, in 1630, and educated in Christ's College, Cambridge. In 1652 he was appointed minister of Newington, in London. He spent his time and a great part of his fortune. He lectured occasionally in various city churches, and was finally chosen to the living of St. Lawrence Pountney, whence he was ejected at the Restoration. He afterwards practised privately at Newington, Theobalds, and Southwark, for which he received no compensation. He died Oct. 29, 1676. He published various pious treatises.

Wadsworth, William A., a Methodist Episcopal minister, was born at New Hartford, N. Y. He declined a flattery business offer when he entered the ministry; officiated some time as local preacher; studied theology in Boston University; and in 1855 joined the Oneida, now Wyoming, Conference; serving as pastor at Vernon Centre, Mount Upton, Norwich, Unadilla, and Cooperstown. He died March 9, 1875. Although Mr. Wadsworth was not a showy or brilliant speaker, yet his sound, instructive, practical sermons and discourses were highly valued by all. In time the daily life he was peculiarly affectionate, faithful, and exemplary. See Minutes of Annual Conferences, 1875, p. 60.

Waehrwolf, in Scandinavian mythology, is a spiritual being who still creates fear in many people's minds. Superstition teaches that Waehrwolf is a human being (man or woman) that is capable of changing itself into a wolf. This wolf is unusually large and savage, and is known mainly by his riding-belt, an indispensible article, as it serves him in changing from one form to another, and which he seeks to hide, as well as his protection. The sweat, daily life he was peculiarly affectionate, faithful, and exemplary. See Minutes of Annual Conferences, 1875, p. 60.

Wasenaenoein, in the mythology of the Finns, is one of the supreme gods, who is said to be seen in the seven principal stars of the Great Bear constellation. He takes the souls of the departed up with him, and if it is possible for such a soul to strike the Great Bear, it becomes partaker of eternal happiness. He is related to Ilmarinen, god of air and water. The name of the father of both is Kave, and he is the only being sprung from himself. The sons discovered and made the arts and sciences—Ilmarinen, the art of working iron; Wasenaenoeinen invented the kandele (a fiddle-like instrument), and with it poetry and song, hunting, fishing, and war. Of Wasenope he was worshiped as the god generally. He was the spirit wherein all life proceeded, the master of favorable spells, the adversary and the conqueror of all personifications of evil, and the sovereign possessor of all science. He sent the celestial fire to man, and invented incantations. Persons of all classes needed to invoke his sweat, which dropped from his body was a balm for all diseases. He alone furnished efficacious assistance against the charms of the sorcerers, and an appeal to him was an effectual resource against the enchantments of demons.—Völmer, Works & Myk. a.v. Leborgnet, Claud. Hatt, P. D. 246.

Wasipesa is a ghost of the earth among the Finns, who at one time made a long journey with his playfellow, and afterwards rested himself upon rocks. From their sweat snakes are said to have sprung.

Was (or Waal), John Baptist de, a Flemish engraver of the 17th century, of whom little is known, is said to have executed some etchings, among which are

A set of prints representing the History of the Prodigal Son. See Spooner, Biog. Hist. of the Fine Arts, s. v.

Wazen, Jan van der. See Wazen.

Wafer is the rendering, in the A. V., of מִלְחיֶשׁ (from מִלְחִי, to flatten), a pancake (Exod. xvi. 31), and of רָקִיק (from רָק, to make thin), a cake (xxix. 2, 23; Lev. ii. 4; vii. 12, viii. 26; Num. vi. 15, 19; 1 Chron. xxiii. 29). See B. We learn from the above passages that such thin cakes made of fine flour, usually without leaven, and anointed with oil, were used by the Hebrews in connection with their offerings. See SACRIFICE. The custom, to some extent, is still maintained by the Jews. See PASSOVER.

WAFER, in ecclesiastical terminology, is the bread used in the eucharist by the Romanists and Lutherans. In the ancient Church, so long as the people continued to make oblations of bread and wine, the elements for the use of the eucharist were taken out of them; and, consequently, so long was the common leavened bread in ordinary use employed for that purpose. The use of wafers and unleavened bread was not known in the Church until the 11th century. It has been conjectured that the change crept in from the people's leaving off their old habits and oblations made in connection with the eucharist. In time the bread itself was to provide the bread themselves. Under pretence of decency and respect, they changed it from leaven to unleaven, and from a loaf that might be broken, to a nice and delicate wafer, which was formed in the figure of a denarius, or penny, either to represent the peace for which our Saviour was betrayed, or because the people, instead of offering a loaf of bread as formerly, were ordered to offer a penny, which was to be expended upon something pertaining to the sacrifice of the altar. This alteration in the eucharistic bread occasioned great disputes between the Eastern and Western churches, which separated about it; the Western Church going so far to the extreme as almost to lose the nature of the sacramental element by introducing a thing that could hardly be called bread, instead of that which our Lord had appointed to be the representative of his body in the eucharist. The wafer now in use in the Roman Church is a small thin portion of unleavened bread, bearing upon it either the figure of Christ or the initials I. H. S. In the Church of England wafers have been used from the earliest times of Christianity, and are still not uncommonly used; but the rubric of the present Prayer-book maintains that the best and purest wheat bread that may be conveniently obtained will suffice.

Waftrudner, in Norse mythology, is a giant, an inhabitant of the country of the Jotes. Odin had a combat with him.

Wagenaar, Hans, a Dutch historian, who was born at Amsterdam, Oct. 31, 1709, was chiefly occupied in commerce and literature, and died March 1, 1775, he serves notice here for several ecclesiastical monographs, for which see Biog. Universelle, s. v.

Wagenseil, Johann Christoph, a Protestant theologian of Germany, was born Nov. 26, 1633, at Nuremberg. In 1667 he was appointed professor of history at Altdorf; in 1674 he occupied the chair of Oriental languages, and from 1697 that of ecclesiastical law, and died Oct. 9, 1705. He is known as the author
of Teda Iymea Satanas, sine Arcomi et Horribiles Judeorum adversus Christianum Deum et Christianum Religionem Liber (Aldiford, 1578), a work which contained anti-Christian literature of the Jews in a Latin translation and refutation. He also translated into Latin the Talmudic treatise Sotah (ibid. 1674), with very valuable notes. Besides, he wrote, Deuculatio Christiana ad Omnem Imperasse qui Judeos habent sub Jurisdictione sua (ibid. 1703–4; reprinted in Schudt's Jacobische Denkschrift, i, 389); — Disputatio Circularis de Judaeis (ibid. 1705); — Emendationes ad Furti Argomenta (ibid. 1698). See Fürst, Bibl. Jud. iii, 489; Winer, Handbuch der theolog. Lit. i, 300, 380, 524. (B. P.)

Wages (usually some form of ד"וע, sakdr, "to hire" [especially in the Hithpael, Hagg. i, 6, to earn wages]), chiefly ד"וע, sakdr [Gen. xxxi, 8; Exod. ii, 9; Ezek. xxix, 18, 19; elsewhere "hire," "reward," etc., and יד'וע, miskordeth [Gen. xxxiv, 15, 31, 41; "reward," Ruth ii, 12; also ד"וע, peitiloth [Lev. xix, 13; "reward," Psa. cxx, 20] work [as elsewhere mostly rendered]; μνέακ [John iv, 36, elsewhere "reward" or "hire"], ποιμάνων [Luke iii, 14; vi, 28; 2 Cor. xi, 8; "charges," 1 Cor. ix, 7; strictly rations], according to the custom of mankind, are a return made by a purchaser for something of value—specifically for work performed. Thus labor is recognized as property, and wages as the price paid or obtained in exchange for such property. In this relation there is obviously nothing improper or humiliating on the side either of the employer or the worker. They bring each a certain thing which the other wants, and, in the exchange which they in consequence make, both parties are alike served. In these few words lies the theory, and also the justification of all service. The entire commerce of life is barter. In hire, then, there is nothing improper or humiliating on either side. It is only the contrary in the modern century, a mean, sordid spirit—that is wrong. So long as a human being has anything to give which another human being wants, so long has he something of value in the great market of life; and whatever that something may be, provided it does not contribute to evil passions or evil deeds, he is a truly respectable capitalist, and a useful member of the social community. The scriptural usage in applying the term translated "wages" to sacred subjects—thus the Almighty himself says to Abraham (Gen. xv, 1), "I am thy exceeding great reward"—furnishes confirmation of this view, and suggests the observance of caution in the use of the words "hire" and "hiring," which have acquired an offensive meaning by no means originally inherent in themselves, or in the Hebrew words for which they stand (xxxix, 18, 32, 33). See HIRING.

The earliest mention of wages is of a recompense, not in money, but in kind, to Jacob from Laban (Gen. xxix, 15, 20; xxx, 28; xxxi, 7, 8, 41). This usage was only natural among a pastoral and changing population like that of the tent-dwellers of Syria. Burckhardt mentions a case in Syria resembling closely that of Jacob with Laban—a man who served eight years for his food, on condition of obtaining his master's daughter in marriage, and was afterwards compelled by his father-in-law to perform acts of service for him (Syria, p. 297). In Egypt, money payments by way of wages were in use, but the terms cannot now be ascertained (Exod. ii, 9). In ancient times the payment in kind of wages to masters or laborers, are mentioned (Hag. i, 6; Ezek. xxix, 18, 19; John iv, 36). The only mention of the rate of wages in Scripture is found in the parable of the householder and vineyard (Matt. xx, 2), where the laborer's wages are set at one denarius per day, probably about fifteen cents, a rate which agrees with Tobit vi, 14, where a drachma is mentioned as the rate per day, a sum which may be fairly taken as equivalent to the denarius, and to the usual pay of a soldier (ten asses per diem) in the latter days of the Roman republic (Tactitus, Ann. i, 17; Polybius, vi, 39). It was perhaps the traditional remembrance of this sum as a day's wages that suggested the mention of "drachmas wronged from the hard hands of peasants" (Shakespeare, Jul. Cos., iv, 3). In earlier times it is probable that the rate was lower, as until lately it was throughout India. In Scotland we know that in the last century a laborer's daily wages did not exceed sixpence (Smiles, Lives of Engineers, ii, 90). But it is likely that when laborers, and also soldiers, were supplied with provisions (Michaelis, Lives of Moses ed. Smith), p. 130, ii, 190, as is intimated by the word ποιμανόν, used in Luke iii, 14, and 1 Cor. ix, 7, and also by Polybius, vi, 39. The Mishna (Baba Metrisa, vi, 1) speaks of victuals being allowed, or not, according to the custom of the place, up to the value of a denarius, i.e. inclusive of the pay.

The law was very strict in requiring daily payment of wages (Lev. xix, 13; Deut. xxiv, 14, 15), and the Mishna applies the same rule to the use of animals (Baba Metrisa, ix, 12). The employer who refused to give his laborers sufficient victuals is censured (Josh xxiv, 11), and the iniquity with withholding wages is denounced (Jer. xxiii, 12; Mal. iii, 5; James iv, 4). See SERVANT.

Wagg, John D., a minister of the Methodist Episcopal Church, South, was born in Jefferson, N. C., July 8, 1835. He embraced religion in early life, and united with the Methodist Church (E. T.) Conference in 1858. In 1865 he was granted a superannuated relation, and died June 13, 1866. Mr. Wagg possessed more than ordinary preaching abilities, and for meekness and piety was worthy of imitation. See Minutes of Annual Conferences of the M. E. Church, South, 1866, p. 63.

Waggoner, Samuel, a Methodist Episcopal minister, was born in Stokes County, N. C., Oct. 24, 1788. He was ordained deacon in 1811, and was appointed to Salisbury Circuit. He was ordained deacon in 1813, elder in 1815, and died April 13, 1816. Mr. Waggoner was laborious, intellectual, and faithful. See Minutes of Annual Conferences, 1817, p. 291.

Wagk, Friedrich, a Roman Catholic theologian of Austria, was born in 1807 at Horn. In 1831 he was made a priest; in 1836, doctor of theology; in 1839, professor of exegesis at Götzen; and died Sept. 10, 1871, at Pöttsleinsdorf, near Vienna. He published, Der Priester und die Neuzeit (Götzen, 1850) — Der Religionsunterricht an der Volksschule (ibid. eod.) See Literarischer Handwörter, 1866, p. 156; 1871, p. 925. (B. P.)

Wagner, Daniel, a German Reformed minister, was born in the duchy of Nassau in 1750, and brought to this country by his parents when only two years of age. He studied the classics under Rev. John D. Graw, of New York city, and theology under Rev. William Hendel, of Lancaster, Pa. He was licensed by the German Cottus in 1771; preached at Kreutz Creek, Pa., 1771–74; York and other places, 1774–86; Tuliphekken, Heidelberg, Bern, Berg, Summerberg, 1786–88; York, 1793–1802; and Frederick, Md., 1802–10, where he died, in 1810. See Harbaugh, Lives of Fathers of the Germ. Ref. Church, ii, 229 sq.

Wagner, Friedrich, a Protestant minister of Germany, was born Jan. 21, 1698, at Caro, not far from Magdeburg. He studied theology and philosophy at Halle from 1712 to 1716. In the latter year he was appointed a teacher there, and entertained hopes of being sent as a missionary to East India; but in 1719 he was called to Berlin, where he remained two years, when he went to Nauen as pastor primarius. A few years later he went to Stargard as provost and pastor of St. Mary's, at the latter place he removed where he became one of the most important Hebrew literature at the gymnasium there. In the year 1756 he was called to Hamburg, where he died, July 6, 1760, having received two years previously the degree of doctor of divinity from the Jena University.
His writings are given in Döring, Die gelehrten Theol. gen. Deutlingens, iv, 612 sq. (B. P.)

Wagner, Henry, a German Reformed minister, was born in Berks County, Pa., April 3, 1802. He united with the Church at Aaronsburg, Pa., when about nineteen years of age; entered the Theological Seminary at Carlisle, Pa., in the spring of 1825, and remained about three years. He preached in the Paradise charge in 1828, and was ordained by the synod in the autumn of the same year; labored extensively in this charge for several years, preaching to eight or more congregations; became pastor of the Lebanon charge, composed of Lebanon, Hill Church, Jonestown, Annville, and Mount Muncie; in 1838 he was in the McDonalds charge, Fulton County, Pa., in 1851; preached at Mercersburg from 1853 to 1856; began his pastorate at Orwigsburg, Schuylkill Co., in the spring of 1856; resigned his pastoral charge, and relinquished the active duties of the ministry in 1865; and died at Lebanon, Pa., May 25, 1869. "As a theologian and as a preacher he stood high among his brethren. His sermons were always well prepared, and replete with sound doctrine and evangelical truth. As a pastor he was faithful and active: as a catechist he was thorough and earnest; as a father in the ministry he possessed the power to influence, and to affect the moral and religious condition of all the people. Raising up the Church were arduous and successful. His ministry has left a sweet savor, and will long be held in grateful remembrance." See Harbaugh, Fathers of the Germ. Ref. Church, iv, 224 sq.

Wagner, Johann Jakob, a German philosopher, was born at Ulm in 1775, and became professor at Würzburg. He died Nov. 28, 1841. His principal works are: Philosophie der Erziehungskunst (1802)—Von der Natur der Dinge (1805)—System der Idealphilosophie (1804)—Grundriss der Staatswissenschaft und Politik (1806)—Religion, Wissenschaft, Kunst u. Staat in ihrem gegenseitigen Verhältnisse (Leips., 1819)—Theologie (Bamberg and Würzburg, 1809)—Ideen zu einer allgemeinen Wissensch. des mensch. Lebens (Frankf., 1808)—Math. Philosophie (1811)—Organum der menschlichen Erkenntniss (1830)—Nachgelassene Schriften (1853). See Rubus, J. J. Wagner's Leben, Lehre, und Bedeutung, etc. (Nuremberg, 1862); Adam and Kcilie, J. J. Wagner's Lebensnachrichten und Briefe (1849).

Wagner, Jacob, a Swiss engraver, was born at Thun, on Lake Constance, in 1706. He first studied painting, at Venice, under Jacopo Amicino, who advised him to devote himself to engraving. He then went to Paris, where he studied under Lawrence Cara. He also visited London in 1733, where he resided some time, and engraved several plates. He afterwards returned to Venice, where he established himself as an engraver, and carried on a trade in prints. He died at Venice in 1780. Among his best works are the following: The Education of the Virgin, after Amicino:—The Infallible Sleep of Jesus, after the same:—The Holy Family, after Paul Veronese:—The Interview between Jesus and Rachel, after L. Giordano:—Rebecka, Receiving the Presents from Eleanora, after the same:—The Death of Abel, after Benedetto Luti:—Mary Magdalene in the House of the Pharisees, after the same:—The Virgin and Infant Christ, after Solimena:—The Assumption of the Virgin, after Piazzetta:—and St. John in the Desert, after Tanio. See Spooner, Diog. Hist. of the Fine Arts, s. v.

Wagner, Tobias, a noted German theologian, was born at Heidenheim, in Württemberg, Feb. 21, 1698. He pursued his studies at the convent of Maulbronn, and afterwards at the University of Tübingen, taking the degree of master of arts in 1618. He was made deacon at Tübingen; later he was a professor at Eisleban. His profound learning caused him to be invited to Tübingen, in charge of the magistracy; and in 1635 he was made professor of theology, in 1656 vice-chancellor, and chancellor in 1662. He died Aug. 12, 1680, leaving a large number of theological works, important in their day, for which see Bied. Universelle, s. v.

Wagenaar, Heinrich Balthasar, a Protestant theologian of Germany, was born Sept. 8, 1755. In 1777 he was appointed fourth preacher at St. Mary's, in Halle; in 1786 he was made deacon there; and in 1809, professor of theology and superintendent and pastor. He died Feb. 16, 1820. He wrote, among other works, Erkenntniss der 19. Jahrhunderts gewidmet (Halle, 1802—6, 2 vols.)—Homiletische Abhandlungen und Kritiken (ibid. 1783—85, 2 vols.)—Liturgisches Journal (ibid. 1801—9, 1812, 8 vols.)—Religionslehen in Beispielen (ibid. 1799, 1800, and often, 2 vols.)—Über die Phänomena vor der Zerstörung der Welt (ibid. 1817, 2 vols.). See Friedl. Handb. der Lit. i, 117; ii, 121; 1870, 261, 263, 383, 389, 398. (B. P.)

Waggon, in Norse mythology, was the god of war among the Danes, who often was mistaken for Frø or Odín, and was represented as similar to these, armed with helmet, shield, and sword.

Wagon (wagon), a word which is used for family transportation in the case of masses, Gen. xiv, 13, like the Greek ἄξυρα and the Latin pullatum, while those with seats (2 Kings ii, 12) were designated as ἄξυρα, chariots; and both eventually became simply the 2 Hebrew word for wagon, which were sometimes drawn by oxen (1 Sam. vi, 7; 2 Sam. vi, 6), especially those for transport, and sometimes by horses (as equipage) or perhaps asses, appear nevertheless to have been customarily employed not so much in the mountain districts (which were ill adapted through lack of carriage roads) as in the southern and maritime climes; whereas in modern times the inhabitants are in the habit of riding (on the backs of horses, donkeys, or mules), leaving burdens to be borne by camels; and carriages (with the exception of a few foreign coaches) are rarely seen in the East (Korte, Reisen, p. 484), even in Egypt (Mayr, Schickesle, ii, 40), where they were certainly very numerous (Herod. ii, 109). The Canaanites had very curiouswagons before the Hebrews (Josh. xi, 4; xvii, 16; Judg. iv, 3), like the Philistines (i, 19; Sam. xii, 5; comp. Jer. xvii, 3) and later the Syrians (2 Sam. ix, 18; 1 Kings xx, 1; xxi, 31; 2 Kings vi, 14 sqq.) and the immense numbers of their (900) in Judg. iv, 1; 2 Kings xii, 18, 30,000 in 1 Sam. xii, 5; comp. the 1200 Egyptian chariots in Chron. xii, 3) are confirmed by other ancient accounts ( Xenop. Anab. i, 7, 11; Diod. Sic. i, 54; comp. 2 Macc. xiii, 2). This gave the natives a great advantage at first (Josh. xvii, 16; but comp. Veget.

Geo.
Ancient Assyrian Wagon. (From the bas-relief of Kuyunjik in the British Museum.)

Milit., iii, 24), which David at once effectually overcame in a pitched battle (2 Sam. viii, 4); and Solomon established cavalry stations (בָּשָׁם הַרְכָּא, 1 Kings ix, 19, x, 26; comp. v, 6) as a defence (Ewald, Jer. Gesch. iii, 72 sq.). These foreign war vehicles are sometimes called chariots of iron (חֶבְדָּב הָאָרֶן, Josh. xvi, 16, 18; Judg. i, 19; iv, 3), meaning either constructed wholly out of or simply strengthened by iron, or rather perhaps scythe-armed ("currus falcati," Curtius, iv. 12, 6; xv, 3, 4; comp. iv, 9, 5; Livy, xxxvii, 41; Veget. Milit., iii, 24; ἱπποτα ὑπαναποφόρα, Xenoph. Anab. i, 7, 10; Diod. Sic. xvii, 58; Apian, Syr. xxiii; see Schicke- danz, De Curribus Falcatis [Serv. 1754]; comp. the בְּשָׁם הַרְכָּא of Nah. ii, 4). See Jahn, Archiol. ii, 439 sq.; Lydias, De Re Milit. (ed. Van Til, Dordr. 1698), p. 131 sq.; Wichmannhausen, De Curribus Belli (Viteb. 1722); Scheffer, De Re Vehiculati (Franco. 1671); Fabricy, Recherches sur l'Époque de l'Équitation (Par. 1764); Ginzrot, Die Wagen der Gr. und Röm. (Munich, 1813). See Chariot.

With some small exceptions, it may be said that wheel carriages are not now employed in Africa or Western Asia; but that they were anciently used in Egypt, and in what is now Asiatic Turkey, is attested not only by history, but by existing sculptures and paintings. It would seem that they were not in early times used in Palestine, as, when Jacob saw them, he knew they must have come from Egypt. Perhaps, however, he knew this by their peculiar shape. The covered wagons for conveying the materials of the tabernacle were probably constructed on Egyptian models. They were each drawn by two oxen (Numb. vii, 3, 8). Herodotus mentions a four-wheeled Egyptian vehicle (ὕπατα) used for sacred purposes (Herod. ii, 63). Two-wheeled wagons, or rather carts, are frequently represented on the Assyrian sculptures, especially for the conveyance of (female and infantile) prisoners away from a sacked city (Layard, Nineveh, ii, 301). The only wheel carriages in Western Asia with which we are acquainted are, first, a very rude cart, usually drawn by oxen, and employed in conveying agricultural produce in Armenia and Georgia; and then a vehicle called an arabad, used at Constantinople and some other towns towards the Mediterranean. It is a light covered cart without springs; and, being exclusively used by women, children, and aged or sick persons, would seem, both in its use, and, as nearly as we can discover, in its make, to be no bad representative of the "wagons" in the Bible. No wheel carriage is, however, now used in a journey. The Oriental wagon, or arabah, is a vehicle composed of two or three planks fixed on two (sometimes four) solid circular blocks of wood, from two to five feet in diameter, which serve as wheels. To the floor are sometimes attached wings, which splay outwards like the sides of a wheelbarrow. For the conveyance of passengers, mattresses or clothes are laid in the bottom, and the vehicle is drawn by buffaloes or oxen (Arundell, Asia Minor, ii, 191, 235, 238; Olearius, Trav. p. 309; Ker Porter, Trav. ii, 533). See CART.

Wagstaffe, John, an English author of the 17th century, was educated in Oriel College, Oxford, where he remained, and died in 1677. He published, Historical Reflections on the Bishop of Rome (1660) --- and Questions of Witchcraft Debated (1671). See Blias's Wood, 4th. Oxon. iii, 1118.

Wagstaffe, Thomas, a learned Nonjuring divine, was born in Warwickshire, England, Feb. 15, 1645. He was educated at the Charterhouse School under Mr. Wood: took the degree of bachelor of arts in 1664, and that of master in 1667; was ordained deacon June 6, 1669, and priest Nov. 12, same year; rector of Martinshorpe, in the county of Rutland, from 1669 to 1676; curate of Stow, in the county of Bucks, from 1676 to 1684; chan-
cellor of the cathedral church, Lichfield, in 1684; and rector of St. Margaret Pattens, London, in the same year. Deprived of his prebendaries at the Revolution for not taking the new oaths, he practiced physic for several years in London with good success. In 1693 he was consecrated bishop, and afterwards became suffragan of Ripon. He died (Oct. 22) in 1739. As his Sermons, he published several tracts in defence of Charles I.

Wahabees, a modern Mohammedan sect founded by sheik Wahhab, the son of Abd-el-Wahhab, for whom they were named. They preach no new doctrine, but have for their distinctive principle a desire to abolish the idolatrous practices which have connected the Mohammedans with the religion of Islam. They reject the worship of Mohammed as gross idolatry, and adhere strictly to the Koran; otherwise they observe all the rites and ceremonies of the Mohammedans—the number of the prayers, the guefuctions, the fast of the Ramadan (q. v.), and abstinence from wine and all spirituous liquors. Abd-el-Wahhab, during his whole life, sought to gain converts by peaceable means, but his successors followed the example of Wahhab in disseminating their principles by the sword, and political interests were united with religious reform. They originated in the small tribe of Nebadi, in Yemen; but their founder undertook an expedition into Syria and the regions bordering on the Euphrates, and having collected a number of tribes from the Arabian desert, who became converts to his views, he formed them into a distinct nation, under the control of Eben Send as their civil governor, and himself as their Imam, or spiritual ruler. This appears to have taken place about the middle of the last century; but no measures were taken against the Wahabees by the Porte until the year 1798, when they were attacked by the pasha of Bagdad, but without effect, which emboldened them to leave the desert; and in 1801—2 they met with signal success, took great booty from the neighboring Mohammedans, and captured Mecca itself, where they established their power in lieu of that of the grand sultan, in virtue of which he had hitherto been regarded as the head and protector of the faithful. The residence of Send was now fixed at Driech, where he had a palace, and lived in all the pomp and splendor of an Eastern sultan. In 1803—4 he made unsuccessful attacks on Bagdad and Bosseireh, but took Medina in 1804, and in 1805 Jidda, which had formerly baffled all his attempts to subdue it. The Porte was now obliged to pay a heavy tribute for permission to send an embassy from Damascus with the censers and caravans that annually supplied the needs of Mecca, and these caravans were no longer allowed to have weapons, flags, or music, or to enter the holy city on carpets, as formerly. In 1807 the Wahabees stood in the zenith of their power, since which time they have been repeatedly repulsed, especially in 1818, when their sheik Abdallah, the great-grandson of Sahib, the friend and protector of Abd-el-Wahhab, was compelled to surrender to Ibrahim Pasha, the son of Mehemet Ali, and was taken to Constantinople and executed. The sect still exists, and is paramount in Central Arabia, where the dominions of the sultan of the Wahabees embrace not only Nedjed proper, but the adjacent provinces, and include 316 towns or villages, with a population (in 1863) of 1,219,000. They are a great annoyance to the Turkish government, and a terror to the pilgrims who proceed from all parts of the East to visit the tomb of the Prophet. See Palgrave, Central and Eastern Arabia. (Lond. 1869); Histoire des Wahabees depuis leur Origine jusqu'à l'A.N. 1809 (Paris, 1810); Burckhardt, Notes on the Bedouins and Wahabees (Lond. 1830). See Mohammedanism.

Wahl, Christian Abraham, a Protestant theologian of Germany, was born at Dresden, Nov. 1, 1775. In 1808 he was called as pastor to Schneeburg. He was appointed in 1823 superintendent at Oschatz; in 1835, member of consistory in his native place; and died Nov. 30, 1855, at Köthenbroda. He wrote, Historische Einleitung in die sämmtlichen Bücher der Bibel (Leips. 1802):—Historisch-praktische Einleitung in die bibl. Schriften (ibid. 1820):—Quaestiones Theologico-dogmaticae Candidati Theol. esse Subjecta Proposita (ibid. 1813):—Bibl. Handbook in the New Testament (Lond. 1841):—Commentario de Particula et Propos, cit apud N. T. Scriptores Ursi et Postestis (ibid. 1827):—Claudius Novi Testamenti Philologico (ibid. 1822; 3d ed. 1848), which is the basis of Dr. E. Robinson's Greek Lexicon of the N. T., the best extant:—Catena Lectorum Ver. Test. Apocryphorum Philologico (ibid. 1858). See Förster, Bibl. Jud. iii, 490; Zuch- old, Bibl. Theol. ii, 1410 sq.; id. Theol. Universal-Lexikon, s. v.; Winer, Handbuch der theol. Lit. i, 128; ii, 501, 304. (B. P.)

Wahl, Samuel Friedrich Günther, a Protestant linguist of Germany, was born Feb. 2, 1760, at Alach, near Erfurt. In 1784 he was appointed rector at Buckeburg; in 1788, professor of Oriental languages at Halle; and died June 29, 1834. He published, Allgemeine Geschichte der orientalischen Sprachen u. Literatur (Leips. 1784):—Observationes Philologico-criticae superior Paulierr Odario 133 (ibid. 1784);—Magazin für alle, besonders mit Indischen Litteratur betrachtet (1784):—Orientalische Bibliothek (Leips. 1788—92, 3 vols.):—Elementarbuch für die arab. Sprache u. Literatur (Halle, 1789);—Beitrag zur Geschichte u. Statistik der Araber (ibid. 1789):—Uebersetzung, Einleitung u. Anmerk. zu Habakkuk (Hanov. 1790):—Arabische Anthologie (Leips. 1791);—Arabische und englische Vorderasien (ibid. 1798);—Uebersetzung des Korans (Halle, 1828, and often). See Förster, Bibl. Jud. iii, 490; Winer, Handbuch der theol. Lit. i, 210, 229, 277, 527; id. Theol. Universal-Lexikon, s. v. (B. P.)

Wailers, F. F., a German Reformed minister, was born at Pikir, kingdom of Hanover, Sept. 10, 1844; emigrated to America; was licensed by the Indiana Classis at Lafayette in the spring of 1867; began preaching at Crothersville, Ind., where he died, March 18, 1868, from suffocation, having fallen in an epileptic fit with his face in the water. See Harbaugh, Fathers of the Germ. Rev. Church, iv, 502.

Währner, Andreas Georg, a Protestant theologian of Germany, was born Feb. 24, 1858, at Rhida. He studied at the universities of Heidelberg, especially in Gottingen, from 1710 to 1716; and, as the result of his studies, he published during that time three dissertations: De Mare Araphitae:—De Regione Ophir:—De Feste Enocit. In 1718 he was called, as professor of the Gymnasium, to Göttingen. When, in 1735, that institution was changed into a university, he was called to the chair of literature there, and in 1755 he published his Hebrew Gram- mar, which is the more remarkable because being the first book which was published by that university. In the same city he studied the Talmud and the Rabbinical writings, his instructor being a learned Jew by the name of Ginzburger. In 1738 he was advanced to be ordinary professor of Oriental languages. He died Feb. 21, 1762. His most important work, which he published in two volumes, is his Antiquitatis Ebreorum de Israelitico Genus Origine, Partia, Rebus Sacris, etc. (Göt. 1748), a very learned and instructive work, which may still be used with great advantage by the student. For his other writings, see Förster, Bibl. Jud. iii, 488 sq.; Döring, Die gelehrten Theologen Deutschlands, iv, 609 sq. (B. P.)

Waidahayanta (or Waidahayanta), in Hindū mythology, is the palace of Indra, god of the sun, in India.

Wail (some form of מֵאilee or מֵאיל, דָּלָּאָל), is singular to observe the onomatopoeic forms of words used in most languages to express the sounds of grief, such as ဗီဗီ, ululare, houl, yell, etc.; all consisting essentially of the l sound). The Oriental forms of lamentation are much more expressive and vehement than with us. See Mourning.
WAINRIGHT

Wainwright, David, an English Congregational minister, was born at Leeds, Jan. 28, 1835. He was educated at Airedale College, and became the minister of the Wesleyan Free Church, Great Horton. He was ordained, April 6, 1860, pastor of the Congregational Church at Chorley, Lancashire, and died Sept. 28, 1862. Mr. Wainwright was a preacher of high religious character, and sought to communicate what he believed to be truth seemed to be the joy of his ministry. See (Lond.) Cong. Year-book, 1866, p. 271.

Wainwright, William, an English Congregational minister, was born in London, September, 1806. He was educated at Christ's Hospital, and while there became deeply impressed with religious things. He early engaged in Sabbath-school work and lay preaching, and in 1849 was ordained at Tarrant, Hampshire. Mr. Wainwright labored successively at Wheathampstead and Codicote, and was recognized by the Church as an earnest and zealous advocate of the religion of Jesus Christ. He died May 8, 1865. See (Lond.) Cong. Year-book, 1866, p. 298.

Wainscott. This term originally seems to have implied rough planks of oak timber, and subsequently to have been given to wooden panelling, to which they were converted for lining the inner walls of houses and churches. It was very extensively employed during the reigns of Queen Elizabeth and James I, and for a long period afterwards. The name has long ceased to be confined to oak panelling. It is also called ceding-work.

Wainwright, Jonathan Mayhew, D.D., a bishop of the Protestant Episcopal Church, was born in Liverpool, England, Feb. 24, 1792. His parents were on a visit to England when he was born, and they remained there until he was eleven years old. During this period he was educated at private schools in Liverpool and North Wales. When his parents returned to the United States, he was placed in Sandwich Academy, Mass., and in due time entered Harvard College, from which he graduated in 1812. For some time after his graduation he was proctor and teacher of rhetoric there, and meanwhile had resolved to enter upon the ministry. In 1816 he became a deacon, and not long after assumed charge of Christ Church, Hartford, Conn., where he was admitted to priest's orders; May 29, 1819, he was made rector of the parish; Nov. 25 he was called to be an assistant minister of Trinity Church, New York city, where he continued to serve until he was elected rector of Grace Church, in the same city, early in 1821. With this Church he spent thirteen years of his ministry. In 1834 he accepted the rectory of Trinity Church, Boston, but remained only three years, when he returned to New York as assistant minister of Trinity Church, the congregation of St. John's Chapel becoming his more immediate charge, and in this relation he continued until the close of his life. He became involved in a controversy with the Rev. Dr. Potts, of New York, in 1844, which grew out of an assertion which he made, that "there is no Church without a bishop." It was in the form of a letter published in the New York Commercial Advertiser, and was afterwards published in pamphlet form. His health having become impaired, he travelled extensively in Europe and the East in 1848–49 for recreation; and after his return he published large volumes on Egypt and the Holy Land. June 15, 1853, he was a representative of the Episcopal Church in America at the celebration in Westminster Abbey, at the close of the third jubilee year of the Society for the Propagation of the Gospel in Foreign Parts. On this occasion Oxford bestowed upon him the degree of D.C.L. Oct. 1, 1852, he was chosen provisional bishop of the Diocese of New York, and was consecrated Nov. 9 following. Among the various offices which he had previously filled, it may be mentioned that he was a deputy from the diocese of New York to the General Convention of 1832; was a member of the Diocesan Standing Committee from 1829 to 1833; was placed on that committee in 1844, and was continued there by four successive conventions; from 1828 to 1834 was secretary of the Board of Trustees of the General Theological Seminary; for many years a trustee of Trinity School; a trustee of the Society for the Promotion of Religious Knowledge; in 1828 he became a vice-president of the New York Bible and Prayer-book Society; a trustee of the Tract Society; and, from the beginning, one of the executive committee and a member of the Board of the General Sunday-school Union. Dr. Wainwright died in New York city, Sept. 21, 1854. Among his publications are numerous published discourses and several books, viz.: Itineraries and Places of Our Saviour (1850):—Two Orders of Family Prayer (1845, 1850)—The Land of Boulogne (1851). He also edited two volumes of Memoirs, one of bishop Havenscroft, of North Carolina, and one of bishop Heber. Dr. Wainwright was a lover of the fine arts, and his taste in these matters was excellent. His sermonic style was perspicuous, but there was little ornament and apparently little elaboration. His elocution evinced careful culture. He had a strong relish for social life, and attracted the refined by his urban manners. See Sprague, Annals of the Amer. Pulpit, v. 610.

Wairswert (or Vairswert), in Hindhi mythology, is the son of Siva, born from his breath to humble Brahma.

Vashwanara (or Vashvanara), in Hindhi mythology, is a surname of Agni (god of fire), and means the all-permeating fire.

Wait, Daniel Guildford, LL.D., an English divinity, was born in 1789, and educated at St. John's College, Cambridge. He was ordained for some time curate of Bucklebury, near Brattle, and in 1819 became rector of Blagdon, Somerset. He died in 1850. He published several works, in which he gives the results of his researches in the Hebrew and other Oriental languages and antiquities.

Wait, Lying in (विना, bhava). The natives of Western and Central Asia have in all ages been infamous for their plundering propensities. Their daring in watching caravans can only be equalled by their patient accuracy in an ambush. They will remain sometimes for days and even weeks, with a very scanty supply of provisions, waiting to surprise the unarmed caravan or the unwary traveller. Homer aptly describes such characters (Iliad, xviii):

"A place for ambush fit they found, and stood Crouched beside a silver flood, Two spires at distance link, and watchful seem, If sheep or oxen seek the winding stream. Beneath their foes the waters flow, And steers slow moving, and two shepherd swans. And ever, as the rains fell, they watched, Seeing their prey. Whose arms and whos' armor. In arms the glittering squadron raised round, Rush sudden ; hilles of slaughter heaped the ground; Whole rocks and islands lie bleeding. In all amidaft them, dead, the shepherd swans!"

It appears from various parts of Scripture that Palestine and the adjoining regions were much infested by persons who lived by violence, and took refuge in the many large caves and mountain fastnesses which the country afforded them. In the civil wars which arose out of the usurpation of Abimelech, we find that the men of Shechem adopted the Canaanitish, or, as we should call it in modern times, the Oriental custom of employing "lies in wait." The sacred historian relates, "The men of Shechem set liers in wait for him in the way that he went down to the fountain of Jezreel, and they seized all that came along that way by them: and it was told Abimelech" (Judg. ix. 25). The chapter from which we have quoted then proceeds to describe how Abimelech, by planting an ambush of "lies in wait," succeeded in surprising the city of Shechem, which he levelled to
The robbers lived with their families in caves, on the steep faces of the mountain precipices, guarded with sharp rocks, and apparently inaccessible to invaders. Herod caused large wooden chests to be made, and let down by an iron chain from an engine on the top of the mountains, till they came on a level with the mouth of each cave. The chests contained soldiers, well armed, and provided with long hooks. They slew with their darts and spears as many of the robbers as they could reach at the entrance of the caves, and pulled out others with their hooks, and cast them down headlong; and they set fire to the bushes, etc., about the caves, and smothered many more, so by these means the mountain robbers were extirpated (Josephus, Ant. xxiv, 15).

Dr. Thomson well describes such scenes (Land and Book, i, 467):

"The Arab robber lurks like a wolf among these sand-haes, and often springs suddenly upon the solitary traveller, robs him in a trice, and then plunges again into the wilderness of sand-hills and reedy downs, where pursuance is fruitless. Our friends are careful not to allow us to stagger about or lag behind, and yet it seems absurd to fear a surprise here—Khafif before, Acre in the rear, and travellers in sight on both sides. Robberies, however, do often occur, just where we now are. Strange country! and it has always been so. There are a hundred allusions to just such things in the history, the Psalms, and the prophecies of Israel. A whole class of imagery is based upon them. Thus, in Ps. x, 8-10: 'He sits in the lurking places of the villages, in the secret places doth he murder the innocent. He lieth in wait secretly as a lion in his den; he lieth in wait to catch the poor; he doth catch the poor when he draweth him into his net; he crocheth and hurleth himself, that the poor may fall by his strong ones.' And a thousand rascals, the living originals of this picture, are this day crouching and lying in wait all over the country to catch poor helpless travellers. You observe that all these people we meet or pass are armed; nor would they venture to go from Acre to Khafif without their musket, although the caupon of the country commands—"Go in peace, the way is safe.' Strange, most strange land! but it tallies most wonderfully with its ancient story."

In modern times, the Kurds are the most distinguished among Asiatic nations for their inordinate and determined spirit of plunder, and they faithfully preserve all the habits which the Old Testament ascribes to the "liars in wait" of ancient times. A writer in the Saturday Magazine thus describes them:

"With them plundering is a natural occupation, and every unhappy stranger whom chance or curiosity throws into their path is a fair prey for their rapacity. In their way they regard as their lawful prey. Should the unfortunate being happen to be poor and ragged, he is severely beaten for not having brought sufficient property to make him worth robbing. They are not only daring robbers, but skilful thieves; and their boldness is only equalled by their address. Sir John Malcolm, on his mission to the court of Persia, in 1816, had scarcely set his foot in their territory when he was attacked, in spite of his imposing appearance and his numerous attendants. Captain Keppel was closely watched for several miles, and narrowly escaped a similar visitation. Mr. Buckingham was less fortunate; a contribution of 2500 pistarees (about $185) was levied on the caravan by which he journeyed, before it was allowed to proceed."

These marauders not only best mountain passes and defiles, but frequently come into the neighborhood of cities for the purpose of kidnapping the unprotected and driving them off to be sold as slaves, or murdering and robbing those whom they suspect of carrying wealth about their persons. The Kurds usually place themselves in ambush near a well, in order to gain possession of the persons of young women who come to draw water; or near the groves planted round ponds, which are sometimes found in the vicinity of Oriental cities, and are favorite haunts of the merchants who come to enjoy the refreshment of pure air, coolness, and shade. See Ron."

Waitana (or Vaitana), in Hindostan, is a ceremony by which water is made holy.

Waita, Clarendon, a Congregational minister, was born in Hubbardston, Mass., Dec. 12, 1830. After graduating from Brown University in 1852, he devoted one year to business, and then spent three years in the Andover Theological Seminary. For six months he was a student at the University of Halle, Prussia, when he was suddenly called home by the death of his father. His first pastorate was that of the Church in Rutland, Mass., where he was installed Feb. 25, 1858, and remained eight years. He was very much interested in the freedmen in the South, and for six months was superintendent of them at Newbern, N. C. In that same year he was installed pastor of Crombie Street Church, Salem, Mass., where, in the midst of his work, he was stricken down. He visited Cuba in the winter of 1866-67, and returned strengthened. In the fall of 1867 he was asked to temporarily fill the chair of English literature and belles-lettres in Beloit College, and consented, but before arriving there was attacked with typhoid fever, of which, soon after his arrival, he died, Dec. 16, 1867. His sermons were carefully prepared, and were earnestly directed towards the salvation of the people. See Cong. Quar. 1868, p. 266.

Waita, John James, an English Congregational minister, was born at Gloucester, Feb. 23, 1808. Mr. Waita's thirst for knowledge in all departments led him to pursue his studies with such avidity as ultimately to impair his eyesight, of which faculty he was en-
WAITE

582

AWAKEFIELD

tiredly deprived at the age of eighteen. This severe affliction served, under the blessing of God, to develop the more rapidly his intellectual and moral character. For ten years he was engaged entirely in ministerial labor, and at the end of this period Mr. Waite commenced his important life-work, the reformation of the Psalmody. For several years he held the oversight of the Church at a Unitarian society; but so great was the growing appreciation of the value of his labors, and of the simplicity and general application of his system of teaching, that it became necessary for him to accede to the request of his ministerial brethren in London, and devote himself exclusively to that great work. Mr. Waite recognised the necessity for a purer taste and for a higher standard of music in the services of the sanctuary, and with the co-operation of the larger churches he was able to do much towards laying the foundation for a more extended knowledge of musical science. He died Oct. 25, 1866. See (London) Cong. Year-Book, 1869, p. 291.

Waite, Thomas, LL.D., an English clergyman, was born in 1775. He became curate of Wellington; was principal of the grammar-school at Lewisham Hill from 1815 to 1833; rector of High Halden in 1838; of Great Chart in 1835; and died in 1841. He published several Sermons, Explanatory and Critical, on the Thirty-nine Articles (1839).

Waite, William, a minister of the Congregational Church, was born at Idle, England, Jan. 6, 1825. His first religious impressions were received under the ministry of Rev. J. Stringer, of Idle, whose church he joined, and by whom, with the concurrence of the entire Church, he was sent to Airedale College, in January, 1847. He spent five years there in the acquisition of knowledge and in preparation for the work of the ministry. He left college at Christmas in 1851; settled at Bacup, Jan. 1; was ordained in May; and died in September, 1862. During a ministry of a little over one year the Church grew rapidly. His death was greatly regretted. "A most pious, devoted, la
day festival once universally held in England. In early times the day was considered as beginning and ending at sunset; and on the eve of the holyday worshippers repaired to the churches for worship, while the following day was spent in amusement. Each church, when the celebration was dedicated to the anniversary of that day the parish wake was kept. In many places there was a second wake on the birthday of the saint, sometimes called Patron or Saint's Day. On these occasions the floor was strewn with rushes and flowers, and the altar and pulpit were decked with boughs and leaves. Crowds resorted to the wakes from neighboring parishes; hawkers or merchants were attracted by the crowds; and ultimately the wakes became mere fairs or markets little under the influence of the Church, and disgraced by scenes of indulgence and riot. The scandal of these scenes became so great that in 1265 Edward I passed a statute forbidding fairs and markets to be held in country churchyards. In 1448 Henry VI ordained that all showing of goods and merchandise except necessary victuals should be discontinued on the great festivals of the Church. In 1536, Henry VIII, by an act of convocation, ordered the festival day of St. John the Baptist's Day to be discontinued, and that of the dedication of the church in all parishes to be the first Sunday in October. This gradually fell into desuetude, the Saint's Day being the more popular festival, and it still subsists in the form of a village wake. A lyle-wake is a watching all night of a dead body by the friends and neighbors of the deceased. In Ireland, upon the death of one in humble circumstances, the body, laid out and covered with a sheet except the face, and surrounded with lighted tapers, is seated by the friends and neighbors. After vociferous lamentations, food and whiskey are indulged in, commonly leading to noisy and even riotous demonstrations. The custom, no doubt, originated in superstitious fear either of passing the night alone with a dead body or of its being interfered with by evil spirits.

Wake, William, D.D., a distinguished English prelate, was born at Blandford, in Dorsetshire, in 1557. He was educated at Christ Church, Oxford, where he received the degree of master of arts in 1679, when he decided to take orders in the Church, although his father designed him for a commercial life. In 1682 he went to Paris as chaplain with viscount Preston, envoy-extraordinary to the court of France. On his return to England, in 1685, he was elected a minister to Gray's Inn. Subsequently after the Revolution he was appointed deputy-clerk of the closet to king William, and in June, 1689, was made canon of Christ Church, Oxford. In 1698 he obtained the rectory of St. James's, Westminster. In 1701 he was made dean of Exeter, in 1706 bishop of London. In the earlier years of his episcopacy he adhered to the Low-Church party, but afterwards became alienated from it, though not becoming a High-Churchman. In January, 1716, he was made archbishop of Canterbury, which office he held until his death, which occurred at Lambeth, Jan. 24, 1745.
in 1776, and was elected to a fellowship the same year. He was ordained in the Church of England in 1778, and appointed curate of Stockport, in Cheshire. In August of the same year he left Stockport and became curate of St. Peter’s at Liverpool, and in 1779 was chosen classical tutor of the Dissenting Academy at Warrington, in Lancashire, where he remained until 1783. He was one of the three non-Yorkean preachers at Nottingham, and in 1790 went to Hackney as tutor in a Dissenting academy, where he remained one year. The remainder of his life was spent in literary pursuits. He died Sept. 9, 1801. Among his most important works are, *An Inquiry into the Opinions of the Christian World respecting the First Century and the Personal Son of Christ—Four Marks of Antichrist, etc. (1778): —Internal Marks of the Evidence of the Christian Religion (1779): —Translation of the New Testament, with Notes (1791): —The Spirit of Christianity Compared with the Spirit of the Times in Great Britain (1798);* and *An Answer to the Age of Reason, by Thomas Paine (ed.).*

**Wakefield, Robert,** a learned English divine in the reign of Henry VIII, was born in the north of England. He was educated at the university and on the Continent; taught Greek, Hebrew, Chaldee, and Syriac in France and Germany; in 1519 left his Hebrew professorship at Louvain, returned to England, became chaplain to Dr. Pope; opened a public lecture in Greek at Cambridge in 1524, being made B.D. by Henry VIII, whom he favored after opposing in the affair of his divorce from Catherine; was professor of Hebrew at Oxford in 1538; canon of Welsey’s College in 1552; saved Hebrew and Greek MSS. at the dissolution of the lesser monasteries in 1536; and died in London, Oct. 8, 1537. He left some learned works in language and controversial.

**Wako-i-tatsu-taio-kami,** in Japanese mythology, is the god of flashes of lightning; a sublime god, resident in the main sanctuary at Kami, near Mijako, and who guards the gate of the Mikado. In this sanctuary are yearly held several festivals, of which one, Ohimatai, is especially remarkable, because the priests then appear in the most costly apparel, superposing even the splendor of the apparel of the choir of music. Besides festive processions, horse-races are a main feature of the occasion, in which only kami priests and court servants are permitted to participate.

**Wakeley, Joseph B., D.D.,** a Methodist Episcopalian minister, was born at Danbury, Conn., in 1809. He was converted when about sixteen, and in 1833 joined the New York Conference, which he served successively at Salisbury, Conn.; Lee and Lenox, Canaan, Stockport, Claverack, and Bloomville, N. Y.; Seventh Street, New York city; and in 1843 at Birmingham and Milford, Conn. In 1844 he was transferred to New Jersey, in 1852 to New York East Conference, and two years later returned to the New York Conference. From 1868 to 1869 Dr. Wakeley was presiding elder of Passaic District, and for the next four years held the same office on the Newburgh District. He died in New York city, April 27, 1875. Dr. Wakeley was a remarkable man in many respects. His cast of mind was practical. He was a model pastor and a prudent counselor. As an ecclesiastical antiquarian he had no equal in the Church. His writings were mainly historical and biographical memoirs of early Methodism, and embrace *Lost Chapters Recovered from the Early History of Methodism:—Anecdotes of the Wesleys:—Anecdotes of Whitefield:—Heroes of Methodism:—The Life and Sermons of Bonnot:—Sectarianism.* He contributed to many church magazines, 1876, p. 55; *Sprague, Amas of the Amer. Pulpit,* vol. vii; *Simpson, Cyclop. of Methodism,* etc.

**Wakemanites,** a small party of fanatics existing at New Haven, Conn., in 1855, who regarded Rhoda Wakeman as a divinely commissioned prophetess that had been raised from the dead, according to her own prediction. Their credulity was carried to an unusual extreme. The so-called prophetess claimed that a farmer named Justus Matthews was possessed by an evil spirit, and that it was necessary to put him to death in order to remove it. Her followers were ready to perform the deed, and even the man himself was willing to submit to be murdered as the only means of being rid of the evil spirit. Upon the commission of the crime the fanatic sect was soon extinguished.

**Waku-nawo-sonajo,** in Japanese mythology, is a festival in Dairi, held on the first rat-day of the second month, by the eating of fresh vegetables.

**Wala,** in Norse mythology, was a wise woman, an enchantress, endowed not with imaginary, but with real, supernatural powers, and able to fix the fate of men.

**Wala, abbot or Canon,** was the son of Bernard (natural brother of Charlemagne) by a Saxon woman, and seems to have been born about 765. He studied at the palatine school, and received the name of Arinæ (male) from his teacher, Alcuin, on account of his energy. Tudesque was his native tongue, but he well understood Latin and Greek. He was employed by his imperial brother as governor of distant provinces, and performed his duties, but was neglected on the accession of Louis the Pious (814); and two years after he assumed the clerical habit at Corbie, where his brother Adalhard was abbot. He was banished by the royal disfavor, but was recalled in 822, and in 826 became abbot. He died in October, in 855, of grief at several distant embassies and home disasters. See Hoefner, * Noue. Biog. Générale,* s. v.

**Walens, Anthony,** an eminent Dutch Protestant divine, was born at Ghent, Oct. 3, 1578. He officiated as pastor at several different places; declared in favor of the Counter-remonstrants, and was one of those who drew up the canons of the Synod of Dort. He afterwards became professor of divinity at Leyden, and died July 9, 1639. He wrote, *Compendium Ethicæ Aristotelicæ (1636),* and the greater part of the translation of the Flemish Bible. See Chalmers, *Biog. Dict.* s. v.; *Biog. Universelle,* s. v. "Wale."

**Walafrid Strabo.** See STABO.

**Walaschal;** in Norse mythology, was one of the palaces which Odin had in Asgard. It was covered entirely with silver, and in the main hall were thrones for all the higher deities, one, however, especially for Odin. It was also called Hlidskialf, and from it Odin could view the whole earth.

**Walburga,** St. See WALBURGIS.

**Walc, Christian Wilhelm Franz,** a theologian of Göttingen, was born Dec. 28, 1726, at Jenæ, where his father was professor of theology. He travelled with his elder brother, Johann, after completing his studies, and made the acquaintance of many of the foremost celebrities in the literary world of his time. On his return he was made extraordinary professor of philosophy at Jena, in 1750; and, on the death of his afterwards professor, in the same branch in ordinary at Göttingen. In 1754 he began to teach theology as extraordinary professor, and in 1757 received the theological chair in the Göttingen faculty. His lectures covered the entire field of theology; and, when supplemented with the numerous learned works he wrote and the administrative duties he performed in the government of the university and other institutions, demonstrated his great industry and capacity for work. He was made a member of various learned societies, and an honorary consistorial councillor of Great Britain. He was married in 1763, and died of apoplexy in 1784.

Walc was rather an industrious compiler than a creative genius. His importance lies in the department of Church history; his theology being deficient in orthodox line, but pervaded by the historical spirit. His
earliest work, written at the age of twenty-seven, was a History of the Lutheran Religion, intended to prove the correctness of that faith, and also to demonstrate that the existence and perfection of God may be seen in history as well as in physics and other fields of study. He displayed a constant disposition to make thorough and critical examination of all available sources; but in all his works evincing an utter inability to attain to that philosophical comprehension of his theme by which he could combine his materials into a homogeneous whole. In perspicacity and taste he was not the equal of Mosheim, and in power to excite and stimulate he was very much inferior to Semler. His chief merit lay in exhaustive patience and great conscientiousness, as displayed in the examination of sources and helps. Many of his works are consequently still indispensable as aids in their special fields.

Walch, Johann Georg, a Jena theologian, the father of Johann Ernst Immanuel and Christian Wilhelms (q. v.), was born in 1706 and entered the University of Leipzig in 1710, and became master in 1713. His earliest literary endeavors were philological. He edited the academical discourses of Cellarius, and a series of ancient Latin authors, including Ovid and Lactantius. In 1716 he wrote the valuable History of the Kandites. In the same year he established himself at Jena, where he became professor of oratory in 1719, and afterwards of poetry also, and where he was associated with Buddeus, who bestowed on him his only daughter in marriage. In 1723 he entered the arena of philosophical discussion with his Gedanken r. Philosophischen Natur. etc. In 1735 he was united with J. W. Wolf in his review of Buddeus' Bodenk. u. d. Wolf'sche Philosophie. In 1762 he published a Philosophisches Lexikon, which attained a fourth edition in 1775; and in 1772 an Einl. in d. Philosophie, and Observat. in Nov. Text. Libros, quarum i Pars ex Consort. Libros quae ex Histor. 1. J. W. Wolf. etc. In 1756, with J. W. Wolf in his review of Buddeus' Bodenk. u. d. Wolf'sche Philosophie. In 1762 he published a Philosophisches Lexikon, which attained a fourth edition in 1775; and in 1772 an Einl. in d. Philosophie, and Observat. in Nov. Text. Libros, quarum i Pars ex Consort. Libros quae ex Histor. 1. J. W. Wolf. etc. In 1756, with J. W. Wolf in his review of Buddeus' Bodenk. u. d. Wolf'sche Philosophie. In 1762 he published a Philosophisches Lexikon, which attained a fourth edition in 1775; and in 1772 an Einl. in d. Philosophie, and Observat. in Nov. Text. Libros, quarum i Pars ex Consort. Libros quae ex Histor. 1. J. W. Wolf. etc.
Wald, Wilhelm, a Protestant theologian of Germany, was born March 5, 1789, at Königstein, where he was also died, Jan. 8, 1879, as superintendent and doctor of theology. In 1826 he was appointed pastor of the Haberberger Church in his native place, where he labored for fifty-two years. His literary productions are some Sermons, which were printed by request. See Neue evangel. Kirchenzeitung, 1879, p. 739 sq. (B. P.)

Waldau, Georg Ersch, a Protestant theologian of Germany, was born March 25, 1745, at Nuremberg. He studied from 1763 to 1767 at Aldorf and Leipsic. After completing his studies, he returned to his native place, where he was appointed vicar of St. Clara's. In 1769 he was made professor of Church history, and occupied that position until his death, April 27, 1817. He wrote, Discurso sobre la origen de las leyes en la Iglesia, 1787, Una Versión Axiaresca en Interpretaciones Novi Testamenti (Aldort, 1770); besides, he published sermons, ascetical works, etc. See Döring, Die gelehrten Theologen Deutschlands, iv, 659 sq.; Winer, Handbuc der theol. Lit. (Index in vol. ii); Koch, Gesch. des deutschen Kirchleides, vi, 284 sq. (B. P.)

Waldegrave, Samuel, an Anglican prelate, son of the eighth earl of Waldegrave, was born in 1817. He received a careful religious training; graduated at Balliol College, Oxford, in 1839, taking double first-class honors; and was admitted into holy orders in 1842 at Oxford, and ordained to the curacy of St. Ebbe's in that city. In 1849 he was elected fellow of All-Souls', and in 1853 was appointed Bampton lecturer. In 1857 he was appointed canon of Salisbury Cathedral, and in 1860 was called to preside over the diocese of Carlisle, which office he held until his death, Oct. 1, 1889. Bishop Waldegrave was a humble and devoted excellent pastor, and an indefatigable worker. He published, among other works, The Way of Peace, or Tracing Scripture concerning Justification (London, 1848), in four sermons at Oxford: New Testament Millennium (1866); and Words of Eternal Life (1864), eighteen sermons.

Walden, Charles, proceeded as a Wesleyan Methodist missionary to Western Africa in December, 1840. It was only for a brief season that the infant Church at Cape Coast enjoyed the advantage of his earnest ministry of the Word, his pastoral affection, and his pious example. He died July 29, 1841. See Wesleyan Conference Minutes, 1842.

Waldenses, The, known also in ecclesiastical history as Valdenses, and sometimes as Vaudois. Two theories have been broached to account for the origin of the name—the one that it is derived from Peter Wald, the Lyonnesse reformer; and the other that it is derived from "vals," a valley, the Waldenses or Waldenses being inhabitants of the valleys of Piedmont. Waddington, in his History of the Church, has given the authorities for both these theories.

1. Doctrine. The doctrinal views of the Waldenses agree essentially with those of the Reformers of the 16th century. W. Carlow Martyn, in his History of the Indians, thus states their doctrinal tenets: (1787).

1. The Waldenses, or Vaudois, hold the Holy Scripture to be the sources of faith and religion, without regard to the authority of the fathers or to tradition; and though they principally use the New Test., yet, as USBer proves from Reiner and others, they regard the Old also as canonical Scripture. From their greater use of the New Test., their adversaries charged them, however, with despising the Old Test.

2. They hold the entire faith according to all the articles of the Apostles' Creed.

3. They reject all the external rites of the dominant Church; and that was what the Jesuits and the sacrament of the Lord's supper; and, as, for instance, temples, vestments, images, crosses, pilgrimages, the religious worship of the holy relics, and the vestment of the Roman sacraments; these they consider as inventions of Satan and of the flesh, full of superstition.

4. They reject the papal doctrine of purgatory, with masses or prayers for the dead, acknowledging only two terminations of the earthly state—heaven and hell.

5. They admit no indulgences nor confessions of sin, with any of their consequences, excepting mutual confessions of sin for instruction and consolation.

6. They hold the sacraments of baptism and of the eucharist to be only symbols, denying the real presence of Christ in the bread and wine, as we find in the authoritative book of the sect concerning antichrist, and as Eheataus de Bethania accuses them in his book Antiheataus.

7. They hold only three ecclesiastical orders—bishops, priests, and deacons; other systems they esteem mere human fagments; that monasticism, now in great vogue, is a puerile carcase, and vows the invention of men; and that the marriage of the clergy is lawful and necessary.

8. Finally, they denounce Rome as "the whore of Babylon," deny obedience to the papal domination, and vehemently repudiate the notions that the pope has any authority over other churches, and that he has the power either of the civil or the ecclesiastical sword.

II. History of their Persecutions. That Peter Waldo (q.v.) became intimately associated with the already existing Waldenses there is no doubt. Among the simple inhabitants of the Piedmont valleys, he found those who sympathized with him in his religious sentiments and practices. So general and wide-spread became the so-called heresy that Innocent III, one of the proudest and most bigoted of the Roman pontiffs, determined to crush it out—exterminate the whole pestilential race. The word "heretic" was the language of which he made use. The commission he gave to the authorities, who knew no law above that which went forth from St. Peter's, was to burn the chiefs of the Vaudois, to scatter the heretics themselves, confiscating their property, and consigning to perdition every soul who dared to oppose the haughty mandate of the pope. How these commands of his holiness were carried out history is a faithful witness. Joined with him in his relentless persecution of the Waldenses was Dominic, the father of the Inquisition, the prime article in whose creed came to be that it was a crime against God and the Church to keep faith with heretics. For many years, however, the inhabitants of the more secluded valleys and fastnesses escaped the storms of persecution, and it was not until towards the close of the 14th century that the vengeance of their relentless foes reached this class of the Waldenses, and multitudes perished, victims of the fierce storms of wrath which was poured out on their once peaceful homes. But with few intervals, all through the 16th and 17th centuries, Rome did not cease in her cruel endeavors to exterminate the hated rebels against her authority. Vast numbers of the sufferers from the papal policy of exterminating the Reformed Church, both in France and in the Old World, were included valleys of Piedmont, hoping, in places inaccessible to their enemies, to escape from their pitiless wrath. But the seasons of tranquillity were short; and when the tempest broke forth again, it seemed to be with tenfold fury. It was in vain that Protestant nations ap-
pealed to the dukes of Savoy to put a stop to the persecutions of the emissaries of the pope. They were appeals made to men who dared not face the ire of Rome.

In 1560 commenced one of those dreadful outbursts of the Church's rage against these humble, earnest Waldenses. We are told that, "the population of the valleys still remaining faithful to the religion of their forefathers, the sword was openly unsheathed and the scabbard thrown away. An armed force, commanded by a chief whose name was in terrible contrast with his character—the count de Trinité—poured into the prescribed territory. But a Spirit stronger than the sword upheld the Waldenses, and an arm more powerful than that which assailed them fought on their side. The villages where they were dispersed, children, the feeble and the aged, were sent for refuge to the heights of the mountains, to the rocks, and to the forests. Every man and boy who could handle a weapon planted himself against the invaders, and a successful guerrilla warfare was carried on by small brigades of peasants against the veteran troops that were let loose upon them. Greater exploits and instances of more enduring fortitude were never recounted than those which have immobilized the resistance offered by the Waldenses to their oppressors."

In 1655 the persecution raged again, and if all the protests of Christendom Europe had not implored their complete annihilation of the Waldenses would have been the result. The blood of John Milton was stirred by the story of the barbarous treatment to which they were subjected, and through his influence Cromwell issued one of those mandates which foreign powers had been compelled to respect. A few years of comparative rest were succeeded by another storm of persecution, which burst upon them under the administration of Victor Amadeus, the duke of Savoy, stirred up by France and Rome to make one more effort to extirpate the hated heretics; and the effort was well-nigh successful, for it is said that "during three years and a half the exercise of the ancient religion of the Waldenses had to all appearance ceased in Piedmont." But after the lapse of two or three years, in 1689 several hundreds of them, who had been driven into exile, returned, and the fortunes of the duke of Savoy having undergone a change, he now showed a better disposition toward them. Many of these who had been sufferers at his hands. The account of this campaign by their devoted pastor and leader, Henri Arnaud (q. v.), is one of the most thrilling passages of history in any age.

Such has been the history of the Waldenses all through these ages—subject to untold suffering from persecution; then enjoying, in the quiet valleys of Piedmont, comparative tranquility for a time; then assailed by their ever-repentless foe, the Roman Catholic Church, which has spared no pains, by fire and sword, and the horrors of the Inquisition, to put an end to the unfortunate victims of their violence. While Napoleon was emperor, in common with all his subjects, they were tolerated in the exercise of their religious rights; but when the house of Savoy was again in possession of their ancestral domains, the old persecuting spirit was revived, for, however just and inclined they might be to be tolerant, there was a power behind the throne whose authority was supreme—the power of the ancient foe of the dwellers in the valleys of Piedmont, the pope of Rome.

III. Present Condition.—At last came what, to the down-trodden Waldenses, must have been their "year of woe." As the 18th century waned, and when we know, after all, that what was long and sadly eventful history, full liberty to worship God according to the dictates of their own conscience was accorded to them by Charles Albert. Everywhere they could settle in Italy, and not be molested in the enjoyment of their religious faith. From Turin to Pistoia, not one of the ancient altars, that had wished to remove to Florence. Ten years, however, must elapse before they could take this step, but they were years of preparation to enter upon the evangelistic work which the Waldensian Church was to undertake in Italy. These were the times of the dominion of Victor Emmanuel embraced nearly all Southern Italy, except the Papal States, and now toleration of religion was allowed everywhere, and the time had come when the Waldensian Church could establish its headquarters in Florence. Thither, in May, 1860, the Vaudois Synod decided to remove its theological school, and the next autumn the two professors, Revel (so well known in America) and Geymonet, with eight pupils, took up their residence in the Palazzo Salvati, once the mansion of an archbishop of Florence, and so utilized every part of the spacious building that they secured for their work a coverage of numerous convenient classrooms, but also a chapel capable of holding three or four hundred hearers, rooms for their families, rooms for preparatory school-work, and a suitable place to set up the printing-press which they had brought from Turin. From the Salvati Palace, as a centre of operation, the Waldensian Church has sent forth the missionaries of the Cross in all directions. The college and preparatory schools are still among the valleys of Piedmont. Students who propose to engage in missionary labors as fast as they are educated at La Tour, the seat of the Waldensian college, are transferred to the theological school at Florence, for the future work. The press also has proved a most efficient helper in giving the pure Gospel to Italy. First of all, there was issued from it a stereotyped edition of Diodati's translation of the Bible in Italian in the 16th century. In 1862 there were sent out, under the direction of the Religious Tract Society, 53,397 copies of religious works, large and small. Among these were Il Primo del Papa, 3000; Differenza fra il Protestantismo e Romantismo, 2000; Il Corpo di Grazia, 10,000; and Feci ma non Bussi, 7000. The next year the number was considerably more than doubled, being not far from 120,000 copies, including Diatribhe di De Santis, 78,000; Va a Gesù, 3000; and De Santis, Lettere al Cardinal Patrizi, 3000. Among the books sent out in 1864 were Sermoni del Rev. C. H. Spurgeon (8 vols.), 3000 each. The total for the three years was nearly 224,000 copies. Standard English books translated into Italian and printed in the Italian press have from 10,000 to 20,000 copies of The Pilgrim's Progress were circulated in Italy. From the last available statistics, it appears that all the higher Waldensian seats of learning were in a prosperous condition. Four journals were published at Florence, one in French. There were 10 mission stations, with 80 preaching places, the larger of which received religious instruction. In the different churches are over 2000 converts. They have also their hospitals and schools. In Rome itself they have a place of worship and schools of various kinds. With the progress of religious freedom in all parts of Italy, and the toleration which is everywhere pledged to them by all classes, it cannot be doubted that, with the blessing of Heaven, a prosperous future is before the Waldensian Church.

IV. Literature.—References to the Waldenses are very numerous. All writers of ecclesiastical history dwell more or less upon the record of their sufferings. See Baird, The Waldenses, Albigenses, and Vaudois (Phila. 1844): L'israel des Alpes (Paris, 1851, 4 vols.); [Anonymous], Sketches of the Evangelical Christians of the Valleys of Piedmont (Phila. 1853): Wylie, The Awakening of Italy and the Crisis of Rome (a publication by the American Tract Society); Adam, The Glorious Recovery (New York, 1846), 8vo, from the original of Henri Arnaud; Beattie, The Waldensian or Protestant Valleys of Piedmont (illustr. by Bartlett and Brockdon, ibid. 1888, 4to); Histoire des Vaudois, ou des Habitants des Valles Occidentales de Piedmont, etc. (Paris, 1796, 2 vols., 8vo); Chavas, Les rhones du Temps des Frogs and Reformation, versione di G. F. Maratori (Torino, 1858, 8vo); Faber,
An Inquiry into the History and Theology of the Ancient Vallenses and Albigensians (Lond. 1838, 8vo); Gilly, Waldensian Researches, being a Second Visit to the Vaudois of Piedmont (ibid. 1831, 8vo); Lowther, Brief Observations on the Present State of the Waldenses (ibid. 1832, 8vo); Martin, Histoire des Vaudois de la Vallée du Piémont sur leurs Colonies, depuis leurs Jours (Paris, 1834, 8vo); Goll, Verkehr der böhmischen Brüders mit den Waldensern (Prague, 1877). (J. C. S.)

Waldensia, THOMAS, D.D., a learned English Carmelite, was born at Walden, in Essex, about 1587. His father's name was John Netter, but he chose to be called from the name he received at his baptism. He became the champion of the Church against the Reformers of the reign of Henry IV.; and in that of Henry V., whose favorite he was, he rose to be provincial of his order and a privy-councillor. Henry V. died in his arms; and he himself died while attending the youthful monarch, Henry VI. in France, in 1429.

Waldhausen, KONRAD VON, an Augustinian monk of the 14th century, who ranks as one of the precursors of John Huss (q. v.). He was a native of Austria, and labored from 1345 to 1360 in Vienna as a preacher. His fame and influence as a powerful preacher of repentance led to his being called to Leitmeritz, in Bohemia, by the Pope himself, and there he was excommunicated by Pope Clement VI., acting in his capacity as king of that country. He soon afterwards began to hold services in the Church of St. Gall at Prague, and subsequently in the public market-place of the city. His efforts were directed towards a moral and religious improvement of the people, but did not assail either the doctrines or the fundamental rules of discipline of the Church. But as his influence increased, and multitudes thronged to his meetings to listen to his bold denunciations of all forms of sin, some opposition began to manifest itself; and when he attacked the orders of mendicant friars and uncovered the hypocrisy and depraved character of the monks, he drew down upon himself the vengeance of those powerful enemies. Twenty-nine charges were laid against him before the archbishop of Prague, by Dominican and Franciscan monks, in 1364; but no complainant appeared at the trial consequently ordered, and Waldhausen succeeded in establishing a satisfactory defence. Effort was made the same year, by the archbishop of Austria, to recall Waldhausen to Vienna, but ineffectually. He died in Prague in 1369. See Palacky, Grach. d. Böhm. iii, 1, 161 sq.; 225 note; Jordan, Vördürser d. Hussitenkriege in Böhmen; Neander, Kirchengesch. vol vi.; Herzog, Real-Encykl., s. v.

Waldo, Daniel, a Congregational minister, was born in Waltham, Conn., Sept. 10, 1742, a graduate of Yale College in the class of 1788. For a time he served as a soldier in the Revolutionary army; he was taken prisoner, and imprisoned by the British in the Sugar House, New York, barely escaping with his life. He was ordained pastor of the Church in West Suffield, Conn., May 24, 1792, remaining there seventeen years (1792-1809), acting also, a part of the time, as a missionary in Pennsylvania and New York. After preaching in Cambridgeport, Mass., for about a year (1810-11), he performed missionary service in the destitute sections of Rhode Island until 1825, organizing a Congregational Church in East Greenwich and another at Stantonville. He preached for a time at Harvard, Mass., and for twelve years at Exeter, R. I. Afterwards he resided in Syracuse. At the advanced age of ninety-three he was elected chaplain to Congress, and died July 30, 1831, having reached the great age of a hundred and two years. See Memorials of R. I. Congregational Ministers. (J. C. S.)

Waldo, Horatio, a Presbyterian minister, was a native of Coventry, Conn. He graduated at Williams College in 1804; was a tutor in the college in 1806-7; settled as pastor of the Church in Griswold, Cofn., in 1810; resigned his pastoral charge in 1830; and re-
moved to Portage, N. Y., where he died in 1846, aged sixty-nine. See Sprague, Annals of the Amer. Pulpit, iv, 630.

Waldo, Nathan, a Congregational minister, received the honorary degree of A. M. from Dartmouth College in 1808; was ordained pastor of the church in Williamstown, Vt., in 1806; and died in 1832. See Sprague, Annals of the Amer. Pulpit, ii, 269.

Waldo (or Valdo), Peter, the founder or ally c. the Vaudois or Waldenses (q. v.), a body of Christians who separated themselves from the Church of Rome in the 12th century, was born at Vaux, in Dauphiny, on the banks of the Rhone. He acquired a large fortune by commercial pursuits in Lyons, France; and when he resolved to retire from business, not only devoted himself to the spirit of the Church, but also distributed his goods among them, and in all respects treated them as his children or brothers. The only translation of the Bible then in use was that made by Jerome, called the Latin Vulgate; but Waldo, who was a learned as well as a benevolent man, translated the four gospels into French, this being the first appearance of the Scriptures in any modern language. The possession of these books soon discovered to Waldo and his people that the Church was never designed to be dependent on a priesthood, even for the administration of the sacraments; and his instruction, boldly followed by action, bore the Church to that point of the crisis, when it was first persecuted by the archbishop of Lyons, and at length anathematized by the pope. No longer safe at Lyons, Waldo and his friends took refuge in the mountains of Dauphiny and Piedmont, and there formed those communities which grew in peace and flourished in rustic simplicity "pure as a flower amid the Alpine snows." From these mountains and valleys the simple doctrines of Christianity flowed out in multiplied rivulets all over Europe. Provence, Languedoc, Flanders, Germany, one after another tasted of the refreshing waters, until, in the course of ages, they swelled into a flood which swept over all lands. Waldo is understood to have travelled in Picardy, teaching his Reformation doctrines hundreds of years before Luther was born. He finally settled in Bohemia, where he died in 1179, the same year in which his tenets were denounced by an ecumenical council. The Waldensian Church was a light on the morrow. Waldo was the first to object to the corruptions of the Church, it held its open Bible and pure doctrines; and that same Church still survives, the basis of all reformation movements in Italy. (W. P. S.)

Waldron, Isaac, an English Wesleyan minister, began his itinerant labors among the Methodists of England in 1760, and died (according to Hill) in 1782. He was not eminently either for the poor, or for usefulness. His natural disposition was crooked. He died in obscurity. See Atmore, Meth. Memorial., s. v.

Waldrin, William, a Congregational minister, was the son of captain Richard Waldrin, of Portsmouth, N. H., and grandson of major Richard Waldrin, of Dover, who was murdered by the Indians in 1680, at the age of eighty years. Waldrin was born in New Hampshire, N. H., Nov. 4, 1897, and graduated from Harvard College in 1717. When the New Brick Church in Boston was founded, he became its minister, being ordained May 22, 1722. He died Sept. 11, 1727. See Sprague, Annals of the Amer. Pulpit, i, 316.

Waldschmidt, John, a German Reformed minister, was born in Bremen, Germany, in 1724, and came to America in 1752. He was pastor of the church at Cocalico, Weishielanden, Mode Creek, and Zeilentreich, Pa., from 1752 to 1786. He also supplied Tulphecken (1756-58) and Heidelberg (176-70). He died in 1786. See Corwin, Manual of the Ref. Church in America, s. v.

Wale. See Walrus.

Walenburg, Peter and Adrian, two brothers, born at Rotterdam in the 17th century, who abandoned
WALES

their country and their religion and lived at Cologne. The first was a titular bishop in Myssia, and suffragan to Cologne; the other was the titular bishop to Adriano-ple, and suffragan to Mayence. Their works consist chiefly of controversial pieces against the Protestant, and anti-Roman. During the period of the title of *Franci Waledesburgiorum Opera* (1670, 2 vols. fol.).—Mosheim, *Hist. of the Church*, bk. iv, cent. xvii, ii, pt. 1, ch. i.

**Wales, Christianity in.** The ancient British Church having been founded at a very early period and entirely independent of the Church of Rome, the Roman and Anglo-Saxon churches were quite independent towards the Church of Britain, which were obliged to fall as a refuge in the mountainous districts of Wales, where they gradually diminished in numbers and finally became extinct. For centuries following ignorance and superstition overspread the entire principality, until the Reformation in the 16th century reached Wales through England. Gospel truth spread rapidly among the mountainers, and its benefits were noticeable among all classes. But in the time of the Stuarts the Welsh peasantry, who had once been characterized by a simple scriptural pie- racy, began to degenerate both in religion and morals. Ignorance and vice prevailed to a melancholy extent. Hand in hand with the marauding peasantry came the thieves, and in some districts the clergy and laity were at once ignorant and immoral. When John Wesley visited Wales, he declared the people to be "as little versed in the principles of Christianity as a Creek or Cherokee Indian." But he also declared the Welsh people of the Gospel, "very enthusiastically anxious to avail themselves of every opportunity of instruction."

The Church of England was fully organized, but seemed utterly incapable of accomplishing the work of elevating the masses above the low condition into which they had fallen. Rev. Griffith Jones, however, by establishing a system of education—now known as the Welsh circulating schools—began a moral revolution, which has accomplished great good. He was instrumental in establishing 3495 schools, in which 158,287 scholars were educated. For the further progress of the work, see Skeats, *Hist. of the Free Churches of England*, p. 892 sq. See Welsh Calvinistic Meth- odists.

**Wales, Eleazer**, a Presbyterian minister, was born in Massachusetts, and graduated at Yale College in the class of 1727. He was ordained and settled at Allentown, N. J., in 1730. He remained here but a short time, and accepted a call from the Presbyterian Church in Clermont, N. Y. In consequence of his inadequacy of support, he asked leave of the Philadelphia Presbytery to resign, which, on due consideration, was granted. He was called to Millstone, N. J., Sept. 19, 1735, and joined the East Jersey Presbytery, in the bounds of which it lay. He was one of the first members of the New Brunswick Presbytery, and the only New-Englander besides Treat who was excluded by the Protest. Whi- field and Brainerd both speak of him in their journals in favorable terms. He died in 1749.

**Wales, Elkanah**, an English clergyman of the Established Church, was born in 1588; was for fifty years minister of Pudsey, Yorkshire, whence he was ejected in 1662, and died in 1669. He published a sermon entitled *Monte Ebal Lecellid*, or *Redemption from the Curse*, with a Life of the Author.

**Wales, John**, a Congregationalist minister, was born at Brantree, graduated from Harvard College in 1728. He was ordained pastor of the Church in Raynham, Bristol Co., Mass., in 1781; and died in 1755, at the age of sixty years. See Sprague, *Annals of the Amer. Pulpit*, i, 710.

**Wales, Samuel, D.D., a Congregationalist minister, son of Rev. John Wales, of Raynham, Mass., was born in March, 1748. He graduated from Yale College in 1767; for a short time was a teacher in Dr. Wheelock's Indian School in Lebanon, Conn.; in 1768 was elected a tutor in Yale College, and remained in that position for one year; was ordained pastor, Dec. 19, 1770, of the Church in Milford, Conn. For a short time, in 1776, he served as chaplain in the Continental army. In September, 1781, he was appointed professor of divinity in Yale College, but was not inducted into office until June 12, 1782. Shortly after this he became the victim of an alarming malady—an affection of the nervous sys- tem. In May, 1786, he went to Europe for the benefit of his health, but returned after an absence of six months, without any marked improvement. His pro- fessorship ceased in 1788. His pulpit eloquence was of a high order, and he was one of the ablest preachers of his day. He died in New Haven, Conn., Feb. 18, 1794. See Sprague, *Annals of the Amer. Pulpit*, i, 710.

**Walladur**, in Norse mythology, was a surname of Odin, who was the father (master) of all the slain in battle, because the surviving in battle carried with him.

**Walford, William**, an English Dissenting minis- ter, was born at Bath, Jan. 9, 1773, and was a sometime tutor in Homerton College. He published, *The Book of Psalms, a New Translation, with Notes Explanatory and Critical* (Lond. 1837)—*Curva Romana*:—Notes on the *Epistle to the Romans*, with a Revised Translation (ibid. 1846). He died at Uxbridge, Jan. 22, 1850.

**Walzigo**, in Slavonic mythology, is a god, pro- tector of cattle and flocks, worshiped in the time of the first Slav tribes.

**Walhalla**, in Norse mythology, is the golden pal- ace in the kingdom of Odin where all heroes slain in battle assembled. Everything known by Northern he- roes as luck and blessedness was to be found in Wal- halla. Hermode and Braga received them in the Gla- sor forest, bearing gold leaves, which led the way to the pavilion. The gods, sitting at the table, were waiting the most ravishing, blooming maidens—the Walkthren—where also was spread for them a table of bacchanalian abundance. But there are also in store for them war, victory, and death; because Odin will em- ploy the heroes in order to resist Surtur's army and the inhabitants of Muspelheim on the day of the destruc- tion of the world.—Vollmer, *Wörterb. d. Mythol.* s. v. See Norse Mythology.

**Wali**, in Norse mythology, is the son of the evil Loke. After Loke had caused the death of Baldur, he was caught in the Faranger-trap by a lyre. Then Wali was changed into a wolf, and he tore to pieces his brother. But when those intestines Loke was bound. Another Wali is also called *Ali*.

**Walk** (prop. *Walka* or *Walkav*, *esparvar*). The He- brew verb not only signifies to advance with a steady step, but also to augment a moderate pace until it acquires rapidity. It is used in this sense by the evan- gelical prophet with the greatest propriety in the fol- lowing passage:—"Even the youths shall faint and be weary, and the young men shall utterly fall: but they that wait upon the Lord shall renew their strength: they shall mount up with wings as eagles; they shall run, and not be weary; and they shall walk, and not faint" (Isa. xl, 30, 81).

Walking for the sake of exercise is rarely practiced in the East; indeed, the indolent Orientals are quite unable to comprehend the conduct of Europeans in walk- ing for mere recreation, without any immediately purpose of business. They attribute this to a spirit of restles- ness which they believe to be a kind of curse inflicted upon Christian nations; and, in a dispute between Turks, it is not uncommon for one of the parties, as his worst execration, to wish that his opponent should be con- demned to "walk the hump of a Frank." Arabians are accused by the Greeks of this dislike of locomotion is carried to a still greater extent, and there is scarcely any epithet which would be more offensive to a Turkish or Persian lady than to be called "a walker." This appears also to have been the case with the Egyptian ladies, for there are but few instances of their being represented on the monuments.
Walking-sticks found at Thebes. 3 is of cherry-wood, in Mr. Salt's collection; 3 shows the peg at the side.

"When walking from home, Egyptian gentlemen frequently carried sticks, varying from three or four to about six feet in length, occasionally surmounted with a knob imitating a flower, or with the more usual peg projecting from one side, some of which have been found at Thebes. Many were of cherry-wood, only three feet three inches long; and those I have seen with the knots head generally about the same length. Others appear to have been much longer; the sculptures represent them at least six feet; and one brought to England by Mr. Madox was about five feet in length. Some were ornamented with color and gliding. On entering a house, they left their stick in the hall or at the door; and poor men were sometimes employed to hold the sticks of the guests who had come to a party on foot, being rewarded by the master of the house for their trouble with something considerable in money, with their dinner, or a piece of meat to carry to their family. The name of each person was frequently written on his stick in hieroglyphics, for which reason a hard wood was preferred, as the ascalis, which seems to have been more generally used than any other; and on one found at Athisis the owner had written, 'O my stick, the support of my leg,' etc.

Priests and other Persons of Rank Walking with Sticks. (From Thebes.)

Walk is often used in Scripture for conduct in life, or a man's general demeanor and deportment. Thus we are told that Enoch and Noah "walked with God;" that is, they maintained a course of action conforming to the will of their Creator, and acceptable in his sight; drawing near to him by public and private devotions; manifesting, by their piety, a constant sense of his presence; and by their purity of life a reverence for the moral laws which he had established for the guidance of his creatures. In many parts both of the Old and New Test. we find God promising to walk with his people; and his people, on the other hand, desiring the influence of God's Holy Spirit, that they may walk in his statutes. "To walk in darkness" (1 John i, 6, 7) is to be involved in unbelief, and misled by error; "to walk in the light" is to be well informed, holy, and happy; "to walk by faith" is to expect the things promised or threatened, and to maintain a course of conduct perfectly consistent with such a belief; "to walk after the flesh" is to gratify the carnal desires, to yield to the fleshly appetites, and be obedient to the lusts of the flesh; "to walk after the Spirit" is to pursue spiritual objects, to cultivate spiritual affections, to be spiritually minded, which is life and peace.

By a somewhat different figure, the pestilence is said to walk in darkness, spreading its ravages by night as well as by day. God is said to walk on the wings of the wind, and the heart of man to walk after detectable things.

Walker, Aldace, D.D., a Congregational minister, was born in Strafford, Vt., July 29, 1812. He was graduated for college at Kimball Union Academy, and graduated at Dartmouth College in 1837. From here he went to Brattleboro in 1838. He then entered Andover Theological Seminary, and, after remaining one year in study, graduated in 1840. He was ordained at West Rutland, Vt., Dec. 30, 1840, where he preached for twenty-two years, and was dismissed Aug. 26, 1862. He then became acting pastor at Wallingford, Vt., in 1862, until installed there, March 10, 1869, in which office he remained until his death. He was disabled from service and resigned in January, 1877, but his Church did not accept. He was a trustee of Middlebury College from 1855; corporate member of the American Board of Commissioners for Foreign Missions from 1873. He was register of the General Convention of Vermont from 1856 to 1870, and a member of Fairbank's Board of Education from its first appointment in 1856. He died of general debility, July 24, 1878. (W. F. S.)

Walker, Alexander Waddell, a minister in the Methodist Episcopal Church, South, was born in Charleston, S.C., Jan. 22, 1815. He received a good grammar-school education; spent much of his early manhood in marble-working, displaying both skill and taste; was converted in 1830, and was admitted into the South Carolina Conference in 1834, and for twenty-three years did efficient work on circuit, mission, and station, in the up-country and in the lowlands, in the missions of the swamps and rice-fields, and in the bracing air of the mountains, to the white man and to the black, to the politie and refined, and to the rude and unrefined. In 1857 Mr. Walker settled at Spartanburg as superintendent, and in 1861 enlisted in the Confederate army and served two years. He died in 1870. Mr. Walker was distinguished for purity and honesty of character, for sincerity, kindness, and generosity of heart, for modesty, constancy, courage, and conscientiousness. See Minutes of Annual Conferences of the M.E. Church, South, 1870, p. 419.

Walker, Augustus, a Congregational missionary, was born in Medway, Mass., Oct. 30, 1822. He was converted at the age of twelve; followed mercantile pursuits in Charleston, S.C., and Baltimore, Md.; prepared for college at Leicester Academy, and graduated at Yale in 1846. In 1852 he graduated at Andover Theological Seminary, was married and ordained, and in the following year sailed for Smyrna, Turkey—Diabekir, on the Tigris, being the field designated for him. Here he labored hard and successfully the remainder of his life, except from 1864 to 1865, when he visited his native land. He was welcomed with much joy by his friends and the natives upon his return to Diabekir. But his work was nearly done. His exhausted and overworked body was stricken with the cholera, and, in spite of all that could be done, he died, Sept. 20, 1866. Mr. Walker did a noble and enduring work on the banks of the Tigris, and his death was felt severely both in
Turkey and America. *He fell where the standard-bearer wishes to fall, at his post, doing manfully, earnestly, even beyond his strength, the work given him to do.* See Cong. Qurr. 1867, p. 202 sq.

**Walker, Benjamin M.,** a Methodist Episcopal minister, was born at Springfield, Mass., April 26, 1809; was converted in 1820; licensed to preach in 1831; and joined the New England Conference in 1834. On the division of the conference he became a member of the Providence Conference. His appointments were as follows: Barnstable, Mansfield, Franklin, Scitico, Tolland, Glastonbury, Wapping, North-west. He was installed in Doc. 2-st., Square Pond, Norwich Falls, Eastford, South Coventry, West Thompson, South Glastenbury, Wapping, Moosup, Staffordville, Tolland, Windsorville, and Quarryville, where he died, March 28, 1871. Mr. Walker was a man of great devotedness, faith, and zeal. See Minutes of Annual Conferences, 1872, p. 37.

**Walker, Charles, D.D.,** a Congregational minister, was born in Woodstock, Conn., Feb. 1, 1791, and died in Binghamton, N. Y., Nov. 28, 1870. At about the age of seventeen years he attended one term at the Academy at Thetford, his education being largely obtained by his own efforts. Subsequently he became a teacher, before he was committed with the Church, and in the year following turned his attention towards the ministry. In September he began to teach at Cherry Valley, N. Y., remaining one year, and then entering the Academy at Plainfield, N. H. In 1818 he entered the Theological Seminary at Andover, and, graduating in 1821, went immediately to New York city, to preach under the direction of the Seaman's and the Evangelical Missionary societies of that city. Going to Central New York, in the year after, he received ordination from the Otsego Presbytery, Feb. 27, at Norwich. After this he preached three months in Lebaon, N. H.; and then in Apr. 2, 1822, after having served there temporarily, was installed pastor of the Church in Rutland, Vt., and served there until 1833. He was trustee of Burr Seminary, Manchester, Vt.; a director of Vermont Domestic Missionary Society, and a warm temperance advocate. In consequence of bronchial trouble he was forced to abandon the pulpit for a time, and took charge of a seminary in Castleton, Vt., for one year (1834). During part of 1834 he supplied the Pine Street Church in Boston, and Jan. 1, 1835, was installed pastor of the Church in Brattleborough, Vt., in which position he remained until Feb. 11, 1846. In 1846 he accepted a call to the Seekonk, R. I., led Depart, Vt., and resigned in 1864. Though not a brilliant preacher, his style was singularly clear and chaste. He received the honorary degree of A.M. from the University of Vermont in 1823, and from Middlebury and Dartmouth colleges in 1825. The degree of D.D. was bestowed by the University of Vermont in 1847. He was elected one of the corporation of Middlebury College in 1837, and of the American Board of Foreign Missions in 1838. He died while on a visit to his daughter at Binghamton, N. Y. See Cong. Qurr. 1871, p. 537.

**Walker, Charles E.,** a minister in the Methodist Episcopal Church, South, was born in Charleston, S. C., Jan. 22, 1815; experienced religion in 1830; and entered the South Carolina Conference in 1834. In 1855 he was made superintendent; in 1856 was appointed agent for Wofford College; and died Jan. 18, 1857. Mr. Walker was a man of stern integrity, sound judgment, and high moral courage. See Minutes of Annual Conference of the M. E. Church, South, 1857, p. 176.

**Walker, Edward P.,** a Presbyterian minister, was born in Amesville, O., in 1834. He entered Marietta College, O., in 1852, where he graduated in 1856. He studied theology in Andover Seminary, and was licensed at Athens Presbytery in 1859. He died Dec. 27, 1861. See Wilson, Presb. Hist. Almanac, 1863, p. 510.

**Walker, Elkanah,** a Congregational minister, was born in Yarmouth, Me., Aug. 7, 1805. He received his preparatory education at Kimball Union Academy. He graduated at the Bangor Theological Seminary in 1837, and was ordained at Brewer, Me., Feb. 14, 1838. He was set out for a foreign mission of the American Board of Commissioners for Foreign Missions, and was four months in traversing the wilderness from Missouri. He was stationed at Tahimakain until 1848, when the Indian massacre and troubles necessitated his removal to Fort Colville. After 1849 he resided in the interior, often acting as pastor there, and at Hillsborough and other missions. In 1857 he was trustee of the Tusital Academy and Pacific University, and from 1847 was President of the Oregon Bible Society. He died at Forest Grove, Nov. 21, 1877. (W. F. S.)

**Walker, Eliphalet, a Presbyterian minister,** was born at Taunton, Mass., Feb. 18, 1780. He was fitted for college at the Academy in his native town, and was a graduate of Brown University in the class of 1803. After leaving college, he made a "public profession of his faith in Christ, and united with the Congregational Church in Dighton, Mass. He commenced soon after this the study of theology with Rev. Dr. Emmons, of Dunkirk, N. Y. He was ordained in 1807. At the same time, was installed pastor of the Presbyterian Congregations in Homer, N. Y., where he remained until his death. At one time there was a little restiveness on the part of a few persons in his Church, and the question of his dismissal was agitated. He interposed no objection, and consented to the calling of a council to consider the matter. It was said that "the moderator opened the session with a prayer of peculiar fervor and earnestness, especially praying for the movers of so responsible a step as severing the pastoral relation. The spirit of the prayer awakened new thoughts and feelings in the assembly. In close one of the chief agitators requested a delay of the proceedings, and moved, before the Church, a dismissal of the matter to be presented to the council, which motion was unanimously carried." At once a remarkable revival commenced, and many persons were hopelessly converted. During his ten and a half years' ministry in Homer the Church enjoyed three general revivals. At the time of his settlement the number of communicants was 99. He received into the membership of the Church 468. At the time of his death, after all losses by removals, deaths, etc., the number of members was 427. And yet, though the Church was thus far unproductive, the pastor, renounced all righteousness of his own as the ground of salvation, and trusted alone in the efficacious work of the Lord Jesus. He died June 4, 1839. See Walker Memorial, p. 55. (J. C. S.)

**Walker, Francis,** one of Wesley's helpers, was born at Tewkesbury, Gloucestershire. He was at the conference of 1753, labored in Wales and Cornwall. One of the great revivals in Cornwall was under his ministry (in 1744). He had his share in suffering persecution. Mr. Walker eventually married and settled in the city of Gloucester, where he died. See Atmore, Mott. Memorial, n. v.; Smith, Hist. of New Methodism, 1, 357, 370. Walker, George, (1), an eminent Puritan divine, was born at Hawshead, Lancashire, England, in 1681. He was educated at St. John's College, Cambridge; and went to London, where, in 1614, he became rector of St. John the Evangelist's, in Watling Street. Here he continued for nearly forty years, refusing every other preferment. He also became, at the same time, chaplain to Dr. Felton, Bishop of Ely. He was distinguished for his controversial powers and their exercise in several instances. In 1635 he preached a sermon in favor of the sacred observance of the Sabbath, for which he was prosecuted by archbishop Laud, fined, and imprisoned; but was released by order of the Parliament. He was chosen in 1648 one of the Assembly of Divines, and a witness
against Laud, in which he testified that he had endeavored to introduce popery. He died in 1651. See Chalmers, Bayo. Dict. s. v.

Walker, George (2), D.D., an Irish clergyman of the Church of England, was born of English parents in London, England. He was educated at the University of Glasgow, and took orders in the Church of England, after which he became rector of Donoughmore, near Londonderry, Ireland. When James II laid siege to that city in 1689, Walker raised a regiment, with which he gallantly defended Londonderry. After the king had abandoned his government, and succeeded in holding the city until James was obliged to raise the siege, July 30, 1689. He received the thanks of the House of Commons, and was nominated bishop of Derry by William III; but desiring to pass through another military campaign before entering upon the duties of the episcopal office, he was killed at the battle of the Boyne, July 1, 1690. He published A True Account of the Siege of Londonderry (1689), which was attacked and criticized, and the attack brought out a Vindication. A statue, mounted on a lofty pillar, had been erected to his memory in Londonderry.

Walker, George (3), a Dissenting minister, was born at Stowupland, England, in 1734. He became pastor of a body of Dissenters at Durham in 1757; of another, at Great Yarmouth, in 1761; and of another, at Nottingham, in 1774; was tutor in mathematics at Warrington from 1772 to 1776; and tutor in various branches at Manchester in 1776. He died in London in 1797. Among his published works are, Doctrine of the Sphere, etc. (1775);—Dissenter's Plea against the Test Laws (1790);—Sermons on Various Subjects (ed.);—Essays on Various Subjects, with a Life of the Author (1809, 2 vols.).

Walker, George W., a Methodist Episcopalian minister, was born in Frederic City, Md., Nov. 26, 1804, of Roman Catholic parents. When he was quite young his father, through curiosity, brought into his family a Bible, which was soon the means of converting them all. But George was led astray by gay companions, and soon forgot the Christian. Through the instrumentality of his pious sister he was brought back; and, after much struggling, he yielded to the ministerial call, and in 1826 entered the Ohio Conference. Soon after entering the ministry, he was sent to Michigan, than which there was then open no harder field for the itinerant. But no swollen river, dismal swamp, or dangerous fen could daunt the lion-hearted George Walker. In 1839 he took charge of the Lebanon District, O., where he remained four years. Thence he went to Cincinnati, where he spent three years. He next served a full term upon the Dayton District. His last appointment was to the Hildreth District, where he died, July 31, 1856. Mr. Walker was remarkable for his manliness, intelligence, and devotedness. As a preacher he was powerful, both in argument and declamation. See Minutes of Annual Conferences, 1866, p. 155.

Walker, James (1), D.D., the venerable primate of the Church of England, bishop of Edinburgh, and Scotch professor of divinity. No record remains of his birth or early life. He took a regular Scottish college course, graduated at the University of Cambridge, and in 1796, returning to his native country, devoted himself to literature as sub-editor of the third edition of the Encyclopaedia Britannica. In 1830 he was elected bishop of Edinburgh; also president, or primate, of the ministerial body to which he belonged. He died in 1841. Bishop Walker was highly instructive, amiable, and revered by all who knew him. See Christian Remembrancer, 1841, p. 319.

Walker, James (2), D.D., an American Unitarian clergyman, was born at Boston, Mass., then a part of Woburn, Aug. 16, 1794. He graduated at Harvard College in 1814, and studied theology at Cambridge; was pastor of the Unitarian Church in Charlestown from 1818 to 1839; editor of the Christian Examiner from 1821 to 1839; was Aford professor of intellectual and moral philosophy from 1821 to 1827; and president of Harvard College from 1838 to 1860. He died at Cambridge, Dec. 23, 1874. Among his published works are, Sermons Preached in the Chapel of Harvard College (1861);—Memoir of Josiah Quincy (1867). He was also editor of Stewart's Active and Moral Powers (1849), and Reid's Intellectual Powers (1850).

Walker, James McCulloch, a Presbyterian minister, was born near Charlotte, N. C., Nov. 1, 1829. He graduated with honor at Davidson College, N. C., in 1847; studied theology at the Erskine Associate Reformed Presbyterian Seminary, Due West, S. C.; was licensed by the First Presbytery of the Associate Reformed Synod of South Carolina in 1850; served two years as a missionary in Kentucky; was ordained pastor of Sardis Church, N. C., May 9, 1851; and subsequently preached in Lancasterville and Waxhaw churches, S. C., and Philadelphia Church, N. C. He died April 15, 1860. Mr. Walker possessed a vigorous intellect; was well versed in theology, science, and general literature; an excellent preacher; a ready writer, contributing largely to the religious press of the day. A Sermon on Temperance, and a tract entitled Grief not the Holy Spirit, have been published. See Wilson, Prob. Hist. Amænae, 1861, p. 110. (J. L. S.)

Walker, Jason, a Methodist Episcopal minister, was born in Pittsylvania County, Va., Feb. 17, 1810. He was converted when about seventeen years of age; successfully filled the offices of class-leader, exhorter, and local preacher, till in June, 1818, when he was received on trial in the travelling connexion. He labored as follows: Wethersfield, 1818; Barre, 1814; Bristol, Somerset, and Rhode Island, 1816; Mansfield, 1816; Warwick Circuit, 1818. He died at Smithfield, R. I., April 10, 1819. Humility, zeal, and patience were his character-istics. See Minutes of Annual Conferences, 1859, p. 328.

Walker, Jeremiah, a Baptist minister, was born in Bute County, N. C., about the year 1747. He is said to have been a lad of remarkable precocity, and was distingushed for the speed of his books and mental improvement. When comparatively young, he became a hopeful Christian, and in due time began to preach. His associations with his brethren, who, however, were good men, and in many respects well fitted to the spheres in which they were called to labor, did not help him much in his mental development. But, as his biographer tells us, "the inrinsible energies of his genius towered above every obstruction." For some time he preached in the neighborhood of his native place and in Pittsylvania County, Va. In 1769 he became the pastor of a newly formed Church in Amelia County. Here he continued a preacher of divine usefulness. In a few years, with the assistance which he had from others, especially a number of young preachers who had been trained by him, he established between thirty and forty churches south of James River. In these churches there were not a few persons of character and influence, who afterward became distinguished ministers of the Gospel. As a preacher, Mr. Walker was unequalled by few of any denomination. He suffered persecution, as did many of the Virginia Baptist ministers, and was thrown into prison. When released, he continued to preach with great success for some time. But he came under a cloud, overtaken by temptation; and although, after having passed through discipline, he was restored,
he never resumed the place he once occupied among the ministers of his denomination. His last illness was attended with great physical suffering. He died, as was believed, an humble Christian, accepted by his Lord in spite of all his failings. His death occurred Sept. 20, 1792. See Benedict, History of the Baptists, ii, 390. (J. C. S.)

Walker, Jesse, a noted pioneer of the Methodist Episcopal Church, whose name was identified for years with the progress of Methodism, was a native of North Carolina. The date of his birth is not ascertained, and there is no record of his early life. He was admitted as a travelling preacher in the Western Conference in 1802, travelled circuits in Tennessee and Kentucky about seven years, and in 1809 was appointed to pioneer the Church through Illinois. His appointment was a mission to the whole territory. The country between Kentucky and the interior of Illinois was then a wilderness, and difficult to travel. McKendree, afterwards bishop, but then presiding elder of the Cumberland District, set out with his pioneer itinerant to assist him on the way. They journeyed on horseback, sleeping in the woods on their saddle-blankets, and cooking their meals under the trees. "It was a time," says bishop Morris, who knew both of them, "of much rain; the channels were full to overflowing, and no less than seven times did their horses break through the rapid streams with their riders and baggage; but the travelers, by carrying their saddle-bags on their shoulders, kept their Bibles and part of their clothes above the water. This was truly a perilous business. In due time they reached their destination safely. McKendree remained a few weeks, visited the principal neighbors, aided in forming a plan of appointments for the mission, and the new settlers received them with much favor." Walker, though left alone in the territory, was not discouraged, and, as the result of his first year's experiment in Illinois, two hundred and eighteen Church members were reported in the pages of the Minutes. His next field of labor was Missouri, and he continued to operate thenceforward alternately in the two territories until 1812, when, as presiding elder, he took charge of all the Methodist interests of both. The old Western Conference having been divided, in 1812, into the Ohio and Tennessee Conferences, the Illinois and Missourian work pertained to the latter. He had charge of districts in the two territories until 1819, when he was appointed conference missionary, that he might range about and form new fields of labor among the destitute—a work to which he was peculiarly adapted, both by nature and grace, and which he continued to be employed for many years." In 1820 this veteran pioneer formed the purpose of planting Methodism in St. Louis, where previously Methodist preachers "had found no rest for the soles of their feet, the early inhabitants from Spain and France being utterly opposed to our Protestant principles, and especially to Methodism." Some idea of his success in this bold undertaking may be obtained from the fact that, as the result of the first year's experiment, he reported to the conference a chapel erected and paid for, a flourishing school, and seventy Church members in St. Louis. The next year (Oct. 24, 1820) the Missouri Conference held its session in that city, when "an excellent and venerable brother, William Beauchamp, was appointed" his successor. Walker was continued conference missionary, and in 1823 began to turn his special attention to the Indian tribes up the Mississippi. In this self-denying work he was most successful in guiding the faithful in establishing new missions until 1834, when his health had become so infirm that he was obliged to take a superannuated relation." He retired to his farm in Cook County, Ill., where he died in great peace, Oct. 5, 1855. See Minutes of Annual Conferences, ii, 487; Sprague, Annals of Methodism, vii, 390; Stevens, Hist. of the M. E. Church, iv, 354. (J. L. S.)

Walker, John (1), D.D., a minister of Exeter, England, is said to have been born in Devonshire near the close of the 17th century. He is best known by his work entitled An Attempt towards Recovering an Account of the Numbers and Sufferings of the Clergy who were Sequestered in the Rebellion. He died in 1720.

Walker, John (2), a Church of England divine, was born in Cheshire in 1719. He was brought up to business; and after marrying and settling as a draper, he experienced religious convictions by the preaching of the Methodists, among which body he first exercised his gifts as a preacher. He next went through a regular academic course at Northampton in preparation for the ministry, after which he settled as minister at Long Buckley, Northamptonshire. About 1760 he removed to Framingham, and a few years later to Walpole, Suffolk, where he continued until his decease, Aug. 31, 1805. Mr. Walker was a man of eminent piety, humility, candor, and benevolence. He possessed a clear understanding, a sound judgment, and was well versed in theology. See Theological Magazine, 1805, p. 437.

Walker, John (3), an Irish clergyman, was born in 1787, and was educated at Trinity College, Dublin, of which he was for some time a fellow, but was expelled about 1800, and originated a sect called the Church of God. He died Oct. 25, 1833. He edited several small works. See (Loud.) Gentleman's Magazine, 1833, ii, 540.

Walker, John (4), an English clergyman, was born in 1776. He was educated at Oxford, where he became fellow of New College; and was vicar of Home-church, Essex, from 1819 until his death, which occurred April 5, 1831. Among his published works are, Curta Oxoniensis, a section of Church articles from the Gentleman's Magazine (1806, 3 vols.). He was also one of the original proprietors of the Oxford Herald, and for several years an assistant editor.

Walker, John (5), a minister of the Associate Church, was born in Washington County, Pa., in 1787. He was educated at Jefferson College, in his native county, studied theology with Dr. Anderson, and was licensed in 1809. He first settled in Centre County, Pa., where he remained three years preaching to various congregations, and then removed to Harrison County, O., where he continued to labor until his death, in 1845. See Sprague, Annals of the Amer. Pulpit (Associate), p. 35 sq.

Walker, John (6), a Methodist Episcopal minister, was born in Hampshire County, Va., Feb. 28, 1797. He removed with his parents to Ohio in 1814; was converted soon after; joined the Ohio Conference in 1821; and served with great zeal and usefulness on the following circuits: Knox and Huron in 1822, West Wheeling in 1823, Burlington in 1824, and in 1825 Salt Creek Circuit, where he died of pulmonary consumption. See Minutes of Annual Conferences, 1827, p. 540.

Walker, John (7), a Methodist Episcopal minister, was born in Burlington County, N. J. He was converted at Mount Holly in his nineteenth year, received on trial in the Philadelphia Conference in 1802, and was pointed to the Trenton Circuit, and subsequently to the following places: Flanders, Salem, Chester, Bristol, Philadelphia, Lancaster, Smyrna, Dauphin, Gloucester, Burlington, New Mills, Freehold, Bargaintown, Camden, and Swedesborough. In 1835 he took a supernumerary relation, and spent the remainder of his life in Clarion County, Pa., where he died April 5, 1849, in the eighty-fifth year of his age. He was a most successful preacher in winning souls. As a man, he was universally beloved: as a Christian, his piety was deep and genuine. See Minutes of Annual Conferences, iv, 330.

Walker, Joseph (1), an English Congregational minister, was born in 1802. Mr. Walker was for many years a teacher in the public schools. He graduated
Walker, Joseph (2), an English Wesleyan minister, was converted at the age of thirteen under the ministry of John Wesley. In 1811 he was accepted as a local preacher, and in 1814 as a class leader. On occasion of the death of his father, he was temporarily laid aside at Dover from 1834 to 1836. He became a superintendatry at Luton, Bedfordshire, in 1845, and died April 14, 1857, in the sixty-ninth year of his age. His entire course was one of great usefulness. See Wesleyan Minutes, 1857.

Walker, Joseph H., a Methodist Episcopal minister, was born at Milford, Conn., in 1825. In 1834 he was converted at the age of twenty; began preaching in 1869; supplied the Lisbon charge in 1870; and in 1871 joined the Maine Conference, and was appointed to Maple Circuit, where he labored two years, and then returned to Wilton, where he died of consumption, Aug. 26, 1875. He was educated at the Connecticut Quarterly School, and at Connecticut College, New London, where he graduated in 1856; and was licensed to preach in 1858, and became a noted tutor; he was for a time one of the preachers before the court of Charles I at Oxford. In May, 1848, he was ejected from his fellowship, and traveled on the Continent, residing mostly at Rome. After the Restoration he was reinstated in his fellowship, and made another visit to Rome as traveling tutor to some young gentlemen. In 1857 he was chosen master of his college, and was also assistant to Abraham Woodhead, who kept a popish seminary. He soon began to give indications of a decided leaning towards the Roman Catholic religion. He went to London in 1868, and on his return to college he announced himself a Roman Catholic. He had mass in his private lodgings, and in 1867, under letters patent from King James, began the publication of books against the Reformed religion. He had some apartments in the college arranged for his use as a chapel, and the income of a fellowship set apart for the maintenance of a priest. For these acts, which were violations of law, he was imprisoned in the Tower, but afterwards released in 1690. He died Jan. 21, 1699. Among his published works are Apology and Defence of the Roman Catholic Religion, 1519; A History of the Church Government (1662);—An Historical Narrative of the Life and Death of Christ (1685) —and many others.

Walker, Peter J., a minister in the Methodist Episcopal Church, South, was born in Williamson County, Tenn., 1808; attended public school in 1814; was licensed to preach in 1851, and joined the Alabama Conference in 1858. He died in 1860. See Minutes of Annual Conferences of the M. E. Church, South, 1860, p. 283.

Walker, Robert (1) (commonly called the Wonderful Robert Walker), a minister of the English Church, was born at Seathwaite, England, in 1709. By his own industry he qualified himself for holy orders, was ordained, and was made a member of Seathwaite College, at the salary of five pounds per annum. This, however, was afterwards increased, so that by rigid economy he was able to maintain his family, and at his death in 1802 leave two thousand pounds. See his Life by Wordsworth.

Walker, Robert (2), a talented minister of the Church of Scotland, was born in the Canongate, Edinburgh, in 1716. He was educated at the University of Edinburgh, and was licensed in 1737. He was ordained minister to Straiton in 1738, and remained there nine years, when he was transferred to the second charge of South Leith. In 1754 he was again removed to one of the collegiate charges of the High Church, Edinburgh,
where he continued until his death, April 4, 1783. He published two volumes of *Sermons*. See *Memoir prefixed to his Sermons*.

WALKER, Robert (3), an English Methodist preacher, was born at Great Gatemead, in the township of Wensleydale, Yorkshire, in 1729. He was converted in his youth and joined the New Connexion. His work as a local preacher gave promise of a life of usefulness in the Church, and he entered the ministry in 1863. He travelled in Barnsley, Stockton, Liverpool, Birmingham, and Alnwick; and at the end of ten years showed a steady growth of his work, and in 1874 he became a supernumary. Hoping for recovery, he took a voyage, but his useful life was cut short; he died at sea, Dec. 21, 1874. See Baggaly, *Digest of the Methodist New Connexion*.

Walker, Samuel, a Church of England divine, was born at Exeter, Dec. 16, 1714: entered Exeter College, Oxford, in 1732, and took his A. B. degree in 1736; and in 1737, was ordained to the curacy of Doddiscombleigh. In the following year he travelled in France, and added music to his acquisitions; and in 1839 returned and resumed his ministry as curate of Lanlivery in Cornwall. Subsequently he removed to thecuracy of Southgate, where his pastoral spirit underwent a radical change for the better. He died July 19, 1786. Mr. Walker was attractive and commanding in person, expressive in features, frank and courteous in conversation. His tracts are considered of great value, especially *The Christian; a Course of Practical Sermons* (1755). Best in the best of his language. His posthumous works are, *Fifty-Two Sermons on the Catechism* (1768);—*Practical Christianity*;—*The Commen of Grace*;—*The Christian Mirror*;—*The Refiner*, or God's Method of Purifying his People;—*The Christian Armor;*—*Discourses on Scripture*. See *Christian Observer, Feb. 1877*, p. 160; *Christian Remembrancer*, 1836, p. 709; *Church of England Magazine*, i. 468; Sidney, *Life, Ministry, and Remains of Samuel Walker* (1885).

Walker, Saunders, a Baptist minister, was born March 17, 1740, in Prince William County, Va. He was a brother of Rev. Jeremiah Walker. Although he had not the intellectual ability of this brother, unlike him he passed through life with no stain left upon his character. He is spoken of as a remarkable instance of the transforming influence of the grace of God. "Before his conversion he was a turbulent, unmanageable temper, and was much addicted to the vices naturally attendant on such a disposition. But the Divine Spirit came upon him at heart, but not at home; so that he was ever after distinguished for the meekness and gravity of his deportment. The meek Saunders Walker was a proverbial expression among all who knew him." In the twenty-seventh year of his age he began to preach the Gospel, and continued in the office of the ministry for thirty-eight years. For some time he had charge of a Church in Bute County, N. C. In 1782 he removed to Georgia, where he remained during the rest of his life. For a time he and Rev. Daniel Marshall were the only ordained ministers in the upper part of the state. It was a period of great political excitement, and party spirit was then rife. Walker was well called to meditate in cases of political animosities, and to reconcile those who had become alienated. The gentleness of his character, and his freedom from the bitterness which turns friends into enemies, eminently fitted him to be a peacemaker, and he had the blessing which our Lord promises to them who are peacemakers. After a life of great usefulness in the cause of his Master, nearly forty years of which were spent in the active duties of the ministry, he died in 1805. See Benedict, *History of the Baptists*, ii. 329. (J. C. S.)

Walker, Simeon R., a minister in the Methodist Episcopal Church, South, was born in MacNairy County, Tenn., Jan. 3, 1864. He professed religion at the age of fifteen, and was received into the Memphis Conference in 1854. In 1858 he was transferred to the Wachita Conference and appointed to the Hampton Circuit, where he died, June 23, 1859. Mr. Walker was a pious man, full of zeal and love for the Church. He died in the full assurance of the last things. See *Minutes of the Annual Conferences of the M. E. Church, South*, 1859, p. 192.

Walker, Thomas (1), a minister of the Society of Friends, was born in Leeds, England, in 1794. He did not enjoy many educational advantages, yet he was instrumental in doing much good. His life was characterised by the exalted spirituality and cheerful, humble willingness to do what he could in the service of the Saviour. He died at Leeds, June 24, 1851. See *Annual Monitor, 1852*, p. 91.

Walker, Thomas (2), an English Wesleyan minister, was received into the Church in early life, into the ministry in 1824, and died April 3, 1828. He was active in his labors. See * Wesleyan Minutes*, 1830, p. 556.

Walker, Thomas (3), an English Wesleyan minister, was converted in his fifteenth year, entered the ministry in 1824, retired in 1847, and settled in York, where he died, July 7, 1848, in the fiftieth year of his age. "His qualifications for the work of the ministry, and the uprightness, integrity, and kindness manifested in his character, made his labors to be esteemed in proportion as they were known." See * Wesleyan Minutes*, 1848.

Walker, W. S. C., a Methodist Episcopal minister, was born in Warren County, Tenn., June 27, 1830, and received the best training in early life. He was converted at the age of twenty-four; joined the Southern Illinois Conference in 1865; and served successively at New Haven, Carmi, Grayville, Marion, and MacLeansborough, where he died, Jan. 12, 1873. Mr. Walker was a man of remarkable energy and faithfulness. See *Minutes of Annual Conferences*, 1873, p. 136.

Walker, William (1), a learned English divine, was born in Lincolnshire in 1823. Among other works, he published a *Treatise on English Particles*, and *Idiomologia Anglo-Latina*. He died in 1884.

Walker, William (2), a Baptist minister, was born in Dighton, Mass., Sept. 19, 1817. When a young man he resided in New Bedford, where he learned the trade of a shipwright. While thus engaged, he became a hopeful Christian, and his attention was soon turned to the interests of religion. He was a student for a few years at the Academy in Middleborough, and was a graduate of Brown University in the class of 1843. He pursued theological studies at the Newton Institution for six months, and then went to the West, where he found everywhere an open field for ministerial labor. For a year and a half he preached at Dixon, III. While attending a meeting of a Baptist association at Peoria, Ill., he was attacked by a fatal disease, and lived only nine days, dying Oct. 26, 1846. See *The Walker Memorial*, p. 91. (J. C. S.)

Walker, William H., a preacher of the United Methodist Free Church, was born at Liverpool, May 21, 1815. He was converted and called to the gospel ministry in 1839. In 1855 he separated from the Wesleyans and joined the Association. After careful preparation, he entered the ministry in 1840, and began a mission at Hamburg, where he labored for seven years, both English and Americans joining his Church. He returned to England in 1847. In 1856 his health gave way, and for twenty-one years he acted as chaplain to the Salford Cemetery. He served his generation faithfully, and died of apoplexy, Aug. 25, 1878. See * Minutes of the 23rd Annual Assembly*.

WALKINSHAW, Hugh, a minister of the Reformed Presbyterian Church, was born in the County of Antrim, Ireland, June 15, 1803. He removed with his father's family, in 1815, to Belmont County, O., and was
WALKYRIES

afterwards educated in Franklin College, where he graduated in 1827. He studied theology under Dr. Black of Pittsburgh, and Dr. Wylie, of Philadelphia. He was licensed to preach in 1832, and in the spring of 1835 was settled as pastor of the congregations of Brookland, North Washington, Union Creek, etc., Pa. In 1841 the charge was divided, and he remained as pastor at Brookland and North Washington, where he continued to labor until his death, which occurred April 19, 1849. See Sprague, Annals of the Amer. Pulpit, ix, 83 sq.

WALKYRIES (Anglo-Saxon, Wålignyrges, from val, the battle-field, and kjora, to choose), in Norse mythology, are two beautiful young maidens in the service of Odin, as his cup-bearers, called Hrist and Miel—the former name signifying a black cloud, the latter a watery, floating vapor. In general, they are imagined as hovering over battles, or even participating in the conflict, marking with the point of the lance the heroes who shall fall, and whom they shall conduct to Walhalla. They somewhat resemble the Hours or Destinies, but never attain that lofty and unapproachable dignity which characterizes those deities. The Walkyries, though superhuman, are not goddesses. They fall in love with men, and then confer their favors in battle as they are prompted by their own passions. For this Odin expels them from Walhalla, dooms them to marriage, or drives them into a trance, where they lie sleeping until the warrior whose understanding how to break the spell.

WALL (prop. מִבְצָר, as a defence, or מִבָּיְד, as a barrier; sometimes מִבָּיְד, perhaps from its rocky character; also various forms from the root מִבָּיְד, to enclose; occasionally מִבָּיְד, from its strength; מִבָּיְד, from its exterior position; מִבָּיְד, from being dug, etc.; Gr. κώμα). The walls of ancient cities and of houses were generally built of earth, or of bricks of clay mixed with reeds or straw and hardened in the sun. When any breach took place in such a mass of earth, either by heavy rains or by some defect in the foundation, the consequence were serious (Gen. xliv. 6; Ps. lxxvi. 5; Isa. xxx. 13). It is not surprising that walls which were often made in such a rude and perishable manner could be easily destroyed by fire (Amos i. 7, 10, 14). The extensive mounds on the plains of Mesopotamia and Assyria, marking the sites of ancient cities, show that the walls were principally constructed of earth or clay. The thickness of the wall surrounding the palace of Khorsabad is fixed by Botta at 4 feet 9 inches; a very close approximation to the width of the wall of Nineveh, upon which three chariots could be driven abreast. The wall of Babylon was 87 feet broad, and six chariots could be driven together upon it. Not unfrequently stone walls, with towers and a fosse, surrounded fortified cities (Isa. ii. 15; ix. 10; xxvi. 1; Neh. iv. 8; Zeph. i. 16). See FORTIFICATION.

Houses abutting on the city wall frequently had windows which communicated with the exterior (Josh. ii. 15; 1 Sam. xix. 12; Acts ix. 24, 25; 2 Cor. xi. 38; see Hackett, Illustr. of Script. p. 67 sq.). See WINDOW. In Scripture language a wall is the symbol of resistance or separation. See FENCE. The Lord tells the prophet Jeremiah (i. 18; xv. 20) that he will make him as a wall of brass, to withstand the house of Israel. Paul says (Eph. ii. 14) that Christ, by his death, broke down the partition-wall that separated us from God, or rather the wall that separated Jew and Gentile; so that these two people, when converted, may make but one. See PARTITION.

Only a few other points need here be noticed in addition to what has been said elsewhere on wall construction, whether in brick, stone, or wood. See BRICK; HANDICRAFT; MORTAR. 1. The practice was common, in Palestine, of carrying foundations down to the solid rock (Luke vi. 48), as in the case of the Temple, and in the present day with structures intended to be permanent (Josephus, Ant. xxv, 11, 5; Robinson, ii, 388; Col. Ch. Chron. [1687.], p. 439). The pains taken by the ancient builders to make good the foundations of their work may still be seen, both in the existing substructions and in the number of old stones used in more modern constructions. Some of these stones—ancient, but of uncertain date—are from 30 feet to 50 feet 10 inches long; 8 feet to 6 feet 6 inches broad, and 5 feet to 7 feet 6 inches deep (Robinson, i, 283, 282, 286; iii, 329). As is the case in numberless instances of Syrian buildings, either old or built of old materials, the edges and sometimes the faces of these stones are "bevelled" in flat grooves. This is common-

Specimens of Ancient Walls.
WALL ARCADING

likely supposed to indicate work at least as old as the Ro-
man period (ibid. i, 261, 286; ii, 75, 76, 278, 335; iii, 59,
58, 84, 229, 461, 498, 511; Ferguson, Handb. of Arch. p. 288).
On the contrary side, see Col. Ch. Chron. (1858), p. 350.

But the great size of these stones is far exceeded by some
of those at Barlebek, three of which are each about 63
feet long; and one, still lying in the quarry, measures
68 feet 4 inches in length, 17 feet 2 inches broad, and
14 feet 7 inches thick. Its weight can scarcely be
less than 600 tons (Robinson, iii, 506, 512; Volney, Trav.

2. A feature of some parts of Solomon's buildings, as
described by Josephus, corresponds remarkably to the
method adopted at Nineveh of encrusting or veneering
a wall of brick or stone with slabs of a more costly ma-
terial, as marble or alabaster (Josephus, Ant. viii, 5, 6; 2
Ferguson, Handb. of Arch., p. 292; 293).

3. Another use of the walls in Palestine is to support
mountain roads, or terraces formed on the sides of hills
for purposes of cultivation (Robinson, ii, 498; iii, 14, 45).
Hence the "path of the vineyards" (Numb. xxii, 24) is
illustrated by Robinson as a pathway through vine-
yards, with the rocks of each side (Robinson, p. 80; 81;
Stanley, Sin. and Pal. p. 102, 420; Lindsay, Trav. p. 299;

Wall Arcading, a series of niches added as an
ornament in the interior walls of aisles. At Leu-
charis, Scotland, and at All-Saints', Stamford, it adorns
the exterior of the Church. At Battle, Merton, Roch-
ester, and Brecon there is a very lofty series of ar-
cading.

Wall, Andrew J., a Methodist Episcopal minis-
ter, was a native of Indiana; joined the Missouri Con-
fERENCE in 1850, and served on the Unionville, Lancaster,
and Ashley circuits. After being located for some time,
he was again admitted in 1859, and appointed to Lin-
neas Circuit. In 1860 he was superannuated; after
which he moved to Laporte, Mich., and finally settled
near Fairfield, Ia., where he died in 1865. Mr. Wall
was a man of clear intellect, average ability, and pos-
sessed an exemplary spirit of humility. See Minutes
of Annual Conferences, 1865, p. 7.

Wall, George, an English Methodist preacher,
and one of the original promoters of the New Con-
nection, was born in the Peak of Derbyshire in 1774, and
was received among the Methodists at the age of
twenty. Removing to the village of Arnold, Notting-
ham, he joined the New Connection, and was accepted
in this ministry in 1799, and his seventeen appoint-
ments embraced the leading circuits in the Connection,
in which his integrity, piety, and devotion secured for
him acceptance and great usefulness. He was three
times president of conference—in 1809, 1815, and 1832.
In 1838 declining health obliged him to become a super-
numerary, but his forty years' labors comforted him in
his retirement. He enjoyed unclouded peace in his last
hours, and died at Lightcliffe, near Halifax, March 4,
1852. See Minutes of the New Connection Conference.

Wall, John D.D., an English divine, was born in
1588; became prebendary of Oxford in 1632; and died
1666. He published a number of Sermons and other
productions.

Wall, Thomas, an English Wesleyan missionary,
was sent out to St. Mary's, Western Africa, in 1837, ar-
iving there Nov. 26. He was studious, diligent, affection-
ate, and faithful to all his duties. His promising life
was cut short by a paroxysm of fever, and he died
Aug. 24, 1838, exactly a year after the death of the la-
mented young Henry Wilkinson, who preceded him on
the station. See Minutes of the British Conference,
1839.

Wall, William, D.D., an English divine, was born
in 1646. He was for fifty-two years (1675-1729) vicar of
Shoreham, Kent, where he died in 1728. He pub-
lished numerous works, among which are, Infant Bap-
tism Asserted and Vindicated (1764)—History of Infant
Baptism, in Two Parts (1705) — and Critical Notes on
the Old Testament (1734).

Wallace, Benjamin John, D.D., an eminent
Presbyterian divine, was born at Erie, Pa., June 10,
1818. He made a profession of religion when in his
twelfth year; received an appointment of a catechist to
the West Point Military Academy, N.Y., in 1827;
graduated at the Princeton (N. J.) Theological Semi-
yary in 1832; was licensed by the Donegal Presbytery
the same year; ordained by the Muhlenburg Presbytery
as a deacon, 1833; became pastor of the Church at York
in 1837; was elected professor of languages in Newark College, Del.,
in 1846, where he was faithful as an instructor: choseneditor of the Presbyterian Quarterly Review in 1852,
and for ten years he sustained it with great ability.
This was the most important labor of his life. Much
of the interest of the Review was created by his own ar-
ticles. In all his reviews of books and editorials there
were an earnestness, a vivacity, and a freshness that made
them readable, and some were marked by great ele-
quence and power. He wrote all the book-notices dur-
ing the ten years of his editorial labors, and wrote some
articles on various subjects. He published two single
Sermons, and was a contributor to the Bibliotheca Sueva,
e.g. He died July 25, 1862. See Wilson, Prov. Hist.
Almanac, 1863, p. 911; Allibone, Dict. of Brit. and Amer.
(J. L. S.)

Wallace, Cranmore, a clergyman of the Prote-
estant Episcopal Church, was born in Ackworth, N.H.,
Feb. 27, 1802. Mr. W. was educated at Dartmouth
College, graduating in 1824, and engaged for a short
time in teaching at Boston and other towns in Massa-
chusetts. As early as 1826 he removed to South Caro-
olina, where for the first ten years of his residence he
was the principal of the Cheraw Academy. Here he
began the study of theology; became principal of the
South Carolina Male School, Charleston; was ordained
deacon in 1836, and priest a year thereafter. His early
clerical labors were spent as a missionary in the upper
d part of the state, after which he became rector of St.
David's Church, Cheraw. Subsequently he was in
charge of the parishes of St. James, James's Island;
St. John's, Berkeley; and in 1848 he accepted an in-
vitation to St. Stephen's Chapel, in Charleston. He
was also rector of the Church Home, and was for many years
secretary of the Hesston Convention, a member of the
standing committee of the diocese.

Wallace, George W., a minister of the Baptist
denomination, was born at Berkeley, Mass., Feb. 19,
1814. At the age of sixteen he professed his faith in
Christ, and united with the Free Baptist Church in
Pawtucket, R. I. In 1836 he was licensed to preach by
the Rhode Island Quarterly Meeting. For several years,
such was the state of his health that he was able to
preach only occasionally. During this time he im-
proved himself by study, and thus prepared himself
for more extensive usefulness. He was ordained at
Rehoboth, Mass., Aug. 23, 1848. The churches of
which he was pastor were at Hebronville, Rehoboth, and
Farmerville, Mass.; Georgaville and Apponagus, R. I.; East
Killingly, Conn.; and in one or two other places. His
ministry in Apponagus is marked by a popularity
marked success. When his age and failing health com-
pelled him to retire from his pastoral work, he returned
to his native village, where he spent the remainder of
his life, with the exception of the last few months.
He died in Providence, R. I., Sept. 11, 1880. See obituary
notice in the Providence Journal. (J. C. S.)

Wallace, Henry C., a Methodist Episcopal minis-
ter, was born in Winchester, Ill., Nov. 5, 1828. Is
WALLACE was converted in his nineteenth year, and in 1858 joined the Illinois Conference and was appointed to Butlerville. The next year he was discontinued. In 1859 he was again received and filled the following charges: Petersburgh and Athens, Sangamon, Springfield Circuit, Petersburgh, Pawnee, Girard, Whitehall, Whitehall Circuit, Topeka, and Sangamon Circuit, where he died, Sept. 29, 1876. Mr. Wallace was a man of great faith, holiness, and exemplary life. See Minutes of Annual Conferences, 1876, p. 243.

Wallace, James, embarked in November, 1845, as a Wesleyan missionary for the island of Ceylon, which he reached in safety. In June, 1846, he was driven out to sea while on his way from Jaffna to Batticaloa, and for six days suffered great privations and dangers in a small craft in the Bay of Bengal. When the effects of this exposure he never appears to have recovered. He died at Colombo, April 21, 1847, deeply regretted by those who had witnessed his zeal for the conversion of India. See Minutes of Wesleyan Conferences, 1847.

Wallace, John (1), a Methodist Episcopal minister, was born in North Carolina in 1768. He spent the early part of his life in ignorance and wickedness; was converted at the age of twenty-six; received license as a local preacher two years later; labored with acceptance in that capacity about twenty-four years; and in 1818 joined the Missouri Conference, and worked in that state until his death, March 25, 1847. He was united with the Ohio Conference and served on Blue River Circuit until his death, Aug. 27, 1822. Mr. Wallace was not a brilliant speaker, yet substantial and powerful. The law and the promises were his great themes. See Minutes of Annual Conferences, 1824, p. 424.

Wallace, John (2), a Presbyterian minister, was born near Gap, Lancaster Co., Pa., Oct. 1, 1791. He was self-educated, but out of regard to his classical and theological attainments was licensed by New Castle Presbytery, and ordained by the same in 1832 as pastor of the Pequa Church in Lancaster County, which was his only charge. Here he labored faithfully and successfully for nearly thirty years. He died Oct. 29, 1866. He was an eminently good and faithful man. See Wilson, Presb. Hist. Almanac, 1867, p. 214.

Wallace, Jonathan, M.D., a Universalist minister, was of Scotch descent, born at Peterborough, N. H., March 26, 1794. He removed with his father to Berlin, Vt., in 1797. He was educated in school and grammar-school, and taught school for several years; studied medicine in his young manhood, and for some time followed the medical profession; and finally embraced Universalism, and in 1815 began preaching. His first fields of labor were Richmond, Williston, and Jericho, Vt. He was married in 1820. In the winter of 1822-23 he moved to Potsdam, N. Y., where for several years he stood almost alone as a preacher of Universalism, his circuit embracing Canton, Madrid, Pierrepont, Hopkinton, Malone, Bangor, and Potsdam, in which latter place he was pastor over twenty years. In 1837 he began in Potsdam the publication of a semi-monthly Universalist paper, which, not paying expenses, was soon dropped. He was afterwards associate editor of The Evangelical Magazine and Gospel Advocate at Utica, N. Y. He went to Boston in 1828 to be treated for epilepsy; preached there about a year; spent his latter years in Potsdam, and died April 6, 1873. Mr. Wallace was a close, original thinker, and very tenacious of his opinions. He left many manuscripts, including a volume of original hymns for public worship. He devoted much of his time preparing young men for the ministry. See Universalist Register, 1874, p. 125.

Wallace, Marcus Gediah, a Presbyterian minister, was born June 19, 1819, in Cabarrus County, N. C. He received his preparatory education at Mount Carmel Academy, Tipton County, Tenn., under the tuition of the Rev. James Holmes, D.D., and graduated at the College of New Jersey in 1849. He made a profession of religion in the church he was educated in, and united with the Church of his parents, the Poplar Tent Church. Immediately after his college graduation, he entered Princeton Theological Seminary, where he spent three years, regularly graduating in 1852. He was licensed as the New Brunswick Presbytery April 29, 1852. He began his ministry as pastor of a church in the last and longest field of labor, and became supply of Maribook and Greenwood (now Hope) churches, in Ouachita Presbytery, Ark. Here he labored assiduously and faithfully for more than eighteen years, until his death, June 21, 1878. He had no fear of death, but during his sickness often expressed a wish to live longer so that he might do something more for the Master. But his work was done, and well done. He was an honest, earnest, and faithful preacher of the Gospel, a firm and devoted friend, true in all the relations of life. (W. P. S.)

Wallace, Robert (1), D.D., a Scotch divine, was born in Perthshire in 1697; was educated at the University of Edinburgh; became minister of Moffat in 1723; also of Greyfriars' Church, Edinburgh, in 1738; and died in 1771. He published, A Dissertation on the Numbers of ManKind in Ancient and Modern Times (1753)—Characteristics of the Present Political State of Great Britain (1758)—and Various Prospects of ManKind, Nature, and Providence (1761).

Wallace, Robert (2), a minister of the Reformed Presbyterian Church, was born in the parish of Loughgilly, County of Armagh, Ireland, in December, 1772. He was educated at the University of Glasgow, from which he graduated in 1810. The next spring he removed to America with his family, consisting of a wife and four children. He studied theology under Dr. Wylie, of Philadelphia, and was licensed in 1814. In the autumn of the same year he received a call from two societies, one in Kentucky and the other near Chillicothe, Ohio, and was ordained and installed as pastor of the former. He continued in this relation until 1820, when he resigned the charge in Kentucky and retained the one near Chillicothe. He was instrumental in organizing several societies within convenient distance of his home. In 1822 he received a call from the three societies which had established a field at Salt Creek. Here he continued to labor as pastor of these societies and as missionary to the adjoining neighborhoods during the remainder of his life. He died July 19, 1849. See Sprague, Annals of the Aner. Pulpit, ix, p. 66 sq.

Wallace, William, a Presbyterian minister, was born in Chester County, Pa., March 17, 1877. He graduated at Jefferson College, Pa.; studied theology privately; was licensed by Steubenville Presbytery in 1821, and immediately entered upon the work of a domestic missionary, going through the new settlements of Eastern Ohio, and gathering up and forming nuclei from which have arisen some prominent congregations. In 1822 he was called to the charge of the two congregations of Nottingham and Freeport, O., in which relation he continued for eighteen years. He died Dec. 18, 1841. Mr. Wallace had the reputation of being a man of ardent piety and practical worth. He was faithful and successful as a pastor, and plain and instructive as a preacher. See Wilson, Presb. Hist. Almanac, 1867, p. 214.

Wallachian Version. See Roumanian Version.

Wallauer, George, a German Reformed minis-
ter, arrived in America, from Europe, in the winter of 1717. He was pastor of the congregation at Baltimore from 1772 until near May, 1776, when it is said that he left Baltimore. Some one has related that during the American Revolution Mr. Wallbridge joined the British army. See Harbaugh, Fathers of the Germ. Ref. Church, ii, 399.

Wallbridge, Edwin Angell, an English Congregational missionary, was born April 10, 1818, and died April 27, 1876. Mr. Wallbridge was for a time connected with the British and Foreign School Society, and in connection with Mr. Townsend in school work at Jamaica. In 1841 he was invited by the London Missionary Society to commence their mission station at Georgetown, Demerara, and here he labored without interruption till 1874. He was deeply interested in the mission work, and was wonderfully blessed in heralding the Gospel of Christ. See (London) Cong. Year-book, 1877, p. 420.

Waller, Alvin F., a Methodist itinerant minister and early missionary to Oregon, was born at Abingdon, Luzerne Co., Pa., May 8, 1808. He was the youngest of seven children, his mother dying when he was but five months old. Receiving early religious instruction in the family of a man of piety, he was converted and joined the Methodist Episcopal Church in 1829, from which time to the end of his busy life he was a devoted Christian. In 1832 he was employed as junior preacher on the Lewiston Circuit, Genesee Conference. In 1835 he was married to Miss Elepha White, and the same year entered the Lyman Seminary under the presidency of Rev. Dr. Luckey, where by diligent application and steady piety he made more permanent the faith which governed his life. He connected himself with the Genesee Conference in 1833, remaining until 1839, when he joined the Oregon Mission, under the superintendency of Rev. Jason Lee. After a tedious journey around Cape Horn, he reached Oregon with his family in 1840, and, with scarcely a day's relaxation, worked for his Master up to the time of his death, which occurred in Salem, Oregon, Dec. 26, 1872. Mr. Waller helped to found the Oregon Institute, from which has grown the Willamette University. To his efforts above all others the latter institution owes its existence. He was also the principal agent in establishing the Pacific Christian Advocate. In fact, he was thoroughly identified with all the best interests of Oregon. At his death flags were placed at half-mast over the buildings, and the commonwealth was shrouded in mourning. See Minutes of Annual Conferences, 1873, p. 132; Simpson, Cyclop. of Methodism, s. v.

Waller, Edmund, a Baptist minister, was born in Spottsylvania County, Va., Jan. 1, 1775. His father and uncle were Baptist ministers, and distinguished for their zeal for the truth during the times of persecution in Virginia. His hopeful conversion occurred when he was but thirteen years of age. He delayed making a profession of his faith in Christ until he was twenty-three years of age, uniting in 1798, with the Baptist Church at Bryan's Station, Fayette Co., Ky. In 1802 he was called to preach, and entered the ministry July 11, 1805. Following the practice of Baptist ministers in the section of the country in which he lived, he had the pastoral care of two or three churches at the same time. He preached during the last years of his life for two churches—one at Mount Pleasant, and the other at Glenn's Creek—dividing his time between them. His ministry was a successful one. He is believed to have baptized fifteen hundred persons, most, if not all, of whom connected themselves with churches under his pastoral care. He died in 1843. See Baptist Memorial, ii, 267. (J. C. S.)

Waller, John Lightfoot, L.L.D., a Baptist minister, was born in Woodford County, Ky., Nov. 23, 1809. His early education was limited, yet he studied privately so diligently as to qualify himself for teaching school for several years, until, in 1835, he accepted the editorship of the Baptist Banner, a small semi-monthly sheet published at Shelbyville, Ky., in which occupation he continued to be engaged with great success until 1841. In 1840 he was ordained to the Christian ministry, and, after relinquishing his editorial position, became general agent of the General Association of Kentucky Baptists, preaching in the meantime whenever he found an opportunity, sometimes as often as six times a week. In 1843 he succeeded his father, Rev. Edmund Waller, as pastor of Glenn's Creek Church. In 1849 he was elected a member of the convention called "to readopt, amend, or abolish the Constitution of the State." In 1850 he resumed the editorial management of the Banner and Pioneer (now styled the Western Recorder), and in April, 1852, the Bible Revision Association having been organized at Memphis, Tenn., he was elected president of the association, and held that office until his death. He died Oct. 10, 1854. See Sprague, Annals of the Amer. Pulpit, vi, 887.

Waller, Ralph, an English Methodist preacher, was born in 1811, and was converted in his youth in the Methodist Society. During the division of 1855 he joined the New Connexion, and after residing near Stockport, and in 1856 entered their ministry. During twelve years he travelled in nine circuits with marked success. In 1844 he obtained entire sanctification by faith, and his ministry was ever after more earnest. His voice failed him in 1846, and he became a superannuated minister at Sheffield, where he died in his triumph, Nov. 17, 1848. See Minutes of the Conference.

Wallet, a bag for carrying the necessaries for a journey, which anciently always formed a part of the dress of the Christian pilgrim. See Scipio.

Wallin, Benjamin, an English Baptist minister, was born in London in 1711. He received a good education; and although it was the earliest wish of his friends that he should enter the ministry, he so distrustful of his qualifications for the work that, for a long time, he resisted their importunities. "When I consider," said he, "the design of such a care to be employed more or less in preaching the Gospel, the very thought strikes me with terror. It is a work of an awful nature." His scruples were, however, in time overcome, and he consented to be set apart to the Christian ministry, and was ordained as the successor of his father, Rev. Edward Wallin, as pastor of the Baptist Church, Maze Pond, London. This position he filled for more than forty years, his death occurring in February, 1803. Mr. Wallin was the author of the hymn, "Hail, mighty Jesus, how divine is thy victorious armor!" See Belcher, Historical Sketches of Hymns, p. 292. (J. C. S.)

Wallin, Johan Olof, a Swedish theologian, was born Oct. 15, 1779, at Stora Tuna, in Dalecarlia. He studied at Upsala, and on first coming before the public, in 1803, as a poet, he received the great prize of the Swedish Academy, which was also awarded to him in the following years by the same academy, of which he became a member in 1809. He now betook himself to spiritual poetry, and became the most prominent representative of this kind of poetry in Sweden. In the same year he was appointed pastor at Solna, and in 1812 was called to Stockholm, and advanced, in 1816, as pastor primus, thus becoming entitled to a seat and vote in the national diet. In 1837 he was made bishop of Upsala, and died June 30, 1839. He published sermons under the title Religions-Tal vid dådet, utgifna af Johan Olof Wallin, 1802—1809, and was translated into German. His poetry he published under the title Witterhetts-arbeten (1842, 2 vols.), of which his sermons are translated into German. He was the author of the Swedish hymn-book, which he completed in 1819, is mostly his work. See Zuchold, Bibl. Theol. ii, 142; Theol. Lærde, iii, 127; Lexikon, s. v.; Winer, Handbuch der theol. Lit., ii, 167, 295. (B.P.)
WALLIS, George, an English Congregational minister, was born at Andover, in May, 1816, and died Sept. 5, 1874. He was educated at the University of Edinburgh, and preached successively at Leytonstone, Bambury, Hungerford, Stonehouse, and Bradford. Mr. Wallis was endowed with talents of no ordinary character, which he cultivated diligently, and became a great power for good to the Church. See (London) Cong. Year-book, 1875, p. 572.

Walls, Hugh, a Congregational minister, was a graduate of Dartmouth College in 1791. He was ordained pastor of the Church in Bath, Me., Dec. 9, 1795; was dismissed July 15, 1800; and died in 1848. See Sprague, Annals of the Amer. Pulpit, ii, 879.

Walls, John (1), D.D., F.R.S., an eminent English divine and mathematician, was born at Ashford, Kent, Nov. 29, 1616, and was educated at Emmanuel College, Cambridge, where he graduated about 1638. He took orders in the Church of England in 1640, and was chaplain to Sir Richard Darley and to lady Vere. Being an expert in discovering the keys to MSS. written in cipher, he was employed in this capacity by the Long Parliament. He afterwards obtained the living of St. Gabriel, London, but exchanged it for St. Martin's in 1648; became Savilian professor of geometry at Oxford in 1649; keeper of the archives there in 1658; and was confirmed in these offices at the Restoration in 1660. He was a member of the Royal Society in 1662. He had a controversy with Hobbes, who pretended to have discovered the quadrature of the circle, which lasted from 1655 till 1663. He died at Oxford, Oct. 28, 1703. Besides publishing numerous scientific and mathematical works, he was one of the revisors of the Book of Common Prayer (1661); edited the posthumous works of Jeremiah Horrox (1678); maintained theological controversies with the Arians, Baptists, and Sabbatarians; published Theological Discourses (1692); and left the MSS. of a number of sermons, which were published for the first time in 1791. See his Memoir, by Rev. C. E. de Coelologon, printed with the Sermons.

Walls, John (2), an English clergyman, was born in Cumberland in 1714. He wrote, Letters to a Pupil on Entering into Holy Orders: Missellany in Prose and Verse (1748); and Natural History and Antiquities of Northumberland (1789). He died at Norton in 1798.

Walls, William James, an English Methodist preacher, was born in London in 1840. His father was an exciseman, his mother a Quakeress, who brought him up religiously. At fourteen he had more friends than companions; at fifteen he gave his heart to God, and devoted himself to his service. At nineteen he removed to Bromsgrove, and joined the Primitive Methodists, who wished to secure him for their ministry; but his New-Connection friends had the first claim on him, and he returned to his family in 1844, but after traveling in five circuits his voice failed him, and the rupture of a blood-vessel suddenly closed his useful life, at Stockton, April 30, 1870. See Minutes of the Conference.

Walloons, a branch of the French Reformed Church, which still exists in the Netherlands. It differs from the Dutch Reformed Church chiefly in retaining the use of the French language in divine service, and of the Geneva Catechism instead of the Heidelberg. The congregations of this body, though once numerous, are now reduced to a very few; and the ministers in most cases Dutchmen by birth. The Walloon sects were largely represented among the early Dutch settlers in North America, particularly in New York and New Jersey.

Wall-painting. The large spaces which are sometimes left without any ornamentation in our churches, and which, when whitewashed, appear so cold and unattractively, were originally covered with color, either in the shape of floral or geometrical patterns, or of figures or emblems. The painted glass when treated in conjunction with the wall, as may be seen at St. Chapelle, has a beautiful effect. The bands of color on the wall were, no doubt, in continuation of the transom, or the sill, or a continuation of a band carried round the arches, and taking the place of a drip-stone and string. There are fresh examples discovered every day, but they are seldom in such a state as to admit of preservation.

Walls, E.H., a Methodist Episcopal minister, who served the church many years as class-leader, steward, exhorter, and local preacher; joined the Southern Illinois Conference in 1848, when somewhat advanced in years; travelled some years; took the superannuated relation; and a few years later died, Aug. 13, 1862. Mr. Walls was a pious, earnest, successful minister. See Minutes of Annual Conferences, 1862, p. 211.

Walls, F.R., a Methodist Episcopal minister, who served the church many years as class-leader, steward, exhorter, and local preacher; joined the Southern Illinois Conference in 1848, when somewhat advanced in years; travelled some years; took the superannuated relation; and a few years later died, Aug. 13, 1862. Mr. Walls was a pious, earnest, successful minister. See Minutes of Annual Conferences, 1862, p. 211.

Walmesley, Charles, D.D., F.R.S., an English Benedictine monk and Roman Catholic bishop, was born in 1721. He was senior bishop and vicar-apostolic of the Western district, and doctor of theology of the Sorbonne. He was the last survivor of those eminent mathematicians who were active in bringing about a change in the chronological style, or calendar, of England, which was accomplished in 1752. He wrote a number of mathematical and theological works, which are at present unimportant. He died at Bath in 1797.

Walmesley, John, an English Wesleyan minister, was converted in early life, called to the ministry in
Walsh, Nicholas, a member of the Society of Friends, was born Oct. 13, 1742, at Fair Hill, near Philadelphia, Pa. He acquired a good elementary education at a Friends' school in Philadelphia, and on leaving the institution entered the study of law; but before attaining to his majority was admitted to practice in the courts. In order to extend his knowledge of the law, he went to England in the fall of 1763, and was a student for some time in the Temple. Having secured the degree of Bachelor of Laws, he returned to America, and in Philadelphia resumed the practice of his profession. For seven years he devoted himself with untiring industry and success to his work as a lawyer, at the end of which time, having had a remarkable religious experience, he felt it to be his duty to abandon his profession and devote himself to religious work, as a member of the Society of Friends. He was a frequent visitor to quarterly and yearly meetings of Friends in different parts of the country; and his gifts made him an acceptable preacher wherever and whenever he felt moved to address the assembled people. Some of these public discourses he published, both for their sake and the advantage of those who heard and read them, and produced a profound impression on those who listened to them. He visited most of the Friends' meetings in England in the years 1783 to 1855, and ten years after made a similar tour through Ireland. Everywhere he was welcomed, and made a good impression. His death occurred Sept. 29, 1813. See A Biographical Sketch of Friends (Philadelphia, 1871), p. 381. (J. C. S.)

Walpurgis, or Walpurga, Sr., was the sister of Willibald, the first bishop of the diocese of Eichstätt after it had been founded by Boniface. She was of English birth, and went as a missionary to Germany at the solicitation of Boniface. After a period of labor in Thuringia, she became abbess of the convent at Heidenheim in Eichstätt, where Wunnebald, another brother, exercised supervision. Tradition states that Walpurgis exercised control over monasteries also, after Wunnebald's death. She herself died in 776 or 778, and several days are still observed in her honor; e.g. Aug. 4, in memory of her departure from England; Feb. 25, in commemoration of her ordination; May 1, in honor of her canonization. It is customary in certain sections of Germany to adorn the doors of houses with birch twigs on the last named of these days, as a protection against witches; and, in explanation of this custom, tradition relates that Walpurga was in the habit of accompanying the apostles James and Philip in their missionary journeys thereby incurring the suspicion of maintaining unchaste relations with them. To remove that suspicion, she planted a dry twig in the ground, which immediately produced leaves. The night of Walpurgis, May 1, has long been regarded as the chosen time when witches conduct their ceremonial practices. To bosh them, it was customary to bind wisps of straw to long poles and burn them—a custom which became known under the name of Walpurgis-fire. The bones of this saint, especially of the breast, are said to exude an oil which is a specific against scrofula. A domestic animal killed which is distributed in the Convent of St. Walpurgis at Eichstätt. See Bollandus et Codr. Henschieni, Acta SS, Februarius 25 (Antwerp, 1658), iii, 511-512; Herzog, Real-Encyclop. s. v.

Walsh, Henry, a Presbyterian minister, was born near Dublin, Ireland, Aug. 5, 1824. He came to the United States in 1849; was educated at Waltham University, Ga.; taught for several years; studied theology in the Princeton Theological Seminary; was licensed by Raritan Presbytery in 1852; was pastor of the churches of Carmel and Macedonia, N.C., one year; and then of Edinboro Church (North Mississippi Presbytery), Miss., until his death, Feb. 14, 1861. See Wilson, Pref. Hist. Almanac, 1862, p. 121.

Walsh, John, an English Wesleyan minister, was born at Ormskirk, Lancashire, in 1795. It was intended by his parents that he should become a Roman Catholic priest, and his education was in reference thereto. Removing to Liverpool, he was led to Christ under the ministry of Joseph Entwisle. He was received into the ministry in 1814; labored two years on the Lancaster Circuit; was sent to Newfoundland; preached at Carbonear, Blackhead, St. John's, and Harbor-Grace; returned to England in 1825; was appointed to several important circuits; became a superintendent in 1851; and died Dec. 19, 1857. Although somewhat stiff in manner, he was a powerful preacher and a laborious minister. See Minutes of Wesleyan Conferences, 1858; Wilson, Newfoundland and its Missionsaries, p. 238.

Walsh, Peter, a learned and liberal Irish Catholic, was born at Moortown, County Kildare, in the early part of the 17th century. He was probably educated at Louvain, where he became professor of divinity. He was also a Franciscan friar. On his return to Ireland, he became doctor of the University of the Bomiège. In the restoration of Charles II, persuaded many of them to sign a renunciation against the temporal supremacy of the pope and in favor of the king. For this course he was so persecuted by the opposition that he had to take refuge in England (in 1670). He went to London, where he was an enemy of the Anabaptists and Quakers for life, and remained true to his early faith, notwithstanding the persecutions he suffered. He died in September, 1687. Mr. Walsh wrote several pamphlets of a controversial character, and a History, which was not important.

Walsh, Thomas, one of the remarkable men in early Methodism, was born in Limerick, Ireland, in 1730. He went to school until he was nineteen years of age, when he commenced teaching on his own account. His parents were Romanists, and he was educated in the faith of their Church. His temper was constitutionally serious, bordering on melancholy, and he had deep religious solicitudes from his childhood. Devotion to the requirements of his Church brought him no relief. In his eighteenth year he became convinced of the errors of the Church, formally abjured its creed, and united with the Established Church. His religious anxiety was now deepened. He heard Swin- dells and other wandering dissenters pity his predicament, and said, "We believe our assemblies to be divinely assured," to use his own words, "that God, for Christ's sake, had forgiven all his sins." He joined the Methodist Society in New Market, and in 1750 he commenced to preach. Persecutions awaited him, not only from Romanists and Churchmen, but even more severely from the Presby- terians of the North (see Morgan, Life, ch. iii). No man contributed more than Walsh to the spread of Methodism in Ireland. "He went like a flame of fire through Leinster and Connaught, preaching twice or thrice a day, usually in the open air. The guileless peasants flocked to his sermons in their rude but beautiful dress. They wept, smote their breasts, invoked the Virgin with sobbing voices, and declared themselves ready to follow him as a savior over the world" (Stevens). His name became famous throughout the country. The priests became alarmed; they instigated mobs, circulated slanderers; but in vain. The people still ran after him and wept aloud under his word, as he proclaimed it in mountains, meadows, highways, market-places, prisons, and ships. In 1758 Walsh called him to London, where he had frequent discussions with the Jews, and preached to the Irish in Moorfields and Short's Gardens. "Such a skilled disputant did not arise from the Jewish synagogue, if ever, to argue with a man who knew the language as is rarely to be met with" (Morgan). "I do not remember ever to have known a preacher," says Wesley, "who, in so few years as he remained upon earth, was the instrument of converting so many peo-
It was while in London he commenced the study of Greek and Hebrew. In these studies he progressed with incredible swiftness. "No Catholic saint ever pored more assiduously and devoutly over his breviary than did this remarkable man over the original Scriptures during the rest of his life" (Stevens, ut supra, i, 291). His memory was a concordance. "The best Hebrew I ever knew," exclaims the enthusiastic and generous-hearted Wesley over this "blessed man," as he was wont to call him (Short History of the Methodists, p. 71) "he knew so thoroughly acquainted with the Bible that if he was questioned concerning any Hebrew word in the Old, or any Greek word in the New, Test., he would tell, after a little pause, not only how often the one or the other occurred in the Bible, but also where it meant in every place. His name was Thomas Walsh. Such a master of Biblical knowledge I never saw before, and never expect to see again" (Wesley, Sermons, ser. xci).

Young men from the University of Cambridge, when in London, chose Walsh to initiate them into the Hebrew tongue. But young Walsh was burning the candle at both ends. The manner of his preaching, his excessive study, habitual self-absorption, and excessive labor and fatigue broke him down, and his nervous sensibilities, at last, suffered great tortures. Wesley, a sagacious man, and who wrote excellent sanitary rules for his ministers, never saw him administered to. Indeed, he seems to have had a sentiment of reverence, if not of awe. Walsh was seized with sickness at Bristol, in February, 1758, sailed for Cork as soon as his strength would permit, and was removed by his friends to Dublin, where, after suffering extreme mental anguish on account of a temporary eclipse of faith—occasioned, no doubt, by nervous disorganization—he died with words of rapture on his lips, April 8, 1759.

The Church has produced few such men as Thomas Walsh. With the devotion of a Kempis—strongly tinged, too, with his asceticism—and the sainthood of place, he has added the name of Walsh to the memory of Origen. "His life," says Southey, "might, indeed, almost convict a Catholic that saints are to be found in other communions as well as the Church of Rome." Socrates was not more lost in contemplation on a Potidean battlefield than was Walsh in introspection and prayer as he walked through the streets of great cities. In his devotions he was sometimes so rapt and absorbed in the visions of God that in these profound and solemn frames of mind he remained for hours still and motionless as a statue. Such were his learning; his talents in the pulpit (where he often seemed clothed with the Lord and made a saint), his saintly dignity and moral grandeur of his character, that contemporary allusions to him are touched with reverence and wonder (see Stevens, i, 338). "His portrait might almost be taken as fac-similes of the current pictures of Jonathan Edwards, whom he resembled much in other respects" (ibid. i, 339, note). Charles Wesley wrote several hymns in memory of Thomas Walsh, commencing "God of unfathomable grace:" "Glory, and thanks, and love:" and "Tis finished, tis past." Nine Sermons by Walsh were published, with a preface by Morgan (1764, 2mo). See Morgan, Life of Walsh (Loudon, 1762, 12mo; N. Y., 1843; republished in Jackson's Early Methodist Preachers, 3d ed. vol. iii); Horne, Appendix to Walsh's Life (in Jackson's Preachers, i, 278 sq.). Jackson, Life of Charles Wesley (N. Y. 1842, 8vo), xxii, 551 sq.; Tylerman, Life of John Wesley, ii, 206, 209, 661; Smith, Hist. of West. Methodists, 2 vols., 1851, 327 sq.; Myles, Chron. Hist. of Methodism, ann. 1750, p. 69; Crowther, Portraiture of Methodism (Loudon, 1814), p. 856 sq.; Atmore, Meth. Memorials (ibid. 1801), p. 438-443; Southey, Life of Wesley, ch. xxiii; Wesley, Hymns (3d ed. 14 vols.), vii, 54, xii, 448 (see Index); Telford, Memoir of Thomas Walsh.

Walsh, Tracy R., a minister of the Methodist Episcopal Church, South, was licensed to preach in 1827, and admitted into the South Carolina Conference in 1830. Several years later he located and assumed charge of the Marion Academy. For thirteen years he was the impress of his steril character was stamped upon the youth committed to his training. During these years he did an amount of pupil and parochial work seldom exceeded by a regular pastor. In 1849 he entered the Conference and continued to travel until elected president of Carolina Female College in 1852. In 1860 he again entered the itineracy, and on Oct. 20, 1867, died. See Minutes of Annual Conferences of the M. E. Church, South, 1867, p. 111.

Walsh, William McKendree, a Methodist Episcopal minister, was born in Hanover County, Va., Feb. 19, 1814; was converted in 1829; and in 1835 entered the ministry in the Virginia Conference. During the following year he was transferred to the North Carolina Conference, within which he labored for thirty years. In 1867 he was admitted into the Baltimore Conference; was supernumerated in 1870; became effective again in 1871, and was appointed to Green Ridge Circuit, and two years later to Hedgesville Circuit, where he died on Oct. 10, 1875. Few men have shown equal fortitude and devotedness. See Minutes of Annual Conferences, 1876, p. 20.

Walsingham, Sir Francis, an eminent English statesman, was born at Chiselhurst, in Kent, in 1538. He was ambassador to the court of France from 1570 to 1577, during which time the Massacre of St. Bartholomew occurred. Here he learned much of the part which Mary Queen of Scots played in the intrigue of that dreadful plot, and acquired a deep and abiding hatred towards her. He went as ambassador to Scotland in 1583, and in 1586 became one of the commission for the trial of Mary Queen of Scots. He afterwards became chamberel of the Queen of Lancaister, and remained such until his death on April 6, 1590.

Walsingham, Thomas, an English Benedictine monk of St. Albans, was precentor at that place in 1440, and historiographer royal to Henry IV about the same time. He wrote two histories of England, and continued the Polycharmon of Ranulph Higden, from 1342 to 1417.

Walter of Galloway, originally clerk to Roland, the high-commissary of Scotland, was bishop of Galloway in 1299. He gave the church of Sembert to the abbey of Dryburgh, and died in 1255. See Keith, Scottish Bishops, p. 272.

Walter of Glasow, originally chaplain of king William, was elected bishop of Glasgow in 1207, and consecrated Nov. 2, 1208. He was sent to treat about peace with king John of England, and went to a general council at Rome in 1215. He died in 1225. See Keith, Scottish Bishops, p. 257.

Walter or St. Victor was a pupil of Hugo of St. Victor, subprior of that monastery to the death of Richard, in 1173, and thenceforward prior. He died in 1180. He is known to posterity through a yet unpublished work, lengthy extracts from which are found in Buleus, Hist. Universit. Paris. ii, 406 sq., 562 sq., 602 sq., 629 sq. It bears the title De Dominio Dummatis etiam in Concilia Hareses, qua Sophistis Abelardus, Lombardus, Petrus Victorius et Gilbertus Forratus Libris Sententiarum sive tertii ed. of Buleus, Libri Sententiarum sive tertii. Walter was a stranger to the profound learning of his master Hugo of St. Victor, but he shared their aversion to the trilling subtleties of scholasticism. To scholasticism he opposes the principle that dialectics can bring into view only formal, but not material, truth. The truthfulness of premises assumed lies altogether beyond its field of research. He was nevertheless so much the slave of authority that he violently opposed every attempt at a...
philosophical investigation of doctrine as a dangerous heresy. His work is filled with abusive epithets and denunciations. He accused Peter Lombard of Nihi-
lism, and Abelard of errors with respect to the Trinity. Vires historian, among them Neaest bei, have errone-
ously identified Walter of St. Victor with Walter of Mauritiania (i.e. of Mortagne in Flanders). The latter
 taught rhetoric at Paris, was the tutor of John of Salis-
bury (q.v.), became bishop of Laon in 1155, and died in
1174. He left few writings, among which is a polem-
ic work on the subject of the subject he addressed to
Abelard. See Herzog, Real-Encyclop. s. v.

Walter, Ann, a Bible Christian minister, was con-
verted in 1820. In 1825 she entered the itinerant
work. She bore a long and painful affliction with ex-
perimental patience, and died triumphantly in the faith
in 1855.

Walter, Ernst Johann Konrad, a German di-
vine who died as doctor of philosophy and pastor at
Neukloster, near Wismar, Sept. 25, 1800, was born Aug.
9, 1741, at Claiber. He wrote, Versuch eines schriftfä-
ndigen Beweises, dass Joseph der wahre Vater Christi sei
(Berlin, 1791)—Neue Vorstellungen von den Strafen der
Vermuteten in der Ewigkeit nach Gründen der Schrift
(Rostock, an Early, 1757). See Winer, Handbuch der
Theol. Lit. i, 478, 555. (B. P.)

Walter, Ferdinand, a Roman Catholic canonist of
Germany, was born Nov. 30, 1794, at Wetzlar; and
studied law at Heidelberg, where he was promoted in
1818 as doctor utriversus juris. Here he also commenced
his lectures, when in 1819 he was called to Bonn as
professor of Roman and canon law, where he died, Dec.
12, 1873. He published Lehrbuch des Kirchenrechts
(Bonn, 1822; 14th ed. 1871, ed. Gerlach). This is his
main work, which was translated into French, Spanish,
and Italian. Besides, he published, Corpus Juris Ger-
nomiei (1824, 2 vols.); Geschichtle des römischen Rechtes
(1834, 3 vols.; 2d ed. 1845; 3d ed. 1880; also
translated into French and Italian);—Deutsche Rechts-
geschichte (1828, 2 vols.; 2d ed. 1885);—Das alte Weste
(1859);—Fontes Juris Ecclesiastici (1862);—Naturrecht
und Politik (1863; 2d ed. 1871);—Das alte Erfre und
die Reichsstadt Köln (1886);—Erinnerungen aus meinem
Leben (1886). See Theol. Universaal-Lexicon, s. v.;
Zuchold, Bibl. Theol. ii, 1414; Literarischer Hand-
weiser für das kathol. Deutschland, 1880, p. 8 sq. (B. P.)

Walter, Henry, a Church of England divine, was
born at Louth, Lincolnshire, Jan. 28, 1785. He received a careful religious training, and was edu-
cated at Jesus College, Cambridge, taking his degree
of A.B. in 1806. In 1858, being left without a
curate, he preached in his schoolroom and still kept up
his pastoral work. He died in January, 1859. Mr.
Walter attained great proficiency as a chemist, astron-
omer, and naturalist. His insinuacy was sought and
cherished by the clergy for miles around. His publi-
cations were all stamped by his characteristic accuracy
of research. They are his History of England, finished
in 1839 (7 vols.);—his collated edition of the Primer of
Edward VI.—Biographical Notice of Tynwald the
Martyr, and his Letters to Bishop Marsh, of Peterbor-
ough. He is the author of the Authorized Version of the
Bible, as well as many of lesser note. See Christian

Walter, Hubert, archbishop of Canterbury, was
born at West Dereham, in Norfolk, where he afterwards
founded a Premonstratensian monastery. He was edu-
cated in the house of his uncle, Ranulph de Glanville,
to whom he was chaplain. In 1186 he was dean of York. Oct. 22, 1189, he was con-
secdated lord bishop of Salisbury, and in 1190 sailed for
the Holy Land. He was enthroned archbishop of Can-
terbury May 30, 1193. Towards the close of 1198, Hubert
was summoned to Normandy. The two sovereigns—
the king of France and the king of England—had se-
lected him to mediate between them, and to effect, if
possible, a reconciliation. He did not succeed, but this
instance shows the high estimation in which he was
held as an honest and skilful diplomatist. Hubert died
April 6, 1199. See Hook, Lives of the Archbishops of
Canterbury, ii, 594. (B. F.)

Walter, Johann Gottlob, a Protestant theo-
lologian of Germany, was born April 5, 1704, and died Nov.
16, 1782, as superintendent at Neustadt—an der—Orla.
He is the author of Prima Gloria Clerogamiae Ressitute
Lutheri Vindicata (Neustadt, 1767). See Winer, Hand-
buch der theol. Lit., i, 751. (B. F.)

Walter, Michael. See Walter, Michel.

Walter, Nathaniel, a Congregational minister,
son of John, was born in the town of Walter, of Roxbury,
died in 1781, and ordained from Harvard College in 1729. He was ordained pastor of the Second Church in Roxbury, July 10, 1734;
died March 11, 1776. See Sprague, Annals of the Amer.
Pulpit, i, 220.

Walter, Nehemiah, a Congregational minister,
was born in Ireland, in December, 1683, of English par-
ents. As early as 1679, his father, Thomas Walter, set-
tled in Boston, Mass. Nehemiah's preliminary educa-
tion was received in his native country. In 1684 he
graduated from Harvard College, and shortly after went
to Nova Scotia, and resided with a French family to
learn the language. Returning to Massachusetts, he
resumed his studies at Cambridge, and was appointed a
fellow of that college. Oct. 17, 1688, he was ordained as
colleague with the famous Apostle of the Indians, John
Eliot, who was then settled in Roxbury, Mass. Eliot
died two years after. About 1717, in consequence of
excessive application to study, health failed, and he was
incapable of performing the duties of his office. He
gradually recovered his health, and resumed his minis-
try. For twenty-eight years he was without a col-
league; but Oct. 19, 1718, his son, Rev. Thomas Walter,
was chosen to that position. After five years the son
died, and the father again assumed the entire pastoral
charge. He died Sept. 17, 1750. A volume of his
Sermons was published after his death, in 1775. See
Sprague, Annals of the Amer. Pulpit, i, 217.

Walter, Thomas, a Congregational minister, son
of Rev. Nehemiah Walter, was born Dec. 13, 1686. He
graduated from Harvard College in 1718; was ordained
as colleague to his father in Roxbury, Mass., Oct. 19,
1718. About 1738 his writings were translated into
Music Explained (1721)—an Essay upon Falsibility,
etc. (1724). He died Jan. 10, 1724. See Sprague,

Walter, William D.D., a Protestant Episcopal
clergyman, was born in Roxbury, Mass., Oct. 7, 1737.
He graduated at Harvard College in 1756; went to
England for holy orders in 1764; and July 22 of the
same year was installed rector of Trinity Church, Bos-
ton, the third Episcopal Church of that city. He re-
signed this charge March 17, 1776, and went to Nova
Scotia, where he remained several years, and preached
during a considerable portion of the time at Shelburne.
In 1791 he returned to Boston, and purchased and
maintained a house, which formed his church, during
the remainder of his life. In 1792 he was installed
rector of Christ Church, Boston. He died Dec. 5, 1800.

Walter, William Bicker, a poet and Unitarian
preacher, a descendant of Nehemiah Walter, was born
in Boston, Mass., in 1796. He graduated at Bowdoin
College in 1813, and studied theology at Cambridge;
his knowledge of the Bible was sometimes preached, but
did not obtain a license. He died at Charleston, S. C., in 1822. He was the author of
Sucks: a Poem (Boston, 1821);—and Poems (ibid. 1821).
See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Walters, Christian, a Methodist Episcopal
minister, was born in Dauphin County, Pa., March 16, 1827.
He was ordained in 1851; had served several years as colporteur for the Bible Society;
and in 1856 entered the Philadelphia Conference. After serving Safe Harbor Circuit two years; St. Paul's, Lancaster, two years; Tamaqua two years; Port Carbon two years; and Second Street, Philadelphia, one year, he took the superintendency relation, travelled some time for the imposing of the orders. He was then called to Hartwick, where he died, July 12, 1869. Mr. Walters was remarkable for his gentlemanliness, zeal, and perseverance. See Minutes of Annual Conferences, 1870, p. 47.

WALTERS, John, a Wesleyan Methodist missionary, was a native of South Wales. He was converted in 1826, at St. Asaph, at the age of nineteen, and appointed to the island of Jamaica. On the death of William Wood (q. v.), May 24, 1835, he was sent from Spanish Town to St. Ann's Bay, to supply the place of the deceased, although he stated to the committee he had an invincible aversion to the place, owing to an impression he could not get rid of, that in a few weeks he himself would die there. With thin and pallid features the slender and delicate Walters startles the mourning people with the words, "Dear Christian friends, I am come this morning to preach Mr. Wood's funeral sermon and I shall at the same time preach my own also. On the above day I travelled the longest day's stage I ever made, and in that stage he passes away. Regard for the poor and sick, and fervent zeal for God, were traits in the character of the young and holy Walters. See Minutes of Wesleyan Conferences (1836); Bleby, Romance without Fiction, or Sketches from the Portfolio of an Old Missionary (Lond. and N. Y. 16mo), sk. xxiii, p. 459 sqq.

WALTERS, Thomas, a Methodist Episcopal minister, was born at Hanley, England, July 18, 1824, of devoted Wesleyan parents, who gave him a careful training, and brought him to Christ at the age of fifteen. He received license to preach at the age of nineteen, and continued on circuit work until 1848, when he sailed to the United States, and settled in Belleville, N. J., where his preaching soon attracted attention, and he received a call to supply Sandyston Circuit. In 1849 he united with the New Jersey Conference, and was appointed to Vernon Circuit. Subsequently he labored at Newton, Rockaway, Barryville, Milford, Home and Greenwood, Asbury, Flemington; Second Church, Rahway; Belvidere; St. Paul's, Staten Island; Belleville, Boonton, Dover; Eighth Avenue, Newark; Prospect Street, Paterson; and First Church, Hackensack. He died July 7, 1879. Mr. Walters was industrious practical, a diligent student, and a thorough expository and scriptural; had a very tenacious memory, a clear, full, rich voice; was cultured in music, and in oratory. See Minutes of Annual Spring Conference, 1880, p. 36.

WALTHER (WALTHERS OR GALTHERS), a German Lutheran divine, was born at Allendorf, in Thuringia, in the latter part of the 16th century. He studied divinity at Jena, and gave special attention to classical and Oriental languages. He became professor of Greek and Hebrew at Jena, and afterwards was appointed superintendent of the Lutheran Church in the duchy of Saxo-Gotha and in the duchy of Brunswick-Wolfenbittl. He died Nov. 16, 1640. He was the author of several theological and linguistic works. See Zemmerus, Vita Professorum Jenaen. WALTHER, Christian (1), a German theologian, was born about the beginning of the 16th century. He studied divinity, took orders, and lived for some time in a convent. Afterwards he joined the Protestants and settled at Wittenberg, where he was much esteemed by the theologians for his learning. He was employed by the celebrated printer Hans Lufft as proof-reader for thirty-four years; was also sub-editor of the Wittenberg edition of Luther's works; and was the author also of some pamphlets and other works. He died about 1572. See Zettel, Theatrum Vitae Eruditorum, p. 542.

WALTHER, Christian (2), D.D., a German divine, was born at Norkitten, near Königberg, in 1655. He was educated at Königsberg, Leipzig, and Jena, receiving the degree of A.M. at the latter place in 1677. He then returned to his native country, where he held several ecclesiastical offices. In 1701 he became a member of the Academy of Sciences at Berlin, and was appointed professor of divinity in the University of Königsberg; in 1704 was made inspector of the synagogues of the Jews in the same city. During some time he was rector magnificus of the University of Königsberg, and died there in 1717. Among his works are, Tractatus de Vita Diversi Sacerdotii Vetus Testamenti, quem Stando Fieri Oportebat: —De Dubius Tabula Lapidis: — De Quatuor Panarum Generibus opud Hebrews: — Disputationes VIII de Pluralitate Personarum in Deivm, ex Genesis, cap. i. 26.

WALTERH, Christoph Theodoulu, a German missionary, was born at Schillburg, in Brandenburg, in 1699, and studied divinity at Halle. On the invitation of Frederick IV, King of Denmark, he arranged to go as a missionary to the Danish possessions in East India. He went to Copenhagen in company with Henry Plüschow and Bartholomew Ziegengal in 1705, and they arrived at Tranquebar, India, July 9, 1706. Walter then learned Portuguese and Vedda, Indian dialects, and worked altogether as a missionary, preaching to the inhabitants with great success. He founded the missionary establishment of Majubaram. On account of failing health, he returned to Europe in 1740; but, before reaching Denmark, he died at Dresden, April 27, 1741. He was the author of several works pertaining to his missionary labors, and for the benefit of the heathen nation to which he preached. See Schütz, Commentariz de Vita et Agone Christiani Theodouli Walerlhe (Halle, 1743).

WALTHER, Heinrich Andreas, a German Protestant clergyman, was born at Königsberg, in Hesse, in 1686. He became minister at Worms in 1729, and at St. Catherine's, Frankfort-on-the-Main. In 1741 he was honored with the rank of senior of the Protestant clergy at Frankfort, and with the degree of doctor of theology by the faculty of Gießen. He died in 1748. Among his principal works are the following: Disputatio ex Antiquitate Orientali de Zobia: — Exseritio des prelatus Licei concilii sanctissimi patrum et patris ecclesiae in his ejusdem praeceptis, in qua ... gen. ein von einem Jesuiten herausgegebenes Büchlein, genannt Licht in der Finsterniss: — Exequiae Epistolae Judae: — Erste Gründe der Weisheit und Tugend: — und Erläuterter Kateschismus.

WALTHER, Johann, a German divine, was one of Luther's intimate friends. As a composer of tunes, he was able to rival the greatest. He was a reformer in improving Church psalmody. In 1524 he published, with Luther's assistance, the first Lutheran Choral Book, containing some of his own tunes. He filled the office of precentor at Torgau, and was afterwards director of the choir to prince John Frederick, and to prince Maurice of Saxony. In 1530 he removed to Wittenberg, received the degree of A.M., and was appointed a lecturer in the university. In 1547 he removed to Dresden, where he probably died, in 1564. He is the author of a fine German hymn, Herzlich tust mich erfreuen (Eng. trans. in Lyra Germ., ii, 298: "Now fain my joyous heart would sing"). See Bach, Geschichte des deutschen Kirchengedichts, i, 247, 285 sq.; 455 sq.; ii, 471; viii, 655. (B. P.)

WALTHER, John L., a Methodist Episcopal minister, was born in Kulmbach, Bavaria, Sept. 10, 1818. He emigrated to America in 1840; was powerfully converted at watch-night services in St. Louis, Mo., at the close of 1848; served the Church growing as exhorter and local preacher in Missouri; was appointed chaplain of the Forty-third Regiment of Illinois Volunteers in 1861, which he served faithfully and successfully until 1861, when he was appointed chaplain of the Forty-third Regiment of Illinois Volunteers. As chaplain he was persistent in all his duties, and highly honored by officers and soldiers. He was shot in the chest April 6,
WALDTHOE, 874

WALDTHOE, 874

1862, on the battle-field of Shiloh, while caring for the wounded, and expired almost without a struggle. Mr. Walther was the third chaplain of the Union army dying in the service of his nation; and was first in excellence among German preachers in the Illinois Conference. See Minutes of Annual Conferences, 1862, p. 294.

Walther, Michel (1), a Lutheran theologian of Germany, was born at Nuremberg, April 6, 1859. He studied, at first, medicine at Wittenberg; but afterwards he betook himself to the study of theology at Giessen and Jena. In the latter place he was appointed adjunct to the chair of theology at the University. For seven years he acted as court-preacher to the duchess of Brunswick and Luneburg, occupying at the same time a professorship at Helmstatt. After the death of the duchess, in 1826, he was appointed court-preacher and general superintendent at East Friesland; in 1842 he was called to Zelle, where he died, Feb. 9, 1862. He wrote, Harmonia Biblica:—Postilla Mosaiica, Prohegetic, Hiero-paulitca, Evangelistica:—Comen, in Epist. ad Ebroes:—Introitus ad Psalterii Sacramentum:—Spicilegium Controversiarum de Nominais Jehovah, Elohim:—De Aput et Phae:—Tractatus de Unione Christi, etc. See Freher, Theutonic and Celestial; Hoffmann, Lexicon Universale: Acta Eruditorum Latina: Jöcher, Allgemeines Gelehrten-Lexikon, s. v. (B. P.)

Walther, Michel (2), a Lutheran theologian of Germany, son of the preceding, was born March 8, 1838, at Aurich, in Friesland. When sixteen years of age he entered the University of Wittenberg, where he was appointed, in 1859, professor of theology. He died Jan. 21, 1862, having written, De Fide Nicaeae:—De Fide Infan tum Baptizatorum:—De Catechizatiove Veterum:—De Novo Legislatore Christo contra Socinianos et Arminianos:—De Satisfactione Christi:—De Dissensibus Ordinis Orti nostri et Christi Homina:—De Dubius Tabula Lapideae ex Exod. 25, 18, et ez 31, 15:—De Ingresso Sacrdttis Summis in Sanctum Sanctorum ex Levit. xvi:—De Jochiamentia ex Job. xxxvii, 7, non Probabilis:—De Deo Acestorde ex Zeb. 16. 15:—De Viro Nomine Ze mach, sive German ex Zuch. xli, 12:—De Sena Verborum jnscolionem Marc. vii, 72:—De coausis fiantes ex 2 Petr. 4, 4:—De Articulli SS. Trinitatis Antiquitate, Veritate et Necessitate, etc. See Bumemann, De Doctis Westphal: Nara Literaria Germania: Pipping, Memoria Theologorum; Jöcher, Allgemeines Gelehrten-Lexikon, s. v. (B. P.)

Walther, Rudolph, a Reformed theologian of Germany, was born at Zurich, Nov. 9, 1819. He studied at different places, visited England, and, after his studies, he was placed as a teacher at Mühlewein. Here he attracted the attention of the landgrave, Philip of Hesse, who took him in 1841 to Ratisbon, where he acted as clerical secretary. Here he made the acquaintance of Melancthon, Bucer, Sturm, Cruciger, and others. After his return, he was appointed pastor at Schwanmendingen, and in 1854 pastor of St. Peter's at Zurich. He died Nov. 25, 1856. He wrote, Apologia Zesigiti:—Commentarii in Libros Historicos Novi Testamenti:—Epistolae Pauli, Petri, Jacobi, Johannis, et Judae:—Hom ilites in Evangelia Dominicalia:—Homilie in Totum Novum Testamentum:—Homilie in Exod. XXXII:—Homila in IX XI Libros Mose:—Homilie XXXII de Incorruptu, Nativitate, et Vita Filii Dei, etc. See Verheiden, Elogia Prestandtorum aliquot Theologorum; Adam, Vita Eruditorum; Teissinoer, Eloge des Savana; Jöcher, Allgemeines Gelehrten-Lexikon, s. v. (B. P.)

Walton, Brian, D.D., a learned English prelate, was born at Seamer, in the district of Cleveland, in Yorkshire, in 1596; he was educated at Pembroke College, Cambridge, where he took the degree of A.M. in 1628. He first went to Suffolk as master of a school, and for some time served as curate; he then went to London, where he acted as curate of All-hallows', Bread Street. In 1628 he became rector of St. Martin's Orgar, in London, and of Sandon, in Essex. Some time afterwards he became prebendary of St. Paul's, London, and chaplain to the king. In 1638 he commenced as doctor of divinity at Cambridge. About this time he became involved in the troubles between the king and Parliament, in which he remained hostile to the cause of the Parliamentaries, and was deprived of his preferments and compelled to fly from London. He took refuge in Oxford, and in 1645 was incorporated doctor of divinity. There he formed the plan of his famous Polyglot Bible, and commenced the collection of materials; but it was not completed till some years after his return to London, which occurred after the death of the king. The work appeared in six volumes, large folio. It was published by subscription, and is thought to be the first book printed in England on that plan. The first volume appeared in September, 1664; the second in July, 1665; the third in July, 1656; and the last in May, 1667. It is so esteemed for its excellence that copies of the Lepton Heptagloton of Dr. Edmund Castell (published in 1669, in 2 vols. fol.) is a lexicon of the seven Oriental languages used in Walton's Polyglot, and has grammars of those languages prefixed. The Polyglot cannot be considered complete without it. The Prologomena to the Polyglot, which are highly valued, and have several times been reprinted separately (Zurich, 1753; Leips. 1777, etc.), are a monument to the author's learning, and contain sixteen dissertations on the languages, editions, and translations of the Bible, the various readings, critical condition, Jewish and other revisions of the text, the Slavonic transcription, etc. Some copies of the Polyglot are ruled with red lines by hand, and are therefore more valuable. Walton published, besides his London Polyglot, The Considerator Considered (1659), a reply to the Considerations of Dr. Owen:—and an Introductio ad Lexiconum Linguarum Orientalium (1655). In 1660, after the Restoration, he was appointed chaplain to the king; and in 1661 bishop of Chester. He enjoyed the honor of the office but a short time, for he died Nov. 29, 1661. See Todd, Life and Writings of the Right Rev. Brian Walton, D.D., Lord Bishop of Chester (London, 1821). See POLYGLOT BIBLES.

Walton, James, a minister in the Methodist Episcopal Church, South, was born near Chester, S. C., Aug. 16, 1799. He removed to Knox County, Tenn., in early life, where he received a careful religious culture, and was trained in the art of agriculture; embraced religion at the early age of eight years; removed to Mississipp in 1832; purchased a farm in the county in 1835; was elected to the county in the State Senate; was licensed to preach in 1838; and in 1842 was admitted into the Mississipp Conference, where he labored with great zeal and devotedness until his death, Jan. 18, 1861. Mr. Walton was deeply pious, had a strong, well-balanced mind, and was an example of prudence and holiness. See Minutes of Annual Conferences of the M. E. Church, South, 1861, p. 318.

Walton, Jonathan, D.D., an English clergyman of the Episcopal Church, was born in 1774; became rector of Birdbrook, in Essex, and rural dean; and died in 1846. He was the author of Lectures on Repentance:—The Principles of Christianity (1833);—and several sermons. See Allibone, Dictionary of British and American Authors, s. v.

Walton, Robert Hall, a Presbyterian divine, was born in Hartford, Conn., in 1833. He entered Delaware College, and graduated in 1854, and commenced his theological studies in Union Seminary in 1857. He was ordained in 1855, and labored in the Broadway Church, N. Y., as a supply, and later in the church at Augusta, Georgia, and supplied the Church at Cassville until his death, April 2, 1876. (W. P. S.)

Walton, William, D.D., a professor and clergyman of the Protestant Episcopal Church, died in New York, Sept. 21, 1869, aged fifty-nine years. He was the eldest son of rear-admiral Walton of the British navy; and at the time of his death he was professor of He-

WALTON, William C., a Presbyterian minister, was born in Hanover County, Va., Nov. 4, 1783. He was educated at Hampden Sidney College; licensed to preach Oct. 22, 1814; ordained April 25, 1818; and on May 6 following was installed pastor of the Presbyterian Church in Hopewell. In 1828 he accepted a call to the Third Presbyterian Church in Baltimore; in 1856 returned to Virginia; in July, 1827, was installed pastor of the Second Presbyterian Church in Alexandria, Va.; in October, 1832, of the Free Church in Hartford, Conn., where he continued to labor until his death, Feb. 18, 1884. He was a most zealous and devoted minister, full of love for souls and the glory of God. See Danforth, Life of W. C. Walton (1837, 2dmo); Christ. Quar. Spectator, x, 193; Sprague, Annals of the Amer. Pulpit, iii, 565.

WALTZ, Henry C., a Methodist Episcopal minister, was born in Wayne County, Ind., June 5, 1843. He spent his boyhood on a farm; entered Indiana Asbury University in 1860; was converted in 1862; graduated in 1866; spent twenty-two months in travelling over Europe and the Orient; lectured the following year on the sights, scenes, customs, and habits of the people of the Old World; joined the North Indiana Conference in 1869; and served the Church at Wabash and Fort Wayne. In 1871 he joined the Colorado Conference, where he served faithfully until 1875, when his failing health obliged him to take a supernumerary relation. He next removed to Quincy, Ill., where he died, May 11, 1877. As a writer, Mr. Waltz was clear, lucid, instructive, and interesting; as a preacher, above the average, faithful, practical, logical; as a pastor, devoted; as a father, affectionate. See Minutes of Annual Conferences, 1877, p. 82.

WAMA (or VAMA), in Hindū mythology, was the wife of king Asawena, who sprang from the holy family of Ikswaka. She gave birth, by her husband, to Parwa, who became so renowned for his piety that he was made one of the twenty-three elders of Buddha.

WAMACK, DRURY, a minister in the Methodist Episcopal Church, South, was born in Rutherford County, N. C., Oct. 12, 1806. He professed religion after reaching his majority, and entered the Tennessee Conference. In 1854 he went to Texas, and entered the North-west Texas Conference. He died in 1878 or 1879. See Minutes of Annual Conferences of the M. E. Church, South, 1879, p. 77.

Wambaugh, ABRAHAM B., a Methodist Episcopal minister, was born in Huntington County, N. J., Oct. 23, 1841. He was admitted to the age of thirteen; joined the Ohio Conference in 1858, and served at Jamestown, Bellefontaine, East Liberty, Jamestown a second term, Columbus, and Circleville. In 1844, because of failing health, he located, studied law, and for six years pursued that profession, though all the time punished by a guilty conscience. In 1862 he was readmitted into the Conference, in which he labored earnestly until his death, Aug. 14, 1873. Mr. Wambaugh was a minister of large ability, reserved among strangers, amiable among acquaintances, always very dignified. See Minutes of Annual Conferences, 1875, p. 146.

WAMEN. See VAMA.

WAN, in Norse mythology, is one of the infernal streams in the kingdom of HELL.

WANADIS, in Norse mythology, is a surname of Freia, the goddess of the Wanes, she having sprung from that nation.

WANAGAREN (or Vanagaren or Banafsheren), in Hindū mythology, is the son of the giant-king Bali, and reigned in Maralipuram. Because Krishna's son Anurudd enthicted his daughter and was captured. Krishna carried on a war with him, and captured his kingdom, notwithstanding Siva's defence, and cut off the giant's thousand hands, all but two, with which he is obliged to pay homage. It would seem as if this myth were designed to express the removal of the Siva-worship by Vishnu.

WANAHEDAM, in Norse mythology, is the country of the Wanes, and is thought to be in the extreme north of Europe, but is difficult to locate exactly either its history or geography.

WANDALLIN, Johan (1), a Protestant theologian of Denmark, was born Jan. 26, 1624, at Viborg, in Jutland. At the age of fourteen he was acquainted with the Hebrew, Chaldee, Syrian, Arabic, and Rabbinical languages. He studied at Copenhagen, Leyden, Utrecht, and other universities. In 1651 he returned to Copenhagen; was appointed lecturer in Hebrew,希伯来语, and the languages, and in 1655 professor of theology. He died as bishop of Seeland in 1675.

He wrote, Comment. in Hag. (1649); Comment, in Librum Esrae; Exercit. in Historiam Sacram Antiquas; De Statu Animarum Post Mortem, etc. See Witta, Mosis Theo iorum; Vinding, A cademia Hremsia. Barthelein, De Scripturis Danii; Jocher, Algemeines Gelehrten-Lexikon, s. v. (B. P.)

WANDALLIN, Johan (2), son of the preceding, was born at Copenhagen, Jan. 14, 1656, where he also became professor of Oriental languages in 1683. He died March 20, 1737. He wrote, Discor. Dialetics de dogmatique de Prophétie et Prophetie (Hafnia, 1676);—Discussion Spei Speciosae de Conversione Judaeorum (ibid. 1792). See Rausch, De Utilitate Peregrinationis Danice; Jocher, Allgemeines Gelehrten-Lexikon, s. v.; Fürst, Bibl. Jud. iii, 493. (B. P.)

WANDALLIN, Peter, a Protestant theologian and linguist of Germany who died in 1559, is the author of Catalogus 900 Vocabularum Daniciorum Coputationem ex Lingua Hebr. Ducentium (Hafnia, 1651). He also wrote Paraphrasia Germ. in 7 Psalmos Panentielis, in Epist. ad Galatas, Philippenes, Hebrews, et Typ Johannis Epistolae. He wrote likewise in the Danish language. See Moller, Cembria Litterata; Jocher, Allgemeines Gelehrten-Lexikon, s. v. (B. P.)

WANDBERT, a saint of German extraction, was born A.D. 813, and became a monk in the monastery of Prum. He was a learned theologian and Latin scholar, whose attainments not only won for him the position of master in the school of his convent, but also gave him literary celebrity. He earned for him the notice of the emperor Louis the Pious. Wandebert was a devoted educator and scholar, and also a busy writer. He left numerous works at his death, both in prose and verse, only two of which are still extant. The first, entitled Vizi et Mires, probably a sermon, was published at Mayence in 1499, and afterwards incorporated by Surius and Mabillon in their respective Acta. It originated in the desire to perpetuate the fame of St. Goar, whose cell on the Rhine was given to the monastery of Prum by kings Pepin and Charlemagne, and is valuable for its account of the days of Ossipringen times. The second work, a Martyrology, is no less important. It was written in verse, and completed about A.D. 850. A preface in prose was prefixed, which describes the different meters employed by him, but otherwise not in general use in his age; and upon this follow six lyrics whose burden is the invocation of the saint to address to the reader, a dedication to the emperor Lothaire, a statement of the plan of the work, and a survey of the different parts of the year. The martyrology itself begins with Jan. 1, and describes in brief the life, character, and death of one or more saints for each day in the calendar year. The entire work is made by a Hymnus in Omnes Sanctos in Sapphic verse; and two other hymns on the seasons and pastoral occupations, etc., in heroic verse. These poems cannot be regarded as successful essays in poetry so much as they must be considered noteworthy productions of the learned culture of that time. The martyrology, unaccompanied by the minor

Wandering Jew. See JEW, THE WANDERING.

Wandsworth, a large village of England, county of Surrey, on the Wandle, near its mouth in the Thames, five miles south-west of St. Paul's, and now included in the city of London; noted as being the seat of the first Presbyterian church and the first presbytery. In 1572 the first presbytery was organized secretly. The members were Mr. Duncan, the first presbyter of Wandsworth; Mr. Smith of Mitcham; Mr. Crane, of Roehampton; Messrs. Wilcox, Standon, Jackson, Bonham, Saintlode, and Edmonds; and afterwards Messrs. Travers, Clarke, Barber, Gardner, Crook, Egerton, and a number of very influential laymen. Eleven elders were chosen, and their duties described in a letter entitled The Teachers of Wandsworth. See PRESBYTERIAN CHURCHES.

Wanes, in Norse mythology, is a people the location of whose country, Wanaheim, is not definitely given; sometimes being thought to be on the Don (Tanais), sometimes on Cape North. This people is remarkable only as being implicated in a long and frightful struggle with the giants, the Aesir, which seems to lead to the destruction of both, until finally peace was made and hostages exchanged, whereby the Aesir released Niord and Freia, and the Wanes Hâner and Mimmer. Both parties also split into a cask, from whose contents the Aesir then created the white man Quasar. The Wanes appear to have been an experienced people, because their hostages introduced the worship of deities among the Aesir. They seem, however, to have been inexperienced in state management, as the Aesir made Hâner their king, while the wise Mimmer was made his adviser; from this is explained the fact of the partial submission of the Wanes to the conquering Aesir.

Wangneræck, Heinrich, a German Jesuit, was born in 1595, and died Nov. 11, 1664. He wrote, Notes in Confessionem S. Augustini.—De Creatione Animae Rationalis:—Antitheses Catholico de Fide et Bonis Operibus, ArEtica IV, VI, XX, Confessionis Augustanae Oppositiones:—Judicium Theologicum super Quæstione: an Pari, quærum Dei Desiderant Protestantæs, sit secundum illicæ? et alia. See Witte, Dictionary Biographique; Alemagbe, Biblioth. Scriptorum Societatis Jesu; Jocher, Allgemeine Gelehrten-Lexikon, s. v. (B. P.)

Wanker, Ferdinand Germain, a Catholic divine of Germany, was born Oct. 1, 1708, at Freiburg, in the Breisgau, where he also studied, and where, on account of his excellent examination, he was promoted as doctor of divinity. In 1782 he received holy orders at Constanz, in 1783 was made subregens at the seminary in Freiburg, and in 1788 was appointed professor of ethics. For a great many years he occupied this chair, and was almost always the president or a member of the college of Freiburg, which he died, Jan. 19, 1824. He is the author of Christliche Sittlichkeit (ULM, 1794; 3d ed. Vienna, 1810). He also wrote, Uber Versunf and Offenbarn in Hinsicht auf die moralischen Bedürfnisse der Menckheit (ibid. 1804; new ed. Freiburg, 1819):—Vorlesungen über Religion nach Versammlung und Offenbarung (Mayence, 1826). His works were edited by Friedrich Weick (Sulzbach, 1830 sq. 4 vols.). See Werner, Gesch. der katholischen Theologie, p. 264; Hug, Rede auf Ferd. Wankr, Dr. v. Prof. der Theologie; Theologisches Universal- Lexikon, s. v.; Winer, Handbuch der theolog. Lit., 286, 316; ii, 924, 825. (B. P.)

Wanley, Nathaniel, an English clergyman and author, was born at Leicesster in 1639, and educated at Trinity College, Oxford. He became minister at Beeby, Leicestershire, and subsequently vicar of Trinity Church, Coventry. He died in 1680. Mr. Wanley was the author of Vot, Or, The Great Duty of Reflection upon a Man's Own Ways (London, 1688):—The Wonders of the Little World: or, A General History of Man (1678):—The History of Man: or, The Wonders of Human Nature in Relation to the Virtues, Vices, and Defects of Both Sexes (1704). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Wannelemans, Johann Michael, an Oriental scholar and traveller in Abyssinia and Egypt, was born in Thuringia in 1665. He was living at Erfurt in 1668, when he was sent by Ernest, duke of Saxo-Gotha, with instructions to conciliate, if possible, the good-will of the Abyssinians, and open up the way for teachers of the Reformed religion. He lingered in Egypt, and, on his return, not being able to account for the money intrusted to him, revolted to the Roman Catholic Church in 1677. He then went to Paris, whence he was sent by Colbert, in 1672, to Egypt, to purchase rare manuscripts for the king's library. In 1678 he became vicar of a church near Fontainebleau, and subsequently vicar of Bouron, where he died in 1679. He was the author of Historia Eclecsiae Alexandriae:—Relation du Désert d'Egypte.—Newell Relation en Forme de Journal de son Voyage Fait en Egypte (1677). See Mosheim, Hist. of the Church, bk. iv, cent. xvii, ii, pt. 1, ch. ii.

Waple, Edward, an English clergyman of the 17th century, became prebendary of Bath and Wells in 1677; archdeacon of Taunton in 1682; prebendary of Winchester in 1691; and died in 1712. He was the author of Book of the Resolution Paraphrased (1693):— and Seventy Sermons (1714-20, 3 vols.; a second edition with Life, 1729). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Wapperts, Gustave, a Flemish painter, was born at Antwerp in 1800. He studied there, and afterwards at Paris, where he attended the studio of David at the academy school. In 1850 he produced the Devotions of the Burgomasters of Leyden, which established his reputation as an original historical painter. He was secretary of Leopold I, who made him a baron; and was director of the Academy of Antwerp until about 1855, when he removed to Paris, and died there Dec. 6, 1874. Among his best works are, Christ at the Sepulchre;—Charles I Taking Leave of his Children;—Charles IX on the Night of St. Bartholomew;—and Execution of Anne Boleyn.

War (prop. מלח, πολέμος, but represented in the Heb. by many subsidiary terms), Hebrew. We may define war as an attempt to decide a contest between princes, states, or large bodies of people, by resorting to excessive acts of violence, and compelling claims to be conceded by force. 1. Early History of Warfare.—This we treat, however, only in its relation to the Hebrews. 2. Patriarchal.—It is probable that the first wars originated in nomad life, and were occasioned by the disputes which arose between wandering tribes for the possession of land, pasture, or flocks and herds. Tribes which lived by hunting were naturally more warlike than those which led a pastoral life; and the latter, again, were more devoted to war than agricultural races. There was almost a natural source of hostility between these races: the hunters were enraged against the shepherds because they appropriated animals by domestication, and the shepherds
equally hated the agriculturists because they appropriated land by tillage, and thus limited the range of pasturage. Hunting also indisposed those who lived by the chase to pursue more toilsome and less exciting occupations; chosen herds, too, thus supported themselves without to throw all the burden of manual labor on their wives, their children, and afterwards on persons whom they reduced to slavery. There is a universal tradition in Western Asia, that Nimrod, mentioned in Scripture as "a mighty hunter before the Lord," was the first who established his power on the ground of obtaining slaves, and that he was also the first who introduced the practice of compelling conquered nations to rescue themselves by the payment of tribute as a ransom. So early as the days of Abraham, we find that wars were undertaken to express purpose and secure slaves and tribute. Chedorlaomer forced several neighboring princes, including the king of Sodom, to pay him tribute for twelve years; and when they ceased to submit to this exaction, he invaded their territories for the purpose of reducing the inhabitants to slavery. He succeeded, and carried away a host of captives, among whom were Lot and his family; but the prisoners were rescued by Abraham.

2. Among the Early Nations, Neighbors to the Israelites.—From the existing monuments of Egypt and Assyria, we learn that war was, among the ancient nations, confined to the Doric race, and not on the Turko-Mongolian. Egypt early possessed a considerable standing army, which was probably kept up by conscription. "Wherever," says Rossellini, "the armies are represented on the great monuments of Egypt, they are composed of troops of infantry, armed with the bow or lance, and of ranks of war-chariots, drawn by two horses. The few figures upon horses almost all belong to foreigners." Chariots also appear in Homer, as the principal strength of the Egyptian army (Iliad, iv, 883). Champaign also says of the war-chariots: "This was the cavalry of the age; cavalry, properly speaking, did not exist then in Egypt." Hence, when Pharaoh proposed the fugitive Hebrew, he "took six hundred chosen chariots," evidently the royal guard; and also all the chariots of Egypt, i.e., the remainder of his disposable mounted forces; as the infantry could not well take part in the pursuit. "And the Egyptians followed them and overtook them, where they were hemmed in by the sea, all the chariot-horses of Pharaoh and his riders and his host" (Exod. xiv, 6, 7, 9, 23, 25, 26, 28). The Assyrian monuments exhumed by Botta and Layard exhibit the military force of the Assyrians as composed of infantry, armed with the bow and the lance; also of war-chariots and regular cavalry (Iliad, ii, 834). Botta gives the list of the chariots, which are depicted on the walls of Khorsabad are low, with two small wheels, with one or two persons standing in each, besides the driver; the horses are full of mettle, some of them splendidly caparisoned (Nah. iii, 3). See CHARIOT.

11. Military Tactics among the Hebrews.—(In this section we follow Kitto's Cyclopaedia.) The Hebrew nation, so long as it continued in Egyptian bondage, might be regarded as unacquainted with military affairs, since a jealous government would scarcely permit so numerous and dense a population as the pastoral families of Israel which retained their seat in Canaan, certainly were to be in possession of the means of resistance to authority; but, placed as this portion of the people was, with the wanderers of the wilderness to the south and the mountain robbers of Edom to the east, some kind of defence must have been provided to protect their bondage to make their natal nation, as Egypt, itself from foreign inroads. Probably the laboring population, scattered as bondmen through the Delta, were alone destitute of weapons; while the shepherds had the same kind of defensive arms which are still in use and allowed to all classes in Eastern countries, whatever be the social position. This social position appears to be countenanced by the fact that, when suddenly permitted to depart, the whole organization required for the movement of such a multitude was clearly in force; yet not a word is said about physical means to resist the pursuing Egyptians, although that a subordinate period, they were not wanting to invade Palestine, but that special causes prevented them from being immediately resorted to. The Israelites were, therefore, partly armed; they, doubtless, had their bows and arrows, clubs, and darts, wicker or ox-hide shields, and helmets (saepe) of skins or of woven rushes.

From their familiar knowledge of the Egyptian institution, the Israelites, doubtless, copied their military organization, as soon as they were free from bondage, and became inured to a warlike life during their forty years' wandering in the desert, but with the unmistakable difference, that while Egypt reckoned her hundreds thousands of regulars, either drawn from the provinces or nomes by a kind of conscription, such as is to be seen on the monuments, or from a military caste of hereditary soldiers, the Hebrew people, having preserved the patriarchal institution of nomads, were embodied by families and tribes, as is plainly proved by the order of march which was preserved during their pilgrimage to the Land of Promise. That order likewise reveals a military circumstance which seems to attest that the distribution of the greatest and most warlike masses was in such a way that the order of march did not favor towards their immediate enemies—but always to the front and right, as if even then the most serious opposition might be expected from the east and north-east—possibly from a remembrance of past invasions of the giant races and of the first conquerors, furnished with cavalry and chariots, having come from those directions.

At the time of the departure of Israel, horses were not yet abundant in Egypt, for the pursuing army had only six hundred chariots; and the shepherds people were even prohibited from breeding or possessing them. The Hebrews were enjoined to trust, under divine protection, to the enemies of the heathen, their own country being chiefly within the basin of high mountains, and the march thither over a district of Arabia where, to this day, horses are not in use. We may infer that the inspired lawgiver rejected horses because they were already known to be less fit for defence at war than for distant expeditions of conquest, in which it was not intended that the chosen people should engage.

Where such exact order and instruction existed, it may not be doubted that in military affairs, upon which, in the first years of emancipation, so much of future power and strength depended, the proper means of defense were appropriate were taken, and that, with the Egyptian model universally known, similar institutions or others equally efficient were adopted by the Israelites. Great tribal ensigns they had, and thence we may infer the existence of others for subordinate divisions. Like the Egyptians, they could model in columns and form well-ordered ranks in deep fronts of battle; and they acted upon the best suggestions of human ingenuity united with physical daring, except when expressly ordered to trust to divine interposition. The force of circumstances caused in time modifications of importance to be made, where doctrine had interfered with what was felt to hinge on political necessities; but even then they were long and urgently wanted before they took place, although the people in religion were constantly disregarding the most important points, and forsaking that God who, they all knew and believed, had taken them out of bondage; to make them natal nation, as Egypt, itself from foreign inroads. Although, from the time the tribes of Reuben and Manasseh received their allotment east of the Jordan, the possession of horses became in some measure necessary to defend their frontiers, still the people persisted for ages in abstaining from them, and even in the time of David it would not occur to them to copy the practice, but when the policy of Solomon had made extensive
conquests, the injunction was set aside, because horses became all-important. From the Captivity till after the destruction of Jerusalem, the remnant of the Eastern peoples, like our enemies, could not advance except in war, and even in war the horse was less important. It was imbibed into the like of the Persian cavalry, won great battles, and even captured Parthian kings. When both the kingdoms of Judah and Israel were again confined to the mountains, they reduced their cavalry to a small body; because, it may be, the narrative, the Want was, by the Parthian. It was as it still is, unfavorable to breeding horses. Another instance of unwillingness to violate ancient institutions is found in the Hebrews abstaining from active war on the Sabbath until the time of the Maccabees. There are, however, indications in their military transactions, from the time Assyrian and Persian conquerors pressed upon the Israelitic states, and still more after the Captivity, how the influence of Asiatic military ideas, according to which the masses do not act with ordered unity, but trust to the more adventurous in the van to decide the fate of battle. Later still, under the Maccabees, the systematization of Macedonian importation can be observed, even though in Asia the Greek method of training, founded on mathematical principles, had never been fully complied with, or had been modified by the existence of new circumstances and the new reconstruction. For example, the use of great bodies of light cavalry, showering millions of arrows upon their enemies, and lighting elephants introduced by the Ptolemies. But all these practices became again modified in Western Asia when Roman dominion had superseded the Greek kingdoms. Even the Jews, as is evident from Josephus, modelled their military force on the Imperial plan; their infantry became armed and was manoeuvred in accordance with that system which everywhere gave victory by means of the firmness and mobility which it imparted. The masses were composed of conscripts, of class equivalents, of a system of centurias and decurias, or subdivisions into hundreds, fifties, and tens—similar to modern battalions, companies, and squadts; and the commanders were of like grades and numbers. Thus the people of Israel and the nations around them cannot be accurately considered, in a military view, without taking into account the successive changes here noticed; for they had the same influence which military innovations had in Europe between the era of Charlemagne and the emperor Charles V, including the use of cannon—that invention for a long time making no greater alteration in the constitution of armies than the perfection of war machines produced upon the military institutions of antiquity.

The army of Israel was chiefly composed of infantry, as before remarked, formed into a trained body of spearmen, and, in greater numbers, of slingers and archers, with horses and chariots in small proportion, excepting during the periods when the kingdom extended over the desert to the Red Sea. The irregulars were drawn from the families and tribes, particularly Ephraim and Benjamin; but the heavy-armed derived their chief strength from Judah, and were, it appears, collected by a kind of conscription—by tribes, like the earlier Roman armies—not through the instigation of superior officers, but by genealogists of each tribe under the superintendence of the princes. Of those returned on the rolls, a proportion greater or less was selected, according to the exigency of the time; and the whole male population might be called out on extraordinary occasions. When kings had rendered the system of government by consent incommode, there was an officer denominated שֹׁטֶר, a sort of muster-master, who had returns of the effective force or number of soldiers ready for service, but who was subordinate to the פֶּרֶשׂ, pē'ér, or scribe, a kind of secretary of state. These officers, or the skotērins, struck out or excused from service: (1) those who had built a house without having yet inhabited it; (2) those who had planted an olive or vineyard and had not tasted the fruit, which gave leave of absence for five years; (3) those who were betrothed, or had been married four months, or had fathered a child, which may mean the constitutionally delicate, rather than the cowardly, as that quality is seldom owned without personal inconvenience, and where it is no longer a shame the rule would destroy every levy.

The levies were drilled to march in ranks (1 Chron. xxi. 28), in columns by fives (2 Chron. xxiv. 19; Ezek. xxiii. 18); hence it may be inferred that they borrowed from the Egyptian system a decimal formation—two fifties in each division making a solid square, equal in rank and file: for twice ten in rank and five in file being told off by right-hand and left-hand files, a command to the left-hand files to face about and march six or eight paces to the rear, then to front and take one step to the right, would make the hundred a solid square, with only the additional distance between the right-hand or unmoved files necessary to use the shield and spear without hindrance; while the depth being again reduced to five files, they could face to the right or left and march firmly in column, passing every kind of ground without breaking or lengthening their order. The pentastichous system, or arrangement of five men in depth, was effected by the simple evolution just mentioned, to its own condensation to double number, and at the same time afforded the necessary space between the files of spearmen, or light infantry, or archers, for handling their weapons without obstacle—always a primary object in every ancient system of training. Between the fifth and sixth rank there was thus space made for the ensign-bearer, who, as he then stood precisely between the companies of fifty each, had probably some additional work to handle his ensign, being stationed between the four middlemost men in the square—having five men in file and five in rank before, behind, and on each side. There he was the regulator of their order, coming to the front in advancing, and to the rear in retreat; and this may explain why στρυγός, a file, and the Hebrew דֶּפֶל and דָּאָב, an ensign, are in many cases regarded as synonymous. Although neither the Egyptian depth of formation, if we may judge from their pictured monuments, nor the Greek phalanx, nor the Roman legion, was constructed upon decimal principles, yet the former was no doubt so in its origin, since it was the direct forerunner of the Israelites; and the Egyptian system, which afterwards succeeded, shows that it was not the original, since even in the phalanx, where the files formed, broke, and doubled by fours, eight, sixteens, and thirty-twos, there remained names of sections which indicated the first-mentioned division. Such a system would surely denote the formation of fifty, while in reality it consisted of sixty-four; and the decay and decurio, though derived from a decimal order, signified an entire file or a compact line in the phalanx, without reference to number.

With centuries thus arranged in masses, both movable and solid, a front of battle could be formed in simple decimal progression to a thousand, ten thousand, and to an army at all times formidable by its depth, and by the facility it afforded for the light troops, chariots of war, and cavalry to rally behind and to issue from their lines; for the heads of the horsemen, and the time of the kings were appointed by the crown, and had a seat in the councils of war; but the commander of the host, חַשּׁיָּה כַּפּוֹת, sār al ha-tebb, such as Josiah, Abner, Beniah, etc., was either the judge, or, under the
judge or king, the supreme head of the army, and one of the highest officers in the State. He as well as the king had an armor-bearer, whose duty was not only to bear the shield when fighting, but above all, to be at the chief's side in the hour of battle (Judg. ix. 54; 1 Sam. xiv. 6; xxxi. 4, 5). Besides the royal guards there was, as early, at least, as the time of David, a select troop of heroes, who appear to have had an institution very similar in principle to our modern orders of horse guards, and may have had the distinctive marks already pointed out as used by the Romans; for it seems they strewed their hair with gold dust. See Armor.

In military operations, such as marches in quest of, or in the presence of, an enemy, and in order of battle, the forces were formed into three divisions, each commanded by a chief, captain or commander of a corps, or third part (שֵׁלִישׁ, Shelish), as was also the case with other armies of the East; these constituted the centre and right and left wing, and during a march formed the van, centre, and rear. The great camp in the wilderness was composed of four of these triple bodies disposed in a quadrangle, each front having a great central standard for its leading tribe, and another tribal one in each wing.

The war-cry of the Hebrews was not intimated by the ensign-bearers, as in the West, but by a Levite; for priest had likewise charge of the trumpets and the sounding of signals; and one of them, called the anointed for war, who is said to have had the charge of animating the army to action by an oration, may have been appointed to utter the cry of battle (Deut. xv. 2). It was a mere shout (1 Sam. xvii. 20), or, as in later ages, Hallelujah!—so called the motif or central banners of the four great sides of the square of Judah, Reuben, Ephraim, and Dan were more likely the battle-songs which each of the fronts of the mighty army had sung at their coming out of Egypt, which are to do battle (Num. x. 34, 35, 36; Deut. v. 4). These verses may have been sung even before the two books wherein they are now found were written, and indeed the sense of the text indicates a past tense. It was to these, we think, Jehoshaphat addressed himself when about to engage the Moabites: he ordered "the singers before the Lord" to chant the response (2 Chron. x. 21), "Praise the Lord, for his mercy endureth forever." With regard to the pass-word, the sign of mutual recognition occurs in Judg. vii. 18, when, after the men had blown their trumpets and shown light, they cried, "The sword of the Lord and of Gideon."—a repetition of the very words overheard by that chief while watching the hostile army.

Before an engagement the Hebrew soldiers were spared fatigue as much as possible, and food was distributed to them; their arms were enjoined to be in the best order, and they formed a line, as before described, of solid squares of hundreds, each square being ten deep, and as many in breadth, with sufficient intervals between the files to allow of facility in the movements, the management of the arms, and the passage to the front or rear of slingers and archers. These last occupied posts according to circumstances, on the flanks or in advance, but the business of battle was to bind the squares of spear-men; the slingers were always stationed in the rear, until they were ordered forward to cover the front, impede a hostile approach, or commence an engagement, somewhat in the manner of modern skirmishers. Meantime the king, or his representative, appeared clad in the sacred ornaments (תַּנָּרָן, tanaran, hadad kidosh, in our version rendered "the beauty of holiness," Psa. cx. 3; 2 Chron. xx. 21), and proceeded to make the final dispositions for battle, in the middle of his chosen brave, and attended by priests, who, by the repetition of the very words overheard while the trumpets waited to sound the signal. It was now, with the enemy at hand, we may suppose, that the slingers would be ordered to pass forward between the intervals of the line, and, opening their order, would let fly their stone or leaden missiles against them, by fire. The dual approach of the two lines of fronts, they would be hemmed in and recalled to the rear, or ordered to take an appropriate position. Then was the time when the trumpet-bearing priests received command to sound the charge, and when the shout of battle burst forth from the ranks. The signal being given, the heavy infantry would press forward under cover of their shields, with the רֶמֶשׁ, remesh, protruded directly upon the front of the enemy; the rear ranks might then, when so armed, cast their darts, and when behind them all, shoot high, so as to pitch their arrows over the lines before them into the dense masses of the enemy beyond. If the opposing forces broke through the line, we may imagine a body of charioteers in reserve rushing from their post and charging among in the disjointed ranks of the enemy before they could reconstruct their order; or, wheeling round a flank, fall upon the rear; or being encountered by a similar manoeuvre, and perhaps repulsed, or rescued by Hebrew cavalry. The king, meanwhile, surrounded by his princes, posted close to the rear of his line of battle, and, in the middle of showered missiles, would watch the enemy and strive to remedy every disorder. Thus it was that "the heavy infantry were weighed down with the burden of the battle" (2 Chron. xvii. 38; xxxv. 29), and that such an enormous waste of human life took place; for two hostile lines of masses, at least ten in depth, advancing under the confidence of breastplate and shield, when once engaged hand to hand, had difficulties of no ordinary nature to treat; because the hindermost ranks, not being exposed personally to the first slaughter, would not, and the foremost could not, fall back; neither could the commanders disengage the line without a certainty of being routed. The fate of the day was therefore no longer within the control of the chief, and nothing but obtuse valor was left to determine the battle, as with the stubborn character of the Jews, battles fought among themselves were particularly sanguinary; such, for example, as that in which Jeroboam, king of Israel, was defeated by Abijah of Judah (xiii. 3—17), wherein, if there be no error of copyists, there was a greater slaughter than in ten such battles as that of Lepea, although on that occasion three hundred and fifty thousand combatants were engaged for three successive days, provided with all the implements of modern destruction in full activity. Under such circumstances defeat led to irretrievable confusion, and, where either party possessed superiority in cavalry, the result would be a complete victory; but where the infantry alone had principally to pursue a broken enemy, that force, loaded with shields and preserving order, could overtake very few who chose to abandon their defensive armor, unless they were hemmed in by the locality. Sometimes a part of the army was posted in ambush, but this manoeuvre was but commonly practiced against the garrisons of cities (Josh. viii. 12; Judg. xx. 33). In the case of Abraham (Gen. xiv. 15), when he led a small body of his own people, suddenly collected, and, falling upon the guard of the captives, released them, and recovered the booty, he was a surreptitiously not an ambush; nor is it necessary to suppose that he fell in with the main army of the enemy. At a later period there is no doubt the Hebrews formed their armies, in imitation of the Romans, into more than one line of masses, and modelled their military institutions as near as possible upon those of the Romans.

Such were the instruments and the institutions of war which the Hebrew people, as well as the nations which surrounded them, appear to have adopted; but in the conquest of the Promised Land, as regards their enemies, the laws of war prescribed to them, for purposes of war, were more stringent, and the respect to the persons of the enemy was more than in other cases. All the nations of antiquity were cruel to the vanquished, perhaps the Romans most
WAR

line one or more "mounts" or "banks" (TA\u00f6\u00f6). Saal-

schütz [Archäol. ii, 504] understands this term of the

scaling-ladder, comparing the cognate sustlām [Gen.

xxvi, 12], and giving the verb shokhād, which accom-

panies sustlād, the sense of a "turried" advancing of

the ladder." In the invention of the city (2 Sam. vii, 15;

2 Kings xix, 32; Isa. xxxvii, 33), which was gradually

increased in height until it was about half as high as

the city wall. On this mound or bank towers (TA\u00f6\u00f6).

Some doubt exists as to the meaning of this term. The

sent of "turrets" assigned to it by Gesenius [Thesaur.

p. 530] has been objected to on the ground that the word

always refers to the inner wall in connection with the

expression "round about" the city. Hence the sense of

"circumvallation" has been assigned to it by Michaelis,

Kell [Archäol. ii, 303], and others. It is difficult,

however, in this case, to see any distinction between

the terms doyēt and mātesār. The expression

"round about" may refer to the custom of building up

banks at different points: the use of the singular in a

collective sense forms a greater difficulty] were erected

(2 Kings xxv, 1; Jer. iii, 4; Ezek. iv, 2; xvii, 17; xxi,

22, xxvi, 8), whence the alingers and archers might

attack with effect. Battering-rams (TA\u00f6\u00f6, Ezek. iv, 2;

xxi, 22) were brought up to the walls by means of the

bank, and scaling-ladders might also be placed on it.

Underground galleries, though probably existent as early

as Layan (Nurseh, ii, 371), is not noticed in the Bib-

le: the reference to it in the Sept. and Vulg., in Jer. ii,

58, is not warranted by the original text. Sometimes,

however, the walls were attacked near the foundation,

either by individual warriors who protected themselves

from arrows by means of shields (Ezek. xxvi, 5), or by

the further use of such a machine as the helotrope, re-

ferred to in 1 Macc. xxi, 43. This is described by Ammi-

nus Marcellinus (xxiii, 4, 10) as a combination of the

testudo and the battering-ram, by means of which the

besiegers broke through the lower part of the wall, and

thus "lopped into the city;" not from above, as the words

prima facie imply, but from below. Burning the gates

was another mode of obtaining ingress (Judg. ix, 52).

The water-supply would naturally be cut off, if it

were possible (Judith vii, 7). The besieged, meanwhile,

strengthened and repaired their fortifications (Isa. xxii,

10), and repelled the enemy from the wall by means

(2 Sam. ii, 24), by throwing over beams and heavy

stones (Judg. ix, 63; 2 Sam. ii, 21; Josephus, War, v,

3, 8, 6, 8), by pouring boiled oil (ibid. iii, 7, 28), or,

lastly, by erecting fixed engines for the propul-

sion of stones and arrows (2 Chron. xxv, 15). See Ex-

cine. Ex. 2. The engines made for this purpose were

by employing the besiegers' works (1 Macc. vii, 31; War,

vii, 11, 4), and driving them away from the neighborhood.

The foregoing operations receive a large amount of illu-

stration from the representations of such scenes on the

Asyrian slabs. We there see the "banks" in the form of an

inclined plane, with the battering-ram hauled up on it

assaulting the walls; movable towers of considerable

elevation brought up, whence the warriors discharge their

arrows into the city; the walls undermined, or attempts

made to destroy them by picking to pieces the stones;

the defenders engaged in archery, and averting the force

of the battering-ram by chains and ropes; the scaling-ladders

at length brought up, and the conflict become hand-to-hand

(Layan, Ninete, ii, 866-874). See Battiein-ram; Leyer.

The treatment of the conquered was extremely severe

in ancient times. The leaders of the host were put to

death (Josh. x, 26; Judg. vii, 25), with the occasional

indignity of decapitation after death (1 Sam. xvii, 51;

2 Macc. xx, 30; Josephus, War, i, 17, 2). The bodies

of the soldiers killed in action were plundered (1 Sam.

xxxvii, 7); the dead being afterwards butchered and

killed in some savage manner (Judg. ix, 45; 2 Sam. xii,

31; 2 Chron. xxxv, 12), mutilated (Judg. i, 6; 1 Sam.

xi,
WAR

2), or carried into captivity (Num. xxxi, 26; Deut. xx, 14). Women and children were occasionally put to death with the greatest barbarity (2 Kings viii, 12; xv, 16; Isa. xiii, 16, 18; Hos. x, 14; xiii, 16; Amos i, 13; Nah. iii, 8; Zech. vii, 10). In addition to these measures, the towns were destroyed (Judg. ix, 45; 2 Kings iii, 25; 1 Macc. v, 28, 51; x, 84), the idols and shrines were carried off (Isa. xi, 1, 2), or destroyed (1 Macc. v, 68; x, 84); the fruit-trees were cut down, and the fields spoiled by overspreading them with stones (2 Kings iii, 12, 25); and the hoes were lamed (2 Sam. viii, 4; Josh. xi, 6, 9). If the war was carried on simply for the purpose of plunder or supremacy, these extreme measures would hardly be carried into execution; the conqueror would restrict himself to rifling the treasuries (1 Kings xiv, 20; 2 Kings xiv, 14; xxiv, 19), or levying contributions from the nation (Deut. xvi, 11). The Mosaic law, however, mitigated to a certain extent the severity of the ancient usages towards the vanquished. With the exception of the Canaanites, who were delivered over to the ban of extermination by the express command of God, it was forbidden to the Israelites to take wives and daughters out of their captive territories; the women and children were to be kept alive (Deut. xx, 13, 14). In a similar spirit of humanity the Jews were prohibited from felling fruit-trees for the purpose of making siege-works (ver. 19). The law further restricted the power of the conqueror over females, and secured to them humane treatment (xxi, 10-14). The majority of the savage acts recorded as having been practiced by the Jews were either in retaliation for some gross provocation, as instanced in the cases of Adoni-bezek (Judg. i, 6, 7), and of David's treatment of the Ammonites (2 Sam. x, 2-4; xii, 31; 1 Chron. xx, 9); or else they were done by lawless usurpers, as in Menahem's treatment of the women of Tiphsah (2 Kings xv, 16; comp. Judg. ix, 45). The Jewish kings generally appear to have obtained credit for clemency (1 Kings xx, 31; comp. 2 Kings vi, 20-23; Is. i, 29).

The conquerors celebrated their success by the erection of monumental stones (1 Sam. vii, 12; 2 Sam. viii, 13, where, instead of "gat him a name," we should read "set up a memorial"), by hanging up trophies in their public buildings (1 Sam. xxxi, 9; xxxii, 10; 2 Kings xi, 10), and by triumphal songs and dances, in which the whole nation joined (1 Chron. xxv, 27-31; 2 Sam. xviii, 8-12; 2 Sam. xxii; Judith xvi, 2-17; 1 Macc. iv, 24). The death of a hero was commemorated by a dirge (2 Sam. i, 17-27; 2 Chron. xxxvi, 25), or by a national mourning (2 Macc. iii, 31). The fallen warriors were duly buried (1 Kings xi, 15), their arms being deposited in the grave beside them (Ezek. xxv, 27), while the enemies' corpses were exposed to the beasts of prey (1 Sam. xvii, 44; Jer. xxx, 33). The Israelites were directed to undergo the purification imposed on those who had touched a corpse, before they entered the presence of the camp or the sanctuary (Num. xxxii, 18).

IV. Moral Principles Involved.—We may distinguish two kinds of war among the Hebrews. Some were of obligation, being expressly commanded by the Lord; others were free and voluntary. The first were such as those against the Ammonites, against the Philistia, the interlopers, and wicked Canaanites, nations devoted to extermination. The others were to avenge injuries, insults, or offences against the nation. Such was that against the city of Gibeath, and against the tribe of Benjamin; and such was that of David against the Ammonites, whose king had insulted his ambassadors as they were to maintain and defend their allies, as that of Joshua against the kings of the Canaanites, to protect Gideon. In fact, the laws of Moses suppose that Israel might make war, and oppose enemies. As to details, the laws of war among the Hebrews, as we have seen, prescribed severities in the treatment of the conquered such as we should not now approve. Probably in practice limitations were put upon the abstract rights of conquerors among the Jews just as among Christian nations. This is not invalidated by severities such as those of Gideon towards the kings who had enslaved Israel (Judith vii, 25; viii, 20-21); or of David cutting off and carrying away the head of the Philistine champion (1 Sam. xvii, 54; nor by such exceptional dealings as those with the Midianites, who had made themselves almost as obnoxious to punishment as the devoted Canaanites (Num. xxxi)). The same may be said of the fearful threatening in Psa. cxxxvii, 8, 9; but, as a matter of practice, contrast the cruelty of putting out eyes by the Philistines, the Ammonites, and the Chaldeans (Judg. xvi, 21; 1 Sam. xi, 2; 2 Kings xvii, 7). The treatment of the men of Succoth and Penuel by Gideon, of the Ephraimites by the men of Shechem, and of the men of Jabesh-gilead by the assembled Israelites (Judg. viii, 4-7; xii, 1-6; xxi, 8-12), are unmistakably punishments of extraordinary severity on account of aggravated acts of treason against Jehovah. The treatment of ten thousand Edomites by Amaziah is a parallel on the part of one whose princi- pal motive to homicide might be hatred (2 Kings xxv, 12). On the other hand, it should be borne in mind that these were not usages of Judaism as such, nor peculiar to the Hebrews; but manifestations of the common spirit of the age and region, which the Mosaic law did all it could, as we have seen, to soften and lessen. Nor should we be too stringent in the rules of modern humanity which is the offset of Christianity. See MOSAIISM.

It has been questioned whether wars are, under any circumstances, justifiable from Jewish example. While it is certain that the practice of offensive wars cannot be defended by reference to sacred history, it is equally clear, if wars must be, that they can only be consistent with the light of that dispensation which breathes forgiveness and forbearance on the clear and obvious ground of necessity and self-defence. When the principles of the Bible shall have illuminated the minds of all nations, when the lessons from the pages of history shall be read, and all men will give glory to God in the highest, and on earth peace and good-will will universally prevail (Psa. xlv, 9; lxvi, 3; Isa. ii, 4; Ezek. xxxix, 9; Luke ii, 14). See PEACE.

WAR, CHIEF VIEWS OF. I. History of Opinion.

The question whether war is allowable to Christians divides itself into two, which are intimately related to each other: (a) Is it right for a Christian government to carry on war? and (b) is a Christian subject obliged to serve as a soldier? Christianity always breathes the spirit of peace among individuals and nations, and likewise the spirit of freedom and personal respect, yet never by command does it do away with either slavery or war, nor does it forbid civil government using the sword. The objections of early Christians to serve in war were based principally upon the text "Whoever sheddest blood,..." etc. But there was also the additional reason that the early Christians did not feel obligated to serve a government that constantly persecuted them, and they also dreaded the idolatry connected with the service of war. Tertullian forbids serving as a common soldier, although such were not so imperatively required to engage in idolatry as those in charge of temples. It is not sufficient for Tertullian to know that the Roman ensigns bore images and pictures of idols (see Tertull. De Idololatria, c. xix; De Corona Militis, c. xi; Apol. c. xii; Ad Scapulam, c. iv). Notwithstanding these objections, a great many Christians served as soldiers. The conversion of Constantine and the exchange of the idol standards for the banner of the Cross laid every
WAR

Christian under obligations to serve as a soldier; the interests of the Church and State having now become common.

The legislature speaks of himself as holding no conscientious scruples concerning Christians serving as soldiers (Ep. 138, ad Marcellum, xii). The opinions of the early Christians do not entirely disapprove military service except in reference to the clergy. The opinion of Origen is now limited to the clergy (Cont. Calumni, vii, 37, 74). In the Roman Church the clergy assume the same attitude that the earlier Christians held, namely, that the services of the sanctuary forbid the shedding of blood; yet they hold that the more closely Church and State are united, the more justifiable is war. Referring, also, to the Obi Test. and to the Church fathers, they make the following distinctions: (1) prohibition of war in itself is in sin; (2) the clergy are not personally to handle the sword, although they may incite others to do so. This was the doctrine of the Middle Ages, and has continued, to a great extent, the doctrine of the Roman Church to-day (Richter, iv, § 94, note 12).

Yet the oft-repeated threats and rebukes in early Christian documents (Apost. Con. Ixxxii, c. 4, 25, qu. 8; Conc. Toledo, iv, c. 45, ann. 633; Conc. Melitense, c. 37, ann. 840; c. x, c. 25, x, 5, 39) indicate that the warlike inclinations of many of the clergy transgressed one of the above rules. Athanasius already lamented that bishops engaged in war. There were three causes that produced this spirit: (a) zealotism, which was anxious to exterminate heretics; (b) self-defence in case of necessity; (c) the feudal system (see Ziegler, Βυζαντινή Εκκλησία [Wittenberg, 1672]). In the time of Chrysostom the monks travelled large companies from place to place to wield imperial authority to exterminate heathenism; and that which had a rough unsystematic commencement became very systematically systematized in after-ages. During the crusades bishops became renowned as military men (Raumer, Hohenstaufen, ch. 1); and these holy wars were carried on by the Church to such an extent that it became part, so to speak, of the Church itself, in the form of the different orders of knights. This warlike spirit became so common among the clergy that whenever anything was to be gained, they were ever ready for war. The question as to whether individuals are obligated to serve as soldiers depends largely upon the government of the country in which they live. So far as the Evangelical Church is concerned in the question whether war is allowable to Christians, we have sufficient proof that the Reformers believed it to be right for Christians to bear arms. The谆谆imus of Confession refers to this subject in art. 16 (" Docet quod Christianis licet jure bellare."). Only a few small sects are opposed to Christians engaging in war. The evangelical doctrine has generally been on the affirmative side of the question (see Reinhard, Moral, § 244, 302; Ammon, Handb. d. christl. Sittenlehre, § 181, Harless, Christl. Ethik, p. 250). Schleiermacher (Die christl. Sittt., p. 273) contends that every individual is bound to obedience when a call to war is made; so also Hegel, "The agitation of war purifies a nation" (Rechtphilos., § 924). The Evangelical Church has no bias against clergy serving in war.—Hertzog, Real-Encyklop., viii, 81 sq.

II. DOGматIC VIEW.—These modern opinions in defence of warfare, however, have evidently grown out of a desire to conciliate the civil power, and are clearly opposed to the ancient Christian doctrine and to the whole Church council, as also in the New Test. (Matt. v, 39; Rom. xii, 17-21, etc.). The appeal to a few passages is futile against this (e.g. Luke xxi, 26; comp. Matt. xxvi, 52; Rom. xii, 4 refers only to magisterial or municipal justice). The lame effort to avoid the force especially of Christ's command made in St. Paul's specific precept, as also, as in the New Test. (Matt. v, 39; Rom. xii, 17-21, etc.). The appeal to a few passages is futile against this (e.g. Luke xxii, 26; comp. Matt. xxi, 52; Rom. xii, 4 refers only to magisterial or municipal justice). The lame effort to avoid the force especially of Christ's command made in St. Paul's specific precept, as also, as in the New Test.

III. SCHEMES FOR THE ABOLITION OF WAR.—The invention of gunpowder and recent improvements in artillery, while they have greatly shortened the periods of warfare, have immensely increased its destructiveness. Hence victory now usually depends rather upon numbers, equipment, and strategic skill than upon personal bravery. At the present time, artillerist have frequently been resorted to, in settlement of national disputes, instead of the sword. Still the history of the present century and the "armed neutrality" of the nations, especially of Europe at the present time, do not favor the hope that war will be abolished in such cases. On this continent likewise, within the existing generation, we have had fearful evidence of the liability to this dernier ressort. The methods by which philanthropists and statesmen have proposed to supercede the necessity of a recourse to arms in modern times are chiefly two, aside from the usual efforts of diplomatic correspondence and the intervention of arbitrament.

1. Peace Congresses.—These are conventions of representatives from allied or interested nations, to which have been referred, or which have voluntarily assumed, the determination to avoid all disputes between particular states. An account of them may be found at length in a recent work (Amos, Political and Legal Remedies for War [N. Y. 1880]), from which it does not appear that this method has been particularly successful in preventing the occurrence of war. It is to be hoped, however, that such a method may be adopted after a law extend and are more generally recognized, this means of averting collisions between contiguous as well as remote nations may become more efficacious.

2. Peace Societies.—These are purely voluntary associations, which labor in moral and social lines to promote peace. They are, of course, among the most ancient human institutions on earth, especially in civilized lands, and thus aim primarily and gradually to extinguish the spirit of an-
WARDLAW

War (or Woer), in Norse mythology, is the goddess of comeliness and fidelity, and the avenger of conjugal unfaithfulness.

Wara. See Vara.

Waranda, in Norse mythology, is one of the three Destinies, who sit at the well of Urdr and control the fate and destiny of the world.

Warburton, William, D.D., an eminent English preacher, was born at Newark-upon-Trent, Dec. 24, 1698. His father was attorney and town-clerk, and young William was designed for the law. He received the usual grammar-school education at Oakham and his own native village, and in 1715 was placed in the office of an attorney at East Markham, in Nottinghamshire, where he remained, until April, 1719. He then commenced the practice of the law; but his literary tastes prevented his success in that profession, and he abandoned it for the ministry. He was ordained deacon by Dawes, archdeacon of York, in 1723; ordained priest by Gibson, bishop of London, in 1726, and appointed vicar of Groveley, Notts. He became rector of Brantbroughton, Lincolnshire, in 1728; preacher to the society of Lincoln's Inn in 1746; prebendary of Gloucester in 1758; king's chaplain in ordinary in 1754; prebendary of Durham in 1755; dean of Bristol in 1757; bishop of Gloucester in 1760; and died there June 7, 1779. In 1789-40 he published a series of letters, in The Works of the Learned, in defence of the orthodoxy of Pope's Essay on Man, which gained him the life-long friendship of the poet; and on the death of Pope, in 1844, it was found that he had bequeathed to Warburton half of his library, and the profits arising from the publication of all his works, no matter who should publish them. But the most important service rendered him by Pope was the introduction to the house of Ralph Allen, Esq. of Prior Park, near Bath. This led to his marriage, in 1745, with Allen's niece, Miss Gertrude Tucker, whose right, on the death of Allen, in 1764, he became proprietor of Prior Park. Among his other literary writings are, Miscellaneous Tracts in Prose and Verse (1728); — An Inquiry into the Causes of Prodigies and Miracles (1727); — Alliances between Church and State (1730); — Divine Legislation of Moses (1738-41); this is his greatest work; — an edition of Shakespeare (1747); — Julian (1750); — An Essay on the Work of Pope's Works (1752); — and The Doctrine of Grace (1762). Warburton's Works were published by his friend bishop Hurd, in 7 vols. 4to, in 1788, and a subsequent edition with a Memoir in 1794. In 1809 appeared a volume of Letters, and in 1841 another volume, entitled Literary Remains of Bishop Warburton. (See Biogr. of Warburton (1860).)

Warburonian Lectures, a lecture founded by bishop Warburton (q. v.), to provide the truth of revealed religion in general, and the Christian in particular, from the completion of the prophecies in the Old and New Testa, which relate to the Christian Church, especially the apostasy of papal Rome. Courses of lectures on this foundation have been delivered by Halfax, Hurd, Bagot, Athorp, and many others.

WARDLAW

John Smith, D.D., an English Congregational missionary, was born at Glasgow, July 29, 1813. He early dedicated himself to the Lord, and commenced preparation for his great work. Mr. Wardlaw had every advantage for mental and spiritual culture. He graduated with honor at Glasgow University and Theological College, and at once decided to give his life to missionary work. He was ordained as a missionary July 14, 1841, and sailed for India under the auspices of the London Missionary Society, arriving at Madras in September, 1841. He at once took an efficient part in carrying out the objects of the mission—teaching, preaching, nursing, and superintending the printing-press. He translated the Scriptures into the Telugu language, and was able to send thousands of copies of the New Testament into the mission fields. In 1855 Dr. Wardlaw visited Vizagapatam, and in 1859 also visited Calcutta and the missions on the coast. He died Oct. 13, 1872. "Dr. Wardlaw was a laborious and faithful student, exact, thorough, with great analytical power, and the ability to express with clearness his conclusions. He was a man of broad sympathies, unselfish in friendship, with a character transparent and spotless, and with an 'exhaustless patience and charity.'" (See Lond.) Congr. Year-book, 1878, p. 565.

Wardlaw, Ralph, D.D., an eminent Scotch Congregational divine was born in Dalkeith, Dec. 22, 1778. Though bred in the principles of the Secession Church, he resolved to join himself to the Congregational party; and was in 1808 ordained and installed pastor of the chapel in Albion Street, Glasgow, but subsequently removed to a larger church in George Street. In 1811 he was appointed professor of theology in the Seminary of the Congregational Church of Scotland, which position he occupied, in connection with his pastorate, until his death, Dec. 17, 1838. He acquired a high reputation as a theologian. His life was a very laborious and earnest one. Besides discharging faithfully and ably the duties of the pulpit and the professor's chair, he was a voluminous author; often involved in theological controversy, and a prominent actor in the public religious, and philanthropic movements of the day. His intellect was acute, his understanding sound, and his style remarkable for its perspicacity, vigor, and grace. The most important works of Dr. Wardlaw were, Discourses on the Socinian Controversy; — Lectures on the Scriptures (2 vols.); — Essays on Assurance of Faith, and on the Extent of the Atonement and Universal Pardon; — Discourses on the Sabbath; — Christian Ethics; — Discourses on the Natural and Extent of the Atonement of Christ; — The Life of Jesus, and the Last of Jacob; — Congregationalist Publications; — On Ministers in Religious Establishments. His life and correspondence were published by Dr. Alexander in 1856. See Albion, Dict. of Brit. and Amer. Authors, s. v. (W. P. S.)

Wardlaw, Thomas Delacevy, D.D., a Presbyterian minister, was born at Warrenton, County Down, Ireland, Nov. 1, 1826, where he received his preparatory education. He graduated from Edinburgh College in 1844; and soon after went to Quebec, Canada, at the same time to the United States in 1846, when he entered Princeton Theological Seminary, from which he graduated in 1849. Immediately on leaving the seminary, he began to preach in a stated supply at Port Carbon, Pa.; but subsequently, having accepted a call, was ordained and installed pastor. After two years' service, he was released to take charge of the Church at Paris, Ky., where he was installed; after a service of six years he was called to Clarksville, Tenn., where he continued nine years. After this he removed to Shelbyville, where he continued to labor until his death, Aug. 28, 1879. He became principal of a Young Ladies' Seminary in that place, at the same time supplying the neighboring churches of Petersburg and Bethlelum. He was a man of superior scholarship and extensive literary culture. See Necrological Rep. Princeton Semi. Alum. (W. P. S.)
WARE

WARE, Henry, Sr., D.D., a Unitarian clergyman, was born at Sherburne, Mass., April 1, 1764. He graduated at Harvard College in 1785, and studied theology under Rev. Timothy Hilliard for a year and a half following. He became pastor of the First Congregational Church at Hingham in 1787, and labored there until 1805, when he was chosen Hollis professor of divinity at Harvard College. This election was the occasion of a sharp controversy between the Unitarians and the Trinitarian Congregationalists, which resulted in the separation of the two parties as distinct bodies of Christians. He held his chair in the college until 1816, when, on the organization of the Harvard Divinity School, he became professor of systematic theology and the evidences of Christianity, which office he held until 1846, when he was compelled to resign on account of the loss of his sight. He died at Cambridge, June 12, 1845. Dr. Ware published, Letters to Unitarians and Calvinists (Camb. 1809), in reply to Dr. Wood's Letters to Unitarians:—Answer to Dr. Wood's Reply (1822):—Postscript to the Answer to Dr. Wood's Reply (1823):—An Inquiry into the Foundation, Evidences, and Truths of Religion (1842, 2 vols.):—and numerous Sermons. See Sprague, Annals of the Amer. Pulpit, viii, 199.

WARE, Henry, Jr., D.D., a Unitarian clergyman, eldest son of the preceding, was born at Hingham, Mass., April 21, 1794. He was educated at Phillips Academy, Andover, and at Harvard College, from which he graduated in 1812. During the next two years he taught in the academy at Exeter, N. H., spending much of his leisure time in the study of theology. During the latter part of this period he conducted the public services of a Unitarian society in Exeter by performing the devotional part of the service and reading a printed sermon. In 1814 he returned to Cambridge to study theology as a resident graduate of the university, and was appointed editor of the college, which office he held one year. He was called to the pastorate of the Second Church in Boston, and ordained and installed Jan. 1, 1817. In this relation he remained until the autumn of 1830. In 1819 he became editor of the Christian Disciple, and remained in that office until 1822. On account of declining health Mr. Ware desired to resign his charge in 1821; but his church and congregation, not willing to lose his services, chose as colleague pastor Mr. Ralph Waldo Emerson, upon whom should devolve the burden of the active pastoral labor. In October, 1830, Mr. Ware removed to Cambridge to enter upon the duties of professor of pulpit pastoral care, to which he had lately been elected. In 1842, on account of feeble health, he resigned his professorship and removed to Framingham, where he died, Sept. 22, 1843. Among his published works are the following: Discourses on the Office and Character of Jesus Christ (1825);—Sermons on Sountis Sins (1827):—On the Formation of the Christian Character (1831):—The Life of the Saviour (1832):—several single Sermons, Essays, and Poems:—and Memoirs of Oberlin, Noah Worcester, Dr. Joseph Priestley, Nathan Parker, and others. See his Select Writings, by Rev. Chandler Robbins (Bost. 1841, 2 vols.); Memorial of Rev. Henry Ware, Jr., D.D. (Ibid. 1846, 2 vols.); Sprague, Annals of the Amer. Pulpit, viii, 472 sq.

Warham, William, D.D., LL.D., an eminent English preacher was born at Okeley, in Hampshire, about 1450. He was educated at Winchester School and at New College, Oxford, of which he became a fellow in 1475. He remained at Oxford until 1488, having in the meantime passed his orders, and is believed, was collated to some living in the Church. Shortly after this, he is found practising as an advocate in the Court of Arches, and acting as principal or moderator of the Civil Law School of the parish of St. Edward's, Oxford. In 1493 he was sent by Henry VII as a joint envoy to the court of Burgundy to complain of the pretender Perkin Warbeck. He was master of the rolls from 1494 to 1502; joint envoy to Maximilian of Burgundy in 1501-2; became keeper of the great seal Aug. 11, 1502; lord chancellor, Jan. 1, 1508; bishop of London in 1508; archbishop of Canterbury, March 9, 1504; and chancellor of Oxford, but resigned the great seal to Wolsey, Dec. 22, 1515. During his latter years he drew some discredit upon himself by his connection with the affair of the Maid of Kent, to whose pretensions he lent some support. He died at St. Stephen's, near Canterbury, Aug. 23, 1532.

WARNER, Aaron, D.D., a Congregational minister, was born at Northampton, Mass., Oct. 29, 1794. After graduating from Williams College in 1815, he entered Andover Theological Seminary, from which he graduated four years afterwards. He was city missionary in Charleston, S. C., from 1819 to 1822, and part of the time was acting pastor of the Circular Church in that city. In 1822 he was ordained to the ministry, was pastor of the First Church in New Bedford, Mass., April 30, 1833; of the Second Church in Medford, which he served until 1832. From February, 1833, to November, 1843, he was professor of sacred rhetoric in the Gilmanton Theological Seminary. In January of the following year he was elected professor of rhetoric and classical languages in American literature in Amherst College, retaining this position until 1853; after which, and until his death, May 14, 1876, he resided in Amherst without charge. Dr. Warner was a corporate member of the American Board of Commissioners for Foreign Missions from 1838. See Cong. Quarterly, 1877, p. 427.

Wernham, Ferdinand, LL.D., an English clergyman and voluminous writer, was born in 1708. He studied some time at Jesus College, Cambridge, but is not recorded among its graduates; became vicar of Rode, Wiltshire, in 1730; rector of St. Michael Queenhithe, London, in 1746; and, in addition, rector of Barnes, in Surrey, in 1758. He died of gout about 1767. Among his published works are the following: System of Divinity and Morality (Lond. 1750):—Rational Defence of the English Reformation (1752):—An Illustration of the Book of Common Prayer and Administration of the Sacraments (1754):—Ecclesiastical History of England from the Beginning of the Christian Era to the Year 1558 (5 vols.);—Memoirs of the Life of Sir Thomas More (1756):—The History of Ireland (1758):—and History of the Rebellion and Civil War in Ireland from 1641 to 1660 (1767).

Water (בר, בדוע), universally one of the chief necessities of life. No one can read far in the Sacred Scriptures without being reminded of the vast importance of water to the Hebrews in Palestine, and, indeed, in every country to which their history introduces us; but more particularly in the deserts in which they wandered on leaving Egypt, as well as those into which they before or afterwards sent their flocks for pasture.

Supply.—In our temperate climate, surrounded as we are by lakes and streams, and with a rainfall very abundant, we can scarcely conceive the value of water in Palestine and other regions of the East. During summer and autumn, when the small streams are dried up from want of rain, the inhabitants are entirely dependent upon the water derived from wells, or preserved in cisterns and basins, which are continually filled by artesian action. See CISTERN. Hence the water of running streams and fountains, as opposed to that of stagnant cisterns, pools, or marshes, is called living water (Gen. xxvi. 19; Zech. xiv. 8; John iv. 10, 11; vili. 38; Rev. vii. 17). See POOL. Water is commonly drawn out of the wells or cisterns by females, and carried, upon the shoulder or head, in large leather or earthen vessels (Gen. xxiv. 45). See WELL.
WATER

In the hot countries of the East, the assuaging of thirst is one of the most delightful sensations that can be felt (Psa. cxiii, 6; Prov. xxx, 25); and every attention which humanity and hospitality can suggest is paid to furnish travellers with water; and public reservoirs or pools are opened in several parts of Egypt and Arabia (Mat. x, 42). See Fountain. Water was sometimes paid for, and is now occasionally in the East (Numb. xx, 17, 19; Lam. v, 4). See DRAWER OF WATER.

II. Peculiar Usages.—Among the desert peoples the use of water is so familiar as to be taken for granted. Thus, when the Hebrews were in the wilderness, they were supplied with water from the pillar of cloud and fire (Exod. xiv, 27). In the time of David, water was used in the daily life of the people. Water was used for purification purposes, and was also used in the sacrificial service. See Watering-Pot.

Many waters, on account of their noise, number, disorder, and the confusion of the waves, are the symbols of peoples, multitudes, nations, and tongues (Rev. xvii, 15; Jer. xlvi, 2); waters signifying an army or multitude (Isa. xiv, 18).

As in Scripture bread is put for all sorts of food or solid nourishment, so water is used for all sorts of drink. The Moabites and Ammonites are reproached for not meeting the Israelites with bread and water; that is, with proper refreshments (Deut. xxiii, 3). Nabul says, insulting David's messengers, "Shall I then take my bread and my water, and my flesh that I have killed for my sheeers, and give it unto men whom I know not whence they be?" (1 Sam. xxv, 11).

WATER OF BAPTISM. The scholastics adopted the mystical interpretation of the water, but carried their discussions and inquiries concerning the fluids to be used at the performance of the rite of baptism to a ridiculous extent. Various opinions obtained concerning the question whether beer, broth, fish-sauce, mead or honey-water, 1ye or rose-water, might be used instead of pure water. They carried their absurdities so far as to start the question "Quid facendum, si puer uniretur (secorizaret) in fontem?" A distinction was also made between "aquae artificiales, naturalis, et usualis." See Hagenbach, Hist. of Doctrines, ii, 54. See Baptism; Holy Water.

WATER, HOLY. See Baptism; Holy Water.

WATER OF JEALOUSY (Numb. v, 11-31). "waters of bitterness," sometimes with נְפֶשׁ הָשָׁפָה added, as causing a curse; Sept. ἵππον τοῦ λιθοβολοῦ; Philo, ii, 510, πένθος λιθοβολοῦ. This was probably not the "water of separation" for purification, mixed with the ashes of the red heifer, for, as its ceremonial property was to defile the pure and to purify the unclean (Numb. xix, 21) who touched it, it could hardly be used in a rite the object of which was to establish the innocence of the upright or discover the guilt of the sinner without the symbolism jarring. Perhaps water from the lower of the two basins is intended. The washing consisted in the husband's bringing the woman before the priest, and the essential part of it is unquestionably the oath, to which the "water" was subsidiary, symbolical, and ministerial. With her he was to bring the tenth part of an ephah of barley-meal as an offering. Perhaps the whole is to be regarded from a judicial point of view, and this "offering" in the light of a court-case. Yet being an offering to "bring iniquity to remembrance" (V, 15), it is ceremonially rated as a "sin-offering:" hence no oil is to be mixed with the meal before bringing it, nor any frankincense to be placed upon it when burned, which same rule was applied to "sin-offerings" generally (Lev. v, 11). With meat-offerings, on the contrary, the mixture of oil and the imposition of frankincense were prescribed (ii, 1; 2, 7; 14, 15). God himself was suddenly asked to judge, and his presence recognized by throwing a handful of the barley-meal on the blazing altar in the course of the rite. In the first instance, however, the priest "set her before the Lord" with the offering in her hand. The Mishna (Sotah) prescribes that she be clothed
WATER OF JEALOUSY

in black with a rope ginlle around her waist; and from the
direction that the priest "shall uncover her head" (Numb. v. 18) it would seem she came in veiled, prob-
ably also in black. As she stood holding the offering,
so the priest stood holding an earthen vessel of holy
water mixed with the dust from the floor of the sanct-
uary, and, declaring her free from all evil consequences
if sincere, solemnly developed in her the notion of Je-
vah to be "a curse and an oath among her people," if
guilty, further describing the exact consequences
ascribed to the operation of the water in the "members"
which she had "yielded as servants to uncleanness"
(ver. 21, 22, 31; comp. Rom. vi. 19; and Theodoret,
Quart. x. in Numb.). The words רַגֶּשׁ, lēmēsh, rendered in the A. V. by the word "rot," rather indi-
cate, according to Rosen, "a purgative, a purge, which
make lean." Michaelis thought ovarian dropsey was
intended by the symptoms. Josephus says, τού τις σκέ-
lous ἰεποσσόντος αὐτή, καὶ τὴν εὐλαβίν ἱερον κατα-
λαμβάνων (Ant. iii. 11, 6). The priest then "wrote
these curses in a book, and blotted them out with the
bitter water," and, having thrown, probably at this
stage of the proceedings, the handful of meal on the
altar, caused the woman to drink of the water that had
been drugged, she, moreover, answering to the words of
his imprecation, "Amen, Amen." Josephus adds, if the
suspicion was unfounded, she obtained conception; if true,
she died infamously. This accords with the sacred
text, if she be "clean, then shall she be free and shall
continue in the courts of the Lord," and she could not
be "forsaken." (Num. v. 29), which seem to mean that
when restored to her husband's affection she should
be blessed with fruitfulness; or that, if conception
had taken place before her appearance, it would have
its proper issue in child-bearing, which, if she had
been unfaithful, would be intercepted by the operation
of the curse. In Josephus' version conception was said
not to forward his suspicions of his own injury,
unless there were symptoms of apparent concep-
tion and a risk of a child by another being presented
to him as his own. This is somewhat supported by
the rendering in the A. V. of the words אֶלֶף מָעָר
(vers. 13) by "neither she be taken with the manner," the italicized words being added as explana-
tory, without any to correspond in the original, and
perhaps causes us to consider the version rather as
"a custom of women" (Gen. xvii. 11: xxxi. 35.), i.e. the
menstrual flux, suggesting, in the case of a woman not
past the age of child-bearing, that conception had
taken place. If this be the sense of the original, the
suspicions of the husband would be so far based upon
a fact. If this be the case, it is possible that the man
may have been an extension of the sense of those immediately preced-
ing, רַגֶּשׁ, lēmēsh, when the connected tenor would be,
"and there be no witness against her, and she be not
taken," i.e. taken in the fact; comp. John viii. 4, ἀφύ-
γη γνώς καθελθήση εὐνομοῦ ἑκατονθρῶμι. In the case
of pregnancy the woman's natural apprehensions
regarding her own gestation would operate very strongly
in making her shrink from the perilous course. The
psychical effects of such a ceremonial on the nervous
system of one so circumstanced might easily go far to
imperil her life even without the precise symptoms as-
scribed to the water. Meanwhile the rule would oper-
ate beneficially for the woman if innocent, who would be,
during this interval, under the protection of the cer-
emony that the husband had himself appealed, and so
far secure against any violent consequence of his
jealousy, which had thus found a vent recognized by
law. Further, by thus interposing a period of proba-
tion the fierceness of the conjugal jealousy might cool.
On comparing this argument with the further restric-
tions that in the treatise Sotah tending to limit the
application of this rite, there seems grave reason to
doubt whether recourse was ever had to it in fact. See
ADULTERY. The custom of writing on a parchement
words calabhistical or medical relating to a particular case,
and then washing them off, and giving the patient the
water of this ablation to drink, has descended among
Oriental supersitions to the present day, and a sick
Arab would probably think this the most natural way
of "taking" a prescription. See, on the general sub-
ject, Grodeck, De Vet. Hebr. Purgo. Castitatis, in
Ulpian, Theor. The custom of such an ordeal was
probably traditional in Moses' time, and by fencing it
round with the wholesome awe inspired by the solemn-
ity of the prescribed ritual, the lawgiver would de-
prise it to a great extent of its barbarous tendency,
and would probably restrain the husband from some
of the consequences of the law which otherwise might
be driven by a sudden fit of jealousy, so powerful in
the Oriental mind. On the whole, it is to be taken,
like the permission to divorce by a written instrument,
rather as the mitigation of a custom ordinarily harsh,
and as a barrier placed in the way of uncalculating vin-
dictiveness. Viewing the regulations concerning ma-
rimony as a whole, we shall find the same principle
animating them in all their parts—that of providing a
legal channel for the course of natural feelings where
irrepressible, but at the same time of surrounding their
outlet with institutions apt to mitigate their intensity,
and so assisting the gradual formation of a social feel-
ner in the bosom of the nation. The precept was given
"because of the hardness of their hearts," but with the
design and the tendency of soothing them. (See some
remarks in Spencer, De Leg. Hebr.) See JEALOUSY;
ORDIAL.

WATER OF SEPARATION. See Purification.

Waterbury, Jared Bell, D.D., a Presbyterian
minister, was born in the city of New York, Aug. 11,
1799. He was converted at the age of seventeen, and
immediately connected with the First Presbyterian Church,
becoming at once an earnest Christian worker. He en-
tered Yale College and graduated with high honors in
1822, and in the autumn of the same year he entered
upon his theological studies in Princeton Seminary,
where he remained two years. On April 15, 1825, he
was elected under the care of the New-York Presbyteri-
ian Church as a candidate for the ministry, and that body licensed him to preach in 1825 and ordained him sine titulo Nov.
13 of the same year. Shortly after completing his theo-
ological studies, he accepted an agency for the Ameri-
can Bible Society, and made a highly successful and
useful tour in its interests through the Northern States.
In the year 1826 he commenced preaching at Hatfield,
Mass.; and having been dismissed by the Presbytery of
New York, April 18, 1827, to the Association of North-
ampton, Mass., was shortly after installed pastor of the
Hatfield Church. While residing there, he published a
small volume entitled Advice to a Young Christian, by a
Village Pastor, with a very interesting introduction
by Dr. Archibald Alexander. This little book was wide-
ly read and very useful. In 1829 he was called to Por-
tsmouth, N. H., where he was installed shortly after, and
remained for two years in a happy and useful ministry,
which was very beneficial to his health. For a short time he resided in Brooklyn, at
the house of his father-in-law, the late Zachariah Lewis.
In the fall of 1832, he began to supply the Presbyterian Church at Hudson, N. Y., and in the spring accepted a
call from and was installed its pastor. Here he labored
fifteen years, and his earnest and fervent pulpit efforts,
his genial and social manners, glowing zeal and godly
life, secured for him the unbounded affection of the
entire community. During his ministry, a large and
beautiful church was erected, and a great number of
persons, many of them of high social position and intel-
ligence, were added. In 1847 he accepted a call to the Bowdoin Street Church, Boston,
where he was installed pastor, and where he continued
to labor until 1857, when he resigned his charge and re-
moved to Stamford, Conn., where he lived over two
years in retirement, but preaching occasionally as opportunity offered. In 1859 he supplied the pulpit of the Central Presbyterian Church, Brooklyn, N.Y., during the absence of its pastor (Dr. Rockwell) in Europe, and thenceforward to the end of his life he made that city his home. During the late war of the Rebellion, Dr. Watson was chaplain to the 83d New York State National Guard. He next became a branch of the Christian Commission, in which position he rendered valuable and effective service, collecting books and pamphlets to be sent to the Union army, and superintending the sending-out of ministers to supplement the work of the regular chaplains in the Army. He continued in this station until 1882, when he returned to Boston. He had a large tent erected on Fort Greene and in Lefferts Park, where on Sundays the outside multitude were congregated to hear the Gospel. Misfortune clouded his last days. His ample property was swept away at a stroke, and his health was gone; yet in the midst of all he never lost his cheerfulness or trust in God, but rested calmly on the never-failing promises. Dr. Waterbury was a man of warm piety, and always watchful for opportunities of winning souls to Christ. As a pastor, he was faithful, sympathetic, and earnest. In his prime he was a preacher of unexampled eloquence and fervor. He wrote many religious tracts, published quite a number of sermons and tracts, besides six or eight volumes of works on various religious subjects. Among his last utterances was this—"Jesus is with me." He died on Sabbath morning, Dec. 81, 1876. (W. P. S.).

Watson, Daniel, D.D., an eminent English theologian and controversialist, was born at Walsely, in Lincolnshire, Feb. 14, 1833. He was educated at the free-school of Lincoln, and Magdalen College, Cambridge, where he graduated in 1703, and became a fellow of the college in 1704. He continued to reside at Cambridge as a fellow, and held the chair of divinity for about forty years. He was master of his college in 1718, and during the same year was rector of Ellingham, in Norfolk. He was appointed one of the chaplains in ordinary to king George II in 1714; preached the Lady Moyer Lectures at St. Paul's, London, in 1720; became rector of St. Austin's and St. Faith's, London, in 1721; chancellor of the Church of York in 1728; canon of Windsor in 1727; and vicar of Twickenham and archdeacon of Middlesex in 1730. He died in London, Dec. 23, 1740. Dr. Waterbury was greatly distinguished as a Trinitarian controversialist, having been especially active in the controversy of 1711 on the question of the Trinity in the office of the Holy Spirit. In 1723, he wrote an admirable treatise on the subject. He wrote many religious tracts, published quite a number of sermons and tracts, besides six or eight volumes of works on various religious subjects. Among his last utterances was this—"Jesus is with me." He died on Sabbath morning, Dec. 81, 1876. (W. P. S.).

Watson, James V., D.D., a Methodist Episcopal minister, was born in London, England, in 1814. He emigrated to the United States while young; became a local preacher in early manhood in Indiana; and in 1835 he formed a connection with the Disciples of Christ. In 1839 he joined the Methodist Episcopal Church. He returned to Indiana, and joined the Indiana Conference. In 1840 he became a member of the Michigan Conference, and later of the Detroit Conference, in which he filled some of the most prominent appointments; then he labored two years as agent of the American Bible Society; and finally superannuated and established a Christian newspaper, which he edited with success until the organization of the Northwestern Christian Advocate, in 1852, when he became its editor. This position he held till his death, Oct. 17, 1866. Mr. Watson was tall and slender in person, amiable and charming in social life, masterly in all his abilities, and profound as an editor. See Minutes of Annual Conferences, 1857, p. 431.

Watson, Richard (1), D.D., F.R.S., an eminent English prelate, was born at Havershaw, near Keddle, Westmoreland, in August, 1737, where he received his early education from his father. He graduated at Trinity College, Cambridge, in 1759, and was elected to a fellowship in 1760. He then took orders in the Church of England, and became assistant tutor in November of the same year. He became moderator in 1762; professor of chemistry in 1764; one of the head tutors in 1767; and vice chancellor of the university in 1771, and at the same time rector of Somersham, Huntingdonshire. In 1774 he exchanged his rectory for the prebend of Ely, and in 1780 became archdeacon of Ely and rector of Northwold, Norfolk. In 1782 he became rector of Knaptoft, Leicestershire, and bishop of Dianst. In 1786 he received a bequest of property from his friend Mr. Luther, of Ougar, Essex, from which he realized £20,500. This, together with his bishopric, his professorship, his archdeaconry, and his rectory, enabled him to live in opulence, despite his complaints of poverty and neglect. He died at Calgarth Park, Westmoreland, in 1796. He was the author of An Apology for Christianity (1776);—An Apology for the Bible (1776);—Chemical Essays (1781-87, 5 vols.);—Sermons on Public Occasions (1788);—Miscellaneous Tracts on Religious, Political, and Agricultural Subjects (1815); and several other works on kindred subjects. He also edited a Collection of Theological Tracts, selected from Various Authors (1785, 6 vols.). His autobiography was published by his son, Richard Watson, LL.B., in 1817.

Watson, Richard (2), a Wesleyan theologian, was born at Barton-upon-Humber, Lincolnshire, Feb. 22, 1781. Physically feeble, he had a precocious mind, and against poverty and great difficulties he bent his energies to the acquisition of knowledge. He enjoyed no school advantages after he was fourteen, having at that age left the grammar-school in Lincoln. Wild and was converted in 1797, at the age of fourteen; commenced to preach when fifteen; was received into the Wesleyan Methodist ministry in 1796; resigned under false imputation of heresy in 1801; entered the ministry of the Methodist New Connexion in 1803; and was received again into the Wesleyan body, chiefly through the influence of the late Mr. W. J. H. Waterman, John A., D.D., a Methodist Episcopal divine, was born in New Hampshire, June 29, 1790. He was converted in the Ohio Conference in 1814; and travelled successively the Miami, Mahoning, and Zanesville circuits. When the Pittsburgh Conference was formed, he fell within its bounds, and successively filled Pittsburgh, Wheeling, Washington, Steubenville, and other prominent appointments. In 1832 he was transferred to the Ohio Conference, as a superannuate; in 1837 he was made effective, and appointed to Oxford, where he died, Aug. 6, 1867. Mr. Waterman was a model man. See Minutes of Annual Conferences, ii, 570.
WATSON

WATSON

otional training of candidates for the ministry. In 1826 he was elevated to the presidency of the Conference, and in 1827 he resumed the itinerancy in Manchester. In 1830 he declined an invitation to the chair of belles-lettres and moral philosophy in Wesleyan University. The Itinerate had been too much for him this time. The world was strangely opposed to slavery and intamity with Buxton, Lushington, and other leaders in the anti-slavery movement, made some eloquent speeches in favor of negro-emancipation. In 1832 he was again appointed to the secretariat of missions. But these comradies were falling. Clarke had died on Aug. 28; that year the Oct. 9; and Watson’s devoted colleague, James, passed away Nov. 6. His own dissolution was not far off. Disease had been gnawing at his vitals all his life; but with devotion indomitable he still wore. He died, after intense suffering, Jan. 6, 1835.

Watson’s character was one of great beauty. His humility and piety never shone brighter than at the time of his greatest popularity; and sympathy, tenderness, and strength blended in a spirit purified by fire. How many felt the power of his presence! “A figure so tall and thin he came to be, yet there was something manly in his guilt and manner, and when his head was bare, the outburhngs of intelligence bespoke the genius which was concealed there, and a kind of awe was felt which indicated the presence of a superior being” (Stevenson, Hist. of City Road Chapel, p. 324).

He was a man of elegant taste, of a remarkably tenacious memory, great vigor of intellect, and unconquerable application. His mind was versatile; his sympathies universal. He was at home in theology, metaphysics, politics, and domestic economy. As a preacher, great things are spoken of him. “Nihil tetigit quod non omnino,” “He soars,” says Robert Hall, “into regions of thought where no genius but his own can penetrate.” “He led his hearers into realms of thought of which they had previously no conception; and his tall and graceful form, his pallid countenance bearing marks of old thought, and of severe pain, and at the same time bearing with benignity and holy delight, served to deepen the impression of his incomparable discourses. The greatest charm of his preaching was its richness in evangelical truth and devotional feeling; and in those qualities it exceeded the last” (Wesl. Meth. Magazine, 1835, p. 102). With them had not the force of Chalmers,” says an elaborate and able article in the London Quarterly Review, 1854, ii, 192; “but he possessed much more thought, philosophy, calm ratiocination, and harmonious fulness. He had not, perhaps, the metaphysical subtlety and rapid combination, the burnish, affections and elegant diction of Hall; but he possessed, as keen a reason, a more lofty imagination, an equal or superior power of painting, and, as we think, a much more vivid perception of the spiritual world, and a richer leaven of evangelical sentiment. Owen’s oratory seemed to be more flowing, spontaneous, and impassioned than that of Watson; but the latter exceeded Owen in stretch of thought, sublimity, beautiful imagery, and deep and touching pathos.”

Watson gave the first systematic treatment of Wesleyan theology. His Institutes, though not the legal, have been the moral and scientific, standard of Methodist doctrine. Although the works of Profes. Pope and Raymond fill a niche in the temple of more recent literature, which, of course, the Institutes cannot fill, the latter work can never be superseded. The elder Hodge speaks of it as “excellent, and well worthy of its high repute among Methodists” (Systematic Theology, iii, 190-191). Brown, in the Brownian year, characterized Watson as “a prince in theology, and the Institutes as the noblest work in Methodism, and truly valuable.” The late Dr. J. W. Alexander says, “Tertullian is in theology taster omnium—that is, so far as Blackstone is in law. Making due allowance for difference in age, Watson, the Methodist, is the only systematizer, within my knowledge, who approaches the same eminence; of whom I use Addison’s words, ‘He reasons like Paley, and descants like Hall!’” (Forty Years of Familiar Letters [letter of Dec. 20, 1851]). The Institutes have been translated into 18 languages by pastors, by methods (iii, 479). Watson’s Exposition was written in sickness, left unfinished, and published posthumously. In the opinion of some, it is one of the finest specimens of such work in the English language. Although of ample yet modest learning, and eminently theological, it is beautiful and tender and brings the heart nearer to God (Jackson, Life of Watson, p. 461).

Watson’s influence has been great and enduring. His premature death was greatly lamented, but “with an intellect so intense, mental labor so abundant and uniting, activity so incessant, and feelings so deep, we are not surprised that Watson fell in his exertions in the midst of his years” (Lond. Quart. Rev., 1854, p. 237).

Besides missionary reports, essays, pastoral addresses, and other Conference documents, Watson wrote the following: An Apology for the Methodists (1799), in a letter to J. C. Hotham, A.B., rector of St. Werburgh’s, Derby, in answer to a pamphlet entitled An Address to the People Called Methodists:—Memoirs, in the Meth. New Connection Magazine, 1805, etc.,—Popular History and Description of the City of Liverpool (1807)—Brief History of the Reign of George III (1807, 12mo)—Editorial Articles in the Northumberland Courant (Nos. 293 and 294), Letter to William Roseow (1808), containing strictures on his late publication on the present war with France:—Defence of Wesleyan Methodist Missions in the West Indies (Lond. 1817, 8vo)—Remarks on the Eternal Sonship of Christ; and The Use of Reason in Matters of Religion (ibid. 1817, 8vo). He provided passages in Clarke’s Commentary on the N. T.;—Observations on Southey’s Life of Wesley (ibid. 1821, 8vo; bound with Watson’s Life of Wesley, ibid. 1825, 8vo);—The Labiatr, or Popish Curse (transl. from the Latin of Simon Episcopius, 1650; Lond. 1826), being a confirmation of the supposed infallibility of the Church of Rome:—Theological Institutes (ibid. 1824, 3 vols. 8vo; 8th ed. 1850, 4 vols. 12mo; reprinted in N. Y., Nashville, etc.);—Life of John Wesley (Lond. 1831, 12mo, often reprinted; Amer. ed. N. Y. 1831; Cooperstown, 1845)—Anкционate Address to the Leaders of the London South Circuit (Lond. 1832, 8vo);—Lectures on the Subject of Independence:—Conversations for the Young (Lond. and N. Y. 1830, 12mo), designed to promote the profitable reading of the Holy Scriptures:—Biblical and Theological Dictionary (Lond. 1832, royal 8vo; 10th ed. 1860; N. Y., Nashville, 1857, 8vo; revised edition by T. O. Summerfield);—Sermons and Sketches of Several Ministers (Lond. 1834, 3 vols. 12mo; 1854, 3 vols. 8vo; N. Y. 1845);—Expositions of the Gospels of Matthew and Mark and other Portions of the Holy Scriptures (Lond. 1838, royal 8vo; 5th ed. 1848, 12mo; N. Y. 1837, 8vo). Watson’s projected sermons on the Epistle to the Romans, and a complete exposition of the New Test. His Works were published in London in 1834–37, with Life, by Jackson (13 vols. 8vo; 2d ed. 1838, 12 vols. 12mo). An Analysis of the Institutes was prepared by Dr. McClintock in 1842, bound with a new edition of the work (N. Y. 1860, 2 vols. 8vo), and revised by James A. Bastow (published separately, Lond. 1876, 12mo).

Besides the authorities cited in the article, see Jackson, Life of Watson (Lond. and N. Y. 1834, 8vo); Stevens, Hist. of Methodism (see Index, vol. iii); Smith, Hist. of Wel. Methodism (see Index, vol. iii); Meth. Quart. Review, July, 1852, p. 15 sq.; Gough, History of Methodism (Auburn, 1822, 12mo); Scott, Obituary, in Minutes of the Conference, 1833; Lowndes, Bibl. Mon. s. v.; Jacoby, Geschichte des Methodismus, i, 335. For able reviews of the apologies of the Institutes, see Bangs, in the Meth. Quart. Review, July, 1857; Jan. 1859, and of their metaphysics, see Coxe, 2d ed. 1831, 1862. For a reply to both Bangs and Coxe, see Lex-
Thomas Abney, at Theobalds, whither he went expecting to remain a week, but he continued there for thirty-six years—the remainder of his life. Here he continued preaching in his Church, overlooking his congregation, or engaging in literary work, as health and inclination prompted him. During the last years of his life, the burden of his years, and the stern realities of a much bitterness of soul, and seemed to so stupefy him that he took but little notice of anything about him. But the worst part of this misconduct was kept from him. Says a correspondent of Doddridge, "Lady Abney keeps him in peaceful ignorance, and his enemies are at this moment working to bring about his cruel persecution he lives comfortably. And when a friend asks how he does, says, 'Waiting God's leave to die.' " In this peaceful state he died, Nov. 25, 1748, and was buried in Bunhill Fields.

Dr. Watts wrote largely for almost all classes of readers, students of all ages, in science, literature, poetry, and divinity. His principal published works are the following: Hymn Lyricke (Lond. 1706); poems chiefly of the lyric kind:—Hymns (ibid. 1707);—Orthodoxy and Charity United (1707);—Guide to Prayer (1715);—The Psalms of David (1719);—Divine and Moral Songs for Children (1730);—Sermons on Various Subjects, Divine and Moral (1721-23);—Logic; or, The Right Use of Reason in the Inquiry after Truth (1725);—The Knowledge of the Heavens and the Earth Made Easy; or, The First Principles of Geography and Astrology Explained (1726);—Dissertations Relating to the Christian Doctrine of the Trinity (ed.);—Essay on the Freedom of the Will in God and in Creatures (1732);—Philosophical Essays (1733);—The World to Come (1738);—Essay on the Rain and Recovery of Mankind (1740);—Improvement of the Mind (1741);—Glory of Christ as God-man Unveiled (1746);—Evangelical Discourses (1747);—Near relations caused his complete works have been published in various editions of from six to nine volumes. Of his literary merits Dr. Johnson, in his Lives of the English Poets, says, "Few men have left behind such purity of character or such monuments of laborious piety. He has provided instruction for all ages—from those who are lapping their first lessons to the enlightened readers of Malebranche and Locke; he has left neither corporal nor spiritual nature unexamined; he has taught the art of reasoning and the science of the stars. His character, therefore, must be formed from the multiplicity and diversity of his attainments, and the variety of his performance, for it would not be safe to claim for him the highest rank in any single denomination of literary dignity; yet, perhaps, there was nothing in which he would not have excelled if he had not divided his powers to different pursuits. As a poet, had he been only a poet, he would probably have stood high among the authors with whom he is now associated. . . . He is, at least, one of the few poets with whom youth and ignorance may be safely pleaded; and happy will be that reader whose mind is disposed, by his verse or prose, to imitate him in all but his nonconformity; to obey his master to man and his reverence to God." Of his Hymns Mr. James Montgomery (Introductory Essay to the Christian Psalms) says, "Every Sabbath, in every region of the earth where his native tongue is spoken, thousands and tens of thousands of voices are sending the sacrifices of praise from the churchyard to the temple, that have been prepared for them a century ago; yea, every day 'he being dead yet speaketh' by the lips of posterity in these sacred lays." His works on logic and philosophy are of no great value at the present time, having been superseded by later and more discriminating treatises. Dr. Watts' last year he preached in the Independent Church, but he was never five feet high; and was never married, although, it is claimed, not by his own fault. Monuments have been erected to his memory in Abney Park and Westminster Abbey; a statue by Chantrey was dedicated at Southampton in 1801; and the foundation of a memorial hall
WATTS

WATTS, William, D.D., an English ecclesiastic, was born near Lynn, in Norfolk, about the close of the 16th century, and was educated at Caius College, Cambridge, where he graduated in 1610. He afterwards travelled abroad, and became familiar with several foreign languages. On his return, he became chaplain to King Charles I, and had the living of St. Alban's, Wood Street, London. Some time after this he became chaplain under the earl of Arundel, general of the forces in the Scotch expedition in 1639, and prebendary of Wells. A public indulgence of his literary labours was apparently a tolerated, but not approved, account of his adherence to the crown, and his family made homeless. He was compelled to fly, and was made chaplain to prince Rupert. He died at Kinsale, Ireland, in 1649. Among his published works are, a Translation, with Notes, etc. of Augustine's Confessions (1831), Advertisements for Foreign Discovery. He also had a principal hand in Spelman's Glossary, and published a fine edition of Matthew Paris (Lond. 1640).

WAUGH, Alexander, D.D., a Scotch Presbyterian divine, was born at East Gordon, in Berwickshire, Aug. 18, 1754. He was educated in the grammar-school at Earlston and the universities of Edinburgh and Aberdeen, where he studied theology two years (1775-76) under the Rev. John Brown, at Haddington. He was licensed to preach June 28, 1779, and supplied the pulpit at Well Street, London, for a short time. In 1780 he was settled as pastor at Newtown, in the parish of Melrose, Roxburghshire, and remained two years. In 1782 he became pastor in the Middle Temple, London, where he continued to the time of his death, Dec. 14, 1827. He was one of the fathers of the London Missionary Society, and was very active in its support.

WAUGH, Beverley, D.D., a bishop of the Methodist Episcopal Church, was born in Fairfax County, Va., Oct. 25, 1789. His father, Capt. James Waugh, was a substantial farmer, and headed a company of militia at the time lord Cornwallis invaded Virginia. Mr. Waugh's youthfull days were guarded by pious parents, who screened him from the common follies of early life, and gave him the best education the country could afford. At the age of fifteen he embraced religion, and maintained his reputation as a consistent Christian through life. His Christian zeal attracted the attention of a pious merchant, who, finding Mr. Waugh well qualified in figures and penmanship, engaged him as clerk, and after a thorough trial gave him full management of a store in Middleburgh, forty miles from Alexandria, the home of his employer. Thus was laid the foundation of his well-developed business habits in after-life. While in his mercantile life, he began exercising his gift as an exhorter, under the conviction that to decline laboring for the salvation of souls would bring a great part of his life's usefulness and fruitfulness to his religious employer. Prompted by such a motive, he quitted business in 1809, and, entering the Baltimore Conference, was appointed helper on the Stafford and Fredericksburg Circuit, Va. In 1810 he travelled the Greenbrier Circuit; and in 1811 was admitted into full connection, and sent to the South. At the organization of the Methodist Church then in the national metropolis. On April 12, 1812, he was married to Miss Catherine B. Busby, of Washington city. The following eighteen years of his itinerant career were marked with all the peculiar lights and shades, joys and sorrows, of a Methodist itinerant life. In 1829 Mr. Waugh was elected assistant book-agent, and in 1832 principal book-agent, in the Methodist Book Concern in New York city. In 1836 he was constituted bishop. His views respecting the new office, as recorded in his private journal at the time, exhibit his characteristic sense of duty and his habitual dilemma and self-distress. He said: "Much as I felt my utter inadequacy to the important work, I feared to take myself out of the hands of my brethren. I could not, therefore, see my way clear to do anything else than to throw myself and my all into the arms of Christ, and by his grace prosecution of the performance of the work to which God, by his Church, appeared plainly to call me." To follow Bishop Waugh on his regular episcopal tours for twenty-two consecutive years, and review his travels and labors, would not be suitable in this brief sketch. Suffice it to say, in whatever manner his labors demanded his presence during those twenty-two years he was never absent, and was so tenacious of performing his whole duty that, sick or well, he seldom called for a moment's relief. In considering bishop Waugh's character, there is much to impress and interest. His personal appearance was very striking. He was sedate and grave, but not sad; cheerful, but not trifling; proverbially neat; and his strength and meekness were happily blended. Christian piety pervaded and emboldened him. About two weeks before his death, the bishop went to Carlisle, Pa., to assist a brother minister in an interesting revival, where he labored with his usual zeal and success. He died suddenly at his home in Baltimore, of erysipelas, followed by an affection of the heart, Feb. 9, 1858. See Minutes of Annual Conferences, 1858, p.1-iv, 6-8; Simpson, Cyclop. of Methodism, s. v.; Sprague, Annals of the A. M. Pulpit, vol. vii.

WAYLAND, Francis, D.D., L.L.D., an eminent Baptist divine and educator, was born in the city of New York, March 11, 1796. His parents came to the United States from England in 1788. Soon after his settlement in New York, his father left his secular business and was licensed to preach the Gospel, and spent the remainder of his days in the ministerial office. The early educational advantages of the son were not of the highest order, apart from those which he enjoyed in his own home, where he felt the influence, in moulding his intellectual character, of a mother of rare qualities of mind and heart. He always gratefully referred, in after-life, to the ability of the instructor who seems first to have taught him to study for the love of it, Mr. Daniel H. Barnes. He was admitted into the sophomore class of Union College, Schenectady, in May, 1811, and was graduated July 28, 1813. On leaving college he began at once the study of medicine, and proceeded so far with it as to be permitted by his Giver to practice, when a sudden turn was given to all his life plans by his conversion. He now resolved to study for the ministry. To make the necessary preparation for entering upon his work, he went to Andover in the autumn of 1816, where he remained one year, deriving great benefit from the instructions of Moses Stuart, one of the most earnest, inspiring teachers any institution in this country has ever had. He left Andover at the close of the session of 1816-17, expecting to resume his studies in the fall. He did not return, however, having accepted an appointment as tutor in Union College, where he remained the next four years. The First Baptist Church in Boston being desirous of a pastor, at the suggestion of Dr. Wisner, then the minister of the Old South Church, the name of Mr. Wayland was mentioned to the Church, as a most suitable person to fill the vacant place. In due time a call was extended to him, and he was ordained Aug. 5, 1819, being engaged for a few months over twenty-five years of age. In some respects it was far from being an inviting field of labor to which he had been called. The house of worship was old and unattractive. The Church had been greatly weakened in its numbers and in its finances. The personal qualifications of the new pastor were in no particular, favorable to winning. It was a severe discipline through which he was called to pass, but he took up his burdens with meekness, and demeaned himself as a good
minister of Jesus Christ, and at length his reward came, and it came deservedly as the result of hard, untried work, and unfailing devotion to his duties as a Christian minister. Not that he became what is called a "popular" preacher, a thing which he never aspired to be, and could not have been under any circumstances, but he grew every month in the esteem and respect of those who knew him intimately and could appreciate his worth. A little more than two years after his settlement he preached his celebrated sermon on The Moral Duty of the Missionary Enterprise. It was on Sunday evening, Oct. 26, 1828, that he delivered it, it being his turn to preach the lecture to the three churches. He was in great freedom with his text, and occasionally held up a union service. "The house was uncomfortable," we are told (the preacher wearing his great-coat throughout the service), "and there was but little enthusiasm on the occasion." What the preacher's estimate of the performance was, we infer from the statement that "on Monday morning he went to Dr. Wianer's, and threw himself on a sofa, in one of his most depressed moods, saying, 'It was a complete failure. It fell perfectly dead.'" It is needless to say that he was mistaken. Probably no sermon ever preached in America, at least up to that time, has had a wider circulation, or been reprinted by a larger number of readers. Dr. Wayland was pastor of the Church in Boston which he served so faithfully five years, when he was invited to accept the professorship of moral philosophy in Union College, made vacant by the resignation of Rev. Dr. Alonzo Potter. In this position he remained only a few months, having been called to the presidency of Brown University, upon the duties of which office he entered in February, 1827, being at the time not quite thirty-one years of age.

Dr. Wayland now entered upon what was to be the work of nearly the whole of the remainder of his life. What he did at Brown University (1827-1839) has passed long since into the records of the literary history of our country. But it was no bed of roses on which he was called to recline. From the outset of his administration he had a well-defined "policy." It was not popular, but he believed it to be right, and he firmly and persistently pursued it against opposition which at times was very bitter and unrelenting. "I was not responsible," he remarks, in the review of his administration, "for the continuance of a college in Providence, but I considered myself responsible for the conduct of the college on correct principles so long as it continued to derive its existence from the University." It was a secondary matter. I could live on the poorest fare and wear the cheapest clothing, but I must and would do what seemed my duty." He was so pleased with a remark of Dr. Arnold's that he made a special note of it in his copy of the Life of that great teacher. "It is not necessary that this (Rugby School) should be a school of three hundred, or one hundred, or of fifty boys; but it is necessary that it should be a school of Christian gentlemen." It is not to be wondered at that shirks, and idle men, and doting parents should look with disfavor upon a man so earnest, and so determined to the carrying out of educational principles as possible. Such persons had but slight appreciation of the moral courage which led him to say, "The vessel might sink; but if so, it should sink with all its colors flying. We would strive to make it a place of thorough education, and a station elevated and noble Christian work."

In a sketch like this we cannot give minute details. It must suffice to say that the policy which the new president marked out for himself commended itself to thoughtful men and the lovers of good learning. Those who had long loved the university, and coveted its restoration, felt new hope. The moral wealth in the city where it had its home gave liberally to supply its wants. While he was in office, and chiefly through his personal efforts, Manning Hall was erected, a twenty-five-thousand-dollar fund raised for the library, and the library itself greatly enlarged and enriched by some of its most valuable treasures; Rhode Island Hall erected, a new president's house built, the college campus greatly improved and extended, and the endowment and scholarship and aid funds enlarged. For twenty-eight years and a few months Dr. Wayland was president of Brown University. Weary with this long service, and convinced that the prolongation of his life depended on his relaxation from his arduous duties, he resigned his office, Aug. 20, 1855. It was a touching remark which he made to his associate, Prof. Goddard, when the bell rang for the opening exercises of the new term: "No one can conceive the unspeakable relief and joy I have felt at this announcement; I have been walking in the shadow of death, and to know, for the first time in nearly twenty-nine years, that it calls me to no duty." For less than two years he remained in the comparative quiet of his pleasant home, within an easy walk of the college grounds. He was invited to act as pastor of the First Baptist Church in Providence for such time as he might find his strength adequate to perform the duties of the office. With his wonted zeal and earnestness, he entered upon the work early in the spring of 1857, and continued in it a little more than a year, exhibiting, in the course which he pursued both as preacher and pastor, an illustration of what was his scientific education and duties of an office than which none more honored could a Christian man take upon himself. After retiring from public life, Dr. Wayland passed the few remaining years of his life in Providence, where he died, Sept. 30, 1865.

We find in the list of the publications of Dr. Wayland, in the form of books, sermons, addresses, etc., the number of seventy-two, exclusive of many articles which he wrote for the periodicals, daily, weekly, and quarterly. From this number we select the following as among those best known: Discourse on the Moral Duty of the Missionary Enterprise (1828);Discourse on the Duties of America to the World (1829);Murray Street Discourse;Certain Triumphs of the Redeemer (1830);Moral Efficacy of the Atonement (1831);Philosophy of Analogy (ed.);Sermon at the Installation of William R. Williams (1832);Dependence of Science upon Revealed Religion (1835);Elements of Moral Science (ed.);Elements of Political Economy (1837);Limitations of Human Responsibility (1838);Thoughts on the Present Collegiate System in the United States (1842);Domestic Slavery Considered as a Scriptural Institution (1842);Discussion with Rev. R. Fuller, D.D. (1845);Memoir of Miss Harriet Ware, Union College;Memorials of the Life and Labors of Rev. A. Judson, D.D. (1853);Sermon at Rochester on the Apostolic Ministry (ed.);Elements of Intellectual Philosophy (1854);Notes on the Principles and Practice of the Baptist Churches (1856);Sermons to the Churches (1859);Introduction to Mulford's Life of Trust (1861);Memoir of the Christian Labors of Thomas Chalmers, D.D., L.L.D. (1864);Revised Edition of Elements of Moral Science (1865). See A Memoir of the Life and Labors of Francis Wayland, D.D., E.L.D. (N. Y., 1867), by his sons Francis Wayland and H. L. Wayland.

The Rev. Dr. Wayland, John, D.D., a clergyman of the Protestant Episcopal Church, was born in New York city. His father was pastor of a Baptist Church in Troy, N. Y. John graduated from Union College with honor; became professor of mathematics and rhetoric in Brown University; Providence, R. l.; afterward professor of Greek in the University of the State of New York, and Dr. Francis Wayland was president. For many years he was pastor of a Baptist congregation in Salem, Mass.; but afterwards entered the Protestant Episcopal Church, and became rector of St. John's parish, Canandaigua, N. Y. In 1840 he assumed the rectorship of St. John's, Saint John's parish, for twelve years. The last two years of his life were spent in Saratoga, without parochial charge. He died at Saratoga Springs, N. Y., Oct. 16, 1863. See Amer. Quart. Church Review, Jan. 1864, p. 668.
Wayte, James H., an English Wesleyan missionary, was born at Newcastle-under-Lyne, Staffordshire, in May, 1822. His parents feared the Lord, and he himself early united with the Church. He believed that he was destined for the mission field. In 1844 he was appointed to the London Missionary Society; but he nevertheless mortified the flesh. He died July 8, 1847. The material for a life of Wazo is furnished by Anselm, canon of Liege (died about 1056), in his Gesta Episc. Li- diensium, c. 39-73. See Pertz, Monum. Hist. Script. vii, 219-233; Frenz, Sasan. Legita. i, 158 sq.; Stenzel, Gesch. Deutschlands, i. d. Fränk. Kaiserl., vol. i; Giese- brecht, Gesch. d. deutsch. Kaiserzeit, vol. ii. — Herog., Real-Encyklop. s. v.

Wealth. See Riches.

Wean (םינפ), from the completion of the infant at that time. Most Oriental mothers suckle their children much longer than is usual in Europe, and the same custom seems to have prevailed among the ancient Hebrews. When Samuel was weaned, he was old enough to be left with Eli for the service of the tabernacle (1 Sam. i. 24). As no public provision was made for the children of priests and Levites until they were three years of age, it is probable that they were not weaned sooner (2 Chron. xxxi. 16; 2 Macc. vii. 27). In India a boy is not taken from the breast until he is three years of age; but throughout the East a girl is generally weaned within the first or second year. "Abra- ham made a great feast for the king and his men; and when the king saw that he was a rich man, he was somewhat lifted up by reason of the great riches." (Gen., xxii., 8), and the same custom prevails among the Hindu and Persians. See Child.

Weapon. See Instrument of any kind.

Among the Hebrews, in general, the same kinds of military weapons mentioned (1 Sam. xvii. 5 sq.; 2 Chron. xxvii. 14; Jer. iv. 13, 16; Ezek. xxxix. 9; comp. Philo, Opp. i. 580) as among other warlike nations of antiquity (see Herod., vii. 61 sq.). We can therefore determine their prime little more accurately.

Form or material, except so far as monuments or modern usage enables us to draw a comparison. We note the following kinds (comp. 2 Cor. vi. 7, ἀράχα; διδακτρια, Did. Sic. iii. 54; ἀγαμεριά, ἀγαμερια, Lat. arma et tel.; see Dreni on Nepos, xiv. 11):

1. Protective Weapons.—To this class belong the following:

1. The Shield (q. v.).

2. The Helmet (יוּשָׁב or יָשָׁב), 2 Chron. xxvi. 14; Jer. xlvii. 4; ἡ περακαβία, Eph. vi. 17) of brass (1 Sam. xvii. 5, 38; 1 Macc. vi. 33; comp. Diod. Sic. iii. 30; Xenoph. Anab. i. 2, 5). Whether the Israelites also possessed the "shiel" (1 Kgs. xi. 8, 33) of copper, "wigger the Gibeonite" (2 Sam. xi. 5 sq.; Strabo, vii. 308, et sq.; comp. Passow, s. v. מכנך) is uncertain, although such certainly belonged to rude ages (for the ancient Egyptian form, see Wilkinson, i. 331). See Helmet.

3. The Breastplate (יוּשָׁב, יָשָׁב), which covered the centre of the person (1 Sam. xvii. 5; Neh. iv. 16; 2 Chron. xxvi. 14; 1 Macc. iii. 3), usually of brass (1 Sam. xvii. 5; Jer. ix. 19; comp. Hidud, xvii. 371 sq. 385 sq.). It was sometimes composed of plates (יוּשָׁב, יָשָׁב) of brass (1 Sam. xvii. 5), by which, however, we must not understand the Roman lorica squamata, consisting of a leather corselet covered with brass scales. In order to wound a fully equipped soldier, it was necessary to strike some spot where the bronze pieces failed to join each other fully, or where ordinary clothing intervened (1 Kings xx. 34). An outer coat of mail or cuirass of bronze armor (pannon) in use (1 Macc. vi. 35; comp. the Sept. at 1 Sam. xvii. 5; Diod. Sic. iii. 30); but of linen corselet (see Kiepke, Krieger, d. Griech. p. 97 sq.) there appears no trace in the Bible. See Breastplate.

4. Greaves for protecting the knees and legs (יוּשָׁב, יָשָׁב, see 1 Sam. xvii. 6), commonly of brass (Hidud, vii. 49), were universal in classical antiquity (Xenoph. Anab. i. 2, 16; iv. 7, 16; Virgil, Ex. xi. 17).
Pliny, xxxiv, 18, etc.), and are regarded as an invention of the Carions (Pliny, vii, 57). We must distinguish from these the military shoe (ἐπτυχά, Isa. ix, 4), probably like the Roman caliga (see Bynoeus, De Calceis Hebr.). p. 88 sq.), a sort of half-boot of leather shoe with strong nails (Juvenal, xvi, 24; Josephus, War, vi, 1, 8; Pliny, xxxiv, 18; xxii, 130; xxiv, 36; xxxiv, 41). See GHEAVES.

II. Aggressive Weapons.—1. The Sword (κεφάλη), which was carried in a special belt at the hips (1 Sam. xvii, 37; xxv, 13; 2 Sam. xx, 8), but certainly not as Jahn [Archäol. ii, ii, 40] falsely argues from Judg. iii, 16, 21; Josephus, War, iii, 5, 5) on the right side (see the figure in the Journal d'Arqueologie, 1840, vii, pl. 3, 6, 7, 10, x, 17, 19, 22, 53, etc.). It was enclosed in a sheath (κεφάλη, 1 Sam. xvii, 51; 2 Sam. loc. cit.; ἱλιός, 1 Chron. xxxi, 27; Σεφή, John xlviii, 11), hence the phrase “to draw the sword” (ἐπτυχά, or ἱλιός, or ἱλιός), and was double-edged (κεφάλη, Judg. iii, 16; Prov. v, 4; διαφθορά, Heb. iv, 12; Rev. i, 61; ii, 12; αἰμοφθερά, Iliad, xxii, 118). It was used both for striking and stabbing (1 Sam. xxxi, 4; 2 Sam. ii, 16; xx, 10, etc.). The Sept. usually translates the Heb. בַּני צָרָעָף, which latter occurs in the New Test., and originally denoted the short dagger (comp. ἱλιός, iii, 271 sq.), but later any (curved) sabre in distinction from Σεφή, the proper (military) sword; but that בַּני צָרָעָף also signifies the straight sword where there can be no doubt. The Roman sica, a somewhat curved sword, was introduced later among the Jews, and became, shortly before the destruction of Jerusalem, the deadly weapon of the bold robbers, who hence were called Sicarii (Josephus, Ant. xx, 8, 10; War, vii, 10, 1; I Macc. § 56). See SWORN.

2. The Spear, lance, or dart, was used as a weapon both for thrusting (close at hand) and for throwing (at a short distance), like the dòps of the Greeks (Strabo, x, 448); but chiefly for the former (see 1 Sam. xviii, 1, xxix, 10, xx, 93). The usual Heb. designations are בַּני צָרָעָף and בֵּית צָרָעָף, which can hardly be distinguished, except that the latter is generally used in connection with the sword (or bow), while both appear in connection with the shield (Judg. v, 8; 1 Sam. xvii, 15). Instead of either word, we sometimes find בִּין (2 Sam. xi, 16) and בֵּית (Josh. viii, 18, 26; 1 Sam. xvi, 6; Job xii, 21); also בַּני in some cases (2 Sam. xviii, 14, according to some). They are also thought to have been used as standards for colors (Gesen. Theaur. p. 690). The spears (see the Perspicuum specimens in Porter, Travels, i, pl. 36, 40, 46, 49) had a wooden shaft (קָרָה, 1 Sam. xvii, 7, or בַּני, 2 Sam. xxi, 19; xxiii, 7, and an iron point (1 Sam. xvi, 7). Ash or fir was preferred (Virgil, Æn. vi, 667; Homer, Il. xix, 390 sq.; ii, 228; Odys. xiv, 281; Ovid, Metam. xi, 93; Statius, Theb. vi, 102; comp. Pliny, xxiv, 24), and hence many (so Rosenmuller) explain Nah. ii, 4; but בַּני is probably cypryss (q. v.). The haste of the Romans, a weapon for throwing, is called קָרָה in the New Test. (John xix, 24; comp. Mark, xvi, 11; see Alstorph. De Hastia Veter. [Amst. 1757].) See SPEAR.

3. The Bow (q. v.) in connection with Arrows (q. v.).

4. The Slings (q. v.).

5. A Battle-axe (see Wilkinson, i, 323, 325 sq.) is named (ץִבּוֹ, Psa. xxxv, 3; comp. the αὐραχην of the Scythians, Massagette, and Persians, Herod. i, 215; iv, 70; viii, 64; Xenoph. Cyrop. i, 2, 9, 2; Strabo, xvi, 734; the Assyrian khardu) as a special weapon of attack (comp. the κρίνα of the Carions). Several pictures and descriptions of the Crimean soldiers show a long sledge-hammer perhaps may be meant in one passage (ץִבּוֹ, Prov. xxv, 1, 18; Sept. פַּסְדָּא צֹא; comp. Odys. xi, 575); but it is probably only the ordinary mallet (ץִבּוֹ). See generally Büsself [Rau], De Arma Vett. Hebr. (Tr. ad Rh. 1781); Jahn, Archäol. ii, ii, 400 sq.; Seume, Arma Vett. cum Notisra Comparata (Lipa. 1792). See ARMS.

Of the custom of many nations of burying arms with a warrior in the grave, there is no trace in the Bible (see Ezek. xxxix, 9), but in Assyria, (Isa. xxvii; Rosenmuller, Morgenl. iv. 343 sq.). Captured weapons were suspended in temples or burned in heaps (Isa. ix, 4 sq.; Ezek. xxxix, 9; comp. Virgil, Æn. viii, 562 sq.). Archers (ץִבּוֹ, 2 Kings xi, 13; Isa. xxxix, 2; ἄρμα, Josephus, War, ii, 17, 9) were erected in cities for the deposit of weapons. See ARMOR.

Weasel (ץִבּוֹ, chiled, so called from its gliding (Gesen.) or burrowing (Fürst)) occurs only in Lev. xi, 28, in the list of unclean animals. According to the old versions and the Talmud, the Heb. chiled denotes "a weasel" (see Lwysohn, Zoöl. des Talm. p. 91, and Buxtorf, Lex. Chald. et Talm. p. 756); but while the word is identical with the Arabic chabild and the Syriac chaludo, as Bochart (Hieroz. ii, 455) and others have endeavored to show, there is no doubt that "a mole" is the animal intended by this term (Theuren, ii, 454), however, he has the following very true observation: "Satis constat animalium nomina perspex in hac lingua hoc, in alio cognata allid, id vero simile, animal significare."

He prefers to render the term by "wæsell," as in the Sept. (יוֹנָדָא), Vulg. (musela), and the English version. See MOLL.

Wolves are common enough in Palestine. Hasselquist (Travels, p. 120), speaking of the country between Jaffa and Ramah, says he had never seen in any place the ground so cast up by moles as in these plains. There was scarcely a yard's length between the mole-hills. It is not improbable that both the Tylul Europaeus and the T. crena, the blind mole of which Aristotle speaks (Hist. Anim. i, 8, 3), occur in Palestine, though we have no definite information on this point. The ancients represented the mole as having no eyes, which assertion later scientific writers believe they have not, owing to the blind moles. The mole weasels to be distinguished from these organs, though exceedingly small. Nevertheless, recent observations have proved that a species, in other respects scarcely, if at all, to be distinguished from the common, is totally destitute of eyes, and consequently has received the name of Tylus crenatus. It is to be found in Italy, but probably extends to the East, instead of the Europaeus. Moles must not, however, be considered as forming a part of the rodent order, whereof all the families and genera are provided with strong incisor teeth, like rats and squirrels, and therefore intended for subsisting chiefly on grain and nuts; they are, on the contrary, supplied with a great number of small teeth, to the extent of twenty-two in each jaw—indicating a partial regimen; for they feed on worms, larvae, and underground insects, as well as on roots, and thus belong to the insectorous order, which brings the application of the name somewhat nearer to carnivora and its received interpretation "weasel."

Bochart, inclined to recognise the word בַּני צָרָעָף, לֶשֶּׁם (A. V., "wild beast of the desert," etc.), as a general term denoting cats, or any kind of wild beasts that frequent dry places, discovered an incongruity when it is opposed to a single species, בַּני צָרָעָף, לֶשֶּׁם (A. V., "wild beast of the islands"), which he translates thores (Isa. xxxxix, 1, Jer. 1, 39). Both words are meant, it seems, to imitate the cry of animals; and if he be right in regarding the first as expressive of the mewing or screaming of wild-cats, with such other animals as the ancients included in the feline tribe, and we now class among Viereridae and Muscidae, each including several genera, more or less represented by species residing in and around Palestine, we then find the opposition of the two words strikingly justified, provided, that instead of the single thores of Is-
chart, we make igim include also the various wild canidae (dogs) of the same region, amounting to at least twelve species, without including two hyenas.

Such is the vagueness of Oriental denominations, and the necessity of noticing certain species which, from their importance, cannot well be supposed to have been altogether disregarded in the Bible, that in this place a few words descriptive of the species of Viereride and Mustelidae known to reside in and near Palestine, and supposed to be collectively designated by the term tayyim, may not be irrelevant. They appear, both anciently and among ourselves, collected into a kind of group, under an impression that they belong to the feline family; hence we, like the ancients, still use the words civet-cat, tree-cat, polecat, etc.; and, in reality, a considerable number of the species have partially retractile claws, the pupils of the eyes being contractile like those of cats, of which they even bear the spotted and streaked livresses. All such naturally have arboreal habits, and from their low lengthy forms are no less disposed to burrow; but many of them, chiefly in other hemispheres, are excellent swimmers. One of these species, allied to, if not the same as, Genetta barbara, is the Thela Elon, described by Bochart as having "various colors, and as being spotted like a pard." In Syria it is called sephki, in Arabia sebez, and lives by hunting birds and shaphans. There are, besides, in the same region, the same, ferret or polecat (Putorius vulgaris), for these two are not specifically distinct; ferret-helle, the weasel (Mustela vulgaris Africana), differing from ours chiefly in its superior size and darker colors. A paradoxurus, identical with, or nearly allied to, P. typus, occurs in Arabia; for it seems these animals are found wherever there are palmiferous, the date-palm in particular being a favorite residence of the species. Two or three varieties, or perhaps species, of nema occur in Egypt solely; for the name is again generic in the Arabian dialects, and denotes the ichneumon. Arabia proper has several other animals not clearly distinguished, though belonging to the families here noticed; but which of these are the sunqib and the sinur, or the alphaneix of Ibn Omar ben-Abdalbar, quoted by Bochart, is undetermined; albeit they evidently belong to the tribes of vermin mammals of that region, excepting as regards the last mentioned, now known to be a kind of miniature fox (Megalotis zarda, Ham. Smith), or fennc of Bruce, who nevertheless confounded it with Paradoxurus typus, or an allied species which equally frequents palm-trees; but the fennc does not climb. It is equally impossible to point out the cats, tree-cats, and civet-cats noticed by the poet Neme- sianus, who was of African birth, or by the Arabian Da- mir, who makes no further distinctive mention of them. The chold is described in Lev. vi, 29 as one of the small animals which are thrown together under the general designation of "creeping things," and which appear to include the smallest carnivorous and insidious ven- 094 WEATHERFORD

Polecat (Mustela putorius).

The whole category is prohibited as unclean. The
too warm for it. All these animals, but particularly the first-named, are most destructive to other small ani- mals; and from their depredations in the poultry-yard are held in detestation by the farmer, who, however, does not consider the benefit they do him in the de- struction of myriads of field-mice, house-mice, and rats. Their appetite for blood seems insatiable; their ferocity and courage prompt them to fly at animals larger than themselves; while their carnivorous organization is de- veloped perhaps even more highly than in the typical cats, and they use their powers with the utmost skill and judgment. They prefer the brain and blood of their prey to the flesh.

Weather (וֹתָא, yom, day, as usually rendered; "fair weather," יָם שָׁבָד, Job xxxvii, 22, lit. gold, i.e. "brightness;" צבָּא, Matt. xvi, 2; "four weather," יָם שָׁבָד, ver. 5, storm, as elsewhere) in Palestine is, in consequence of the region being greatly diversified by hills, valleys, and plains, quite various in different parts, being hot during the summer, especially along the seashore (comp. Josephus, War, iii, 9, 1) and in the Jordan gorge (ibid. iv, 8, 3), and cooler on the mountain ridges, especially in winter, but, on the whole, more equable than in Northern and Occidental countries. The length of the day also varies less in different latitudes than in higher latitudes, and thus tends to equalize the temperature. See CALENDAR; PALESTINE; SEASON.

Weathercock is a weather vane, on which is the metal or wooden representation of a cock, placed on the top of a spire, which vane turns by the force and direction of the wind.

Weatherford, John, a Baptist minister, was born in Charlotte County, Va., about 1740. His parents were members of the Presbyterian Church, his father being an elder in the church of which the distinguished Dr. Rice was the minister. Soon after his conversion, his mind began to be troubled on the subject of baptism. Having conversed on the matter with his pastor, and his doubts not having been removed, Dr. Rice had the magnanimity to say to him, "I perceive, John, that you will be a Baptist. Go, and the Lord be with you." He became a member of the Baptist Church when he was about twenty years of age. He commenced to preach about the year 1761, and his ministry was so popular that crowds were drawn to hear him. Persecution now began to follow him. After preaching on a certain occasion in Chesterfield, Va., he was arrested and thrown into prison, where he was held in confinement five months. It is said of him that "his courage
Weaving (.argv, ardyg) is an art which appears to be coeval with the first dawning of civilization. In what country or by whom it was invented, we know not; but we find it practiced with great skill by the Egyptians at a very early period, and hence the invention was not unnaturally attributed to them (Pliny, vii, 57). The "vestures of fine linen" such as Joseph wore (Gen. xii, 42) were the product of Egyptian looms, and their quality, as attested by existing specimens, is pronounced to be not inferior to the finest cambric of modern times (Wilkinson, ii, 70). The Israelites were probably acquainted with the process before their sojourn in Egypt: but it was undoubtedly there that they attained the proficiency which enabled them to execute the hangings of the Tabernacle (Exod. xxxv, 35; 1 Chron. iv, 21) and other artistic textures. At a later period the Egyptians were still famed for their manufactures of "fine" (i.e., huckled) flax and of chori, "woven," rendered in the A.V. "networks," but more probably a white material either of linen or cotton (Isa. xix, 9; comp. Prov. vii, 16). From them the Tyrians procured the "fine linen with brocaded work" for the sails of their vessels (Ezek. xxvii, 7), the handsome character of which may be inferred from the representations of Egyptian sailors in the Egyptian paintings (Wilkinson, ii, 131, 167). Weaving was carried on in Egypt generally, but not universally, by men (Herod. ii, 35; comp. Wilkinson, ii, 84). This was the case also among the Jews about the time of the Exode (1 Chron. iv, 21): but in later times it usually fell to the lot of the females to supply the household with clothing (1 Sam. ii, 19; 2 Kings xxiii, 7), and an industrious housewife would produce a surplus for sale to others (Prov. xxxi, 19, 24).

The character of the loom and the process of weaving can only be inferred from incidental notices. The Egyptian loom was usually upright, and the weaver stood on it. The cloth was fixed sometimes at the top, sometimes at the bottom, so that the remark of Herodotus (ii, 66) that the Egyptians, contrary to the usual practice, pressed the wood downwards, must be received with reservation (Wilkinson, ii, 85). That a similar variety of usage prevailed among the Jews may be inferred from the remark of John (xix, 23) that the seamless coat was woven "from the top" (ἰκ τῷ ἄνω̃τῳ). Tunics of this kind were designated by the Romans reticulum, implying that they were made at an upright loom at which the weaver stood to his work, thrusting the wool upwards (Pliny, vii, 74). The modern Arabs use a procumbent loom, raised above the ground by short legs (Burekhardt, Notes, i, 67). The Bible does not notice the loom itself, but speaks of the beam (be Яν尤其是 so called from its resemblance to a ploughman's yoke) to which the warp was attached (1 Sam. xvii, 7; 2 Sam. xxv, 19); and of the pin (P ΠΤΝΥ, a term otherwise understood of the warp, as in the Sept. and the Vulg. [Genesius, Theaur., p. 890]) to which the cloth was fixed, and on which it was rolled (Judg. xvi, 14).

We have also notice of the shuttle (Уп, denoting both the web and the shuttle), which is described by a term significant of the act of weaving (Job
An Egyptian Loom. (k is a shuttle, not thrown, but put in with the hand. It had a hook at each end.)

vii, 6); the thrum (נָּשֱׁה), or threads which attached the web to the beam (Isa. xxxviii, 12, marg.); and the web itself (Judg. xvi, 14; A.V. “beam”). Whether the two terms in Lev. xiii, 48, rendered “warp” (נָּשִׁים) and “woof” (נָּשָׁה), really mean these admits of doubt, inasmuch as it is not easy to see how the one could be affected with leprosy without the other; perhaps the terms refer to certain kinds of texture (Knoebel, ad loc.). The shuttle is occasionally dispensed with, the wool being passed through with the hand (Robinson, Bibl. Res. i, 169). The speed with which the weaver used this shuttle, and the decisive manner in which he separated the web from the thrum when his work was done, supplied vivid images—the former of the rapid passage of life (Job vii, 6), the latter of sudden death (Isa. xxxviii, 12).

The textures produced by the Jewish weavers were very various. The coarser kinds, such as tent-cloth, sackcloth, and the “hairy garments” of the poor, were made of goats’ or camel’s hair (Exod. xxxvi, 7; Matt. iii, 4). Wool was extensively used for ordinary clothing (Lev. xiii, 47; Prov. xxvii, 26; xxxi, 13; Ezek. xxvii, 18); while for finer work flax was used, varying in quality, and producing the different textures described in the Bible as “linen” and “fine linen.” The mixture of wool and flax in cloth intended for a garment was intertied (Lev. xix, 19; Deut. xxii, 11). With regard to the ornamental kinds of work, the “needlework” and “the work of the cunning workman” have already been discussed under the head of Needlework to the effect that both kinds were produced in the loom, and that the distinction between them lay in the addition of a device or pattern in the latter, the ḫêtibbāḥ consisting

simply of a variegated stuff without a pattern. We may further notice the terms (1) ḫibbāḥ (נַחַב) and ṭashbāḥ (נַחַב), applied to the robes of the priest (Exod. xxviii, 4, 89), and signifying “brocaded” (A.V., “broader”), i.e. with depressions probably of a square shape worked in it, similar to the texture described by the Romans under the term scutellatus (Pliny, viii, 73; Juvenal, ii, 97); this was produced in the loom, as it is expressly said to be the work of the weaver (Exod. xxxix, 27); (2) ḫadīsh (נַחַכָּה) (A.V., “twined”), applied to the fine linen out of which the curtains of the tabernacle and the sacerdotal vestments were made (xxvi, 1; xxviii, 6, etc.); in this texture each thread consisted of several finer threads twisted together, as is described to have been the case with the famed cymalet of Amasis (Herod. iii, 47); (3) ṭashbatāth zawqāb (נַחַבָּה נַחְבָּה הַצַּוְּעָה) (A.V., “of wrought gold”), textures in which gold-thread was interwoven (Psa. xlv, 13). The Babylonians were particularly skilful in this branch of weaving, and embroidered groups of men or animals on the robes (Pliny, viii, 74; Layard, Nineveh, ii, 418). The “goodly Babylonian garment” secreted probably was probably a characteristic (Josh. vii, 21). The sacerdotal vestments are said to have been woven in one piece without the intervention of any needlework to join the seams (Josephus, Ant. iii, 7, 4). The “coat without seam” (θηρον ἄθραπος), worn by Jesus at the time of his crucifixion (John xix, 23), was probably of a sacerdotal character in this respect, but made of a less costly material (Carpzov, Appar. p. 72). See Ḫêtībāḥ.

Webb, Benjamin C., a clergyman of the Protestant Episcopal Church. His ministry was devoted to one object, the salvation of the Southern slaves, having had charge of several large plantations in Prince William County, Va. In 1854 he removed from the low country to Abbeville, S. C., to take charge of a white congregation, hoping to improve his health by the change of climate; but he resigned the Church, and was seeking relief at Wilson’s Springs, N. C., in 1855, when he died, aged forty-five years. See Amer. Quar. Church Review, 1855, p. 482.

Webb, Daniel, a Methodist Episcopal minister, was born at Canterbury, Conn., April 13, 1778. He embraced religion in 1797, and immediately began his life-work of preaching. He entered the New England Conference in his twentieth year, and labored on its many and vast circuits, with marvellous endurance and experience, until 1814, when the wide-spread distress occasioned by the war with Great Britain compelled him to locate, which he did at Newport. Here he opened a school, and for nine years performed the responsible duties of both schoolmaster and preacher in charge. In 1823 he rejoined the New England Conference, and during the following eighteen years filled the most important charges in the Conference; published the Zion’s Herald one year (1827); and was presiding elder for several years. In 1841 he superannuated; in 1843 he was transferred to the Providence Conference, and was stationed first at Little Compton, and then at
Webb, Francis, an English Baptist minister, was born at Taunton in 1735. He became minister of a congregation at Barbican, London; also at Hounon; and died in 1815. He was the author of some volumes of Sermons:—Sower a Poem (1811); and Pankaramonicon (1815). See (Lond.) Gentleman's Magazine, 1815, ii, 278, 568.

Webb, James, a Methodist Episcopal minister, was born in Pennsylvania in 1829. He embraced religion in early life; years later was licensed as an exhorter; and began his ministerial life in 1858 on Zion Circuit, Cecil Co., Md. Meeting with discouragement he began to doubt the genuineness of his call, and soon returned to his former vocation. After much prayer and counsel he again began the active work; joined the Philadelphia Conference in 1860, and in it labored four years so persistently that his health gave way and carried him to the grave. He died, greatly lamented, in Chester County, Pa., Oct. 8, 1864. See Minutes of Annual Conference, 1866, p. 34.

Webb, John (1), an American divine, was born in 1807. He graduated at Harvard College in 1708; was ordained minister of the New North Church, Boston, in 1714; and died in 1750. He published twenty single Sermons. See Allibone, Dict. of Brit. and Amer. Authors, a. v.

Webb, John (2), an English clergyman and eminent antiquary, was born in 1776, and died in 1869. He was the author of Translation of a French Mertrical History of the Deposition of King Richard II (Lond. 1822):—Household Expenses of Richard de Svinfield (1855). See Allibone, Dict. of Brit. and Amer. Authors, a. v.

Webb, John (3), an English Congregational minister, was born at Dulect in 1827. Early in life he experienced a thorough consecration to God, and was diligent in preparation for the ministry. Mr. Webb graduated at the Western College, and settled at Castle Cary in 1851. He removed to Shepton-Mallet in 1858, and settled at Lowton in 1864. The Church and congregation greatly increased under his administration. Mr. Webb's reading was extensive among the best writers and thinkers of the day; and his preaching, though simple, was combined with such intelligence that he attracted the thoughtful Christians, and always attached them to his ministry. He died Nov. 7, 1867. See (Lond.) Cong. Year-book, 1868, p. 301.

Webb, John (4), an English minister of the Bible Christians, was born Jan. 31, 1836. After laboring for some time as a local preacher, he gave himself wholly to the work of the ministry. He entered the Conference in 1868. At the Conference of 1873, feeble health compelled him to take a supernumerary ticket. He died June 7, 1874. See Minutes of Conference, 1874.

Webb, Joseph, a Presbyterian minister, was a graduate of Yale College in the class of 1715. He was ordained and installed pastor of the Church at Newark, N. J., and became a member of the Synod in 1720. He proposed to the Synod a case of conscience, but in such general and doubtful terms that it was remitted to the Presbytery. In 1730 a committee of Synod, at its request, went to Newark to settle a difficulty which had arisen; and the Synod approved of its action in the premises. In 1732 difficulties in his congregation led the Church missionaries to commence their services in the town. Dickinson preached on "the vanity of human institutions in matters of religion." Colonel Josiah Ogden had been suspended from Church privileges because, for fear of losing his hay, he had gathered it in on the Lord's day. He wrote to the Synod in 1734, and Cross and Pemberton replied; but the letter did not satisfy him. Dickinson and Pemberton wrote the next year. The result was that Ogden joined the Episcopalians, and a Church missionary was stationed in Newark. Webb continued his relation to the Synod till 1740. He and his son, a student of Yale College, were drowned while crossing the ferry at Saybrook, Conn., Oct. 21, 1741. (W. P. S.)

Webb, Lorenzo, a Methodist Episcopal minister, was born at Windber, Hunting Co., Pa., Aug. 9, 1837. He removed with his parents to La Porte, Ind., when thirteen years of age; there received a common-school education; experienced conversion in 1855; removed to Rochelle, Minn., in 1857; spent two winters in a printing-office; received license to preach in 1868; studied two years at McKendree College; was one of the first to respond to president Lincoln's call for volunteers to put down the Rebellion, and served the first three months as first lieutenant, and the next three years as captain of Company F, Ninth Illinois Infantry; then, being disabled for the infantry, returned home. Soon after he joined the 31st Infantry to suppress the insurrection. He died in the hospital at St. Louis, Mo., Feb. 24, 1891. His close application and over-exertions undermined his constitution, and hemorrhage of the lungs set in. He removed South, and employed himself at various manual occupations until his demise at Nashville, Tenn., Feb. 20, 1873. After four years in that state, he returned to his native state where his life were full of poverty, bereavement, and deep sorrow. See Minutes of Annual Conference, 1880, p. 50.

Webb, Nathan, a Congregational minister, was born in Brantiss, Mass. He graduated from Harvard College in 1729; was ordained pastor of the Church in Uxbridge, Feb. 3, 1731; and died March 14, 1772, in the sixty-seventh year of his age. See Sprague, Annals of the Amer. Pulpit, ii, 8.

Webb, Samuel, an English Wesleyan minister, was born at Hanham, near Bristol, in 1788. He feared the Lord from his youth, and joined the Methodist Church at the age of twenty-two. He was called into the ministry in 1808, in which he continued with an unbullied reputation until his death, June 23, 1847. Meek, humble, and modest, he was firm in faith, and talented in preaching. See Minutes of Wesleyan Conferences, 1847.

Webb, Thomas, prominent in the early history of Methodism, was an English soldier—for several years lieutenant of the Forty-eighth Regiment of Foot—and a man of wealth and education. He lost an eye and was nearly killed in the storming and capture of the French fort of Louisburg, Acadia (Nova Scotia), in 1758; and was, with Washington, one of the few officers who survived the terrible slaughter at the battle known as "Braddock's Defeat"—the unsuccessful attack in 1755 on the French fort Duquesne, where Pittsburgh, Pa., now stands. After four years on the Western marches of Abraham with Gen. Wolf, and saw Canada pass forever from the hands of France. He was converted under a sermon preached by Wesley, in Bristol, in 1765; united with the Methodist society, and commenced preaching. We next hear of him as barrack-master at Albany, N. Y., 1768. In 1769 and 1770 the Methodists had commenced meetings in New York reached the ears of the zealous captain, and he at once repaired thither (spring of 1777). Webb was the providential man. "The little society needed a leader—Webb was born to command. They needed another preacher of mature experience, learning, and power—Webb was one of the best preachers then on the continent of America. They
WEGSCHEIDER

needed money wherewith to house their young society —Webb was rich and generous. ... It would have been a hard matter for them to have suited themselves by a choice of all the Methodists, but not better than the God had suited them" (Daniels, Hist. of Methodism, p. 388). The congregations became too large, and in 1768 John Street Church was dedicated, Webb being one of the principal contributors in meeting the expenses of the new building. The military authorities now placed the Methodists on the enlisted list, but no longer required them to pay. In 1770, at once commenced itinerating. He introduced Methodism into Long Island at Jamaica; founded societies at Pemberton, Burlington, and Trenton, N. J.; traversed Delaware and Maryland; became the pioneer of Methodism in Philadelphia, where he preached in a sail-loft and formed a class in 1768, and two years after gave liberally for the purchase of St. George's Church. The work was now spreading rapidly. Help was needed. Webb sailed for England in 1772; preached in Dublin, London, etc.; made a stirring appeal before the Leeds Conference; and in 1779 returned with Shadford, Ras- kin, and Yearby. He continued his evangelistic labors till after the breaking-out of the Revolutionary War, being one of the last of the English preachers to leave; but finally the country became too hot for him, and he bade a reluctant good-bye to America, the scene of so many struggles and victories, and went to a more varied life. On his return to England, he secured a home for his family in Portland, on the heights of Bristol; but still travelled and preached extensively in chapels, in market-places, and in the open air, listened to by immense congregations. The French prisoners at Winchester (1778-92) and the soldiers and sailors at Portsmouth were benefited by his labors. In 1792 he was liberal and active in the erection of Portland Chapel, at that time one of the most elegant meeting-houses in the Methodist connection. The old soldier and evangelist died Dec. 20, 1796, aged seventy-two years, and was laid to rest in the churchyard of Portland Chapel.

Weisgley writing to a friend in Limerick, said, "Captain Webb is a man of fire, and the power of God constantly attends his word" (Jour. Feb. 2, 1773; Works [3d ed. Lond.], xii, 375). Charles Wesley speaks of him as an "inexperienced, honest, zealous, loving enthusiast." In 1774 an Athens newspaper gave an account of the many eloquent, eloquent men he ever heard. He reaches the imagination, and touches the passions very well, and expresses himself with great propriety." See Atmore, Mth. Mem. s. v.; Stevens, Hist. of Meth. I, 427; iii, 90; id.; Hist. of M. E. Ch. (Index), vol. iv; Porter, Hist. of Meth. p. 347-50, 581; Cyclop. of Meth. (1810).

Wegscheider, Julius August Ludwig, the foremost systematic theologian of rationalism, was born in 1771 at Kuebelingen, in Brunswick. In 1791 he was in the University of Heidelberg, where he occupied the theological chair, and in 1795 he became tutor in the family of a prominent merchant of Hamburg. He gave ten years to this service. His leisure time was devoted to the study of Kant's philosophy, the fruit of which appeared in 1797 in Ethices Stoicorum ..., cum Principis Ethica a Kanti Propositis Comparata, and in a Versuch d. Hauptzüge d. philosopher. In Leipzig, 1802, 8vo. In 1804 he added to these a treatise Uber die Tremmung der Moral vor der Religion. In 1805 he obtained a tutorship in the University of Göttingen, and in the following work came more prominently before the public by the issue of his Essay on the Right of Common. He was then appointed to a professorship in the Hessian University of Rinteln, and afterwards on the absorption of Rinteln was transferred to Halle. Here he became exceedingly popular with students, who thronged his lecture-rooms, and he added to his fame by the publication of his Institutiones dogmatis (1814). His popularity continued until the Denunciation of the Evangelical Kirchenzeitung, as it was called, in 1830, when he was, together with his colleague Gesenius, cited before a committee of examination to defend himself against complaints respecting his teachings in the lecture-room. The intervention of political events deprived the examination of much importance as it might have possessed for him, but his influence was nevertheless irrevocably broken. Ullmann came to reinforce Tholuck in 1829, Julius Muller ten years afterwards; and the orthodox tendency grew in every direction. Many of the polemical blows aimed by Hase against Tholuck in 1830 took effect on Wegscheider also. As his reputation declined, students no longer found it possible to endure the tediousness and monotonous delivery of his lectures, and but few of them continued to sit at his feet after 1840. He died in February, 1849. The scientific value of his Institutiones, the great systematic theologian of rationalism, owes but little of its character to Wegscheider. Its thoughts are borrowed, usually from Henke's Lineamenta and Ammon's Summa, and, in many instances, in the exact words of those books. It abounds in half-complete ideas and unresolved differences, as does scarcely any other theological work. Its true character was determined by its first form as a contribution by Hase in his Antiroll (1837). See also Steiger, Krise des Rationalismus in Wegscheider's Dogmatik (1830) and Herzog, Real-Encyklop. s. v.

Wegsawin, in Norse mythology, is one of the streams of Hel, flowing through Nithheim.

Weichselzopf, in German mythology, is a name given to a certain disease which was thought to be derived from the river Weichsel, because this sickness was supposed to be common in Poland. It is, however, now quite certain that the name really is Wichtelzopf, taken from the superstitious idea of Wichtel—small, domestic, elf-like spirits that, doubtless, in many cases are beneficial to men, yet, when teased or tantalized, are angry and evil-minded; and, besides doing other mischief, apparently have an unlovely head in inextricable plats and knots.—Vollmer, Wörterb. d. Mythol. s. v.

Weichmann, Joachim Samuel, a Lutheran theologian of Germany, was born May 1, 1714, at Dantz. From 1735 to 1739 he studied at Leipzig, and his dissertation, published in 1739, De Fontibus Veritatis Staurac. in Annot. Pernici. in Argenti. Lib. VII, Cap. 7, gave him the privilege of lecturing on philosophy. In 1740, having presented another dissertation, De Platonica Animorum Immortalitate, he was appointed adjunct to the philosophical faculty. Three years later he was made professor extraordinary, and in 1744 professor in a chair of theology in Mainz. For this occasion having been De Theologia Trinitatis, aliqua Logentis, aliqua Sententiosis. Shortly afterwards he was made doctor of theology, and died Oct. 18, 1774. Besides the writings already mentioned, he published, De Christo in Marci Gloriosissimo (Viteberg, 1755.—De Discrimine Graeis Divina sine Merito contra Munitum (ibid. 1757).—Johns, Resurrectionis non Typus, sed Professor (ibid. 1759). His other writings are enumerated in Fürst, Bibl. Jud. iii, 497; Dühring, Die gelehrten Theologen Deutschlands, iv, 672 sq. (B. P.)

Weidelbot is a priest of the Wends in Pomerania and Rügen, the next to Grievo.

Weidman, Paul, a Reformed (Dutch) minister, was born in 1768. He graduated at Union College in 1818, at New Brunswick Theological Seminary in 1820, and was licensed by the Classis of New Brunswick the same year; was pastor at Schoharie, N. Y., 1820-36; at Manheim, 1837-41, and again, 1841-50. He died in 1862. See Corwin, Manual of the Ref. Church in America, p. 464.

Weidner, Johann Joachim, a Lutheran theologian of Germany, was born November 11, 1672, at Schoppenrock. He studied at different universities, and in 1698 he was appointed deacon at St. Mary's in his native place. In 1706 he received the degree of D.D., in 1716 was ap-
pointed professor of theology, and in 1721 senior of the theological faculty, and died Oct. 17, 1724. He was a voluminous writer. Of his works we mention: Disput. IX contra Reformatos, quod non Convincat cum Lutherism in Plurimis Articulis Fidei;—Disertationes Tres de Gratia Dei Universali non Particulares:—Christus ex Bibliis ipsocon:—De Forma S. Cena in Consec. in Considerationem Religis. Eius Mortis et Morborum. Dedicato ad ducatione et Bibliome:—Miraculum Murorum Hieri- chustiae Cadumum:—Christus Resurgens Victor, etc. See Seelen, Athenae Lubeconis; Jöcher, Algemeines Gelehrten-Lexikon, s. v. (B. P.)

Weidner, Paul, a Jewish convert of Carinthia who joined the Christian Church in 1858, was professor of Hebrew at the Vienna University, and was appointed by imperial permission to preach occasionally to the Jews. He wrote Loca Precipuæ Fidei Christianæ Col- lecta et Explicata (Vienna, 1859; 2d ed. 1862, with Epistola Hebr. ad R. Jehudam, Venet. Habitantium, cum Versione Latina). See Kalkar, Israel und die Kirche, p. 90; Delitzsch, Wissenschaft, Kunst, Judentum, p. 109, 590; Wolff, Bibl. Hebr. i. 984; Jöcher, Algemeines Ge- lehrten-Lexikon, s. v.; Fürsten, Bibl. Jud. iii. 498; Bayle, Dictionnaire Historique et Critique. (B. P.)

Weigel, Christopher, a German engraver, was born at Redwitz, in Bohemia, in 1564. After visiting various German cities, he settled in Nuremberg, where he died in 1725. His principal work was a set of Bible plates engraved from his own drawings. See Scriptura Logens in Imaginibus, etc., published in 1690. They were executed with the graver. He is also said to have engraved in mezzotint, and to have carried on an extensive commerce in prints. See Spooner, Biog. Hist. of the Fine Arts, s. v.

Weigel, Valentine, a mystic of the 16th century, was born in 1583 at Hayn, in Misulis, where his father was then pastor of the Reformed Church and Weiten- berg from 1564 to 1567, and was ordained pastor of Zachopua, in the diocese of Chemnitz, Nov. 16, 1567, by Paul Eber (q. v.). He remained in that position till he died, June 10, 1588. He was married, but remained childless. He was beloved by his parishioners, who were not capable of discovering his heterodox views, more especially as he did not publish them to the world, and contented himself with privately elaborating them. He was not wholly successful, however, in preventing reports of his unsound opinions from being circulated, according to which he was tainted with Osianidrian and Schwenkfeldian errors. His cantor, Weikert, collected a band of mystical adepts, who undertook the multipli- cation, and subsequently the publication, of Weigel's works; and who issued them at Halle, Magdeburg, and elsewhere, in 1612, and afterwards in repeated editions. It is possible that interpolations of foreign matter into these writings took place, as the editors assumed pseu- donymous names.

The sum and substance of Weigel's theorizing may be comprehended in the words of his epitaph at Zachopua (see Arnold, Kirchen- u. Ketzterhistorie, ii. 17, 17), "O man, learn to know thyself and God; this is suf- ficient for the knowledge of the world and the range of the subjective consciousness, objective proofs being regarded by him as the demonstration of a bond- age to the letter which is opposed to all true spiritual wisdom. He teaches that man is a microcosm which embodies within itself the potentiality of salvation equal- ly as man is a microcosm which embodies within itself the potentiality of salvation equally or brain. His consciousness, and his spirit from the spiritus vitalis in God; and the principle of his consciousness is nothing more strongly expressed, man comprehends in himself by nature not only the world, but also God and Christ. Man is consequently both a microcosm and a microcos- mos, and constitutes the point at which the world, which emanated from God, returns to God. Weigel's panthe- ology is unimportant, but the idea of a universal life appears in his cosmology, and the thoughts of eternity and time, the invisible and the visible, are everywhere regarded by him as correlated, so that none of them can exist without its counterpart. The creature is considered es- sential to the existence of the Most High in his scheme. The person- ality of the Son and the Holy Spirit is not necessary to the immanent being of God, but originates in con- nexion with the emanation of the world from God. The Son is the centre in which God and the creature come together. Through him God becomes corporal, and temporal, and is no longer able to affect the emanation of the creature from God, but is a mere impossible reduction of the divine and the eternal to the measure of time and sense; nor does Weigel any- where succeed in achieving the completeness essential to the consistency of his system which the establishing of a distinct creature-nature would involve. Angels were created by the word of God, and in them the invisible world; but when Lucifer fell, God desired to have man, and therefore created the earth. Yet man is called the eye, ear, foot, hand, instrument of God, through which everything must be recognised and wrought; and it is said that this could only have come to pass had Adam remained in Paradise. In brief, all externality is but a reflex of the internal, and an ideal- ism exists in which the distinction between the world and God is altogether subjective, and whose result is that man lacks personality. All effect is the result of the divine action, and yet the human will is said to be unneccessitated in the fall into sin—a contradiction which Weigel nowhere explains. Sin is not a substance, but an accident assumed by the will, though it may be con- sidered a substance in view of its effect on human nature, which involves the loss to man of his whole body—body being equivalent to all that is objective. Origin- al sin is a necessary condition of the creature nature, which involves the departure of man from Eden, that he may till the soil and learn to know himself. Re- demption consequently has no objective signification. Christ and the new life exist naturally in man. The kingdom of God is so that in all the world of salvation exist in him, and it is actualised by the ac- tainment of the soul to a knowledge of itself, and there- by to a knowledge of the Eternal and of God. The key to the whole of Weigel's system is his postulated oppo- sition between the internal, which is the divine in man, and the external, which is the world, which is the source. The Scriptures, as the outward letter, are depreciated and accounted incapable of revealing eternal life, which, according to Weigel, is made known by the subjective spirit alone; and yet they are said to be necessary in another direction, because of our blindness and weak- ness. The duty of man is fulfilled in a simple surren- der to the operations of the immanent Christ.

It remains to be observed that while, in his opposition to the literalism of the Church, Weigel was at one with the sects of the time of the Reformation, he was utterly at variance with them in his advocacy of a fully developed individualism, and in his development of the principle of the autonomy of the individual conscience in lawsuits, etc., as he was also with the gross materialism which characterized the early Anabaptists in the unqual- ified intellectualism of his views. His mysticism afforded no aid whatever towards the thorough regener- ation of theology. His significance probably extends no further than his influence contributed to the renew- al of philosophical methods in theological inquiry, and as he antagonized the supranaturalism then current with his principle that nothing can be true which does not impress itself immediately upon the consciousness as being true.

See Arnold, Kirchen- u. Ketzterhistorie, ii. 17, 17, where a complete list of Weigel's works is given: Unschuldige Nachrichten, 1715; Hilliger, a dissertation enti- tled Fama et Scripta M. V. Weigel, etc. (Wittenberg,
WEIGHING OF SOULS

1721; comp. also Roth, Nütziger Unterricht von d. pro-
phet. Weisssagungen (1694), § 24. Arnold has stated Wei-
gel's peculiar tenets in an apologetical way, while Hili-
gger has published a somewhat expanded list of his here-
ries.

His importance to philosophy is set forth in Rit-
ter, Gesch. d. Philosophie, x, 77—100; Stadenmayer,
Philos. d. Christenthums, i, 729 sq.; Carrière, Philosoph.
Weltschauung d. Reformationszeit, p. 203—209; further,

Vorles. ü. d. Rel.-Gesch. d. Welt, 337 sq.; Donner, Christologie,
i, 858; Baur, Trinitätstheorie, iii, 255—260; id. Veräch-
zungskritik, p. 463. —Herszog, Real-Encyclop. n. v.

Weighing or Souls is a practice accredited to the
Egyptian gods to determine their place in the future
world. The heart of the deceased was placed on one
side of the scales held by Horus and Anubis, and the
god Thoth registered the result of the weighing. Upon
this judgment (which was rendered by Osiris and his
forty-two deities) the irreproachable fate of the soul de-
depended. If the deceased was convicted of unpardon-
able faults, he became the prey of an infernal monster,
with the head of a hippopotamus, and was beheaded
by Horus and Sm, one of the forms of Set, upon the
nemesis, or infernal scaffold. The most wicked were pun-
ished with final annihilation. See Lenormant, Cheikhaneh
Magic, p. 86. See Weight.

Weight (ג'ג, ëben, Dent. xxii, 24; xxv, 15; 2 Sam.
xiv, 26; Prov. xi, 1; xvi, 11, x, 10; Mic. vi, 11; a
stone, as elsewhere rendered; usually בְּנֵיָוָיִצְלָד mishkâl
[once בְּנַיְוָוָיִצְלָד mishkîl, Ezek. iv, 10], from בְּנַיְוָיִצְלָד, to
weigh; בְּנַיְוָיִצְלָד, pîles, Prov. xxvi, 11; "scales," Isa. xi, 12; a
balance; בְּנַיְוָיִצְלָד, Hebr. ii, 1, a mass; בְּנַיְוָיִצְלָד, Cor. iv, 17,
elsewhere "burden"). It is evident from one of
these names (ëben) that stones were used in the most
ancient times among the Hebrews for weights, as they
were also among many other nations; and from another
(mishkâl), that of their money weights and terms, the
shekel was that in most common use, and the standard
by which others were regulated. In later times weights
were made of lead (Zech. v, 6). These weights were
carried in a bag (Deut. xxx, 13; Prov. xvi, 11) suspend-
ed from the girdle (Charlin, Voy. iii, 422), and were
very early made the vehicles of fraud. The habit of
carrying two sets of weights is denounced in Deut. xxxv,
18 and Prov. xx, 10, and the necessity of observing
strict honesty in the matter is insisted upon in several
precepts of the law (Lev. xix, 36; Deut. xxv, 13).
But the custom lived on, and remained in full force to the
days of Micah (vi, 11), and even to those of Zechariah,
who appears (ch. v) to pronounce a judgment against
fraud of a similar kind. See Bag.

Between ancient weights and money there was a
very intimate connection. All Greek money was origi-
nally a certain weight of silver, and a similar rule prob-
ably held with the money of other nations. Hence,
perhaps, the best mode of ascertaining an ancient weight
is by weighing a good coin of the same denomination.
When this is ascertained, we can form a just opinion of
the other weights in the scale from their relative propor-
tions. Gold, even as late as the time of David, was
not used as a standard of value, but was considered
merely as a very precious article of commerce, and was
weighed like other articles. In Oriental countries, as
far back as the time of Abraham, the value of gold
was sometimes estimated at a certain quantity of silver, the
price of which was taken into account by the merchant (Gen.
xxiii, 16). But there is no trace of stamped silver or coin
previous to the Captivity. Nor, indeed, was it at that
eyear period divided into pieces of a certain size. It
was commonly weighed out in balances, though its
weight was sometimes ascertained by means of an instru-
ment of weighing answering to our steelyards. See Scale.
By means of the balance the Hebrews ap-
pear to have been able to weigh with considerable del-
icacy, and for this purpose they had weights of extreme
precision, which are called metaphorically "the small
dust of the balance." (Isa. xi, 15). The "little grain"
(מַעֲט te'et), of the balance in Wis. xi, 22 is the small
weight which causes the scale to turn. In this pas-
sage, as in 2 Macc. ix, 8, the Greek word πλαστέγε κοι
dered "balance," was origi-

A"nalyzed to the scale-pan
alone. See Balance. The
balance in this form was
known at a very early period.
It is found on the Egyptian
monuments as early as the
time of Joseph, and we find
allusions to its use in the sto-
ry of the purchase of the cave
of Machpelah (Gen. xxiii, 16)
by Abraham. Before coin-
age was introduced, it was of necessity employed in all
transactions in which the valuable metals were the me-
diums of exchange (xlii, 21; Exod. xxii, 17; 1 Kings
xx, 39; Esth. iii, 9; Isa. xlvi, 6; Jer. xxxii, 10, etc.).
See Money.

The shekel, the half-shekel, the talent, are not only
 denominations of moneys, of certain values, in gold and
silver, but also of certain weights. The earliest weight
to which reference is made is the רֵעָנָא, kesîdah (Gen.
xxiii, 19; Josh. xiv, 32; Job xiii, 11), which in the
margin of our version is in two passages rendered
"lambs," while in the text it is "piece of money." It
may have derived its name from being in the shape of
a lamb. See Sheep. A number of small statuettes, of a
crouching lion in bronze, forming a series of various
dimensions, from one inch to twelve in length, found at
Nimrud, and now in the British Museum, appear to
have been Assyrian weights. On the tombs at Thebes

Ancient Egyptian Scales.

Asyrian Weights. (From specimens in British Museum.)

are representations of weights having the form of stags,
sheep, gazelles, etc. There are also among the Egyp-
tian antiquities some Coptic weights of great antiquity,
but not antecedent to the Christian era. They are cir-
cular, and have grooves or channels cut in them. See Mince.

The Weight of the Sanctuary, or Weight of the Temple
(Exod. xxx, 13, 24; Lev. v, 15; Numb. iii, 50; vii, 19;
xxiii, 16, etc.) was probably the standard weight.
preserved in some apartment of the Temple, and not a
different weight from the common shekel (1 Chron.
xxiii, 29); for though Moses appoints that all things
duly valued by their price in silver should be rated by
the weight of the sanctuary (Lev. xxvii, 25), he makes no
difference between the shekel of twenty oboli, or twenty
gerahs, and the common shekel. Ezekiel (xiv, 12),
speaking of the ordinary weights and measures used in
traffic among the Jews, says that the shekel weighed
twenty oboli, or gerahs; it was therefore equal to the
weight of the sanctuary. Neither Josephus nor Philo
nor Jerome, nor any ancient author, speaks of a distinc-
tion between the weights of the Temple and those in
common use. Besides, the custom of preserving the
standards of weights and measures in temples is not
peculiar to the Hebrews. The Egyptians, as Clemens
Alexandrinus informs us, had an officer in the college
of priests whose business it was to examine all sorts of
measures and to take care of the originals; the Romans
had the same custom (Fannius, De Amphora); and the
emperor Justinian decreed that standards of weights
and measures should be kept in Christian churches.
The Jews do not seem to have had any officers whose
especial duty it was to superintend weighing transac-
tions like the kabbâneh, or public weighers of Egypt,
the Greek ζυγόσταρα ἢ (Artemid. ii, 37), or Latin libri-
pendes (Pliny, xxxii, 3); but care was always taken
that the money used should be of full weight (Gen.
xiii, 21). For the estimation of Hebrew weights, see
METROLOGY.

Ancient Egyptian Kabbâneh, or Public Weigher and Notary.

1. The weight: a. The notary making an official record; b. The bag of money to be weighed; c. The frame or box containing the scale; d. A scale containing a number of coins; e. An apparatus for weighing, the arm of the balance; f. An eye, the emblem of Thoth, the god of justice, presiding over the operation; g. The other scale containing the weight.

The expression in Dan. v, 27, "thou art weighed in
the balances, and art found wanting," has been supposed
to be illustrated by the custom of weighing the Great
Mogul on his birthday in the presence of his chief gran-
dees. The ceremony is described in a passage from
Sir Thomas Roe's Voyage in India, quoted in Taylor's Cal-
mot, Frag. 186: "The scales in which he was thus
weighed were plated with gold, and so the beam on
which they hung by great chains, made likewise of that
most precious metal. The king, sitting in one of them,
was weighed first against the beam, which immedi-
ately after was distributed among the poor; then was he
weighed against gold; after that against jewels (as they
say); but I observed (being there present with my lord
ambassador) that he was weighed against three several
things, laid in silken bags, on the contrary scale. . . . By
his weight (of which his physicians yearly keep an ex-
act account) they presume to guess of the present state
of his body; of which they speak flatteringly, however
they think it to be." It appears, however, from a con-
sideration of the other metaphorical expressions in the
same passage of Daniel that the weighing in balances is
simply a figure, and may or may not have reference
to such a custom as that above, for the condition of the
departed was determined according to the preponder-
ance of good or evil. Such judgment scenes are very fre-
cently represented in the paintings and papyri of ancient
Egypt, and one of them (given on the following page) we
have copied as a suitable illustration of the present sub-
ject. One of these scenes, as represented on the walls of
a small temple at Deir-el-Medineh, has been so well ex-
plained by Mr. Wilkinson that we shall avail ourselves
of his description; for although that to which it refers is
somewhat different from the one which we have engraved,
his account affords an adequate elucidation of all that
ours contains: "Osiris, seated on his throne, awaits the
arrival of those souls that are ushered into Amenti. The
four genii stand before him on a lotus-blossom [ours has
the lotus without the genii], the female Cerberus sits
behind them, and Harpocrates on the crook of Osiris.
Thoth, the god of letters, arrives in the presence of Os-
iris, bearing in his hand a tablet, on which the actions of
the deceased are noted down, while Horus and Arceiris
are employed in weighing the good deeds of the judged against the
ostrieh feather, the sym-
bol of truth and justice. A cynocephalus, the em-
blem of truth, is seated
on the top of the balance. At length arrive the de-
ceased, who appears be-
tween two figures of the
godess, and bears in his
hand the symbol of truth,
indicating his meritorious
actions, and his fitness for
admission to the presence of Osiris" (Kitto, Pict. Bi-
ble, note ad loc.).

A weight of glory, of
which Paul speaks (2 Cor.
iv, 17), is opposed to the
lightness of the evils of this
life. The troubles we
endure are really of no
more weight than a feath-
er, or of no weight at all,
if compared to the weight
or intenseness of that glory which shall be hereafter a
compensation for them. In addition to this, it is prob-
able the apostle had in view the double meaning of the
Hebrew word וַתְּקִזֵּב, kâ tô bôd, which signifies not only
weight, but glory; that is, splendor is in this world the
lightest thing in nature; but in the other world it may
be real, at once sub stance and happiness.

Weinmanny, Johann Heinrich, a Lutheran
tologist of Germany, was born at Ulm, Aug. 4, 1687.
He studied at Jena, was appointed deacon in 1662 at
Leipheim, and pastor at Altheim in 1681. In 1687 he
was called to Ulm, where he died, May 29, 1706. He
left a great many writings, mostly of an ascetical na-
ture, which are given in Fipping, Memoriae Theologorum;
Serpilus, Epistulæ Theologorum; Jöcher, Allgemeines
Gelärthten-Lez. & v. (B. P.)

Weikel, John H., a German Reformed minister,
was pastor of Boehm's and some other churches in Montgomery County, Pa., from 1776 to 1781, but his loyalty to the American cause during the Revolution finally led to his resignation on account of dissatisfaction among his parishioners. Nothing seems to be known of him after the war. See Hartbaugh, Fathers of the Germ. Ref. Church, ii, 400.

Weiller, Kajetan von, a Roman Catholic theologian of Germany, was born at Munich, Aug. 2, 1762. He studied theology and philosophy in his native place. In 1785 he received holy orders, and in 1799 he was placed in the chair of philosophy and pedagogies. The University of Landshut conferred on him the degree of doctor of philosophy in 1802, while learned societies admitted him to membership. In 1812 he was enmo-
some friends in New York, and was requested to do the kind of work which he had performed so successfully in Maryland among the feeble churches of the Baptist denomination along the line of the Hudson River. In October of this year he was ordained as pastor of The Church in Catskill, and remained there a little less than two years, when he was called to take charge of what is now the Emanuel Church in Albany, N. Y. He entered upon his duties here in September, 1827. It was a dark day in the history of the Church when Dr. Welch conceived the idea of founding this church. "We are the Church," says Dr. Bridgman, "were feeble and staggering with their debt. The old theatre in Green Street had been turned into their sanctuary, but the house was thought to be too large, and a partition had been built to save fuel, and to make neighbors of the worshippers. At once a change took place, and as a preacher Dr. Welch soon stood in the foremost rank among the most gifted and eloquent ministers in the city of Albany. A few years of such work as he put into his ministry told wonderfully upon the prosperity of the enterprise. The feeble band grew to be a Church of three hundred and twenty-seven members, "united, in faith, and binding their consciences, free from all embarrassment, and in a condition of great material and spiritual prosperity." The question of colonizing began to be discussed, and after the usual delays which arose from the reluctance of Church members to break away from their religious homes, it was decided that the time had come to engage in pioneer work. An appeal was made to the friends of religion, and those who had been warmly attached to Dr. Welch, although not belonging to the Baptist denomination, for the necessary funds to carry out the projected plan. Among the contributors to these funds we notice the names of William L. Marcy, Martin Van Buren, Erastus Corning, and P. S. Van Rensselaer. The corner-stone of the new church was laid in July, 1835, and the building was ready for occupancy in the month of October following. A colony of about one hundred and twenty, with Dr. Welch as the pastor of the new church, took possession of what was then regarded as one of the most elegant houses of worship in Albany. The record of the results of a ministry of fourteen years in the Pearl Street Church is summed up in very general terms by saying that during these fourteen years five hundred and seven persons were received by baptism, and two hundred and sixty-two by letters from other churches. During all this time Dr. Welch took a prominent position in all the great religious enterprises in which the Baptist churches were interested, especially in the American and Foreign Bible Society, of which, for many years, he was the president. One of the most interesting of these was the Pearl Street Church, Dr. Welch taking charge of the Presbyterian Church in Brooklyn, where he remained eight years, and then removed to Newtonville, near Albany, and was pastor for ten years. Worn down by the labors of his long ministry, Dr. Welch went into retirement. His powers gradually grew weaker and weaker, until the lamp of life went out, to be rekindled amid the glories of a better world. He died Dec. 9, 1870. See Minutes of the Hudson River Baptist Assoc. for 1871; Dr. Bridgman's Sermon. (J. C. S.)

WELCH, Moses Cook, D.D., a Congregational minister, son of Daniel W. Welch, was born in Marenfield, Conn., Feb. 22, 1754. Although he graduated from Yale College in 1772, he remained for several years undecided as to his profession. For a while he was teacher of a grammar-school in Windham, Conn., and then entered the office of an Hon. Elizabeth Dyer to study law. He found his legal profession not suited to him, and abandoned it about 1764. Then he taught school and studied medicine a short time. As the Revolution was fairly begun, he engaged with Mr. Samuel Nott in the manufacture of saltpetre, to be used in making powder to supply the Continental Army. Having been drafted, he cheerfully entered the army, but, contracting a disease in camp, was obliged to return home. About this time he was converted. Turning his attention to the ministry, he studied theology under Rev. Dr. Salter, of Mansfield, and Rev. Stephen White, of Windham. When his father died, in 1782, he was called to succeed him as pastor of the Church of North Mansfield, to which office he was ordained June 2, 1784. In 1812 he was detailed as chaplain in the American army, a service which he promptly performed. For two years, from 1822, he belonged to the Corporation of Yale College. He died at North Mansfield, April 21, 1824. In consequence, probably, of his legal training, he was a great ecclesiastical lawyer. With a vigorous mind, an ardent temperament, and clear perceptions, he became a popular preacher. See Sprague, Annals of the Amer. Pulpit, ii, 234.

WELCHMAN, Edward D., an eminent English divine, was born about 1665. He became a commom of Magdalen Hall, Oxford, in 1679; graduated in 1688; was admitted probationer fellow of Merton College in 1684; became rector of Lapworth and of Solihull, Warwickshire; archdeacon of Cardigan in 1727; and died in 1739. He was the author of, Defence of the Church of England (1692); Husbandman's Manual (1695); Aris-tocrats. XCVII.; and Apologetics on the Admiration of the Superstitious (1713); translated into English (1740); his most famous work: Doctrine of Baptism (1706); Dr. Clarke's Scripture Doctrine of the Trinity Examined, etc. (1714); Conference with an Arius (1721); and other works. See Chalmers, Biog. Dict. s. v.

Weld, Luodovicius, a Congregational minister, was born at Brantree, Mass., Sept. 13, 1766, being a son of the Rev. Ezra Weld. He graduated at Harvard College in 1789; taught school in Cambridge; studied theology with his father; and was ordained at Hampton, Conn., in 1799, where he remained until infirmities induced him to seek a dismissal (1824). He removed to Fabius, N. Y., where he ministered to the church for several years. In 1842 he purchased a residence near his son Theodore, in Belleville, N. J., where he died, Oct. 9, 1844. Mr. Weld's character from early life was manly and upright; his mental abilities were superior, so that he was considered one of the ablest men of his day in that region. Three of his sermons were published. See Cong. Quar. 1860, p. 181.

Welt (prop. *"bër*, bôr, ópian, a day's source of living, though not running, water; but "well" is an occasional rendering in the A. V. likewise of *"bôr*, bôr, 2 Sam. iii, 26; xxiii, 15, 16; 1 Chron. xi, 17, 18; 2 Chron. xxxvi, 10, a "pit," i. e. cistern; also of *"yôd*, maydn, Josh. xxvi, 15; 2 Kings iii, 19, 25; Ps. lxxx, 6, a "fountain;" of *"nâkôb*, makôr, Prov. x, 11, a "fountain;" and even of *"ayin*, dyin, Gen. xxiv, 16, 29, 30, 42, 43, 45, xliv, 22, a living spring; and so of *"yôvâh*, John iv, 6, 14). The difference between a well (bôr) and a cistern (bôr) consists chiefly in the use of the former word to denote a receptacle for water springing up freely from the ground, while the latter usually denotes a reservoir for rain-water (Gen. xxxvi, 19, 32; Prov. v, 15; John iv, 14). See Cistern. Both these Heb. words come from a root (*"yôd* or *"nâkôb*) significant of digging, and are thus distinguished from a natural fountain. The former (bôr) is still represented by the Arabic bähr, used in the same sense; but the latter (bôr) has in modern times given place to birkit (= Heb. *"bûkî*), which signifies an open pool of surface water. See Topographical Terms.

The first well mentioned in Scripture is in "the wilderness," in the way to Shur, where Hagar sat down when fleeing from Sarai, which was afterwards called Beer-lahoi-roi, "the well of that he liveth and seeth me" (Gen. xvi, 14), between Kadesh and Bered. It is called both a "fountain" and a "well." The second well mentioned is also in connection with Hagar's his-
tory (xxi, 19) in the wilder-
ness of Beersheba. After this a
good many wells are men-
tioned: the wells of Beere-
sha, which remain to this day
(xxvi, 25); the Mesopotami-
an well (xxxiv, 11), at the city
of Nahor; the wells in Gerar
(xxvi, 15, 18); the well Esek
(ver. 20); the well Sitnah
(ver. 21); the well Rehoboh
(ver. 22); the well in Haran
(xxix, 2); the wells of Elim
(Exod. xv, 27); the well dug
by the princes (Num. xxxi, 61);
the well of Nephos (Josh. xviii, 15); the great
well at Sechu (1 Sam. xix,
22); the well of Bethlehem
by the gate (2 Sam. xxiii,
10); the well of Harod (Judg.
vii, 1); Jacob's well, on the
low slope of Gerizim (John
iv, 6). See FOUNTAIN.
The importance of wells is
very great, especially in the
desert, where the means of
forming them are deficient, as
well as the supply of labor
necessary for such undertakings, which, after all, are not
always rewarded by the discovery of a supply of water.
Hence in such situations, and indeed in the settled coun-
tries also, the wells are of the utmost value, and the water
in most cases is very frugally used (Num. xx, 17-19;
Deut. ii, 6, 28; Job xxii, 7). It is, however, not merely
the value of the well itself, but certain other consider-
tations that explain the contests about wells which we
find in the histories of Abraham and Isaac (Gen. xxii,
25-31; xxvi, 27). The special necessity of a supply of
water (Judg. i, 15) in a hot climate has always involved
among Eastern nations questions of property of the
highest importance, and sometimes given rise to serious
contention. To give a name to a well denoted a right
of property, and to stop or destroy one once dug was a
military expedient, a mark of conquest, or an encroach-
ment on the right claimed or existing in its
neighborhood. Thus, the well Beersheba was opened,
and its possession attested with special formality by
Abraham (Gen. xxii, 30, 31). In the hope of expelling
Isaac from their neighborhood, the Philistines stopped
up the wells which had been dug in Abraham's time and
encroached on. Notwithstanding the measure which was
stoutly resisted by the followers of Isaac (xxvi, 15-38;
see also 2 Kings iii, 19; 2 Chron. xxvi, 10; comp.
Burckhardt, Notes on the Bed. ii, 185, 194, 204, 276). The
Koran notices abandoned wells as signs of desertion (sur.
xxviii). To acquire wells which they had not themselves
dug was one of the marks of favor foretold to the Heb-
rews on their entrance into Canaan (Deut. vi, 11). To
possess one is noticed as a mark of independence (Prov.
v, 15), and to abstain from the use of wells belonging to
others, a disclaimer of interference with their property
(Num. xx, 17, 19; xxii, 29). Similar rights of posses-
sion, actual and hereditary, exist among the Arabs of the
day. Wells, Burckhardt says, in the in-
terior of the desert, are exclusive property, either of
a whole tribe, or of individuals whose ancestors dug
the wells. If a well be the property of a tribe, the tents
are pitched by it, and whenever rain-water becomes scarce
in the desert; and no other Arabs are then permitted
to water their camels. But if the well belongs to an
individual, he receives presents from all strange
tribes who pass or encamp at the well, and refresh
their camels with the water of it. The property of
such a well is never alienated; and the Arabs say
that the possessor is sure to be fortunate, as all who
drink of the water bestow on him their benedictions

Well at Beersheba.
(Notes on the Bed. i, 228, 229; comp. Num. xxxi, 17, 18,
and Judg. i, 15).

It is thus easy to understand how wells have become
in many cases links in the history and landmarks in the
topography both of Palestine and of the Arabian
Peninsula. The well once dug in the rocky soil of Pal-
estine might be filled with earth or stones, but was with
difficulty destroyed, and thus the wells of Beersheba, and
the well near Nahilis, called Jacob's Well, are among the
most conspicuous witnesses of those transactions of
secret history in which they have borne, so to speak,
a prominent part. On the other hand, the wells dug in
the sandy soil of the Arabian valleys, easily destroyed,
and easily renewed, often marked, by their ready supply,
the stations at which the Hebrew pilgrims slaked their
thirst, or, as at Marah, were disappointed by the bitter-
ness of the water. In like manner the stations of the
Mohammedan pilgrims from Cairo and Damascus to
Mecca (the Haj route) are marked by the wells (Robin-
sen, i, 66, 69, 204, 205; ii, 288; Burckhardt, Syria.
p. 318, 472, 474; App. iii, 656, 660; Shaw, Trav. p. 314;
Niebuhr, Descr. de l'Afrique, p. 347, 494; Wellsted,
Trav. ii, 40, 43, 64, 457, App.).

Wells in Palestine are usually excavated from the
solid limestone rock, sometimes with steps to descend
into them (Gen. xxiv, 16; see Burckhardt, Syria, p. 232;
Col. Ch. Chron. 1858, p. 470). The brims are furnished
with a curb or low wall of stone, bearing marks of high
antiquity in the furrows worn by the ropes used in
drawing water (Robinson, i, 204). This curb, as well as
the stone cover, which is also very usual, agrees with
the directions of the law, as explained by Philo and Jose-
phus, viz. as a protection against accident (Exod. xxix,
38; comp. Josephus, Ant. iv, 8, 37; Philo, De Spec. Leg.
iii, 37; ii, 324, ed. Mangney; see Maundrell, in Enquiries
Trav. p. 455). It was on a curb of this sort that our
Lord sat when he conversed with the woman of Sam-
aria (John iv, 6); and it was this, the usual stone cover,
which the woman placed on the mouth of the well at
Bahurim (2 Sam. xvii, 19), where the A. V. weakens the
sense by omitting the article (πηγή; Sept. τὸ πηγάζων
λαμβάνω; Vulg. velam). Sometimes the wells are cov-
ered with cupolas raised on pillars (Burckhardt, App.
v, p. 665).

A well was often covered with a great stone, which
being removed, the person descended some steps to the
surface of the water, and on his return poured into a
trough that which he had brought up (Gen. xxiv, 11–15; xxxix, 3–10; Exod. ii, 16; Judg. v, 11). There is, in fact, no intention of any other way of drawing water from wells in Scripture. But as this could only be applicable in cases where the well was not deep, we must assume that they had the use of those contrivances which are still employed in the East, and some of which are known from the Egyptian monuments to have been very ancient. This conclusion is the more probable as the wells in Palestine are mostly deep (Prov. xx, 5; John iv, 11). Jacob's Well near Shechem is said to be 120 feet deep, with only fifteen feet of water in it (Maundrell, Journey, March 24); and the labor of drawing from so deep a well probably originated the first reluctance of the woman of Samaria to draw water for Jesus: "Sir, thou hast nothing to draw with, and the well is deep." See Jacob's Well.

From this deeper kind of well the usual methods for raising water are the following: 1. The rope and bucket, or water-skin (Gen. xxiv, 14–20; John iv, 11). When the well is deep, the rope is either drawn over the curb by the man or woman, who pulls it out to the distance of its full length, or by an ass or ox employed in the same way for the same purpose. Sometimes a pulley or wheel is fixed over the well to assist the work (Robinson, i, 304; ii, 248; Niebuhr, Descr. de l'Ardée, p. 137, pl. 15; Col. Ch. Chron. 1859, p. 350; Chardin, Voy. iv, 98; Wellsted, Trav., i, 280). The sabieh, or Persian wheel, consists of a vertical wheel furnished with a set of buckets or earthen jars attached to a cord passing over the wheel, which descends empty and returns full as the wheel revolves. On the axis of the wheel revolves a second wheel parallel to it, with cogs which turn a third wheel set horizontally at a sufficient height from the ground to allow the animal used in turning it to pass under. One or two cows or bulls are yoked to a pole which passes through the axis of the wheel, and as they travel round it turn the whole machine (Numb. xxiv, 7; see Lane, Mod. Egypt. ii, 168; Niebuhr, Voy. i, 120; Col. Ch. Chron. 1859, p. 452; Shaw, p. 291, 408). 3. A third method of the ancient method, by which a man, sitting opposite to a wheel furnished with buckets, turns it by drawing with his hands one set of spokes prolonged beyond its circumference, and pushing another set from him with his feet (Niebuhr, Voy. i, 120, pl. 15; Robinson, ii, 22; iii, 80). 4. A method very common, both in ancient and modern Egypt, is the shaduf; a simple contrivance consisting of a lever moving on a pivot, which is loaded at one end with a lump of clay or some other weight, and has at the other a bowl or bucket. This is let down into the water, and, when raised, emptied into a receptacle above (Niebuhr, Voy. i, 120; Lane, Mod. Egypt. ii, 168; Wilkinson, Anc. Egypt. i, 85, 72; ii, 4). See Irrigation.

Wells are usually furnished with troughs of wood or stone (Δίνων; Sept. σωστοφυών; Vulg. canale), into which the water is emptied for the use of persons or animals coming to the wells. In modern times, old stone sarcophagi are often used for this purpose. The bucket is very commonly of skin (Burckhardt, Syria, p. 68; Robinson, i, 204; ii, 21, 315; iii, 35, 89, 109, 134; Lord Lindsay, Trav. p. 255, 257; Wilkinson, Anc. Egypt. loc. cit., xvii, 39, 189; xxiv, 50; Exod. ii, 16).

Unless machinery is used, water is commonly worked by men, women are usually the water-carriers. They carry home their water-jars on their heads (Lindsay, p. 230). See DRAWER OF WATER.

Great contentions often occur at the wells, and they are often, among Bedawi, favorable scenes for the attack by enemies (Exod. ii, 16, 17; Judg, v, 11; 2 Sam. xxiii, 15, 16). See Burckhardt, Syria, p. 68; Notes on the Bed, i, 228; Col. Ch. Chron. 1859, p. 478; Lane, Mod. Egypt. i, 252; Robinson, iii, 153; Hackett, Illustr. of Scripture p. 88–98.

WATERS.

Wellesley, CHARLES, D.D., an English Unitarian minister, was born at York about 1770. He became a clergyman at his native place; was noted for his philological and archæological attainments; and died at York in 1858. He was the author of Eboracum; or, York under the Romans (1845) — The Holy Scriptures of the Old Covenant (1850–53), in a revised translation, in two volumes; also A Letter addressed by me to the Rev. George Vance Smith and Rev. John Scott Porter; and other works. A Memoir, by Rev. John Kenrick, appeared in 1860.

Weller, GEORGE, D.D., a Protestant Episcopal clergyman, was born at Johnstown, N. Y., Aug. 11, 1790. He was educated in the public schools of Boston; learned the trade of a bookseller; opened a small bookstore in Newark, N. J.; and afterwards removed to New York City. About the year 1813 he entered the family of the Rev. Bethel Judd, D.D., of Norwich, to study theology. He began to officiate as lay reader at Bedford, N. Y., in June, 1814; was admitted to deacon's orders by bishop Holabird, June 16, 1816; missionary in the counties of Putnam and Westchester in 1816–17; ordained priest April 2, 1817; instituted rector of Great Coptank parish at Cambridge, Md., Nov. 15, 1817; rector of St. Stephen's Church, Cecil County, Md., in November, 1822; became editor of The Church Register Jan. 7, 1825, in which office he continued three years; was secretary and agent of the Domestic and Foreign Missionary Society in 1828; removed to Nashville, Tenn., about 1829, where he built a new church, the first Episcopal Church in Tennessee: retired for a time on account of feeble health about 1855; became rector of St. Mary's of Galvase, in 1856; rector of Christ Church, Vicksburg, Miss., in 1859. This was his last field of labor. During the prevalence of the yellow fever in Vicksburg, he was overburdened with the claims of the sick and friends of the dead, and fell a victim of the epidemic, Nov. 9, 1841. He was the author of Visitations of the Church (1824) — and editor of the Poems of Bishop Heber (about 1829) — and the Weller Tracts. See Sprague, Annals of the Amer. Pulpit, v, 561.

Welles, NOAH, D.D., a Congregationalist minister, was born at Colchester, Conn., Jan. 25, 1718. He graduated at Yale College in 1741; engaged in teaching school at Hartford for some time; and became tutor of Yale College in 1745. He was licensed to preach soon after, and ordained pastor of the Church at Stamford, Conn., Dec. 31, 1746, where he remained in the quiet and faithful discharge of his duties until his death, Dec. 31, 1776. He was chosen fellow of Yale College in 1774, and as such deed to attend, he conducted the church of that institution, Sept. 13, 1770, before one hundred and twenty ministers. He took an active part in the dispute concerning the validity of non-episcopal ordination in 1783, publishing three pamphlets on the subject. He also published other single Sermons and Addresses. See Sprague, Annals of the Amer. Pulpit, i, 481.
Wells, Edward, D.D., a learned English divine, was born about 1665. He was admitted to Westminster School in 1680, and in 1686 to Christ Church College, Oxford, where he proceeded A.M. in 1693, and as D.D. in 1697. He was Fellow of Merton College, and rector of Bledington, in Oxfordshire, and of Chiddingstone, in Kent. He was a canon of the Church of England; and became rector of Bletchingley, in Sussex, and of Cottesbach, in Leicestershire, in 1717, where he died, in August, 1727.

He was the author of A Treatise of Ancient and Present Geography (1701) — Historical Geography of the New Testament (1704) — The Old Testament (1711-12) — A Help to the More Easy and Clear Understanding of the Holy Scriptures (1709-18, 8 vols. 4to), being a revised translation of the Bible, with a paraphrase and annotations: The Book of Daniel Explained, etc. (1716) — and other works, especially on mathematics. See Chalmers, Biog. Dict. of Brit. and Amer. Authors, s.v.; Allibone, Dict. of Brit. and Amer. Authors, s.v.

Welsh, David, D.D., an eminent Scotch clergyman, was born at Breafuf, Dumfriesshire, in 1798. He was educated at the University of Edinburgh; was pastor of the parish of Crossmichael, Prebendary of Kirkudbright, for several years, beginning in 1821; became minister of St. David's in Glasgow, in 1826; was appointed professor of theology in the University of Edinburgh in 1831; travelled on the Continent in 1834, studying the German language and literature; was appointed inspector of schools in Scotland; was moderator of the General Assembly in 1842; left the Established Church in 1845; became professor of church history in the Edinburgh College, and was editor of the North British Review. He died April 24, 1845. He was the author of An Account of the Life and Writings of Thomas Brown, M.D., etc. (1825) — Sermons on Practical Subjects (1834) — Elements of Church History (1844, vol. i.) — and Sermons, with a Memoir by A. Dunlop, Advocate (1846).

Wesel, Johann von, whose name really was Johannes Adolphus von Wesel, was one of the most prominent forerunners of the Reformation in Germany. He was born early in the 16th century. The first authentic record we have of his life brings him into view as a master in philosophy at Erfurt, about 1445. Soon afterwards he was professor and doctor of theology. In philosophy he was a nominalist, and sufficiently able to project his influence over many years, so that Luther is yet constrained to acknowledge his power (see De Conciliis, in Opp. ed. Walch, xvi, 2748). The age in which he lived was truly under the rule of traditional authority to be strongly impressed by his Biblical knowledge, as may be gathered from a scholarly essay from his pen aimed against indulgences excited so little attention that he was chosen, subsequent to its appearance, to be vice-rector of the university, and preacher at Mayence, about 1460: it does not seem certain that he accepted the latter position. A statement is extant to the effect that Wesel was driven from Mayence in 1461 or 1462 by pestilence, and afterwards became preacher at Worms, giving the next seventeen years to the preaching of the Gospel. His utterances were exceedingly frank and bold, and were supported by the labors of his pen until the rules of the Church came to regard him as a mischievous personage, upon whom they might justly bring vexatious tribulations, and whom, eventually, they must silence. An article directed against the hierarchy as the central abuse in the administration of the Church finally induced the archbishop of Mayence, Diether of Isenburg, to take the precaution of expelling the bold agitator to end his work. It is not known why the archbishop, whose jurisdiction did not extend over Wesel, took action rather than the bishop of Worms, Reinhard of Sickingen, who was Wesel's immediate superior; but Argentor, who reported the trial of Wesel, assumed the phoenix of imprisonment of Wesel had for its inspiration the hatred with which the Thomanists who stood opposed to him in philosophy bore against him. Wesel was summoned before a tribunal composed of theologians from the universities of Cologne and Heidelberg, who were, with a single exception, realists. The Dominicans and Franciscans, M. de Nocello, De Rabs, and a third unknown person were inquisitors at the trial. The preliminary proceedings began on the Friday after Candlemas, probably February 4, 1479, at Mayence. Elten, a fanatic, presided. The accused was required to explain certain suspicious facts in his personal history, such as his connection with the Bohemians, and especially with a certain Nicholas of Bohemia. He was examined with regard to any possible adherents he might have gained, and respecting a communion service he had held. Bayle (Dictionary, s. v. "Wesel") and Erhardt (Gesch. des Wiederaufbldens, etc., i, 291) state that he was also questioned with regard to his relations with the Jews; but as Argentor does not mention this point, a confounding of Wesel with Wessel would seem to have been made by those authorities. A second part of his trial was concerned with doctrinal errors alleged against Wesel, e.g. that he denied the procession of the Holy Spirit from the Son, which he held, but defended his view by an appeal to the Scriptures; that he rejected the authority of tradition, with respect to which he was obliged to acknowledge his opinion that the holy fathers and doctors were not infallible; identified the institution of the Sacraments of the Church with the infallible Spirit by which it was originally revealed, and that the immediate direction of the Holy Spirit could not be certainly assumed of every council which might be convened by the proper authority. Other errors charged against him had reference to indulgences, the sacraments, sin in general, and original sin in particular. Under the influence of the Church, he stated his belief in one holy Church; but was charged with omitting the attribute of universality. He conceded the rule of the Holy Ghost over the Church, and also her freedom from error. He also conceded the necessity of grace. But the paper went on to specify a number of promulgations and equivocations. It is evident that he did not hold the views respecting the authority of the Church which were current in his time. He denied any distinction between bishop and presbyter, and endeavored to overturn the right of civil jurisdiction and legislation as claimed by the Church, did not accept the doctrine of monasticism, and fasting as of binding obligation, and was able to reply in a satisfactory manner to the charges against him upon these points, only because they were conceived and expressed in a form in which he had actually never held the views to which they referred. It appears that his views were far more in the nature of persecutors as far as he could without doing too great violence to his conscience, and that he sought to take advantage of every ambiguity in the charges against him, or which he could weave into his own explanations. He even went so far as to repeatedly ask for mercy. He needed all the encouragement he could get. He was old and broken down, threatened with death by fire, and obliged to undergo usage which he declared would have turned Christ himself into a heretic. He finally consented to retract, with the proviso that the retraction should be charged upon the conscience of his judges. The formula adopted was of a general nature, and set forth that erroneous matter might be found in his writings, which he now recalled; that he submitted to the authority of the Church and the teachings of her doctors; that he was ready to perform whatever penance might be imposed; and that he would not be asked to retract anything before the assembled tribunal, and was followed by a similar act in the cathedral. His writings were burned, and he was himself condemned to life-long imprisonment in the Augustinian convent, where he died in 1481.

Wesel stated the doctrine of the sufficiency of Scripture, the formal principle of Protestantism, with greater
clearness than was possible to the Reformers in the beginning of their work. He joined its perspicuity with its sufficiency as a necessary consequence. He also laid down the foundations of the doctrine of the witness of the Spirit, though he did not develop it. With reference to the ... of the Reformation Wesel was less clear. He assailed indulgences, as not authorized by Scripture, and denied that God could confer jurisdiction in divine things upon the Church. His argument, however, was altogether that of a clear-headed, well-meaning theologian, who saw in the doctrine of indulgences a scientific error involving practical consequences, but it was not at all the return of a conscience whose most sacred convictions are outraged. Indulgences were in his view an ecclesiastical abuse, but not a peril which threatened the soul. His idea of sin is that it is a debt and a deficiency. He does not appreciate its power over the inner man. Grace is exalted by him, but rather as demonstrating the causality of God than as benefiting the soul of man; and he accordingly gives a foremost place to the doctrine of election. He regarded the Church as being above all a communion, and held that the true Church is the holy Church of the Elect. He had helpedchurches arbitrarily or capitulistically that the apostles had received power from Christ to enact canons and laws, and refused to recognize the pope as the vicar of Christ in any sense which would involve the concession of legislative functions. He was even disposed to question the authority of secular rulers. He thought the Church High and the Community Low. He had become a friend of a Scotch lad, James Murray, afterwards the celebrated lord Mansfield. Young Charles made such progress in his studies that in 1721 he was admitted one of the king's scholars, his expenses being thus henceforth borne by the Foundation. The biographers that the High Church was the most useful place where he could have the services of the great hymnist, or the State those of the administrator of India and the hero of Waterloo, if the student at Westminster had accepted an heirship to the estates of Garrett Wesley, Esq., member of Parliament for the County of Meath, at this time (about 1726) possessed, but in the next year became a student at Christ Church College, Oxford, an institution which his brother John had left a little before. Here he and a few friends became so diligent in study, serious in manner, and observed with such strictness the method of study and practice laid down in the statutes of the university, that they won for themselves an epitaph first applied to a college of physicians in Rome in the time of Nero, and soon the little band was known by a word that has now in a large measure lost its opprobrious note—Methodist. At the age of twenty-one Charles took his A.B. degree, and became tutor in the college. He married Miss Lucy Wills, a relation of his landowner relative. In 1726 he was elected to Christ Church College, Oxford, an institution which his brother John had left a little before. In the College at Christ Church he joined by John Wesley, and through insult and ridicule pursued their devotional and self-denying labors. The brothers remained at the university until the death of their father, in April, 1755. Having been persuaded to accompany John on the mission to Georgia, primarily as secretary to the managing committee of the colony, and private secretary to general Oglethorpe, its founder, Charles, at the instance of Dr. Burton, was ordained deacon in Oxford by Dr. John Potter, bishop of that city, and on the following Sunday he was ordained priest in the metropolis by Dr. Gibson, bishop of London (autumn of 1730). The ship Symonds sailed from London on Feb. 5, 1736. It is needless to treat the reader with an account of the mishaps, privations, trials, and persecutions which befell our subject in this country. He can read it in Charles Wesley's Journal and Life. Suffice it to say that this diligent, conscientious, and earnest-hearted clergyman, despite the hardships of his calling, was a good soldier while stationed at Frederica. On the 11th of August, 1736, Charles Wesley, sick and disappointed, embarked for England. The vessel was compelled to put into Boston, where, under kind and hospitable treatment, he quite fully recovered, so as to be able to make his way, eventually, to Kingsbridge, in Devonshire. On Dec. 3, 1736, he arrived at Deal. By the desire of the University of Oxford, Charles Wesley was requested to present their address to the king, which he did at Hampton Court, Aug. 29, 1737. He was graciously received, and dined with the royal household.

In February, 1738, the brothers Wesley were intro-

duced to Peter Bohler, the Moravian. On the 20th, Charles began to instruct his friend in English, and Peter in return taught him the plan of salvation by faith. It was on Whitunday, May 21, 1738, his heart having been prepared by sickness, that this devout and laborious priest of the Church of England obtained the sense of pardon and adoption. It was just a week before his brother received the same blessing. Henceforth, what had been a labor of conscience and duty was to be one also of joy and love. He at once commenced addressing small audiences in the houses of friends, having sometimes as a devout hearer Robert Almworth, author of the Latin Dictionary. He was soon appointed curate of St. Mary's, Islington, London, which was the only preferment Charles Wesley ever had in the Church of England, although to the end of his long life one of his firmest adherents. His faithful ministry speedily procured his dismissal. "He was literally," says Dr. Ad-
II. A few special topics remain to be treated before we come to a survey of the career, influence, and genius of Charles Wesley.

1. His Family.—On April 8, 1749, Charles Wesley was married to Sarah Gwynne, a Welsh lady of piety, refinement, and fortune. Of this happy marriage were born four sons and four daughters. Three only survived their father—George, Charles, and Philip. Of these, Charles and Philip were musical prodigies. They gave concerts before the skate of London with great applause, and were shown marked favor by the royal family. The last days of their father’s life were embittered by the perversion of his third son, Samuel, to the Church of Rome in 1786. This cutting off of the oldest son by the breaking up of the family, was a sore trial and disappointment to Charles. He felt it as a wound in the rich and honeyed hallowed ground of his early life.

2. His Character.—Although abrupt and singular in his manners, and with the utmost simplicity and frankness of mind, he had a much warmth of affection and tenderness of sympathy; so that his friendship was felt to be of inestimable value. His views were ascetic. In him appeared “the true Reformer’s fire, the fearless zeal, the utter self-renunciation, the contempt for what other men prize, the unworly aspirations, the miracle-working faith” (Bird, ut infra, p. 146). “The most remarkable feature of the poet’s mind,” continues the same writer, “was its subjectiveness. His vision was perpetually introverted; he had no eyes for external objects, no interest in the things that other men care most for; he was all soul; spiritual ideas and facts were the world to him.”

3. His Preaching and Scholarship.—His discourses were effusions of the heart rather than the offspring of the intellect or of the imagination. Of the Bible he was a diligent and enraptured student, and he imbued his sermons with its doctrines and convictions of language. To turn men from sin to Christ was the object of his preaching, and in those less artificial, slower, and perhaps more ignorant days he did not hesitate to preach long—sometimes two hours—if he thought good could be accomplished thereby. With the Latin, Greek, Hebrew, and Syriac languages he was well versed, for he had studied Arabic. Horace and Virgil he loved, and often repeated from memory large portions of the Eneid. Jackson thinks that had he devoted himself to sacred literature, he would have taken high rank among the poets of Great Britain.

4. His Differences of Opinion with his Brother, and his Relation to Methodism.—Charles Wesley was an ardent Churchman (see his Postscript in John Wesley’s Reasons against a Separation from the Church of England). He loved the Church as his own life; yet he thought he was not for that reason less a Methodist. Against this, however, he says: “I believe the Methodists should leave the Church when he and his brother were dead, while John was as happy as an angel, flying through the three kingdoms, sounding the trumpet of the world’s jubilee and joyfully witnessing every successive year the steady advancement of the work of God” (Jackson, ut supr., p. 549). He still remained with the Methodists, and still stood off his matchless hymns. In 1771-72 he finally removed to London. In 1777 he frequently visited the unfortunate Dr. Dodd, condemned to die for forgery, and from his pen came A Prayer for Dr. Dodd under Condemnation. In 1789, in age and feebleness, he attended at Bristol the dedication of the new church, but he returned to London, till he quietly passed away, at No. 1 Chesterfield Street, London, March 29, 1788. His body rests in the old Marylebone church-yard.
odism a nursery for evangelical pastors and preachers in the Church of England, and an outlaw of the Established Church. Wesley was a man of practical genius, and he was less of a Churchman than his brother, and his hopes of a bishop were continually disappointed. 'The bishops might, if they pleased,' he wrote to Latrobe, the Moravian minister, in 1785, 'save the largest and soundest part of them back into the Church; perhaps they should have chosen the bishop of bishopric duties for me. But I fear, however, betwixt you and me, their lordships care for none of these things. Still, I should hope, if God raised up but one primitive bishop, and commanded the porter to open the door' (John H. Rigg, London Quar. Rev., [no date], No. L.X, Vol. I, p. 119. Yet the same Churchman approved of lay preaching, separate meetings, and almost everything else that belonged to the earliest Methodist. He himself was the first to administer the Lord's supper to the separate societies. In fact, as Jackson well says, 'there was a singular discrepancy between his theory of churchmanship and his conduct. For thirty years he made more noise on the subject of the continued union of the Methodists with the Church than any man of the age; and all this time he was beyond comparison the greatest practical separatist in the whole connection. John Wesley spent most of his time away from Britain and Ireland, often preaching twice every day, and two or three times on the Sabbath. Rarely, however, did he preach in Church hours except when he officiated for a brother clergyman. . . . He attended the Church where he happened to be, and pressed the people to accompany him thither. Many of the itinerant preachers pursued the same course. . . . This was the recognised plan of Methodist practice. . . . But this was not the state of things in London under the administration of Charles Wesley. He preached twice during Church hours every Sabbath, and indulged the society with a weekly sacrament at their own places of worship. He conducted divine worship, indeed, according to the order of the Church of England, except that he used extemporary prayer and sang his own beautiful hymns; but he and the society had otherwise no more connection with the Established Church than any Dissenting minister and congregation had. He was under no episcopal control, the chapels were licensed by no bishop. . . . The country societies wished in this respect to be on an equality with their metropolitan brethren, and they were never satisfied until this was conceded to them' (Life of Charles Wesley, Lond. ed., ii, 404, 405). 'Though Charles Wesley had no more connection with the jurisdiction of a bishop than I am, yet he was so attached to the name of a Churchman that I heard him say he should be afraid to meet his father's spirit in Paradise if he left the Church' (Bradburn, Are the Methodists Dissenters? [Bristol, 1792]).

Charles lacked the breadth of view, the practical cast of mind, the wisdom, of his brother; and in measures of Church administration his influence over the latter was slight. Perhaps the remark of Dr. Stevens is justified: 'Had the leadership of Methodism early devolved upon him by the death of his brother, as was at one time likely, he would have been more united to the jurisdiction of a bishop than I am, but he was so attached to the name of a Churchman that I heard him say he should be afraid to meet his father's spirit in Paradise if he left the Church' (Hist. of Methodism, ii, 275). It was as a hymnist his influence over Methodism was so great and so blessed.

5. His Hymns.—Charles Wesley's fame rests, and will forever rest, upon his hymns. Upon these is he secure for all time. Critics, however, have found certain faults in these hymns. These alleged defects we will first give. They call attention to 'the prosaic, literal, doctrinal character of many of the lines; their occasional harshness, and the preponderance of the verb' ('The Preacher,' Church of England Pulpit, Pref. Rev. April, 1867, p. 845). 'The paucity of his topics produces frequent repetition. He has little variety of manner, and less variety of matter. . . . Many of his pieces wear the excessive aspect of the sectarian; he casts his mite into the treasury of a party he holds to be the "church" of the universal Church' (Miller, Life of Watts). Certain extravagant expressions and violations of correct judgment and taste are pointed out: e.g., the remarkable hymn, 'Ah, lovely appearance in death,' the lines of which, the objector allows, 'are not one of his best' (Bird, Biblioth. Sac. Jan. 1664, p. 148). 'Dr. Whedon stoutly defends this hymn, taking issue with Dr. Floy and critics generally. He says it is rarely excelled for originality, solemnity, and pathos; compares it with Byron's celebrated passage in the Giaour, and awards it the palm of simplicity and powerful suggestiveness of word and music, the prescriptive moral and divine beauty connected with repose from the toils, sorrows, and sins of life, and the bush of the spirit to its eternal and ineffable repose' (Met. Quar. Rev. April, 1867, p. 307). Finally, George Macdonald—an undoubted authority—denies them "much literary merit" (England's Antithesis, 1869). See also adversely, J. D. Burne, in the Encyclop. Brit., 8th ed., xii, 180).

On the other side, we give the judgment of a Lutheran critic, Rev. Frederic M. Bird, a most thorough and ardent student of Wesleyan hymnology. 'We quote with great pleasure a very able, elaborate and interesting review of Wesley's hymns, by Mr. Bird in the Bibvtheca Sacra, Jan. and April, 1864: 'The more extensively and closely his writings are examined, the more will be found in them worthy to be admired and used' (p. 129). 'Dr. Watts has been commonly considered the most powerful of hymnists. The published Wesleyan hymns are five times as numerous as his. Of this immense mass the literary standard is far higher than that of the lesser bulk of the more celebrated writers. Set aside one hundred of Watts's and five hundred of Wesley's best hymns, there will be no comparison between the remainder in style and poetical merit. Dr. Watts was a poet, and Watts has never been surpassed in the use of rhythm, in the construction of the verse, in the development of musical inspiration; Charles Wesley was a poet by nature and habit, and almost always wrote as such. Of course his effusions are not equal among themselves; but he established and observed, through all his multiplicity of verses, a standard which no other hymn-writer, up to his time, was able to approach, and which none has since surpassed' (ibid.). 'No other sacred poet has attempted such a "variety of matter;" and his versatile muse handles all these multifarious topics with equalised, almost with unvarying, ease and grace. . . . There are no hymns in the world of such "spontaneous abstraction;" few are so "musical" as his; no simple and genuine and intense earnest, as the best-known and most largely used of Wesley's. It is the highest praise of the few noblest hymns of Watts and Cowper that they reach an elevation on which the Methodist poet generally sat, and express a mental state which was habitual with him' (p. 140). 'No hymn-writer is more intellectual; none puts more doctrine, thought, solid mental paraphernal into his poems. And certainly none is more awakening and edifying; few others, in fact, approach him in native moral earnestness, force, fire, and none possesses a higher, purer, and tender, consecrated spirituality' (p. 311). 'As a poetical critic Charles Wesley has never been equalled . . . The most powerful, combative, and controversial poems we have ever seen appear in Hymns on God's Everlasting Love, published in 1741, and greatly enlarged in 1756' (p. 588). Mr. Bird gives us some of these rousing polysyllables. 'The Funeral Hymns of Charles Wesley are, perhaps, the noblest specimens of his genius' (see further, p. 598 sq.).'Doddridge and Steele are diluted reproductions of Dr. Watts. Montgomery, a professor and life-long poet, is inferior to Wesley in the observation of all the five elements of the "sacred" style ('American Preacher', 1867, p. 345).
lidity, strength, and fire. Cowper is the greatest name in the hymn-books; but Cowper's best poems, which are very few, are but equal, not superior, to Wesley's best poetry. Toplady approaches most nearly the Methodist poet, but Toplady borrowed his inspiration from Wesley and reproduced his style; and it is the Calvinist’s highest praise that his finest pieces are undistinguishable from those of his Arminian neighbor. No other names in British sacred lyric poetry can be mentioned that come so near to those of Wesley and Cowper, when it is remembered that all these counted their poems by dozens or hundreds, while he by thousands; and that his thousands were in power, in elegance, in devotion, and literary value, above their few, we call him yet more confidently great among poets and prince of English hymn-writers (p. 318). This high praise comes from one who—not a Methodist—has by long and patient study earned for himself a place among the very few authorities in the hymnology of Wesley.

It is needless to mention single hymns of surpassing excellence. Several have been already referred to in the art. HYMN OLOGY. Suffice it here to call attention to three only:

(a.) The poem on “Wrestling Jacob” has enraputured all readers. Who has not felt the power of that masterpiece? With consummate art he carries on the action of a lyric into the conflict with the Mo-

terious Being, against whom he wrestles all night, being marked with precision by the varying language of the speaker, accompanied by intense increasing interest, till the rapturous moment of the discovery, when he prevails and exclaims, “I know thee, Saviour, who thou art!”

(b.) “Jesus, lover of my soul” is the essence of a thousand

sands hymns and prayers. Tributes innumerable might be laid down here. But what are these? The heart of the world is brought near to God.

(c.) “Stand the omnipotent decree,” “the finest lyric in the English language,” says Southey.

III. Literature.—We classify this for convenience sake, under separate heads.

1. Charles Wesley’s own poetical works (published during his life) may be enumerated, as follows, in tabular form (we include a few prose writings):

; Psalmody, Christian.

5. The great musicians Lampé, Giardini, and Han- | 1756 |

del composed tunes for Charles Wesley’s hymns.

Wesley, Charles (2), an eminent musician, son of the Rev. Charles Wesley, was born at Bristol, England, in 1756; was for many years organist at St. Marylebone, and died in 1834. He was the author of A Set of Eight Songs (1784); and, among other

...
pieces, an anthem entitled My Soul Hath Patently Tarryd.

Wesley, Charles (3), D.D., clergyman of the Church of England, son of Samuel Wesley, the musician and grandfather of Charles Wesley, A.M., was born at Ridge, a village near St. Albans, Sept. 25, 1738. He was instructed by his father until he was about twelve years old; sent to a school at Wateringbury, near Maidstone; remained some years at St. Paul’s School, London; entered St. John’s College, Cambridge, where he distin-
guished himself as a logician; was ordained priest in Salisbury Cathedral in 1821; appointed curate of Ebury Chapel, Pimlico, the same year; became alternate minis-
ter of St. Mary’s Chapel, Fulham, in 1822; was for some years minister at St. Paul’s, Covent Garden; be-
came chaplain to the king’s household at St. James’s in 1833; subsequently became subdeacon of her majesty’s Chapels Royal, confessor of the household, and in 1847 chaplain to the queen. He died at St. James’s Palace, Sept. 14, 1859. He published A Guide to the Talismen (1832), and A Short Commentary on the Church Cate-
chism. See Stevenson, Memorials of the Wesley Family, p. 539 sq.

Wesley (or Westley), John (1), an English clergyman of the Established Church, grandfather of the founder of Methodism, was born about 1686; and educated at New Inn Hall, Oxford, where he was dis-
guished for piety, diligence, and special attainments in the Oriental languages. After graduation he was con-
nected with the Church at Wootton Bassett, Wiltshire, and later, at Witchurch, Dorsetshire, by which he was sent as a lay preacher to labor among the seamen and others at R idolpe, near Weymouth. In 1658 he became the minister of Winterbourne Whitchurch, Dorsetshire, under the authority of Cromwell. After the Restoration he was summoned before Gilbert Ironsides, bishop of Bristol, who dismissed him without interfer-
tance. But he was afterwards twice imprisoned, and in 1661 ejected from his living. He was then perse-
ued from place to place, and finally took refuge in Preston. He was then called to preach to a society in Poole, but on account of the Five-mile Act performed the duties of pastor still residing at Preston. He was several times arrested and four times imprisoned; and died about 1670. Application was made to bury him in the Church at Preston, but permission was refused by the vicar.

Wesley, John (2), the founder of Methodism, was born at Epworth, Lincolnshire, England, June 17, 1708 (O. S.). His father, Samuel Wesley, rector of Epworth, belonged to a separate family of high respectability. His mother was the daughter of Dr. Annesley, a man nobly connected, and the possessor of a very exalted character. To this remarkably endowed lady Wesley was chiefly indebted for his admirable early training and his elementary education. He uncommonly fine traits of character, and his narrow, not to say marvel-
ous, escape from the burning rectory when he was six years old, gave birth in her mind to an impression that this child was destined to an extraordinary career. She therefore consecrated him to God with special solemnity, resolving "to be more particularly careful . . . to instil into his mind the principles of religion, and virtue." The fruit of her fidelity to this high purpose was the grand and beautiful life of her consecrated boy.

I. School and College Life. — When Wesley was in his eleventh year, the patronage of the duke of Buckingham secured his admission to the Charterhouse School, London, of which Dr. Thomas Walker was then master, and the Rev. Andrew Tooke, author of the Pantheon, usher. To such a grave and gentlemanly manner as was this poor son of a village rector, his removal from the peaceful rectory and the companionship of his firm but loving mother to the cloisters of a large "foun-
dation" school, and to forced association with numerous rude boys, whose cruelty to their juniors was equal to their thoughtlessness, must have been a very sore trial; but he stood it bravely, and soon won a very high rep-
utation for good behavior, devotion to study, and superi-
or scholarship. When sixteen years old he was elect-
ed to Lincoln College, Oxford, and continued his studies with the same exemplary diligence as at the Charterhouse. So highly were his classical attain-
ments esteemed by the heads of the university that he was elected fellow of Lincoln College, March 17, 1726. He was then but twenty-three years of age, yet such was his scholarship that he was soon ranked as a classical scholar, and as a polished writer, and a skilful logician that he was chosen Greek lecturer and moderator of the classes only eight months after his election to a fellowship, and be-
fore he had proceeded master of arts, to which academic honor he was admitted in February, 1727.

II. His Religious Experience. — After much hesitation, caused by grave doubts as to whether the ministry of the Gospel was his proper vocation, Wesley had sought and obtained ordination as a deacon by the hands of bishop Potter in September, 1725. The same prelate ordained him priest in 1728. From 1725 to 1729 his time was spent partly at Epworth, as his father’s curate, and partly at Oxford; but in the latter year his college authorities insisting on his residence at Oxford, he returned thither and devoted himself to the duties of his fellowship. In 1735, on the death of his father, he was strongly urged by his relatives to take his seat in the house of commons; he accordingly assumed the vacant Epworth rectoryhip. Believing that he could be more useful at Oxford than at Epworth, he only yielded to the wishes of his friends so far as to make an indirect application for the living (Tyerman, Wesley, i, 102, 103). He was probably pleased to leave that it was given to another. Yet in October of the same year his convictions respecting his duty to remain at Oxford were so modified that he was per-
suaded to go with general Ogilthorpe as a missionary to Georgia.

Wesley spent two years and almost four months in Georgia, faithfully preaching to the colonists; but find-

ing no opportunity to reach the Indians, as he had hoped to do, and seeing but scant fruit from his labors in Savannah and adjacent settlements, he returned to England in 1738. His ascetic habits, his extreme ritu-
alistiies, his rigid administration of Church dissi-
pation, his vigorous method of dealing with prevailing vices in the pulpit, and his highly cultivated and re-
finned nature were not suited to win the sympathy of those rude, self-seeking colonists. Had his character and preaching been softened by that evangelical expe-
rience which he subsequently obtained, his missionary work in America would have been more pro-
ductive. Nevertheless, it was eminently beneficial to himself; and after his departure the people of Savan-
nah, reflecting on what he had said and done among them, generally admitted his great worth, and lamented his absence as a serious loss to the colony.

Wesley was now nearly thirty-five years of age, and, except in academic circles at Oxford, was almost as unknown man. No signs of the great celebrity to which he was destined had yet appeared; but his hour was at hand. He was about to receive that spiritual baptism which was the pivotal fact in his career, but for which he is best known. He was born in the gratification of his scholastic tastes, quietly performing the duties of his fellowship within the walls of Lincoln College, at Oxford. Wesley’s special work was the fruit of his religious experience, to which we will now direct the reader’s attention.

III. His Religious Experience. — From his earliest childhood Wesley was unusually susceptible to reli-
gious impressions. He was reverential, conscientious, re-
fective, and grave, far beyond his years. These qual-
ities were developed by the religious atmosphere which pervaded the Epworth rectory, by the methodical in-
struction and judicious training of his exceptionally highlly gifted mother, and by the influence of his learn-
ed and devout father. Reared in this home, consecrated to the domestic affections, to intellectual culture, and to
spiritual pursuits, his mind and heart drank in the sweet influences of the spirit of truth so precociously that his early training was marked by this divine impress. The works which had hitherto been the bane of his experience, and replace it with a full reliance on the blood of Christ shed for him.

To gain this faith he strove with all possible earnestness. And at a Moravian society meeting in Alderman Street, while one was reading Luther's statement of the change which God works in the heart through faith, Wesley says, 'I felt my heart strangely warmed. I felt I did trust in Christ, Christ alone, for salvation; and an assurance was given me that he had taken away my sins, even mine, and saved me from the law of sin and death.'

Wesley was now the possessor of 'constant peace.' But, in fact, his faith in Christ was subject to many fluctuations through manifold temptations. He therefore devoted all the forces of his mind to the culture of his faith. He sought association with the spiritually minded Moravians; journeyed to Germany; visited count Zinzendorf; made himself familiar with the religious life of the Moravians at Herrnhut; conversed freely with many of their most distinguished men; and, in September, 1738, returned to London, strong in faith and prepared to enter with unbounded zeal upon the duty of calling men to repentance as Providence might give him opportunities. 'I look,' he said to a friend, shortly after his return, 'as the Evangelist on all the walls of the parish; thus far, I mean, that, in whatever part of it I am, I judge it meet, right, and my boulton duty to declare unto all that are willing to hear the glad tidings of salvation.'

IV. Beginning of his Evangelistic Work.—This conviction, the offspring of his faith and love, was the germinal principle of organic Methodism, though Wesley did not then recognize it in that light. At this time he had not the feeblest conception that he was about to become the builder of a vast ecclesiastical structure. Never, perhaps, was a learned clergyman at thirty-five years of age so utterly without a plan of life as was John Wesley in 1738. He knew that his heart was ablaze with love for Christ and for human souls, and that he was possessed by a passionate desire to proclaim the doctrine of present salvation by faith alone, and that he determined that what it might be, it might be his, in that desire. Beyond this his intentions did not reach. He was a staunch, even a High, Churchman, and very naturally supposed that the fruit of his labors would contribute to the spirituality of the Established Church.

Hence Methodism must be regarded as an accident rather than the result of a premeditated, deliberately formed and carefully nurtured plant in the mind of its great founder. It was the outgrowth of a sublime principle wrought into organic form by circumstances which could not be controlled, except by the surrender of the principle itself. The facts in Wesley's career subsequent to 1738 scarcely admit of any other satisfactory interpretation. Let us briefly review them.

There were several "societies" in London, chiefly composed of persons who were desirous of spiritual fellowship and instruction. Some of them were under Moravian teachers, others were made up of Churchmen, and others again were nothing but societies of the sort to which Wesley very naturally associated with these societies and preached to them and to such Episcopal congregations as were open to his ministrations. But his exceeding earnestness, his theory of instantaneous conversion through faith, and, above all, the remarkable spiritual results of his preaching gave such offence to the vicars and rectors of the churches that, after a few months, he found his further access to church pulpits very generally refused, and his sphere of operations limited, in the main, to the rooms of the societies, to prison chapels, and to hospital wards. Neither was there any probability that he would be presented to any church living. At this crisis of his fortunes he received a very pressing invitation to visit Bristol. After some hesitation he went thither; and his High-Church sensibilities were shocked by seeing that eloquent evangelist
preach to an immense congregation in the open air. "I could scarcely reconcile myself at first," he observes, "to this strange way of preaching in the fields... having witnessed the lives of clergymen late in every point relating to decency and order that I should have thought the saving of souls almost a sin if it had not been in a church." But seeing Whitefield's field preaching divinely blessed, he conquered his life-long prejudices, and, standing on an eminence near the city of Bristol, preached for the first time in the open air to about three thousand souls. Thus the problem of his evangelistic career was solved. The great purpose of his life could be accomplished in spite of closed church doors. He did not know it then, but he really made organic Methodism, with its itinerant ministry, possible on the American continent. In April, 1739, when, with a courage which in his circumstances was truly sublime, he crossed the Rubicon by becoming a field preacher.

The success of his out-door ministrations soon made it necessary to erect a chapel for the accommodation of his converts at Bristol. Lack of ability on the part of the people compelled him to assume the financial responsibilities of this enterprise. To protect his pecuniary interests thus acquired, and to secure the use of its pulpit to himself or his representatives, he felt obliged to vest the title to the chapel in himself. All this, to his mind, bore the aspect of an undesirable burden forced upon his shoulders by unseemly circumstances. But it proved to be the inception of that system of vesting his chapel titles in himself but for which the organic unity and growth of the Wesleyan societies could not have been secured. In adopting it, Wesley was unconsciously working on the foundations of a Church the ideal of which he had not as yet arisen even in his imagination.

V. His First Societies.—A still more important step in the same direction was taken in London, July 20, 1740. This was nothing less than the formation of a society, under his exclusive direction, at his chapel in London, then recently acquired, and known as the Foundery. Six months before he had organized a "United Society" in connection with the Moravians at Fetter Lane. But, owing to errors in theory and wrongs in practice which had appeared among its members, Wesley thought proper to invite all who adhered to him to separate from the Moravians. Some eighteen or nineteen accepted his invitation and organized a "Morrison's" society, as it is frequently called, as stated above, which, though not intended to be a separation, either on his part or theirs, from the Church of England, must be regarded historically as a germ of the Wesleyan Church. It was the nucleus around which the societies that recognised Mr. Wesley as their ecclesiastical leader subsequently grew.

The rapid increase of his United Societies, and his enforced absence from them while on his evangelical tours, soon made it apparent that some means of watching over their spiritual growth was needed. No plan presented itself to his mind until, in February, 1742, while his followers in Bristol were discussing ways and means of paying their chapel debt, one of them proposed that the society should be divided into bodies of twelve, one of whom should be a sort of leader to collect from each a penny per week. Wesley approved. The plan worked well in life, (being their true and most useful habit), so some of their leaders spoke of having disorderly members on their list. "It struck me immediately," wrote Wesley, "this is the thing, the very thing, we have wanted so long." Acting promptly and with characteristic energy on this suggestion, he requested all the collectors to make partial lists of the names of those living in their respective lists. Six weeks later he divided his London society into similar classes, under the leadership of "earnest and sensible men," who were instructed to gain "a sure, thorough knowledge of each member on his list." At first they did this duty by personal visits; but as the number of converts being found, these members were required to meet their leaders once a week for prayer and religious conversation. Thus the class-meeting originated. It immediately became a means of "unspeakable usefulness;" indispensable, indeed, to spiritual instruction and discipline in a system of itinerant preachers. In a short time, it was found necessary to perform thorough pastoral work. Wesley illustrated his sagacity, if not his genius, in incorporating it into his scheme of Christian work. It is, perhaps, theoretically open to objections, which some think to be not entirely groundless; yet it is historically certain that it contributed greatly to the purity and spread of Methodism; and it is assuredly susceptible of such improvements, both on its intellectual and spiritual sides, as to justify its retention in the great churches which have grown out of Wesley's United Society.

VI. Originates the Wesleyan Itinerary.—Owing the unusual results of his tour in Ireland last summer, Wesley visited other towns in the vicinity of London and Bristol. Wherever he preached, powerful awakenings and surprising conversions took place. This success begot new and weightier responsibilities. As the father of these spiritual children, he felt it to be his duty to see that they were properly nurtured. And when he saw many of his converts repelled from the sacramental table in national churches only because they were their hearers, he felt compelled to provide for their spiritual culture and oversight. His choice lay between making such provision or permitting the fruits of his labors to become a "rope of sand." Being as he was, he could not fully approve of lay preaching; but, following numerous Church precedents, he did appoint Mr. Cennick at Bristol, and Mr. Maxfield at London, to take local supervision of the societies in their respective neighborhoods, to hold prayer-meetings, and to expound the Scriptures, but not to preach.

But circumstances soon arrayed themselves once more against his slowly declining eclecticism. During his absence young Maxfield began to preach in London with such power and spiritual fruitage as demonstrated his divine call. Wesley hastened back to London, intent on putting a stop to this irregularity. His mother, then living in his house, said to him, "John, you know what my sentiments have been; you cannot suspect me of favoring readily any theory of this kind. But take care what you do with respect to that man, for he is as sure called to preach as you are." Thus cautioned, Wesley heard Maxfield who, carefully observing the fruits of his preaching, was convinced that he was called of God to the work of the ministry, and then authorized him to preach to Methodist congregations as his "lay helper." Yet he would not permit him to administer the sacraments, because he was not legally ordained.

This unmeditated step, so reluctantly taken, contributed immensely to the structure which Wesley was still undesignedly rearing. In taking Maxfield as his helper, he in fact inaugurated the ministry of Methodism on the basis of a divine call. And as other men equally qualified and conscious of that call speedily appeared among his converts in numerous places, he could not consistently refuse to accept their aid, since the rapidly increasing number of his societies and congregations demanded the employment of more laborers. Having once established the right in Wesley to act, to whom did not some of these leaders of a regular committee of one hundred and five ministers and laymen, in whose meetings the Wesleyan Church had of necessity to apply it. Hence, in 1742, he had twenty-three helpers preaching under his direction; and in 1744, five years after his first sermon in the field at Bristol, we find him holding his first "conference" in London. It was composed of John and Charles Wesley, John Hodges, Henry Morcom, and the three Quakers, Stephen Grellet, Thomas Piers, and Edward Stubbes. As a synod, they expressed their full sympathy with Wesley; and Thomas Richards, Thomas Maxfield, John Bennett, and John Downes, lay helpers in all, ten persons. They remained in session five days, conversing freely on questions of doctrine, discipline, and ministerial duty. Among the rules adopted for admission to the office of elder, the "standing in the church" was specified, the "enough in all things not according to your own will, but as a son in the Gospel to do that part of the work which
we direct, at those times and places which we judge most for his glory." This rule recognised Wesley's authority to apprise the laity as he judged best; it made unqualified submission to this authority the duty of every lay assistant; it put into the rising structure of Methodism the principle of authority which made an organized itinerant ministry possible, and without which, in some form, it is difficult to see how it could be maintained. As exercised by Wesley, this authority was autocratic and practically irresponsible, and his acceptance and use of it cannot be justified except on the ground that he believed it was necessary, as it probably was at first, to the growth of the great work which Providence had thrust upon him. He used it as he pleased, and he retained it in accordance with the peace and progress of his societies; but, whether one agrees with him or not on this point, one cannot fairly charge him with its improper use. From first to last he sought the highest good of his societies, the best fields of usefulness for his preachers, and the promotion of the glory of God in all his appointments. No doubt he made many mistakes, for he was human; but, if ever mortal man possessed of great power was unselfish and pure in its exercise, that man was John Wesley.

VII. Formulation of a Doctrinal Platform.—The doctrine of the Wesleyan society was formulated, at least in its essential outlines, at this first conference. Wesley himself had, after diligent study while at Oxford, conclusively accepted the Arminian theory of general redemption, and learned to regard the doctrines of election and reprobation, as held by Calvin, with very deep abhorrence. His adhesion to what he believed to be the teaching of Holy Writ had brought him into an unpleasant conflict with Cennick, his lay helper at Bristol, and with his friend and fellow-evangelist Whitefield. The latter, having while in New England become enamoured with its then prevailing Calvinism, took great exception to Wesley's teaching in a letter to Whitefield, published in England. Cennick espoused the opinions of the letter, and, though in Wesley's employ, sowed the seeds of dissension in the Bristol society. The consequence was Cennick's separation from Wesley, Whitefield's temporary estrangement from his old friend, and the division of Methodism into two branches, the Calvinistic and the Wesleyan. Subsequently the two friends "agreed to differ," though they henceforth wrought in separate paths. But during this controversy the creed of Methodism was definitely formulated and settled, and when Wesley assembled his first conference, and its members conversed two days on "what to teach," they found themselves in substantial agreement on the atonement, election, justification by faith, the witness of the Spirit, entire sanctification, and other leading doctrines. Thus Wesley's theological views became the accepted platform of the great ecclesiastical system which he was unconsciously organizing.

VIII. Development of Wesley's Work.—During the five years preceding this first conference great things had been accomplished. Starting from London and Bristol as the centres of his movement, Wesley had traversed the country from the Land's End to Newcastle, and had formed societies in numerous towns and cities. In London alone those societies numbered not less than two thousand souls. Their number elsewhere is not known, but it must have been several thousands. Forty-five preachers were engaged in the work, none unoccupied by under his direction. Unnumbered thousands were accustomed to listen to the quickening words which fell with unwoalded power from his lips, and from those of his devoted and laborious helpers. They had much bitter opposition and harsh persecution to content with; yet the movement continued, and strengthened amid them. The lower orders were steeped in brutality, the upper classes were hardened by scepticism and devoted to pleasure. The clergy were frozen amid the formalities of the Establishment. The Dissenting churches, with their limited numbers and feeble strength, were a swelling tide of immorality which overflowed the land. They were, as Isaac Taylor remarks, "rapidly in course to be found nowhere but in books." And the peculiar characteristic of the English nation was, to use the words of Wesley, "universal, constant, ungodliness." Against this triumphant wickedness, Wesley, with his brother Charles, a handful of spiritual clergymen, and his little band of lay helpers, inspired by heroic faith, had entered the lists, determined to overthrow it and to establish the reign of scriptural holiness in its stead. It looked like an unequal and hopeless strife. But he believed that it was not more than the commencement of the battle of the Lord against the hosts of hell in the midst of the fray, and led the van of a host which, if it did not wholly purify England, wrought a great reformation in public morals, poured fresh tidest of spiritual life into both the Established and Dissenting churches, raised up that great body of spiritual men and women who finally constituted the Wesleyan Church, and effected a reformation which broke the sceptre of ungodliness and made England a comparatively godly nation.

IX. Wesley's Extensive Labor.—In leading this great reformation, Wesley did herculean work. His evangelistic tours, annually enlarging, soon extended into all parts of England, to Wales, Scotland, and Ireland. Ever on the wing, travelling some four thousand five hundred miles every year, he preached from twice to four times nearly every day. His audiences were generally large, sometimes vast, and in many places were disturbed by riotous mobs which, like hungry beasts, thirsted for his blood. He also met the societies, the classes, and the official boards whenever opportunity offered or necessity required. The erection of thousands of chapels, the collection of funds to pay their cost, and the choice of suitable trustees constantly required his attention. The care of all his preachers was upon him. His corresponding work was immense. His publishing business to manage. His journeys, mostly on horseback until the feebleness of advanced age compelled him to use a carriage, were long, tedious, tiresome, often perilous, and were pursued in sunshine and in storm, through the heat and rain of summer, and the frosts, winds, and snows of winter. Not unfrequently, especially during the beginning of his career, they involved many privations, severe hardships, and much physical suffering. He usually rode while travelling, even when on horseback, and thus kept himself thoroughly acquainted with the current literature of his times. He also wrote much, though original books were not his forte, but pamphlets on passing events. He edited, wrote, translated, or abridged not less than two hundred miscellaneous publications, which he published and sold through his preachers for the benefit of his societies. Every public movement for the improvement of society, such as the Sunday-school, the abolition of slavery, the circulation of tracts, charitable associations, popular education, and the like, occupied his thoughts, moved his sympathies, called forth his co-operation, and exhausted his purse. His eyes were open to every detail, no matter how minute, that concerned the growth of his societies or the increase of the kingdom of God. He was always at work when awake, yet was never in a hurry. His industry and activity never were, never can be, exceeded. It is estimated that during the fifty years of his itinerant ministry he travelled over a quarter of a million miles, and preached more than forty-two thousand sermons.

Under this unexampled leadership, continued through half a century, the organization which was begun with the feeble society at Fetter Lane, London, in 1739, had developed in 1790 into a powerful body consisting of five hundred and eleven preachers, laboring on two hundred and fifty-five circuits, with which were connected societies in Great Britain and Ireland, in the West Indies, and in America; and numbering in its fellowship over one hun-
dred and twenty thousand souls. Besides this enrolled membership, there were at least four times as many persons worshipping in the principal congregations. These rewards were the outcome of his adherents, at the time of his death, to at least half a million of souls. But outside of this army of vowed adherents there was "a multitude which no man could number," who had been spiritually and morally benefited by the movement which this truly marvellous man had inaugurated, and which, for twenty years, he had guided with almost unexampled wisdom and energy.

X. His Death.—Age could not chill the zeal of this apostolic man. Despite of its burdens and infirmities, he would not slacken his labors until the approach of death benumbed his powers. Eight days before his death he preached his last sermon at Leatherhead, near London. His physical nature then gave way. A gradual sinking of his physical forces followed, during which his mind was generally clear, his faith strong, his peace perfect, his hope triumphant. On March 2, 1791, he passed, "without a lingering groan," into the felicities of the blessed life, in the eighty-eighth year of his age. His remains were interred in the burial-ground of City Road Chapel.

Wesley left no children. In February, 1751, he had married the widow of a deceased London merchant named Glyn, who had been his constant companion since their engagement. The lady could not, of course, did not, enter into the sympathy with her husband's great life-work. She shrank from the toil which his incessant journeying involved, and, after a short time, refused to accompany him to his appointments. Neither would she cheerfully consent to his almost constant absence from home. Hence, after a few years, they lived apart. She died Oct. 8, 1781.

XI. Personal Appearance and Character.—When he was forty-one years of age Wesley was described by Dr. Kennicott as being "neither tall nor fat. . . . His black hair, quite smooth and parted very exactly, added to a person who has a constant look of goodness, be an uncommon man." Tyerman says, "In person Wesley was rather below the middle size, but beautifully proportioned, without an atom of superfluous flesh; yet muscular and strong, with a forehead clear and smooth, a bright penetrating eye, and a lovely face, which retained the freshness of its complexion to the latest period of his life."

As a preacher Wesley was calm, graceful, natural, and attractive. "His voice was not loud, but clear and manly." He was not an orator like Whitefield, but his preaching was remarkable for unctuous, compactness and transparency of style, clear and sharply defined power over the conscience, impressiveness and authority.

In social life Wesley never trifled, but he was always cheerful. He was an admirable conversationalist, full of anecdote, witty, courteous, gentle, serious, and at ease with both rich and poor. Though naturally irritable, he was master of himself, and was, in all respects, "a Christian gentleman." A more charitable man probably never existed. His benevolence was only limited by his resources. After reducing his personal expenses to the lowest point consistent with the maintenance of his health and respectable appearance, he spent the rest of his income in works of charity.

If a man's work is the measure of his mind, Wesley must be ranked among men of the highest intellectual order. A nature that could impress itself as his did on his generation, that could create and govern almost absolutely his human organization such as he called into existence, must have been truly regal—born to rule. Had he possessed a more philosophical imagination, and had he given himself to speculative thought, the world might have rated him higher among its profound thinkers than it does. There is, however, no valid reason for discounting his worth for purposes of judgment almost any department of human knowledge. His journals and other writings show that he had a rare aptitude and appetite for both reading and thinking; but the practical cast of his mind led him to avoid speculation, and to turn his knowledge to account in a multitude of channels and in the direction of the higher purposes of his life. Yet the clearness of his thoughts, while it led men to underestimate their depth, showed the far-reaching penetrativeness of his mind. His perception of things and their relations was rather intuitive than the resultant of a slow and tedious process of reasoning. His mind was more of a business like a direct path through which he viewed the facts of nature, the course of human history, and the revelations of Holy Writ, with such clear vision as enabled him to present them to men with a mental force so logical and authoritative, and in a style so terse and direct, that their judgments were convinced, their affections won, and their wills subdued by the truths he uttered.

Wesley's mind was constructive in all its tendencies. Had it been destructive, he would have spent much of his force in efforts to pull down the National Church, which was nearly "dead in trespasses and sins" when he began his itinerant career. He did not do this, because his genius moved him to build, not to destroy. So strong was this tendency that it restrained his natural combativeiveness, which was large, limiting it to such vigorous defences of what he believed to be vital truth and to such courageous, if not prevent him from work from being hindered by the attacks of his many adversaries. This constructive instinct moved him to give organic form to a novel system of itinerant preaching; it led him to organize the fruits of his labor into societies, by which he hoped not to supersede or rival the Episcopal Church, but to fan its energies and spiritual life back to healthful action. But circumstances were stronger than his hopes, and the structure he erected became the Wesleyan Church.

Wesley's character was remarkable for its perfect unity and coherence. He was governed in all he did and thought by his unswerving avowal at the beginning of his evangelical career, when he affirmed his belief that God had called him "to declare unto all that are willing to hear the glad tidings of salvation." This conviction shaped his life. It dwelt in his conscience; it absorbed his affections; it governed his will; it flowed into all the activities of his life; it sustained him under hardships and trials; it accounts for the peculiarities of his career. The most scrutinizing search finds nothing contrary to it, either in his private, social, or public life. Such absolute coherence is rarely found in human character. In Wesley it is so obvious that it gives a clear and definite accounting for that marvellous degree of personal power by which he ruled so absolutely and yet so peacefully over his societies. Men submitted to his rule because they saw that he ruled not for himself, but for the triumph of a great principle; that he held on to his great power, not because he was ambitious or loved power for its own sake, but because he believed the spiritual welfare of thousands required him to keep the reins in his own hands. That this belief amounted to a sincere conviction is evident from the fact that in 1778 he wrote to the saintly Fletcher begging him to prepare to succeed him, because he knew that, after his death, his societies could be held together only by placing supreme power in the hands of one leader. But Fletcher's death led him, at a later period, to change his mind. Seeing no other man whom he could safely trust with his supreme power, he began to train the "Yearly Conference" to assume the government of his societies, and to give them not by surrendering his power while living, but by permitting the conference to direct affairs under his supervision. When satisfied by this experiment that it would be safe to convey his power to that body, he executed a "Deed of Declaration," to take effect after his death, by which he evacuated and transferred the appointment power, and the use of his chapels and their properties, were placed in perpetuity in the hands of
WESLEY

one hundred preachers, and their successors in office to be chosen from the body of Wesleyan preachers. Had Wesley deemed it safe to make this legal transfer of his power during his lifetime, he would, no doubt, have done so. But he desired to preserve in his lifetime the privilege to exercise both legislative and executive powers for several years before his death is proof enough that he did not cling to power for its own sake. His aim was not his own honor, but the good of his beloved societies.

XII. Wesley's Writings. — Wesley's writings and correspondence are of the utmost importance for the study of his evangelical work. Knowing ignorance to be a sturdy foe to godliness, he used the press as an auxiliary of the pulpit from the very beginning of his itinerant career to the day of his death. He consecrated his pen to the great purpose of his life. He had the ability to win a high reputation as an elegant writer; but, despising the mere praise of men, he wrote, as he preached, in the style and manner he believed best adapted to win men to Christ. His most important productions were his Sermons, numbering one hundred and forty-one. They are remarkable for the terseness and purity of their style, in which not a word is wasted; the intrepidity and couragelessness of their thoughts; and a logical force which is not subtle, but the fruit of a "keen, clear insight." A first series of his Sermons was published in 1771: — his Translation of the New Testament, with Notes (Lond. 1758), which won approval from many eminent scholars. In 1791 he published his authorized Version: — the notes for conciseness, spirituality, acuteness, and soundness of opinion: — his Journals, which portray, as in a mirror, the course of his remarkable life, and are exceedingly curious and entertaining. The first part was issued in 1789; nineteen more parts, at irregular intervals: — his opposition and enthrone an Ardent Appeal to Men of Reason and Religion (written in 1744), and A Further Appeal to Men of Reason and Religion (published 1744-46, 3 pts.). These masterly appeals are acute, searching, and powerful in thought, forcible in style, and singularly tuneful in language. In Original Sin, in reply to Dr. Taylor, of Norwich, which was so conclusive that the doctor never attempted to answer it, though he promptly replied to every other writer who controverted his opinions. Besides these works, Wesley wrote many controversial articles, which were published separately and in pamphlets. He was editor of several monthly magazines (The Arminian Magazine), which he continued to the end of his life. He also wrote a Church History (in 4 vols.):— a History of England (in 4 vols.): — a Compendium of Natural Philosophy: — a Dictionary of the English Language: — separate Grammars of the English Tongue, and of the Latin to accompany them: — a Compendium of Logic, etc. His original prose works filled fourteen closely printed volumes; his commentaries, compilations, and abridgments form a list of one hundred and nineteen publications in prose, one of which, entitled A Christian Library, contained fifty volumes. Besides these prose works, he published fifty-two separate works in poetry, the joint productions of himself and his brother Charles; and, lastly, five publications on music, and collections of tunes. That all this literary work should have been accomplished by a man whose life, for half a century, was a series of journeys, is an astonishing thing at his travelling," remarks Tyerman, "the marvel is how he found time to write; and, looking at his books, the marvel is how he found time to preach." An edition of his principal prose works is published by the Methodist Book Concern (N. Y.) in seven octavo volumes.

Wesley, John Thomas, an English Congregational minister and missionary, was born at Burton in 1844, and died Dec. 19, 1875. Mr. Wesley from early youth was a devoted follower of Christ; graduated at Hackney College in 1870, and was ordained at York Street, Dublin, where he secured the warm affection and esteem of the people. In 1874, under the auspices of the London Missionary Society, he sailed for Madagascar; readily acquired the language; and, during his few years of labor, became a great power in the mission field, and an honor to the Church. (See Lond.) Cong. Year-book, 1877, p. 421.

Wesley, Samuel (1), A.M., an English Episcopal clergyman, son of John and grandson of Bartholomew Wesley, and father of John Wesley, the founder of Methodism, was born at Wiltshire, in the county of Wiltshire, in 1662. He began his studies in the free-school in Dorchester, and at the age of fifteen went to an academy in London, where he remained about three years. He was then transferred to the Stepney Academy, conducted by the learned Nonconformist Edward Veal. This academy being bankrupt within a few years, he was sent to the academy of Charles Morton at Newington Green, where he remained until the summer of 1679. During the entire period of his academic studies he was expected to enter the ministry of the Dissenters. He wrote verses for newspapers and satires against the Episcopal clergy under the advice of the Nonconformist ministers. His change to the Episcopal Church is thus accounted for in the words of his son, John Wesley: — "Some severe invectives being written against the Dissenters, Mr. S. Wesley, being a young man of considerable talents, was pitched upon to answer them. He set him on a course of reading, which produced an effect very different from what had been intended. Instead of writing the wished-for answer, he himself conceived he saw reason to change his opinions, and actually formed a resolution to renounce the Dissenters and attach himself to the Established Church. This resolution, which he formed at that time with his mother and an old aunt, both of whom were too strongly attached to the Dissenting doctrines to have borne with any patience the disclosure of his design. He therefore got up one morning at a very early hour, and, without acquainting any one of his purposed departure, went quietly away, and obtained admission to himself at Exeter College." He entered as a sizar and pauper scholar, and helped to support himself with his pen during the next five years, graduating June 19, 1688. Seven weeks after this time he was ordained deacon at Bromley by Dr. Sprat, bishop of Rochester. During the year immediately following his ordination he served a curacy at a salary of £20. He was then appointed chaplain on board a man-of-war at a salary of £70, and held the office one year, during which he began his History of a Curacy. He was during the next two years incumbent of a curacy on London on a salary of £30, to which he added during the second year £50 by his pen. He then married Susannah, daughter of Dr. Samuel Annesley, an eminent Nonconformist divine. This occurred (probably) in the spring of 1689. In 1691 he was appointed chaplain to the living of South Ormsby in Lincolnshire, where he also acted as domestic chaplain to the marquis of Normandy. In 1693 Mr. Wesley to be raised to an Irish episcopate, but the plan was not favored either by the crown or archbishop Tillotson. Mr. Wesley remained at South Ormsby five years. About 1694 or 1695 the mansion which had been occupied by the marquis of Normandy was rented to the east, on Castletown, which was a noble man; and, greatly to the disgust of the rector, kept mistresses who
were thrown in contact with his family. The marquis was a man of similar habits, and an event occurred in the summer of 1696 which occasioned the removal of the rector to another place. It is thus related by John Wesley: "The marquis of Normanby, a house in the parish of South Ormsby, where a woman who lived with him usually resided. This lady would be intimate with my mother, whether she would or not. To such an intercourse my father would not submit. Coming in one day, and finding this intrusive visitant sitting with my mother, his wife, he went up to her, took her by the hand, and very fairly handed her out. The nobleman resented the affront so outrageously as to make it necessary for my father to resign the living." In 1696, having dedicated his Life of Christ to Queen Mary, he was presented by her with the living of Epworth, Lincolnshire, where he died April 22, 1735. For four or five years he also had the rectory of Wroote, a little village near Epworth, which hardly paid his curate. In 1734 he resigned it to his son-in-law, John Whitelamb. Mr. Wesley was always poor in this world's goods. He had nineteen children, had to assist poor relations, including his widower mother, met with many reverses, and never had more than £200 a year. He was a man of great learning, of large benevolence, loyal, devout, and conscientious in the exercise of the duties of his office. He is frequently mentioned as a Tory and a High-Churchman, but it is certainly not true that he pronounced the work done at Oxford by his son John and Charles, which gained for them the name of Methodists and The Holy Club. He penned the following words Dec. 1, 1730: "I hear my son John has the honor of being styled the 'father of the Holy Club.' If it be so, I must be the grandfather of it; and I need not say that I had rather any of my sons should be so dignified and distinguished than to have the title of His Holiness." He was a prolific writer. Among his works may be mentioned, a volume of poems called Muggots (1686): The Life of Christ, an Heroic Poem (1688): The Pious Contemplator (London, 1700): History of the Old and New Testament (1701): Dissertations on the Book of Job, in Latin: and several excellent hymns. He was one of the editors and chief contributor to the Athenian Gazette. See Tyrer, Life and Times of the Rev. Samuel Wesley; Clarke, The Wesley Family; Stevens, Life and Correspondence of the Wesley Family; and the numerous Lives of John and Charles Wesley.

Wesley, Samuel (2), A.M., an English clergymen, son of the Rev. Samuel and Susannah Wesley, was born in London, Feb. 10, 1690. His mother taught him to read at the age of five years, and laid the foundation of knowledge which he afterwards pursued. He was sent to Westminster School in 1704, and was admitted king's scholar there in 1707. He was employed for a time in the house of Dr. Sprat, bishop of Rochester, to read to him at night, and in 1711 was elected to Christ Church, Oxford. He remained there a little more than one year, when he received the degree of A.M., and entered into holy orders. He officiated as usher in Westminster School for the next twenty years. Here he became familiar with lord Oxford, Pope, Swift, Prior, and other Tory poets and statesmen, though he associated with Addison and others of his class. In 1732 he became head-master of Blundell's free Grammar-school at Tiverton, where he remained till his death, Nov. 6, 1739. He was one of the founders of the first infirmary set up at Westminster, now St. George's Hospital. He belonged to the High-Church party, and did not co-operate with John and Charles in their "Methodist" labors; but he often supported them in their attacks upon the good works of others, only cautioning them against such excess as would injure their health. He is represented as an excellent preacher, and often exercised his talents in that direction. Like other members of the family, he was highly gifted in poetry. The first edition of his poems was published in 1736, a second, with additional poems, appeared in 1743. A new edition was published, with a life of the author, by William Nichols, in 1802. He is best known, however, by his hymns. See Stevenson, Memorials of the Wesley Family.

Wesley, Samuel (3), an eminent musical genius of England, third son of the Rev. Charles Wesley, was born Feb. 24, 1707, and composed his first important work before he was eight years of age, and in his later years he was considered the most remarkable extemporaneous player in Europe. Among his compositions were, a Grand Mass for the chapel of pope Pius VI:—A Complete Service for the Cathedral of the Church of England:—anthems, psalms, and duets for the peep-coach, and voluntary for the organ. He died Oct. 11, 1837. See (Lond.) Gentleman's Magazine, 1837, ii, 544.

Wesley, Susannah, a remarkable Christian woman, wife of Samuel Wesley, Sr., and mother of John and Charles Wesley, was the youngest daughter of the learned Nonconformist divine Samuel Annesley, L.L.D., and was born in London, Jan. 20, 1669. About the year 1741, before she was thirty-three years of age, she pronounced Nonconformity and gave her adherence to the Church of England. In 1689 she became the wife of Samuel Wesley, to whom she bore nineteen children. The great service she did for the world was accomplished largely through her thorough training of her children. Her methods of teaching and arranging her children was peculiar to herself, and is fully described in a letter to her son John, dated Epworth, July 24, 1732. They were not taught to read until they were five years old, when they learned the alphabet in a few days, and began to spell and read, first a line, and then a short paragraph, mastering it perfectly. She was a woman of strong intellect, and employed her best powers in the performance of her maternal duties. She was a model mother, and her sons owed a great deal of their success to her prudent counsels. Many incidents remain on record which illustrate her singular independence of character, and her power of using her legitimate authority. For a prolonged period she shared the fortunes of her husband in a country parish with a stinted income; but throughout she maintained an active, cheerful, and consistent piety. The family of which they were a part, though small, was a remarkable and to its peculiarities she contributed her full share. After her husband's death, she remained a short time with her daughter Emilie, and then resided with her son John in London, and became his judicious adviser in carrying out his great work. Previous to her death, her influence was very powerfully felt, so much so than formerly, though she seems to have been a true Christian all her days. She died in London, July 23, 1742, and was buried in Bunhill Fields, where her son John delivered the funeral discourse. See Stevens, Memorials of the Wesley Family.

Wesleyan Conference, Australian, is the general designation of the regular Methodist body in that province of the British empire.

I. Origins and History.—Methodism in Australia and New Zealand has had the marks of Divine Providence stamped upon it from the beginning. Colonization has been both a source of relief and of impoverishment to the mother-country of England. Early in the second decade of the 19th century, the master and mistress of Mr. Wesley's charity-school at Great Queen Street, London, were sent out as teachers to Australia. An English penal colony had existed there some years, and, in order to raise the character of the people, many of them released convicts, teachers were first wanted. A few years afterwards the Governor's wife, who had an agricultural farm in New South Wales, and among them Messrs. Bowden and Hoskins, two schoolmasters, who had gone out in 1811, recommended by Joseph Butterworth, M.P., to take charge of the charity-school in Sydney. They were Methodists, and, desiring to have the advantages of the Methodist class-meeting in their new home, commenced the first on the evening of March 6, 1812. Twelve persons met at the
WESLEYAN CONF., AUSTRAL. 919 WESLEYAN CONF., AUSTRAL.

...commencement, and they resolved to apply to the Methodists in England for a missionary. Mr. Samuel Leigh, who had conversed with Dr. Coke, had offered his services. The proceedings were delayed by the fact that Mr. Leigh had not heard from Dr. Coke, and News of his death was not received until after his appointment. Mr. Leigh, having discharged his duties in the capacity of a missionary in Australia from that day forward cannot be contemplated without a feeling of astonishment and delight. In 1820 Methodism was introduced into Van Diemen's Land; in 1822 it reached the Friendly Islands and the neighboring groups; in 1823, New Zealand; in 1826, the Fiji Islands were added to their first Methodist missionary; in 1828 a mission was commenced in South Australia; and in 1839, Western Australia. Thus, within a quarter of a century, the whole country was visited by Methodist missionaries where there was population to whom they could minister. The pioneers who early united their efforts, six to the local preachers, and some have become wealthy, and devoted much of their substance to the erection of Methodist churches, parsonages, and schools. Mr. Leigh records of one of the earliest of the convicts, Mr. E.—, who was an educated Irishman designed for the bar, but who, for forgery, had been sentenced to death, was executed, and his sentence commuted to transportation for life. His Methodist friends gave him a Bible to be his companion in his banishment. He read the Bible and studied its fellowship-convicts; and his intelligent, consistent Christian life soon secured him his liberty. He taught a school, preached in the villages on the Sabbath, and commenced the first Methodist class-meeting at Windsor in 1812. In his humble way, he probably was the first Methodist preacher in the southern world. The members gathered by this young Irishman held the first Methodist love-feast in that country on April 5, 1812. The missionaries and the converts numbered many of 1839, many of whom were much impressed with the work, and many in many instances they had repented and found mercy at the bands of God. The morning of eternity alone will tell how many of those children of crime and punishment will be welcomed in heaven by parents and friends who seldom mentioned their names.

Mr. Leigh was a most faithful and heroic man, and he soon witnessed the erection of three small chapels, one each at Sydney, Windsor, and Castlereagh. Four Sunday-schools were opened, and a Methodist Circuit was formed which included fifteen in his Irish prayer, including 50 miles. After three years of arduous toil, Mr. Leigh welcomed Walter Lowry, on May 1, 1818, as his first colleague, and so rejoiced was he on meeting that he fell on his neck and kissed him. The aborigines as well as the criminals were accessible to the missionaries; but the preachers were exposed to insults and persecutions. The foundations of Australian Methodism were thus laid broad and deep, and possibly that form of religion may ultimately dominate in that vast country.

Cheered by the prospect which was opening before him, Mr. Leigh returned to England in 1820 to plead for more men to extend the work, and he took out with him William Horton and Thomas Walker. They intended to open a station among the natives, among whom he commenced to labor; but owing to their nomadic character the success did not justify the continuance of that station after 1828. Another and more satisfactory effort was made in 1826, when a new station was opened at Port Phillip, Port Jackson, with two missionaries, and one at Perth, Western Australia. In 1838 Methodism was introduced into Geelong by two missionaries. These men endured immense hardships. They acquired the native languages, translated portions of the Scriptures, commenced schools, established printing, wrote new hymns, and by their labors founded a training institution for native preachers and teachers. At each station the missionaries conducted a farm on which the people were taught agriculture, the farms supplying the preachers with a large portion of their income in those early days.

Mr. Horton opened his labors in Tasmania, or Van Diemen's Land, in 1820. The population there was utterly demoralized, both convicts and natives. Among the former were found a few who had been Methodists, who had repented of their evil doings, and had committed themselves to a life of prayer and fasting. The mission prospered there, under the fostering spirit of the governor, who, seeing the good results of the labors of the missionaries, in 1827 applied for additional preachers, offering to pay their passage out and partial support on arrival. In 1828 William Butters commenced a mission at Port Jackson, and commenced a convict settlement. Successive governors testified to the value of these missionaries' labors among the convicts, and in 1837 the work was extended by the arrival of four more preachers.

A survey was made of the progress of the mission in 1829, that continued in 1830, that there were required to be nine missionaries, 570 members of society, and 992 scholars. To extend and consolidate the work, the Rev. John Waterhouse was appointed general superintendent of all the Australian and Polynesian missions; but his exhaustive and earnest labors ended his earthly career in three years, though the work was extended. William Binnington Boyce succeeded him, and he became the president of the first Australian Conference in 1855, Samuel Leigh, on his return from England in 1821, made an inroad on New Zealand. His first experiment was not encouraging. On entering one of the native villages, he paused and thought he had lost his way, and turned down the pathway. That sight helped to determine him to endeavor to dispel the darkness and misery which prevailed. He secured the help of Messrs. Turner and White, and commenced a mission at Wagara, on the north-east coast. They were surrounded by ferocious and savage cannibals. One day Mr. Leigh, with eight or ten chiefs seated at a fire, roasting one of their slaves between two logs of wood, to make them a meal. These natives became more enlightened, the work prospered, natives were converted, chapels were erected, and much good was done; but in 1827 war broke out, the mission was stopped. In 1828 they returned, at the invitation of one of the chiefs, and commenced a new mission at Maungunu, which for
two years made but little progress. After 1830 the work revived, conversions increased rapidly, more missionaries were sent, and so satisfactory was the conduct of the people that one of the missionaries in 1834 wrote, "I am strongly confirmed in the hope that God has awakened aborigines to a pattern even to Europeans, and tokens of many kinds were given that a glorious work was beginning in New Zealand." Those signs proved true. Deputations were sent from the Southern Island to the missionaries for preachers and teachers; more missionaries were sent out, who soon mastered the language of the natives; books were written and translated; a printing-press was established; chapels and schools were erected; and an institution for the training of native preachers was established. The blessings of civilized life worked their diffusion of Christian principles; and in 1854, when it was determined to unite the mission stations in New Zealand with those in Australia, to form one Conference, the Report of the condition of the Methodist missions in New Zealand exhibited the following figures: Chapels, 105; other preaching-places, 149; local preachers, 322; catechists, 5; members of society, 4,500; attendants at public worship, 11,000; missionaries, 20. So ably had the missionaries conducted their financial enterprises that in 1854 the entire debts on their chapel property in New Zealand were only £360. After such a satisfactory report, there was no opposition to the union of the latter with Australia. There were also: Sunday-schools, 188; day-schools, 88; pupils, 8,046. Such were the results a quarter of a century since.

The South Sea Islands form an important part of the Australian Methodist Church. Walter Lowry commenced a mission in Tonga in 1822, but it was given up in 1823. In 1826 John Thomas and John Hutchinson resumed the work, and in 1827 they were joined by William Cross, Nathaniel Turner, and another, and that gracious work was commenced which has resulted in bringing the whole population of those islands under the influence of Christianity. There are no records in history which can compare with those of the history of Christianity in the various islands of the South Seas for the completeness of the overthrow of heathenism, idolatry, infanticide, cannibalism, with all their attendant horrors; and the establishment, in their place, of Christian schools, parochial schools, and the whole population within the space of a quarter of a century embracing Christianity and learning to read and write; and the introduction and practice of all the customs of civilization. When John Thomas, who still lives, visited the Hawaiian Islands in 1890, he was startled to find the king of the nation and all of the people, even the heads of the native heads, worshiping the true God, and their idols temples were either burned or converted into dwelling-houses. During a visit to Tonga, where the mission had appeared to fail, the king of the Hawaii Islands had been converted, and on his return brought with him a Christian native and his wife. The king, leading his people by example, was baptized, and he had a chapel erected in which fifteen hundred people could worship. In but a short time young and old, rich and poor, masters and servants, embraced the new lotu, or religion. The king, a man of fine presence and intelligence, took the name of George, and his wife that of Charlotte. King George carried the intelligence of their conversion to the king of Vavau, who, on hearing and seeing the changes which Christianity had wrought, with a thousand of his people at once renounced paganism, and the visitors remained a long time teaching the people the elements of Christianity. The mission was extensively printed by thousands and scattered broadcast on the numerous islands. The press was to the people one of the greatest marvels they had known. Hymn-books, catechisms, and portions of Scripture were distributed by thousands, the natives being the voluntary agents employing hundreds of these natives, male and female, including chiefs and their wives, were employed as teachers, class-leaders, exhorters, and local preachers, the people learning to read with avidity, and the missionaries' wives teaching the art of cutting out clothes and making, as well as other domestic and useful arts. The news of these conversions spread far and wide, and canoes laden with inquirers came a distance of three hundred miles to see what Christianity had done, and these returned themselves to spread the tidings of the new religion. So the work went on till July, 1834, when there broke out on several islands a great spiritual revival. Men, women, and children, chiefs and people, all shared in the outpouring of the Spirit, and on one day (July 27) Mr. Turner records that "not fewer than one thousand souls were converted, not only from dumb idols, but from Satan to God." A little later he records, "Within the past six weeks the number of converts is 2,292." For a week they held prayer-meetings six times daily, and as many as a thousand persons were on their knees at the same time, seeking, some crying earnestly, for deliverance from the bondage of sin. Such earnest crying for mercy was, perhaps, never before witnessed on earth.

King George became first a class-leader, then a local preacher, and his whole life was now devoted to the elevation of his people. He released all his slaves, and had a mission church erected in the Friendly Islands, a thousand of his people being employed in its erection. The hurricanes of 1866 and 1867 caused great destruction of the buildings. The communion-rails were sold for the communion-table, and two clubs formerly adored as deities were placed as pillars to the pulpits. The king himself preached the opening sermon, and thousands of people attended the opening. Such were some of the results of one of the greatest revivals ever known. In no other portion of the mission field have so many native laborers been raised up, and schools, chapels, and parsonages adorn most of the islands. The whole population has embraced Christianity.

The Rev. Robert Young in 1888 visited those islands, New Zealand, and Australia as a deputation from the English Conference to make the arrangements for the union of all the churches in the Eastern Archipelago. That union was satisfactorily arranged, and has worked admirably for over a quarter of a century. At the time the Australian Conference was founded it included nearly 200,000 members and 40,000 communicants; the societies were nearly all self-supporting, and £10,000 was annually given for missions alone. Since that period every department has advanced. In 1890 there were reported in that conference 483 ministers and 69,297 church members. The Methodist membership has increased to 150,000, and includes native members in the Union, in the Southern Islands, and in British India. The Methodist membership in Great Britain at the time of Mr. Wesley's death. In another half-century the Australian churches will probably sum up as many members as the parent society.

When the Jubilee of the Wesleyan Missionary Society was celebrated in 1864, a large meeting was held in Australia in that connection, and a fund was then opened which soon reached £12,000, the money being spent in the erection of a Wesleyan college. About the same time another institution came into existence at Melbourne, the erection of the Wesleyan Emigrants' Home at the cost of £30,000, towards which the colonial government voted £1,000, from a conviction of its philanthropic character. That temporary home has been a blessing to multitudes on their arrival in the colony without friends to greet them.

II. Church Organization and Polity.—In these respects the Wesleyan Church and society is in accordance with the parent society. Ministers and laymen unite in conducting the annual conferences; and occasionally ministerial deputations are sent to the outlying churches to report upon and encourage them. The Rev. Messrs. Rathbone and Forbes went over the missions in the South Sea Islands in 1869, and reported most encouragingly of their advancement.
WESLEYIAN CONFERENCE, FRENCH. Under this head we propose to give a statement of the spread of Wesleyanism across the English Channel.

I. Origin and History.—Methodism had to struggle hard and long to obtain a home in France; but the efforts of its early years were at length crowned with success. As early as 1779 Methodism found its way from Newfoundland to Jersey, one of the Channel Islands opposite France. Some soldiers in a regiment from England to Jersey, being Methodists, carried their religion with them, and a small society was formed. They applied to Dr. Coke, who sent Rev. Robert Clarke, an itinerant preacher, to preach. In 1785 Dr. Coke visited the island, and in 1786 Adam Clarke was appointed to the Normandy Islands to assist Dr. Male. In 1787 Mr. Wesley sent a fortnight on the island, preaching and exhorting from house to house. The people assembled in the evenings by hundreds to hear him. Mr. Wesley foresaw that Methodists from those islands, having frequent intercourse with France, would soon take their religion there also. In 1790 the Rev. John de Quentinville and Mr. John Angel visited the island, and opened offices in Normandy and Brittany. After some small congregations of French Protestants, joined them, and began by giving personal experiences of conversion. This awakened sympathy, and the people desired information.

William Mahy, a lay preacher in Guernsey, was sent, and was ordained on 1789 by Dr. Coke, to preach. He commenced his labors at Courcelle. Dr. Coke then went on to Paris, taking with him Mr. de Quentinville and Mr. Gibson; and there hired a room for a month near the Seine. Dr. Coke was then offered a suppressed church in Paris for £100, which would hold two thousand persons. This still showed the low state to which religion had then fallen. Inefficiency was rampant, the priests had all been killed or banished, and any pastors remaining did not favor the new religion. The opposition to Mr. Mahy broke down his health, and ended in his premature death. Dr. Coke soon found that Paris was not favorable to Methodism, and retired. Seed was sown in several villages in Normandy, which was not allowed to die; but the Revolution following so quickly on these efforts arrested further progress then.

In the history of Methodism in many places, when one door is closed, Divine Providence opens another. So it was in France. For notwithstanding every form had been nearly extinguished. The war with Napoleon Bonaparte had resulted in the capture, by England, of thousands of French prisoners; and eleven large ships of war formed the prison-homes of those men in the river Medway. In 1810 the Rev. William Toase began to visit the ships and speak to the soldiers. He was heard gladly; and began to preach and distribute French Bibles, and converts were the result. In 1811 Conference appointed Mr. Toase a missionary to the French ships in the Medway. These soldiers were ultimately, after 1815, returned to their homes, and they took their Bible with them. Bible work in Normandy and Brittany was thus prepared for the renewed introduction of Methodism. This time it was to be permanent; and although it has had a slow and struggling existence, yet the statistics will show that it has survived, if it has not extended largely.

After the peace of 1814, some evangelists again commenced to labor in Normandy; but the return of Bonaparte from Elba caused them to flee for safety, leaving a small society of fourteen members, which was increased to twenty-five during the year. After the battle of Waterloo, and the return home of prisoners, the Rev. William Toase went to Normandy, and restored the society. He afterwards continued his labors in Normandy with Benjamin Franklin as his colleagues. In 1818 Charles Cook followed them. He studied the language, and so thoroughly interested himself in the people that for forty years he devoted all his time, strength, and energy to promoting Methodism among them.

WESLEYAN CONGRESS, AUSTRAL. See WESLEYANS.
WESLEYAN CONF., FRENCH

He is considered the chief founder of Methodism in that country, giving not only his own life, but the lives of his two sons, to the same work, both of whom are as well known in America as in France. Mr. Cook became a convert in 1787, but his mission being not available, Mr. Cook did not leave France. He preached his first sermon in that country in December, 1818. The first district meeting was held in April, 1820, when there were present five preachers—Brethren Taise, Ollivier, Hawtrey, Cook, and Henry de Jersey. The first love-feast was held the week after the district meeting, and it proved to be an occasion of much good, and was long remembered.

Up to the year 1832 the progress was slow and discouraging; but the surrounding circumstances sufficiently accounted for that state of things. The Conference of 1832 sent the Rev. Robert Newstead to give the mission a new start, and the members were nearly doubled the first year. In 1834 James Hocart joined the mission, and he has since devoted his whole life to the work. He still survives; and at the English Conference of 1860 he made a powerful and impressive appeal on behalf of the extension of Methodism in France. In 1835 Matthew Gallienne joined the mission; he devoted many years of valuable service to the cause, and his son is at the present time tutor in theology of the young men preparing for the ministry. The reinvigorated mission soon showed signs of the new power infused into it. Robert Newstead died in 1852, a total membership of one hundred and eleven; in eight years just one thousand were added. Eight years after came another Revolution and the overthrow of the monarchy, which, followed by increased difficulties in conducting religious worship, soon resulted in the loss of nearly three hundred members. Peaceful times followed, and Dr. Cook lived to see the number of ministers raised from 4 to 30, and the members from 29 to 1446—progress which would have been thought small in any country excepting Catholic France.

In 1832 France was organized into a separate conference, and affiliated with England. It had then 17 preachers and 776 members. France was divided into two districts; and in 1833 Jean Paul Cook joined the mission as a catechist. He has since been one of the most devoted and successful of its pastors. There were then 15 preachers on all France, but the conference had long been under consideration to make the older missions of Methodism self-sustaining, while at the same time the Missionary Society in London desired to be relieved of the management of its operations, and thereby give the French people greater facilities for useful and extended operations. The Rev. Dr. Beecham, one of the general secretaries, assisted in completing the arrangements, and with the pleasure and sanction of the Rev. Dr. Chas. Cook, the Conference of 1852 adopted the recommendation of the Missionary Committee, and France has ever since managed her own affairs, care having been taken to form such a main and secondary system of Methodism, as to ensure their maintenance and discipline, while the operations may take a wider scope. Two years after the change, eight more preachers were at work and three hundred members added to the society. The largest number of members ever recorded in one year was in 1870, when they were registered at 2,669. At the same time the Marquis, who were very much attached to the cause, and the Communes, which caused a loss of over two hundred members throughout the country. In 1880, owing mainly to the want of financial support—all the societies being poor—the total membership is only 1,789, being about one hundred less than at the end of the last war. Many special efforts have been made during the period of the present republic to encourage and advance Methodism in France. Ten thousand dollars a year more would give the cause an impulse such as it has never had before. There is more eagerness shown, by both men and women, to hear the Gospel and read religious books than ever before. The Rev. William Gibson, A.B., has for some years been using his utmost efforts, chiefly in evangeline labor; but what is one in so great a city as Paris? There is a bright day dawning for Methodism in France if only the small sum named could for a few years be guaranteed to aid the work. The Rev. Dr. Johnson, Rev. William Arthur, A.M., and other leading Methodists from England have rendered some help; but such help guaranteed for three or five years would work wonders at the present time. Doors are open everywhere for preaching the Gospel; and for some years the preachers have continued their labors for only a bare pitance for food and clothing. The French Conference owns a newspaper and a book-room; but both are languishing for want of patronage. In no country in the world, not even Ireland, have there been greater obstacles in the way of making progress than have existed in France; but now financial help is all that is required to make Methodism in France a great power for good.

II. STATISTICA.—The following table will exhibit the numerical progress of French Methodism:

III. LITERATURE.—The French people are, on the whole, much more educated than many nations to whom the Gospel has been sent. Infidelity and polygamy in their worst forms have been the chief sources of opposition to the spread of vital godliness in France. From an earnest desire to instruct the people, when preaching has been forbidden, about a dozen preachers belonging to the French Conference have made free use of the press to enable them to spread spiritual life; and although the sales of some of the books have been but small, yet their very existence—copies having found their way into public libraries—has often proved a source of defence, and in other ways have been helpful when the living voice might not be appealed to.

Dr. Charles Cook has seven publications. A volume of Christian Songs, of nearly 400 pages, ran through eight editions in his lifetime:—A Letter to the Editor of the Evangelical Gazette of Geneva (8vo, 24 pp.):—The Life of Mz. Mary Fletcher:—Journal of Hester Ann Rogers:—Aphorisms on Justification:—The Love of God to a Lost World, a reply to a brochure by Dr. Malau:—and Wesley and Wesleyanism Justified.
Jean Paul Cook, besides writing most interesting Letters for many years past in the New York and the Western Christian Advocate, has issued separately, "Organisation of Sunday-schools (1847)—Life of Christ (Cook) (1852)."—Letters on Peter (1850).—The Days of a Young Child who Loved the Saviour (12mo, 30 pp.).

The venerable John de Quetettle may be considered the father of the French Methodist press. He was accepted by Mr. Wesley as a preacher to the French in the Channel Islands as early as 1786, and he devoted nearly sixty years of his life in promoting Methodism among the French people. He published the first hymn-book for them; but the date of the first edition is uncertain. A Collection of Methodism Hymns, in French, was first published in London in 1786, the first year of Mr. de Quetettle's ministry. It is supposed that it is attributed to Mr. R. C. Brackenburg; so also, is another and larger collection issued in 1799. Mr. de Quetettle prepared and issued a new edition of the hymn-book in 1818, in various sizes. In the same year he translated and published a work on Jesus and the Life of the Son of Righteousness; and also, issued French translations of other sermons by John Wesley. He translated the Life of William Bramwell into French, and published it; besides which he was for thirty-four years the editor of the Methodist Magazine, in French. The Rev. Matthew Gallienne became the editor after Mr. de Quetettle.

Francis Farjat, who served the ministry from 1842 to 1856, published a volume of 150 pages, 18mo, on the Spirit and Tendencies of the Christians called Methodists:—also a small volume, Notice sur Louis Jaurmes:—also a Biography of Madeleine Marie Temple (18mo, 60 pp.).

L. F. Galland, who began to itinerate in 1881, issued a pamphlet appeal of 90 pages: "Know You the Truth of Christianity?"

Matthew Gallienne, who began to itinerate in the French ministry, published, in 1846, a "Collection of Hymns for Sunday-schools, edited conjointly by himself and Mr. Handcock. He also issued, for four years, a monthly periodical called Le Missionnaire, which would have done much good had it been patronized. As the editor of the French Methodist Magazine, Mr. Gallienne rendered great and permanent service up to the time of his death.

Philip Guiton, who has now been forty years in the ministry, published, in 1846, Histoire du Methodisme Wesleyen dans les Ile de la Manche:—in 1864 he published a French translation of Rev. William Arthur's Tongue of Fire.

William J. Handcock, who travelled many years in the French Conference from 1838, published in French a Summary of the Laws, Organization, and Discipline of the English Methodists, in 1838, a pamphlet of 50 pages:—also An Exposition of the First Epistle of St. John, in 1861.

James Hocart has devoted forty-six years to the itinerant ministry in France. He has published five sermons on special occasions—namely, Faith the Indispensable Condition to Success in the Ministry:—The Good Fight, preached at the ordination of Henry T. de Jersey in 1862.—The Christian Pastor:—Part of Heart:—and The Young Servant of Christ Encouraged. He has also revised a new edition of Mr. Wesley's Sermons.

John Wesley Lelièvre has translated and published in French Mrs. Thebeau Palmer's Way of Holiness:—and Faith and Its Effects:—also a small book, The Death of Elisha.

Matthew Lelièvre published in 1865 the Life of John Louis Roscan, the French Missionary, which has recently been translated into English by Rev. J. A. French, A.B., and published at the Wesleyan Conference Office, under the title of the Alpine Missionary. He has also translated and published, in French, The Life of John Hunt, Missionary to the Cannibals:—The Life and Work of John Wesley, a valuable biography, which has been published in English, also, at the Conference Office:—also a Life of Paul Lelièvre (1868, 133 pp.).

Luke Pulford, who has now completed forty years of itinerancy in France—commencing his labors in 1841—has published a Harmonized Collection of Tunes and Chants for Three and Four Voices:—also a Collection of the Proper Names in the New Testament, dedicated to the fathers, mothers, and children.

John Louis Roscan, the Alpine missionary from 1834 to 1860, published Christian Perfection Explained from Scripture. This was translated into English by a lady, with the title The Path Made Plain. He also published an essay on Class-meetings and Christian Experience.

William Touse, one of the apostles of French Methodism, published several Sermons in French:—Memoirs of Mrs. Elizabeth Ayres:—and Rev. Richard Bobart, one of the first missionaries to France:—also An Account of the Wesleyan Mission in France:—and Among the French Soldiers. He was sixty years a preacher.

IV. Presidents of the French Conference. —Charles Cook, D.D., six years;马修·卢思, twelve years; Louis, twelve years; Philibert Hocart, twelve years; Luke Pulford, twice; Emile F. Cook, A.B., twice; Jean Paul Cook, A.B., twice; William Cornforth, twice—the first in 1852, the last in 1881. (G. J. S.)

WESLEYAN CONFERENCE, Insan. This is a convenient, if not exact, designation of the body of Methodists in the Insan.

I. Origen and History. —It is a curious and interesting fact that the Palatines, a body of German emigrants, were the cause of introducing Methodism into Ireland, and it is equally interesting to know that some of those very Palatines were the originators of Methodism in America. About the year 1709, these emigrants, a set of sturdy Protestants, were ruthlessly persecuted by the Romish bigots under Louis XIV, and compelled to leave their paternal home in Germany. Some thousands settled in England, others went to New York, and then to the Barbadoes, where the Rev. Lord Southwell's estate in the County of Limerick, Ireland. Each family was allowed eight acres of ground on lease, at five shillings per acre; and the government, in order to encourage the Protestant interest in the country, engaged to pay their rent for twenty years. The leases were long; the living small; and the allotment rents were demanded, and the title of emigration set in about 1760, which led some of the best families to find a home in America; and soon afterwards Methodism was commenced in New York by some of those emigrants.

Methodism was introduced into Ireland in 1747 by a lay preacher named Thomas Williams. He formed a society in Dublin; and during the same year John Wesley made his first visit to Ireland, examined personally the members gathered into fellowship, and found them strong in faith; and wrote respecting those who gathered to the ministry, "What a nation is this! every man, woman, and child, except a few of the great vulgar, gladly and patiently suffers the word of exhortation." Crowds gathered to hear him, including many wealthy citizens. He wrote in his Journal in August, 1747, "If my brother or I could have been here a few months, I doubt not we might not have been a larger society in Dublin than even in London itself." After spending two weeks among them, he returned to London, and immediately afterwards sent his brother Charles, and Charles Perronet, of Shoreham, who remained more than half a year in the country reaping much fruit.

At Christmas following, John Cennick preached a ser-
mon in Dublin on "the babe wrapped in swaddling clothes." A popish hearer, ignorant of the Bible, deemed the text a pure Protestant invention, and called the Methodists "Swaddlers"—a title which clung to them for several generations. During Charles Wesley's visit many riotous proceedings were witnessed from the papists opposing the Methodists; people were killed, and mock trials were held, and the rioters escaped, the papists being so much in the ascendancy. God owned the words of the preacher. Charles Wesley was firm, so were his followers, and firmness was no badge to the infant society. On the public Green, out of doors, Mr. Wesley often had as respectable a society as at the Foundry; and the power of the Holy Spirit was so manifest that the prayers and cries of the penitents often drowned the preacher's voice. Additions were made to the society almost daily, and the bulk of the communicants at St. Patrick's were usually Methodists led there by Mr. Wesley himself. During that visit Charles Wesley often preached five times in one day; he collected subscriptions, and had a better chapel erected. The Gospel reclaimed the people from error and sin, and the persecution bound them together in bonds of affection.

During that visit Charles Wesley travelled abroad into the country. The singing of the Methodists had a most winning effect on the Irish people. A good work was begun in many places, and in some a spirit of transformation was early noticeable. This was the case at Tyrrell's Cross. The people there had been wicked to a proverb; they became entirely changed. In some places the dragons had to be called for their protection; the soldiers became converts, and were the cause of spreading Methodism. When John Wesley returned to Dublin in March, 1748, Charles left for England, with the blessings of hundreds of converts.

Robert Swindells, a lay preacher, accompanied John Wesley, and, being especially adapted for both the work and the people, was made a great blessing. Mr. Wesley began his morning preaching every morning at five o'clock—a plan not congenial to the dilatory Irish; but they crowded to hear him in most places. During this second visit he found out more of the real Irish character, and formed no sanguine hopes of the success of Methodism among the Irish. He tried both persuasion and threatening in his sermons; but the people, while easily touched, neither understood, nor had time to digest any portion. What was Mr. Wesley's discovery in 1748 was the experience of Henry Moore in 1788, and also of Gideon Ouseley in 1828. The same may also be said of the Irish people to-day. Traversing Ireland for several months, so numerous societies were formed, and half a dozen excellent preachers from England were laboring among them.

Charles Wesley returned to Ireland soon after John left, and he revisited the places into which he had introduced Methodism a year previously. In Cork he observed a great moral change had come over the people. Swearing was now seldom heard in the streets, and the altars and churches were crowded with devout worshipers. He preached to ten thousand people out of doors; even the clergy came to hear him. Returning to England, a fierce storm of opposition was raised against the Methodists in Cork, and led by a ballad seller. The mayor of the city favored the persecutors; and when the Methodists applied for protection, the mayor said in reply that "the law protected the priests, but not the Methodists;" after which declaration, publicly, the rioters became furious. The whole city was excited, and Wesley and all his preachers who had been in Cork were charged before the assizes as persons of ill-fame and vagabonds. The judge soon discovered the nature of the case and the character of the witnesses, and the case assumed a better aspect in court; but the mischief done at Cork that year was not remedied for many years afterwards. The preachers were vindicated; yet two years afterwards, when John Wesley was again in Cork, he was assailed with terrible violence; but God has his own way of defending those who do his work. When the mayor encouraged the rioters, some of the soldiers were converted, and they bore down all opposition to the preaching service. Protection was thereby secured, and the work prospered. Methodism took permanent root in that city; and in 1755 Mr. Wesley was received by the mayor at the Mansion-house; and his visit to the place was then considered an honor to the city.

The church at Limerick was by Robert Swindells, in March, 1749. He had been in Ireland just one year, and had accompanied John Wesley in his tour, and had learned much of the character of the people. He also accompanied Charles Wesley in his Irish journeys. Swindells had not a gracious reception at Limerick; but, though he had a small audience, he preached daily on the Parade, which was at that time a courageous act. In his congregation one day was a young man, educated for the Romish priesthood, who was convinced of sin so deeply that he could not rest away from the Methodist services, and who a few weeks after was converted, and joined the society at Newmarket in 1749. That young man was Thomas Walsh, the first-fruit of street-preaching in Ireland, one of the most pious, useful, and accomplished preachers Methodism ever had in her ranks.

Philip Guier, one of the Pioneers, was another convert to the Gospel. He was in Ireland for the first time in 1748. He carried his religion to the little colony among whom he resided. Mr. Wesley's preachers were invited to preach among them. The colonists greeted them and welcomed them with joy, and soon a society was formed with Guier as the leader of the small church.

In 1752 Mr. Wesley was again at Limerick, on which occasion he convened the first Irish Conference. There were present John Wesley, J. Tarwood, J. Haughton, Joseph Cowley, J. Fisher, Thomas Walsh, Jacob Rowell, J. Keay, Robert Swindells, J. Whitgood, and J. Morris. These, excepting J. Morris, were Wesley's staff of preachers in Ireland in the middle of the 18th century. In 1756 Mr. Wesley again visited Limerick, and now for the first time preached in Bellington, the home of Philip Embury and Barbara Heck, both of whom were members of Wesley's congregation. Much of the future of the Methodism in Ireland depended upon that visit and those sermons, with Embury and Heck as part of his audience. Wesley says of that service, in his Journal, "I found much love among this plain, artless, serious people. The whole town came together in the evening, and praised God. I thought many of these people would bear the Gospel as it was brought to them. I heartily joined with us in the walk in the light of God's countenance; yes, and have divided themselves into classes in imitation of our brethren, with whom they live in perfect harmony." Here are the gnomes of that Methodism which ten years later originated the first Methodist society in New York, and in America. At the first Irish Conference Mr. Wesley suspected one of the preachers of a Calvinistic leading, of which, he observed, he had as great a dread as he had of the plague. In 1758 Mr. Wesley again held a conference in Ireland, at which fourteen preachers were present; and though it was a much smaller meeting, the proceedings is compressed within a few lines, yet it is most satisfactory. In 1760 Mr. Wesley was again among the Palatines, when he observed the ravages of emigration. How little did he then foresee what immense advantages would follow that emigration! else he would have used other words to describe those preachers who were converted to Methodism in America. Popish influence was unsurprisingly exercised to oppose the progress of Methodism in Ireland. Mobs continued to be gathered, assuming often frightful and perilous severity; while at other times Providence, in a remarkable manner, delivered the worshippers. Once at Clouna, a popish rabble violently assaulted the Methodists in the market-place, when suddenly a veteran
Scotch military pensioner took his post by a tree in the market-place, musket in hand, declaring he would shoot the first man who disturbed the meeting. The terrible earnestness of the man awed the people into submission; and he kept guard there regularly for several weeks.

Ireland was helpful to America in more ways than historians record. Soon after the first society was formed in New York, Charles White and Richard Sause, two Dublin Methodists, arrived in New York; and they were librarian, by invitation to John Houst Chapel. Several years afterwards Richard Sause recrossed the Atlantic, settled in London, and became one of the trustees of Mr. Wesley's chapel in the City Road, where he was interested.

Methodism won many converts from popery, as well as from theぱparanities of Ireland. Mr. Wesley sent to that country some of the best preachers he had; and with unerring zeal they labored year by year, witnessing alternately vicissitudes and progress; but the root of Methodism was fixed in the soil, and there can be no doubt that it saved Protestantism in that country. In 1775 the visit of the death of Dr. Coke was mourned by the other Irish family named Lawrence, removed to Canada, and they introduced Methodism into that country. In 1775 Lawrence Coughlan, another Irish Methodist, with two others, founded Methodism in the Norman isles; while Remington, another Irish Methodist, established Methodism in Canada. In England itself the Methodists flourished Methodism in every part of Ireland; but that emigration has resulted in an amount of extension which never could have been realized by other means. Methodism was often carried to and planted in the new homes of emigrants years before it would have reached them by invitation. Ireland has peculiar claims on those countries to which its emigrants have carried their religion. During Dr. McClintock's visit to his family homestead, in the County of Tyrone, Ireland, he went into a humble cabin inhabited by a poor widow. A friend introduced the doctor as from America. Instantly the aged widow's fading eye brightened as in her early days, and she said, instantly, "America? Ah, then, sir, do you know our Eliza?" That may be thought to be a simple question; but remembering that there is scarcely a homestead but has its representative in America, such sympathy is easily accounted for.

In 1789 Mr. Wesley presided for the last time at the Irish Conference, then composed mainly of Irishmen, those English preachers who had done such good service having been returned to their own Conferences. Mr. Wesley's record is worthy to be transcribed. He saw it never had between forty and fifty such churches together in Ireland before, all of whom have reason to hope are alive to God, and earnestly devoted to his service, men of sound experience, deep piety, and strong understanding. As for foreseeing his own death, Mr. Wesley sent Dr. Coke, in 1789, to hold the first Conference formally. Dr. Coke took that nomination as the yearly president of the Irish Conference, and he continued to occupy that position, in conjunction with John Crook and Dr. Adam Clarke, to the end of his life. In 1790 there were in Ireland 15 circuits, 67 preachers, and 14,000 members. No minutes were published of the early Irish conferences, apart from those of the English Methodists.

Historical accuracy makes it necessary to name an unpleasant dispute which arose in an informal conference held by Mr. Wesley in 1778, to consider and determine a dispute which had arisen among his societies in respect of the separation of the Methodists from the Church. The Rev. Edward Smythe had been driven from the Irish Church for his Methodist preaching. He had joined the Methodist ministry and had insistently urged the need for separation from the Church. Mr. Wesley heard the arguments, but ruled that separation was not desirable. He visited Ireland more than twenty times, and nothing gave the Methodists there greater pleasure than to see him and to hear his voice. His last visit was attended by circumstances which were not of an encouraging nature. Dr. Coke had been raising his salary, and he introduced changes in church hours. This innovation was stoutly resisted by the leading laymen, of whom Mr. Arthur Keene and Mr. Richard O'Dlier were the chief. They presented a memorial to Mr. Wesley against the action of Dr. Coke. Letters and memorials followed in quick succession, and Mr. Wesley in the council again put the proposed change, while Dr. Coke had a considerable following among the people of his way of thinking. The result was, before Mr. Wesley's death, a divided society in Dublin. After Mr. Wesley's death, Dr. Coke was able to urge his opinions with more determination, and they served to alienate from the doctor some of his dearest and best friends in Dublin, and the progress of the work of God was proportionately hindered. In 1790 Mr. Wesley was pleased to know that in Dublin he had one of the largest societies in his connection, very few being larger.

Dr. Coke became the apostle of Ireland after the death of Dr. Coke. In the visit of the death of Dr. Coke, the other Irish family named Lawrence, removed to Canada, and they introduced Methodism into that country. In 1775 Lawrence Coughlan, another Irish Methodist, with two others, founded Methodism in the Norman isles; while Remington, another Irish Methodist, established Methodism in Canada. In England itself the Methodists flourished Methodism in every part of Ireland; but that emigration has resulted in an amount of extension which never could have been realized by other means. Methodism was often carried to and planted in the new homes of emigrants years before it would have reached them by invitation. Ireland has peculiar claims on those countries to which its emigrants have carried their religion. During Dr. McClintock's visit to his family homestead, in the County of Tyrone, Ireland, he went into a humble cabin inhabited by a poor widow. A friend introduced the doctor as from America. Instantly the aged widow's fading eye brightened as in her early days, and she said, instantly, "America? Ah, then, sir, do you know our Eliza?" That may be thought to be a simple question; but remembering that there is scarcely a homestead but has its representative in America, such sympathy is easily accounted for.

In 1789 Mr. Wesley presided for the last time at the Irish Conference, then composed mainly of Irishmen, those English preachers who had done such good service having been returned to their own Conferences. Mr. Wesley's record is worthy to be transcribed. He saw it never had between forty and fifty such churches together in Ireland before, all of whom have reason to hope are alive to God, and earnestly devoted to his service, men of sound experience, deep piety, and strong understanding. As for foreseeing his own death, Mr. Wesley sent Dr. Coke, in 1789, to hold the first Conference formally. Dr. Coke took that nomination as the yearly president of the Irish Conference, and he continued to occupy that position, in conjunction with John Crook and Dr. Adam Clarke, to the end of his life. In 1790 there were in Ireland 15 circuits, 67 preachers, and 14,000 members. No minutes were published of the early Irish conferences, apart from those of the English Methodists.
at once communicated with the lord-lieutenant, who sent out the soldiers to meet the rebels, and they were defeated and the city saved. Dr. Coke came to Dublin, in order to prevent the people from travelling. At the Conference, it was resolved to establish home missions, in order to provide preaching for the people in their native language. The two missionaries first appointed were James M'Quigg and Charles Graham. The former was both a scholar and an able preacher. He toiled as a missionary till his health broke down from disease, and he was unable to carry on the preparation and editing of the Bible in the Irish tongue, which the British and Foreign Bible Society published. He brought out a second edition, and, while preparing a third edition for press, closed a career of toil and suffering, leaving behind, in that Irish Bible, a work which was a blessing to thousands after his death. Charles Graham was a man of dauntless Irish courage. At twenty-five his eyes were opened to see his lost condition. He had been both Churchman and papist, but, finding no soul-rest till he found Methodism, his character was soon discovered by Mr. Wesley, who sent him out as a missionary in Kerry County. Few of the County evangelists had more trials than Graham, and few knew better how to meet and conquer them. Bartley Campbell was another who had been an ardent papist, and became an eccentric but enthusiastic missionary. More extensively useful than any who had preceded him in mission work was Gideon Ouseley, who devoted a large part of his life to spreading divine truth in the form of Methodism among the Irish people. The Life and Labors of that eminent preacher and defender of truth, by the Rev. William Arthur, has perpetuated his character and work. He and Graham often travelled together and ministered to the souls of the people. In fifteen years fully ten thousand members were reported at successive conferences as having emigrated to America. Nor was this the only drawback to the progress of the work. In 1801 the English Conference, unable to meet the claims of its own societies, and having to borrow money to sustain its own agencies, was obliged to discontinue the pecuniary assistance it had cheerfully rendered the Irish Conference. Dr. Coke immediately visited Ireland. To provide for that emergency a fund of £1200 was raised by special effort, out of which the debts were paid, and the Conference was enabled to raise money. The institution was of great utility to the cause; but instead of being financially helpful, money had to be borrowed to keep it going, and soon the debts were £8000, the interest on which absorbed all the public collection on behalf of the book-room. The preachers roved from place to place, and in three years were enabled to reduce the debt. Their difficulties from limited resources continued nearly twenty years, and after the division in the society in 1818, the burden on the Irish preachers became so oppressive that the English Conference generously granted them £600 a year from the contingencies of that debt was raised, and in 1828 the Irish preachers again taxed themselves, and by a special effort raised £1850 towards clearing off the £8000 still remaining of debt. During the year following the people raised £7200, so the debt was cancelled. But who can tell the sacrifices the preachers had to make to bring about the deliverance of the Irish Methodists from their agencies? During sixteen years they almost staggered under heavy financial burdens, but they slackened not in their devotion for the salvation of their benighted countrymen.

The great trouble of the Methodists in Ireland was the sacramental question. Unlike their English brethren, they were barely content with their position as a society without full church privileges. When the English Methodists agitated for and obtained permission in 1797 for their ministers to administer the sacraments, the Irish, having Dr. Coke and Mr. Averell so frequently with them to administer the sacraments, did not claim for their preachers generally their full pastoral rights. After the death of Dr. Coke the members in society had so often to be taken either to Church or to the Presbyterians for the sacraments, according to the leaning of the preacher, that they became greatly dissatisfied, and in 1816 there arose a strong determination in the minds of many of the people to have the sacraments from their own ministers. There was also another party equally determined to abide by the old rule and go to Church for the ordinances. For more than two years the contention continued, both parties being equally determined to have the sacraments. The Rev. Adam Averell had long been the apostle of the Irish Methodists, travelling constantly among them, giving his money, relieving their sufferings, directing their official meetings, and administering the sacraments. Several thousands resolved to adhere to the old plan, and at the Conference of 1816, Dr. Adam Clarke presented the plan of the Rev. Adam Averell and Mr. Tobias were the chief speakers—the former for the latter against, continuing the old plan. Throughout the societies the people were divided, and in the autumn of 1816 a Conference was held at Clones of those representing those two old parties. The hope of avoiding a separation, there was too much hesitation and deliberation. In 1817 two conferences were held, the second one at Clones, presided over by Mr. Averell, who was unanimously chosen their president. The main body of the preachers voted for the sacraments; the parish was divided, but Averell had the majority. The plan of the Rev. Adam Averell and Mr. Tobias was presented to the Conference. In January, 1818, a meeting of representatives of circuits was held at Clones, when those who adhered to Mr. Averell and primitive custom resolved on a form of general principles, and formed the Primitive Wesleyan Methodist Society. They were not a Church; their object was to maintain internal independence, and to retain ministerial titles, and performed no proper ministerial functions. They preached to the people, and led them to other churches for the ordinances. In that uncertain condition they certainly prospered for a time, and during 1818 over two thousand members were added to them, and in 1819 over four thousand additions were made. This section of the original society was led by Mr. Averell during the rest of his protracted life. In years following they maintained their separate condition amid various vicissitudes, and for just sixty years they endured hardships and privations greater than those to which they were subjected for the first time at the Conference of 1874. In the address from the Irish to the English Conference of that year is this record, "This Conference has been notable for the consummation of the union with the Primitive Wesleyan Society, so long under consideration. The final dissolution of the separateness of the sacraments is begun, and good feeling, and the decision arrived at with a hearty unanimity. When the two conferences came together it was a time long to be remembered, and it was evident to all that the spirit of God was eminently in their midst. The only breach which has occurred in the Union is with the Irish Hibernian Society." The parent society was known for some time as the Sacramentarians, because the preachers had voted them-
selves to the privilege of administering the ordinances of baptism and the Lord's supper—a privilege they ought to have had from the first. The vote carried with it an immense amount of pecuniary loss and hardship to the society, and for the year 1874, an annual decrease of members was reported, and in 1872 no less than 7500 retired; but in 1819 they had an increase of over 3500, and the Separatists had an increase of over 4000, so that neither party could claim plenitude of apparent want of success. The greatest hinderance to prosperity was the continued emigration from Ireland to America, by which for many years the society lost not less than a thousand members annually. The yearly visits as presidents of their Conference of such preachers as Dr. Adam Clarke, Richard Reece, Richard Watson, Dr. Bunting, Robert Newton, and other leading ministers from England, greatly encouraged the patient toilers. Their financial privations were very great; but they labored most energetically, though it was uphill work all the way; yet in 1839, the centenary year, they numbered over 150 preachers and more than 26,000 members. During the same year they contributed £145,500 to the Pension Fund, and that liberality in their poverty was marvellous, and shows the spirit of self-denial which animated them all. In addition to all this effort, they established schools in Dublin, Cork, and Belfast, and, aided by the munificent contribution of the American Methodist episcopal Church, established a Methodist College at Belfast. The Wesleyan Connectional School in Dublin, opened in 1845, was to secure to Methodists in the South a high-class education. The college in Belfast, opened in August, 1868, combines both a public-school and college. In the former, boys are prepared for a collegiate course of training; and in the college two classes of students are received—one consisting of candidates for the ministry, the other those intended for commercial pursuits. Undergraduates of the Queen's University also attend its classes of instruction.

Wesley had been heroic in their ranks, who have fought and labored with marvellous zeal and energy. Charles Graham was a gray-headed veteran of seventy-four years, who died in triumph in April, 1824. William Hamilton broke down in 1816, but he ceased not to labor until October, 1843, when he closed a ministerial career which spread over nearly six decades. Judge Ouseley was abroad preaching out-of-doors at seventy-four, active as ever, and delivering twenty sermons in the week. He died a victor's death, in Dublin, May 14, 1835, aged seventy-eight. To these may be added Richard Boardman, James Morgan, Andrew Blair, James McKenna, James Milligan, Thomas Barker (who succeeded Adam Clarke into the ministry), Lanktree, Tobias, Stewart, Waugh, and others. Besides these, how many Methodists from Ireland have entered the ministry both in England and America—such men as Henry Moore, Adam Clarke, William Thompson, Walter Griffith, and William Arbour, all of whom were presidents of both the English and the Irish Conference, and the transplanting of whom impoverished the Church which reared them! Think also of the ministers from Ireland now in America! But these we have not space to name. Irish Methodists have helped to found their denomination in America, Canada, Australia, Africa, and India; and while thus helping others everywhere with their best men, they were left to struggle on, in their own land, with but little help from any but themselves. Irish Methodists have a roll of honor which will never be surpassed in the Church militant; and in the Church triumphant they will receive greater reward than those whose names have just been given, and hundreds of others who were their colaborers and joint sufferers. Rev. William Cook, D.D., has a copious history of Irish Methodism nearly ready for publication.

In 1877, as a preparation for the union with the Irish Primitive Methodists, the Irish Methodist Conference first admitted laymen to participate with the ministers in the Annual Conference. This act of grace was done in Ireland one year before it was adopted by the English Conference. In 1878 the Primitive Wesleyan Conference came in a body to the Conference of the parent society, and the union took place. The Primitive Wesleyan Conference, ever had at one time was in the year 1814, when the agitation commenced for the sacraments. That year the membership was 29,398. The year 1818, when the separation took place, there were reduced to 15,002. The society never fully rallied from the shock that division caused. In 1844, when in their divided state, the parent society numbered 28,460; but having to struggle against the continued drain arising from emigration, when the two societies were united in 1878, they only reached a total of 25,487 members, and at the present time they are below that number. A careful examination of the statistics of the body will enable the reader to understand the difficulty of the preachers in laboring in such various discouraging forces. The disruption which took place in England in 1844 reached Ireland in its paralyzing influence, and the Irish Conference, which in 1849 had a membership of 22,000, in 1855 had been reduced to a little over 18,000. The highest number of members reported by the Irish Conference during the thirty years following 1849 was only 23,500 in the year 1861.

III. Literature.—But few of the Irish Methodists, preachers, as such, have had either leisure or disposition to make free use of the press. Some preachers who left Ireland and joined the English Conference have made considerable use of it, but not extensively. Dr. Adam Clarke, Henry Moore, William Arthur, A.M., William Myles, and James Creighton have each left their names permanently in the annals of English literature. With two or three exceptions, the literature of Ireland has not been much enriched by the preachers: not from want of ability, but owing to more pressing duties.

Rev. W. P. Appelbee, LL.D., has published three pamphlets: one on The Genuineness and Authenticity of Holy Scripture; one Calvinism Not the Theology of the Bible; and A Vindication of the Wesleyan Catechism. John George Alley has published Our Class Meetings, Their Scriptural Authority and Practical Working (1868, 136 pp.).

Rev. J. C. Bass has published a poem, Life's True Altitude; or, Who is Wise?—also, Glimpses in America.

Rev. Robert G. Cather, LL.D., made very free use of his pen in newspapers, as secretary of the Systematic Benevolence Society.

Rev. G. W. Campbell, A.M., has become widely known by his Life of the Rev. Charles Graham, published in 1868 as The Apostle of Kerry (500, 324 pp.).

Rev. William Crook, D.D., is the most prominent author not on our list with the exception of John Nelson. He has published, Funeral Services, on the death of his father:—Christian Consolation in Relation to the Dead in Christ, a sermon for W. H. Barkin;—The Memory of our Fathers, sermon on the death of John Nelson;—Our Heavenly Home, sermon for John Carey;—Paradise; or, The Present State of the Holy Dead, a sermon;—Lay Preaching in Ireland, and the New Gospel;—Ireland, and the Centenary of American Methodism, an octavo volume of 293 pages. He has in press a History of Methodism in Ireland (in 2 vols.). He has also been the editor of the Irish Exponent for many years.

Rev. John Dwyer has published Christian thoroughness, a memorial of T. A. Shallington, Esq., of Portadown.

Rev. Thomas Pearson is the author of, The Irish of the Irish Church, published anonymously, and a work of deep research:—The Bible and Temperance; or, The True Scriptural Basis of the Temperance Movement. This is one of the shortest and most concise works on the wines of the Bible, an octavo volume of 296 pages issued in 1881.

Mr. Ouseley himself was the author of thirty-four separate publications, with his name attached. They were chiefly letters of a controversial character, which were clear, powerful, and convincing; and were of immense service, when published, in opposing the spread of popery, and in defending Methodist agency in Ireland. The two principal works published by Mr. Ouseley were, Old Christianity against Popul Novelties, an octavo volume of 446 pages;—and Calvinism-Arminianism (1818, 18mo, 220 pp.).

Rev. George Vance has published a pamphlet, Calvinism Not the Theology of the Bible.

Rev. Samuel Weir, in 1867, published a small volume, 18mo, Omerod to God.

Rev. G. E. Wedgwood has published a lecture entitled Liberty. (G. J. S.)

(Wesleyan) Methodist New Connection, a body of religious communicants which separated from the regular Wesleyans on questions of ecclesiastical polity.

I. Origin.—The opinion has been held, and is still prevalent in some localities, that the Methodist New Connection had its origin in personal sympathy with Alexander Kilham. Such is not the fact. Most of those who joined it did so at the instance of their ministers, who were influenced by the publications and public addresses of Mr. Kilham, but the Connection as such originated in principle, not in sympathy. The Methodist New Connection was originated by a contest for the establishment of the following important and scriptural principles:

1. The right of the people to hold their public religious worship at such hours as were most convenient for them, without their being restricted to the mere intervals of the hours appointed for service in the Established Church.

2. The right of the people to receive the ordinances of baptism and the Lord's supper from the hands of their own ministers, and in their own places of worship.

3. The right of the people to a representation in the district meetings, and in the annual conference, and thereby to share in the government of the community and in the appropriation of its funds.

4. The right of the Church to have a voice, through its local branches, in the regulation of members, the choice of local officers, and in the calling-out of candidates for the ministry.

Not any of these privileges were originally enjoyed in the parent body; they were for years zealously contested by the fathers and founders of the New Connection; and when they could not be fully obtained, conscience compelled those men to secede from the parent community and originate a distinct denomination in which such scriptural privileges could be freely enjoyed.

The power of Mr. Wesley was absolute, but it fell into his hands unsought and undesired. It was exercised by him with affection, and solely for the best interests of his societies; and retained from the same motive. He was the father of the community, and was nominated for a time to be its sole administrator and governor; or, but for his proffer it was for him to exercise that power during the infancy of the Connection, yet, when surrounded by churches which had grown to maturity, and assisted by ministers and laity of acknowledged wisdom, integrity, and piety, whose existence and happiness were bound up with the success of Methodism, it would have been more conformable to the example of the apostles and the dictates of sound reason to have gradually relaxed his hold of the reins and admitted others to a participation of the same, and finally to have framed a liberal constitution defining the rights of the members and the officers of the Church, securing both by suitable regulations and wholesome laws. Mr. Wesley's mind was well qualified for this, but he did it not. He retained absolute power until death; and, instead of framing for the community a liberal constitution, he transferred by legal settlement to the churches the power to ordain the preaching of the gospel, which before was only custom, and custom arising from the peculiar relation in which he stood. He made those his successors in absolute power who could not possibly be his successors in paternal relation and influence. That exercise of power was the subject of many remarks and much criticism. According to some, the origin of the Methodism of Mr. Wesley had to defend his conduct in this matter, which he did in these words:

"Some of our helpers say, 'This is shackling free-born Englishmen;' and they demand a free conference, that is, a meeting of all the preachers, wherein all things shall be determined by most votes. I answer, It is possible after my death something of this kind may take place, but not while I live. I like to see the preachers have engaged themselves to submit, to serve me as sons in the Gospel; but they are not thus engaged to any man or number of men besides. To me the people in general will submit, but they will not thus submit to any other.""

When Mr. Wesley died, in 1791, only two years after he had written and published the above observations, there were 380 preachers in his society, some with active, others passive, dispositions. Among the former were those who did not hold the same opinion of opinion that the regularly appointed ministers of their congregations, they sought to exercise all the functions which belong to the pastoral office; but to be deprived of the privilege of administering the sacraments was felt by some of the preachers to be a great hardship, while the laity, many of whom were strongly influenced by the regularity of representation in the properly constituted Church courts.

Mr. Alexander Kilham, one of the preachers who had
been specially privileged in his ministerial career, was one of the most able and courageous advocates of what was considered the full rights and liberties of both preachers and people. In 1792 he published an address to the Newcastler Society, to whom he was then ministering, advocating liberal views. His address met with favor from Dr. Coke, Messrs. Bradburn, Powno, Moore, Taylor, Crowther, Bramwell, and others. The Church party among the preachers resisted strongly, and the controversy spread, however, impressed with the conviction that permanent peace would never be established in the body until such a constitution was adopted as secured to the people New-Test. rights and privileges, felt it a duty to make another effort for the attainment of this important object. Under this impression he wrote a pamphlet entitled The Progress of Liberty. In this work he adverted to the course of Mr. Wesley in the progress of Methodism, showing that he had acted from time to time as altered circumstances required; he glanced at the alterations which had been effected since Mr. Wesley's death, and analyzed "the Articles of Pacification," pointing out their defects, etc. In the second part of this work he lays down the "Outlines of a Constitution," which he humbly proposes to the consideration of "The People called Methodists." This outline embraces the following particulars:

First, That instead of the preachers having the sole power to scant and expel members, these acts should be done with consent of the people.

Second, that the members have a voice in choosing their own leaders.

Third, that local preachers, instead of being appointed by the circuit preachers, should be examined and approved by the leaders and quarterly meetings; with which meetings also should rest the power of receiving and dismissing them.

Fourth, that as it was impossible to allow the people to choose their own ministers on account of the itinerant plan, yet these meetings should have a voice in recommending preachers to travel.

Fifth, that the preachers appointed by the quarterly meetings should attend the district meetings.

And, lastly, he proposes, "with subscription to the preachers and the connection at large, to appoint one or two lay delegates from every district meeting to attend the Conference."

Such were the propositions of Mr. Kilham, and such were the principles adopted as elements of the constitution at the connection at large, which remain its essential and distinguishing features at the present day. Many of them have since been substantially adopted in the other Methodist bodies. Nevertheless, for publishing the pamphlet advocating these principles of freedom, Mr. Kilham was tried and expelled from the connection (1796). Being left without a circuit, Mr. Kilham published a detailed account of his trial and expulsion, which sold extensively and was read eagerly. It created a strong feeling of sympathy towards the expelled, who was welcomed in many circuits to preach to and address the people. Several large societies expressed their adhesion to the principles Mr. Kilham advocated, and in May, 1797, a chapel was purchased in Leeds, where he gathered large congregations and preached to them.

The Methodist Conference of 1797 was occupied during its session with the altered circumstances arising from their refusal of the liberties which had been asked by deputations from the people. A Plan of Pacification was drawn up and published by the Conference, which was one of the most important proceedings connected with the history of Methodism. As, however, that plan did not concede all that the people desired, three of the preachers signed—William Thom, Stephen Eversfield, and Alexander Cummings—and united with Mr. Kilham. These brethren, with a number of delegates from the people, met together in Ebenezer Chapel, Leeds, on Aug. 5, 1797, when Mr. Thom was elected president, and the Kilham majority, and the basis of a constitution was adopted in conformity with the principles which had been publicly advocated. The full development and formal statement of these principles were reserved until the ensuing conference.
and another; four of the members are preachers and three are laymen, one year, and rice vera the following year. It is the duty of this committee to see that the resolutions of Conference are carried into effect; to give advice as to the details of dispute and difficulty, and to make provision for such circuit changes as may be necessary through death, new openings, or other causes, need supplies during the ecclesiastical year. A report of its proceedings is prepared by the corresponding member, and annually presented to Conference.

3. Quarterly Meetings.—These meetings are composed of all the circuit preachers in the district, with an equal number of laymen (including the representatives to the last Conference), who are elected by the respective quarterly meetings. These meetings are designed to form and carry out plans for the revival of the work of God in the district; to investigate the condition of the societies, chapels, and Sabbath-schools; and to prepare correct returns of the number of members, probationers, Sabbath-school teachers and scholars, etc., for the use of Conference; to ascertain the amount raised in each circuit for the different Connectional funds; to investigate all claims on the yearly collection and chapel fund; to receive applications for the division of circuits; to examine candidates for the ministry; to lay before the district any resolution of the Conference affecting the circuits, and to ascertain whether they have been carried into full effect. These meetings are designed and calculated to continue during the time of the conference, to strengthen the executive, to secure more correct information on points of local interest than can be done at a greater distance, and to afford a legitimate channel through which many evils may be altogether prevented or speedily rectified.

4. Quarterly Meetings.—These are held in each circuit, and are composed of the circuit preachers, the circuit stewards, the secretary of the local preachers, and representatives of the people chosen from the local preachers, leaders, trustees (being members), and other experienced persons from the different societies. Each society sends one or more representatives according to the number of its members. Any member of society has free admission to the quarterly meetings, with liberty to give his opinion, but without the power to vote. It is the business of the quarterly meeting to pay the preachers' salaries; to determine the amount that each society shall pay for the support of the ministry; to make by-laws for its own regulation and for the management of the circuit, providing they do not contravene the rules of the Connection; to appoint persons to make the preachers' plans for the circuit; to recommend local preachers to be taken into the regular ministry; to elect the stewards for the local ministry, and to examine and decide upon the affairs, both temporal and spiritual, of the circuit generally.

4. Leaders' Meetings.—These consist of leaders, society stewards, or more of the circuit preachers, a female representative for each of the female and circuit preachers' classes, and a representative from the trustees of the chapel, provided such representative be a member of society. Leaders' meetings are held weekly, or once a fortnight, and regulate the affairs of each society and place in respect thereto. It is the province of these meetings to inspect the class-books, and to receive the weekly or other payments; to inquire after the sick or absent members, that they may be visited; to determine on notices for the pulpit; to fix the hours for public worship, and appoint the times for making the collections for special purposes; to select the chapels to receive collections from exhorters or local preachers; to judge and decide upon the fitness of candidates for Church membership; to ascertain whether any members are walking disorderly; and prayerfully to devise plans for the advancement of the work of God, and for the general improvement of the society.

5. Annual Preachers' Meetings.—These are held previ-ously to the circuit quarterly meetings, and are composed of the circuit and local preachers. Their business is, in addition to mutual counsel and encouragement, to consider the recommendations given by the leaders' meetings of preachers employed as local preachers or exhorters, to make suitable provision through death, new openings, or other causes, need supplies during the ecclesiastical year. A report of its proceedings is presented by the corresponding member, and annually presented to Conference.

The religious, social, and society meetings of the New Connection are conducted in the same manner as the like meetings of the Wesleyan body, the parent society.

IV. History.—The incidents of history in the Methodist New Connection are comparatively few, and they relate chiefly to the personal history of the founders and the steady spread of the movement. At the first Conference the number of adherents was five thousand and thirty-seven. Surrounded by difficulties of a more than ordinary urgency and gravity, the society made very slow progress, not so much from want of sympathy on the part of the people as from want of funds and agents to commence new circuits. The new itinerancy commenced with seven circuits and seven preachers. In 1798 seven other preachers entered the ministry Messrs. W. Hasham, W. Styan, John Revil, Charles Donald, W. Driver, G. Wall, and John McClure. That fact inspired the denomination with confidence, and in the next ten years only two hundred and forty-three additions were made to the membership. A monthly magazine was commenced in 1798, which has been continued ever since. The first and second conferences were presided over by Mr. William Thom, the secretary being Mr. Kilham. The Conference of 1799 was presided over by John Grundell, the secretary being Mr. Robert Hall, of Nottingham, a holy man, and a generous supporter of the cause. In December of the previous year the first heavy blow and discouragement came by the unexpected death of Mr. Kilham; many were disheartened, and some among Mr. Wesley's followers were glad, they viewing the occurrence as a judgment upon him personally. All the surrounding circumstances, calmly considered apart from prejudice, show that Mr. Kilham's death was more the result of earnest overwork and exposure in bad weather. Viewed from any human standpoint, the premature and unexpected death was a calamity to the Church of England and the good work for which he lived and labored was considerably retarded by the occurrence. Exactly two months after Mr. Kilham's death, the Connection suffered another serious loss by the death of their very liberal and zealous layman, Mr. Williams Smith, of Hanley, who expired of a stroke of apoplexy on Feb. 20, 1799. His death was a great blow to the connection, and his death bringing up Mr. Wesley's society, but his sympathies were with Mr. Kilham, whom he visited at Nottingham Dec. 19, 1798. He was born at Walsall, Staffordshire, in December, 1768; was religiously brought up; frequently preached as occasion offered; attended the first Conference of the New Connection; opened his house at Hanley for preaching, and soon afterwards had a chapel erected there, which became the central home of one of the largest and most prosperous societies in the Connection.

The Conference of 1799 recognised a society in Ireland, and the Rev. John McClure commenced a cause at Lisburn. The same year the few preachers then associated agreed to contribute ten shillings and sixpence yearly to found a fund for the support of aged ministers.

The Conference of 1808 commenced what is known as the Presentment. It recommended preachers to take the collection in the chapels and private subscriptions. Allowances are made from it towards the support of the children of the preachers in their early years. The Beneficent Fund was originated at the same Conference by Mr. Samuel Higginbottom, of Manchester, who gave fifty pounds as a benefaction, and who became the first treasurer of the fund. The receipts are obtained from public collections and
subscriptions, and its objects are the relief of aged and infirm ministers and their widows. In 1880 the Paternal Fund produced £2698; the Beneficent Fund, £3500. The year 1894 was made memorable by the celebrated Rev. Mr. E. L. Bunting, its president, returning from a visit to the New Connection. He travelled for eight years in that body, and they claim the honor of bringing that extraordinary man out of obscurity. Two of the sermons in his published works were first preached in New Connection chapels. During his itinerancy with them he was a member of the Annual Conference, and three times secretary of the Conference. Dr. Bunting reintroduced him into the Wesleyan body, but he ever held in very high esteem his brethren in the New Connection.

In 1808 the law was made which requires preachers, at the end of their probation, to answer in public questions relating to their religious experience, call to the ministry, their doctrinal views, etc.

It will be instructive to the present race of Methodists to read the financial conditions on which Methodist preachers consented in 1812 to devote themselves wholly to the ministry. Serious complaints had been made respecting the inadequacy of the income of the preachers to meet their necessities. A committee was appointed by the Conference of 1812 to examine and report thereon. After a candid consideration of the subject, it was resolved that, in addition to the use of a house and furniture at the expense of the circuit, every married preacher was to receive, instead of the usual £12 per quarter; "not less than £2 per quarter for a servant"; and, in addition to these items, "not less than 1s. per week for board." The allowance from the Paternal Fund for boys under eight years of age, and for girls under twelve, to be £6 per annum; then they retire from the fund. Charge for medical attendance and travelling expenses are to be paid by the quarterly meeting. Considerable uneasiness and anxiety was felt in many parts of the Connection in the years 1814–16 with regard to the legal safety of some of the chapels which had belonged to the parent society before the year 1797. These anxieties were not favorable to the spread of the word of God.

In 1814 a Home Mission was established to introduce Methodism into new localities. The sum of £242 was given by the circuits to aid that mission. In 1824 the mission was relinquished, and Ireland was selected as the mission field. In 1825, one of the English preachers was appointed to superintend the work. It has continued with varying success to the present time. In 1880 there were seven stations in Ireland, with a total membership of 715, being only an average of 102 members per station. The home missionary operated from 1848 to 1853, and in 1880 they occupied eleven stations in England, with a membership of 1249, and for their support the circuits contributed £1158 during the year 1879–80.

In 1823 the general rules of the Connection were considered, amended, and published, with the sanction of the Conference.

The same Conference ordered the publication of a monthly magazine for Sunday scholars at the price of 2d. The Conference of 1827 ordered the publication of a Catechism for the use of children, which was prepared by the Rev. Abraham Scott. A larger Catechism for the use of elder children was written by the Rev. William Cooke, D.D., and published about the year 1848. The same minister is preparing a new and enlarged edition of that Catechism to be published in 1881.

A Connectional magazine was commenced in January, 1798, at the price of 6d. monthly. It has been continued to the present time. To promote the circulation of these several publications, a book-room and an editor were indispensable. The former was located at Hanley from 1798 to 1832, when it was removed to Manchester. In 1827 the Rev. W. Shuttleworth was appointed editor and steward, and the business rapidly advanced. In 1827 the capital stock amounted to £1895, and the annual profits to £113. Five years afterwards the capital was £2500, and the yearly profits over £500, while the magazine was greatly improved; the third series was commenced in 1833. In 1844 it was found expedient to remove the book-room to London, where it has since remained, and the Rev. John Bakewell was appointed editor. In 1848 the Rev. William Cooke, the eminent theologian and divine, was the editor of the magazine, and in that capacity and as book-steward he has rendered more valuable service to the Connection than any other minister. The Rev. Charles Brutwick Ward, D.D., was appointed editor and book-steward in 1880; the capital stock that year was £2280, and the profits £243.

The Methodist hymn-book had been used in the New Connection from 1797. In the year 1834 a new hymn-book was prepared and published, which was intended more as a source of profit to the Connection than as a superior book to the one which it supplanted. This also was displaced by another and very much improved collection, including 1242 hymns, compiled chiefly by the Rev. Henry Piggot, and published in May, 1865. It was at that time the best collection of the great Methodist family. Its marked superiority soon led to the preparation of other improved and enlarged collections for the use of "the People called Methodists."

The years 1836 and 1837 were periods of unrest in many Methodist societies, owing to the trial and expulsion of the Rev. Dr. Warren from the Wesleyan body. At Dudley and Stourbridge large numbers left the Wesleyans and joined the New Connection, adding greatly to their influence and usefulness in those towns. An effort was made to bring all those who had left the parent society into union with New Connection, but some of the Separatists made such radical changes in the constitution a condition of joining that the New Connection decided not to make such concessions, though many changes were made. Those who did not unite with this body formed themselves into a new branch of the Methodist family, known for some years as the Wesleyan Association. They afterwards relinquished most of those extreme views which prevented their proposed union.

The year 1841 was a painfully memorable one to the New Connection, owing to the necessary expulsion of Mr. Barker and his wife. Mr. Barker had used his position to advocate low socialist and infidel opinions. Much mischief was done, for twenty-nine societies, including 4348 members, were lost to the Connection. After trying his new doctrines for some years, he found out the delusion into which he had fallen, returned to the Church three years afterwards, and to the uttermost to undo the mischief he had done. He is said to have joined the Primitive Methodists; wrote and published his autobiography in 1869, in which he recounted all his errors; was reconciled to most of his former brethren in the New Connection; and died in 1879 (or 1880) a penitent Christian. It was not until 1855, fourteen years afterwards, that the number of members in society reached the total at which they stood at the date of Mr. Barker's expulsion. A small work was published in 1841 entitled The Beacon, and also some tracts by the Rev. W. Cooke, D.D., which prevented the breach becoming wider than it otherwise would have been. The Connection suffered greater losses through Mr. Barker's unfaithfulness and treachery than from any other cause in its whole history of over eighty years. The financial difficulties of the Connection became so great and oppressive that in 1842 nearly £3000 were received in aid, and in 1843, and the Conference of that year ordered a special collection to be made through the circuit, which secured £3000 more towards the same object.

The Conference of 1887 originated a mission in Canada, which became a great blessing to that country. Mr. William Ridgway, one of the leading New Connection
laymen, having visited that locality, made such representations of the claims of Canada for the Gospel that the Rev. John Addyman became the pioneer missionary there. He was joined two years afterwards by the Rev. Henry Addyman. Mr. Addyman still survives, having been in the ministry forty-eight years. Dr. Crofts entered into rest in the year 1880. The Canadian mission was a success; but a few years ago, in 1875, it was united to the other branches of Methodism in Canada, in order to make one large undivided Methodist Church in that country. The jubilee of the New Connection was a time of great rejoicing. The Jubilee Conference was held at Manchester, the Rev. Thomas Allin presiding. The sessions commenced June 1, 1846. The first important special business done was the final consideration and adoption of a deed-poll, which provides for the security of the property of the Connection, the preservation of its doctrines, and the continuance of its principles and discipline. By the deed-poll a legal identity is given to the Connection in the persons of twenty-four guardian representatives—twelve ministers and twelve laymen—which is in the deed-poll provision for filling up the vacancies that will necessarily occur. The attendance of six of the guardian representatives is requisite to legalize the Conference. After its adoption, the deed-poll was executed by every member of the Conference; and it has since been duly enrolled in the Historic Register. A model trust-deed, and a form of conveyance of freehold land for Connectional chapels, schools, and parsonages, were also decided upon; and a book - room deed also agreed to, each of them adapted to the deed-poll.

At the end of fifty years, the number of members in the Connection was only 20,002, namely—in England, 13,610; Ireland, 392; Canada, 3460. It was resolved to raise a Jubilee Fund of not less than £20,000, but the result was only £7721. Towards that fund there was raised in 1847 £2829; in 1848, £1557; in 1849, £3492. About £5100 was voted to remove chapel debts, £1300 to promote missions; and various sums were given or loaned to the Paternal Fund, the Beneficent Fund for a theological college, for aged ministers, and to lessen other financial burdens which fettered the agencies of the Church. On June 5 a jubilee tea-meeting was held in the Free-Trade Hall, Manchester, which was attended by many distinguished London and Lancashire laymen and persons. Several important schemes for the extension of the work, which it was hoped the fund would enable the Connection to undertake, could not be commenced for want of finances. One result, however, was attained, which will be a permanent memorial. The Rev. William Griffith, James Bromley, Thomas Rowland, and others. Although in three years more than one hundred thousand members were separated from the parent society, very few of them were attracted to the New Connection. In 1851, the following Conference report to each Conference a decrease, which was a source of much anxiety and solicitude, and a special service of humiliation before God was held at the Conference of 1853. In 1851 overtures were made from the Wesleyan delegates—the seceders from the parent society—towards union with the New Connection, but no union took place. In 1854 an effort was made to change the name of New Connection, as it was then not new, and many thought the name was a hindrance to others uniting with it. It was, however, resolved by the Conference of that year not to change the name, as the new deed-poll had only been adopted a few years. The rules of the Connection were revised in 1854.

The Manchester Conference of 1859 was memorable for the establishment of a mission to China. From a conviction that the encouragement of foreign missions would not hinder home work, that step was taken. The Rev. William Griffith was the president, and by his general advocacy a successful work was commenced in that country, which in 1880 reported 43 chapels, 27 societies, and 902 members, under the superintendence of the Rev. John Innocent, who is the principal of a training institution in China. In 1862 a mission was established in Australia, which has but two societies at present—one at Adelaide and one at Melbourne—with two missionaries and 115 members.

At the Conference of 1860 a Trustees' Mutual Guarantee Fund was established against losses by fire, to include all Connectional property.

A provision for the preparation of young men for the ministry was for some years under consideration. The Conference of 1861 resolved upon having one; and owing to the noble generosity of Thomas Firth, of Sheffield, such an institution was erected at Hammersom, near that town. Its trustees were appointed in 1862, and the college was opened and a tutor selected in 1864. In 1880 there were nine students in residence, who paid £10 per annum. The president of the Conference was the principal and only tutor at that period. The college building cost £710.

The Conference of 1865 resolved that a copy of Bagster's Psalter was to be subscribed for, the deed-poll, and the general rules of the society should in future be the insignia of office of the president, to be handed down in succession. The same Conference resolved that all future conferences of their body should meet on the second Monday in June, instead of Whit-Monday as previously. The latter being a movable day, which was often attended with much inconvenience to both ministers and laymen. Mr. Alderman Blackburn, of Leeds, a wealthy layman, presented to each of the ex-presidents of Conference for fourteen years previously to the year 1863 a copy of Bagster's Bible and the new hymn-book, then first published. A new tune-book, adapted to the hymn-book, was prepared by the Rev. J. Ogden, and published in 1866.

The Conference of 1868 resolved on a new departure from existing usage, and consented to ministerial appointments being continued for five successive years in circuits where two thirds of the quarterly meeting request it. The limit had previously been three years.

A further attempt at union was made at the Conference of 1870, when the terms for a federal union with the Bible Christians were considered, and resolutions were carried on the lines of the Theory of Union. The Conference of 1870 appointed home missionaries of fourteen years' standing be allowed to attend the Conference, but not to vote.

The Conference of 1871 approved of the raising of a fund to extinguish the Chapel Fund debt. The sum of £4673 was raised, which accomplished the object desired.
The Conference held at Manchester in 1872 was presided over by the Rev. Joseph H. Robinson, the secretary being the Rev. J.C. Watts. Both these ministers had spent many years in the Canada mission. Methodist union in Canada was fully considered in 1872, and the union was consummated in 1874.

It was resolved in 1875 to establish a training institution in China for native teachers. The principal is the Rev. John Innocent.

The Conference of 1876 was made memorable by acts of fraternization of considerable interest. The Methodist Church of Canada sent as a deputation to the Conference the venerable and Rev. Egerton Ryerson, D.D., and Mr. David Savage, who presented an address of brotherly fraternization. They were most cordially welcomed.

Dr. Ryerson remained some time in England as the guest of various friends of his connection. His portrait was ordered to be engraved and published in the magazine as a pleasant memorial of his visit. At the same Conference, the Rev. Alexander Clarke, D.D., presented a fraternal message from the General Conference of the Methodist Protestant Church in the United States of America. Fraternal messages were returned to both bodies. The same Conference sent its first fraternal message to the Primitive Methodists of England, which greetings were continued and reciprocated for three years, when, in 1879, the New Connexion Conference, seeing how kindly their written messages had been received, appointed two members of the Conference to visit the ensuing Primitive Methodist Conference, two others to visit the Methodist Free Church Conference, and two others to visit the Wesleyan Conference. Each of the conferences appointed representatives to return to those visits of good-will, and the good work has since been continued with very happy results; and the feeling of surprise now is that such pleasant reunions by representation should have been so long delayed. They serve to facilitate the arrangements for holding the Ecumenical Congress in 1881. At the Conference of 1876, Mr. Mark Firth presented £1000 to the endowment fund of the college, and the home and foreign auxiliary societies were united under one committee of management.

In 1877 a loan fund was commenced for the purpose of aiding church trusts and of encouraging the erection of new chapels.

The Conference of 1880 was remarkable for its record of deaths among the ministers, no less than six of whom, all men of distinction, had died during the year. The names were: Parkinson Thomas Gilton, William Baggallay, Henry Only Crofta, D.D., John Taylor, Charles Mann, and Benjamin B. Turnlock, A.B.

As many as six ministers had never before died in one year.

**Wesleyan Methodists.** See **Wesleys.**

**Wesleyan Reform Union.** This organization had its origin in the expulsion of the Revs. James Everett, Samuel Dunn, and William Griffith from the Wesleyan Conference, in August, 1839, these expulsion.
sions took the people of England, and the Methodist people in particular, so entirely by surprise that the whole press of the country, excepting only two or three papers, took the part of the expelled ministers. Meetings of 15,000 took place in many parts of England, and the popular feeling, fanned by the voice of the press, was in a few months manifested by tens of thousands of members and office-bearers signing memorials to the Conference against the expulsions. In response thereto, the Conference ordered the preachers to write letters to tickets from all who signed such memorials, whether officers or members, and that policy was continued for about two years, until the funds of the Connection became so embarrassed that the expulsion policy had to be abandoned.

Seeing the desolation which prevailed in so many societies, all the efforts made by members for redress being repulsed by the Conference, another effort was made in December, 1851, by a large number of influential lay officers in the Connection who had not been expelled, who drew up a memorial to the Conference under twelve heads, asking for the cessation of the severe discipline it had inflicted. The Committee of the Conference failed to accept any of the lay representation in the chief courts of Methodism. This was known as the Mediation Movement, and their memorial was in a short time signed by over two thousand Methodists, chiefly official persons.

The Conference of 1852 declined to receive or negotiate with any society having regard to the said memorial, and in reply thereto "indulged in rancorous invective against many of the memorialists." Every effort at reconciliation with the Conference having been made by the people, and resistance being the only reply, it became necessary to take care of the thousands of members who, by the withdrawal of their society tickets, had been cut off from membership.

Not wishing to establish a separate body, early in the year 1850 a large meeting was held in Finsbury, London, of delegates from all parts of England, about four hundred in number, all of whom less than a year before had held office in Methodist societies. After several days' deliberation a form of constitution was agreed upon, and the best arrangements made for keeping the members united, till all negotiations were found to be of no avail, when it was resolved, first, that they should exist as the Reform Union, and afterwards as the United Methodist Free Churches.

The details of the various steps taken for several years to reform the constitution of the Wesleyan Conference so as to admit laymen into the higher Church courts, and so open the way for the return of thousands into fellowship, having all failed, to avoid, if possible, making the Wesleyan body, the Conference of the New Connection was applied to, but that body did not feel disposed to make the concessions asked, so as to open the door for union. Had they done so, their membership might have been doubled immediately. Some local societies did unite with them. Ultimately, in 1856, a meeting was held in Exeter Hall of appointed representatives from the Wesleyan Methodist Association (of 1835) and the Wesleyan Reformers (of 1849), when terms of union were agreed upon which resulted in the amalgamation of the two bodies under the name of "United Methodist Free Churches." At the eighth meeting of the delegates of the Reformers, held at Bristol in August, 1856, the statistics of their society were as follows:

Although most of the leading societies belonging to the Reformers resolved on amalgamation, yet during the first year only 19,115 took action; and as there was a strong feeling of independence existing in many places, so long as they were able to maintain the minister of their choice, these societies kept a separate existence, in defiance of which action some members of the Reform Union determined not to amalgamate. In 1857 more than 26,800 members adhered to their original principles. That number was, however, soon considerably reduced. In 1858 nearly 2000 united with the Free Churches; and in 1859 over 5000 acted in the same way, and so the parent society on that year several separate societies uniting in a body with the Free Churches, still leaving a few who maintained a separate existence as the Reform Union.

This body has had its headquarters at Exeter Hall from its origin. It established a book-room there, and commenced the publication of a bimonthly magazine in 1851, as the Wesleyan Reformer, the first editor being Mr. Robert Bulman, its second Mr. N. T. Langridge, its third Mr. Nichols. In 1853 its title was changed to the Wesleyan Methodist Penny Magazine. The committee also established a monthly magazine for the scholars in the societies, called the Wesleyan Schools Review. As the connected societies increased in numbers, chiefly by amalgamation, it has for more than ten years past been the smallest section of the Methodist family, and its continued existence as a separate body has been a source of regret for some years, seeing that decadence has marked its course almost continually from the time of its formation. The statistics of the past four years will be sufficient to indicate its position and influence.

Their doctrines are identical in all respects with those of the Wesleyan Methodists. The points of polity or discipline in which they differ are, that their ministers may remain as many years in a circuit as the people may desire; and they permit lay preachers to baptize their children, and to administer the Lord's supper, thus placing ministers and laymen on an equality in ministerial functions.

In addition to the serial publications previously named, the committee of the Reform Union resolved to take out a book-room, for the purpose of carrying on their work; and as large profits had been made by the sale of the hymn-books used by their societies, the book committee was the first to try the experiment of enlarging the hymn-book which had so long been in use by English Methodists. The Rev. James Roberts, the late secretary, has been employed in the book-room of the parent society, learning that there were only about eight hymns in the Wesleyan collection which were copyrighted, supplied their places by others of Charles Wesley's, and added to them as many more new and popular hymns as made a book of a thousand hymns. To these were added for the first time the authors' names, not in all instances correctly, but as nearly so as was then possible. The book was a success, and as the usual discount was allowed on it to booksellers, which at that time the Wesleyans did not allow, many thousands soon found their way even into the congregations of the parent society, that improved edition in due time led the way to a still better collection being issued by the book-room of the Methodist Free Churches, and since, a still more modern one by the Wesleyan Conference itself. The Reform book-room has for some years published "Reformer's Monthly Magazine," a serial which has for many years, unofficially, been very helpful to many industrious lay preachers. It has also published other Methodist works, chiefly remaniders of editions of good books which authors wished to dispose of, but which the rigid rules of the Wesleyan book-room prevented from admission into their sales. (G. J. S.)
WESLEYANISM

Wesleyanism, or Methodist Arminianism, is a reproduction of the original doctrine of James Arminius (q. v.), the Dutch Remonstrant, an ephebet gained by his followers for their opposition to the Calvinistic views which had been chiefly maintained by the Synod of Dort. The soundest and most prudent of the early Arminian theologians were Episcopalians and Limborch, who developed the views of their great leader substantially as held by the Wesleyan Methodists both in America and Great Britain; but a few of the Remonstrants, especially Grotius, and of his own sect, Currodes, exhibited signs of a freethinking tendency, especially on the doctrine of the atonement. The intermediate English Arminians carried these erratic elements to the verge of Socinianism, and thus gave a color to the charge of Pelagianism with which Calvinistic writers—at least in the very recent times—have been infrequently in the habit of branding Arminianism in general, See ARMINIANISM.

John Wesley, the founder of Methodism, came of Arminian stock. His father, Samuel, like many of the evangelical Anglican divines of that period, was opposed to the Calvinist school, and to this extent, Currodes's, exhibited signs of a freethinking tendency, especially on the doctrine of the atonement. The intermediate English Arminians carried these erratic elements to the verge of Socinianism, and thus gave a color to the charge of Pelagianism with which Calvinistic writers—at least in the very recent times—have been infrequently in the habit of branding Arminianism in general. See ARMINIANISM.

testified to the soul by a special "witness of the Spirit" (q. v.), which is distinct from all other evidence, although concomitant and corroborative; and the third element is that of the human subject, and is evidenced by the alteration felt in the heart and shown in the life; but they all three are equally and wholly the effect of the operation of the Holy Spirit.

The man does not save himself, but simply consents to be saved, depends upon Christ to be saved, and co-operative cooperation is necessary from the above showing that the converted person knows for the time being his gracious condition by this threefold testimony, the other or the other part of which, however, may for the moment preponderate.

5. Wesleyanism, moreover, maintains that this salvation is not only free and present, but also full, i.e. that it is the privilege of every believer to be entirely sanctified in this life, and to live without actually feeling or committing any known sin. They admit, of course, the continual peculiarity of human nature, and do not claim Adamic or angelic perfection for any human being since the Fall; but they nevertheless insist upon the privilege and duty of complete holiness in heart and life as not only necessary for heaven, but possible indefinitely before death. They differ to some degree among themselves as to the instantaneous or progressive character of this experience, each to its own date, when reference to the conversion, but they all agree in looking for it during life and health, on precisely the same terms of consecration, faith, and co-operation as required by regeneration. See Sanctification.

6. Finally, holding the above views of the power and operation of the human will at every stage of the redemptive process, Wesleyans universally believe that it is possible for any, even the highest Christian, to fall from grace and ultimately perish, and they think they find actual instances of such lapse in the Scriptures and in common life. As none are absolutely elect, the doctrine of election is to some extent the same, until probation is entirely ended. See Perseverance.

Literature.—The most exhaustive as well as oldest polemic on these distinctive features of Wesleyan Arminianism is Fletchers's Checks to Arminianism (Lond. 1771 sqq., and often since); but the subject is discussively large, like Piers Plowman (in Hurd.). A topical discussion is given in Watson's Institutes (Lond. 1822, and since), in Pope's Christian Theology (ibid. 1875-77, 3 vols. 8vo), and in Raymond's Systematic Theology (Cincin. 1867 sq., 3 vols. 8vo). For other works, see Arminianism; Methodism.

Wesleyanism has been an adherent of followers of John Wesley, the founder of Arminian Methodism; but by usage it is commonly limited to the regular Methodist Churches in Britain, in distinction of the Methodism of the rest. Various bodies have been held together by the conclusions drawn, and often we must be taken before the famous sect of learning. That sermon was printed and widely circulated. It was followed by another one on "God's free grace," which, with equal lucidity and power, he set forth the doctrine "that the grace of God is free in us, and free for all." This sermon was printed in a cheap form; and those sermons, repeated in various forms and places, "gave birth to the greatest revival of religion" the world has ever known.

He desired, in his own mind, to retire to Oxford to his beloved obscurity, but Divine Providence ordered otherwise. John Wesley was committed in London and impromptu to preach these new doctrines, in various churches, thrice every Sunday, and on week-days also. One source of attraction was that he had recently returned from America, which was considered a far country; and he related some of his experience in the course of his discourses. Multitudes flocked to hear him, and soon the churches were unable to hold the crowds which assembled. In a short time, partly because of the large assemblies and partly owing to the new doctrines, he was excluded from one church, then from another, till at length he was shut out of all the churches. Not being able to bear the struggle between honor and conscience, he made a virtue of necessity, and preached in the open air—first in Moorfields, London, then at Kennington, and in many other parts of England.

Thousands upon thousands of persons—in some instances thousands, in others twenty thousand, and even more as computed by Mr. Wesley himself, and recorded by him in his Journals—attended his out-door services. This step was not taken in any spirit of antagonism to the Church; quite the contrary. During one month in 1749, both John and Charles Wesley had intercessory prayers on behalf of the Archbishop of Canterbury, the Bishop of London, and Potter, archbishop of Canterbury, to talk over their conduct; and with kindly results in each
case. Mr. Whitefield, also, had similar interviews with bishops respecting his preaching in the open air. It is plain, therefore, that the resistance these three clergymen met with did not proceed from the heads of the Established Church, but from the clergy who were at ease in their comfortable livings, and who saw that their quiet enjoyment would be broken if the proceedings of these evangelists were not stopped. Hence it was that many newspapers and magazines were used by those clergymen to slander and misrepresent the work of the Wesleyans and Whitefield.

During the summer and autumn of 1739, there were witnessed by thousands of persons most remarkable manifestations of divine power at many of the open-air services conducted by John Wesley. The preaching of George Whitefield and Charles Wesley, at the same period and to the same congregations, was quite as faithful and even more impassioned, at times, than was John Wesley's; but it was to the preaching of John Wesley only that those special manifestations were given. At London and at Bristol, on various occasions and at different places, during the six months preceding the formation of the United Societies, scores of persons were smitten down under his preaching, in the open air and in small meetings in rooms; such signs had never been before witnessed since apostolic times.

Mr. Wesley himself wrote: "More and more of the people were cut to the heart, and came to me in tears, inquiring with the utmost earnestness of God what they should do. These penitents were counseled by scores and hundreds during the autumn of 1739; and it was the witnessing of the deep agony of spirit and anguish of heart that awakened the sympathy of two gentlemen, who attended the preaching at Moorfields, to provide a place of shelter for those poor stricken ones.

Northward of the preaching ground at Moorfields—only a few hundred yards, but surrounded by fields—the Old Gunnery, or foundry for cannon, had stood in ruins for more than twenty years. Mr. Wesley was pressed to take the premises into his own hands; but he had to decline them, having no funds. Mr. Ball and Mr. Watkins, two kindly disposed friends, finding that the tenancy could be secured for £15, loaned that sum to Mr. Wesley; but, as the place was a vast heap of ruinous buildings, a large additional sum had to be spent to fit it up as a place for religious worship. These buildings were purchased and Mr. Wesley purchased a house on Sunday evening, Nov. 11, 1739. The cost of fitting up the Foundry for worship was about £800, which sum was paid in three years by small subscriptions from many friends who had shared in the blessings which came from it.

The exact date of the origin of Methodism is not known; but it was within the three weeks embraced within the last week in November and the first fourteen days of December in 1739. A large number of persons had been converted within six months, who had been joined to the Moravians. In Mr. Wesley's works we will find several allusions made by him to that period. The two following passages convey the clearest account we have: "In the latter end of the year 1739, eight or ten persons came to me in London, who appeared to be deeply convinced of sin and earnestly groaning for redemption. Church, but I was taught to love the congregation whom I judged most needful for them; and we always concluded our meetings with prayer suited to their several necessities. This was the rise of the United Societies; first in London, then in other places." The first meetings were class-meetings, and John Wesley was the leader of them. The following are additional details: "The first evening about twelve persons came; the next week thirty or forty. When they were increased to about a hundred, I took down their names and places of abode, intending, as often as it was convenient, to call upon them at their homes. Thus, without any plan, they began the Methodist Society in England—a company of people associated together to help each other to work out their own salvation."

Such is the account of the origin of Methodism from the pen of its founder, who, in a small tract which he issued shortly before their organization, thus describes the character of a Methodist: "A Methodist is one who has the love of God shed abroad in his heart by the Holy Ghost given unto him; one who loves the Lord his God with all his heart, and soul, and strength. He prays without ceasing, and in everything gives thanks. His heart is full of love to all mankind, and is purified from envy, malice, wrath, and every unkind affection. His own desire, and the one design of his life, is not to do his own will, but the will of His Father who keeps all God's commandments, from the least to the greatest. He follows not the customs of the world: for vice does not lose its strength through familiarity. He fares not sumptuously every day. He cannot lay up treasure upon the earth: nor can he adorn himself with costly apparel. He cannot join in any diversion that has the least tendency to vice. He cannot speak evil of his neighbor any more than he can sell a lie. And he for ever utters an unutterable corruption of speech. He is always on the watch against corruption. His heart is always weighty with the love of his God and of his neighbors, and enemies. These are the principles and practices of our sect. These are the marks of a true Methodist. By these alone a true Methodist is to be distinguished from other men."

2. Progress of the Wesleyans during Mr. Wesley's Lifetime.—For the first century of its existence the history of Methodism was a series of providences. In a condensed record, which this is required to be, these providential openings can be very little more than indicated.

From the time the Wesley brothers returned from America they were both closely connected with the Moravians, whose meeting-house was, and is still, in Peter Lane. It is probably true that most of the occasions made to their society during the years 1738 and 1739 were the fruits of the labors of the two Wesley and Whitefield. Even after Mr. Wesley began his own society, in December, 1739, he himself continued to meet with the Moravians; and he took with him many of those who adhered to him as the results of his ministry. As early as 1738 a Moravian settlement at Herrnhut, Germany, where he remained three months, conversing freely with the Brethren on their doctrines and discipline. In December of the same year Mr. Wesley drew up for the society in Peter Lane the "Plan of the Band of Lay Preachers." This band comprised not less than five nor more than ten—who met together once a week for religious conversation and prayer. A series of nine questions were prepared and used on each occasion as helps and instructions; and the design of these meetings was embodied in a series of ten propositions and inquiries. These were the basis of the United Societies which began to meet under Mr. Wesley in December, 1739.

In April, 1739, John Wesley was excluded from the churches in Bristol, and a few months later he was also excluded from the London churches. Mr. Whitefield and Charles Wesley, in their respective situations and branches of work, Mr. Wesley commenced open-air preaching near Bristol, with such happy results that John Wesley soon saw a wide door of usefulness opened to him in that plan; and he readily adopted it, with such marks of divine approbation as had not been before witnessed. This led to a general revival, which was accompanied by increased fervency, and necessitated the employment of lay helpers; hence lay preachers had to be engaged to watch over the new converts, gathered out of the world by the labors of those apostolic men.

The earliest of these lay helpers were Joseph Humphrey, Thomas Maxfield, and John Cennick. The first-named is thus introduced to us by Mr. Wesley himself:

"..."
Watch-night services began as early as April, 1742. The converted collars at Kingswood first began them as a substitute for their midnight meetings held at the ale-house. They began at eight or nine o'clock, and continued until midnight. Mr. Wesley at once approved, and fixed them, first monthly, at the full of the moon, then quarterly, and recommended them to all his societies. They are now held only on the last night of the year.

Quarterly society tickets were first given in 1742. For over twenty years these were issued in three or four localities, each having a different design. Inconvenience having arisen from these varieties, the ticket of one district not being known or recognised in another, the Conference in 1765 ordered a uniform ticket to be issued from London, the first of which is dated Feb-

uary, 1766. For fifty years these tickets were only about an inch square—a very simple record—containing the date, a text of Scripture, and a large capital Roman letter enclosed in a simple border, with the member's name written by the preacher who gave it on the margin. In 1816, at the suggestion of the Rev. Jacob Bunting, the ticket was a little enlarged to give space within the border for the member's name. In 1822, when Mr. Bunting was Connexional editor, he again altered the ticket, making it twice as large as before, and adding the name and origin of the society at the head. The design was thought by the Conference too fanciful. So the mode of issuing the tickets was altered; issued, next it was printed with a ray border around it in 1823, and in that form it has appeared ever since. The tickets were used to admit the members to lovefeasts, society meetings, and the Lord's supper. The addition of a few lines by the preacher at the back of the ticket made it a passport for a member to any society of Methodists either in England or the colonies. Recently a proper form for the removal of members has been provided.

In 1742 Mr. Wesley and John Nelson itinerated through parts of Yorkshire and Cornwall, establishing Methodism in many places. During that year the organization of Methodism was nearly completed. On May 1, 1743, the rules of the society were first published in a small tract of eight pages, with the title "The Nature, Design, and General Rules of the United Societies in London, Bristol, Newcastle, York, &c., etc." They review briefly the origin of the societies, and then describe the objects and characteristics of Methodism. Twenty editions of that tract were issued during Mr. Wesley's lifetime.

In 1743 sick-visitors were appointed, the leaders of classes furnishing the names of persons to be visited, and the visits being afterwards noted and reported. In June, 1744, the first Conference was held. Mr. Wesley invited six clergymen and five lay preachers to meet him in London, at the Foundry, and five days were occupied with its deliberations. The first included preliminary plans and a discussion of justification; the second, a discussion on sanctification; the third, on the Church; the fourth, on discipline; and the fifth was devoted to the appointment of officers and defining their duties. A full record of their deliberations was preserved, and it shows how completely the whole scheme of Methodist discipline was outlined in its early stages.

The year 1746 was memorable for the inquiry made in the Conference, Is Episcopal, Presbyterian, or Independent Church government most reasonable? The question was not only asked, but the correspondence with the Rev. Wesley Hall, who had urged him to renounce the Church of England. At that time, Mr. Wesley believed in apostolic succession and the offering of an outward sacrifice by the priest. These dogmas were soon afterwards given up by him. His journey to Paris in January, 1748, to read Lord King's Inquiry into the Constitution, Discipline,
WESLEYANS

Unity, and Worship of the Primitive Church. As the result of the discussion held in the Conference of 1745, Mr. Wesley considered his lay helpers as deacons and presbyters, and himself as a scriptural bishop. Lord King's book confirmed those opinions. He took time to think, instead of working. Mr. Wesley's views, as expressed in the Convention of 1747, in a series of nine questions and answers, he states plainly his acceptance and adoption of a Presbyterian form of Church government. He renounced all his High-Church notions, and his legislation in Conference after that date was based upon the convictions wrought in him by his long work. Even apostolic succession had to go. Of that, some years afterwards, he wrote, "I never could see it proved, and I am persuaded I never shall." His preference for the Church of England remained, but his practice was in accordance with the Dissenters in Church polity. Although Mr. Wesley did not for forty years after that period resort to the imposition of hands in ordination, yet the preachers he employed were solemnly set apart to the pastoral office; and the fact of his laying-on of hands shortly before his death was more a matter of form than the conferring of any special grace or qualification. He founded the Quarterly Meeting as the Church was growing. This was the first custom of setting apart godly men as their pastors. If there was some inconsistency in Mr. Wesley's adhesion to the Church of England, and his establishing a separate Church in the land, it was more the result of necessity than design.

The Church of England was divided into seven circuits, for the better carrying-on of the itinerancy and the systematic government of the societies. Circuit stewards were that year first appointed and quarterly meetings first held. At that meeting all the finances of the circuit were reported, receipts and expenses, and those reports were carried up by the Yearly Conference.

In 1747 a tract society was commenced in Methodism. Mr. Wesley had himself written and published a dozen tracts, the wide distribution of which made a great blessing to many people. The wisdom and forethought of Mr. Wesley were clearly shown in June, 1748, when he opened a large school on the top of Kingswood Hill, Bristol, for the education of the children of his preachers. That school still exists; but nearly a quarter of a century since it was changed in its character to a Reformatory School, and a much larger and more convenient establishment was erected for the same object, called the School for the Children of Preachers' Children, which is known as New Kingswood. In 1813 a second school for the same purpose was purchased and opened at Woodhouse Grove, near Leeds, Yorkshire. For some years, the latter has been the juvenile school and New Kingswood the finishing school, and it has taken high rank among the first-class classical and mathematical schools in England. There is a scheme under consideration for the union of these schools, or for some enlargement which will admit of the larger number of preachers' sons, owing to the greatly increased number of Methodist preachers. Those schools have east of the balance of interest, at least to Methodists; but no friendly hand has yet undertaken to be the chronicler of their instructive records. From those schools have gone forth youths who have risen to the highest positions in law, theology, and medicine; while in commercial life Methodist preachers' sons take rank with the best in the land. In the present years (1880-81), the son of an Irish Methodist preacher is the Lord mayor of London, he having been also sheriff of London and Middlesex. Among the senators in the House of Commons are sons of Methodist preachers, who are distinguished as accomplished speakers and able statesmen, and within two years, no less than two preachers have been presidents of the Methodist Conference. While much of this distinction is doubtless due to natural genius and persevering effort, yet these owe their inception, growth, and success largely to the excellent training obtained in the schools for preachers' children. A public collection is made through all the societies once in the year for these schools. It was appointed by Mr. Wesley when the first school was opened, and it has been continued ever since. The collection was instituted when the salary of a preacher was £120 a year.

In January, 1750, a union took place between Mr. Whitefield and Mr. Wesley. Doctrinal differences separated them ten years previously; but they began this year by preaching in each other's chapels, and so, records Mr. Wesley, "one more stumbling-block is removed".

In 1751 the first disruption in Methodism took place. John Bennet, who had been a preacher for eight years, separated from Mr. Wesley, charging him with being a pope and preaching popery. During the same year, James Wheatley, another preacher, was expelled by the united voice of both John and Charles Wesley. Both these men for a time created prejudice against the Wesleys, but the societies soon recovered their lost ground.

The Conference of 1752 agreed that the preachers should receive a stipend of £12 per annum to provide themselves with necessities. Previously no money salary had been offered, but the societies paid what they wanted. In the year 1800 the finances had improved sufficiently to allow the preachers £4 each quarter. Ten years later that amount was doubled in some circuits, and by the end of the first hundred years (1859) most of the preachers received £1 per week or more, besides receiving a rent-free house. In 1880 single young preachers receive as a minimum salary £80 a year, while some of the leading ministers receive a total annual salary which ranges from £250 to £2500 from their circuits. Many excellent preachers left Mr. Wesley during his lifetime because no provision could be made for the widows and children, or for men worn out in the service.

In August, 1755, Mr. Wesley held the first covenant service in London. The form of service used is that written by that eminently holy Puritan Richard Alleine. The sacrament of the Lord's supper formed the closing part of the service. It has for many years been the custom to hold the covenant service in the afternoon, or during some part, of the first Sunday in each year, in all societies belonging to English Methodism. It has usually been a solemn but very interesting and profitable service.

The Conference of 1756 ordered a collection to be made yearly in all the societies, which for a century was known as the yearly collection, to assist in paying chapel debts, to help poor circuits, to pay the preachers' small salary, to encourage the opening of new preaching stations, and to pay legal costs when Methodists had to defend their rights against men who interfered with them. The debts on chapels in 1756 were £4000, and in 1812 they reached £100,000. Regulations made during the last quarter of a century provide against any such accumulations of debt. The yearly collection is made in the society classes among members only, and in 1880 it realized more than £200,000. The General Fund, as first originated, has changed its name into Contingent Fund, or Home Mission and Contingent Fund. The several objects at first to be assisted by the fund have now each a separate collection for their support.

On several occasions evil-disposed persons had spoken against the moral character of some of the preachers. Mr. Wesley, hearing of these complaints, caused each preacher to be examined at the Conference of 1759, and such examination has been continued at each successive Conference. The punishments for offenders are a reproof, a fine, a flogging, or a buke from the bench. In two years, no less than two preachers have been put back on trial, suspension for a year, or expulsion. One result of the first examination of character was a great revival of religion, which spread over most parts of England and into Ireland.

In 1763 Thomas Maxfield and George Bell separated
from Mr. Wesley, and took with them a large number of members in the London society. This led Mr. Wesley, in 1783, to devise a plan for the union of all the societies in England, and to establish a Connectional principle which should be a bond of union and mutual help. The Conference of 1784, held in London, adopted these and the twelve rules of a helper written and published. The same year the preachers received instructions to sell the books issued from the book-room, and the first preacher in each circuit has acted as Connectional bookseller ever since.

The Conference of 1785 observing that some of the preachers were almost worn out and unable to itinerate, it was recommended that a fund be established to relieve the urgent needs of such as were obliged to rest. Each travelling preacher was desired to contribute ten shillings yearly to that fund. For forty years the provision thus made was utterly inadequate for the purpose designed. In 1807 the Conference reported that the fund was not sufficient to provide the superannuated preachers and their widows with even the necessary of life. Dr. Adam Clarke drew up a plan that year for increasing the fund. Subsequent conferences increased the subscription and for several years it was known as the Superannuity Fund and the New Auxiliary Fund. The preachers contribute liberally to it, and a collection is made once a year in all the circuits, so that the annual revenue falls a semi-yearly share each to the preacher and widow to receive from it a yearly sum that fully meets all the necessities of life and places each above want. The Rev. John Rattenbury devoted the last years of his valuable life to perfecting the resources and administration of that fund. In 1800 the Conference of 1785 decided that preachers under 25 years of age might be engaged on itinerate should become a superannuity, and at the end of four years he should be superannuated. Rules were afterwards made for permitting some superannuaries to enter into business, in which case their names were removed from the list of preachers belonging to the Conference. In this way the Rev. Thomas Rankin, who presided over the first Methodist Conference held in America, having entered into business, had to suffer the removal of his name from the Conference roll, and his death was not recorded in the Minutes when he died.

At the Conference of 1765 it was resolved to issue from London one uniform society ticket of membership for all the societies. The ticket so issued is dated February, 1766. The tickets have been printed and sent out by the book-room ever since. At the same Conference it was recommended that in speaking to and of the members of society the words "brother" and "sister" should be uniformly used as far as practicable. Those terms are still used by the older preachers and members.

The Conference of 1767 made a regulation that the same preacher shall not be sent above once in a year, never above two years in a row, unless the Conference shall extend the time. The Conference of 1772 extended the time since it has been so extended to three years. Once, by special request of the Bible Society, Dr. Adam Clarke was appointed a fourth year to the same circuit. Preachers who have ceased to itinerate, that they may occupy official situations in the Connection, are appointed by the Conference to the duties for a period of six years, which may be renewed at the discretion of the Conference.

There are about eighty preachers located in office.

The question was agitated in 1788. Are the Methodists in the same condition as ministers? This Mr. Wesley replied, "We are neither the one nor the other, but irregulars." A century later the same question was often asked, and answered in the same way. The position of Methodism is now taken in the religious world in which it is securing for it the character of a Church, independent of all others, complete in its organization, and fast assuming a dominant place among the churches of Christendom.

In 1789 the Conference expressed its joy at hearing of the establishment of Methodism in America, and sent two of its preachers, Richard Boardman and Joseph Fletcher, to Philadelphia society to convey to them a substantial proof of its sympathy.

The Conference of 1770 was a very memorable one in Methodism. To raise a defence against Antinomianism, Mr. Wesley published a series of eight propositions respecting doctrine. These aroused a fierce controversy. Lady Huntington, Rev. J. Horne Shirley, and others using their most vigorous efforts against Mr. Wesley. Convinced that Mr. Wesley was right, all his preachers defended the propositions, and the Rev. John Fletcher wrote and published his "Cheeks to Antinomianism," a masterly work, in defence of the Arminian doctrines of the Methodists.

The Rev. George Whitefield died in America in the September of 1770, and Mr. Wesley preached his funeral sermon in both Mr. Whitefield's tabernacles in London. The year 1777 was memorable in Methodism as that in which the foundation of City Road Chapel was laid in London.

On Jan. 1, 1778, Mr. Wesley issued the first number of the "Arminian Magazine," a work in defence of general redemption. It has appeared monthly without any interruption for one hundred and three years, and is nearly the oldest serial magazine in England. Its price for thirty-two years was one shilling each issue; in January, 1811, the price was raised to one shilling monthly, and so continued till it had completed a century of years, when the price was again reduced to sixpence. Soon after Mr. Wesley's death the title was changed to "Methodist Magazine," and in 1822 the Rev. Jabez Bunning, as editor, changed it to "Methodist Magazine," which it still retains. When there were but a few magazines in England, its highest circulation was about twenty-six thousand monthly; in 1880 the circulation was only eleven thousand, but it has many rivals. It has been a source of much revenue to Methodism, and an able and powerful defender of its doctrines, agencies, and experience. Its pages are richly stored with valuable history, and instructive and precious biography.

The Rev. Dr. Thomas Coke, an ordained clergyman who had been a prebendary in Wales, and Mr. Wesley in 1777, was sent by him to preside at the Irish Conference in 1782, and was for nearly thirty years continued to preside over their deliberations, his visits to that country being, on the whole, a great blessing to the people. In 1784 Dr. Coke travelled over England to examine the trust-deeds of the chapels, and to get them settled, the Conference plan. The last day of February, 1784, was a memorable one in the history of Methodism. To perpetuate the system of Methodism as it had been formulated by the experience of forty-three years, Mr. Wesley had drawn up a deed of declaration, which was enrolled in the Court of Chancery, by which the one hundred and twenty ministers are to form the Annual Conference of Methodists, and the survivors to fill up all vacancies once a year. The deed limits the sittings of the Conference to not less than five, nor more than twenty-five days, and by that deed Methodism may be perpetuated till the end of time. The same week in which the preachers were not included in the first selected hundred took office. The Connection, among whom were John Hampson, senior and junior, and Joseph Phlommo, who went to America and did useful work in the Church.

The Conference of 1784 fixed the time for a preacher to remain in the same circuit as follows: it had been longer. Soon after the Conference Mr. Wesley ordained Dr. Coke, and sent him out to America to be joint superintendent over the Methodist brethren in that country with Francis Asbury. He also wrote and sent an important letter to the American societies, dated Bristol, Sept. 10, 1784, in which he embodied what to him seemed sufficient in-
structions for the establishment and perpetuation of a Methodist Church, and he sent them also an abridged liturgy for their use.

Sunday-schools were systematically commenced by the Methodists about the year 1784. Mr. Wesley himself had conducted a Sunday-school in Georgia, America, as early as 1736. In 1769 Hannah Ball, a Young Methodist lady, conducted a Sunday-school ten years before Mr. Raikes began the work in Gloucester. Mr. Wesley early approved of the system, and one of the earliest letters written by him was published in the *Arminius Magazine* for January, 1785. That led the way to their general adoption by the Methodists. In 1812 the number of scholars in Methodist Sunday-schools was about 60,000; in 1880 the number was 757,149, with 119,911 teachers, in England, and a union was established for the Connection.

The action taken by Mr. Wesley in 1784 in ordaining Dr. Coke as superintendent or bishop to officiate in America, and ordaining Richard Wharton and Thomas Vassay to act as elders or deacons, was repeated in the following year, 1785, when he ordained John Fawson, Thomas Hanby, and Joseph Taylor to administer the sacraments in Scotland. In 1786 he ordained Joshua Keighley, Charles Atmore, William Warrener, and William Hammett; the two latter were for mission stations abroad. In 1787 Duncan McAllum, Alexander Suter, and Jonathan Crowther were ordained by him, and in 1789 Thomas Jones, John Ordway, and Alexander Mather a superintendent. In 1789 Henry Moore and Thomas Rankin were ordained to have special charge of the London, Bath, and Bristol societies, and to administer the sacraments. Mr. Moore's ordination was in the possession of the writer. Mr. Rankin, five years previously, had convened and presided over the first Conference of Methodist preachers in America. These acts of ordination were strongly opposed by Charles Wesley, but such a proceeding on the part of John Wesley was justified by the surrounding circumstances of the time. It was one of those pacificatory measures which prevented what threatened to be a separation and loss of members.

The conferences after Mr. Wesley's death did not recognize the "orders" thus given as conferring any superiority of position to the preachers thus ordained, excepting that some of them were permitted to administer the Lord's Supper. Mr. Moore maintained his supposed rights to the end of his days, but the Conference did not regard them. The Conference to ordain preachers by the imposition of hands in 1836, but Mr. Moore was not invited to take part. Mr. Coke, a strong advocate of the threefold order, laid hands on the heads of young men received into full connection in 1836 were Jabez Bunting, president of the Conference; Richard Reece, ex-president; and Robert Newton, secretary of the Conference. Ordination in this way has been continued at every subsequent Conference, the ordaining ministers being the president and secretary of Conference, the ex-presidents, some chairmen of districts, and occasionally the father, if a minister, who has a son to be ordained. The president, in giving a copy of the Bible to each, says, in substance, "Take thou authority to preach the word and administer the ordinances." This takes place not till after four years' satisfactory probation, and a thorough examination.

During the life of Mr. Wesley, preaching by the Methodists was held at five and nine in the morning, five in the afternoon, and eight in the evening, so as not to interfere with the business of the farmers. The Conference of 1786 gave consent to hold Methodist services in church hours when the minister was a wicked man or preached Arian doctrines, or when the churches could not contain half the people, or when the church was three miles distant. In such cases the preacher had to read the Psalms, Lessons, and part of the Church Prayers. All this was changed soon after Mr. Wesley's death, and more liberty was given to the preachers.

March 29, 1788, was a memorable day in the history of Methodism; Charles Wesley, the poet, entered into rest. He was laid in the cemetery where "he built him an邑 at the foot of a little hill and stood still." He was born in December, 1707, consequently was aged eighty years and three months. He wrote fully six thousand five hundred hymns and poetical pieces, but left his widow in such moderate circumstances with her three children that William Wilberforce, the Christian, the Englishman par excellence, paid the sum of £60 as a gratitude-offering for the soul-comfort he had derived from her husband's hymns and sermons, and this was continued till her death, in December, 1822, at the age of ninety-six years. The death of Charles Wesley was more deeply felt by the founder of Methodism than any other event in the history of the Connection.

At the Conference following the death of his brother, Mr. Wesley took a review of the fifty years that had passed since his conversion, which event he considered to be the real beginning of Methodism. The sum of a long conversation was that the Methodists, in the course of fifty years, had neither promiscuously nor willingly varied from the Church in one article, either of doctrine or discipline. That out of necessity, not choice, they had slowly varied in some points of discipline, by preaching out-of-doors, using extemporary prayer, employing laity in offices formerly limited to the clergy, and holding annual conferences. These were all commenced as Providence opened the way.

The Conference of 1790 was the last presided over by Mr. Wesley. As if premonitory of his death, two committees were appointed, one to manage the mission newly established in the West Indies, and one to superintend the erection of chapels both in England and Ireland. A plan of the order of business in conducting the Conference was drawn up and published in the *Minutes*.

3. History of the Wesleyan Body since Mr. Wesley's Death.—The death of John Wesley, in March, 1791, was a blow, so heavy, that it occurred that it produced a feeling of awe and submission among the preachers, which prevented the introduction of various reforms for several years which had been contemplated and were required. During the whole year the *Arminius Magazine* scarcely named Mr. Wesley; more important duties devolved on both preachers and officers of the Connection. It was resolved to elect a president from the senior preachers at each Conference, and in other respects to carry on the Connection on the plan previously observed. England was divided into districts, and one to the chairmen to superintend them. The number of districts were, England, nineteen; Scotland, two; Ireland, six. By this plan the best possible arrangement was made for giving to the societies that careful oversight which they had previously received from Mr. Wesley himself. Each district was required to meet its own expenses.

A spirit of restless soon appeared among some of the societies after Mr. Wesley's death. William Hammeth, whom Mr. Wesley had ordained to labor in the West Indies, went to America in 1792 in search of health. He made a division in the society at Charles-town, appointed the English Conference, and the result was his exclusion from the ministry. In England, one at least of Mr. Wesley's ordained preachers assumed the title of reverend, wore a gown in the pulpit, and administered the Lord's supper without the consent of the Conference. During the three years following, much unrest was occasioned by the Church of England by the people asking to have the Lord's supper administered by their own preachers instead of having to go to Church for the purpose.

In 1794 the trustees of some Methodist chapels, especially in Bristol, refused to allow any preacher to officiate in the chapel who had not previously been approved by them for that purpose.
Bristol ran so high as to threaten a division of the whole Connection. In 1735 the dispute with the Bristol trustees, and the querulousness of some of the preachers administering the Lord's supper to the societies, had created so much painful unrest that, to save a disruption, a plan of pacification was drawn up by nine preachers, which, when approved by the Conference, was submitted to the discontented trustees, and when accepted by them was sent to the societies, and was the means of averting for that year any division. The plan included nine points concerning public worship, and nine points concerning discipline. The concessions consisted mainly of authorizing the continuance of sacramental services by the preachers where they had been practiced without the consent of the society, and of exempting from censure any preacher who spoke for or against the introduction of the Lord's supper to be subject to trial and penalties. That clause was resisted so determinedly by a few preachers and by very many members, both in public addresses and by the wide distribution of pamphlets, chiefly written by Mr. Alexander Kilham, one of the preachers, that at the Conference of 1796 the first business done was the trial, and finally the expulsion from the ministry, of Mr. Kilham. Those who had the direction of the affairs of the Connection acted with determination in this matter, but many of the junior preachers and several thousand members considered that decision unjust, unwise, and impolitic.

The year between the expulsion of Mr. Kilham and the Conference of 1797 was passed by him in visiting the societies in various parts of England, to ascertain their views respecting the action of the Conference in his case. The result was the formation, in the summer of 1797, of a new Methodist Connection, which included at least three preachers from the old body and about five thousand members. That was the first division of the Methodist people after Mr. Wesley's death, and in thirty years it was followed by three others, all which might have been averted by the exercise of more Christian forbearance and the concession of points of discipline deemed "non-essentials," which have in later years been nearly all conceded by the Methodist Conference. The New Connection Methodists ought to be now united with the parent society, from which they should not have been separated. The three preachers who separated themselves from the Conference on that occasion were William Thom, Stephen Everfield, and Alexander Cummin, all of whom assisted in forming the New Connection. The Conference of 1797 issued a pastoral address to the societies, to allay as much as possible the spirit of분할. A widely circulated volume of letters was also written, about sixty years a pastoral address has been annually issued by the Conference, commencing with the year 1819.

The foreign missions of Methodism were considered and recognized by the Conference of 1798. Those missions were commenced by Dr. Coke in 1786, and were entirely under his direction and management till 1791, when the Conference appointed a committee of three of the brethren to assist him in examining candidates for foreign service, and also the accounts and letters relating to the missions. The Committee of 1798 appointed the first general collection to be made throughout the Connection in support of the missions. The second collection was made in 1796, and it has been continued yearly ever since. Those missions were under the control and management of Dr. Coke, with the aid, though little more than nominal, of a committee, until the year 1818, when he was removed from the connection. Coke was succeeded in his earthly pilgrimage while crossing the Indian Ocean, and in the following year the Foreign Missionary Society was organized at Leeds, since which time it has become one of the most useful and important missionary organizations in the world, with nearly five hundred men in the field. The first collection was made in 1800; the voluntary contributions reported at the annual meeting that year in support of the foreign missions being £265,498, while the expenditure of the year was £268,680.

A Committee of Privileges was appointed by the Conference of 1803, which then consisted of ten of the principal preachers and laymen in Methodism. Its origin dates from the threatened invasion of England by Bonaparte in 1802, when an act was passed in Parliament to raise a regular corps of militia. This included some Methodists; and a clause was introduced to exempt the Methodists from drill on the Sabbath. The Committee of Privileges was at first intended to act in defence of those rights. Its scope and numbers were enlarged in 1811, when the committee was appointed to have the direction of any lawsuit in which in any way related to Methodism; and Thomas Ricketts, one of the most respected and most prominent of Mr. Wesley's preachers, who, seeing that the allowance made to supernumerary preachers was wholly inadequate to their support, preferred to enter into business and become a coal-merchant rather than impoverish a fund already overtaxed, that act excluded him from the ministry, and at his death he had no record in the Minutes of Conference. An interesting memoir of him was printed in the Methodist Magazine.

A series of nine new minutes were agreed to by the Conference of 1807, the fifth of which was to the effect that camp-meetings may be allowed in America, but they are highly improper in England; and the Conference disclaimed all connection with them. Some of the earnest Methodists in Staffordshire were of opinion that if camp-meetings were good for America, they were equally good for England; accordingly, at Mow Cop and at Oxton, camp-meetings were held; and for taking part in them William Clowes, Hugh Bourne, and other Methodists were deemed unworthy of membership; and on being excluded, several of them united in forming the Primitive Methodist Connection in 1818, which has since become the most prosperous and most numerous of the numerous different Methodism societies. Its members in 1880 numbered 190,400.

The first Methodist missionary was sent to Africa in the year 1811. Some Methodists had settled in the colony of Sierra Leone about the year 1792. Early in this century a colored man, named Mingo Jordan, preached to the tribe with success; and in 1799, Dr. Coke, and Dr. Adam Clarke, asking for help. The Conference of 1811 sent out George Warren as the first missionary to that colony.

Some Methodists, having made their way to the colony of Australia, formed a class, and found in one of the penal convicts who had become converted the first Methodist preacher in that vast country. The Conference of 1812 sent out Samuel Leigh, who lived in Australia, broad and deep, the foundations of a great Methodist Church, which numbered in 1880 fully 69,000 members.

In 1818 Dr. Coke started with a small band of missionaries to found the Methodist Church in India; and although it has been of slow growth, its branches are rapidly stretching over the continent of India. The work assumed wider proportions, and found many new fields after the Missionary Society was fully organized in 1818. The Missionary Society has found its way to nearly every country under
heaven; and, aided by the American Episcopal Church and the Church South, Methodism is establishing itself in every land.

Dr. Forrester, 1815, what is now known as the Bible Christian Society was founded at Lake, near Sheebear, Devonshire, by William O'Bryan. He had been a very zealous Methodist local preacher; had visited many places in that country where the Gospel was not preach-
ed, and gathered the people together for religious worship. For doing just what Mr. Wesley had done sev-
enty years before, an injudicious Methodist preacher expelled Mr. O'Bryan from their community; and he, not feeling at liberty to discontinue his evangelistic work, gathered some of his converts into a small society in Devonshire; and in one year their members num-
bered more than 500. In the year 1809 their membership in England was 21,292; in addition to those in Canada, 7254; and Australia, 3605. Mr. O'Bryan died in America a few years ago at an advanced age. Their membership is largely confined to the west of England, where the society originated.

In 1818, what is known as the Children's Fund was instituted. Previously to that date, each preacher hav-
ing a family was allowed £6 per annum for each child, which sum was found to be inadequate. New arrange-
ments were made in 1818 for raising more money, and for the better management of the fund. The allow-
ance has been £7 for each child for half a century; but some circuits, by a special effort, make up the sum to £10.

In 1819 important improvements were made in the system of finance, and the Conference resolved that in future a financial district meeting should be held in the early part of the month of September in every district, at which all the preachers and stewards who could were to be present, to make whatever financial arrangements were required for each circuit in the district, for one year prospectively.

One of the most important acts done at any Meth-
odist Conference was the passing of what has since been known as the Liverpool Minutes of 1820—a series of thirty-one resolutions, the design and purpose of which was "the increase of spiritual religion among our societies and congregations, and the extension of the work of God." The reading of these resolutions to the societies for the same month has usually been followed by renewed spiritual activity and success.

The year 1820 was memorable also for the resolution then passed to secure every four years an exchange of delegates between the English and the American Methodist Churches. The first delegate from America was John Emory, who was presented to the Conference at Liverpool in July, 1820; and who, in his address sketching the progress of Methodism in his own coun-
try, said, "The two bodies would yet compass the world, and shake hands at the Pacific." This pro-
hhecy has been realized. Emory was a thin spare man of about thirty-five, but his presence and words made a deep impression on the Conference. He was the guest of Dr. Adam Clarke at Millbrook, who was then work-
ing hard at his Commentary. The first delegates from the British Conference to America were Richard Reece and John Hannah, who attended the General Confer-
ence held at Baltimore in 1824, where they met bishops McKendree, George, and Roberts, and one hundred and twenty-nine delegates.

The missions to the Shetland Islands were com-
missioned by Dr. Adam Clarke in 1822, who found the clergy of 1100 to 1200, with only one missionary for twenty years, when he deceased from his labors. They now have eighty-two thousand members.

What is known as the Leeds organ dispute arose from the introduction of an organ into Brunswick Wesleyan Chapel in 1828 against the wishes of a large majority of the leaders and members of the society. The re-
sult was that more than one thousand members left Meth-
domism, and formed the Society of Wesleyan Protestant

Methodists. They existed as a useful, laborious Church for about eight years, when they united with a much larger secession from the old body.

In the progress of Methodism, the question of commenc-
ing an institution for the education and training of young ministers was considered and decided upon. Among the advocates for the measure were Messrs. Reece, Bunting, Newton, Subcliffe, Gaultier, Scott, Les-
sey, and one hundred and fifty other preachers. Against the proposal were James Wool, Dr. Samuel Warren, James Bromley, Henry Moore, and about thirty old preachers; one hundred other preachers remained neu-
tral. Dr. Warren took the lead in the opposition; wrote and published a pamphlet against the proposal, which was considered by those friendly to the project to be such a misrepresentation of the fundamental principles of the doc-
trial before a special district meeting. Dr. Warren was the superintendent preacher of the Manchester first cir-
cuit. The circuit defended their minister; the special district meeting tried, and suspended him from office as a preacher. An appeal was made to the Court of Chan-
cery, where the vice-chancellor, Shadwell, declared, against Dr. Warren; in consequence of which, at the Sheffield Conference of 1835, Dr. Warren was expelled from the Conference and the Connection. Having many friends and followers who sympathized with him, they left the Connection, and formed the Wesleyan Method-
ist Association, the first ten years ten thousand members, and a membership of 21,176 members. In 1857 they were united with the Reform Methodists of 1849–50.

The resolution of the Conference of 1834 to found a theological institution was carried into effect by the Conference of 1835–36. A committee was formed to complete the proposed scheme. An old Congregational building, known as the Hoxton Academy, was rented, and used with advantage for several years. In 1839, Abbey House, in Stoke Newington, long the residence of Sir Thomas Abney and of Dr. Isaac Watts, was taken as a branch establishment; and both were used to their fullest capacity until the year 1841–42, when the hand-
some college at Richmond was completed; and about the same time the commodious institution of Didsbury, near Manchester, was also ready for occupation, when both were tenanted by the removal of the students from the two London buildings. Since then another college has been built at Lahore, and another at Didsbury, near Leeds, and occupied fully; and a fourth college is now in course of erection at Handsworth, near Birmingham, which is to be opened in 1884.

The centenary of Methodism was celebrated in all parts of the world during the year 1878. The Conference of 1878 was a great assembly of ministers and laymen to prepare a report of the best way of observing the occasion. The report was presented to and accepted by the Conference of 1888, and a great Connectional representative meeting was gathered in Oldham Street Chapel, Manchester, Nov. 7, 1884, comprising two hundred and sixty-five preachers and laymen, intimated to the impression of Methodists which had ever been held. Its deliberations were continued for three days. To commemorate its proceedings a large picture was painted, engraved, and published by Mr. Agnew, in which were included one hundred and four portraits. It is generally known as "The Centenary Picture." Thomas Jackson presided. It surpassed all previous meetings for Christian feeling and pious beneficence. A Thanksgiving Fund was recommended as an ac-
knowledgment for the great mercy of the past, and a fixed sum of £70,000 was included in the resolution from it. No less than £10,000 was promised at the meeting held in the City Road Chapel, London. Ire-
land generously promised £14,500; and by the opening of the centenary year the promises had reached £102,000; by March they were £156,000; and by the time the celebration of the centenary year was completed—namely, Friday, Oct. 25—the promises had reached £200,000. Before the fund was closed, it amounted to
£216,000. The objects to be benefited by the fund were: the erection of two Theological Institutions; the purchase of a Centenary Hall and Mission-house in London; the re-organization of the old Society for the Support of worn-out preachers and their widows; the building of a Centenary Chapel in Dublin; and to make provision for promoting day-school education. The Centenary Conference, 1839, reported an increase of membership of over 15,000, and 118 candidates for the ministry. In 1842, i.e. 1792, the Methodist family numbered 550 itinerant preachers and 140,000 members in Great Britain and America: in 1839 these figures were raised to 8200 itinerant preachers and 1,171,000 members in society. In 1860 the total number of itinerant ministers throughout the Methodist world was 31,467: the total of preachers and members, 4,704,472. This record may be very appropriately closed with the memorable words of the dying Wesley—"What hath God wrought?"

In 1841 the Centenary grant of £2000 for educational purposes was made available for the founding of a training institution for elementary teachers and the establishment of primary schools throughout the Connection. The necessary funds for developing the work came in slowly. The Normal Training Institution and practicing schools in Westminster were opened in 1848. In the year 1854 the number of day-schools was 4,988. The number of students was 246,675: the number of graduates, 52,620 scholars were taught. Ten years later there were 640 schools and 100,000 scholars. In 1880 there existed 851 schools and no less than 179,900 scholars. An additional training institution has also been established at Shortlands, Battersea, for females. The first principal of the Westminster institution was the Rev. John Scott, and the present principal is the Rev. Dr. Rigg. The principal at Shortlands is the Rev. G. W. Olver, A.B.

The disruption which took place at the Manchester Conference of 1849 was the most sad and painful event in the history of Wesleyanism. The feeling of discontent had for some years been manifested by some of the preachers at what was considered by them a policy of dictation by some of the senior preachers, more especially by Dr. Bunting; and certain fly-sheets were printed and circulated throughout the Connection, in which the causes of complaint and dissatisfaction were embodied. The fly-sheets were anonymous. About the same time there was published a volume entitled Centenary Sketches of One Hundred of the Prominent Ministers of the Connection. That also was anonymous. The Conference of 1849 resolved to ascer-
tain, by a body of rigid questioning, who among the preachers were the authors of the said publications. Several of the preachers refused to answer the question. Are you the author of the fly-sheets? Suspicion was mainly fixed on the Rev. James Everett, one of the senior preachers. He most resolutely declined to an-
swer to the question of authorship of the delinquent publications, and he was excluded from the Connection for contumacy. The Rev. Samuel Dunn, another minister of about thirty years' standing, had commenced in 1849 a new monthly magazine, with the title of The Wesley Banner. He had not complied with an obsolete Methodist Conference rule requiring the ordinary preacher to publish works only through the book-room. The question of the authorship of the fly-sheets was put to him, and also the question whether he would discon-tinue The Wesley Banner. For refusing to answer those questions, he was excluded from the Connection. The Rev. William Griffith, Jr., also took up the question of authorship of the fly-sheets, and he also declined to promise that he would not report the pro-
ceedings of the Conference to a Wesleyan newspaper. For those offences he also was excluded. To those three ministers after the addenda the Rev. James Burles-
son, the Rev. Thomas Rowland, and a number of others, a number of those proceedings was that within two of three years more than 120,000 members of society had left the Con-
nection, and had formed a new one under the designa-
tion of Wesleyan Reformers. During the same time the funds of the Connection had suffered so severely that the capital of the funds was reduced to about £100,000. The total membership of Eng-
lish Methodism in 1850 was reported at 358,277. It was not until twenty-five years afterwards that the membership again reached those figures, so that it re-
quired the labors of over one thousand paid ministers to recover by those expulsions. Such a painful and costly experiment as was that of the Con-
ference of 1849 is not likely to be ever again repeated. The Wesleyan Reformers had a separate existence until the year 1857, when they united with those who sepa-
rated in 1844 from the General division of 1845, and formed to-
gether the United Methodist Free Churches, having a membership in 1880 of 78,477. A few societies, which refused to amalgamate, form the Wesleyan Reform Un-
ion, with a membership of 7728. Two of the origi-
nally expelled ministers in 1849—Mr. Dunn and Mr. Griffith—still survive, rejoicing in a spirited and happy old age. Thousands of members were alienated lost to Methodism and to the Christian Church in conse-
quence of that disruption. The Reformers have un-
iformly laid the chief blame of the expulsions to the Rev. Dr. Bunting, but other prominent preachers were also held responsible.
condition was that at least one thousand sitting were to be provided in each chapel.

The Conference of 1873 received under its fostering care a Home for the Children’s Home, which was originated in Lambeth in 1869 by the Rev. Thomas Bowman Stephenson, A.B., and which had steadily developed into a large establishment for the education and training of destitute children. Its origin and history abound in interesting incidents. Having been originated by a Wesleyan minister, and supported mainly by the benevolence of the Methodist people, it began to be considered as a great Methodist orphanage, or home for the destitute. As an independent organization, it had expanded into four separate establishments — the Central Home, in Bethnal Green, London; a training institution at a farm in Radnorshire; and a Home in Canada, to which the children, when trained, are sent to be placed in service, and to get a good start in life. The Conference of 1873 recognized the institution as belonging to Methodism. Its Report is yearly presented to the Conference, and the same body appoints its officers. There were 489 children in the Homes at the Conference of 1880, and a new branch was to be opened at Birmingham. Its proper designation now is the Children’s Home and Orphanage.

At the Conference of 1873 the Committee for the Promotion of Higher Education in Methodism was instructed to take steps for forming a College for Methodist children in the university city of Cambridge. The institution has been successfully founded, under the management of the Rev. W. F. Moulton, D.D., with the modest designation at present of the Leys School. It reported 190 pupils at the school in 1880, and its prosperity was most satisfactory. Arrangements were made by the Conference of 1875 for the founding of a Wesleyan Methodist Sunday-school Union. The varied advantages of such an institution were recognized by the Conference, and during the year following the Union was formed, which established itself in 1876 in new premises in Ludgate Circus, London. At the Conference of 1880, the committee reported 6376 Methodist Sunday-schools in the Union—an increase of fifteen per cent. in ten years; 119,911 officers and teachers—twelve per cent. increase; and 767,143 scholars—an increase of twenty-four per cent. in ten years. The Conference was content to rest on the records of the Union, and to make no more convenient premises for the Union at an early date. The Rev. Charles K. Kelley is the clerical secretary of the Union, and its chief advocate and representative.

The most important, historical event of the present generation of Methodists is the introduction of lay representation into the Conference. That was first determined upon by the Conference of 1877, and the whole scheme of the new arrangement occupies nineteen pages of the Minutes of that year. The Conference cannot legally extend beyond twenty-nine days yearly. The first fourteen days are to be devoted to the Ministerial Conference, and, in the sixth week following, the Conference is to consist of 240 ministers and 240 laymen. All the members of the legal hundred are entitled to be present, and also secretaries of departments in Methodism, some chairman of districts, and others. The lay representatives are to be all members of society and members of a circuit quarterly meeting. The conditions are specified with great care and minuteness. Fifteen subjects are reserved for the consideration of the ministerial conference only, and sixteen other subjects, chiefly of a financial character, are reserved for the laymen. It was thus the Conference of 1878 that was the first at which the new plan was adopted. The harmony of the new Conference was the experiment. The ministers and laymen worked together with great success and sympathy. As a mark of gratitude to God for the success of the first Representative Conference, four months after its close the Thanksgiving Fund was inaugurated, which has now reached in promises £292,000, but it is hoped the ultimate amount will be £300,000. The conferences of all the offshoots of Methodism have from their origin consisted of ministers and laymen. The parent society was the last to try the experiment, and some persons were surprised that it was not a failure. This action on the part of the Wesleyan Conference was the first really aggressive step towards the union of universal Methodism. The Ecumenical Methodist Congress of 1881, to be held in London, will be the next important step towards the accomplishment of that object. There are many minor points of Methodist history, which the limited scope of this article cannot include.

II. Doctrine.

The following are some of the principal doctrines, as a summary of the principal doctrines believed and taught by the people known as Wesleyan Methodists.

1. That there is one God, who is infinitely perfect, the Creator, Preserver, and Governor of all things.

2. That the Scriptures of the Old and New Testaments are given by divine inspiration, and form a complete rule of faith and practice.

3. That three persons exist in the Godhead—the Father, the Son, and the Holy Ghost—undivided in essence and coequal in power and glory.

4. That in the person of Jesus Christ the divine and human natures are united, so that he is truly and properly God, and truly and properly man.

5. That Jesus Christ has become the propitiation for the sins of the whole world; that he rose from the dead; and that he ever liveth to make intercession for us.

6. That man was created in righteousness and true holiness, but that by his disobeience Adam lost the purity and happiness of his nature, and in consequence all his posterity are involved in depravity and guilt.

7. That repentance towards God and faith in our Lord Jesus Christ are necessary to salvation.

8. That justification is by grace through faith; and that he that believeth hath the witness in himself, and that it is our privilege to be fully sanctified, in the name of the Lord Jesus Christ and by the Spirit of our God.

9. That man’s salvation is of God, and that if he is cast into hell it is of himself; that men are treated by God as rational, accountable creatures; that it is God that worketh in us to will and to do of his own good pleasure; and that we are to work out our own salvation with fear and trembling; that it is possible for man to fall finally from grace.

10. That the soul is immortal, and that after death it immediately enters into a state of happiness or misery.

11. That the observance of the Christian Sabbath is of perpetual obligation.

12. That the two sacraments, baptism and the Lord’s supper, are institutions of perpetual obligation.

The doctrines of Methodism are explained in Mr. Wesley’s Sermons, and in his Notes on the New Testament, which, with the small volume known as the Large Minutes, form the authorized standards of both doctrine and discipline. The doctrines preached by Mr. Wesley were those of the Church of England. When it became necessary for him to make a selection of them for the use of his followers, he printed them in a tract with the title Appeals to Men of Reason and Religion. The most complete summary of them, with Scripture proofs, will be found in the catechism used by the Methodists.

III. Constitution and Polity.—The Members of Society are the preachers and the members of the church, and are selected by the Conference. Any man of mature age, or any clergyman, is eligible to be a member. The preachers may be classed under the following heads: the president and secretary of the Conference, chairmen of districts, financial secretaries, official or located ministers, superintendents of circuits, ministers in full connection, licensed preachers, and superintendents of circuits, converted ministers, local preachers and exhorters.
Official lay members are classified under the following heads: trustees, local preachers, class-leaders; circuit, society, chapel, and poor stewards; treasurer, secretaries, and members of committee of various institutions; superintendents and teachers of Sunday-schools, missionary collectors, and others.

The various meetings or assemblies recognised by the Methodists are: the Conference, which is Connectional; district and minor district meetings; and the following local or circuit meetings: namely, quarterly, leader's, local preachers', band, class, society, and prayer meetings, and love-feasts. These in addition to the usual public worship.

(1) Officers.—1. Ministerial.—(1) The president of the Conference is chosen annually. The names of three or more preachers who are members of the legal hundred are placed before the Conference, a ballot is taken, and the preacher having the highest number of votes is named to the legal hundred, by whom the choice is confirmed. The secretary is elected in the same manner. Both retain office till the next Conference, when the secretary may be re-elected. The president cannot be re-elected until after the lapse of eight years. The Rev. John Farrar is the only president re-elected during the past thirty years. The president is invested with the power of two members; he presides at all official meetings, supplies vacancies in the ministry, sanctions changes in appointments, and exercises similar jurisdiction.

(2) The chairman of the district exercises the authority of a bishop, or overseer, in the locality to which he is appointed. He convenes and presides over the annual district meeting held in May, and the financial one held in September, at both which all the preachers residing in the district are present. He is responsible for the carrying-out of all the rules and usages of the Connection, the proper conduct of religious worship, the care of all the Methodist Trust property in the district, the payment of the preachers' salaries, the making of public collections and their proper distribution. He is a faithful dispenser of the means of grace, and directly or indirectly, the authority to visit any part of his district. He is chosen annually.

(3) The financial secretary has to assist the general treasurers of the various funds to transact all the financial business in which they are engaged.

(4) Official or Located Ministers.—These are principals or professors and tutors in colleges and seminaries, book stewards, missionary secretaries, secretaries of other Connectional agencies, editors, and house governors of theological colleges.

(5) Superintendents are those ministers whose names stand first in the list of appointments to a circuit. The office constitutes such a minister chairman of all the circuit official meetings. He is responsible to the district meeting for the maintenance of order and discipline, and the administration of all its affairs. He admits and excludes members with the consent of the leaders, directs all the public services, meets the classes quarterly and gives each member a ticket, keeps a list of all the officers and members in society, registers deaths of members, collects statistical information, makes circuit plans, examines his colleagues in the ministry as to their fitness, enquires into their advancement, and directs the appointment of candidates for the ministry, has to distribute the books published at the book-room and to pay for the same quarterly, to appoint the collections, and see all moneys collected transmitted to the treasurers, and is responsible for every breach of discipline in the circuit.

(6) Ministers on Trial.—When a young man has been examined by the quarterly meeting and recommended therefrom as a minister on probation, he is sent usually to the district meeting, thence to the Conference, and, if accepted there, he may be sent for training in one of the four theological colleges, where he may remain one, two, or three years. A course of study is marked out for each year. He must pass a yearly examination and be well reported of by his examiners. The Conference has made satisfactory provision for his having a supply of suitable books and proper instruction in pursuing his studies. He may attend quarterly and district meetings, but they may not vote. They may not administer the sacraments, excepting baptism in a case of great emergency. They may not marry while on trial. They are specially under the care of the superintendent until received into full connection, which is not till they have completed their form of probation. The act of being received into full connection is one of the most important in the career of a minister.

Having passed several examinations with a good report, he is presented to the Conference. Two evenings during each Conference are set for this work. On the first the young men give an account of their conversion and call to the ministry, experience, which is often attended with the manifest outpouring of the Divine Spirit on the audience, and they answer a few questions asked by the president. The young men are often heard in moving and public prayers. They may administer the ordination and confirmation, imposition of hands of the president, secretary, and several senior ministers in the legal hundred, the president saying, "Mayest thou receive the Holy Ghost for the office and work of a Christian minister, now committed unto thee by the imposition of our hands. And be thou faithful in the calling of the Ministry, and in all the holy sacraments, in the name of the Father, and of the Son, and of the Holy Ghost." After each young man has received the gift of a small Bible, the president says, "Take thou authority to preach the Word of God, and to administer the holy sacraments in our congregations." Shortly after this, each is required to send in a certificate of his admission into full connection, a copy of the Large Minutes, in which are inscribed the following words, signed by the president and secretary of the Conference: "As long as you freely consent to, and earnestly endeavor to walk by, these rules, we shall rejoice to acknowledge you as our fellow-laborer." On the second evening, the ex-probationer delivers to the newly ordained a ministerial charge, which is usually printed.

Most of the young ministers enter the married state a few days afterwards.

(8) Supernumeraries.—These ministers either from age or infirmity are unable to perform their circuit work are placed in this class. Many ministers are obliged to retire from the full work for one or more years to rest, and after recovery of strength resume circuit work. At the Conference of 1798 it was resolved that "every preacher shall be considered as a supernumerary, unless the Conference, after trial, shall order him to be excelling, and shall afterwards be deemed supernannuated." All supernumerary or supernunnated ministers are required to meet in class to retain their membership in the Methodist society. A supernunnated minister ceases to be a member of the legal hundred; but this rule has been set at naught in the case of the editors of the Methodist magazine. A su-
pernuinary who enters into business is not entitled to have his name retained on the journal of the Conference as a minister, and his death, if occurring while he is in business, is not recorded in the Minutes. The provision now made for supernumerary ministers and their widows is dependant on the rule of independence.

(9.) Local Preachers, or Lay Preachers.—This class of workers is as old as Methodism itself. As early as the year 1738, Mr. Wesley had a lay helper named Humphreys, who left in 1739. In May, 1739, Thomas Maxwell was converted; he became Mr. Wesley's first lay helper in London, and John Cennick was the first lay helper in Bristol. From this body of men nearly all the ministers have been selected. Local preachers must be accredited members of society, men of piety, of consistent life, of good understanding, and fair ability as speakers. They generally begin by exhorting in cottage meetings or mission rooms, and when considered capable of addressing an audience, they are, after preaching a trial sermon before a competent judge, admitted on trial and have appointments on the plan. They are examined as to their knowledge of doctrine and Church government and their call to the work. After examination, and if found satisfactory at the local preachers' meeting, and have passed by the quarterly meeting of Church officers, they are received as accredited local preachers. Many, by the exercise of their gifts, soon qualify themselves for a wider sphere of ministerial work; others remain at home, following their daily occupations, and preach every Sabbath, often to large congregations, without any financial consideration. Lay preachers have always been held in much esteem in Methodism, and were thought so highly of when Mr. Wesley died that they had special notice in the inscription on the monument erected to the memory of the founder of Methodism, where he was described as "the patron and friend of lay preachers." Methodism for a full century was greatly indebted to the lay preachers for their services, valuable as teachers of divine truth, but especially so because rendered gratuitously. They have hitherto looked alone to God for their reward, and through their labors thousands of sinners have learned the way to God and heaven who would otherwise have lived and died destitute of the knowledge of both.

2. Official Lay Members.—(1.) Trustees.—The office of trustees in Methodism is one of great responsibility. The body holds property belonging to the Connection, in trust for the Conference, and are themselves responsible for the discharge of the debts connected with their respective trusts. During the lifetime of Mr. Wesley, there was diversity in the drawing of the trust-deeds, and, consequently, in the powers conferred. The property of the Connection is now vested in trustees according to the form of a model deed, which has been prepared with great care, and corrected from time to time so as to meet all emergencies which are likely to arise. Some trustees have had power to refuse the admission of any preacher to their pulpit whom they did not think of the same character as the others. The ecclesiastical powers of trustees are defined in the Plan of Pacification drawn up and published in the Minutes of Conference for 1794-95. The superintendent-minister is "ex officio" the chairman at all meetings of trustees, and has a casting vote. Trustees appoint their own stewards; they discharge set rents and collections taken in behalf of the trust, and keep the property in satisfactory repair.

(2.) Class-lenders.—These are persons of piety, intelligence, and ability, who are appointed to take charge of classes. The classes consist of the members of society, belonging to the same neighborhood, according to circumstances, from six to sixty persons, either male or female, or sometimes mixed. The simple condition of membership is "a desire to flee from the wrath to come." Mr. Wesley himself was the first class-leader. The office of leader was not instituted until February, 1742, when the necessity for it was shown during a providential conversation at Bristol. During that year, leaders were appointed in London and elsewhere. The business of a leader is thus defined by Mr. Wesley, and published by him in the Rules of the Society:

I. To see each person in his class, once a week, at least, in order—
To inquire how their souls prosper.
To advance, improve, comfort, or exhort, as occasion may require.
To rejoice that they are willing to give towards the support of the Gospel.
II. To meet the ministers and the stewards of the society once a month.
To inform the minister of any that are sick, or of any that walk disorderly, and will not be reproofed.
To pay the charges, and see that they have received of their several classes in the week preceding, and to show their account of what each person has contributed.

The original rule of Methodism was that each member contribute one penny weekly, and one shilling quarterly when the tickets of membership were given. Even at the beginning of Methodism, and throughout its whole history, there have been members who gave sixpence, or sevenpence, or even a shilling, or more, every six months or every quarter, twenty shillings quarterly, some twenty shillings. Among the poor the original rule is the standing order. As early as 1748, leaders were recommended to meet in other classes to promote growth in grace. Leaders are really resident local pastors, and, as such, have in thousands of instances witnessed many glorious and triumphal deaths. Leaders are chosen by the superintendent-preacher, and nominated by him at a leaders' meeting, the vote of the meeting fixing the appointment. Some good and useful leaders have been appointed at as early an age as sixteen years in times of special revival. Leaders are members of the quarterly meeting of society officers.

(3.) Circuit Stewards.—The most important of the circuit officers is the circuit steward, who manages all the finances. There are generally two in each circuit. They receive and pay all accounts, and report the items to each quarterly meeting. They are expected to attend the district meetings held in May and September. When ministers are invited to travel in a circuit, the steward makes the necessary arrangements. He is the official channel through which communications from a circuit are transmitted to the Conference. According to rule, the office of steward ceases at the end of the year, and no successor is to remain in office above three years in succession, except in some extraordinary cases. They are appointed to office by the quarterly meeting, on the nomination of the superintendent-minister.

(4.) Chapel stewards are appointed by the trustees to let and relet the sitting in a chapel, to receive the money for the same, and pay it into the hands of the treasurer for the trustees. They are expected to see that the chapel is kept in proper repair, to have it made ready for public worship, and to transact any business connected with the chapel which can be done without calling the trustees together.

(5.) Superintendents are entrusted with the financial affairs of a particular society. Where the members are few, only one is appointed, but two is the usual number. Their business is—
1. To attend the leaders' meetings; to examine the books of the stewards to receive the money which their members have contributed since the last leaders' meeting.
2. To prepare proper notices for the pulpits of all that is advertised upon the circuit plan, and to take care that other pulpits notices are duly signed.
3. To receive the congregation holder in the vestry before public worship, and to make such arrangements for the service as may be necessary, pending for the due celebration of the sacrament of baptism and communion, if it be administere.
4. To see that the contributions are made at the time specified upon the circuit plan, and to take charge of them until they can be delivered into the right hands.
5. To provide the necessary expenses, which are paid, by the stewards who officiate in their respective chapels, and to see that their expenses, if any, are paid.
They are chosen yearly on the nomination of the superintendent-minister, the leaders' meeting approving or rejecting as they see best. It is recommended that each society steward may be either changed annually, or one each year alternately, so as to retain one who knows the duties. The poor and efficient stewards are given the money given for the poor. The collections taken at the Lord's supper, and at love-feasts of the society, are thus distributed. They attend the leaders' meeting, and pay to the leaders any sums which are voted for needy or sick members, monthly or quarterly. A special collection is often taken on the first Sunday in every new year, which yields from five to ten shillings for each poor member. The poor-stewards provide the bread and wine for the Lord's supper, and the bread and water for the love-feasts. Preachers who have wine after preaching are supplied by the society.

(7.) Treasurers, secretaries, and members of committee of the various institutions connected with Methodism are, to some extent, offices held by intelligent and respectable members of the congregations, who are not always members of society, but persons of integrity, whose consistent Christian conduct entitles them to the confidence thereby reposed in them. The committees and families are by these means retained in Methodism who would be likely to drift into other communities of Christians, but for their being thus employed in the work. Persons so occupied generally find their way into society, and so become recognised members.

The teachers and elder scholars in our Sunday-schools render important services as collectors for the Foreign Missionary Society. Forty years ago a special effort was made to secure the services of the Sunday-school children as collectors, first of Christmas offerings. In this way, £4000 and £5000 was soon raised as free-will offerings at Christmas and at New-year's. Afterwards, those young persons were organized into a Juvenile Mississ Parliamentary Society, and by their aid a considerable sum is brought into the funds of the society. No less a sum than £16,567 was collected by the juvenile associations for 1890, which was one sixth of the entire ordinary income for foreign missions in that year.

(11.) Official Meetings.—I. The Conference is the highest court, and the only legislative body in Methodism. During forty years, all the power of the Conference was vested in Mr. Wesley. By the Deed of Declaration enacted in 1791, the Conference was made to consist of one hundred preachers in connection with Mr. Wesley's society. In 1791 was held the first Conference after Mr. Wesley's death, and was the first organized according to the deed. By the provisions of that deed, Methodism is made perpetual. The resolution of the Conference of 1781 was "to follow strictly the plan which Mr. Wesley left." This was done until the year 1814, when the Conference resolved upon two changes: first, to fill up one vacancy in four in the legal hundred, not by seniority, as previously, but by nominations from the whole body of preachers who have travelled fourteen years or upwards. Second, to give preachers of fully fourteen years' standing authority to nominate a preacher for election into the hundred, and also to vote in the election of connectional officers. The legal hundred alone has to confirm such elections. From the time of Mr. Wesley's death to the year 1878, only preachers were permitted to be present at the Conference. Following the example so successfully set them by the General Conference of the M. E. Church in America, the English Conference of 1877 resolved to admit laymen to participate in their proceedings in such matters only as did not strictly belong to the ministerial office. The time for the Conference, which is usually held on the third Monday in every new year, is limited to twenty-one days. Two weeks are now devoted to the Ministerial Conference, and the third week to the Mixed Conference. This is composed of an equal number (240) of ministers and laymen. In this brief summary only an outline of the business of each Conference can be given.

The Ministerial Conference embraces the following items of business, namely:

1. Filling up vacancies in the legal hundred.
2. Election of president and secretary.
3. Appointment of committees.
4. Public prayer-meeting for one hour.
5. Reports on probationers and candidates for the ministry.
6. Reception of representatives from other conferences.
7. Consideration of cases of character and discipline.
8. Appointment of committees.
9. Appointment of committees, notices of motion.
10. Ordination of young ministers.
11. Supernumeraries.
12. Obituaries of ministers, with reminiscences.
13. Alterations and divisions of circuits.
15. Statistics; reading pastoral addresses.
17. Pastoral reports of colleges, schools, etc.
19. Addresses to the Conference and replies.
20. Official appointments and depositions.

The business of the Mixed Conference may be thus summarized:

1. Calling the roll, and address of the president.
2. Reports on vacancies, characters and motion.
3. Consideration of home and foreign missions.
4. Schools for ministers' children.
5. Extension of Methodism.
6. Funds relating to chapels.
7. The Children's Fund.
8. Home Missions and Contingent Fund.
9. District sustentation funds.
10. Worn-out Ministers and Widows' Fund.
11. Theological Institution.
12. Education: General Committee, Sunday-school Union, and Children's Home.
15. Conversation on the work of God.
17. Temperance.
18. Reports on memorials.
19. Miscellaneous business.
20. Reading and signing the Conference Journal.
21. District meetings originated at the first Conference after Mr. Wesley's death in 1791. They correspond very much to the annual conferences in the M. E. Church. Their deliberations occupy from two to five days. The business transacted may be thus briefly stated. At the session in May, when ministers only are present, inquiries are made regarding each minister and probationer, connected with personal and professional affairs, attention to doctrine, attention to discipline, ability to preach, marriages, deaths, resignations, and whether fully employed; number of members in society; reports from Home Mission stations; conversation on the work of God; reports of examination of preachers on trial; examination of candidates for the ministry; reports from Annual Conference. When the circuit stewards join the ministers, the funds are separately brought under consideration, much in the same manner as at the Mixed Conference, each circuit being brought under consideration. The district meeting is usually closed by a sermon from one of the leading preachers, and by the administration of the Lord's supper. The financial district meeting, held in September yearly, was originated at the conference of 1819, when important changes were introduced into the system of finance. The finances of each circuit are arranged and determined for a year at that meeting. Quarterly meetings, as their name indicates, are held in each circuit once in three months, about the time of the usual quarter days. All the stewards, class-leaders, and local preachers of at least one year's standing may attend. The superintendent-minister presides. A committee records the names of those present, and the dates of meetings and resolutions of the other business transacted. The statistics of membership are read; the stewards report the amount of monies received from the classes, the salaries paid to the preachers, house rent, and other expenses, and the accounts are balanced each quarter. Conversations are held upon the progress of the work in each society, and reports of pioneer work detailed.
The quarterly meeting may be called a circuit Conference. The origin of these meetings dates from the first ten years of the history of Methodism; but the first was held at London on 26th January, 1749. At this Conference of 1749, though stewards were appointed and changed several years previously. After 1749 they became part of the economy of the Connection.

4. Leaders' meetings were originally, and for half a century, held weekly. Their purpose was to pay to the stewards what money they had received from the members. For many years that money was distributed by the stewards among the poor. It now goes towards the support of the ministry. The meetings were used for receiving reports of sick and poor members, and also for giving counsel and directions to the leaders as would be likely to promote the spiritual welfare of their classes, and the spread of the work of God. The superintendent-preacher presides, and no meeting of the leaders is legal without a preacher is present to preside. Since the death of Mr. Wesley the powers of the leaders have been increased considerably; they can veto the admission of members; members and stewards can be appointed or removed only with their consent; they also give consent for the administration of the Lord's supper, and for making special collections on the Sabbath for any benevolent purpose. In some circuits the leaders meet only once a quarter; where that is the case, they are under the rule of the Circuit Preacher, who occasionally reads and expounds, and their principles enforced. Seriously disposed persons are permitted to be present, and they are invited to become members of the society. These meetings are frequently held on Sunday evening after the usual public worship. They are held for the purpose of giving the convenience when there have been neglect and indifference manifested.

5. Local preachers' meetings are usually held seven days before the quarterly meeting of the circuit. They are occasions of pleasant and profitable intercourse. After an hour spent in taking tea together, the superintendent-preacher presides, a secretary records the names of those present, and a summary of the proceedings. The names are called over, and inquiries made as to their appointments, especially when neglected. Probationers receive every kind of help and encouragement; any revivals, or evidences of either prosperity or adversity, are reported and considered. Occasionally new preaching stations are accepted, and young men are examined before them before being received on trial, and again before they are received on full plan. The services of local preachers are all gratuitous. A Yorkshire country gentleman, when asked what reward he expected for his services, said, "I preach in a meeting a Superintendent, and keep myself." Local preachers are expected to confine their labors to their own circuits; they are all to meet in class, and are allowed to have from the book-room publications at the trade discount. According to rule, they may not hold love-feasts, but the rule is not strictly enforced. 

6. Band meetings are the oldest society meetings connected with Methodism; but they have quite changed their original design. Band societies were established before Methodism had a separate existence. In December, 1788, Mr. Wesley drew up the Band Rules, which were printed and circulated. All who were justly terrified by faith, who knew their sins forgiven, were urgencyed to meet in band, and "to confess their faults one to another, and to pray for each other." It was a more strict or searching form of class meeting. For more than a century they have been introduced into every part of England; but in 1806 the Conference complained that fellowship meetings were taking the place of band meetings, and gradually they have done so; band meetings for personal examination and confession are almost unknown now; the meetings now held under that name are generally on the Sabbath as a Family Sabbath, and they consist of singing, prayer, and the relation of personal religious experience. They are led by one of the ministers, and usually continue one hour, from eight to nine o'clock.

7. Class meetings may be said to be the origin as well as the last meeting of the local society. The first of the kind of meeting of persons who were desirous to "fly from the wrath to come, and to be saved from their sins," were continued through the years 1740-41, and till February, 1742. In May, 1745, he published the first edition of the Rules of the society. Class meetings are under the direction of a leader, who has under his care from six to twenty, or even as many as sixty persons, who meet once a week for mutual edification and encouragement. The members relate their religious experience, hear of other's progress in the divine life, and receive from the leader suitable counsel and direction. These meetings have no resemblance to the confessional of secret orders. The meetings are of a purely social character, and, to render them profitable, candor and simplicity are blended with faithfulness and affection. The members contribute each at least one penny weekly towards the support of the ministry.

8. Society meetings are convened by the preacher, and consist of members of the society usually. After singing and prayer, the preacher delivers an address respecting their religious duties, Christian experience, and general duties. Occasionally he will occasionally read and expound, and their principles enforced. Seriously disposed persons are permitted to be present, and they are invited to become members of the society. These meetings are frequently held on Sunday evening after the usual public worship. They are held to stimulate members to meet the next time, when there have been neglect and indifference manifested.

9. Love-feasts are a revival of a custom practiced by the early Christian Church. They are conducted by a minister, who, after singing and prayer, desires the stewards to give to each person a small piece of bread or cake and a drink of water, after which a collection is made for the poor. The minister then relates his Christian experience, and those present follow him in giving their own experience. About two hours are occupied for these meetings; they are usually held quarterly, soon after the visitation of the Circuit Preacher, when the members are all present. Those tickets entitled their owners to attend class and society meetings, band meetings and love-feasts.

10. Prayer meetings are appointed by the superintendent of each circuit. They are open to the public, and are held at some times as being the most convenient time of each week of the week. One should be held in each society at seven o'clock on Sunday morning; in some places one is held for half an hour before the evening service, and again after the evening service. One week-day evening is devoted for one hour for public prayer, and once a month, generally the first week of the month, home and foreign chapels are specially prayed for. Much good has been done by holding such meetings in cottages, with the permission of their occupants. A monthly prayer meeting held by Sunday-school teachers and the older scholars has been a great blessing in many schools; and other ways of prayer, such as churches organized, prayer meetings in cottages, halls, warehouses, and factories. Cases are on record of very poor persons, who had a remarkable gift in prayer, acquired by close and frequent communion with God in private, having been employed in prayer-laborers, and later on, when opportunities for the above have been fully considered, and often revivals of religion have resulted from their persistent devotion to prayer. Any church which
WESLEYANS

has well attended prayer-meetings, and earnest short prayers from many members, is sure to be in great prosperity. Prayer is power, and gives courage and strength.

These notices on the rules and ordinances of Methodism are original compilation from William Peirce's Principles and Policy of the Wesleyan Methodist; Minutes of Conference; and the personal experience of a fifty years' membership in the society in London.

The year 1766, which witnessed the commencement of Methodism in America, was memorable also as that in which the first record was printed of the number of Methodist meeting in class in England. From that year we have a continuous record to the present time.

3. Order of Public Collections in English Methodism.

Name of Collection

Worn-out Ministers and their Families Fund.

Contributions in classes: May.

Public collections: July.

Home Missions, etc.

Contributions in classes: March.

Public collections: October.

Practical Missions, etc.

Subscriptions and collections: November.

Theological Institutions.

Subscriptions: January.

Church Connection:

General Chapel Fund: March.

Education Fund: Various.

Foreign Missions:

Collections: Various.
V. Institutions and Funds.—(L) Schools.—There are four theological institutions in England for the training of young men for the ministry. In official documents the theological institutions are commonly called colleges. Their names are as follows:

1. **Richmond Branch** was erected in 1840-41 largely out of the Centenary Fund, and opened in 1842. It is a very handsome range of buildings, situated on the top of Richmond Hill, about twelve miles from London. Its present staff of officers is as follows: George Osborn, D.D., theological tutor; Daniel Sanderson, house governor; Frederick P. Napier, A.B., and George G. Friedlay, A.B., classical tutors; William H. Findlay, A.B., assistant tutor.

2. **Headingly Branch**, erected in 1842-48, partly out of the Centenary Fund, is situated a short distance from Manchester, and was opened in 1843. The following are its staff of officers: William Burt Pope, D.D., theology; William Jackson, house governor; John Dury Gedden, Hebrew and classics; Alfred J. French, A.B., mathematics and philosophy; George Armstrong Bennett, A.B., assistant tutor.

3. **Heatingly Branch** was erected in 1856-57 (and opened 1868) partly by a grant of £12,000 from the Jubilee Fund of the Wesleyan Missionary Society. It is situated a short distance from Leeds, Yorkshire, and was at first intended for the training of young men for the foreign missionary work. That design has since been changed, and the Richmond Branch is now used for missionary students, as being nearest to the Mission House in London. Its present staff is as follows: John Shaw Banks, theology; Benjamin Hillier, house governor; Robert Newton Young, classical tutor; Edward H. Hughes, A.B., and William Foster, A.B., assistant tutors.

4. **Birmingham Branch**, erected partly out of a handsome gift of £10,000 by a gentleman residing in that locality, Solomon Jevons, is now (1880) in course of erection. It is situated in the estate of seventeen and a half acres, adjoining the suburb of Handsworth, in the midst of an un delighting and wood-woof tract of country, about three miles from Birmingham. The college, of which the memorial stones were laid in June, 1880, by the president of the Conference, Sir Francis Lyttelton, is now being built. The design is for a co-educational college; a college where the boys and girls are instructed in harmony with the principles of the late Rev. John Wesley. In 1846 it was also made, by royal charter, one of the colleges of the University of London, and degrees in arts and laws are open to all its students.

11. **Schools for Ministers' Children**—The Schools' Fund was instituted by the Wesleyan Conference as a fund for the education of the children of Wesleyan ministers, and he commended it to the liberal support of his people in the most forcible terms. The collections and subscriptions for the Schools' Fund are made in the early part of November. Out of it the four schools for ministers' children are entirely supported, and an allowance is made for the education of those for whom there may not be room in the schools. These allowances are only made for children between the ages of nine and fifteen.

The general committee consists of the governors of the New Kingswood and Woodhouse Grove School, the governing body of the School for Girls, and seventeen other ministers and laymen.

(1.) **For Boys.**—The governing body of the New Kingswood and Woodhouse Grove School consists of the president and secretary of the Conference, the ex-presidents, the current governors and secretaries of the Schools' Fund, the chairman of the Bristol, Bath, Halifax and Bradford, and Leeds Districts; the governors and the head-master of the school; and ten ministers and thirteen laymen named by the Conference.

New Kingswood School is situated at Lansdown, Bath, and was founded in 1853. The Kingswood School near Bristol, was founded by the Rev. John Wesley, A.M., in 1748. It is now a Reformatory School for young criminals in connection with the nation.

Woodhouse Grove School was established in 1811.

(2.) **For Girls.**—The governing body of the Schools for Girls consists of the president and secretary of the Conference, the ex-president, the general treasurers and secretaries of the Schools' Fund, the general treasurers...
and secretary of the Children’s Fund, the chairman of the Second London and Liverpool districts, the local treasurers and secretaries, and fifteen other ministers and laymen.

Quenswood School (Clapham Park) is near London. The executive committee consists of ten members.

Trinity Hall School (Southport) is near Liverpool. The executive committee consists of ten members.

(II.) Other Institutions. — 1. The Wesleyan Chapel Union, formed in 1818, and incorporated in 1854. The committee, consisting of an equal number of ministers and laymen, usually meets on the first Wednesday of each month to dispose of loans and grants; to determine on erections, alterations, purchases, and sales of Wesleyan trust property, including organs; and to afford advice on difficult cases. The income from all sources in 1879 was £9148 9s. 1d. The total number of applications for permission to erect or enlarge chapels, schools, and organs, which have received the conditional sanction of the committee in 1873-80, including 97 modifications of cases previously sanctioned, is 341. The estimated outlay is £283,655. Two hundred and ninety-seven erections and enlargements have been completed during the year at a cost of £318,175. The entire temporary debt left on this large outlay is £75,807, most of which will be paid off in the next few years from the entire amount of debts which have been discharged or provided for during the last twenty-six years is £1,482,559.

2. Metropolitan Chapel Building Fund (instituted in 1882). — This fund originated from the generous gift of the late Sir Francis Lyeceet of £50,000 towards the erection of fifty Methodist churches in London during twenty years. Sir Francis in 1880 gave £5000 more towards the erection of ten additional chapels. Shortly afterwards he died, after only ten days’ illness. The secretary of the fund is the Rev. Gervase Smith, D.D.

3. Itinerant Methodist Preachers’ Annuity Society. — The society, formed at Leeds in 1806, re-formed and revised in Leeds in 1837, and revised again in London in 1860, and is the same which is often called among the Methodists “The Preachers’ Fund.” It was formed by some of the preachers for the relief of supernumerary and superannuated preachers among themselves and of their widows, and is supported by donations and legacies, but chiefly by the payments of the members themselves. The annual payment is now by preachers on trial, £5 5s.; by ministers in the home work, £6; and by ministers on foreign stations, £10 4s.

4. Besides these agencies, there exists also a separate mission in London, chapels to be erected by the army and navy, and a lay mission, each under distinct management, for London, Manchester, and Liverpool. Since 1875 the temperance movement has been recognised by the Conference, and circuit societies and bands of hope are rapidly forming throughout England. There are also committees of privilege and exiguity, and those for the promotion of the religious observance of the Sabbath.

5. A Sunday-school Union was established in 1874, and the total number of schools in union in 1880 was 2029 out of 8236 belonging to the Connection. The secretariat is in the Rev. Gervase Smith’s rooms below No. 82, Duke Street, in the city of London.

6. The Children’s Home — Orphanage, Refuge, and Training Institute originated at Lambeth in 1869, has now four branches, and a fifth is in preparation.

London Branch. — Bonner Road, Victoria Park, E.

Lancashire Branch. — N. heathseaf Farm, Edgworth, near Bolton.

Canadian Branch. — Hamilton, Ontario, Canada.

Ontario Industrial Branch. — Milton, Kent.

Orphanage Branch. — Birmingham.

Preparatory.

This institution exists for the nurture and education of orphans and destitute children. It has been sanctioned and commended to the Christian public by several resolutions of the Conference, to which body the committee of management is annually submitted for approval. At present five hundred children are in the Home, and nearly all sent forth into the world, and the reports received concerning the great majority of them are highly satisfactory. The Home is also a training institute for Christian workers, especially with the view of preparing godly men and women for work in orphanages, industrial schools, children’s hospitals, and similar institutions.

7. Conference Office and Book-room (2 Castle Street, City Road, London) was instituted by the Rev. John Wesley. It was formed by him for the publication and sale of his works. On his death he vested his property, viz., 2000 guineas, consisting of books, the income from which “for carrying on the work of God in connection with the Conference.” The whole of the proceeds of this institution is devoted to the support and extension of Wesleyan Methodism in Great Britain and Ireland.

8. Wesleyan Methodist Missionary Society (Centenary Hall, Bishopsgate Street Within, London).—Missions were commenced in 1786, and the society organized in 1816. The committee of management consists of the president and the secretary of the Conference, the general treasurers, the general secretaries, the honorary secretaries, the stewards of the London College, the Connexional editor, the lay treasurers of the Rich mond institution, the London district treasurer, and of fifty-two other members, viz., sixteen from the country circuits and thirty-six resident in London: four of the latter go out annually by rotation, and four of the former are also changed each year. Every person subscribing annually one guinea or upwards, and every benefactor of £10 and upwards, is deemed a member.

The Wesleyan missions were commenced in 1786, and were, until 1818, confined chiefly to British North America and the West Indies. In the December of that year, however, Dr. Coker, accompanied by a band of young missionaries, embarked for India. Up to this period, Dr. Coker had mainly raised the funds needed to carry on the Methodist missionary operations. The additional evangelical enterprise now entered upon mustered new arrangements and exertions necessary. Various plans were suggested; but that which originated with the late Rev. George Morley and the late Rev. Dr. Bun ting, then stationed at Leeds, and sanctioned by several of the ministers in that town and neighborhood, was adopted by the ensuing Conference. That scheme has been greatly owned of God. In 1814 the income of the Methodist Missionary Society was £7000, comprising 10 missionaries, and the number of members under their care was 18,747. Now there are, according to the last returns in 1880, 92,527 accredited Church members, besides 10,885 on trial for membership, under the care of 919 missionaries; and the income is £185,498 12s. 4d., inclusive of £37,922 4s. 11d. received from the Thanksgiving Fund. The expenditure in 1879 was £148,107 6s. 10d. The legacies for 1879-80 amounted to £4966 1bs. 8d. The Ladies’ Committee for Female Education in Heathen Countries expended £2296 1s. 6d., besides supplying clothing, etc., for charitable objects.

9. The Home Mission and Contingent Fund was instituted in 1756 and remodelled in 1856. The committee consists of the president and the secretary of the Conference, the ex-presidents, the treasurers, the general secretary and the financial secretary of the fund, the treasurers of the various branches of the fund, the secretary of the Home Mission in Great Britain, with fifteen ministers and fifteen laymen for London, and thirty-five ministers and thirty-five laymen for the country. The secretary is the Rev. Alexander McCaulay. This fund is to assist the dependent circuits in maintaining the ministration of the Gospel; to provide means for the support of additional ministers, and to meet various contingencies. It is mainly supported by the yearly collection, by the Home Missionary collections made after sermons and
WESNA

meetings, and by subscriptions, legacies, and juvenile associations. The total income of the fund in 1879 was £33,514 8s. 9d., and the total expenditure £33,516 12s. 1d.

VI. Literature. This is copiously exhibited in Os-
born's Wesleyan Bibliography (Lond. 1869, 8vo). See also Morgan, Bibliotheca Canadensis (Ottawa, 1867, 8vo); and compare Methodism. (G. J. S.)

Wesna, in Slavonic mythology, is a sister of Mor-
ana: they represent spring and winter, or life and death, under whose protection human life stands. Wesna guards the beginning of life, Morana its end. She rocks men to sleep with beautiful hymns and suitable pictures.

Wessel, Johann (1), was unquestionably the most important, among his main opponents, those who hoped to prepare the way for the Reformation. The circumstances connected with his private life are involved in great uncertainty, inasmuch that even his names have been made the subject of inquiry (John, Hermanni; Gansvort, Basisius). He was born in 1409 or 1419, probably the latter year. His birthplace was Groningen, where the very house in which he was born is yet shown. He was orphaned at an early age, but received into the house of a kinswoman named Oda or Odilla Clantes, and sent to a school at Zwoll, which was conducted by the Brothers of the Common Life, and had a genuine reformation. He next devoted himself to scientific pursuits, but also to the promotion of the religious life, being aided in the latter respect by Thom-
as & Kempis, who sojourned in the neighborhood of Zwoll. In time he came to fill the place of an under-
teacher, but unpleasant surroundings and a thirst for greater knowledge drove him away from Zwoll to Co-
logne, where he studied Greek and Hebrew, chiefly un-
der the direction of private tutors, and also examined the libraries. His habit was to note the results of his readings and impressions in memorandum, which he con-
tinued to keep to the end of his life. The independence of thought which his method of study displayed was yet further cultivated by the study of Plato, the great 

antagonist of scholasticism and agent in the restoration of theology, and the simple and unadorned mystic 

Rupert of Deutz (q. v.). It was not possible, however, 

that he should find in bigoted Cologne a soil suitable for the propagation of his views. An invitation to Heidelberg was extended to him, but he was not yet ready to de-
vote himself exclusively to the work of teaching, and 

himself attracted to Paris, where the controversy 

between nominalists and realists had broken, out afresh. He paused for a little while at Louvain, and then hastened to the court of Maximilian in his court 

at Vienna. Here he met Henry of Zomerer and Nicholas of Utrecht, both famous professors, over to realism; but the end 

was that he became a nominalist himself, and continued to 

be such while he lived. He remained in Paris about 

sixteen years, not sustaining an altogether receptive at-

titude, but doing his part to shape the mind of the com-

ning generation. He was most powerfully stimulated by 

association with cardinal Bessarion, Rovere, then gen-

eral of the Franciscans, but afterwards pope Sixtus IV, 

and with younger men like Reuchlin and R. Agriola. 

He visited other French cities also, e. g. Angers, in or-

order to take part in disputations, and two years before 

the close of the pontificate of Paul II came to Rome. 

Here he found the most advanced culture of the time, 

but also the most evident and shocking corruption in 

the Church. On his return to Paris he witnessed the 

attempt of Louis XI to put down nominalism by force. 

He did not, however, content himself with a mere 

-Heidelberg as a member of the philosophical faculty. 

His combativeness as a debater had in the meantime 

earned for him the title of Magister Contradictionum. 

He soon afterwards retired to privacy in his native town 

of Groningen, and spent his remaining days in arrang-

ing and publishing his Commentatio de commissio-

ation of a profound piety. All the works from his pen 

which we possess were probably written in this period, 

when the mystical trait in his nature was becoming 

prominent. He is said to have been the physician of 

the bishop, and the Trentendorn correspondence 

of Rovere (see above), which circumstance probably de-

terred the inquisitors of Cologne from proceeding against 

him, as they did against J. von Wessel (q. v.), and as 

Wessel thought they would. He maintained a large 
correspondence and received many visitors. He also 

contributed much towards the formation of the charac-

ters of R. Agricola, Alexander Hegius, Hermann Busch, 

etc., with reference to whose influence in the future he 

predicted that his young friend Oostendorp would live 
to see the time when scholasticism, i.e. the teachings of 

Aquinas, Bonaventure, etc., should be rejected by all 

true Christians. He was embittered, however, by doubts 

respecting all the verities of the Christian faith, with 

which he struggled almost despairingly, but which he 

conquered with the cry, "I know nothing but 

Jesus, the crucified one." He died in peace, but with-

out having received the papal absolution, Oct. 4, 1489, 

and was buried in the Church of the Nunnery at Gre-

oningen. After his death the mendicant monks subject-

ed his writings to their rage, and probably destroyed a 

portion of them, though a sufficient quantity of them 

was preserved by the devotion of his pupils to enable 

us to estimate the character of the man. The first col-

lection was made by S. B. Hurst, omitting an essay on 

the Lord's supper, which was added for the first time in 

the Groningen edition of 1614.

Wessel's career was largely determined by the fact 

that he was never bound by any vow, official station, 

or other similar obligation; so that while he was great-

ly interested in the conditions of the Church and the 

school, it was yet possible for him to be to some extent 

an independent observer. He was thus able to com-

mand the leisure required for a thorough examination 

of the matters he discussed, and the calmness essential 

to scholarly polemics. It must be added that he was 

natur-

ally endowed with an independent spirit and sound judg-

ment. Neither the superstitions of the Church nor the 
mysticism of the Brothers of the Common Life could 

overturn his balanced mind.

The writings of Wessel do not constitute a system. 

His method was somewhat spheroidal, involving the 

discussion of the questions of the day, as having been 

revised and extended to him, but he was not yet ready to de-

vote himself exclusively to the work of teaching, and 
sent himself attracted to Paris, where the controversy 

between nominalists and realists had broken out. A 

moral, contained in the treatise De Providentialia Dei, 

which conceives of God as the absolute cause, or, in 

other words, as independent Being. The pantheistic 
tendency of this idea of God is not sufficiently guarded against, but finds its rectification in the emphasis which Wessel else-
where lays upon the idea that God is pure Being, 
distinct from and above the world. In the doctrine of 

the Trinity the Father is the divine wisdom, the Son 

the divine reason, the Spirit the divine love. The Deity 

is the creative life, the original idea, which is necessarily 

active and compelled to glorify itself. This glorifying 

of the divine nature constitutes the Son, the ἐσόγ 

μορφή; and in order that both may not be unem-

ployed, the self-conscious and self-glorying Being 

must also eternally love himself. In anthropology 

man is conceived of as being in the likeness of God, as 

respects his inner nature. The parts of the divine im-

age are not so expressed as though they 

and each of these parts is, it would appear, held 
to be incessantly subject to the divine influence. He 

locates the divine image even more particularly in the 

human will, which is free, and which is sharply 
distinguished from the intellect and the desires. In 

discussing the problem of evil, he concludes with the 

fruitful source from which spring the will, the judge-
ment, self-consciousness, etc., and remarks that man has in his personality the ability to transform the naturally existing relation between the Divine Spirit and the human into an ethical relation, an immediate consciousness of God residing in him and demanding that he be morally bound to effect this change. In soteriology he places the origin of sin in the angel-world, but does not account for its transfer into the world of men. It would even seem that he regards it as an inherent factor in the constitution of man, since it is to him merely a delusion. Adam and Eve were far from being perpetual sinners while in Eden, and needed, even if temptation had been resisted, development in every side of their nature. It is difficult to see how this undeveloped state could be other than a sinful state under his definition. He recognizes a moral depravity as having been imputed in the fall, but makes it amount to a mere immaturity, which does not extend so far as to destroy the freedom of the will, though it unites man from attaining to his rightful goal. Grace is necessary and the only means of salvation, because it was required for human well-being from the beginning.

Redemption is a process which required that Jesus should be the "express image" of God. Christ, as the source of life, was mediator from the beginning. He was from all eternity appointed to be the king and head of an empire, which is in no sense a merely social organization since the one is the life of the other. He is the one and is himself the end for which it exists. In the atonement Jesus died for us and made satisfaction to God. The process of redemption is, however, constantly described by Wessel as a conflict in which the Lamb is not regarded as taking upon himself the wrath of God, but as resisting the assaults of the devil, who is empowered to wage war and is assisted therein by God. The death of Jesus is then conceived as the completion of the life-long struggle. His victory consists, on the one hand, in the subjugation of the devil, who is unquestionably regarded as the personification of the power of evil, and, on the other, in the demonstration of his triumph that he is the testator of the New Testament, in his death and in his evident drawing of all men to himself in his righteousness and love. His merit as redeemer is superabundant, for he is the consummation of the race, and in his capacity as head and redeemer has more to offer than man possessed before the fall.

The condition of salvation is faith in God, based on the word of Christ. Justification is distinguished from the remission of sins, and conceived of as the positive act of renewing in righteousness through a union with Christ in the Holy Spirit. God regards his man as being positively righteous in Christ, though not for Christ's sake. This is stated in a different light when Wessel teaches that faith does not lay hold upon the work of Christ, but upon his life-giving person. This union having been formed, faith melts into love, and good works may appropriately be said to flow from either quality. Remission of sins is nowhere allowed an independent place in Wessel's theological system. Repentance is not with him sorrow for the sins of the past, but is, in substance, conversion or freedom from sin. It is a matter of the will rather than of the feelings.

Upon the doctrine of the Church Wessel differed from Wycliffe and Huss in that he did not define the Church to be a commumio praeestitutorum, but a commumio sanctorum. The circumstances of his age obliged him to look for the visible Church within the papacy, and according to his juridical position he restricted its operations altogether to externalities, and denied that a papal excommunication has power to control God. He even asserted that a pope is entitled to be the director of the faith of the Church only when his own faith is correct; and he rated the authority of the papacy higher than the authority of the clergy. But he esteemed the Scriptures even above the universities, and addressed to them the final appeal. The Scriptures, he held, are simply the Holy Ghost speaking to man. They are clear and self-explanatory and also sufficient. Tradition, however, was not rejected, and he contended that the Church was placed on an equality with Scripture by him.

With respect to the sacraments, Wessel denied that they are of themselves effectual means of grace. The infusion of love into the heart constitutes true baptism, and God is himself the administrator, according to his view; the priest, of whatever degree he may be, only supplies a minister, and not able to contribute anything whatever to the gracious power of the sacrament. The sacrament of penance was not allowed by him to possess any vital connection with inward purification, and the priest's agency in it was only to teach, to lead to acts of penance, and to certify them. He led to the caution forth of proper disposition through the employment of instruction, exhortation, etc. This view carried with it the rejection of indulgences as a matter of course, for they were the fruitage of the sacrament of penance as held by the Church. Wessel does not hesitate to term them swindle, and piously indulgences abominations. In connection with the Lord's supper, he contended against the opus operatum, or bringing of masses in behalf of particular individuals. He held that the mass has value for him who hungers and thirsts for the bread of life, the eating of which he regards as the highest function of an individual. The idea of sacrifice has no place whatever in his view.

In eschatology Wessel held firmly to the existence of purgatory, but as a place of purgation rather than satisfaction. The fire which burns there is the fire of piety, and, more particularly, of love. Christ himself is there to preach his Gospel among the dead, and to make of purgatory a place of delights. Wessel did not paint the state of the lost, and therein left his description incomplete.

The fanatical hostility of the mendicant monks prevented the immediate publication of Wessel's writings. Luther's collection of these writings, entitled Farrygo Rerum Theologiaca Umberrima, appeared in 1521, and was followed by repeated editions in 1522 and 1523. The last edition was that of Strack (Giessen, 1617), following a complete edition of Wessel in 1614. The Farrygo contains the following books: De Benignissima Dei Previsione, De sancto Spiritu, De quibusdam Decretis, Magistratis, Dominicoe Incuramationibus et Passionibus; De Dignitate et Potestate Ecclesiasticati; De Sacramentum Penitentiae; Quae sit Vera Communio Sanctorum; De Purgatorio; and a number of letters, among which one, De Indignitatis, addressed to Hoecck, deserves special mention. The com- complete edition completed by Louvet in 1750 contains, in addition, the tract De Eucharistia, which Luther had omitted for dogmatic reasons, and also an extended essay, De Causis Incuramationis et de Magistrattudine Dominicati Passionibus, in two books; and three ascetical works entitled, respectively, De Orat. Bas. Meditations, and Exempla Sacra Medit. The impression made by a reading of the Farrygo is that Wessel was a man who lived with pen in hand, and who for that very reason seldom undertook the composition of an extended work. It is, accordingly, not remarkable that statements with respect to lost writings from his pen do not harmonize. For information respecting such writings and also concerning Wessel's life, see Horden: Suffridus Petri De Scriptoribus Friae; Ubo Emmius, Historia Rerum Friaequirum; the Effigies et Vitae Professorum Academiae Groningae (1654); and especially Murer, Commentatio Hist. Theol. (Trav. ii. 1st ed. 1681); id: De Wesseli Gangfortii, etc. (Ad Amstelodam 1640). See also Hamburger Reformatorum vor der Reformation (Hamb. 1841). Jud, iii, 506. (B. P.)

Wesseling, Peter, a German philologist, was
born at Steinfurt, Jan. 7, 1692, of an old and wealthy
Westphalian family celebrated in literary circles. He
was educated at the University of Leyden, and after-
wards at Franeker, where in 1718 he was received as a
candidate for the ministry. In 1719 he was made
professor of Greek at Middelburg, in 1721 rector
of the gymnasium at Deventer, in 1728 professor of
elocution and history at Franeker, and in 1735 filled
the same chair (with the addition of canon law in 1746, and
the librarianship in 1749) at Utrecht, where he
died, Mar. 29, 1786. He wrote, Epistola ad Archi-
daemum de Agulis in Scriptis Phthionis Jud. Fragmenta et Pla-
tonis Epistolam XIII (Utrecht, 1748) —— Observationes
Variarum Libri (Amst. 1727) —— Diatribes de Judaorum
Archontibus ad Inscriptionem Berenisseum, et Disserta-
tio de Evangelio Iesus Imperatoris Anastasii non Een-
dacius et Divini (Utrecht, 1738) —— Deusemumque
Articulaturus Usu Numismatique apud Hebræos (ibid. 1759) ——
Dissertatio in Epistolam Jeremiae (ibid. 1752). See
Winer, Handbuch der theol. Literatur, i, 52, 560; Fürst, 
(B. P.)

Wessely, Hartwig (or, according to his Jewish
name, 'Hille Wessely'), a noted Jewish writer, was
born in 1725 at Hamburg. Like his friend, Rabbi M. H.
heinich, he was originally a Rabbinic Jew, and observed
the traditional law to the last. His thirst for knowledge
led him to acquire the German, French, Danish, and Dutch
languages, and to study mathematics, natural philos-
ophy, geography, and history. An extraordinary power
of writing Hebrew both prose and poetry, secured him
the esteem of his nation, and gave him an opportunity
of communicating his acquirements in a national, and
therefore an unsuspected, form. The edict of the
emperor Joseph II to establish elementary schools among
the Jews first exhibited Wessely as a Reformer. He
wrote a letter to the congregation at Trieste upon the
subject, in which he related the importance of elementary
instruction, recommended the study of Hebrew gram-
matica, and advised the postponing of the Talmudic studies
to a riper age. This brought down upon him all the
weight of Rabbinic indignation, especially that of the
Polish rabbins, who attacked and anathematized him
with vehemence, while those of Trieste, Venice, Ferrara,
and Reggio supported him. Wessely, who died at
Hamburg in 1805, may be considered the founder of
modern Hebrew literature, in the same way as Mendels-
sohn was of German literature among the Jews of his
age and country. For though in destitute circumstances,
he found time and strength to write a series of works
which form a new era in Hebrew composition, and have
united his name with that of Mendelssohn in the hon-
orable appellation of the "two restorers of science among
the Jews." Jost's description of the effects of their labors
is very striking. He says, "They found the Jews with-
out an alphabet, without letters, without books — the
German and the Hebrew." He wrote, גירל, The Spirit
of Grace (Berlin, 1780, s. o.), a commentary on
the Book of Wisdom, translated into Hebrew by him-
self: נדעל, A commentary on Levit-
cus, which forms part of the commentary of Mendels-
sohn's Pentateuch: נדעל, The Wine of Lebanon
(ibid. 1775), a commentary on the treatise Aboth: —

West (expressed in Heb. by יﺰ, behind; ב, the
sea; ב, the going down of the sun [and so in Greek θυάτερον, sunset]; ב, evening). The Shemites,
in speaking of the quarters of the heavens, etc., sup-
poses his face turned towards the east; so that the east
is before him, לְעוֹנָה, strictly what is before or in front; the south on his right hand, נַפֵּל, strictly what lies to the right; the north on his left hand, אֶלֶף, the left side; and the west behind him, מִתְנַשֶּׁה, literally the hinder side. The last Hebrew word, though never translated "west" in our version, means so: as in Isa. ix. 12, "the Philistines behind," opposed to the Syrians, גָּוָע, Sept. אַרְּבָּא הַמַּעֲמָא; Vulg. ab occidente; and in Job xxxii. 8. The words (Deut. xi. 24, "the uttermost sea," מַגְדֵּל נְהָר, are rendered in the Sept. ποιμα τῆς ἰπείρου; Vulg. ad mare occasuale (comp. xxiv. 2; Joel ii. 20). The more general use of the word for the west is superceded among the inhabitants of Palestine by מַעֲמָא, literally "the sea," that is, the Mediterranean Sea, which lay to the west, and which, as a more palpable object, became to them the representative of the west generally, and chiefly associated with their ideas of it. Accordingly this word מַעֲמָא and its derivatives, מַעֲמָא, etc., are thirty-two times rendered by מַגְדֵּל נְהָר, in the Sept., and only once by מַעֲמָא; in the Vulg. by occidentem and maris. It is used to signify a quarter of the heavens, or of the earth (Gen. xxviii. 14; Deut. xxxiii. 23; 1 Kings vii. 25; 1 Chron. iv. 24; 2 Chron. iv. 4; Isa. xiv. 11; Ezek. xlix. 1; Hosea xi. 1; Hagg. ii. 14; Jer. xxxi. 14;); it is used adjectively in the same sense: as, west border (Num. xxxiv. 6; Josh. xv. 12; Ezek. xiv. 7); western (Num. xxxiv. 6); west quarter (Josh. xviii. 14); west side (Exod. xxvii. 12; xxxvii. 2, 12; 12; Num. ii. 18; xxxv. 6; Ezek. xlv. 3-5, 29, 24); westward (Gen. xxxii. 14; Num. iii. 23; Deut. iii. 27; Ezek. xlvii. 18; Dan. vii. 4); west wind (Exod. x. 19). Those words of Moses, "Naphtali, possess thou the west and the south" (Deut. xxxiii. 23), seem to contradict the statement of Josephus, that this tribe possessed the east and the north in Upper Galilee (Ant. v. 1, 29); but Bochart interprets the "south," not with regard to the whole land of Canaan, but to the Danites, mentioned in ver. 22; and by "the west" he understands the lake of Tiberias, otherwise called the sea of Tiberias, or Galilee, or Gennesaret; for the portion of Naphtali extended from the south of the city called Dan or Laish to the sea of Tiberias, which was this tribe. So all the Chaldean and Syrian historians explain the word מַעֲמָא, here translated west; Sept. מַגְדֵּל נְהָר, with מַגְדֵּל נְהָר, and מַגְדֵּל נְהָר, in their translation of the Psalmist, Ps. xxxiii. 11. So in Job ii. 18. In the account given of the removal of the plague of locusts from Egypt, we are told (Exod. x. 19), "the Lord turned a mighty strong west wind," מַגְדֵּל נְהָר, נַפֵּל מִכָּל נְהָר. Supposing that these were the very words of Moses, or a literal rendering of his words, it follows that the Egyptians made a similar reference to the Mediterranean, since Moses, an Egyptian, would no doubt use the language of his country in describing an event which occurred in it. If his words do not refer to the Mediterranean, they must refer to the far-distant Atlantic, which, however, according to Herodotus, was not known to the Egyptians till many ages afterwards. Moses also represents God as saying to Abram, in the land, "Lift up thine eyes and look northward, and southward, and eastward, and westward, מַגְדֵּל נְהָר (Gen. xiii. 14). The allusion to the sea in the latter passage may be accounted for by the position of Egypt very west of the Mediterranean, and the very vivid notion of God to Abram had been preserved, and were inserted by Moses in his history. In two passages (Ps. civ. 3; Isa. xlix. 12) מַגְדֵּל נְהָר stands opposed to מַגְדֵּל נְהָר, but ought still to be rendered "the west" comp. Amos viii. 12; Deut. xxxiii. 23. The west is also indicated by the phrase מַגְדֵּל נְהָר, Sept. יִרְאוּ אֶת מַגְדֵּל נְהָר; Vulg. de terra occasus solis. These words are translated "the west country" in Zech. viii. 7, literally, the country of the going-down of the sun, and are fully translated in Ps. l. 1; exiii. 3; Mat. i. 11, comp. xi. 30; Josh. i. 4, xxiii. 3. Another word by which the west is denoted is מַגְדֵּל נְהָר, from מַגְדֵּל, to remove, pass away, disappear as the sun does; hence the quarter of the heavens, etc., where the sun sets, the west. The same idea is conveyed in the Greek word ἴσος, from ἀέω. It occurs in 1 Chron. xii. 15: Ps. lxxxv. 6; civ. 12; evii. 8; Isa. xiii. 3; xiv. 6; lix. 19; Sept. ἴσος. The same word is used: in Dan. viii. 5, Sept. ἴσος; it is used to denote the west quarter of the heavens or earth. In the Apocalypse and New Test. the word translated "west" invariably corresponds to ἴσος (Jud. ii. 19; Matt. viii. ii., xxiv. 27; Luke xii. 34; xxi. 22). It is used by the Lord's disciples when they saw the east and the west, etc. (Matt. xxvii. 11), to which Luke adds "and from the north and the south," (xxix. 29), signify all the regions of the world; as in classical writers also (Xenoph. Cypr. i. 1, 3). Godius thinks that this passage refers to the promise to Jacob (Gen. xxviii. 14), "As for the light of the east and the west, etc." In our Lord's parable of the destruction of the temple by the Romans (Matt. xxiv. 27), "For as for the lightning cometh out of the east and shineth even unto the west, so shall this come to pass in the sign of the son of man." He is supposed to have intimated the precise direction in which the Roman army conducted the invasion. His reference to the cloud rising out of the east, and the west, as the precursor of a shower (comp. I Kings xviii. 43-46), still corresponds to the west in Palestine. "The east and the west winds, which in Syria and Palestine prevail from November to February, are, to borrow an expression of the Arabs, 'the fathers of showers'" (Voyage en Syrie, i. 267; Commodius, p. 329).—Kito. Notable instances of such showers are those at the battle of Bethophon (Josh. x. 11), and Elijah's sacrifice on Mt. Carmel (I Kings xviii. 44).

WEST IN EXORCISM. A person to be exorcised stood with his face towards or his hands stretched in the direction of the west, the region or symbol of darkness. This practice is related to the EA-Towards the EA.
high station he was destined to fill. He remained here until he was eighteen, with the exception of a short time when he accompanied Major Sir Peter Halkert as a volunteer to search for the remains and bury the bones of the army which had been lost under General Braddock. On his return from this expedition he was called to witness the death of his mother, after which he returned to Philadelphia and set up as a portrait-painter. When he had exhausted his patronage in Philadelphia, he removed to New York, where he met with still better success. In 1780 he was assisted by some wealthy merchant to go abroad for the improvement of his talents. At Rome he was patronized by Lord Grantham, whose portrait he painted, became the friend of Mengs, and, as the first American artist ever seen in Italy, attracted much attention. He pursued his studies in Italy for three years, during which he was greatly assisted by wealthy Americans. He painted his Clonmel and Iphigenia, and Angelica and Medora, and was elected member of the academies of Florence, Bologna, and Parma. In 1783, visiting England on his way to America, he was induced to remain in London, and in 1785 married Eliza Shewell, an American lady, to whom he had been engaged while going to Europe. He was appointed for the archbishop of York, pictures of Agrippina Landing with the Ashes of Germanicus, which attracted the attention of George III, who became his steady friend and patron for forty years, during which time he sketched or painted over four hundred pictures. His first painting for the king was The Battle of the Nile; and it was so entirely satisfactory that the artist was received by the king on terms of intimacy from that time onward. West was one of the founders of the Royal Academy in 1768, and succeeded Sir Joshua Reynolds as its president in 1792, but declined the honor of Sir Joshua Reynolds. His death of General Wolfe, painted in the costume of the period against the advice of all the most distinguished painters, effected a revolution in historic art. For the king he painted a series of twenty-eight religious pictures for Windsor Castle. His best-known works are, Christ Healing the Sick and Death on the Pale Horse, and the Battle of La Hogue. He attempted many wonderful, and to most artists dangerous, subjects, such as, Moses Receiving the Law on Sinai: —Descent of the Holy Ghost on the Saviour in the Jordan: —Opening of the Seventh Seal: —St. Michael and his Angels Coming Out the Great Dragon: —The Mighty Angel in the Sea: —The Napoleonic War and the Other on the Earth: —the Resurrection: —and others of like character. He died in London, March 11, 1820, and was buried with great pomp in St. Paul's Cathedral. See Spooner, Blog. Hist. of the Fine Arts, s. v.; Gait, The Life and Studies of Benjamin West (Lond. 1818-20); Cunningham, Lives of Eminent British Painters.

West, Elizabeth, a pious lady, the wife of a Scotch clergyman, was born in Edinburgh in 1672, married Mr. Brie, minister of Salim, Fifeshire, and died in 1735. She wrote Memoirs, or Spiritual Exercises Written with her own Hand (Edinb. 1807). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

West, Enoch G., a Methodist Episcopal minister, was born in Clermont County, O., Nov. 25, 1825. He was the son of the object of the pious parents from infancy, and the subject of deep religious impressions from childhood; experienced religion in his fourteenth year, was appointed class-leader at the age of eighteen, joined the Ohio Conference in 1848, and assisted in promoting and conducting religious and philanthropic enterprises which occurred at Urbana, O., May 8, 1865. Mr. West possessed a well-stored mind, was a man of deep and uniform piety, bold and firm in principle. See Minutes of Annual Conferences, 1866, p. 163.

West, Francis, an English Wesleyan minister, began his work in 1778, labored twenty-seven years, and died July 3, 1820. The Minutes characterize him as "a plain, useful man." See Minutes of the Conference, 1820.

West, Francis L., a Methodist Episcopal minister, was born at Rush, N.Y., March 7, 1840. He removed with his parents to Michigan when quite young, experienced religion in his youth, was licensed to preach in 1859, and in 1861 joined the Detroit Conference, and in 1864, when he was drafted into United States service, and sent in the Twenty-third Michigan Infantry to Tennessee, where he was shot, while on duty, by guerrillas, and died in Hospital No. 1 at Chattanooga the next morning, Jan. 5, 1865. Mr. West's qualifications of mind and heart made him a young man of great promise. He was firm in purpose, of intense earnestness, conscientious, able, devout. See Minutes of Annual Conferences, 1865, p. 168.

West, John (1), a Methodist Episcopal minister, was born in Charles City Co., Va., April 20, 1768. He joined the Methodist Episcopal Church in 1784, was licensed to preach in 1787, entered the travelling connection in 1790, and was appointed to Greene Circuit, in Tennessee. In 1802 he was transferred from the Virginia to the Baltimore Conference, his connection with that body lasting until 1825, when, at its organization, he became a member of the Pittsburgh Conference. For fifty-seven years (forty-four of which he was effective) "Father West" labored in the itinerant ministry of the Methodist Episcopal Church, and in every station his ardent and unceasing efforts were made to promote the fidelity but seldom equalled and perhaps never surpassed. He died July 22, 1847. "Modesty, innocence, and punctuality were prominent traits in the character of Father West." His death was as triumphant as his life was serene. See Minutes of Annual Conferences, iv, 228.

West, John (2), a Welsh Congregational minister, was born in 1808. He studied privately for the ministry, was ordained, and for some years preached in several English counties with acceptance and success. In 1839 he was received by the Colonial Missionary Society, and was sent to Tasmania under its auspices. He not only did good work as a preacher, but as a political leader he did much for Tasmania, and his stirring appeals were a strong element in the resistance that finally triumphed over the imperial government. In 1854 he became chief editor of the Sydney Morning Herald, and labored in this capacity until his death, Dec. 11, 1873. See (Lond.) Cong. Year-book, 1875, p. 375.

West, Jonathan Renshaw, a Methodist Episcopal minister, was born in Jackson Co., Ala., Aug. 31, 1806. He experienced religion in 1825, was licensed to exhort in 1827, and to preach in 1832, and in 1846 or 1847 joined the Missouri and Arkansas Conference. During the war, he was compelled to leave the South for personal safety. In 1864 he went to Kansas, where he preached until his death, June 15, 1874. See Minutes of Annual Conferences, 1875, p. 23.

West, Nathaniel, D.D., a Presbyterian divine, was born in Ulster, Ireland, in 1734. He was educated under Drs. Chalmers and Turner; entered the ministry in the Independent Connection in Hull, England, in 1821; came to the United States in 1834, and was pastor of Presbyterian churches successively at Meadville, Pa.; Monroe, Mich.; Northampton, Mass.; Pittsburgh, Pa.; Hestonville, and Philadelphia, Pa., besides being engaged in various benevolent agencies. He was senior chaplain in the Satterlee United States Military Hospital, West Philadelphia, from May, 1862, until his death, Sept. 2, 1864. He published, The Ark of God the Safety of the Nations (1841),—Discovering the Prop of Europeans Despotism (1852)—Babylon the Great (ibid.)—Right- and Left-hand Blessings of God, or a Cure for Covetousness (Phila., 1852, 18mo)—Complete Analysis of the Holy Bible, Containing the Whole of the New and Old Testaments, Collected and Arranged Systematically

As a language model, I am not able to see images or documents. However, based on the text provided, it seems to be a historical document discussing various individuals and their contributions. The text includes biographies of notable figures, mentioning their achievements, contributions, and the contexts in which they lived. The document appears to be part of a larger collection, possibly historical or biographical in nature, given the detailed accounts of the lives and works of these individuals. If you have any specific questions or need further analysis, feel free to ask!
WESTBROOKS, JAMES M., a Southern Methodist Episcopal minister, was born March 10, 1827. He professed conversion in his twentieth year; began preaching in 1852; and in 1853 was received into the North Carolina Conference, wherein he labored faithfully until compelled to discontinue active work in 1885 from an illness of a short time previous to his death, which occurred Jan. 28, 1856. M. Westbrooks possessed a fervent but unobtrusive piety, and, though smitten down in the morning of life, he left abundant evidence of his ability as a preacher, his diligence as a pastor, and his consistency as a Christian. See Minutes of Annual Conferences of the M. E. Church, South, 1856, p. 694.

Westcott, Lorenzo, a Presbyterian minister, was born in Southern New Jersey, and belonged to a large connection known in that part of the state. He was a graduate of Princeton College and entered the Theological Seminary in 1852, where he remained three years and graduated. He was ordained in Greenwich Presbyterian Church, Brooklyn, L.I., and was installed pastor of the Church at Warrior Run, Pa., in 1859. He was called to a professorship in Lincoln University in 1865, and remained at that post until transferred to a professorship in Howard University. He was deeply interested in the elevation of the negro race in this country, and gave to this important matter his stores of learning and unceasing labors. He died at Germantown, June, 1879. See Presbyterian, June 14, 1879. (W. P. S.)

Westcott, William Augustus, a Presbyterian minister, was born in Orange County, N. Y., in 1814. After receiving an academical education, including the Latin Grammar School, he was graduated in 1838 at Rutgers College in 1838; but returned to the pastorate in 1836 at Cortlandtown, N. Y., where he remained fourteen years (1836-50), and then retired from active service to Kingston, N. Y., where he died in 1858. Dr. Westbrook was in every respect a man sui generis. He was original in thought, speech, writing, and action. He stereotyped nothing—for he could never be anything but himself. He was learned and scholarly in his tastes, but could never endure rigid system, nor follow in the tracks of others. His mind was quick, intuitive—springing to conclusions and holding on by slow reasonings. His intellect and heart and will all acted impulsively, and often at a white heat. He studied topics, not treatises and systems. His preaching was moulded in the same way, by generous and noble impulses, by large views of truth, by intense and fervid conceptions, and by the genius which often shone in his illustrations and peculiar modes of expression, as well as by the piety which warmed his childlike heart. In prayer also he was himself, natural, trustful in God, reverential, and devout. At the grave of Washington among the veterans of the War of 1812, whose chaplain he was, he prayed with the intensity of a man that bad been left to console his country and its assembly of gray-haired heroes. His social qualities were unique and attractive. He was a Nathanael in whom there was no guile, but he was also as cheerful and happy and exuberant as a boy. His heart never grew old. He was always a boy. His pupils, parishioners, and friends loved him just because he was Dr. Westbrook, unlike any one else, and always genial, gentle, great-hearted, honest, simple-minded, single-eyed, and unselfish, full of sympathy for the weak and suffering, full of generosity and labors for the cause of Christ. His very faculties grew out of the simplicity of his large nature, and without them he added much to his experience of the grace of God. See Corwin, Manual of the Ref. Church, p. 264, 265. (W. J. R. T.)

Westen, Thomas, a missionary among the Lapps or Finns down to the year 1772. This man was one of the most noteworthy characters in the history of Protestant missions. The people among whom he labored dwelt from latitude 64° northward, chiefly in the marshes of Finland and in the North country, but to some extent also among the Norwegians. Their number is now reduced to from 4000 to 7000 souls. They speak a language resembling that of the inhabitants of Finland; all belong to the same stock. As they have not made any considerable advancement in civilization, they are greatly despised by Norwegians and Swedes. In the period of the Christianizing of those regions, they heard the Gospel and were forced to receive baptism. The preachers were not able to traverse all the country and reach all the people, and hiring adventurers, intent only upon the securing of gain, came to occupy many of the parishes. In many instances persons were denied the privileges of religion because too poor to pay the amounts demanded by their ministers as a yearly contribution. The Norwegians, too, were guilty of overbearing and unjust conduct in their intercourse with these people. The result was what might have been expected; the Finns returned to their former heathenism, though outwardly observant of the forms of Christian worship. Baptized children were washed on their return from Church in order that the baptism might not take effect, and a sort of counter-baptism was administered, etc. A Finnish name was given the child, which was carefully concealed from the preachers, etc. The forgiveness of the heathen gods was invoked whenever participation in the sacrament of the Lord's supper became necessary. In more cases of alcoholism he took no more than a very small toll of harm. Drinking-shops stood in church-yards and at church-doors, and even ministers of the Church carried on a profitable traffic in the business of providing for the general thirst for fiery potions, and used persuasion to induce unwilling persons to drink. In time, no censure could be conducted without the use of alcoholic drinks. Marriages were sealed with it, and it was sprinkled over the graves of the dead as a sort of holy water. After a time, the Norwegians came into the possession of the Finnish lands and property, and even children. The Danish-Norwegian Church was not, however, altogether unconcerned about the needs of this people. Bishop Eric Bredahl visited it repeatedly, and won a few individuals over to Christianity. Isaac Olsen, a schoolmaster, spent fourteen years at Varanger, on the Russian frontier, and under the 70th degree of latitude, engaged in apostolic toils, enduring apostolic sufferings for the cause of Christ, and succeeding in some of his pupils excel their Norwegian competitors in a knowledge of Christian doctrines in the annual visitation of churches and schools. In 1707, king Frederic IV of Denmark ordered an investigation of the condition of schoolmasters and churches in Northern Finland, and in 1714 the king founded Collège de Promovendo Cursu Evangelii to make preparation for a
mission among the Finns. The result of the measures taken in consequence of these orders was the selection of Thomas of Westen to be the superintendent of the passenger mission.

Westen was born at Trondheim, in 1682, and was obliged in early life to contend with want and difficulties of every sort. His father refused to permit him to study, and, when beneficent effort made a university career possible, induced him to study medicine instead of theology. Just as he was about to take the degree of M.D., his father died and left him penniless; but poverty did not deter him from entering on the study of theology, and particularly of Oriental languages. He was able to get food of very inferior quality, and only on alternate days; and he shared with his room-mate his old and poor black coat, which compelled him to remain indoors when the garment was away. A call to Moscow as professor of languages and rhetoric, which was extended to him at this time by Peter the Great, was withdrawn without result, and he accepted instead the post of librarian at Trondheim without salary, but with a prospect of ecclesiastical preferment. In 1710 he became pastor of the parish of Vedeno, and after six years of successful labor was made lector and notary of the Trondheim chapter, and soon afterwards vicar and manager of missions among the Finns. In the capacity of lector he was called on to preach the word, to hold in each parish yearly lectures on moral and positive theology, and also to guide the school, which was designed to become a nursery for the Finnish mission.

Westen's first missionary tour among the Finns was undertaken May 29, 1716, and was protracted through West Finmark, East Finmark, and Nordland until autumn, when he returned in open boats, often at the risk of being drowned in the stormy inland waters, to Trondheim. He brought the worn-out Olsen with him, and afterwards recommended him for the post of Finnish teacher and interpreter in the missionary college. He had left a chaplain as missionary in East Finmark, and had appointed a number of itinerant teachers, besides encouraging the building of churches by all the natives whom he could persuade to that work. He also brought to Trondheim a number of Finnish children to be trained for missionary work, and in time sustained a seminary of his own. In this work the bishop, Krog, endeavored to prevent the success of Westen's plans, but was defeated through the favor of the king. In 1717 the seminary was securely established, and royal edicts were issued providing for the erection of churches and chapels within the field of the mission, and settling the qualifications of the clergy of churches and similar matters. A second missionary tour was begun by Westen, in company with several assistants whom he had gained, in June, 1718. He was already permitted to note progress in the work he had so recently begun. Several churches were in course of erection, and a number of children were secured for instruction in the principles of Christianity. The volunteers who accompanied him were left as pastors in different places, and not only became useful laborers in the preaching of the Word, but also valuable contributors to the literature of the country. Erasmus Raebrew translated Luther's Catechism, and wrote a Grammatica Lapponica, and a Specimen Vocabularii Lapponicæ. Martin Lund rendered similar service with his pen. Westen was unable to return to Trondheim in the autumn of this year, and contented himself with rendering a written report, which led to his being invited to return to Copenhagen in the following spring, that he might gain full information. He was presented to the king, and was permitted to submit for examination a list of whatever things he might consider necessary to the promotion of success in his work. Corresponding arrangements were then made and new missions undertaken.

On Westen's return for a third missionary tour, begun June 29, 1719, he found a great awakening among the young people of his charge. They clamored for education and read the Bible. The population of certain places which he had not previously visited were, however, very few. At Sarvic he was so much afraid of being nuisances that he refused to take his life; but when he preached to them, they were subdued and won. On the rock Overhalden lived a population of 288 souls who never came into the valleys, and who had never been visited by a preacher of the Gospel. When they heard that Westen intended to visit them, they were seized with mortal terror, and held a magical mass to deter him; but he came and gained their good-will and submission to the Gospel. Similar experiences awaited him in Snasaen, where he remained two months, and, after his return to Trondheim, in May, 1723, in Stordalen and Merager, in the immediate vicinity of that centre. He perceived, while visiting the Finns, also, who dwelt within the bounds of the diocese of Christiania, but was hindered by its bishop. In 1728 the district of Saltan contained 1920 newly converted Christians, and that of Finnmark 1725.

During these years Westen wrote many works in the interest of his mission, chiefly of a practical nature. A history of the Finnish-Lapp mission was completed, but has never been published, and is now probably lost. His last days were troubled with poverty. He died April 9, 1727, leaving behind him a widow who had been a helpmeet for him and continued to live in the recollection of the people whom he had served as "the lector who loved the Finnish man." See Acta Hist. Eccles. iii, 1111; v, 922; x, 867; Högtström, Description of Lapland (German ed. 1748); also Rudelbach, in Knapp's Christoterpe (1883), p. 299-380; and Hammond, Noril. Missioniæthec. (Copenhagen. 1767).—Herzog, Real-Encyklop. s. v.

**WESTERS (or Westers), a town of Sweden, capital of the laen of Westmanland, sixty miles west-northwest of Stockholm. An imperial diet was held here in 1527, in which the Protestant controversy was brought to a crisis. Liberty was granted for the "preachers to proclaim the pure Word of God," a Protestant definition being coupled with this phrase. The property of the Church, with the authority to regulate ecclesiastical affairs, was delivered into the hands of the king. The Protestant churches retained their revenues, and the ecclesiastical property fell, for the most part, to the possession of the nobles. See Fisher, Hist. of the Reformation, p. 176.**

**WESTERLO (or Wijwerlo), a Dutch town, capital of the district of Westerlo, was destroyed by the English on Oct. 27, 1516, at Copenhagen, where he commenced his linguistic studies, which he continued from 1838 to 1839 at Bonn, Paris, London, and Oxford. From 1841 to 1844 he travelled through India and Persia, and after his return was appointed in the latter year professor of Indian philology at Copenhagen, where he died, Sept. 9, 1878. Of his writings we mention, Racines Linguas Sanscritas (Bonn, 1841)—Sanskrit Formularium, together with Sanskrit Lesebog (Copenhagen. 1846). He also published the critical edition of the Zendavesta (ibid. 1854)—and the Buudeh (ibid. 1861). His two treatises De ulide Tatarum i den indiske Historie and Studier over de ulides sprog (1860) have been translated into German (Breman, 1862).**

**Westerlo, Eilardus, D.D., the successor of Theodorus Frelinghuyzen in the Reformed Church of Albany, was born in Groningen, Holland, in 1738, his father, Rev. Isaac Westerlo, being pastor of the Church at that place. Consecrated by his parents from his early boyhood to the ministry, after spending six years at the Latin school of Oldenburg, the young man emigrated to America in the age of sixteen; spent six full years in preparation for his holy office; and at twenty-two was admitted to its vows in 1760. Just at that time he unexpectedly received and accepted the call to Albany; was installed as pastor of the Church in March, and arrived in the autumn of that year in the city where he spent his ministerial life. About eight years after coming to Albany**
he fell into a state of religious despondency, which proved to be an eventful period of his intellectual life. Relief came only with much prayer and struggle of soul, but it seemed like "life from the dead." In 1775 he married the widow of Stephen Van Rensselaer, patroon of the Manor of Rensselaerwyck, and resided with her at the Manor-house until 1784, when they moved to Albany.

John H. R. Westerlo's wife was the sister of Mrs. Westerlo. The relationship between these two eminent clergymen grew in strength and usefulness with their years and services for Christ's kingdom. Both of them were ardent supporters of the independence of the American Church from British control, and were leaders among the leaders during all the strife which ended in the triumph of their principles. Both of them were equally bold and influential patriots during the Revolutionary War. When Burgoyne was moving towards Albany in 1777, Dr. Westerlo took his family to a place of safety, but came back to his home, directed his church to be opened, and held daily religious services for a week, with fervent prayers for the army and animating exhortations to those who remained in the city. Dr. Livingston aided him in these patriotic services, which continued until the surrender of Burgoyne and his army.

When Washington visited Albany in 1782, Dr. Westerlo delivered the address of welcome, and until 1789 he preached only in the Dutch language, and at his death stated services in that tongue ceased in his church. But at the period named he began to preach on a part of each Sunday in English, and continued to do so with consent until Dr. Bassett became his colleague, in June, 1787, about three years before his own decease. He was a man of fine personal presence, mild and persuasive in manner, yet dignified and commanding. He was beloved by his own people, and a favorite in the community among all denominations of Christians. An excellent classical and theological scholar, he was familiar with the languages of his times. He wrote well in Hebrew and Greek, and president Stiles of Yale College, with whom he corresponded, said that he wrote Latin with greater purity than any man he ever knew. He left a Hebrew and Greek lexicon, prepared apparently for publication, in his own neat manuscript. Among his papers was found an interesting autobiography, written in Dutch, up to May, 1782, and in English up to Dec. 4, 1790. This work, he says, was written "for his own edification and the remembrance of God's mercies." During his last illness, a brief period of despondency was followed by the most cheerful and happy security of soul. "He spoke calmly from all points of the city, and he saw him when he was near his end, and he left them with his blessing in such a solemn manner that it was thought he did as much good in his death as in his life." He will always be remembered among the great and good ministers of the Church of his fathers. He died Dec. 26, 1790. "So omnipresent was his religion, so engrossing his piety, that his habitual state of mind seemed to be 'one continued prayer,' and his life 'one unbroken offering of praise.'" See Rogers, "Historical Discourses," p. 31, 82; Corwin, "Manual of the Ref. Church," p. 266, 268; Sprague, "Annals of the Amer. Pulpit," ix, 29-31. (W. B. H.)

Westerners, Franz Boislauff, a Protestant theologian of Germany, was born Aug. 22, 1778, at Flechtorf, near Brunswick. He studied at Helmstedt, and in 1799 he was called as pastor to Magdeburg. In 1810 he was made president of the University of Magdeburg. In 1817 the Halle University conferred on him the degree of doctor of divinity, and in 1825 the king of Prussia appointed him evangelical bishop. Three years later he was made general superintendent of the province of Saxony. He died March 1, 1831. He was one of the most brilliant men of the Evangelical Church and his "Offentliche Religionsvorträge" (Magdeburg, 1800) will always be regarded as fine specimens of pulpit eloquence. For his writings, see Döring, "Die gelehrten Theologen Deutschlands," iv, 708 sqq.; Zachold, "Bibl. Theol.," ii, 149; Wimmer, "Handbuch der theolog. Lit." ii, 150, 172, 173, 174, 175, 338. (B. F.)

Western Church. See ROMAN CATHOLIC CHURCH.

Westervelt, Alfred L., a minister of the Methodist Episcopal Church, was born about 1820, of pious parents. He received a careful religious training; experienced conversion in his twentieth year: began preaching soon after, and subsequently joined the Ohio Conference; served three years as junior preacher and three as senior; and died of cholera, July 31, 1849. Mr. Westervelt was a man of deep piety and respectable talents. See Minutes of Annual Conferences, 1849, p. 388.

Westervelt, John F., a Reformed (Dutch) scholar, was born at Paramus, N. J., Nov. 7, 1816. He was a teacher in Lafayette Academy, Hackensack, in 1838, and afterwards in private seminaries in New York and vicinity until 1844. He studied theology for one year under the Rev. Albert Amerman. After embarking in various pursuits, he joined the Presbytery of Albany in 1855, and removed to Princeton, N. J., where he gave much time to the study of languages and Biblical criticism. He was familiar with the ancient languages, Hebrew, Greek, and Latin; in addition, he understood French, German, French, and Dutch. Especially was he skilled in the last, and held familiar intercourse with the theologians and poets of the Low Countries. He preached as fluently in the Dutch language as in his own. Bilderdyk, his favorite poet, he esteemed equal to any of our English poets. When Dr. Cohen Stuart came from Holland to attend the Evangelical Alliance, so great had the fame of Mr. Westervelt become as a Dutch scholar that Dr. Stuart visited Paterson, to which place Mr. Westervelt had moved in 1866, in order that he might see the renowned scholar. Dr. Stuart afterwards spoke of his "eminently attainments being equalled only by his modesty." By request of the doctor, Mr. Westervelt was made a member of the Leyden Society of Netherlandish Literature, June 16, 1876. Although Mr. Westervelt was in doctrine a Calvinist, yet he was one of the most catholic of men. Among his brethren his opinion of difficult passages of Scripture was approved by the Lord's sufficient authority. His piety was fervent and deep, his character pure and spotless, his faith trustful and strong; and in his last hours, when utterance was difficult, he declared Christ to be his satisfaction. He died Jan. 15, 1879. He published a "Translation from the Dutch of Dr. K. van der Dussen's Treatise on Commentary," and contributed to the Princeton Review articles on Van der Palm (1861), Bilderdyk (1862), Strauss, and Schlierenmacher (1866); also articles to this Cyclopaedia. See Corwin, Manual of the Ref. Church in America, p. 550.

Westervelt, Ralph, a (Dutch) Reformed minister, studied under his father-in-law, the Rev. S. Froeligh. He was licensed by the Classis and served at Paramus in 1801, at New Jersey and Warrington from 1802 to 1807, at Clove in 1808, at Bethel and Coeysmans until 1816, and at Wyanэтskill from 1816 to 1822, in which latter year he died. See Corwin, Manual of the Ref. Church in America, n. v.

Westervelt, Samuel D., a Presbyterian minister, was born in Schraelen, N. J., April 21, 1813. He was converted in his eighteenth year; educated in the Free school; studied theology, and was licensed by the New York Classis; and ordained, October, 1839, as pastor of a church in King Street, N. Y., known as the True Reformed Dutch Church. In 1852 he transferred his ecclesiastical relation to the Second Presbytery of New York, and in 1853 was installed pastor of the Free Presbyterian Church at Paramus. He continued to labor almost until the close of his life. He died Nov. 15, 1885. He was a good scholar, a clear and instructive preacher, and an acceptable writer. He
published one of the best articles on dancing as a fashionable amusement that have ever appeared in print. It was quoted in all the religious journals, republished in London, and highly spoken of by the London press. See Wilson, *Prob. Hist. Almanac*, 1867, p. 215.

**Westfall, Benjamin B.**, a minister of the Reformed (Dutch) Church, was born at Clarence, Columbia Co., N.Y., in 1798. His early life was spent on a farm. Religious convictions seized his mind when quite young. He graduated at Union College, N.Y., in 1819, and at the New Brunswick (N.J.) Theological Seminary in 1825. He was licensed by the Classis of New Brunswick in 1826. He was missionary at Sand Beach, N.Y., in 1827-28. Then he was made pastor of Rochester, part of which time Clove was connected with it. In this field he labored from 1828 until 1838, during which time he saw, as the fruits of his labor, about three hundred souls brought into the Church. His last charge was Stone Arabia and Ephratah, where he died in 1838 until his death, in 1844. He was a man of fervent piety and deep and strong convictions. His sermons, breathing his own high convictions of truth, were addressed both to the consciences and understandings of his people. He lived only to save men. His death was caused by excessive labor in revival and other meetings for the benefit of the people. See Corwin, *Manual of the Ref. Church in America*, s. v.

**Westfall, Simon V. E.**, a minister of the Reformed (Dutch) Church, was born at Rhinebeck, Dutchess Co., N.Y., in 1804. He graduated at Williams College in 1821, and at the New Brunswick Seminary in 1824. He was licensed by the Classis of Rensselaer in 1834. He was pastor of the Hyde Park Church, Dutchess Co., N.Y., from 1824 to 1837, and Union and Salem from 1837 to 1844. At this time he went as missionary to Illinois, and in that capacity he labored without interruption for seven years, from 1847 to 1848. In 1849 he undertook the trying task of building up an "eminent Dutch Church" in the young city of Pekin, Tazewell Co., Ill., where, with the exception of one year (1850), in which he labored at Vandalia, Morgan Co., he ministered until 1856. His task was long and arduous, but fruitful. He left Pekin in 1856, and returned to his native East to spend his declining days. He had scarcely got settled in his new house and engaged to supply the Second Church of Rotterdam, when he was taken sick, and died, in 1856. During the short time he was sick, he repeatedly uttered the word "Exalted" while visions of glory passed before his mind. He was a man of separated life, of inflexible integrity, and of a modest and distended spirit. See Corwin, *Manual of the Ref. Church in America*, s. v.

**Westfall, Thomas**, an English prelate, was born at Ely in 1573. He was educated at Jesus College, Cambridge, and afterwards became a fellow; he was assistant to Dr. Nicholas Felton, at St. Mary-le-Bow, London, and then presented to the same Church; afterwards presented to St. Bartholomew's, made archdeacon of St. Alban's, and finally made bishop of Bristol, on account of his piety and wisdom. He suffered under the Revolution, was ejected from his bishopric, and died June 25, 1644. He left no published works, but two volumes of his *Sermons* appeared after his death.

**Westhoff, Elbert Wilhelm**, a Roman Catholic theologian of Germany, was born in 1801 at Dolberg. He studied at Munster and in the Collegium Germanicum at Rome, where he received holy orders in 1829, and was appointed by the Pope as the envoy of the papal legate. In 1829 he was called to the Church at Shinninghausen, and in 1833 to Destedde. In 1851 he was called to Cologne as regent of the clerical seminary, which position he occupied until 1868, when he retired on account of feeble health. He died May 6, 1871, in the Alexian Monastery at Nerlich. He is the author of several sermons, writings of Avancinus, Augustine, Bellarmino, Gregory the Great, etc. He also published new editions of Ballerini's writings on the position of the popes to the general councils, on the primacy of the popes, and their infallibility in defining controversies fidei. (B. F.)

**Westlake, Burrows**, a Methodist Episcopal minister, of whose birth and early history nothing definite can be learned, joined the Ohio Conference in 1814. The last nine years of his life and labors were in connection with the Indiana Conference. He died of epidemic erysipelas, April 17, 1845. Mr. Westlake possessed a strong, well-stored mind, and a tender, devout heart. See *Minutes of Annual Conferences*, 1845, p. 658.

**Westlake, Charles**, an English Wesleyan minister, was born at Laxmestone, Cornwall. He was converted under the ministry of Henry Cheverton, entered the sacred work in 1831, and died suddenly of apoplexy, Nov. 18, 1858, aged fifty-three years. See *Minutes of the Conference*, 1859.

**Westley.** See *Westley*.

**Westley, James R.**, an English Wesleyan missionary, was converted under a sermon preached at Kingsland Road, London, by Holloway. He was received by the Conference in 1845, and died at Kingston, Jamaica, Nov. 28, 1874, aged thirty years. He was diligent, studious, and unremitting in his pastoral duties. See *Minutes of the Conference*, 1848.

**Westminster Abbey**, the venerable pile around which the city itself (now included in London) originally sprang. (The following account is taken from the *Globe Encyclopedia*, s. v.) The foundation of the first Abbey on a spot formerly surrounded by the waters of the Thames and called Thorney Island is involved in mystery, but here was certainly one of the earliest Christian churches in England. Sebert, king of the East Saxons, who died in 616, is believed to have completed a sacred edifice dedicated to Peter, which was destroyed by Edward the Confessor in 1050. He placed over the place built a structure of great splendor for his time, and endowed it with a charter of ample powers and privileges. Henry III pulled down a portion and enlarged the plan of this ancient Abbey, adding a chapel dedicated to the Virgin, and the incomparable Chapter-house. Henry VII built the magnificent chapel to the east of the Abbey which bears his name. After his reign the building fell into decay until renovated by Sir Christopher Wren, who designed the upper part of the two western towers. The restoration of the Chapter-house was undertaken by Sir Gilbert Scott in 1863. The nave and aisles are in the form of a Greek cross, its exterior length being 416 feet, or, including Henry VII's Chapel, 530 feet. Its interior length is 575 feet, and its greatest interior breadth 290 feet. The breadth of the nave and aisles is 75 feet, and their interior height, to which the Abbey owes much of its stately appearance, is 101 feet. The best view of the Abbey is from the west door between the towers. In the interior is a noble range of pillars terminating towards the east by a sort of semicircle enclosing the Chapel of Edward the Confessor. The fabric is lighted by a range of windows supported by galleries of double columns on the arches of the pillars by an upper and under range of windows, and four capital windows, the whole of the lights being admirably arranged. Twenty-two windows are enriched with stained glass. The new choir, 155 feet by 35 feet, was executed in 1848. The fifty-two stalls exhibit a great variety of carving and traceried. The reredos, containing the statues of St. Peter and St. Paul, is an elaborate and splendid work. The names of the various chapels, beginning from the south cross and passing round to the north cross, are in order as follows: (1) St. Benedict's; (2) St. Edmund's; (3) St. Nicholas's; (4) Henry VII's; (5) St. Paul's; (6) St. Edward's; (7) St. John the Baptist; (8) St. John, St. Michael, and St. Andrew's. The Chapel of Henry VII is adorned-

WESTMINSTER ASSEMBLY

without with sixteen Gothic towers, beautifully orna-
mented and jutting from the Abbey at different angles.
Here is the magnificent tomb of that monarch and his
queen. In the south transept is the well-known Poet's
Corner. Every English sovereign since the Conquest
has been crowned in Westminster Abbey, and the coronation-
chairs and the coronation-stone of Scotland are in
the Chapel of Edward the Confessor. Thirteen kings
(george II being the last) and fourteen queens are
buried in its precincts. Here also are the remains of Chaucer,
Spenser, Ben Jonson, Dryden, Cowley, Addison,
Congreve, Prior, Gay, Dr. Johnson, Garrick, Sheridan, Campbell,
of Handel, Blow, and

no respect the product of the Westminster Assembly, except as it is executed in the spirit of their publications, and by persons some of whom had been members of it. The notes on the Pentateuch and on the four gospels are by Ley, subdean of Chester; those on Kings, Chronicles, Ezra, Nehemiah, and Esther, by Dr. Gurnall; those on the Psalms by Meric Casaubon; on Proverbs by Francis Taylor; on Ecclesiastes by Dr. Reynolds; and on Solomon's Song by Smallwood. The Larger Prophets fell to the lot of the learned Gataker; the Smaller, in the first edition to Pemberton, in the second to bishop Richardson. The eccentric Dr. Featley undertook the Pauline epistles, but did not complete his work; and Downham and Reading were both employed on the work, though what they did has not been specified. The work is more than respectable; some parts, especially those intrusted to Gataker, are done with superior learning and ability; and the whole, though of various merit, does credit to the piety, scholarship, and judgment of the authors.

Westminster Assembly or
Divines, a name given to the synod of divines called by Parliament in the reign of Charles I, for the purpose of settling the government, liturgy, and doctrine of the Church of England. The Westminster Synod or Assembly of Divines derived its name from the locality in London where it held its sessions, and owed its origin to the ecclesiastico-political conflict between the "Long Parliament" and king Charles I, which resulted in the decapitation of Charles, the protectorate of Cromwell, and the events consequent on those changes. This conflict was, in its religious aspects, a struggle of Puritanism or radical Protestantism against a semi-
Romanish Episcopal hierarchy and liturgy; in its political bearings, a contest for parliamentary privilege and popular freedom against the monarchical absolutism of the Stuarts. The final result of the struggle was a constitutional monarchy and a moderate episcopacy, with an Edict of Toleration in favor of Protestant Dissenters.

After some unsuccessful attempts to obtain the sanction of the king, a joint resolution of the houses of Parliament was passed, June 12, 1645, which convoked a synod: "for settling the government and liturgy of the Church of England, and for vindicating and clearing of the doctrine of said Church from false aspersions and interpretations," and, furthermore, for bringing about a more perfect reformation in the Church than was obtained under Edward VI and Elizabeth, by which a closer union should be established with the Church of Scotland and the Reformed churches of the Continent might be secured. It was intended that it should include among its members adherents of all the chief parties among English-speaking Protestants, except the party of archbishop Laud, whose innovations and despotic tendencies had been one main cause of the separation of Church and State. Parliament appointed to members to this synod 121 clergymen taken from the various shires of England, ten members of the House of Lords, and twenty of the Commons. The General Synod of Scotland, Aug. 19, 1643, elected five clergymen and three lay elders as commissioners to the Westminster Assembly; and what will be seen, were simply a committee raised by Parliament and amenable to its authority. About twenty of the members originally summoned were clergymen of the Church of England, and several of them afterwards bishops; but few of the Episcopal members took their seats. The bishops of the English Church never ac-

Purcell; of Pitt, Fox, Wilberforce, Grattan, Canning, and Peel—a multitude of the illustrious departed. Palmerston, Charles Dickens, Lyttton, and Livingstone are among the latest of the glorious company. There are also memorials to Shakespeare, Milton, Goldsmith, Thackeray, John and Charles Wesley, and many others whose remains lie elsewhere. Some of the monuments, such as that to John, Duke of Argyll, are very imposing. The Abbey fills a great place in the political and religious history of England. The Chapter-house was used for three centuries as the meeting-place of the House of Commons, and was thus the cradle of representative government, and the scene of the chief acts which laid the foundation of the civil and religious liberty of England. The Westminster Assembly of Divines sanctioned in the Abbey the Confession of Faith which is the recognised creed of the Presbyterian Church (1648-52), and the final alterations in the Book of Common Prayer were made by the bishops in the Jerusalem Chamber in 1662. Roman, Anglican, and Puritan theologians have in turn preached in these walls. In recent times, under the enlightened rule of Dean Stanley, the national character of the Abbey has been well maintained. Officially called the Collegiate Church of St. Peter, it is governed by the dean, a chapter and eight prebendaries, and other officers. See Neale and Brayley, History and Antiquities of Abbey Church of St. Peter, Westminster (London, 1818, 2 vols.); Stanley, Historical Memoirs of Westminster Abbey (ibid. 1876, 4to); Historical Description of Westminster Abbey (1878), printed for the Verger.

Westminster (Assembly's) Annotations. By this name is commonly designated a work bearing the title of Annotations upon all the Books of the Old and New Testaments, by the Assembly of Divines (London 1651, 2 vols. fol.; 3d and best ed. 1657). It was the conjoint work of several eminent ministers, but was in
knewledged its claims, and the king forbade its sessions under extreme penalties, June 22, 1648; but it nevertheless became, if measured by the far-reaching consequences of its work, the most important synod held in the history of the Reformed faith. The synod convened July 1, 1648, in Westminster Abbey, in the presence of the Scottish Parliament, and the following morning, the Assembly sixty-nine of the clerical members were in attendance, and at different times ninety-six of them were present, though the usual attendance ranged between sixty and eighty. The great body of the members, both clerical and lay, were Presbyterians; ten or twelve were English or Congregationalists; five or six styled themselves Erastians. Nearly or quite all were Calvinists. The purposes for which, according to the ordinance, the Assembly was convened were, as above stated, to vindicate the doctrine of the Church of England, and to recommend such further reformation of her discipline, liturgy, and government as might be agreeable to God's holy word, and most apt to procure and preserve the peace of the Church at home, and nearer agreement with the Church of Scotland and other Reformed churches abroad. But when the Parlia-

Let us consider the characteristics of the Assembly. The Scottish Church in the 17th century was divided into the two branches of the Solemn League and Covenant, and the Assembly was a body representing all the presbyteries of Scotland, and it was attended by all the members of the presbyteries. It was a very influential body in Scotland, and its decisions were respected by the king and the government.

The Assembly debated in a most grave and orderly way. No man is called up to speak; but who stands up of his own accord, he speaks, so long as he will, without interruption. They hang long and learnedly. They study the questions well beforehand, and prepare their speeches, but withal the men are exceedingly prompt and well-spoken. I do marvel at the very accurate and extemporal replies that many of them usually make.

The question of Church government occasioned the most difficulty, and seemed for a time impossible to be settled. The Presbyterian principle that the people should be entirely on the side of Parliament were yet in favor of what they termed primitive episcopacy, or the system in which the presbyters and their president governed the churches in common. There were the Scotch commissioners and the more radical Puritans who were at the same time seeking to have the king have authority. After due consideration, these differences must be reconciled. It was accomplished after much discussion and long delay by the adoption of the Presbyterian form of government.

The subjects relating to the form of public worship and the statement of doctrines occasioned less difficulty. Early in 1644 the House was assigned to a special committee for the preparation of materials, after which they were to be brought before the larger committees and then before the Assembly. The Directory for Public Worship was prepared in 1644. The question of Church Government, so far as it referred to ordination, was submitted to Parliament April 30, 1644, and ratified by that body Oct. 2, the same year. This Directory was completed during the following year, but the printing of it was delayed till 1647. In 1645 to 1646 the Confession of Faith was elaborated, and finally put into the shape in which it is still printed in Scotland. The Larger Catechism was sent to the House of Commons Oct. 22, 1647; the Shorter Catechism, Nov. 25, the same year. In the autumn of 1648 both houses of Parliament ordered the printing and publishing of the Shorter Catechism, but the House of Lords was dissatisfied before it had acted on the Larger Catechism.

The other papers issued by the Assembly consisted only of admonitions to Parliament and the nation, controversial tracts, letters of foreign churches, etc.

The last of the Scotch commissioners left the Assembly Nov. 9, 1647. On Feb. 22, 1649, after it had held 1163 sittings, lasting each from 9 o'clock A.M. to 2 P.M., the Commons resolved that the Speaker of the Assembly dissolve the Assembly into a committee for trying and examining ministers, and in this form it continued to hold weekly sittings until the dissolution of the "Long Parliament," April 20, 1653.

A monthly day of fasting and prayer was regularly held in union with the House of Parliament. In this time it had framed and adopted a complete standard of doctrine, government, and worship for the Reformed churches of the three kingdoms. Its labors were approved by Parliament, and their results inserted into laws of the State, though with certain modifications in the temporal government. It was a great step forward in the history of Church and State. The assembly of 1648 was, however, impossible, because a large number of the English people adhered to the Episcopal establishment and liturgy, and the great majority of Irishmen were of the Roman Catholic faith. Scotland alone gave them an unparalleled obedience, which has
been continued almost intact down to the present day. From Scotland the Westminster standards were transmitted, with unimportant modifications of statement, to the different Presbyterian bodies of North America. After completing its labors, the synod was perpetuated in the character of a board of examination and ordination until March 25, 1662, when the dissolution of Parliament caused its end and the ideas of its existence, without any formal adjournment having been had. The official records of the Assembly are supposed to have been lost in the great fire of London in 1666, though it is said that Dr. McCrie, the younger, recovered a portion of them. Extensive private reports by members have survived, but we have, however, e. g. Lightfoot's Journal of the Proceedings of the Assembly of Divines (London, 1824), Robert Baillie's Letters, and three manuscript volumes of Goodwin's Notes. Clarendon's History of the Puritan Rebellion is biased and insufficient; but Neal's History of the Puritans, part iii, ch. ii-x, has a very full and, upon the whole, trustworthy report. See also Hetherington, History of the Westminster Assembly of Divines (Edinb. 1843; N. Y. 1866); History of the Westminster Assembly of Divines (Presb. Board of Publ., Phila. 1841); Minutes of the Sessions of the Westminster Assembly of Divines (Edinb. 1874); Gibbon's History, vol. ii, chs. 2, 3; Notes of the Proceedings of the Assembly of Divines (ibid. 1844); Fuller, Church History, and Worthies of England; Palmer, Noncomformists' Memorial; Price, History of Protestant Nonconformity; Hetherington, History of the Church of Scotland; Reid, History of the Presbyterian Church in Ireland; Stoughton, Ecclesiastical History of England; Rutherford, Letters; Hanbury, Historical Memorials of the Independents; Brookes, Lives of the Puritans; Reed, Lives of the Westminster Divines; Smith, Lives of English and Scottish Divines; Wood, Athenae Oxonienses; Marnoch, Early and Later Puritans; McCrie, Annals of the Scottish Church; McCrie, History of Westminster Abbey; and Skeats, History of the Free Churches of England.

Westminster Catechism. These are two in number, the Larger Catechism being designed for use in public worship, the Shorter for the instruction of the young. They are probably, next to the Heidelberg Catechism, the most widely circulated of Reformed catechisms, and are highly esteemed for their logical and systematic, and more logical in arrangement and intelligible in statement. The substance of the questions is steadily repeated in the answers, and the use of the third person is maintained throughout. The Shorter Catechism is simply an abridgment of the Larger.

Westminster Confession of Faith, that body of doctrines proposed by the Westminster Assembly, and adopted by Parliament in 1646 as the creed of the English Church, and now the doctrinal basis of almost all Presbyterian churches. A committee, consisting of about twenty-five members, was appointed by the Assembly "to prepare matter for a joint Confession of Faith" about Aug. 20, 1644. The matter was prepared, in part at least, by this committee, and the digesting of it into a form was being more or less systematically and more logically in arrangement and intelligible in statement. The substance of the questions is steadily repeated in the answers, and the use of the third person is maintained throughout. The Shorter Catechism is simply an abridgment of the Larger.

Westminster Directory for the Public Worship Without a Form of Government, but with General Directions for the Guidance of the Worship of the Church, Parliament substituted this Directory for the Anglican Liturgy, but the latter was restored on the accession of Charles II, and Scotland alone retained the Westminster.

Westminster Form of Presbyterian Church Government Combined with Ordination of Ministers. The members of the synod were at first inclined, as a general thing, to content themselves with restoring apostolical or primitive simplicity in the Episcopalian Church; but, after the arrival of the Scottish commissioners and the adoption of the Solemn League and Covenant, the synod became predominantly Presbyterian in its views. The Presbyterian constitution was recognized as originating with Christ and being the only scriptural form of Church organization. Toleration was opposed, and uniformity was strenuously insisted on. Liberty of conscience was stigmatized as the outgrowth of sloth and a common form of error; and the Jesuits. In these tenets the majority was zealously opposed, however, by the Independents led by Dr. Thomas Goodwin, who insisted upon the divine right of each congregation to govern itself under the Word of God; and by the Erastians, who wished to relegate the power to punish and excommunicate as well as civil offices, altogether to the secular authorities, and, in general, advocated the subordination of the Church to the State as the only trustworthy means for doing away with spiritual tyranny and also of obviating all conflict between Church and State. The leaders of the Erastian party were the celebrated Orientalists and antiquarians Lightfoot and Selden, etc. When the Presbyterian party prevailed, the Independents and Erastians withdrew from the synod; but Parliament adopted the Scotch-Presbyterian constitution with an Erastian proviso, and with the declaration that it should be set aside if, after trial, its provisions should be found impracticable. The event proved that England was not ripe for such a Church organization. Independency and other forms of dissent conquered the Westminster Assembly and made an end of all its endeavors towards conformity.

Weston, David, D.D., a Baptist minister, was born in North Middleborough, Mass., Jan. 26, 1836, and was graduated at Brown University, class of 1859, and of the Newton Theological Institution in the class of 1862. Soon after graduating he was ordained pastor of the Pleasant Street Baptist Church, Worcester, Mass., where he remained nearly eight years. He resigned on account of his health, and for two years was the principal of the Worcester Academy. For a short time he was pastor of the Central Baptist Church in Salem, Mass., from which place he removed to Hamilton, N. Y., having accepted an appointment as professor in Madison University. His instruction was in ecclesiastical history in the theological department, and civil history in the collegiate department. After a service of two years and a half, he died, Feb. 21, 1875. Dr. Weston published a revised and valuable edition of Backus's History of the Baptists in New England, (J. C. S.)

Weston, Edward, D.D., an eminent Roman Catholic divine, was born in London about the middle of the 16th century. He spent about five years at Oxford, studying arts at Clare College and in the school of Dr. John Chase; studied subsequently six years at Rome and some time at Rheims; taught divinity at the latter place and at Douay from 1592 until about 1602; afterwards went on a mission to England, where he remained some time; returned to Douay in 1612; became canon of the church of St. Bruges in Flanders, in which capacity he continued until his death, in 1634. He was the author of several works, among which are, Institutiones de Triplex Hominis Officio, ex Notione ipsius Naturalis, Morali, ac Theologica (1622)—Triall of Christian Truth by the Rules of the Vertues (1624)—and Theatrum Vitae Civitatis ac Sacrae, etc. (1626).

Weston, Hugo, an English divine of the 16th century, was a native of Lincolnshire. He was educated at Boliol College, Oxford; became proctor of Oxford in 1557, rector of Lincoln College in 1557-38, elected Margaret professor of divinity in 1540, became rector of St. Botolph's in 1543, archdeacon of Cornwall in 1547, dean of Westminster in 1553, archdeacon of Colchester in the same year, dean of Windsor in 1556, was deprived of his preferments by cardinal Pole for alleged impiety in 1557, and died in 1558. He was the author of, Oratio eorum Patribus et Clero, Anno Primo Mariae (1558)—Disputations with Cranmer, Ridley, and Latimer in the Divinity School, Oxford (1554). See Alibone, Dict. of Brit. and Amer. Authors, s. v.

Weston, John Equality, a Baptist minister, was born in Amberst, N. H., Oct. 13, 1796. He was licensed to preach in 1822, and in 1827 was ordained pastor of the Baptist Church in East Cambridge, a relation which continued until his death, July 2, 1831. In 1819, with Mr. Thomas Southard, one of the first Baptist newspaper in America, the Christian Watchman. See Sprague, Annals of the Amer. Pulpit, v. 718.

Weston, John W., a Methodist Episcopal minister, was born near Easton, Md., Jan. 1, 1839. He was converted in 1856; soon began preaching, and in 1862 was received into the Philadelphia Conference, and in 1869, he worked with great zeal and fidelity. He died in Wilmington, Del., April 23, 1877. Mr. Weston was a good preacher, a skilful workman, and an upright man. See Minutes of Annual Conferences, 1878, p. 22.

Weston, Stephen (1), an English prelate, was born at Farnborough, Berkshire, in 1665. He was educated at Eton and at King's College, Cambridge, where he graduated in 1686; became a fellow of both colleges; was for some time assistant and then under-master of Eton School; became vicar of Maple-Durham, Oxfordshire; was collated to a stall in Ely in 1715; became archdeacon of Cornwall; was consecrated bishop of Exeter Dec. 28, 1724; and died Jan. 16, 1741 or 1742. In 1749 two volumes of his Sermons appeared, published by bishop Sherlock.

Weston, Stephen (2), an English clergyman and Oriental scholar, was born at Exeter in 1747. He was educated at Eton and at Exeter College, Oxford; became fellow of his college, took orders in the Church of England, held the living of Mamhead (1777-90), that of Hempston, Devonshire (1786-90), and afterwards devoted himself to Continental travel and literature, becoming distinguished as a classical and Oriental scholar. He died in London, Jan. 8, 1830. His published works include translations from the Chinese and Persian, Specimen of the Conformity of the European with the Oriental Languages (1802)—Fragments of Oriental Literature (1807)—Sunday Lessons throughout the Year (1808-18)—Specimen of a Chinese Dictionary (1812)—Annotations on Certain Passages in the Psalms, with Hebrew and Greek Titles (1824)—besides several works on travel. See (Lond.) Gentleman's Magazine, 1830, i, 370.

Weston, William, an English clergyman, was born about 1700. He graduated at St. John's College, Cambridge, of which he became a fellow, and was many years rector of Campden, Gloucestershire, where he died in 1760. He was the author of, Inquiry into the Rejection of the Christian Miracles by the Heathen (1748)—Discernments on Some of the Most Remarkable Wonders of Antiquity (1748)—Safety and Perpetuity of the British State (1759)—New Dialogues of the Dead (1762)—and other works.
Westphal, Georg Christian Erhard, a Protestant theologian of Germany, was born in 1571 at Quedlinburg. He studied at Jena and Halle. After completing his studies, he acted as private tutor. In 1775 he was appointed teacher at the Quedlinburg gymnasium, and in 1779 was called as second pastor to Halberstadt. In 1785 he went to Halle, was made member of consistory in 1805, and died Dec. 2, 1808. Besides a number of sermons which he published, he translated the histories of Livy and Valerius Maximus into German. See Döring, Die deutschen Kanzelredner, p. 566 sq. (B. P.)

Westphal, Joachim, a zealous and uncompromising Lutheran polemic and Flaccianist, was born at Hamburg in 1610 or 1611. He was educated at Wittegen under Melancthon and Melanchthon, and went to Göttingen, and after various vicissitudes settled, in 1641, as pastor in his native city. When the disputes consequent on the Leipsic Interim broke out, he united with Flaccius and his party, and published his first work, against Melancthon and Wittenberg, under the title: Vind. Vit. Aurei, hoc est, de Virtutibus. Temporibus et Schoenae Epistola. (Magdeburg, 1649). A second work incident to the Adiaphoristic controversy, and discussing the advisability of allowing the adiaphora as a lesser evil than rejecting them, issued from his pen in the following year, entitled Exemplaria Generalia Sententiae quibusdam de Temporibus, in quo Quaedam Erudita Intellegere Potest quod in Controvers. de Adiaph. Sequendum aut Fugandum sit. In this, the Olssonian disputes he was associated with Johann Aeplin in the judgment returned by Hamburg, etc., theologians to doctor Alberti of Prussia on Osiander's doctrine of justification (Magdeburg, 1558). It is also probable that in the Majoritic controversy he composed the harsh opinion of the Hamburg theologians respecting Major's doctrine of the necessity of good works to salvation. His principal field of battle, however, was the sacramental dispute, in which he defended extreme Lutheran orthodoxy against Swiss and Philippist latitudinarians. Peter Martyr had denied the bodily presence of Christ in the elements of the Lord's supper, at Oxford, 1549, and Calvin and Farel avowed similar views in the Consensus Tigurinensis of that year, issued by them in conjunction with the clergy of Zurich. An extract from Major's polemic tract: De Sacramentis Christianis (Frankfort, 1552) was soon afterward printed in a small pamphlet (1552) by J. Wolphius, in which the editor claimed that Luther's doctrine of the Lord's supper had been thoroughly destroyed. Westphal at once issued a reply, and also as an attack upon the Philippists, who agreed more nearly with the Swiss than with the Lutheran view, a pamphlet entitled: Epistola de Conformitate Christianarum (Magdeburg, 1552). In 1558 he repeated the effort by publishing Recta Fidei de Cona Domini ex Verba Apostoli Pauli et Evang. (ibid.). At this juncture Mary of England had expelled the congregation of French and Dutch exiles formed by John a Lasco in London, and they were seeking a refuge in North Germany, which was everywhere denied them. Westphal held a disputa- tion with Micronius, one of their preachers, and was ex- ceedingly zealous in opposing them. In 1554 he published a third book against the Reformed doctrines of the time, under the title Collected Sententiae. De Aurel. Aug. de Cona Domini, etc., in which he tried to show that the Swiss view has no support in the ut- terances of Augustine. This work, reinforced by in- dignation growing out of the author's treatment of a Lasco and his Reformed adherents, drew out a reply from Calvin, under date of Nov. 28, 1554 (Defensio Sac- ri et Ord. Hieron. De Sacramentis Christianis, published in 1555), written in a style of proud and haughty depreciation of the adversary it was designed to demolish. A rapid interchange of writings followed, in the course of which Lasco, Bullinger, and Beza became involved in the dispute. In the effort to defeat his opponents, Westphal wrote to various church authorities in order to unite them in a league against the Swissers, and re- ceived from many of them statements of their belief, which he published under the title Confessio Fidei de Eucharistia Sacramento, etc. (Magdeburg, 1557). The leaders of the strict Lutheran party, e.g. Brentius, Andreae, Dreß, Schmaus, Dietzet, etc., also came to his support. After 1560 Westphal withdrew from the arena of religious controversy. He acted as superintendent of Hamburg from 1562 to 1571, and in the latter year was appointed to that office. He died Jan. 16, 1574. See the Corpus Reformatorum (ibid. 1840-42), ed. Breteinch, Hist. der Kirche, vii, ix; Gieseler, Kirchengesch. (Bonn, 1858), iii, 2, 1; Müller, Klemperg, ibid.; Kle- rara (Hanau, 1744), p. 641-649; Horzog, Real-Encyklop. a. v.

Westphalia, Peace of (also known as the Peace of Münster). This title designates the treaty which brought the Thirty Years' War (q. v.) to a conclusion in 1648, and which was drawn up in the Westphalian districts of Münster and Osnabrück. The Peace of Prague, May 20 (30), 1635, concluded between the emperor Ferdinand II and the elector John George of Saxony, was designed to extend amnesty to Protestants over the whole empire, excepting Bohemia, the Palatinate, and various individual princes and nobles (see the imperial patent of June 12, 1635); but these exceptions, and the success of the combined German and French forces, together with the direct intervention of France in the war, prevented the consummation of the proposed peace, and constrained the emperor to convene a general diet to meet at Ratis- bon in 1640. A more important congress of deputies from the different contending powers was assembled, however, at about the same time in Hamburg, whose deliberations resulted in the signing of preliminaries of peace, Dec. 15 (25), 1641. The settling of these preliminaries was rendered difficult by the conflicting views of the French and Swedes, and the suspicions they entertained respecting each other; and the preliminaries themselves were extended in the desire of both parties for the holding of a definite peace convention, and determined rules to be observed with respect to the safe-conduct and powers of deputies. The sanction of the representatives of the empire and of the emperor himself to those arrangements was not obtained until 1644, and the proposed congress was delayed until April, 1645. The representatives of the emperor, the states of the empire, and the Swedes met at Osnabrück, and those of the emperor, the French, and other foreign powers at Münster. Each convention was to become a party to whatever decisions might be reached in either place, and neither convention was intended to take the place of a separate peace. The negotiations, which were protracted during more than three years, were greatly influenced, of course, by the varying fortunes of the war, which was incessantly prosecuted; but the Osnabrück convention succeeded in settling terms of peace, Aug. 8, and the Münster convention reached a like conclusion, Sept. 17, 1648. The treaty was then adopted and signed in a general assembly of both conventions, Oct. 14 (24), 1648. Spain and the United Netherlands had previously (Jan. 20, 1648) reached an agreement at Münster by which the independence of the latter country was recognised and its league with Germany confirmed; in return, the independence of the Swiss Confederation, already pronounced by the Peace of Basle, Sept. 22, 1649, was con- firmed by the Treaty of Westphalia.

The provisions of this peace belong to our field only in so far as they involve religious or ecclesiastical interests. In these respects they

1. Ordain that the demands of France, Sweden, and Hesse-Cassel be satisfied. This conclusion satisfied the demands of France over the cities of Metz, Toul, and Verdun, and established its peace and the principality of Hagenau. Sweden obtained jurisdiction over Pomerania and the bishopric of Bremen. These arrangements involved the transfer of ecclesiastical property with certain exceptions which were particularly specified.

2. Compenate Brandenburg, Mecklenburg, and Brunsw.-Liebeck for territory lost by the arrangement made
to satisfy France, etc., and thereby bring about similar ecclesiastical changes as are above described.

2. The Roman Catholic Church was ordered to abandon its heresy and apostasy, and to restore the ancient ecclesiastical property. The year 1615 was agreed upon as the year to whose conditions a return should be made; but in 1616, through the influence of the Elector of Bavaria, and for the same interest; and a somewhat similar disposition was expressed by King Ferdinand of Austria. In the papal states of Austria the annuity was practically deprived of all effect by the numerous clauses and provisos with which it was hampered. Württemberg, on the other hand, secured the return of all Church property of which it had been deprived as a Protestant state. Mecklenburg also, and a number of smaller states, which had been taken from the emperor of the empire by the Treaty of Westphalia, a special provision ordered that the ecclesiastical status of all these states should be continued as before.

3. In the spiritual states of the empire, the Anglican Church was not to be regarded as the true Church, and the Protestant ministers were to be expelled from the empire, as "communists and imprecated".

4. The emperor's letter of 1616, and the acts of the Reichstag of 1617, were to be observed, and in the event of any breach of promise, the censures of the Church were to be observed, and the provisions of the treaty were to be placed in the hands of the Universal Church, with all the penalties and consequences which were provided for in the case of breach of promise.

5. The pope, through the cardinals who were acting as mediators, was to receive the cession of the imperial territories in the empire, and the guarantees of the emperor for the observance of the provisions of the treaty.

6. The treaty was to be ratified by the censors of the emperor, and the censures of the Church were to be observed in the event of any breach of promise.

The emperor issued edicts designed to give effect to the treaty Nov. 7, 1648, and the parties to the treaty exchanged the documents involved in the consummation Feb. 8, 1649. The leaders of the respective armies also had, since the close of 1648, conducted negotiations at Prague looking towards a realization of the peace, and this led to a congress at Nuremberg at which the three estates of the empire (electors, princes, and cities) were represented, and which passed June 16, 1650, a general recess of execution. The papal legate, cardinal Fabius Chigi, had protested against the peace, Oct. 14 and 26, and Innocent X followed with the bull Zelo Domus Dei of Nov. 26, 1648. It is asserted that these protests were only designed to perform a duty which the pope claimed as a right, and that the pope had no intention of performing it, since they could not under no circumstances exercise authoritative influence over the execution of the peace.

The treaty was confirmed by the diet of 1654 and often afterwards. Its execution was, as respects particulars, secured only through many disputes, and its provisions have often been violated; but it has preserved its authority in general down to the present day.

The very copious literature may be found collected in the list of Putten, in Literatur d. Staatsrichter, ii., 420 sq., 492 sq.; iii., 69 sq.; iv., 128 sq., 140; id. Getat d. westphål. Friedens, p. 77, a complement of Senckenberg, Deutsch d. Friedens (Frankfort, 1804); 7; Wollmann, Gesch. d. westphål. Friedens (Leips. 1808, 2 vols. 8vo). Wettenhall (or Wettenhall), Edward, an English clergyman, was born at Lichfield in 1636. He was educated at Cambridge and Oxford became rector of Lincoln College; minister of St. Peter's, Rochester; canon on residency of Exeter in 1667; removed to Ireland in 1672; became bishop of Cork and Ross in 1678; was translated to Kilmore in 1689; and died in London in 1718. He published, Method and Order for Private Devotion (1666)—Scripture Authentic and Faith Certain.—View of Our Lord's Passion (1710)—and other works. See Allsone, Dict. of Brit. and Amer. Authors, s. v.

Wetherell, William, an American clergyman, was born in 1600, and became minister at Scituate in 1640, in which capacity he continued until his death in 1654.

Wetherill, Samuel, a preacher of the Society of Free Quakers, was born at Burlington, N. J., in 1713, and removed to Philadelphia in early youth, where he spent the remainder of his life. He was a prominent member of the Society, and the Annotations (1752) he wrote, An Apology for the Religious Society called Free Quakers—a tract on the Divinity of Christ—and other works. See Allsone, Dict. of Brit. and Amer. Authors, s. v.

Wetmore, Israeliah, an American clergyman, was born in 1729. He graduated at Yale College in 1748; became minister at Huntington, Conn.; and died in 1786. See Allsone, Dict. of Brit. and Amer. Authors, s. v.

Wetmore, James, a Protestant Episcopal clergyman, was graduated from Yale College in 1714. He was ordained the first Congregational minister in North Haven, Conn., in November, 1718, but in September, 1722, declared in favor of the Church of England. He immediately went to England, obtained orders, and returned in 1723 as catechist and assistant to the Rev. William Vesey of New York. In 1726 he became rector of the Church at Rye, N. Y., where he continued until his death, May 15, 1760. He published Quakerism a Judicial Infatuation, and other controversial works. See Sprague, Annals of the Amer. Pulpit, v. 16.

Wette, Wilhelm Martin Ledererich der, an eminent German theologian and critic, was born Jasta of 1780, at Ulla, near Weimar, where his father, Joh. Augustin, was pastor. He began his pursuit of learning at a time when German literature was in its highest glory, and in a region where its foremost representatives sojourned. In the school at Batzdorf he was greatly embraced by lack of money. Thence he went to the gymnasium at Weimar, where Böttiger was rector and Herder ephorus. His theological course was taken at Jena, where Griesbach, and still more Paulus, exercised a stimulating influence over him, and developed in him a taste for independent study of the Scriptures.

De Wette's earliest essay in literature was a critical dissertation on the book of Deuteronomy (Jena, 1805), and his next, Contributions to Neu-Test. Introduction (Beiträge zur Einführung in das N. T.). In these works De Wette abandoned the attempt to explain the miracles of Scripture as natural occurrences, and took the ground that they are mythical events. To establish this position he undertook to show that the historical books of the Bible are of much more recent origin than ecclesiastical tradition teaches; that especially the Pentateuch is composed of fragments, the earliest of which originated in the time of David, and the latest, the book of Deuteronomy itself, in the reign of Josiah; and that many persons were engaged in the compilation of these books. As J. S. Vater, of Halle, had just published similar opinions, De Wette was obliged to revise his book and delay its publication until 1806, when the first volume of Beiträge in seine Äst. Theil appeared. The second volume appeared in 1807, and carried De Wette's work to a further development of the theory that the Chronicles are not drawn from the same source in which the books of Samuel and Kings originate; but that the writer of the Chronicles had made use of Samuel and Kings so far as they could serve his purpose, and had arbitrarily altered or added to them, so as to form a parallel to the Levitical hierarchy; and for the manner in which
these conclusions are made to react upon the credibility of the Pentateuch. He nevertheless persisted in maintaining the sacredness of the Scripture histories, even in their mythical form, and insisted that no miserable preactions can possibly be ascribed to the sacredness of these.

He declared truth to be the great law of history, and the love of truth to be the historian's first qualification; but truth was for him an ideal, poetic abstraction, which had no place either in the rationalism or the supernaturalism of those days. His views upon this subject are given in the work Erwägungen zur Charakteristik des Hebräismus, in the Studien which he edited in common with Creuzer and Daub (1807). He places himself on the side of those who believe in revealed religion, and regards Christ as the true Redeemer and the central fact in revelation.

In 1867 De Wette became professor of theology at Heidelberg after having served as tutor at Jena, and having received the doctorate of philosophy. In 1811 he published a commentary on the book of Psalms (editions in 1828, 1829, and 1860), in which he denied the Davidic authorship of a number of psalms previously ascribed to David, and in his restatement of the psalms, by the current exegesis, to the person of Christ to less distant historical events; and assigned a later date than was usually assumed to the Psalms generally. He was himself constrained to feel that his work was not conducive to devotional effects, and subsequent editions were written in such a way as to bring a supplement on the devotional exposition of Psalms (Heidel. 1857). He demands a strictly scientific exposition, and emphatically denounces all "play of pious ingenuity." Christ is, in his view, not foretold as a historical personage in the Psalms, though many ideal descriptions are there furnished which may be utilized for Christological purposes. In 1810 he called to the then newly founded University of Berlin, where Schleiermacher became his colleague and his collaborator in the endeavor to secure a theology which might satisfy the demands of both faith and science, though they differed widely as respects the application of methods. Schleiermacher insisted on a strict separation of philosophy from theology, yet persistently made use of philosophy; De Wette, on the other hand, proceeded from the theistic standpoint of Kant's criticism, and also coincided with Jacobit in his theory of the feelings in relation to the object of faith, a theory which is fundamental to the philosophy of Fries. Knowledge and faith are by him sharply distinguished from each other—the former being a matter of the understanding, and being concerned with finite things only. Infinite things are to be apprehended by faith acting under the form of feeling (devotion, emotion, migration). The religious consciousness is accordingly esthetically in character. The infinite is symbolically manifested in the finite, and the historical revelation must be conceived of, in consequence, as a symbol. This he held to be true of miracles also.

De Wette's critical labors, in this period of his life, extended beyond the limits of exegesis and reached over into systematic theology. In 1817 he published the Lehrbuch der hist.-krit. Einleitung in die konv. u. apokryph. Bücher des Alten Test., which may be regarded as the consummation of his critical progress. It passed through seven editions, and was rated by De Wette as the most furnished of the productions of his pen. In 1826 the complementary Einleitung in das Neue Test. appeared (6th ed. 1860). Earlier than both of these Introductions was his Lehrbuch der hebr.-jüd. Archäologie, etc. (Leips. 1814, 1820, 1840); and earlier still the Commentarius de Morte Jesu Christi Ezechieliana (1818). In this last work De Wette's authorship is unimpeachable; and he maintained the orthodox view of the atonement from a new direction. He represented the death of Jesus as the unavoidable consequence of his moral action, and as unexpected, but grandly met when it was at hand. The philosophical principles on which De Wette's theological system was built are developed best of all in his little work Über Religion u. Theologie, etc. (Berlin, 1815 and 1821). The first part of his book on Christian doctrine appeared in 1818, and was devoted to Bible doctrines and pervaded by the principle of "historical development" of the ideas of the primitive and theological doctrines. In Bible doctrine he distinguished between Hebraism and Judaism in the Old Test., and the teaching of Jesus and the teaching of the apostles in the New. Church doctrine was not, to his thinking, a finished product, which could undergo no alteration and be developed further. He was the last to hold the bond of union which binds together those who are members of the Church, but which preserves the attention of the theologian despite every advance that may be made. The presentation of Church doctrine, however, in these books, was simply that of the Lutheran Church. The author's own system was not given to the public until 1846. In 1819 the Lehrbuch der Dogmatik was followed by a Christliche Sittenlehre (Christian Ethics) in two parts, the former of which contained the system of ethics, and the latter the history of ethics. In this book De Wette turned aside from the beaten track, in that he did not regard Christian ethics as a mere agglomeration of moral prescriptions, but as a life having its root in a Christian disposition of the heart. His views in this field are still further exhibited in the article Kritische Ueberredung der Ausbildung der theolog. Sittenlehre in der evangel.-luth. Kirche seit Calvus, in the theolog. Zeitschrift, 1821. His last work was the big work Der Kirchenrecht (Mosch, and Lücke). His published views upon this subject fairly reflected his own theological character. He combined in himself most intimately the scientific and the practical ethical character. His whole being was enlisted in the endeavor to work a moral renunciation of the German people, and a restoration, on a large scale, of a Christian community in the land. Unable to use the pulpit, he drew up a number of pamphlets and articles for periodicals (1815-19), which were very influential and became quite popular. This constant endeavor to introduce his ethical views into the relations of practical life brought upon him the censure of the government on the occasion when the Erlangen theological student. Karl Sand, a member of the Jena Burachschaft as well, startled the German world by assassinating the dramatist August von Kotzebue under the impulse of an enthusiastic patriotism (March 28, 1819). De Wette's book became the most triumphant success of the liberal movement then being made. De Wette addressed to the mother of this misguided youth a paper in which he condemned the murder as illegal, immoral, and antagonistic to all moral law, but at the same time characterized the motives from which the action sprang as mostensonous. In this De Wette, in explication of which idea he afterwards added Jean Paul's judgment of Charlotte Corday. In consequence of having written this letter he was, despite the intervention of the academical senate in his behalf, dismissed from his professorship by command of the king. Oct. 2, 1819. He declined a sum of money offered him in compensation, and retired to Weimar to undertake an editon of Luther's writings (Luther's Briefe, Sendbriefen und Bedenken), of which vol. I appeared in 1825, and the final volume (v) in 1828. A supplementary volume was published by De Wette himself in 1829. De Wette's first comprehensive and complete edition of Luther's works ever published, and was of itself sufficient to earn for its author the fame of scholarship. In 1822 he published the didactic romance Thedor, oder des Zwiefels Wehe, to which Tholuck replied in 1828 with his Wohre Wehe des Zweifels. De Wette's death took place in 1832.
place were his constant auditors. In this way he covered a course of ethics, and another on the nature, manifestations, and influence of religion; both of which were published (Berlin, 1829 sqq. and 1827). He also gave himself, besides the pulpit, a hand in the researches into the history of the kingdom, the liturgy, and the people; and he never regularly engaged during his earlier years, and published five volumes of sermons (1825-29), which were supplemented by a sixth volume published after his death (1849). He was, however, simply a teacher in the pulpit—neither a writer; and yet the pulpit reacted upon the lecture-room, and led him into the study of theoretic homiletics, the fruit of which appears in his valuable work "Anweisungen über Bildung u. Berufstätigkeit der Geistlichen, etc. He also attempted catechetical works, but without gaining the popular ear.

During the stay at Basel, he solidified his practical element in his character more energetically developed, and introduced a noteworthy change in his religious life. He learned, in contact with different people, to appreciate various forms of religious manifestation which had formerly repelled him, and his polemical tendency gave way to an irenic disposition as his years advanced. He instituted a "Griechenverein" in 1825, whose object was the advancement of the moral and religious welfare of the newly liberated Greeks, and aided in the founding of a branch "Gustav-Adolf Verein" for Switzerland (Protestant-kirch. Hülfsverein). He was chosen (1828) to the chair of theology, with a view to ecclesiastical orthodoxy; but there is abundant evidence that he never changed the views he had adopted in earlier life. He persisted in advocating the utmost independence in theological thinking, and in regarding religion as a life rather than a creed; but testified that he knew "that home other men under heaven is given among men whereby we must be saved but that of Jesus, the Crucified One." In addition to his professional employments, De Wette took an amateur interest in art. He did not condemn the drama as immoral, and had even published a drama of his own construction (Berlin, 1823), though moral considerations prevented him from visiting the theatre. He loved music and the formative arts, and impressed their importance on the thought of his students. He wrote a second romance, and published it in 1829 (Heinrich Melchthai, oder Bildung u. Genetologie [2 vols.]). A visit to Rome in the winter of 1829 was largely devoted to the study of ecclesiastical art, and gave birth to the attractive book "Gedanken über Malerei u. Baukunst, besonders in kirch. Beziehung" (Berlin, 1846).

De Wette's chief occupation, however, was always theology, and his years at Basel were fruitful in theological science. He revised his version of the Bible, wrote the "Einziehung in's N. T.," constructed a mass of text-books and articles for periodicals, and crowned his exegetical labors especially with the "Kurzgefasstes exeget. Handb. zum N. T. [3 vols. in 11 pts. 1839-46]. He possessed in an unusual measure the power of condensed yet precise statement, and evinced it here as in all his works. This commentary was contemporary with Strauss's "Leben Jesu," and the author did not hesitate to avow, in his preface to Matthew, his sympathy with Strauss in that writer's opposition to old and new "harmonists," and in his advocacy of an idealistic and symbolic interpretation of the miracles of Scripture, though he believed that Strauss had gone too far in giving up the historical Jesus. De Wette was twice invited back to Germany, once to become pastor of St. Peter's in Hamburg, and again to accept a pastorate of Schleswig, but both invitations he declined.

He died, after a brief illness, June 16, 1849. His likeness in oil by Dietter, and his bust by Schlöth, ornament the aula at Basle.

Concerning De Wette's life and works, see Hagenbach (for many years his colleague), "Leichenrede" (Basle, 1849); Schirmer, "De Wette" (Leipsic, 1849); Schleiermacher, "K. G. W. De Wette u. u. Bedeutung seiner Theologie, etc." (Schaffhausen, 1849); Luecke, "De Wette, zur freundschäftl. Erinnerung" (Ham, 1850); Thol zend, in "Nekrolog der Deutschen, 1849," p. 427 sqq.; Broekhaus, "Conversations- Lexikon, s. v. ; Biographie Universelle, s. v. With reference to his soteriology, see his "Kritische Kirchengesch. 11. Itten Jahrhunderts" (Tüb., 1846), p. 212; and especially his "D. innere Gang d. deutsch. Protestantismus" (Leips., 1860). Respectu De Wette's merits as a critic and expositor, see the various introductions to Scripture, particularly Bleek's, and the commentaries.—Herrn. Real-Encykl. s. v.

Wettengel, Friedrich Traugott, a Protestant theologian of Germany, was born Feb. 9, 1756, at Asch, in Bohemia, where he studied at Jen. In 1780 he was graduated at Jen., and in 1775 he was appointed chaplain to the prince of Reuss, Heinrich XI.; in 1780 he was made court preacher, and in 1792 superintendent. He died at Greiz, June 24, 1824. Of his writings we mention, "Predigten über die Reken Jesu Christi vor dem Kreuz" (Erlangen, 1779).—"Sind die symbolischen Bücher ein Loch für die freie evangelisch-lutherische Kirche?" (Greiz, 1790). See Döring, "Die gelehrten Theologen Deutschlands," iv, 710 sq.; Winer, "Handbuch der theol. Lit." i, 384, 494; ii, 888. (B. P.)

Wettstein (often written Wettetstein), Johann Rudolf (1), a learned Swiss theologian (son of the state minister of the same name), was born at Basle, Jan. 6, 1614. He devoted himself chiefly to Hebrew languages. After a short term as preacher at Basle, he became professor of rhetoric, and in 1637 of Greek, from which he passed in 1644 to the chair of logic, and again in 1650 to that of theology, from which he was finally transferred to the chair of the department of New-Test. interpretation. He died Dec. 11, 1684, leaving several theological works, for which see Hoefer, "Nouv. Biog. Générale," s. v.

Wettstein, Johann Rudolf (2), a Swiss theologian, son of the preceding, was born at Basle, Sept. 1, 1647, and died there, April 24, 1711, as professor of theology (after 1685), leaving the following writings: "Originum et Locorum, Marci et Luci, Responsio ad Africani Epist. de Hist. Suaquar Gra. et Lat. cum Notia Edslit" (Basle, 1674);—his "Deputatio de Prophecia" is published in "Nov. Lit. Helv." (1702), p. 127. See Winer, "Handbuch der theol. Lit." i, 899; Fürst, "Bibl. Jad." iii, 510; Hoefer, "Nouv. Biog. Générale," s. v. (B. P.)

Wettstein, Johann Jakob, a celebrated New-Test. critic, was born at Basle, March 8, 1638, the second in a family of thirteen children. His father was minister in St. Leonard's Church, and his teachers were the younger Buxtorf, Samuel Werenfels, Iselin, Frey, etc. His attention was early turned up the manuscripts in the public library and the comparison of codices, and his early study was thoroughly grounded in that branch of learning. His "Variae N. T. Lectionibus." Travels to Geneva, Lyons, Paris, and England, in connection with which he visited all accessible libraries and made himself acquainted with all the more important manuscripts of the New Test., served to enlarge the range of his views, as did also association with Montfaucon, La Rue, and Bentley. He obtained a chaplaincy in a Dutch regiment of Switzers through Bentley's influence, but in 1717 returned to Basle and was made diaconus communitis, and in 1729 deacon of St. Leonard's and assistant to his father. In this station he earned the reputation of an able preacher and faithful pastor, but stewing among his favorite occupation, he read private lectures on exegesis and systematic theology before a class of young men, and gave his spare moments to the continued comparison of manuscripts in the library. He conceived in this period of a plan of a new edition of the New Test. Iselin and Frey worked at the same time studying the codices of the Basle Library for the purpose of aiding Bengel in the preparation of his New Test., and Wettstein came into conflict with them respecting the age of the Basle Codex of the Gospels (E), which he believed to be considerably older than Bengel supposed. This dispute soon became personal. Wettstein's orthodoxy had for some time been suspected. He was
charged with holding Arian and Socinian errors, and to this fault were now added his alleged critical aberrations. His preference of ści to ści in 1 Tim. iii, 16, on the subject of a woman's deaconship, from clara Andrin, had convinced him of its genuineness, was credited to an alleged desire of depriving the doctrine of Christ's deity of a proof. Complaints respecting his heterodoxy were expressed even in the Diet of the Confederation, and ultimately a formal process of inquisition was instituted against him. With his consent, however, to take the precaution, however, to send the manuscript of his New Test. to Holland, and his assailants were accordingly compelled to substantiate their charges from the notes of his pupils, and from the memories of those who had heard him preach. He was ultimately dismissed from his post in 1789. He founded and became the ści, as successor to Clericus in the College of the Demonstrators, and henceforward made Holland his home. The Protogemna to his New Test. had already been issued anonymously in 1780. In 1792 to 1793 appeared the New Test. itself, the work of his life; but such was the timidity of the age that he was compelled to state the readings he preferred in foot-notes, and to give the received text in the body of his work. William Bowyer, of London, first published a New Test. with Wettstein's improvements in 1763. It contained a wealth of various readings, numerous antiquarian remarks illustrative of the subject, and many parallel passages from classical, ecclesiastical, and Rabbinical writers, which made it a valuable aid both to exegesis and criticism. Wettstein had appended to his New Test. two Syriac letters discovered by him and credited to Clemens Romanus, but whose genuineness has since been disproved (the letters to Cyprian). He earned the reputation of having excelled all his predecessors in the industry and exactness with which he prosecuted the comparison of codices, having personally examined about forty. To him we owe the designation of codices now current in the theological world. He did not long outlive the publication of his book, and died March 22, 1754. In 1792 his colleague, Jacob Krugholter, published a funeral discourse over his remains, which led to a dispute between himself and Frey, of Basle. Previous to his death, Wettstein had been a made a member of the academy of sciences in Berlin and London, and of the British Society for the Improvement of the British Society for the Propagation of the Faith. See A. M., 1790, 1791, 1792, 1793, Meister, Helvet. Gesamten der neuern Schriftschr. u. Jodler di (Zurich, 1785), p. 167 sq.; Hagenbach, Wettstein . . . u. seine Gesner, in Illgen's Zeitschrift f. hist. Theol. 1830, No. 1, p. 13; Herzog, Real-Encyklop., s. v.

Wetzell, Andreas, a Lutheran minister of Germany, was born Jan. 17, 1808, at Weil, in Wurttemberg. He studied at Tubingen, and in 1831 he arrived in the United States. In Lewis County, N. Y., he commenced his ministerial labors with great success, looking at the same time after his collegejions in Oneida County. In 1852 he also commenced preaching at Utica. In 1844, the congregation organized there built a church—Zion's Church—and in 1845 Mr. Wetzell left Verona, where he labored until the year 1879, when bodily infirmities obliged him to retire from his office. He died Aug. 16, 1880. Mr. Wetzell was highly honored in his ecclesiastical station, in which he held for a great many years the office of treasurer. He also promoted the cause of education within his own Church and the community in which he lived, and took an active part in all movements which tended to elevate the moral standard of the people. (B. P.)

Wetz (or Wessel), Johann Kaspar, a learned German writer, was born at Meiningen, Feb. 22, 1691, as the son of a poor shoemaker. He was educated at the expense of Bernard, the duke of Saxe-Meiningen, at Halle and Jena. After teaching awhile, he became secretary to a diplomat, and in that capacity visited Italy and Greece, writing a number of pamphlets while there. He then returned to Germany, and finally became preacher of the duchess dowager (1724) and at Römthild (1728), where he died, Aug. 6, 1755, leaving several works, of which we mention, Hypomagnesographia, oder hist. Lebensbeschreibung der berühmtesten Liederalter-Verfasser, 1719-28, 4 pts.; Hymnomologia Sacra (Nuremberg, 1729); Nomenclator Persnonnull (ibid. 1738) —Hymnomologia Polonicae (Arnszt., 1735).—Analecta Hymnica, oder merkwaerdige Nachlese zur Liederhistorie (Gotha, 1751-55, 2 vols.). See Döring, Die gelehrten Theologen Deutschlands, iv, 712 sq.; Hoefer, Nouv. Biogr. Générale, s. v. (B. P.)

Wetzor, Heinrich Joseph, chief editor of the Encyclopædia of Roman Catholic Theology, was born in 1801 at Ansbach. After Electoral Investigation, his instruction was obtained of pastor Kaiser, at Niederklap; whence he went to the Pedagogium, and subsequently (1820) to the University of Marburg. Under Arnold's and Hartmann's tuition, he devoted himself especially to the study of the Hebrew and Arabic languages. In 1828 he was at Tubingen, engaged in the study of Oriental languages, and in 1824 he received at Freiburg the doctorate of theology and canon law. He then visited Paris, and prosecuted the study of Arabic and Persian under De Sacy, and of Syriac under Quatremère. While in Paris he published from an Arab manuscript The History of the Church and the Eastern Church in the 18th Century (1828), as written by a learned imaum of Egypt, accompanying the Arabic text with a Latin version. He had already published A Latin Treatise on the Ariant Controversy, A.D. 325—850 (1827). In 1828 he became tutor and extraordinary professor, and in 1830 ordinary professor, in Oriental philology at Freiburg. In 1831 he married. He delivered interesting lectures on the grammar of the Hebrew and Arabic languages, and on the interpretation of Scripture and introduction to the Old Test., etc. In 1840 he published, in connection with L. Van Ese, the Sulzbach edition of the Bible. In the internal dispute which agitated the University of Freiburg, he held strictly Roman Catholic ground. When in 1844 a motion was made in the Chambers of Baden to discontinue that institution of learning, he wrote an essay advocating its preservation. His principal importance, however, grew out of the sense he gave to the plan of publishing and arranging the Catholic theological work, conceived by the bookseller Herder. He was given the direction of the work, and industriously prosecuted it from 1846 until his death, in November, 1853. The work is thoroughly Roman Catholic in tone and spirit, and has doubtless contributed greatly towards advancing the tendency of theological literature of late years in Germany. Its treatment of Protestantism, the institutions growing out of it, and the men connected with it is naturally biased; but its polemics are never bitter or extreme. Significant are the brevity and superficial treatment accorded to Sailler (q. v.), and curious the mildness which Fenelon's mystical quietism receives in the article "Bossuet." The immaculate conception of the Virgin is not at all approved of, though it was not yet a dogma of the Church when the Encyclopædia appeared. The entire work, including Supplement, consists of volumes (1847-1853). A complete index facilitates its use. A new edition is at this writing (1881) in course of publication.—Herzog, Real-Encyklop., s. v.

Wexford, Council of, or Concilium Wexfordense, Wexford is a seaport town of Ireland, capital of Wexford County, on the right bank of the Slaney, where it expands into a harbor, sixty-four miles south-west of Dublin. An ecclesiastical council was held here in 1240 by the bishop of Ferns, in which it was ruled how the duties of daughter children should be divided. Clerks were forbidden to follow any kind of secular business. The infringers of ecclesiastical liberties, intruders into benefices, encendiaries, poisons, false witnesses, etc., were excomcommunicated. Curates were forbidden to excommunicate their parishioners without the bishop's sanction. See Wilkins, Conc. i. 661; Mansi, Conc. (s. sup.), ii, 1065.—Landon, Manual of Councils, p. 691.
WEZEL. See WEZEL.

WHALE. The rendering in the A.V. (besides אָרָץ, Matt. xii. 40) of two very closely related Heb. terms: בָּלָה, ban (or rather בָּלָה, bananim), as a sing., Ezek. xxxii. 2; “dragon,” xxix. 3; elsewhere as a plur. and rendered “dragons,” Job xxx. 29; Ps. xlv. 19; Isa. xiii. 22; xxxiv. 18; xxxv. 7; xiii. 20; Jer. ix. 11; x. 22; xiv. 6; xlix. 38; lii. 57; and יִבְּשָׁן (Gen. i. 21; Job vii. 12; “serpent,” Exod. vii. 9, 10, 12; “sea-monster,” Lam. iv. 9; elsewhere also “dragon,” Deut. xxxii. 38; Neb. ii. 13; Ps. lxix. 13; xci. 13; cxlvii. 7; Isa. xxix. 11; li. 9; Jer. li. 34). The texts where these are used in general present pictures of ruined cities and of desolation in the wilderness, rendering it difficult to determine what kind of creatures in particular are meant, except as may be inferred from other passages (Job xxx. 29; Ps. xlv. 19, 20; Isa. xiii. 22; xxxiv. 18; xxxv. 7; Jer. ix. 11; x. 22; xlix. 38; lii. 34). Where the term is associated with beasts or birds of the desert, it clearly indicates serpents of various species, both small and large (Isa. xiii. 20; Ps. xci. 13; also Exod. vii. 9-12), and in one passage a poisonous reptile is distinctly referred to (Deut. xxxii. 38). See SERPENT.

In Jer. iv. 6, where wild asses snuffing up the wind are compared to dragons, the image will appear in its full strength, if we understand by dragons great boa and python-serpents, such as are figured in the Ptolemaic coins of Egypt, were common in the desert, and are still far from rare in the tropics of both continents. Several of the species grow to an enormous size, and, during their periods of activity, are in the habit of raising a considerable portion of their length into a vertical position, like pillars, ten or twelve feet high, in order to survey the company above the surrounding bushes, while with open jaws they drink in a quantity of the current air. The same character exists in smaller serpents; but it is not obvious, unless when, threatening to strike, they stand on end nearly three-fourths of their length. Most, if not all, of these species are mute, or can utter only a hissing sound; and, although the mali-pambu, the great rock-snake of Southern Asia, is said to wail in the night, no naturalist has ever witnessed such a phenomenon, nor heard it asserted that any other boa, python, or erpeton had a real voice; but they hiss, and, like crocodiles, may utter a hiss akin to that of a serpent, a fact that will sufficiently explain the passage in Micah (i. 8). When used in connection with rivers, the term probably signifies the crocodile (Psa. lxix. 13; Isa. xxvii. 1; li. 9; Ezek. xxxii. 3; xxxii. 2), and when allusion is had to larger bodies of water, probably alludes to the crocodile or crocodilians (Gen. i. 21; Lam. iv. 7; Jer. iv. 8). See LEVIATHAN. The above interpretation is according to that of both Bochart (Hieros, ii. 429), who proposes always to read בַּלָּה in the sense of huge serpents; but others, following Rab. Tanchum Hieros, suggest a different etymology for the plur. forms בַּלָּה and בַּלָּה (the isolated case of a sing. form בַּלָּה, in Ezek. xxxii. 3, being taken for a corrupt reading for בַּלָּה, as in some MSS.,) from the root בַּלָּה, in the tropical sense of stretched out in running, and applied to the jackal, a swift animal, which answers well to the description where these forms occur, being a creature living in deserts (Psa. xlv. 19; Isa. xiii. 22; xxxiv. 18; xxxv. 7; xiii. 20; Jer. ix. 11; x. 22; xiv. 6; xlix. 38; lii. 37), suckling its young (Lam. iv. 3), and uttering a wailing cry (Job xx. 29; Mic. i. 8). The other passages in which the forms, sing. בַּלָּה, plur. בַּלָּה, occur are thus left to be explained as before, namely, as signifying, (1) a great fish or sea-monster, e.g. a whale, shark, etc. (Gen. i. 21; Job vii. 12; Isa. xxvii. 11; Psa. cxiv. 30; Ezek. xxv. 11, 12; Deut. xxxii. 35; Psa. xci. 13), or (2) a “dragon” (Jer. lii. 34), or the crocodile (Psa. lxix. 13), put as a symbol of Egypt (Ezek. xxix. 3, according to the true reading; also xxxii. 2). See DRAGON.

In the passages where scales and feet are mentioned as characterizing these creatures, commentators say that the crocodile is intended, which then is synonymous with the leviathan; and they have endeavored also to demonstrate, where תמרין draw the drags to suckle their young, that seals are meant, although cetacea nourish theirs in a similar manner. It may be doubted whether in most of the cases the poetical dictum points absolutely to any specific animal, particularly as there is more force and grandeur in a generalized and collective image of the huge monsters of the deep, not inappropriately so called, than in the restriction to any one species, since all are in Gen. i. 26 made collectively superior to the supremacy of man, and polytheism is still more inappropriate when, not contented with pointing to some assumed species, it attempts to rationalize miraculous events by such arguments; as in the case of Jonah, where the fact of whales having a small gut and not being found in the Mediterranean is adduced to prove that the huge fish תמרין, did not a cetacean, but a shark! Now, if the text be literally taken, the transaction is plainly miraculous, and no longer within the sphere of zoological discussion; and if it be allegorical, as some, we think, erroneously assume, whether the whale be represented by means of a kind of boat called דָּק, or it be a mystical account of initiation where the neophyte was detained three days in an ark or boat figuratively denominated a fish, or Celtic araunc, the transaction is equally indeterminate; and it assuredly would be derogating from the high dignity of the prophecy of Constantine, or the people, in the 86th year of Justinian (A.D. 562), after having destroyed vessels at certain intervals for more than fifty years. Rondoni enumerates several whales stranded or taken on the coasts of the Mediterranean; these were most likely all orcas, physeters, or cæpédæóso, i.e. toothed whales, as large and more fierce than the mysticetes, which have balein in the mouth, and at present very rarely make their way farther south than the Bay of Biscay; though in early times it is probable they visited the Mediterranean, since they have been seen within the tropics. In the Syrian seas, the Belgori pinnipeds Lavia, of his nation, and the Maltese to Palestine, incidentally mentions a "Tonymyvisch," which he further denominates an "oil-fish," longer than the vessel, leisurely swimming along, and which the seamen said prognosticated bad weather. On the island of Zerbì, close to the African coast, the late Commandor Moreau found the bones of a cetacea, of which Balaen bìlus is the largest in these seas, and two species of bâlce or dugong, which are
herbivorous animals, intermediate between whales and seals.

"Much criticism has been expended on the scriptural account of Jonah being swallowed by a large fish; it has been variously understood as a large glow-worm, as an alligator, or as a poetic mythus or a parable. With regard to the remarks of those writers who ground their objections upon the denial of miracle, it is obvious that this is not the place for discussion; the question of Jonah in the fish's belly will share the same fate as the sea serpent miracle recorded in the Old Testament (Herodotus, De Fini qui Jonum Devoravit [Vitemb. 1705])."

The reader will find in Rosennmuller's Prolegomena several attempts by various writers to explain the scriptural narrative, none of which, however, have anything to recommend them, unless it be in some cases the ingenuity, such as, for instance, that of Godfrey Less, who supposed that the 'fish' was no animal at all, but a ship with the figure of a fish painted on the stern, into which Jonah was received after he had been cast out of his own vessel! Equally curious is the explanation of C. Antonius, who supposed that as just as the prophet was thrown into the water, the dead carcass of some large fish floated by, into the belly of which he contrived to get, and that thus he was drifted to the shore! The opinion of Rosennmuller, that the whole account is founded on the tradition of Nebuchadrene, is confirmed by Neptune (Lycephon, Cassandr., 38), although sanctioned by Gesenius, Winer, Ewald, and other German writers, is opposed to all sound principles of Biblical exegesis. It will be our purpose to consider what portion of the occurrence partakes of a natural and what of a miraculous nature. In the first place, then, it is necessary to observe that the Greek word κέρας, used by Matthew, is not restricted in its meaning to 'a whale,' or any cetacean; like the Latin ceto or cetus, it may denote any sea-monster, either 'a whale,' or 'a shark,' or a 'seal,' or a 'tunny of enormous size' (see Athen., p. 308 b [ed. Dindorf]; Odyss., xii, 97; iv, 446, 452; Hillel, xx, 147). Although two or three species of whale are found in the Mediterranean Sea, yet the 'great fish' that swallowed the prophet cannot properly be identified with any cetacean, for, although the sperm-whale (Physeter macrocephalus) has a gullet sufficiently large to admit the body of a man, yet it can hardly be the fish intended; as the natural food of cetaceans consists of small animals, such as medusæ and crustaces. Nor, again, can we agree with bishop Jubb (Sacred Literature, p. 178, 179) that the κελαία of the Greek Text denotes the back portion of a whale's mouth, in which case the prophet was swallowed; for the whole passage in Jonah is clearly opposed to such an interpretation. The only fish, then, capable of swallowing a man would be a large specimen of the white shark (Carcharhinus vulpinus), that dreaded enemy of sailors, and the most voracious of the family of Squaleides. This shark, which sometimes attains the length of thirty feet, is quite able to swallow a man whole. Some commentators are sceptical on this point. It would, however, be easy to quote passages from the writings of authors and travellers in proof of this assertion: we confine ourselves to two or three extracts.

The shark has a large gullet, and in the belly of it is sometimes found the bodies of men half eaten; sometimes whole and entire! ('Nature Displayed, iii, 140). But lest the abib Pluche should not be considered sufficient authority, we give a quotation from Mr. Couch's recent publication, A History of the Fish. He states that "this author, who has paid much attention to the habits of fish, states that 'they usually cut asunder any object of considerable size and thus swallow it; but if they find a difficulty in doing this, there is no hesitation in passing into the stomach even what is of enormous bulk; and the formation of the jaws and throat render this a matter of but little difficulty.'" Buysch says that the whole body of a man in armor (loricus) has been found in the stomach of a white shark; and Captain King, in his Survey of Australia, says he had caught one which could have swallowed a man with the greatest ease. Blumenbach mentions that the whole whale has been found in a shark, and Captain Basil Hall reports the taking of one in which, besides other things, he found the whole skin of a buffalo which a short time before had been thrown overboard from his ship (p. 27). Dr. Baird, in the J. Geod. Soc. (London, Nat. Encyclopaedia, p. 514), says that in the river Hooghly, below Calcutta, there had been a white shark swallow a bullock's head and horns entire, and he speaks also of a shark's mouth being 'sufficiently wide to receive the body of a man.' Wherever, therefore, the Tarsihesh, to which Jonah's ship was bound, was situated whether in Spain or in Cilicia or in Ceylon, it is certain that the common white shark might have been seen on the voyage. The C. vulpinus is not uncommon in the Mediterranean; it occurs, as Forskål (Description Animal, p. 20) assures us, in the Arabian Gulf, and is common also in the Indian Ocean. So far for the natural portion of the subject. Below Jonah could have been swallowed whole without hurt, or how he could have existed for any time in the shark's belly, it is impossible to explain by simply natural causes. Certainly the preservation of Jonah in a fish's belly is not more remarkable than that of the three children in the midst of a burning flame. Naturalists have recorded that sharks have the habit of throwing up again whole and alive the prey they have seized (see Couch, Hist. of Fishes, i, 38). 'I have heard,' says Mr. Darwin, 'from Dr. Allen of Forres, that he has frequently found a Diodon floating alive and distended in the stomach of a shark, and that several occasions he has known it eat its way out, not only through the coats of the stomach, but through the sides of the monster, which has been thus killed.'"

Whalley, Richard Chapple, D.D., a Church of England divine, was born in 1749. He received a superior education: displayed a passionate love for the fine arts in his youth; travelled extensively in Italy; and finally returned home, given much to the study of Hebrew. He became converted, however, soon after, and took orders. He travelled in Europe in 1786; and on returning, in 1787, was ordained to the ministerial office at Horsham, where he continued to reside and officiate for thirty-three years, during which time he engaged, in the loss of his wife and child, his religious knowledge and character were deepened and perfected. He died Nov. 17, 1816. See Christian Guardian, 1847, p. 1, 49.

Wharton, Charles H., D.D., a Protestant Episcopal clergyman, was born in Maryland, May 25, 1748. At the age of twelve he was sent to the English College of St. Omery's, where he educated a Roman Catholic. Little is known from this till his ordination in 1772, except that he was a teacher of mathematics for some time at Ligue. In 1788 he returned to America; and in 1785 was rector of Immanuel Church, Newcastle, Del. Subsequently he was connected with the Swedish Church at Wilmington. In 1798 he served St. Mary's, Burlington, where he continued for upwards of thirty-five years with great usefulness; and in 1801 he became president of Columbia College, N. Y. He died July 28, 1833. See Sprague, Annals of the Amer. Pulpit, v, 385.

Whatcoat, Richard, a bishop of the Methodist Episcopal Church, was born in Quinton, Gloucestershire, England, Feb. 25, 1786. He enjoyed the influences of a Calvinistic education at an early day. He was graduated at the University of Edinburgh in 1758; and was immediately placed in official positions by the society at Westminster, where he resided. In 1769 he entered as a probationer into the itinerant connection of Wesleyan Methodist preachers, then under the superintendence of Mr. Wesley. He preached extensively through England, Ireland, and the principality of Wales; and was selected by Mr. Wesley to aid in the
organization of the Methodist Episcopal Church in America. He was ordained in September, 1784, by John Wesley, assisted by Dr. Coke and Mr. Creighton, as deacon and elder; and, accompanying Dr. Coke, landed in America November 12, 1784. He was a member of the Committee for the Methodist Episcopal Church at the annual Conference until his election to the office of a bishop. He discharged, with the exception of three years, the duties of presiding elder, "which, in those days especially, required labors and privations of no ordinary character, as both the districts and circuits were large, the people generally poor, and the calls for preaching numerous and often far apart." At the General Conference in May, 1800, such was the health of bishop Asbury that he thought of resigning; but the Conference, in order to relieve him, elected bishop Whatcoat, he having a majority of four votes over Jesse Lee. Boehm, in his Reminiscences, says, "I witnessed the excitement attending the different balloting. The first, no election; the second, a tie; the third, Richard Whatcoat was elected." The same authority gives a momentary view of the ordination Sabbath. "Sunday, the 18th, was a great day in Baltimore among the Methodists. The ordination sermon was preached by Rev. Thomas Coke, LL.D., in Light Street Church. Crowds at an early hour thronged the temple. The doctor preached from Rev. ii, 8: 'And unto the angel of the church in Smyrna write, These things saith the first and the last, which was dead and is alive; even the Amen. Selah.' After the sermon, which was adapted to the occasion, Richard Whatcoat was ordained a bishop in the Church of God by the imposition of the hands of Dr. Coke and bishop Asbury, assisted by several elders. Never were holier hands laid upon a holier head. In those days we went 'out into the highways and hedges and compelled them to come in.' That afternoon Jesse Lee preached in the market-house, on Howard's Hill, from John xiv, 3: 'And this is life eternal, that they might know thee the only true God, and Jesus Christ, whom thou hast sent.' The Lord was there in a powerful manifestation of his Spirit. "He then, as he was about to leave the city for the second time for the conference and on his election as bishop until he was disabled by sickness and debility, he travelled regularly through his vast diocese, which extended over the entire continent, preaching almost every day to the people, visiting the annual conferences, sometimes in company with his venerable colleague, bishop Asbury, and sometimes alone, discharging his responsible duties with marked satisfaction to all concerned. In 1806 he met the Baltimore Conference in company with bishop Asbury, and at the adjournment of Conference travelled through the eastern shore of Maryland towards Philadelphia. His last sermon was preached in Philadelphia, Del. On his return he "finished his sixth episcopal tour through the work after his consecration," says Dr. Phobus, his biographer, "or near that; and, after great suffering, he got an honorable discharge from the Captain of his salvation, and by his permission came in from his post which he had faithfully kept for fifty years." He took refuge at the home of senator Bassett, Dover, Del., where he died, "in the full assurance of faith," July 5, 1806. He was buried under the altar of Wesley Chapel, in the outskirts of Dover. Bishop Asbury, some time after his death, visiting the place of his sepulture, preached his funeral sermon from 2 Tim. iii, 10. In the course of his sermon he declared that such was his unabated charity, his ardent love to God and man, his patience and resignation amid the unavoidable ills of life, that he always exemplified the temper and conduct of a most devoted servant of God and of an exemplary Christian minister. Bishop Whatcoat was a man of great industry and unceasing diligence in his business, a man of great erudition, a man of great learning in the highest sense, an extensive science; but he was thoroughly acquainted with Wesleyan theology, and well versed in all the varying systems of divinity. As a preacher his discourses were plain, instructive, and highly spiritual. His distinguishing trait of character was a meekness and modesty that never faltered, but bore the marks of a man of integrity and gravity of deportment, commended him to all as a partner worthy of their imitation. Laban Clark said of him, "I think I may safely say, if I ever knew one who came up to St. James's description of a perfect man—one who bridled his tongue and kept in subjection his spirit—this was Bishop Whatcoat." See Minutes of Annual Conferences, 1867, p. 145; Stevens, Hist. of the M. E. Church, ii, 157, 166, 168, 182, 284, 295, 496; iii, 38, 75; iv, 64, 116, 169, 184, 283, 501; Bangs, Hist. of the M. E. Church, ii, 98, 184, 185; Boehm, Reminiscences, p. 85; Phobus, Memoirs of Bishop Whatcoat, etc. (N. Y., 1828), p. 118. See also Statesman's Manual.

Whately, Richard, D.D., an eminent Anglican prelate and writer, was born in Cavendish Square, London, in 1877. His father was the Rev. J. Whately, D.D., prebendary of Bristol Cathedral, and proprietor of Nonsuch Park, Suffolk, whose brother, Thomas Whately, the private secretary to lord Suffolk, was the author of Observations on Modern Gardening, and Remarks on Some of the Characters of Shakespeare. His mother was a daughter of W. Plummer, Esq., of Ware Park, in Hertfordshire. He was carefully educated, chiefly in private, at Nonsuch Park, and early entered Oriell College as a commoner, under the tutorship of Dr. E. Creighton, then head of the college, and afterwards bishop of Llandaff (1776-1849). From public lectures, private conversation, and personal study, Whately acquired a reputation as a sound thinker. His active, ingenious, and curious mind was soon engaged in the study of ecclesiastical politics, then "sounding on their dim and perilous way" towards Tractarianism, he kept a heedful and safe course. At the Michaelmas term in 1808 he graduated as A.B., taking a second-class in litera humanioribus and in disciplinis mathematicae et physicis, when the late Sir H. Peel went up from Christ Church and came out in both the only first-class man of his year. In 1810 Whately gained the chancellor's (lord William Wyndham Grenville's) prize of £20 for the best English essay on What are the arts in the cultivation of which the moderns have been less successful than the ancients? He early got into the eighteen fellows of Oriell College, graduated as A.M. in 1812, and then began to act as tutor in his college, in which office, by his felicitous style of teaching, he produced more first-class graduates than any other tutor of his day.

In 1813 Whately contributed his article on Logic to the Encyclopaedia Metropolitana. To the same work he also contributed the original outline of his Elements of Rhetoric. These writings were too important and useful to be kept shut up in the huge miscellany of literature in which they at first appeared, and were, on urgent request, brought together and published as a separate work, which, as the late Prof. Spalding said, he "has expounded the Aristotelian or syllogistic logic with admirable clearness and method, and illustrated it with characteristic sagacity," was severely commented upon by Sir G. C. Lewis, by George Bentham, nephew of the philosopher of Westminster, and notably by Sir W. Hamilton in his paper (subsequently republished) in the Edinburgh Review for April, 1833. Even by these opponents it is admitted that "a new life was suddenly communicated to the study" by logic in the publication of this work; and we may safely trust the decision of John S. Mill, that in it the student will find stated with philosophical precision, and explained with remarkable perspicuity, the whole of the common doctrine of the "syllogism." The latter work, that on Rhetoric, was immediately accepted as a text-book. De Quincey early acknowledged the "acuteness and pertinacity" of Whately's system of definitions and plans, and asserted that "in any elementary work it has not been our fortune to witness a rarer combination of analytical acuteness with severity of judgment." In 1819 Whately issued anonymously his ingeniously grave logical satire on scepticism, entitled Rhetoric: Definitions Related to the Substance of Intuition as Maintained by Sir William Hamilton, and appeared his Bampton Lectures, on The Use and Abuse
of Party Feeling in Religion. This subject is treated with
delicacy, discrimination, and liberality, and the
text is uniformly judicious. Meanwhile Whately became by marriage, in 1821, a
member "not on the foundation" of Oriel. His wife was a daughter of Wm. Pope, Esq., of Hillington, Mid-
dlesex, a lady of talent, taste, accomplishments, and lit-
erary capacity. Shortly after his marriage he accepted
the rectory of Halesworth, with the vicarage of Chad-
ston, deanery of Dunwich, in the Blything Hundred of
Suffolk. In 1825 Whately succeeded Peter Elmsley
as principal of St. Alban's Hall. His Logic and Rheto-
ric were then re-published as separate and independent
works. In 1828 he published his "Essays on Some of the
Principal Questions connected with the Subject of
the Christian Religion," which had been preceded by a
series on Some of the Peculiarities of the Christian Religion, and were succeeded by
The Errors of Romanism having their Origin in Human
Nature, etc., in 1830 his Thoughts on the Sabbath were
published. Mr. Fellowes, of Ludgate Hill, himself a mis-
cellaneous writer. This book was made the occasion
of a prosecution for stamp-duty, to which all publications
except books of piety and devotion were then liable.
The publisher was fined £20, and, on remonstrance that
the book was within the protection of the statute anent
"piety and devotion," he was answered that it was
merely "a book of private devotion," and was therefore
not the Mosaic law, and inculcates that we may do just the
same on Sabbaths as on other days." Several series of
Sermons, Charges, and Tracts were published in 1830,
1833, and 1836. In 1831 earl Grey, then premier, pro-
moted the logician, theologian, and politician of St. Al-
ban's Hall to the primacy of Ireland. The appointment
was at first the occasion of much animadversion. Sus-
picion was sown in the minds of the clergy, and dislike
was shown in their conduct. But Whately's honest
impartiality disarmed hostility, and he soon gained the
hearts of clergy and people. Bishop Copleston said,
"We have no "buffer" in Whately. He has stood by
him purely, I believe, from public spirit and a sense of
duty. Wealth and honor and title and power have
no charm for him. He has great energy and intrepid-
ity; a hardihood which sustains him against obloquy
when he knows he is discharging a duty; and he is
generous and disinterested almost to a fault. His en-
larged views, his sincerity, and his freedom from preju-
dice are more than a compensation for his want of con-
secrating manner." The labors of the episcopate, great
as they were, could not exhaust his power of work-
ing. In 1828 he had composed a paper on Trans-
pounderism, and had been on the same side against
Mr. Lee. He followed this up in 1832 with Thoughts on Secondary
Punishments, and in 1834 with Remarks on Transporta-
tion. In these he had "the distinguished honor," says
Henry Rogers, "of being the first who treated the sub-
ject comprehensively, or who succeeded in exciting any
colossal degree of attention to it." In the parlia-
montary report on this topic in 1838 nearly all the opin-
ions of archbishop Whately were adopted, and the car-
ying out of his principles was recommended. The
question of the treatment of criminals did not use up all
his sympathies. The cause of national education was
advocated by him with force and pertinacity, and
chiefly through his sagacity the national schools of
Ireland, under the commissioners of education, were placed
on a workable and useful foundation. For these schools
(in particular) he composed several treatises; among
others, his able little work, Easy Lessons on Roman-
ism, a well written Manual of British Constitution.
For scholastic purposes, too, he wrote for the Society for Promoting Christian Knowl-
edge his candid Lessons on the History of Religious
Worship, and his simple yet effective Lessons on Chris-
tian Evidence—the former of which has been trans-
lated into Italian, and the latter into German, and like
into these two tongues, but also into Spanish, Swedish,
German, Greek, and Hebrew. Explanations of the Bi-
ne and Prayer-book and Lectures on Prayer may also be
regarded as additions to the educational répertoire.
During the year 1840, 41 Whately's sermons were
issued, and for some years after Tractarianism was
active and influential in the Church and in the uni-
versity. The movement reached its crisis about 1843-
45 in the withdrawal from the English communion of
the author of Tract 90—Dr. J. H. Newman—and several
of his associates. Newman had been a friend of Whately's,
but it was said he had "actually composed a considerable portion," and he
was "the original author of several pages," of Whately's
famous work on Logic as it now stands. Yet Whate-
ly did not shrink from duty at the call of friendship,
but produced, as occasion seemed to demand, his quiet,
meek, lucid, logical, and elegantly constructed tracts,
with more special reference to the material doctrines
and theories involved in the hurricane of controversy
with which the Church was assailed, he issued in 1841
a truly admirable work, The Kingdom of Christ De-
linated. In his charge in 1843 he characterizes the
prevailing opinions on organ music in a non-natural
sense as "dangerous, disgraceful, and ruinous." Cog-
nate topics occupy his charge for 1844, entitled Thoughts
on Church Government; for 1846, on The Danger of
Divisions within the Church; for 1851, on Protective
Measures on Behalf of the Established Church. The
Maynooth question was reviewed in a lecture entitled
The Church and Roman Catholic Seminary, a charge delivered in
1845. On the failure of the potato crop in Ireland, he
issued an Address to the Clergy and Other Members of
the Established Church on the Use and Abuse of the Pres-
ent Occasion for the Exercise of Benevolence; and the
same topic occupied him in 1848, when he gave a charge on
The Right Use of National Affections. The Tracta-
rian doctrine of regeneration called from him in 1850 a
charge on Infant Baptism; and every subsequent year
found him holding himself abreast of the tide of specu-
lative or practical difficulty, and able to teach his clergy
both the "buffer" and the "protection." After the first
conference on Christian union, held at Liverpool in
October, 1845, which resulted in the establishment of
the Evangelical Alliance, Whately, early in 1846, issued
Thoughts on the Proposed Evangelical Alliance, in which
he expressed a fear that it would become an organized
intolerance, or occasion a surrender of truth for the
mere sake of an outward unity; and "condemned as
aschimastic" the setting-up, by persons engaged in the
ministry, of "extraneous combinations independently of
their own Church authorities," or the becoming members
of those combinations when set up. He thus continued
to uphold and publish the venerable powers of importance
until his death, which occurred at Dublin, Oct. 8, 1863.
Whately's works not already noticed are chiefly the following: Introductory Lessons on the Studies of St.
Paul's Epistles (1849)—Scripture Revelations concerning
Good and Evil Angels (1851)—English Synonyms (ed.);—Bacon's Essays, with Amendments (1856):—
Lectures on Some of the Parables (1859):—Lectures on Prayer (1860):—Thoughts on the Proposed Revision of
the Liturgy (ed.):—A General View of the Rise, Prog-
ress, and Corruptions of Christianity (ed.);—and Mis-
cellaneous Lectures and Reviews (1861). Since his death
two volumes of Remains have appeared. His Life and
Correspondence (1866, 2 vols.) has been published by
his daughter, Miss E. Jane Whately. See also Memoirs
(1864), by William J. Fitzpatrick.
Wheat (ὥτης, chithaō [for ὡτής, chithaō]); Chald.
plur. ἥταν, cithiaina; siron, the well-known valuable
cereal cultivated from the earliest times, occurs in va-
rious passages of Scripture (Heb. gen. xxx, 14; Exod, i, 32;
xxix, 2, xxxiv, 22; Deut, vii, 8; xxxii, 14; Judg.
vi, 11; rv, 13; Ruth ii, 33; 1 Sam, vi, 13; xii, 17; 2

WHEAT

11; Chald. Ezra vi, 9; vii, 22; Greek Matt. iii, 12; xiii, 22, 23, 30; Mark iv, 26 ["corn"]; Luke iii, 17: xvi, 7; xxi, 31; John xii, 24; Acts vii, 12 ["corn"]; xiii, 38; 1 Cor. xv, 37; Rev. vi, 6; xviii, 15; also Judg. iii, 3; Eclesi. xxi, 25). In the A. V. the Heb. words bar (בָּר) and רָפָה, Jer. xxiii, 28; Joel ii, 24; Amos v, 11; vi, 5, 6; dagán (דַּגָּן, Num. xii, 12; Jer. xxxii, 12), ῥηφόθ (Ῥηφόθ, Prov. xxxvii, 22), are occasionally translated "wheat," but there is no doubt that the proper name of this cereal, as distinguished from "barley," "spelt," etc., is χίθρῳ (Χίθρῳ; Chald. ɳ.UR, ɳUMIN, dictur ex usu Erebœorum. This brings it still nearer to the Arabic name of wheat, which in Roman characters is variously written, kîthē, kînthê, kentâ, and by Pemplus, in his translation of Avicenna, Khiththa; and under this name it is described by the Arabic authors on Materia Medica. As the Arabic κ is in many words converted into χ, it is evident that the Hebrew and Arabic names of wheat are the same, especially as the Hebrew כ has the guttural sound. Different derivations have been given of the word χίθρῳ: by Celsius it is derived from כנף, canath, protulit, produlit, freightum, ex Cant. ii, 13; or the Arabic "canath, rebutit, quod tetricum rubello sit coloré" (Hierobol. ii, 118). The translator of the Biblical Botany of Rosenmüller justly observes that "the similarity in sound between the Hebrew name χίθρῳ and the English wheat is obvious. Be it remembered that the χ here is identical in sound with the Gaelic guttural, or the Spanish x. It is further evident that the Hebrew term is etymologically cognate with the words for wheat used by every one of the Teutonic and Scandinavian nations (thus we have in Icelandic, hávit; Danish, hvede; Swedish, hvete; Meso-Goth. hwite; German, Weizen); and that, in this instance, there is no resemblance between the Scandinavian and Teutonic terms, and the Greek, Latin, and Slavonic (for the Greek word is κριτίκος; the Latin, frumentum or triticum; the Russian, пшеница; Polish, pszenica); and yet the general resemblance between the Slavonic, the Thracian, and the Gothic languages is so strong that no philologist now doubts their identity of origin" (loc. cit. p. 70). Rosenmüller further remarks that in Egypt and Arabia the usual name of wheat (quotul. Descript. de H. Egypte, xiv, 45; Hést, Account of Meroë and Fis, p. 309) and that also in Hebrew, ַקָּדִיק, kîdîk, denotes the flour of wheat (Gen. xxvii, 8, Numm. v, 15). This, it is curious to observe, is not very unlike the Indian name of wheat, kuma. All these names indicate communication between the nations of antiquity, as well as point to a common origin of wheat. Thus in his Hindostan Botany, Dr. J. F. Boyle has stated: "Wheat, having been one of the earliest-cultivated grains, is most probably of Asiatic origin, as no doubt Asia was the earliest-civilized as well as the first-peopled country. It is known to the Arabs under the name of kîthē; to the Persians as gûdûnum; Hindî, ghûnû and kumû. The species of barley cultivated in the plains of India, and known by the Hindî and Persians as the first or wild, is found here conticium. As both wheats and barley are cultivated in the plains of India in the winter months, where none of the species of this genera are indigenous, it is probable that both have been introduced into India from the north, that is, from the Persian, and perhaps from the Tartar races. Barley and other species of barley are most successfully and abundantly cultivated" (p. 419). Different species of wheat were doubt cultivated by

Much has been written on the subject of the origin of wheat, and the question appears to be still undecided. It is said that the Trîcium vulgare has been found wild in some parts of Persia and Siberia, apparently removed from the influence of cultivation (English Cyclop. s. v. "Trîcium"). From the experiments of M. Esper Fabre of Agde, it would seem that the numerous varieties of cultivated wheat are merely improved transformations of Egylops ovesa (Journal of the Royal Agricultural Society, 38, p. 167-180). M. Fabre's experiments, however, have not been corroborated by some botanists (see an interesting paper by the late Prof. Henfrey in No. 41 of the Journal quoted above). Egypt in ancient times was celebrated for the growth of its wheat. The best quality, according to Pliny (Nat. Hist. xviii, 7), was grown in the Thebæan; it was all-bearded; and the same varieties, Wilkinson writes (Anc. Egypt. ed. 1854), i, 39, "existed in ancient as in modern times, among which may be mentioned the seven-eared quality described in Pharaoh's dream" (Gen. xii, 22). This is the so-called mummy-wheat, which, it has been said, has germinated after the lapse of thousands of years, and it is now known that the whole thing was a fraud. Babylonia was also noted for the excellence of its wheat and other cereals. "In grain," says Herodotus (i, 128), "it will yield commonly two-hundredfold, and at its greatest production as much as three-hundredfold. The blades of the wheat and barley plants are often four fingers broad." But this is a great exaggeration (see also Theophrastus, Hist. Plant. vii, 7). Modern writers, as Chesney and Rich, bear testimony to the great fertility of Mesopotamia. Syria and Palestine produced wheat of fine quality and magnificent proportions. The wild wheats (Poa, c. xlvii, 14; lxxxi, 16, etc.). There appear to be two or three kinds of wheat at present grown in Palestine —the Trîcium vulgare (var. biberum), the T. spelta [see Rye], and another variety of bearded wheat (T. dicoccum, which appears to be the same as the Egyptian kind, the T. compostitum. In the parlable of the sower, our Lord alludes to grains of wheat which in good ground produce a hundredfold (Matt. xiii, 8). "The return of the lambs is seen one," says Trench, "is not unheard of in the East, though always mentioned as something extraordinary in this place. The English proverb says, "There is to be found at Kerek a species of hundred wheat which justifies the text; and other species of barley are against the charges of exaggeration of Egyptian Wheat (Trîcium compos- 

Digitized by Google
which it has been the object." The common *Triticum vulgare* will sometimes produce one hundred grains in the ear. Wheat is reaped towards the end of April, in May, and in June, according to the differences of soil and position. It was sown either broadcast, and then ploughed in or trampld in by cattle (Isa. xxxiii, 20), or in rows, if we rightly understand Isa. xxviii, 25, which seems to imply that the seeds were planted apart in order to insure larger and fuller ears. The wheat was put into the ground in the winter, and some time after the barley. In the Egyptian plague of hail, consequently, the barley suffered, but the wheat had not appeared, and so escaped injury. Wheat was ground into flour. The finest qualities were expressed by the term "fat of kidneys of wheat" (בֵּית הָנֹּזֶּר הַנָּבֶּן, Deut. xxxii, 14). Unripe ears are sometimes cut off from the stalks, roasted in an oven, mashed and boiled, and eaten by the modern Egyptians (Sonnini, Travels). Rosenmüller (Botany of the Bible, p. 80), with good reason, conjectures that this dish, which the Arabs call *ferik*, is the same as the *girra carnel* (גִּירְרא כָּרְמאֵל) of Lev. ii, 14 and 2 Kings iv, 42. The Heb. word *kali* (כָּלִים, Lev. ii, 14) denotes, it is probable, roasted ears of corn, still used as food in the East. An "ear of corn" was called *shibboleth* (שִׁבְּלוֹת), the word which betrayed the Ephraimites (Judg. xii, 1, 6), who were unable to give the sound of s. The curious expression in Prov. xxvii, 22, "Though thou shouldest bray a fool in a mortar among wheat with a pestle, yet will not his foolishness depart from him," appears to point to the custom of mixing the grains of inferior cereals with wheat; the meaning will then be, "Let a fool be ever so much in the company of wise men, yet he will continue a fool." Maurer (Comment, loc. cit.) simply explains the passage thus: "Quomodounque tractarea statuum non patiatur se emendari." See Cereals.

Wheat was known to the Israelites in Egypt (Exod. ix, 32), and on returning to Canaan they no doubt found it still cultivated as in the days of Reuben (Gen. xxx, 14). Most probably they were the same sorts which were used in both countries; but there were only a few districts of Palestine, such as the plain of Jezreel, which could compete with that magnificent "carse," the delta of Egypt, the finest corn country of the ancient world. At present the wheat crops of Palestine "are very poor and light, and would disgust an English farmer. One may ride and walk through the standing corn without the slightest objection made or harm done. No wonder it is thin, when white crops are raised from the same soil year after year, and no sort of manure put into the ground" (Tristram, Travels, p. 591). See Agriculture.

**Wheaton, Nathaniel S., D.D., a clergyman of the Protestant Episcopal Church, was born at Washington, Conn., Aug. 20, 1792. His preparatory education was acquired at the Episcopal Academy of Cheshire, Conn.; he graduated at Yale College in 1814; was ordained deacon and priest in 1817; was pastor in Anne Arundel, Prince George, and Montgomery counties, Md.; in 1816 became rector of Christ Church, Hartford, Conn., remaining twelve years; in 1831 became president of Trinity (then Washington) College, which office he filled until 1837; in that year became rector of Christ Church, New Orleans, continuing in that position for seven years; in 1844 visited Europe, and on his return published his travels in two volumes. He was a scholar of varied learning. His benefactions to various scientific, philanthropic, and religious objects were large, and his bequests to Trinity College amounted to about twenty thousand dollars. He died at Marbledale, Conn., March 18, 1862. See Amer. Quar. Church Review, 1862, p. 734.**

**Wheel (usually and properly [of a carriage] פַּאַר, which is invariably so rendered; sometimes [of any circular object] פַּעַר, Psal. lxxxiii, 13; Eccles. xii, 6; Isa. xvii, 13; Jer. xlvi, 3; Ezek. x, 2, 6, 18; xxxii, 24; xxxvi, 10; "heaven," Psal. lxvii, 18; Dan. vii, 9; "rolling thing," Isa. xvii, 13; or פַּעַר, gigal, Isa. xxxii, 28; occasionally פַּעֵר, 724, Judg. v, 28, a step, as often elsewhere; פַּעָר, 724, obdonym, Jer. xviii, 3, of a potter's wheel). We find that the wheels under the brazen laver in Solomon's Temple were cast; they are thus described by the sacred historian: "And the work of the wheels was like the work of a chariot-wheel: their axletrees, and their naves, and their felloes, and their spokes were all molten" (1 Kings vii, 50). This is illustrated by the Egyptian chariots. A wheel has been found by Dr. Abbott of a curious construction, having a wooden tire to the felloe, and an inner circle, probably of metal, which passed through and connected its spokes a short distance from the nave (A, A). The diameter of the wheel was about three feet one inch. The felloe was in six pieces, the end of one overlapping the other. The tire was fastened to it by bands of raw hide passing through long, narrow holes (B, B) made to receive them (Wilkinson, Anc. Egypti, i, 382). Among the ancient Assyrians the wheels originally had six spokes, and the felloes consisted of four pieces. They appear to have been thicker and more solid than those of the Egyptians (Layard, Nineveh, ii, 270). Later the wheel had eight and not six spokes, and was apparently strengthened by four pieces of metal which bound the felloes (ibid. p. 271). See Chariot.
WHEELER

Wheeler, Daniel, a distinguished member of the Society of Friends, was born in London, England, Nov. 27, 1771. Early in life he served in both the navy and the army. Having become an accredited minister of the Society of Friends in 1816. In 1817 the emperor of Russia, in order to carry out a cherished plan for draining and cultivating the marshes surrounding St. Petersburg, secured the services of Mr. Wheeler as manager of the enterprise. While faithfully discharging his duties in the secular business to which he had been called, he was also faithful to his higher Master, and preached the Gospel with all simplicity and fidelity, not only to the humble and lowly, but also to the higher in authority in Russia. He remained in St. Petersburg until 1822, when he felt impressed that it was his duty to go as a missionary among the islands of the Pacific, where a rich blessing attended his labors. After several years spent in missionary work in the Pacific, he returned to England. Here he remained until 1838, when he came to the United States, where he continued nine months, rendering such service as he could to the cause of Christ, and then went back over his own country. During his second year in the United States he contracted a disease which proved fatal; and he died soon after landing at New York, Feb. 6, 1840. See Memoir (Phila. 1870). (J. C. S.)

Wheeler (or Wheel), Sir George, D.D., an English clergyman and traveller, was born at Breda, Holland, of English parentage, in 1630. He removed to Kent, England, in childhood; was educated at Lincoln College, Oxford; travelled on the Continent and in the East with Dr. James Spon, of Lyons, in 1675-76; presented a collection of MSS. to the University of Oxford; received the honorary degree of A.M. from Oxford University; was knighted and ordained in 1688; and, having taken orders, was collated by bishop Crewe to the second prebend in the Cathedral of Durham. In 1684. He was presented to the vicarage of Basingstoke, Hants; in 1702 was created D.D. by diploma from Oxford, and in the following year received the curacy of Whitchurch. In 1706 he was collated to the rectory of Winston, and in 1709 to that of Houghton-Le-Skerne, which he purchased in 1714. He was created bishop of Exeter in 1714. Dr. Wheeler was the author of, A Journey to Greece (1682):—An Account of the Churches or Places of Assembly of the Primitive Christians (1689);—The Protestant Monastery; or, Christian Economics (1698). He was a man of vast research and ability, and a devoted minister and parent. See Church of England Magazine, viii, 332.

Wheeler, John, D.D., a Congregational minister, was born at Grafton, Vt., March 11, 1798. He graduated at Dartmouth College in 1816, and at Andover Theological Seminary in 1819. In 1821 he was ordained over the Church at Windsor, Vt., where he took his high rank immediately. At the age of sixty-six, he declined the presidency of the University of Vermont; but nine years after, upon the resignation of President Marsh, he accepted the honor. From this time his best energies were devoted to the university. He raised up friends for it, carried it through seasons of trial, and elevated it to the national scholarship, in 1845, and died at Burlington, April 16, 1862. Dr. Wheeler published several Sermons and Discourses, especially that before the Porter Rhetorical Society of Andover Theological Seminary in 1834. See Cong. Quar. 1863, p. 307.

Wheelock, Eleazer, D.D., a Congregational minister, was born at Watham, Conn., March 11, 1711, and graduated from Yale College in 1733. In March, 1735, he was ordained minister of the Second Church in Lebanon, called "Lebanon Crank," now Columbia. In the great Whitefieldian revival Mr. Wheelock engaged with great zeal and energy. After the religious excitement had subsided, he entered into a course in which not far from twenty-five years of age, he joined the Society of Friends. Some years after this, he abandoned a very lucrative part of the business in which he was engaged, that he might devote himself to the work to which, by the Spirit of God, he believed himself called. He became an accredited minister of the Society of Friends in 1816. In 1817 the emperor of Russia, in order to carry out a cherished plan for draining and cultivating the marshes surrounding St. Petersburg, secured the services of Mr. Wheeler as manager of the enterprise. While faithfully discharging his duties in the secular business to which he had been called, he was also faithful to his higher Master, and preached the Gospel with all simplicity and fidelity, not only to the humble and lowly, but also to the higher in authority in Russia. He remained in St. Petersburg until 1822, when he felt impressed that it was his duty to go as a missionary among the islands of the Pacific, where a rich blessing attended his labors. After several years spent in missionary work in the Pacific, he returned to England. Here he remained until 1838, when he came to the United States, where he continued nine months, rendering such service as he could to the cause of Christ, and then went back over his own country. During his second year in the United States he contracted a disease which proved fatal; and he died soon after landing at New York, Feb. 6, 1840. See Memoir (Phila. 1870). (J. C. S.)

Wheelock, John, D.D., LL.D., an American clergyman, was born at Lebanon, Conn., Jan. 28, 1754. He entered Yale College in 1776, but removed with his father Dr. Eleazer Wheelock, to Hanover, N. H., in 1770, and graduated at Dartmouth College in 1771; was tutor there from 1772 to 1776; was elected to the Colonial Assembly in 1775; appointed major in the New York forces in 1777, and soon after lieutenant-colonel in the Continental army; and was domiciled until 1778 with the Indians of the Ohio. He was a second generation of the Delhi Indians West of the Ohio (1778);—A Sermon on Liberty of Conscience, or No King but Christ in the Church (1775); —and an occasional Sermon, His Memoirs, by Drs. McClure and Parish, were published in 1811. See Sprague, Annals of the Amer. Pulpit, i, 397.

Wheelock John, D.D., LL.D., an American clergyman, was born at Lebanon, Conn., Jan. 28, 1754. He entered Yale College in 1776, but removed with his father Dr. Eleazer Wheelock, to Hanover, N. H., in 1770, and graduated at Dartmouth College in 1771; was tutor there from 1772 to 1776; was elected to the Colonial Assembly in 1775; appointed major in the New York forces in 1777, and soon after lieutenant-colonel in the Continental army; and was domiciled until 1778 with the Indians of the Ohio. He was a second generation of the Delhi Indians West of the Ohio (1778);—A Sermon on Liberty of Conscience, or No King but Christ in the Church (1775); —and an occasional Sermon, His Memoirs, by Drs. McClure and Parish, were published in 1811. See Sprague, Annals of the Amer. Pulpit, i, 397.

Wheelan, Richard Vincent, D.D., a Roman Catholic priest in England, born in Baltimore, Md., Jan. 1812. He was educated at Mount St. Mary's College, Emmettsburg, where he became a teacher and prefect of studies; studied theology and philosophy at the Seminary of St. Sulpice, Paris, graduating in 1831; was ordained priest at Versailles the same year; was professor in St. Sulpice seminary from 1829 to 1833; served as curate in several parts of Virginia and Maryland from 1835 to 1840; became bishop of Richmond in March, 1850, and on the division of the diocese the following year took the title of bishop of Wheeling, where he was active in promoting the interests of Romanism, building up a school of theology and philosophy in the vicariate of de Chautau; was a member of the Vatican Council of 1869-70, in which he opposed the dogmas of infallibility,
but gave in his adhesion to it after it was declared. He died at Wheeling, July 7, 1874.

Wheelp (יוֹר, gör, or יָהְר, yāhīr), the cub of a lion (Gen. xlix, 9; Deut. xxxiii, 22; Jer. ii, 38; Ezek. xix, 2, 3, 5; Nah. ii, 13), or of a jackal (Lam. iv, 8). See LION. The cubs of a bear (2 Sam. xvii, 8; Prov. xvii, 12; Hos. xiii, 8) are not designated by the Heb. word. See BEAR.

Whewell, William, D.D., a clergyman and professor of the Church of England, was born at Lancaster, England, in 1796. He graduated from Trinity College in 1816, and received the degree of D.D.; was ordained deacon in 1820, and priest in the following year; became master of Trinity College, Cambridge, in 1841, and was vice-chancellor of the university. Previous to this he was fellow and tutor of Trinity College, and from 1829 to 1832 was professor of mineralogy in the university; from 1838 to 1855 he was professor of moral theology. Dr. Whewell died at Cambridge, March 6, 1866. As an author he was prolific; among his works being, An Elementary Treatise on Mechanics (1819), which passed through several editions, Analytical Statics (1826); Architectural Notes on German Churches (1830); Principles of University Education (1831); First Principles of Mechanics (1832); Doctrine of Limits (ed.); Treatise of Dynamics (1832-36); Astronomy and General Physics (1838); Mechanical Excid (1837); History of the Inductive Sciences (ed. 3 vols.); Philosophy of the Inductive Sciences (1840, 3 vols.); The Mechanics of Engineering (1841); Liberal Education (1845); Verses Translations from the German (1847); Lectures on the History of Moral Philosophy (1852); Systematic Morality (1846); Elements of Morality (1848). He was also editor of an edition of Newton's Principia, first three sections (1846); of Butler's Human Nature (1845); of Butler's Moral Subjects (1849); and of various other scientific works. He was also the author of various scientific articles in leading periodicals, and published many pamphlets and numerous sermons. See Amer. Quart. Review, July, 1866, p. 325.

Whichcote, Benjamin, D.D., an eminent English divine, was born at Whichcote Hall, in the parish of Stoke, in Shropshire, March 11, 1610. He was educated at Emmanuel College, Cambridge, where he graduated in 1632; became a fellow there in 1633; was a distinguished tutor; was ordained in 1655; organized a Sunday afternoon lecture on the subject of Trinity Church, and became preacher at the university; was presented to the living of North Cadbury, in Somersetshire, in 1648; appointed provost of King's College in 1644; presented to the rectory of Milton, in Cambridge, in 1649; was removed from his provostship at the Restoration in 1661, but retained his rectory at Milton; obtained the living of St. Anne's, Blackfriars, London, in 1669; and the vicarage of St. Lawrence's, Jewry, in 1668. He died while on a visit at Cambridge, in May, 1683. "Dr. Whichcote is regarded as one of the heads, if not the chief founder, of what is called the latitudinarian school of English divines." He enjoyed great fame as a preacher, and left considerable results of his literary labor, although he published nothing during his lifetime. His Observations and Apologies (1668), and his Sermons (1698), were edited by the earl of Shaftesbury. Dr. John Jeffery edited his Moral and Religious Apologies (1708), and his Discourses (1701-3, 3 vols.), to which Dr. Samuel Clarke added a fourth in 1707. An edition of his Sermons, in 4 vols., accompanied by a Life by Dr. Nathaniel Campbell and Gerard, appeared in 1751.

Whip (יוֹר, gör; occasionally rendered "scourge," Job v, 21; ix, 23; Isa. x, 26; xxviii, 15). In ancient times, whips were used not only for driving animals, but also as instruments of torture; and even now, in slaveholding countries, the unfortunate slaves are obliged to work with the fear of the whip before their eyes. The system of administering personal chastisement has been, and is, universal throughout the East; and, under despotistic governments, no person can be sure of escaping punishment, if he is inflicted with the mere caprice of any tyrant who may happen to be in power. For this purpose, however, the rod (q.v.) was often used, and punishment of the bastinado (q.v.) is now the most common in Oriental countries. See CORPORAL PUNISHMENT.

Various materials were used in the manufacture of whips. In 1 Kings xii, 11, Reboboam says, "My father chastised you with whips, but I will chastise you with scorpions." Here a simple scourge and another more painful are mentioned in opposition. The latter is called a "scorpion," and probably means to denote a comparison between the pain respectively occasioned by the scourge and the reptile. The rabbins think generally that this scourge was a scourge composed of knotted and thorny twigs, by which the flesh was severely lacerated. More probably it consisted of thongs set with thorns or sharp iron points. Such scourges were known to the Romans as a means of torturing used by unrelenting persons, and particularly by masters in the punishment of their slaves. Some of the early martyrs were thus tortured. See SOURGEE.

Few travellers have visited Egypt without commiserating the condition of the unhappy Fellahs: every public work is executed by their unpaid labor; half

[Image of Ancient Egyptian Whips]

Whip Suspended from the Wrist of the Archer.
naked and half starved, they toil under a burning sun, to clear out canals or level roads, under the eyes of task-masters ready to punish with their formidable whips, made from the hide of the hippopotamus, the least neg- lect or relapse of which immediately calls to mind the sufferings endured by the Israelites while they were subjected to the tyranny of Pharaoh. " The Egyptians made the children of Israel to serve with rigor; and they made their lives bitter with hard bondage, in mortar, and in brick, and in all manner of service in the field; all the service wherein they made them serve was with rigor" (Exod. i, 18, 14). The monu- ments abound with similar scenes. See BRICK.

In driving, the ancient Egyptians used a whip, like the heroes and charioteers of Homer; and this, or a short stick, was generally employed even for beasts of burden and for oxen at the plough, in preference to the goad. The whip consisted of a smooth, round wooden handle, and a single or double thong; it sometimes had a lash of leather, or string, about two feet in length, either twisted or plaited; and a loop being attached to the lower end, the archer could be enabled to use the bow, while it hung suspended from his wrist" (Wilkinson, Anc. Egypt. I, 372 sq.). See CHARIOT.

Whipple, Georgi, D.D., a professor of the Congregational Church, was born in Albany, N. Y., June 4, 1805. For a time he was a student in the Oneida Institute; was one year (1838) in the Lane Theological Seminary; and graduated from the theological department of Oberlin College in 1856, in which year he was ordained deacon. From 1838 to 1838 he was principal of the Oberlin preparatory department, and from 1838 to 1847 was professor of mathematics in that institution. From 1846 until his death he was secreta- ry of the American Missionary Association, his office being in New York city. He died in Brooklyn, N. Y., Oct. 6, 1874. See Cong. Quar. 1877, p. 427.

Whiston, William, a learned English divine and mathematician, was born at Norton, in Leicestershire, Dec. 9, 1667, where his father was rector of the parish. He was educated at Tamworth School and Clare Hall, Cambridge, where he graduated in 1690; became a fel- low of his college, took orders in the Church of England, and was appointed mathematical tutor in 1693; was chaplain to a king, bishop of Oxford, from 1698 to 1698; vicar of Lowestoff, in Suffolk, from 1698 to 1701; became deputy to Sir Isaac Newton in the Lucasian professorship of mathematics in 1701, and succeeded him in that chair on his resignation in 1703; was nom- inated by bishop Moore catechetical lecturer at the Church of St. Clement. By this time he had gained em- inence as a lecturer, when he adopted, rejected infant baptism, and began to omit portions of the litany. The bishop of Ely requested him not to fulfil the duties of the Boyle lecturership, in which he was making his views public, but allowed the continuance of the salary. Whiston resigned the lectureship, and, after several hearings before the heads of the houses, was deprived of his lectureship and expelled from the university, on Oct. 30, 1710. In consequence of certain the- ological publications of a controversial character, he was pronounced a heretic by the congregation of the university, and the proceeds of his library were auctioned at public sale. His trial and conviction of sedition, and the prosecution of one John Sayer, which he procured against his former employer, the Rev. Mr. Sayer, and which he afterwards published, is the subject of the following article.

Whitaker, Nathaniel, D.D., a Presbyterian min- ister, was born at Huntington, L. I., Feb. 22, 1725, and graduated at Princeton College in 1752. He was or- dained and installed at Woodbridge, N. J., in 1784; was called to Chelsea, near Norwich, Conn., Feb. 25, 1761; and selected by the Connecticut Board of Correspondents for Evangelizing the Indians, to go to Great Britain with the Rev. Sampson Occam, an Indian of the Moh- iegan tribe, and to procure funds for a mission station at Huntington, Romaine, Venn, Wesley, and others showed them great favor, and a considerable sum was raised. After eighteen months' absence, they returned, having prepared the way for founding Dartmouth College. While in England he published several sermons on Reconciliation to God. Difficulties arising in his con- gregation on the subject of church government, he ac- cepted a call to the Second Church in Salem, Mass., and was installed July 28, 1769. In 1773, in consequence of a disagreement among the people, Dr. Whitaker, with fourteen others, withdrew from the Church, formed a separate church, and united with the Presbyterians, the Presbytery, which declared the new election the Third Church. His friends erected a house of worship, but it was soon after burned. Not disheartened, they sought outside help, and in 1778 were enabled to complete a new church. At the breaking-out of the war he warmly espoused the cause of independence, and actually en- gaged in the manufacture of saltpetre. In a short time he furnished the authorities with two hundred and eighty pounds. On the occasion of the Boston massacre in 1771, he printed a sermon on The Fatal Tragedy in King Street, and on the proclamation of independence another, The Great Milestone in the Career of the Revolution, the end of the war still another, On the Reward of Toryism. He was dismissed by a council called for that purpose, Feb. 10, 1784, but soon after installed at Norridgewock. After vainly attempting to establish a presbytery in Maine, he went to New York, and died at Woodbridge, near Hampton, Jan. 1, 1795, in poverty, though he had done for the Church and country. (W. P. S.)

Whitaker, Thomas Dunham, LL.D., a clergy- man of the Church of England, was born at Rainham, in Norfolk, June 8, 1759. He was educated at St. John's College, Cambridge; ordained deacon in 1785, and priest the following year; became perpetual curate of Holme, Lancashire, in 1757; vicar of Maexley in 1769; held for some time the vicarage of Heysham; became vicar of
Blackburn in 1818, and remained there until his death, which occurred Dec. 18, 1821. He published, A History of the Original Parish of Whalley and Honor of Clitheroe, with the Counties of Lancaster and York (1801); — History of the Demesnes of Crewe (1805); — De Motu Superior Britanniam Civico Anno 1745 et 1746 (1809): — The Life and Original Correspondence of Sir George Radcliffe (1810): — an edition of The Vision of Piers Plowman (ed.); — a new edition of Thoresby's Ducatus Leicestriensis et Ioannis Campana, Deeds of Edw. (1816); — Lothia und Albion: or, An Attempt to Illustrate the Districts Described in these Words by Bede (1816): — besides single sermons and other works.

Whitaker, William, D.D., an eminent English divine, was born at Holme, Lancashire, in 1548. He was educated at St. Paul's School and Trinity College, Cambridge, where he was appointed to a fellowship; became regius professor of divinity at Cambridge in 1579; was appointed chancellor of St. Paul's in 1580; and became master of St. John's College, Cambridge, in 1586. He died at Cambridge, Dec. 4, 1595. Mr. Whitaker was an able Calvinistic writer, and a powerful champion of Protestantism against the attacks of popery. He published his popery in Prophesies of Antichrist in English, in 1581; and also his Tractatus de Dei Eleemosynae, in Latin and Greek (1596): — Catechismus, sine Prima Institutio Disciplinae Pietatis Christiana Latina Explicita, etc. (1570): — Ad Rationes Decem Edmundi Campioni Jesu ... Respondo, etc. (1581): — A Disputation on Holy Scripture against the Popishers, especially against the Act of Supremacy and Jurisdiction of England, in Latin and Greek (1589): — Catechismus, sine Prima Institutio Disciplinae Pietatis Christiana Latina Explicita, etc. (1570): — Ad Rationes Decem Edmundi Campioni Jesu ... Respondo, etc. (1581): — A Disputation on Holy Scripture against the Popishers, especially against the Act of Supremacy and Jurisdiction of England, in Latin and Greek (1589): — and other controversial works. A collection of his Opera Theolologica was published at Geneva in 1610, 2 vols. fol.

Whitby, Daniel, D.D., an eminent English divine, was born at Rushden, Northamptonshire, in 1690. He was educated at Trinity College, Oxford, where he graduated in 1697, and became a fellow in 1664; took holy orders, became chaplain to Dr. Seth Ward, bishop of Salisbury, and was made prebendary of Salisbury in October, 1698, was admitted preacher of the same church in 1672, became rector of St. Edmund's, Salisbury, about the same time, which was his last preferment, and where he died, March 24, 1726. Among his published works are, Romish Doctrines not from the Beginning (1664): — Endeavor to Evince the Certainty of Christian Faith (1671): — Discourse concerning the Idolatry of the Church of Rome (1674): — A Body of the Coherence and Universality of the Christian Revelation (1705). Late in life he became an Arian, and engaged in a dispute with Dr. Waterland. He was a voluminous writer, the above-mentioned works being only a small part of what he gave to the public. His Paraphrase and Commentary is considered his best work.

White, Charles, D.D., a Presbyterian divine, was born at Randolph, Mass., Dec. 28, 1795. He was a lineal descendant of Pernigine White of the famous "Mayflower;" graduated at Dartmouth College with the first honors of his class in 1821; studied theology at Andover, Mass.; after license to preach, was settled as college pastor, his diploma, A.D., 1829. He was professor of divinity, at Telford, Va.; subsequently over the Church in Cazenovia, N. Y., and again at Owego, N. Y.; elected president of Wabash College, Ind., and entered upon his duties in October, 1841, and his presidency was of twenty years' continuance. In this last relation he most effectually discharged his functions with fidelity and energy. He shrink from no labor that the embarrassed condition of the college, when he entered on its presidency, demanded at his hands; and he had the satisfaction of seeing, long before his death, as one result of his labors, a larger number of students in the college classes alone than he found in all the departments when he entered upon the presidency. He died suddenly, Oct. 29, 1861. Dr. White was a ripe and accurate scholar, an able teacher, an impressive preacher, and a sound theologian. He published Essays in Literature and Ethics (Boston, 1853, 12mo), and contributed four sermons to the National Preacher, and articles (the most of which are reprinted in his Essays) to the Biblical Repository and Religious Register. See Wilson, Presb. Hist. Almanac, 1855, p. 313, Allibone, Dict. of Brit. and Amer. Authors, s. v. (J. L. S.)

White, Francis, D.D., an English prelate who flourished in the early part of the 17th century, was educated at Cambridge; became dean of Carlisle in 1622; bishop of Carlisle in 1628; bishop of Norwich in 1629; bishop of Ely in 1631; and died in February, 1637 or 1638. He was the author of, Orthodox Faith and the Way to the Church Explained and Justified against T. W. (1617): — Repleio to Jesuit Fisller's Answer to Certain Questions Propounded by James 1, etc. (1624): — Treatise of the State and Church of England (1632): — and other works. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

White, Henry, D.D., a Presbyterian divine, was born at Durham, Greene Co., N. Y., June 19, 1800. He received his preparatory training in the academy at Greenwich; graduated with high honor at Union College in 1824; studied theology in the Princeton (N. J.) Theological Seminary, was licensed to preach by the Presbytery of Columbia in 1826, and immediately after entered upon an agency for the American Bible Society, his field being in the Southern States. In 1829 he was ordained and installed as pastor of the Allen Street Presbyterian Church, New York city. He then continued until the establishment of the Union Theological Seminary in 1836, when he was elected to the professorship of theology in that institution, which office he continued to hold until his death, Aug. 25, 1880. Dr. White had naturally a strong, discriminating mind, well balanced, and abounding in practical wisdom. As a preacher, he was eminently thoughtful, clear, convincing, and pungent. As a teacher of theology, he had peculiar and almost unrivalled excellence. He published a Sermon on the Death of John Withie (1888), and a Sermon on the Abrahamic Covenant (1846). See Sprague, Annales of the American Presbyterian and Reformed Church (1872), Dict. of Brit. and Amer. Authors, s. v. (J. L. S.)

White, Joseph (1), D.D., an English clergyman and eminent Oriental scholar, was born at Stroud, in Gloucestershire, in 1746. He was the son of a weaver, and was designed for his father's calling, but having been sent to a charity-school at Gloucester, and having made rapid advance and died in February, 1637 or 1638. He was sent by a gentleman of fortune to Oxford, where he graduated at Wadham College about 1770; became a fellow of that College in 1774, was appointed to archbishop Laud's professorship of Arabic in 1775; chosen in 1788 to preach the Hampton lecture for the following year, in the preparation of which he was assisted by Dr. Farr and Mr. Samuel Badecock; became prebendary of Gloucester in 1788; was appointed rector of Melton in 1790; became prebendary of Oxford in 1802; regius professor of Hebrew at Oxford the same year; and subsequently canon of Christ Church. He died at Oxford, May 22, 1814. He was the author of the following: — Quincy & Aspinall, Studii Theologiæ Orientalis (1774); — Textus Novi Liber Historici et Epistolae tam Catholicum quam Paulinum, Verrò Syracusa Philoehizena, etc., (1779-1803); — A View of Christianity and Mohammedanism (Hampton Lectures) (London, 1784): — and other works of great merit.

White, Joseph (2), called in Spain Don José María Blanco y Crespo, a Roman Catholic priest, descend-
ed from an Irish Catholic family which had settled in Spain, was born at Seville, July 11, 1775. Being dis-
satisfied with mercantile life, he was educated for the
Church, and was ordained a priest in 1799; soon lost
confidence in Roman Catholicism, renouncing his ad-
hesive nature of his government by this paper; lived
subsequently in London as a man of letters; edited for
three years (1822-25) another Spanish journal, Las
Variedades; was editor of the London Review (1829);
served as tutor in the family of archbishop Whately at
Dublin, from 1822 to 1825; removed to Liverpool, where
he joined the Unitarian Society, of which the Rev.
John Hamilton was then pastor; and died May 20, 1841.
He was the author of a great many works, among which
are Preparatory Observations on the Study of Religion
(1817):—Letters from Spain (1822):—Practical and
Internal Evidence against Catholicism (1825):—Poor
Man's Property (1824):—Property Concerning
the Church of Rome (1827):—Letter to Protes-
tants Converted from Romanism (1827):—Second
Travels of an Irish Gentleman in Search of a Religion
(1823):—and Life of the Rev. Joseph Blanco White, Written by
Himself, with Preface of his Correspondence; edited by
John H. Thomson (1845, 8 vols.).
"The book, the time of its appearance, excited a good deal of inter-
est, and is still eminently worth referring to. The
curious picture it presents of a mind at once pious and
sceptical; longing and sorrowing after a truth which it
can nowhere find, or, finding, contrive to rest in, has, in
the present unsettled state of religious opinion, a very
particular significance. Poor White's life-long search for
a religion seems not to have been a successful one, and
to have landed him at the last in a condition of
nearly extinct sectarianism."

White, Robert Meadows, D.D., an English
clergyman and philologist, was born about 1796. He
graduated at Magdalen College, Oxford, in 1819; was
ordained in 1821; became a tutor at Oxford in 1829;
Rawlinson professor of Anglo-Saxon in 1848; visited
Denmark in the interests of philology in 1837; became
vice-president of Magdalen College in 1838; gave con-
siderable attention to local antiquarian research; was
the first rector of the Oxford college; and had a leading
authority in English philology. During the latter por-
tion of his life he was rector of Slumbridge, Gloucestershire,
where he died, Jan. 31, 1865. He devoted a large
part of his time, for twenty years, to the editing of The
Oxmalum, Semi-Saxon Hymnola in Verse, now first ed-
ted from the Original MSS., with Notes and Glossary
(Oxford, 1853).

White, Thomas (1), D.D., an English
clergyman, was born at Bristol about 1550; was educated at Mag-
dalen Hall, Oxford, where he graduated about 1570;
took holy orders, and preached frequently; received
the living of St. Gregory's in London; became vicar of St.
Dunstan's Fleet Street, in 1575; was made prebendary
of Mora, St. Paul's, in 1588, treasurer of Salisbury in
1590; canon of Christ Church in 1591, and canon of
Windsor in 1598. He died March 1, 1624. He
was noted for his benefactions in founding hospitals and
almshouses, but especially for the founding of Sion Col-
lege, London. His published works consist of a few
sermons.

White (Lat. Anglica a Albia, Candida, or Vitus; otherwise called Biscachi, Richcroth, and Blacklaw),
Thomas (2), an eminent English philosopher and
Roman Catholic priest, was born at Halton, Essex, in
1582; was educated abroad and became a priest in
1617; was employed in teaching philosophy and divin-
ity, residing at Douay, Rome, and Paris with occasional
interruptions until 1638, when he was elected prin-
cipal of the English College at Lisbon; served the duty
of the English mission for some years; resided for a
considerable time in the house of Sir Kenelm Digby,
whose philosophy he supported; became a professor at
Douay again in 1622; was rector of the English
College; spent his latter years in England, and died at
Drury Lane, London, July 6, 1676. He was a volun-
tuous writer, and among his numerous works the follow-
ing deserve mention: Dialogues concerning the Judg-
ment of Common Sense in the Choice of Religion (1646):
—De Mundo Dialogi Tres (1652):—Institutionem Peri-
pateticarum ad Medentas, etc. (1646):—Institutiones The-
ologica super Fundamentis in Peripatetica Dibaptica fusi-
ta Estraucta (1652):—Questions Theologica, etc. (1658):
—Contemplation of Heaven, etc. (1654):—The Grounds of
Obedience and Government (1655):—Religion and Rea-
son Mutually Corresponding and Assisting Each Other
(1659):—The Middle State of Souls from the Hour of
Death to the Day of Judgment (ed.). See Chalmers,
Biog. Dict. s. v.; Allibone, Dict. of Brit. and Amer.
Authors, s. v.

White, William, D.D., a Protestant Episcopal
bishop, was born in Philadelphia, March 26, 1748. He
passed A.B. at Philadelphia College in 1765, and was
soon after admitted to the English church. He
resided in America in 1772, he became associate minister of Christ
Church and St. Peter's, Philadelphia, where he con-
tinued till the Revolution. In 1777 he was chaplain to
Congress and was elected rector of Christ and St. Peter's
churches in Philadelphia. He was consecrated bishop
at London in 1787, and died July 17, 1836. Exclu-
sive of periodicals, he published, The Case of the Episcopal
Churches in the United States (1782):—Thoughts on the
Singing of Psalms, etc., signed "Silas" (1808):—Lec-
tures on the Catechism of the P. E. Church, with Supple-
mentary Lectures, etc. (1813, 2 vols. 8vo):—Comparative
View of the Conjoint and Compromise systems of
the Arminians, etc. (1817, 2 vols. 8vo):—Memoirs of the
P. E. Church in the United States (1820, 8vo):—A Com-
mentary on Ordination, etc. (1833, 8vo):—An Essay:
and several Addresses, Letters, and Sermons. See
Sprague, Annuals of the Amer. Pulpite, v, 280.

Whitefield, George, a pre-eminent evangelist and
founder of the Calvinistic branch of the Methodists,
was born in the village of Ewloe, Flintshire, county of
Denbigh, in the principality of Wales, in the walled
town (his father being a tavern-keeper) he was born,
Dec. 16, 1714. His father having died while George
was yet young, the boy's education devolved solely on
his mother, whose pious instructions and example had
a powerful influence in imbuing his infant mind with
strong religious impressions. Having resolved to en-
vocate the superior talents with which she saw George was
endowed, she sent him to a classical school. At the age
of fifteen he had distinguished himself by the accuracy
and extent of his knowledge, and by his taste in Greek
and Roman literature. But his mother not succeeding
in the hotel, and becoming reduced to poverty, the
progress of George's education was stopped, and, being
driven to undertake some menial place about the estab-
lishment, his manners and morals were much injured by
his association with irreligious servants. Happily his
religious impressions revived, and, having been confirmed,
he received for the first time the sacrament put on
the Lord's supper. His mother's circumstances improving, she
sent him to Pembroke College, Oxford, and there he
joined in forming a small select society for mutual
improvement in religious knowledge and personal
piety, along with the Wesleys and a few college contempora-
aries of his. John Benson, a man who was acquainted with his rare talents and piety, re-
solved to grant him ordination, and the solemn cere-
mony was performed at Gloucester on June 20, 1736.
His first sermon, preached on the following Sabbath,
produced an extraordinary sensation. From Gloucester he
went to London, where he preached alternately in the
chapel of the Tower and at Ludgate Prison every Tuesday. In 1737 he joined his friends the Wesleyas as a missionary at the Georgian settlement; but he had only been four months resident there, when he returned to London with unkindly effects. In 1751 Mr. Whitefield was an ardent supporter of the subscriptions for erecting an orphan-house in that settlement. On his arrival in London, he found an outcry raised against him on account of Methodistism. Bishop Benson disregarded it and ordained him a priest. But he was denied access to the pulpits of many old friends; and hence he commenced the practice of open-air preaching in Moorfields, Kennington, Blackheath, and other quarters, where his ministrations were attended by vast crowds. Having raised a fund of £1000 for his orphanage, Whitefield returned in 1759 to the American continent. At Savannah immense crowds repaired to hear him, and extraordinary scenes of excitement were exhibited. On March 25, 1740, he laid the first brick of the orphan-asylum; and when the building was completed, he gave it the name of the Bethesda. Although his ministry was very successful at Savannah, he signed for his native land; and accordingly, in 1741, he returned to England. He travelled in and out with indefatigable diligence to preach the Gospel. In prosecution of that object, he made a tour through England, Wales, and Scotland, preaching in many places, and always in the open air, to immense crowds. While in Wales, he married Mrs. Jones, a widow to whom he had been introduced by Dr. John Hawkesworth. After a short time, however, he returned to London, where, it being winter, some of his admirers erected a wooden shed in which he preached, and which he called the Tabernacle. He was under the patronage of the countess Dowager of Huntingdon, to whom he was chaplain, and whose benevolence he shared especially in the support of the community of which he was the head. At the death of that lady, her place was filled by lady Erskine.

In the beginning of August, 1744, Mr. Whitefield, though in an infirm state of health, embarked again for America. At New York he was taken exceedingly ill, and his death was apprehended; but he gradually recovered and resumed his arduous and important duties. He was still very much inconvenienced with pains in his side, for which he was advised to go to the Bermudas. Landing there on March 15, 1745, he met with the kindest reception, and traversed the island from one end to the other. He experienced the greatest pleasure in his communications with the people. The societies were large, he there collected upwards of £100 for his orphan-school; but as he feared a relapse in his disorder if he returned to America, he took passage in a brig, and arrived in safety at Deal, and the next evening set off for London, after an absence of four months.

On the return of Mr. Whitefield, he found his congregation at the Tabernacle very much scattered, and his own pecuniary circumstances declining, all his household furniture having been sold to pay the orphan-house debt. His congregation now, however, began to contribute, and his debt was slowly liquidating. At this time lady Huntingdon sent for him to preach at her house to several of the nobility, who desired to hear him; among whom was the earl of Chesterfield, who expressed himself highly gratified; and lord Bolingbroke told him he had done great justice to the divine attributes in his discourse. In September he visited Scotland a third time and was joyfully received. His thoughts were now wholly engaged in a plan for making his orphan-house (which was at first only intended for the fatherless) a seminary of literature and academical learning. In February, 1749, he made an excursion to Exeter and Plymouth, and returned to London in April, in the same year he returned to London, having travelled about six hundred miles in the west of England; and in May he went to Portsmouth and Portsea, at which places he was eminently useful; many at that time, by the instrumentality of his preaching, being turned from darkness to light, and from the power of Satan unto God." In September he went to Northampton and Yorkshire, where he preached to congregations of ten thousand people, who were peaceable and attentive; and only in one or two places was he treated with abuse. On Oct. 17 he arrived at Savannah, and was gladly received at Dublin; his labors there were, as usual, very useful. From Ireland he proceeded to Scotland, where he also met with great encouragement to proceed in his indefatigable work. On Aug. 8 he set out from Edinburgh for London, in order to return to America. On Oct. 27 he arrived at Savannah, and found the orphan-school in a flourishing condition. Having suffered formerly from the climate, he determined not to spend the summer in America, but re-embarked for London, where he arrived in safety. His active mind, ever forming some new plan for the extension of the Redeemer's kingdom, now turned toward the erection of a new tabernacle. The foundation was laid March 1, 1758, and was opened on Sunday, June 10, 1754. After preaching in it a few days, he again left England for Scotland, embracing every opportunity of preaching on his road till he arrived at Edinburgh. And when it was determined he returned home on Nov. 25, and opened the Tabernacle at Bristol, after which he returned to London, and in September, 1756, opened his new chapel in Tottenharn Court Road. His labors were immense. He preached fifteen times a week; hundreds of persons went away from the door without being able to gain admittance, by his unremitting attention to his congregation, at the two chapels in London, his strength was much reduced. About the end of the year, finding his health improved, he, however, determined on again visiting America. Towards the end of November he left England, and arrived at Boston the beginning of January. After spending the winter pleasantly and usefully in America, he once more embarked for his native shores and landed in England, and on Oct. 6, 1765, opened the countess of Huntingdon's chapel at Bath. Shortly after his arrival in London, Mrs. Whitefield was seized with an inflammatory fever, and became its victim on Aug. 9; and on the 14th he delivered her funeral sermon, which was distinguished for its pathos, as well as for its manly and pious eloquence.

He now prepared for his seventh and last voyage to America, where he arrived in safety on Nov. 30; but his health was so fast giving way that he was unable to counteract his complaint, which was asthma, made rapid inroads upon his constitution, and, though it had several times threatened his dissolution, it was at last sudden and unexpected. From Sept. 17 to the 20th this faithful laborer in the vineyard of Christ preached daily at Boston; and was much indulged in its advantages, continued from thence on the 21st, and continued his work until the 29th, when he delivered a discourse at Exeter, N. H., in the open air for two hours; notwithstanding which, he set off for Newburyport, where he arrived that evening, intending to preach the next morning. His rest was much disturbed, and he complained of a great oppression at his lungs; and at five o'clock on Sabbath morning, Sept. 30, 1770, at the age of only fifty-six, he entered into the rest prepared for the people of God. According to his own desire, Mr. Whitefield was interred at Newburyport. He and Wesley, though one in heart, were divided in their theological opinions, each seeking in the early part of their career their paths diverged. The friendship existing between them was not of an ephemeral character, but remained steadfast to the end. Wesley preached a funeral discourse commemorative of his virtues and usefulness.

Mr. Whitefield was not a learned man, like his contemporary, Wesley; but he possessed an unusual share of good sense, general information, knowledge of the Holy Scriptures, and an accurate acquaintance with the human heart. Few ministers have been equally useful since the days of the apostles. The sermons of Mr. Whitefield were impassioned, and generally addressed to
hearts of his congregations. He was benedictive and kind, forgiving and gentle; but he was zealous and firm, and seldom allowed his feelings to overcome his judgment. In his piety, he conveyed a greater degree of attention to religion; and millions have doubtless blessed his name, as tens of thousands revere his memory.

Whitefield was no common preacher. Parties of the most opposite character and principles, such as Frank- lin, Hume, and John Newton, have united in bearing testimony to the beauty and effectiveness of Whitefield's pulpit oratory. Dr. James Hamilton, of London, describing Whitefield, said, "He was the prince of English preachers. Many have surpassed him in making sermons, but none have approached him as a pulpit orator. Many have outshone him in the clearness of their logic, the grandeur of their conceptions, and the sparkling beauty of single sentences; but in the power of darting the Gospel direct into the conscience, he eclipsed them all. With a full and beaming countenance, and the frank and easy port which the English people love, he combined a voice of such compass which could equally thrill over Mofford's in musical thunder or whisper in terrible secret in every private ear; and to his gainly aspect and tuneful voice he added a most expressive and eloquent action. None ever used so boldly, nor with more success, the higher styles of impersonation. His thoughts were transformations; and if he spoke because he felt, his hearers understood because they saw. They were not only enthusiastic amateurs, like Garrick, who ran to weep and tremble at his burst of passion, but even the colder critics of the Walpole school were surprised into admiring sympathy and reluctant wonder. In Lord Chesterfield was listening in lady Huntington's pew when he described the sinner under the character of a blind beggar led by a little dog. The dog escapes, from some cause, and he was left to grope his way guided only by his master's voice. UNSUCCEsSfully he wanders to the edge of a precipice; his staff drops from his hand, down the abyss too far to send back an echo; he reaches forward cautiously to recover it; for a moment he poises on vacancy, and—'Good God!' shouted Chesterfield, 'he is gone, as he sprang from his seat to prevent the catastrophe. But the glory of the whole reached such a pitch that it was heart-kindled and heart-melting Gospel. Without this all his bold strokes and brilliant impersonations would have been no better than the rhetorical triumphs of many pulpit dramatists. He was an orator, but he only sought to be an evangelist. Like a volcano where gold and gems are mingled and no one knows which shall come to the surface, but where gold and molten granite all alike in fiery fusion, bright thoughts and splendid images might be projected from his pulpit, but all were merged in the stream that bore along the Gospel and himself in blended fervor. Indeed, so simple was his nature that glory to God and good-will to man had filled it, and there was room for little more. Having no Church to found, no family to enrich, and no memory to immortalize, he was simply the ambassador of God, and inspired with its genial, pious spirit—so full of heaven reconciled and humanity restored—he soon himself became a living Gospel. God continued his work most wonderfully in his communion with his Master, and in the strength of accepted prayer, there was an elevation in his mien which often paralyzed hostility, and a self-possession which made him, amidst uproar and confusion, the more sublime. With an electric bolt he would bring the jester in his fool's- coat to the very beam of the roof, cut him to the quick, cut at the skulking miscreant's grasp, or sweep down in crouching submission and shame-faceted silence the whole of Bartholomew Fair; while a revealing flash of sententious doctrine, of vividly Scripture, would disclose to awe-struck hundreds the forgotten verities of another world. In all the saddest aspects of man's condition he came to break your head, but through you God has broken my heart' was a sort of confession with which he was familiar; and to see the deaf old gentleman, who used to utter imprecations on him as he passed along the street, clambering up the pulpit stairs to catch his angelic words, was a sort of spectacle which the triumphant Gospel often witnessed in his day. When it is known that his voice could be heard by twenty thousand, and that ranging all the empire, as well as America, he would often preach thrice on a working day, and that he has received in one week as many as a thousand letters, it is clear that some result must be the reasonable estimate can be formed of the results of his ministry, some idea may be suggested of its vast extent and singular effectiveness."

Whitefield published a number of sermons, journals, etc., and his entire works were printed in London in 1771-72 (7 vols., 8vo), including a Life by Gillies. For other literature, see Allibone, Dict. of Brit. and Amer. Authors, s. v. The best biography is by Tyerman, Life of George Whitefield (Lond. 1876, 3 vols. 8vo).

Whitehouse, Henry John, D.D., D.C.L., a Protestant Episcopal clergyman, was born in New York city in August, 1808. He graduated at Columbia College in 1824, and at the General Theological Seminary (Epis- copal) in 1826. He ordained deacon in 1827 and priest in 1829. He was a brother of Dr. Whitehouse in Chicago, Chicago, in 1829 to 1844, and of St. Thomas’s, New York, from 1844 to 1851; was consecrated assistant bishop of Illinois, Nov. 20, 1851; was chosen to succeed bishop Chase in 1852; served as bishop of the latter in 1852; preached the sermon before the New York Central Council, in 1867, and died Aug. 10, 1874. His only publications are in the form of Sermons, Addresses, etc.

Whitgift, John, D.D., an eminent English prelate, was born at Great Grimsby, Lincolnshire, in 1530. He was educated at Queen's College, and Pembroke Hall, Cam- bridge, where he graduated in 1554; was chosen fellow of Peterhouse in 1555; entered into holy orders in 1560, and was appointed chaplain to Cox, bishop of Ely, who gave him the rectory of Fevensham, in Cambridgeshire; was appointed lady Margaret professor of divinity at Cambridge in 1568; became chaplain to the queen in 1568; was president of Peterhouse in 1567; became master of Pembroke Hall in April of the same year; was appointed regius professor of divinity, and yet the same year became master of Trinity College; became prebendary of Ely in 1568; vice-chancellor of the Uni- versity of Cambridge in 1570; dean of Lincoln in 1571; prebendary of Lincoln in 1572; bishop of Worcester, and vice-principal of the Maroch of Wales in 1577; was chosen the successor of Edmund Grindal as archbishop of Canterbury in 1588; was very severe in his prosecution of Nonconformists, both Puritans and Catholics, and was noted for his strenuous advocacy of the constitution of the English Church; obtained a decree against liber- ty of printing in 1585; became privy-councillor in 1596; founded a hospital and grammar-school at Croydon in 1595; joined in the deliberations of the conferences at Hampton Court in January, 1604; and died at Lambeth Palace, Feb. 29, of the same year. The Works of John Whitgift, Archbishop of Canterbury (Cambridge, 1651-54, 3 vols. 8vo) was prepared for the press by Rev. John Ays. Biographies have been writ- ten by Sir George Paule (1612) and John Strype (1718).

Whiton, John Milton, D.D., a Presbyterian divi- ne, was born at Winchendon, Mass., Aug. 1, 1785. He graduated at Yale College in 1803; taught an academic course in Life in a school for the daughters of the clergy, or in the bride's chamber; was ordained and installed pastor of the Presbyterian Church in Andrim, N. H., Sept. 28, 1808; resigned Jan. 1, 1833, and became acting pastor of a Congregational Church in Bennington, N. H., where he continued till his death, Sept. 28, 1836. He published several sermons and an oration on the marriage of the Town of Antrim to the New Hampshire Hist. Coll. iv. 221-224, and to the Repository an Account of the Mis-
isters of Hilleborough, N. H. — See Sprague, Anna of the Amer. Pilgrim, iv, 413, note; Allibone, Dict. of Brit. and Amer. Authors, s. v.

Whittaker, John William, D.D., an English divine, was born at Manchester in 1790. He was educated at St. John's College, Oxford, of which he became a fellow; was made vicar of St. Mary's, Blackburn, and in 1852 honorary canon of Manchester. He died Aug. 5, 1854. He published, *An Historical and Critical Enquiry into the Interpretation of the Hebrew Scriptures* (1819): Supplement to the same (1820): — *Justification by Faith: Five Sermons, etc.* (1825): — *The Catholic Church: Five Sermons* (1835): — and other sermons and papers.

Whittimore, Thomas, D.D., an American Universalist minister, was born in Boston in 1808. He was apprenticed successively as a morocco-dresser, brass-founder, and boot-maker; studied theology, and in April, 1821, was settled as pastor of the Church at Milford, Mass.; removed to a Church at Cambridgeport in 1822; resigned this pastorate in 1831, but remained in Cambridge the rest of his life; was joint editor of the *Universalist Magazine*; established *The Trumpet*, a Universalist newspaper, in 1828, and was sole editor and proprietor of it for thirty years; was a member of the Massachusetts Legislature, president of the Cambridge bank, and president of the Vermont and Massachusetts Railroad, and died in Cambridge, March 21, 1861. He was the author of *A Commentary on the Revelation of St. John* (1830): — *A Commentary on the Book of Daniel*: Plain Guide to Universalism (1840): — Autobiography (1859): — and other works.

Whittingham, William Rollinson, D.D., LL.D., a bishop of the Protestant Episcopal Church, was born in New York city, Dec. 3, 1806. He graduated in 1825 from the Theological Seminary in New York city, and was ordained two years later. St. Mark's, Orange, N.J., was his first pastoral charge, which he held from 1828 for a year and a half. In 1831 he became rector of St. Luke's parish, New York city. While there his health failed, and he made a trip to Italy, returning much benefited. In 1835 he was elected to the chair of ecclesiastical history in the General Theological Seminary. In 1846 he was elected bishop of Maryland, and was consecrated in Baltimore, Sept. 17 of that year. He died at West Orange, N.J., Oct. 17, 1879. The *Parish Register* was largely edited by him, and he was also editor of *The Churchman*, a well-known Episcopal periodical. *The Family Visitor and Children's Magazine* were also under his editorial supervision. Bishop Whittingham's library was considered one of the finest collections in America. See *Amer. Church Rev.* xxxi, 476.

Whitleysey, William, archbishop of Canterbury, is supposed to have been a native of Whitleysey, a town situated in the County of Cambridge, and received his education at the University of Cambridge. In 1349 he became master custos of his college, the third in succession from the founder. In 1361 William Whitleysey was consecrated to the see of Rochester, and on Oct. 11, 1368, he found himself privy of all England and metropolitan by order of the pope. It seems that he was neither physically nor intellectually adequate to the exigencies of his position or the requirements of the time. His government was weak. The condition of the Church troubled him greatly. He felt deeply his incapacity to take his proper place in the country. From 1368 to 1371 the government of the diocese belonged to the metropolis by order of the pope. It seems that he was an end to the disputes which frequently arose between the University of Oxford and the bishop of Lincoln. He died in June, 1374. See Hook, Lives of the Arobishops of Canterbury, iv, 221 sq.

Wicklf. See Wycliffe.

Wilberforce, Samuel, D.D., an English prelate, son of William Wilberforce, was born at Clapham, Sept. 7, 1805. He graduated at Oriel College, Oxford, in 1826; became curate of Chickenden, Oxfordshire, in 1828: rector of Brixton (Brightstone), Isle of Wight, in 1830; select preacher at the University of Oxford; rector of Alverstoke, Hants, archdeacon of Surrey, and chaplain to prince Albert, all in 1839; canon of Winchester Cathedral in 1840; sub-almoner to the queen in 1844; dean of Westminster and select preacher before the University of Oxford in 1845; bishop of Oxford, to which he was appointed in 1854; and archbishop of Canterbury in 1860. He died Oct. 25, 1863. He was the author of *Notes on the Life and Writings of Charles Wesley* (1834), *Life of the Rev. John Wesley* (1854), *The Vicar of Wakefield* (1857), *Heroes of Hebrew History* (1870): — and many other miscellaneous works, including sermons, charges, stories, etc.

Wilberforce, William, an English philanthropist, was born at Hull, Aug. 24, 1759. He father was a merchant of the city, descended from the ancient Yorkshire family of Wilberfoos. He first attended the grammar-school at Hull; but on the death of his father, in 1768, he was transferred to the care of his uncle, who placed him in a school at Wimbledon. While at this school his aunt, who was an ardent admirer of Whitefield's preaching, first led him to the contemplation of the truths of religion; but, at the same time, impressed upon him her peculiar views. His mother, fearing lest he should become a Methodist, removed him from the care of his uncle and placed him in the Fockington Grammar School. In 1774, when he was nineteen years of age, his serious impressions were soon dissipated in a life of ease and gaiety. In October, 1776, he entered St. John's College, Cambridge, being only seventeen years of age. He graduated in 1781, and almost immediately thereafter was elected member of Parliament from Hull. He now came to London and entered at once on an active political life. He was a member of the most fashionable clubs, and became intimate with the leading wits and politicians of the day. He had formed an intimacy with Pitt while at Cambridge which now became still closer. In Parliament he took but little part in the debates, but he was really a powerful influence in the cabinet through his administrative relations, and particularly adverse to the American War. In 1784, while delivering an address before the freeholders of York, they suddenly decided to have him for their representative, and he was returned to Parliament from this the largest county in England. He made a tour on the Continent during 1784-85 with Mr. Pitt and the Rev. Isaac Milner, whose influence, coupled with the reading of the New Test. and Dodridge's *Rise and Progress*, awakened in him those serious impressions which had been implanted by his aunt at Wimbledon, and fixed in him the determination to devote his life to God and humanity. On his return to England he began to devote himself to all reforms which opportunity permitted. But in 1787 he began a series of efforts for the reformation of manners, the suppression of vice and immorality, and especially for the abolition of the African slave-trade. The debate against the slave-trade in 1788, published in May, 1789, and, during all the period that followed until the accomplishment of this great result, never lost sight of the one object of his public career. He continued to represent York until 1812, from which time until 1825 he was representative from Tamworth. From the *English Cyclopedia* (Blog. Div. vi, 609, 610) we quote the account of his efforts against the slave-traffic: 
WILBORD 986 WILEY

"Relying more upon the humane and religious feelings of the country than upon parliamentary support, he and his party were not unopposed. The Hanoverian Whig, George Sharp, was the president, and Thomas Clarkson the agent. Throughout the struggle, which lasted twenty years, and ended in the defeat of the Jacobites and the accession of George III, his hopes were deferred. Thwarted at one time by the protracted examination of witnesses, outvoted at another, as now in the Commons, now in the Lords, he never flinched from a renewal of the contest. In Parliament he supported a number of symlinkables, and in debate, in his diluent collection and silencing of evidence. Out of Parliament he never lost sight of the same great object. In his counties, he was a visitor, a counsellor, and a collector of all parties. Cabinet ministers, opposition members, the clergy of all shades of opinion, and his own familiar friends, were all invited to the cause of abolition..."

"Apart from the opposition which he encountered from the West India interest, the fearful excesses of the French Revolution and the rebellion of the slaves in St. Domingo led many to the cause of abolition of the slave trade with the frantic schemes of the Jacobins. For seven years this cause alone retarded the success of his endeavors. Meanwhile, though well suited morally for the labors he had undertaken, it is marvellous how his weakly constituted enabled him to bear up against the bodily fatigues which he incurred. When the labor was yet to come, his health appeared to be as far from him. To the suggestion of the organ. The first physicians, after a consultation, declared to his family that he had not stamina to last a fraction of a day; but though he had only 80 to live from illness, we find him exclaiming on New-year's-day, 1796, 'At thirty and a half I am in constitution sixty.' From then on, his health gradually improved, and his exertions were constantly interrupted or rendered painful by this infirmity. Still, rising with new hopes and with the thought of the approaching abolition day, he was encouraged by the possibility of ultimate success. At length the hour of triumph was at hand. In January, 1838, he put a blow against the slave-trade, at the very moment that question was about to be discussed in the House of Commons. The abolition bill passed the House of Lords, and its passage through the Commons was one continued triumph to its author, Mr. Samuel Morley, concluded an affecting speech in favor of the measure. He expressed the feeling of the nation, that we are all his greatness, with those of that honored individual who would this day lay his head upon his pillow and meet with death. The slave-trade was abolished, and when the whole House, we are told, burst forth in acclamations of applause, and greeted Mr. Wilberforce with three cheers."

During this whole period he had been actively engaged in all the great questions of the times. He sacrificed friendship to the cause of truth and humanity, and never suffered an opportunity to escape for doing good. His great task, however, was the agitation of negro-emancipation, which he continued until his retirement in 1825. The emancipation act passed just before his death. "Thank God," he exclaimed, "that I should have seen my birthday in abolition, and willing to give twenty millions sterling for the abolition of slavery!" He died at Cadogan Place, London, July 29, 1838, and was buried in Westminster Abbey with all the honors of a public funeral. His most important literary works are, "Speech in the House of Commons on the Abolition of the Slave-trade" (1789); "Practical View of the Present Religious Systems of Professed Christians in the Higher and Middle Classes in this Country Contrasted with Real Christianity" (1797); "Apoloogy for the Christian Sabbath" (1799); "Letter on the Abolition of the Slave-trade, Addressed to the Freeholders and Other Persons in the County of Yorkshir and elsewhere (1811); "Theophilus, Memoir of William Wilberforce" (1855); and Harford, "Recollections of William Wilberforce, Esq., M.P., etc."!

WILBROD (or WILLIBROD), St., commonly known as "The Apostle to the Frisians," was born in the Saxony kingdom of Northumbria about A.D. 657. He was placed in Wilfred's monastery at Ripon while still a child, and adopted the monastic profession before he was ten years old. In 694 he was sent three years under the instruction of St. Egbert and the monk Wigbert, two members of the Anglo-Saxon Church, the latter of whom had preached Christianity in Friesland for two years in vain. Having determined to undertake the work which had baffled his predecessor, Wilbrod devoted three years in the year 690, taking with him twelve or thirteen disciples. When they arrived at Utrecht, they were warmly received by Pepin the Big, who had just gained a victory over the Frisians. In 692 he visited Rome to gain the favor and influence of the pope, and in 695 made a second visit to the papal capital, and for Promad bishop of the Frisians with the ecclesiastical name of Clemens. He established his episcopal chair at Utrecht, where he built the Church of St. Saviour, and restored that of St. Martin. He visited the Danes and made many converts; then, proceeding by water, he came to the island called Friesland (probably the present Heligoland), from the name of the idol worshipped there. Here his disregard of their superstitions and of the objects by them held sacred subjected him to great opposition and a severe ordeal, in which, however, he was successful in escaping punishment. His work was largely undone by the death of Pepin in 701, and the consequent restoration of the heathen monarch Radbod. But Willibrod enjoyed the patronage of Charles Martel, whose successes re-established him in his episcopal authority and influence. He founded the monastery of Epernach, near Treves, about 698, and there died in 728. The Church calendar is the 7th of November.

Wiley, Allen, D.D., a Methodist Episcopal divine, was born in Frederick County, Va., Jan. 15, 1789. He removed to Indiana with his parents in 1804; was brought into the Church of Christ in 1810; licensed to exhort Sept. 10, 1811, and to preach July 10, 1813, and was admitted on trial in the Ohio Conference in 1817. "The commencement of his itinerancy was the beginning of a career of great and permanent usefulness." Eleven years he spent in traveling extensive circuits, during ten years he acted as presiding elder, and for five years he was stationed in the principal large towns. He was chosen delegate to each General Conference from 1832 to 1844. He died at Vevay, Ind., July 23, 1848. Dr. Wiley was a man of God, mighty in the Scriptures, able and successful as a minister, his mind clear and strong, his heart good, his soul healthy, and his mind, with a happy familiarity in the Hebrew, Latin, and Greek languages. "He was one of the active founders and patrons of the Indiana Asbury University, and held for many years the position of trustee. He wrote for the Western Christian Advocate a number of articles on 'Ministerial Character and Duties,' which were subsequently collected and published in a separate work, and are now contained in the account of his Life and Times, written by Dr. F. C. Holiday." See Minutes of Annual Conferences, iv, 295; Simpson, Cyclop. of Methodism, s. v.; Sprague, Annales of the Amer. Pulpit, viii, 569. (J. L. S.)

Wiley, Charles, D.D., a Presbyterian minister, was born at Flatbush, L. L., May 30, 1816. He was the second son of Charles Wiley, bookseller and publisher in New York city. After the usual school preparation, he entered Columbia College in 1825, and remained as a student there until the death of his father, in 1826. He then entered the law-office of Griffen and Strong, a well-known law firm in Wall Street, and pursued a successful practice of law with ardor, hope, and determination of success. During the religious revival of 1828-29 he joined Dr. Joel Parker's Church, and resolved to become a minister of the Gospel. In 1831 he entered Princeton College, and in 1832 went to the Theological Seminary at Auburn, N. Y., graduating in 1835 after a full course. In 1836 was placed on the pastoral charge for six years at the church at Dansville, where he had taught during his college course, and from which he was called there, and after spending a short time at New Ha
WILFRID
987
WILKINS

ven, Conn., was in 1837 ordained and installed as pastor of the Congregational Church at Northampton, Mass., where he remained eight years. In 1845 he was installed over the Reformed Dutch Church at Utica, N.Y., where he remained until 1855. In 1855 he was appointed president of Milwaukee University, and held that position for several years; but the financial crisis of 1857 made it impossible for that institution to sustain competition with others earlier in the field, and the effort to build it up was discontinued. In 1858 he supported the Free Church movement at Lafayette, Ind., and was rector of the high-school there. In 1859 he supplied the Congregational Church at Birmingham, Conn. In 1860 he settled over the Reformed Dutch Church at Geneva, N.Y., where he preached until 1866, when he removed to Hackensack, N.J., and engaged in teaching a private school. In 1871 he removed to Orange, and up to the period of his fatal illness was engaged in that region in conducting a private school, and in editing some text-books of Virgil and Cesar for school use.

Dr. Wiley was a fine classical scholar. His death occurred Dec. 21, 1876, at East Orange, N.J. (W. F. S.)

Wilfrid (Wilpferd), Saint, is the name of four English bishops.

1. Bishop of York (which was no longer an archbishopric after the death of Paulinus; see Fuller, Church Hist. of Britain, i, 217). This celebrated man was born c. 670. On the death of his father, Sixtus, in 679, he was of age to succeed him. He entered the Scotch convicts on the island of Lindisfarne, but afterwards resolved to study the Church and monasticism at Rome. He went thither by way of Canterbury and Lyons, and arrived in 654. From 655 to 658 he was at Lyons, and there received the tonsure at the hands of his friend, the archbishop Dalfin. He returned to England, and gained the favor of Oswy, king of Northumberland, being made tutor to the prince Alchfrid (664) and receiving the abbey of Inrhymp (Ripon). At this time a synod was assembled at Sennesdale (Whitby, in Yorkshire), at which the Eastern and Western churches were controvoriesies, and Wilfrid succeeded in determining it to approve the usages of Rome, in consequence of which he was appointed in 665 to the then vacant see of York, and sent to archbishop Agilbert of Paris for consecration. During his absence, Cedd (St. Chad) was ordained bishop of Lindsey, and Canterbury; and Wilfrid therefore retired to his monastery of Ripon until archbishop Theodore transferred Ceddada to Mercia (Lichfield) and restored York to Wilfrid, after which he exercised jurisdiction over the whole of Northumberland. He lost the royal favor, however, in 673, by assisting queen Ethelburga of Kent in her complaints against him, and he was then deprived of his diocese divided into three parts. He appealed to the pope, and started for Rome to plead his own cause in A.D. 678; and being driven out of his course by a storm, he carried the Gospel to the Frisians, converted many, and baptized their king, Aldegis. On his arrival at Rome, pope Agatho restored him to his bishopric, but directed that the more distant parts of his see should be erected into separate dioceses. King Egfrid threw him into prison, however, on his return to England, regardless of the justification of his cause pronounced by the pope; and he was eventually obliged to seek an asylum among the heathen people of Sussex. This banishment was utilized, however, for successful missionary labors. King Edwelve received baptism, and evangelists were sent to the Isle of Vincta (Wight), who labored with gratifying success. In 686, Alchfrid, Wilfrid's former pupil, having obtained the crown, the exiled bishop was permitted to journey to Rome. The king, however, being disobedient to the authority of Canterbury. He once more appealed to the pope from his banishment in Mercia, and at the age of seventy years undertook a journey to Rome that he might obtain justice (703 or 704). The concile decided that Wilfrid's opponents were base calumniators, and the pope granted Wilfrid his see. While returning through Gaul, Wilfrid fell sick (705), and had a vision in which the angel Gabriel revealed that the prayers of Wilfrid's pupils had obtained for him restoration to health, the recovery of part of his diocese, and four years of life. The king refused, on his return to England, to recognize the pope, but died soon afterwards, and his successor, Osered, restored the see. Wilfrid died, "after four years," Oct. 12, 709, having held the bishopric during forty-four years. His remains were interred at Ripon, but ultimately at Canterbury. His importance, aside from his missionary character, lies in his association with Theodore of Canterbury as principal supporter of the papal authority and Roman canons in England. The following writings are attributed to him, but without full proof of authenticity: De Catholico Celebrando Paschali Ritu:—De Regibus Monasteriorum, etc. See Hedioin, Vita Wilfridi; Bede, Hist. Eccl. iii-v, ed. Stevenson; Roger de Wendover, Chronicum circiter Florae Historiarum, vol. i, ed. Coox; Lingard, Hist. of England, 5th ed. i, 122 sq.; William of Malmsbury, De Gest. Pontif. iii, 152; id. De Gest. Reg. i, 3; Godwin, De Presol. Angl. p. 654; Her- zog, Real-lexikon. v. 3.

2. Bishop of Beverley and archbishop of York (Wilfridus Junior), a contemporary of Bede (Hist. Eccl. v, 5, 23; see also Roger de Wendover, sup. i, 213, 227; and Sachsenchronik).

3. Bishop of Worcester at the beginning of the 8th century. See Anglo-Saxon Survey; Roger de Wendover, usp. i, 305; Bede, Hist. Eccl. v, 25.

4. Archbishop of Canterbury, 806 et sq., died 829 or 832. See Roger de Wendover, usp. i, 370; also Sachsenchronik.

Willie, William, D.D., a Scotch clergyman and poet, was born at Echlin, Linliithgowshire, in 1721. He was educated at the University of Edinburgh, where he had entered at the age of thirteen, but was compelled to leave that institution before completing the course on account of the death of his father; turned his attention to farming, where he continued his studies, and took orders in the Church of Scotland; published The Epigram, a Poem in Nine Books, in 1757, which gained for him the title of "the Scottish Homer"; printed a new edition of this work, accompanied by A Dream in the Manner of Spenser, in 1759; was chosen professor of natural philosophy at St. Andrew's the same year; published a volume of Moral Fables in verse in 1768; and died Oct. 1772.

Wilkins, David, D.D., a learned English divine, was born in 1651. He was appointed keeper of the archiepiscopal library at Lambeth in 1716; spent the next three years in drawing up a catalogue of that collection; became rector of Monagh-Parva, Kent, in 1716, and of Great Chart and Hadleigh in 1719; was constituted chaplain to the archbishop and collated to the rectories of Monks-Ely and Bocking; was appointed joint commissary of Bocking; became prebendary of Canterbury in 1729; was collated to the archdeaconry of Suffolk in May, 1724; and died Sept. 6, 1745. His principal publications are, Novum Testamentum Aegypticum, vulgo Copticum, etc. (1716) — Leges Anglo-Saxonicae Ecclesiasticatae, etc. (1717) — Lives of Monks of the Principal Monasteries of Egypt, Magna Propheta in Lingua Aegyptiaca, etc. (1717) — Concilia Magna Britanniae et Hiberniae (1736-37). See Chalmers, Biog. Dict. s. v.

Wilkins, Isaac, D.D., a clergyman of the Protestant Episcopal Church, was born at Withywood, in the island of Jamaica, Dec. 17, 1742. His father, Martin Wilkins, became a judge in Jamaica, and was an eminent lawyer. Martin Wilkins was an only son, and when about six years of age was brought to New York city to obtain better educational facilities than the West Indies afforded. In 1760 he graduated at Columbia College. What he saved from his father's estate in Jamaica enabled him to purchase Castle Hill Neck, in Westchester County, New York, for some time upon this farm, and occupied himself in cul-
tivating it. In 1772 he was sent to the Colonial Legislature, and until April 18, 1775, he was an active member of that body, ready in debate and honest in the service of his country. He was the reputed author of several anti-republican and anti-slave works which were in circulation to the Whigs, and eventually it was necessary for him to leave America; and published, before sailing for England, an address to his countrymen, in which he endeavored to vindicate himself as a lover of his country. He remained in England about a year, in which time it is assumed that he endeavored to whet the chins of the disputes between Great Britain and the colonies. Having returned to his family at Castle Hill, which had been left waste, he was compelled to retreat with them to Long Island. At Newtown and Flatbush he made his residence until peace was declared. His farm had not been confiscated; so he sold it in 1784, took his family to Shelburne, N. S., purchased property there, and again became a farmer. Soon after he was a member of the Assembly in that province. In 1798 he returned to New York and prepared for the ministry, and took charge of St. Peter's Church at Westminster, of which, as soon as he was ordained deacon, he became rector. On Jan. 14, 1801, he was ordained priest. The British government, in consideration of his services during the Revolution, bestowed upon him an annuity of £120 for life, and for thirty-one years he was rector of St. Peter's. He died in Westminster, N. Y., Feb. 5, 1869. His sermons were forcible; his memory was natural and effective. As a rule, his discourses were short and impressive. A number of poetical effusions of some merit are extant of which he was the author. See Sprague, Annals of the Amer. Pulpit, v. 462.

Wilkins, John, D.D., an ingenious and learned English bishop, was born at Fawsley, near Daventry, Northamptonshire, in 1614. He was educated at All-Saints' College, Hall, and Hall, Oxford; took holy orders; became chaplain, first to William, lord Say, and then to Charles, count Palatine of the Rhine; took sides with the Parliament under Cromwell, and took the Solemn League and Covenant; was made warden of Waihelm College in 1648; became master of Trinity College, Cambridge, in 1629; ejected at the Restoration the following year; became preacher to the honorabile society of Gray's Inn and rector of St. Lawrence Jewry, London; was chosen a member of the Royal Society; was made dean of Ripon; became bishop of Chester in 1688; and died at the house of Dr. Thomas, a retired lady, King's Lane, Nov. 19, 1672. He published several mathematical and philosophical works, and the following, viz., Ecclesiast, or a Discourse concerning the Gift of Preaching as it Falls under the Rules of Art (1648); best ed. 1778; — Discourse concerning the Beauty of Providence in all the Rugged Passages of it (1649) — Sermons, etc. (1675): — Of the Principles and Duties of Natural Religion (1679).

Wilkinson, Henry (1), D.D., an English clergyman, son of one of the same name, and known as "Long Harry," was born at Waddesdon, Buckinghamshire, in 1698. He entered as commoner in Magdalen Hall, Oxford, in 1622, where he made great proficiency in his studies, became a noted tutor, master of the schools, and divinity reader; took orders in the Church of England about 1638, but was suspended from preaching because of views advanced in a sermon at St. Mary's in September, 1640; was restored by the Long Parliament; removed to London, where he was made minister of St. Faith's, under Sir Thomas Urquhart, one of the Proprietors of Divines; became rector of St. Dunstan's-in-the-West in 1645; was appointed one of the six ministers to go to Oxford to establish Presbyterian forms and practices; became fellow of Magdalen College, a canon of Christ Church, and Margaret professor of divinity in 1652; went deputy to the Restoration; settled at Chesterton, Northamptonshire, in September, 1675. He published several Sermons preached before the Parliament. See Chalmers, Biog. Dict. s. v.

Wilkinson, Henry (2), D.D., sometimes called Junior, but commonly known as "Dean Harry," an English clergyman, cousin of "Long Harry," was born at Adwick, in the West Riding of Yorkshire, in 1616. He began his education at a grammar-school in All-Saints' parish, Oxford; entered a commoner of Magdalen Hall in 1631, where he graduated, took holy orders, became a noted tutor, and moderator or dean of Magdalen Hall; left the university on account of his Puritan principles in 1642; removed to London, took the Covenant, and preached frequently; under the supremacy of Parliament he returned to Oxford, and became principal of Magdalen Hall and moral-philosophy reader; and suffered for Nonconformity after the Restoration while endeavoring to preach at Buckingham, Leicester- stershire; Gisfleld, Essex; Sible-Headingham; and lastly at Conard, near Sudbury, Suffolk, where he died, May 13, 1690. He was the author of Consecrations Tres (1654): — Three Decades of Sermons (1660): — Catalogus Librorum in Bibliotheca Aulae Mag- dalenae (1661): — Two Treatises (1681): — and other works.

Wilkinson, Sir John Gardner, D.C.L., F.R.S., a celebrated English traveller and Egyptologist, was born at Haxendale, Westmoreland, Oct. 5, 1797. He was the eldest son of the Rev. Richard Gardner. He received his education at Harrow School and at Exeter College, Oxford. He afterwards went to Egypt, where he remained twelve years, devoting himself to the study of the antiquities of the country, and making himself acquainted with the language, manners, and customs of the modern inhabitants. He resided a considerable time in a tomb at Thebes, and employed himself in making accurate surveys of the district and drawings of the superb architectural monuments, and in copying the sculptures, paintings, hieroglyphics, and other objects of interest then existing. In 1828 he published at Malta Materia Hieroglyphica, in four parts, and in 1835, in London, Topography of Thebes and General View of Egypt. In 1886 he began the publication of his great work, The Manners and Customs of the Ancient Egyptians, printing the first series in 3 vols. 8vo., the second series, in 2 vols. 8vo., appearing in 1840. In 1843 he published Modern Egypt and Thebes, a new and condensed edition of which was published among Murray's Hand-books in 1847. In 1844 he travelled in Dalmatia and Montenegro, and in 1848 published Dalmatia and Montenegro, with a Journey into Servia, Karageorgevina, and the Slavonic Nations, etc. In 1850 he published The Architecture of Ancient Egypt, and in 1851 The Fragments of the Hieratic Papyrus at Turin containing the Names of the Egyptian Kings, etc. In 1856-57 he revisited Egypt, and on his return published Egypt in the Time of the Pharaohs, represented his collection of Egyptian, Greek, and other antiquities to Harrow School for the purpose of forming a museum, to which he added, in 1874, his valuable collection of coins and medals. In 1858 he published A Treatise on Color and the General Diffusion of Tint among all Classes. He contributed many notes to the most important ancient and published papers in the Transactions of the geographical and archaeological societies in Great Britain. He died Oct. 29, 1875. A Memoir was published by his widow in 1876. Lord Ripon, in an address before the Royal Society of Literature, spoke thus of his great work on the ancient Egyptians: "Indefatigable in research, full of learning, accurate in facts, Sir Gardner Wilkinson has at the same time treated his subject with the enthusiasm of genius and the liveliness of poetry. He opens to you the temple of their deities, the palace of their sovereign, the field of battle, and the repositories of the dead. He traces for you their early history, he enlightens your knowledge of the arts and sciences.
the course of their husbandry, and the process of their manufacturers; and he introduces you to their private life with a graphic vivacity which makes you at once a judge of the virtues and vices of the Egyptian character, as it was, of the intimacies of their domestic society.”

**Will, Arminian View of.**—I. Definitions.—1. Mind is one and indivisible. For convenience in language, the phenomena of mind are generalized, and names given to the powers by which phenomena become possible and to which phenomena are referred. Those powers of mind which are immediately concerned in the acquisition, retention, and classification of knowledge are classed together and generalized so that the generic name of the intellect is made to include them all, or, more briefly, the mind’s power to know is called the intellect. In like manner, the susceptibility of feeling is called the sensibility, and the power to put forth action is called the will. Not that there are three distinct entities, for evidently it is the same one and indivisible mind that perceives, judges, remembers, imagines, is pleased or displeased, loves or hates, chooses, resolves, determines, acts. Perhaps it would be quite as scientific as is the usual method of statement to say that mind, considered as an entity, is one, simple, indivisible, and ultimate; that the same one mind, considered as a power to know, is called the intellect; considered as a power of feeling, is called the sensibility; and considered as a power to act, is called the will.

2. Edwards defines will as “the power to choose.” This is unscientific and inadequate, because there are evidently other phenomena of mind as distinctly active, and as clearly distinguished from knowledge and from feeling, as is choice.

Tappan’s definition of will is “the mind’s causality.” This is not objectionable, unless it be said that it is too general and does not enable the thinker to form a definite conception.

Wisdow says the will is “that power of the mind by which an individual is the author of an intentional act.” This is more specific, and is correct so far as it goes; but it may be asked, Is not will sometimes active when there is no intention or purpose cognized in consciousness? Does not the mind put forth acts of will unconsciously?

3. I understand by the will that power which the mind has of determining or deciding what it will do and of putting forth volitions accordingly.

Upham says “the will may properly enough be defined the mental power or susceptibility by which we put forth volitions.” These are both defective, because they require a knowledge of what is meant by the word volition.

Manifestly mind is so perfectly one, and its phenomena are so thoroughly interpenetrated, each and all being mutually conditioned one upon the other, that accurate and exhaustive definition is extremely difficult, if not impossible, in the present state of mental science, perhaps we say the best thing possible, and all that is requisite for practical purposes, when we say that to know, to feel, and to act is an exhaustive category of mental phenomena, and the mind’s power to act is what is expressed by the term “will.”

3. In general use, all acts of will are called volitions. Some writers, however, distinguish them as “choices” and “volitions;” but no reason is apparent for varying from the general usage, as the distinction sought may be easily made when necessary by simply noting one class as volitions in choice, and the other as volitions in the sense of volition. I begin to seek, and am about to seek for a purpose, to seek an end, to indulge an intention, to resolve to do, with other terms of similar import, express acts of mind which are different from the mental *nissa* which moves the mind or body, or both, to do the thing intended. As between idleness and employment, as between leisure and business, no distinction is made, and another point of between several books lying before me, I determined to take up a particular book and give attention to the reading of the same, and the study of the topic on which it treats. These selections and the determination formed are acts of will—are choices, volitions in choice; but no one of them, nor all of them together, have as yet stirred a muscle. Another act of will is requisite to move the body and do the work intended: this may be called volition in the executive nissa.

The executive power of will is exerted both upon the mind and upon the body—upon the mind as in all acts of volition, and whereby attention is confined to any particular topic; upon the body as in all cases of intended muscular movement.

The above, in a matter so well understood, may suffice as a sort of index pointing towards, rather than accurately defining, what is intended by the terms “will,” “choice,” “volition,” and their synonyms; and we now proceed to the discussion of the question which, more than all others connected herewith, is of vital importance, namely—

II. The Freedom of the Will.—Fatalism is a denial of the existence of free-will in any sense in which the term may be used. What is is, because it could not not be; and what is not is not, because it could not be. The actual is equal to the possible, and the non-existent is equal to the impossible. Eternal fate governs all existences and events. Of course atheists are universally fatalists. Materialism, when it asserts that nothing exists but matter, is necessarily fatalistic, and in any of the forms which it assumes it is logically fatalistic. Dualism and pantheism always lead in the same direction, though dualists and pantheists are not all professed fatalists. One form of professed theism is confessedly fatalistic, namely, the species of them which affirms that God acts from the necessities of his nature, so that he does all he can do, and what he does he cannot avoid doing, the actual being, by the necessity of God’s nature, the measure of the possible. All that it is deemed needful to say of fatalism in this connection is that it contradicts the universal convictions of the human mind. All men, fatalists themselves included, have an ineradicable conviction that many things might be different from what they are. All men irresistibly conceive an essential difference between a man and a machine, and conceive that that difference is due to the fact that he is free to choose the ends and the manner of their accomplishment, and the machine does not. Fatalism, if true, cannot be proved, for to admit the possibility of its truth long enough for the consideration of an argument is to admit that human thought is a necessary falsehood; and arguments against fatalism are evidently futile, for, in his own profession, he is bound to ignore all confidence in his own thoughts. Rejecting as he does ultimate principles, denying intuitive truths, there is no foundation for an argument.

The antagonism between fatalist and freedom may be found in the distinction between the two subjects to the law of necessity in every direction, and in the same sense that matter is subject to that law? The fatalist affirms and the freedomist denies. For all that is apparent, the antagonists must stand face to face forever—the one affirming and the other denying—with nothing for either to say that will be of any service to the other.

Among antifatalists there is great diversity of opinion, and here controversy begins. All are agreed in affirming the doctrine of human liberty, or technically in asserting the doctrine of free-will; but they instantly begin to divide as to the manner in which these phenomena are referred to the brain. Some affirm the complete freedom of the mind, so far as is possible and consistent with human nature—some the subjection of the mind to the necessity of the case. One affirms that the will is the principal effect of the brain, the other affirms that it is of no importance to the brain. The former affirms that the will is the principal cause of the brain, the latter denies it. Some affirm that the will is the only cause of the brain, the other denies it. Some affirm that the will is the principal cause of the brain, the other denies it. Some affirm that the will is the principal cause of the brain, the other denies it.
be said that this question does not cover the whole ground of controversy, since some allow that "the power to the contrary" is essential to a probation, and that the first man possessed it; affirming only that the pos-
terity of the first pair, by reason of their relation to the first, has the same. This is one of the difficulties in the case; for it is clear that all, or well-nigh all, arguments adduced to prove the non-existence of a power to the contrary in the posterity of Adam prove, if they prove anything, not the non-existence, but the impossibility, of such a power. The question may be stated in another manner. Is man a power to the contrary, or is he rather a power dependent on another power? When the mind chooses A, could it at the same time and under the same circumstances have chosen B instead? Is mind, or is it not, an either-causal power? Is it, or is it not, in respect to any event, a first cause? The parties to this controversy have been called Fre-
domists and Necessitarians. We adopt these terms not only for convenience, but because they explicitly charac-
terize the opinions held by each.

1. Freedomists affirm that the power to the contrary is not only conceivable, but actual; that it is involved in all intellectual concep-tions of infinite power; that at any moment in the determination God can create or refrain from creating; that, creating a world, he can place its centre in any one given point in space or in any one of an infinite number of other points; that this power in God is absolutely free from all constraint, either from anything external to himself or from anything pertaining to his own nature. They further affirm that several created men in this feature of his image, so that to de-
prive man of it entirely would be to dehumanize him—
would be to reduce him to the character and condition of
a brute, or perhaps worse, to mere machinery. They
still further affirm that the possession of this power is
fundamental and essential in the make-up of a moral
being. Necessitarians deny the power to the contrary.
Their opponents—stating it in the mildest terms they
choose to adopt—an invariable antecedency in all events, psy-
chosical as well as physical. All phenomena are uniform,
equally so whether pertaining to matter or mind. Exter-
nal objects determine perception, perception deter-
mines emotion, emotion determines desire, desire de-
termines volition in choice, volition in choice determines
volition in the executive nisus, and this determines the exter-
nal muscular action. The chain is unbreakable; the
one links the antecedent, the next the necessary, as impossible to otherwise, as is the connection be-
tween external object and perception. Every cause is
potent only for one sole effect; every antecedent is fol-
lowed, and must be followed, by one sole consequent. As
Edwards puts it, the law of necessity governs all events;
it is a broad inclusive law; it makes the possibility of
the opposite of what is. Discussions on this subject among theologians
have primary and chief respect to the power for good. Pelagi-
ans affirm that the power for good is as essential to human nature as any other power. Of course it was not lost by the fall, and all men come into personal con-
sciousness as fully possessed of power to choose the evil. Augustinians and Armillians affirm that power to choose
the good was lost by the first sin; that man became enslaved, and that the race have inherited the enslav-
emment. Augustinians further affirm that the lost power is never restored; that if man wills a good, it is by a divine efficiency causing him thus to will—in other words, the power to the contrary does not exist in the
human mind, has not since the first sin, and never will.
Armillians agree with Pelagians in affirming that the
power to the contrary is essential to a moral nature, to a
human soul's activity, but differ from them in the things
they deny that the power to good was lost by sin. Ar-
millians agree with Augustinians in affirming that the
power of the first pair have inherited an enslaved
nature, but they differ from them when they assert that
this enslavement is perpetual. Armillians affirm that the
race, except the first pair, come into personal con-
sciousness under grace; that the unconditioned benefits of
atonement include not only personal existence, but
also all the requisites of a fair probation, among which
the power to refuse the evil and choose the good is chief,
is fundamental and essential. These differences among
freedomists and theologians are of the greatest importance; but it is not needful that they be kept in mind, for the dis-
cussion is the same, whether they be considered or left out of the account.

(1) Freedomism is sustained by an appeal to univer-
sal consciousness. It is affirmed that every man does,
that every day of his life, millions of times, anything
while doing these things that he has power to do other-
wise. It is objected to this appeal by opponents that
consciousness testifies to the acts of mind, and not to its
powers. This objection is an assumption which all
psychologists do not admit, and it cannot be denied
that man is, in some sense, conscious of his power.
But allowing the objection to stand for what it is worth, it is still averred that the consciousness of a conviction
so universal as is the conviction that very many things
we do, we do with the same ability to do otherwise that
we have to do as we do, is as determinative as any con-
version of plus or minus that can be relied upon in any testimony that it gives respecting human nature, or if a conviction existing in
universal consciousness is any evidence that that convic-
tion is true, then man is free in the sense of the free-
domists; he possesses power, or, more accurately, he is himself the agent in the matter.

(2) Freedomists affirm that the power to the con-tra-
y is essential to moral obligation; that a conviction of
its existence arises necessarily from a consciousness of
moral responsibility. It is affirmed that it is imposs-
ible for any one to feel responsible for any event, unless he also feels that that event is under his control.
If one feels obligated to choose the good, he must also feel
that he has power to do so; if he feels condemned for
choosing the evil, he must also feel that he might have
chosen the good. These convictions are, in perfect ac-
cordance with what abstract science, and nature, are judged as just, honorable, and right. Wherever obligation
and responsibility exist, alternative must be coexistent.
In justice and in honor, punishment cannot be awarded for
the unavoidable; if but one way be possible, moral
desert is impossible. Necessitarians attempt to avoid
these conclusions by affirming that not a power to
contrary, but voluntariness, is the basis of obligation
and responsibility; voluntariness, they say, is self-mo-
tion in the absence of constraint. It is said if a man
choose evil unconstrained by anything extraneous to
himself, he is responsible; though being what he is it
were impossible for him to choose otherwise. How-
ever, it is said that it is no matter how he came to be
what he is, whether his depravity be concreted, in-
fused, or self-imposed, if his acts are his own and not
another's, he is responsible. Is this so? If without
any fault or agency of my own I am a slave to evil de-
sires, so that I have no power or ability to choose good,
am I responsible for the evil I do? Let the common
sense of mankind answer.

(3) Freedomists aver that a denial of power to the
contrary, if not itself identical with fatalism, is logically
its equivalent, since absence of power to be otherwise
equals necessity. The term necessity cannot be
accurately defined than by the term absence of power
to the contrary. In reply, necessitarians make a dis-
tinction between a physical and a moral necessity; the
former being found in the connection between a physi-
cal cause and its effect, and the latter between a men-
tal state and its effect. Both when they deny this equ-
ality he contends for is "the full and fixed connection
between the thing signified by the subject and predicate
of a proposition which affirms something to be true."
The rejoinder of the freedomist is that necessity is al-
ways the same, whatever be the subject to which it ap-
plies, and is always impossibility of the opposite. No
distinction founded on an irrelevant matter, nor the obscurity of Edwards's definition, avails to avert the force of the evident affirmation that absence of power to be other than as necessity, fate; and necessitarianism equals fatalism.

(4.) Freedomists affirm that to deny the power to the contrary is to deny human liberty fully and totally. If man cannot do otherwise than he does, he is not free. To avoid this affirmation, vicious definitions are given of the terms liberty, freedom, etc. Liberty is power to do as you will, to will as you choose, to do as you are pleased, etc. To do as you will defines physical liberty, the freedom of the body, and has no relation whatever to mental freedom. To will as you choose is without significance, because choosing is willing, and liberty, if anywhere, is in the choice and the chance, not in the accordance with it of any subsequent act either of body or mind. To will as you are pleased admits the inseparable connection between choice and antecedent pleasure or desire, and may reject the possibility of the opposite, and this is precisely that for which the definition is constructed. When used for this purpose, the outcome is simply a statement of the issue; the definition, and all that depends upon it, avails nothing in averting the affirmation that the denial of a possible opposite is a denial of the possibility of freedom fully and totally. Liberty does not exist, fixed fate governs all.

(5.) As a corollary of the above, freedomists affirm that necessitarianism must, if consistent with itself, equally with fatalism, deny all moral distinctions and regard the idea of a moral government as chimerical.

2. The principal arguments adduced in support of necessitarianism are as follows:

(1.) Causality.—Volitions are effects, and must have a cause; the cause being what it is, the effect cannot be otherwise than it is. This is regarded by opponents as a plain begging of the question, for it assumes that all causes are potent only for one sole effect, when the question under discussion is whether or not mind is a cause equally potent for each of different several effects. If it be asked, What causes the mind to cause as it does? the answer is, Nothing causes it; it is itself first cause of its own volitions, and is by its nature an adequate cause of all its volitions, both general and particular.

(2.) Antecedence.—If the act to be self-determined, it must determine itself in any given volition by an antecedent volition; but if this antecedent volition be self-determined, it also must be determined by another antecedent volition, and so on ad infinitum. But to suppose such an infinite series of volitions always reduced to a reducible antecedent is to suppose impossibility. All the force of this argument comes from the unfortunate use of the term self-determined. Mind is not determined, it is itself determiner. The supposed antecedent volition is useless, and the series is stopped at its beginning.

(3.) Utility.—The question is asked, "What is the use of a power that is never used?" The events that do occur are produced each by a power adequate to its production; if there be a power adequate for the production of an opposite event, it is never used, is useless, and therefore shall not be. The fallacy here consists in the assumption that the doctrine of freedom supposes two powers—one to do, and another not to do. Whereas the asserters of a power to the contrary affirm that the same one power is fully adequate to the production of either of several different results. Mind is such a cause that when it acts as effect A, it is fully adequate to produce effect B instead.

(4.) Motive.—It is said mind cannot act without a motive. In a conflict of motives the strongest must prevail, therefore volitions always are as the strongest motive. The fallacy of this argument comes from the materials and ideas by which it is supposed. There is no analogy between material and mental phenomena that admits of such argumentation. The strength of a motive cannot be represented by the weights of a balance; to infer prevalence from strength in mental the same as in physical phenomena is vicious. If, however, the term strong be used in the same sense as determinist believe it to be distinctly stated in what the strength of a motive consists; the term strength must be clearly defined. "The so-called strength of a motive," says Weden, "may be defined the degree of probability that the will will choose in accordance with it, or on account of it." This definition being admitted, the argument is closed, for beyond all controversy it is evident that great improbabilities do sometimes occur; an improbability, however great, is not the equivalent even of a certainty, much less of a necessity.

But, again, the argument assumes that mind never acts but in accordance with motives, and that it cannot act without a motive. This is not admitted. Every active man, every day of his life, in a thousand indifferent and unimportant movements, both of mind and body, acts in the total absence from consciousness of any motive or reason for doing as he does; and, again, in an equilibrium of conflicting motives, clearly cognized in consciousness, man can make a choice. This is not a supposed case, but is of actual and frequent occurrence. Men frequently with strong motives for action find themselves without any motive whatever for action in one way rather than another, and yet in these circumstances there are volitions as natural and as definite as when a strong preponderance is obvious. The argument from the strength of motives is not determinative.

(5.) Divine Prescience.—Infinite wisdom must include a perfect knowledge from eternity of all existences and events. A complete history of the universe through all time must have always been perfectly cognizable by the Divine Mind. God's foreknowledge can never be disappointed. All existences and events will be as God has from eternity foreknown them; therefore the opposite to what is, and the different from it, could not be; the power to the contrary does not exist. Let it be distinctly noted that the inference here is not merely the non-existence of a power to the contrary, but its impossibility; and if the argument proves an impossibility in human affairs, it also proves the same as to divine affairs—indeed, as to all events from eternity to eternity—and God himself is forever shut up to one sole positive and necessary act, the possible; eternal fate governs God and all that is not God.

The premises are unquestionable, but the conclusion is a non-sequitur. A future event may be certain, which may be known as certain, and its opposite be possible notwithstanding; will be is not the same as will may be. The argument that a power to the contrary is impossible if the foreknowledge of God were eliminated. Knowledge is not causative; the knowledge of an event has nothing to do with its production. All that the divine prescience of future events does in this argument is to prove their certainty. But this must be admitted without such proof: all things will be as they will be, whether God knows them or not. The history of the universe will be in one way, and not two; objective certainty is self-evident. But certainty is not necessity; it does not exclude the possibility of an opposite. Prescience neither helps nor hurts this case at all. If a man can see no difference between necessity, he cannot admit contingency; he is logically shut up to invincible fate. If one does apprehend a clear difference between will be and must be, he may affirm both prescience and contingency. Between these two parties thus cognizing these ultimate ideas there must be a perpetual difference of opinion in the question of contingency. Further discussion is useless; they have reached the ultimate of the question; they must stand face to face, one affirming contingency, and the other necessity, without the possibility of an argument from either that will be of any service to the other.

(6.) Ditincts of the same case. The same world is in accordance with a decree. No existence or event can be permitted to contravene his plan; all existences and
events must be included in the plan, and each must form a constituent part thereof. To suppose anything contingent upon the human will is to take that thing from the influence of God, or sovereignty, subject it to human caprice, to uncertainty, to chance. Therefore nothing can be possible which is different from what is. All the strength of this argument lies in one or the other, or both, of two conceptions. One of these conceptions is that a perfect government implies an absolute necessity of being endowed with authority; the other is that contingency is the equivalent of uncertainty, no cause, chance. The one conception is that the divine sovereignty cannot be complete and perfect unless all that is not God be reduced to the condition of machinery. The other is that the complexion of Calvinism is the complexion of beings being endowed with alternative powers. The idea that a contingency is an uncertainty is antagonized by the conception that contingency and certainty may both be predicative of the same event; it may be certain that a thing will be, and yet at the same time, be possible that it may not be. These antagonizing conceptions are ultimate; and two parties, the one entertaining one and the other the other, must forever be at variance. Controversy closes, the one party affirming and the other denying. If God cannot know how his creatures will conduct themselves when endowed with such a variety of power, how can their conduct be by their own free will; if he cannot govern the world when much of its history is within the power of his creatures, when much that is, is determined and enacted by the free volitions of men, then freedom must quit the field, and, as we see it, fatalism is triumphant. There are innumerable possibilities which never become actual; if the actual be the measure of the possible, then fate governs all things.

III. Literature.—Arminius, Works (Auburn, N. Y. 1853, 3 vols. Svo.), iii. 222; ii. 472; Wesley, Works (N. Y. ed.), i. 68, 494, 460; vi. 89; vii. 41, 49, 127, 584; viii. 97; Fisk, Calvinistic Controversy (ibid.), ii. 435 sq.; Fisk, Calvinistic Controversy (ibid.), 135 sq.; Bledsoe, Examination of Edwards (Philadelphia. 1835); Whedon, Freedom of the Will (N. Y. 1864); Raymond, Systematic Theology (Cincinnati, 1877), ii. 140 sq.; Pope, Christian Theology (London, and N. Y. 1879 sq.), iii. 363 sq. A moderately Calvinistic, but not strictly Arminian, view of the will may be found in the Baptist Review, 1880, p. 537 sq. See Arminianism; Theology (New England); Wesleyanism. (M. R.)

WILL, CALVINISTIC DOCTRINE OF THE. It is obvious that consistent Calvinists and Pelagians cannot hold the same theory as to the nature, conditions, and extent of the freedom of man in will. If there be no possibility of the occurrence of any event, it is no more conceivable that the human will, that it is not possible for a free-agency, that is, the freedom of the will, to be absolutely limited in its operation. The Westminister Confession of Faith represents all other Calvinistic standards in ascertaining as follows:

Ch. III, § 1. God has "unchangeably ordained whatsoever comes to pass; yet so as thereby neither is God the author of sin, nor is violence offered to the will of the creature, as through the interposition of secondary causes taken away, but rather established."

Ch. IV, § 1. "The foreknowledge and decrees of God, the first cause of all things, come into the sight of the natural and secondary causes, either necessarily, freely, or contingently."

Ch. ix, § 1. "God hath enjoined the will of man with that natural liberty, that it is neither forced nor, in any absolute necessity of nature determined to good or evil."

This doctrine Calvinists have always maintained, and they have never held any other doctrines which, in their belief, were inconsistent with this fundamental doctrine of human freedom. In former times Calvinistic theologians, while maintaining the freedom of man as a responsible moral agent, have generally felt impelled to over against the fact of freedom the equally certain facts of man's moral depravity, and consequent voluntary aversion and moral inability to will that which is contrary to that which is in accordance with our relation to God. This has been sharply emphasized in opposition to Pelagian error. But more recently, in consequence of the prevalence of pantheistic and materialistic modes of thought, which are alike fatalistic, man's freedom is entirely a gift of God, an expression of the rational and moral self-determining power of the human soul which they had always held. This primary truth is the only and the efficient solvent alike of materialism and of pantheism in all their forms. It is the citadel of faith, the last tangible support of supernatural religion. We therefore not only hold to the freedom of the human soul in willing sincerely and in good faith, but we regard it as fundamental and essential, the truth of all others to be held aloft and vindicated at the present day.

The Arminians as a class have always maintained the freedom of the human soul as the sole cause of its own volitions is so consciously true that such impartial, learned, and able critics as Sir William Hamilton (Discussions, Appendix I, A.; and note on p. 402 of collected Works of Dugald Stewart), Dugald Stewart (Discourse on the Progress of Philosophy), and Sir James Mackintosh (Note O to his Preliminary Dissertation) have affirmed that the doctrine of the will maintained by Jonathan Edwards is irreconcilably inconsistent with the doctrines of Augustine and Calvin, and the system they taught. In direct contradiction to this opinion, E. B. Colton (Christian Church and its Work, 227 sq.) has held that with a particular theory of liberty which they maintained—which has been absurdly misrepresented by its title of "philosophical necessity"—is essential to the logical defence of the Calvinistic system. Principal William Cunningham, in his article "Calvinism and the Doctrine of Philosophical Necessity," in his Reformers and the Theology of the Reformation, has incontrovertibly proved that both these opposite opinions, as to the relation of the Calvinistic system of theology to special theories of the freedom of the will, are false; and that neither the theory taught by Edwards, nor the theory of self-determination taught by E. B. Colton, or any of the systems of the will which can be consistently held by Wesleyanism, is excluded by the logic of Calvinism.

II. Opposition to Pelagianism.—Pelagians hold that the essence of free-will involves an absolutely unconditional power of choice between good and evil, and that this power is inalienable from human nature and essential to responsible agency; that the moral agency of a man at any one moment cannot determine nor limit his moral agency at any other moment, but that he must possess, whatever his conduct, throughout his entire existence, full ability to will and to do all that God has any right to require of him; that moral character, whether good or bad, can be rationally predicated only of acts of the will, and not of any permanent states of the will or of the affections. Hence Pelagians deny—1. That Adam was created with a holy character antecedent to his own morally unacted action. 2. They deny that there is in any representative of the human race, and that, in consequence of his apostasy, his own nature or that of his posterity became morally depraved. 3. They deny that man's will is ever morally impotent, or unable to meet all the obligations resting upon him. 4. That the will of sinful man is dependent upon a natural law, whether of nature or of grace, that it can be absolutely influenced by such grace without prejudice to its freedom or responsibility. 5. Socinians, the only con-
sistent Pelagians, hold that certainty is absolutely in-consistent with liberty, and that, consequently, God cannot make free future acts of men, or other contingent events.

Calvinists, are, of course, prevented by their religious faith from agreeing with the above positions of the Pelagians as to the conditions of free agency. They hold that man was created with a positive holy character, yet able to obey or disobey. That man's moral nature has since the fall totally corrupted, indisposed and disabled to obey God's holy law. That the influence of divine grace, prevalent and co-operative, exercised in regeneration and sanctification, instead of limiting the liberty of the human will, re-establishes and revives it.

III. Ability and Liberty.—Hence Augustinians have sharply emphasized the distinction between liberty, the inalienable property of the human soul as a free rational moral agent, and ability, i.e. the power to will and do up to the full measure of our responsibility; or the power to will in a manner contrary to the prevailing moral state of the soul itself; or the power, by a mere volition, to change that prevalent moral state. The same distinction is signalized, by German philosophical theologians, by the terms Freiheitsfakt, or ability, and Reale Freiheit, or liberty. The neglect of this distinction led to so much confusion, as Luther, and many of the older Augustinian theologians, in terms denied liberty, when they really meant only to deny to men moral ability to obey the divine law independently of supernatural grace. This has led many honest opponents of Calvinism, imperfectly acquainted with Augustinian theological literature, and the usage of technical language which prevails in it, to misunderstand altogether the meaning of many of our classical authorities.

Calvinists, as they have understood themselves, have always maintained the freedom of the human will, and at the same time, and in perfect consistency, have denied the moral ability, as used by the Augustinians, of God's law without supernatural grace. They have also always, and with equal consistency, maintained that all events, including the volitions of free agents as well as those dependent upon necessary causes, have been from eternity certain future, and that this certain futurity has been determined by the sovereign foreordination of God.

But in all these points, except the last, Westleyans and Calvinists agree. Different explanations and adjustments of these great commonplaces of Evangelical Christianity may distinguish them, but, as above general, they are at one. God did create man with a nature holy, antecedent to all action, yet mutable (Watson, Institutes, pt. ii, ch. vi and xviii; and Wesley, as there quoted by Watson). Man, after his fall, continues to be a free and responsible moral agent, and yet is morally depraved before individual action, and is unable, before regeneration, and without the assistance of supernatural grace, to obey the divine law; and the operation of this grace does no violence to his freedom of will (Methodist Articles, art. viii; Watson, Institutes, pt. ii, ch. xvii; and Wesley on Original Sin). Saints in glory will be free, yet confirmed in holiness and not liable to fall into sin (Methodist Articles, pt. i, ch. xxvii). The free acts of men and angels have always been certainly future to the infinite foreknowledge of God (ibid. pt. ii, ch. iv).

IV. Foreknowledge and Predestination. — Obviously, there is no point at which the essential elements of the Calvinistic system appear to us, but that the nature or conditions of human free agency in a manner different from that in which the essential principles of evangelical Arminianism bear upon the same is the point of the divine decrees. Calvinists hold that God has from eternity immutably foreknown whatsoever comes to pass. Wesleyans hold that God has from eternity immutably foreknown whatsoever comes to pass. Both equally involve certainty, and neither involves anything else. Watson says "the great fallacy in the argument, that the certain prescience of a moral agent is inconsistent with the liberty of the agent and opposing that contingency and certainty are the opposite of each other." Anti-Calvinists commonly understand that divine foreordination necessarily includes the determination upon the part of God efficiently to bring to pass the things foreordained. But all events are effects either of necessary or of free causes. Foreordination of the effects of necessary causes, of course, does involve a putting-forth of divine efficiency to bring them to pass either immediately or mediatly. But the foreordination of the effects of free causes, such as the volitions of free agents, of course, does not involve upon the part of God any pre-existing act of putting forth event in order to make the foreordained volition to pass, except that involved in bringing the free agent into existence whom he foresaw would freely execute the volition in question; and in giving him power, either natural or gracious, to execute it. God eternally saw in idea all possible free agents, under all possible conditions and all necessary combinations which they would freely exercise under all those conditions, if they were so created and conditioned. This knowledge (scientia simplicia intelligitiva) precedes and conditions all foreordination. He then sovereignly chose out of the possible the entire system of things he desired to make the futurity of all things certain. This foreordination precedes and conditions his foreknowledge of things certain future. In order to execute it, God, in creation and providence, brings into existence and controls in action all necessary agents, including some sides of human nature; but as to free volitions, he simply brings the agents into existence and conditions them according to his plan, and gracioulsly or naturally supplies them with the power necessary to will and act as predetermined, and then leaves them freely and contingently to will as he had certainly foreseen they would do. The whole system of Calvinism is simply this: "The Calvinist position is stated with sufficient distinctness when it is said that the existing system of things or world-plan was present in the divine mind from all eternity, and was therefore both foreknown and foreordained." Thus the Calvinistic doctrine of the foreordination of free acts, like the Wesleyan doctrine of foreknowledge (which really does not differ from it as much as many suppose), simply involves the pre-existing immutable certainty of the act, and in no way affects the freedom of the agent or the contingency of his act (Westminster Confession of Faith, lii, 1.). It is free in its very essential nature. It is not foreseen by any antecedent cause or condition, and so conditioned. God makes it certainly future by his purpose to so create and so place that man. His creation and providential condition are brought about by the efficiency of God. His volition, although foreseen to be certain future, is his own free spontaneous self-determination. Even if this explanation should be proved untrue or absurd, surely a thousand other reconciliations of these revealed truths may be possible to divine, although they should all be impossible to human, reason.

Hence, neither Calvinist nor evangelical Arminian can consistently hold a theory of the will involving the principles of Pelagianism which both repudiate. Hence, also, Westleyans and Calvinists agreeing (1) that God's foreknowledge proves that all events are certainly future, and (2) that there can be no foreordination of a human volition in any sense or degree inconsistent with its perfect freedom, have, each of them, in consistency foreseen and foreordained that God's free volition shall be within the same range of choice as to theories of the will as the other. Principal William Cunningham incontrovertibly proves this in essay ix, Reformers and Theory of the Reformation. That foreordination leads to foreordination is argued by professor L. W. Cable, D.D., L.L.D., in his Classical Address for 1880, and The Foreknowledge of God; and hence he proposes to revolutionize Wesleyan theology by the introduction of
the denial of God's foreknowledge of future contingent events.

V. The Eudorean Doctrine.—Edwards wrote against the Pelagianizing Armenians represented by Whitby, and in a theological interest, as he supposed. He proposed to settle forever, by strictly logical process, all the questions at issue. He argued that the act of the will is its free will only in so far as it is the self-determining motive. "He does not carefully distinguish between the different usages of the word 'cause'; he seems to limit freedom too exclusively to executive volition; at times he implies that the whole causal power, producing volition, resides in the motives; his conception of causation, so to speak, is an atomistic one. He seems to regard volition as merely a series of principles, disconnected from that of living spontaneous forces; and he is so earnest in arguing against the self-determining power of the will as to neglect that element of self-determination which is undeniable found in every personal act" (Smith [Dr. Henry B.], in the Amer. Preach. and Theol. Review, Jan. 1865). Yet he never intended to deny that essential freedom of choice which is witnessed for in consciousness, and that he conducted his argument with consummate power is witnessed to by his most earnest opponents. He "set up a philosophy of the will which is not consonant with the doctrine that had been held by the main body of Augustinian theologians. ... The doctrine of Augustine, however, and the more general doctrine, even, of Calvinistic theologians, the doctrine of Calvin himself, and of the Westminster Assembly's creeds, is that a certain liberty of will (ad utrumvis), or the power of contrary choice, had belonged to the first man, but had disappeared in the act of transgression, which brought his will into bondage to evil. It was the common doctrine, too, that in mankind now, while the will is enslaved as regards religious obedience, it remains free outside of this province in all civil and secular concerns. In this wide domain the power of contrary choice is preserved. Fisher [Rev. Prof. George P.], in the North American Review, March, 1879]. Calvin says, in writing against Pighius, "If force be opposed to freedom, I acknowledge and will always affirm that there is a free will, a will determining itself, and proclaim every man who thinks otherwise a heretic. Let the will be called free in this sense, that is, because it is not constrained or impelled irresistibly from without, but determines itself by itself" (Henry, Life of Calvin, transl. by Stebbing, i, 497).

Dr. Thomas Reid, the founder of the Scottish philosophy, was a Calvinistic minister, and in his Active Powers taught the freedom of the will. Sir William Hamilton was a man of the Augustinian school, and a believer in foreknowledge and foreordination, taught the same (see his Notes on Reid, and his Discussions). Dr. McCo"h (Divine Government, bk. iii, ch. i, § 1 and 2) plainly enters his dissent from Edwards, although he regards the problem with the consistency of the admitted self-determining power of the human soul and the universal reign of the law of causation to be at present insoluble. Henry P. Tappan has ably criticised Edwards in the interest of the "doctrine of a self-determined will," while he remains a consistent Calvinist.

There is no doubt that Edwards's celebrated treatise is an amazing monument of genius. In certain special directions its argument has never been answered, and, as far as can now be seen, never will be. Dr. Whedon's new view of the will is a practical testimony to the continued vitality of Edwards's logic (Ward's A finite Series remains a triumphant refutation of the old doctrine of the liberty of indifference. The position of the treatise before the public in the present age, however, is maintained not by its Calvinistic defenders, but by its persistent critics, who attack it because they believe it to be the policy of Calvinistic theology and Calvinistic practice is, and has always been, an entire mistake. Calvinists, as such, are independent of, and indifferent to, the psychological theory it advocates, and the fate of the argument on which that theory rests.

VI. Psychology of the Subject.—The question as to the will and the laws of its action should be investigated purely as a psychological, and not as a theological, question. In this respect both Edwards and Whedon have equally erred. The opinion of most modern theologians, founded purely on psychological considerations, and independent of all theological bias, is that the will is, in its uppermost aspect, the street where decision is made to be by the usages of the soul, common to both parties, of considering the will as a separate organ or agent, external to the reason, affection, desires, conscience, and other faculties of the soul. Consciousness affirms that the human soul is an absolute unit, not a series of separate functions; the soul is the one organ of all its functions; the whole soul (Ego) thinks, desires, judges, feels; and the whole soul wills. The soul, that is, the person, is an original self-promoted cause, and is the sole and sufficient cause of all its volitions. In every free volition the soul is self-determined only, and had power to the contrary choice. The will, however, is not separate from the reason, but includes it; includes all the soul includes; is self-decided by its own contents and its own character; and hence is rational and moral, free and responsible.

If the problem be pushed further, and we are asked to affirm the relation which the previous states of the soul sustain to its volitions, most theologians believe that no satisfactory answer has ever been given. The answer of Edwards that the volitions are determined, through a rigid law of moral causation, by the preceding state of the soul, or by the strongest motive, appears to involve the reign within the will of the same law of cause and effect which prevails in the physical universe; and this it is difficult to prevent from degenerating into fatalism. The answer of Whedon that the will, independent of the reason, and the affections and the conscience, can follow, is not in any way consistent with the rational and moral character of an agent, and direction of which no cause or reason whatever exists, except the bare power the man has to will anything, appears to us to involve pure chance (by excluding conscience and reason and personal character and content from the will itself). And chance is only another name for fate. It is better to be satisfied with the statement of the points in which all agree,—(a) the free self-determining power of the soul itself in every free choice, (b) that in the free acts for which we are morally responsible we act for reasons, in view of moral considerations, and our personal character is revealed in the act,—(c) that the self-determining power is the genealogy of each volition and its relation to the antecedent states of the soul. For hitherto no such account has been permanently regarded as satisfactory by either party.

William, Josiah, D.D., LL.D., a president of Harvard College, brother of Rev. John Willard, D.D., of Stoughton, Conn., was born in Biddeford, Me., Dec. 29, 1758. He was the son of the Rev. Samuel Willard, minister of that town, and great-grandson of the Rev. Samuel Willard of the Old South Church, Boston, and vice-president of Harvard College. Joseph was born and reared in poverty, but by the aid of others and by his own energy he entered Harvard College, and gradu-
WILLEHAD was consecrated bishop at Worms, having previously been a simple presbyter. On his return, he found the Saxons unwilling to recognise a bishop placed over them by the conqueror and endowed with the rights of an apostle. He laboured, however, to effect a firm establishment of the Church among them, and succeeded in dedicating the first Church in his diocese Nov. 1, 789. His administration, however, was but brief. He undertook a tour of visitation, the fatigue of which threw him into a violent fever, from which he died Nov. 8. He had earned the reputation of a devout, eminently trustworthy and very zealous Christian laborer, as well as of a modest, courageous, and abstemious man. He wholly abstained from the use of flesh food and intoxicating drink. His body was interred at Bremen and was credited with the performance of many miracles. Anagur enumerates thirty-four such wonders, which involve not only many noteworthy historical and topographical traditions of that time, but also several psychological features which deserve examination. He was formally canonized, and two days, July 13 and Nov. 8, were set apart in his honor.

WILDERAM (or Willeram) and WALRAM (a) were two celebrated German monks, and native of Franconia. On his return from Paris, where he had been to study philosophy and belles-lettres under able masters, he was appointed prebendary at Bamberg; but ere long he assumed the garb of a monk and retired into a hermitage at Fulda. The report of his piety, his merits, and his learning reached the emperor or Henry III, who gave to him the Abbey of Ebersberg, Bavaria, in 1048, where he passed the remainder of his days. Willeram died May 7, 1085. He seems to have been concerned to improve the material interests of his monastery, as a number of exchanges of property made by him are on record. Among his works are several devotional books for a vineyard possessed by bishop Henry of Trident. He had the reputation of being a scholar and a poet. We are indebted to him for a double paraphrase of Solomon's Song, one in hexameters and the other in Latin, which, in the style of language, is a specimen of the ancient Franks. It was arranged in the form of a dialogue between bridegroom and bride. Several copies of this double work are preserved in manuscript in various libraries of Europe; the original is at the Abbey of Ebersberg. The Latin paraphrase had been brought out for the first time in 1628, in the title Willemi Abbatos in Cantico Solomonis Mysticae Explantatio (Hagenau, 1528). Paul Merula published the two texts, with notes and a Dutch translation, at Leyden, in 1538, entitled Willeram Porphyrostus Gemina in Canticum Canonicum, prior Rhythmus Latinus, Altera Vetera Lingua Francico. His spirit in his publication, after one poor manuscript was finished, remained incorrect and of little value. That which Marquard Freher had given in German from the manuscript at Heidelberg is more highly estimated. It was published at Worms in 1581 under the title Uralte Deuteronomium oder verholten Lektur, und der Alderne Theatr. The author of this work is the author of the Theaurus Antiqu. Teuton., formed a plan of reducing the work of Willeram, but he died before he had time to realize his project. His work was found among his papers, and Scherz took upon himself the task of completing it, and published it in Ulm in 1726. Through the efforts of M. de Fallerschen, an entire edition of the work was published by Hoffmann in Ger

William (St.) of Aquitaine, duke, surnamed "the Great," was the son of count Thierry, and is thought to have been the brother of Charlemagne, who greatly honored him, and rewarded his services in reducing the Saracens in Spain. William founded a monastery in Gelone, a little valley on the borders of the diocese of Lodève, which he entered barefooted and in sackcloth in 806, after having obtained the consent of his wife, and made provision for his children. He practiced great austerity, and died May 26, 812 or 813. His body was found in 1679 under the great altar of the church there. See Hoefer, Nouv. Biog. Générale, xxiii, 594.

William of Aria, a goldsmith of Paris, flourished about the beginning of the 13th century. He stood forth as a preacher of the sect of the Holy Ghost, and announced the coming of judgment on a corrupt Church, and the inauguration of a new era in which the Holy Ghost was to permeate all. See Neander, Hist. of the Church, iv, 448.

William of Auvergne (also called of Paris), a French prelate and theologian, was born at Aurillac about the close of the 12th century. He succeeded Barthélemy as bishop of Paris in 1228. He took a large part in the civil affairs of Louis X. At the same time he too deeply interested himself in the controversies of the day respecting benefits, combating the abuses with great vigor. He also erected several churches and monastic institutions. He died at Paris March 30, 1248. His works, which consist of many mystical treatises, were published by Leferon (Orleans, 1674, 2 vols. fol.). See Hoefer, Nouv. Biog. Générale, xxiii, 898.

William of Champcaux (Lat. Campellonius), a French prelate, was born in the diocese of Champaux, near Melun, about the close of the 11th century. He studied at Paris under Anselm of Laon, became archdeacon of Notre Dame, and taught dialectics in the cathedral school for many years. Among his scholars was the famous Abelard, who eventually eclipsed him. In 1105 Champcaux retired to a suburb of Paris, and there founded, in 1113, the Abbey of St. Victor. He soon opened a school of philosophy, rhetoric, and theology, and was next raised to the episcopacy of Chalons-sur-Marne. He became involved in the papal quarrel of the investitures (q. v.), and died in 1121. His principal published works are two treatises entitled Moralia Abbreviate and De Originis Animae, together with a fragment on the eucharist, contained in Mabillon's ed. of St. Bernard's Works. For these philosophic speculations, see Hoefer, Nouv. Biog. Générale, ix, 626.

William of Corbeil, archbishop of Canterbury, is generally supposed to have been a Frenchman. His first appearance in history is as counsellor with the crown of Stephen. He is also supposed by some to be the Ralph Flamard, bishop of Durham. William was selected by the bishop of London to be prior of St. Osyth. He was consecrated archbishop of the see of Canterbury in 1125. In 1128 he officiated at the coronation of king Stephen. His conduct in so doing has been severely condemned. One in his history is as counsellor with the crown of Stephen. The history of archbishop William was the completion and consecration of the church commenced by Lanfranc and carried on by Anselm. This occurred May 4, 1130. "A dedication so famous," says Gervais, "was never heard of on earth, since the dedication of the Temple of Solomon." The archbishop died in 1136. See Hook, Lives of the Archbishops of Canterbury.

William (St.) of Dion was born in 961 of a noble family, near Navarre (Italy), and was early dedi-

cated to the Church. He became a proficient in sacred and profane learning, and retired first to Clugny, but was soon made abbe of St. Benigne, and superior of a large number of monasteries, into which he introduced the reforms and the spirit of fervent devotion. He founded the abbey of Frusta, commonly called St. Balain, in the diocese of Yvres, and died at Fécamp (Normandy), Jan. 1, 1031. See Hoefer, Nouv. Biog. Générale, xxii, 596.

William of Malmesbury. See Malmesbury.

William of Modena, a Roman Catholic bishop of the 18th century, was sent by pope Honorius III as a legate to Livonia about 1224. He was of great service to both the natives and their recent conquerors, the Germans, by exhorting the one to bear the yoke in submission, and charging the other to lay on the shoulders of their subjects no intolerable burdens. See Nean-
der, Hist. of the Church, iv. 41.

William of Newbury (Newburgh, or Newbridge), a canon of the monastery of Newbury, Yorkshire, was born in 1136, probably at Briddlington, Yorkshire, and died in 1204 at a valuable and valuable monastery on extending from the Norman Conquest to the year 1197, entitled Guileelmus Neighbriensis Rerum Anglicarum Libri V (Antwerp, 1567).

William of Nogaret. See Nogaret.

William I of Orange (of the house of Nassau), the first leader in the Dutch war of independence, was born of Lutheran parents at Dillenburg, in Nassau, April 16, 1553. He was educated in the principles of the Reformed religion; but the emperor Charles V, who early became interested in his career, removed him to his court, and had him trained in the Roman Catholic faith. The emperor soon admitted the boy to great intimacy with him, allowing him alone to be present when he gave audience to foreign ambassadors, and in other ways conferring with him a confidence not shewn to others. The discretion which the young prince manifested in matters of public concern gained for him the surname of The Silent; and even the emperor avowed that he had been indebted to so young a man for important suggestions which had not occurred to his own mind. One day Philip the Second ordered him to continue employed him in diplomacy. On the abdication of Charles in favor of his son Philip II, the relation of William to the crown was materially changed. Philip hated him on account of the esteem in which he had been held by his father. Yet, under Philip, William paved the way for the treaty of Cateau-Cambresis in 1559, and Henry II of France detainted him and the duke of Alva as hostages for its execution. While Charles remained on the throne William adhered to the Roman faith; but on the abdication of that monarch he embraced Calvinism as reasorn as he had abandoned Lutheranism in his youth. This change was unknown to the French monarch at the time of his residence there, who, supposing him to enjoy the same confidence with Philip that he had enjoyed with Charles, incautiously revealed to him the secret of a treaty lately concluded between the crown of France and the crown of Spain, to which the cursed vermin of the Protestants" in the dominions of both. William hastened to communicate this disclosure to the Protestant leaders at Brussel, and Philip discovered that he had revealed the secret. William was already a member of the council of state which was to assist his brother John in the administration of the Spanish possessions in Ireland. Being also stadtholder of Holland, Zeeland, and Utrecht, he was able to exert a strong influence in
behalf of the Protestants, and largely undermine the designs of Philip. In 1564 he brought about the removal of Cardinal Granvelle, the principal enemy of the Protestants, but could not prevent the introduction of the Inquisition, and the increasingly strong hand of persecution that followed. In 1568 he led the delegation to the Hague, where, at the behest of the Duke of Alva, to whom Philip had transferred the regency of the Netherlands from Margaret of Parma, was the signal to William of the coming contest. He avoided the tragic fate of Egmont and Horn by retiring for a few months to his paternal domains in Nassau. He then set about improving the security of the Netherlands, his own wrongs, and perhaps political more than religious motives aroused William, in 1568, to an energetic course of opposition to the tyranny of Spain, which did not cease until triumph was complete. He published his Justification against the False Blame of his Calumniators, and began, in concert with the Pro- tentant princes of Germany, to raise money and troops. His first operations miscarried. He was driven back with his army of 30,000 men into French Flanders; and in the spring of 1569 he, and his brothers Louis and Henry, with 1200 of his soldiers, joined the Huguenots under Charles IX, in 1570. In 1571 and 1572, on successful engagements, in which he had command of an army of 24,000 troops, he was compelled to disband it on account of the loss of all hope of assistance from France. In 1578 William secured the famous Union of Utrecht, which formed the basis of the Dutch republic. This union included the seven Protestant provinces of Holland, Zealand, Utrecht, Friesland, Groningen, Over- sief, and Guelderland. As soon as this measure became known to Philip, he offered a reward of 25,000 crowns and a patent of nobility for his assassination. Once he was dangerously wounded, but the French undertook by Bethlgazar Gerard, a Burgundian fanatic, who obtained audience with the steward on the pretext of business, drew a pistol, and shot him through the body, at Delft, July 10, 1584. See Motley, The Rise of the Dutch Republic (N. Y. 1866, 3 vols.); Kloos, Wacht am Ehrenhain (Leipzig, 1871); Heinrich von Cramer, Wilhelm von Oranien (Stuttgart, 1873); Gachard, Correspondance de Guillaume le Taciturne (Brussels, 1847-56); and Juste, Guillaume le Taciturne d'après sa Correspondance et les Papiers d'Etat.

William of Rubruquius. See RUBYSSBOUK.

William of St. Alban's. flourished about 1170, and is known chiefly for a Latin prose life of St. Alban, said to be a translation from an English life of that saint. The work has never been printed, but a copy of the MS. is in the Cottonian Library, and another in the library of Magdalen College, Oxford. See Wright, Biog. Brit. Lit. (Anglo-Norman Period), p. 213.

William of St. Amour, in Burgundy, doctor of the Sorbonne, and a famous defender of the Paris University in the 13th century against the mendicant orders, which claimed the right to occupy regular chairs of theology in the university without consenting to be governed by its rules. Pope Innocent IV had seen the necessity of putting down the monks before his death, but under Alexander IV they obtained full control of the university. Under these circumstances, St. Amour attacked them, ridiculing their doctrine that manual labor is criminal, and that prayer will reap greater harvests in the hereafter than in labor. He was sent before the bishop of Paris, but acquitted because his accusers did not appear (1245). Alexander, nevertheless, issued three bulls in behalf of the Dominicans in 1255. In 1256 William published his book De Pericula Non- cristianorum Temporum, which, without specifying the orders endorsed by the pope, charged monks generally with being ignorant intruders into the pulpit and the teacher's chair, and also seeking-prosecute, as well as professional beggars, liars, flatterers, and calumni- tors. It asserted directly that perfection consists in labor, in the performing of good works, and not at all in being a beggar. The work was endorsed by the archbishop of York, followed by the whole of England, and was the origin of the famous traditions of St. Amour, who was a wealthy nobleman. The work was condemned by the pope, and its author was ban- ished. He resigned his see and went to the Holy Land. His father, Rev. John, Cistercian, was canonized in 1290. The victory achieved over St. Amour enabled the orders to pursue their arbitrary methods without restraint, until the accession of popes Urban IV and Clement IV restored the rules of the university to some degree of honor. St. Amour was therewith returned, and was not again molested by the Dominicans. His death occurred probably in 1272. See Bulaei, Hist. Univers. Paris. iii, 260; Dupin, Nouv. Bibl. des Auteurs Eccl. vol. x; Schrck, Kirchengesch. xxvii, 458 sq.; Hist. Lit. de la France, Paris, xix, 314 sq.; Herzel, Real-Encyklopd. s. v.

William of St. Thierry, a Belgian theologian, was born at Liege about the end of the 11th century. He studied in the abbey of St. Nicaise at Rheims, of which he was made prior in 1112, and eight years after- wards he became abbe of St. Thierry in the same vicini- ty. In 1184 he retired to the monastery of Ligny, and died in 1185. He was a great friend of St. Bernard, and an admirer of Abelard. He wrote a number of doctrinal, practical, and historical discussions, for which see Hufner, Nouv. Biog. Générales, xxii, 665.

William of Waynflete. See WAYNFLETE.

William of Wyckum, an English clergyman of the 12th century, became prior of Lanthony, and chap- lain of Robert de Beutm, bishop of Hereford. After the death of that prelate (1149) he wrote a sketch of his life, which is published in Wharton's Anglia Sacra, ii, 293 sq. See Allibone, Dict. of Brit. and Amer. Au- thors, s. v.

William of Wykeham. See WYKHEAM.

Williams, Charles S., D.D., a clergyman of the Protestant Episcopal Church, was born June 11, 1791, in the County of Kent, in England; was graduated (B. A. Rev. Williams was rector of a parish). He entered the army when young, and passed some time in India; on his return from India he joined the Dragoons, and served with them during a part of the Peninsula War. At Toulouse he was severely wounded, and was left all night among the dead and dying on the field. He graduated at St. John's College, Cambridge, and was ordained in 1820. In 1823 he came to the United States, and became rector of St. John's Church, York, Pa. For about eight years he was president of Baltimore College, having charge, at the same time, of the parish at Elk Run. For the last twelve years of his life he resided in Philadelphia, devoting himself to the cause of education, and officiating almost constantly for his brethren of the clergy. He died there, June 12, 1859. See Amer. Quar. Church Review, 1859, p. 534.

Williams, Daniel, D.D., an eminent English Presbyterian divine, was born at Wrexham, Denbigh- shire, in Wales, but educated in England. He professed the utility of educational advantages seem to have been rather limited, but he was admitted a preacher among the Presbyterians in 1683. To avoid the penalties of the law against Dis- senters, he went to Ireland, where he became chaplain to the countess of Meath. Some time after, he was called to be pastor to a congregation of Dissenters as-
seeming in Wood Street, Dublin, where he continued for nearly twenty years. During the troublous times in the latter end of the reign of James II, he found it necessary to return to London in 1687, where he continued to reside. Here he was often consulted by William III on Irish affairs, and did great service in behalf of many who fled from Ireland. He became pastor of a numerous congregation at Hand Alley, Bishopsgate Street, in 1688, and in 1691 succeeded Richard Baxter as preacher of the Merchants' Lecture at Finsbury Hall, Bromley. On account of claiming in the law the houses, he, with others of the incumbents, withdrew, and established another lecture at Salter's Hall, on the same day and hour. This led to a sharp controversy between the two parties, and a great deal of bitter feeling. He died Jan. 25, 1716. The bulk of his estate he bequeathed to a group of charitable charities. The most important of these charities was the founding of the Red Cross Street Library. He ordered a convenient building to be obtained for the reception of his own library, and the curious collection of Dr. Bates, which he purchased for that purpose. Accordingly, after his death a commodious building was erected (1727) by subscription among the wealthy Dissenters in Red Cross Street, Cripplegate, where the books were deposited, and by subsequent additions the collection has become a considerable one, containing more than 20,000 volumes. It is also a depository for acts and minutes of Nonconformist meetings, manuscripts, and other matters of curiosity or utility. It is here that the Dissenting ministers meet for the transaction of all business relating to the general body. Registrars of births of the children of Dissenters are also kept here with accuracy, and have been allowed equal validity in courts of law with parochial registers. Dr. Williams was the author of, The Vanity of Childhood and Youth; in Several Sermons (1691): — Gospel Truth Stated and Vindicated (1692): — A Defence of Gospel Truth (1688): — Man Made Righteous by Christ's Obedience; Sermons (1694): — Discourses on Several Important Subjects (1728-50); — Tractatus Selecti, ex Anglica Latina Versi, et Testamenti sui Jussu Editti (1760).

Williams, Eliphalet, D.D., a Congregational minister, son of Solomon Williams, D.D., of Lebanon, Conn., was born Feb. 21, 1727. He graduated at Yale College in 1748; was ordained minister in East Hartford in March, 1748; and died June 29, 1808. See Sprague, Annals of the Amer. Pulpit, i, 923.

Williams, Griffith, D.D., an English divine, was born at Carnarvon, in North Wales, about 1589. He entered Oxford University in 1603, but two years later entered Jesus College, Cambridge, where he graduated and entered into holy orders. He became curate of Hanwell, Middlesex; rector of Foscot, Buckinghamshire; and lecturer of St. Peter's, Cheapside, London; was suspended by the bishop of London in 1615; received the living of Llanbedr, in the diocese of Bangor; became domestic chaplain to the Earl of Montgomery, and tutor to his children; was promoted to be chaplain to the king, and prebendary of Westminster; was instituted dean of Osney, Ireland, in 1621, but was obliged by the breaking out of the Irish Rebellion, in less than a month after taking possession, endured great hardships for many years on account of his attachment to the crown; regained his bishopric at the Restoration, and died at Kilkenny, March 29, 1672. Among his published works are: The Lights of Life by Mr. Griffith Williams (1629) in Sixteen Golden Catechismes (1627) — The True Church (1629) — The Right Way to the Best Religion (1636) — Vindicia Regum (1643) — The Discovery of Mysteries (ed.) — Discourse on the Only Way to Preserve Life (1644) — Jura Majestatis (ed.) — The Great Antichrist Revealed (1660) — Description and Practice of the Four Most Admirable Branches (1665) — The Persecution

Williams, John, 1, D.D., a distinguished English prelate, was born at Ather-Conway, Carnarvonshire, Wales, March 25, 1582. He was admitted to St. John's College, Cambridge, in 1588; graduated there in 1602, and was made fellow for two years; he held holy orders, was appointed to a small living nearbury St. Edmonds', upon the borders of Norfolk; was presented to the rectory of Grafton-Regis, Northamptonshire, in 1611; appointed chaplain to lord Egerton the same year, by whom he was promoted to the rectory of Gratton-Underwood, Northamptonshire, made precentor of Lincoln 1613; rector of Waldgrave, Northamptonshire, in 1614, and between that year and 1617 was made prebendary and residuary in the Church of Lincoln, prebendary of Peterborough, of Hereford, and of St. David's, and secured a sinecure in North Wales. On the accession of Francis Bacon as lord-keeper, he was made justice of the peace for Northamptonshire, and chaplain to the king at the same time; became dean of Salisbury in 1619, and of Westminster in 1620; was made lord-keeper of the great seal of England July 10, 1621, and in the same month was made Lord-Lieutenant of Lincoln as lord-keeper by Charles I in October, 1626; in 1636 convicted of subornation of perjury when tried for betraying the king's secrets, fined £10,000, suspended from his offices and imprisoned in the Tower, where he remained three years and six months; was released, and restored his seat in the House of Lords in 1639, and by command of the king had all the records of proceedings against him cancelled; became archbishop of York in 1641; retired to his estate at Ather-Conway in July, 1642, and fortified Conway Castle for the king. After the death of Charles I, he spent the remainder of his days in sorrow, study, and devotion, and died March 25, 1650. He published several Sermons, and The Holy Table, Name and Thing more Anciendy, Properly, and Literally Used under the New Testament than that of Allar (1657).

Williams, John, 2, D.D., an eminent English divine, was born in Northamptonshire in 1634. He entered as a commoner at Magdalen College, Oxford, in 1651, where he completed his degrees in arts, and was ordained in 1658; was made rector of St. Mildred-in-the-Poultry, London, in 1673; prebendary of Reyemere, in St. Paul's, in 1688; became chaplain to William and Mary after the Revolution; was preferred to a prebend of Canterbury; was consecrated bishop of London December 16, 1696, where he died in 1709. He was the author of, Hist. of the Gunpowder Treason (1679) — Brief Exposition of the Church Catechism (1690) — Twelve Sermons Preached at the Boyce Lectures concerning the Possibility, Necessity, and Certainty of Divine Revelation (1699-1700); and other works, including Sermons.

Williams, John, 8, LL.D., a Socinian minister, was born at Lampeter, Cardiganshire, Wales, in 1728. He was pastor of a Church at Sydenham, Kent, from 1758 until his death, at Islington, in 1798. He published, A Concordance to the Greek Testament, with the English Version to each Word, etc. (1677) — Thoughts on Subscription to the Thirty-nine Articles: Free Inquiry into the Authenticity of the First and Second Chapters of St. Matthew's Gospel (1717) — Clerical Reform (1792); and other works, including Sermons.

Williams, Joshua, D.D., a Presbyterian divine, was born in Chester County, Pa., Aug. 8, 1787. He pursued his preparatory studies in Gettysburg; graduated at Dickinson College in 1788; studied theology privately; was licensed to preach by the Presbyterian Church Oct. 4, 1787, and was ordained and installed pastor of the united congregations of Perry and Paxton, Oct. 2, 1789. In April, 1802, he became pastor of the Congregation of Big Spring, where he continued to labor for twenty-seven years, during which period, as appears from his church register, he admitted to communion
four hundred and twenty-six persons. In April, 1829, on account of bodily infirmities, he resigned his charge, but continued to preach as his health permitted and opportunity offered until his death, Aug. 21, 1838. Dr. Williams was a man of vigorous and comprehensive mind, learned and able in his profession; as a preacher, some of the most marked and prominent characteristics of his ministration, besides occasional contributions to periodicals, was a _Sermon on the Sinner's Inability._ See Sprague, _Annals of the Amer. Pulpit_, iv, 186; Nevin, _Churches of the Valley_: Allibone, _Dict. of Brit. and Amer. Authors_, s. v. (J. L. S.)

**Williams, Nathan, D.D., a Congregational minister, son of Stephen Williams, D.D., of Lebanon, Mass., was born Oct. 28, 1735. He graduated at Yale College in 1755; was ordained pastor of the Church in Tolland, Conn., April 30, 1760; from 1788 to 1808 was a member of the Corporation of Yale College, and died April 25, 1829. He published, _A Dialogue on Christian Baptism and Discipline_ (2d ed. 1792). See Sprague, _Annals of the Amer. Pulpit_, i, 297.

**Williams, Peter, D.D., an English clergyman, was born during the latter part of the 18th century, and became archdeacon of Merioneth in 1802. He published, _A Short Vindication of the Established Church_ (1803) — _First Book of Homer's Iliad, Translated into Blank Verse_ (1806) — _Remarks on British Independence of Commerce_ (1812) — _Remarks on the Recognition of Each Other in the Future State_ (1809).

**Williams, Philip, D.D., an English clergyman of the 18th century, became a fellow of St. John's College, Cambridge, in 1730, and was rector of Starston and Barrow. He published a volume of _Observations_ (1738), some controversial works, and a number of _Sermons_.

**Williams, Robert, was one of the earliest Methodist ministers in America. Previous to his leaving England, Mr. Wesley had given him permission to preach under the direction of the regular ministers. He first labored for a time in New York City. Under date of Nov. 1, 1769, Mr. Pilmour, then in Philadelphia, writes, "Robert Williams called, on his way from New York to Maryland. He came over about business, and being a local preacher in England, Mr. Wesley gave him a license to preach, and justifies the ordination of irregular preachers." He afterwards speaks of him as "very sincere and zealous." Williams spent the greater part of his time in Maryland, where he was instrumental in commencing a great work. In 1772 he passed south into Virginia, where his labors were greatly blessed. He died July 1775; that same year he died. Bishop Asbury says of him, "He has been a very useful, laborious man, and the Lord gave him many souls to his ministry. Perhaps no man in America has ministered to awakening so many souls as God has awakened by him." It has been said of him that "he was the first travelling preacher in America that married, located, and died." See Bangs, _Hist. of the M., E. Church_, i, 73, 76, 89; Simpson, _Cyclopedia of Methodist_, s. v.; Sprague, _Annals of the Amer. Pulpit_, vii, 11.

**Williams, Roger, the founder of the colony of Rhode Island, was born at Conway Cayo, Wales, in 1599. In his youth he went to London, and attracted the attention of Sir Edward Coke by his short-hand notes of sermons and matriculated pensioner at Chamberton, and was sent by him to Sutton's Hospital (now the Charterhouse School) in 1621. On April 30, 1624, he entered Jesus College, Oxford, where he obtained an exhibition. According to some authorities, he was admitted to Pembroke College, Cambridge, Jan. 29, 1623, and matriculated June 15, 1624, graduating A.B. in January, 1627. He studied Latin, Greek, Hebrew, French, and Dutch, and took orders in the Church of England. He soon, however, became an extreme Puritan, with tendencies towards the views of the Baptists, who were rapidly rising in England at that time. To avoid the persecution then rife in his own country, he emigrated to New England, arriving at Boston Feb. 5, 1631, accompanied by his wife, Mary. He refused to join the congregation at Boston, because the people would not make public declaration of their repentance for having been in communion with the Church of England. He thereupon resolved to become the assistant to pastor Skelton; but the general court remonstrated against his settlement there, on account of his attitude towards the Boston congregation; and, further, that he "had declared his opinion that the magistrate might not punish Sabbath-breaking and other crimes, because it was contrary to the first table of the law. His ministry at Salem was brief. Before the close of the summer, persecution drove him to Plymouth, where for two years he was assistant to the pastor, Ralph Smith. At the close of this period he was invited to return to Salem as assistant to Skelton, and, after the latter's death, became pastor. In a short time he had very generally indoctrinated the people with his peculiar views. In the autumn of 1635 the general court banished him from the colony, with orders to depart within six weeks, because he had called in question the authority of magistrates in respect to the liberty of conscience, the liberty of the king to appropriate and grant the lands of the Indians without purchase, and the other to the right of the civil power to impose faith and worship. On the first of these questions he had written a paper in which he defended the right of the natives to the soil; but on the interference of the court of the Massachusetts nation, and consented to the burning of the MS. when they were somewhat more leniently disposed towards him. But on the other question he reiterated and amplified his views; and when oppressed by his opponents, frankly declared his opinion that the magistrate ought not to interfere to stop a church's preaching, and that office of civil magistrate "extends only to the bodies and goods and outward estates of man." He was the first to assert fully the doctrine of entire liberty of conscience, the right of every person to worship in whatever manner he pleased, or to refrain from public worship altogether without interference on the part of the civil magistrate. In reply to the charges against him, and in defence of his views, he published a pamphlet entitled _Mr. Cotton's Letter Examined and Answered_ (printed in 1644). Winter being at hand, the period for his departure was extended until the spring; but he persisted in preaching, and the people flocked to hear him. It became generally understood that many had decided to go with him to found a new colony not far distant, and the court decided to send him at once to England, regarding him as a dangerous person in the colony. A small vessel was despatched to Salem to convey him away; but he was forewarned, and fled before its arrival. Leaving family and friends in midwinter, he was "for fourteen weeks sorely tossed in a bitter season, not knowing what bread or bed did mean." But he had learned the Indian language while at Plymouth, and was kindly received and so favored by the savages. He selected a site for his new colony on the shores of the Narraganset; and, after purchasing lands on the eastern shore of the Seekonk River, and planting his corn, he learned that he was within the limits of the Plymouth colony. He therefore set out, with five companions, to make new exploration; and went eastward, until he arrived in a canoe to the spot which Williams fixed upon as his home. He said that he had "made covenant of peaceable neighborhood with all the sachems and nations round about;" "and, having, of a sense of God's merciful providence _to them in their distress, called the place Providence, desiring it of God to be an assurance for persons distressed for conscience._ Here he was joined by others who sympathized with his opinions, and even people from England flocked thither in considerable numbers. Roger Williams was the founder, the lawgiver, and the minister of the infant colony, but
he did not aim to be its ruler. His purpose was to found a commonwealth in the form of a pure democracy, where the will of the majority should govern, but only in civil affairs, leaving matters of conscience to be settled between the individual and God. The original constitution, which all were required to sign, was in these words: "We whose names are hereunder, desirous to inhabit the town of Providence, do promise to subject ourselves, in active or passive obedience, to all such orders or agreements as shall be made for the public good of the body, in an orderly way, by the major consent of the present inhabitants, masters of families, incorporated together in a town of fellowship, and others whom they shall admit into the same, only in civil things." With this foundation for a civil government, Williams went on to establish the Church in Rhode Island on his own views. Having adopted the belief in baptism of adults by immersion only, he was baptized by Ezekiel Holliman, a layman, in March, 1639; and then he baptized Holliman and about ten others. He soon entertained doubts as to the validity of the proceeding, and early withdrew from the Church thus organized. The colony remained for some years a pure democracy, transacting its business in town-meetings; but the time was coming for a more systematic organization. Accordingly, in 1648, Williams was sent to England to procure a charter. He was treated with marked respect by the Parliament, but no charter was given. He took up residence on Narragansett Bay, with "full power and authority to govern themselves," was granted. Williams returned the following year, and was received in triumph by the inhabitants of Rhode Island. On his voyage to England he had prepared a Key to the Languages of America, including abstracts of the observations on manners, customs, habits, laws, and religion of the Indian tribes. This work he published in London; and about the same time The Bloody Tenent of Persecution for Cause of Conscience Discussed in a Conference between Truth and Peace (Lond. 1644; new ed. Providence, 1867). On his return to Rhode Island, he refused the office of president of the colony; but when the rights granted by the charter were about to be infringed, he was sent to England again in 1651 to secure a confirmation of the rights of the colony, and was entirely successful. While in England the second time he published The Bloody Tenent of the Puritans: Mr. Knowles, &c., by Colonel Easton, renounced (1652):—"The Harming Ministry None of Christ's; or, A Discourse Touching the Propagating the Gospel of Jesus Christ, etc. (ed.).—And Experiments of Spiritual Life and Health and their Preservatives (ed.). He also began his great work on the Indian languages by the conversational method, and thus became acquainted with John Milton, Oliver Cromwell, Sir Henry Vane, and other persons of eminence. In 1654 he returned to Rhode Island, and was elected president of the colony, which post he held two years and a half. He refused to persecute the Quakers, but met some of their ablest preachers in public debate; and in 1672 published a work in opposition to the sect entitled George Fox Dugg Out of his Burrow, or an Offer of Disputation on Fourteen Proposals, made this Last Summer, 1672 (so called), unto G. Fox, then Planted in Rhode Island in New England, etc. By his constant friendship with the Indians he was of great service to the other colonies; but they refused to remove their ban, or to admit Rhode Island into their league. He died in 1683, and was buried in his family burying-ground, near the spot where he landed. Much was written about Williams, and to this day ten by James D. Knowles (Boston, 1833), William Grammel (ibid. 1846), and Romney Elton (Lond. 1852). His works have been reprinted by the Narragansett Club in 6 vols. folio (Providence, 1866–75). Among the works not already named is Letters from Roger Williams and John Wheelwright, Jr., Governor of Connecticut (Boston, 1863). A tract by Roger Williams, recently discovered, is in the John Carter Brown Library at Providence. See also Dexter, As to Roger Williams and his Punishment from the Massachusetts Plantation, with a Few Further Words concerning the Baptists, Quakers, and Religious Liberty (ibid. 1875); and Arnold, History of Rhode Island (vol. i, 1860).

Williams, Rowland, D.D., an English clergyman, was born at Haikin, Flintshire, Wales, Aug. 16, 1817. He was educated at Eton and at King's College, Cambridge, where he graduated in 1841; was chosen fellow, and in 1842 elected tutor of his college; took orders, and became identified with the review of the Deist at Cambridge and with the Broad Church movement, which was headed by Arnold and Maurice; became vice-principal and professor of Hebrew in the Welsh Theological College of St. David's at Lampeter, and chaplain to the bishop of Llandaff; in 1850; was appointed select preacher to the University of Cambridge in 1854; became vicar of Broad Chalk, Wiltshire, in 1859; was one of the authors of the famous volume of Essays and Reviews (1860), for which act he was prosecuted in the Court of Arches, and condemned in December, 1862, but obtained a reversal of the judgment in February, 1863. He died in 1882, and was buried in the churchyard of St. Peter's, Paddington, thereafter resided at his vicarage in Broad Chalk, near Salisbury, where he died Jan. 18, 1870. His principal published works are, Essays from the Cumbic Lyre:—Account of St. David's College, Lampeter:—Rational Goodness (1855)—Christianity and Hindustan (1856)—Christ and Christians (1859), with the Preface of the Council of 1632.—The Hebrew Prophets Translated Afresh (1868–71, 2 vols.).—Broad Chalk Sermon—Essays on Nature, Medicine, Ation, and Abolition (1867).—Owen Glendower, a Dramatic Biography, and Other Poems (1870):—and Paulins and Lutians (1872), edited by his widow, who also published his Life and Letters (1874).

Williams, Solomon, D.D., a Congregational minister, son of the Rev. William Williams, of Hatfield, Mass., was born June 4, 1700. He graduated at Harvard College in 1719, and was ordained pastor of the Church in Lebanon, Conn., Dec. 5, 1722. In 1746 he became involved in a controversy on the nature of justifying faith with the Rev. Andrew Crowswell, and in 1751 in another with his cousin, the elder Jonathan Edwards, concerning the Christian sacraments. In the extensive revival of 1740 he showed himself a decided friend to Whitefield, whom he repeatedly welcomed to his pulpit. He died Feb. 29, 1776. He published, Substante Observations on the Ordinances of God (1732), by Drowning of Mr. John Woolcard and of the Deliverance of Mr. Samuel Gray (1741).—A Vindication of the Gospel Doctrine of Justification by Faith (1746), being an answer to the Rev. Andrew Crowswell's book, "On Justifying Faith."—The True State of the Question concerning the Qualifications Necessary to Lawful Conunion in the Christian Sacraments (1751), being an answer to the Rev. Jonathan Edwards's "Humble Inquiry," etc.—and several occasional Sermons. See Sprague, Annals of the Amer. Pulpit, i, 821.

Williams, Stephen (1), D.D., a Congregational minister, son of the Rev. John Williams of Deerfield, Mass., was born May 14, 1695. When in his eleventh year, he was taken captive by the Indians, with all his father's family except one brother, and subjected to great suffering on the journey to Canada. Having been separated from the rest of the family, he did not meet any of them again for fourteen months. He was released at a village called Neshow, had been written by his father, and arrived in New England, and arrived in Boston, Mass., Nov. 21, 1705, nearly twenty-one months from the beginning of his captivity. In 1713 he graduated at Harvard College, and then taught school at Hadley for one year. After preaching at Longmeadow for about two years, he was appointed the pastor of the church there, where he was active till 1716. During this period he served as chaplain in the army: at Cape Breton, in 1745, under Sir William Pepperrell; went to
Lake George, in 1755, under Sir William Johnson; and in the year following was under General Washington. He was an important agent in establishing the mission in 1784 among the Housatonic Indians in Stockbridge. He died June 10, 1782. His only publication was A Sermon at the Ordination of John Kep (1772). See Sprague, Annals of the Amer. Pulpit, i, 384.

Williamson, Stephen (b), a Constitutional minister, son of the foregoing, and father of the Rev. Stephen Williams of Fitzwilliam, N. H., was born at Longmead, Mass., Jan. 26, 1722. He graduated at Yale College in 1741, studied theology with his father, was ordained first pastor of Woodstock (West) in 1747, and continued in charge until his death, April 26, 1736. He was a great, able, and learned man, a practical preacher, and much esteemed by his people. See Cong. Quar. 1861, p. 855; Sprague, Annals of the Amer. Pulpit, i, 287.

Williamson, Thomas, D.D., a Methodist Episcopal minister, was born in the city of Durham, England, July 6, 1811. He was converted in 1835, graduated at Hoxton in 1840, joined the British Wesleyan Conference, and was appointed as a missionary in America, three years later; removed to Edinburgh, where he formed a close friendship with the famous Dr. Chalmers, and from thence he removed to the Stockport North Circuit, where he published his defence of the British Wesleyan Conference against the Fly-sheets Vindicated. In 1849 he was appointed to the General Conference of the church in the United States, and furnished his Address to the Methodist societies. In 1852 he was appointed to City Road, London (First Circuit); and in 1854 emigrated to America, joined the Rock River Conference, and was stationed at Indiana Street Church, Chicago, where he continued three years. Mr. Williamson was transferred in 1858 to the Missouri Conference, and was appointed pastor of Ebenezer Church, St. Louis. On the death of the president of the University of Missouri, at Jefferson City, Mr. Williamson was elected to fill the vacancy. Failing health in 1861 caused him to travel East for its restoration. He stopped at Saratoga, and there died the same year. See Minutes of Annual Conference, 1862, p. 5.

Williams, William, called the "Watts of Wales," was born in 1717, in the parish of Llanfair-fawr, Bryn, Carmarthenshire, Wales. His conversion he traced to the preaching of Howell Harris. He left the Established Church at the age of thirty-two, and connected himself with the Methodists, among whom he was recognized as one of their most popular preachers. Gifted with poetical talents of a high order, like Charles Wesley, he consecrated his genius to the cause of his Master. He published the following works: Alleluia (Bris tol, 1745-6, 6 pts.); The Sea of Glass; Visible Fare well; Welcome to Invisibly Things; and A Elegy on Whitefield, dedicated to the countess of Huntingdon. His death occurred in 1791. Mr. Williams was the author of the hymn "O'er the gloomy hills of darkness," etc. His best-known hymn—one that is found in so many collections of hymns—is that commencing with the words "Guide me, O thou great Jehovah." The hymn was at this time translated into Spanish by Bishop Whitefield, who, having read one of William's books with much spiritual satisfaction, persuaded him to prepare a collection of hymns, to be called the Gloria in Excelsis, for especial use in Mr. Whitefield's Orphans' House in America. In this collection appeared the original stanza of "Guide me, O thou great Jehovah." In 1774, two years after its publication in the Gloria in Excelsis, it was republished in England in Mr. Whitefield's collections of hymns. Its rendering from the Welsh into English is attributed to W. Evans, who gives a translation similar to that found in the present collections of hymns. The hymn was taken up by the Cymmrodor Methodists, embodying, as it did, a metrical prayer for God's overcoming strength and victorious deliverance in life's hours of discipline and trial, expressed in truly majestic language, in harmony with a firm religious allegiance and trust, and a lofty experimental faith. It immediately became popular among all denominations of Christians, holding a place in the affecting of the Church with Robinson's "Come, thou Fount of every blessing." The fourth verse is usually omitted:

"Musing on my habitation,
My heart's in the heaven above,
Pule my heart with holy longing—
Come, Lord Jesus, quickly come."Vandike is all 1. See: Lord, I long to be with thee."

See Butzer, Story of the Hymns, p. 30-34. (J. C. S.)

Williamson, Isaac Dowd, D.D., a Universalist clergyman, was born at Pomfret, Vt., April 4, 1807. He had no better early educational advantages than a district school, and learned the clothier's trade; but force of character and thirst for knowledge made amends for lack of external aid, and in 1827 we find him preaching in Springfield. Subsequently he labored as supply in Langdon, N. H.; as pastor, in 1828, at Jeffrey; in 1829 at Albany, N. Y., where he lived seven years, and published his first book, An Argument for Christianity; removed to Poughkeepsie in 1835, to Philadelphia in 1839; to New York city in 1841; to Mobile, Ala., three years later; to Memphis, Tenn., two years later; to Lowell, Mass., in 1850; to Louisville, Ky., in 1851; to Cincinnati, O., in 1853; and in 1856 to Philadelphia, where he spent three years. He died in Cincinnati, Nov. 26, 1856. Dr. Dowd was a man of high and scholarly taste, engaged during his ministerial career as editor and reviser of the Universalist minister of the Gospel Anchor, in Troy, N. Y., in 1880; the Religious Inquirer, in Hartford, Conn.; the Herald and Era, in Louisville, Ky., in 1829; and for ten years was connected with the Star in the West as joint proprietor and editor. Besides the above-named Argument for Christianity, he published An exposition and Defence of Universalism (1840, 1848);—Examination of the Doctrine of Endless Punishment (1847, 1850)——Sermons for the Times and People (1849, 1850);—The Philosophy of Universalism, or Reasons for our Faith (1866, 1869). He was a Universalist to the core; he was a Universalist to the bone. He was essentially a pioneer, empirically a self-made man, a man of strong convictions and robust intellect, and a prominent member of the Odd-fellows' Society. He was logical, sincere, lucid, ingenious, and magnetic. See Universalist Register, 1878, p. 82.

Willibald, Sr., and first bishop of Eichstätt, was a steadfast supporter of Boniface in the work of Christianizing the Germans. He was born about A.D. 700 in England, of noble Saxon parents; and in his third year, during a severe sickness, was dedicated to the service of the Church. In his fifth year abbot Eg bald, of Walthem, undertook his education. In 720 he undertook a pilgrimage to Rome, in company with his father and brother (Wunibald). From Rome he went accompanied by two friends, on a pilgrimage to the Holy Land, which extended over seven years, and exposed him to many dangers and adventurous experiences. On his return he spent ten years in monastic retirement at Monte Cassino (729-739). He then accompanied a new emperor, and it was during this mission that he made the acquaintance of Boniface, whose kinman he was. In 740 he came to Germany, and entered on his apostolic work at Eichstätt. In the same year he was consecrated to the priesthood, and in the following year (Oct. 31 or 22) to the bishopric. In 742 he was present, as bishop of Eichstätt, at a council held by Carloman, duke of the Eastern Franks. But little is known as respects the details of Willibald's activity. Descriptions of his career speak in general terms of the eradication of heathenism, the subduing of the soil, the maintenance of worship at stated times, the regular preaching of the gospel, and the multiplication of convents, under the rule of St. Benedict, in his diocese. His brother Wunibald and his sister Wulburgis came to his assistance, as did other missionaries, and he was thus able to multiply his labors and
extend their area. In 765 he attended a synod at Aitigny, held by Pepin. He attained to a great age, and outlived most of the pupils and companions of Boniface. Reports of the 11th century fix the date of his death on July 7, 781; but a donation to Fulda, from his hand, is dated 786; and it might accordingly be more nearly correct to set his death on that date. The principal source for Willibald's life is the Vita Willibaldi, also entitled Hodeporicum, written by a nun of Heidenheim, who terms herself his kinswoman, and states that she obtained many of the facts she records from his own lips. This Vita was copied in Canisius, Leiden, 1589; and in Bolland, SS. July, ii, 308; and at Magdalen, Acta SS. B. M. iii., ii, 117; and in Falkenstein, Cod. Diplom. Nordgau., p. 445. A second Life is copied in Canisius, ut sup., p. 117; Bollandus, p. 512; and Magdalen, p. 388; which, however, is merely an abridgment of the first. A third Life, which, for no special reason, is usually ascribed to bishop Reginald (died 806), is given by Canisius alone. Abbot Adelbert, of Heidenheim, furnished a brief biography of Willibrord, in connection with a historical sketch of his monastery, in the 12th century; and another was drawn up by bishop Philip of Eichstätt in the 14th century, of which we have copies in Gessner, De Diesis Tetelocharis (Ingolst. 1617). See Retberg, Kirchengesch. Deutschl., ii, 348 sq.; Wright, Biog. Brit. Literat. (Anglo-Saxon Period), p. 335; Herzog, Real-Encyklop. s. v.

Willibrord (or Willibrord). See Willibrord, St., Willis, Henry, one of the early Methodist preachers in America, was a native of Virginia. He entered the ministry in 1779, and was one of the most dominant spirits of the times, energizing, by his irresistible ardor, the work of the Church throughout two thirds of its territory. He labored mightily for the West, as if conscious of its prospective importance in the State and the Church. He filled the following stations: Roanoke, 1779; Mecklenburg, 1780; Talbot, 1781; Dorchester, 1782; New Hope, 1783; Holston, 1784. In 1786 he was in charge as presiding elder of a district, comprehending most of North Carolina; 1786, Charleston, S. C.; 1787, New York city; 1788, presiding elder of New York District; 1789, of a district which extended from Philadelphia to Redstone and Pittsburgh; 1790, located; 1791-95, supervisor in Philadelphia; 1796, he reappears in the minutes of the Conference. John Hagner of this district, and others, testified that he was as about "six feet in stature, slender, a good English scholar, well read, an eloquent man, mighty in the Scriptures, and a most profound and powerful reasoner. He became feeble in the prime of life, retired from the itinerant field, married, and settled on a farm near Frederick County, Md. The Baltimore Conference sat in his parlor in April, 1801." He was the most endeared to Asbury of all the itinerants of that day. See Minutes of Conferences, 1808, p. 157; Stevens, Hist. of the M. E. Church, ii, 51-53, 154, 286, 947; iii, 17, 267; iv, 240; Biddle, History of the M. E. Church of 1780 (L. L. S. iv, 782). Willis, Michael, D.D., LL.D., a minister of the Scotch Presbyterian Free Church, was born in Scotland in 1798. He was ordained and installed pastor of Renfield Presbyterian Free Church, Glasgow, and labored with great success and usefulness for twenty-five years. In 1847 he received a call from Canada West to the pastorate of the Congregational church at Ancaster, Hamilton, and Toronto. He was well known to English Presbyterians, and took a great interest in everything pertaining to the welfare of the Church. In some respects he was peculiar, was regarded as very eccentric, and was quoted for his pungent remarks on the preachers to whom he chanced to listen. Though pointed, his criticisms were not bitter or intended to wound. Fifty-seven years of his life were spent in preaching and teaching. He died at Aberfoyle, Scotland, in September, 1879.

Dr. Willis published a Funeral Sermon, on his father.—A Discourse on Popery (1829)—A Defence of Church Establishment—Biographical and Historical Memoirs.—besides several Pamphlets. See Morgan, Celebrated Canadians (Quebec, 1862, 8vo), p. 465. (W. P. S.)

Willis, Richard, D.D., an English bishop, was born in 1683. He became prebendary of Westminster in 1695; prebendary and dean of Lincoln in 1701; bishop of Gloucester Jan. 16, 1714; bishop of Salisbury in 1721; bishop of Lincoln in 1722; and died in 1731.

He was the author of, The Occasional Paper, in Eight Parts (1697)—Speech in the House of Lords on the Bill against Francis (late), Bishop of Rochester (1723)—and a number of single Sermons.

Willis, Robert, F.R.S., F.G.S., an English clergyman and scientist, was born in London in 1806. He graduated at Caius College, Cambridge, in 1826, and obtained a fellowship, which he subsequently vacated; took orders in the Church of England; was early distinguished for his researches in physical science, particularly in acoustics and the physics of oral language, the philosophy of mechanism and machinery, and the mathematical and philosophical analysis of architecture; became a fellow of the Royal Society April 22, 1830; was appointed Jacksonian professor of natural and experimental philosophy at Cambridge in 1837; made a tour of France, Germany, and Italy for the study of architecture in 1862–5; and became a profound architectural historian. He was a member of many scientific associations, before which he delivered many addresses; invented several philosophical instruments; and died at Cambridge, Feb. 28, 1875. As a lecturer in his own department he was unrivalled. He was the author of numerous works on scientific subjects, among which may be mentioned, Remarks on the Architecture of the Middle Ages, Especially of Italy (1855)—Report of a Survey of the Dilapidated Portions of Hereford Cathedral in the Year 1841—Principles of Mechanism for Students (1841)—Architectural History of Canterbury Cathedral (1845)—Architectural History of Winchester (1846)—Architectural History of Ely Cathedral (1846)—Architectural History of the Holy Sepulchre at Jerusalem (1849)—and Architectural History of Gloucester Abbey (1866).

Willis, Thomas, D.D., an English clergyman of the 17th century. He was educated at St. John’s College, Cambridge; became minister of Kingston-upon-Thames about 1657, and died in 1692. He published, The Key to Knowledge: and several single Sermons (1659–76).

Williston, Seth, D.D., a Presbyterian minister, was born at Suffield, Conn., April 4, 1770. He studied at Dartmouth College, where he graduated in 1791. Having applied himself to the study of theology, he was licensed to preach on Oct. 7, 1795, and employed for some months in supplying, temporarily, several churches in Connecticut. After several years spent as a missionary in Vermont and New York, he was finally, in 1803, installed pastor of the Church of Lisle, N. Y., which he held, however, supplied for the preceding three or four years. Having in 1810, become pastor of the Presbyterian Church at Durham, he remained there eighteen years, when he received a dismission, at his own request, Dec. 22, 1828; and during the rest of his life he preached at various places, chiefly in New York state. After a life remarkable for earnestness and activity, he died at Guilford Centre, Chenango Co., N. Y., March 2, 1851. Dr. Williston published the following volumes: An Address to Parents (1799)—Sermons on Doctrinal and Experimental Religion (1813)—A Vindication of Some of the Most Essential Doctrines of the Reformation (1817)—
Willow is the rendering, in the A. V., of the two following Heb. words:

1. יְרֵב, ēreb (only in the plur. יְרֵבִים, Sept. iring, ἑγροῦ), is apparently a generic term for the willow, like the Arabic gharab. Willows are mentioned in Lev. xxiii, 40, among the trees whose branches were to be used in the construction of booths at the Feast of Tabernacles; in Job xii, 22, as a tree which gave shade to Behemoth ("the hippopotamus"); in Isa. xlv, 4, where it is said that Israel’s offspring should spring up "as willows by the watercourses;" in the Psalm (cxxxi, 2) which so beautifully represents Israel’s sorrow during the time of the Captivity in Babylon—"We hanged our harps upon the willows in the midst thereof." With respect to the tree upon which the captive Israelites hung their harps, there can be no doubt that the weeping willow (Salix Babylonica) is intended. This tree grows abundantly on the banks of the Euphrates, in other parts of Asia as in Palestine (Strand, Flora Palest. No. 556), and also in North Africa. Bochart has endeavored to show (Phaleg, I, viii) that the same country is spoken of, in Isa. xv, 7, as "the Valley of Willows." This, however, is very doubtful. Sprengel (Hist. Roi Herb. i, 18, 270) seems to restrict the ēreb to the Salix Babylonica; but there can scarcely be a doubt that the term is generic, and includes other species of the large family of Salices, which is probably well represented in Palestine and other Bible lands, such as the Salix alba, S. cinerea (osier), S. Aegyptiaca, which latter plant, however, Sprengel identifies with the safaf of Abulfedâ, cited by Celsius (Hierod. ii, 108); but this latter word is probably the same as—

2. פֶּשֶׁל, tsiphtaphâd, which occurs only in Ezek. xviii, 5, "He took also of the seed of the land, and planted it in a fruitful field; he placed it by great waters, and set it as a willow-tree." Celsius, however, thinks that the word means locus planus, planités, although he at the same time gives all the evidence for the willow. First, the rabbins consider it to mean a tree,"et quidem salix," R. Ben Melech says it is "species salicae, Arabicae tsiphtaph dicta;" while “Avicenna hoc tit. dict. tsiphtaph esse chilaf." Travelers also give us similar information. Thus Paul Lucas: "Les Arabes le nomment safaf, qui signifie en Arabe saule." Rauwolf (Travels, i, 9), speaking of the plants he found near Aleppo, remarks, "There is also a peculiar sort of willow-trees called safaâf, etc.; the stems and twigs are long, thin, weak, and of a pale-yellow color; on their twigs here and there are shoots of a span long, like unto the Cypriotish wild fig-trees, which put forth in the spring tender and woolly flowers like unto the blossoms of the poplar-tree, only they are of a more dry- ing quality, of a pale color, and a fragrant smell. The inhabitants pull of these great quantities, and distil a very precious and sweet water out of them." This practice is still continued in Eastern countries as far as Northern India, and was, and probably still is, well known in Egypt. Hasselquist (Trans. p. 499), under the name of safaf, apparently speaks of the same tree; and Forskål (Descript. Plant. p. lxxvi) identifies it with the Salix Aegyptiaca, while he considers the safaf to be the S. Babylonica.

Various uses were no doubt made of willows by the ancient Hebrews, although there does not appear to be any definite allusion to them. The Egyptians used "flat baskets of wickerwork, similar to those made in Cairo at the present day" (Wilkinson, Anc. Egypt. i, 45). Herodotus (i. 194) speaks of boats at Babylon whose framework was of willow; such coracle-shaped boats are represented in the Nineveh sculptures (see Rawlinson, Hierod. i, 268).

Of Biblical willows by far the most interesting is the weeping willow, or willow of Babylon (S. Babylonica). With its long lanceolate, finely serrated, and pointed leaves, with its smooth, slender, purplish, drooping branches, it has in all modern times been the symbol of sorrow. Before the Babylonian Captivity the willow was always associated with feelings of joyful prosperity. "It is remarkable," as Mr. Johns (Forest Trees of Britain, ii, 240) truly says, "for having been in dif-
WILLS

Branch of the Weeping Willow.

frequent ages undeveloped of two directly opposite feelings—at one time being associated with the palm, at another with the cypress." After the Captivity, however, this tree became the emblem of sorrow, and is frequently thus alluded to in the poetry of our own country; and "there can be no doubt," as Mr. Johno continues, "that the dedication of the tree to sorrow is to be traced to the pathetic passage in the Psalms." "The children of Israel," says lady Callcott (Scripture Herbal, p. 583), "still present willows annually in their synagogues, bound up with palm and myrtle, and accompanied with a citron."

Wills. The subject of testamentary disposition is, of course, intimately connected with that of inheritance, and little need be added here to what will be found there. See H 7. Under a system of close inheritance like that of the Jews, the scope for bequest in respect of land was limited by the right of redemption and general re-entry in the Jubilee year. See J 6. V 6. But the law does not forbid bequests by will of such limited interest in land as was consistent with those rights. The case of houses in walled towns was different, and there can be no doubt that they must, in fact, have frequently been bequeathed by will (Lev. xxv, 30). Two instances are recorded in the Old Test., under the law, of testamentary disposition—1. In the case of Abihithaphel (2 Sam. viii, 28); 2. Recommended in the case of Hezekiah (2 Kings xx, 1; Isa. xxxviii, 1); and it may be remarked in both that the word "set in order" (παραστασις; Sept. 7εριτακοαμας; Vulg. dis-PMC) in Rabbinc is a will. See Gesen. The-7auer, p. 1155), marg., "give charge concerning," agrees with the Arabic word "command," which also means "make a will" (Michaels, Laws of Moses, art. 80). Various directions concerning wills will be found in the Mishna, which imply disposition of land (Baba Bathr. viii, 6, 7). See Testament. 

Willson, James McLeod, D.D., an eminent Presbyterian divine, and son of the distinguished divine Rev. James R. Wilson, D.D., was born at the Forks of Trough, near Elizabeth, Allegheny Co., Pa., Nov. 17, 1802. From childhood he was apt in the ac-quisition of learning, and diligent in his studies. His preparatory education was prosecuted under his father's instruction. "So thorough had been his previous training, and so advanced his scholarship, that on entering college he took high rank at once in the senior class." He graduated at Union College, Schenectady, N. Y., in 1829; then spent some years in teaching, first in an academy at Belair, Md., then at the village of Scho-duck, N. Y., and lastly as principal of the High-school in Troy, N. Y.; studied theology until 1834, when he was licensed to preach by the then Southern Presbyterian; and ordained and installed pastor of a distinctive church in Philadelpia, Pa., Nov. 27, 1834, where he labored with great success until 1802. In 1859 he was appointed by the Synod to a professorship in the Theological Seminary, Allegheny City, Pa., a position for which he was emi-nently qualified, and which he filled with great industry and zeal for three successive sessions, while still retaining his pastoral relation to his congregation. In 1862, his pastoral relation was dissolved, and he removed to Alle-geny, where he continued to perform the duties of his professorship, until the day of his death, Aug. 31, 1856. Coincident with his pastoral and professional duties, he performed the amount of other work requisite to the whole power of a man of ordinary gifts. For more than seven-teen years he was sole editor of the Covenant, an able conducted and efficient monthly, and co-editor with Dr. Thomas Sproul for four years more after its union with the Reformed Presbyterian. He was also the author of several treatises, viz.: The Decree (1840):—Civil Mag-nistracy: — Civil Government: —a little treatise on Psephology. Dr. Willson was a diligent, kind, and faith-ful pastor; a plain, logical, and eminently instructive preacher; a successful editor and author; a distinguished theological professor. His controversial powers were of a high order; his knowledge of history was both ex-tensive and accurate. In the Theological Seminary he was in his element. He was an "Israelite indeed, in whom was no guile." His whole life gave evidence of this. See Wilson, Pres. Hist. Almanac, 1867, p. 807.

Willson, James Renwick, D.D., one of the most learned, able, and eloquent divines of the Reform-ed Presbyterian Church in his day, was born near Pitts-burgh, Pa., April 9, 1780. He early gave indications of great mental ability, and, when only twelve years of age, was graduated at Jefferson College, Pa., with first honors, in 1806; was licensed to preach in 1807; and was principal of Bedford, Pa., 1806–15, and of a classical school in Philadelpia for two and a half years. His labors as a teacher were highly successful, some of the most prominent gen-tlemen of the country having been trained by him. In 1817 he became pastor of the congregations of Newburgh and Coldenham, N.Y. At that time Newburgh was noto-rious for its infidelity; but his advent was a new era in the village. The town collected to hear him; it was gradually reformed, and the oldest inhabitants still as-scribe very much to his sermons. In 1828 the congre-gation of Coldenham asked and received all his services until 1830, when he removed to Albany, as pastor of a church there. As early as 1820 he began educating young men for the ministry; in 1822 he began to edit the Evangelical Witness, a monthly magazine, the first ever published by a Covenanter as a distinctive denom-inational magazine: it was discontinued in 1826. He afterwards commenced and continued for two years The Christian Statesman, a small paper, 8vo, of eight pages. In 1831, about the time when the abolition movement began, and also a movement within the Reformed Pres-byterian Church, he began a series of essays in which he took a leading part in all this conflict, and from its earlier appearance had begun the publication of The Albany Quarterly. From 1840 until 1845 he was senior professor in the Reformed Presbyterian Seminary, Alle-gheny, Pa.; from 1845, when the Seminary was re-moved to Cincinnati, O., he was sole professor until
WILLYMOTT, William, LL.D., an English clergyman, was born at Rosyston about 1675. He was admitted a scholar at King's College, Cambridge, in 1692; became usher at Eton; was tutor in King's College; became rector of Milton in 1735; and died in 1787. He published numerous school-books, and Collection of Devotions for the Alar, etc. (1720). See Chalmers, Bio. Dict. s. v.

Wilmer, William H., D.D., a Protestant Episcopalian clergyman, was born in Kent County, Md., Oct. 29, 1782. He graduated at Washington College, Md., and immediately engaged in mercantile pursuits, but eventually abandoned them to study theology. In 1806 he was ordained, and then appointed to Chester Parish, Md. The convention of the diocese named him one of the standing committee in 1811. The following year he received a call to St. Paul's Church, Alexandria, Va., and, after his removal to this charge, became one of the standing committee of the diocese of Virginia. He was one of the Virginians in 1819 at the Education Society of the District of Columbia, designed to aid theological students at the seminary in Fairfax County. Until his removal from Alexandria he was president of this association. When St. John's Church in Washington, D.C., was erected in 1816 he was chosen its first minister, but did not accept the office, though he supplied the Church until a rector was secured. Of the Washington Theological Repertory, a periodical begun in 1819, he was one of the editors until 1826. After removing to Virginia, until the close of his life, he was a delegate of every general convention; and was presiding clerk of the Court of Chancery and Lay Deputies in 1820, 1821, 1823, and 1826. When the Theological Seminary of Virginia opened its sessions in Alexandria in 1825, he became professor of systematic theology, ecclesiastical history, and church polity. In the spring of 1826 he was chosen assistant rector to bishop Moore, in the Monumental Church at Richmond, Va., but was induced by the friends of the seminary to decline the call. A few months after, however, he was elected president of William and Mary College, and rector of the Church at Williamsburg. Before the expiration of a year from the time of his entrance upon these duties he died there July 4, 1824. His death, it was said, was due to great simplicity; and although his manner was not considered oratorical, it was fervent. See Sprague, Annals of the Amer. Pulpit, v. 515.

Wilna, Elijah, also called the Pious (יוסף), was born in 1720 at Selz, near Brisk, in Poland. His natural endowments were so extraordinary that when eleven years of age he was not only a thorough Hebraist, but unrivalled in the knowledge of the traditions of the rabbinical school, of astronomy, geometry, grammar, etc.; and at the age of thirteen (1733) was appealed to as a great authority and teacher. In addition to his marvellous native powers, he possessed a real love of learning and great assiduity, as well as an independent fortune, and lived till 1797. Like Mendes Pinto and Joseph. Wilna was laboring to produce a reformation in Poland with the special purpose to check the mischief wrought in the Jewish community by the Chasidim, who at his time had become very powerful. Wilna's writings are very numerous. Up to the year 1790 he had written the prodigious number of sixty volumes, of which four appeared between 1802 and 1854. We mention the following: Commentary on the Order Zeraim (Lemberg, 1797, and often; last ed. Steitlin, 1860) — Commentary on the Order Toharoth (Brunn, 1802, and often; last ed. Steitlin, 1860) — Text-critical Glosses on the Mechilta (Wilna, 1844) — Critical Notes on the Babylonian Talmud (Vienna, 1807, and often) — Critical Notes on the Pirke de R. Eliezer (Warsaw, 1854) — Critical Notes on the Pesikta (Breslau, 1851) — Scholiar to the Greater and Lesser Seder Olam (Wilna, 1846) — Glosses on the Thirty-two Hermeneutical Rules of R. Joseph (Sklov, 1808) — The Mante de Eliazh, a commentary on the Pentateuch (first printed in the Pentateuch edition published at Dobrown, 1804, and again at Halberstadt, 1859-60) — A Commentary on Isa. i-ix and Habakkuk (Wilna, 1820; 2d ed. ibid. 1843, edited and supplemented by his grandson Jacob Moses of Slovin) — A Commentary on Jonah (ibid. 1860) — A Commentary on Proverbs (Sklov, 1789, and others) — A Commentary on Job i-ii (Warsaw, 1854) — A Commentary on the Song of Songs (Prague, 1811; Warsaw, 1842) — A Commentary on the Chronicles (Wilna, 1820; 2d ed. ibid. 1848) — A Commentary on the Book of Jezira (Grodnin, 1806) — A Commentary on the Zohar (Wilna, 1810) — A Hebrew Grammar (Sklov, 1833) — A Description of Palestine, and a Treatise on the Solomonic Temple (Sklov, 1802, and often) — A Commentary on the Third or Essexi Temple (Berlin, 1822). See Fürst, Bibl. Jud. iii, 516-521; Jost, Gesch. d. Judenth. u. s. sektes. iii, 248 sq.; Kitto, Cyclop. c. v.; Grätz, Gesch. d. Juden, xi, 118 sq.; Heschel, יוסי והזדיק אייל (Wilna, 1856); Finn, יוסי והזדיק אייל (containing a history of the congregation of Wilna, biographies of its rabbins, etc. [ibid. 1860]), p. 133 sq. (B. P.)

Wilson, Adam, D.D., a Baptist minister, was born at Tophams, Me., Feb. 3, 1794. He was a graduate of Bowdoin College in the class of 1819, and during his freshman year he joined the newly constituted Baptist Church in his native town. He studied theology with Rev. Dr. Stoughton, of Philadelphia, and was ordained in 1820. After preaching some months he was settled as pastor at Wiscasset, Me. His special vocation seemed to be rather as a stated supply of churches, and in this capacity he served in various places in New England, some denominational paper having been started in Portland, Me., the Zion's Advocate, he became its editor and proprietor, conducting it with marked ability, and making it exceedingly useful in promoting the interests of the Baptist denomination in his native state. The last years of his life were spent in Waterville, Me., of the college in which place he was a trustee for forty years. His death occurred at Waterville, Jan. 16, 1871. "A man of energy and industry, of decided character and marked wisdom and discretion, and of genial disposition, he ever had the respect, confidence, and affection of the community whose interests he espoused, and was eminently a good man." See Necrology of Bowdoin College. (J. C. S.)

Wilson, Bird, D.D., LL.D., a Protestant Episcopal clergyman, was born at Carlyle, Pa., in 1777. He graduated at Philadelphia College in 1792; studied law, and became president—judge of the Court of Common Pleas for the seventh Circuit of Pennsylvania in 1802; was ordained pastor in the Paterson Presbyterian church in 1819; was rector of St. John's Church, Norristown, Pa., from 1819 to 1821; professor of systematic divinity in the Episcopal General Theological Seminary in New York from 1821 to 1850, and emeritus professor from 1860 until his death, April 14, 1869. He published Memoirs of the Life of the Right Rev. William White, Bishop of the Protestant Episcopal Church in the state

Wilson, Christopher, D.D., an English clergyman, in 1714, became prebendary of London in 1745, of Westminster in 1748, and bishop of Bristol in 1783. He died in 1792. His publications consist of a few single sermons.

Wilson, Daniel, D.D., a colonial bishop of the Church of England, was born in Spitalfields, London, in 1727. Destined by his parents for trade, he was apprenticed at fourteen to his father's partner. He was a only boy; but in 1797 he was converted, and determined to abandon trade. In 1798 he entered St. Edward's Hall, Oxford, where he graduated A.B. in 1802, and A.M. in 1804. He had previously been ordained in 1801, and began his ministry in that year as curate to Mr. Cecil in Chobham. "In 1806 he was appointed to a tutorship at Oxford, where he remained for about eight years and a half, during which time he was first curate of Worton, and then of St. John's Chapel, London, where he remained until the year 1824. He then became vicar of Islington, discharging the duties of his station until 1828, when he was elected to the see of Dr. Top¬ner, bishop of Calcutta; he was appointed his successor, and from that time to his death, in 1858, he was devoted to the arduous and indefatigable labors for the promotion of Christianity in India, which have made his name conspicuous in the history of missions. Bishop Wilson was a man of studies, until he became pastor, of the little respect for forms or ceremonies, compared with inward experience; destitute of the elegant culture and graceful address of Heber, one of his most distinguished predecessors, he was stern in purpose and explicit in speech. He knew that the discharge of duty was almost without a parallel. Social in his disposition, fond of conversation, and exercising a generous hospitality, he appears to have had few attachments and intimacies.

Free from worldliness, from every trace of self-indulgence, from all duplicity and guile, he found his highest glory in the progress of the faith; and in his zeal, courage, firmness, and self-devotion, must be regarded as a model of the missionary bishop." In theology he belonged to the evangelical party of the Church of England — the earnest school of Newton, Hill, and Celic. He died at Calcutta, Jan. 2, 1858. A copious biography is furnished in Bateman's Life of Bishop Wilson. (London, 1859.) Besides occasional sermons, charges, etc., he published Sermons (4th ed. ibid. 1826, 8vo) — Evidences of Christianity (4th ed. ibid. 1841, 2 vols. 12mo) — Divine Authority of the Lord's Day (ibid. 1851, 12mo; 8d ed. 1840) — Sermons Preached in India (ibid. 1858, 8vo) — Lectures on Colossians (ibid. 1845, 8vo) — Our Ten (Continued (1825, 2 vols. 8vo). See Life, by Bateman; London Rev. July, 1860, p. 470; Amer. Ch. Rev. 1858, ii, 177.

Wilson, Henry Rowan, D.D., a Presbyterian divine, was born near Gettysburg, Adams Co., Pa., Aug. 7, 1780. He pursued his preparatory course in a classical school in the neighborhood; graduated at Dickinson College in 1798; studied theology privately; was licensed to preach by the Presbytery of Carlisle in 1801; and was ordained and installed pastor of the congregations at Bellefonte and at Lock Run, Centre Co., Pa., in 1802. In 1806 he was called to the professorship of languages in Dickinson College, which position he held for about ten years, until the death of his predecessor, September 1816. In May, 1824, he was installed pastor of the Church in Shippenburg; in 1838 he accepted the general agency of the Board of Publication in the Presbyterian Church; in 1842 he became pastor of the Church at Nesbitt, Hartsdale, Bucks Co., Pa., where he continued till October, 1848, when, at his own request, the pastoral relation was dissolved. He died March 22, 1849. Dr. Wilson was a man of strong mind; an able, energetic, and popular preacher; "his record is on high." See Sprague, Annals of the Amer. Pulpit, iv, 806; Nevin, Churches of the Valley. (G. L. S.)

Wilson, Hugh Nesbitt, D.D., a Presbyterian minister, was born at Elizabeth, N. J., May 7, 1813. He early felt the power of religion and united with the Second Presbyterian Church of Elizabeth at about fifteen years of age. He graduated at the College of New Jersey in the class of 1830, and, after teaching for a short time in Trenton, N. J., entered Princeton Theological Seminary. After taking a full course of study, he graduated in 1834. During the years 1833–35, he held the place of tutor in the college. As an instructor, he was faithful, thorough, and able. His manners were gentle, winning, and most agreeable, and he always commanded the unbounded respect as well as the affection of the students. He was licensed by the Presbytery of Elizabethtown, April 23, 1835, and ordained as an evangelist by the same Presbytery Oct. 7, in the same year. His first field of labor was on Long Island, where he began to supply the Church at Southampton in September, 1835, but soon after he re¬ceived a call to become a regular pastor on Long Island. He was installed June 29, 1836. Here he had a long, useful, and happy pastorate of nearly sixteen years. His labors were largely blessed in gathering many souls into the Church, and he enjoyed the unbounded love of an attached people. For reasons connected with his health he removed from Long Island on April 13, 1852, and was immediately afterwards settled at Hackettstown, N. J. There he was installed June 23, 1852, and labored six years with great acceptance; but, having received a call to the Second Reformed (Dutch) Church of New Bruns¬wick, N. J., he resigned his charge at Hackettstown May 1, 1858, and was installed at New Brunswick May 27, in the same year. After laboring at the latter place four years, he resigned this charge in May, 1862. It is not often that a minister is invited back in later life to serve the congregation which enjoyed his first ministry. This happened to Dr. Wilson. By leaving New Brunswick, he was invited to supply for a time the Church at Southampton, which he began to do in August, 1863. In the next year he received a regular call, and was again installed as pastor on Sept. 28, 1864. But, after three years, his health, which had for a time promised to return from strength, hopelessly failed, and he resigned May 1, 1867, and in June of the same year he removed to Germantown, near Philadelphia. Here, in an extremely infirm and disabled condition, but patient and trustful, he continued to reside until his death, which occurred June 4, 1878. Dr. Wilson was a director in Princeton Seminary from 1841, until he resigned in 1858, on entering another denomination. He was, in the truest sense of the word, a Christian gentleman; was a fine classical scholar and a man of extensive reading. As a preacher, he was earnest, affectionate, instructive, and popular. The blessing of God attended his labors in every place where he was settled. See Corwin, Manual of the Ref. Church, s. v. (W. P. S.)

Wilson, James D.D., a bishop of the Church of Ireland, was a native of Dublin, and a student of Trinity College, from which he received his degree of A.M. in 1809. He occupied the post of examining chaplain to Dr. Walsh, a bishop of Dublin, when consecrated bishop of Cork in 1848. He died at Cork, Jan. 5, 1857, aged seventy-five years. His title at the time of his death was bishop of Cork, Cloyne, and Ross. See Amer. Quar. Church Rev. 1857, p. 149.

Wilson, James Patriot, D.D., a Presbyterian divine, was born at Lewes, Sussex Co., Del., Feb. 21, 1789. He graduated with high honor at the University of Pennsylvania in 1798, and was admitted to the bar in 1799; licensed to preach by the Presbytery of Lewes in 1804, and in the same year was ordained
and installed as pastor of the united congregations of Lewes, Cool Spring, and Indian River. In 1800 he accepted the pastoral charge of the First Presbyterian Church in Philadelphia, where he remained until he resigned in 1830. He died Dec. 9, 1830. Dr. Wilson was a profound thinker and a learned preacher of the Gospel. He published, "Lectures upon Some of the Paradoxes of the Roman Catholic Church," 8vo;—"An Easy Introduction to Hebrew" (Phila, 1812, 8vo; 1817, 8vo);—"An Essay on Grammar" (1817, 8vo; Lond. 1840, 18mo);—Common Objections to Christianity (Phila, 1829, 12mo);—The Hope of Immortality (1829, 12mo).—A Free Conservation on the Unbearable Sin (Philadelphia, 1829) a series of Gospemvtrical Lectures;—Liturgial Considerations (1833)—also many single sermons and pamphlets. He edited Sermons of the Rev. John Evening, D.D., with a Life (Easton, 1812, 8vo);—Ridgley's Body of Divinity, with Notes (1814). See Sprague, Annales of the Amer. Pulipt, iv, 385; Allibone, Dict. of Brit. and Amer. Authors, s. v.; Anecd. Mag. xi, 177. (J. L. S.)

Wilson, John, D.D., a missionary of the Scotch Free Church to Bombay. Though not so widely known as Dr. Duff, he was a kindred spirit. His influence had become very great in India, where he spent forty-eight years of missionary toil. While at home a short time, he was made moderator of the General Assembly, and he returned to India where to do him honor. He returned to India and assumed his labors, continuing in vigorous health until a few months before his death, which occurred in Bombay in 1875. See Presbyterian, Jan. 1, 1876. (W. P. S.)

Wilson, John Makemee, D.D., a Presbyterian divinity, was born in Mecklenburg County, N. C., in 1769. He graduated with the highest honor at Hampden Sidney College in 1791; studied theology privately under the direction of the Rev. James Hall, D.D.; was licensed to preach by the Presbytery of Orange, N. C., in 1793, and immediately after was sent by the Commission of Synod on a missionary tour through the counties in the lower part of the state. He was ordained in 1795, and continued in this mission work until 1801, when he accepted a call from the congregations of Rocky River and Philadelphia. In 1812 he opened a school especially for the accommodation of the young men of his charge who wished to devote themselves to the ministry; this school continued for thirty years. Twenty-five of his pupils became ministers of the Gospel. He died July 30, 1831. Dr. Wilson possessed a strong, penetrating, and well-cultivated mind. As a member of the Judicatories of the Church, no man of his day was held in higher repute. He preached the Gospel with great fidelity and fervency, and with strong faith in the spirit of God to give it effect. He published, a Sermon (1804)—Sermon (1811)—and an Appendix to a work on psalmody by the Rev. Dr. Ruffner, of Virginia. See Sprague, Annales of the Amer. Pulipt, iv, 90; Foote, Sketches of North Carolina; Allibone, Dict. of Brit. and Amer. Authors, s. v. (J. L. S.)

Wilson, Joshua Lazoey, D.D., a Presbyterian divinity, was born in Bedford County, Va., Sept. 22, 1774, and in the fall of 1781 removed to the neighborhood of Danville, Ky., with his mother and stepfather, John Templan, father of Terah Templan. He was brought up to the trade of a blacksmith, and had no education beyond what his mother gave him till he was twenty-two years old. At that period he was converted. He soon after commenced the study of law, but abandoned it for theology; was licensed to preach in 1802, and in 1804 was ordained pastor of Bardstown and Big Spring churches, Ky. In 1806 he sat as a member of the Commission of Synod in the Cumberland difficulties. In 1808 he became pastor of the First Presbyterian Church in Cincinnati, where he remained for thirty-eight years, part of the time teaching a classical school. In the great controversy which divided the Presbyterian Church in 1837 he bore an active and prominent part. He died Aug. 14, 1846. Dr. Wilson was a self-educated man, of unbending integrity, candor, and conscientiousness. For thirty-eight years he was at the head of every social, moral, and intellectual enterprise of the day in Cincinnati, and to his personal influence Cincinnati College is largely indebted for its existence and prosperity. He published "Discourses and Sermons" (1811), and a number of sermons and theological pamphlets. See Sprague, Annales of the Amer. Pulipt, iv, 308; Allibone, Dict. of Brit. and Amer. Authors, s. v.; Davidson, Hist. of the Presb. Church in Kentucky, p. 354—366. (J. L. S.)

Wilson, Matthew, D.D., eminent as a Presbyterian, a physician, and a teacher, was born in Chester County, Pa., Jan. 15, 1781. He received his education in an academy in New London, Pa., studied theology privately, was licensed to preach in April, 1754, ordained in October, 1755, and installed pastor of the congregations at Lewes and Cool Spring, Del., in April, 1756. He was regularly bred to the medical profession, and few physicians of his day manifested more medical skill and learning. He died March 30, 1790. Dr. Wilson was an instructive and persuasive preacher; learned, pious, patriotic, and benevolent in an eminent degree. He contributed medical papers to Aikens's Amer. Mag. 1775, and Carey's Amer. Mag. 1783, vol. iv, and a treatise on the Asmetics of Surgery. In the Trans. Amer. Soc. vol. iii; and left prepared for the press (never published) A Therapeutic Alphabet. See Thacher, Amer. Med. Biog. ii, 197; Sprague, Annales of the Amer. Pulipt, iii, 175; Allibone, Dict. of Brit. and Amer. Authors, s. v. (J. L. S.)

Wilson, Robert, G., D.D., a Presbyterian divinity, was born in Lincoln County, N. C., Dec. 50, 1768. He pursued his preparation for the ministry and studied at Salisbury, N. C.; graduated at Dickinson College in 1790; studied theology privately; was licensed to preach April 16, 1798, by the Presbytery of South Carolina; and was ordained and installed pastor of Upper Long Canoe Church, in Abbeville District, May 22, 1794. He was offered a professorship in South Carolina College, and was also invited to become principal of an academy in Augusta, Ga.; but he declined these offers, and accepted, in 1805, a call to become pastor of a small Church, then lately organized, in Chillicothe, O., where he remained nineteen years, greatly beloved by his people and signalized by laudable labor. In 1824 he resigned his charge by advice of the presbytery, and accepted an invitation to the presidency of the Ohio University, at Athens, over which he continued to preside until 1839, when, on account of the increasing infirmities of age, he resigned the office, returned to Chillicothe, and engaged to write a stated supply for the Union Church. He died April 17, 1851. Dr. Wilson was an instructive preacher. He excelled as a member of the judicatories of the Church. In no situation, however, in which he was placed were the energies of his mind brought into more vigorous and effective exercise than in the presidency of Ohio University. When he entered upon that office, the institution was greatly depressed; but he gave it to the whole power of his vigorous mind, and his success was indicated within a few years by a very considerable increase of both funds and students. He published, three sermons (1817, 1829, 1839), and the First Preacher (1833)—and an Address to the Graduating Class of Ohio University (1836). See Sprague, Annales of the Amer. Pulipt, iv, 122; Foote, Sketches of North Carolina; Allibone, Dict. of Brit. and Amer. Authors, s. v. (J. L. S.)

Wilson, Sir Thomas, (L.L.D.), a statesman and divine of the reign of queen Elizabeth, was born at Stro- key, about 1524, in Lincolnshire, and was educated at Eton and at King's College, Cambridge, where he graduated in 1546. He took orders in the Church of England; became tutor to the two sons of Charles Brandon, duke
WILSON 1008

of Suffolk, by Mary, ex-queen of France, but both of his pupils soon died; withdrew to the Continent on the accession of Henry VIII in 1509, was imprisoned by the Inquisition at Rome on account of heresies alleged to be contained in his LOGIC and RHETORIC, and was put to the torture; obtained his liberty at the death of pope Paul IV in 1555, in consequence of a fire which caused the populace to break open the doors and allow the prisoners to escape; returned to England, and became private secretary to queen Elizabeth in 1558: was appointed one of the masters of requests, and master of St. Katherine's Hospital, near the Tower; went as envoy to the Netherlands in 1576; became secretary of state and colleague of Sir Thomas Walsingham in 1577; was made dean of Durham in 1579; and died in London, June 16, 1581. He published a Latin Biography of his two pupils, Henry and Charles Brandon (1551) — The Rule of Reason, Containing the Arts of Logique set forth in English (ed.) — The Arte of Rhetorike, for the Use of all Such as are Students of Elocution (1558) — The Three Orations of Demosthene, etc. (1570) — A Discourse upon Usage by Waye of Dialogue and Oracions, etc. (1572). See Strype, Annals; and Chalmers, Biog. Dict. s. v.

Wilson, Thomas (2), D.D., LL.D., a Church of England divine, was born at Burton, Cheshire, Dec. 20, 1663. Little is known of his early life. He was educated at Chester and at Trinity College, Dublin, quitting the university in 1686, and receiving an appointment to Winchester, Lancashire. In 1692 he was ordained priest, and became domestic chaplain to the earl of Derby, and tutor to his son; and in 1726 entered upon his duties as bishop of Sodor and Man, in which he remained faithful till death, 1755. Bishop Wilson was remarkable for his humility, his conscientiousness, and his devotedness to Christian duty. He was a man of prayer and deep piety. See Christian Observer, 1820, p. 568, 713, 785; Church of England Magazine, 1820, p. 245; and Christian Remembrancer, 1829, p. 729.

Wilson, Thomas (3), D.D., an English divine, son of bishop Thomas, was born at Kirk Michael, in the Isle of Man, Aug. 24, 1703. He was educated at Christ Church, Oxford, where he graduated A.M., Dec. 16, 1727: became prebendary of Westminster in 1743: was forty-six years rector of St. Stephen's, Wallbrook; and died at Alford House, Bath, April 15, 1784. He published, Distilled Liquors the Bone of the Nation: — Review of the Project for Building a New Square at Westminster (1757): — The Ornaments of the Churches Considered, etc. (1716).

WIMPINA, Konrad (really Kock; for he adopted the name Wimpina from the town of Wimpfen, his father's native place), a scholastic theologian and defender of Tetzl, the indulgence peddler, was born at Buchen, or Buchheim, in the Oden forest, A.D. 1459 or 1460. He was educated at Leipsic, and held a professorship in that university. In 1592 he became licentiate, and in 1508 doctor of theology. Envy charged him with holding heterodox views at this time, but he succeeded in repelling the charge before the archbishop of Magdeburg. In 1566 he, in his turn, assailed Martin Folichus with a charge of heterodoxy, because that writer had characterized scholastic speculations as useless, and had recommended philosophical studies as possessing a higher value for theology. Wimpina was associated with the founding of the University of Wittenberg, and immediately afterwards was made professor of theology and rector in the University of Frankfort-on-the-Oder. On Luther's promulgation of his theses against indulgences, Wimpina assumed the defence of Tetzl. Two dispu-

tations in Tetzl's favor appeared in 1517, which were generally credited to Wimpina, and which were chiefly remarkable as postulating a distinction between punitive and reformatory punishments in connection with the theory of indulgences. In 1580 Wimpina attended the Diet at Augsburg, in the character of associate author of the Confutation of the Augsburg Confession, and also as a member of the commission appointed to effect a reconciliation of parties with respect to points in dispute. He died, either May 17 or June 16, 1581, in the monastery of Amorbach.

Litterature. — Gieseler, Kirchengegesch. vol. iii; Léschner, Reform, Acta und Documenta (Leips., 1720), i., 86 sq.; Unsichliche Nachrichten (ibid., 1716); De Wette, Luther's Briefe, etc. (Berlin, 1830), vol. i.; Seekendorff, A Auführli, Hist. d. Lutherthums (Leips., 1714); Sisit and Olpe, Tetzl u. Luther, etc. (1859) [Rom. Cath.]; Herzog, Real-Encyklop. s. v.

Wimple is the rendering, in the A. V. at Isa. iii, 22, of the Heb. נַרְפָּך (from נַרְפָּך, to spread out; Sept. translates undistinguishably; Vulg. virga, which is translated "veil" in Ruth iii, 15, but it signifies rather a kind of shawl or mantle (Schröder, De Vestitum Mulier. Hebr. c. 16). The old English and now obsolete term means a kind of hood or veil in use at the time the translation was made, and was not a bad representative of the original. The word occurs in Spenser:

"For she had laid her mournful stole aside, And widow-like and wimple thrown away."

"But (she) the same did hide Under a veil that crepted was full low; And over all a black stole she did throw, As one that lily mourned."

See Veil.

Oriental Out-door Veils for Ladies.

Oriental Out-door Veils for Ladies.
WINCHLESTER, Thomas, D.D., a learned English divine, was born in the County of Berks about the beginning of the 18th century. He was educated at Magdalen College, Oxford; was a tutor there for many years; received a fellowship in 1747; became rector of Appleton, Berkshire, in 1761; held for some years the curacy of Aslton Chapel, near Asbury, in Warwickshire; and died May 17, 1780. He published A Dissertation on the XVIIth Article of the Church of England, etc. (1773).

Winckelmann, Johann, a Lutheran theologian of Germany, was born in 1561 at Homburg, in Hesse. He studied at Heidelberg and Oxford, and obtained the degree of doctor of divinity at Basle in 1581, and was appointed court preacher at Cassel in 1582. In 1592 he was called as professor of theology to Marburg; in 1607 he received the chair of theology at Giessen, and in 1612 the superintendency there. He died Aug. 16, 1626. He wrote commentaries on the Minor Prophets, the gospels of SS. Mark and Luke, the epistles to the Romans and Galatians; on St. Peter's and James's epistles, and on the Apocalypse. He also wrote dissertations on different passages of Scripture and on theological and other subjects. See Freher, Theatrum Eruditorum; Witte, Memoriae Theologorum; Fischer, Allgemeine Gelehrten-Lexikon, s. v. (B. P.)

Winckler (or Winkler), Johann, one of the most faithful, important, and judicious of the friends of Spener (q. v.), was born July 18, 1642, at Götzen, near Grimma, and was educated at Leipsic and Tübingen. He had become acquainted with Spener before he entered upon his first pastorate at Hamburg in 1671, and received ordination at his hands. In 1672 Winckler became superintendent at Braubach; 1676, court preacher at Darmstadt; 1678, pastor at Mannheim; and 1679, superintendent at Wurtzheim. He had already, at Darmstadt, begun to hold private devotional meetings, such as he had observed to be a useful means of grace in the ministry of Spener at Frankfurt. On Aug. 31, 1684, he was, on the recommendation of Spener, chosen chief pastor of St. Michael's at Hamburg, and that city continued afterwards to be his home while he lived. Soon after his settlement in Hamburg (1686), he came into a controversy with Dr. Joh. Frieleit, Mayer, pastor of St. Jacob, who maintained the three scriptural passages defended against Winckler's aspirations; and the dispute was renewed with greater acrimony when Dr. Schultz, the senior of Hamburg, submitted a formula, made binding by an oath, and directed against all fanatics, to the ministers of Hamburg for their signature. Winckler and his friends refused to sign the paper, and various theologians in other places, among them Spener, had written against its adoption, while Mayer became its impassioned advocate. Winckler ultimately felt constrained to discuss the matter in dispute in the pulpit, which he did in four sermons delivered April 25, 1694. The course of the dispute Horb was expelled from the city, but Mayer was thoroughly defeated. An amnesty was secured in June, 1694. In 1699 the death of Schultz transferred the office of senior to Winckler, and Mayer

WINCLER, in ecclesiastical phrase, is a name of a hood or veil, especially the white linen cloth bound over the forehead, and covering the necks of nuns (q. v.).

Winem, in Norse mythology, is the river through which Thor waded when he journeyed towards Geirrodsgard. The daughter of the giant made its waters so high that they reached to his neck.

Winchelsey, Rossiter, archbishop of Canterbury, was born at Winchelsea, and educated at Canterbury. From Canterbury School he proceeded to Paris, and there his success was remarkable. At an early age he received his degree of A.M., and soon after was appointed rector of the university. On his return to England he became a member of Merton College, Oxford. He was also appointed archdeacon of Essex. He was translated to Canterbury in 1293, and enrobed in grand style by Henry, prior of his church at Canterbury, in 1295. It seems that of all the primate of all England, none was ever so unpopular as archbishop Robert. He was so severe and hard and haughty that he placed himself, as it were, in opposition to the country just when the nation was rising to national independence. He was so unscrupulous in the means he adopted and the measures he proposed that he at length involved himself in the guilt of high treason. Towards the close of his life, he was created archbishop of Canterbury, and was enrobed in grand style by Henry, prior of his church at Canterbury, in 1295. Whatever may have been said of his faults as a public character—and they were many and great—all his contemporaries bear testimony to his worth in private life. He exercised boundless charities to the poor, and their gratitude invested him with the character of a saint. He died at Oxford, May 11, 1313. See Hook, Lives of the Archbishops of Canterbury, iii, 386 sq.

Winchester, Elhanan, a Universalist minister, was born at Brookline, Mass., Sept. 30, 1731. He was of Welsh descent, the son of a respectable and industrious mechanic, the eldest of a family of fifteen children; was very precocious, naturally of a feeble constitution, and remarkably amiable; received a careful religious training and excellent educational privileges; joined the Baptist in 1769, united in marriage the same year, and soon after began his ministerial career. In 1771 he preached at Rehoboth, Mass., where his youth, extraordinary memory, eloquence, apparent zeal, and singular desire of interest and admiration at his hands. In 1762 Winckler became superintendent at Braubach; 1676, court preacher at Darmstadt; 1678, pastor at Mannheim; and 1679, superintendent at Wurtzheim. He had already, at Darmstadt, begun to hold private devotional meetings, such as he had observed to be a useful means of grace in the ministry of Spener at Frankfurt. On Aug. 31, 1684, he was, on the recommendation of Spener, chosen chief pastor of St. Michael's at Hamburg, and that city continued afterwards to be his home while he lived. Soon after his settlement in Hamburg (1686), he came into a controversy with Dr. Joh. Frieleit, Mayer, pastor of St. Jacob, who maintained the three scriptural passages defended against Winckler's aspirations; and the dispute was renewed with greater acrimony when Dr. Schultz, the senior of Hamburg, submitted a formula, made binding by an oath, and directed against all fanatics, to the ministers of Hamburg for their signature. Winckler and his friends refused to sign the paper, and various theologians in other places, among them Spener, had written against its adoption, while Mayer became its impassioned advocate. Winckler ultimately felt constrained to discuss the matter in dispute in the pulpit, which he did in four sermons delivered April 25, 1694. The course of the dispute Horb was expelled from the city, but Mayer was thoroughly defeated. An amnesty was secured in June, 1694. In 1699 the death of Schultz transferred the office of senior to Winckler, and Mayer

X.—S s s
of another without being himself observed (Judg. v. 28; 2 Sam. vi, 16; Prov. vii, 6; Cant. ii, 9). In Egypt these outer windows generally project over the doorway (Lane, Modern Egypt, i. 27; Carne, Letters, i. 94). When houses abut on the town-wall, it is not usual for them to have projecting windows surrounding the wall and looking into the street, as is sometimes the case in Byzantium and How-
son's St. Paul, i. 124. Through such a window the spies escaped from Jericho (Josh. ii, 15), and Paul from Dam-
ascus (2 Cor. xi, 33). In the Talmud, Tyrian windows are mentioned (Baba Batra, iii, 5). See Hart-
mann, Hebriden, iii, 541 sqq.; Oldermann, De Speciali-
bus ianuis (1805). In the remainder it may be assumed.

Wine, both natural and artificial, is frequently men-
tioned in the Bible, and in modern times, especially in connection with the temperament cause, its character and use have been a subject of little nor always temperate controversy. We propose here to treat it in the light of Scripture, history, and morals, unbiased by the disputes into which learned and good men have allowed themselves to fall upon the subject.

I. Bible Terms.—The produce of the wine-press was described in the Hebrew language by a variety of words indicative either of the quality or of the use of the liquid. It may at once be conceded that the Hebrew terms translated "wine" refer occasionally to an unfermented beverage, although as such they are much as they are generally translated "wine" in the Authorized Version. It is clear that fer-
mented liquors were also in common use. It is also obvious that the Bible generally speaks in terms of strong condemnation of the effects of wine; but it is a fair question whether the condemnation is not rather directed against intoxication and excess than against the substance which is the occasion of the excess.

The following are the words more or less so rendered in the A.V., with a few others of cognate signification and application.

1. ἑγίνοντο, ὑπερήφανον; (A. V. invariably "wine," except Judg. xxi, 14, "wine," Cant. ii, 4, "banqueting"). This word, the most commonly employed in the Old-Test. Scriptures for wine, is also the most comprehensive, including, like the corresponding English word, words of all sorts, although used also in a more restricted sense to denote red wine.

(1.) It is etymologically derived, according to Gene-
nius, from ἂν, an unused root, having the force of ferro-
da, estuendi; according to First, from ποτήριον, like the Arabic ἂν, Aeth, ἂν, Fr. Socote, et sic porro cetere in linguis, Arm. yavít, Lat. viusum, Eng. wine, Sept. oino, didere, Lat. dextrum. It has been the constant opinion of the Indo-European languages borrowed the term from the Hebrews. The reverse, however, is thought by some to be the case (Renan, Lang. Sém., i, 207), and the word has been referred either to the root ῧή, "to weave," whence comme vinem, veris, vitia (Pott, Etym. Forsch., i, 120, 250), or to the root ἡμίκ, "to love" (Kuhn, Zeitschr. f. vergl. Sprache, ii, 395, 1892). However this may be, the etymological connection and substantial identity of the above Heb, Greek, Latin, and English words cannot be doubted.

(2.) In most of the passages in the Bible where ὑδαίν is used (85 out of 156), it certainly means fermented grapes-juice, and in the remainder it may fairly be pres-
sumed to do so. In four only (Isa. xvi, 10; Jer. xi, 10-
12; Lam. ii, 12) it is doubtless. In no passage can it be positively shown to have any other meaning. The corresponding English word "wine" properly means "the fermented juice of the grape." It always has this meaning, except when expressly modified by the immediate connection in which it is used. The same is true of its equivalent congener—Greek, oinos, Latin, vinum, German, wein, French, vin, etc.

The intoxicating character of ὑδαίν in general is plain from Scripture. To it are attributed the "darkly flash-

**Winder, Henry, D.D., a learned English Dissenter, was born at Hutton John, in the parish of Graysstock, Cumberland, May 16, 1838. He was educated at Pen-
ruddock and at Whitby; continued his studies pri-
vately in Dublin for two years; became pastor of a con-
cgregation at Tunley, Lancashire, and was ordained in 1716; was chosen pastor of the meeting at Castle Hey, Liverpool, in 1716, where he continued to labor until his death. Aug. 9, 1752. He is known to the litera-
ty world by his "ingenious and elaborate work," A Critical and Chronological History of the Rise, Progress, Declension, and Revival of Knowledge, Chiefly-
ly Biblical, in Two Periods—the Period of Trans-
dition, from Adam to Moses; and the Period of Let-

**Window (usually ἐπιθέσια, chaldón; Chald. ṣer, Kan, Dan. vi, 10; Gr. ἑπιθέτον.) The window of an Oriental house consists generally of an aperture (as the word chaldón implies) closed in with lattice-work, named in Hebrew by the terms arubbdh (πηνελς, Eccles. xii, 3, A.V. "window"); Hos. iii, 3, A.V. "chimney," charakkim ὑπεπέφελον, Cant. ii, 9), and eshēbd (ἐπιθέσις, Judg. v, 28; Prov. vii, 6, A.V. "casingment," the two former signifying the interlaced work of the lattice, and the third the coolness produced by the free current of air through it. On the Heb. terms rendered "window" are ὑπεπέφελον (Gen. vi, 16; a light or opening to admit it, otherwise "noon"), and ὑπεπέφελον, shibeyp (1 Kings vii, 15 or πηνελς, ὑπεπέφελον, ὑπεπέφελον (iv, 4; vii, 4), which means simbera or beams. See Ark; Temple.**

Glass has been introduced into Egypt in modern times as a protection against the cold of winter; but lattice-
work is still the usual, and with the poor the only, con-
trivance for closing the window (Lane, Modern Egypt, i. 29). When the lattice-works of Saxon method has been there appears to have been nothing in early times to prevent a person from falling through the aperture (Acts xx, 9). The windows generally look into the inner court of the house, but in every house one or more look into the street, and hence it is possible for a person to observe the approach
WINE

WINE

ing eye" (Gen. xlix. 12; A.V. "red," but see Gesenius, Theor. Append. p. 89), the unbridled tongue (Prov. xxx. 1; Isa. xxvii. 7), the excitement of the spirit (Prov. xxxii. 6; Isa. vii. 11; Zech. ix. 15; x; 7), the charmed affections of its votaries (Hos. iv. 11), the perverted judgment (Prov. xxx. 5; Isa. xxvii. 7), the indecent exposure (Hab. ii. 15, 16), and the sickness resulting from the use of A.V. "bottles" of wine (Pro. vii. 5). So in actual instances: Noah planted a vineyard, and drank of the yagin and was drunken (Gen. iv. 21): Nabai drank yagin and was very drunken (1 Sam. xxvi. 36, 87); the "drunkards of Ephraim" were "overcome with yagin" (Isa. xxvii. 1), or rather, knocked down, or, as Gilgal (Isa. xxvii. 1), amnitted, knocked down, with it as with a hammer, and laid prostrate on the ground, where they lie fixed to it, not able to rise." Jeremiah says, "I am like a drunken man, and like a man whom yagin hath overcome" (xxix. 9).

The intoxicating quality of yagin is confirmed by Rabbinical testimony. The Mishna, in the treatise on the Passover, informs us that four cups of wine were poured out and blessed, and drunk by each of the company at the eating of the Paschal lamb, and that water was also mixed with the wine, because it was considered too strong to be drunk alone (Perekhim, vii. 15; x. 1). In Hichai (Hoch. 1, 1) it is said, "To this rite be performed with red wine." Babylon. Shabb. (Ixxvi. 1), "Sharon wine is of famous report, with which they mix two parts of water;" Babylon. Berachoth (fol. 1), "Their wine (yagin) was very strong, and not fit for drinking without being mixed with water." The Gemara adds, "The cup of blessing is not to be blessed until it is mixed with water;" the Jerusalem Talmud says, "It became a man nobly to entertain his wife and children (at the Passover), that at this feast they might be merry with wine" (yagin). To meet the objection How can intoxication be hindered? the rabbis replied, "Because wine between eating does not intoxicated a man" (Hieros. Talm. The D. Rabbim's Reply to a Pamphlet by Rev. W. Ritchie on the Scripture Testimony against Intoxicating Wine, p. 9, 8.

But, although usually intoxicating, yet it was not only permitted to be drunk, but was also used for sacred purposes, and is spoken of as a blessing. Thus, in Jcob's blessing on Judah, "His eyes shall be red with yagin, and his teeth white with milk" (Gen. xlix. 12). So in God's promise to restore his people, that "I, the Lord, will give them their yagin again" (Amos iv. 19). "Drink thy yagin," says the preacher, "with a merry heart, for God now accepteth thine works" (Ecclus. ix. 7). The Nazarite, at the expiration of his vow, was permitted to drink yagin (Numb. vi. 13; 20); the Israelites were permitted to drink yagin at their feasts (Deut. xiv. 24-26); yagin was used in the sacred service of Jehovah, being poured out as a drink-offering to him (Exod. x. 10; Lev. xxvi. 13; Numb. xv. 5).

Hence, it not only "maketh glad the heart of man" (Psa. civ. 15), but also "cheereth both God and man" (Judg. ix. 13); its cheerful effects being symbolically transferred to the Divine Being.

Some, indeed, have argued from these passages that yagin could not always have been alcoholic. But this is begging the question, and that in defiance of the facts. Although yagin was probably fermented, it was probably not properly inebriating, in most instances, doubtless, was but slightly alcoholic, like the vin ordinaria of France, or our own cider.

2. Tirdsh, מ' (Gen. xxviii. 28-38; Numb. xxviii. 12; Deut. vii. 13; xi. 14; xii. 17; xiv. 23; xvii. 3; xxviii. 4; xxxiii. 5; xxiii. 26; Judg. ix. 15; 2 Kings xvii. 32; 2 Chr. xxxiii. 20; Jer. xxxi. 12; xxv. 9; xiv. 22; vii. 17; Zech. ix. 17; xii. 10; Isa. xx. 8, 9, 22; vii. 14; Joel ii. 19, 24; rendered "new wine" in Neh. x. 39; xix. 8, 5; Prov. iii. 10; Isa. xxiv. 7; lxv. 8; Hos. iv. 11; ix. 2; Joel i. 10; Hag. ii. 10; Zech. ix. 17; "sweet wine," in Mic. vi. 15), properly signifies must, the freshly pressed juice of the grape (the γάρνησκον, or sweet wine of the Greeks, rendered "new wine" in Acts ii. 13). The word (rendered in the Sept. by three distinct terms, ωνος, ροδινος, μωσθων) occurs sometimes in connection with yagin, sometimes with oil, and sometimes with words denoting the edible productions of the earth (Isa. xlv. 12).

(1.) Etymologically, tirdsh is usually referred to the root yagin, מ' , "to get possession of," applied to wine on account of its inebriating qualities, whereby it gets possession of the brain. So Gesenius, "Mustum, novum vinum ita dictum quia inebriat, cerebrum occupat" (Theor. p. 683); and Furst, "Mustum uvis expressum, A. V. מ', occupare, acquirere, comparare" (Concord. p. 528, 2). But according to Bythner, as quoted by Lees (Tirshah, p. 52), it refers to the wine as being a possession (הנה 'יסחי) in the eyes of the Hebrews. Neither of these explanations is wholly satisfactory, but the second is less so than the first, inasmuch as it would be difficult to prove that the Hebrews attached such pre-eminent value to the vine as to place it on a par with landed property, which is designated by the cognate terms yewashah and morashah. Nor do we see that a wine which is drunk from this latter derivation; for, assuming its correctness, the question would still arise whether it was on account of the natural or the manufactured product that such store was set on the wine.

(2.) As to the exclusively liquid character of the substance denoted, both yagin and tirdsh are occasionally connected with expressions that would apply properly to a fruit; the former, for instance, with verbs significant of gathering (Jer. xi. 10, 12 and growing (Psa. civ, 14-16); the latter with gathering (Isa. lix. 9, A. V. "brought it together"); treading (Mic. vi. 15), and sowing (Zech. vii. 7). Joel i. 10, 11. This explains, the former is used in Numb. vi. 4, to define the particular kind of tree whose products were forbidden to the Nazarite, viz. the "pendulous shoot of the vine;" and the latter in Judg. ix. 13, to denote the product of the vine. It should be observed, however, that in most, if not all, the passages where these and similar expressions occur there is something to denote that the fruit is regarded not simply as fruit, but as the raw material out of which wine is manufactured. Thus, for instance, in Numb. xxvii. 15, and Judg. ix. 13, the cheering effects of the product are noticed, and that these are more suitable to the idea of wine than to that of self-evident fruitage. In the same way, indeed, the A. V. connects the expression "make cheerful" with bread (Zech. ix. 17); but this is a mere mis-translation, the true sense of the expression there used being to nourish or make grow. So, again, the treading of the grape in Mic. vi. 15 is in itself conclusive as to the pregnant sense in which the term tirdsh is used, even if it were not subsequently implied that the effect of the treading was, in the ordinary course of things, to produce the yagin which was to be drunk. In Isa. lix. 9, the object of the gathering is clearly conveyed by the notice of drinking. In Isa. xxiv. 7, the tirdsh, which with the wine is shed on the two following verses. Lastly, in Isxv. 8, the nature of the tirdsh, which is said to be found in the cluster of the grapes, is not obscurely indicated by the subsequent euclomium, "a blessing is in it." That the terms "wine" and "wine" should be thus interchanged in poetic language of this kind, is, in my opinion, inexplicable, and infer from such instances that the Hebrew terms mean grapes as fruit than we could infer the same of the Latin vinum because in some two or three passages (Plautus, Trist. ii. 4, 126; Varro, De Ling. Lat. iv. 17; Cato, De Re Rustica, c. 147) the term is transferred to the grape itself, and the grape of tirdsh is not named.

Moreover, tirdsh generally follows "corn" in the tripleCorn, wine, and oil," and hence the term applied to the consumption of corn is carried on, in accordance
WINE

with the grammatical figure zeugma, to the other members
of the clause, as in Deut. xii, 17. In the only pas-
sage where the act of consuming tirōsh alone is noticed
( Isa. lxii, 8, 9) the verb is zahakh (צחה), which
constantly indicates the act of drinking (e. g. Gen. ix, 21;
xxiv, 22; Exod. vii, 21; Ruth ii, 9), and is the general
term combined with abd (אבד) in the joint act of
“eating and drinking” (e. g. 1 Sam. xxx, 16; Job i, 4;
Eccles. ii, 24). We can find no confirmation for the
sense of sucking assigned to the term by Dr. Lee (Ti-
rōsh, p. 61); the passage quoted in support of that sense
( Psa. lxv, 8) implies, at all events, a kind of sucking
allied to drinking rather than to eating, if indeed the
sense of drinking be not the more correct rendering of
the term. An argument has been drawn against the
usual sense assigned to tirōsh, from the circumstance,
that it is generally connected with “corn,” and there-
fore implies an edible rather than a drinkable substance.
The very opposite conclusion may, however, be drawn
from this circumstance; for it may be reasonably urged
that in any enumeration of the materials needed for
man’s support, “meat and drink” would be specified
rather than the better kinds of the latter. “Bread and water”
or “cereal and drink” occur together very often
(e. g. Ezek. iv, 17; 1 Sam. xxxv, 11, etc.). Is water
then, a solid? There are, finally, passages which seem to
imply the actual manufacture of tirōsh by the same process
by which wine was ordinarily made. For, not to insist on
the probability that the “bringing together,” noticed in
Isa. lix, 9 would not appropriately apply to the col-
lecting of the fruit in the wine vat, we have notice of the
“treading” in connection with tirōsh in Mic. vi, 15,
and again of the “overflowing” and the “bursting out”
of the tirōsh in the vessels or lower vat (יַנַךְ, תַּנְךָ; Sept.
pron. yānāch, yannāch), which received the must from the
proper presses ( Psa. xxcvii, 10; Joel ii, 24). This,
according to the author of Tirōsh Lo Yāqin, is an “image
of abundance;” the “vats piled up with fruits so full
that what was put on would roll off to the ground, because
they could hold no more!” (p. 54).

(5) As to the intoxicating character of this drink, the allusions to its effects are confined to a single pas-
sage, but this a most decisive one, viz. Hos. iv, 11,
“Whorelom and wine (yāgin), and new wine (tirōsh)
take away the heart,” where tirōsh appears as the cli-
max of engrossing influences, in immediate connection
with yāgin. The inevitable impression produced on the mind by
a general review of the above notices is that both yāgin
and tirōsh, in their ordinary and popular accception,
referred to fermented, intoxicating wine. In the con-
demnatory passages no exception is made in favor
of any other kind of liquid passing under the same name,
but invested with the same dangerous qualities. Nor,
again, in these passages is there any decisive con-
demnation of the substance itself, which would enforce
the conclusion that elsewhere an unfermented liquid
must be understood. The condemnation must be un-
derstood as implied in any use in which the scriptural
law is not then specially represented. Where this is not expressed, it is implied; and therefore the instances of wine being drunk without any reproof of the
act may, with as great a probability, imply the moderate
use of an intoxicating beverage, as the use of an
unintoxicating one.

The method of fermentation are not very decisive.
A certain amount of fermentation is implied in the dis-
tension of the leather bottles when new wine was placed
in them, and which was liable to burst old bottles. It
has been suggested that the object of placing the wine
in bottles was to prevent fermentation, but that in “the
case of old bottles, fermentation might ensue from their
being impregnated with the fermenting substance” (Ti-
rōsh, p. 65). This is not inconsistent with the state-
ment in Matt. ix, 17, but it detracts from the spirit of the
comparison which implies the presence of a strong,
expansive, penetrating principle. It is, however, in-
consistent with Job xxxii, 19, where the distension is
described as occurring even in new bottles. It is very
likely that new wine was preserved in the state of must
by placing it in jars or bottles, and then burying it in
the earth. But we should be inclined to understand
the passages above quoted as referring to wine drawn
off before the fermentation was complete, either for
immediate use, or for the purpose of forming it into
sweet wine after the manner described by the Geoponic
writers (vii, 19). The presence of the gas-bubble, or,
as the Hebrews termed it, “the eye” that sparkled in
the cup (Prov. xxiii, 31), was one of the tokens of fer-
mentation having taken place, and the same effect was
very possibly implied in the name chēmer (כֹּהֶמֶר).

The testimony of the rabbins is to the same effect.
They say, “Tirōsh, יַנַך (יַנַךְ), is new wine; the liquor
of the grapes first pressed out, which easily takes posses-
sion of the mind of man” (Sanhedr. lxxvi, 1). “If thou
abuse it, thou shalt be poor; if thou rightly use it,
thou shalt be head” (Yoma, lxxvi, 2). Again, in the
Gemara, “Wherefore is it called tirōsh? Because all
who are drawn to it shall be poor.” Such is the testi-
mony of the rabbins, “who ought to know something of
their own language.” In accordance with this, the
Targumists Onkelos and Jonathan render tirōsh, in
every instance of its occurrence (except in three cases
where there is no word, or the word for vineyard), by
the word בָּרָך, chamarr (see Tattam, Reply, p. 5, 6).

3. Chēmer, כֹּהֶמֶר (כֹּהֶמֶר), is a fermenting and fermentando dictum” (Genesius, Thesaur. p. 493). The word occurs eight times—twice
(Deut. xxxii, 14; Isa. xxxvii, 9) in its Hebrew and six
times (Exra vi, 9; vii, 22; Dan. v, 1, 2, 4, 23) in its
Chaldee form.

In Deut. xxxii, 14 it is (in the A.V.,
but the Vulg.) treated as an adjective, and renders
“pure”—the pure blood of the grape, instead of “the
blood of the grape—wine,” chēmer. The rabbins call it
“pure or neat wine” (i. e. no water being mixed with
the juice of the grape), “because it disturbs the head
and the brain” (Tattam). They regarded chēmer and
tirōsh as equivalent terms. This pure, powerful
wine was permitted to the Israelites (Deut. xxxii, 14); and
is spoken of with approbation by Isaiah, “In that day
sings your song, in the heyard of reeds, I, Lord, do keep it”
(xxvii, 2, 3). Cyrus and Arta-
xerxes commanded that chēmer should be given to the people of Israel “for the service of the God of heaven”
(Exra vi, 9).

4. Shekār, שְׂכָר (from שְׂכָר, שְׂכָר תֹּא), is a fermenting drink, whether wine prepared or distilled
from barley or from honey or from dates (Genesius, Thesaur. p. 1440). So First, who adds, “or any other
kind of intoxicating drink comprehended under the
name תֹּא וַיָּקְנִין. Jerome says, “Sicerā (בָּרָך) He-
bru seronome omnis potio, que inebriare potest, sive
illa quae frumento conficitur, sive pomorum succo, aut
quum faveo discequantur in dulcem et barbaram potioni-
em, aut palmarum fructus exprimitur in liqueorem,
cocctiae frugibus aqua pungentior colorantur (Ep. ad Ne-
poticonem). In the A. V. the word is once rendered
“strong wine” (Numbl. xxviii, 7); and elsewhere,
occurring along with yāgin, “strong drink” (vi, 8; Deut.
xxix, 6; Judg. xiii, 4, 7, 14; Isa. v, 11; li, 12; Mic. ii, 11;
and the passages cited below). Onkelos, On Numbl.
xxviii, 7, calls it “old wine. Rabbi Solomon, rabbi
Eleazar says, “it belongs to the first fruit, or intoxicating
wine.” The word means strong drink, from whatever
substance made” (Tattam). It was used as a drink-of-
fering in the service of God (Numbl. xxviii, 7), and was,
notwithstanding its highly intoxicating property, per-

Digitized by Google
mitted to the Israelites (Deut. xiv. 26). See Drink, Strong.

A vain attempt has been made, by connecting the word etymologically with sugar, to prove, in the face of the clearest evidence to the contrary, that it was a sweet, non-intoxicating syrup (see Lees, Works). The word is employed in the following passages in such a manner as to show decisively that it denotes an intoxicating drink: Lev. x. 9, where the priests are forbidden to drink wine or shékdr when they go into the tabernacle; 1 Sam. i. 15, where Hannah, charged with drunkenness by Elkanah, swears, "It is not so!"—are drunk neither wine nor shékdr; Ps. lxxx. 12, where the psalmist complains, "I was the song of the drinkers of shékdr" (A. V. "drunkards"); Prov. xx. 1, "A wine is a mocker, a shékdr is raging, and whosoever is deceived thereby is not wise;" xxxi. 4, 5, "It is not for kings to drink wine, nor for princes shékdr, lest they drink and forget the law." Isa. v. 22, "Woe unto them that are mighty to drink wine, and men of strength to mingle shékdr;" xxviii. 7, "They also have erred through wine, and through shékdr are out of the way: the priest and the prophet have erred through shékdr, they are swallowed up of wine, they are out of the way through shékdr;" xxx. 9, "They are drunken, but not with wine; they stagger, but not with shékdr.

5. **'Asa, נַעַרְנָה** (from נַעַרְנָה, to tread; Sept. νιαῖμα, γλυκαρίαν, oinos vign, usen, τιφός), "pure wine;" Vulg., dulcedo, mustum), is must, that which is expressed from grapes by treading, or from pomegranates (Genesius, Thesaur, p. 1054). Henderson says, "By נַעַרְנָה is meant the fresh wine, or juice of the grape or other fruit which has just been pressed out, and is remarkable for its sweet flavor and its freedom from intoxicating qualities" (Comment on Joel i. 5). Its extraction is employed in the following passages: Cant. iv. 2 ("juice"). Yet its intoxicating quality seems intimated in Isa. xliii. 6, "They shall be drunken with their own blood as with sweet wine" (also Joel i. 5, "Awake, ye drunkards, and weep. . . . because of the new wine (as it), for it is cut off from your mouth."); it is promised by God as a blessing (Joel iii. 17, 18; Amos ix. 10).

6. Sôbê, סָבָה (from סָבָה, potar, idque intemperantia, *gurgisgiaut,* to drink to excess, to tope [Genesius, *Thesaur.*, p. 982]; Sept. oinos: Vulg. vinum), occurs only in three places (Isa. i. 22, "wine;" Hos. iv. 18, "drink;" Nah. i. 10, "drunken"), but the verb and particle סָבָה occurs in the latter to denote a drunkard, a hard topfer. Genesius renders the noun in Isa. i. 22, vinum, but in Hos. iv. 18, composito, a drinking-bout, a carouse; so Henderson, Dathe, etc. The Sept. must have followed a various reading in this place. Sôbê, then, means some (or perhaps any) kind of intoxicating drink.

7. **Miské, מִשָּׁקָה** (from מִשָּׁקָה, to mix, or mingle, is wine mixed with water or aromatics (Sept. καίμασιν: Vulg. mutam). It occurs only once (Psa. Ixxvi. 9); but the participial noun מִשָּׁקָה, misnak, is found in Prov. xxviii. 30; Isa. ix. 11, in a similar sense—wine highly spiced, to improve its flavor and enhance its intoxicating power. See below.

8. Shemarím, שֵׁמַרִים (from שֵׁמַר, to keep, preserve, lay up; Sept. σωστίων, φιλαργυρία, δόεα; Vulg. facres, eudemium; A. V. "lees, " dregs," wine on the lees"), occurs five times, and always in the plural. It is used both of lees and of wine preserved on the lees of: lees, Psa. xcv. 8; Jer. xxviii. 11: Zeph. i. 12, in all which passages it is not given as an assuragence: in the second and third, the form of expression is proved to be, being used of individuals and nations—"de is qui desideres, atque otiosi sunt, vel certe vita utuntur quieta, tranquilla, metaphorâ a vinum potuo, quod diu in cella reconditum facibus superjacet et intactum asservat, quo validissimi fit vinum odorique fragrantissimi" (Genesius, *Theaurin p. 1444*). It is used of wine, Isa. xxx. 6 (his), where the prophet foretells the rich provision of Gospel blessings under the figure of "a feast of fat things, of wines on the lees, shemarim, well refined (גְּנֶשְׁוּי, dejecto—i. e. "vinum vetus et nobilissimum a facibus purgatum" (Genesius), or "cum facibus servantum (He-) feinwein), quod deflectat et clarificant in convivis opifis apportatur" (Furst, *Concord. p. 1177*). The word is used of lees, according to some, "from their preserving the strength and flavor of wine" (Alexander); according to others as "id quod ad ultimum usque reservatur et remaneat—fectus, utpote que in imo vasio fundus subsidendum" (Furst). This "vetus et nobilissimum vinum" is spoken of approvingly in the last-cited passage.

9. Ashisháih, אֲשִׁשָּׁה (Sept. λαγγαον ἀντι ρηγανον, πινακή, ἀμπερικος—i. e. a cake from the frying-pan, a baked cake, a sweet cake—is a variation of rendering truly. The Targ. of Jonathan on Exod. xvi. 31 uses פְּלָדָה for the Heb. פְּלָדָה, a flat cake. The traditio Judaica is פְּלָדָה, a jar of wine. The A. V. has "flags, on "flagons" (wine). The plural of the word occurs both in the masculine and feminine forms. Critics are pretty generally agreed that it does not denote wine or any other drink, but a cake; such, e. g., "prepared from dried grapes, or raisins pressed or compacted into a certain form. Cakes of this kind are mentioned as delicacies with which the weary and languid are refreshed (2 Sam. vi. 19; 1 Chron. xvi. 3; Cant. ii. 5), and were offered in sacrifice to idols (Hos. iii. 1). They differed from פְּלָדָה, i. e. grapes dried but not compacted into the form of cakes; and also from פְּלָדָה, i. e. figs pressed into cakes." So Genesius, who derives the word from פְּלָדָה, to press, although Buxtorf would derive it from a similar form denoting barn. The evidence seems in favor of a cake, especially a grape cake, in which latter sense it certainly occurs in Hos. iii. 1, where, however, it is written more fully, or rather with the addition of פְּלָדָה, grapes, which fills up its meaning, פְּלָדָה יִשַּׁק=cakes of grapes. Dr. Tattam, resting on the authority of rabbins whom he quotes, seems inclined to abide by the rendering of the A. V. (see Reply, p. 13, 14). See Cake.

10. Three other words may here be noticed. יִשָּׁק, chometa (Sept. διακατ, but in Prov. x. 28 διακατα, i. e. sour grapes; so Jabez, Gen. xlv. 7), occurs five times. This, it appears, was obtained either from יִשָּׁק or shékdr (Num. vi. 3), and was used by those engaged in the labors of the field to soften and render more palatable the dry bread which formed the food of the reapers (Ruth ii. 14). It was also used as a beverage, probably mixed with water (Num. vi. 3), in which case it would resemble the posca of the Romans, which was not an intoxicating drink, and was used only by the poorer classes (Plaut, *Mil. Glor. iii. 2, 23*). In Matt. xxvii. 34 our Lord is said to have had vinegar mingled with gall offered to him to drink when on the cross. Mark (xxv. 29) says it was wine mingled with myrrh; Luke that it was vinegar offered by the soldiers in mockery (xxiii. 38); and John that it was vinegar (xix. 29). Possibly these accounts refer to two separate occurrences—the one an act of cruelty on the part of the soldiers, who, in response to our Lord's exclamation, "I thirst," offered him some of their own posca; the other an act of intended kindness, designed to alleviate his sufferings by an anodyne. See Vinegar.

11. In the New Test. several words are employed denoting wine.
The second notice of wine is in the history of Lot, whose daughters made their father drink wine (gēdān), so that he became stupidly intoxicated (Gen. xix., 32, etc.). It next occurs in Isaac's blessing pronounced on Jacob: "The Lord give thee... plenty of corn and wine" (Gen. xxvii., 29). The next notice of the juice of the grape (although, be it observed, the product is not called wine) is in connection with Egypt (Gen. xi., 11), when the chief butler says, "I took the grapes and pressed them into Pharaoh's cup. Are we to take these words according to their strict literal meaning? It is a question whether the king of Egypt could drink the unfermented juice of the grape etc. However that may be, and although an affirmative answer seems demanded, yet we know that the vine was cultivated in Egypt from very ancient times, representations of the process of the manufacture of wines being found on tombs of the 4th dynasty. The process was used almost universally by the rich; that it was freely drunk at the banquets of both men and women, and even excessively, as the monuments abundantly testify; that it was drunk even by the priests, and offered in the temples to their gods. All this is now well ascertained, notwithstanding the contradictory statements of Herodotus on some points (see Rawlinson, Herod. ii., 103, 126; Wilkinson, Anc. Egypt. i, 144, etc.). It has been inferred from a passage in Plutarch (De Isid. 6) that no wine was drunk in Egypt before the reign of Ptolemy, and this passage has been quoted in illustration of Gen. xi., 11. The meaning of the author seems rather to be that the kings subsequently to Ptolemy did not restrict themselves to the quantity of wine prescribed to them by reason of their sacred official (Deod. i., 70).

In the laws of Moses wine is frequently mentioned as forming a usual drink-offering that accompanied the daily sacrifice (Exod. xxix., 40), the presentation of the first-fruits (Lev. xxii., 13), and other offerings (Num. xv., 5). It appears from Num. xxxviii., 7 that strong drink might be substituted for it on these occasions. Tithe was to be paid of wine (tirāš) as of other produce. And this was to be given unto the "Lord," meaning within the precincts of the Temple, or perhaps, as may be inferred from Lev. vii., 16, at the place where the Temple was situated (Deut. xii., 17, 18). The priest was also to receive first-fruits of wine (tirāš), as of other articles (xxviii., 4; comp. Exod. xxii., 29); and a promise of plenty was attached to the faithful payment of these dues (Prov. iii., 9, 10). Wine offered to God as a drink-offering (Num. xv., 5, 7, 10) furnishes the key to the peculiar language of Jotham's parable, "wine that cheereth God and man" (Judg. x., 15)—an exposition much preferable to that which renders the words "the gods and men" for wine was offered to God as the drink of the Great King, the symbol of our best spiritual things which we offer in his worship. Wine was forbidden to the priests during the performance of their sacred duties in the tabernacle (Lev. x., 9), which prohibition seems to have originated in the influence of the Egyptian law, as the Hebrews drank it "transgressed through wine." At other times the priests were at liberty to drink wine. To the Nazarites, while under their vow, not only wine, but vinegar, and the fruit of the vine generally, in every form, was prohibited (Num. i., 5, 4). The Israelites were at liberty to drink wine even at their national sacred feasts.
WINE 1015 WINE

vala when rejoicing before the Lord (Deut. xiv, 22-26). The Rechabites are mentioned as very peculiar in their abstaining from wine, as well as from their refrainig to live in tents, and are commended, not for their abstention, but for their obedience to the command of their ancestors (Jer. xxxviii, 11). This was incompatible with the conditions of a nomad life, and it was probably on this account that Jonah, wishing to perpetuate that kind of life among his posterity, prohibited the use of wine to them. The case is exactly parallel to that of the Nabataeans, who abstained from wine on purely political grounds (2 Chron. xxi, 9). The use of wine at the paschal feast was not enjoined by the law, but had become an established custom, at all events in the post-Babylonian period. The cup was handed round four times according to the ritual prescribed in the Mishna (Pesaach, x, 1), the third cup being designated the "cup of blessing" (1 Cor. x, 16), because grace was then said (Pesaach, x, 7). The contents of the cup are specifically described by our Lord as "the fruit" (γίνομα) of the vine (Matt. xxvi, 29; Mark xiv, 25; Luke xxii, 18), and in the Mishna simply as wine. The wine was mixed with warm water on the Passover, as implied in the words of the warming-kettle (Pesaach, viii, 13). Hence in the early Christian Church it was usual to mix the sacramental wine with water, a custom as old, at all events, as Justin Martyr's time (Apol. i, 65). See PASSOVER.

The rabbis have a curious tradition, that at the great feast which was observed on the day of atonement, the rabbi shall drink wine made from grapes which grew in Paradise during the six creative days, and preserved in Adam's cave for that great occasion (Obothia Lez. s. v.; "Vinum:" Buxtorf, Syn. Jud. p. 460).

The Pastoral Epistles contain directions as to the use of wine; and the practice of the parting of the table holding office in the Church; as that they should not be πυρονικοί (1 Tim. iii, 8; A.V. "given to wine"), meaning insolent and violent under the influence of wine; "not given to much wine" (iii, 8); not enslaved to much wine" (Tit. ii, 3). The term νηπηληος in 1 Tim. iii, 2 (A.V. "sober"), expresses general vigilance and circumspection (Schleusener, Lez. s. v.; Alford, ad loc.). Paul advises Timothy himself to be no longer an habitual water-drinker, but to take a little wine for his health's sake (1 Tim. v, 23). No very satisfactory reason can be assigned for the place which this injunction holds in the Epistles of St. Paul, and is perhaps due to possible misapprehension as to the preceding words, "Keep thyself pure." The precepts above quoted, as well as others to the same effect addressed to the disciples generally (Rom. xiii, 13; Gal. v, 21; 1 Pet. iv, 3), show the extent to which intemperance prevailed in ancient times, and the extreme danger to which the Church was subjected from this quarter.

It appears to have been an ancient custom to give medicated or drugged wine to criminals condemned to death, to blunt their senses, and so lessen the pains of execution. To this custom there is supposed to be an allusion, Prov. xxxi, 6, "the parting of the table drinking drink unto him that ready is to perish," and an illustration of this custom is furnished by the soldiers giving Jesus "wine mingled with myrrh," or, which is the same, "vignar" i.e. sour wine; "mingled with gall," i.e. a bitter drug, without specifying the kind (Mark xv, 23; Matt. xxvii, 44). "Omnis a naviedo ad mortem damnati potarunt "vino g," "vino viso" (h.e. optimo, fortii) ut diriperetur intellectus eus, ad confirmandum id dictor, Prov. xxi, 6, etc. De pertulo dictor, id fieri, ut obliviscatur mortis, quia est currus ipse" (Syst. Minn. Hest. p. 260). To the same custom some suppose there is a reference in Amos ii, 8, where the "wine of the condemned" (A.V.) is spoken of. The margin reads, instead of condemned, "fined or mulcted," so Gesenius; Henderson, 'amerced.' The wicked here described, in addition to other evil practices, imposed unjust fines upon the innocent, and spent the money thus unjustly obtained upon wine, which they quaffed in the house of their gods; as Dante renders it: "pecunias hominibus innocentibus extortas comptionationibus absumunt in templo deorum suorum."

Mixed wine was also spoken of in Scripture. It was of different kinds. Sometimes it was mixed with water to take it down (Isa. i, 29); sometimes with milk (Cant. v, 1); and sometimes, by lovers of strong drink, with spices of various kinds, to give it a richer flavor and greater potency (Isa. v, 22; Ps. ixxv, 8). Both the Greeks and Romans were fond of the habit of flavoring their wines with spices, and such preparations were described by the former as wine i.e. αυρωματω κατασκευαζον (Athen. i, 21 e), and by the latter as aromates (Pliny, xiv, 19, 5). The authority of the Mishna may be cited in favor both of water and of spices, the former being noticed in Berach. vii, 5; Pesaach. vii, 18; and the latter in Shen. ii, 1.

The "royal wine," literally wine of the kingdom, ποτηρι Κυρίου (Esth. i, 7), denotes most probably the best wine, such as the king of Persia himself was accustomed to drink. "Wine of Lebanon" is referred to in such a way as to indicate its peculiar excellence—"the scent thereof shall be as the wine of Lebanon." (Hos. iv, 7). Hence it is thought to have been distinguished by its grateful smell. But "21 means, as the margin renders it, memorial, and includes odor, flavor, and refreshing influence. Modern writers have generally assumed that this wine was the wine of Lebanon. The "wine of Helbon, or Chalbon," is mentioned as one of the importations of Tyre (Ezek. xxxviii, 18), and was very famous. It was greatly valued by the Persian monarchs (Strabo, xv, 785), as it is still by the residents of Damascus (Porter, Damascus, i, 333).

The wines of modern Palestine are represented by travellers as being of excellent quality. The sweet wines are particularly esteemed in the East, because they are grateful to the taste, very exhilarating, and some of them will keep for a long time. They were therefore preferred by those who were addicted to drinking, and commonly selected for the tables of kings. Their inebriating quality is alluded to by the prophet Isaiah: "I will feed them that oppress you with their own flesh, and they shall be drunken as with sweet wine" (Isa. xlix, 20). "The testimony of the best modern travellers respecting the spiritual nature of the wines of Palestine accords with that of the sacred writers. . . . It is observed by Thevenot that the people of the Levant never mingle water with their wine at meals, but drink by itself what water they think proper for abating its strength. While the Greeks and Romans by mixed wine understood wine united and lowered with water, the Hebrews, on the contrary, meant by it wine made stronger and more inebriating by the addition of powerful ingredients. . . . The wines of Palestine are generally kept in bottles made of leather, or goat-skins, sewed or pitched together. In these the process of fermentation took place, and the wine acquired its proper degree of strength. In absence of anything like chemical analysis, these are the data from which we must draw our conclusions concerning the nature of the wines referred to by the sacred writers. Some of them are represented to have been sweet wines, which, if not the strongest, are known to have been famous. The grapes from which they were produced were remarkable for their richness and excellence; the climate of the country being such as to favor the growth and development of those principles which, during fermentation, were converted into alcohol. As the grapes of that country are supposed to have been very rich and spirituous wines, we may infer that the ancient were similar in their character; since there is abundant evidence that the climate has not suffered any material change for three thousand years. We should not omit, in confirmation of this view of the spiritual nature of
the wines of Palestine, to advert to the modes in which they were kept. It is now well known that when mixtures of alcohol and water are put into bottles, the water evaporates and leaves the alcohol in a more concentrated state. If kept in bottles closed by pieces of bladder firmly tied over the mouth, in a few weeks acquire the strength and flavor which would be imparted to it only by several years' preservation in the ordinary way. Now, it is probable that the leather bags into which these wines were put would produce a similar effect upon the liquor, which, after the process of fermentation had ceased, would soon attain its complete and appropriate alcoholic character" (Prof. Silliman, *Amer. Jour. of Science and Arts*, 1834).

"The wine was generally contained in large ox-skins ranged in the store-room, and quite distended with liquor. The larger skins seem to have answered to casks; the smaller goat and kid skins, to barrels and kegs in the comparison, to be chiefly used in conveying to customers the smallest quantities required. Individuals rarely keep large stores of wine in their houses, but get a small supply of a goat-skin or two from the wine-store. This seems also to have been the case with the ancient Jews, for Nehemiah, although holding the rank of governor, had no store of wine, for we read he had a supply every ten days (Neh. vi, 18). The large skins in the wine-store we have mentioned are supported above the floor on frames" (*Kitto's Bible Cyclopaedia*, note on Job xxxii, 19). Similar methods of storing and keeping wine were common to the Greeks and Romans. See Smith, *Dict. of Class. Antiq.* a. v. "Vinum."

II. Teaching of the Scriptures in respect to the Use of Wine.—1. As appears from the foregoing examination, the Bible makes no distinction between intoxicating and non-intoxicating wines—never refers or alludes to such an idea. There is no watered or diluted wine, no fermented or distillate, spoken of in precisely the same way that corn and oil and milk are spoken of,—namely, as a blessing sent by God for the use of man. It was enjoined to be used in the service of God. It is employed as a symbol of the highest spiritual blessings (Isa. iv, 1, 2). The use of it was common among the Jews, as it is among the people of all wine-producing countries. It was forbidden to the Nazarites alone, and that only while under their vow. It is, in one sense, as prescribed by Paul to Timothy (1 Tim. v, 23). Jesus Christ came "drinking wine" as well as "eating bread" (Luke vii, 33-54), and in one instance miraculously produced a supply of wine when it was needed (John ii). We attach great importance, religiously and philosophically, to the use of wine. Jesus was no ascetic. He gave the most perfect example of moderation and prudence in its use. It is certainly in no sense antecedent to asceticism. By drinking wine—freely using the blessings of God's providence—he testified against the error, afterwards called Gnostic and Manichean, which would attach impurity to that which enters the mouth, and vindicated the liberty of his followers to use "every creature of God" as good and fit for food, and to be received with thanksgiving by them as those who "believe and know the truth" (1 Tim. iv, 3, 4). But this error repelled, and this liberty asserted, none are obliged to drink wine or to eat meat if they prefer not. There is liberty on this side also. They may abstain if they choose. Paul expressed his readiness to abstain from "fresh" and "wine" to secure the good of a brother, or to avoid occasioning him injury (Rom. xiv, 21; comp. 1 Cor. viii, 13). The same liberty is ours; and if a great practical good may be attained by this principle, Christian benevolence calls us in this direction.

But while liberty to use wine, as well as every other earthly blessing, is conceded and maintained in the Bible, yet all abuse of it is solemnly and earnestly condemned. In the book of Proverbs the warnings against such abuse are frequent and severe (xx, 1; xxii, 29-31; xxv, 6-7). It is the same in the New Test. (Cor. vi, 10; Gal. vi, 21). "Be not drunk with wine—not given to much wine." Such are its precepts—precepts which would have little or no force, or even meaning, were wine not intoxicating, and were there not some peculiar excellence in its use. If wine were not intoxicating, the apostle might as well have exhorted them against drinking too much milk or too much water. He takes for granted the right to use: he recognises the danger incident to the use; but instead of prohibiting, he cautions and exhorts against the abuse of it. "Moderation" is the word; and "Moderation" is the broad Christian law. *Abstinence* from some kinds of food may become a duty under peculiar circumstances. Self-denial, in relation to things lawful, is often imperative. Wine is good; it is a gift of God. It may be used with advantage; it may be abused, but not inoffensively or with impunity. It may be declined in the exercise of Christian liberty; it ought to be declined if doing so helps forward the cause of humanity, morality, and religion, and promotes the glory of God. In view, however, of the almost impossibility of procuring genuine wine in the United States without extravagant cost, and the fact that in order to its preservation it is invariably more alcoholic than the light wines of Bible times usually were, and especially in view of the dangerous tendency to intoxicating habits involved in the use of wine as a beverage, not only to the drinker, but to his family and friends, it cannot be doubted that the exercise of this liberty is austerely binding on them from it. This is in accordance with the apostolic precept of self-restraint (1 Cor. viii, 13).

2. There is no positive proof that the fluid used by our Lord in instituting the sacred communion was alcoholic; it is nowhere expressly called wine, but simply "fruit of the vine" (Matt. xxvi, 29). That it was wine, properly so called, however, is a fair presumption from the fact that this was the customary liquor of the Jews in the Passover meal, as we learn from the definite prescription of the Talmud ("There shall not be less than four cups of wine" [*yad], 16). Many modern Jews, it is said, use the liquor of steeped raisins for paschal purposes; but there is no trace of such a custom in ancient times.

Therefore the use of any other fluid in the communion at the present day must be justified, if at all, from prudential considerations growing out of modern temperance principles. Let us consider ourselves as liberty to vary the kind of bread (originally unleavened), the posture of the communicant, and other unessential details, to suit the convenience of the occasion and the parties. These considerations are undoubtedly of the greatest importance; yet theologically they do not redound inebriates partaking or even approaching the communion-table, where the taste or fumes of alcoholic beverage are liable to revive their appetite. If, as it is confidently claimed by many, unfermented grape-juice can be procured at a moderate cost and without great inconvenience, and can be considered with ordinary care as a sufficient length of time, and is not offensive to the sense, or otherwise particularly objectionable, there is no reason why ceremonial scruples should be allowed to stand in the way of its employment. Whether individuals not susceptible to such a danger as the above stated could be employed the serious objections from the communion where alcoholic wine is used, is quite another question, which it does not lie within the scope of this article to discuss.

IV. Literature.—This is quite copious. We mention, in addition to the works noticed above, only the most important. General treatises on fermentation, etc., of wines have been written by Henderson (London. 1831), Redding (ibid. 1851), Denman (ibid. 1864), Thudichum (ibid. 1872), and others, but they are chiefly of a commercial character. The moral aspects of the subject have been considered in numerous books and periodical articles; see also the 12th ed. of the *Bible Repository*. In 1860, we may especially refer the reader to the Biblical Repository, Oct. 1866, and
Oct. 1839; and the Bibliotheca Sacra, Jan. 1839; Jan., April, and June, 1880. Dr. F. R. Lees in various works, has strongly asserted that the wines of antiquity were largely non-alcoholic, and this view has incautiously been accepted by several others. In his class of the wines of the Bible, Stuart, Burns, etc., and by many temperance advocates; but it has been powerfully combated by others, especially Tattam, Crosby, and scholars generally. The latest and most complete treatise on this question is that of Wilson, The Wines of the Bible (Lond. 1877), which is dedicated to the memory of the late Dr. Harper, a scriptural reference, arrives at the conclusion that "so far as the wines of the ancients are concerned, unfermented wine is a myth." The effort of Samson, The Divine Law as to Wine (N. Y. 1880), to meet this testimony by garbling the ancient statements and contradicting the modern is feeble and unworthy. Treadwell observes, "All the terms for wine [in the Bible] are used in collocations which clearly show that fermentation is implied; nor is there the slightest ground in criticism for the pretense that the unfermented juice of the grape was ordinarily used." (Nat. Hist. of the Bi- ble, p. 41). An article by Rev. H. Bumsted, in the Bibliotheca Sacra for January, 1881, fairly meets the scientific, philological, and moral aspects of the "wine question" as presented by Rev. A. B. Rich, D.D., in the January, April, and July numbers of the same journal. It shows, at least, that alcohol when taken in moderate doses is innocuous, or at the very least is only properly a poison, but is assimilated and healthily disposed of in digestion; that tirah denotes the produce of the vine in general, while yāḏāh always signifies the fermented juice of the grape; and that to no one of the words translated "wine" does the Bible attach an indiscriminate and absolute condemnation. See Temper- ance.

Winebrenner, Christian, a German Reformed minister, was born Feb. 7, 1789. He entered the ministry in 1838 or 1889, taking charge of several congregations in Bedford and Huntington counties, Pa., where he labored until 1846. After this time he was not connected with the Synod, but still continued to preach until the time of his death, at Woodbury, Pa., Feb. 12, 1858. See Harbaugh, Fathers of the Germ. Ref. Church, iv. 491.

Winebrenner, John, an American clergyman, was born in Frederick County, Md., March 25, 1797. He began his ministry in the German Reformed Church, having charge of four congregations in and near Leipsic, Md., in its lamented connection with Titchele, N. B. He was accustomed to precede or follow his lectures with addresses in which he surveyed, often with truly prophetic vision, the movement of events in the world or the Church; and on those occasions he often rose to the highest point of impassioned eloquence, and urged impressions which his hearers were not likely to forget. It remains to be added that his tendency was thoroughly orthodox, and that all his impulses grew out of his perfect devotion to moral goodness. He was, however, too earnest a lover of truth to engage in the building of original systems which can only be held by their authors will not recognize the soundness of any truth that is old and approved, and also too devoted to the service of truth to endorse and repeat the old simply because it is old.

Of the written products of his life a small number belong to the department of symbols—namely, the Comparative Darstellung des Lehrbegriffs der verschiedenen christlichen Kirchenparteien (1824, 2 ed. 1837), a thoroughly scientific work:—his edition of the Augsburg Confession, with notes (1825):—and two addresses on the author of the book of Daniel written in the German in 1826 and 1830. In bibliography his Hinrich der theologischen Literatur (1821, 3d ed. 1838-40, 2 vols.; and supplement, 1842) is a monument of genuine German industry, and is valuable for its brief biographies of authors. The central object, however, about which all of Wine's literary activity turned was the Bible. Not only did he supply works reference to the Bible, but his most original, meritorious, and permanently useful work for theology was done in the field of Biblical science. He barely touched upon Biblical theology indeed, and gave but passing attention to either the lower or the higher criticism; but in inagological science he contributed valuable papers to the elucidation of questions respecting versions of the Old Testament, e. g. the character of the Samaritan Pentateuch, the value of the Chaldee paraphrases, especially of Onkelos and Pseudo-Jonathan. The interpretation of Scripture engaged his attention more than any other study. He reviewed all the books of the New Testament before his classes. But of the results of his labors he gave the world no considerable quantity—a single book, the Epistle to the Galatians (1821, 3 ed. 1829), and sections from other epistles constituting the whole. As the fruit of a whole life given to the study of exegesis, he accomplished this with a little help from others. Matters of fact from Scripture history he was on the other hand, very busy with his pen. He wrote dissertations on the taking of Tyre by Nebuchadnezzar (1848); on the question whether the gift of Jesus and his disciples (John xiii) were a Passover supper or not (1847); on whether the feet of Christ were nailed to the cross or not (1845), etc. His Bibliothec
Complete in Christ. His works, in addition to those mentioned, are, A Trip to Boston (Best, 1861, 12mo):—Three Hints on a System of Popular Education (Philad. ed. 12mo):—How Shall I Govern my School? (ed. 2mo),—Preliminary letter to a First-reading teacher in Boston (12mo):—Commentaries on the Loves of the Ancient Hebrews, with an Introductory Essay on Civil Society and Government (N. Y. 1852, 8vo). This work passed through five editions:—Adam and Christ: or, The Doctrine of Representation Stated and Explained (1865, 18mo):—Preliminary letter to a First-reading teacher in Boston (12mo):—The True Penitent Portrayed, etc. (Philad.).—Treatise on Generation (N. Y. 1863, 12mo):—The Promises of God (Philad. 1868, 18mo):—Essay on Temptation (1865, 12mo). He has also published a number of Addresses, and contributed to The Amer. Quart. Rev., North Amer. Quart. Rev., Biblical Repository, The South and South-West, The Teachings of the Sacra, Knickerbocker, etc. See N. Y. Observer, Dec. 18, 1879; Allibone, Dict. of Brit. and Amer. Authors, a. v. (W. P. S.).

Wing (prop. Πηγή, πτιψί). By this word the Hebrews understood not only the wings of birds, but also the lappet, skirt, or flap of a garment (Ruth iii, 9; Jer. ii, 34), the extremity of a country (Job xxxviii, 13; Isa. xxiv, 16); figuratively, the wings of the wind (Psa. xxi, 10), sunbeam (Mal. iv, 2); and, metaphorically, protection (Job xxi, 5). Eliphaz (Job xxi, 5) says, his wings have borne him on the wings of eagles (Exod. xxi, 4; see also Deut. xxxii, 11); that is, he had brought them out of Egypt as an eagle carries its young ones upon its wings. The prophet begs of God to protect them under his wings (Psa. xxviii, 8), and says that the children of men put their trust in the protection of his wings (xxxvi, 7). Isaiah, speaking of the army of the kings of Israel and Syria who were coming against Judah, says, "The stretching out of his wings shall fill the breadth of thy land, O Immanuel" (viii, 8).

Wing, M. T. C., D.D., a professor of the Protestant Episcopal Church, was born in Vermont in 1758, and died at Gambia, June 26, 1835. Dr. Wing was a graduate of Middlebury College, and, after studying at the Theological Seminary, Alexandria, Va., became a tutor in Kenyon College, O. At the time of his death he was professor of ecclesiastical history in the Theological Seminary at Gambia. See Amer. Quart. Church Rev. April, 1885, p. 162.

Winifred, the apostle of Germany. See Boniface.

Winkelmann, Frederick T., D.D., an American clergyman and teacher, was professor of Latin, French, and German in the Packer Collegiate Institute, Brooklyn, N. Y., and in a polytechnic school in New York City. He died in 1865.

Winnowing. See AGRICULTURE.

Winslow, Gordon, M.D., D.D., a clergyman of the Protestant Episcopal Church, was born at Williams, Vt., in 1864. His preliminary education was acquired at Andover, Mass., and he graduated at Yale in both the collegiate and theological departments, becoming a Congregational minister. In 1886 he entered the Protestant Episcopal communion, and was ordained deacon in that year. His first parish was St. John's, Troy, N. Y., from which he went, in 1886, to Trinity Church, Elmira, N. Y.; and in 1887 became rector of St. Ann's Parish, Annapolis, Md. In 1845 he assumed the pastorate of St. Paul's Parish on Staten Island, and a few years after, though still rector of St. Paul's, was chaplain at the Quarantine. At the beginning of the Civil War he was appointed chaplain to the Fifth New York Regiment. In 1863 he was made inspector of the important contributions to religious literature, and the last work on which he was engaged was seen in the Riverside Press at Cambridge, Mass., his book entitled The State of Prisons and of Child-saving Institutions throughout the World. He had prepared another book which was ready for the press, under the title of
being drowned by falling overboard from a steamer near the mouth of the Potomac. See Amer. Quar. Church Rev. Oct. 1864, p. 482.

Winslow, Hubbard, D.D., a Presbyterian divine, brother of Drs. Gordon and Myron, was born at Williston, Vt., Oct. 30, 1799. He prepared for college at Phillips Academy, Andover, Mass.; graduated at Yale College in 1818, and studied theology at New Haven; preached at Litchfield, Conn., in 1827-28; was pastor of the First Congregational Church at Dover, N. H., from 1828 to 1831, and of the Bowdoin Street Church, Boston, from 1832 to 1844; travelled in Europe; was principal of the Mount Vernon Institute for Young Ladies, Galveston, Tex., 1844 to 1853; was in the religious institutions of Europe in 1858; edited for a time the Religious Magazine, besides contributing to various other periodicals; gained considerable repute as a polemical theologian; was much employed as a platform lecturer on various topics; preached to the First Presbyterian Church at Geneva, N. Y., from 1857 to 1892; became pastor of the Fiftieth Street Presbyterian Church, New York city, in 1861; and died at Williston, Vt., Aug. 13, 1884. He published, Controversial Theology (1832); — Discourses on the Nature, Evidence, and Moral Value of the Doctrine of the Trinity (1831); — Christology to no other Social and Civil Duties (1836); — Young Man's Aid to Knowledge (1836); — Are you a Christian? An Aid to Self-examination (1836); — Mental Cultivation (1839); — Design and Mode of Baptism (1842); — The Christian Doctrines (1844); — Elements of Intellectual Philosophy (1851); — Elements of Moral Philosophy, Analytical and Synthetical (1856); and other works.

Winslow, Myron, D.D., LL.D., an eminent Congregational missionary, was born at Williston, Vt., Dec. 11, 1789. He was of the same stock as the two governors Winslow of Massachusetts, and the Kenelm Winslow mentioned in the English history of the 16th century. At the age of fourteen he entered a store as a clerk, and finally established himself in business in Norwich, Conn. During this period he was converted, and convictions that he ought to preach to the unenlightened nations took hold upon him. Abandoning a profitable business, he entered college and graduated at Middlebury in 1813, and Andover Theological Seminary in 1818. He was ordained to the ministry in 1821, and was a resident preacher at Fisk and others, Nov, 4, 1819, and in the following year embarked at Boston, arriving at Calcutta in five months. He took up his residence in Oodooville, Ceylon, in 1820, where he labored seventeen years, founding a seminary and otherwise consolidating the mission. In 1836 he was transferred to Madras. His biography during his residence in India would be no less than the history of the missions there. He founded the Madras Mission; was general secretary and financial agent of that and other missions; was president of Madras College from 1840, and head of all the native schools; had the care of a native church of several hundred members; supervised the printing and editing of various educational and religious works in the Tamil language; and was at the time of his death the oldest missionary of the American Board of Commissioners for Foreign Missions. He died at the Cape of Good Hope, on his way to America, Oct. 22, 1864.

Dr. Winslow wrote the following: History of Missions (Andover, 1819, 12mo, 432 pp.); — Hints on Missions to India (N. Y., 1856, 8vo); — A Comprehensive Tamil and English Dictionary of High and Low Tamil (Madras, 1862, 4to). "This work has received the eulogies of native, English, and our own best writers, and seems second to no other philological achievement of the age. Not merely for the profound scholarship displayed in its pages, but for the vast influence it exerts in civilizing and Christianizing India, has it called forth the thanks of the religious world. In the preparation and completion of this work, Dr. Winslow spent upwards of twenty years of continuous toil. It has one thousand pages, three columns to a page, and contains sixty-eight thousand words and definitions. Of these nearly half owe their lexicographical birth and position to the author. The dictionary contains the mythological, astrological, medical, political, official, and poetic terms of the Tamil; names of heroes, gods, goddesses, geographical and historical information, thus forming an encyclopedia of Tamil learning." Dr. Winslow is said to have devoted more study to the Eastern languages than any other American. He also conducted a continuous correspondence for forty years with the Missionary Herald, N. Y. Observer, and many other periodicals. Several Sermons and Addresses were published in pamphlet. Dr. Winslow was five times married. Memoirs of two of his wives and one of his children were published. See Cong. Quarterly, 1865, p. 209; Appleton's Annual Cyclopaedia, 1864, p. 814; Allibone, Dict. of Brit. and Amer. Authors, n. 6.

Winstanley, Thomas, D.D., a Church of England divine, was born in 1749. He studied at Brasenose College, and afterwards became fellow of Hertford. He took his degree of A.M. in 1774; published an edition of the Poetics of Aristotle; was appointed principal of St. Alban's College, in 1775; took his degree of B.D. and D.D. in 1798, and died in 1835. He was a Unitarian, though the first Oxford professor of Arabic, Camden professor of ancient history, and prebendary of St. Paul's. He died in September, 1823. See Christian Remembrancer, 1823, p. 628.

Winter (prop. יגש, sethān, Cant. ii, 11; but usually יאֹר, chōresh, which is strictly autumn, the season of ripeness; Gr. χρυμός, the rainy season). In Palestine, part of autumn and the seasons of seed-time and cold, extending from the beginning of September to the beginning of March, were called winter (Gen. viii, 22; Ps. lxxiv, 17; Zech. xiv, 8; Jer. xxxvi, 22). The cold of winter is not usually very severe, though the north winds from the middle of December to the middle of February are exceedingly penetrating. Snow falls more or less, but seldom lies upon the ground, except in the mountains (Ps. cxxvii, 17). In shady places the ice will occasionally bear a man's weight, but thaws as soon as the sun rises upon it. In the plain of Jericho the winter is more genial than the spring of northern countries, while in the mountainous country around Jerusalem it is often more severe. More inclusion might be expected (Matt. xxiv, 20). In this season the most frequent storms of hail are experienced all over the land; the brooks rise, and all their streams fill their channels, and thunder and lightning are frequent. Towards the end of January the fields become green, and there is every appearance of springing; the last rains fall in the early part of April; it is still cold, but less so, and the spring may be said to have arrived (Cant. ii, 11). See Calendar; Palestine; Season.

Winter, Robert, D.D., an English Dissenting minister, was born in London in 1762, and was pastor at New Court, Carey Street, from 1806 until his death, in 1853. He published Pastoral Letters on Nomocommity, and several works. See (Lord.) Gentleman's Magazine, 1833, ii, 277.

Winter, Samuel, D.D., an English clergyman, was born in 1603; became provost of Trinity College, Dublin, and died Dec. 29, 1666.

Wisdom (prop. יִשְׁלֹה, chokmah, σοφία), in a general sense, is a comprehensive knowledge of things in their proper nature and relations, together with the power of combining them in the most useful manner. Among the Hebrews, the term "wisdom" comprehended a wide circle of virtues, nearly coinciding with the modern ideas of virtue, knowledge, prudence, and prudence. xxviii, 3; xxxi, 6; 1 Kings iii, 38; iv, 29-34), and its precise import in the Scriptures can only be ascertained by a close attention to the context. See Fool.

1. It is used to express the understanding or knowledge of things, both human and divine, chiefly in a
practical and moral aspect, especially in the Psalms, Proverbs, and the book of Job. It was this wisdom which Solomon entreated and received of God, especially in a governmental sense.

2. The wisdom, skill, dexterity, as in the case of the artificers Bezaleel and Aholiab (Exod. xxviii, 3; xxxi, 3).

3. Wisdom is used for subtlety, craft, stratagem, whether good or evil. Pharaoh dealt wisely with the Israelites (Exod. i, 10). Jonadab was very wise, i.e. subtle and crafty (2 Sam. xiii, 8). In Proverbs (xiv, 8) it is said, "The wisdom of the prudent is to understand his way."

4. It stands for doctrine, learning, experience, sagacity (Job xii, 2; 12; xxxviii, 37; Ps. cv, 22).

5. It is put sometimes for the skill or arts of magicians, wizards, fortune-tellers, etc. (Gen. xii, 8; Exod. vii, 11: Eccles. ix, 17; Jer. i, 55).

6. The wisdom or learning and philosophy current among the Greeks and Romans in the apostolic age, which stood in contrast with the simplicity of the Gospel, and tended to draw away the minds of men from divine truth. It is mentioned (2 Cor. i, 19) "wisdom of this world" (1 Cor. i, 20; iii, 19), and "wisdom of men" (ii, 5).

7. In respect to divine things, wisdom, i.e. knowledge, insight, deep understanding, is represented everywhere as a divine gift, including the idea of practical application and is thus distinguished from theoretical knowledge (Acts vi, 10; 1 Cor. xii, 8; Eph. i, 17; Col. i, 9; 2 Tim. iii, 15; James i, 5; iii, 13, 15, 17).

Wisdom of Jesus (Son of Siraich). Book of. See Ecclesiasticus.

Wisdom (The) of Solomon. Book of, one of the deuterocanonical portions of the Old Testament, which have come down to us by tradition as the production of the son of David. Among the Apocryphal books of the Bible, it attaches to the end of the supposed parallelism with some of the genuine writings of Solomon found in the sacred canon, especially the book of Ecclesiastes (q. v.). See Apocrypha.

I. Title and Position. This book is called Σοφία Συλωμών or Σολωμώντος (Alex. Compl.), i.e. the Wisdom of Solomon, in the Sept.; and the Great Wisdom of Solomon in the Vulg. version, because it was anciently believed to have been written by Solomon, who therein propounds the lessons of wisdom. It is denominated Παντόκρατος Σοφία, All-virtuous Wisdom, an appellation which, though also given to Proverbs and Ecclesiasticus, is especially given by Athanasius and Epiphanius. It is a very extensive book, containing much wisdom and wisdom of wisdom than either of the other so-called Solomonic productions. It is called § Άνθρω πός Σοφία, Sapientia Dei, by Clement of Alexandria (Strom. iv, 16) and Origen (On Rom. xii, 14). In the Vulg. it is simply called Liber Sapientiae, without the name of Solomon, because Jerome disputed the Solomonic authorship of it. The versions of the Reformation are divided between those appellations. Thus, in Luther's version (1536), the Genevan version (1560), the Bishops' Bible (1568), and the A. V. (1611) this book is called the Wisdom of Solomon, according to the Sept.; while the Zurich version (1551), Coverdale's Bible (1550), Matthew's Bible (1567), Cromwell's Bible (1539), and Cranmer's Bible (1540) denominate it The Book of Wisdom, after the Vulg.

The book is placed in the Sept. and in the Vulg. after the Song of Songs and before Ecclesiasticus, or immediately after the deuterocanonical productions of Solomon, since it was believed that it, too, proceeded from this monarch. Though all the translations of the Reformation followed the example of Luther's version in separating the deuterocanonical from the canonical books, yet they have deviated from their prototype in the order of the books, while Luther, in his Bible, places this book between Judith and Tobit, the Zurich version—which, as usual, is followed by Coverdale, and again by Cromwell's Bible, Matthew's Bible, the Bishop's Bible, and Cranmer's Bible, as well as the Genevan version and the A. V.—places it between the additions to Esther, for Esther and Ecclesiasticus.

II. Design, Division, and Contents.—The object of this book is both panentheistic and apologetical. It comforts and strengthens the faithful who are distracted by the inexplicable difficulties in the moral government of the world, by showing them that whatever sufferings and conflicts they have to bear from their persecutors, their brethren and their heathen oppressors, and however much the wicked and the idolaters may prosper here, the elect, in following the counsels of divine wisdom, will be able to look forward with joy to a future state of retribution, where the righteous Judge will render to the ungodly according to their deeds, and confer upon the godly a blissful immortality.

This purpose is developed in three sections, the contents of which are as follows:

1. The First Section (i, 1–vi, 21), which contains the real problem of the book, opens with an admonition to the magnificence of the earth to follow the path of righteousness, since God only reveals himself to and abides with those who are of an upright heart (i, 1–6), and duly registers the deeds of the wicked, which he will most assuredly bring before the bar of a future judgment (ver. 7–16). For although the wicked deny the immortality of the soul (ver. 1–4), and stir up the pleasures of this world (ver. 7–9), and persecute the righteous, defying God to defend them (ver. 10–24); and though the case of the godly seems almost forlorn, yet God exercises a special care over his people, whom he allows to be chastised and to puny to them (i, 7–17), and has destined his saints to judge the nations of the earth, and to abide forever with their Lord (ver. 8, 9); while he has laid up condign punishment for the wicked (ver. 10–18).

The wicked who have large families are therefore not to be envied, for their children only perpetuate their wickedness to the third generation (i, 18–21), and are suddenly overtaken by death are not to be despised, since honorable age is not to be measured by length of years, but by holiness of conduct, and since they are sometimes suddenly taken away to escape the snares of the wicked: thus showing that God's mercy is with his saints even in their adversity (i, 22–27), and that their being perfected in their youth, though dead, speak condemnation to the wicked, who shall at last, in the great day of retribution, be constrained to confess it (ver. 8–20).

For then the righteous shall triumph, and the wicked who shall witness it will confess with anguish of soul to the justice of the decree and the severity of the sentence that those whom they have derided and persecuted in this life are really the children of God, enjoy a glorious immortality, and deal out terrible punishments on the ungodly (v, 1–23). Having shown that this is the doom of the wicked, Solomon reiterates in more earnest tones the warning to the magnificence of the earth with which this section commences, seeing that the righteous Judge who invested them with the powers they possess will soon call them to the bar of his judgment, where there is no respect of persons (vi, 1–8); and tells them that the most effectual way to obey this warning is to learn divine wisdom, who is always ready to be found of those that seek her (ver. 9–14), who alone is the safest guide in this world, and leads to a union with the Creator in the world to come (ver. 15–21).

2. The Second Section (vi, 22–lx, 18) describes the nature of this wisdom, the blessings she secures, and the manner in which she is to be obtained. First of all the presence of Solomon, who recounts himself in the first person. He tells us that, though an exalted monarch, he realized his mortality, and therefore prayed for wisdom (vi, 22–vii, 7). With this precious gift, which he preferred above thrones, riches, health, and beauty, he came all the way through life, while the wicked, who were his mother (ver. 8–12). Through her he became the friend
WISDOM OF SOLOMON

of God, whose she is, and who bestows her as a gift (ver. 13–16). By her aid he fathomed the mysteries of the changing seasons, of the heavenly bodies, and of the animal and vegetable kingdoms, as she herself is the maker of all things, and pervades all creation. She alone unites us to God with ties of friendship, and no vice can defile us. The virtues of the Virgin, 11–14. She offers all earthly blessings, all intellectual and moral powers, as well as the ability to govern nations, and she can only be obtained from God in answer to prayer (viii, 1–21).

Solomon then recites the prayer in answer to which he received this divine gift (ix, 1–12). The second, 12–22 describes the blessings which wisdom secured to the people of God, and the sore calamities which befell the ungodly who rejected her teaching, from the history of mankind, beginning with Adam and ending with the conquest of the Promised Land. Thus it shows how wisdom guided and protected the pious from Adam to Moses (x, 1–xi, 4): how the wicked who despised her counsels and afflicted the righteous were punished, as seen in the case of the Egyptians (xi, 5–xii, 1) and the Canaanites (xii, 2–27). As the chief sin of the Canaanites was idolatry, so the chief sin of the Egyptians was the worship of false gods.

Abominations of idolatry (xiii, 1–xx, 19), and then returns to describe the plagues of Egypt, which constitute an essential part of the history of the question, thus showing the awful doom of the wicked and the great deliverance of the righteous (xiv, 1–xii, 22).

From a critical and systematic analysis of its contents, it will be seen that the book forms a complete and harmonious whole; the grand problem discussed in the first section being illustrated in the second section by the experience of Solomon, and in the third section by the experience of God’s people, detailed in the third part of the work. Indeed, the unity and integrity of the book were never questioned till the middle of the last century, when Houbigant (Prolegomena in Not. Crit. in Omnes V. T. Libros, p. 29, xxxvi, cxxxi) maintained that it consists of two parts, the first (ch. 1–ix) being written by Solomon in Hebrew, and the second (ch. x–xix) being most probably an addition of the Greek translator of the first part.

Eichhorn submits (Einleitung in d. Apokryph. p. 145 sq.) that the two parts, which belong to different authors, are x–i, and xi, 2–xix; or, if proceeding from the same author, that he must have written the second part in his younger years, before he divested himself of his national prejudices, and before his notions were enlarged by Greek philosophy. Bretschneider, again (De Libri Sup. Parte Priori), will have it that it consists of four different documents, the first of which (i, 1–v, 8) is a fragment of a larger work originally written in Hebrew by a Palestinian Jew connected with the court of Antiochus Epiphanes; the second (vii, 9–x) was written in Greek at the time of Christ, by an Alexandrian Jew, who put sentiments of Greek philosophy into the mouth of Solomon in order to vindicate for the Jews the honor of having possessed all philosophic systems and sciences prior to every one else. The third (viii, 1–xix, 2–26) was written by a common Jew, who possessed the crudest notions; while the fourth piece (xi, 26–36) was added by the compiler of the book to connect the second and third parts. These must suffice as specimens of the opinions entertained by some respecting the unity of this book. They are most ably and elaborately refuted by Grimm (Comment. p. 9–15).

The integrity of the book is not only impugned by those who dispute its unity, but by some who admit that it has a regularly developed plan. Thus Grotius will have it that it is imperfect and unfinished, having been left by the hand of the original author. On the contrary, Calvin, who also maintains that the book is unfinished, hesitates to decide whether the end was lost by accident or through the unfavorable circumstances of the times, or whether it was designedly omitted by the author himself. But a conclusion more aptitude and more in harmony with the design of the book can hardly be imagined than xix, 22, in which the just reflection and moral lesson are enunciated as deduced from the whole treatise, that the righteous are under God’s special care, and that he “assists them in every time and place.”

Equally untenable is the assertion that the book contains internal contradictions. A Christian exposition was first made by Grotius (“Christiana quodam commodis locis addit,” Prof. in Librum Suppl. Magistri Josephi Vossi, in his who in his Comment. specifies iv, 7, where he remarks, “Sed hae, ut dixi, Evangelium magis reddent.” Grätz Geschicht der Juden [2d ed. Leipzig, 1868, iii, 439 sq.], who advocates the same opinion, admits that Grotius had consulted Grimm’s masterly commentary on the passages in question when preparing the second edition of the whole of his history, he would not have reprinted so literally the remarks from the first edition on this subject.

IV. Philosophical and Doctrinal Character. — 1. Though there are Platonic and Stoical sentiments in this book, it is not to be considered that the Wisdom of Solomon propounds therein a philosophical view of Judaism.

The book of Wisdom contains no greater admixture of Greek elements than the post-Babylonian canonical writings contain of Persian elements. It is essentially based upon the truths embodied in the Old Test., whose spirit it is, and which it expounds with the due regard to its paramount, while the Greek sentiments are very subordinate, and are such as would almost enter spontaneously into the mind of any educated Jew residing in such a place as Alexandria.

The doctrines of divine and human wisdom (or objective and subjective wisdom as it is termed) contained in this book are simply amplifications and bolder personifications of what is to be found in Proverbs and Ecclesiastes. This may be seen in the conception of divine wisdom being an emanation from, or the Spirit of God present with, the Deity before and during the creation of the world, and brooding over the elements of the unformed world (Wis. vii, xx, 25; ix, 19; iv, 22–26; Job xxxiv, 19; iv, xix, 19; Prov. iii, 19; viii, 22–26; Job xxxii, iv, x, 7; comp. Prov. iii, 19; viii, 22–26; Job xxxii, 4; Ecclus. xxxiv, 9); in the view that human wisdom proceeds from the primordial divine wisdom which permeates all finite and pure spirits (Wis. vii, 25; comp. Job xxxii, 4; Prov. ii, 6; Ecclus. i, 1), for which reason the two notions frequently merge into one another (Wis. vii, 12; viii, 6; x, comp. Prov. iii, 13–20); that she is “the universitas litterarum,” she teaches us all arts and sciences —cosmology, chronology, meteorology, astronomy, zoology, pneumatics, psychology, botany, pharmacy, politics, philosophy of history, parables, and enigmas (Wis. vii, 17–21; viii, 8; comp. Exod. xxxi, 3; 1 Kings iii, 12; iv, 29–34), and the whole range of moral and spiritual virtues (Wis. i, 18; x, 1–15; Prov. i, 7; iii). See the article preceding.

Not only does the author of this book derive his lead-
the depth of the sea—thus violating both its connection with the following verse, as indicated by διά τοῦ ἀνάθεμα of the sense of ἀνάθεμα, which is not to bring out, but to spit out, to cast out—is based upon a tradition which tells us that the sea spit out the corpses of the Egyptians as they did not know from the Shekhinah. This tradition is given in the Mechina, the so-called Chaldean paraphrases of Jerusalem, and Jonathan ben-Uzziel, On Ezek. xx. 12, and Pirke de Rabbi Eliezer, sect. xii., and is at the basis of the account in Josephus (Ant. ii, 16, 6). Our author also follows tradition in his re- mark p. 31, line 39, that the Targum is as stated in Numb. xx. 9, but to God, which saved the Israelites (Wisd. xvi, 7; comp. Rosh hash-Shanah, 26; Jerusalem Targum; and Rashi, On Numb. xxii, 9), that the manna (Numb. xii, 6) had all manner of pleasant tastes (Wisd. xvi, 20, 21; comp. Yoma, 76); that prayers must be offered to God before the sun rises (Wisd. xvi, 28; comp. Mishna, Berakoth, 2), that Sodom was destroyed because its inhabitants were inhospitable to strangers (Wisd. xix, 17, 18; comp. Sankedrin, 109), etc.

With these facts before us, we entirely differ from Gföhler (Phil. ii, 207 sq.), Dähne (Jiid.-alexand. Rel. 153 sq.), and others, who maintain that the author of this book derived his leading tenets from Alexandrian, and more especially from Platonism, philosophy, and fully concur with Ewald (iv, 549), who remarks that to the closing day of the Old Testament as well as with our author is the peculiarity that he derived the doctrine of immortality from the above-named source. The specification of the σώματα σωτηρίου, φως, ζωης, δικαιοσύνη, and άνδρα as the four cardinal virtues, both here (Wisd. vii, 7) and by Philo (ii, 455 sq.; iv, 54 sq.; xv, 18 sq.; xv, 22 sq.; where δικαιοσύνη is put for φως, etc.; xv, 7, where there is a similar change) is indeed real Platonism, and is derived entirely from the Platonic school. But even these four virtues appear in vii, 7 as merely secondary, and in the whole connection of the treatment of the book as accidental." Welte (Erläuterungen, p. 163 sq.), indeed, who does not dispute the agreement of the book of Wisdom with Alexandrian philosophy, goes so far as to say that it only refers to such things as are also more or less clearly expressed in the canonical books of the Hebrew Scriptures.

2. In its religious doctrines the book of Wisdom is one of the most remarkable and instructive contributions to the literature of the Jewish theology before the advent of Christ. It shows how the tenets of the Jews were preparing them for the teachings of the New Testament. Thus it tells us that God is not the author of death, but made both man and all creatures in the image of his own eternity, and delighted in the whole of his creation (i, 13, 14; xi, 24), which he made for perpetual duration (i, 14; comp. Rom. viii, 20, 21). Death entered into the world through the envy of the devil (Wisd. ii, 24). We have here the first instance on record where the serpent which tempted the protozoa in Paradise is identified with the devil (ver. 24), thus confirming the explanation given of Gen. iii, 1-15 in John viii, 44; Rev. xii, 9, 11, 22. Grätz (Gesch. iii, 448 sq.), who cannot brook so striking a confirmation on the part of the Jews before Christ to the correctness of the teachings of the New Testament, will have it that this is one of the passages interpolated by a Christian hand. But there is very little doubt that the Jews believed in the identity of the serpent and Satan long before the advent of Christ (comp. Ginsburg, The Kabbalah [London, 1885], p. 29), and that this notion has even passed over into the Punic religion (comp. Hengstenberg, Christologia, iv, 401 sq.).

The book of Wisdom, moreover, shows that the doctrine of immortality and a future judgment was most emphatically believed and was generally current among the Jews (i, 16, 6; ii, 15, 16, 18; iii, 17); that the Israelites believed that the wicked attract death by their sinful deeds (i, 10); that the saints, who are the chil-
tion of the fetus in the mother's womb is at variance with Philo's notions upon the same subject (Wisd. vii, 2; comp. Philo, De Mundi Opif. in Opp. i, 13). (2) The text of this book is distinctly declared that the Egyptians were punished with serpents, which Philo distinctly denies (Wisd. xii, 15; xvii, 9; comp. Philo, De Vit. Mox. in Opp. ii, 97 sq.). (4) The darkness with which the Egyptians were visited is described in this book as having proceeded from the infernal regions, while Philo assigns it to the eclipse of the sun (Wisd. xvii, 14; comp. Philo, De Vit. Mox. i, 21). (5) The view that the serpent which tempted our first parents is the diabolically opposed to that of Philo, who does not recognize such an evil power in the world, and regards the serpent as a symbol of pleasure (Wisd. ii, 24; comp. Philo, De Mundi Opif. in Opp. i, 38). (6) The description of the idolatry of the world in this book is totally different from that of Philo (Wisd. xii, xiii; comp. Philo, De Monarch. § 1-3, in Opp. ii, 213 sq.). (7) The idea of divine wisdom, which in the centre of this book is different from that of Philo. The author of the book has thrown a new light upon the subject of wisdom, which shows a trichotomy of human knowledge, nor even with the doctrine of ideas, which forms a most essential and organic part of Philo's system, as is evident from the fact that he makes no allusion thereunto in such passages as i, 8; vii, 19 sq.; ix, 15; and especially vii, 22 sq., where it would have been most appropriate, and where it would undoubtedly have been found, had the writer known the points in question.

The force of these arguments against Philo Jäckel, and yet the unwillingness to relinquish the traditional name, have led many Roman Catholics and some Protestant scholars (vz. Lortzus, Bellarmine, Huetius, Drustus, Wernsdorf, Buddeus, etc.) to resort to the theory that it was not the well-known philosopher, but an older Philo, who either composed the book of Wisdom or put it into its present form. But the fatal objection to this is that the elder Philo was, according to the expression in Philo, pp. 234 sqq. Deuteronomy 1:26, a heathen; and could not therefore have written this book.

Still more far-fetched is the theory of Dr. Tregelles, that it was written by an unknown Christian of the name of Philo, basing it upon the passage "et Sapientia ab amicis Solomonis in honorem ipsi scriptam in" the Authorized translation of the Greek original, that may have read, η α' Σαπιες Σαλωμους ὑπὸ Φίλωνων, instead of ὑπὸ Φίλωνων (Journal of Philol. 1855, p. 37 sq.).

Being thus compelled to relinquish the name of Philo in whatsoever form, Augustine would at first have it that Jesus, son of Junias, was the author of this book (De Doctr. Chr. ii, 8), but afterwards retracted his opinion (Retractt. ii, 4; De Civ. Dix. xvii, 20, 1).

Faber, again, maintained (Prolegomena a Libro Sap. [Ansach, 1776-77], 1-vii, pt. v) that it was written by Zerubbabel, who might justly call himself the second Solomon, because he restored the Solomonic temple, but as all the arguments against the Solomonic authorship are equally to be urged against this theory; and, moreover, as ix, 3 can only be applied to Solomon, and as the whole tone of the book shows that this monarch is meant, Faber's conjecture has not been espoused by any one else.

Neither can the more plausible theory of Lutterbeck (Die neutestamentl. Lehrbegriffe [Mayence, 1852], p. 407 sq.) be sustained, that Aristobulus (flourished B.C. 150) wrote it. Because (1) he was a favorite of Ptolemy VI Philometor (67-46 B.C.) and not of the younger Ptolemy, the nearest contemporary of the time against kings (comp. vii, 1 sq.). (2) The Jews in Egypt enjoyed the greatest distinctions under this monarch, and were treated with the highest confidence, so much so that Philometor and Cleopatra intrusted the government and the army to Jews (Josephus, Contra Apion. ii, 5), whereas the Jews in Egypt suffered under the most rigorous treatment when under Cleopatra (Wisd. x, 5 sq.; xii, 23 sq.; xvii-xix; Grimm, Comment. p. 21). For these reasons modern writers have given up all attempts to discover the author's name.

2. Equally divergent are the opinions of commentators and historians respecting the date of the book, as will be seen from the following statements:

Sept., the Syriac and Arabic versions, Clemens of Alexandria, Tertullian, etc. B.C. cir. 1000
Faber, 1000
Grotius, 1500-300
Weiss, 1500-300
Grimm, 1500-300
Grütter, 1500-300

Some ancient fathers, De Lyra, Luther, bishop Cosin, Grütz, etc. a.D. cir. 30-80

All, however, that can be deduced from internal evidence upon this subject is that (1) the author of the book was an Alexandrian Jew, or that he resided in Egypt and wrote for his coreligionists in the land of their former bondage, as is evident from the details of the Egyptian animal-worship (ix, 15; xii, 24; xv, 18 sq.); from the involuntary adoption of certain Alexandrian notions and phrases as shown above; from the allusion to the events in the history of Assyria; and from the apologetic nature of the book, not specifying the names of these patriarchs—viz. to the directing of the course of the righteous in a piece of wood of small value (i.e. Noah and his family in the ark; comp. Wisd. x, 4 with Gen. vii, 1 sq.); to the preservation of the righteous man blameless unto God (i.e. Noah); to the saving of the righteous man from the burning of the cities (Wisd. x, 5 sq.; comp. Gen. xix, 15 sq.), which could only be made by a Jew, and only be understood by Jews; and from the exalted terms in which he speaks of the Jewish nation, of the permanent obligations of the Mosaic law, and of Palestine (Wisd. ii, 12; iii, 8; 7); and from the Haggadic embellishments of the Old-Test. narratives, as has been shown in the preceding part of this article. These facts, therefore, completely set aside the opinion of Kirschbaum (Der jüd. Alexandriaeisimus [Leips. 1841], p. 82), Weisse (über die Zukunft der europ. Kirche [Ibid. 1849]), p. 235), Noak (Der Ueberg. der Christl. Lehren auf die Griech. Sprache, etc., that this book is the work of a Christian hand; and that (2) it was written after the Sept. (i.e. Ptolemy II Philadelphus, B.C. 284-246), for, as we have seen, he quotes the Pentateuch and Isaiah according to this version. He, however, composed it some time before Philo (B.C. 140), because he found the Mosaic law more imperative than the Jewish statutes, and the greater depth of the degree of development which the religious philosophy of Alexandria had attained among the Jews in the interval between the author of Wisdom and the writings of Philo. The sufferings referred to in this book (ix, 5 sq.; xii, 25 see viii-xix) are most probably those which Ptolemy VII Phoenix (B.C. 140-117) heaped upon the Jews in Alexandria (comp. Josephus, Contra Apion. ii, 5; see Grütz, Geschichte der Juden [2d ed.], iii, 66). The hypothesis of Dr. Rainfall (Cena. litt. Apocr.) 'that it was written in the time of the emperor or Caesar, who would have his statue set up and adored in the temple of Jerusalem (Suetonius Vit. Cæs. § 22), and that xiv, 10-20 deprecates his blasphemous attempt at self-defilement, which is followed by Noak (Der Ueberg. des Christenthums, i, 222 sq.) and Grütz (Geschichte der Juden, iii, 442), is based upon precarious interpretations of the text and has not been approved by Grütz, p. 99).

The conclusion (g) shows conclusively that it gives the writer's opinion respecting idolatry, which he, in common with many learned heathen of his day, traces to the deification of man, as is evident from the fact that several Seleucidians adopted the epithet 2εικων (2 Macc. ii, 25), and that Ptolemy I was called by his subjects 2εικων, and that his successors and subjects gave him the title 2εικων του θεον, and erecting to them altars and temp-

VI. Original Language and Style.—Believing it to be the work of Solomon, many of the ancient fathers, and several modern writers, both Jews and Protestants, as well as most of the scholars of the language, have held that the language of Wisdom was Hebrew. Even Grothus, though not regarding it as the production of Solomon, believed it to have been originally written in Hebrew, while Houbigant advocated a Hebrew original for the first nine chapters, and Bretschneider and Engelbrecht restricted it to the first six. The latter held that the author of the "Arab. de Rossi" again would have it that Solomon wrote it in Aramaic in order to send it to some king in the extreme East ("Meer Enagim" ed. Vienna, 1829, 281 b). But Jerome had already declared that there was no Hebrew original extant of this book, and that it was originally written in Greek, as is evident from its style ("Secundus qui Sapientia Solomonis inscribuit" apud Hebraeos nunc est, quin et ipsae stylum Graecum eloquentiam redoleat" [Pref. in Libr. Sali.]). This remark is fully borne out by (i.) The numerous compound expressions, especially adjectives (e. g. κακοθεμως, i. 4; x, 16; κακοθεμως, i. 17, 18; κακοθεμως, xii, 16, 17; comp. also i. 6, ii. 10; iv. 8; v. 22; vii. 3, 13, ix. 5, 15, x. 3, xi. 17, xii. 5, 19, and for ἄφιξης λεγο

nu, vii. 1, xii. 3; xiv. 3, 25; xv. 8, xvi. 3, xvi. 21), which have no corresponding terms in the Hebrew. (2.) The tone and character of the style. In accordance with the nature of the language, the lexicai Haerisms (ε. g. ἄτροχος καρδιας, i. 1, μετερος, ii. 9, πριτζος, ii. 15, λογι

ζωας εις τι, ii. 16, πλημνον κουσρ, iv. 13, Ἰσιον του στοιρο, iv. 15), the numerous Hebrew parallelisms, etc., these are to be expected from so thorough an Israelite and admirer of Hebrew literature, as the author manifestly was; and when it is borne in mind that the author breathes throughout the whole of his work the spirit of the Old Test.; that the book of Wisdom is a Hebrew version of the same tradition wherein Solomon is represented as having philosophically refuted scepticism and tyranny, of which traces appear elsewhere in the later Jewish literature; and that the author took the ancient Hebrew poetry for his model.

The style of the book is very uneven. Some portions of it are truly sublime, and will bear comparison with any passages in the best classics; as, for instance, the delineation of the sensualist (ii. 1 sq.), the picture of future judgment (v. 15 sq.), and the description of wisdom (vi. 22—viii. 11); while in other passages the author, as bishop Louth remarks, "is often pompous and turgid as well as tedious and diffuse, and abounds in epithets, directly contrary to the practice of the He

brews" (Lectures on the Sacred Poetry of the Hebrews, Prelect. p. xxiv).

VII. Canonicity and Authority.—Though the book of Wisdom, like the other deuter-cano nal books, was nev

er included in the canon of the synagogue, as is evident from the literary citations given the Turim mud (Quaerelath, § 14); and though it is not found in the catalogues of Origen, Jerome, Epiphanius, Athanas

ius, Cyril, etc., yet there can but little doubt that it was held in great respect among the Jews, and that the apostle Paul was familiar with its language, as may be seen from the striking parallels in Rom. ix. 21 to wisdom, x. 7; in Rom. ix. 12 to xii. 10; in Eph. vi. 13—

17 to Wisd. v. 17—19. The next allusion to it, though also not by name, is to be found in the epistle of St. Clement to the Corinthians (i. 27; comp. Wisd. xvi. 22; xii. 12); and Eusebius tells us (Hist. Eccles. v. 26) that Ireneus made use of it in a lost book. Clement of Alex and Hippolytus, though the latter supposes the language of canon to be the language of Wisdom, is quoted with the introductory phrase η ζυδι σαφει λευχα (Strom. iv. 16, p. 699, ed. Potter). It is also quoted as such by Origen (Contra Celsum, iii. 72), Tertullian (Advera. Va

lent. c. 11), Cyprian (Exhortat. Martyr. 12), Cyril (Catech. ix. 127), etc. Hence it was declared as canonical by the third Council of Carthage (A.D. 397), and the concil

s of Sardis (A.D. 347), Constantinople in Trullo (A.D. 692), Toledo (A.D. 675), Florence (1438), and in the fourth session of the Council of Trent (1464). With other deuter-cano nal writings, it remained in the canon till the time of the Reformation, when Luther first separated it and put it together with the rest of the Apocrypha at the end of the Old Test. Still Lu

ther spoke of it with great respect (Vorrede auf die Weis

heit Solomonis in his translation of the Bible, ed. 1534). In the Anglican Church the book of Wisdom is looked up on with still greater favor. Thus chapters xii., xiv. and xvi. are quoted as Scripture (Sermon against Peril of Idolatry, pt. iii. viii. 1, 16; xiv. 10; xii. 8, are cited as the work of the same wise man (Sermons for Rogation Week, pt. iii.); iii. 11; xiii. 5, are quoted as Scripture (Sermon against the Batch of the Lord's Enemies, 2. 11; and ch. v is referred to as Holy Scripture (Against Wil

ful Rebellion, pt. vi.) See Deuter-Cano nal.

VIII. Test.—The book of Wisdom is preserved in Greek and Latin texts, and in subsidiary translations into Syriac, Arabic, and Armenian. Of these latter, the Armenian is said to be the most important; the Syriac and Arabic versions being paraphrastic and inac

curate (Grimm, Einleit. § 10). The Greek text, which, as appears above, is undoubtedly the original, offers no remarkable features. The variations in the MSS. are confined within narrow limits, and are not such as to suggest the idea of distinct early recensions. Nor is there any appearance of serious corruptions anterior to existing Greek authorities. The Old Latin version, which was left untouched by Jerome (Pref. in Libr. Sali., "In eo libro qui aliqua Sapiendia Sali

monis inscribuit ... calamo temperavi; tantummodo etiam canonicam redactum esse meum certis magis quam dubius commendare"). in the main, a close and faithful rendering of the Greek, though it contains some additions to the original text, such as are characteristic of the old version generally. Examples of these additions are found: i. 10, Injustitia est autem morte est ascipti: ii. 8, Nulium prae tum non fore. Jeremiam non prout moluzat luxuria nostra; ver. 17, et sciens que

rum novissima illius; vi. 1, Melior est sapientia quam vires, et vir prudens quam fortis. And the construction of the parallelism in the two first cases suggests the belief that there, at least, the Latin reading may be correct. But other additions point to a different con

clusion: vi. 23, diligite lexem sapientia omnes qui pre

estis populos; viii. 11, et facies principium mirabatur me; ix. 19, quicumque placuerit tibi domine un principio; xi. 5, a defectio potus estui, et in eis ambustum filiui Israel latrat.

The chief Greek MSS. in which the book is contain

ed are the Codex Sinaiticus (N), the Cod. Alexandrinus (A), the Cod. Vaticanus (B), and the Cod. Ephraemi rescr. (C). The entire text is preserved in the three former; in the latter, only considerable fragments: vii. 5—10; xiv. 19—xvii. 8; xviii. 24—xix. 22.

Sabatier used four Latin MSS. of the higher class for his edition: "Corbeilenses duos, unum Sangerma

nensem, et alium S. Theodoric de Remos, of which he professes to give almost a complete (but certainly not a literal) collation. The variations are not generally important, but patristic quotations show that in early-
Wiseman, Nicholas Patrick Stephen, Cardinal, and chief of the English Catholic Church in England, was born at Seville, Spain, Aug. 2, 1802, of Irish and Spanish extraction. At an early age he was brought to England, and placed in St. Cuthbert's College, at Ushaw, near Durham. He was thence removed to the English College at Rome, where he was ordained a priest, and made a doctor of divinity. He was a professor for a time in the Roman University, and was then made rector of the English College at Rome. In 1828 he published his Hora Syriaca. Dr. Wiseman returned to England in 1835, and in the winter of that year delivered a series of lectures upon the leading doctrines of the Catholic Church, at the Sardinian Chapel, in Lincoln's Inn Fields. About the same time he delivered his Lectures on the Connection between Science and Revealed Religion, for which he is best known in Protestant literature. He subsequently repaired to Rome, and is understood to have been instrumental in inducing pope Gregory XV to issue the vicar apostolic of England.

The number was doubled, and Dr. Wiseman came back as coadjutor bishop to Dr. Walsh, of the Midland District. He was also appointed president of St. Mary's College, Oscott. In 1847 he again repaired to Rome on the affairs of the English Catholics, and prepared the way for the subsequent change which took place in 1848, which was delayed by the troubles that ensued at Rome. He was now made pro-vicar-apostolic of the London district in place of Dr. Griffiths, deceased. Subsequently he was appointed coadjutor, cum jure successionis, to Dr. Walsh, who was translated to London; and in 1849, on the death of Dr. Walsh, he became vicar-apostolic of the London district. In August he went again to Rome, "not expecting," as he said, "to return to England again." But in a consistory held on Sept. 30, 1850, he was elected to the dignity of cardinal by the title of St. Pudenziana, and was appointed archbishop of Westminster, a situation of much angry controversy in the papers, and resulted in the Ecclesiastical Titles Bill. He died in London, Feb. 15, 1865. Dr. Wiseman was a moderate polemic, a fine scholar, an elegant orator, and an accomplished critic. He was from the first one of the chief contributors to, and joint editor of, the Dublin Quarterly Review, the author of numerous pamphlets bearing more or less directly on the religious controversies of the past quarter of a century. His Essays have been reprinted in three volumes. He also published, Lectures on the Exxarch:—Recollections of the Last Four Popes:—Pope Pius IX; or, The Church of the Catacombs, etc. Dr. Wiseman was the seventh English cardinal since the Reformation. The other six were Pole, Allen, Howard, York (a son of the Pretender, who was never in England), Weld, and Acton. Archbishop Wiseman's successor was Cardinal Manning, the present incumbent.

Wiseman, Luke Houlé, M.A., a Wesleyan Methodist minister, was born in the city of Norwich, Jan. 19, 1822. He "was a saint at twelve and a preacher at fourteen." He entered the ministry in 1840; was elected missionary secretary in 1868, a position which he held until the close of his life; was elected to the presidential chair at the London Conference of 1872 by the largest number of votes ever recorded at such an election; and died in London, in the midst of his work and honors, Feb. 8, 1877. "As a Christian, he had deep reverence for the spiritual nature of Christianity; as a man, a love for freedom that amounted to a passion. Hence to contend for the rights of conscience, to enlarge the sphere of free action, and to assert liberty of difference among Christian churches while promoting fraternal union and co-operation, and independence of the commonwealth while maintaining patriotic loyalty and an unshaken confidence, were a sacred trust of all his duties, and he ever discharged them with matchless courage and fearless independence. As an administrator, Wiseman had learned to combine in the happiest manner the fortress in re with the suaviter in modo. . . . Never flurried, never in a hurry—always at ease and at home, courteous to all, servile to none but to whom; he succeeded in guiding skillfully the course of discussion and business, and in uniformly maintaining Christian courtesy and urbanity with judicial fairness and impartiality. Such was Wiseman—a man of open soul and loving heart, massive alive in body and mind, with a splendid spirit and a cheerful manner, was universal favorite with preachers and people, admired, trusted, loved by all. . . . His heart was too high for pettiness, too large for selfishness or envy. Faith without superstition or fear, religion without bigotry or cant, the grandeur of intellect covered with the sincerity of childhood, were found in him as found in few" (London Watchman; see N. Y. Methodist, March 20, 1875).

Wiseman passionately loved the missionary cause. He eloquently advocated it and unselfishly worked for it. Like Frankland, Perks, Coley, and other eminent men in the British Conference, he worked hard, and his sudden death was at once a surprise and a warning. Besides occasional published Sermons, Wiseman wrote, Lectures on Industries Prompted by Conscience, and Not by Conformity (1852; 3d ed. 1858);—The Employment of Leisure Time (London, 1856, 12mo);—Things Secular X. TT77

and Things Sacred (ibid. ed.).—Agents in the Revival of the Last Century (ibid. 1855) ... Men of Faith, or Sketches from the Book of Judges (ibid. 8vo);—Thoughts on Lord's Meetings and their Improvement (ibid. 1854, 12mo);—Christian in the Wilderness: Practical Views of our Lord's Temptation (ibid. 1857, 12mo). See Minutes of Conference (ibid. 1875), p. 18; Osborne, Meth. Bibliog., u. v.;—Meth. Magazine, 1875, p. 295.
tion having gained some power, and having a head for the protection of its members, he preached more boldly in Dundee, Perth, Montrose, and Ayr, creating popular tumults. He was implicated in an attempt to take the life of cardinal Beaton, but no positive proof has been brought to sustain the charge. While preaching at various places in the neighborhood of Edinburgh, he was apprehended by the cardinal's troops, conveyed to St. Andrews, tried for heresy, condemned to be burned at the stake, and executed March 28, 1546. See Rogers, Life of George Wishart, etc. (1876); MacKenzie, Lives of Scots Writers, iii, 9-19.

Wishart, George (2), D.D., a Scotch divine, was born at Yester, East Lothian, in 1609. He was educated at the University of Edinburgh; became a minister, first at North Leith and St. Andrews, where he refused to take the Covenant in 1639, for which refusal he was deprived of his living and imprisoned; made his way to Newcastle, England, where he was captured by the Scottish army in October, 1644, and taken to Edinburgh and thrown into the common jail, where he remained several months and suffered great hardships; joined the marquis of Montrose, to whom he became chaplain, and narrowly escaped execution with him in 1650; became chaplain to Elizabeth, the electress-palatine, and accompanied her to England at the Restoration in 1660; was the first Nonconformist bishop consecrated in the Church of England in 1662. He died at Edinburgh in 1671. He published an elegant Latin history of the Wars of Montrose (1647), which was hung by a cord to the neck of the marquis at his execution. He left a second part, bringing the history down to the death of Montrose, which was never published in its original form, but a number of excellent translations of the whole work have been published at later dates. See Keith, Catalogue of the Bishops of Scotland; Lyon, Hist. of St. Andrews, ii, 10-12.

Wishart, William, D.D., a Scotch clergyman, was born at Dalkeith in 1557. He was educated at Urquhart; became one of the ministers at South Leith after the Revolution; afterwards principal of the University of Edinburgh, and one of the city ministers in 1716. He died in 1727. He published several single Sermons:—some collections of Sermons:—and Principles of Liberty of Conscience (1789).

Wiser, Benjamin Blydenburg, D.D., a Congregational minister, was born at Goshen, N.Y., Sept. 29, 1829. After Rev. Dr. Axtell, of Geneva, N.Y., he acquired his preparatory training. In 1810 he joined the sophomore class in Union College, from which he graduated in 1813. For one year he was principal of an academy at Johnstown, when he returned home and began to study law. From 1815 to 1818 he was tutor in Union College, and during this time he studied theology under professor Andrew Yates, D.D. Resigning his tutorship, he entered the theological seminary at Princeton in 1818. In June, 1820, he was licensed to preach, and received a call to the pastorate of the Presbyterian church in Brunswick, N.J., which he declined; was ordained pastor of the Old South Church, Boston, Mass., Feb. 21, 1821, where he continued to serve during twelve years. From October, 1822, he labored as the secretary for the American Board of Commissioners for Foreign Missions, travelling extensively through the Union to establish new missionary organizations, etc. He died in Boston, Feb. 9, 1835. He was a member of the board of directors of the American Education Society, and was a trustee of the Andover Theological Seminary. His executive talent was undoubted, and he did not lack ability as an extemporaneous debater. His style as a writer was not imaginative nor particularly felicitous, but he was a man of commanding influence. Dr. Wiser published, Three Discourses on the History of the Old South Church:—A Sermon on the Benefits of Sunday-schools:—and a Memoir of Mrs. Huntington. He also contributed to the Spirit of the Pilgrims, and to the Comprehensive Commentary. See Sprague, Annuals of the Amer. Pulpit, ii, 682.

Wissner, William, D.D., a Presbyterian divine, was born at Warwick, N.Y., in 1782. He studied law, and practiced in Orange County; abandoned the law, and became pastor of a Church in Ithaca; was pastor of a Church in Rochester from 1830 to 1862; removed to Cedar Rapids, Ia., in 1870, and died there Jan. 7, 1871. He published, Incidents in the Life of Pastor (1861):—Elements of Civic Liberty; or, The Way to Maintain Free Institutions (1858);—besides single Sermons, pamphlets, and contributions to periodicals.

Wissner, William Carpenter, D.D., a Presbyterian minister, was born at Elmira, N.Y., Dec. 7, 1808. He was prepared for college in the Homer Academy, and graduated at Union College in 1830. He did not pursue any regular theological course at the seminary, but prosecuted his studies under his venerable father, Rev. Dr. Wissner, of Ithaca. He was licensed to preach by the Presbytery of Rochester, and in 1832 was ordained and installed pastor of the Third Presbyterian Church of that city. After remaining there for a short time, he removed to Athens, Pa., where he preached for a while, and then served the Church in East Avon, N.Y., for eighteen months. In 1846 he accepted a call to the Second Presbyterian Church of St. Louis, Mo. In 1857 he was called to the Church at Lower Lockport, and in 1848 was installed as pastor of the Dutch Reformed and Church of Lockport, and resigned on account of failing health after a successful pastorate of thirty-four years. He was for many years a trustee of Hamilton College and Auburn Seminary. He was moderator of the New School General Assembly at St. Louis in 1855. He died at Lockport, N. Y., July 4, 1890. His manner as a public speaker was peculiar, and strangers to it would at first find it unpleasant; but becoming familiar with it, they would come under his power, and find him a teacher of great originality, and would become familiar with him. His principal publication was a work entitled, Peculiarity and Parity. (W. F. S.)

Witch is the rendering, in the A.V., at Exod. xxi, 18, of זָקָע (mekoshkephah, Sept. עָקָע, Vulg. maleficis), and in Deut. xviii, 10, of the masc. form. of the same word (צָקָע, mekoshkeph, Sept. עָקָע, Vulg. maleficiis), which is elsewhere rendered "sorcerer." (Exod. vii, 11; Dan. ii, 2; Mal. iii, 5).

WITCH OF ENDOR. See Saul.

Withers, Philip, D.D., an English clergyman, became chaplain to lady dowager Hereford in 1788. He was sentenced Nov. 21, 1789, to a fine of £30 and a year's imprisonment. He was on Mrs. Fizby's staff to the Prince of Wales, in his History of the Royal Maudly (Lond. 1789). He died in Newgate, July 24, 1790. He also published a work entitled Aristarchus: or, The Principles of Composition (1791).

Witherspoon, John, D.D., LL.D., a distinguished Presbyterian divine, and one of the signers of the Declaration of Independence, was born in Yester, near Edinburgh, Scotland, Feb. 5, 1722. His father was a clergyman of the Church of Scotland, much respected for his piety and learning; on his mother's side, he traced an unbroken line of ministerial ancestry, through a period of more than two hundred years, to the great Reformers. He was himself the recipient of religious training at a very early period; pursued his preparatory studies in the public school at Haddington, where he soon evidenced remarkable powers; graduated at the University of Edinburgh, where he stood "unrivaled for perspicacity of style, logical accuracy of thought, taste in sentiment and language, correctness of diction, and elegance of style." He was called to Washington College in 1748; ordained as minister of the popular parish of Beith, in the west of Scotland, in 1748; and of the Law

Pilgrim's Progress, and to the Comprehensive Commentary. See Sprague, Annuals of the Amer. Pulpit, ii, 682.
Church in Paisley, Jan. 16, 1757; here he continued till the year 1768, when he was elected president of the College of New Jersey, and inaugurated at a meeting of the trustees, called specially for the purpose, Aug. 17, 1768. He held that office for six years, and then precluded him, and consequently he brought to the college a large accession of students, and was the means of greatly increasing its funds, and placing it on a foundation of permanent usefulness. Indeed, few men could combine more important qualifications for the presidency of a literary institution—"talents, extensive attainments, commanding personal appearance, and an admirable faculty for governing young men, and exciting in them a noble emulation to excel in their studies." He introduced many important improvements in the system of education—particularly the method of teaching by lectures, which seems previously to have been unknown to American colleges; and he actually delivered lectures on four different subjects—viz., Eloquence and Composition, Taste and Criticism; Moral Philosophy; Chronology and History; and Divinity. He likewise rendered most important service to the college by increasing its library and philosophical apparatus, and introducing the study of the Hebrew and French languages; he was also chiefly instrumental in obtaining the first orrey constructed by the celebrated Ehrtenhouse. In connection with his duties as president, he was the head of the Society during the whole period of his presidency. But he was soon to enter upon a new sphere of duty. He was selected by the citizens of New Jersey, in 1776, as a delegate to the Congress that promulgated the Declaration of Independence. He continued to represent the State of New Jersey in the General Congress from 1776 to 1782, and in practical business talent and devotion to public affairs he was second to none in that body. Many of the most important state-papers of the day were from his pen. During the whole period in which he was occupied in civil life he never laid aside his habit of reading, and when he retired from public life he was usually found at his book, "a minister of God," in a sacred as well as in a civil sense. When he retired from the national councils, he went to his country-place near Princeton, N. J., having two years before partially given up his duties as president of the college to the vice-president, his son-in-law, Dr. Sewall. He died March 16, 1812. Dr. Witherspoon was undoubtedly one of the ablest, as well as one of the most voluminous, writers of his time. He published, Ecclesiastical Characteristics; or, The Ar- cana of Church Policy (Glasgow, 1758, 8vo; 3d ed. 1754, 8vo; at least five editions). This work was aimed at certain points in the Church of England and Presbyterianism, particularly in the Church of Scotland, and by its acknowledged ability, and particularly by the keenness of its satire, it produced a great sensation and acquired immense popu- larity;—A Serious Apology for the Characteristics, in which he avows himself the author of the preceding work;—Essays on the Connection between the Doctrine of Justification by the Imputed Righteousness of Christ and Holiness of Life, etc. (Edinb. 1756, 12mo; often re-published). "This work has always been regarded as one of the ablest Calvinistic expositions of that doctrine in any language. I hope you approve Mr. Witherspoon's books. I think his Treatise on Regeneration is the best I have seen upon this important subject" (Rev. John Newton to Mr. Cunningham, in Bull's Life of Newton [1868, p. 150]);—Serious Inquiry into the Nature and Effects of the Sins (Glasgow, 1757; with Sermon by Sewall). The Scriptures and Usages of the Church of Scotland, which had its origin in the fact that Mr. John Home, a cler- cymen of the Church of Scotland, had published his well-known tragedy of Douglas, which was acted re- peatedly in the Edinburgh Theatre, where a number of the author's clerical friends attended. The Rev. John Newton to Mr. Cunningham, in Bull's Life of Newton (1868, p. 150):—Serious Inquiry into the Nature and Effects of the Sins (Glasgow, 1757; with Sermon by Sewall). The Scriptures and Usages of the Church of Scotland, which had its origin in the fact that Mr. John Home, a cler- gymen of the Church of Scotland, had published his well- known tragedy of Douglas, which was acted re- peatedly in the Edinburgh Theatre, where a number of the author's clerical friends attended. The Rev. John Newton to Mr. Cunningham, in Bull's Life of Newton (1868, p. 150):—Serious Inquiry into the Nature and Effects of the Sins (Glasgow, 1757; with Sermon by Sewall). 1611 he was at Wormer, in 1666 at Goesen, and in 1668 at Leedwarden. In these several fields of labor he earned the reputation of a faithful pastor, a superior preacher, and a scholarly thinker, and was, in consequence, honored in 1675 with a call to a professorship, and called to Leyden, which released him from the pulpit, and on Oct. 22, 1708, he closed his busy life in death.

The principal work of Witsius (De Economia Fidei et Divinae Libri IV) was published in 1677, and originated in his desire to mollify the acrimonious spirit apparent in the controversies between the orthodox and the heterodox. His plan involved no true mediation between the opposing systems, however, but merely the knocking-off of a few of the more prominent angles on the Federal hypothesis; and he succeeded only in raising a storm among the Federalists against himself, without converting the opposition to Protestantism. He was simply and only a scriptural theologian, and incapable of exercising the acuteness of a scholastic apprehension—the more, perhaps, because he thought and wrote in classical Latin. The plan of the (Econom. Fid. is confused (I, i, De Fid. Dei in Genere; ii, De Fid. Gratia; iii, De Fid. cum Eleuther.; iv, De Doctr. Salut.), The doctrine of Christ's person and work is treated in the second book, and that of the election of grace and the appropriation of salvation in the third. The fourth book contains a history of Revelation, besides the doctrine of the sacraments. The personality of Witsius was of greater importance to the Church than his theology.

Other works of Witsius are, in Latin, Judeus Christianizans:—Ecc. in Symb. Apost. et Orat. Dominicam:—Egyptiaca (Miscellanea Sacra, Medetetanae Leiden.)—Praxis Christianissim. cum Imaginibus Spirituali- bus:—and Orationes funebres, in Latin and Dutch, Libr. sacr. Viae nec, etc. It is to be added that he was well acquainted with modern languages also, especially French, in which he frequently preached without difficulty.

Egyptian Wolf.

Wolfe, Charles Godfrey, D.D., LL.D., F.R.S., a Socinian minister, was born in Poland in 1726. He was educated at Frankfurt-on-the-Oder and at Leyden; was in 1750 for some time pastor at Lissa; settled in England as preacher at the German Chapel Round St. James's, in 1770; was subsequently both in London and Oxford, and was further employed as literary and scientific writer and collector of Oriental languages. He died in London, May 7, 1790. He edited La Croze's Coptic Lexicon (1775), and Schott's Egyptian Grammar (1778). He also translated with his own hand the New-Test. portion of the Codex Alexandrinus (1786), which he afterwards published in fac-simile. At the time of his death he was engaged in preparing Fragmenta Novi Testamenti in V. Aegypt. Dialetii, etc., which was completed by Dr. Ford and published at Oxford in 1795.

Wolf (the licentious rendering in the A. V. of xny, xeb, so called either from its ferocity or its yellow color, or perhaps the word is primitive; xeb), a fierce carnivorous animal, very nearly allied to the dog, and so well known as to require no particular description, excepting as regards the identity of the species in Palestine, which, although often asserted, is by no means established; for no professed zoologist has obtained the animal in Syria, while other travellers only pretend to have seen it. Unquestionably a true wolf, or a wild canine with very similar manners, was not infrequent in that country during the earlier ages of the world, and even down to the commencement of our era. At this day the true wolf is still abundant in Asia Minor, as well as in the gorges of Cilicia, and, from the travelling disposition of the species, wolves may be expected to reside in the forests of Libanus. Herrnich and Ehrenberg, the most explicit of the naturalists who have visited that region, notice the xib, or xeb, under the denomination of Canis lupaster, and also, it seems, of Lupus stygicus. They describe it as resembling the wolf, but smaller, with a white tip on the tail, etc.; and give for its synonym Canis antius and the wolf of Egypt, that is, the xebax of Aristotle and Theon of Ham. Smith. This species, found in the mummy state at Lycolopolis, though high in proportion to its bulk, measures only eighteen inches at the shoulder, and in weight is scarcely more than one third of that of a true wolf, whose stature rises to thirty and thirty-two inches. It is not gregarious, does not howl, cannot carry off a lamb or sheep, nor kill men, nor make the shepherd flee; in short, it is not the true wolf of Europe or Asia Minor, and is not possessive of the qualities ascribed to the species in the Bible. The next in Hempich and Ehrenberg's description bears the same Arabic name; it is scientifically called Canis sacer, and is the pisanech of the Copts. This species is, however, still smaller, and thus cannot be the wolf in question. It may be, as there are no forests to the south of Libanus, that these ravenous beasts, who never willingly range at a distance from cover, have forsaken the more open country, or else that the derbom, now only indistinctly known as a species of black wolf in Arabia and Southern Syria, is the species or variety which anciently represented the wolf in Syria—an appellation fully deserved if it be the same as the black species of the Pyrenees, which, though surmise to be a wild dog, is even more fierce than the common wolf, and is equally powerful. The Arabs are said to eat the derbom as game, though it must be rare, since no European traveller has described a specimen from personal observation. Therefore, either the true wolf or the derbom was anciently more abundant in Palestine, or the ravenous powers of those animals, equally belonging to the hyena and to a great wild dog, caused several species to be included in the name. See Dog. There is also an animal of which travellers in Arabia and Syria hear much, under the name of the xib, which the natives believe to be a breed between a leopard and a wolf. They describe it as being scarcely in shape distinguishable from the wolf, but with the power of springing like a leopard, and of attacking cattle. Its bite is said to be mortal, and to occasion raving madness before death.
In 1729 Dr. Freer saw and measured the forepart and tail of one of these animals, and supplied Dr. Russell with the description which he has inserted in his book. The animal was one of several that followed the Basrah caravan from Basrah to the neighborhood of Aleppo. Many persons in the caravan had been bitten, some of whom died from a short time ensuing. It was also reported that several persons in the neighborhood of Aleppo were bitten, and died in like manner; but the doctor saw none of them himself. Dr. Russell imagines that the šābīb might be a wolf run mad. But this is a hazardous assumption, as it is doubtful whether canine madness exists in Western Asia; and unless we conclude with Col. Hamilton Smith that the šābīb is probably the same as the Thous aconum, or the wild wolf-dog of Natoia, it is best to await further information on the subject. Burckhardt says that little doubt can be entertained of the existence of the animal, and explains its fabulous origin (between a wolf and leopard) by stating that the Arabs, and especially the Bedawins, are in the common practice of assigning to every animal that is rare or neglected by man, and is related to a species of known animals" (Kitto, Phys. Hist. of Palestine, ii, 364).

The following are the scriptural allusions to the wolf: its ferocity is mentioned in Gen. xlix, 27; Ezek. xxii, 27; Hab. i, 8; Matt. xvi, 15; its nocturnal habits in Jer. v, 6; Zeph. iii, 8; Hab. i, 8; its attacking sheep and lambs in Exod. xiii, 17; John x, 12; Matt. x, 16; Luke x, 3. Isaiah (xi, 6; lxv, 25) foretells the peaceful reign of the Messiah under the metaphor of a wolf dwelling with a lamb. Cruel persecutors are compared with wolves (Matt. x, 16; Acts xx, 29). See Zeeba.

Wolves were doubtless far more common in Biblical times than they are now, though they are occasionally reported by modern travellers (see Russell, Nat. Hist. of Aleppo, i, 184): "The wolf seldom ventures so near the city as the fox, but it is sometimes seen at a distance by the sportsmen among the hilly grounds in the neighborhood; and the villages, as well as the herds, often suffer from them. It is called dib in Arabic, and is common all over Syria." The wolf is now as, of old, the dread of the shepherds of Palestine. Not so numerous, but much more formidable than the jackal, he lurks about the fields, hunting not in noisy packs, but secreting himself till dark among the rocks, and without arouses the vigilance of the sheep-dogs, he leaps into the fold, and seizes his victims by stealth. Their boldness at times, however, is very remarkable, especially in the less frequented regions. "In every part of the country we occasionally saw the wolf. In the open plain of Gennesaret my horse one day literally leaped over a wolf. In the hill country of Benjamin the wolves still remain. We found them alike in the forests of Bashan and Gilead, in the ravines of Galilee and Lebanon, and in the maritime plains" (Tristram, Nat. Hist. of the Bible, p. 154).

Wolves, like many other animals, are subject to variation in color. The common color is gray with a tinting of fawn and long black hairs. The variety most frequent in Southern Europe and the Pyrenees is black; the wolf of Asia Minor is more tawny than those of the common color. The Syrian wolf likewise is of a lighter color than the wolf of Europe, being a pale fawn tint, and seems to be a larger and stronger animal. See Fox.

WOLF, Johann Christoph, well known by his works in the field of Jewish literature, was born at Wernigerode, Germany, Feb. 21, 1683. At the gymnasium of his native place he received a solid classical education. In 1655 he went to Hamburg with his father, and here he prosecuted his preparatory studies under Anckelmann, Edward, and Fabricius. In 1708 we find Wolf at Wittenberg; in 1704 he was made a doctor, and in 1706 he was received into the academic senate; in 1707 he returned to Hamburg, and was appointed co-rector at Flensburg; in 1708 he went to Holland and England, and was thus brought into contact with the learned men of his age, as Vitringa, Hemsterhuyse, Clericus, Surenhusius, Reiland, Perizonius, Basnage, Bentley, Barnes, Cave, and others. At Oxford he stayed about six months, and spent most of his time in the Bodleian Library. In 1709 he returned to Flensburg, where he received a call to Wittenberg as professor of philosophy; in 1712 he was appointed professor of Oriental languages at the Hamburg Gymnasium, and in 1716 he became pastor of St. Catharine's. He died July 25, 1739. His main work is his Bibliotheca Hebraica (Hamburg, 1715-38, 4 vols.); the first volume contains a list of Jewish authors; the second treats of the Old Testament, its MSS., editions, etc.; the third and fourth are supplements to the first two. This Bibliotheca is still the great storehouse of information on Jewish literature; and although Jewish writers of our day speak of its deficiencies and shortcomings (but how could it be otherwise?), yet these fault-finders, while abusing the author, copy his work. Those, however, who have labored in the same department will always speak with great admiration of Wolf's Bibliotheca. Steinacker says of our author "dass Wolf an Fleiss, Ehrlichkeit, Besonnenheit, und Unbefangenheit zugleich noch von keinem christlichen und von sehr wenigen jüdischen Autoren auf diesem Gebiete übertroffen worden." (Bibl. Handbuch, p. xviii.) Besides his great work, he wrote, דניאר דוד סדר ורהו, Historia Lexicorum Hebraiorum (Wittenberg, 1705); De Una Talmudica Rabbinicoque Lectionum Eleemosynico (ibid. 1706); Noticia Karo-orum (Hamburg, 1721). See Seelen, De Vita, Scriptor, et Meritis J. C. Wolfi (Staice, 1717); Petersen, Gesch. der Hamburgischen Bibliothek (Hamburg, 1838); Erst, Bibl. Jud. iii, 529; Winer, Handbuch der theolog. Lit. i, 69, 120, 137, 140, 189, 235, 416, 642, 648, 826, 899-901; Stein-acker, Bibl. Handbuch, p. xviii sq.; 150; id. Cata- logus Libr. Hebr. in Bibl. Bodl. p. 2780; De Rossi, Dictionario Storico (German transl.), p. xiv sq. (B. F.)

Wolfenbüttel Fragments. See LESSING.

Wolfenbüttel Manuscript (Codex Guelpfer-
BITYANDI is the name given to two palimpsest fragments (A and B) of the Greek Testament (usually designated as P and Q of the Gospels), which were discovered by Knittel in the ducal library at Wolfenbüttel, Brunswick, under the more modern writings of Iulides of Seville. He published the whole in 1762, and Tischendorf quoted it fully in vol. iii. of his Monumenta Sacra Inedita (1860). The volume of which they are a part (called the Codex Carolinus) seems to have been once at Bobbio, and has been traced from Mayence and Prague, till it was bought by a duke of Brunswick in 1889. Codex P contains, on 49 leaves, 31 fragments of 480 verses from all four epistles; Codex Q, on 19 leaves, 12 fragments of 235 verses from Luke and John. A few portions, once written in vermilion, have quite departed. They belong to the 6th or 6th century. Both are written in two columns, the uncial being bold, those of Q considerably smaller. The capitals in P are large and frequent, and both have the Ammonian sections without the canons of Eusebius. See Scrivener, Introduct. p. 118; Tregelles, in Horne's Introd. iv. 179. See Manuscripts.

Wolff, Bernard C., D.D., a German Reformed minister, was born at Martinsburg, W. Va., Dec. 11, 1794. When a mere child he received the impression that he ought to be a minister, and this conviction deepened as his mental development advanced. He was sent to the best schools afforded by his native place, where he made rapid progress, especially in mathematics; and subsequently received instruction under private tutors in the family of B. M. Coulston, Esq., who lived near Martinsburg. He also pursued the study of the Latin and Greek languages for some time under the direction of the Rev. Dr. Denny, a Presbyterian clergyman of Chambersburg, Pa., with whom he made attainments which would have admitted him to the junior class in college. He was then called home by his father to engage with him in the saddle and harness making business, where he labored four or five years, until, at the age of twenty-one, he became the sole owner of the shop. In his thirty-seventh year he entered the Theological Seminary at York, Pa., completed his course in 1822, and was licensed at Frederick, Md., in September of the same year. He became associate pastor of the Church at Easton, Pa., in 1822; pastor of the First Church at Baltimore, Md., in 1844; entered upon the duties of the office of professor of didactic and practical theology in the Theological Seminary at Mercersburg, Pa., Nov. 29, 1854; resigned his professorship some years previous to his death, and devoted the remainder of his days to the interests of the evangelical Church, and of the cause of his Church. He died at Lancaster, Pa., Nov. 1, 1870. See Harbaugh, Fathers of the Germ. Ref. Church, iv. 246.

Wolff, Joseph, D.D., LL.D., not inappropriately called a meteor or comet on the missionary heaven, was born of Jewish parentage, in 1735, in Bavaria. Endowed with almost unprecedented linguistical talent, a quick power of perception, lively temperament, and great persistence, he became acquainted at a very early age with the most prominent men in different countries of Europe. In 1812 he was baptized at Prague by a Benedictine monk. While at Vienna he was introduced to the highest ecclesiastical dignitaries; lived for some time with them in their castle of Finally, he went to Rome to be educated there as a missionary. His heart was filled with the desire to proclaim the glad tidings of the Gospel to both Jews and Mohammedans. Although he enjoyed the favor of the most prominent men in Rome, especially that of pope Pius VII, and formed acquaintances which were of the greatest interest in his life, yet he could not reconcile himself to Romanism. While at Rome he spent his time in studying Oriental languages. Some liberal views which he had expressed on sundry occasions made him suspected in the eyes of the Inquisition, and he had to leave the college and the Eternal City. After many adventures, he went to London, and here he joined the Church of England. Soon he became acquainted with men like Henry Drummond, Charles Simeon, Lewis Way—the founders of the London Society for the Jews. They, perceiving Wolff's special fitness for missionary work, effectually invited him to Cambridge University, where he continued the study of the Hebrew language for two years (1821); he gathered up his studies, and commenced his adventurous life as a traveller. Amid the richest and most remarkable experiences, he travelled over Europe, Asia, America, and a part of Africa. In these journeys he became acquainted with kings and princes, as well as with the most eminent men of all ecclesiastical relations; everywhere professing Jesus as the Christ; and although he had often been imprisoned and his life had been endangered several times, yet in the greatest perils he showed an undaunted courage and great presence of mind. Mesopotamia, Persia, Egypt, Bokhara, witnessed his ardent zeal. He preached everywhere—at one time in this language, at another time in a different one; distributed the Holy Scriptures in the various languages of the East; and wherever he went he understood how to interest the most prominent men and women in the mission. In 1837 Wolff arrived in America, and was ordained by Bishop White in New Jersey. After spending some time in this country, he left New York Jan. 2, 1888, for England. Here at first occupied a small incumbency at Linlithgow, in Yorkshire; but as the climate was too cold for his health, he removed to Georgian Place, in London; (daughter of the count of Oxford). Wolff exchanged that parochial charge for the curacy of High Haldon, in the county of Devon, and there he remained for nearly five years. At the beginning of the year 1843, Wolff heard of the imprisonment of colonel Stoddart and captain Conolly in Bokhara, this induced him to return in that place in order to ascertain their whereabouts. From what he learned on this his most dangerous journey, he was convinced that Stoddart and Conolly were dead. In 1844 he returned to England and received the parson in Ille Beerwa. Here he labored for the remainder of his life, and died May 23, 1862. Before his death he fulfilled the promise made by him many years before to the Armenian and Greek patriarchs of helping them to establish hospitals in Cambrige and Oxford; the Rev. George Williams, senior fellow of King's College, Cambridge, assisted and co-operated with him in this undertaking. Wolff published, Researches and Missions of New Labor among the Jews, etc. (Lond. 1835);—Missionary Journal and Memoir, written by himself (revised and edited by J. Bagford, ibid. 1824) ;—Missionary Journal, vol. iii. (ibid. 1829);—Journal giving an Account of his Missionary Labors from the Year 1827 to 1881, and from 1830 to 1888 (ibid. 1829);—Narrative of a Journey to Bokhara in the Years 1845-46 (2 ed. ibid. 1845, 2 vols.):—but the most interesting are his Travels and Adventures of the Rev. Joseph Wolff (ibid. 1861). The latter forms the basis of Dr. H. Sengelmann's Dr. Joseph Wolff, ein Wanderling (Hamburg, 1865). (B.T.)
but, meeting with less success than he had expected, he 
accepted a call to visit bishop Pilgrim of Passau, and 
soon afterwards, through that prelate's influence, chosen 
bishop of Beverley by the chapter. He was consecrated 
and enthroned in St. Peter's Church by 
archbishop Frederick of Salzburg and his suffragans 
in 978. Soon afterwards he persuaded his chapter to 
accede to the wish of the Bohemians for a separation of 
their country from the diocese of Ratibon, and its erec-
tion into an independent see; and he also supplied the 
Monastery of St. Emmerau, over which the bishops of 
Ratisbon had always presided, with a regular abbot, and 
set apart a portion of the cathedral possessions for 
the support of the monks. He furthermore reformed the 
munneries of Upper and Lower Munster at Ratisbon, 
where the Benedictine rule was neglected, and he 
advocated that they, as canonsesses rather than regular nuns, 
were not required to practice so strict an asceticism as 
nuns; the end being accomplished through the zeal of 
the nuns of the new convent of Middle Munster which 
he founded. He was equally zealous and judicious in 
his care over the spiritual interests of his secular clergy and over the moral and physical needs of 
the common people. He was immoveably loyal to the 
emperor, so that duke Henry II of Bavaria was unable to 
persuade him to become a supporter of the rebellion 
against Otto II; and when Henry submitted, Wolfgang 
built a thank-offering church at St. Emmerau. He 
accompanied the emperor's suite in the campaign of 
978. On the return the army was pursued by the 
French, and, on reaching a swollen river, was in danger 
of being cut to pieces because the soldiers feared to at-
tempt the crossing. Wolfgang thereupon plunged into 
the stream, and the army, emboldened by his exam-
ple, escaped without the loss of a man. His influence 
led to a better cultivation of the East Marches of Bav-
aria. He built the Castle of Wiesenberg as a defence 
against the incursions of the Hungarians. He also edu-
cated the children of duke Henry, the eldest of whom 
became at a later day the emperor of Germany. After 
administering the episcopal office during twenty-one 
years, he died at Puppingen, Oct. 31, 994, and was buried 
in a chapel of St. Emmerau's. See Otto, Vito Wolfs-
kanji, in Pertz, Monumenta Germaniae Historica, vol. vi;

Wollaston, Francis, LL.D., an English clergy-
man, a grandson of William Wollaston, was born in 
1671; became rector of Chinehill, in Kent, and died in 
1815. He published, Address to the Clergy, etc. (1722): 
Queries relating to the Book of Common Prayer (1744): and 
several astronomical works.

Wolsey, Thomas, a celebrated English cardinal and 
statesman, was born at Ipswich, in March, 1471. He 
is said to have been the son of a butcher named 
Robert Wolsey, and his wife Joan, who were poor but 
reputable, and possessed sufficient means to give their 
son the best education his native town afforded. He 
than set to send him to Magdalen College, Oxford, where 
he graduated at the age of fifteen, and gained by his 
early advancement the sobriquet of "the boy-bachelor." 
He was soon after chosen a fellow of his college, and on 
taking his master's degree was appointed teacher of 
Latin and Hebrew, and was then elected Master. 
When he was made bursar of the college, and has the credit 
of building Magdalen Tower about this time. While 
at Oxford he became acquainted with Erasmus (q. v.), 
and united his efforts with those of that eminent schol-
ar for the promotion of letters. But in subsequent 
years, Wolsey entered into a more active career, 
and, after he was made a member of the University, 
while Erasmus continued to live the life of a mere scholar, the intimacy which existed between them 
began to diminish into a mere courteous formality, 
which circumstance drew from Erasmus the opinion, 
when Wolsey fell, that he was not worthy of the honor 
which he accosted him with. In 1500, while here he fell 
into disgrace. Being at a fair in the neighborhood, he 
was engaged in some kind of disorderly conduct (pos-
ibly drunk, as has been charged), and was arrested by 
one Sir Amias Poulet, a justice of the peace, and put 
in the stocks. The indignity was remembered by 
Wolsey, and when he became chancellor, Sir Amias 
was imprisoned for six years by his order. He next 
became domestic chaplain to Henry Dean, archbishop 
of Canterbury, and on his death, in 1508, was appointed 
chaplain to Sir John Nafant, through whose influence 
he became chaplain to King Henry VII. In 1504 he 
received the rectory of Bedingfield, in Norfolk, which consti-
tuted his third living. His influence and favor at 
court were rapidly increasing, and in February, 1508, 
the king gave him the deanery of Lincoln and two prebends in the same church.

The death of the king in the following year brought 
to the throne a prince of a very different character 
from the one who had just left it. Great changes were 
to be made at court by Henry VIII; but amid them 
all Wolse missed to be not only retained, but pro-
moted still further. Many circumstances favored his 
promotion. He was in the prime of life; he was ac-
customed to the court for which he was born; he was 
not a dull routine of official work. While a young 
archbishop, particularly fitted him; and he held an impor-
tant place in the Church. Added to this, there were an-
imosties between the Earl of Surrey, the lord-treasurer, 
and Fox, the bishop of Winchester, who was also keeper of the privy seal and secretary of state. Before 
the king's accession had closed, he had become lord almoner, and 
and had been presented with valuable lands and houses in 
London. In 1510 he became rector of Torrington; in 
1511, canon of Windsor and registrar of the Order of the 
Garter; in 1512, prebendary of York; in 1513, dean of 
York and bishop of Tournaul, in France; in 1514, bishop 
of Lincoln, and in the same year archbishop of York. 
In 1516 he was made a cardinal, and succeeded Warham 
as chancellor. In 1516 the pope made him legate a la-
tera, a commission which gave him great wealth and 
amongst the most powerful over the English clergy. He 
also farmed the revenues of the Church of England, 
and was held by foreign bishops, appropriating a good share to 
his own use, and received stipends from the kings of 
France and Spain and the doges of Venice. Thus Wol-
sey had secured to himself the whole power of the state, 
both civil and ecclesiastical, and derived from various 
other monopolistic sources a revenue which dazzled 
the imagination of the age, but the royalty. Yet his ambition was not satisfied. He aspired to the papacy, and had a considerable fol-
lowing in 1522 as candidate for the place left vacant by 
Leo X, and again in 1528 for that of Adrian VI.

Wolsey was fond of display, and indulged that fond-
ness to a degree that should have been the subject of 
scorn. At York Place (now Whitehall) his residence was fur-
ished with every luxury; and at Hampton Court he
WOLESLEY 1032

WOOD

built for himself a palace which he eventually presented to the king. His dress was gorgeous, his manner of living sumptuous, and his household consisted of more than a hundred persons, among whom were many people of rank—lords, earls, and the like. Yet while his train of servants consisted of these persons, his house was a school where their sons were educated and initiated into public life. While he was dazzling the eyes or insulting the feelings of people by an ostentation of wealth and elegance, he was also engaged in a general and liberal patron of literature and art. He promoted learning with a munificent hand. He established lectureships, professorships, and colleges at his own expense. He was the founder of a college, or school, which, for a time, rivaled the schools of Eton and Winchester, but was discontinued at the cardinal's fall. He also founded Cardinal's College at Oxford, which remains to-day as Christ Church.

He was an opponent of the Lutheran Reformation, and manifested his zeal against it in 1521, by procuring the condemnation of Luther's doctrines in an assembly of divines held at his own house. He also published the pope's bull against Luther, and endeavored to suppress his writings in England. But he was always lenient towards English Lutherans, and one article of his impeachment was that he was a part of a company of persons acting heretically. His ecclesiastical administration was exceedingly corrupt, furnishing to all clergymen an example of holding many prebendaries without performing the duties of any of them. The effect of this was to sow in England many of the seeds of the Reformation which followed. In 1522, he resigned the see of Durham for that of Winchester; but to the latter place he never went. About this time was the beginning of difficulties, the end of which he might have foreseen, but had no power to avert. Henry VIII desired to employ the cardinal's talents in aid of his proposed divorce from queen Catherine. Anne Boleyn was his cousin, and Anne Boleyn and her efforts and rigid adherence to legal forms and technicalities greatly exasperated the king, who was not to be trifled with even in the gratification of his baser passions. Unfortunately, too, for Wooley, his conduct had been such as to inspire the hatred of both the queen and the people.

When the king knew that he had taken steps towards procuring her divorce, and Anne Boleyn knew that he was using his influence against her marriage with the king. Added to this eminence in high place were the jealousy and opposition of the numerous aspirants for preferment who had been less successful than himself. With such a combination against him, his fall was speedily and relentlessly accomplished.

On the first day of the term, Oct. 9, 1529, while he was opening the court of chancery at Westminster, the attorney-general indicted him in the court of King's Bench for procuring a bull from Rome appointing him legate, contrary to the statute, by which he had incurred a promissio, and forfeited all his goods to the king and might be imprisoned. The king immediately sent and demanded the great seal from him, and ordered him to leave his magnificent palace at York Place. Before leaving this place he made an inventory of the furniture, plate, and other works of art, which he had added, and it is said to have amounted to the immense sum of five hundred thousand crowns. From thence he started to Esher, near Hampton Court, and was met on the way, as he was riding from Putney on his mule, by a messenger who assured him that he still retained the royal favor and supported him with a ring which the king employed as a token to give credit to the bearer. The message was received by Wooley with the humblest expressions of gratitude; but he seems not to have credited the mockery, as he proceeded on his way to Esher. Wooley might have pretended to concern himself in defence against his accuser, the king's letters-patent authorizing him to accept the pope's bull; but he merely instructed his attorney to plead, in his absence, his entire ignorance of the statute, and that he acknowledged other particulars with which he was charged, and submitted himself to the king's pleasure. The king's answer to this was that he was "out of the protection, and his lands, goods, and chattels forfeit, and his person might be seized." His enemies continued their prosecutions. Forty-four articles were presented against him to the House of Lords, which were to serve as the basis of his utter ruin. But he had a chance of evading them by his innocence. He showed that it was possible to insinuate upon him, and Parliament could do little more than sanction what had already been done. Wooley also found a friend in Thomas Cromwell, formerly his steward, subsequently earl of Essex, who defended him with such spirit and eloquence as materially to change the tide of his fortunes. His speech had the effect to cause the Commons to reject the articles, and this brought the proceedings of the lords to a standstill. During his residence at Esher, the cardinal's health was found to be declining rapidly, and the king was induced, from the impression he had that it was mental rather than physical trouble that was preying upon his vitality, to show him such kindness as revived his spirits at once. Henry also granted him, Feb. 12, 1580, a free pardon for all crimes and misdemeanors, a few days afterwards restored to him a large part of his former estates, and permitted him to return to Richmond. From thence he was removed to the archbishop's seat at Southwell; and then his residence was fixed at Cawood Castle, which he began to repair, and was beginning to gain favor with the people when the king had him arrested for high-treason, and ordered him to be brought to London. He set sail on Nov. 1, 1550, but on the road he was seized with a disorder which ended his life at Leicester Abbey on the 28th of the month. During his last hours he gave utterance to the expression, "If I had served my God as diligently as I have served my king, he would not have given me this trouble to the terrors of hell." Wooley attained his elevation by a winning address, combined with shrewdness, talent, and learning. His ambition was unlimited, his rascality great; he was arrogant and overbearing, and extremely fond of splendor and parade. But he was a great minister, enlightened beyond his age in what he called "divine business," and a good servant to the king; for when his authority was established, he checked the king's cruelty, restrained many of his caprices, and kept his passion within bounds. The latter part of Henry's reign was very far more criminal than that during which the cardinal presided over his counsels. See Henry VIII. See the Life of Wooley by Cavendish, his gentleman usher (Lond. 1664), Galt (1812), Howard (1824), and Martin (1882); Williams, Lives of the English Cardinals (Lond. 1868); Brewer, Letters and Papers, Foreign and Domestic, of Henry VIII (1870-75); and the several Histories of England.

WOMB (usually ἔτροφος, both meaning belly, as often rendered; but the distinctive term is ἐτρωγός). The fruit of the womb is children (Gen. xxxi, 2), and the Psalmist describes them as the blessings of marriage (Psa. cxvii, 3-5). See Child.

WOOD (usually δέντος, also rendered "tree," zōnos). The East, especially Egypt (Hasséquist, p. 70; Norden, p. 261), is remarkably destitute of forests, and Palestine is nearly as barren of them, except in some of the northern and eastern districts. See Tree. Consequently the inhabitants are obliged to use, instead of fire-wood, dried grass (Matt. vi, 30; Luke xii, 28), or plants, leaves, straw (Matt. iii, 12; Mishna, Shabb 311;), and, in the absence of these, dung (Ezek. iv, 9; Deut. xi, 21; Jer. vi, 24); and in Babylonian mineral pitch (Diod. Sic. ii, 12). Comp. Korte, Rei., p. 577; Taverner, 1, 280; Avicenn, i, 152; Robinson, i, 242; iii, 293; Wellsted, ii, 60. See Full. 

Digitalized by Google
An unusual supply was required for the sacrificial fire. See Burnt-offering. Charcoal was also used. See Coal. That the advantage of forests was a common property does not follow from Lam. iv, 4, and is of itself very improbable in a land where a strict system of proprietorship was in vogue. For the various fabrics of the various works of this material see Handicraft. The chief trades concerned were carpenters (Exod. xxxix, 80 sq.), cabinet-makers (xxxv, 10 sq.; xxxvii, 1, 10, 15, 25, etc.), wheelwrights (Judg. iv, 13; 1 Sam. vii, 7; 1 Kings vii, 38; ix, 19; Hos. x, 11, etc.), basket-weavers (Num. vi, 15 sq.; Deut. xxvi, 2, 4; Judges vi, 19), (carefully) imitated in the iron. On the other hand, we find no trace of co-operation (not even in Jer. xlviii, 12, where דִּבְרָנן does not casks, but vessels generally). Ancietyly, still, as the Orientals used leather bottles, horns, and jars, instead of barrels; but pails (wooden buckets) were probably unknown (Lev. xvi, 12-17). The tools of wood-workers were the axe or hatchet (דִּבְרָנָן or הַדָּבָר), the saw (צַעֵד), the plane (דָּפַק), and the auger (תַּמּוֹנָה, מִשְׁהָה, קלד, chil., 4). See generally, Bellerme, Bandb. t, 252 sq. As ships were not built by the Hebrews, and stone was the ready material for building, architecture had little use for wood. See House.

Wood, James (1), D.D., an eminent Presbyterian divine, was born at Greenfield, N. Y., July 7, 1799. He graduated at Union College, Schenectady, N. Y., in 1822; studied theology in the Seminary at Princeton, N. J.; was licensed by Albany Presbytery, and ordained and installed in 1826 as pastor of the Church at Amsterdam, N. Y.; and retained this connection until 1838, when he became agent for the Presbyterian Board of Education, laboring in the states of Louisiana, Mississippi, and Alabama with marked success; became professor of Biblical literature in the Theological Seminary at New York, N. Y.; associate secretary of the Board of Education in 1854; president of Hanover College, Hanover, Ind., from 1859 to 1866; president of Van Rensselaer Institute, Hightstown, N. J., from 1866 until his death, April 7, 1867. Dr. Wood was a man of mark in his day, and occupied many prominent places of usefulness. In the controversies which resulted in the division of the Presbyterian Church, he was a very able and successful writer. His work entitled Old and New Theology is the most comprehensive, and the fullest exposition of the reasons which led to the disruption that has ever been published. Its temper, tact, and sound learning are the peculiar strength of the writer. As professor in the Theological Seminary, Princeton, N. J., wrote as follows: "In common with all his brethren, I ever regarded him as one of our best, wisest, and most useful ministers. The important positions which he was called upon to fill are proofs of the high estimation in which he was held. His sound judgment, dignified manners, amiable temper, combined with his learning and energy, secured for him a wide and happy influence in the Church." Dr. Wood was the author of a Treatise on Baptism (1830, 12mo) — Call to the Sacred Office: — The Best Lesson and Best Time: — The Angel Fountain (1830); New and New Life (1855, 12mo); Grace and Glory (1860, 18mo). He published also four educational pamphlets, and contributed a Memoir of the Author to Rev. James Matthews' Influence of the Bible, etc. (Philadelphia). See Wilson, Presb. Hist. Almanac, 1898, p. 124; Allibone, Dict. of Brit. and Amer. Authors, s. v. (J. L. S.)

Wood, James (2), D.D., an English clergyman, was born about 1769; educated at St. John's College, Cambridge; became dean of Ely in 1820; and died at Cambridge in April, 1839. He was co-author of a valuable series of mathematical works known as the Cambridge Course of Mathematics.

Wood, Jeremiah, D.D., a Presbyterian minister, was born in Saratoga, N. Y., Nov. 11, 1801. After graduation at Union College, Schenectady, N. Y., in 1824, he entered Princeton Theological Seminary, and remained there over two years, but without completing the course. He was licensed by the Albany Presbytery in August, 1826, and began preaching at Mayfield, N. Y., within the bounds of the presbytery of Saratoga, and possessed unusual power as a debater and pulpit orator. He was a wise counsellor, and his opinions always commanded respect among his brethren. His deep piety, consistent life, and faithful labors made him an uncommonly successful pastor, and he was deeply beloved by his people. During his long ministry he was permitted to witness many powerful and glorious revivals among the people of his charge. In one of these in 1873 the membership of his Church was almost doubled. He died suddenly, June 6, 1876. (W. P. S.)

Wood, Nathaniel Milton, D.D., a Baptist minister, was born at Camden, Me., May 24, 1822, and was graduated at Wellsville College, New York, N. Y., in 1846. For a year after leaving college he was private tutor in the family of Gen. Brown, of Columbia, Miss. He pursued his theological studies at Covington, Ky., and was ordained as pastor of the Baptist Church in Bloomfield, Me., May 13, 1848, where he remained four years. The following eight years he was pastor of the Baptist Church in Waterville, Me. His next pastorate was at Lewiston and Thomaston, Me., and Upper Alton, Ill., until March, 1872, when he was elected professor of systematic theology in Shurtleff College. The state of his health compelled him to resign his office in June, 1874. He was a large man, and lived a little over two years, dying at Camden, his native place, Aug. 2, 1876. (J. C. S.)

Wood, Samuel (1), D.D., a Congregational minister, was born at Mansfield, Conn., May 11, 1732. From an early period he determined to enter the ministry, but it was not till he was twenty-two years old that he began his preparation for it. Under Rev. Isaiah Potter, of Lebanon, N. H., he prepared to enter Dartmouth College, from which he graduated in 1779. Seven weeks after his graduation he was licensed to preach. In October, 1781, he accepted a call to the Church at Boscowan, and here he continued to preach until May, 1802. He removed to Wells, Me., and was ordained in that town, and of this, although the smaller parish, he became the pastor. He never fully recovered from an attack of a violent disease in 1828. Rev. Salmon Bennett was installed as colleague pastor with Dr. Wood in December, 1822, but after four years Dr. Wood was again sole pastor. For twenty years he officiated gratuitously as superintendent of the schools in the town; and was influential in establishing a library and an academy. He died in Boscowan, N. H., Dec. 24, 1836. He fitted a large number of young men for college. He was an earnest and impressive preacher. See Sprague, Annuals of N. E. Literature, 1838.

Woodbridge, Benjamin, D.D., a Congregational minister, brother of Rev. John Woodbridge of Newbury, Mass., was born in Wiltshire, England, in 1622. He removed to America, and was the first graduate of Harvard College. Returning to England, he succeeded the famous Dr. Twiss at Newbury, where he remained a few years, as a preacher and casuist. Having been ejected in 1652 on account of his nonconformity, he continued to preach privately; and in 1671 resumed his public labors. He had been minister of Newbury nearly forty years, and died at Inglefield, Berks, Nov. 1, 1684. See Sprague, Annuals of the Amer. Pulpit, 4, 181.

Woodbridge, Timothy, D.D., a Presbyterian
divine, was born at Stockbridge, Mass., Nov. 24, 1784. His maternal grandfather was the first president Edward, and his paternal ancestry embraced a long line of venerable ministers, reaching back to the very early settlement of New England. He was educated at Williams College, and while there he lost the sight of both eyes, and the remainder of his life was passed in total blindness. In 1809 he entered the Theological Seminary at Andover, and in due time was regularly licensed to preach; in 1816 he was ordained pastor of the Church at Green River, Columbia Co., N.Y., where he continued, laboring with great zeal and diligence, twenty-six years; in 1842 he became pastor of the Church at Spencerstown, N.Y., where he remained till 1851, when he resigned his pastoral charge; since that time he lived in comparative retirement until his death, Dec. 7, 1882. Dr. Woodford had an intellect of much more than common vigor, and a memory that held everything deposited in it. His preaching was evangelical, earnest, impressive. "It may reasonably be doubted whether, as a blind preacher, he had his equal since the days of Waldcl. He published The Autobiography of a Blind Preacher (Boston, 1856, 12mo), including a letter to the American Tract Society from the Rev. Mr. Parson, Life of Burr, ch. xxxiii; Sprague, Discourse at the Funeral of Rev. Timothy Woodbridge, D.D. (Albany, 1883, 8vo); Wilson, Pref. Hist. Almanac, 1884, p. 325; Allibone, Dict. of Brit. and Amer. Authors, s. v. (J. L. S.)

Woodford, Samuel D.D., an English divine, was born in London in 1636, and educated at Wadham College, Oxford. He studied law at the Inner Temple, but entered into holy orders in 1669. He became rector of Hartley-Maudit, Hampshire; prebendary of Chichester in 1674, and of Winchester in 1680. He died in 1700. He was the author of, A Poem on the Return of King Charles II (1660)—A Paraphrase upon the Psalms of David (1667)—And A Paraphrase upon the Canticles and Some Select Hymns of the New and Old Testaments, with Other Occasional Compositions in English Verse (1679). In this last he examines Milton's blank verse and commend his recently published Paradiae Lost. See Wood (Bible's ed.), Athenae Oxonienses, iv, 731.

Woodhouse, John Chappell, D.D., an English clergyman, was born in 1748, and educated at Christ Church, Oxford, where he graduated A.M. in 1778. He became rector of Donnington in the same year, prebendary of Rochester in 1797, prebendary of Lichfield and arundel in 1810, and rector of Steeple-upon-Trent in 1814. He died Nov. 17, 1833. He published The Apocalyps, or Revelac of St. John, Translated; with Notes, Critical, et c. (1805)—Annotations on the Apocalypse, et c. (1828)—and some Sermons. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Woodhull, John, D.D., a Presbyterian divine, was born in Suffolk County, L. I., Jan. 26, 1744. He graduated at the College of New Jersey in 1766, studied theology privately, was licensed to preach by the Presbytery of Newcastle, Aug. 10, 1768, and was ordained and installed pastor of the Leacock congregation, Lancaster Co., Pa., Aug. 1, 1770. In 1778 he became pastor of a congregation in Freehold, N. J., where he remained until his death, Nov. 22, 1824. Dr. Woodhull was a popular and useful minister, distinguished for his skill and tact in ecclesiastical bodies. He published a Sermon in the New Jersey Preacher (1815). See Sprague, Annals of the Amer. Tract. Society; Allibone, Dict., Brit. and Amer. Authors, s. v.; Timlwox, Hist. Selm. Dr. Woodhull, Selah Strong, D.D., a (Dutch) Reformed minister, was born in New York city, Aug. 4, 1808. At the age of twelve, while a freshman in Columbia College, he lost both his parents. He then went to Yale College, graduated in 1802, studied theology under his uncle, Rev. Dr. Woodhull, of Freehold, N. J., and afterwards at Princeton with Dr. Henry Kollock, and was licensed to preach at the age of nineteen by the Presbytery of New Brunswick (1805). After one year of service as pastor of the Presbyterian Church of Bounce-etown, N. J., he returned to New Brunswick, until 1825 continued the popular and useful minister of the First Reformed Church in that city. He was then (1825) elected by the General Synod of the Church as professor of ecclesiastical history and pastoral theology in the Theological Seminary, and by the trustees of Rutgers College at New Brunswick. His great capacity led to his selection for these and many other important positions, in all of which he commanded universal confidence. He was the impersonation of activity, decision, energy, and persevering industry. He was a diligent student, a faithful pastor, an instructive, methodical, solemn, earnest, practical, graceful, and attractive preacher. See Sprague, Annals of the Amer. Pulpit, ix, 161-164; Livingston [Dr. J. H.], Memoir, p. 401-402; Corwin, Manual of the Reformed Church in America, p. 271. (W. J. R. T.)

Woodroffe, Benjamin, D.D., an English clergyman, was born at Oxford in 1658, and educated at Christ Church, Oxford, where he became a tutor. He became chapel in charge of her Majesty's ship "Royal Prince," and prebendary of Oxford in 1672, prebendary of Lichfield in 1678, principal of Gloucester Hall in 1692, and died in 1711. He published The Fall of Babylon (1690) and other works. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Woodes, James Sterrett, D.D., a Presbyterian divine, was born in Cumberland County, Pa., April 18, 1793. He pursued his academic studies in Hopewell Academy, Pa.; graduated at Dickinson College, Pa.; studied theology in the Princeton Theological Seminary, N. J.; was licensed by the Presbytery of New Brunswick in 1817; and labored as an evangelist from 1819 to 1822 in the valley of the Lehigh, near MacVeytown, Newton, Hamilton, and Shirley'sburg, where he laid the foundations of the present churches. In 1822 he was called to take charge of the Lewistown and MacVeytown churches; in 1823 he became pastor of the Church of Lewistown alone, and remained there until the time of his death in 1862. "Dr. Woods," says Rev. G. Elliott, "was remarkable for his candor, his modesty, and his magnanimity." To the work of preaching the Gospel he devoted his life. Textual, evangelical, methodical, and earnest, his preaching everywhere commanded attention and secured edification. See Wilson, Pref. Hist. Almanac, 1858, p. 216. (J. L. S.)

Woodes, Leonard, D.D., an eminent Congregational divine, was born at Princeton, Mass., June 19, 1774. His father had intended him for a farmer; but, as he early exhibited a strong desire for knowledge, his mother's wishes at last gained the ascendency, and he was sent away to learn under Rev. William Adams, and graduated at Harvard College in 1796 with the highest honor. He left college with a mind imbued with Priestley's speculations and unseated by materialistic notions. He taught school at Medford for eight months, also pursuing a systematic course of reading. He was interested, however, in his spiritual welfare,
WOODS, 1035 WORCESTER

and, by the advice of his college and life-long friend, Dr. John H. Church, he read the Life of Doddridge and other spiritual books, and after many hard struggles he came out into the light and liberty of the Gospel. He now put himself under the theological training of Dr. Charles Backus of Somers, and in 1788 was ordained pastor of the Church in Newburyport, Mass. In 1789 Theological Seminary was established. Mr. Woods was appointed professor of theology, and held that position until his death on April 26, 1846. The last years of his life were spent in preparing for the press his theological lectures and miscellaneous writings, and in writing a history of Andover Theological Seminary, which he left unfinished.

He died Aug. 24, 1854.

In his theological opinions, Dr. Woods was an orthodox Calvinist, accepting the Assembly's confession and catechism in the simple, historical sense of the language. He was on terms of intimacy and friendship with some Hopkinson divines, and he considered their divergences non-essential, never publicly controverting their views lest their differences should give advantage to those who were assailants of the common faith. He had a fondness for metaphysical studies, and qualifications for distinguished success in them. Facts, among which he gave the highest place to those of revelation, were the starting-point in his philosophy. From these, by careful induction, he came to general laws, then to a lawyer, then to a universal government. Dr. Woods was patient, cautious, and earnest in his investigations, and his attainments came, not by genius, but by steadily pressing his inquiries further and further into the domain of science.

His works include:

Woolf, AARON, D.D., a Presbyterian divine, was born at Longmeadow, Mass., Oct. 25, 1736. He graduated at Yale College in 1748; studied theology privately; was licensed to preach by the Eastern Association of New London County; and was ordained and installed pastor of the Church in Bridgehampton, April 30, 1787. Several powerful revivals of religion occurred under his ministry, particularly one in 1800, an account of which was published in connection with Dr. Buell's Narrative of an Extensive Revival in East Hampton. He died April 2, 1821. Dr. Woolf was a man of remarkably sound judgment, deep piety and power as a preacher. See Sprague's Annals of the Amer. Pulpit, iii, 468; Prime, Hist. of Long Island; Phillips, Funeral Sermon.

WOOLTON, JOHN, D.D., an English prelate, was born at Wigan, Lancashire, in 1555. He entered as student of Brasenose College, Oxford, in 1558, and fled to his uncle, Dean Nowell, and the other exiles in Germany, in 1556. He returned to England in Queen Elizabeth's reign, and was made canon residuary of Exeter. He also had the living of Spaxton, in the Diocese of Wells, and in 1575 became warden of Manchester College. In 1579 he was consecrated bishop of Exeter, and continued in that office until his death, March 18, 1588 (O. S.). He was the author of, Christian Manwell; or, The Life and Maners of True Christians (1756): A Sermon at Rossall College (1847): and Letters Delivered in Australia (1850). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

He was the author of, Christian Manwell; or, The Life and Maners of True Christians (1756): A Sermon at Rossall College (1847): and Letters Delivered in Australia (1850). See Allibone, Dict. of Brit. and Amer. Authors, s. v.
Worcester, Samuel, D.D., an eminent Congregationalist and author, was born at Hollis, N.H., Nov. 1, 1770. He was of pious ancestry, being a descendent in the sixth generation of Rev. William, and in the third of Rev. Francis, Worcester. Every opportunity for mental improvement was seized at the house of his father, who was a farmer, and at the age of twenty-five, he was elected a Fellow of Andover, with a desire for thorough education. He therefore entered the New Ipswich Academy, working his own way, and afterwards Dartmouth College, graduating with the highest honors in 1795. He studied theology with Dr. Austin, of Worcester, taught school at Hollis, and was principal of the New Ipswich Academy, 1796. The following year he was ordained pastor of the Church at Fitchburg, a society which was cursed by all the evils of the Half-way Covenant— including among its members Deists, Arians, Universalists, and the openly immoral. With decision, inflexible integrity, and solemn faithfulness to truth and duty, Worcester opened the batteries of the Gospel upon the errors and sins that called for rebuke. As a result, in the ensuing spring, the covenant was revised and an orthodox creed adopted, and in 1799 an extensive revival occurred. A malignant spirit of opposition, however, was all the time developing against these movements, and the Universalists were openly manifested. Under this influence, the town voted a dissolution of their contract with the pastor, but a council of the Church unanimously decided that he should remain. His opponents now conceived the design of organizing themselves into the First Congregational Church of Fitchburg, but the town took the place of the church of which Worcester was pastor, in the legal relations of the town to the minister. Several ex parte councils were called for this purpose, but they failed in accomplishing their designs. The point of contention ultimately arrived at was whether the town should control, both with reference to the selection ordismissal of her ministers, or whether the Church should do this with the concurrence of the town acting as the parish, "according to the uniform ecclesiastical usage of New England." This, the biographer of Dr. Worcester remarks, was the first organized attempt in Massachusetts at such a sub- jection of the Church. The fearlessness, ability, patience, and skill of the pastor foiled the efforts of the disaffected, and the Church was saved from civil bondage. A mutual council was at length chosen according to ecclesiastical usage, the Church and pastor sustaining their own respectability, and were regularly dismissed, Aug. 29, 1802. The following year he was installed over the Tabernacle Church, Salem, Mass., where he had an eminently happy, useful, and successful pastorate. In 1804 he declined a professorship of theology in Dartmouth College.

In promoting the cause of missions and the circulation of the Scriptures, Dr. Worcester was very laborious. From 1808 to 1808, he was the editor of the Massachusetts Missionary Magazine, for five years he was the secretary of the Massachusetts Missionary Society, and on the death of Dr. Springle his chosen successor, all the duties were devolved upon him and ardently. He aided in the formation of the Massachusetts Bible Society, its constitution and the Address to the Public having been prepared chiefly by him. It was on a ride in a chaise with Dr. Springle from Andover to Bradford to attend the General Association of Massachusetts Missionary Society that the first idea of the American Board of Commissioners for Foreign Missions, in its form and administration, was suggested and developed. The Association (1810) instituted the Board, Dr. Worcester being appointed one of the nine, and at the first meeting thereof he was chosen corresponding secretary. He came into his new office with no small deliberation and heart which were equal to the great responsibilities and toils imposed upon him. "His plans of benevolent action were based upon fundamental principles, and would bear the most thorough analysis; and for the same reason, the measures of the American Board adopted in the early years of its existence are marked by pre- eminent wisdom; and the distinguished men who have followed him in office have found little occasion to alter them." Dr. Worcester's constitution at length began to give way under the load of his exertions as pastor and secretary. A colleague pastor was installed in 1821, but he did not stay long, and the 37 ministerial work. In 1821 he took a voyage to New Orleans, with the intention of visiting the Choctaw and Cherokee nations for the double purpose of recruiting his health and promoting the Indian missions. The trip irritated rather than mitigated his disease. The weather during his stay in New Orleans and the journey northward was unpromising. After much suffering, he reached Mayhew, in the Choctaw nation, and eighteen days after, Brainerd, Tenn. He was now so weak that he had to be carried into the mission-house. He lingered resignedly for a few days, and on June 7, 1821, passed peacefully away.

As a preacher, Dr. Worcester was doctrinal, faithful, and luminous, though his manner was neither easy nor graceful; as a pastor, he was diligent, sympathetic, the poor and the sick sharing his special care. He had considerable musical talent, instructed in sacred music, and gave much of his time to that study. With this influence was felt much in ecclesiastical councils, and he was often called upon to adjudicate disputes and settle difficulties. He was a powerful debater, and some of his speeches were seldom rivalled even in judicial and legislative assemblies. Dr. Worcester ever defended the Indians with his sympathies, and formalized with those of other denominations. In spite of his activity, periodical and peace-loving disposition, he was thrice drawn into controversy. The publications resulting therefrom are considered to class with the ablest ever written in the history of religious dispute.

Besides numerous sermons, Oration, and Addresses, Dr. Worcester is the author of the following: Six Ser- mons on the Doctrine of Eternal Judgment (1800):—Summary View of the Fitchburg Ecclesiastical Affairs (1802):—Discourses on the Covenant with Abraham (1811, Salem, Mass.):—Letters on Baptism to the Rev. Thomas Baldwin (1807):—Christian Polymydia (1814, 4 pts.):—Three Letters to Dr. W.E. Channing (Bos- ton, 1815, 8vo). In some respects these Letters are the greatest work of his life. They were occasioned by Channing's Reply to Jeremiah Evarts's Review of American History (1821). The controversy between the two events in the doctrinal division of the Congrega- tional churches of Massachusetts. The Pamphlet and Drs. Morse, Spring, and Worcester saved American Congregationalism from the advancing Unitarian tide:—Watts's Hymns and Selections (ibid. 1816). More than 900,000 have been circulated.—Pamphlets (posthumous, 1829, 980).—First Ten Reports of the American Board
of Commissioners for Foreign Missions (1810-20; repub. 1884). His Letters to Dr. Channing in connection with the Unitarian controversy, especially the last one, have been considered as almost unrivalled specimens of polemic theological discussion. His Sermons are rich in pietistical thought, and logically and luminously presented by R. Anderson, D.D., in the Memorial Volume of the American Board of Commissioners for Foreign Missions (1862), p. 114. Of his three ministerial brothers—Noah, Thomas, and Leonard—the two former were able writers on the Unitarian side. His son, the Rev. Samuel M., D.D., became an author of some repute. See Cong. Quart., 1862, p. 131-160 (by Dr. Clark); Sprague, Annals of the Amer. Pulpit, ii, 398 sq.; Allbone, Dict. of Brit. and Amer. Authors, s. v.; also Missionary Herald, Aug. 1821 (by Evarts): Life and Labors of Dr. Worchester (Boston, 1852, 2 vols. 12mo), by his son; North Amer. Rev., April, 1882.

Worchester, Christopher, D.D., an English clergyman, youngest brother of William Worchester, the poet, was born at Cockermouth, Cumberland, June 9, 1774. He was educated at Hawkehead grammar-school and at Trinity College, Cambridge, where he graduated in 1796. He was elected fellow of Trinity College Oct. 1, 1796. He became domestic chaplain to Dr. Manners Sutton, archbishop of Canterbury; rector of Ashby and Obey-with-Thirne, Norfolk, in 1804; and dean of Bocking, Essex, May 30, 1808. He was appointed rector of St. Mary's, Lambeth, Surrey, and of Sunningdale, Kent, April 10, 1811; and soon after served as chaplain to the House of Commons. On July 26, 1820, he was installed master of Trinity College, Cambridge, and in the same year exchanged the livings of Lambeth and Sunningdale for the rectory of Buxted, with Uckfield, in Sussex. He resigned the mastership of Trinity College in 1841, and thereafter resided at Buxted, where he died, Feb. 2, 1846. He published, Six Letters to Granville Sharp, Esq., respecting his Remarks on the Definition Article in the Greek Testament (1802); Ecclasticological Biography (1810); Sermons on Various Subjects (1814); Who Wrote the Book of Psalms? and another work on the same subject, in both of which he attributes it to King Charles I;—Christian Institutions (1836);—and other works.

Wormwood (Artemisia absinthium), of uncertain etymology; Sept. πυρποία, χολή, δέκτη, and αἰμήτης; Vulg. amarizudo, absinthium is, doubtless, the correct translation of the Heb. word, which occurs frequently in the Bible, and generally in a metaphorical sense, as in Deut. xxiii, 18, where of the idolatrous Israelites it is said, "Lest there be among you a root that beareth wormwood" (see also Prov. vi, 4, 18). In Jer. ix, 15; exilii, 13; Lam. iii, 15, 19, wormwood is symbolical of bitter calamity and sorrow. Unrighteous judges are said to "turn judgment to wormwood" (Amos v, 7; so in vi, 12, "hemlock"). In like manner the name of the star, which, at the sound of the third angel's trumpet, fell upon the rivers, was called Wormwood (Acts viii, 11). The Orientalis typified sorrows, cruelties, and calamities of any kind by plants of a poisonous or bitter nature. Some other plants have been adduced, as the coloquynth and the oleander, but without anything to support them; while different kinds of Artemisia and of wormwood are proverbial for their bitterness, and often used in a figurative sense by ancient authors. "Parce, precor, lacerae tuam, nec amara paternis Admiscere velli, cec melli absinthia, verbis" (Paulin. Ep. ad Aquinnonum).

Celsius has no doubt that a species of Artemisia, or wormwood, is intended: "Hanc plantam in Judæa et Arabia copiose nascentem, et interpretatum auctoritate egregie suffultam, ipsam esse Ebneorum ἑρμοῦντοι, pro indubitato habemus." That species of Artemisia is common in Syria and Palestine is well known, as all travellers mention their abundance in particular situations; but as many of them resemble each other so very closely in properties, it is more difficult to determine what particular species is meant. It is probably, indeed, that the name is used in a generic rather than a specific sense. Artemisia is the botanical name of the genus of plants in which the different species of wormwoods are found. The plants of this genus are easily recognised by the multitude of fine divisions into which the leaves are usually separated, and the numerous clusters of small, round, drooping, greenish-yellow, or brownish flower-heads with which the branches are laden. It must be understood that our common wormwood (Artemisia absinthium) does not appear to exist in Palestine, and cannot, therefore, be that specially denoted by the scriptural term. Indeed, it is more than probable that the word is intended to apply to all the plants of this class that grew in Palestine, rather than to any one of them in particular. The examples of this genus that have been found in that country are—1. Artemisia Judaica, which, if a particular species be intended, is probably the absinthium of Scripture. Ruwold found it about Bethlehem, and Shaw in Arabia and the deserts of Numidia plentifully. This plant is erect and shrubby, with a stem about eighteen inches high. Its taste is very bitter; and both the leaves and seeds are much used in Eastern medicine, and are reputed to be tonic, stomachic, and anthelmintic. 2. Artemisia Romana, which was found by Hasselquist on Mount Tabor (p. 281). This species is barbarous, erect, with a stem one or two feet high (higher when cultivated in gardens), and nearly upright branches. The plant has a pleasantly aromatic scent, and the bitterness of its taste is so tempered by the aromatic flavor as scarcely to
be disagreeable. 3. *Artemisia abrotanum*, found in the south of Europe, as well as in Syria and Palestine, and eastward even to China. This is a hoary plant, becoming a shrub in warm country, and its branches bear loose particles of nodding yellow flower-heads. It is bitter and aromatic, with a very strong scent. It is not much used in medicine, but the branches are employed in imparting a yellow dye to wool. The species most celebrated in the garden works on malaceous plants is that called *stilb*, which is conspicuous for its bitterness and for being fatal to worms; hence it has been commonly employed as an anthelmintic even to our own times. This seems to be the same species which was found by Rauwolf in Palestine, and which he says the Arabs call achthus. But the author of *Herbarium Amaranthum* says, "*Achtonisum, unde semen lumbricorum colligitur*," the *Abutilium santonicum Judaicum* of Caspar Bauhin, in his *Pinax*, now *Artemisia Judaiaca*, though it is probably two or three species yield the *Senonii sanctonicum*, or wormwood of commerce, which, instead of seed, consists of the tops of the plants, and in which the peduncles, calyx flowers, and young seeds are intermixed. *Artemisia maritima* and *Judaiaca* are two of the plants which yield it. See Kitto, *Phys. Hist. of Plants*, p. 215; Celsius, *Hierob. I.*, 480; Rosenmüller, *Bibl. Bot.* p. 116; Calcott [*Papyri*], *Script. Herb.* p. 542.

Worthington, John, D.D., an English divine, was born at Manchester, in February, 1618. He was educated at the University of Cambridge, and was made a fellow of which college he became a fellow, and was created B.D. in 1646. He was chosen master of Jesus College, but resigned the office soon after the Restoration. In the meantime he was successively rector of Horton, Buckinghamshire; Gravely, and Eton Divot, in the County of Cambridge; Barkley, with Needham, Suffolk; and Ingoldsby, Lincolnshire. In 1663 he was collated to the rectory of Moulton - All-saints, Norfolk, and entered upon the cure of St. Benet-Fink in June, 1664, under the canons of Windsor, and continued to preach there until the church was destroyed by fire in February, 1666. Shortly after this, he was presented to the living of Ingoldsby, Lincolnshire, and the prebend of Asgaby in the Church of Lincoln. He removed to Hackney in 1670, and died there, Nov. 26, 1671. He was the author of, *Form of Sound Words*; or, *A Scripture Catechism* (1674). — *The Great Duty of the Divine Will* (1675). — *The Doctrines of the Resurrection and the Reward to Come* (1690). — Miscellaneous (1704). — and other works.

Worthington, Thomas, D.D., an English divine, was born at Blairnsough, Lancashire, about 1552. He was educated at Oxford, and entered the English College at Douay in 1578, and the English College at Rheims (having in the meantime become a priest) in 1578. He labored as a missionary in England for some years; was imprisoned in the Tower in 1584, and banished in 1585. He was president of the English College at Douay from 1599 to 1613. He spent his latter years in England, and died in Staffordshire, six months after he became a Jesuit, in 1626. He published, *Annotations on the Old Testament* (1669). — *Catalogus Martyrum Pontificiorum*, etc. (1612). — *An Anker of Christian Doctrine, wherein the most Principal Points of Catholicke Religion are Proved by the only Written Word of God*, etc. (1682-22). — and other works. See Allibone, *Dict. of Brd. and Amer. Authors*, v. v.

Worthington, William, D.D., a learned English divine, was born in Merionethshire in 1708, and educated at Oswestry School, whence he went to Jesus College, Oxford. He then returned to Oswestry and became usher in that school. He took the degree of A.M. at the College of St. John's, Oxford, and of D.D. at Jesus College, Oxford, in 1756. He became vicar of Llanyblodwell, in the County of Salop, and afterwards of Llanrhaiadr, Denbighshire, where he died, Oct. 6, 1778. He became prebendary of York in 1768, and of St. Asaph in 1778. He published numerous works, among which are, *Essay on the Scheme*, etc., of Man's Redemption (1749); *The Evidence of Christianity*, etc. (1769); and *The Scripture Theory of the Earth* (1773).

Wotton, William, D.D., an English divine, was born at Wrentham, Suffolk, Aug. 10, 1666. He was endowed with a remarkable memory, and by the time he was five years old had acquired, under the tuition of his father, considerable facility in translating Latin, Greek, and Hebrew. In April, 1675, when not yet ten years old, he was admitted to Catherine Hall, Cambridge, where he made rapid progress in the languages and branches of learning. In 1679 he took the degree of A.B., and afterwards obtained a fellowship in St. John's. In 1691, he received the living of Llandrillo, Denbighshire, and was soon after made chaplain to the earl of Nottingham, who, in 1698, presented him to the rectory of Middleton Keynes, Buckinghamshire. He died at Buxted, Essex, Feb. 18, 1726. His publications are numerous, among which may be named, *Reflections upon Ancient and Modern Learning* (1694). — *Hist. of Rome from the Death of Antoninus Pius to the Death of Severus Alexander* (1701). — *Discourse on the Confusion of Language at Babel* (1780).

Wren, Christopher, D.D., an English clergyman, was fellow of St. John's College, Oxford, afterwards chaplain to Charles I, and rector of Knolle, Wiltshire. He was made dean of Windsor in 1635, and presented the rectory of Hambledon, in Hampshire, in 1638. He died at his house of his son-in-law, Mr. William Holder, at Blechington, in the County of Oxford, in 1638.

Wren, Matthew, D.D., an eminent English prelate, was born in the parish of St. Peter-chap, London, Dec. 28, 1655. He was educated at Pembroke Hall, Cambridge, and elected fellow of his college, Nov. 9, 1655. He studied divinity, and was admitted to holy orders in 1610. He was appointed chaplain to bishop Andrews, and presented to the rectory of Teversham, Cambridgeshire, in 1615. In 1621 he became chaplain to prince Charles, whom he attended in that office to Spain in 1629. He became rector of Bingham, Nottinghamshire, and prebendary of Winchester in 1624. In July, 1625, he was chosen master of Peterhouse, Cambridge, to which he became a great benefactor, building a large part of the college, and securing contributions for a chapel. The college was completed in 1629. In July, 1628, he became dean of Windsor and Wolverhampton. He was sworn a judge of the Star-chamber for foreign causes in 1629; installed as prebendary of Westminster in 1634; promoted to the bishopric of Hereford the same year; and translated to the see of Norwich in 1666, where he remained about two years and a half. He succeeded Juxon as dean of his majesty's chapel in 1636, and was translated to the bishopric of Ely in May, 1638. In December, 1640, proceedings were begun in Parliament against him, and in July, 1641, he was impeached of high crimes and misdemenumors. The penalty was fixed at imprisonment in the Tower during the pleasure of the Parliament, which lasted eighteen years. When the Restoration drew nigh, he was released, in March, 1659, and returned to his palace at Ely in 1660. He died at Ely House, London, April 24, 1667. He published some *Sermons* and other works of no present interest.

Wright, Edward W., D.D., a Presbyterian divine, was born at Lancaster, 0, in April, 1817. He was educated at Miami University; studied divinity at the Princeton (N. J.) Theological Seminary, and finished in the Western Theological Seminary at Allegheny, Pa., in 1838. He was licensed as a preacher in 1838, and was licensed by Logansport Presbytery in October, 1889; became pastor of the Church at Lafayette, Ind., in 1840; agent in the West for the Presbyterian Board of Education in 1845; pastor of the Church in Delphi in 1846, which relation...
continued for a period of twenty years. His labors there were greatly blessed. The Church grew and became a feeder to new churches beyond. He was stated clerk of the Synod of Northern Indiana from the time of its formation in 1842 until his removal to Allegheny, and sailed to New York City in 1851. He was considered one of the most learned men in the church, with a long length of time. It was generally admitted that, "as a presbyter, he had no equal in the synod." At length he was elected and served as librarian of the Board of Colportage of Pittsburgh and Allegheny synods, and soon afterwards he removed his family to Allegheny. He died in 1867, aged 85 years. He was one of the leaders of the church in Allegheny. He was a strong preacher: "He did not appeal to the sympathies or the passions, but rather to the reason and the consciences of the people. He took no crude materials into the pulpit; his sermons always afforded proof of patient and prayerful study, and they were delivered in a solemn and reverential manner." See Wilson, Prob. Dis. Al- manac, 1867, p. 219.

Wright, John Flavel, D.D., a Methodist Episcopal minister, was born in North Carolina, July 30, 1795, and passed his early years in the northern part of that state. He was converted in 1813, and soon after began to feel it his duty to become a preacher of the Gospel. He was licensed to exhort in August, 1814, and for some time was engaged in that work. He was admitted on trial in the Virginia Conference at Lynchburg, Feb. 20, 1815, and appointed successively to Hanover, Black River, Guilford, Princess Ann, and Newbern circuits, and Raleigh station. In 1821 he was transferred to the Ohio Conference, and appointed to Lebanon Circuit. He was next appointed to Cincinnati, then to Madison, Ind., and in 1824 to Chillicothe, O., where three hundred and sixty-five were added to the Church, and more than that number converted. In 1827 he was stationed a second time at Cincinnati, and in 1829 became presiding elder of the Lebanon District. In 1832 he was elected book-agent at Cincinnati, and fulfilled the duties of that office for twelve years in succession. In 1844 he lacked but a few votes of an election to the episcopacy. From that time until 1861 he received various appointments in Ohio. He was chaplain of the First Kentucky Regiment during the Rebellion, and near the close of the war became chaplain to the military hospitals of Cincinnati. He again entered the conference work when the hospitals were closed, and continued in that field until 1877, when he retired. He died Sept. 15, 1879. See Minutes of Cincinnati Conference, 1886, p. 139.

Wright, Samuel, D.D., an eminent English Dissenter, was born at Retford, Nottinghamshire, Jan. 3, 1663. He was pastor at Blackfriars, London, from 1670 to 1734, when he removed to a meeting house in Carter Lane, Southwark, and died April 3, 1746. He published, A Little Treatise of Being Born Again (1718);—Treatise on the Religious Observance of the Lord's Day (4th ed., 1736); — Human Virtues; or, Rules to Live Soberly (1780); — Decency of Sin (1781); — and other works. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Wulfram (or Wulfran), Sr., apostle to the Frisians and bishop of Sens, was of patrician family, and was born about A.D. 650, at Milly. He became monk and abbot at Fontenelle, to which monastery he donated his family-seat of Milly, and afterwards was chaplain to the French court, and bishop of Sens. In 684 or 685 he devoted himself, with several brother monks, to the missionary work among the Frisians, his personal associate for a time being a Burgundian count named Ganguf or Gengulf, who was afterwards killed by a clergyman. In 690, his wife, Wulfram is credited, while in the prosecution of his missionary labors, with having recovered a lost paten from the sea by prayer; with having cured paralytics and other invalids by anointing them with oil; with having preserved alive a boy who was hanged by the Frisians in honor of their divinities, and two other boys who were about to be drowned from similar motives. Tradition states that Wulfram was on the point of baptizing Radobod, the Frisian king, when the latter, standing with one foot in the water, inquired whether his unbaptized ancestors were to be found in heaven or in hell, and being assured that they were in hell, with tears expressed that he would not be separated from his royal ancestors. The devil thereupon appeared to the king and incited him to persist in idolatry, until he was driven away by the sign of the cross. Radobod, however, died unbaptized. Wulfram, about 685, returned to Fontenelle, and died in 690. See Tertullian, Hist. Rom., vii. 12. The martysrologies assign to him March 30. See Bal- land, Acta SS. Martyr. (Antw. 1668), iii, p. 143-165: Retberg, Kirchengesch. Deutschlands (Göt. 1848), p. 574 sq., and the literature there referred to; also Herzog, Real-Encyklop. s. v.

Wulstan (Wulstæn, or Wolstan) (1), a monk of Winchester, lived in the 9th century. He was the author of a work on the Harrowing of Hell, a poem in Latin hexameters on the Miracles of St. Swinthun, and a prose Life of Bishop Ethelwald. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Wulstan (2), an English prelate of the 11th century, became archbishop of York in 1005, holding along with that dignity the bishopric of Worcester, and died in 1028. He is supposed to be the author of the Anglo- Saxon Harrowing of Hell, in which he affixed the name of Lepus Episcopus. One of these may be found in Hicke, Theatini, iii, 99-106. See Wright, Biog. Brit. Lit. (Anglo-Saxon Period), p. 505.

Wulstan (3), the last of the Anglo-Saxon prelates, was born at Icenium, Warwickshire, about 1007. He was educated at Evesham and Peterborough, and was ordained a presbyter at the usual age. He then became a monk at Worcester, and gradually rose in that monastery until at last he became prior. In 1062 he was chosen bishop of Worcester, and succeeded in rescuing that see from the control of the archbishop of York. He enjoyed the favor of William the Conqueror, and after him of his son Rufus. He rebuilt the Cathedral of Worcester; put down an insurrection of the adherents of Duke Robert of Normandy; and defended the city against the army of the rebels led by Roger de Montgomery. He died in Worcester, either on Nov. 28 or Jan. 15, 1095. He is not known to have written anything either in Saxon or Latin, though an attempt has been made to ascribe to him a treatise on the Greg- orian Sacramentaries in the Saxon Chronicle from 1034 to 1079. See William of Malmesbury, De Gestis Pontificum; Wharton, Anglia Sacra, vol. ii.

Wyatt, William E., D.D., a clergyman of the Protestant Episcopal Church, a native of New York city, was ordained deacon in 1810, and priest shortly after. In 1811 he was pastor of St. John's Parish, New- town, L. I.; in 1814 he became associate rector of St. Paul's Parish, Baltimore, subsequently succeeding to the rectorship, which he retained until the close of his life. He died June 24, 1864, aged seventy-six years. Through all this period he was a member of the Standing Committee of his diocese; was delegate to every General Convention; and during thirty years was president of the Lower House. In 1820 he was professor of the-ology in the University of Maryland. He published a volume of Family Prayers;—a volume of Bishop Kemp's Sermons;—the Christian Altar;—and a number of pamphlets, tracts, etc. See American Univ. Church Reg. Oct. 1864, p. 483.

Wyckoff, William H., LL.D., a minister of the Baptist denomination, was born in the city of New York, Sept. 10, 1807, and was a graduate of Union College in the class of 1828. After leaving college, he was for several years the principal of the classical department of a collegiate school in New York. In 1839 he became the editor of The Baptist Advocate, now The
Examiner and Chronicle, which was started by him, and has exerted a wide influence in the denomination. Of this paper he had the editorial charge until 1846, in which year he was ordained as a minister of the Gospel by the Laight Street Baptist Church of New York. For several years he was the Principal of the Biblical Institute, of the Young Men’s City Missionary Society, of the Baptist Domestic Mission Society, and was one of the originators of the American and Foreign Bible Society, formed in 1835. Of this society he was the corresponding secretary from 1846 to 1836. In 1839 he aided in the formation of the American Bible Union of which he was a charter member, and was one of the secretaries. He died in Brooklyn, N. Y., Nov. 3, 1876.

Among his published writings are The Bible Question; or, The American Bible Society and the Baptists:—— The Bible, its Excellences:—— Rollins Ancient History, Condensed (J. C. S.)

Wyckoff, Isaac Newton, D.D., a (Dutch) Reformed minister, was born near Millstone, N. J., in 1792. He graduated at Queen’s College in 1813, and at New Brunswick Seminary in 1817. He was settled as pastor of the Reformed Church, Catskill, N. Y., from 1817 to 1836; and of the Second Reformed Church, Albany, from 1836 to 1868; and also continued an active ministry of forty-five years of arduous clerical labor, about three years before his death, which occurred in 1869. Four new churches were organized by him in his first field of labor. At Albany more than one thousand persons were added to the communion of his Church during his ministry of thirty-one years, and he was fond of books of poetry, history, and literature and theological culture. But he was pre-eminently a pastor. He seemed to know everybody in his flock, and almost in the whole city. Young men found him a genial, sympathizing, and loving helper, for he never lost his youthful buoyancy. He was gifted with a quick flow of animal spirits. His presence was sunshine. His conversation overflowed with wit and humor, with irresistible drollery, and yet with a pious fervor which sanctified the whole man. To the emigrant Hollanders, who always stopped at Albany on their way to the Michigan Colony, he was for years a father and a prince. He conversed, read, and could preach in the Dutch language with great fluency. In every benevolent institution, in the boards of the Church, in all kinds of public assemblies where his influence could be well used, he was a representative speaker and actor. His sympathies, therefore, were not wide, but deep, young and the aged alike, his personal and pastoral tact and power were universally admitted. His home was a Bethel, his hospitality unbounded, and his social intercourse entertaining and profitable. He was full of music, an art which he cultivated delightfully and skillfully with voice and instrument. His piety was a flowing stream, sparkling, clear, unceasing, joyous, and refreshing to himself and to his people and friends.

“The spontaneity of his faith precluded the indulgence of mere cant. The light of the cross was on his brow; the breath of Olivet animated his speech. To hear him pray in his family circle was to be borne up to the Mount of Vision.” His religion was a life, never a burden, never a mere robe, but a principle in active operation—“a well of water in him springing up to everlasting life.” His charity was wonderful, in thoughts, feelings, speech, gifts and deeds of love for Christ’s sake. In ecclesiastical assemblies he was always prominent. His olive branch never withered in the heat of controversy. With nearly all the great movements of his Church for half a century he was prominently identified. He was a frequent speaker at the great May anniversaries in New York, and a number of his sermons are printed in the New York Christian. He was an eloquent, medium size, slender, wiry, agile, and tough. His face was radiant with cheerfulness and good-humor. His voice was large, full, sonorous, and he used it often with great oratorical effect. His mental ingenuity and freshness of thought and expression proclaimed him an original character. He was perfectly unique, always himself, and never much like other folks. He thought and talked, and preached and prayed, in his own peculiar way. He used many big words; he often made words and combinations of words that gave great point and pitch to his sentences. His aim was direct; his sermons were oracles of the Bible. His literary style was descriptive and ornamental, sketches of characters. Down to his old age he retained his youthful appearance and manner, with fresh complexion, and hair curling and unchanged in color. “His eye was not dim nor his natural strength abated” until his last illness laid its wasting hand upon him. See Porter [Dr. E. S.], Memoir Section. (W. J. R. T.)

Wyckoff, Theodorus Preilingshuyse, a (Dutch) Reformed minister, son of the above, was born at Catskill, N. Y., in 1820. He graduated at Rutgers College in 1838, and at New Brunswick Theological Seminary in 1842; was pastor of the Second Reformed Church of Ghent, N. Y., from 1843 to 1844; of the South Reformed Church, West Troy, from 1845 to 1854; and ministered at St. Thomas, New York, from 1855. He died at his home in Jan. 19 of the latter year, only a few weeks after his arrival in St. Thomas. He was a young man of cultivated mind and manners, a careful student, scholarly in his tastes and refined in accomplishments; he wrote much and well for the periodical press. His sermons were orate in style, evangelical in matter and spirit, and full of promise. (W. J. R. T.)

Wycliffe, John, the first translator of the entire Bible into English, and “the morning-star of the Reformation,” was also eminent as a scholar, a diplomatist, and a preacher. There seem to have been three other persons of the same name contemporaneous with him; one a seneschal of Merton College in 1336 (probably the John Wyclif of Hereford), another a master of Balliol College in 1340, and still another who was vicar of Mayfield from 1361 to 1380. 1. Antecedents.—The career and work of Wycliffe can be briefly reviewed by a brief review of some of the literary and ecclesiastical, and especially the Biblical, circumstances of the times.

1. The midnight of the Dark Ages had been broken by the establishment of high-schools, whose light was sensibly felt along the pathways of scientific and religious inquiry. Europe was emerging from the semi-barbarism which the northern hordes had poured over the older seats of civilization, and the invaders themselves, now Christianized and educated, were sending back streams of missionary and literary culture to their fathers. England was foremost in realizing these ameliorating influences. From the times of the Roman sway she had enjoyed pre-eminent advantages through contact with Latin Christianity, which then embodied all the learning and piety of the Western empire; and the displacement of the Britons by the Anglo-Saxons, and the subjugation of these in turn by the Normans, had added successively elements to her originally wild strength, as the compound English language itself attests to-day. At the period of which we write the French tongue was still used in courts of law, a vestige of which exists in many of the commonest legal terms to the present day; and side by side was the Latin, the language of the Church, whose influence, if not of the Romish, yet so much mingled with it as still belongs to it, was felt in all the vernacular literature of England, and was the common tongue of the educated classes. This was the period of Geoffrey Chaucer, whose work is yet indicated by other legal titles of well-known processes. The English universities, established about two centuries prior to Wycliffe’s graduation, and a little later than those of Italy and Paris, but some three centuries before the oldest of Germany, were originally divinity schools, or, at least, were conducted by
divines and largely for sacred learning. In fact, theology was the chief and almost the sole science of that early day, and the only other forms of knowledge that took a scholastic form were languages and philosophy, both of which had been specifically the study of the mediaeval church.

Moreover, the students were almost exclusively novitiates of some of the various monastic ranks with which at that time all parts of Europe particularly swarmed. Wycliffe himself, while in college, was a candidate for holy orders, and his own studies of course lay in that direction, as doubtless did those of most of his pupils.

2. The Lollards, as all the predecessors of Protestantism in England were called, had already begun a comparison of the glaring corruptions of Rome with the simple truths and practices of early Christianity, as well as with the obvious laws of morality and social decency; and in this discussion, which was usually rather indirectly than ostensively carried on, the Bible, and especially the New Testament, was of course continually appealed to as an authority against the papal dogmas, ecclesiastical traditions, and priestly dominations. These latter were especially open to the shafts of ridicule, and, as in the Reformation afterwards, the wis of Wycliffe's day, including Chaucer and Gower, were not slow in pointing out Romish inconsistencies to the public eye. The mass of the people were thoroughly awake to the religious questions thus raised, and were interested with a zeal which completely with them, as Wycliffe did, had constant occasion to ascertain their feelings and apprehend their necessities.

3. The political condition of the country at the time greatly stimulated these debates, which had not yet been nationally agitated elsewhere. One century before Wycliffe was born, the English barons had extorted from the violent and vacillating king John the famous Magna Charta, which, although quickly denied by that prince, and denounced by the pope, who claimed the vassalage of the realm, yet, renewed by the next and confirmed by the subsequent sovereigns, has remained to this day the substantial basis and bulwark of British constitutional liberty. From that document definitely dates the great struggle between the Romish and the secular arm, on the one side, and the aristocratic and the popular rights, on the other, which has characterized English political and social history. The reign of Henry III, who followed John upon the throne of England, was but a series of contests between the king and the newly instituted House of Commons; which after a lull during the reign of Edward I, which was the next prince, but who was chiefly occupied in sea affairs, and was unprovided with any chancellor, began under Edward II, and culminated in his dethronement and horrid death. All these fluctuations of civil power the Roman pontiff watched at a safe distance, like a vulture snuffing the field of battle, ever ready to pounce upon the weak or the wounded of either side. Edward III, who came to the throne at the age of fourteen, three years after the above-mentioned date of Wycliffe's birth, soon engaged in wars with Scotland and France, which occupied his entire reign; but he nevertheless resisted the claims of Rome, and Parliament supported him by statutes declaring the independence of the English clergy. The effects of all these political changes was to create and foster a spirit of free inquiry into human rights, both civil and ecclesiastical. The seeds of the English Reformation of a later age were widely and deeply sown by these public measures and private experiences.

4. It must be borne in mind, however, that the art of printing had not yet been discovered. All books, being in MS., had to be laboriously copied by hand, and were therefore rare and costly. This was especially true of the Bible, from its large size and the dead languages in which it was written. The Latin Vulgate was the Bible of the day, as it is the best known by the old name of Wycliffe. Of the Reformer's immediate parentage and early education nothing is recorded, nor is the exact date of his birth known. From the fact that he entered while yet a youth as one of the first commoners of Queen's College, Oxford, which was founded in 1846, he is generally believed to have been born in 1320. In what little he became later in life he became a probationer, and apparently also a fellow of Merton College, and at the period of his first introduction to notice he was associated with some of the best scholars of the university. Chaucer being said to have been at one time his pupil. His hours were doubtless chiefly occupied in the study of an English translation of the Bible, the present day, with private instruction to the undergraduates; and his intervals of recreation appear to have been largely spent in social rambles among the peasantry in the neighborhood. His scholastic culture, warmed by a genial temper, gave him great influence as well as ready access to those seeing the very function of a link between the literary aristocracy and the sturdy popu-
lace of a collegiate borough. Hence he was enabled to sympathize with the wants and sentiments of the lower classes, and to meet them with the higher qualifications and views of a Christian student. In person considerably above the medium height, straight, slender, but wiry, with features indicating penetration and refinement, a thin aquiline nose, firm mouth, smooth forehead, and clear though somewhat deep-set eyes; his expression at once frank and cautious, bland but wellbred, intellectual and yet sympathetic, Wycliffe was a man to rivet attention and secure respect at the first glance.

In 1360 Wycliffe became known as a public opponent of the mendicant friars who infested England, interfering with the school discipline as well as with domestic relations; and to this date his tracts on that subject are accordingly assigned. This was an effort in behalf of the less of the people, who were weary with the obtrusive sanctimony and beggarly squallor of these church fleas, than of the university authorities, who were equally sick of their impertinent ignorance and proselyting usurpation. It won him such popularity that in 1361 he was made warden (or master) of Balliol Hall (afterwards Balliol College), an office for which he was well qualified by his eminent diligence and reputation as a student of civil and canon law, and especially by his skill in philosophical and theological dialectics. This preferment gave both a wider scope to his scholastic abilities, and greater prestige to his popular discussions. In the same year he was made rector of Fillingham, in Lincolnshire, a position which he exchanged in 1368 for that of Ludgershall in the same diocese. These livings did not require his removal from Oxford, yet afforded him a clerical function and a pastoral opportunity to come still more closely than before into communion with the common people, and that in a rustic neighborhood.

In 1365 archbishop Islip of Canterbury appointed Wycliffe master of his new college of Canterbury Hall (afterwards merged in that of Christ Church) at Oxford, but soon after the accession of Langham to the see in 1366 the monks, who formed a majority of the members of the college, induced that prelate to eject Wycliffe, on the ground of some informality in the appointment, and the pope (Urban V) being appealed to, sided of course against Wycliffe by a special bull issued in 1376, of which the monks purchased the royal confirmation in 1372. How little heed Wycliffe, although still professing to be a faithful son of the Romish Church, paid to the papal order of silence accompanying the bull—since it was not only gratuitous, but illegal under the Parliamentary statutes above mentioned—we may judge from his tract in defence of the national policy against the pope, published about this time. This production doubles the substance of his argument before the court, in reply to the sumpsion's summons to the king to pay the homage due from the time of John to the see of Rome—a demand which, as we have seen, Edward had refused to acknowledge, and now openly resisted. Thus introduced to the royal favor, Wycliffe acted as the king's chaplain, and was presented (Nov. 6, 1375) to the prebend of Aust, in the diocese of Worcester, and was made a prebendary of the Court of Canterbury, and Duke of Lancaster he was compensated (about 1376) for the loss of his college mastership by being made rector of Lutterworth where he had already (in 1372) been created "doctor in theology" by the University of Oxford, not a mere honorary title, but an official one, authorizing him to lecture publicly before the students; and he used the privilege to expose the vanity and superstition of the ecclesiastics with a vigor of reasoning and a keenness of satire which are conspicuous in his published tracts on the subject. These abuses had come to be such a public burden, especially the occupancy of benefices by aliens, that in 1373 the king appointed a commission, and next year renewed it, with Wycliffe as a prominent member, to confer with the papal authorities for the abrogation of the evil. An arrangement was finally made, but the pope soon violated the compact, and Parliament again took action against the Roman usurpations. These developments more fully opened Wycliffe's eyes to the intolerant corruption of the Roman Church, and forth began to argue and preach, and teach and write, boldly and without reserve. As with Luther in a later age, the hierarchy was alarmed and exasperated; by a formal condemnation they summoned him to answer, Feb. 19, 1377 (Lewis erroneously says 1378), to accusations of erroneous doctrine. The trial opened regularly in St. Paul's on the day appointed; but an unfortunate altercation of a personal nature, arising between the bishop of London and the duke of Lancaster, threw the assembly into an uproar, and even led to a popular tumult outside. In the mêlée, Wycliffe was carried off in safety by his friends. The pope (Gregory XI) was now induced to take up the matter. Formal articles were prepared against Wycliffe, and in five papal bulls, three of them dated simultaneously (May 22, 1377), he was cited to answer to the charges of insubordination and heresy. Before these summonses arrived, Edward III died, and Richard II was crowned; and the new Parliament was slow to surrender Wycliffe for a trial at Rome, or even to suffer his imprisonment at home. However, in February of the following year (1378), the archbishop of Canterbury and the bishop of London, to whom one or more of the bulls had been addressed, ordered a second trial, which was held in Lambeth Palace in April. Wycliffe responded by a
formal paper; but the proceedings were again abruptly, although not violently, ended by the interference of the populace in mass and the command of the king's mother; the prelatical judges retired in confusion with a pusillanimous injunction of silence upon Wycliffe, to which, of course, theクリモ貴族 reefed in convulsion. The petition addressed to the king was shortly expunged with the death of Gregory, and a schism occurred by the election of two popes as his rival successors. This gave Wycliffe fresh opportunity of exposing the corruption of the papacy, and, at the same time, a season of quiet for the prosecution of his cherished design of translating the Scriptures, somewhat fast like that of Luther at the castle in the heart of the Thuringian Forest.

We rapidly pass over the residue of Wycliffe's life. Early in 1379 he had a severe fit of sickness, during which he was visited by the papal emissaries, who urged him to recant; but he soon recovered to denounce them more vigorously than ever. In 1382 a court constituted by the pope, with the aid of the new archbishop of Canterbury, controverted certain propositions of Wycliffe, who had begun to question the doctrine of transubstantiation, and as his patron, the duke of Lancaster, withheld his support, the Reformer ventured upon doctrinal ground, Wycliffe's position was eventually condemned, and the king was induced to remove him from the university. It is probable that the odium of Wat Tyler's insurrection in 1381 fell upon Wycliffe; he was supposed by his enemies to have been fomented by the "poor priests," and he went out as itinerants to propagate his own views. The Wycliffites, as his numerous followers were called, were subjected to much persecution; but Wycliffe himself continued, unmoistened, to preach at Lutterworth. On Dec. 29, 1381, he was seized with a second fit of paralysis, while (as some say) in the act of celebrating the Lord's supper, and died on the last day of that year. The Council of Constance (May 5, 1415) condemned his doctrines, and in 1429 his remains were dug up and burned; the ashes were cast into the adjoining Swift, which, as Fuller proudly says, and Wordsworth mockingly, remark, conveyed them through the Avon and the Severn into the sea, and thus disseminated them over the world. His doctrines, carried into Bohemia by the members of queen Anne's retinue, originated the Hussite movement.

The celibacy of the clergy being then a universal custom, he was unmourned; his widow, Alice, and family, and the English Bible his heirloom to posterity.

III. Writings.—Wycliffe's literary productions are very numerous (Shirley [List of the Original Works of John Wycliffe (Oxf. 1865)] enumerates more than two hundred, chiefly tractates, many of them still unpublished); some of them are in Latin, others in English, and nearly all are on the religious questions of the day. Many of them still remain in MS. The most important, by far, is his New Testament, which appears to have been published about 1578, and again in 1830; the first printed edition was by John Lewis (Lond. 1731, fol.), the next by Henry H. Babb (ibid. 1810, 4to), and the latest at the Clarendon Press (Oxf. 1879, 12mo); it is also contained in Bagster's Hexapla (ibid. 1841, 4to), and, in part, in Bosworth's Anglo-Saxon Texts (ibid. 1868, 4to). It was likewise printed from a considerably different MS. by Pickering (ibid. 1846, 4to). Wycliffe also translated, either in person or by assistants, the entire Old Testament, including the Apocrypha, which seems to have been completed shortly before his death. His whole Bible has been accurately printed from a collection of 170 MSS., with valuable dissertations, etc., by Forshall and Madden (Oxf. 1856, 4 vols. 4to). Wycliffe translated di rections from Origen into Greek, the as the result of his knowledge of the Hebrew and Greek origins as a basis. His version is quite literal and plain, but stiff and Latinized; yet less so than many of Wycliffe's other writings. It has, of course, little critical value; but its influence, at the time, was immense, and has since been inexcusable. It can hardly be considered the foundation of our present English Bible, but rather its precursor; and, no doubt, Tyndale largely used it in his translation from the original tongues.

Wycliffe's Bible was revised about 1886 by John Purvey, who had been his curate; and it is Purvey's edition, rather than Wycliffe's own, that has generally passed as Wycliffe's Bible (Lei., Lewis's, Baber's, the Clarendon, and Bagster's text). Both are printed in parallel columns by Forshall and Madden. See Authorised Version.

See Leechler's ed. of Wycliffe's Trilingualis (Oxf. 1869); also id., Diet. of Later, 1883; and Wycliffe's Wicket (Oxf. 1816); Armistead: Select English Works of Wycliffe (Lond. 1869-71, 3 vols.); Vaughan, Tracts and Treatises of John Wycliffe (ibid. 1854); Lives of Wycliffe, by Lewis (Oxf. 1820); Tyler (Edinb. 1826); Murray (Lond. 1829); Vaughan (ibid. 1828, 1831, 1853). Le Bas (ibid. 1856); Lechler (Leips. 1879); trans. by Lorimer, Lond. 1874.

Wylie, Andrew, D.D., a Protestant Episcopal clergyman and professor, was born at Washington in 1789. He was educated in the Presbyterian Church, and passed A.B. at Jefferson College, Canonsburg, Pa., in 1810. He was licensed by the Presbytery of Ohio in 1815, and soon after installed pastor of Miller's Run Church. He is pastor of Presbyterian churches in Washington and Baltimore, and extended his services as a preacher to Ten Mile and West Liberty, till his removal to Pigeon Creek, where his memory is still cherished. In 1828 he was elected president of Indiana College, and removed to Bloomington, where he joined the Episcopal Church. Twice he represented the diocese in General Convention, and was president of the Standing Committee in 1851. He died Nov. 11, 1851. Dr. Wylie was regarded as one of the ablest teachers in the West. He published an English Grammar (1822):— A Eulogy on Lafayette (1834);—a pamphlet entitled Secularisation vs. Theological Education (1840);—The Individual and the Body Politic (1841);—Sermons and Addresses:—a work on rhetoric; and an Advice to Young Men (left ready for publication). See Sprague, Annals of the Amer. Pulpit, v. 779; Amer. Quart. Church Rev. 1852, p. 640.

Wylie, Samuel Brown, D.D., LL.D., a Reformed Presbyterian divine and author, was born at Moylarg, near Dalmally, County of Artrim, Ireland, May 21, 1774. He graduated at the University of Glasgow in 1797; emigrated to Philadelphia the same year; taught a school at Cheltenham, Pa., until the fall of 1798, when he was appointed a tutor in the University of Pennsylvania; was licensed to preach June 25, 1799; ordained June 25, 1800; was pastor of the First Reformed Presbyterian Church, Philadelphia, Pa., till 1807, and presiding elder of the Reformed Presbyterian Synod of the South till 1812; professor in the Theological Seminary of the Reformed Presbyterian Church from 1809 to 1851; professor of ancient languages in the University of Pennsylvania from 1828 to 1845, and emeritus professor from 1845 to 1852; vice-president of the University of Pennsylvania from 1838 to 1845, and died in Philadelphia, Oct. 13, 1852. Mr. Wylie was the author of The Faithful Witness for Ministry and Mission upon a Scriptural Basis (Philadelphia, 1804; Paisley, Scotland, 1806; other eds.)—The Westminster Magazine (1821-22, 2 vols. 8vo), and also contributed to periodicals. "Few men have ranked higher than Dr. Wylie in the moral literature and theological attainments of his time, and a greater "defender of the Christian Church" (Blake, Biog. Dict. s. v.). See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Sprague, Annals of the Amer. Pulpit, i. 34; McMaster, Discourse on his Life and Character (Philadelphia, 1852, 8vo); Meleod, Discourses, etc. (1852, 8vo); Wilson, Presb. Hist. Amer., 1860, p. 177. (J. L. S.)

Wynne, John, D.D., an English clergyman, was
sometime fellow of Jesus College, Oxford. He became Margaret professor of divinity at Oxford in 1705; prebendary of Worcester in 1706; principal of Jesus College, Oxford, in 1712; bishop of St. Asaph in 1715, and of Bath and Wells in 1727; and died in 1748. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Wynne, Robert, D.D., an English clergyman, became prebendary of St. Asaph in 1691 (or 1692), and afterwards chancellor of St. Asaph. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Wytembogard. See Uttenboogarding.

Wytenbach, Thomas, chronologically the first of Swiss reformers, is supposed to have been born in 1472 of an ancient family at Biel. He is known to have been a student at Tubingen, where Gabriel Biel and the learned Hebræist Konrad Pellican were the professors. About 1503 he habilitated himself at Basle as artium lb. magister and sacer doceologia bacillus. baccal. He expounded the sentences of Peter Lombard and several books of Scripture, and taught the dogmas of Rome in disputations, as is attested by his pupils Leo Judah and Ulrich Zwingli. In 1515 he was appointed to the town church of Biet, and confirmed in that charge by the bishop of Lausanne on Aug. 26. In the course of his early ministry he was employed by the town authorities to conduct negotiations with Rome respecting the permission to use a milk diet in Lent and the obtaining of dispensations for the citizens of Biel. He was also zealous in defending the independence of the town priest against the abbot of the neighboring convent of St. John, and the rights of the town church against the civil authorities. In 1515 he sojourned at Basle, and obtained the degree of theological doctor, besides being made canon and custos of St. Vincent's, while retaining his previous office at Biel; but five years later he had resigned all his dignities at Basle and resumed his place at Biet altogether. He persistently preached against indulgences and the mass, kept a watchful eye upon the abbott of St. John and the town council, and ventured to attack the celibacy of priests. In 1524 he married, and was accordingly dismissed from his charge. He thereafter preached in the open air and other available places, visited his assailants and discussed the questions at issue with them, and by different methods gained many friends to his side. His life had been a constant struggle with poverty from the beginning, and was now more than ever wretched from this cause. But appeals to the council for support, in recognition of the services of eight years which he had given to the town, produced no effect; and when, in 1525, the temper of the community had changed, and resolutions were adopted by the citizens asking that Wytenbach be allowed to preach, and that a suitable support be assured him, the council first evaded the demand and then invoked the intervention of the bishop of Lausanne. An ecclesiastical admonition was accordingly addressed to Biel, Nov. 11, 1525. A protracted agitation followed, the result of which was that Wytenbach was thrown aside by all parties, and refused employment of any kind by his native town. A pension amounting to twenty florins annually was after a time granted him as remuneration for the losses incurred in the contest with the abbott of St. John; but he did not live to enjoy even this beggarly provision. He died in 1526. Two years afterwards the reformation of Biel was an accomplished fact.

No literary remains of sufficient extent to afford a proof of Wytenbach's scholarly abilities are in existence. A few Letters, mostly contained in the archives of Biel, are extant, which show him to have been a man of convictions and a courageous defender of truth and right. See Scheurer, Manualium (largely incorrect), pt. i.; Kuhn, Reformatorum Vitae, p. 344, in Schott, d. Stadtb. Biel, etc., and particularly the section Manuel Dominorum Collegii St. Vincenti Bernalis from A.D. 1488 to the Reformation; Haller to Zwingli in 1523, in Zwingli's Opp. i, 294.—Herges, Real-Encyklop. s. v.

X.

Xavier, Francis, one of the most celebrated members of the Order of the Jesuits, was born of noble parentage at the Convent of Xavier in Navarre, April 7, 1506. He was the youngest child of a large family, and fondly loved by his doting parents. Early developing remarkable talents, and devoted to literary pursuits, he was sent, at the age of eighteen, to the College of St. Barbara in Paris. The strained circumstances of his life forced him to make a course of study; but the affection of his eldest sister, and her almost prophetic insight into his wonderful future career, prompted to the practice of the strictest economy in college expenditures; this giftid brother might have the means to complete his collegiate education. It was not long before, as a public teacher of philosophy, he was able to procure the means for his own support and begin to make that impression in the world for which he afterwards became so renowned. It was at this time that he became acquainted with Ignatius Loyola, who threw around the brilliant young man the fascination which he was unable to resist, and in due time he was enrolled as a member of the Society of Jesus. He followed his leader with an unquestioning obedience to Rome, and united with him in his effort to raise a band of devoted missionaries, who should go forth in all directions to extend the triumphs of the Church and bring the nations under the sway of the Christian faith.

After the discoveries of Vasco de Gama, the Portuguese had sent out colonies to India. By them the city of Goa was founded. Acting in accordance with the spirit of the age, John III. king of Portugal, resolved to set up the Christian Church in his Eastern territories, and by the suggestion of Loyola and of his own envoy at Rome, Govea, he selected Xavier to commence the enterprise. "A happier set of circumstances could not have been made, nor was a summons to toil, to suffering, and to death ever so joyously received." He embarked in a ship which bore a regiment of a thousand men, sent out to reinforce the garrison of Goa. A long, dismal, and wearisome instance of the state of voyage was the fearful experience through which the band had to pass. Xavier, although himself weakened by constant sea-sickness, was an angel of mercy and kindness to his fellow-voyagers, and "lived among the dying and the profligate the unwearied minister of consolation and peace." Five months were passed in this dreary voyage when the ship reached Mozambique. Here Xavier was brought to the borders of the grave by a raging fever, and so slow was the return of his strength that it was months before he set foot in the city of Goa. A dismal moral scene met his eye, and a less heroic spirit would have been appalled in view of the mighty task he had undertaken to perform. But with apostolic zeal he commenced and prosecuted his work. Wearing the coarsest garments, and pale and haggard with his long sickness, he traversed the gay streets of Goa, swinging a large bell in his hand, and calling everywhere upon the many who met to place their children under his spiritual care. Gathering these little ones under his tuition, he taught them the rudiments of religion, and sent them to their homes to carry their parents the lessons which they had been taught by the missionary of the Cross. The wretched and neglected who were so often borne by him. He frequented the most loathsome hospitals, and had
words of sympathy and kindness for the suffering ones whom he found there. More than a year did be remain in Goa; and when his work there was done, the city was not what it was when first he took up his abode within its walls.

On the coast of Malabar there was then, as there is now, a large and well-organized monastic community. Those engaged in this dangerous business formed a large and degraded caste, which seemed to be forsaken of God and man. Thither Xavier directed his steps. Once more were heard the tones of his ringing bell calling the ruse, neglected children to his side and giving them such religious instruction as he could give them. He did not fail to find teachers from which they could learn the elements of Christian doctrine. He remained among these degraded pearl-fishers for fifteen months, sharing in all the hardships of their abject lot, and living among them in the humblest and most self-sacrificing way, if by any means he might win them to the acceptance of the faith which he taught. He found inexhaustible joy in his missionary work. "I have nothing to add," thus he wrote to Loyola, "but that they who came forth to labor for the salvation of idolaters receive from on high such consolations that, if there be on earth such a thing as happiness, this is it." His mission on the coast of Malabar accomplished, Xavier moved on to make other conquests for the Church. The kingdom of Travancore was next entered, and the most marvellous service followed his labors. He tells us that in one month he baptized ten thousand natives. With a zeal and energy not surpassed by any missionary of the Cross, he explored the islands of Mora, Manex, Ceylon, the Moluccas, and every part of the Indies which had been made known to the world by European travellers. "Weak and frail he may have been, but from the days of Paul of Tarsus to our own the annals of mankind are filled with no such soul borne on so triumphantly through distress and danger in all their most appalling aspects." In 1549 he landed on the shores of Japan, and was soon able to preach to the natives of that great island the Gospel as he believed it. The story of the labors of Xavier and his associates among the Japanese is one of the most marvellous in the annals of missionary adventures. The details of this story are too long to be recited in a sketch like this, and the reader must look elsewhere to find them. With his ambition as a missionary still ungratified, and resolved to find a still larger number of converts with his eyes turned towards the great empire of China, and resolved to make that vast country the scene of his consecrated toil. Overcoming obstacles which would have terrified any other man, he embarked in the "Holy Cross," and at length reached Sancian, an island near the mouth of the Canton River, where the Portuguese had a commercial factory. Here he was proscribed by a disease which proved fatal. His iron frame was worn out by his ten years and a half of incessant work, and he was compelled to bow before a Power whose mandate he could not withstand. He died Dec. 2, 1552. His last words were to his companions, "Give the cope of my tunic to the poor, and the vestments in asternum" ("In thee, O Lord, have I put my trust; let me never be confounded"). His body was removed to Goa, where it was deposited in the Church of St. Paul. In 1619 he was beatified, and in 1622 was canonized as a saint. The "festival day" of Xavier in the calendar of the Roman Church is Dec. 3. See Stephens, "Miscellaneous, &c., &c. "Ignatius Loyola and his Associates;" The Life and Letters of St. Francis Xavier (Lond. 1872, 2 vols.); Christian Review, June, 1842. (J. C. S.)

XIMENES, FRANCISCO DE CHIREROS, cardinal-archbishop of Granada, inquisitor-general of Castile, and regent of Spain, was descended from a family belonging to the inferior nobility of Castile, and originally resident in the town from which its apppellative was derived. He was born in 1486, and named Gonzalez, the name Francisco being a later monastic substitute. Early destined for the Church, he studied ancient languages at Alcala, at the age of fourteen entered the University of Salamanca, and six years later became bachelor of both civil and canon law. He was driven by poverty to engage in the practice of law at Rome. On the death of his father, however, he returned home. Those engaged in this dangerous business formed a large and degraded caste, which seemed to be forsaken of God and man. Thither Xavier directed his steps. Once more were heard the tones of his ringing bell calling the ruse, neglected children to his side and giving them such religious instruction as he could give them. He did not fail to find teachers from which they could learn the elements of Christian doctrine. He remained among these degraded pearl-fishers for fifteen months, sharing in all the hardships of their abject lot, and living among them in the humblest and most self-sacrificing way, if by any means he might win them to the acceptance of the faith which he taught. He found inexhaustible joy in his missionary work. "I have nothing to add," thus he wrote to Loyola, "but that they who came forth to labor for the salvation of idolaters receive from on high such consolations that, if there be on earth such a thing as happiness, this is it." His mission on the coast of Malabar accomplished, Xavier moved on to make other conquests for the Church. The kingdom of Travancore was next entered, and the most marvellous service followed his labors. He tells us that in one month he baptized ten thousand natives. With a zeal and energy not surpassed by any missionary of the Cross, he explored the islands of Mora, Manex, Ceylon, the Moluccas, and every part of the Indies which had been made known to the world by European travellers. "Weak and frail he may have been, but from the days of Paul of Tarsus to our own the annals of mankind are filled with no such soul borne on so triumphantly through distress and danger in all their most appalling aspects." Yates, Andrew, D.D., a (Dutch) Reformed min-
ister, was born at Schenectady, N.Y., Jan. 10, 1772. He
graduated with honors at Yale College in 1789; studied
theology under Dr. John H. Livingston, and was licensed
in 1796 by the Classis of New York. In 1797 he was
made professor of Latin and Greek in Union College,
and held this chair until 1801, when he became pastor
of a Congregational Church in East Hartford, Conn.
After thirteen years of efficient service (from 1801 to 1814), he again accepted a professorship in Union College
(mental and moral philosophy) which he held eleven
years (from 1814 to 1825), and for eleven years more
was the principal of a high-school at Chittenango,
N. Y. (to 1836). From that time until his death he
devoted himself with untiring zeal and great useful-
ness to the assistance of no less than thirteen feeble
present at the storming of the latter place. He
has been credited with having originated the Inquisi-
tion in Castile, and charged, on the other hand, with
having opposed its rule. Both statements are, how-
ever, erroneous. He came to the court twelve years
after the Inquisition was introduced, and he protected
Talavera, archbishop of Granada, against the charge
of heresy by appealing the case from the Inquisition to
the pope. As grand-inquisitor he issued instructions
to enable new converts to prevent themselves against
the suspicion of relapse, and even provided for their
education in Christian knowledge. He also restricted
the authority of subordinate inquisitors. On the oth-
er hand, he refused to allow causes before the tribunal
of the Inquisition to be tried in public, and in general
showed himself to be in thorough harmony with the
spirit of that institution. A moderate estimate fixes
the number of persons burned at the stake during the
ten years of his supreme administration at above two
thousand. He also erected a new tribunal of the In-
quisation and transplanted the Inquisition itself to Oran,
the Canary Isles, and America.
He was unable to attend the Lateran Synod held un-
der Leo X, but counselled the pope by letter, and pro-
mulgated the decisions of the order which he had
sent in his stead. He also endorsed Leo's plan for impro-
vining the Julian calendar. But he did not, on the oth-
er hand, hesitate to condemn the sale of indulgences
as involving an enervation of the discipline of the
Church and a dangerous liberty. When king Ferdi-
nand died (1611), Ximenes was made regent of Castile
until Charles (V) should reach his majority, a position
which he filled during twenty months with great abil-
ity. He preserved for the crown, against the opposi-
tion of the nobility, the grand-mastership of the order
of San Iago di Compostella; transferred the seat of
government to Madrid; had Charles proclaimed king
over the votes of the assembled council; restrained
the nobles by organizing an armed militia throughout all
Spain, and deprived them of a portion of the property
they had acquired by violence or fraud. With this
money, partly secured by his ordinances and partly by
Isabella, strengthened the army and navy, erected fortifi-
cations and established arsenals, and supplied the mer-
cenary greed of the court with funds. He took meas-
ures to improve the condition of the natives of Amer-
ica, and appointed Las Casas to be protector over the
American colonies. The introduction of African slave-
ery into the colonies, which was proposed by some,
was positively forbidden by him. On the return of
Charles to Spain, he found Ximenes dying. The end
came Nov. 8, 1517.
The principal source for Ximenes' life is Gomez, De
Rob. Gereciga a Fv. Ximineo Cnmero, in Libri Octo, in
Rerum Hisp. Scriptores Aliguet (Frankl. 1581), vol. iii.
Other Spanish works on Ximenes are given in Pres-
cott. A French life was written by Fleichier, bishop of
Nimes. See also Hefele, Der Cardinal Ximenes, etc.

YATES 1047 YOUNG

-churches. During his life as a teacher, he was con-
stantly engaged in preaching wherever he was wanted.
He was the chief instrument in founding a mission among
the Indians at Mackinaw, about 1823. He organized a
Church at Chittenango, and was its pastor while he had
charge, and on Sabbath School. His life was full of
illness contracted in his missionary labors. His last ef-
cfort was the establishment of a Mission Church among
a poor people at Day, or Saumagaga, Schenectady Co.,
N.Y., of which his sister, an aged and benevolent lady,
was the chief supporter. But ten days before its dedi-
cation, and on Sunday, Oct. 19, 1844, he died without
a struggle. His epitaph is inscribed on the bell of the
little church, which is only one of the many monuments
of his apostolic spirit and toils. At East Hartford his
pastorate was greatly blessed with revivals and constant
ingathering. There he began, and at Schenectady con-
tinued, to teach theology to young men, of whom thirty
entered the ministry of Christ. Among these were presi-
dent Wayland, of Brown University; Dr. Mark Tucker,
of Wethersfield; and Dr. B. B. Wisner, of Boston. Dr.
Yates was an accurate scholar, a thorough theologian,
an effective evangelical preacher, an accomplished col-
el, a professor of the school, a man of poetic spirit
and Christian enterprise. He was in the best sense a
Christian gentleman, and "a good minister of Jesus
Christ." His publications consisted of a few occasional
Sermons and fugitive pieces. He preferred to let his
active works speak for him, for he was not ambitious of
disclosure. He was an honest soul, who, for the sake of
his neighbors, was consistent in the "purpose of being
superior" to his neighbors. Ambition is a bad motive; the
Bible does not appeal to it. "The dew falls silently, nobody hears it, but the fields feel it. The attraction of gravitation makes no noise." So he lived and died, a happy Christian, and "a work-
man that needed no testimony to be acknowledged." Dr. Sprague has given an unusual space to his memory in his Annals of the Amer. Pulpit, ix, 126-138; see also Corwin, Manual of
the Ref. Church, p. 275, 276. (W. J. R. T.)

Yates, John Austin, D.D., a (Dutch) Reformed
minister, son of the preceding, was born at East Hart-
ford, Conn., May 31, 1801. He graduated at Union Col-
lege in 1821, and studied theology at the Seminary of
the Reformed Church at New Brunswick, N. J., for two
years, when he accepted a tutorship in his alma mater
at Schenectady, N. Y. He was licensed to preach in
1824; continued as tutor until 1827, and was then made
professor of the Liberal Arts in that Institution. To complete his preparations for this chair, he went
to Europe, studied at the University of Berlin, visited
Italy and other countries, and returned at the end of
two years to his post (in 1829). He was never settled
as a pastor, but supplied various churches in Schenectady,
Albany, and elsewhere during his collegiate life of twenty
years. He had, however, accepted a call to the First
Reformed Church of Jersey City, and had informally
begun his labors with enthusiasm and great popular-
ity. He died very suddenly of Asiatic cholera, Aug. 26,
1849, while on a visit to Schenectady, and his funeral
sermon was preached in his church in Jersey City on
the evening that had been set apart for his installation.
Dr. Yates was a highly accomplished man, attractive
in manners, of genial spirit, and possessed of that magnetic
power which is so irresistible in social and public life.
He was a man of genius, literary and polished to a high
degree, and an enchanting public speaker. His ser-
mons, being prepared during his professional life, were
written with great care, and often were the fruits of
long previous study and repeated revision. His deliv-
ery was animated and graceful, with a subdued earnest-
ness and a marked effect on his hearers. His was
the most natural and effective of all the speakers he
heard. He was as simple as a child, and singularly free
from duplicity or suspicion. He passed through many
trials, to some of which his natural temperament added
new pangs and complications. His students and friends
loved him unto death with the most ardent affection,
while those who opposed him in some of his difficul-
ties were equally decided in their feelings. His sud-
den death found him at peace with God and ready
for his change. He left no printed remains. (W. J.
R. T.)

Yates, Richard, D.D., an English clergyman, was
born at Bury St. Edmund's in 1769. He was chaplain
of Chelsea Hospital from 1792, and rector of Ashby
in the county of York, from 1804 until his death, Aug. 24, 1844. He pub-
lished An Illustration of the Monastic History and Antiqui-
ties of the Town and Abbey of St. Edmund's-Bury (1806);
—The Church in Danger, etc. (1815); — and other works.
See Allibone, Dict. of Brit. and Amer. Authors, a. v.

Yates, William, D.D., a Baptist missionary, was
15, 1792. He was educated at Bristol College, and went
to Calcutta as a missionary in 1815. He settled at Ser-
ampore, where, after the death of Dr. Carey, he devoted
himself entirely to translating, and to preparing text-
books. He visited England in 1827-29, and in 1845 embarked for England on text-
book, and his health, but died on the Red Sea, July 3 of that
year. He translated the whole Bible into Bengalee; the New Test.
and most of the Old into Sanscrit, and the New Test.
into Hindee and Hindostanee. Among
his most important publications were, A Grammar of the Sanscrit Language on a New Plan (1820); Sanscrit Vocabulary (ed.); — Introduction to the Hindostanee
Language (1827); — Dictionary, Hindoostanee and English
(1836); — Biblical Apparatus, in four parts (1837); —
Theory of the Hebrew Verb; — and Introduction to the
Bengalee Language (posthumous; edited by J. Wengar,
1847). A Memoir (1847) of him has been written by
Dr. James Hoby. See Allibone, Dict. of Brit. and Amer.
Authors, a. v.

Yeomans, John William, D.D., a Presbyterian
divine, was born at Hinsdale, Mass., Jan. 7, 1800. He
graduated at Williams College in 1824; studied theology
in the seminary at Andover, and was ordained and in-
stalled pastor of the Church at North Adams in Novem-
ber, 1828. In 1832 he became pastor of the First Congre-
gATIONAL Church of Pittsfield; in 1834 of the First
Presbyterian Church of Trenton, N. J.; in 1841 accepted the presidency of Lafayette College, Easton, Pa.;
and in 1846 became the first Moderator of the Mahoning Church in Pennsylvania, where he continued to labor until his death, June 22, 1863. Dr. Yeomans was a man of strong and original
mind. His profound thought and logical power were
acknowledged by all who knew him or read his writings.
As a preacher, he was instructive, impressive, and often highly eloquent, and above all, he was a devout faith
and prayer, of deep, intelligent, and scrip-Ptural piety.
He published, an Election Sermon (Boston, 1834, 8vo.):—Dedication Sermon (1840, 8vo.):—Inaugural Address
(1841, 8vo.);—and he co-author of a Hist. of the County of Berkshire, Mass. (Pittsfield, 1829, 12mo, 468 pp.; in 2
parts). Besides these, he was a frequent contributor to
the Biblical Repertory and other religious periodi-
cals, and had for several years been engaged in writ-
ing Commentaries on the Epistle to the Romans and the
Gospel of John, both of which were left in an un-
(J. J. L.)

Young, Alexander, D.D., a Unitarian minister,
was born in Boston, Sept. 22, 1800. In 1812 he entered
Boston Latin School, and in 1820 he graduated at
Harvard College. In 1821 he entered the Divinity
School at Cambridge, where he pursued the regular
course of study for three years, was graduated in 1824, and accepted a call to the Sixth Congregational
Church, Boston, in 1825. In 1833 he went to Europe.
He was a very successful preacher. He died March 16,
1846. His publications were numerous, mostly ser-
Young, Arthur, D.D., LL.D., an English divine, chaplain to speaker Ouslow, became rector of Bradfield, and in 1746 prebendary of Canterbury. He died in 1759. He published a Historical Dissertation on Idolatry and Religion, etc. See Allibone, Dict. of Brit. and Amer. Authors, s.v.

Young, Brigham, the president and prophet of the Mormons (q.v.), or Latter-day Saints, was born in Whitingham, Vt., June 1, 1801. He was the son of a farmer, received a very limited education, and learned the trade of a painter and sign painter. He joined the Baptist Church and preached occasionally with considerable acceptance. In 1832, however, he joined the Mormons at Kirtland, O., became an elder and one of the twelve apostles, and was sent as a missionary in 1835 to make proselytes in the Eastern States, in which he was very successful. His preaching was characterized by a peculiar kind of eloquence, which made a deep impression, and enabled him to rise rapidly in the estimation of the people of his sect, and to acquire almost boundless influence. He possessed, at the same time, great energy and shrewdness and a strong personality, which further enhanced his popularity. After the death of Joseph Smith, in 1844, Young was one of the four aspirants to the presidency, and was unanimously elected to that office by the apostles. The choice was received with the highest approval, and his principal rival, Sidney Rigdon, was excommunicated. When the Mormons were expelled from Missouri in 1838, Young set out to lead the host on their weary journey across the Plains, which terminated only on their reaching Great Salt Lake Valley, which he declared to be the promised land. Here he founded Salt Lake City in July, 1847, in which he exercised absolute authority. In March, 1849, a convention was held in that city, a constitution framed, and a State was organized under the name of Deseret, which, in the "reformed Egyptian" language, is said to mean the "Land of the Honey-bee." Congress, however, refused to admit the new state, but Utah Territory was organized, and President Fillmore appointed Brigham Young governor for four years. The next year the United States judges were driven away: and at the termination of the four years for which Young had been appointed governor, Colonel Steptoe was appointed in his place. But on visiting Utah in 1864, he was resisted by the Mormon president, who declared that the Constitution "would be inoperative if I should have no power to hinder it until the Lord Almighty says, 'Brigham, you need not be governor any longer.'" In 1857 President Buchanan appointed Alfred Cumming governor, and sent him out with a military force of 2000 men for the protection of the Federal officers. This brought many difficulties with the Mormons and the Government, but peaceable, though not without some concessions on the part of the government.

On Aug. 29, 1859, Young proclaimed the "celestial law of marriage," sanctioning polygamy, which he declared had been revealed to Joseph Smith in July, 1843. This was denounced by Smith's widow and her four sons as a forgery; and, although the Mormon apostles had repeatedly and explicitly denied the imputation of such a doctrine and practice, they now accepted it without much resistance. He took to himself a large number of wives, more or less by force, residing in a building known as the "Lion House," so called from a huge lion, carved in stone, which stands upon the porch. In addition to his office of president of the Church, he was grand archdeacon of the Order of Danites, a secret organization within the Church, which was one of the chief means of state power; and by organizing and directing the trade and industry of the Morning Star, he had for his own advantage accumulated immense wealth. During the later years of his life and administration, the development of the mining interests of the Territory and of the commercial interests of Salt Lake City brought a great many "gentiles" (as those who are not Mormons are called by that sect) to the Territory and city, and the temporal power of Brigham Young had greatly diminished. He died at Salt Lake City, Aug. 29, 1877.

Young, Edward (1), LL.D., an English clergyman, father of the poet, was born in 1643. He was successively fellow of Winchester College, rector of Upham in Hampshire, and rector of Salisbury. He died in 1705. He published a number of single sermons, and a collection under the title of Sermons on Several Occasions (Lond. 1702-3, 2 vols.). See Allibone, Dict. of Brit. and Amer. Authors, s.v.

Young, Edward (2), a celebrated English poet and clergyman, was born at Upham in Hampshire, in 1684. He was educated at Winchester School and at Oxford University, where he received a law fellowship in All-Souls' College in 1708. He devoted himself, however, more to poetry and religious studies than to law; but received the degree of B.C.L. in 1714, and that of D.C.L. in 1719. His first appearance as a poet was in 1713, in an Epistle to George, Lord Lansdowne, on his being created a peer. He, however, became ashamed of its fulsome flattery and suppressed it. In the same year he also published two other poems of some length, entitled respectively The Last Day and The Force of Religion. The Last Day includes The Love of Name, the Universal Love. The Force of Religion includes A Poem on the Death of Queen Anne. These efforts gave him some immediate reputation, and in 1719 he ventured on the more ambitious effort of a tragedy, under the title of Busiris, which was brought out at Drury Lane with fair success. This attracted to him the notice of the duke of Wharton, with whom he went abroad at the end of this year. At the death of the duke, Young received an annuity of £200. In 1721 his tragedy The Revenger was produced, but was unsuccessful at the time, though it has since had greater acceptance. Between 1725 and 1728 appeared in succession his pastoral entitled The Love of Name, the Universal Passion, which had great success, and brought to their author both money and fame. In 1726 he issued The Instalment, a poem addressed to Sir Robert Walpole on his being made a Knight of the Garter, for which service it is believed he obtained his pension. In 1727 he took holy orders, and was appointed one of the royal chaplains; and in 1730 he became rector of Welwyn, Hertfordshire, which post he retained, much against his will (for he was an anxious seeker for ecclesiastical preferment), until his death, April 12, 1765. In 1731 he married Lady Elizabeth Lee, daughter of the Earl of Sandwich, and widow of a Colonel. He exhibited great grief at her death, in 1741; and it is believed that he received the suggestion of the Night Thoughts from the solemn meditations on that event. By this work, began shortly afterwards and published 1742-46, almost solely is he remembered. He published numerous other works of no present importance. In 1762 he superintended an edition of his collected works in 4 vols. 12mo, from which he excluded some of his most gushing productions. The Night Thoughts has passed through editions innumerable both in England and America. Various other editions of his collected works have also appeared from time to time, for which see Allibone, Dict. of Brit. and Amer. Authors, s.v. See also Chalmers, Bkg. Dict. s. v.; Johnson, Lives of the Poets; Hazlitt, Lectures on the Eng. Poets, lect. vi.

Young, Jacob, D.D., a Methodist Episcopal minister, was born in Allegeny County, Pa., March 19, 1775. His father was a member of the Church of England, and his mother was a Presbyterian, yet both were strangers to the converting power of Christ being brought to him by their own son. The stirring scenes and mighty struggles connected with the birth of our national republic at the time Mr. Young was ushered into life seem to have breathed into him the very spirit of greatness. His first years were passed amid the wildest scenes of frontier peril, which inspired him
with physical and mental activity, and uncommon natural courage. Under the care of his affectionate mother, he grappled with many of those great thoughts which afterwards swelled his mature and manly heart. The simple grandeur of the New Test, impressed his mind, while the history and sufferings of his Saviour were reflected in his mirror of faith. In early manhood he moved with his father to Kentucky; joined the Methodists; felt himself called to preach; and, without formal Church authority, preached his first sermon, saw the congregation bathed in tears, and felt in his own soul the heavenlyunction. In 1806 he was licensed to preach by the direction of William McDendree, afterwards bishop, was thrust out on a large frontier circuit. For fifty-five years Mr. Young was engaged in the itinerancy. He travelled extensively, everywhere attended by marvellous success. He died Sept. 15, 1855. He was a man of great intellectual power, habitually prompt, laborious, unsparing; great in his Christian character, great in his fidelity; great in his success. See Minutes of Annual Conference, 1850, p. 233; Simpson, Cyclopaedia of Methodism, s. v.; and his Autobiography.

Young, John Clarke, D.D., a Presbyterian minister, son of the Rev. John Young, was born at Green- castle, Pa., Aug. 15, 1811. He prepared for the theological studies under Dr. John Borland, an eminent teacher of New York city; and studied three years in Columbia College, where he removed to Dickinson College, graduating in 1828. He entered Princeton Theological Seminary in 1824, where he remained two years; then in 1826 became tutor in the College of New Jersey, where he served until 1828. He was licensed in the spring of 1827 by the Presbytery of New York; and, on leaving Princeton, was settled as pastor of the McChord Presbyterian Church of Lexington, Ky. In the fall of 1830 he was chosen president of Centre College, Danville, and filled the office with great credit to himself during the remainder of his life. In 1834 he assumed, in connection with the presidency of the college, the office of pastor of the Presbyterian Church at Danville, in which relation, also, he remained until his death, which occurred June 22, 1857. He published a number of single sermons, speeches, and addresses. See Sprague, Annals of the Amer. Pulpit, IX, iv., 44.

Young, John Kimball, D.D., a minister of the Congregational Church, was born at Dover, N.H., March 22, 1802. His preparatory studies were pursued at Dover Academy; he entered Dartmouth College at the age of fifteen, and graduated in 1821. He was a teacher in Hillsborough Academy in 1821-1824, to July, 1827; graduated from Andover Theological Seminary in 1828, and was ordained in Boston, Sept. 24, 1829; was the agent of the American Bible Society from 1829 to 1831; installed pastor at Laconia, N.H. (then Meredith Bridge), Nov. 29, 1831, and was dismissed Feb. 12, 1867. He was acting pastor at Hopkinton from 1867 to 1874. From 1842 he was a corporate member of the American Board of Commissioners for Foreign Missions; from 1846 to 1858, also from 1861 to 1873, he was a trustee of the New Hampshire Missionary Society; for a time he was a trustee of the Gilmanton Academy and Theological Seminary; was corresponding secretary of the New Hampshire General Association from 1851 to 1861, was moderator of it in 1866, and from 1849 was a member of the New Hampshire Historical Society. He died at Laconia, Jan. 29, 1873. See Cong. Quar. 1876, p. 437; 1877, p. 51.

Young, John R., D.D., a Presbyterian minister, was born at Marlborough, N.Y., Oct. 17, 1829. He graduated at Union College, and subsequently at Union Theological Seminary. After his ordination he became pastor of the Presbyterian Church of Phelps, N.Y.; subsequently he became stated supply of Painted Post, Baldwinsville, Cortland, and Keeseville, all in N.Y. A second pastorate in Plattsburg lasted five years; from Plattsburg he removed to Maranamneck, and from thence to Newport, R.I. He was pastor at Greenbush, N.Y., for two years, and stated supply at Albany for two years following. After this he served a short time at Newmarket, N.H., and Tecumseh, O., where he was taken ill, and returned to Albany. He died at Norfolk, Va., July 30, 1879. See Necrological Report of Union Theological Seminary.

Young, Matthew, D.D., a distinguished Irish prelate and mathematician, was born in the County of Roscommon in 1750. He prosecuted his studies at Trinity College, Dublin, where he was admitted in 1766; became a fellow of the college in 1773, and entered the priesthood in 1776. In 1786 he was chosen professor of natural philosophy in the same institution, and greatly enlarged his course of instruction, introducing illustrations by means of apparatus. He was one of the founders of the Royal Irish Academy, which began active work in 1792. He was appointed by lord Cornwalis bishop of Clonfer and Kil- managh; and died Nov. 28, 1800. He published a number of mathematical and philosophical papers and essays, and left in MS. a Latin Commentary on the First Two Books of Newton's Principia. See Knight, English Cyclop. Biog. vi, 692; Allibone, Dict. of Brit. and Amer. Authors, s. v.

Young, Patrick (Lat. Patricius Junius), a noted English clergyman and scholar, was born at Seton, in East Lothian, Scotland, Aug. 29, 1784. He was educated at the University of St. Andrews, where he took the degree of A.M. in 1803. In 1805 he was incorporated A.M. at Oxford, took deacon's orders, and became chaplain of New College. He went to London afterwards; was granted a pension of £50 a year; and made keeper of the library of king James. In 1817 he went to France and other neighboring countries, where he attracted great attention on account of his learning. He was subsequently presented to the rectories of Hayes and Llan- rhian. In 1849 he retired to Brompton, in Essex, where he lived with his son-in-law, Mr. Atwood; and died Sept. 7, 1852. His great scholarship is not adequately represented by his literary remains, for he is said to have been indolent and undeserving of literary fame. He assisted Thomas Reid in translating into Latin the works of king James; made some notes on the Alexandrine MS. of the Bible (extending down to Numb. xv), which are published in Walton's Polyglot Bible, vol. vi, under the title Patris Juni Annnotationes quas Paraverat ad MS. Alexandriana, etc.; published in 1683 an edition of the Epistles of Clement Romans, from the same MS., which he had corrected; consigned to Labbe and Cossart; and in 1688 published an Exposition of Solomon's Song, written by Gilbert Foliot, bishop of London in the time of Henry II. His Life has been written by Sir Thomas Smith (rabbith Smith). See Chalmers, Biog. Dict. s. v.; Knight, English Cyclop. Biog. s. v.; Allibone, Dict. of Brit. and Amer. Authors, s. v.

Young Men's Christian Associations. This is the current designation of certain organizations of modern times for religious work outside of the regular ecclesiastical limits.

I. History. There were associations of young men for religious improvement in Great Britain and Ireland at a very early period. The meetings of these societies were secret and the members participated in and largely controlled by John and Charles Wesley were of this character. Such organizations found their way into Germany and Switzerland about the same time. In 1710 there were similar societies in England, which were opposed as in the case of Cotton Mather under the title of Young Men Associated. There were similar associations in some of the German cities during the period from 1834 to 1842. Up to that time, however, the organizations were sporadic, and left no permanent results in the form of our present associations. A larger movement occurred in Germany in
1849, which resulted in the organization of the German associations of the present time.

The Young Men's Christian Associations of England and America originated in a meeting of a dozen clerks in the upper story of a London drapery house, with the purpose of spending an hour in religious exercises, in 1844. It was organized by George Williams, one of the clerks, and afterwards became enlarged in its scope and plan so as to meet the wants of the Christian young men of that vicinity. A convention of those who had become interested in the movement and wished to see a society formed met on June 6, 1844, for "Improving the Spiritual Condition of Young Men in the Drapery and other Trades." The plan was imitated in other British cities, and found its way across the Channel. Various cities on the Continent attempted similar organizations, and among them Paris. In the French metropolis, however, the consent of the police was required in order to hold any kind of public meeting. This was at length given, and a start was made in the good work. A providential circumstance favored the popularization of the new movement. Just at this time Renan's Life of Jesus had appeared, and was producing great excitement among the Parisians. The work was read by thousands. To counteract the infidel influence of this brilliant writer, Protestant lectures were given in reply to him. The lectures were crowded. Thousands became eager listeners, who had hitherto been out of the reach of the churches and other religious movements. This gained for the association the esteem of all the better classes, and gave it a standing which it has ever since maintained.

The movement of London also found its way across the Atlantic in two directions at about the same time. The canals of Montreal, Canada, was organized according to the model of the London society, Dec. 9, 1851. Twenty days later, by direct suggestion from London, and without knowledge of the organization at Montreal, the association of Boston, Mass., was organized. On March 21, 1852 the association of New York was organized, and during the same year ten associations, including those of Baltimore and Washington, came into existence. Cincinnati, however, claims a permanent organization since 1848, which is earlier than that of any other American association. Such organizations had multiplied in North America since the time above mentioned, and at an early period of their history united in conventions for aggressive and concerted action. At the First Annual Convention of the Young Men's Christian Associations of the United States and British Provinces, which met at New Orleans, March 18, 1850, about 15 of these societies, about half of those in existence, formed a Confederation. There were at that time in the countries mentioned 35 societies with about 8000 members. Associations not formally connected with the Confederation were welcomed to seats in the annual meetings, but associations, having no part in the proceedings except by courtesy of the convention. A second convention was held at Cincinnati in September, 1855, when there were 40 associations with 9000 members. A third convention was held at Montreal in June, 1856, when the report showed the existence of 67 societies with 10,000 members. This convention adopted the Paris basis, adopted by the first World's Conference of the associations, held in that city in 1855. It is as follows:

"The Young Men's Christian Associations seek to unite those young men who, regarding Jesus Christ as their Great Teacher, are bound by the Holy Scriptures, desire to be his disciples in their doctrine and in their life, and to associate their efforts for the extension of his kingdom among young men."

As a rule, the American associations regulated their membership on this basis. It was deemed advisable to keep them within the evangelical churches. While those outside who are seriously disposed are permitted to enjoy all the general advantages of the association, they are not allowed to vote or to hold office. In the English associations, as a general rule, any person is eligible to membership. But it is the desire that such a state exists that the young man will unite with some Church. In Holland there is no restriction as to membership; it is presumed that when a young man presents himself to the association, he is earnestly seeking the kingdom of God, and Churchly influences are beyond the period of its organization to the breaking-out of the civil war in 1861, the new movement had made steady and rapid progress, the membership of all the associations having reached 25,000 in April of the preceding year. The work done is in part indicated by an extract from the report of the annual convention held at New Orleans, April 11, 1860:

"Sixty-nine associations have sent in reports. Of these 34 have sustained prayer-meetings; 15 have Bible-claues; 34 conduct mission Sabbath-schools; 39 have had courses of sermons, and 35 courses of lectures; 48 own libraries, and 38 keep open reading-rooms."

But with the fall of Fort Sumter came a terrible shock to the associations. Many of them disbanded; the annual convention could not be called that spring; and the Confederation speedily fell to pieces. The work of the preceding ten years seemed to have been destroyed. But not for a moment was there a cessation of work on with the war. Within a month after the opening of the war the association of New York appointed an Army Committee, who began work among the soldiers gathered in the numerous camps in the neighborhood of that city, and extended its demoralizing influences of camp and garrison life. Devoted to the soldiers, a pocket edition of a Soldier's Hymnbook was published and circulated; the Christian men of every regiment were organized, as far as possible, for effective work, and public sentiment was aroused in behalf of the soldiers.

The need of co-operation under this new phas of the movement, as under the earlier development, was soon felt, and, by the suggestion of the Army Committee of the New York association, the Central Committee was induced to call a convention to meet in New York. Only forty men attended this meeting; these represented but fifteen associations; but in their sessions, which lasted a day and a half, a grand beginning was effected. In order to promote the temporal and spiritual welfare of the soldiers and sailors of the army and navy, the United States Christian Commission was appointed by the President, and a number of Christian gentlemen, from eight leading cities, and was to be the organ and executive agent of the Young Men's Christian Associations and of the Christian public. This proved to be a great boon to the soldiers in camps, on battle-fields, and in hospitals. It co-operated with the Sanitary Commission, which was a purely secular agency; but it went further than that commission could go. The Christian public heartily supported its efforts, and made it the medium by which Christian homes, churches, and communities sent spiritual and material comfort to the soldiers in the field and the hospital. This work belonged distinctively to the Young Men's Christian Associations only at its origin. After it was fairly organized it belonged to the whole Christian public. During the four years of the war, the commission sent out 4859 delegates to do hospital and Gospel work; expended in cash $2,515,741.63; received $2,445,330; returned and distributed $399,576.26; distributed 1,466,748 Bibles and parts of the Bible, 296,816 bound books, 1,370,983 hymn-books, 19,621,103 papers and magazines, 5,306,002 knapsack-books in flexible covers, 93,104,243 pages of tracts; kept in constant reach 50,809 sermons, and held 7,44 prayer-meetings."
Singular work was done by some of the associations in the South among the soldiers of the Confederate army, but there was no general organization for that purpose.

The distinctive work of the associations throughout the country during the war was continued on a limited scale and organized under the auspices of the associations during this period; the first met at Chicago, June 4-7, 1863, with 30 associations represented; the second met at Boston, June 1-5, 1864, with 28 associations represented by 136 delegates. Although these meetings were full of enthusiasm, it appeared that the principal activity of the societies would be carried on by the local and district conventions held during this period; the first met at Chicago, June 4-7, 1863, with 30 associations represented; the second met at Boston, June 1-5, 1864, with 28 associations represented by 136 delegates.

After the close of the war the associations entered upon a new period of progress in their work among young men, which has continued at an increasing rate until the present, and has every appearance of a still greater development of power for good in the years to come. Among the items in which this improvement has been manifested, a few deserve mention. A number of general secretaries have been appointed, who make this work for young men the business of their lives. These secretaries hold an annual meeting for the interchange of views on their common work, and under their direction the societies unite to deal with topics of interest to those present. The greatest advantage accruing from the labors of these officers is the rapid increase of societies, as well as of workers in those already organized. There has been a rapid increase in the amount of property and the number of buildings owned by these associations, thereby the more thoroughly realigning them. The society by the International Convention, which has secured a more substantial Christian character to the associations. In 1866, at Albany, N. Y., they reaffirmed the Paris basis adopted in 1856; in 1868, at Detroit, Mich., they adopted the "evangelical Church test," and in 1895, at Portland, Oreg., the "evangelical Church test." The test, as now applied, is as follows:

"Resolved, That, as these organizations bear the name of Christ and profess to be engaged directly in the Savior's service, it is clearly their duty to maintain the full and undiluted management of all their affairs in the hands of those who profess to love and publicly avow their faith in Jesus, the Redeemer, as Divine, and who testify their faith by becoming and remaining members of churches held to be evangelical. And we hold those churches to be evangelical which, maintaining the Holy Scriptures to be the only infallible rule of faith and practice, do believe in the Lord Jesus Christ (the only begotten Son of the Father) as their Lord and Saviour, whom the Son of God is, and who dwelleth in the fulness of the Godhead bodily, and who was made sin for us, though knowing no sin, being made sin for us, that our sins might be forgiven, as the only name under heaven given among men whereby we must be saved from everlasting punishment."

At the time this resolution was passed about one half of the associations had the same test. It was decided that all associations organized after that date must, in order to be entitled to representation in the International Convention, limit their active voting membership to members of evangelical churches. The associations have thus secured the hearty co-operation of the churches and the priests or people of the churches. Another important work, not to be overlooked, is the organization by these societies of stringent legislation in the United States for the suppression of obscene literature, and the continuation of those efforts by special organizations for the enforcement of such legislation.

Association leaders brought together many men of vicious habits, who, in turn, contaminated those who came in contact with them. Here was a new population continually on the move, yet sadly needing the assistance of such an organization as the Young Men's Christian Association. Each new terminus of the train brought into one town, generally, a group of tents and board shanties; but what was happening today might be a wilderness to-morrow, and another spot in the wilderness be chosen for the town. Churches could not keep pace with this onward march of humanity; and in July, 1868, the Young Men's Christian Association of Omaha organized a movement to meet the demands of this new field. They sent out a company of Christian young men whose duty it was to keep pace with the march of the employes and the attendant means of drawing men into temptation. They held religious meetings wherever they could get a hearing, and conducted Sunday schools for the children of the workers. After the movement had been fairly started by the Omaha association, and its practicability had been demonstrated, the International Convention of the Young Men's Christian Association took it up, and extended it to other railroads as rapidly as circumstances would permit. Buildings were erected for the railroad workers at Erie, Altoona, Baltimore, Jersey City, and other important centres, but for various reasons they met with only partial success. In time leading railroad men became interested in these philanthropic labors in behalf of their employes. Such men as Charles Vanderbilt, Thomas A. Scott, John W. Garret, Robert Harris, J. H. Devereux, and others gave encouragement to the movement in various ways. Some of them contributed to the support of secretaries named by the associations, and offered rooms for the holding of meetings. In Indianapolis twelve railway companies unite in supporting the work, and the principal railroad officials are members of association committees.

II. Present Operations. — There are two prominent characteristics of these associations, which deserve notice: they are associations of young men; they emphasize the religious and moral improvement of the Church. What constitutes a young man, is a problem that has had various solutions. In America a young man is considered to have passed his youth when he has reached the age of forty years. After that he ceases to be an active, and becomes a counselling, member. In France there is no such division, for the duties of the young men and those who have passed young manhood. Young women, as a rule, are not admitted. In one or two organizations women have been admitted to equal or nearly equal privileges with men. This is the case in Brooklyn, where the women's association plan is in the activity and efficiency of the society. In some other cities women have all the privileges of the library and reading-room, and other similar advantages. In Boston they have organized a Young Women's Christian Association. A like association was founded in New York in 1870, and incorporated in 1871. It has for its object the same ends as those to which Young Men's Christian Associations are directed. Generally, however, young women are not admitted to these organizations of young men, except as spectators to certain of the more public meetings.

The second characteristic of these associations is their undenominational character. They profess to be simply Christian associations. But it was found necessary to limit the voting membership to Christian young men, and in time it was deemed important to find a common basis of Christian belief. This was found in the evangelical test already mentioned. There is a broad distinction to be noted in the methods and opinions of the evangelical churches and the so-called liberal Christians. The incitements to sinners to lead a new life, the degree of zeal in exhortation, and the methods of instructing inquiring penitents are so widely different in these societies that it is generally believed that it was essential to the success of the enterprise to keep them separate in this field of labor. No new creed was desired, and none was needed; a simple declaration of what was already in the symbols of all evangelical churches was sufficient to unite the Christian young men of America into one great body, with a common purpose for Christian work. There is no clash of theological opinions, for all have united under the one banner of the Divine Christ, to reach out and save fallen humanity from impending ruin.

The work of the associations consists of prayer-meetings, Bible classes, social meetings, educational classes, meetings in jails, hospitals and almshouses, open-air
services, services of song, neighborhood and cottage prayer-meetings, and the sustaining of reading-rooms, lectures, gymnasiums for physical exercise, and employment bureaus. The extent of this work is indicated in the statistics given at the close of this article.

The great work and rapid growth already indicated, and still more apparent by an examination of the statistics, could not have been secured by the active efforts of individual associations. A very common experience is that of a few young men of a village, who meet and organize an association, obtain a room, meet for a few months, and then disband. Such failures result from a lack of organized superintendence. To counteract such evils, secretaries were employed, who were to give their time to the work and receive remunerative salaries. In 1870 these were 11 in number; while in 1880 there were 133 secretaries, with several assistants.

The system of organization and mutual dependence of these associations is best indicated by an extract from an article by Rev. George R. Crooks, D.D., in *Harper’s Weekly* for April 8, 1880. He says:

"First are the local organizations, occupying hired rooms, or in some instances their own buildings, and employing secretaries to conduct the necessary business. Then follow the state and provincial organizations, composed of a State or Canadian province, holding an annual convention and appointing a State committee to exercise due oversight. Their relation to the local bodies, however, is purely advisory: twelve of them employ secretaries. Ascending higher, we have the American International organization, composed of the associations of the United States and Canada. Its executive agent is an International Committee of twenty-five members, having a working quorum in New York city. The committee is a vigorous body, and has taken in hand the fostering of associations among college students, commercial travelers, Germans, colored young men, and railroad men. At the top of all is the International Central Committee, which met in Geneva, Switzerland, in June, 1879."

The work accomplished by the American International organization has exerted a powerful influence upon the associations of the whole country. In 1865 a committee of five was appointed by the convention, and located in New York. This committee has since retained its headquarters, with a working quorum, in that city, but has been increased to twenty-five members, many of whom reside in other parts of the country. This is the executive agent of the International Convention. By it the convention is called to assemble each year, and by it the proceedings are afterwards published. Each year the committee brings up a report of its work, and submits a plan for the coming year. This, after due consideration and such modifications as are considered desirable, is referred back to the committee for execution. In 1868 the convention authorized the employment of a visitor in the West. The field included the states of Indiana, Illinois, Michigan, Wisconsin, Iowa, Minnesota, Missouri, Kansas, Nebraska, Kentucky, and Tennessee. There he has continued to labor with abundant success. When he began his labors there were less than 40 associations, maintained at an annual expense of $25,000. Now there are nearly 300 associations, expending annually more than $100,000. At that time only one general secretary was employed, and not one society owned a building. Now there are 48 general secretaries and eight buildings. The eleven states all have state organizations, and of these six employ state secretaries.

The requirements of the central office had so increased in 1870 that a general secretary of the International Committee was appointed to direct the correspondence, visitation, and editorial work. He has since been retained, and, owing to the increased demands of this department, an assistant has lately been provided.

The work in the South has developed wonderfully within a period of ten years. In 1870 there were between Virginia and Texas only three associations. In that year the visitors of the committee began their labors in that section, and now there are more than 150 associations.

The work among railroad men has already been referred to. Another movement, entirely independent of the Pacific Railroad Mission, was that begun in Cleveland, O., in 1872. In that city, where about 10,000 men are employed by railroad companies, meetings were held to which men of this class only were invited. The idea was taken up and practiced by other railroad cities, and, finally, the International Committee undertook the general supervision of this branch. Since the beginning of 1877 a general railroad secretary has given his entire time to this work, organizing associations, le...
cating secretaries, visiting associations, and holding conventions. There are now more than forty railroad organizations, with a membership of about 5000.

In 1874 the first meeting of the National Bund of German-speaking Associations was held in Baltimore. A canvass was made to raise funds by the National Committee to sustain it. The work of this committee is to visit German communities and organize associations. The field embraces the young men to be found among the two millions of German-speaking inhabitants in America.

The first work among colleges was begun in 1877, when a visitor was placed in the field. The work has yielded abundant fruit. There are now 96 associations in colleges, with a total membership of 4298.

A secret ary has been sent to visit the colored young men of the Southern States, to organize associations, but more especially to instruct them in the right methods of Christian endeavor.

A great work has been undertaken in behalf of commercial travellers. A ticket has been issued by the Commercial Committee, which entitles the holder to all the privileges of the associations where he may be travelling. A secretary for commercial travellers has been appointed, and the work of this department receives his attention.

So the work is ever enlarging and reaching out into new fields. In 1898 the committee expanded in its entire work to 289. Now, with the recent development of the work in all its departments, $22,000 are required annually to meet the demands upon it.

III. The Outlook.—In its Statement of Work for 1880, the International Committee has announced the following as its field of labor: "48,000 college students; 500,000 colored college students; 48,000 colored young men; 500,000 colored young men; 800,000 railroad men; the young men in the states west of Ohio; the young men at the South; the young men in Canada; the Young Men's Christian Associations of North America. They state that the work "will call for the undivided effort of nine men; the cooperation, for brief periods, of twenty-five members and forty corresponding members of the committee in every state and province; the visitation of more than 500 places; 130,000 miles of travel by these workers; distribution of pamphlets and documents relating to the work, with necessary correspondence. All this can be done with so much economy that $22,000 will cover the total cost." In America the field is almost unlimited, and with its present facilities, the International Executive Committee will go on enlarging the work and gathering power while there are any young men yet unsaved.

IV. Statistics.—There have been eight World's Conferences held—beginning with that at Paris in 1885, and ending with that at Geneva, Switzerland, in 1878. Twenty-three American International Conventions have been held—beginning with the one at Buffalo in 1854, and ending with the one at Baltimore in 1879. There were 13,000 people at the last convention held during the year ending June, 1880. There is, over and above the committees already referred to, an International Central Committee, appointed by the World's Conference at Geneva in 1876. This committee represents eight Christian countries, and has headquarters at Geneva, where the general secretary and one half of the members reside. In America there are 9 International secretaries, 13 State secretaries, 111 general secretaries, and 45 assistants and other agents.

The following table will indicate in some degree the wonderful growth of the Young Men's Christian Association in America. The figures, however, do not fully represent the facts. Many associations send in no reports. Their membership, property, libraries, and work must therefore be left out of the account. Much of the work, also, is of such a nature that it cannot be represented in statistical tables. The information about the work in foreign lands is meagre, but enough is known to give some idea of the proportions it has assumed in several countries.

![Image: North America. 1860. 1870. 1880. Whole number of associations. 200 900 972 Total number of members. 95,000 300,000 100,000 Total annual expenses. $265,000 $600,000 General secretaries. 11 178 Number of buildings. 68 85 Value of buildings. $299,000 $3,400,000 Associations having building funds. 30 39 Amount of building funds. $119,000 $163,000 Associations owning libraries. 48 146 Voluntary chapel societies. 150,000 150,000 Reading-rooms kept open. 68 250 Aggregate average daily attendance. 10,136 Number of 48 and provincial conventions held. 30 200 Number of delegates present. 1,888 1,461 College associations reporting. 81 German-speaking associations reporting. 81 Associations providing situations. 81 Persons provided with situations. 8,473 Associations conducting Bible classes. 46 129 Associations conducting daily prayer-meetings. 129 Associations conducting weekly prayer-meetings. 202 Associations conducting meetings in jails, hospitals, etc. 400]

Other Countries.—The latest reports from the British Isles show 281 associations. In 1879 partial returns indicated an average membership of 180 in England. Many societies in Great Britain own the buildings in which they keep open reading-rooms, and employ the same general plans in their work as have already been described.

There are in France 65 associations, but the membership is very small, averaging less than 20.

In Germany the statistics are more encouraging.

There are 285 associations in all, of which 137 report a membership of 12,000, 139,119 and 142,710 volumes, 170 sustaining educational classes, and 173 conduct Bible classes.

The total number of associations in Holland is 406; but we have no report of membership or other items.

In Switzerland there are 254 associations, 80 of which report a membership of 1294. There are also 22 Boys' Associations. The most of these societies sustain prayer-meetings, Bible classes, song services, and Sunday-schools; several have courses of lectures, and a few own libraries. The great majority of them have been organized within a few years, and more may be expected in the future than has yet been done.

Sweden has 81 associations, with 3845 members.

The following additional associations in various countries are reported:—Italy, 6; Spain, 8; Austria, 1; Belgium, 16; India, 2; Syria, 4—the one at Beirut, organized in 1876, has 80 members, and a library of 160 volumes; the others are at Damascus, Jaffa, and Nazareth; South Africa, 6; Japan, 2; Madagascar, 1; and Sandwich Islands, 1.

There are in the world, so far as reported, 2571 associations.

Most of the information contained in this article has been obtained from documents published by the American International Committee, especially a Historical Sketch of the Young Men's Christian Associations of the United States, etc., written by Richard C. Morse, secretary of the International Committee (N. Y. 1878); and the Year-book of the International Committee for 1880-81. See also Harper's Magazine, Oct. 1870, p. 241 eq.
Zaanaim (Heb. Tsanaa'anim, צַנָּאָיִם; Sept. Τσανα'אֵיוֹ נִם; Vulg. Saniam), the name of a "plain" (מַשְׂקָר, miskhor), more accurately "the oak by (ב) Zaanaim," a tree—probably a sacred tree—mentioned as marking the spot where Heber the Kenite was encamped when Sisera took refuge in his tent (Judg. iv. 11). Its situation is defined as "near Kedesh," i.e. Kedesh-Naphthali, the name of which still lingers on the high ground north of Safed and west of the lake of el-Huleh, usually identified with the Watters of Merom. The Targum gives as the equivalent of the name mishkor agganyad, "the plain of the swamp"; and in the well-known passage of the Talmud (Megillah Jerush. ch. i) which contains a list of several of the towns of Galilee with their then identifications, the equivalent for "Elon (or Aljan) be-Zaanaim" is Agmiga hakodesh. Agme appears to signify a swamp, and can hardly refer to anything but the marsh which borders the lake of Huleh on the north side, and which was probably more extensive in the time of Deborah than it now is. See Merom. On the other hand, Prof. Stanley has pointed out (Jewish Church, p. 324; Localities, p. 197) how appropriate a situation for this memorable tree is afforded by "a green plain ... studded with massive terebinths," which adjoins on the south the plain containing the remains of Kedesh. The whole of this upland country is more or less rich in terebinths. One such, larger than usual, and bearing the name of Sejar em-Messiah, is marked on the map of Van de Velde, as six miles north-west of Kedesh. The name Zaanaim, which appears to signify "removing" (as if a camping-ground), has passed away—at least no trace of it has yet been discovered (Porter, Handbook, p. 444; Van de Velde, Travels, ii, 418). "From the identity of signification, it has been conjectured to be Betsân, a little east of Tabor. In this plain the black tents of the Bedawin, the modern Kenites, may constantly be seen" (Tristram, Bible Places, p. 278). See Zaanannim.

Za'anah (Heb. Tsana'ah, צַנָּאָה; Sept. Τσανα'α; Vulg. in cx.ii), a place named by Micah (i, 11) in his address to the towns of the Shefelah. This sentence, like others of the same passage, contains a play of words founded on the meaning (or on a possible meaning) of Tsana'ah, which has derived a name from it. Thus: "The inhabitress of Zaanan came not forth." Both Genesis and Furst, however, connect the word with צְנֶה, making it mean a place abounding with (or fit for) flocks. The division of the passage shown in the Sept. and A. V., by which Zaanah is connected with Beth-ezel, is now generally recognised as inaccurate. It is thus given by Dr. Pusey, in his Commentary: "The inhabitant of Zaanah came not forth. The mourning of Beth-ezel shall take from you its standing." So also Ewald, De Wette, and Zunz. The place is doubtless identical with Zeanah (q. v.).

Zaananim (Heb. Tsanaanim, צַנָּאָיִם; Sept. Τσανα'אֵיוֹ נִימ; Vulg. Saniam), a place mentioned only (in this form) in Josh. xix. 33, and in the Keri or margin of Judg. iv. 11; but usually thought to be the more correct form of Zaanaim (q. v.), which occurs in the text of the latter passage. It appears to be derived (if a Hebrew word) from a root (צְנֶאַי, to migrate) signifying to load beasts as nomads do when they change their places of residence (Genesis, Thesaur., p. 1177). The rendering of the A. V. is incorrect: "And their coast was from Heleph, from Alon to Zaananim." The Hebrew is צַנָּאָיִם, and can only signify "from the oak of (or "in") Zaananim" (see Keil, ad loc.; Reland, Palest., p. 717; Keil and Delitzsch, On Judges, i, 11; Porter, Giant Cities of Bashan, p. 206).

Za'avan (Heb. Tsana'an, צַנָּאָן, migratory; Sept. Τσανα'αν; Vulg. Zavon), a Horite chieftain, second named of the three sons of Ezer (Gen. xxxvi. 27; i Chron. i. 42, "Zavan"). B.C. post 2037.

Zabad (Heb. Zabad, צָבָד; Sept. Zabi'el or Zabdir, etc.), the name of several Hebrews.

1. One of David's warriors, being son of Nathan and father of Ephial, in the lineage of Sheehan's daughter Ahlai by the Egyptian slave Jarha (1 Chron. ii. 36, 37; xi. 41). B.C. 1046.

3. The regicide of a King of Ammon named Shimeath, who, in conjunction with Jehozabad, the son of a Moabitess, slew king Joash, to whom they were both household officers, in his bed (2 Kings xii, 21; 2 Chron. xxiv, 25, 26). In the first of these texts he is called Jozachak (q. v.). The sacred historian does not appear to record the mongrel parentage of these men as suggesting a reason for their being more easily led to this act, but as indicating the sense which was entertained of the enormity of Joash's conduct that even they, though servants to the king, and though only half Jews by birth, were led to conspire against him "for the blood of the sons of Jehoshaph the priest." It would seem that their murderous act was not abhorred by the people; for Amaziah, the son of Joash, did not venture to call them to account till he felt himself well established on the throne, when they were both put to death (2 Kings xix, 6, 0; 2 Chron. xxvi, 3, 4). Joash had become unpopular from his idolatries (xxiv, 18), his oppression (ver. 22), and, above all, his calamities (ver. 23-25). The assassins were both put to death by Amaziah, but their children were spared in obedience to the law of Moses (Deut. xxiv, 16). The coincidence between the names of Zabad and Joash is remarkable.

4, 5, 6. Three Israelites, "sons" respectively of Zatta (Ezra, x. 27), Hashum (x. 33), and Nebo (x. 48), who divorced their Gentile wives, married after the return from Babylon. B.C. 458.

Zabadan (Heb. Zabadan, צָבָדָן, Zabad'ân, Zabad." The designation of an Arab tribe who were attacked and spoiled by Jonathan, on his return from the Philistines, to the west of the mountains of the army of Demetrius (1 Macc. xii, 31). Josephus calls them Nabateans (Ant. xiii, 5, 10), but he is evidently in error. Nothing certain is known of them. Ewald (Gesch. iv. 389) finds a trace of their name in that of the place Zabda given by Robinson in his lists; but this is too far south, between the Yarmuk and the Zerka. Michaelis suggests the Arab tribe Zobibash: but they do not appear in the necessary locality. Jonathan had pursued the enemy's army as far as the river Euletherus (Nahr el-Kebir), and was on his march back to Damascus when he attacked and plundered the Zabdeans. We must look for them, therefore, somewhere to the north-west of Damascus. Accordingly, on the road from Damascus to Baalbek, at a distance of eight and two-thirds hours (twenty-six miles) from the former place, is the village of Zebadawy, standing at the upper end of a plain of the same name, which is the very centre of the Tilmas, the name of the ancient tribe of the Zabdeans. According to Burckhardt (Syria, p. 3), the plain "is about three quarters of an hour in breadth and three hours in length; it is called Ard Zobedani, or the district of Zebedent; it is watered by the Barrada, one of whose sources is in the midst of it, and by the river called Most Zobedani, whose source is in the mountain behind the village of the same name." The plain is "limited on
one side by the eastern part of the Anathilbanus, called here Jebel Zebed. The village is of considerable size, containing nearly 8000 inhabitants, who breed cattle and the silkworm, and have some dyeing-houses (ibid.). Not far from Zebıdon, on the western slope of Anathilbanus, is another village called Kefr Zebad, which again seems to point to this as the district formerly occupied by the Zabadaeous.

Zabadaeous (Zabadeeas), the Greek form (1 Esd. ix, 35) of the Heb. name (Exz a, 48) Zabadd (q. v.).

Zab'ba' (Heb. Zabb'ā, יֶבֶ֣בּ מִיִּמְנֹת; prob. an error for מִיִּמְנֹת, Zakkay'; Sept. Zatōs; Vulg. Zabbai and Zachai), the name of two Hebrews.
1. The father of Baruch, which latter repaired part of the wall of Jerusalem after the Captivity (Neh. iii, 20). B.C. ante 446. He is perhaps the same with Zaccai (q. v.) of Ezra ii, 9.
2. A descendant of Bebai, who divorced his Gentile wife married after the return from Babylon (Ezra x, 28). B.C. 458.

Zab'-bud (Heb. Zabbud' יְבַבּ מִיִּמְנֹת; prob. an error for מִיִּמְנֹת, Zakkay; as in the marg.); Sept. Zatōs; a "son" of Bigvai who returned from Babylon with Ezra (Ezra viii, 14). B.C. 459. See Zacces.

Zabdees (Zabdeas), the Greek form (1 Esd. ix, 21) of the Heb. name (Ezra x, 20) Zebaddiah (q. v.).

Zab'di (Heb. Zabbi, יֶבֶ֣בּ מִיִּמְנֹת, my gift; Sept. Zatibhi, Zatibi, Zatihi, etc.; Vulg. Zabbi, Zabdius), the name of several Hebrews.

3. Son of Zerah and father of Carmi, the son of Acham of the tribe of Judah (Josh. vii, 1, 17, 19). B.C. ante 1618.
4. Second named of the nine sons of Shishim (Shime) the Benjamin (1 Chron. viii, 19). B.C. cir. 1612.
5. A Shiphibite (i.e. inhabitant of Shepham), David's commissioner of wine-yards and wine-cellar (1 Chron. xxvii, 27). B.C. 1045.
6. An Asphathite, father of Mica and grandfather of Mattaniah (Neh. xi, 17); elsewhere called Zacces (xii, 35) and Zichri (1 Chron. ix, 15). B.C. ante 446.

Zab'diel (Heb. Zabdi'el, זַבְדֵּיֵל, gift of God), the name of three Jews mentioned in the Old Test. and Apocrypha.
1. (Sept. Zaddi'el). The father of Jashobeam, the chief of David's warriors (1 Chron. xxvii, 2). B.C. ante 1046.
3. (Sept. Zadad'el; Josephus, Zдобав; Vulg. Zabdiel). An Arabian chiefman who put Alexander Balas to death (1 Macc. xi, 17; Josephus, Ant. xili, 4, 8). According to Diodorus, Balas was murdered by two of the officers who accompanied him (Muller, Fragm. Hist. ii, 16).

Zabrackie, John Lassing, a venerated clergyman of the Reformed (Dutch) Church in America, was born in 1779 at Albany, N.Y. He graduated at Union College in 1797, studied theology under Dr. Thodoric Roveyn, and was licensed by the Classis of Albany in 1800. His first settlement was in the united churches of Greenough and Wynantskill, near Albany, in 1800-11. In the latter year he removed to Hillsborough (or Miller's) near New Brunswick, N.J., where he ministered until his death, in 1850. His pulpit and parochial labors were said to be greater than those of any other minister of the region. He was a judicious, sensible, wise man; an excellent "old-fashioned" preacher; evangelical, earnest, and practical; a father to his people, and venerated by the ministry. His career was quietly useful, his character unspotted by the world, and his memory is cherished among the godly people of his large and important charge, upon whom he left the permanent stamp of his faithful teachings. He was in person short and stout, with a large head and face, genial in expression, and easy in his manners. With all his habitual gravity and professional air, at times in his social intercourse he would astonish and excite you by his wit, his sarcasm, and even drollery. His talents were good, and his attainments in the old theology were respectable. He knew the Gospels, and felt it and preached it with clearness, zeal, and often with great power of immediate impression. See Cum- win, Minst of the Ref. Church in America, p. 277, 278. (W. J. R. T.)

Zab'ud (Heb. Zabbud; יְבַבּ מִיִּמְנֹת; given; Sept. Zatōb; v. r. Zatōbath, son of Nathan the prophet (1 Kings iv, 5). B.C. 1012. He is described as a priest (A.V., "principal officer"), and as holding at the court of Solomon the confidential post of "king's friend," which had been occupied by Hushai the Archite during the reign of David (2 Sam. xv, 37; xvi, 16; 1 Chron. xxvi, 33). This position, if it were an official one, was evidently distinct from that of counsellor, occupied by Ahithophel under David, and had more of the character of private friendship about it, for Absalom conversely calls David the "friend" of Hushai (2 Sam. xvi, 17). Azariah, another son of Nathan, was "over all the (household) officers" of king Solomon; and their advancement may doubtless be ascribed to the young king's respect for the venerable prophet, who had been his instructor, but in the friendship he had contracted with his sons during the course of education. The office, or rather honor, of "friend of the king" we find in all the despotic governments of the East. It gives high power, without the public responsibility which the holding of a regular office in the State necessarily imposes. It implies the possession of the utmost confidence of, and familiar intercourse with, the monarch, to whose person "the friend" at all times has access, and whose influence is therefore often far greater, even in matters of state, than that of the recognised ministers of government. In the Vat. MS. of the Sept. the word "priest" is omitted, and in the Arabic of the London Polyglot it is referred to Nathan. The Pesbo-Syriac and several Hebrew MSS. for "Zabud" read "Zaccar." The same occurs in the case of Zabud.

Zab'ulon (Zabudon), the Greek form (Matt. iv, 15; 15, 17; Rev. vii, 8) of the Heb. name Zebulun (q. v.).

Zac'cai (Heb. Zakkay; יַצַּקְאֵי; pure; Sept. Zaccai v. r. Zacchay; the ancestor of 760 of the Israelites who returned from Babylon (Ezra ii, 9; Neh. vii, 14). B.C. ante 556. See also Zabba; Zacchaeus.

Zaccees (Zacceas), for the Heb. Zaccari (q. v.), the name of two Jews mentioned the one in the Apocalypse, and the other in the New Test.

1. An officer of Judas Maccabeus left with two others to besiege the citadel of Zion (2 Macc, x, 19). Grothus, from a mistaken reference to 1 Macc, 56, wishes to read Zax v. r. Zacchaeus.

2. The name of the tax-collector near Jericho, who, being short in stature, climbed up into a sycamore-tree, in order to obtain a sight of Jesus as he passed through that place. Luke only has related the incident (xix, 1-10). Zacchaeus was a Jew, as may be inferred from his name and from the fact that the Saviour speaks of him expressly as "a sinner" (Luke xix, 2). So the latter expression of the former's character was understood, and not in a spiritual sense; for it was evidently meant to assert that he was one of the chosen race, notwithstanding the prejudice of some of his countrymen that the Jews under the Roman government made him an alien and outcast from the privileges of the Israelite. The term which designates this office (דַּקְשָׂרָאָשׁ) is unusual, but describes him, no doubt, as the superintendent of customs or tribute in the district of Jericho, where he lived, as one having a commission from his Roman principal (maecenas, publicanus).
A Simeonite, son of Hamuel and father of the Shimei whose posterity became numerous (1 Chron. iv, 26, A. V. "Zachur"). B.C. considerably ante 1012.

3. First named of the four sons of Asaph as Levitical musicians in the arrangement for 1 Chron. xxxv, 2, 10; Neh. xii, 35). B.C. 1043.

4. Son of Imri and builder of part of the wall of Jeru-

5. Son of Mattaniah and father of the Hanan whom Nehemiah appointed to distribute the treasures (Neh. xiii, 18).

7. A Levite who signed the sacred covenant with Nehemiah (Neh. x, 12). B.C. 410.

Zachariä, Gottfried Traugott, a German theologian, was born at Tauchardt, in Thuringia, in 1729, and studied at Königsberg and Halle, being the pupil, associate, and amanuensis in the latter place of the learned Baumgarten. He was called in 1760 to the newly founded professorship of Natural Theology at Bützow, and in 1770 succeeded Dippel, and in 1775 to Kiel, where he died two years afterwards. His reputation as a scholar rests principally upon the Biblische Theologie, oder Untersuchung des Grundes der corneutischen biblischen Lehren (1771-75, 4 pts., 3 sections, with Suppl. by Volborth [1785]). The work occupied him for 30 years on a systematic ground, but even Baumgarten, professing a belief in revelation and miracles, but applying the historico-critical method of interpretation to the proofs deduced from Scripture, and either eliminating them altogether or depriving them of any considerable force. The end of the divine economy of redemption is represented as being the blessings which Christ will bestow, which consists in the fruits of his atonement. The necessity for an atonement is, however, said to conflict with the idea of the freedom of the divine will. A progressive economy of grace is spoken of, but is shown in its outward manifestations in the mere enumeration of historical events only. It is said to have been God's first design to establish faith in the true God, and to reveal nothing respecting Christ until the truth respecting God should have been sufficiently impressed on the minds of men. The work, reviewed by Schiller (pt. iv; Dippel, gelehrt Leolos Theologe Deutschlands, pt. iv; Schenkel, in Stud. u. Krüt. (Aufgabe der Bibl. Theol.), 1852, No. 1; Herzog, Real-Enzyklop. s. v.

Zachariä published, besides, paraphrasical explications of the epistles to the Romans, Corinthians, Galatians, Ephesians, Colossians, Thessalonians, Hebrews, etc., which were favorably received and repeatedly published. See Thies, Geschichte der Rechentumshifte Kiel, 1864, pt. i; Diegenbach, die gelehrt Leolol Theologen Deutschlands, pt. iv; Schenkel, in Stud. u. Krüt. (Aufgabe der Bibl. Theol.), 1852, No. 1; Herzog, Real-Enzyklop. s. v.

Zachariä'ah (a, 2 Kings xiv, 29; xv, 8, 11; § 2 Kings xviii, 2). See Zechiahiah.

Zachariä's (Zephanyaç), the Greek form of the Heb. name Zechriā'h: applied to several men in the Apocrypha and New Test., besides those mentioned in the Old Test. Thus, a figure in Josiah's reign (1 Esdr. i, 8), the lesser prophet (vi, 1; vii, 3), the messenger of Ezra (viii, 44; comp. Ezra viii, 16), the "son of" Pharaoh (1 Esdr. viii, 30; comp. Ezra viii, 3), the "son" of Behai (1 Esdr. viii, 37; comp. Ezra viii, 11), a "son" of Elam (1 Esdr. ix, 27; comp. Ezra viii, 26), and one (1 Esdr. i, 16) who is said to be in the temple of the Lord in the xxiv, 15, and another (Zephaniah, 1 Esdr. v, 8) properly called Amu-riā, or Seraiah (Ezra ii, 2; Neh. vii, 7).

1. Son of Barachiās, who, our Lord says, was slain by the Jews between the altar and the Temple (Matt. xxii, 65; Luke xi, 51). There has been much dispute who this Zacharias was. There is no record to identify him with the Zachariah son of Jehoiachin mentioned in Is. vii, 2. It is singular that Josephus (War, iv, 5, 4) men-
which he presided. Saul apparently attempted to expropriate the high-priestly house of Eli, on account of what he reckoned the treason of Abimelech (1 Sam. xxii, 17–20), so that only his son Abiathar escaped; and he knew that his reign was at an end. As soon as David came to David, carrying with him the high-priest's ephod, and how Jehovah acknowledged him as the true high-priest, inquiring of God, on behalf of that fugitive, who was the true king of Israel. The only conjecture we feel disposed to make is that king Saul may at this time have reconciled the high-priest's house, which he had forfeited the high-priesthood, and may have declared that the office reverted to the house of Eleazar, to which Zadok belonged; there might be a stroke of policy in his thus restoring the constitution of the priesthood according to the law of Moses, analogous to his slaughter of the Gibeonites, "in his zeal to the children of Israel and Judah" (2 Sam. xxii, 2). If so, it is easy to see how the two rival royal houses had their rival priestly houses too; and how, at the end of the civil war, David's policy of gradual and amicable reconstruction would lead him to acknowledge both high-priests, especially after Zadok's hearty adherence to David's interest. Perhaps, in memory of his early military service, Zadok had a place among the princes of the tribes assigned him by David, as ruler over the Aaronites (1 Chron. xxi, 7). In later times we usually find two priests, the high-priest and the second priest (2 Sam. viii, 17); and there does not seem to have been any great difference in their dignity. So, too, Luke iii, 2. Zadok and Abiathar were of nearly equal dignity (2 Sam. xv, 35, 36; xix, 11). Hophni and Phinehas, again, and Eleazar and Ithamar, are coupled together, and seem to have been holders of the office, as it were, in commission. The duties of the office, too, were, in the case of Zadok and Abiathar, divided. Zadok ministered before the tabernacle at Gibon (1 Chron. xvi, 39); Abiathar had the care of the ark at Jerusalem; not, however, exclusively, as appears from 1 Chron. xvi, 11; 2 Sam. vii, 24, 25, 29. Hence, perhaps, it may be concluded that from the first there was a tendency to consider the office of the priesthood as somewhat of the nature of a corporate office, although some of its functions were necessarily confined to the chief member of that corporation; and if so, it is very easy to perceive how superior abilities, on the one hand, and infancy or infirmity, on the other, might operate to determine or impress the members of this corporation respectively. Zadok seems to have been succeeded in the priesthood by his son Azariah (1 Kings iv, 2), strictly speaking his son's son, if we observe 1 Chron. vi, 8, 9, and 2 Sam. xv, 27. That it continued without derangement in his family, and that the general recognition of "Azariah, the chief priest, of the house of Zadok," in Hezekiah's time (2 Chron. xxxii, 10), the language in Ezek. xi, 46; xiii, 19; xlv, 15; xlviii, 11 bears high testimony to the faithfulness of the priests, the sons of Zadok; so much so that the prophet takes no notice of any priests besides them. See HIGH-PRIEST.

2. Father of Jerusha, who was the wife of king Uziah and mother of king Jotham (2 Kings xv, 38; 2 Chron. xxvii, 1). B.C. 755.

3. According to the genealogy of the high-priests in 1 Chron. vi, 12, there was a second Zadok, son of a second Abibuth, son of Amanrah; and he is there given as the father of Shallel. B.C. cir. 700. He seems also to be referred to in ix, 11; Neh. xi, 11. Some critics are disposed to regard this name as an interpolation by a copyist. The person so named seems to be the high-priest called Hoesiah in the Seder Olam, and Oedac (O'dag) by Josephus (Ant. x, 8, 6). See HIGH-PRIEST.

4. Son of Banna, who repaired a portion of the wall in the time of Nehemiah (Neh. iii, 4). B.C. 446. He is probably the same as in the list of those that sealed the covenant in Neh. xi, 21; as in both cases his name follows that of Mesheshaeiel. But if so, we know that he was not a priest, as his name would at first sight lead one to suppose, but one of "the chief of the people," or laity. With this agrees his patronymic Banna, which indicates that he was attached to the tribe of Judah, for Banna, one of David's mighty men, was a Netophathite (2 Sam. xxiii, 29), i.e. of Netophah, a city of Judah. The men of Tekoa, another city of Judah, worked next to Zadok. Meshullam of the house of Meshesheziel, who preceded him in both lists (Neh. iii, 4 and x, 20, 21) was also of the tribe of Judah (xii, 24). Intermarriages of the priestly house with the tribe of Judah were more frequent than with any other tribe.

5. Son of Immia, a priest who repaired a portion of the wall over against his own house (Neh. iii, 29). B.C. 446. He belonged to the 16th course (1 Chron. xxiv, 14), which was one of those that returned from Babylon (Ezra ii, 57).

6. A scribe, one of the three principal treasurers appointed by Nehemiah (Neh. xii, 13). B.C. 410. He was perhaps identical with No. 4 or 5 above.

Zarah (Heb. id., חָרָה, in pause חָאָר, rancidity or flatulence; Sept. Ζαρά v. r. Ζαράμ and Ρασόλαμ; Vulg. Zoram), last named of the three sons of Rehoboam by one of his wives (2 Chron. xi, 19), named Abihail (q.v.), according to the Hebrew version, but, as Keil maintains, (Comment. ad loc.) by Mahath (Abihail being the mother of the latter) (B.C. 978).

Zar (Heb. צָפָר, ὀβρός, small, as often; Sept. ΢αφάρ; Vulg. Seira), a place named in 2 Kings viii, 21, in the account of Joram's expedition against the Edomites, as one to which he went with all his chariots. There he and his force appear to have been surrounded, and only to have escaped by cutting their way through in the night. This spot, however, is the interpretation of the Jewish commentators, who take the word צָפָר to refer to the neighboring parts of the country of Edom (see Rashi, On 2 Chron. xxvi, 9). The parallel account in Chronicles (xxi, 9) agrees with this, except that the words "to Zair" are omitted, and the words "with his princes" inserted. This is followed by Josephus (Ant. ix, 5, 1). The omitted and inserted words have a certain similarity both in sound and in their component letters, צָפָר and הֵבָר; and on this it has been conjectured that the latter were substituted for the former either by the error of a copyist or intentionally, because the name Zair was not elsewhere known (see Keil, Comment. on 2 Kings viii, 21). Others, again, as Movers (Chronik, p. 218) and Ewald (Geick. iii, 524), suggest that Zair is identical with Zebrah, the name of the road by which an army passed from Judaea to the country formerly occupied by Edom lay through the place which was then believed to be Zoor, below Kerak, at the south-east quarter of the Dead Sea (Fulcher, Gesta Dei, p. 405), and so far this is in favor of the identification; but there is no other support to it in the MS. readings either of the original or the version. The readings of the Vulg. (Seira) and the Arab. version (Sair), is that Zair is an alteration for Seir (סיר), the country itself of the Edomites (Thenius, Kurzg., extra. Hist.). The objection to this is that the name of Seir appears not to have been known to the author of the book of Kings.

Zaph (Heb. צָלָב, צָלָב, wound; Sept. Σάλιος v. Σάλι and Εithe; Vulg. Seleph), the father of Hanun, which latter rebuilt part of the wall of Jerusalem after the Exile (Neh. iii, 30). B.C. ante 446.

Zalmun (Heb. צָלָם, צָלָם, skald; Sept. Σαλμων v. r. Σαλλών, etc.; Vulg. Salmon), the name of a man and of a hill.

At Bethlehem, one of David's warriors (2 Sam. xxiii, 28), called in the parallel passage (1 Chron. xi, 29) Lail
ZALMON
(q.v.), which Kennicott prefers (Disert. p. 187). See DAVID.

2. A mountain (עָלָם) or wooded eminence in the immediate neighborhood of Shechem, from which Abimelech and his people cut down the boughs with which he suffocated and burned the Shechemites who had taken refuge in the cistern. The name of the Sept., here (ربع) is remarkable both in itself and in the fact that the two great MSS. agree in a reading that so much removed from the Hebrew; but it is impossible to suppose that Hermon (at any rate, the well-known mountain of that name) is referred to in the narrative of Abimelech. It is a name so often mentioned in a place of the same name, but evidently far from the necropolis (Schwarz, Poole, p. 187). The name Sulemiajeh is attached to the S.E. portion of Mount Ebal (see the map of Dr. Rosen, Zeitsschr. der deutschen morgenl. Geest, xiv. 634), and Jebel Silman is the name of a high conspicuous summit S.W. of, and linked with Mount Gerizim, having on it a tomb attributed by Mohammadan tradition to Silman el-Farsi (Van de Velde, Memoir, p. 354). The only high mountains around Shechem are Ebal and Gerizim, and Zalmon may be another name for one of these. The name of Dalmanutha has been supposed by some to be a corruption of that of Tsalmon (Otho, Lee, Rabb. s. v. "Dalmanutha").

It is usually supposed that this hill is mentioned in Psa. lxxxviii, 14 (A. V. "Salmon"); and this is probable, though the passage is peculiarly difficult, and the precise allusion intended by the poet seems hopelessly lost. Commentators differ from each other; and Furst, within in 176 pages of his Handschreiberbuch, differs from himself (see אָלֹם and עָלָם). Indeed, of six distinguished modern commentators—De Wette, Hitzig, Ewald, Hengstenberg, Delitzsch, and Hupfeld—no two give distinctly the same meaning; and Mr. Keble, in his admirable version of the Psalms, gives a translation which, though poetical, as was to be expected, differs from any one of those six schemes. The translation of the word אָלֹם is "Thou wouldst make it snow," or "It would snow," with liberty to use the verb either in the past or in the future sense. As, notwithstanding ingenuity of attempts, this supplies no satisfactory meaning, recourse is had to a translation of a comparative character, "Thou makest white as snow, etc." Whence it is white as snow—words to which various metaphorical meanings have been attributed. The gloss which, through the Lexionum of Gesenius, is most generally received is that the phrase refers to the ground being snow-white with bones after a defeat of the Canaanites, and this may be accepted by those who will admit admitting bones upon wounds, and a battle-field. At the same time, it is to be remembered that the figure is a very harah one, and that it is not really justified by phrases quoted in illustration of it from Latin classical writers, such as "campique ingentes ossibus albertus" (Virgil, Æs, xii, 38) and "humanus omnibus albet humus" (Ovid, Fast, i. 558). For in these cases the word the bones is actually used in the text, and is not left to be supplied by the imagination. Granted, however, that an allusion is made to bones of the slain, there is a divergence of opinion as to whether Salmon was mentioned simply because it had been the battle-ground of some ancient battle of the Canaanites, or whether it is only introduced as an image of snowwhiteness. Of these two explanations, the first would be, on the whole, most probable; for Salmon cannot have been a very high mountain, as the highest mountains near Shechem are Ebal and Gerizim, and of these, Ebal, the highest of the two, is only 1928 feet higher than the city (see Robinson's Geumus, p. 895 a). If the poet had desired to use the image of a snowy mountain, it would have been more natural to select Hermon, which is visible from the eastern brow of Gerizim, is about 10,000 feet high, and is covered with perpetual snow. Still it is not out of the question that this circumstance by itself would be conclusive, for there may have been particular associations in the mind of the poet unknown to us which led him to prefer Salmon.—Smith. It is perhaps not too great a stretch of fancy in this highly figurative Psalm to suppose that the hill in question, being near Shechem, in the centre of the country, may have been (or conceived to have been) the sacred mountain of the Canaanites, and that the poet, being in the conquest of Canaan, and the prostrate bodies of the slain Ops, covered with their white Oriental garments, are pictured like snow upon the distant background of the mountain-side. The use of the Heb. future points out the conceptual character of the statement, and justifies the translation as a metaphor, "It seemed to snow."

Zalmon'nah (Heb. Tsalmunah, צַלְמַנָּה, shady; Sept. Σέλμωνα; Vulg. Salmona), the name of a desert station (the 45th) of the Israelites, which they reached between leaving Mount Hor and camping at Punon, although they must have turned the southern point of Edomish territory by the way (Numb. xxxiii, 41). It therefore lay on the south-east side of Edom, but hardly so far north as Maan, a few miles east of Petra, as Raumer thinks. More probably Zalmonah may be in the Wady el-Amr, which runs into the Wady Ithm, close to where Elath anciently stood. See EXODE.

Zalmun'na (Heb. Tsalmunna, צַלְמִנָּה, apparently from צָלַם, shadow, and מַנָּה, to withhold, i.e. deprived of protection; Sept. and Josephus, Σαλμοννα), last named of the two "kings" of Midian, whose capture and death by the hands of Gideon himself formed the last act of his great conflict with Midian (Judg. viii, 2-21; Psa. lxxiii, 11). B.C. 1361. See Zina.

The distinction between the "kings" (Deut. 3:1, melu-kim) and the "princes" (Deut. 3:1, weym) of the Midianites on this occasion is carefully maintained throughout the narrative (Judg. viii, 5, 12, 26). "Kings" of Midian are also mentioned in Num. xxxi, 8; but when the same transaction is referred to in Josh. xiii, 21, they are designated by a different title (נפתל, nislim; A. V. "princes"). Elsewhere (Num. xxii, 4, 7) the term eldars (נְפָתָלי, nislim) is used, answering in signification, not in etymology, to the Arabic sheik. It is difficult, perhaps impossible, to tell whether these distinctions are accurate, and how far they represent a perfectly distinct acquaintance which the Hebrews must have had with the organization of a people with whom, except during the orgies of Shittim, they appear to have been always more or less at strife and warfare (1 Chron. xx, 10, 12-20). There is an entire probability that they were in favor of their being correctly retained rather than the reverse. It should not be overlooked that they are not, like Oreb and Zeeb, attached also to localities, which always throws a doubt on the name when attributed to a person as well. Josephus inverts the designation. He styles Oreb and Zeeb Barakki, and Zebah and Zalmon, הָיַעַמֹּן (Ant. v. 7, 5). The vast horde which Gideon repelled must have included many tribes under the general designation of "Midianites, Amalekites, children of the East," and nothing would be more or less natural than for the Hebrew scribes who chronicled the events to confuse one tribe with another in so minute a point as the title of a chief. In the great Bedawin tribes of the present day, who occupy the place of Midian and Amalek, there is no distinctive appellation answering to the melak and sdr of the Hebrew narrative. Differences in rank and power there are as between the great chief, the second, the third, and the lesser chiefs who lead the sub-tribes into which it is divided, and who are, to a great extent, independent of him. But the one word sheik is employed for all. The great chief is the sheik el-kobur; the others are nis el-mashari, "of the sheiks," i.e. of sheik rank. See MIDIANITE.

Zam'ibri (Zaspí, Vulg. Zamfr), the Greek form
ZAMBRIS [1 Macc. ii, 26] of the Heb. name (Numb. xxv, 14) Zam- bri (q.v.).

Zambris (Zambris v. r. Zambris, a corrupt Greek form (1 Esdr. ix, 34) of the Heb. name ( Ezra x, 42) Amarih (q.v.).

Zam'moth (Zam'moth v. r. Zam'moth, Vulg. Zulothm), a corrupt Greek form (1 Esdr. ix, 28) of the Heb. name ( Ezra x, 27) Zattu (q.v.).

Zamzum'mim (Heb. Zamzummim, גְּזַמְזַמִּים; Sept. Ζαμζούμιμ v. r. Ζαμζούμι, Vulg. Zomzuminim, A. V. "Zamzummim"), the Ammonite name for the people by whom others (though who they were do not appear) were called Rephaim (q.v.) (Deut. ii, 20 only). They are described as having originally been a powerful and numerous nation of giants—"great, many, and tall"—inhabiting the district which at the time of the Hebrew conquest was in the possession of the Ammonites, by whom the Zamzummim had a long time previously been destroyed. Where this district was it is not, perhaps, possible exactly to define; but it probably lay in the neighborhood of Rabbath-Ammon (the present Amman), the only city of the Ammonites of which the name or situation is preserved to us, and therefore eastward of that rich undulating country from which Moab, inhabited by the Amorites (the modern Belka), and of the numerous towns of that country whose ruins and names are still encountered.

From a slight similarity between the two names, and from the mention of the Emim in connection with each, it is usually assumed that the Zamzummim are identical with the Zuzim (q.v.) (Genesis, Theoar, p. 410 a; Ewald, Gesch. i, 308, note; Knobel, On Gen. xiv, 5). Ewald further supports this by identifying Ham (q.v.), the capital city of the Zuzim (Gen. xiv, 5), with Ammon. But at best the identification is very conjectural.

Various attempts have been made to explain the name: as, by comparison with the Arabic zamazam, "long-necked" or zamzam, "strong and big" (Simonis, Onomatol, p. 135); or as "obstinate," from בָּזָמָה (Luther), or as "noisy," from בִּזָה (Genesius, Theoar, p. 419); or on onomatopoetic, intended to imitate the unintelligible jabber of foreigners. Michaelis (Suppl. No. 629) playfully recalls the likeness of the name to that of the well Zen-sam at Mecca, and suggests thereupon that the tribe may have originally come from Southern Arabia. Notwithstanding this hanger, however, he ends his article with the following discreet words, "Nihil historiam, nihil originis populi novimus: fas sit etymologiam aquae ignorare." See Journ. Soc. Lit. 1852, p. 386.

Zano'a (Heb. Zano'ah, זָנֹה; [Neh. xi, 80, 81], prob. maras), the name of two towns in the tribe of Judah.

1. (Sept. Zano'ah v. r. Tanaw, Vulg. Zanah.) A place in the lowland (Shephelah), named in connection with Zoreah and Jarmuth (Josh. xv, 84), in the group occupying the north-western corner of the district. See JUDAH. The name recurs in its old connection in the lists of Nehemiah, both of the towns which were re-inhabited by the people of Judah after the Captivity (xi, 30), and of those which assisted in repairing the wall of Jerusalem (iii, 15). Jerome says (Onomatol, a. v. "Zano'ah") that it was still called Zamotus in his day, and lay in the region of Eleutheraopolis on the way to Jerusalem. The name and position tolerably correspond to those of Zano'a, a site which was pointed out to Dr. Robinson from Doli with Neft (Bibl. Res. ii, 16), and which in the maps of Van de Velde and of Tobl (Dritte Wanderung) is located on the north side of the Wady Imsil, two miles east of Zareah, and four miles north of Yarmuk. Rabbi Schwarz inaccurately calls it Zamaa (Paelst. p. 102).

2. (Sept. [Josh., taking in the following name]}

ZAPHNATH-PAANE'AH (Heb. Taphanath-Paane'aah, זָפָנָת פַּאֲנֵאָה; Sept. Σαφανασιαβι, Vulg. savorator mundi), a name given by Pharaoh to Joseph (Gen xii, 45). See JOSEPH.

I. Form of the Word.—Various forms of this name, all traceable to the Hebrew or Sept. original, occur in the works of the early Jewish and Christian writers. Thus, Menander, Bishop of Ephesus, in a different manner, gives the various forms of whose Antiquities (ii, 6, 1) no less than eleven forms have been collected following both originals, some variations being very corrupt; but the translation given by Josephus it is probable that he transcribed the Hebrew. Philo (De Nominium Mut. [ed. Col. 1013], p. 819) and Theodore (i, 106, ed. Schultz) follow the Sept. and Jerome the Hebrew. The Coptic version nearly transcribes the Sept., paonkomponek.

In the Hebrew text the name is divided into two parts. Every such division of Egyptian words being in accordance with the Egyptian orthography—as So-Ammon, Mem-ph, Poti-Pherah, if the name be Egyptian, reasonably propose any change in this case; if the name be Hebrew, the same is certain. There is no prima facie reason for any change in the consonants.

The Sept. form seems to indicate the same division, as the latter part, paaneah, is identical with the second part of the Hebrew, while what precedes is different. There is again no prima facie reason for any change from the ordinary reading of the name. The cause of the difference from the Hebrew in the earlier part of the name must be discussed when we come to examine its meaning.

II. Proposed Etymologies of the Word.—This name has been explained as Hebrew or Egyptian, and always as a proper name. It has not been supposed to be an official title, but this possibility has to be considered.

1. The rabbins interpreted Zaphnath-paneah as Hebrew, in the sense "reveler of a secret." This expla-
nation is as old as Josephus (κατά τον εὐρήτην, Ant. ii, 6, 1), and Theodoret also follows it (τῶν αποστόλων εἰρήνευτον, i, 106, Schulz). Philo offers an explanation, which, though seemingly different, may be the same (in ἠπαρχητον στίγμα κραυνόν; but Mangay con- junctures the true reading to be in ἠπαρχητον στίγμα ἀποστόλου, loc. cit.). It must be remembered that Josephus perhaps, and Theodoret and Philo certainly, follow the Sept. form of the name. We dismiss the Hebrew interpretation as unsound in itself and demanding the improbable concession that Pharaoh gave Joseph a Hebrew name.

2. Isidore, though mentioning the Hebrew interpretations, remarks that the name should be Egyptian, and offers an Egyptian etymology: "Joseph . . . hunc Pharaon Zaphanath Phaenea appellavit, quod Hebræice amidst conditionem repertorem sonant . . . tamen quia hoc nomen ad Egyptian ponitur, Iptius lingum debeat haberare rationem. Interpretabatur ergo Zaphanath Phaenea "Egyptio sermo salvator mundi." (Orig. vii, 7, vol. iii, p. 327, Arev.). Jerome adopts the same rendering.

3. Modern scholars have looked to the Coptic for an explanation of this name. Jablonski and others proposing as the Coptic of the Egyptian original psen-phiemep, "the preservation (or preserver) of the age." This is evidently the etymology intended by Isidore and Jerome. See Jablonski, Opera c. 207-216; Rosellini, Mon. Storici, i, 185; Champollion, Gramm. p. 396; Perown, Lex. Copt. p. 315; Guenin, Thesaur. ii, 23.

III. Comparison with Egyptian Elements.—1. The Hebrew Form. This, after eliminating the Masoretic vowels, is Zyp-bn-th P-nt-n, which transcribed in hieroglyphics stands thus:

```
Z ph n th P n ch
```

The first syllable, za/f, signifies "provisions;" the second, nat, is the preposition "of," pi is the definite article "the;" and the last syllable, aech, means "life." The whole name, therefore, may well be translated "food of the living."

2. The Septuagint Form. This is more difficult of rendering. The most literal transcription of the Greek ποζοσμαρανθω, omitting the vowels as unessential, i.e. π-ρ-ν-τ-ν-ν-ν, would be in hieroglyphics thus:

```
p s n t m n n
```

This means "he who gives joy to the world," a sense evidently taken by Jerome in the Vulgo, who lived while the Egyptian was yet vernacular, and who renders it "savour of the world" (see the Speaker's Comment- ary [Amert, ed.], i, 480 sq.).

Zap'phon (Heb. Tsaphon, .opacity, as often; Sept. Σαφών w. τ. Σαφών; Vulg. Sagphon), the name of a place mentioned (in connection with Beth-sram, Bethnimrah, and Succoth) in the enumeration of the allot- ment of the tribe of Gad (Josh. xiii, 27). It is one of the places in the "valley" (i.e. of the Jordan), which appear to have constituted the "remainder ("τὸ" περὶ τῆς Κυρίας τοῦ βασιλείας τοῦ Βασιλέως τῆς Σιών")" apparently referring to the portion of the same kingdom previously allotted to Reuben (ver. 17-21). The enumeration appears to proceed from south to north, and from the mention of the Sea of Chinn- eroth it is natural to infer that Zaphon was near that lake. The Talmud (Gemara Jerus. Shabbith, vi) identifies it with the ancient Amathus (q. v.,) the remains of which are still called Amathus on Wady Rejib (Schwarz, Fuller, p. 292), and this position is not an improbable one.

In Judg. xii, 1 the word rendered "northward" (tsaphbón) may with equal accuracy be rendered "to Zaphon." This rendering is supported by the Alexandrian copy of the Sept. (K太平) and a host of other MSS, and it has consistency on its side, since the Ephraimites were in the process of migrating eastward rather than northward. See Japheth.

Za'ra (Zapá), the Greek form of (Matt. i, 3) of the Heb. name Zerah (q. v.), the son of Judah.

Zera. See Talmud.

Zar'acés (Zapákiq v. t. Zapáziq; Vulg. Zaraceles), a corrupt Greek form (1 Esdr. i, 38) of the Heb. name of the brother of Joschim (Jehoiakin), king of Judah, probably Zebediah (q. v.).

Za'rah (Gen. xxxviii, 80; xlv, 12). See Zerah.

Zāra'as (Zapákas), the Greek form of Zerahiah (α, 1 Esdr. vii, 2; comp. Ezra vii, 1; 6, 1; Esdr. viii, 31; comp. Ezra viii, 4) or (corruptly) Zabadiah (1 Esdr. viii, 34; comp. Ezra viii, 6).

Za'resh (Neb. xi, 29). See Zorah.

Za'reshithe (1 Chron. ii, 58). See Zorathcite.

Za'red (Numb. xxii, 12). See Zerad.

Zar'ephath (Heb. Tsarephath). opacity, smelting place; Sept. and New Test. Zarephath [in Older ra Sap- róta; v. in i Kings, Σαρέφατη; Josephus, Sapréf; "Sarepta," Luke iv, 26], a town which derives its claim to notice from having been the residence of the prophet Elijah during the latter part of the drought, and where he performed the miracle of multiplying the barrel of meal and cruse of oil, and where he raised the widow's son to life (1 Kings iv, 19, 20). Beyond stating that it was near to, or dependent on, Zidon (יוֹדָן), the Bible gives no clue to its position. It is mentioned by Obadiah (ver. 20), but merely as a Canaanitish (that is, Pho- nician) city. Josephus (Ant. viii, 13, 2), however, states that it was "not far from Sidon and Tyre, for it lies bet- between them." To this Jerome adds (Onomast. s. a. "Sarepta") that it "lay on the public road," that is, the coast-road. Both these conditions are implied in the mention of it in the itinerary of Paula by Jerome (Epit. Paula, § 8), and both are fulfilled in the situation of the modern village of Surajend, a name which, except in its termination, is almost identical with the ancient Pho- nician (comparison, 1 Kings, ver. 17, Jerome, Acad. 456). There were many vineyards there (Sidon. Apoll. Carm. xvii, 16; Fulgent. Mythol, ii, 15). The Crusaders made Sarepta a Latin bishopric in the archiepiscopate of Sidon, and erected near the port a small chap- el over the reputed site of Elijah's miracle (William of Tyre, xii, 14, Jacob of Vitry, ch. xiv). In the Middle Ages it was a strongly fortified place (Wil- ken, Kreuziige, ii, 208). The locality has been visited and described in recent times by Robinson (Bibl. Res. ii, 470), Thomson (Land and Book, ch. xii), and others. It appears to have changed its place, at least since the 11th century, for it is now more than a mile from the coast, high up on the slope of a hill (Robinson, p. 474), whereas at the time of the Crusades it was on the shore. Of the old town considerable indications remain. One group of foundations is on a headland called Ain el- Kentaara; but the chief remains are south of this, and extend for a mile or more, with many fragments of col- umns, slabs, and other architectural features. The Roman road is said to be unusually perfect here (Beam- mont, Diary, etc., ii, 186). The site of the chapel erect- ed by the Crusaders on the spot then reputed to be the site of the widow's house is probably still preserved (see the citations in supra). It is near the water's edge, and is now marked by a welly and small khan dedicated to el-Khur, the well-known personage who unites, in the popular Moslem faith, Elijah and St. George. A grotto at the foot of the hill on which the modern vil-lage stands is now shown as the residence of Elijah (Van de Velde, Syr. and Palaest., i, 102). See Mann-
ZARETAN 1062 ZEBADIAH

us, *De Sarepta* (Viteb. 1728). See PHILONIA.

Zar'etan (Heb. *Tsaretnan*, על in perhaps splen-
kan*; A. V. *Zarthan*; with the direc- tive, *Zarshand-
nah*, על做大做强, in iv, 12; Sept. *Szepan* v. r. *Sarapha* and *Ezlawen*; Vulg. *Sarthanna*; A. V. *Zarshannah*), a
town or locality mentioned by this name three times, and apparently several times also under similar names. It is first named in the account of the passage of the
Jordan by the Israelites (Josh. iii, 16) as defining the
position of the city Adam, which was beside (עַל) it. It
is next mentioned in the list of Solomon's commis-
sariat districts as "close to" (לְעָל) Bethshean, that is, in
the upper part of the Jordan valley and "beneath" (לְעָל) Jezreel (1 Kings iv, 12). It is again men-
tioned in connection with Succoth as a clays place
where Solomon cast metal in the circle (*לענ*), *kikbâr*, "plain," i.e., ghôr) of the Jordan (vii, 46). In the par-
allel passage to this last (2 Chron. iv, 17) ZEREDATHAH
(q.v.) is substituted for Zarthan, and this again is not
impossibly identical with the Zereshah (q.v.) of the
story of Gideon (Judg. vii, 32). All these spots agree
in proximity to the Jordan, and the associated places
somewhat aid us in discovering the general locality.
Bethshean is the present Beisan, Succoth is probably
the present Salkut, and Adam is, doubtless, represented
by the modern Adamich ford. Van de Velde (Memoir,
p. 354) inclines to identify Zaretan with Sarothah, a
lofty and isolated hill which projects from the main
highlands into the Jordan valley, about seventeen miles
north of Jericho (comp. De Saulcy, *Dead Sea*, ii, 31);
but the names are not closely alike, and this peak has
another ancient appellation. See Sarothah. Schwarz
probably refers to the same spot when he declares that
the name should be read Saritap, and that the town in
question was so called "because it lay near Mount Sar-
taf, five English miles west of the Jordan" (Polest, p.
162). Mr. Drake (in the *Quar. Report* of the "Pales-
tine Explor. Fund," Jan. 1876, p. 81) thinks that the
reading Szarom (Szaporá) of the Alexandrian MS. at
1 Kings vii, 46 points to a *Tell Saram*, a very conspicu-
ous and unusually large mound three miles south of
Beisan; but this reading is very precarious. Accord-
ing to Tristram (Bible Places, p. 229), "the name linger-
s in Ain Zaharak and Tellah Zaharak, three miles west of
Beisan, indicating that Zaretan was the designation of
a district rather than a place."

Zâ'rah-shâ'har (Heb. *Tweth rash-sha'char*, צָרָהּוָּ שַׁחַר,"
shore of the sea, where the river runs through steep
banks shaded by cedars and palms, with numerous
together with somewhat sulphurous springs (Bible Places,
p. 361). A place Shâkar is marked on Van de Velde's
map, about six miles south of es-Salt, at the head of
the valley of the Wady Seir, which might possibly rep-
resent the latter part of the name more exactly.

*Zapel*, A. V. *Zarshite*), the patronymic of the family
of Zeresh son of Judah (Numb. xxvi, 20; Josh. vii, 17;
1 Chron. xxvii, 11, 13), and also of that descended from
Zerah son of Siman (Numb. xxvi, 18).

Zar'atana (Heb. *Zarta'nah*), 1 Kings iv, 12. See ZARETAN.

Zâ'râh (1 Kings vii, 46). See ZARETAN.

Zathô's (Sept. *Zapôb*; Vulg. *Zochus*), a Greek
form (1 Esdr. viii, 82) of the Heb. name ZATTU (which is
apparently omitted in Ezra viii, 5).

Zathû'î (Sept. *Zasôv* v. r. *Zerôb*; Vulg. *Demu*), a
Greek form (1 Esdr. vi, 12) of the Heb. name (Ezra ii,
8) ZATTU (q. v.).

Zath'u (Neh. x, 14). See ZATTU.

*Zosôv* v. r. *Zosôv*; Zezattu, etc.; Vulg. *Zethus*, Zethus), an
Israelite whose "sons" to the number of 945 (or 946)
returned from Babylon with Zeresh (Ezra ii, 8; Neh.
vi, 13); and another company of them returned with
Esra, although his name has accidentally dropped out of
the text in Ezra viii, 5, as we learn from the Sept. and
the Apocryphal parallel (1 Esdr. viii, 52), which both
read "of the sons of Zosôv, Zezenins, and Aziel (or
Several of these descendants renounced their Gentile
wives (Ezra x, 27).

Zâ'van (1 Chron. i, 42). See ZAAVAN.

Zayit. See OLIVE.

*Zasôv* v. r. *Ozâ'â*, Ozâ', etc.; Vulg. *Zazo*), last named of
the two sons of Jonathan of the family of Jerahmeel
the Judahite (1 Chron. ii, 38). B.C. post 1618.

Zebachim. See TALMUD.

Zebadi'ah (Heb. *Zebabaid*, צֶבָּדָא, "three in
the prolonged form Zebaida'hu, צֶבָּדָאִי, 1 Chron. xxvi, 2; 2
Chron. xvii, 8; xix, 11, 20; Gezer; Sept. Zabá-
bia or Zababdai v. r. *Zabái* or *Zabábia*, etc.), the
name of several Israelites. Comp. in:

1. A Benjamite of the "sons" of Beriah (1 Chron.

2. A Benjamite of the "sons" of Elpaal (1 Chron.

3. One of the two sons of Jeroham of Gedor, a Ben-
jamite who joined the fortunes of David in his retire-
ment at Ziklag (1 Chron. xii, 7). B.C. 1054.
4. A Levite, third son of Meshelemiah the Korhite (1 Chron. xxvi, 2). B.C. 1043.

5. Son of Asahel (Joab's brother), and commander with his father of the fourth contingent of David's troops (1 Chron. xii, 7). B.C. 1014.

6. One of the two Levites who were sent with others in the third year of Jehoshaphat to teach the law in the cities of Judah (2 Chron. xviii, 9). B.C. 910.

7. The son of Ishmael and prince of the house of Judah in the reign of Jehoshaphat, who, in conjunction with Amariah, the chief priest, was appointed to the superintendence of the Levites, priests and chief men who had to decide all causes, civil and ecclesiastical, which were brought before them (2 Chron. xix, 11). B.C. 895. They possibly may have formed a kind of court of appeal, Zeboiah acting for the interests of the king, and Amariah being the supreme authority in ecclesiastical matters.

8. Son of Michael of the "sons" of Shephatiah, who returned with Ezra from Babylon with eighty male relatives (Ezra viii, 8). B.C. 459.

Ze'bah (Heb. Ze'bach, מְצָבָח, sacrifice, as often; Sept. Ζαβαθ, Josephus, Ζαβύα; Vulg. Zeboe, first name of the two "kings" of Midian who appear to have commanded the great invasion of Palestine, and who finally fell by the hand of Gideon himself. B.C. 1361. He is always coupled with Zalmunna, and is mentioned in Judg. vii, 5–51; Ps. lxxxiii, 11). See ZALMUNNA.

It is a remarkable instance of the unconscious artlessness of the narrative contained in Judg. vi, 58–vii, 29 that no mention is made of any of the chiefs of the Midianites during the early part of the story, or indeed until Gideon actually comes into contact with them. We then discover (vii, 18) that while the Bedawin were ravaging the crops in the valley of Jezreel, before Gideon could capture or more of his brothers but had been captured by the Arabs and put to death by the hands of Zebar and Zalmunna themselves. But this material fact is only incidentally mentioned, and is of a piece with the later references by prophets and psalmists to other events in the same struggle, the interest and value of which have been allowed to underounce (q. v.).

Ps. lxxxiii, 12 purports to have preserved the very words of the cry with which Zebar and Zalmunna rushed up at the head of their hordes from the Jordan into the luxuriant growth of the great plain—"Seize these godly pastures!"

There is a resemblance between this and the Hebrews and Zeeb, two of the inferior leaders of the incursion, had been slain, with a vast number of their people, by the Ephrathimites at the central fords of the Jordan (not improbably those near Jer Darniek), the two kings had succeeded in making their escape by a passage farther to the north (probably the ford near Bethshean), and thence by the Wady Yatlah, through Gilead, to Karkor, a place which is not fixed, but which lay doubtless high up on the Hauran. Here they were reposing with 15,000 men, a mere remnant of their huge horde, when Gideon overtook them. Had they resisted, there is little doubt that they might have easily overcome the little band of "fainting" heroes who had toiled after them up the tremendous passes of the mountains; but the name of Gideon was still full of terror, and the Bedawin were entirely unprepared for his attack: they fled in dismay, and the two kings were taken. See GIDEON.

Then came the return down the long defiles leading to the Jordan. We see the cavalcade of camels, jingling the golden chains and the crescent-shaped collars or trappings hung round their necks. High aloft rode the chief chiefs clad in their brilliant keypysz and embroidered abayaz, and with their "collars" or "jewels" in their nose and arms. Gideon probably strode on foot by the side of his captives. They passed Penen, where Jacob had seen the vision of the face of God; they passed Succoth; they crossed the rapid stream of the Jordan; they ascended the highlands west of the river, and at length reached Ophrah, the native village of Joseph (Matt. vi, 6). For the last time, at last, the question which must have been on Gideon's tongue during the whole of the return found a vent. There is no appearance of its being having been alluded to before, but it gives, as nothing else could, the key to the whole pursuit. It was the death of his brothers, "the children of his mother," that had supplied the personal motive for that steady perseverance, and had led Gideon on to his goal against hunger, faintness, and obstacles of all kinds. "What manner of men were they which ye slew at Tabor?" Up to this time the sheiks may have believed that they were reserved for ransom; but these words once spoken, there can have been no doubt what their fate was to be. They met it like noble children of the desert, without fear or weakness. One request alone they make—that they may die by the sure blow of the hero himself—and Gideon arose and slew them, and not till he had revenged his brothers did any thought of plunder enter his heart—then, and not till then, did he lay hands on the treasures which ornamented their camels. See MIDIANITE.

Ze'baim (Heb. with the art. hets - Tsebaim, צְבֵיאָמ, the gazelles, as often; Sept. vioi Α'Τσιβαίου v. Α'Τσίβαιος; Vulg. Aebaim; in Heb. hets - Tsebayim, צְבֵי-אֱ-בַיִם, Sept. vioi Τσιβαίου v. Τσιβαίος), apparently the name of the native place of the "sons of Pochereth," who are mentioned in the catalogue of the families of "Solomon's slaves" as having returned from the captivity with Zerubbabel (Ezra ii, 57; Neh. vii, 59). On the other hand, the compound name Pochereth-hat-Tsebaim is considered by some to have no reference to place, but to signify the "smarter or hunter of gazelles" (Gesen. p. 1099; in Ezr. vii, 1, etc.; Excubius, Ezech. Hanah. Ezra ii, 57), designating doubtless an individual. See Pochereth.

Zeb'eedee, or rather Zeb'eede'tes (Zebedee'tes, the Greek form apparently of Ze'ebit or Zebo'bita), a fisherman of Galilee, the father of the apostles James the Great and John (Matt. iv, 21), and the husband of Salome (xxvi, 35; Mark xvi, 40). He probably lived at least at Bethsaida and in its immediate vicinity. It has been inferred from the mention of his "hired servants" (i, 20), and from the acquaintance between the apostle John and Anna, the high-priest (John xviii, 15), that the family of Zebee was in easy circumstances (comp. xix, 27), although not above manual labor (Matt. xx, 26). While Caiaphas, the high-priest, frequented it as a patronymic, for the sake of distinguishing his two sons from others who bore the same names, he appears only once in the Gospel narrative—namely, in Matt. iv, 21, 22; Mark i, 19, 20—where he is seen in his boat with his two sons mending their nets. A.D. 26. On this occasion he allows his sons to leave him, at the bidding of the Saviour, without raising any objection, although it does not appear that he was himself ever of the number of Christ's disciples. His wife, indeed, appears in the catalogue of the piou women who were in constant attendance on the Saviour towards the close of his ministry, who washed his feet with ointment, and ministered to him even in the grave (Matt. xxvii, 55, 56; Mark xv, 40; xvi, 1; comp. Matt. xx, 20; Luke viii, 3). It is reasonable to infer that Zebedee was dead before this time. See John (the Apost).

Zeb'elma (Heb. Zeb'elma, צֶבֶלמָה, purchase; Sept. Ζαβελμᾶ v. Ζαβελμᾶ; Vulg. Zebelma), one of the "sons" of Nephe, who divorced his collateral wife taken after the return from Babylon (Ezra x, 43). B.C. 458.

Zeb'ul (See ALEXANDER).

Zeb'oltim (Gen. xiv, 2, 8). See ZEBRIM.
Zeb'olim, a name which occurs in two distinct forms in the original, denoting different localities.

1. (Heb. Zebolim', שֶׁבֹּלִים, gazelles, as often, Hos. xi, 8; or shorter, Tsebolim', צְבֹלוּם [marg. Zebolim'], Gen. x, 19; or צֶבֹּלִים [marg. Zebolim'], xiv, 2, 8 [A.V. "Zebolim']); Deut. xxix, 23; Sept. סְבֹּלוֹֹלִים v. לֹֹלִים (Sabaolim); Vulg. Zebolim), one of the five cities destroyed by divine visitation in the vale of Siddim (Hos. xi, 5), mentioned immediately after Admah (Gen. x, 10; Deut. xxix, 29), and ruled over by a separate king. Sheenah (Gen. xiv, 2, 8). De Saulcy finds the site of Zebolim in the Talda Sebaim, a name which he reports as attached to extensive ruins on the high ground between the Dead Sea and Kerak (Dead Sea, i, 883); but the position as well as the elevation is improbable, and the ancient spot is most likely beneath the water of the southern bay of the sea. See Sodom; Zoaal.

2. (Heb. the art. háte-Zebolim', מִנֵּה צֵבְלוֹלִים, the heynus; Sept. Ζαύασιν v. Σάμθνε, Zasiosin, etc.; Vulg. Zebolim), the name of a valley (יו), i.e. a ravine or gorge, apparently east of Michmash, mentioned in 1 Sam. xiii, 18, where it is described with a curious minuteness, which is unfortunately no longer intelligible. The road running from Michmash to the east is said to have been "the road of the valley that looketh to the ravine of Zebolim towards the wilderness." The wilderness (miṣdar) is no doubt the district of uncultivated mountain tops and sides which lies between the central district of Benjamin and the Jordan valley, and here apparently the ravine of Zebolim should be sought. In that very district there is a wild gorge, bearing the name of Shuk ed-Dub, "ravine of the hands," up which runs the path from Jericho to Makkhas (Conder, Tent Work in Palest. iii, 16). It is represented on the new Ordnance Map as running for a short distance N.E. of Ain Duk. The same place or a town adjacent seems to be shown on the plan of Ptolemy (xi, 23, 24) (where it occurs without the art.-prefix)—confounding it, nevertheless, with the Zebolim of Genesis—as occupied after the Captivity. Rabbi Schwarz, however, maintains that the two places are different, and, while locating the valley as above (Palest. p. 156), he identifies the Zebolim of Nehemiah with "the village Zabu, situated on a high mountain, three English miles west of Jerusalem" (ibid. p. 154). He adds, "In [the Talmudical tract] Challah, iv, 10 is mentioned the Mount Zebolim. He doubts less to the ruined village Soba, about six miles west of Jerusalem, near Eshtoah; but this has little probability.

Zebub. See Fly.

Zebul (Heb. Zebul, זֶבְּלוּל, habitation; Sept. סְבֹּלוֹֹל, Zabol; Josephus, Ζαβολαζ), the chief man (נָג, A. V. "ruler") of the city of Shechem at the time of the contest between Abimelech and the native Canaanites (Judg. ix, 18, 20, 30, 36, 38, 41). B.C. 1319. He governed the town as the "officer" (אֶבֶן, Sept. εἰκόπος; Josephus, Ζιβος [Ant. v, 7, 4]) of Abimelech while the latter was absent; and he took part against the Canaanites by shutting them out of the city when Abimelech was encamped outside it. His conversation with Gaal, the Canaanitish leader, as they stood in the gate of Shechem watching the approach of the armed bands, gives Zebul a certain importance as among the minor characters of that time of confusion. See Abimelech.

Zeb'ulonite (Heb. Zebul'ônîte, זֶבּולוֹנִיָּה; Sept. Ζαβολωνικός, Zaboulinoc), the patronymic designation of a member of the tribe of Zebulun (Numb. xxxi, 27, "Zebulunite"); Judg. xii, 11, 12).

Zeb'ul'un (Heb. Zebul'un, once [Judg. i, 30] fully זֶבּוֹלּוֹן, usually זֶבּוֹלּוֹן or [Gen. xxx, 20; xxxvi, 23; xxxvi, 4; Judges iv, 6; v, 18; vi, 35; 1 Chron. ii, 1; vi, 58, 71, xxx, 10, 11, 18; Ps. cxix, 27; Isa. ix, 1) זֵבֻלוֹן, habitation; Sept., New Test., and Josephus, Ζαβουλον; Vulg. Zebulon; A. V. "Zabulon," Matt. iv, 13, 15; Rev. vii, 8), the name of a man and of the tribe descended from him, and also of a city in Palestine.

3. The sixth and last son of Leah, and the tenth born to Jacob (Gen. xxxv, 23; xlviii, 14; 1 Chron. ii, 1). His birth is recorded in Gen. xxx, 19, 20, where the origin of the name is, as usual, ascribed to an exclamation of his mother—"Now will my husband dwell with me" (זָבַב וְאָדָם וְנֹא, for I have borne him six sons! and she called his name Zebulun." B.C. 1416. This panonomasia is not preserved in the original of the "Blessing of Jacob," though the language of the A.V. implies it. The word rendered "dwell" in xli, 13 is זָבַב, with no relation to the name Zebulun. The Sept. puts a different point on the exclamation of Leah: "My husband will choose me" (αἰτείται με). This, however, hardly implies any difference from the original text. Josephus (Ant. i, 19, 6) gives only a general explanation: "a pledge of goodness will towards her." In the order of birth, Zebulun followed his brother Issachar, with whom, in the history of the tribes and in their allotted territories in Canaan, he was closely connected (Deut. xxxiii, 18). His personal history appears to have been uneventful, his history being a single incident worthy of record; and his name is not once mentioned except in the genealogical lists. In the Jewish traditions he is named as the first of the five who were presented by Joseph to Pharao—Dan, Naphtali, Gad, and Asher being the others (Targ. Pseudo-Jon. On Gen. xxxv, 24).

At the time of the descent of Jacob into Egypt, Zebulun had three sons—Sered, Elon, and Jahleel (Gen. xlv, 14)—who became the founders of the three great families into which the tribe was divided (Numb. xxxvi, 26). Though the first generation was so small, this tribe ranked fourth in numbers among the twelve, when the census was taken at Mount Sinai, in the year of the Exode; Judah, Dan, and Simeon being more numerous. During the wilderness journey it increased from 57,400 males to 60,500; but it held just the same relative place among the twelve—Judah, Dan, and Issachar being before it. Then the census was made on the plains of Moab (ver. 27).

History is almost as silent regarding the acts of the tribe during the long period of Egyptian bondage and the desert march as it is regarding the patriarch Zebulun himself. During the journey from Egypt to Palestine, the tribe of Zebulun formed one of the first to join with Judah and Issachar (also sons of Leah), marching under the standard of Judah. The head of the tribe at Sinai was Eliaib son of Helon (Numb. vii, 24); at Shiloh, Eliphanz son of Parnach (xxiv, 25). Her representative among the spies was Gaddiel son of Sodi (xiii, 10). The only point worthy of note previous to its settlement in Palestine is the fact that, on the solemn proclamation of the law, Zebulun was among the six tribes stationed on Mount Ebal to pronounce the curse (Deut. xxvii, 13).

The position and physical character of Zebulun's destined territory in the Land of Promise had been sketched in the prophetic blessings of Jacob and Moses. Looking down into a far-distant age, Jacob exclaimed, as his son stood by his bedside, "Zebulun shall dwell on the shore (יָמָה, chaph, a core, the modern Haifa) of seas; and he shall be for a shore of ships; and his side will be to Zidon" (Gen. xlix, 13). Though Issachar was an elder brother, Jacob seems to have already noticed and acknowledged the peculiarity of Zebulun by placing him first in order. This superiority was afterwards more fully displayed in the blessing of Moses.
which, though embracing both tribes, appears as if addressed to Zebulun alone—"And of Zebulun he said, Rejoice, Zebulun, in thy going out; and Issachar, in thy tents. They shall call the people unto the mountain; there they shall offer sacrifices of righteousness; for there is much wood; and the fruit thereof is the bow of a great man, by the abundance of ships in the sea" (Deut. xxxiii, 18, 19). Zebulun's territory was one of the richest and most beautiful sections of Western Palestine. Its allotment was the third of the second distribution (Josh. xix, 10). Joshua defines its borders with his usual minuteness, though, in consequence of the disappearance of many old cities, it cannot now be entirely identified. Its position, however, and general extent, are clear enough. Asher and Naphtali bounded it on the north, and Issachar on the south. It stretched nearly across the country from the Sea of Galilee on the east, to the maritime plain of Phoenicia on the west; embracing a strip of Edraelon, a little of the plain of Akka, the whole of the rich upland plain of Battatua (equal in fertility, and almost equal in extent, to that of Jezreel, and with the immense advantage of not being, as that was, the high-road of the Bedawin); with a part of the fertile tableland of Samaria on the north, about 30 m. inland from the sea; and, last, not least, it included sites so strongly fortified by nature that in the later struggles of the nation they proved more impregnable than any in the whole country. The sacred vicinity of Tabor, Zebulun appears to have shared with Issachar (Deut. xxxiii, 19), and Cleopas (Luke xix, 21). In this connection Leviticus (1 Chron. vi, 77). The beautiful wooded hills and ridges extending from Tabor, by Nazareth and Seferiyeh, to the plain of Akka, were also in Zebulun. It touched Carmel on the south-west; and though it did not actually reach to the shore of the Mediterranean, its shores joined the narrow maritime territory of Phoenicia to the west. Jacob, according to custom, gives the name of its chief city, Zidon—"And his side (נֹפֶל, i. e. flank) will be to Zidon." Its opposite extremity resting on the shore of the Sea of Galilee, the words of Jacob were fulfilled: "Zebulun shall dwell upon the coast of sea." His fishermen on the Sea of Galilee, and his merchants navigating the Mediterranean, in company with their Phoenician neighbors, illustrate remarkably the other blessings: "He shall be for a shore of ships;" "he shall rejoice in his going out." Possibilities of trade with Rome were great on the wooded, and an outlet for commercial enterprise, both in the Mediterranean and in the Sea of Galilee, the future state and history of Zebulun were influenced and moulded by external circumstances. The four Northern tribes—Zebulun, Issachar, Asher, and Naphtali—were in a great measure isolated from their brethren. The plain of Edraelon, almost uneasily swept by the incursions of hostile nations, separated them from Ephraim and Judah; while the deep Jordan valley formed a barrier on the east. Isolation from their brethren, and their peculiar position, threw them into closer intercourse with their gentile neighbors—the old mountain peoples whom they were never able entirely to expel (Judg. i, 30), and especially the commercial Phcenicians. Their national exclusiveness was thus considerably modified; their manners and customs were changed; their language gradually assumed a foreign tone and accents (Matt. xxvi, 73); and even their religion lost much of its original purity (2 Chron. xxx, 10, 18). "Galilee of the Gentiles" and its degenerate inhabitants came at length to be regarded with distrust and scorn by the haughty people of Judah (Isa. ix, 1; Matt. iv, 15; xxvi, 4, 19). The four Northern tribes formed, as it were, a state by themselves (Stanley, Jewish Church, i, 260); and among them Zebulun became distinguished for warlike spirit and devotion. In the great campaign and victory of Barak it bore a prominent part (Judg. iv, 6, 10). Deborah, in her triumphal ode, says, "Zebulun and Naphtali were a people that rejoiced their lives unto the death in the high places of the field" (v. 18). It would appear, besides, that their commercial enterprise led them to a closer and fuller study of the arts and sciences than their brethren. "They thus at an early period acquired the reputation of the family of liberal instruction; and the poet sang of them, 'From Zebulun are the men who handle the pen of the scribe'" (ver. 14; Kalisch, "On Genesis," p. 758). One of these scribes may have been Elon, the single judge produced by the tribe, who is recorded as having held office for ten years (Judg. xii, 11, 12). This combination of warlike spirit with scientific skill seems to be referred to once again in a more extended field of action. The sacred historian mentions that in David's army there were, "Of Zebulun, such as went forth to battle, expert in war, with all instruments of war, fifty thousand, which could keep rank; not of double heart" (1 Chron. xii, 35). They were generous, also, and liberal, as well as brave and loyal; for they contributed abundantly of the rich products of their country—meal, figs, raisins, wine, oil, oxen, and sheep—to the wants of the army (ver. 40). The head of the tribe at this time was Ishmaiah ben-Obediah (xxvii, 19). The "wainscoting" of the road from Damascus to the Mediterranean, traversed a good portion of the territory of Zebulun, and must have brought its people into contact with the merchants and the commodities of Syria, Phoenicia, and Egypt. Its inhabitants, in consequence, took part in sea-faring concerns (Josephus, Ant. i., v. 1, 2). In the document of Ze- bulbun (Fabricius, "Pseudopigraph. V. T. I. in 630-645) great stress is laid on his skill in fishing, and he is commemorated as the first to navigate a skiff on the sea. It is satisfactory to reflect that the very latest mention of the Zebulonites is the account of the visit of a large number of them to Jerusalem of Hezekiah, when, by the enlightened liberality of the king, they were enabled to eat the feast, even though, through long neglect of the provisions of the law, they were not cleansed in the manner prescribed by the ceremonial law (2 Chron. xxx. 10, 11). The tribe of Zebulun, though not mentioned, appears to have shared the fate of the other Northern tribes at the invasion of the country by Tiglath-pileser (2 Kings xxvii, 18, 24 sqq.). From this time the history of distinct tribes ceases. With the exception of the Levites, the whole were amalgamated into one nation; and, on the return from exile, were called Jews. The land of Zebulun, however, occupied a distinguished place in New-Test. times. It formed the chief scene of our Lord's life and labors. Nazareth and Cana were in it; and it embraced a section of the shore of the Sea of Galilee, where so many of the miracles of Christ were performed, and so many of his discourses and parables spoken. Then was fulfilled the prophecy of Isaiah: "The land Zebulun, and the land Naphthali, the way of the sea, beyond Jordan, Galilee of the Gentiles: the people which sat in darkness saw great light; and to them which sat in the region and shadow of death, light is sprung up" (ix, 1, 2; Matt. iv, 13). In the visions of Ezekiel (xlviii, 26-33) and of John (Rev. vii, 8) this tribe finds its due mention. See ISRAEL, KINGDOM OF.

The following is a list of all the Biblical local cities in this tribe, with their probable identifications:

2. A place on the eastern border of the tribe of Asher, between Beth-dagon and the valley of Jiphthah—el (Jos. xix. 27); perhaps the modern Abdin, a village "perched upon a high and sharp hill, on the south side of the wady of the same name" (Robinson, Later Res. p. 103). In this passage the word has usually been regarded as referring to the town by that name, as if Asher's boundary at this point coincided with that of Zebulun, whereas they were identical along the whole line named. See Trim.

Zebulunite (Num. xxxvi. 27). See Zebulonite.

Zechari'ah (Heb. Zekaryahu, יֶצֶרְיָה, remembered of Jehovah; occasionally [1 Chron. v. 7; xv. 18, 24; xxiv. 25; xxvi. 2, 11, 14; xxvii. 21; 2 Chron. xx. 14; xxi. 2; xxvi. 5; xxix. 18; xxxiv. 8] in the prolonged form Zekaryahu, יַעֲרֶשְׁנָה; Sept. N. T., and Josephus, Zaxeapiac), the name of many Hebrews, besides Zacharias (q. v.), the father of John the Baptist.

1. (Sept. Zxeapiac v. r. Zakeapiac). Ninth named of the ten sons of Jehiel, the father or founder of Gibeon (1 Chron. ix. 37). B.C. cir. 1618. In 1 Chron. viii. 81 he is called Zacher (q. v.).

2. Son of Meshelemiah, or Shelemiah, a Korhite, and keeper of the north gate of the tabernacle of the congregation (1 Chron. ix. 21) in the arrangement of the porters in the reign of David. B.C. 1045. In 1 Chron. xxvi. 2, 14, he is described as "one counselling with understanding."

3. A Levite in the Temple band as arranged by David, appointed to play "with psalteries on Alamoth" (1 Chron. xv. 20; comp. xvi. 5). He was of the second order of Levites (xxv. 19), a porter or gate-keeper, and may possibly be the same as the preceding or the following.

4. One of the priests who blew with the trumpets in the procession which accompanied the ark from the house of Obed-edom (1 Chron. xxv. 24). B.C. 1045.

5. Son of Ishiah, or Jesiah, a Kohathite Levite descended from Uzziel (1 Chron. xxiv. 25). B.C. 1043.

8. The son of Benaiah and father of Jahaziel, which last was a Gebirite Levite in the reign of Jehoshaphat (2 Chron. xx. 14). B.C. ante 912.

9. Third named of the five princes of Judah in the reign of Jehoshaphat who were sent with priests and Levites to teach the people the law of Jehovah (2 Chron. xvii. 7). B.C. 910.

10. Fourth named of the seven sons of king Jehoshaphat (2 Chron. xxii. 2). B.C. 887.

11. (Sept. Zazeapiac). Son of the high-priest Jehoiada, in the reign of Joash, king of Judah (2 Chron. xxiv. 20), and therefore the king's cousin. B.C. 888. After the death of Jehoiada, Zechariah probably succeeded to his office, and in attempting to check the reaction in favor of idolatry which immediately followed, he fell a victim to a conspiracy formed against him by the king, and was stoned with stones in the court of the Temple. His dying cry was not that of the first Christian martyr, "Lord, lay not this sin to their charge" (Acts vii. 50), but, "The Lord look upon it, and require it" (2 Chron. xxiv. 20-22). The memory of this unrighteous deed lasted long in Jewish tradition. In the Jerusalem Talmud (Ta'amih, fol. 69, quoted by Lightfoot, Temple Service, ch. xxxvi) there is a legend told of eighty thousand young priests who were slain by Nebuzaradan for the blood of Zechariah, and the evident hold which the story had taken upon the minds of the people renders it probable that "Zacharias son of Barachias," who was slain between the Temple and the altar (Matt. xxiii. 35), is the same with Zechariah, the son of Jehoiada, and that the name of Barachias as his father crept into the text from a marginal gloss, the writer confusing this Zechariah either with Zechariah the prophet, who was the son of Berechiah, or with another Zechariah, the son of Jeberechiah (Isa. viii. 2). See Casteus, De Zechariae Berechiae Filio (Lips. 1720); Huth, Codex Abila et Zachariae (Erlang. 1756): and the Stud. u. Krit. 1841, ii, 678. See ZACHARIAS.

12. A prophet in the reign of Uzziah who appears to have acted as the king's counsellor, but of whom nothing is known (2 Chron. xxxvi. 5). B.C. 807. The chronicle in describing him makes use of a most remarkable and unique expression—"Zechariah, who understood the seeing of God," or, as our A. V. has it, "who had understanding in the visions of God" (comp. Dan. i, 17). As no such term is ever employed elsewhere in the description of any prophet, it has been questioned whether the reading of the received text is the true one. The Sept., Targum, Syriac, Arabic,
In the English version of 2 Kings xxv, 10 we read:

"And Shalum the son of Jabeth conspired against him, and smote him before the people, and slew him, and reigned in his stead." And so the Vulg., "persecutissime cum palam et interfecto." But in the Sept. we find קְשַׁבָּאו (kēšaḇā) instead of the proper name Keshab, and Kehlaam killed Zechariah. The common editions read קְשַׁבָּאוּ (kēšaḇā‘u), meaning that Shalum killed Zechariah in Kehlaam; but no place of such a name is known, and there is nothing in the Hebrew to answer to iv. The words translated before the people, קְשַׁבָּאוּ, palam, are עַל בָּנָי (ēḇā‘i, i.e., "as if the Latin and English translations were correct.

He also observes that in 2 Kings xv, 14, 25, 30, where almost the same expression is used of the deaths of Shalum, Pekahiah, and Pekah, the words before the people are omitted. Hence he accepts the translation in the Latin MS. of the Sept., and considers that Kabelam or קְשַׁבָּאוּ was a fellow-conspirator or rival of Shalum, of whose subsequent fate we have no information. On the death of the Shalum, however, he was made king, but, after reigning in Samaria for a month only, was in his turn dethroned and killed by Menahem. To these events Ewald refers the obsecutive passage in Zech. xi, 8: "Three shepherds also I cut off in one month, and my soul abhorred them"—the three shepherds being Zechahiah, Kabelam, and Shalum. This is very ingenious: we must remember, however, that Ewald, like certain English divines (Mede, Hammond, Newcomen, Secker, Pye Smith), thinks that the latter chapters of the prophecies of Zechahiah belong to an earlier date than the rest of the book. See ZECHARIAH, Book of.

18. A Kohathite Levite in the reign of Josiah, who was one of the overseers of the workmen engaged in the restoration of the Temple (2 Chron. xxxiv, 12). B.C. 628.

19. Second named of the three rulers of the Temple in the reign of Josiah (2 Chron. xxxiv, 8). B.C. 629. He was probably, as Bertheau conjectures, "the second priest" (comp. 2 Kings xxv, 18).

20. Son of Shiloni and father of Jozari among the descendants of Perez (Neh. xi, 5). B.C. long ante 586.

22. Son of Amariah and father of Uzzaiah, of the family of Perez (Neh. xi, 4). B.C. ante 586.

23. The representative of the priestly family of Iddo in the days of Jokiam the son of Jeshua (Neh. xii, 16). B.C. 586. He was possibly the same as Zechahiah the prophet in the son of Iddo.

24. The fourteenth in the order of the twelve minor prophets.

1. Of his personal history we know but little. He is called in his prophecy the son of Berechiah and the grandson of Iddo, whereas in the book of Ezra (v, 14) he is said to have been the son of Haggai. Many attempts have been made to reconcile this discrepancy, Cyril of Alexandria (Pref. Comment. ad Zach.) supposes that Berechiah was the father of Zechahiah according to the flesh, and that Iddo was his instructor, and might be regarded as his spiritual father. Jerome, too, according to some MSS. has in Zech. i, 19 eliahu Baruch filium Addo," as he supposed that Berechiah and Iddo were different names of the same person; and the same mistake occurs in the Sept.: τὸν τοῦ Βαρκελῶν ιδον 'Αδδο. Gesenius (Lex. s. v. 'Addo) and Rosenmuller (On Zach. x, 4) take "the passages in Ezra to mean "grandson," as in Gen. xxix, 5 Laban is termed "the son," i.e., "grandson," of Nahor. Others, again, have suggested that in the text of Ezra no mention is made
of Berechiah, because he was already dead, or because Iddo was the more distinguished person, and the generally recognised head of the family. Knobel thinks that the name of Berechiah has crept into the present text of Zechariah from Isa. viii. 2, where mention is made of the "son of Berechiah," which is the virtually the same name (Sept. Baothiyāw) as Berechiah. His theory is that ch. ix.—x. of our present book of Zechariah are really the work of the older Zechariah (Isa. viii. 2); that a later scribe finding the two books, one bearing the name of Zechariah at the son of Iddo, and the other that of Zechariah the son of Berechiah, united them into one, and at the same time combined the titles of the two, and that hence arose the confusion which at present exists. This, however, is hardly a probable hypothesis. It is surely more natural to suppose, as the prophet himself mentions his father’s name, whereas the historical books of Ezra and Nehemiah mention only Iddo, that Berechiah had died early, and that there was now no intervening link between the grand-father and the grandson. The son, in giving his pedigree, does not omit his father’s name: the historian passes it over, as his tradition, but who was but little known or a ready forgotten. This view is confirmed if we suppose the Iddo here mentioned to have been the Iddo the priest who, in Neh. xii. 4, is said to have returned from Babylon in company with Zerubbabel and Joshua. He is there said to have had a son Zechariah (ver. 10), who was of another generation from Iddo: and this would explain the fall in with the hypothesis that owing to some unexplained cause—perhaps the death of his father—Zechariah became the next representative of the family after his grand-father Iddo. Zechariah, according to this view, like Jeremiah and Ezekiel before him, was priest as well as prophet. He seems to have entered upon his office while yet young (32, Zech. ii. 4; comp. Jer. i. 6), and must have been born in Babylon, whence he returned with the first caravans of exiles under Zerubbabel and Joshua.

It was in the eighth month, in the second year of Darius, that he first publicly discharged his office. B.C. 519. In this he acted in concert with Haggai, who must have been considerably his senior if, as seems not improbable, Haggai had been carried into captivity, and hence had been one of those who had been "the house of Jehovah "in her first glory" (Hagg. ii. 8). Both prophets had the same great object before them; both directed all their energies to the building of the second Temple. Haggai seems to have led the way in this work, and then to have left it chiefly in the hands of Zechariah. The foundations of the new building had already been laid in the time of Cyrus, but during the reigns of Cambyses and the pseudo-Smerdis the work had been broken off through the jealousies of the Samaritans. When, however, Darius Hystaspis ascended the throne (521) things took a more favorable turn. He seems to have been a large-hearted and gracious prince, and to have been well-disposed towards the Jews. Encouraged by the hopes which his accession held out, the prophets exerted themselves to the utmost to secure the completion of the Temple. From this time, for a space of nearly two years, the prophet’s voice was silent, or his words have not been recorded. But in the fourth year of king Darius, in the fourth day of the ninth month, there came a deputation of Jews to the Temple, anxious to know whether the fast-days which had been instituted during the seventy years’ captivity were still to be observed. On the one hand (Isa. v. 10) the captivity was over, and Jerusalem was rising from her ashes, such set times of mourning seemed quite out of place. On the other hand, there was still much ground for serious uneasiness; for some time after their return they had suffered severely from drought and famine (i. 6—11), and who could tell that the same calamity would not again? so the desire of the people towards the Lord was not diminished. The priests and Levites, the elders of the people, and the scribes, and the chief of the fathers, went up to Jerusalem with a mind to the house of the Lord, and to the house of the high priest. They were therefore the especial duty with which he was intrusted, would be the priestly origin of Zechariah. Too often the prophet had had to stand forth in direct antagonism to the priest. In an age when the service of God had stiffened into formalism, and the priests’ lips no longer kept knowledge, the prophet was destined for fitness for the truth, which lay beneath the outward ceremonial, and without which the outward ceremonial was worthless. But the thing to be dreaded now was not superstition formalism, but cold neglect. There was no fear now lest in a gorgeous temple, amid the splendors of an imposing ritual and the smoke of sacrifice ever ascending to heaven, the heart and life of religion should be lost. The fear was all the other way, lest even the body, the outward form and service, should be suffered to decay. The foundations of the Temple had indeed been laid, but that was all (Ezra v. 16). Discouraged by the opposition which they had encountered from the first, the Jew- ish colony had begun to build, and were not able to finish; and even when the letter came from Darius sanctioning the work, and promising its protection, they showed no hearty disposition to engage in it. At such a time no more fitting instrument could be found to rouse the enthusiasm of the community than that one who united to the authority of the prophet the zeal and the traditions of a sacerdotal family. Accordingly, to Zechariah’s influence we find the rebuilding of the Temple in a great measure ascribed. "And the elders of the Jews builded," it is said, "and they prospered through the prophesying of Haggai the prophet and of Zechariah the son of Iddo." (vi. 14). It is remarkable that in this juxtaposition of the two names both are not styled prophets—not "Haggai and Zechariah the prophets," but "Haggai the prophet and Zechariah the son of Iddo." Is it an improbable conjecture that the son of Iddo was dignified by his father’s (or grandfather’s) name, rather than by his office, in order to remind us of his priestly character? Be this as it may, we find other indications of the close union which now subsisted between the priests and the prophets. Various events connected with the building are ascribed directly to the Spirit of the Lord. At last, when the temple was completed, it was dedicated by anointing by the high-priest of the people of the Lord, by the priestly and kingly office, and by the authority of the high priest himself. The temple was consecrated by the high-priest to the Lord, and by the kingship exhibited in its walls. Thus, then, did the work of the prophet continue. And as the prophet and the priest became one in the Temple, so the prophet and the priest continued one in the new building.
prophet are worth nothing. According to these, he exercised his prophetic office in Chaldea, and wrought many miracles there; he returned to Jerusalem at an advanced age, where he discharged the duties of the priesthood, and where he died and was buried by the side of Haggai (Pseudepigraph. De Prop. c. 21; Dorotheus, p. 144; Eusebius, p. 76).}

2. The genuine writings of Zechariah help us but little in our estimation of his character. Some faint traces, however, we may observe in them of his education in Babylon. Less free and independent than he would have been had his feet trodden from childhood the soil

"Where each old poetic mountain
Inspiration breathed around,

He leans approvingly on the authority of the older prophets, and copies their expressions. Jeremiah especially seems to have been his favorite, and hence the Jewish saying that "the spirit of Jeremiah dwelt in Zechariah." But in what may be called the peculiarities of his prophecy he approaches more nearly to Ezekiel and Daniel. Like them, he delights in visions; like them, he uses symbols and allegories rather than the bold figures and metaphors which lend so much force and beauty to the writings of the earlier prophets; like them, he beholds angels ministering before Jehovah and fulfilling his behests on the earth. He is the only one of the prophets who speaks of Satan. That some of these passages are owing to the fact that his education can hardly be doubted. It is at least remarkable that both Ezekiel and Daniel, who must have been influenced by the same associations, should in some of these respects so closely resemble Zechariah, as widely as they differ from him in others.

Even in the form of the visions a careful criticism might perhaps discover some traces of the prophet's early training. Possibly the "valley of myrtles" in the first vision may have been suggested by Chaldaea rather than by Palestine. At any rate, it is a curious fact that myrtles are rarely mentioned in the history of the Jews before the Exile. They are found, besides this passage of Zechariah, in Isa. xii, 19; iv, 13, and in Neh. viii, 15. The forms of trial in the third vision, where Joshua the high-priest is arrayed, seem borrowed from the practice of Persia rather than Jewish courts of law. The filthy garments in which Joshua appears before the congregation of the ancient nation is also a characteristic we have brought to trial. The white robe put upon him is the caftan or robe of honor, which to this day in the East is put upon the minister of state who has been acquitted of the charges laid against him. The vision of the woman in the Ephah is also Oriental in its character. Ephah refers to a very similar vessel. In God's Righteousness, ii, 688. Finally, the chauris issuing from between two mountains of brass must have been suggested, there can scarcely be any doubt, by some Persian symbolism. See Zechariah, Book of.

25. The leader of the one hundred and fifty "sons" of Bathshua who returned with Ezra (Ezra viii, 3). B.C. 459.

27. One of the chiefs of the people whom Ezra summoned in council at the river Alava, before the second caravan returned from Babylon (Ezra viii, 16). B.C. 459. He stood at Ezra's left hand when he expounded the law to the people (Neh. viii, 4).

28. (Sept. Zerubab.) One of the family of Elam, who had married a foreign wife after the Captivity (Ezra x, 26). B.C. 458.

29. One of the priests, son of Jonathan, who blew with the trumpets at the dedication of the city wall by Ezra and Nehemiah (Neh. xii, 35, 41). B.C. 446.

ZECHARIAH, BOOK OF. The time and personal circumstances of the prophet whose name this book bears have been considered above. It remains to discuss the prophecies themselves, and especially their authenticity. Their peculiar character and obscurity of interpretation also call for a somewhat full treatment.

1. Contents.—The book naturally falls into two principal divisions, which, as will be seen more fully in the sequel, are marked not only by certain peculiarities of expression, but obviously by the absence of any historical data in the latter portion such as are given in the former.

(I.) The first part, embracing chs. i—viii, divides itself into three sections by the chronological indications given respectively in 1, 1, 7, and vii, i; and these are still further subdivided by the recurrence of the phrase "the word of the Lord came unto me." This part, therefore, consists, first, of a short introduction or preface, in which the prophet announces his commission; then of a series of visions, descriptive of all those hopes and anticipations of which the building of the Temple was the pledge and sure foundation; and finally of a discourse, delivered two years later, in reply to questions respecting the observance of certain established fasts.

1. The short introductory oracle (1, 1-6) is a warning voice from the past. The prophet solemnly reminds the people, by an appeal to the experience of their fathers, that the glory of God has fallen on the ground; and that therefore, if with sluggish indifference they refused to co-operate in the building of the Temple, they must expect the judgments of God. This warning manifestly rests upon the former warnings of Haggai.

2. In a dream of the night there passed before the eyes of the prophet a series of nine (essentially seven) visions, followed by an emblematic scene, descriptive in their different aspects of events, some of them shortly to come to pass, and others losing themselves in the mist of the future (i, 7-vi, 15). These visions are obscure, and accordingly the prophecies ask their meaning. The interpretation is given, not as to Amos by Jehovah himself, but by an angel who knows the mind and will of Jehovah, who intercedes with him for others, and by whom Jehovah speaks and issues his commands; at one time he is called the angel who spoke with me [or "by me"] (i, 9); at another, "the angel of Jehovah" (ver. 11, 12; iii, 1-6).

(1.) In the first vision (i, 8-17) the prophet sees, in a valley of myrtles, a rider upon a roan horse, accompanied by others who, having been sent forth to the four quarters of the earth, had returned with the tidings that the whole earth was at rest (with reference to Hagga, ii, 20). Hereupon the angel asks how long this state of things shall last, and is assured that the indifferences of the heathen shall cease, and that the Temple shall be built in Jerusalem. This vision seems to have been partly borrowed from Job i, 7, etc.

(2.) The second vision (ii, 1-12, A. V. i, 18-ii, 13) explains how the promise of the first is to be fulfilled, and is composed of three separate emblems. The four horns are the symbols of the different heathen kingdoms in the four quarters of the world, which have hitherto been combined, but not Jerusalem. These four ministers or smitners symbolize their destruction. The measuring-line betokens the vastly extended area of Jerusalem, owing to the rapid increase of the new population. The old prophets, in foretelling the happiness and glory of the times which should succeed the Captivity in Babylon, had made a great part of that happiness and glory to consist in the gathering together again of the whole dispersed nation in the land given to their fathers. This vision was designed to teach that the expectation thus raised — the return of the dispersed of Israel — should be fulfilled; but that Jerusalem should be too large to be compassed by a wall, but that the wall itself would be to her a wall of fire—a light and defence to the holy city, and destruction to her adversaries. A song of joy, in prospect so bright a future, closes the scene.

The next two visions (ch. iii, iv) are occupied with
the Temple, and with the two principal persons on whom the hopes of the returned exiles rested. (5.) The permission granted for the rebuilding of the Temple had, no doubt, stirred afresh the malice and the animosity of the Sanaitans or Persians. What a high-priest had been singled out, it would seem, as the especial object of attack; and perhaps formal accusations had already been laid against him before the Persian court. The prophet, in vision, sees him summoned before a higher tribunal, and solemnly acquitted, despite the charges of the Sanaitans or Persians. This is done with the forms still usual in an Eastern court. The filthy garments in which the accused is expected to stand are taken away, and the caftan or robe of honor is put upon him in token that his innocence has been established. Acquitted at that bar, he need not fear; it is implied, any earthly accuser. He shall be protected, he shall carry on the building of the Temple, he shall so prepare the way for the coming of the Messiah, and upon the foundation-stone laid before him shall the seven eyes of God, the token of his ever-wathchful providence, rest.

The succeeding vision (ch. iv) supposes that all opposition to the building of the Temple shall be removed. This sees the completion of the work. It has evidently a peculiarly impressive character; for the prophet, though his dream still continues, seems to himself to be awakened out of it by the angel who speaks to him. The new temple (v, 7) is to have (or, more properly, chandelier with seven lights, borrowed from the candlestick of the Mosaic tabernacle, Exod. xxx, 8 sq.) supposed to be that the Temple is already finished. The seven pipes which supply each lamp answer to the seven eyes of Jehovah in the preceding vision (iii, 9), and this sevenfold supply of oil denotes the presence and operation of the Divine Spirit, through whose aid Zerubbabel will overcome all obstacles; so that as his hands had laid the foundation of the house, his hands should also finish it (iv, 9). The two olive-branches of the vision, belonging to the olive-tree standing by the candlestick, are Zerubbabel himself and Joshua.

The next two visions (v, 1–11) signify that the land, in which the sanctuary has just been erected, shall be purged of all its pollutions.

(6.) First, the curse is recorded against wickedness in the whole land (not in the whole earth, as in the A. V.), v, 4, 5. It is written (not inscribed), and it may be read upon a roll, and the roll is represented as flying, in order to denote the speed with which the curse will execute itself.

(7.) Next, the unclean thing, whether in the form of idolatry or any other abomination, shall be utterly removed, and set up as the sport of some savage beast, and pressed down with a weight as of lead upon it so that it cannot escape, it shall be carried into that land where all evil things have long made their dwelling (Isa. xxxiv, 13), the land of Babylon (Shinar, Zech. vi, 11), from which Israel had been redeemed. (7.) The night is now waning fast, and the morning is about to dawn (vi, 1–8). Chariots and horses appear, issuing from between two brazen mountains, the horses like those in the first vision; and these receive their several commands and are sent forth to execute the will of Jehovah in the four quarters of the earth. The four chariots are images of the four winds, which, according to Psa. civ, 4, as servants of God, fulfil his behests; and of the one that goes to the north it is particularly said that it shall let the Spirit of Jehovah rest there: is it a spirit of anger against the nations, Assyria, Babylon, Persia, or is it a spirit of hope and desire to gather in the hearts of those of the exiles who still lingered in the land of their captivity? Stähelin, Maurer, and others adopt the former view, which seems to be in accordance with the preceding vision; Ewald gives the latter interpretation, and thinks it is supported by what follows.

Thus the cycle of visions is completed. Scene after scene is unrolled till the whole glowing picture is presented to the eye. All enemies crushed; the land repeopled, and Jerusalem girt as with a wall of fire; the Temple rebuilt, more truly splendid than of old, because the leaders of the people assured in the most signal manner of the Divine protection; all wickedness solemnly sentenced, and the land forever purged of it: such is the magnificent panorama of hope which the prophet displays to his countrymen. Very consolatory must such a prospect have been to the hearts of the disheartened colony in Jerusalem. For the times were dark and troublesome. According to recent interpretations of newly discovered inscriptions, it would appear that Darius I found it no easy task to hold his vast dominions. Province after province had revolted both in the east and in the north, whither, according to the prophecy (vi, 8), the winds had carried the wrath of God: and if the reading Mudraja, i. e. Egypt, is correct (Lassen gives Kurdistan), Egypt must have revolted before the outbreak mentioned in Herod. vii, 1, and have again been reduced to subjection. To such revolt there may possibly be alluded in the reference in the text to the rebellion in the south” (ver. 6). It would seem that Zechariah anticipated, as a consequence of these perpetual insurrections, the weakening and overthrow of the Persian monarchy and the setting-up of the kingdom of God, for which Judah, in faith and obedience, was to wait (ver. 9–10).

(8.) The third vision (vii, 1–10) consists of a symmetrical act (vii, 9–15). Three Israelites had just returned from Babylon, bringing with them rich gifts to Jerusalem, apparently as contributions to the Temple, and had been received in the house of Josiah the son of Zechariah. Thither the prophet is commanded to go—whether still in a dream or not is not very clear—and to employ the silver and the gold of their offerings for the service of Jehovah. He is to make of them two crowns, and to place these on the head of Joshua the high-priest—a sign that in the Messiah who should build the Temple the kingly and priestly offices should be united. This, however, is expressed somewhat enigmatically, as if king and priest should be perfectly at one, rather than that the same person should be both king and priest. These crowns, moreover, were to be a memorial in honor of those by whose liberality they had been made, and should serve at the same time as a reminder of all the kind things done for the kingdom of Jehovah, to the like liberality. Hence their symmetrical purpose having been accomplished, they were to be laid up in the Temple.

3. It is remarkable, as has already been noticed, that the question relating to the fast days (vii, 4–5) should have been put, not merely in a dream, but in the very Temple in which these visions are seen. This close alliance between two classes hitherto so separate, and often so antagonistic, was one of the most hopeful circumstances of the times. Still Zechariah, as chief of the prophets, has the decision of this question. Some of the priests, it is evident (ver. 7), were inclined to the more gloomy view; but not so the prophet. In language worthy of his position and his office, language which reminds us of one of the most striking passages of his great predecessor (Isa. liii, 7–7), he lays down the same principle that God loves mercy rather than fasting, and truth and righteousness rather than sackcloth and a sad contempt. They had perished, he reminds them it was because their hearts were hard while they fasted; if they would dwell safely, they must abstain from fraud and violence, and not from food (Zech. vii, 4–14).

Again, he foresaw that not now in vision, the glorious exiles returning, her Exiles returning, her Temple standing in all its beauty, her land rich in fruitfulness, her people a praise and a blessing in the earth (viii, 1–15). Again, he clearly states that “truth and peace” (ver. 19) are the bul-
zechariah, book of

works of national prosperity. But, once more reverting to the question which had been raised concerning the observance of the fasts, he announces, in obedience to the command of Jehovah, not only that the fasts are abolished, but that the days of weeping from day to day shall henceforth be days of joy, the fasts be counted for festivals. His prophecy concludes with a prediction that Jerusalem shall be the centre of religious worship to all nations of the earth (ver. 16-23).

(II). The remainder of the book consists of two sections of about equal length, ch. xii-xiv, and xlix-lv, each of which has a separate description. They have the general prophetic tone and character, and in subject they far harmonize with i-viii that the prophet seeks to comfort Judah in a season of depression with the hope of a brighter future.

1. In the first section he threatens Damascus and the seas-coast of Palestine with misfortunes; but declares that Jerusalem shall be protected, for Jehovah himself shall encamp about her (where ix, 8 reminds us of ii, 5). Her king shall come to her; he shall speak peace to the heathen, so that all weapons of war shall perish; and his dominion shall be from sea to sea; and the Jew who is still in captivity shall return to their land; they shall be mightier than Javan (or Greece); and Ephraim and Judah once more united shall vanquish all enemies. The land too shall be fruitful as of old (comp. vii, 12). The Teraphim and the false prophets shall not be found, but the Lord execute judgment, and then he will look with favor upon his people and bring back both Judah and Ephraim from their captivity. The possession of Gilad and Lebanon is again promised as the special portion of Ephraim; and both Egypt and Assyria shall be broken and humbled.

The prophecy now takes a sudden turn. An enemy is seen approaching from the north, who, having forced the narrow passes of Lebanon, the great bulwark of the northern frontier, carries desolation into the country beyond. Hereupon the prophet receives a commission from God to feed his flock, which God himself will no more feed because of their divisions. The prophet undertakes the office, and makes to himself two staves (naming the one Favor and the other Union), in order to tend the flock, and cuts off several evil shepherds whom his soul abhors; but observes, at the same time, that the scions shall be obedient. Hence he withdraws up his office; he breaks asunder the one crook in token that the covenant of God with Israel was dissolved. A few, the poor of the flock, acknowledged God's hand herein; and the prophet, demanding the wages of his service, receives thirty pieces of silver, andcasts it into the bosom of the house ofiah. At the same time, he sees that there is no hope of union between Judah and Israel, whom he had trusted to feed as one flock, and therefore cuts in pieces the other crook, in token that the brotherhood between them is dissolved.

2. The second section (ch. xii-xiv) is entitled "The burden of the word of Jehovah for Israel." But Israel is here used of the nation at large, not of Israel as distinct from Judah. Indeed, the prophecy which follows concerns Judah and Jerusalem. In this the prophet beholds the near approach of troublous times, when Jerusalem should be hard pressed by enemies. But in that day Jehovah shall come to save them: "the house of David shall be as God, as the angel of Jehovah (xii, 8), and all the nations which gather themselves against Jerusalem shall be destroyed. At the same time, the deliverance shall not be from outward enemies alone. God will pour out upon them a spirit of grace and supplications; and they shall bewail with a mourning greater than that with which they bewailed the beloved Josiah in the valley of Megiddo. So and so true shall be this repentance, so lively the aversion to all evil, that neither idol nor false prophet shall again be seen in the land. If a man shall pretend to prophesy, his father and his mother that begat him shall thrust him through when he prophesieoth," fired by the same righteous indignation as Phinehas was when he slew those who wrought folly in Israel (xii, 1-36).

Then follows a short apostrophe to the sword of the enemy to turn against the shepherds of the people; and a further announcement of searching and purifying judgments; which, however, it must be acknowledged, is somewhat abrupt. Ewald's suggestion that the passage xiii, 7-9 is here out of place, and should be transposed to the end of xii, is certainly ingenious, and does not seem improbable.

The prophecy closes with a grand and stirring picture. All nations are gathered together against Jerusalem, and seem already sure of their prey. Half of their cruel work has been accomplished, when Jehovah himself appears to the army of heaven, a mighty earthquake beaves the ground, and even the natural succession of day and night is broken. He goes forth to war against the adversaries of his people. He establishes his kingdom over all the earth, and Jerusalem is safely inhabited, and becomes rich with the spoils of the nations. All nations that are still left shall come up to Jerusalem, as the great centre of religious worship, there to worship "the King, Jehovah of hosts," and the city from that day forward shall be a holy city.

III. Zechariah's prophecies added a lift to call this in question. The probability that the later chapters (from the 9th to the 14th) were by some other prophet seems first to have been suggested to him by the citation in Matthew. He says (Ephes. xxxi):

"It may seem the evangelist would inform us that those latter chapters were spoken to Zerubbabel (or Zechariah) out of Zechariah (or Zerubbabel, etc.) are indeed the prophecies of Jeremy, and that the Jews had not rightly attributed them... Certainly, if a man were as weighty as some of them, it is in all likelihood be of an elder date than the time of Zechariah—namely, before the Captivity—for the subjects of some of them were scarce in being after that time. And the chapter out of which St Matthew quotes may seem to have somewhat much unanswerable with Zechariah's time; as, a prophecy of the destruction of the Temple, then when he was to encourage them to build it. And how doth the sixth verse of the chapter in the text? There is no scripture salut they are Zechariah's; but there is scripture salut they are Jeremy's, as this of the evangeliul.

He then observes that the mere fact of those being found in the same book as the prophecies of Zechariah does not prove that they were his; difference of authorship being allowable in the same way as in the collection of Agur's Proverbs under one title with those of Solomon, and of Psalms by other authors with those of David. Even the absence of a fresh title is, he argues, no evidence against a change of author. "The author wrote in rolls or volumes, and the title was but once. If any were added to the roll, ob similitudinem argumenti, or for some other reason, it had a new title, as that of Agur; or perhaps none, but was divinus."

The utter disregard of anything like chronological order in the prophetic books is, when once the true authorship is recognized, with Zechariah; then we are brought back to Jehoiakim, then to Zedekiah again—makes it probable, he thinks, that they were only hastily and loosely put together in those distracted times. Consequently, some of them might not have been discovered till after the return from the Captivity, when, under the guidance of Zechariah, and so came to be incorporated with his prophecies. Mede evidently rests his opinion, partly on the authority of Matthew, and partly on the contents of the later chapters, which he considers require a date earlier than the Exile. He says again (Ephes. xi):

"That which moveth me more than the rest is in ch. xii, which contains the prophecy of the destruction of Jerusalem, and a description of the wickedness of the inhabitants, for which judgment I have no more pity on them. It is expounded of the destruction by Titus; but methinks such a prophecy was nothing seasonable for Zechariah's time (when the city yet,
for a great part, lay in her ruins, and the Temple had not yet recovered hers), nor agreeable to the scope of Zechariah, and, as I have already observed, together with his companions Haggai, Zechariah, and Malachi, was sent to encourage the people lately returned from the captivity, in order to animate them in the extension of their commonwealth. Was this a fit time to forestall the destruction of both, while they were but yet a-building, and completing their houses? Was not this better left to Nebuchadnezzar?"

Archbishop Newcome went further. He insisted on the great dissimilarity of style as well as subject between the earlier and later chapters. And he was the first who advocated the theory which Bunsen calls one of the most curious and modern criticisms, that the last six chapters of Zechariah are the work of two distinct prophets. His words are:

"The eight first chapters appear by the introductory parts to be the prophecies of Zechariah, stand in connection with each other, and were delivered at the time when they were written, uniform in style and manner, and constitute a regular whole. But the six last chapters are not expressly assigned to Zechariah; they are unconnected with those which precede; the three first of them are unsuitable in many parts to the time when Zechariah lived; all of them have a more adorned and poetical turn of composition than the eight first chapters; and they manifestly break the unity of the prophetic book. . . . I conclude, therefore, that chs. ix. to xiv. have for a time been written before chs. i. to viii. Three chapters were written much earlier than the time of Jeremiah and Daniel. . . . There are three principal divisions of the prophecy mentioned in i. 1, 14 (but that this argument is inconclusive, see Mal. ii. 11); Ephraim ix. 10, 18; x. 7; and Amos viii. 12, 13, 15 (even if the last is of their own time and manner. . . . The 12th, 13th, and 14th chapters form a distinct prophecy, and were written after the captivity, and before the restoration, though we are not certain whether for Caesar or for the captivity, and by what prophets, is uncertain, though I incline to think the author lived before the destruction of Jerusalem by the Babylonians."

In proof of this he refers to xiii. 2, on which he observes that the "prediction that idols and false prophets should cease at the final restoration of the Jews seems to have been uttered when idolatry and groundless pretensions to the spirit of prophecy were common among the Jews, and therefore before the Babylonian Captivity."

A large portion of critics have adhered to the view of Bishop Newcome in denying the later date of the last six chapters of the book. In England, bishop Kidd, Whiston, Hammond, and more recently Pye Smith and Davidson; in Germany, Fliggte, Eichhorn, Bauer, Bertholdt, Augusti, Forberg, Rosenmuller, Gramberg, Credner, etc., agree in assigning these chapters to a later period than the former. All agree in maintaining that these last chapters are not the work of Zechariah the son of Iddo.

On the other hand, the later date of these chapters has been maintained among British writers, by Blayney and Henderson, and on the Continent by Carpzov, Beckhoff, and Keil. Rosenmuller, Knobel, Hitzig and Bleek, are agreed in maintaining that these last chapters are the work of Zechariah the son of Iddo.

Those who impugn the later date of these chapters of Zechariah rest their arguments on the change in style and subject after the 6th chapter, but differ much in the application of their criticism. Rosenmuller, for instance (Schol. in Prop. Min. iv. 257), argues that ch. ix.-xiv. are so alike in style that they must have been written by one author. He alleges in proof his fondness for images taken from pastoral life (ix. 16, x. 2, 3; xi. 3, 4, 5, 7, 8, 9, 11, 15, 17; xiii. 7, 8). From the allusion to the exodus (xii. 5; comp. Amos i. 1), he thinks the author must have lived in the reign of Uzziah. Davidsson (in Horne's Introd. ii. 982) in like manner declares for one author, but supposes him to have been Zechariah mentioned in Isa. vii. 2, who lived in the reign of Ahaz. Eichhorn, on the other hand, while also assigning chs. ix.-xiv. to one writer, is of opinion that they are the work of a later prophet who flourished in the time of Alexander. Others again, as Bertholdt, Gesenius, Knobel, Maurer, Bunsen, and Ewald, think that ch. ix.-xi. (to which Ewald adds xii. 7-9) are distinct prophecies from ch. xiii.-xiv., and assign them to different intervals of time. These critics conclude from internal evidence that the former portion was written by a prophet who lived in the reign of Ahaz (Knobel gives ix. 7 and x. 2 to the reign of Jehoash), and that of xi.-xiii. to that of Jeroboam. But, contrary to this conjuncture that he was the Zechariah the son of Jehozadak, this name is not mentioned in Isa. vii. 2. Ewald, without attempting to identify the prophet with any particular person, contented himself with remarking that he was a subject of the Southern kingdom (as may be inferred from expressions such as that in ix. 7, and from the Messianic hopes which he utters, and in which he resembles his countryman and contemporary Isaiah); and that, like Amos and Hosea before him, though a native of Judah, he directed his prophecies against Ephraim. There is the same general agreement among the last-named critics as in the case of the section following, viz. to sign it to a period immediately previous to the Babylonian Captivity, and hence the author must have been contemporary with the prophet Jeremiah. Bunsen identifies him with Urijah, the son of Shemariah of Kirjath-jearim (Jer. xxvi. 20-23), who prophesied "in the name of Jehovah" against Judah and Jerusalem.

According to this hypothesis, we have the works of three different prophets collected into one book, and passing under one name: (a) Ch. ix.-xi. the book of Zechariah i., a contemporary of Isaiah, under Ahaz, about 736; (b) ch. xii.-xiv. author unknown (or perhaps Urijah, a contemporary of Shemariah); (c) ch. i.-viii. the work of the son (or grandson) of Iddo, Haggai's contemporary, about 520-518. We have then, two distinct theories before us. The one merely affirms that the last six chapters of our present book are not from the same author as the first eight. The other carries the dismemberment of the book still further, and maintains that the last six chapters are the work of two distinct authors who lived at two distinct periods of Jewish history. The arguments advanced by the supporters of each theory rest on the same grounds. They are drawn partly from the difference in style, and partly from the difference in the nature of the contents. But without admitting so sweeping a criticism, and one which the verdict of able critics on the former portion has contradicted, there can be no doubt that the general tone and character of the one section are in decided contrast with those of the other. The scenes of the first half of the prophet to the second," says Eichhorn, "no reader can fail to perceive how strikingly different are the impressions which are made upon him by the two. The manner of writing in the second portion is far loftier and more mysterious; the images employed are grander and more magnificent; the point of view and the horizon are changed. Once the Temple and the ordinances of religion formed the central point from which the prophet's words radiated, and to which they ever returned; now these have vanished. The favorite modes of expression, hitherto so often repeated, are now, as it were, forgotten. Instead of what, for a time, so fore-marked the day on which each several prophecy was uttered now fall us altogether. Could a writer all at once have forgotten so entirely his habits of thought? Could he so completely disguise his innermost feelings? Could the world about him, the mode of expression, the images employed, the language, be the same as in the case of one and the same writer?" (Eins. iv. 443, § 608).
(L) Ch. i–viii are marked by certain peculiarities of diction and phraseology which do not occur afterwards. Favorite expressions are: "The word of Jehovah came unto," etc. (i, 7; iv, 8; vii; vii, 1; iv, 3, 18; viii, 1, 18) "Thus saith Jehovah (Goel) of hosts" (i, 4, 16; 17; ii, 11; vii, 2, 3, 4, 14, 20, 25). "And I lifted up mine eyes and saw," etc. (i, 1; vi, 1). These and other modes of expression are to be met with in ch. ix–xiv. On the other hand, the phrase "In that day" is entirely confined to the later chapters, in which it occurs frequently. The form of the inscriptions is different. Introductions to the separate oracles, such as those in ix, 21; 10, 1; 11, 1; 12, 1; 13, 1, are present. The material of these various portions of the book never does this. It has also been observed that after the first eight chapters we hear nothing of "Satan," or of "the seven eyes of Jehovah;" that there are no more visions; that ch. x contains no allegory, not a symbolic action; that there are no riddles which need to be solved, no angels interposing to solve them. 

(II) Ch. xi–x. These chapters, it is alleged, have also their characteristic peculiarities: 1. In point of style, the author resembles Hosea more than any other prophet; such is the verdict both of Knobel and Ewald. 2. He speaks and acts as the prophet of his people. 3. Jehovah comes to Zion, and pitches his camp there to protect her (ix, 8–9). He blows the trumpet, marches against his enemies, makes his people his bow, and shoots his arrows (ver. 13, 14); or he rides on Judah as his war-horse, and gallops through the nations (ver. 11, 12). He speaks in the person of the people as a flock, and the leaders of the people as their shepherds (ix, 16; x, 2, 8, 3, x, 4 sq.). He describes himself also, in his character of prophet, as a shepherd in the last passages, and assumes to himself, in a symbolic action (which, however, may have been one only of the imagination), all the guise and the gear of a shepherd. In general he delights in images (ix, 3, 4, 13–17; x, 3, 5, 7, etc.), some of which are striking and forcible.

2. The notes of time are also peculiar: (1.) It was a time when the pride of Assyria was yet at its height (ch. x, 11); and when the Jews had already suffered from it. This first took place in the time of Menahem (II Chr. 722–761). (2.) The Transjordanian territory had already been swept by the armies of the invader (x, 10), and a still further desolation threatened it (x, 1–8). The first may have been the invasion of Palt (1 Chron. v, 20), the second that of Tiglath-pileser. (3.) The kings of Judah and Ephraim are both standing (ix, 10, 18; x, 6), but many Israelites are nevertheless exiles in Egypt and Assyria (ix, 11; x, 6, 8, 10, etc.). (4.) The struggle between Judah and Israel is supposed to be already begun (x, 14). At the same time, Damascus is threatened (ix, 1). If so, the reference must be to the alliance formed between Pekah king of Israel and Rezin of Damascus, the consequence of which was the loss of Elath (739). (5.) Egypt and Assyria are both formidable powers (x, 9, 10, 11). The only other prophets to whom these two nations appear as formidable, at the same time, are Hosea (vii, 11; xii, 1; xiv, 8) and his contemporary Isaiah (vii, 17, etc.); and that in prophecies which must have been uttered between 748 and 746. The expectation seems to have been that the Assyrians, in order to subdue Egypt, would march by way of Philistia, and Philistia, along the coast (Zech. ix, 1–9), as they did afterwards (Isa. xx, 1), and that the kingdom of Israel would suffer chiefly in consequence (Zech. ix, 9–12), and Judah in a smaller degree (ver. 8, 9). (6.) The kingdom of Israel is described as "a flock for the slaughter" in ch. xi, over which three shepherds have been set in one month. This corresponds with the season of anarchy and confusion which followed immediately on the murder of Zerubbabel the son of Jerobelam II (750). This son reigned only six months, his murderer Shallum but one (2 Kings xv, 8–12), being put to death in his turn by Menahem. Meanwhile another rival king may have arisen, Buneem thinks, in some other part of the country, who may have fallen as the murderer did, before Menahem. (7.) The symbolical action of the breaking of the two shepherd's staves—Favor and Union—points the same way. It represents the division of tribute of which favor had departed from Israel, that of the second that all hope of union between Judah and Ephraim was at an end.

All these notes of time, it is claimed, point in the same direction, and make it probable that the author of ch. xi–x was a contemporary of Isaiah, and prophesied during the reign of Ahaz. According to Knobel, ch. ix and x were probably delivered in Jotham's reign, and ch. xi in that of Ahaz, whom summoned Tiglath-pileser to his aid. Maurer thinks that ch. ix and x were written between the first (2 Kings xv, 29) and second (2 Kings xvii, 4–6) Assyrian invasions, ch. x during the seven years' interregnum which followed the death of Pekah, and xi in the reign of Hoshea. (III) Ch. xii–xiv. By the majority of those critics who assign these chapters to a third author, that author is supposed to have lived shortly before the Babylonian captivity. The ground for this view is that these three chapters from ch. ix to xii are as follows: 1. This section opens with its own introductory formula, as the preceding one (ix, 1) does. This, however, only shows that the sections are distinct, not that they are separate scribes. 2. The object of the two sections is altogether different. The author of the former (ch. ix–x) has both Israel and Judah before him; he often speaks of them together (ix, 13; x, 6; xi, 14; comp. x, 7); he directs his prophecy to the Transjordanian territory, and announces the destruction of his office in Israel (x, 9, 14). The author of the second section, on the other hand, has only to do with Judah and Jerusalem: he nowhere mentions Israel.

3. The political horizon of the two prophets is different. By the former, mention is made of the Syrians, Assyrians, Egyptians, Philistines (ix, 1–7), and Greeks (ver. 18), as well as of the Assyrians and Egyptians, the last two being described as at that time the most powerful. It therefore belongs to the earlier time when these two nations were beginning to struggle for supremacy in Western Asia. By the latter, the Egyptians only are mentioned as a hostile nation: not a word is said of the Assyrians. The author consequently must have lived at a time when Egypt was the chief enemy of Judah.

4. The anticipations of the two prophets are different. The former trembles only for Ephraim. He predicts the desolation of the Transjordanian territory, the carrying away of the Israelites, the return from Assyria and Egypt (x, 7, 10). But for Judah he has no cause of fear. Jehovah will protect her (ix, 8), and bring back those of her sons who in earlier times had gone into captivity (ver. 11). The second prophet, on the other hand, making no mention whatever of the northern kingdom, is filled with alarm at different times. He sees hostile nations gathering together against her, and two thirds of her inhabitants destroyed (xiii, 6); he sees the enemy laying siege to Jerusalem, taking and plundering it, and carrying half of her people captive (xii, 3, 4, 5). Of any return of the captives nothing is here said.

5. The style of the two prophets is different. The author of this last section is fond of the prophetical formula: וְיֵלָדָה, "And it shall come to pass" (xii, 9, xiii, 2, 4, 8, 14, xiv, 6, 8, 18, 16); וְיֵלָדָה, "in that day"
ZECHARIAH, BOOK OF

(xiii, 3, 4, 6, 8, 9, 11; xiii, 1, 2, 4; xiv, 8, 9, 13, 20, 21); in the section ix–xi the first does not occur at all, the second but once (ix, 16), the third only twice (x, 12; xi, 6). We have, moreover, in this section certain favorite expressions: "all peoples," "all people of the earth," "all nations round about," "all nations that come up against Jerusalem," "the inhabitants of Jerusalem," "the house of David," "family" for nation, "the families of the earth," "the family of Egypt," etc.

6. There are apparently few notes of time in this section. One is the allusion to the death of Josiah in "the mourning of Hadad-rimmon in the valley of Megiddo." Another to the earthquake in the days of Uzziah. This, besides, shows the influence of the king shows. Knobel suggests, that he had been long dead; but the argument, if it is worth anything, would make even more for those who hold a post-exilic date. It is certainly remarkable, occurring thus in the body of the prophecy, and not in the inscription as in Isa. i, 1.

(B.) Arguments in Favor of the Integrity of the Book.

—I. As between ch. i–viii and ix–xiv. In reply to all the foregoing arguments, it has been urged by Keil, Stähelin, and others that the difference of style between the two principal divisions of the prophecy is not great enough to allow it to be acknowledged as the change of subject. The language in which visions are narrated would, from the nature of the case, be quieter and less animated than that in which prophetic anticipations of future glory are described. They differ as the style of the narrator differs from that of the orator. Thus, for instance, how different is the style of Hosea, ch. i–iii, from the style of the same prophet in ch. iv–xiv! or, again, that of Ezekiel vi, vii, from Ezekiel iv! But, besides this, even in what may be termed the more oratorical portions of the first eight chapters, the prophet is to a great extent occupied with warnings and exhortations of a practical kind (see i, 4–6; vii, 4–14; viii, 9–23); whereas in the subsequent chapters he is rapt into a far-distant and glorious future. In the one case, therefore, the language would naturally sink down to the level of prose; in the other, it would rise to an elevation worthy of its exalted subject.

In like manner, the notes of time in the former part (i, 1, 7; vii, 1) and the constant reference to the Temple may be explained on the ground that the prophet here busies himself with the events of his own time, whereas afterwards his eye is fixed on a far-distant future. On the other hand, where predictions do occur in the first eight chapters, they are generally similar to those in them and the predictions of the second. The scene, so to speak, is the same; the same visions float before the eyes of the seer. The times of the Messiah are the theme of the predictions in ch. i–iv, in ix, x, and in xii–xiii; 6, while the events which are to prepare the way for that time, and especially the siting of the nation, are dwelt upon in ch. v, vi, and in xiii, xiv–xiv, 2. The same peculiar forms of expression occur in the two divisions of the prophecy. Thus, for instance, we find בֵּית יִשָּׂרָאֵל not only in v, 14, but also in ix, 8; יִשָּׂרָאֵל, in the sense of "to remove," in iii, 4, and in xii, 2—elsewhere it occurs in this unusual sense only in later writings (2 Kings xvi, 3; 2 Chron. xv, 8)—"the eye of God," as betokening the divine providence, in iii, 9; iv, 10; and in ix, 1, 8.

In both sections the return of the whole nation after the Exile is the prevailing image of happiness, and in both it is similarly portrayed. As in ii, 10, the exiles are summoned to return to their native land, because now, according to the principles of righteous recompense, they shall rule over their enemies, so also a similar strain occurs in ix, 12, etc. Both in ii, 10 and in ix, 9 the renewed protection whereof God will favor Zion is represented as an entrance into his holy dwell-

Again, similar forms of expression occur in ii, 9, 11, and xi, 11; the description of the increase in Jerusalem, xiv, 10, may be compared with ii, 4; and the prediction in viii, 20–28 with that in xiv, 16. The resemblance which has been found in some other passages is too slight to strengthen the argument; and the occurrence of Chaldaeans, such as הַמְּגַדְּלִים (ix, 8), הַמְּגַדְּלִים (xv, 10), וּמָטַת (which occurs besides only in Prov. xx, 21), and the phrase הִנֵּה (ix, 10), instead of הִנֵּה, really prove nothing as to the age of the later chapters of Zechariah. Indeed, generally, as regards these minute comparisons of different passages to prove an identity of authorship, Maurer's remark holds true: "See que potestis esse disjectorum quorumdam locorum, ubi res judicandae est ex toto?"

2. Of far more weight, however, than the arguments already given in favor of the integrity of the last chapters (ix–xiv) shows an acquaintance with the later prophets of the time of the Exile. That there are numerous allusions in it to earlier prophets, such as Joel, Amos, Micah, has been shown by Hitzig (Comment. p. 504, 2d ed.); but there are also, it is alleged, allusions to Zephaniah, Hosea, Micah, Ezekiel, and Isaiah (ch. xi, 6). If this can be established, it is evident that this portion of the book, if not written by Zechariah himself, was at least written after the Exile.

We find, then, in Zech. ix, 2 an allusion to Ezek. xxviii, 3: in ver. 5 to 1 Kings x, 27; in ver. 5 to Zeph. ii, 4; in ver. 6 to Isa. li, 14; in ver. 8 to Isa. xli, 3; 9 to Jer. iii, 4; in ver. 10 to Ezek. xxxvii, 15, 17; in ver. 10, 11, to Jer. xxxi, 36–40; in ver. 16–19 to Isa. lxvi, 23 and lx, 12; ver. 20, 21, to Ezek. xliii, 12 and xiv, 9.

This manifest acquaintance on the part of the writer of Zech. ix–xiv with so many of the later prophets seemed so convincing to De Wette that, after having in the first three editions of his Introduction declared for two authors, he found himself compelled to change his mind, and admitted that the last part of the book belongs long to the age of Zechariah, and might have been written by Zechariah himself.

Bleich, on the other hand, has done his best to weaken the force of this argument, first by maintaining that in most instances the alleged agreement is only apparent, and, next, that where there is a real agreement (as between Zech. ix, 12; x, 3; xii, 1; xiv, 16) with the passages above cited, Zechariah may be the original from whom Isaiah and Jeremiah borrowed. It must be confessed, however, that it is more probable that one writer should have allusions to many others than that many others should have one. In view of this, and in view of the approach to certainty in proportion as we multiply the number of quotations or allusions. If there are passages in Zechariah which manifestly make reference to other passages in Zephaniah, in Jeremiah, Ezekiel, and the Deuteronomistic Style, which is the more probable, that they all borrowed from him, or he from them? In x, 12 especially, as Stähelin argues, the expression is decidedly one to be looked for after the Exile rather than before it: and the passage rests upon Jer. xvi, 18, and has an almost verbal accordance with Isa. lxi, 7.

3. Again, the same critics argue that the "historical references" are not genuine, because they are perfectly consistent with a post-exilic date. This had already been maintained by Eichhorn, although he supposes these chapters to have been written by a later prophet than Zechariah. Stähelin puts the case as follows: Even under the Persian rule the political relations of the Jews co-

Digitized by Google
tinued very nearly the same as they were in earlier times. They still were placed between a huge Eastern power on the one side, and Egypt on the other, the only difference now being that Egypt as well as Judaea was subjugated. In all these circumstances, therefore, the Persians would be on the watch to check such efforts, and would wreak their vengeance on those among her own tributary or dependent provinces which should venture to form an alliance with Egypt. Such of these provinces as lay on the sea-coast must indeed suffer in any case, even if they remained true in their allegiance to the Persians. The armies which were destined for the invasion of Egypt would collect in Syria and Phoenicia, and would march by way of the coast; and, whether they came as friends or as foes, they would probably cause sufficient devastation to justify the prophecy in Zech. ix., 1, et seq., delivered against Damascus, Phoenicia, and Philistia. Meanwhile the prophet seeks to calm the minds of his own people by assuring them of God’s protection, and of the coming of the Messiah, who, at the appointed time, shall again unite the two kingdoms of Judah and Ephraim. It is observable, moreover, that in his description of his disappearance, the prophet not only to tranquillize the minds of his countrymen, but to prevent their engaging in any insurrection against their Persian masters, or forming any alliance with their enemies. In this respect he follows the example of Jeremiah and Ezekiel, and, like these two prophets, he foretells the return of Ephraim, the union of Ephraim and Judah, and the final overthrow both of Assyria (x, 11)—that is, Persia—and of Egypt, the two countries which had, more than all others, vexed and devastated Israel. That a large portion of the nation was still supposed to be in exile is clear from ix., 11, 12; and hence ver. 10 can only be regarded as a reminiscence of Mic. v., 10; and even if x, 9 must be explained of the past (with De Wette, Einl. § 250, 6, note 4), still it appears from Josephus (Ant. xii., 2, 6) that the Persians carried away Jews into Egypt, and from Simeon (p. 486, Niebuhr’s ed.) that Ochan translated to Egypt Jews from the territory of the east and north: the earlier custom of thus forcibly removing to a distance those conquered nations who, from dissatisfaction or a turbulent spirit, were likely to give occasion for alarm, having not only continued among the Persians, but having become even more common than ever before, and better known, the policy on the part of their conquerors would be a sufficient ground for the assurance which the prophet gives in x, 9. Even the threats uttered against the false prophets and the shepherds of the people are not inconsistent with the times after the Exile. In Neh. v. and vi, we find the nobles and rulers of the people oppressing their brethren, and false prophets active in their opposition. In Nehemiah’s time, the idols (יִכְרְסֹנָה) in xiii., 1-5 may be the same as the ‘Teraphim’ of x, 2, where they are mentioned in connection with the ‘diviners’ (יִכְרְסֹנָה). Malachi (iii., 5) speaks of ‘sorcerers’ (יִכְרְסֹנָה), and that such superstition long held its ground among the Jews is evident from Josephus (Ant. vii., 2, 5). Nor does xiv., 21 of necessity imply either idol-worship or heathen pollution in the Temple. Ch. xi. was spoken by the prophet later than ch. ix. and x. In ver. 14 he declares the impossibility of any reunion between Judah and Ephraim, either because the northern territory had already been laid waste, or because the inhabitants of it had shown a disposition to league with Phoenicia in a vain effort to throw off the Persian yoke, which would only involve them in certain destruction. This difficult passage Stähelin admits he cannot solve to his satisfaction, but contends that it may have been designed to teach the new colony that it was not a part of God’s purpose that the two tribes should meet in this; he sees an argument for the post-exilic date of the prophecy, inseparable from the union of the ten tribes with the two was ever one of the brightest hopes of the prophets who lived before the Captivity.

Having thus shown that there is no reason why the section in Zech. ix. should not have come to a time subsequent to the return from Babylon, Stähelin proceeds to argue that the prophecy directed against the nations (ix., 1-7) is really more applicable to the Persian era than to any other. It is only the coast-line which is here threatened; whereas the earlier prophets, whenever they threaten the maritime tribes, unite with them Jash and Ammon, or Edom. Moreover, the nations here mentioned are not spoken of as enemies of Judah; for being Persian subjects they would not venture to attack the Jewish colony when under the special protection of that power. Of Ashdod it is said that a foreigner (יְפֹּרָ же, A. V. ‘a bastard’) shall dwell in it. This, too, might naturally have happened in the time of Zechariah. During the Exile, Arabia had established themselves in Southern Palestine, and the prophet foresees that they would occupy Ashdod; and, accordingly, we learn from ver. 14 that to the Jews it was unintelligible to the Jews, and in iv, 7 the people of Ashdod appear as a distinct tribe united with other Arameans against Judah. The king of Gaza (mentioned in Zech. ix., 5) may have been a Persian vassal, as the kings of Tyre and Sidon were, according to Herod. viii., 67. A king of Gaza would only be in conformity with the Persian custom (see Herod. iii., 15), although this was no longer the case in the time of Alexander. The mention of the ‘sons of Javan’ (ix., 13; A. V. ‘Greece’) is suitable to the Persian period (which is also the view of Eichhorn), as it was then that the Jews were first brought into any close contact with the Greeks. It was, in fact, the fierce struggle between Greece and Persia which gave a peculiar meaning to his words when the prophet promised his own people victory over the Greeks, and so reversed the earlier prediction of Joel iv., 6, 7 (A. V. iii., 6, 7). If, however, we are to regard the prophecy as symbolical, then this again equally suits the period supposed, and the prophecy will refer to the Arabians, of whom we have already spoken.

(II) We come now to the section xii., xiv. The main proposition here is, that however hard Judah and Jerusalem were pressed by the known policy, their policy on the part of their conquerors would be a sufficient ground for the assurance which the prophet gives in x, 9. Even the threats uttered against the false prophets and the shepherds of the people are not inconsistent with the times after the Exile. In Neh. v. and vi, we find the nobles and rulers of the people oppressing their brethren, and false prophets active in their opposition. In Nehemiah’s time, the idols (יִכְרְסֹנָה) in xiii., 1-5 may be the same as the ‘Teraphim’ of x, 2, where they are mentioned in connection with the ‘diviners’ (יִכְרְסֹנָה). Malachi (iii., 5) speaks of ‘sorcerers’ (יִכְרְסֹנָה), and that such superstition long held its ground among the Jews is evident from Josephus (Ant. vii., 2, 5). Nor does xiv., 21 of necessity imply either idol-worship or heathen pollution in the Temple. Ch. xi. was spoken by the prophet later than ch. ix. and x. In ver. 14 he declares the impossibility of any reunion between Judah and Ephraim, either because the northern territory had already been laid waste, or because the inhabitants of it had shown a disposition to league with Phoenicia in a vain effort to throw off the Persian yoke, which would
Phoön. Alérth. i, 581, together with the tribe of Levi; the prophet, like the writer of Ps. lxxxix, looking to it with a kind of yearning, which before the Exile, while there was still a king, would have been inconceivable. Again, the manner in which Egypt is alluded to (xiv, 19, 24) and the very words of the prophet, are descriptive of their time; yet, for then Egypt, in consequence of her perpetual efforts to throw off the Persian yoke, was naturally brought into hostility with the Jews, who were under the protection of Persia. Before the Exile this was only the case during the interval between the death of Josiah and the beginning of the Exile. Here, there is no mention of that; but, there, it is quite clear, that there is nothing to compel us to place this section xii-xiv in the times before the Exile; much, on the contrary, which can only be satisfactorily accounted for on the supposition that it was written during the period of the Persian dominion. Nor must it be forgotten that we have here that fuller development of the Messianic idea which at such a time might be expected, and one which, in fact, rests upon the prophets who flourished before the Exile.

Such are the grounds, critical and historical, on which Stähelin rests his defence of the later date of the second portion of Zechariah, given above. Of his arguments at length as the ablest and most complete, as well as the most recent, on his side of the controversy.

Some of them, it must be admitted, are full of weight. When critics like Eichhorn maintain that of the whole section ix, 1-x, 17, no explanation is possible, unless we do not understand the name of Alexander the Great; and when De Wette, after having adopted the theory of different authors, felt himself obliged to abandon it for reasons already mentioned, and to vindicate the integrity of the book, the grounds for a post-exile date must be very strong. Indeed, it is not easy to say which would be the case in the present discussion.

(Cc) With regard to the quotation in Matthew (xxvii, 9, 10; comp. Zech. xi, 12, 13) there seems no good reason for setting aside the received reading. Jerome observes (Comment. in Evang. Matth. xxvii, 9, 10), "This passage is not found in Jeremiah. But in Zechariah, who is nearly the last of the twelve prophets, something like it occurs; and though there is no great difference in the meaning, yet both the form and the words are different. I read a short time since, in a Hebrew volume, which a Hebrew of the sect of the Nazarenes presented to me, an apocryphal book of Jeremiah, in which I found the form for the word. I am inclined to think that the quotation is made from Zechariah. But the cause of the omission and apocryphies, who, neglecting the order of the words, only give the general sense of what they cite from the Old Test." Eusebius (Evangel. Demonstr. lib. x) is of opinion that the passage thus quoted stood originally in the prophecy of Jeremiah, but was either erased subsequently by the maisters of the Jews [a very improbable supposition, it need hardly be said], or that the name of Zechariah was substituted for that of Jeremiah through the carelessness of copyists. Augustine (De Cons. Evangel. iii, 30) testifies that the most ancient Greek copies had Jeremia, and thinks that the mistake was original. Matthew was disposed in this way, and that the evangelist would not correct the error even when pointed out, in order that we might thus infer that all the prophets spake by one Spirit, and that was the work of one was the work of all ("et singula esse omni, et omnia singulorum"). Some later writers account for the non-appearance of the passage in Jeremiah by the confusion in the Greek MSS. of his prophecies—a confusion, however, it may be remarked, which is not confined to the Greek, but which is found no less in our present Hebrew text. Others, again, suggest that in the Greek autograph of Matthew, 2PJOY may have been read, or that Gary, and other Hebrew manuscripts, had 2PJOY instead of 2PJOY. But there is no evidence that abbreviations of this kind were in use so early. Epiphanius and some of the Greek fathers seem to have read 2PJOY. The most ancient copy of the Latin version of the Gospels omits the name of Jeremiah, and

has merely dictum est per Prophetam. It has been conjectured that this represents the original Greek reading 2PJOY, and that some early annotator wrote 2PJOY on the margin, whence it crept into the text. The choice lies between this, and a slip of the pen of the copyist. The former at least is not without the integrity of our present book of Zechariah, unless, indeed, we suppose, with Eichhorn, who follows Jerome, that an Apocryphal book of Jeremiah is quoted. Theophylact proposes to insert a kai, and would read 2PJOY kai 2PJOY—γιγος Ζαχαριασ. He argues that it is a transposition of the words in two passages; that concerning the price paid occurring in Zech. xi, and that concerning the field in Jer. xix. But what New-Test. writer would have used such a form of expression "by Jeremy and the Prophet?" Such a mode of quotation is without parallel. At the same time, it must be borne in mind that the passage as given in Matthew does not represent exactly either the Hebrew text of Zechariah or the version of the Sept. The other passages of the prophet quoted in the New Test. are ix, 9 (in Matt. xxii, 5; John xii, 15); xii, 10 (in John xix, 67; Rev. 1, 7); xiii, 7 (in Matt. xxvii, 37); but in no instance is the prophet quoted by name.

(D) The following writers have discussed the question of the integrity of Zechariah: Mede, Works (Lond. 1664), p. 786, 884; Riddler [Sp.], Demonstration of the Messias (ibid. 1700), ii, 199; Newmane [Archib.], Minor Prophets (third edition, 1830), ibid. 183; Taylor, in his essay on the "nature and extent of the Apocrypha" (Oxf. 1797); Carpzov, Vindic. Crit. (Lips. 1784); Flitlge, Die Weisegespen der Prophet, Zach. (Hamb. 1784); Barthold, Einleitung, iv, 1762 sq., 1712 sq.; Eichhorn, Prophetae, iii, 327-360, 380-392, 415-428, 515-518; id. Einleitung (4th ed. 1824), iv, 437 sq.; Bauer, Einleitung, p. 510 sq.; Beckhaus, Integrit. der proph. Schrift, p. 357 sq.; Jahn, Einleitung, ii, 675 sq.; Köster, Meletemata exeget. (Götting. 1818); Forberg, Comm. Exeget. (Cob. 1824); Gramberg, Gesch. der Religionsideen, ii, 520 sq.; Rosenmüller, Scholia, vii, 4, 254 sq.; Credner, Der Prophet Jos. p. 67 sq.; Hengstenberg, Beiträge, i, 361 sq.; id. Christologie, vol. iii; id. Integrit. of Zechariah (Edinb. transl. 1848); De Wette, Einleitung (1st to 3d eds. against the Integrity, later eds. in favor of it); Keil, Einleitung; Hävernick, Einleitung; Maurer, Comment. i, 621 sq.; Ewald, Die Propheten; id. Gesch. vol. iv; Bleek, Einleitung; id. Zeitalter von Zach., in the Stud. und Krit. 1848, 327 sq.; id. in the Stud. und Krit. 1862, p. 315 sq.; Hitzig, in Stud. und Krit. 1880, p. 25 sq., and in Prophet.; Henderson, Minor Prophets (1830); Davidson, in Horne's Introduct. (10th ed. 1856), and more recently in his Introduction to the Old Testament; Bummen, Bibliothek, vol. ii, ch. i, pt. ii; id. Gott in der Geschichte, i, 449; Sandrock, Zech. ab umo August (Vratil. 1856); Ortenberg [disintegratio], Bestand- theils des Buches Zach. (Stuttg. 1860); Wright, Bampton Lect. for 1878; and the later commentators generally.

III. Style and Diction.—Some of Zechariah's peculiarieties in these respects have been noticed above. It will have been already perceived that the symbols with which he abounds are obscure, and their prosaic structure is diffuse and unvaried. The rhythm of his poetry is unequal, and its parallelisms are hibharmonious and disjointed. His language has in many phrases a close alliance with that of the earlier prophetic and prophetic imitations of them, especially of Ezekiel, characterizes his oracles. He is also peculiar in his introduction of spiritual beings into his prophetical scenes.

In point of phraseology, generally speaking, Zechariah's style is pure and remarkably free from Chaldaism. As is common with writers in the decline of a language, he seems to have striven to imitate the purity of the earlier models; but in orthography, and in the use of some words and phrases, he betrays the influence of a later age. He writes 'א and יי, and employs..."
ZEADAD 1077 ZEDEKIAH

Πάρος (v, 7) in its later use as the indefinite article, and Πάρος with the fem. termination (iv, 12). A full collection of these peculiarities will be found in Köster, Meltematia, etc. in Zech.

IV. Commentaries.—The following are the exegetical helps on the entire prophecy exclusively, to the most important of which we prefix an asterisk: Jerome, Commentarius (in Opp. ed. Villars [Veron. 1754]; vii); Theodorite, Interpretatio (in Opp. ed. Schulze [Hal. 1769-74]; ii, ii); Ephraim Syrius, Expositio (in Opp. v, 265); Ruperti, Commentarius in Zech. in Klöckner, Commentaries (transl. from the Heb. by McCaul, Lond. 1824, 5vo; Luther, Aulgudag (Wittenberg, 1528, 4to; Erf. ed. 8vo; also in his Works, in Lat. and Germ.); Melancthon, Commentarius (in Opp. ii, 581; Dorotheus, Expositio [incl. Joel and Micah] (Vitumbb. 1655, fol.); Chrysostom, Lectiones (in Opp. ii, 397; Stuunic [R. C.]); Commentarius (Salamanca, 1577, fol.); Grynaeus, Commentarius (Genev. 1581, 8vo; also in Opp.); Baldwin, Commentarius [incl. Haggs. and Mal.] (Vitumbb. 1610, 8vo); Santorius, Commentarius (Lugd. 1616, 4to); Pernel, Exposition [on ch. i-x] (Lond. 1620, 4to; De Reynoles [R. C.], Questions (Paris, 1631, fol.); Ursinus, Commentarius (Francof. 1652, 8vo; Dorsch, Synopsis (ibid. 1653, 1691, 8vo; Varenius, Expositio [incl. Haggs. and Mal.] (Rost. 1692, 4to); De Hase, Analecta (Bremen, 1693, 8vo; Bäcker, Erklärung (Ueberlingen, 1706, 4to); Gerhade, Oppeloyer (Leyd. 1702, 4to); Mullman, Illustratio (Franck. 1708, 4to; Meiss, Erklärung (Leips. 1708, 8vo); Bohle, Analytica, ed. Grafe (Rost. 1711, 8vo); Nemethius, Expositio (Ultraj. 1714, 4to); Boekholt, Verklaring (Amst. 1718, 4to); Andaia, Dissertationes (Franck. 1729, 4to); * Vitringa, Commentarii (Leov. 1734, 4to); Mann, Zerspetzung (Ueberl. 4to); Opitz, Anmerk. (Göttingen, 1747, 4to; Oporin, Anmerk. (ibid. 1748, 4to); Herlich, Erklärung (Rost. 1764, 4vo); Trinius, Anmerk. (Quedlinburg, 1780, 8vo); * Fliggere, Erklärung (Hamb. 1784, 4vo); * Venema, Sermones (Leov. 1789, 4to); Blayney, Notes (Off. 1797, 4to); Thiele, Erklärung (Schwerin, 1802, 8vo); Hanson, ZFMK (Dessau, 1805, 8vo); Köster, Meltematia [on ch. ix-x] (Göttingen, 1818, 8vo); Forberg, Commentarius (ibid. (Coh. 1824, 4to, pt. i); Stoudt, Commentarius (Lond. ed. 8vo); Maller, Erklärung (Bremen 1831, 8vo, pt. 1); Park, Exposition (Lond. 1832, 8vo); Burger, Etudes (Strasb. 1841, 4to); Baumgarten, Nachgesicht (Brunswick, 1854, 2 vol., 8vo); Nemethius, Exposition (Ueberl. 1862, 12mo); * Kleinloth, Erklärung (Schwerin, ed. 8vo); Köhler, Erklärung (Erlang. 1862-63, 8vo); Robinson, Homilies (Lond. 1865, 8vo); * Moore, Commentary [incl. Haggs. and Mal.] (New York 1866, 8vo); Pressel, Commentar (ibid. (Gotha, 1870, 8vo); Wright, Commentary (Lond. 1879, 8vo). See Prophetus, Minos.

Ze'dad (Heb. Teshod, נזדא; with n directive, Teshdah, נזדה; slope; Sept. Zedaddah v. Ζαδάδ, Ζαδά, one of the landmarks on the north border of the land of Israel, as promised by Moses (Num. xxxiv. 8) and as restored by Ezekiel (xviii, 16). In the former passage it occurs between "the entrance of Hamath" and Ziphron, and in the latter between the "road to Hamath" and Hamath. A place name of this kind existed to the north of the eastern extremity of the chain of Antilbanus, about fifty miles E.N.E. of Baalbek and thirty-five S.E. of Hums (Robinson, Bibb. Res. ii, 507; Wetzstein, Reis. üb. Italien, p. 88), which Porter thinks is identical with Zedad (Five Years in Damascus. ii, 354-356; Giese, Gesch. des Osma, p. 31) and so also apparatus, ii, 31; Schoyen (Voda, p. 26). Between the boundaries of Palestine proper never extended so far northward. See Tabia. A trace of the name possibly lingers in the desert plain called Stahl Jadesheh, on the western slope of Antilbanus, in or near the district of Zedebadi (Robinson, Later Bibb. Res. p. 400).

Zedech'ia (Zede'ia, the Greek form (1 Ezech. i, 64) of the name of king Zedeckia (q. v.).

Zedekia'h (Heb. צדוקיה, צדוקיה [but in this simple form only in 1 Kings xxii, 11; Neh. x, 1; Jer. xxiii, 12; xxviii, 1; xxxix, 8: elsewhere in the prolonged form Tsidqiyahu, צדוקייהו], my righteousness is Jah, or, righteousness of Jehovah; Sept. and Josephus, Ζηδεκιας), the name of several Hebrews.

1. Son of Chenaanah, a prophet at the court of Ahab, head, or, if not head, virtual leader of the college. He appears but once, viz., as spokesman when the prophets are conscripted on the result of Jerueli; and as a petition to Ramoth-Gilead (1 Kings xxii; 2 Chron. xlviii). B.C. 896. Zedekiah had prepared himself for the interview with a pair of iron horns, after the symbolic custom of the prophets (comp. Jer. xiii, xix), the horns of the re'em, or buffalo, which was the recognized emblem of the tribe of Ephraim (Deut. xxxiii, 17). With these, in the interval of Micaiah's arrival, he illustrated the manner in which Ahab should drive the Syrians before him. When Micaiah appeared and had delivered his prophecy, Zedekiah sprang forward and struck him a blow on the face, accompanying it by a taunting cry, that he is three times a prophet, and in terms which are hardly intelligible to us, but which evidently allude to some personal danger to Zedekiah.

The narrative of the Bible does not imply that the blow struck by Zedekiah was prompted by more than sudden anger, or a wish to insult and humiliate the prophet of Jehovah. But Josephus takes a very different view, which he develops at some length (Ant. viii, 15, 8). He relates that after Micaiah had spoken, Zedekiah again came forward, and denounced him as false, on the ground that his prophecy contradicted the prediction of Elijah, that Ahab's blood should be licked up by dogs in the field of Naboth of Jerueli; and, as a further proof that he was an impostor, he struck him, daring him to do what Idoo, in somewhat similar circumstances, had done to Jerobam—viz., wither his hand. This addition is remarkable; but it is related by Josephus with great circumstantiality, and was perhaps drawn by him from that source, now lost, from which he has added so many touches to the outlines of the sacred narratives.

As to the question of what Zedekiah and his followers were, whether prophets of Jehovah or of some false deity, it seems hardly possible to entertain any doubt. True, their location was that of the residence of the habitat of false prophets (Jer. xxvii, 23; comp. xxxvii, 21, 31); and there is a vast difference between the casual manner in which they mention the awful name and the full and, as it were, formal style in which Micaiah proclaims and reiterates it. Seeing, also, that Ahab and his queen were profoundly worshippers of Baal and Ashtaroth, and that a few years only before this event they had an establishment consisting of two bodies—one of 400, the other of 400—prophets of this false worship, it is difficult to suppose that there could have been also 400 prophets of Jehovah at his court. But the inquiry of Jehovah seems to be the only possible one. After hearing the prediction of Zedekiah and his followers, he asks at once for a prophet of Jehovah: "Is there not here besides (וֹאֵשׁ) a prophet of Jehovah that we may inquire of him?" The natural inference seems to be that the others were not prophets of Jehovah, but were the 400 prophets of Ashtaroth (A. V. "the groves") who escaped the sword of Elijah (comp. I Kings xviii, 19 with 22, 40). They had spoken in his name, but there was something about them—some trait of manner or voice, that cut the lungs of Jehoshaphat, and, to the practised eye of one who lived at the centre of Jehovah-worship and was well versed in the marks of the genuine prophet, proclaimed them counterfeit. See Micahiah.

2. The son of Hanaaniah, one of the princes of Judah
who were assembled in the scribes' chamber of the king's palace when Micahiah announced that Baruch had read the words of Jeremiah in the ears of the people from the chamber of Gemariah the scribe (Jer. xxxvi, 12). C. 605.

3. The king of Judah and Jerusalem. B.C. 598-588. He was the son of Josiah, and his genealogy is given in 1 Chron. iii, 15, from which it appears that the sons of Josiah were Jehanan the first-born (who is never elsewhere mentioned, and therefore probably had died young, or had been set aside by some popular resolution, to which Shallum may have been indented for the crown in preference to his elder brother, Jehoiakim), the second Jehoiakim, the third Zedekiah, and the fourth Shallum. Since Jehoiakim was twenty-five at his father's death, and Jehoahaz, or Shallum, twenty-three, while Zedekiah was not twenty-one till his accession to the throne, eleven years later, there must be a different order from that of age adopted with the last two sons of Josiah: perhaps it was arranged so as to bring together the two sons of Josiah, who reigned each eleven years, each having been preceded by a king who reigned for only three months. Zedekiah is, indeed, called the brother of Shallum in 2 Chron. xxxvi, 10; but the word must be used in an indefinite sense, for he certainly was his uncle. His mother was Hamutal, the daughter of Jeremiah of Libnah; so that he was full brother of Jehoiachin (2 Kings xxvii, 21; xxxi, 12).

His original name had been Mattaniah, which was changed to Zedekiah by Nebuchadnezzar when he carried off his nephew Jehoachin to Babylon, and left him on the throne of Jerusalem. Zedekiah was but twenty-one years old when he was thus placed in charge of an impoverished kingdom, and a city which, though still strong in its natural and artificial impregnable, was bereft of well-nigh all its defenders. But Jerusalem might have remained the head of the Babylonian province of Judah, and the Temple of Jehovah continued standing, had Zedekiah possessed wisdom and firmness enough to remain true to his allegiance to Babylon. This, however, he could not do (Jer. xxxviii, 5). His history is contained in the short sketch of the events of his reign given in 2 Kings xxiv, 17-xxv, 7, and, with some trifling variations, in Jer. xxxix, 1-7; lii, 1-11, together with the still shorter summary in 2 Chron. xxxvi, 10. The events in the reign of Zedekiah, xxxvi, xxxviii, xxxix, xxxvi, xxxviii, xxxix, xxxviii, xxxviii, xxxviii, being the chapters containing the prophecies delivered by this prophet during this reign, and his relation of various events more or less affecting Zedekiah), and Ezek. xvi, 11-21. To these it is important to add the narrative of Josephus (Ant. x, 7-18), which is partly constructed by comparison of the documents enumerated above, but also seems to contain information derived from other and independent sources. From these it is evident that Zedekiah was a man not so much bad at heart as weak in will. He was one of those unfortunate characters, frequent in history, like Charles I of England and Louis XVI of France, who find themselves at the head of affairs during a great crisis, without having the strength of character to enable them to do what they know to be right, and whose infirmity becomes moral guilt. The princes of his court, as he himself pathetically admits in his interview with Jeremiah, described in ch. xxxviii, had him completely under their influence. "Against them," he complains, "it is not the king that can do anything." He was thus driven to disregard the counsels of the prophet, which, as the event proved, were perfectly sound; and he who might have kept the fragments of his kingdom together, might have saved the remnant for some generations longer. The worship of Jehovah, brought final ruin on his country, destruction on the Temple, death to his family, and a cruel torment and miserable captivity on himself.

It is evident from Jer. xxvii (in ver. 1 Jehoiakim's name is a copyist's error for that of Zedekiah) and xxviii (apparently the earliest prophecies delivered during this reign) that the earlier portion of Zedekiah's reign was marked by an agitation throughout the whole of Syria against the Babylonian yoke. Jerusalem seems to have taken the lead, since in the fourth year of Zedekiah we find outcries from all the neighboring kingdoms—Tyre, Sidon, Edom, and Moab—at his court, to consult as to the steps to be taken. This happened either during the king's absence or immediately after his return from Babylon, whether he had gone on some errand, the nature of which is not named, but which he had been sent on to bind the eyes of Nebuchadnezzar to his contemplated revolt (Jer. li, 59). The project was attacked by Jeremiah with the strongest statement of the folly of such a course—a statement corroborated by the very material fact that a man of Jerusalem named Hananiah, who had opposed him with a declaration in the name of Jehovah, that the spoils of the Temple should be restored within two years, had died, in accordance with Jeremiah's prediction, within two months of its delivery. This, and perhaps also the impossibility of any real alliance between Judah and the surrounding nations, seems to have put an end to the project in the time of Zedekiah (2 Chron. xxxvi, 10); but the word must be used in an indefinite sense, for he certainly was his uncle. His mother was Hamutal, the daughter of Jeremiah of Libnah; so that he was full brother of Jehoiachin (2 Kings xxvii, 21; xxxvi, 13).

His original name had been Mattaniah, which was changed to Zedekiah by Nebuchadnezzar when he carried off his nephew Jehoachin to Babylon, and left him on the throne of Jerusalem. Zedekiah was but twenty-one years old when he was thus placed in charge of an impoverished kingdom, and a city which, though still strong in its natural and artificial impregnable, was bereft of well-nigh all its defenders. But Jerusalem might have remained the head of the Babylonian province of Judah, and the Temple of Jehovah continued standing, had Zedekiah possessed wisdom and firmness enough to remain true to his allegiance to Babylon. This, however, he could not do (Jer. xxxviii, 5). His history is contained in the short sketch of the events of his reign given in 2 Kings xxiv, 17-xxv, 7, and, with some trifling variations, in Jer. xxxix, 1-7; lii, 1-11, together with the still shorter summary in 2 Chron. xxxvi, 10. The events in the reign of Zedekiah, xxxvi, xxxviii, xxxix, xxxvi, xxxviii, xxxix, xxxviii, xxxviii, xxxviii, being the chapters containing the prophecies delivered by this prophet during this reign, and his relation of various events more or less affecting Zedekiah), and Ezek. xvi, 11-21. To these it is important to add the narrative of Josephus (Ant. x, 7-18), which is partly constructed by comparison of the documents enumerated above, but also seems to contain information derived from other and independent sources. From these it is evident that Zedekiah was a man not so much bad at heart as weak in will. He was one of those unfortunate characters, frequent in history, like Charles I of England and Louis XVI of France, who find themselves at the head of affairs during a great crisis, without having the strength of character to enable them to do what they know to be right, and whose infirmity becomes moral guilt. The princes of his court, as he himself pathetically admits in his interview with Jeremiah, described in ch. xxxviii, had him completely under their influence. "Against them," he complains, "it is not the king that can do anything." He was thus driven to disregard the counsels of the prophet, which, as the event proved, were perfectly sound; and he who might have kept the fragments of his kingdom together, might have saved the remnant for some generations longer. The worship of Jehovah, brought final ruin on his country, destruction on the Temple, death to his family, and a cruel torment and miserable captivity on himself.
by Jeremiah's capture and imprisonment, which, but for the interference of the king (Jer. xxxvii, 17, 21), would have occurred weeks earlier. The Babylonians were absent from Jerusalem as we are not told. It must have required at least several months to move a large army and baggage through the difficult and tortuous country which separates Jerusalem from the Phœnician coast, and to effect the complete re-
pulse of the Egyptian army from Syria, which Josephus affirms was effected. All we certainly know is that on the tenth day of the tenth month of Zedekiah's ninth year, the Chaldaeans were again before the walls (iii, 4). From this time forward the siege progressed slowly but surely to its consummation, with the accompaniments of bitter suffering and privation, as the sufferings of the besieged interfered to preserve the life of Jeremiah from the vengeance of the princes (viii, 7-13), and then occurred the interview between the king and the prophet of which mention has already been made, and which affords so good a clue to the condition of abject dependence into which a long course of opposition had brought the weak-minded monarch. It would seem from this conversation that a considerable desertion had already taken place to the besiegers, proving that the prophet's view of the condition of things was shared by many of his countrymen. But the unhappy Zedekiah throws away the chance of preservation for himself and the city which the prophet set before him, in his fear that he would be mocked by those very Jews who had already taken the step Jeremiah was urging him to take (v, 19). At the same time, his fear of the princes who remained in the city is not diminished, and he seeks in furtive flight to escape the city. Nothing, with the view of concealing the real purport of his conversation from these tyrants of his spirit (ver. 24-27).

But while the king was hesitating the end was rapidly coming nearer. The city was indeed reduced to the extremest extremities. The food had wholly failed, and the besiegers had throughout been very destructive (Josephus), but it was now aided by a severe famine. The bread had long been consumed (Jer. xxxviii, 9), and all the terrible expedients had been tried to which the wretched inhabitants of a besieged town are forced to resort in such cases. Mothers had boiled and eaten the flesh of their own infants (Bar. ii, 5; Lam. iv, 10). Persons of the greatest wealth and station were to be seen searching the dungheaps for a morsel of food. The effeminate nobles, whose fair complexions had been their pride, wandered in the open streets like blackened and living skeletons (v. 19). The king was seen sitting in the gate where justice was administered, that his people might approach him, though indeed he had no help to give them (Jer. xxxviii, 7).

At last, after sixteen dreadful months had dragged on, the catastrophe arrived. It was on the ninth day of the fourth month, about the middle of July, at midnight, as Josephus with minuteness informs us, that the breach in those stout and venerable walls was effected. The moon, nine days old, had gone down below the hills which form the western edge of the basin of Jerusalem, or was, at any rate, too low to illuminate the utter darkness which reigns in the narrow lanes of an eastern town, where the inhabitants retire early to rest, and where there are but few windows to emit light from within the houses. The wretched remnants of the army, starved and exhausted, had left the walls, and there was nothing to oppose the entrance of the Chal-
dane. Passing through the breach made by them in their way, as their custom was, to the centre of the city, and for the first time the Temple was entered by a hostile force, and all the princes of the court of the great king took their seats in state in the middle gate of the house of the virgin daughters of Jerusalem. The alarm quickly spread through the sleeping city, and Zedekiah was collecting his wives and children (Josephus), and surrounding himself with the few soldiers who had sur-
-
which they incurred it: the prophet simply pronounces that the time would come when they should fall into the hands of Nebuchadnezzar and be burned to death. In the Targum of J. Joseph on 2 Chron. xxviii, 3, the story is told that Joshua the son of Jozadak the high-priest was cast into the furnace of fire with Ahab and Zedekiah, but that, while they were consumed, he was saved for his righteousness' sake.

6. The first named of the princes who sealed the sacred covenant with Nehemiah (Neh. x, i, A. V. "Ziclih"). B.C. 410.

Zedeb. See Wolfe.

Zeb'eb (Heb. Zebab, נֶבֶּבּ, woff, as often; Sept. τοῦ Ζῆβ, Vulg. Zeb), one of the two "princes" (בְּנֵי הָיוֹם) of Midian in the great invasion of Israel—inferior to the "kings" Zebah and Zalmunna. He is always named with Oreb (Judg. vii. 25; viii. 3; Ps. lxxxii. 11). The name signifies in Hebrew "wolf," just as Oreb does "crow," and the two are appropriate enough to the customs of predatory warriors, who delight in confronting such names on their shields. Zeeb and Oreb were not slain at the first rout of the Arabs below the spring of Hared, but at a later stage of the struggle, probably in crossing the Jordan at a ford farther down the river, near the places which descend from Mount Ephraim. An enormous mass of their followers perished with them. See Oreb. Zeeb was brought to be in a winnowing-press, as in later times bore his name—"the press of Zeeb" (Acts vii. 59; Sept. ἱσσαμανή v. r. ἱσσαμήνα, Vulg. Torcular Zeb). Down the Jordan valley, overlooking the plain of Jericho, is a sharp peak, still known as Ash el-Chorah, i. e. "the Raven's, or Oreb's, Peak." Five miles north-west of this is a wady and mound known as Tiber el-Dib, i.e. "the wolf's town," or Zeeb's, "Den," which Tristram accepts as the required localities (Bible Places, p. 290). Rabbi Schwarz's suggestion (Palest. p. 231) is inapposite.

Zekukith. See Crystal.

Ze'la (Heb. Tezla', צֶלֶּלֶת, in pause, צֶלֶלֶת, in Sam.), a rib; Sept. in Josh. Zel'pa, in Sam. Zel'pa, a city of Benjamin (Josh. xviii, 28, where it is mentioned in the south-western section between Taralah and Ha-Elaph); it contained the family tomb of Kish, the father of Saul (2 Sam. xxii, 14), in which the bones of Saul and Jonathan, and also apparently of the two sons and five grandsons of Saul sacrificed to Jehovah on the hill of Gibeah, at last found their resting-place (comp. ver. 13). The ancient geographers see ignorant of the locality (Reland, Palest., p. 1058); but modern travellers are inclined to identify it with Bes Jalal (Wilson, Lands of the Bible, i, 401; Bonar, Mitzvah, p. 234), a considerable Christian village opposite Rachel's Tomb (Robinson, Bibl. Res., ii, 2 sq.). The suggestion of rabbi Schwarz (Palest. p. 128) is too vague. Liet, Conder's suggestion of Ramadin is equally a venture (Test Work in Palest. ii, 940). See Zelzah.

Ze'lek (Heb. Tzalek, צָלֵּק, fisture; Sept. Ἰλάδα, and Ἰλάδη v. r. Ἰλάδη and Ἰλάδη, an Ammonite, one of David's thirty heroes (2 Sam. xxvi, 57; 1 Chron. xii, 39). B.C. 1046. See David.

Zeloph'ebad (Heb. Tzalophhabad, צלופחַבָּד, of uncertain etymology; Sept. Σαλωφαθά, v. r. Σαλωφαθά, etc.), son of Heber, son of Gilead, son of Machir, son of Manasseh (Josh. xvii, 3). B.C. ante 1618. He was apparently the second son of his father, Heber (1 Chron. xvii, 15); though Simon and others, following the interpretation of the rabbins, and under the impression that the etymology of his name indicates a first-born, explain the form χοτεθά, as meaning that he lost his birthright.

Zelophehad came out of Egypt with Moses; and all that we know of him is that he took no part in Korah's rebellion, but that he died in the wilderness, as did the whole of that generation (Num. xiv, 85; xxvii, 8). On his death without male heirs, his five daughters, just after their second numbering in the wilderness, came before Moses and Eleazar to claim the inheritance of their father in the tribe of Manasseh. The claim was admitted by divine direction, and a law was promulgated, to be of general application, that if a man died without sons his inheritance should pass to his father's brothers (Num. xxvii, 11); and this led to a further enactment (ch. xxxvi, 7), which was, that no daughter should marry out of his own tribe—a regulation which the five daughters of Zelophehad complied with, being all married to sons of Manasseh, so that Zelophehad's inheritance continued in the tribe of Manasseh.

The law of inheritance exemplied in the case of Zelophehad is treated at length by Selden (De Success. ch. xxii, 33). See Inheritance.

Zelo'te'a (צֵלֶטוֹתַךְ, an epithet of the apostle Simon (Luke vi, 15; Acts i, 13) to distinguish him from Simon Peter. In the parallel lists of Matt. x, 4; Mark iii, 18, he is called Simon the Cananite (Κανανιών, A. V. erroneously "Cananaites"); this being a transliteration of the Heb. or Aramaean צֵלֶטוֹת, "zelote," of which the Greek title is a translation. The word denotes a zealot in general (Acts xxii, 12; Tit. iii, 1). It was used especially in behalf of Jewish law and institutions (Acts xxii, 20; xxii, 8; Gal. i, 14). Probably there were already extant in the time of Christ, when this epithet was given to Simon, the gents of the sect or party afterwards thus designated, the members of which professed a great reverence for their law and customs, and were punished by informal trial and execution those guilty of infringing the observances of the national religion, perpetrated great excesses (Josephus, War, iv, 8, 9; v, 1, iv; vi, 3; vii, 8, 1). See Simon.

Zel'sah (Heb. Tselacha', צְלֶשַׁא, shadow from the sun, or, by reduplication from צְלֶשַׁא, to send; Sept. δόλομος μεγάλος, Vulg. meridies), a place in the border of Benjamin, mentioned by Samuel when sending Saul home from Ramah: "Thou shalt find two men by Rachel's sepulchre, in the border of Benjamin, at Zel'sah" (1 Sam. x, 2). Rachel's sepulchre stands on the side of the road leading from Bethlehem to Jerusalem, about a mile distant from the former. Westward of the sepulchre, in full view across the valley, and not much over half a mile distant, is the village of Beit Jala, which may be identical with Zelzah. The names bear considerable resemblance to each other and the position agrees with the sacred narrative (Wilson, Lands of the Bible, i, 401). The Sept. rendering of Zelzah is remarkable. It makes it an expression of joy on the part of the men who announced the finding of the asses—"Thou shalt meet two men leaps joyfully." But dean Stanley's remark on this is surely a rash criticism, that the Hebrew text "cannot be relied upon" (Sin. and Pol, p. 222). The Greek rendering in this case apparently rests upon a reading θέλω, which indicates a possible etymology of the word = double shade. The Talmud has numerous explanations, the favorite one being that Zelzah was Jerusalem—"the shadow (θέλω) of God." Something of this kind seems to be at the basis of the rendering of the Vulg. The essential part of the name is thus rendered more closely congruent with that of the above Arabic village, and at the same time with that of Zelzah (q. v.), which must have lain in the same vicinity. Rabbi Schwarz suggests another location less apposite (Palest. p. 158). See Saul.

Zemar'ah (Heb. Tsamara'ah, צֶמַּרְא, double fleece of wool, or perh. the dual of same base as Zemar'ah (q. v.), the name of two localities in Palestine.

1. (Sept. Ζεμπία v. r. Ζεψα; Vulg. Sermonum.) One of the ancient towns of the territory allotted to Benjamin (Josh. xviii, 22), where it is grouped in the eastern section of the tribe, and named between Beth-arabah and Bethel; and it would therefore appear to have been
situated either in the Jordan valley (Arabah) or on the mountain declivities between it and Bethel. About five miles north of Jericho, in the western edge of the valley of the Jordan, are the ruins of a small town or village, situated on the eastern slope of a sandstone ridge, which may be regarded as the modern representative of the old town of Benjamin (Seetzen, Reisen, vol. iv, map; Robinson, Bibl. Res. i, 569; iii, 299, note; Van de Velde, Memoir, p. 356; De Sauley, Dead Sea, ii, 20, 26; Schwarz, Palest., p. 125). Though little remains above the ground, the ruins are still so extensive and sited on a sandstone bench, which are proofs of large buildings once existing in the vicinity (Tristram, Bible Places, p. 108).

(2. Sept. Equinox; Vulg. Semeron.) A mountain (στίς) or eminence mentioned in 2 Chron. xiii, 4 as being "in Mount Ephraim," that is to say, within the general district of the highlands of that great tribe. It appears to have been close to the scene of the engagement mentioned in the narrative, which again may be inferred to have been south of Bethel and Ephraim (ver. 19). It may be said, in passing, that a position so far south is no contradiction to its being in Mount Ephraim, which extended into the contiguous territory of Benjamin. See Ramah. It probably lay adjacent to the above-mentioned mountain, which it appears to have derived its name (Reland, Palest., p. 108).

Zemarit (Heb. with the art. khet-Tsemarit, זֵמָרִית, evidently a patronymic or rather patrial from Zemer [see below]; Sept. Ὁ σμαράεας; Vulg. Sama- ruana), the general designation of one of the Hamite tribes who in the genealogical table of Gen. x (ver. 18) and 1 Chron. i (ver. 16) are represented as "sons of Canaan." They are named between the Arvadites, or people of Ruad, and the Hamathite, or people of Hamath. The old interpreters (Jerusalem Targum, Arabic version, etc.) place them at Emesa, the modern Homs, Michaelis (Spicileg. ii, 51), revolting at the want of similarity between the two names (which is perhaps the strongest argument in favor of the old identification), proposes to locate them at Sumru, the Simyros (Συμύρος) or Simyrus (Συμύρος) of the classical geographers (Asemaeni, Bibliothe, Orient. i, 504), located on the Phoenician river Eleutherus (Ptolomy, v, 15, 4; Pliny, v, 17; Mela, i, 12, 8), which name is mentioned by Shaw (p. 294) as attached to a site of ruins near Arkav, on the borders of the ancient states of Syria, two kilometres from the lake and the Issus, and also at Tripoli (comp. Buckingham, ii, 415). On the French map of the Lebanon (Carte du Liban, etc., 1862) this place appears as Koubet um Shumara, and lies between Arka and the Mediterranean, two kilometres from the latter and five and a half from the former. Beyond, however, the resemblance in the names, and the proximity of Ruad and Ark, the probable seats of the Arvadiotes and Arkites, and the consequent inference that the original seat of the Zemarites must have been somewhere in this direction, there is nothing to prove that Sumra or Shumra has any connection with the Zeemarites of the ancient records. The name is more likely to have sprung from this direction in the locality of the eastern declivity of Mount Ephraim or Benjamin, elsewhere designated as Zemaraim (q. v.). The identification by the Sept. and Vulg. of both these places with the city of Zemarit is evidently a mere conjecture or false transliteration.

Zemir'ah (Heb. Zemir'ah, זֵמִירָה, music, as in Isa. xxiv, 16, etc.; Sept. Zemir'ah v. Zemir'ah and Ἀμαριας; Vulg. Zemirum, first named of the nine sons of Becher, son of Benjamin (1 Chron. vii, 8). B.C. post 1747.

Ze'nan (Heb. Te'eman, צֵנָן, pointed, if this be the proper form of the name; Sept. Ζεμάν v. Ζενών; Vulg. Samun), a town in the lowland district of Judah (Josh. xvi, 37), where it is named before Hadsahal and Migdal-ged in the western group of the tribe. See JUDAH. Accordingly, a few miles south of the present Mejdul is a small village called Jesem, which is probably the modern representative of Zenan. It is generally supposed that Zenan is the same place which the prophet Micah calls Zemun (Mic. i, 11; see Reland, Palest., p. 1068; Keil and Delitzsch, On Josh. xx, 37). Knobel (loc. cit.) does not think that this is the Zemun of the Bible, but refers to Bezeth, near Beit Jibrin (Tobler, Dritte Wanderung, p. 124). Schwarz (Palest. p. 108) proposes to identify Zenan with "the village Zun-abra, situated two and a half English miles south-east of Marash." By this he doubtless intends the place which in the lists of Robinson (Bibl. Res. 1st ed., vol. iii, app. p. 117) is called es-Sandbrak, and in Tobler's Dritte Wanderung (p. 149), es-Sambrak. The latter traveller in his map places it about two and a half miles due east of Marash (Maras). But both these latter identifications are more doubtful.

Ze'nas (Ζηνᾶς, a contraction from Ζηνώνω, as Ἀρμᾶς from Ἀρμιδώνω, Νεμᾶς from Νεμίδωνω, and probably Ζηνᾶς from Ζηνώνω), believer, and, as may be inferred from the context, a preacher of the Gospel, who is mentioned in Tit. iii, 18 in connection with Apollos, and, together with him, is there commended by Paul to the care and hospitality of Titus and the Cretan brethren. A.D. cir. 59. He is further described as "being a good workman" (v. 15). It is impossible to determine with certainty whether we are to infer from this designation that Zenas was a Roman jurisconsult or a Jewish doctor. Grotius accepts the former alternative, and thinks that he was a Greek who had studied Roman law. The New-Test. usage of ζηνᾶς leads rather to the other inference. Tradition has been somewhat busy with the name of Zenas. The Synopsis de Vita et Morte Prophetarum, Apostolorum, et Discipu- lorum Domini, ascribed to Dorotheus of Tyre, makes him to have been one of the "seventy-two" disciples, and subsequently bishop of Diospolis, in Palestine (Bibl. Patr. iii, 150). The "seventy-two" disciples of Dorotheus are, however, a mere string of names picked out of salutations and other incidental notices in the New Test. The Greek menologies on the festival of SS. Bartholomew and Titus (Aug. 25) refer to a certain Iefs of Titus, ascribed to Zenas, which is also quoted for the Pontius (Augustus) of the "seventy-two" comp. Fabricius, Codex Apocr. N. T. ii, 831, 2). The association of Zenas with Titus, in Paul's epistle to the latter, sufficiently accounts for the forgery.

Zeno, a Greek philosopher, was born at Elea, in Southern Italy, about B.C. 490. He was a pupil of Parmenides, and lived at Elea all his life, with the exception of occasional visits to Athens, where he had many of the wealthiest men for his discipulos. He and his disciples have engaged in a conspiracy against Neapolis, the tyrant of Elea, who captured him and put him to death by cruel torture. For an account of his philosophy, see Eleatic School.

Zeno the Stoic. See Stoics.

Zephani'ah (Heb. Tsephanyahu, זֶפֶןְיָה, in the prolonged form Tsephanyahu'kh, זֶפֶןְיָהַו, 2 Kings xxv, 18), hidden of Jehovah; Sept. Ζηφανίας v. r. in [1 Chron.] Zephaniai, Vulg. Sophonias, the name of four Hebrews.

3. A Kohathite Levite, son of Tabath and father of Azariah, in the ancestry of the prophet Samuel (q. v.) and of Heman (1 Chron. vi, 86 [Heb. 21]); the same elsewhere (ver. 24 [9]) called Uriel (q. v.) the father of Uzziah.

2. A prophet of whom we have no information beyond what is found in his book furnishes. In this (Zeph. 1) he is said to have been "the son of Cushi, the son of Gedaliah, the son of Amariah, the son of Hikiah," which last is usually regarded as the same with king Hezekia- h. If so, he lived B.C. cir. 620. With this agrees the date of his prophecy there given; namely, in the reign of Josiah. We do not elsewhere, however, read of any such son of Hezekiah as Amariah, and, so far as the
record and probability go, Manasseh was his only son. See ZEPHANIAH, BOOK OF.

3. The son of Manasseh (Jer. xxii, 1) and sagan,) or second priest, in the reign of Zedekiah. He succeeded Jehoiakim (xxvi. 22) and was probably the ruler of the Temple, whose office it was, among others, to punish pretenders to the gift of prophecy. In this capacity he was appealed to by Shemariah the Nehelamite, in a letter from Babylon, to punish Jeremiah (ver. 29). Twice he was sent from Zedekiah to inquire of Jeremiah the information and advice desired; and twice he copied Jeremiah's reply (xxvi, 1), and to implore him to intercede for the people (xxxvii, 3). On the capture of Jerusalem by Nebuzaradan, he was taken with Seraiah the high-priest and others, and slain at Riblah (lxxii, 24, 27; 2 Kings xxv. 18, 21). B.C. 588.

4. Father of Josiah 2 (Zech. vi, 10), and of Hen, according to the reading of the received text of Zech. vi, 14 as given in the A. V. B.C. ante 519. See Josiah.

ZEPHANIAH, BOOK OF, the ninth in order of the minor prophets, both in the Hebrew and Greek copies of the Scriptures (Jerome, Prolog. ad Paul. et Evs.). Besides his genuine prophecy, there was in the ancient Christian Church an apocryphal book ascribed to Zephaniah, quoted in the apocrypha, and quoted by some of the fathers under the name of his Ἀνάλογος or Προφητεία. See APOCRYPH.

I. Author.—The name of this prophet has been variously explained. Disputes upon it arose as early as the times of Jerome, for in his Commentary on this book he says,* "Nomen Sophumathis, aliis speculatim, aliarnum Dei, translaturum." The word was thus derived either from Ψῆφος, he watched, or Ψῆφος, he hid, with the common affix ΨΨ, i.e. Yah. The old father made it a matter of indifference which etymology he adopted, as both, according to him, give virtually the same sense—the commission of a prophet being virtually that of a watchman or seer, and the burden of his message some secret revealed to him by God. Abarbanel (Pirahm. in Zekh.) adheres to the latter mode of derivation, and the Pseudo-Dorothius, following the former, translates the prophet's name by the Greek participle σκοπευοντας. Hiller and Simonis differ also in a similar way; Hiller, taking the term from Ψῆφος, renders it "absconditi deo, i.e. delituit Jehovah" (Onomast. s. v.), as if the name had contained a mystic reference to the character of the age in which the prophet lived, when God had withdrawn himself from his apostate people; but Simonis (Origens. V. T.) gives another exposition, the sanctified, i.e. sanctified by Gesenius—"absconditi, i.e. custodivi Jehovah." Jehovah hath guarded, the verb Ψῆφος being used of divine protection in Psa. xxxvii, 5 and lxxiii, 4. The name seems to have been a common one among the Jews.

2. Parentage.—Contrary to usual custom, the pedigree of the prophet is traced back for four generations—"the son of Cushi, the son of Gedaliah, the son of Amariah, the son of Hiah." This formal record of his lineage has led many to suppose that Zephaniah had sprung from a noble stock (Cyril, Prof. ad Zeph.), and the occurrence of the highest name in the list, which in the Hebrew text is spelled and pointed in the same way as that rendered Hezekiah in the books of Kings and Chronicles, has induced some to identify it with that of the good king Hezekiah, and to pronounce the prophet a calfet of the royal house of Judah. Kimchi is very cautious in his opinion, and leaves the point undecided. Zephaniah had an early recognition and a prominent position, at once concludes that Zephaniah is descended from Hezekiah; and his opinion has been followed by Huet (Demonstrat. Evang. Propos. iv, 303), and partially by Eichhorn (Einl. § 598). The conjecture has little else to recommend it than the mere occurrence of the royal name. But it was not a name confined to royalty; and had it been the name of the pious monarch to which Zephaniah's genealogy is traced, certainly his official designation, "king of Judah," would have been subjoined in order to prevent mistake. Such an addition is found in connection with his name in Prov. xxvii. ix, 24, 25, and is a title given to Zedekiah, and this statement to affirm that the phrase "king of Judah" is added to Josiah, and to, avoid repetition may have been omitted after Hizkiah, for such regard to euphony, such filial delicacy, is no feature of Hebrew composition. The argument of Carpoce (Intro. p. 414), that Zephaniah was the contemporary of Zedekiah, that the supposed connection of the prophet with the blood royal is of no great weight. These critics say that from Hezekiah to Josiah, in whose reign Zephaniah flourished, are only three generations, while from Hezekiah to Zephaniah four are reckoned in the first verse of the prophecy. But as Hezekiah reigned twenty-nine years, and his successor sat on the throne no less than fifty-five years, there is room enough in such a period for the four specified descents; and Amariah, though not heir to the crown, may have been much older than his youthful brother Manasseh, who was crowned at the age of twelve. As there was at least another Zephaniah, a conspicuous personage at the time of the Captivity, the parentage of the prophet may have been recounted so minutely to prevent any reader from confounding the two individuals. The descent of the prophet from king Hezekiah, therefore, is not in itself improbable. It is certain that the name Zephaniah is associated with that name points to a personage of rank and importance. Late critics and commentators generally acquiesce in this hypothesis, viz. Eichhorn, Hitzig, F. Ad. Strauss (Vaticinum Zephaniae [Berlin, 1845]), Haverwick, Keil, and Bleek in Estbury and de Geest's Commentaries.

The Jews absurdly reckon that here, as in other superscriptions, the persons recorded as a prophet's ancestors were themselves endowed with the prophetic spirit. The so-called Ephippius (De Vita Prophet. ch. xix) asserts that Zephaniah was of the tribe of Simeon, of the hill-country of Ephraim, and son of the prophet Joznoe. The genealogy of the prophet is known only from his oracles, and these have no biographical sketches; so that our knowledge of this man of God comprises only the fact and the results of his inspiration. It may be safely inferred, however, that he labored with Josiah in the pious work of re-establishing the worship of Jehovah in the land.

II. Date.—It is recorded (ch. i) that the word of the Lord came to him "in the days of Josiah the son of Amon, king of Judah." We have reason for supposing that he flourished during the earlier portion of Josiah's reign. This chapter (v. 1-8) was probably composed at the time of the doom of Nineveh, and the fall of that ancient city happened about the eighteenth year of Josiah. In the commencement of his oracles, also, he denounces various forms of idolatry, and specially the remnant of Baal. The reformation of Josiah began in the twelfth and was completed in the eighteenth year of his reign. So thorough was his extirpation of the idolatrous rites and hierarchy which defiled his kingdom that he burned down the groves, dismissed the priesthood, threw down the altars, and made dust of the images of Baalim. Zephaniah must have prophesied prior to this religious revolution, while some remains of Baal were yet secreted in the land, or between the twelfth and eighteenth years of the royal reformer. So Hitzig (Die 12 kleines Prophet.) and Movers (Chronic. p. 234) place him; while Eichhorn, Bertholdt, and Jäger incline to give him a somewhat later date. At all events, he flourished between the eighth and eleventh years of Josiah's reign. The subject of prophecy which refers to the destruction of the Assyrian empire must have been delivered prior to the year B.C. 625, the year in which Nineveh fell (Henderson, On the Minor Prophets, p. 326). The publication of these oracles was therefore contemporary with a portion of the reign of Josiah, or perhaps confined to him in the thirteenth year of the reign of Josiah.
Indeed, the Jewish tradition is, that Zephaniah had for his colleagues Jeremiah and the prophetess Huldah, the former fixing his sphere of labor in the thouroughfears and market-places, the latter exercising her honorable work (state of the prophetesses in that day). (Neh. xiv. 40; cf. p. 415). Köster (Die Propheten, iii) endeavors to prove that Zephaniah was posterior to Habakkuk. His arguments from similarity of diction are very strong and the more so when we reflect that all circumstances combine in inducing us to fix the period of Habakkuk (q. v.) in the reign of Josiah; and, consequently, for the Chaldaean invasion. In the present book Nineveh is represented as in a state of peace and prosperity, while the notices of Jerusalem touch upon the same tendencies to idolatry and crime which are condemned by the contemporary Jeremiah. It is not impossible, moreover, that the prophecy was delivered about the time when the Scythians overran the empires of Western Asia, extending their devastations to Palestine. The king's children, who are spoken of in ch. i, 8 as addicted to foreign habits, could not have been sons of Josiah, who was but eight years old at his accession, but were probably sons of either Amon or Manasseh, the two sons of Josiah's chief consort, Tamar. Baal (ch. i, 4) implies that some partial reformation had previously taken place, while the notices of open idolatry are incompatible with the state of Judah after the discovery of the Book of the Law.

III. Contents.—In ch. i. the utter desolation of Judæa is represented as the result of idolatry, and neglect of the Lord, the luxury of the princes, and the violence and deceit of their dependents (ver. 3, 9). The prosperity, security, and insoucience of the people are contrasted with the horrors of the day of wrath; the assaults upon the fenced cities and high towers, and the slaughter of the people (ver. 10–18). Ch. ii. is a call to repentance (ver. 1–3), with prediction of the ruin of the cities of the Philistines, and the restoration of the house of Judah after the visitation (ver. 4–7). Other enemies of Judah, Moab, Ammon, are threatened with perpetual destruction, Ethiopia with a great slaughter, and Nineveh, the capital of Assyria, with desolation (ver. 8–10). In ch. iii. the prophet addresses Jerusalem, which he reproves sharply for vice and disobedience, the cruelty of the princes and the treachery of the priests, and for their general disregard of warnings and visitations (ver. 1–7). He then concludes with a series of promises, the deliverance of the captivity from Babylon, the destruction of exiles, the extirpation of the proud and violent, and the permanent peace and blessedness of the poor and afflicted remnant who shall trust in the name of the Lord. These exhortations to rejoicing and exertion are mingled with intimations of a complete manifestation of the prophet's messianic hopes and love in the restoration of his people (ver. 8–20).

It has been disputed what the enemies are with whose desolating invades he threatens Judah. The ordinary and most probable opinion is that the foes whose period of invasion was "a day of the trumpet and alarm against the fenced cities and against the high towers" (ch. i, 16), were the Chaldeans. Hitzig especially, Cranmer too, and Eichhorn, supposed the prophet to refer to a Scythian invasion, the history of which they imagine has been preserved by Herodotus (i, 105). But the general style of the oracle, and the sweeping vengeance which it menaces against Assyria, Phatamia, Ammon, and Cush, as well as against Judah, by some great and unnamed power, point to the Chaldean expedition which, under Nebuchadnezzar, laid Jerusalem waste, and carried to Babylon its enslaved population. The contemporary prophecies of Jeremiah contemplate the punishments, on the destruction of Nineveh (Isa. xxxiv. 10, 15; cf. also Zeph. ii. 9). The former part of Zephaniah's prediction is "a day of clouds and of thick darkness," but in the closing section of it light is sown for the righteous: "The king of Israel, the Lord, is in the midst of thee; he will rejoice over thee with joy; he will rest in his love." IV. Style.—We cannot by any means award so low a character to Zephaniah's style as is done by De Wette (Einzel: § 245), who describes it as being often heavy and tedious. It has not the sustained majesty of Isaiah, or the sublime and original energy of Joel: it has no prominent verse-form and shows little rhythmical and metrical ingenuity. Its language and style are, in many of its touches and images, bold and striking. For example, in the first chapter the prophet groups together in his descriptions of the national idolatry several characteristic exhibitions of its forms and worship. The verses are not t Pete and prosaic portraiture, but form a series of vivid sketches, of his contemporaries on the more strange peculiarities of the heathen worship—uttering denunciations on the remnant of Baal, the worshippers of Chemarim—the star-adorers, the devotees of Malcham, the fanatics who clad themselves in strange apparel, and those who in some superstitious mummary leaped upon the threshold (Bochart, Hieros. c. 36). Not a few verses occur in the course of the prophecy which, in tone and dignity, are not unworthy to be associated with the more distinguished effusions of the Hebrew bards. A few paronomasies occur (i, 5 and ii, 1–4), and occasionally there is a peculiar repetition of a leading word in the same sentence ( Jer. vi. 18).

Jahn (Introd., § 182) and Eichhorn assert that Zephaniah has borrowed to a considerable extent from the earlier prophets, especially from Isaiah; yet the similarity of such passages as Isa. xxxiv, 11 to Zeph. ii, 4, or Isa. xlvi, 8 to Zeph. ii, 15, or Isa. xviii, 1 to Zeph. iii, 10, or Isa. xlvii, 10 to Zeph. ii, 8, is not sufficient evidence that Zephaniah was Isaiah's imitator. The clauses of resemblance are idiomatically in nature, and seem to have been of proverbial force and currency, so that both prophets may have taken them from the national usus loquendi. Coincidences of expression have also been noted between Zephaniah and some of his contemporaries, particularly Jeremiah (Eichhorn, Einzelt., § 595; Rosenmüller, Proems. vi). Between Zeph. i, 5 and Jer. viii, 2 we can perceive little similarity of language, though the same superstitious custom is referred to, and a comparison of Zeph. i, 12 with Jer. xlvii, 11 leads to such a conclusion as we have already stated, as the phrase common to both passages—"settled on the lees"—must have been one in wide circulation in a wine country like Judæa. It was altogether groundless, therefore, in some of the older critics, such as Isidore and Schmidius (Prologum in Sophon.), to style Zephaniah the abbreviator of Jeremiah, and to claim for a part of Zephaniah's prophecy between Zephaniah and Amos, and between him and his successor Ezekiel; but to call these imitations rash, if we reflect on the similarity of the topics discussed, and the peculiar range of imagery and phraseology which is common to Hebrew prophetic poetry, and which are interwoven language of his prophetic brotherhood. The language of Zephaniah is pure: it has not the classic ease and elegance of the earlier compositions, but it wants the degenerate feebleness and Aramaic corruption of the succeeding age. Zephaniah is not expressly quotes in the New Test.; but clauses and expressions occur which seem to have been formed from his prophecy (Zeph. iii, 9; Rom. xv, 6, etc.). He was, in fine, as Cyril of Alexandria terms him (Prefaat, in Soph. tom. iii), "a true prophet, and filled with the Holy Ghost, and bringing his oracles from the mouth of God."

The chief characteristics of this book are the unity and harmony of the composition, the grace, energy, and dignity of its style, and the rapid and effective alternations of threats and promises. Its prophetic import is chiefly shown in the accurate predictions of the desolation which has fallen upon each of the nations denounced for their offences: Ethiopia has been destroyed, with a terrible invasion, being alone exempted from the doom of perpetual ruin. The general tone of the last portion is Messianic, but without any specific reference to the person of our Lord.

There has often been noticed in this prophecy a general or universal character, rather than specific predici-
tonsa, though these are not entirely wanting. This tendency is in harmony with the position which Zephaniah was called to occupy in the course of divine providence; for he lived at the commencement of the period of the universal empire, which are represented by Daniel in detail, and exhibited as introductory to the kingdom of the Son of man. The Chaldean monarchy was rising with marvellous rapidity to universal empire, and was in preparation by the Lord to be the scourge of his own people as well as of the heathen nations; and in connection with their work Zephaniah saw the coming of the day of the Lord, the day of judgment, when all the earth shall be devoured with the fire of his jealousy (ch. i, 18; iii, 8). But as earlier prophets, especially Joel and Isaiah, had already foreseen and declared this in connection with the work of the Assyrian monarchy, which only made a commencement and left the completion to its rival and heir at Babylon, we find the language and imagery of these earlier prophets continually referred to, adopted, or elaborated anew by Zephaniah and his contemporary Jeremiah, with whom he has much in common.

V. Commentaries.—The following are the special exegetical helps on this entire book exclusively: Luther, Commentarius (in Opp. vol. iv.; also in Germ. in Werke); Bucer, Commentarius (Argent. 1528, 8vo); Selemecker, Auslegung (Leips. 1566, 4to); Cesar, Freytagen (Wittemb. 1608, 8vo); Tarassovius, Commentarius (Rost. 1623, 4to); Lorenz, Tuba (Mediol. 1558, 8vo); Gebhardtus, Speculatio (Gruphan. 1701–2, 4to); Höcke, Auslegung [includ. Nah. and Hab.] (Frakf. 1710, 4to); Noltenius, Commentarius (on ch. i) (Fr. ad O. 1719–24, 4to); Gebhardt, Erklärung (Fr. am O. 1728, 4to); Cramer, Synthetische Denkmäler (Kiel, 1777, 8vo); Antion, Interpretatio (on ch. iii) (Gorl. 1811, 4to); Collin, Observationes (Vratisl. 1818, 4to); Ewald, Erklärung (Erlang. 1827, 8vo); Strauss, Commentarius (Berol. 1848, 8vo); Robinson, Homilies (Lond. 1865, 8vo); Reinke, Erklarung (Leips. 1868). See PROPHETS, MINOR.

Ze'phath (Heb. Tsophath', צָפַת, watch-tower; Sept. Σεφαθ v. r. Σαφεις and Σαφι; Vulg. Sephath), the earlier name (according to the notice of Judg. i, 17) of a Canaanish town, which after its capture and destruction was called by the Israelites HORMAH (q. v.). According to rabi Schwarz (Palest. p. 186), it is likewise mentioned in the Jerus. Talmud (Rosh hash-Monath, ch. ii). See also ZE'PHAN. Two identifications have been proposed for Zephath—that of Dr. Robinson with the well-known pass es-Sufa', by which the ascent is made from the borders of the Arabah to the higher level of the “south country” (Bibl. Res. ii, 181), and that of Mr. Rowlands (Williams, Holy City, i, 464) with Sabatia, two and a half hours beyond Khallasah, on the road to Suez, and a quarter of an hour north of Rohbeh or Ruheibeh. See also ZEPHATH.

1. The former of these Mr. Witton (The Nogeh, etc., p. 199, 200) has challenged, on account of the impracticability of the pass for the approach of the Israelites, and the inappropriateness so far and desolate a spot for the position of a city of any importance. The question really forms part of a much larger one, which this is not the place to discuss—viz. the route by which the Israelites approached the Holy Land. See EXODUS.

But, in the meantime, it should not be overlooked that the attempt of the Israelites in question was an unsuccessful one, which is so far in favor of the steepness of the pass. It should also be borne in mind that both in ancient and modern times such difficult passes have in many cases been the chief thoroughfares in Palestine, and this one in particular has remained such to the present day. The argument from the nature of the site is one which might be brought with equal force against the existence of many other towns in this region.

2. On the identification of Mr. Rowlands some doubt has been thrown by the want of certainty as to the name and exact locality. Dr. Stewart (Tent and Khan, p. 265) heard of the name, but east of Khallasah instead of south, and this was in answer to a leading question—always a dangerous experiment with Arabs. The English engineers of the Ordnance Survey, however, found Sebasta in the vicinity indicated; namely, about fifteen miles south of Khallasah. Prof. Palmer gives a full description of the extensive ruins of the place (Desert of the Exodus, p. 315 sq.), and a plan of the town, with other details, may be found in the Quarterly Statement of the “Palestine Explor. Fund,” Jan. 1871, p. 3–73. Preferring, as we decidedly do, the location of Kadesh-barnea, on the edge of the Arabah, we should decide

Pass of Sufa. (From a photograph by the Editor. The dark spot half-way up the mountain is the traveller’s caravan climbing the ascent.)
against the claims of this spot to be the Zephath of Scripture, notwithstanding the agreement in name and remains. See Kadesh.

Zephathah (Heb. Tsaphathah, נְצָפָת, watch-tower; Sept. κατά Σαφάν; Josephus, Σαφάν, Ant. viii, 12:1; Vulg. Sephato), the name of a valley (גַּב) where Aza joined battle with Zerah the Ethiopian (2 Chron. xiv, 10). It was "at," or rather "belonging to," Marshah (אֹצֵר שַׁמַך; Josephus, οἰκὸς ἁπασαρίου). This would seem to exclude the possibility of its being, as suggested by Robinson (Bibl. Res. ii, 31), at Tell es-Sapheh, which is not less than eight miles from Marshah, the modern representative of Marshah. There is a deep valley which runs past the latter place down to Beiz Jibrin, and thence into the plain of Philistia. This, perhaps, may be the valley of Zephathah (Porter, Handbook, p. 258). Some, however, understand the name Zephathah to be only that of Zepkuth (q.v.), with "at" directive, and render it "the valley towards Zepkuth."

Zephath. See Pithon.

Ze'phi (1 Chron. i, 36). See ZE'PHI.

Ze'pho (Heb. Tsapho', צָפוֹ, watch-tower; Sept. Σαφω; Vulg. Sepho), third named of the five sons of Eliphaz the son of Esau (Gen. xxxvi, 11), and one of the Idumean "dukes" (ver. 15). B.C. considerably post 1927. In the parallel passage (1 Chron. i, 36) the name is written Zephi (Heb. Tsaphi', צָפִיה; Sept. Σαφω; Vulg. Sepho).

Ze'phon (Heb. Tsaphhone', צָפִיה, watch; Sept. Σαφων; Vulg. Sephon), first named of the seven sons of Gad (Num. xxvi, 15) and progenitor of the family of the Zephonites (Heb. with the art. ahu-Tsaphhoin, צָפוֹנִים; Sept. Ἀυτοῖς Sephon; Vulg. Zephonites). In Gen. xlvii, 16 his name is written Ziphoni (Heb. Tsaphhoni', צָפִיִון; Sept. Σαφων; Vulg. Sephion). B.C. 1874.

Zephyrinus, bishop of Rome, succeeded Victor about A.D. 199-201, and filled his office (according to Eusebius) during eighteen years. He died in 217. His pontificate falls in the period when Montanist and Monarchian influences were struggling to obtain control of the Church; and although his own personality was by no means imposing, his rule became important through the unlimited power which he permitted Calixtus I (q.v.) to acquire. Zephyrinus's original attitude was hostile towards Montanism; and though the influence of Hippolytus (q.v.) compelled the gradual exclusion of the Monarchians from the Church, they were accorded kindly treatment. The peace of the Church was in this way preserved, in outward appearance, while Zephyrinus lived. The more energetic administration of his successor, Calixtus, produced a formal breach, and thus conferred prominence upon Zephyrinus's pontificate as being the close of the first period of the greatness of the Roman Church. Eusebius furnishes a few scanty notices on Zephyrinus in the Hist. Eccles. (bk. v and vi), which are supplemented by the ninth book of Hippolytus (Comm. Hieros.). The latter work called forth Iossian's book Hippolytus u. seine Zeit, a production of but little value, and Dollinger's Hippolytus u. Cullituis, which is not impartial. Greater importance attaches to Baur's brief remarks in his work on the Christianity of the first three centuries, and to Ritschl, in Entstehung der altkatholischen Kirche (2d ed.). See also Herzog, Real-Encyklop. s.v.

Ze'rah (Heb. Zera'ach, זֵרָּא; [in pause Za'rach, זָרָא], 1 Chron. ii, 4; "Zarah," Gen. xxxviii, 30; rising of the sun; Sept. usually Zaph, but sometimes Zapi, Zaphi, etc.), the name of several Hebrews and one foreigner.

1. Second named of the three sons of Reuel, son of Esau (Gen. xxxvi, 13; 1 Chron. i, 37), and one of the "dukes" or phyarchs of the Edomites (Gen. xxxvi, 17). B.C. considerably post 1927. Jobab of Bozrah, one of the early kings of Edom, perhaps belonged to his family (ver. 38; 1 Chron. i, 44).

2. Twin son with his elder brother Pharez of Judah and Tamar (Gen. xxxviii, 30; 1 Chron. ii, 6; "Zara,"
Matt. i, 3). B.C. circ. 1895. His descendants were called Zarhites, Ezrathites, and Izrathites (Numb. xxvi, 20; i Kings iv, 31; 1 Chron. xxvii, 8, 11), and continued at least down to the time of Zerubbabel (Is. 6; Neh. vi, 14). The latter is directly related to the Phoenician kings, and has a peculiar connection with the Semitic races, both Semitic and Semitic origin. See Shishak. The difference is great, but it may be partly accounted for if we suppose that the Egyptian deviates from the original Semitic form, and that the Hebrew represents the form, or that a further deviation than would have been made was the result of the similarity of the proper name Zaer. So, Sin, or if pronounced Szara or Sera, is more remote from Shebek or Sebezek than Zeror from Usorken. It may be conjectured, therefore, that these names resemble those of Memphis, Moph, Noph, which evidently represent present pronunciation, probably of Semites.

2. The Date.—In its form Zerah is identical with the Hebrew proper name above. It has been supposed to represent the Egyptian Usorken, possibly pronounced Usorken, and certainly almost Semitic origin. See Shishak. The difference is great, but may be partly accounted for if we suppose that the Egyptian deviates from the original Semitic form, and that the Hebrew represents that form, or that a further deviation than would have been made was the result of the similarity of the proper name Zaer. So, Sin, or if pronounced Sera or Sera, is more remote from Shebek or Sebezek than Zeror from Usorken. It may be conjectured, therefore, that these names resemble those of Memphis, Moph, Noph, which evidently represent present pronunciation, probably of Semites.

3. The Event.—The first ten years of Asa's reign were undisturbed by war. Then Asa took counsel with his subjects, and called a fast, and sent to the heads of the cities of Judah. He also maintained an army of 500,000 men, 300,000 spearmen of Judah, and 280,000 archers of Benjamin. This great force was probably the whole number of men able to bear arms (2 Chron. xiv, 1-8). At length the anticipated danger came. Zerah the Ethiopian, with a mighty host, came to the mountains by the way of Judah to Jerusalem, in the wilderness "bowing his chariots to Jerusalem, and advanced unopposed in the field as far as Mareshah. As the invaders afterwards retreated by way of Gerar, and Mareshah lay on the west of the hill-country of Judah, where it rises out of the Philistine plain, in the line of march from Egypt to Jerusalem, it cannot be doubted that they came out of Egypt. Between the border on the side of Gerar and Mareshah lay no important city but Gath. Gath and Mareshah were both fortified by Rehoboam before the invasion of Shishak (xii, 8), and were before captured and probably dismantled by that king (comp. xii, 4), whose list of conquered towns, etc., shows that he not only took some strong towns, but that he subdued the country in detail. A delay in the capture of Gath, where the warlike Philistines may have opposed a stubborn resistance, would have removed the only obstacle to the progress of the Ethiopian army. The retreat that was afterwards made by this route. From Mareshah or its immediate neighborhood was a route to Jerusalem, presenting no difficulties but those of a hilly country; for not one important town is known to have lain between the capital and this outpost of the tribe of Judah. The invasion army, therefore, would not have been delayed. The delay would have been caused by the sieges of Gath and Mareshah, which could have enabled Asa hastily to collect a levy and march to relieve the beleaguered town or hold the passes. "In the valley of Zephathah at Mareshah" the two armies met. We cannot perfectly determine the site of the battle. Mareshah, according to the Onomasticon, lay within two miles of Eleutheropolis, and Dr. Robinson has reasonably conjectured its position to be marked by a remarkable "tell," or artificial mound, a mile and a half south of the site of the latter town. Its significance, "that which is at the head," would be preserved in the toponym. The position at the head of the valley. But it seems that a narrow valley terminates, and a broad one commences, at the supposed site. The valley of Zephathah, "the watch-tower," is supposed by Dr. Robinson to be the latter, a broad wady, descending from Eleutheropolis in a northwesterly direction towards Tell es-Safieh, in which last name he is disposed to trace the old appellation (Bibl. Res. ii, 31). The two have no connection whatever, and Robinson's conjecture is extremely hazardous. See Zephathah. If this identification be correct, we must suppose that Zeror retired from before Mareshah towards the plain, that he might rejoin his archers and horsemen, instead of entangling them in the narrow valleys leading towards Jerusalem. From the prayer of Asa we may judge that, when he came upon the invading army, he saw its hussars, and that, as he descended through a valley, it lay spread out beneath him. The Egyptian movement enabled us to examine the several dispositions of Zeror's army. The chariots formed the first corps in a single or double line; behind them, massed in phalanxes, were heavy-armed troops; probably on the flanks stood archers and horsemen in lighter formations. Asa, marching down a valley, must have attacked in a heavy column; for none but the most highly disciplined troops can form line from column in the face of an enemy. His spearmen of Judah would have composed this column: each bank of the valley would have been occupied by the Benjamite archers, like those who came to David, "helpers of the war, armed with bows, and Generated as the left in hurling stones and shooting arrows out of a bow" (1 Chron. xii, 1, 2). No doubt the Ethiopian, confident in his numbers, disdained to attack the Hebrews or clear the heights, but waited in the broad valley, or the plain. Asa's prayer before the battle, full of faith and confidence, "Lord [it is] like to thee to help, whether the strong or the weak: help us, O Lord our God; for we rest on thee, and in thy name we go against this multitude. O Lord, thou [art] our God; let not man prevail against thee. From the account of Abijah's defeat of Jeroboam, we may suppose that the priests sounded their trumpets, and the men of Judah descended with a shout (2 Chron. xiii, 14, 15). The hills and mountains were the favorite camping-places of the Hebrews, who usually rushed down upon their more numerous or better-disciplined enemies in the plains and valleys. If the battle was deliberately set in array, it would have begun early in the morning, according to the usual practice of these times, when there was not a night-surprise, as when Goliath challenged the Israelites (1 Sam. xvii, 20-23), and when Thothmes III fought the Canaanites at Me- edinum (Tell es-Safieh) (see p. 424). This was a beautiful day, and an unbroken sky. By this time, Asa had the sun would have been in the eyes of the army of Zerah, and its chariots would thus have been useless. The chariots, broken by the charge and with horses made unmanageable by flights of arrows, must have been forced back upon the cumbrous host behind. "So the Ethiopians were taken alive, and the men of Judah and the Ethiopians fled. And Asa and the people that were with him pursued them unto Gerar:
and [or "for"] the Ethiopians were overthrown, that they could not recover themselves. This last clause seems to relate to an irremediable overthrow at the first; and, indeed, had it not been so, the pursuit would not have been so protracted or the battle fought at the frontier. So complete was the overthrow that the Hebrews could capture and spoil the cities around Gerar, which must have been in alliance with Zerah. From these cities they took very much spoil; and they also smote the tents of cattle, and carried away sheep and camels in abundance (2 Chron. xvi. 9—10). More seems to have been captured from the Arabs than from the army of Zerah: probably the army consisted of a nucleus of regular troops, and a great body of tributaries, who would have scattered in all directions, leaving their country open to reprisals. On his return to Jerusalem, Asa was met by Azariah, who exhorted him and the people to be faithful to God. Accordingly Asa made a second reformation, and collected his subjects at Jerusalem in the third month of the fifteenth year, and made a covenant, and offered of the spoil "seven hundred oxen and seven thousand sheep" (xv, 1—16). From this it would appear that the battle was fought in the preceding winter. The success of Asa, and the manifest blessing that attended him, drew to him Ephraimites, Manassites, and Simeonites. His father had already captured cities in the Israelite territory (xiii, 19), and he held cities in Mount Ephraim (xv, 10). It is seen, then, that at the mercy of a powerful king of Judah, would have naturally turned to him. Never was the house of David stronger after the defection of the ten tribes; but soon the king fell into the wicked error, so constantly to be repeated, of calling the heathen to aid him against the kindred Israelites, and hired Ben-hadad, king of Syria-Damascus, to lay their cities waste, when Hanani the prophet recalled to him the great victory he had achieved when he trusted in God (xvi, 1—9). The after-years of Asa were troubled with wars (ver. 9); but they were with Baasha (1 Kings xv, 14, 19). Zerah and his people had been too signally crushed to attack him again. See ASA.

4. The identification of Zerah has occasioned some difference of opinion. The term Cushite or Ethiopian may imply that he was of Arabian Cuchi; the principal objection to which is that the Cushites were inhabitants of Abyssinia or African Ethiopia, and are resisted by the difficulty of seeing how this "huge host" could have obtained a passage through Egypt, and crossed the Red Sea, and thus advanced Juda. The most probable posses, with Champollion (Précis, p. 257), whom Coquerel follows (Bog. Sacer, s. v.), that Zerah the Cushite was the then king of Egypt, of an Ethiopian dynasty, this difficulty would be satisfactorily met. But lately it has been supposed that Zerah is the Hebrew name of Usurken, the second king of the Ethiopian twenty-second dynasty; or perhaps more probably Usurken II, his second successor. This is a tempting explanation, but cannot be received without question, and it is not deemed satisfactory by Rosellini, Wilkinson, Sharpe, and others. Jahn hazards an ingenious conjecture, that Zerah was king of Cush on both sides of the Red Sea; that is, of both the Arabian and African Ethiopia; and thus provides him a sufficient power without subjecting him to the necessity of passing through Egypt. There are two other suppositions which are not destitute of probability. It is conceived either that he was a native king, who delivered himself from the yoke of the armies of Egypt, or that he was an Ethiopian general who led an Ethiopian army through Egypt, now separate from Ethiopia, and invaded Judah through Egypt. This question is a wider one than seems at first sight. We have to inquire whether the army of Zerah which overthrew the Cushites was not a part of the armies of Egypt, or a part of the Cushites, and was to be an armament which was sent to help what the Egyptians were at work for its connection with the people of Gerar and the pastoral tribes of the neighborhood. The sudden decline of the power of Egypt after the reign of Shishak would be explained by the overthrow of the Egyptian army about thirty years later.

The composition of the army of Zerah, of Cushim and Lubim (2 Chron. xvi, 8), closely resembles that of Shishak, of Lubim, Sukkim, and Cushim (xii, 3): both armies also had chariots and horsemen (xiii, 3; xvi, 8). The Cushim might have been of an Asiatic Cush, but the Lubim can only have been African. The army, therefore, must have been of a king of Egypt, or Ethiopia above Egypt. The uncertainty is removed by our finding that the kings of the twenty-second dynasty employed mercenaries of the Mashwunasha, a Libyan tribe, which apparently supplied the most important part of their hired force. The army, moreover, as consisting partly, if not wholly, of a mercenary force, and with chariots and horsemen, is, save in the horsemen, exactly what the Egyptian army of the empire would have been, with the one change of the increased importance given to the mercenaries, which we know marked it under the twenty-second dynasty. That the army was that of an Egyptian king therefore cannot be doubted.

As to the identification of Zerah with a Usurken, we speak diffidently. That he is called Cushite must be compared with the occurrence of the name Namuret, Nimrod, in the line of the Egyptians, but that line seems rather to have been of Eastern than of Western Ethiopians. The name Usurkan has been thought to be Sargon, in which case it is unlikely, but not impossible, that another Hebrew or Semitic name should have been adopted to represent the Egyptian form. On the other hand, the Cushites in general were of a warlike family, and their sons constantly held military commands. It is unlikely that an important army would have been intrusted to any but a king or prince. Usurken is less remote from Zerah than seems at first sight, and, according to our computation, Zerah might have been Usurken II, but according to Dr. Hinckle's, Usurken I.

5. Preternatural Character of the Deliverance.—The defeat of the Egyptian army by Asa is without parallel in the history of the Jews. On no other occasion did an Israelish army meet an army of one of the great powers of the day and come out victorious and unopposed; Sennacherib was not met in the field; Necho was not met, and overthrew Josiah's army; Nebuchadnezzar, like Shishak, was only delayed by fortifications. The defeat of Zerah thus is a solitary instance, more of the power of faith than of the bravery of the Hebrews, a single witness that the God of Israel was still the same who had led his people through the Red Sea, and would give them the same aid if they trusted in him. We have, indeed, no distinct statement that the defeat of Zerah was a miracle, but we have proof enough that God providentially enabled the Hebrews to vanquish a force greater in number, stronger in the appliances of war, with horsemen and chariots, more accurate in discipline, no raw levies hastily equipped from the king's army, but a seasoned standing militia, strengthened and more terrible by the addition of swarms of hungry Arabs, bred to war, and whose whole life was a time of pillage and devastation. But the event furnishes us proofs that God is to his people ever the same, whether he bids them stand still and behold his salvation, or nerves them with that courage that has wrought great things in his name in our later age; thus it bridges over a chasm between two periods outwardly unlike, yet connected by the immutability of the divine actions. See EGYPT.
Zerahiah (Heb. Zerachyah', זַרְחָצָה, Jehovah has riven; Sept. Zaphata v. r. Zaphaiā), the name of two Hebrews.

1. A priest, son of Uzzi and father of Meraioth, in the ancestry of the later Jewish pontiffs (1 Chron. vi. 6, 51 [Heb. v. 32; vi. 80], and of Ezra [Ezra vii. 4]). B.C. c. 475. See MAZIAH.

2. Father of Elihoenai "of the sons of Pahath-moab" (Ezra viii. 4). B.C. ante 459.

Zeraiem. See TALMUD.

Ze'ered (Heb. id. פַּעָמָה [in pause Ze'rod, פַּעָמָה, Deut. ii, 13; "Zared," Numb. xxii, 12], eicer-brook; Sept. Ζαρεία v. r. Ζαρίπι and Ζαπί, the name of a brook or valley (tr) on the border between Moab and Edom (Deut. ii, 13), where the Israelites encamped before crossing the Arnon (Numb. xxii. 12). It seems to have been the same as the Wady al-Ahay, which runs into the Dead Sea near its S.E. corner (Robinson, Bibl. Res. ii, 157). Its name is derived from the distance, that thinks that the source of the Wady Ghârûndel in the Arabah is the site, as from Mount Hor to el-Ahay is by way of Ezion-geber sixty-five leagues, in which only four stages occur—a rate of progress quite beyond their power. This argument, however, is feeble, since it is clear that the marches mentioned indicate not daily stages, but more permanent encampments. He also thinks the palm-trees of Wady Ghârûndel would have attracted notice, and that Wady Jethum (el-Ithum) could not have been the same, after the journey. The camping station in the catalogue of Numb. xxiii. 27, which corresponds to the "pitching in the valley of Ze'red" of xii. 12, is probably Dibon-gad, as it stands nearest to Ije-abarim (comp. xxxiii. 44, 46 with xxi. 12). The Wady al-Ahay forms the boundary between the districts of Jebal and Kerak. Taking its rise near the castle of el-Ahay, on the route of the Syrian Haj, upon the high eastern slope, it breaks down through the whole chain of mountains (Burchardt, Travels, p. 400) in a very deep ravine, and contains a hot spring which the Arabs call the "Bath of Solomon son of David" (Irby, May 29). The Israelites doubtless crossed it near its upper end, where it would present no difficulty. See TALMUD.

The Jewish interpreters translate the name in the first case "oasies," and in the second "baskets" (Targum of Pseudo-Jonathan), which recalls the "brook of the willows" of Isaiah (xv. 7). The name Safât (willow) is attached to the valley which runs down from Kerak to the Dead Sea; but this appears to be too far north for the Zered. See WILLOWS, BROOK OF THE.

Zer'eda (Heb. with the art. hats-Treerethah', זָרֶדָה, the fortress [Frst.] or the cool [Gesn.]; Sept. Ζαρέπα v. r. Ζαραπί; Vulg. Sarapba), a town in Mount Ephraim, the birthplace of Jeroboam the son of Nebat (1 Kings xi. 26). In an addition made by the Sept. to ch. xii. Sarira (as this place is called by some MSS.) is said to have been built by Jeroboam for Solomon, and it is stated to that it Jeroboam returned when he came out of Egypt. The same passage further substitutes it for Tirzah. It seems to have been located as a fastness on some strong position. On this account, as well as because of its mention with Mount Ephraim, it cannot be (as many think) the same with Zerethath, Zerethath, or Zorathan, which lay in the Jordan valley. Liet. Conder (Test Work in Palest. ii, 940) identifies it with Suraba, a village little more than a mile south of Jufia (Tristram, Bible Places, p. 110).

Zered'athah (Heb. Tetseerathah', זֶרֶדֶתֶא, which is the same word with Zereda above, with local added; Sept. Ζαρέτα v. r. Ζαρακαία and Ζαρακία; Vulg. Sareathian), mentioned as the place of Solomon's brass-foundry (2 Chron. iv. 17), in place of the Zarthan (q. v.) of the parallel passage (1 Kings vii. 46).

Zer'ereth (Heb. Treerereth, זֶרֶדֶרֶת, or rather Zer'earah (Heb. Treerereth, זֶרֶדֶרֶת, with local added, Terereth- thah, זֶרֶדֶרֶתֶא, to Zererah, perhaps an interchange for Zereshad, as some MSS. and versions read; Sept. Tzapa- rusahaan v. r. קְשַׁפְּעָה יִשּׁע; Vulg. Omits), a place mentioned (Judg. vii. 22) in describing the rout of the Maimarites before Gideon: "And the host [camp] fled [to] the mountain of Ephraim to Zereshah [Zererah], and [i.e. even to] as far as the border of Abel-meholah, unto [upon] Tabbath." It appears it have been the same place in the Jordan valley elsewhere called Zereshethah (q. v.) or Zorzetan (q. v.), but not Zereda (q. v.).

Zer'esh (Heb. id. פַּעָמָה, Persian for gold; Sept. Δωρούνα v. r. Σωρούνα; Josephus, Σωρόπα, Ant. xi. 6, 10; Vulg. Saropa), the wife of Haman the Agagite (Esth. v. 10), who advised him to prepare the gallows for Mordecai (ver. 14), but predicted his fall on learning that Mordecai was a Jew (vi. 13). B.C. 474. See ESTHER.

Zereth. See SPAN.

Ze'roth (Heb. Tzereth, זֶרֶדֶרֶת, prob. splendor; Sept. Δωρούνα v. r. Σωρούνα and Αριάδνη; Vulg. Zereth), first named of the three sons of Ashur (the Judahite and founder of the tribe of Zebulun) by one of his wives, Helah (1 Chron. iv. 7). B.C. cir. 1619.

Ze'ri (Heb. Tereri, זָרֶדֶרֶת, "a bunch, as often; Sept. Δωρούνα v. r. Αριάδνη and Ταρη; Vulg. Seror), a Benjamite, son of Bechorath and father of Abiel in the ancestry of king Saul (1 Sam. ix. 1). B.C. cir. 1200.

Zer'ah (Heb. Teererah). זֶרֶדֶרֶת, "emitter with leprous [Gesen.] or ful-filled [Furst.]; Sept. Σορούνα; Vulg. Saruma), the widowed mother of Jeroboam the son of Nebat (1 Kings xi. 26). B.C. 973. In the additional narrative of the Sept. inserted after 1 Kings xii, 24, she is called Sarira (a corruption of Zereda, Jeroboam's native place), and is said to have been a harlot.

Zerub'abel (Heb. Zerubbabel). זֶרֶדֶבּל, "son of Zereda, "Zereda, "Zereda, "Zereda, "Zereda; bow in Satrani; Sept., Σορούνα; Zorobal), the physiarch or head of the tribe of Judah at the time of the return from the Babylonian captivity in the first year of Cyrus. B.C. 536. His exact parentage is a little obscure from his being always called the son of Shealtiel (Ezra iii. 2, 8; v. 5, etc. Hag. i. 1, 12, 14, etc.), and appearing as such in the genealogies ("Zoro- babel," Matt. i. 12; Luke iii. 27), whereas in 1 Chron. iii. 19 he is represented as the son of Pelaiah, Shealtiel's or Salathiel's brother, and consequently as Salathiel's nephew. Probably the genealogy in 1 Chron. exhibits his legal parentage, and he succeeded his uncle as head of the house of Judah—a suppression which tallies with the facts that Salathiel appears as the first-born, and that no notice is assigned to him. It is possible, not that that Josephus speaks of Zorobabel as "the son of Salathiel of the posterity of David and of the tribe of Judah" (Ant. xi. 3, 10). Had he believed him to be the son of Jecohiah, of whom he had spoken (x, 11, 2), he could hardly have failed to say so (comp. 7, 7, 1). (See below.)

1. Canonical History.—In the first year of Cyrus, Zer- rubabel was living at Babylon, and was the recognised prince (N'z comparable) of Judah in the Captivity, what in later times was called מֹשֶׁה יְהוּדָה, or "the Prince of the Captivity." On the issuing of Cyrus's decree, he immediately availed himself of it, and placed himself at the head of those of his countrymen "whose spirit God had raised to go up and build the house of the Lord which is in Jerusalem." It is probable that he was in the king
of Babylon's service, both from his having, like Daniel and the three children, received a Chaldean name (Šešh-bażuṣar), and from his receiving from Cyrus the office of governor (סֶכֶן) of Judæa. The restoration of the sacred vessels which Nebuchadnezzar had brought from the Temple having been effected, and copious presents of silver and gold and goods and beasts having been bestowed upon the captives, Zerubbabel went forth at the head of the returning colony, accompanied by Jeshua the high-priest, and perhaps by the prophetess Haggai and Zechariah, and a considerable number of priests, Levites, and heads of houses of Judah and Benjamin, with their followers. On arriving at Jerusalem, Zerubbabel's first care was to build the altar on its old site, and to restore the daily sacrifice. Perhaps, also, they kept the Feast of Tabernacles, as it is said they did in Ezra iii, 4. But his great work, which he set about immediately, was the rebuilding of the Temple. Being armed with a grant from Cyrus of timber and stone for the building, and of money for the expenses of the builders (Ezra vi, 4), he had collected the materials, including cedar-trees brought from Lebanon to Joppa, according to the promise of Jehovah (Chron. ii, 16), and got together masons and carpenters to do the work by the opening of the second year of their return to Jerusalem. Accordingly, in the second month of the second year of their return, the foundation of the Temple was laid with all the pomp which the occasion demanded. The High Priest, the heads of the families of priests and Levites, with trumpets, and the sons of Asaph with cymbals, singing the very same psalm of praise for God's unfaithful mercy to Israel which was sung when Solomon dedicated his Temple (v, 11-14); while the people responded with a great shout of joy "because the foundation of the house of the Lord was laid." How strongly must have been the emotions of Zerubbabel at this moment! As he stood upon Mount Zion and beheld from its summit the desolations of Jerusalem, the site of the Temple blank, David's palace a heap of ashes, his father's sepulchres defiled and overlaid with rubbish, and the silence of desertion and emptiness hanging oppressively over the streets and waste places of what was once the joyous city; and then remembered how his great ancestor David had brought up the ark in triumph to the very spot where he was then standing, how Solomon had reigned there in all his magnificence and power, and how the priestly and Levitical inhabitants and the nations had been his vassals and tributaries—how must his heart alternately have swelled with pride, and throbbed with anguish, and sunk in humiliation! In the midst of these mighty memories he was but the officer of a foreign heathen despot, the head of a feeble remnant—of half-reincarnated slaves, the captain of a band hardly able to hold up his heads in the presence of their hostile and jealous neighbors; and yet there he was, the son of David, the heir of great and mysterious promises, returned to a wonderful providence to the home of his ancestors. At his bidding the daily sacrifice had been restored after an interval of 40 years. History again begins, and now the foundations of the Temple were actually laid, amid the songs of the Levites singing according to David's ordinance, and the shouts of the tribe of Judah. It was a heart-stirring situation; and, despite all the discouragements attending it, we cannot doubt that Zerubbabel's faith and hope were kindled by it into fresh life. But there were many hindrances and delays to be encountered before the work was finished. The Samaritans or Caubeans put in a claim to join with the Jews in building the Temple; and Zerubbabel and his companions refused to admit them into the work, lest they tried to hinder them from building, and hired counsellors to frustrate their purpose. They probably contrived, in the first instance, to intercept the supplies of timber and stone, and the wages of the workmen, which were paid out of the king's revenue, and then by misrepresentation to calumniate them at the court of Persia. Thus they were successful in putting a stop to the work during the seven remaining years of the reign of Cyrus, and through the eight years of Cambyses and Smerdis. Nor does Zerubbabel appear quite blameless in this connection. He seems to have given way to the way of building the Temple were not such as need have stopped the work; and during this long suspension of sixteen years, Zerubbabel and the rest of the people had been busy in building costly houses for themselves, and one might even suspect that the cedar-wood which had been brought for the Temple had been used to decorate private dwellings (comp. the use of τιμίαν in Hagg. i, 4, and 1 Kings vii, 3, 7). They had, in fact, ceased to care for the desolation of the Temple (Hagg. i, 2-4), and had not noticed that God was re-reading his lukewarmness by withholding his blessing from their labors (ver. 5-11). But in the second year of Darius light dawned upon the darkness of the colony from Babylon. In that year—it was the most memorable event in Zerubbabel's life—the spirit of prophecy suddenly blazed up with a most brilliant light among the returned exiles, and the long silence of the sacred minis- teries till the ministry of John the Baptist was pre- ceded by the stirring utterances of Haggai and Zechariah. Their words fell like sparks upon tinder. In a moment Zerubbabel, roused from his apathy, threw his whole strength into the work, zealously seconded by the people with their voices and with their hands, in the spirit of a great and exalted purpose. They now began to work in the spirit of God. The Temple was not only restored in spirit, but was restored in its place on the very spot where it had been left by the Babylonians. It was finished in the sixth year of Darius, and the dedication was celebrated with the usual solemnities. The Temple was an emblem of a new Israel, a truer Israel, the Messiah, the new Jerusalem, the new Temple. The people were to be a new temple, to be God's house. The Temple was no longer to be the abode of the people, but the people were to be the abode of God; the temple was a symbol of the kingdom.
sion, three young men of his body-guard had a contest who should write the wisest sentence. One of the three (Zerubbabel) writing "Women are strongest, but above all things Truth beware of the victory," and afterwards defending his sentence with much eloquence, was chosen as the winner and placed in the temple. The Temple, accompanied by the families of which the list is given in Ezra ii, Neh. vii; and then follows, in utter confusion, the history of Zerubbabel as given in Scripture. Apparently, too, the compiler did not perceive that Sanballat (Sheshbazzar) was the same person as Zerubbabel. Josephus, indeed, seems to identify Sheshbazzar with Zerubbabel, and tries to reconcile the story in 1 Esdras by saying, "Now it so fell out that about this time Zorobabel, who had been made governor of the Jews that had been in captivity, came to Darius from Jerusalem, for there had been an old friend-ship between those two, the king and his father." But it is obvious on the face of it that this is simply Josephus's invention to reconcile 1 Esdras with the canonical Ezra.

Josephus has another story (ibid. xi, 4, 9) which is not found in 1 Esdras. Zerubbabel going into Samaria, accuses the Samaritans of persecuting the Jews, and of their obtaining a decree from the king commanding his officers in Samaria to supply the high priest with all that he required. But that this is not a genuine historical account appears from the names of the governors, the persons representing a superfluous and empty race of scribes and officials, who are mentioned. (Zerubbabel, Bokhez of Zerubbabel; and the names of the other persons who add their names from the list in 1 Esdras, v, 8, where Zerubbabel, Euenian, and Mardochaus correspond to Zerubbabel, Annanias, and Mardochaeus of Josephus. Moreover, the letter or decree of Darius as given by Josephus is as manifestly copied from the decree of Darius in Ezra vi, 6-10. In all probability, therefore, the document used by Josephus was one of those numerous Apocryphal religious romances of which the Hellenistic Jews were so fond about the 4th and 3d century before Christ, and was written partly to explain Zerubbabel's presence at the court of Darius, as spoken of in 1 Esdras, partly to explain that of Mordecai at the court of Artaxerxes, though he was in the list of those who were Zerubbabel's companions (as it seemed), and partly to give an opportunity for reviling and humiliating the Samaritans. It also gratified the favorite taste for embellishing and corrobating, and giving, as was thought, additional probability to the, Scripture narratives, and dwelling upon bygone times of Jewish triumphs.

3. The list of Zerubbabel's posterity in 1 Chron. iii, 19-24 is somewhat confused. Perhaps its statements may be harmonized with themselves and with the New-Test. genealogies, if the entire passage read thus: (ver. 19) "Of Shemihah, which were Zerubbabel (by his brother Salathiel's widow), Shimeii (to whom may be added Zerubbabel's children, Meshullam, Hananiah, and a daughter Shelomith)," (ver. 20) Hashubah, Ohol, Berechiah, and Hasidiah (called also Jushab-hesed), making in all five sons (besides Zerubbabel, who was reckoned as Salathiel's heir [Ezra iii, 2]). (Ver. 21) The descendants of the above Hananiah were Peliathia and Jeashiah, besides the children of a third son Rephaiah, together with those of Arnan (one of the last-mentioned children), and in like manner the issue again of his sons of Otachel and grandsons of Hananiah. (Ver. 22) The family of this last consisted of six descendants, namely, his son Shemachiah, and grandchild Hattush, Igeal, Bariah, Neariah, and Shaphath. (Ver. 23) Neariah had three sons, Ellionai, Hezekiah, and Azrikam; (ver. 24) and Ellionai again seven, namely, Hodaias, Eliahas, Peliath, Akkab, Johanan, and Eliah, and Anani. An objection, it must be admitted, lies against this arrangement, namely, that it brings down the list to a later date than the close of the Old-Test. canon (B.C. 406), requiring the supposition of the addition of some of the last names by a subsequent hand. Another view, which condenses the lineage within earlier limits, is given under Darius 2. The above adjustment, however, is not only conforming to the natural view of the text, but is also confirmed by not a few striking coincidences in names and descent with the genealogies of our Lord as given by the evangelists. The following table will exhibit these at a glance: (see Strong, Harmony and Exposition of the Gospels, § 3). See Genealogy (Of Christ).
husband's name has not been considered worthy of pres-
servation in the sacred records.

Ze' than (Heb. Zeythan, צְתָה, or Zethan [q. v.]; Sept. Zeṣaḇ' v. r. Zeṣaḇ', Vulg. Ze-
than), fifth named of the seven amanuens of Shema, a Ben-
jaminite (1 Chron. vii, 10). B.C. prob. 1014.

Ze' thar (Heb. Zethar, צֶתַּר, prob. Persian, either star [Gesen.] or sacrifice [Furst.; Sept. 'Aḥarêdaz, Vulg. Zethar], sixth named of the seven eunuchs of Ahaseurus who attended upon the king, and were commanded to bring Vashti into his presence (Esth. i, 10). B.C. 488.

Zi' ba (Heb. Tizba, צִבָּה, briefly Néth, 2 Sam. xvi, 4; plantation [Furst.], or statue [Gesen.]; Sept. Tiszba v. r. Tisba; Vulg. Zéba; Josephus, Τίσβα; Zebur Vibli, Zibo), a person who owns a prominent part, though with doubtful credit to himself, in one of the episodes of David's history (2 Sam. i, 2-12; xvi, 1-4; xix, 17, 29). He had been a slave (עֹבֹד) of the house of Saul before the overthrow of his kingdom, and (probably at the time of the great Philistine incursion which proved so fatal to his master's family) had been set free (Josephus, Ant. vii, 5, 9). It was of him that David inquired if there was any one left of the house of Saul to whom the monarch might show favor. B.C. 1044. Mephibosheth was in consequence found, and having been certified of David's friendship, Ziba was appointed to till the land for the prince, and generally to constitute his household and do him service (2 Sam. i, 2-10). The opportunities thus afforded him he had so far improved that when first encountered in the history he is head of an establishment of fifteen sons and twenty slaves. David's reception of Mephibosheth had the effect of throwing Ziba with his establishment back into the state of bondage from which he had long been freed. It reduced him from being an independent landholder to the position of a mere dependent. When David had to fly from Jerusalem in consequence of the rebell-

ion of Absalom, Ziba met the king with a large and ac-
ceptable present. "But where is Mephibosheth?" asked the fugitive monarch. "In Jerusalem," was the answer; "for he said, 'To-day shall the house of Israel restore me the kingdom of my father.'" Enraged at this, which looked like ingratitude as well as treachery, David thereupon gave to Ziba all the property of Mephibosheth (xxiv, 14). On David's return to his metropolis an explanation took place, when Mephibosheth accused Ziba of having slandered him and David, apparently not being perfectly satisfied with the defence, gave his final award, that the land should be divided between the master and his servant (xix, 24 sq.). B.C. 1023.

Zib' he (Heb. Tishe, צִבְהֶה, dyed [Gesen.] or robber [Furst.; Sept. Zerisáv, Vulg. Sebem], the father of Anah, the wife of Shem, and Enoah was Enoah's wife (Gen. xxxvi, 2). B.C. ante 1603. Although called a Hivite, he is probably the same as Zibiel the son of Seir the Horite (ver. 20, 24, 29; 1 Chron. i, 38, 40), the latter signifying "cave-dweller" and the former being the name of his tribe, for we know nothing of the race of Zibiel, or perhaps Zibiel is a misrepresentation for שִׂר (the Horite). See Ezel.

Another difficulty connected with this Zibiel is that Anah in Gen. xxxvi, 2 is called his daughter, and in ver. 24 his son; but this difficulty appears to be easily explained by supposing that שִׂר refers to Abiobamah, and not to the name next preceding it. The Samaritan, it should be observed, has שִׂר. An allusion is made to some unrecorded fact in the history of the Horites in the passage "This [was that] Anah that found the mules in the wilderness as he fed the asses of Zibeon his father" (ver. 24). The word rendered "mules" (q.v.) in the A.V. is the Heb. מְנַע, yemeni, perhaps the Emim, or giants, as in the reading of the Sam. מְנַע, and so also Onkelos and Pseudo-Jonathan; Gesenius prefers "hot-springs," following the Vulg. rendering. Zibiel was also one of the dukes or phylarchs of the Horites (ver. 29). For the identification with Beeri, father of Judith the Hittite (xxvi, 34), see Békéz, and also Anah.

Zib' 'la (Heb. Tisília, צִבְיָלָה, roe; Sept. Ζίβιλα v. r. Ζίβιλα; Vulg. Sebila), a Benjamite, second named of the seven sons of Shaharaim (q. v.) by one of his two wives, Hodesh (1 Chron. viii, 9). B.C. post 1612.

Zib' 'lah (Heb. Tisilah, צִבְיָלָה, roe; Sept. Ζίβυλα v. r. Ζίβιλα; Vulg. Sebila), a native of Beer-sheba, nephew of King Jehoshaphat of Judah (1 Kings xii, 1) and one of the seven strongholds, and consequently wife (or concubine of) his father, Ahaziah. B.C. 876.

Zich' ri (Heb. Zikri, צִכְרי, my memorial or mem-
orable; Sept. Zegzi v. r. Zegzi, Zegyi, Zaqi, and even sometimes Zayqiyiç, 'Ezqiy; Vulg. Zechri), the name of numerous Hebrews.

1. Last named of the three sons of Ishar the son of Kohah of the tribe of Levi (Exod. vi, 21, where most modern editions of the A.V. incorrectly have "Zithri"). B.C. cir. 1658.

2. Second named of the nine sons of Shimhi of the tribe of Benjamin (1 Chron. viii, 19). B.C. cir. 1612.

5. A "son" of Asaph and father of Micah (1 Chron. ix, 15) elsewhere called Zabdi (Neh. xi, 17) and Zaco-
cur (xii, 35).

6. A descendant of Elizezer the son of Moses, being son of Duram and father of the treasurer Shelomith (1 Chron. xxvi, 25). B.C. ante 1043.

7. The father of Elizezer, which latter was chief of the Reubenites in David's reign (1 Chron. xxvii, 16). B.C. ante 1043.

8. A Judahite whose son Amaasiah volunteered at the head of 200,000 men in Jehoash's army (2 Chron. xxvii, 16). B.C. 909.

9. Father of Elishaphat, which latter was one of the conspirators with Jehoiada to restore Joash (2 Chron. xxiii, 1). B.C. ante 876.

10. An Ephraimite chief in the invading army of Pekah the son of Remaliah (2 Chron. xxvii, 7). B.C. cir. 784. It seems that he took advantage of the victory of this monarch over the army of Judah to penetrate into Jerusalem, where he slew one of the sons of Ahaz, the governor of the palace, and the king's chief minister or favorite. Sept. 'Azur, 'Azur; Josephus, 'Azor, and there is some probability in the conjecture that he was the "Tabael's son" whom Pekah and Rezin designed to set upon the throne of Judah (Isa. vii, 6). See Tabeal.

11. Father of Joel, which latter was superintendent of the Benjamites after the return from Babylon (Neh. xi, 9). B.C. ante 536.

12. A priest of the family of Abijah in the days of the high-priest Joakim the son of Jehosha (Neh. xii, 17). B.C. cir. 480.

Zid' dim (Heb. with the art. hata-Tsidim, צִידִיָּם, the declivities; Sept. Ζίδιῳ Τεψίῳ, apparently reading Ζίδιῇ)
for "]; Vulg. Ašsedim), the first named of the fortified towns of the tribe of Naphtali (Josh. xix, 35), Zer being mentioned next; but the two names are probably to be connected as one. See Zen. The Sept. (as above) identifies the place with Tyre and the Syriac with Zidon, but both these are quite beyond the bounds of Naphtali. The Jerusalem Talmud (Megillah, ch. 1) is probably nearer the mark in identifying Hatz-caddim with Kefr Chittah, which Schwarz (Palest. p. 182) with much probability takes to be the present Hattin, at the northern foot of the well-known Kurn Hattin, or "Horns of Hattin," a few miles west of Tiberias. This identification falls in with the fact that the next names in the list are all known to have been connected with the lake. "The village has several traces of antiquity in its tombs, and is, compared with many others, a clean and thriving place" (Tristram, Bible Places, p. 258).

Zidki'jah (Neh. x, 1). See Zedekiah.

Zi'don (Heb. Tsdon), תִּדְוֹּן; or briefer תְּדֹנֶה, Gen. x, 19; xlix, 13], fishery [Gesen.]; or fortress [Furst.]; Sept. [usually]. New Test., and classical writers generally, Ζίδων; أ. ی. "Zidon" in ver. 15, 19, and New Test., the name of a man and of a place. They have a mutual bearing in relation to origin and birthplace of the Punie race which figured so conspicuously in later times and in Roman history.

1. The eldest son of Canaan (Gen. x, 15; 1 Chron. i, 13). B.C. considerably post 2514. See ETHNIOGRAPHY.

2. One of the most ancient cities of Phoenicia (Gen. x, 19; xlix, 13; Josh. xi, 8; xix, 28; Judg. i, 31; x, 6; xviii, 28; 2 Sam. xxiv, 6; I Kings xvii, 9; Isa. xxiii, 2, 4, 12; Jer. xxv, 22; xxvii, 3; xlv, 4; Ezek. xxvii, 8; xxxii, 21, 22; Joel iii, 4; [Heb. iv, 4]; Zech. ix, 2; Matt. xi, 21, 22; xx, 21; Mark iii, 8; vii, 24, 31; Luke iv, 26; vi, 17; x, 13, 14; Acts xii, 20, xxvii, 3), which still retains its ancient appellation (Phoen. טִדוֹנָה) in the Arabic form Saida. Justin Martyr (who lived in Palestine) derives the name from the Phoenician word for fish, "piscem Phoenices zidon vocant" (xviii, 3); but Josephus, from the son of Canaan (Ant. vi, 2).

1. Situation and Importance.—Zidon lies on the eastern coast of the Mediterranean Sea, in lat. 33° 34' 5" N., less than twenty English miles to the north of Tyre. It is situated in the narrow plain between the Lebanon and the sea, to which it once gave its own name (Josephus, Ant. v, 8, 1, τὸ μέγα πελάγος Ζιδωνὸς πολέως) at a point where a mountain rises a little hill, a spur from which shoots out a few hundred yards into the sea in a south-western direction. On the northern slope of the promontory thus formed stands the old city of Zidon. The hill behind on the south is covered by the citadel (En-cyclopa. Britann. ed. a. v.). It had a very commodious harbor, which is now nearly choked up with sand (Strabo, xvi, 756; Josephus, Ant. xiv, 10, 6).

It was distant one day's journey from the fountains of the Jordan (Is. v, 3, 1), and four hundred stadia from Berytus (Strabo, xvi, 756, 757). It was situated in the allotment of the tribe of Asher, but never conquered (Judg. i, 31); on the contrary, it was sometimes a formidable enemy (x, 12). Even in Joshua's time it was called Tsdon-rabs, or Great Zidon (Josh. xi, 8; xix, 28), or Zidon the Metropolis, scil. of Zidonias. This district appears to have embraced the states of Zidon, Tyre, and Aradus, and its inhabitants are always distinguished from the inhabitants of the city itself (called "dwellers [מעְרֹחי Zidon]" אֲשֵׁרָה, "Zidonians," or dwellers in the districts; and it seems in those early times to have extended northward to the Gbabites, southward to the Carmel (Zebulon's border, Gen. xlix, 13). At a later period the boundaries south were determined by the fluctuating issue of the struggle for the hegemony between Zidon and Tyre, while northward the river Tanymus divided it from the State of Berytus. To the east, where it never had extended very far (Dan, a Zidonian colony, being described as being "far from the Zidonians," Judg. xviii, 7), in early days, it touched, at a later period, the territory of Damascus. The assumption, however, drawn by some writers from the exact way in which the appellation Zidonian is used by
ancient writers—viz. that this name stood for "Phoin-
ician," and Zidonia itself for the whole of Phoenicia, or at least the most important of its colonies. The Tyrians, of later origin than Zidon, if not indeed founded by it, in the same way itself styles it on coins ΔΙΩΝ, "Metropolis of Zidonia," in the sense of its momentary hegemony over Zidon only, possibly also with a secondary reference to the nationality of its inhabitants, mostly immigrants from Zidon.

The frequent allusions to the skillfulness of the Zidonians in arts and manufactures, the extent of their commerce, the information of the ancient writers, are well known (see Homer, Il. vi, 290; xxiii, 743; Odyssey, iv, 617; xiii, 285; xv, 117, 425). Of the trade of the "Zidonian merchants" (Isa. xxiii, 2; Ezek. xxvii, 8), both by land and sea, we hear in Diod. Sic. (xiv, 41, 45); of their glass, linen, and other manufactures, in Pliny (v, 20), Virgil, Strabo (xvi, 10), and other classical writers. The best vessels in the fleet of Xerxes were Zidonianian (Herod. vii, 99, 120). In Hasaelquinia's time (1750) its exports to France were considerable (Travels, p. 166); but at present its traffic is chiefly confined to the neighboring towns (Mannert, Geographie, i, 291; Kitto, Pictorial Bible, notes on Deut. xxxiii and Josh. xix).

2. History. The antiquity of Zidon is evident from the Biblical assertion that Zidon was the first-born of Canaan, though Berytus and Byblos, as towns founded by Cronos, claimed a high mythological antiquity. Tyre is not mentioned in the Pentateuch at all; but Zidon is referred to in terms that give it the pre-eminence among Phoenician cities. From a Biblical point of view, this city is inferior in interest to its neighbor Tyre, with which its name is so often associated. Indeed, in all the passages referred to in which to the two cities are mentioned together, Tyre is named first—a circumstance which might at once be deemed accidental, or the mere result of Tyre's being the nearest of the two cities to Palestine, were it not that some doubt on this point is raised by the order being reversed in two works which were written at a period after Zidon had enjoyed a long temporary sovereignty (Ezra iii, 7; 1 Chron. xxii, 4). However this may be, it is certain that, of the two, Tyre is of greater importance in reference to the writings of the most celebrated Hebrew prophets, and the splendid prophecies directed against Tyre, as a single colossal power (Ezek. xxvi; xxvii; xxviii, 1-19; Is. xxiii, i), have no parallel in the shorter and vaguer utterances against Zidon (Ezek. xxviii, 21-25). The predominance of Biblical notice of Tyre arises from the prophecies relating to its destiny.

If we could believe Justin (xviii, 8), there would be no doubt that Zidon was of greater antiquity than Tyre, as he says that the inhabitants of Zidon, when their city had been reduced by the king of Ashkelon, founded Tyre two years before the capture of Troy. Justin, however, is such a weak authority for any disputed historical fact, and his account of the early history of the Jews, wherein we have some means of testing his accuracy, seems to be so much in the nature of a romance (xvxxvi, 2), that, without laying stress on the unreasonable degree of faith it demands to accept the precise time when Troy was taken, he cannot be accepted as an authority for the early history of the Phoenicians. In contradiction of this statement, it has been further insisted on that the relation between a colony and the mother city among the Phoenicians was sacred, and that as the Tyrians were so absorbed in their relation towards Zidon, the supposed connection between Tyre and Zidon is morally impossible. This is a very strong point; but, perhaps, not absolutely conclusive, as no one can prove that this was the custom of the Phoenicians at the very distant period when, alone, the Zidonians would have built Tyre; if they founded it at all; or that it would have applied not only to the conscious and deliberate founding of a colony, but likewise to such an almost ac-

cidental founding of a city as is implied in the account of Justin. Certainly there is nothing otherwise improbable in the idea that Zidon was, in some sense, the "Great Tyrus," or "the metropolis Zidon," which is twice given to it in Joshua (xi, 8; xix, 29). It is confirmed, likewise, by Zidonians being used as the generic name of the Phoenicians, or Canaanites (xiii, 6; Judg. xviii, 7); and by the reason assigned for there being no deliverer to Tyre at its fall, that its peacetime inhabitants were massacred, that "it was far from Zidon," whereas, if Tyre had been then of equal importance, it would have been more natural to mention Tyre, which professed substantially the same religion, and was almost twenty miles nearer (ver. 29). It is in accordance with the inference to be drawn from these circumstances that in the Homeric poems Tyre is not named, while there is mention both of Zidon and the Zidonians (Odys. xiv, 425; xlv, 743); and the land of the Zidonians is called "Sidonia" (Odys. xiv, 283). One point, however, in the Homeric poems deserves to be specially noted concerning the Zidonians; it is that nowhere are they mentioned as traders, or raised for their nautical skill, for which they were afterwards so celebrated (Herod. vii, 44, 96). The traders are invariably known by the general name of Phoenicians, which would, indeed, include the Zidonians; but still the special praise of Zidonians was as skilled workmen. When Achilles distributed prizes at the games in honor of Peleus, he gave as the prize of the swiftest runner a large silver bowl for mixing wine with water, which had been cunningly made by the skilful Zidonians, but which Phoenicians had brought over the sea (Homer, Il, xxii, 743, 744). When Mene-

laus wished to give to Telemachus the most beautiful and most valuable, he presented him with a similar mixing-bowl of silver, with golden rim—a divine work, the work of Hephaestus—which had been a gift to Menelaus himself from Phaedimus, king of the Zidonians (Odys. iv, 614-618; xv, 425). Again, all the beau-

tifully embroidered robes of Andromache, from which she selected one as an offering to Athens, were the produc-
tions of Zidonian women, which Paris, when coming to Troy with Helen, had brought from Sidonia (II, vi, 299-290). But in no case is anything mentioned as having been brought from Zidon in Zidonian vessels or perhaps by Zidonians. At this time the Phoeni-
cian vessels were principally fitted out at seaports of Phenicia to the north of Zidon.

But very soon after that period the splendor and power of Zidon began to pale before Tyre, which existed already at the time of Joshua, but as a dependency of Zidon. After the memorable defeat which the Zidonians suffered in the war with the king of Ashkelon (13th century B.C.), reported by Justin, when the Zidonians are said to have "retired to their ships and to have founded [?] refounded] Tyre," Zidon almost disappears from history for a time, so utterly enfeebled and insignificant had it become; but the most brilliant rise of its own daughter and rival, to whom all the noblest and most skilful of her children had fled, its fate was almost the same as was that of Tyre herself when Dido-Elissa had founded Carthage, and drew all the most important elements from the old city to the new town," which, it must not be forgotten, had origi-

nally been a Zidonian settlement under the name of Kakabe.

From the time of Solomon to the invasion of Nebu-
chadnezzar Zidon is not often directly mentioned in the Bible, and it appears to have been subordinate to Tyre. When the city is named, it is sometimes called "Zidonia," sometimes it is called "Great Zidon," or "the metropolis Zidon," which is
to Hiram that there was none among the Jews that could skill to hew timber like the Zidonians (1 Kings v, 6); and, possibly, when Ethbaal, the father of Jezebel, is called their king (xvi, 31), who, according to Menander, in Josephus (Ant. viii, 13, 2), was king of the Tyrians. This may likewise be the meaning when Ashethoreth is called the goddess, or abomination, of the Zidonians (1 Kings xi, 5, 68; 2 Kings xxiii, 18); or when women of the Zidonians are mentioned in reference to Solomon (1 Kings xi, 1). And this seems to be equally true of the phrases “daughter of Zidon,” and “merchants of Zidon,” and even once of “Zidon” itself (Isa. xxiii, 2, 4, 12) in the prophecy of Isaiah against Tyre. Notice, however, that Zidon itself, the city properly so called, was threatened by Joel (iii, 4) and Jeremiah (xxvii, 5). Still, all that is known respecting it during this epoch is very scanty, amounting to scarcely more than that one of its sources of gain was trade in slaves, in which the inhabitants did not shrink from selling inhabitants of Palestine; that the city was governed by kings (ibid.; xxv, 22); that, previous to the invasion of Nebuchadnezzar, it had furnished mariners to Tyre (Ezek. xxvii, 8); that, at one period, it was subject, in some sense or other, to Tyre; and that, when Shalamanezer, king of Assyria, invaded Phoenicia, Zidon seized the opportunity to revol. It seems strange to hear of the subjection of one great city to another great city only twenty miles off, inhabited by men of the same race, language, and religion; but the fact is rendered conceivable by the relation of Athens to its allies after the Persian war, and by the history of the Italian republics in the Middle Ages. It is not improbable that its rivalry with Tyre may have been influential in inducing Zidon, more than a century later, to submit to Nebuchadnezzar, apparently without offering any serious resistance.

During the Persian domination, Zidon seems to have assumed its highest point of prosperity; and it is recorded that, towards the close of that period, it far excelled all other Phoenician cities in wealth and importance (Diod. Sic. xvi, 44; Mela, i, 12). It is very probable that the long siege of Tyre by Nebuchadnezzar had tended not only to weaken and impoverish Tyre, but likewise to enrich Zidon at the expense of Tyre; as it was an obvious expedient for any Tyrian merchants, artisans, and sailors, who deemed resistance useless or unwise, to transfer their residence to Zidon. However this may be, in the expedition of Xerxes against Greece, the Zidonians were highly favored, and were pre-eminent among the other Phoenicians in the capture of Messene. When, from a hill near Abydos, Xerxes witnessed a boat-race in his fleet, the prize was gained by the Zidonians (Herod. vii, 44); when he reviewed his fleet, he sat beneath a golden canopy in a Zidonian galley (ibid. vii, 100); when he wished to examine the mouths of the river Peneus, he intrusted himself to a Zidonian galley, as he was wont on similar occasions (ibid. vii, 128); and when the Tyrians and general officers of his great expedition sat in order of honor, the king of the Zidonians sat first (ibid. vii, 67).

Again, Herodotus states that the Phoenicians supplied the much-needed provisions for the great fleet of the Persians, the Zidonians (vii, 96). Lastly, as Homer gives a vivid idea of the beauty of Achilles by saying that Nireus (thrice-named) was the most beautiful of all the Greeks who went to Troy, after the son of Peleus, so Herodotus completes the triumph of the Zidonians when he praises the vessels of Artemisia (probably for the daring of her crew) by saying that they were the most renowned of the whole fleet, “after the Zidonians” (vii, 9).

The prosperity of Zidon was suddenly cut short by an unsuccessful revolt against Persia, which led to one of the most disastrous catastrophes in history. Unlike the siege and capture of Tyre by Alexander the Great, which is narrated by several writers, and which is of commanding interest through its relation to such a renowned conqueror, the fate of Zidon is only known through the history of Diodorus (xvi, 42-45), and is mainly connected with Artaxerxes Ochus (B.C. 359-338), a monarch who is justly regarded with mingled aversion and contempt. Hence the calamitous overthrow of Zidon has not, perhaps, attracted so much attention as it deserves. The principal circumstances were these. While the Persians were making preparations in Phœnicia to put down the revolt in Egypt, some Persian satraps and generals behaved oppressively and insolently to Zidonians in the Zidonian division of the city of Tripolis. On this the Zidonian people projected a revolt; and, having first concerted arrangements with other Phœnician cities and made a treaty with Nectanebus, they put their designs into execution. They commenced by committing outrages in a residence and park (παραλίθος) of the Persian king; they burned a large store of fodder which had been collected for the Persian cavalry; and they seized and put to death the Persians who had been guilty of insults towards the Zidonians. Afterwards, under their king Tennes, with the assistance from Egypt of four thousand Greek mercenaries under Mentor, they expelled the Persian satraps from Phœnicia; they strengthened the defences of their city; they equipped a fleet of one hundred triremes; and prepared for a desperate resistance. But the Persians, who for long had occupied their own city, revolting, proved a truer to their cause; and, in performance of a compact with Ochus, he betrayed into the king’s power one hundred of the most distinguished citizens of Zidon, who were all shot to death with javelins. Five hundred other citizens, who went out to the king with ensigns of suppliance, shared the same fate; and, by concert between Tennes and Mentor, the Persian troops were admitted within the gates and occupied the city walls. The Zidonians, before the arrival of Ochus, had burned their vessels to prevent any one leaving the town; and when they saw themselves surrounded by the Persian troops, they adopted the desperate resolution of shutting themselves up with their families, and setting fire each man to his own house (B.C. 351). Forty thousand persons are said to have perished in the flames. Tennes himself did not save his own life, as Ochus, notwithstanding his promise to the contrary, put him to death. The privilege of searching the ruins was sold for money.

After this dismal tragedy Zidon gradually recovered from the blow; fresh immigrants from other cities must have settled in it; and probably many Zidonian sailors survived who had been plying their trade elsewhere in merchant vessels at the time of the capture of the city. The battle of Issus was fought about eighteen years afterwards (B.C. 333); and then the inhabitants of the restored city opened their gates to Alexander of their own accord, from hatred, as is expressly stated, of Darius and the Persians (Arrian, Anab. II, 15). The impolicy as well as the cruelty of Ochus in his mode of dealing with the revolt of Zidon now became apparent; for the Zidonian fleet, in joining Alexander, was an essential element of his success against Tyre. After aiding to bring upon Tyre as great a calamity as had afflicted their own city, they were so far merciful that they saved the life of Ochus, and showed a lenient kindness to the Tyrians by sending among them in their ships and then transmitting them to Zidon (Quintus Curtius, iv, 4, 15).}

Greek Coin of Zidon.
part in history. It became, however, again a flourishing town; and Polybius (v, 70) incidentally mentions that Antiochus, in his war with Ptolemy Philopator, encamped over against Zidon (B.C. 218), but did not venture to attack it from the abundance of its resources and the great number of its inhabitants, either natives or refugees. Subsequently, according to Josephus (Ant. xiv, 10, 2), Julius Caesar wrote a letter respecting Hry- canus, which he addressed to the "Magistrates, Council, and Demos of Sidon." This shows that up to that time the Zidonians enjoyed the forms of liberty, though Dion Cassius says (L. xii, 7) that Augustus, on his arrival in the East, deprived them of it for seditionious conduct. Not long after Strabo, in his account of Phoenicia, says of Tyre and Sidon, "Both were illustrious and splendid cities before, and now; but which should be called the capital of Phoenicia is a matter of dispute between the inhabitants" (xvi, 756). He adds that it is situated on the mainland, on a fine, naturally formed harbor. He speaks of the inhabitants as cultivating the sciences of arithmetic and astronomy; and says that the best opportunities were afforded in Zidon for acquiring a knowledge of these and of all other branches of philosophy. He adds that in his time there were distinguished philosophers—natives of Zidon—as Boethus, with whom he studied the philosophy of Aristotle, and his brother Diotous. It is to be observed that both these names were Greek; and it is to be presumed that in Strabo's time Greek was the language of the educated classes at least, both in Tyre and Zidon. This is nearly all that is known of the state of Zidon when it was visited by Christ. It is about fifty miles distant from Nazareth, and is the most northern city which is mentioned in connection with his journeys. Pliny notes the manufacture of glass at Zidon (Nat. Hist. v, 17, 19); and during the Roman period we may conceive Tyre and Zidon as two thriving cities, each having an extensive trade, and each having its staple manufacture—the latter of glass, and Tyre of purple dyes from shell-fish.

Zidon is mentioned several times in the New Test. Jesus went once to the coasts of Tyre and Zidon (Matt. xv, 31); Sarepta, a city of Sidon, is referred to (Luke iv, 26); and Paul touched at Zidon on his voyage from Cesarea to Rome (Acts xxvii, 3). Whatever be the doom of Tyre and Zidon, it shall be "more tolerable in the day of judgment" than that of Chorazin and Bethsaida, which saw the Saviour's mighty works, but were unconvinced by them; for had these towns been so privileged, "they would have repented long ago in sackcloth and ashes."

Zidon was sometimes dignified with the Greek title of Nauarchus (commander of ships), and was also called by the Romans Colonia Augusta and Metropolita. Christianity appears to have been introduced here at an early period (Acts xxvii, 3), and a bishop of Zidon attended the Council of Nicaea in 325. After the conquest of Syria by the Moslems (in 636), Zidon surrendered to her new masters without resistance, and it was then in an enfeebled condition. It shared generally the fortunes of Tyre, with the exception that it was several times taken and retaken during the wars of the Crusades, and suffered, accordingly, more than Tyre previous to the fatal year B.C. 1291. Since that time it never seems to have fallen quite so low as Tyre. Through Fakhr ed-Din, emir of the Druses between 1594 and 1634, and the settlement at Saïda of French commercial houses, it had a revival of trade in the 17th and part of the 18th century, and became the principal city on the Syrian coast for commerce between the East and the West (see Mémoires du Chevalier d'Ar-
two lines of Phoenician writing were found engraved upon the chest of the royal personage—king Ash-
manezer II—who it represents. A smaller, abbrevi-
vated inscription runs round the neck. The age of
this monument has variously been conjectured as of
the 11th century B.C. The exact position in honor of
the gods. This sarcophagus is now in the Ninkeveh division
of the sculptures in the Louvre. At first sight the ma-
terial of which it is composed may be easily mistaken,
and it has been supposed to be black marble. On
the authority, however, of M. Suchard of Paris, who has ex-
amined it very closely, it may be stated that the sarcopha-
gagus is of black avenite, which, as far as is known, is
more abundant in Egypt than elsewhere. It may be
added that the features of the countenance on the lid
are decidedly of Egyptian type, and the head-dress
is Egyptian, with the head of a bird sculptured on what
might seem the place of the right and left shoulder.
There can therefore be little reason to doubt that this
sarcophagus was either made in Egypt and sent thence
to Zidon, or that it was made in Phoenicia in imitation
of similar works of art in Egypt. The inscriptions
themselves are the longest Phoenician inscriptions
which have come down to our times. A translation of them
was published by Prof. Dietrich at Marburg in 1856, and
by Ewald at Göttingen in 1856. The king's title is "king
of the Zidonians," and, as is the case with Ethan, men-
tioned in the book of Kings (I Kings xvi., 31), there
must remain a certain doubt whether this was a title
ordinarily assumed by kings of Zidon, or whether it had
a wider signification. We learn from the inscription
that the king's mother was a priestess of Ashoter.

The following is a portion of the most remarkable
(larger) inscription divided into words (there is no di-
vision even of the letters in the original) according to
the sense—in some instances merely conjectured—and
transcribed into Hebrew characters, to which is subjoin-
ed a translation, principally following Munk and Levy,
but occasionally differing from either:

1. רֶאֶל יָלָע בְּכֵן פֶּרֶס עָבָד הַבֶּי
2. הַקְּנֵי הַתֶּלֶת גְּלֵם הַפַּל בְּכֵן אֲבָד
3. דֶּרֶךְ צְרָמָה לַמַּעֲבָד וְשָׁאָל הָאֵל
4. אִנִּי בְּכֵן נִכְּפָר הָאֵל
5. לֹא יִכְּפָר עַל גֶּרֶם בְּכֵן לֹא יִכְּפָר
6. יָדָה אֲשֶּׁר אִדְּרָג לָעָבָד שְּלֹשֶּׁה
7. יָדָה אֲשֶּׁר אִדְּרָג לָעָבָד שְּלֹשֶּׁה
8. בְּכֵן לֹא יִכְּפָר עַל גֶּרֶם
9. לֹא יִכְּפָר עַל גֶּרֶם
10. אָשֶׁר יִכְּפָר עַל גֶּרֶם
11. יָדָה אֲשֶּׁר אִדְּרָג לָעָבָד שְּלֹשֶּׁה
12. לֹא יִכְּפָר עַל גֶּרֶם
In the month of Bul, in the year 14 (XIV) of my reign, [1] King Ashurban, king of the Zidonians, (9) son of King Tabnit, king of the Zidonians: spoke king Ashurban, king of the Zidonians, saying: "I have been stolen away from you twice in the course of this year, (7) days of which are seven. The whilom Great is dumb — the Son of God is dead. And I rest in this grave, even in this tomb, (4) in the place which I have built. My adoration to all the ruling powers and all men: Let no one open this resting-place, and (2) not search through it. They have no treasure with us; and let him not bear away the couch of my rest, and not trouble (6) us on this resting-place by disturbing the couch of my slumber, except if people should persuade thee, do not listen to their speech. For all the ruling powers and (7) all men who should open the tomb of my rest, or any man who should bear away the couch of my rest, or any man who should trouble me or (8) this place there are two mighty kings who will rule over them, and (10) cut them off with their dynasty. If any human being should open this resting-place, and any man should carry away (11) it then he of royal seed or a man of the people — there shall be unto them neither root below nor (12) fruit above, nor honor among the living under the sun..."
ZILLAH

The situation of the town is difficult to determine, notwithstanding so many notices. On the one hand, that it was in "the south" (Nēgeb) seems certain, both from the towns named with it, and also from its mention with "the south of the Cherethites" and "the south of Caleb," some of whose descendants we know were inhabitants of Zelophehad, perhaps even of Zelah (1 Sam. xxv, 1). On the other hand, this is difficult to reconcile with its connection with the Philistines, and with the fact—which follows from the narrative of 1 Sam. xxx (see vs. 9, 10, 21)—that it was north of the brook Besor. The word employed in xxxii, 5, 7, 11, to denote this, is awad. Zelah itself it stood as a place, a not awad, of Shephelah, as it must have had Ziklag stood in the ordinary lowland of Philistia, but has-Sādekh, which Prof. Stanley (Sin. and Pal. App. § 15) renders "the field." On the whole, though the temptation is strong to suppose (as some have suggested) that there were two places of the same name, the only conclusion seems to be that Ziklag was in the south country, with a portion of which the Philistines had a connection, which may have lasted from the time of their residence there in the days of Abraham and Isaac.

Ziklag does not appear to have been known to Eusebius and Jerome, or to any of the earlier travellers. Mr. Rowlands, however, in his journey from Gaza to Suez in 1842 (in Williams, Holy City, i, 463-468), was told of "an ancient site called Aštuq, or Kasāṭ, with some ancient walls," three hours east of Sèbata, which again was two hours and a half south of Kedesh. This he considers as identical with Zelah. Dr. Robinson had previously (in 1838) heard of Aštuq as lying south-west of Mīth, on the way to Abūd (Bibl. Res, ii, 201), a position not discordant with that of Mr. Rowlands. The identification is supported by Mr. Wilton (Nēgeb, p. 209); but in the Arabic form of the name, sinb, which prompted Mr. Rowlands's conjecture almost entirely disappéars (אשָׁטְאָו, אֱשָׁטְאָו).—Smith. The English engineers think that they have discovered the name and site of Ziklag in the ruins still called Khirbet Zuheilikah, occupying three small hills, nearly half a mile apart, in the form of an equilateral triangle, together with ancient cities, situated in an open, rolling plain eleven miles east-south-east of Gaza, and nineteen south-west of Beit-Jibrin (Quar. Report of "Pal. Explor. Fund," Jan. 1878, p. 12 sq.).—See SIMON.

Zillah (Heb. Tissâlah, קִזְלָא, skade; Sept. Σιλίλή; Vulg. Sella), last named of the two wives of Lamech the Caineite, to whom he addressed his song (Gen. iv, 19, 22, 23). B.C. cir. 5800. She was the mother of Tubal-Cain and Naamah. Dr. Ball (Gen. on Gen. iv, xxvi, 82) regards Zillah as Lamech's wives and of his daughters as significant of the transition into the period of art which took place in his time, and the corresponding change in the position of the woman. "Naamah signifies the lovely, beautiful woman; while the wife of the first man was simply Eve, the life-giving... The women were, in the age of Lamech, no more regarded merely as the propagators of the human family; beauty and gracefulpleness began to command homage. Even the wives of Lamech manifest the transition into this epoch of beauty; for while one wife, Zillah, reminds still of assistance and protection ("shadow), the other, Adah, bears a name almost synonymous with Naamah, and likewise signifying ornament and loveliness." In the apocryphal book of Jashar, Adah and Zillah are both daughters of Cainan. Adah bare children, but Zillah was barren till her old age, in consequence of some noxa, which her husband gave her to preserve her beauty and to prevent her iron bearing. See LAMECH.

Zillah (Heb. Tissâlah, קִזְלָא, a trickling; Sept. Σιλίλή; Josephus, Σηλίλη, Ant. i, 19, 7; Vulg. Zelpha), a female servant of Laban, whom he gave to Leah on her marriage with Jacob (Gen. xxix, 24), and whom Leah eventually induced him to take as a concubine wife, in which capacity she became the mother of Gad and Asher (xxx, 9-18; xxxvi, 26; xxxvii, 2; xlvi, 18). B.C. 1919.

Zilli'athi (Heb. Tissâliyy, קִזְלַיָּה, shady or my shadow; Sept. Σιλακίτει, r. Σιλακιτὶ and Συμάκα; Vulg. Salsa- thiti and Selathiti), the name of two Hebrews.

1. Fifth named of the nine "sons" of Shimmhi, and one of the Benjamite chiefs resident at Jerusalem (1 Chron. viii, 20), B.C. post 1672.

2. Last named of the seven Manasseite captains who joined David at Ziklag (1 Chron. xii, 20). B.C. 1054.

Zimm'ah (Heb. Zimmâh', קִזַמְיָה, purpose; Sept. Ζεμψα, r. Ζαμψα and Ζαμψα; Vulg. Zemunia or Zammia), the name of two or three Levites.

1. A Gersonite, "son of Jahath and father of Jahoz (1Chron. vi, 20); probably the same with the "son" of Shimein and father of Jahath (ver. 42). B.C. post 1674.

2. Father or ancestor of Jahoz, which latter was a Gersonite in the reign of Hezekiah (2Chron. xxix, 12). B.C. ante 726. At a much earlier period we find the same collocation of names, Zimmah and Jahoz as father and son (1 Chron. vi, 20). This is but an evidence of the frequent recurrence of the same names in a family (comp. "Mahat the son of Amsaiai" in 2Chron. xxix, 12 with the same in 1 Chron. vi, 85; "Joel the son of Azariah" in 2Chron. xxix, 12 and 1Chron. vi, 86; and "Kish the son of Abdai" in 2Chron. xxix, 12 with "Kishi the son of Abdai" in 1 Chron. vi, 44).

Zimmân (Heb. Zimmâra, קִזַמְוָרָה, celebrated; Sept. Ζεμπυρα, r. Ζαμπυρα, Ζαμπυρα, etc.; Vulg. Zama and Zammara), first named of the nine sons of Abraham by Keturah (Gen. xxxv, 2; 1 Chron. i, 82). B.C. cir. 2020. His descendants are not mentioned, nor is any hint given that he was the founder of a tribe; the contrary would rather appear to be the case. Some would identify Zimmân with the Zimrii of Jer. xxv, 25, but these lay too far to the north. The Greek form of the name, as found in the Sept., has suggested a comparison with Ζαμβυρα, the chief city of the Cimóbololitina, who dwelt on the Red Sea, west of Mecca. But this is extremely doubtful, for this tribe, probably the same with the ancient Kenda, was a branch of the Joktanite Arabs, who in the most ancient times occupied Yemen, and may only have come into possession of Zabram at a later period (Knobel, Gen.). Hitziq and Lengerke propose to connect the name Zimmân with Zimrius, a district of Ethiopia mentioned by Pliny (xxxvi, 25); but Grotius, with more plausibility, finds a trace of it in the Zimmâra, a tribe in the Italian colony of Mirone, in the region of Zimmân. The identification of Zimmân with the modern Beni Omars and the Bani Zomanon of Diodorus, proposed by Mr. Forster (Geogr. of Arabia, i, 431), cannot be seriously maintained. Winer (Hand. s. v.) suggests the Zim- mara of Asia Minor (Ptolemy, v, 7; 2: Pliny, x, 20 or Zimmara (Zeumpa) of Asia (Ptolemy, vi, 17, 8). See ARABIA.

Zim'ri (Heb. Zimmri', קִזַמְרִי, my song or celebrated; Sept. Ζαμπυρα, r. Zeaμpyra, Ζαμπυρα, etc.; Josephus, Zeampyra, Ant. viii, 12, 5; Vulg. Zambrius), the name of several Hebrews, and apparently one foreign tribe.

1. First named of the five sons of Zerah the son of Judah (1Chron. i, 6). B.C. post 1674.

2. The son of Shema, a Simeonite, smaitain, slain by Phinehas with the Midianitish princess Cozbi (Numb. xxv, 14). B.C. 1618. When the Israelites at Shittim were smitten with plagues for their impure worship of Baal Peor, and were weeping before the tabernacle, Zimri, with a shameless disregard of his own high position on account of the sufferings of his tribe, brought into their presence the Midianitess, in the sight of Moses and in the sight of the whole congregation. The fierce anger of Phinehas was aroused, and in the swift vengeance with which he pursued the offenders, he gave the first indication of that uncompromising spirit which charac-
terized him in later life. The whole circumstance is much softened in the narrative of Josephus (Ant. iv, 6, 10-12), and in the hands of the apologists is divested of all its vigor and point. In the Targum of Jonathan ben-Uziel several traditional details are added. Zimmr retorts upon Moses that he himself had taken to wife a Midianitess, and twelve miraculous signs attend the vengeance of Phinehas. See PHINEHAS.

It is a turn of the desert to the west of the Dead Sea, Ghor, and Arabah (possibly including the two latter, or portions of them) on the east, and the general plateau of the Th which stretches westward. The country in question consists of two or three successive terraces of mountain converging to an acute angle (like stairs where there is a turn in the flight) at the Dead Sea's southern verge, towards which also they slope. Here the drainage finds its chief vent by the Wady el-Fikre into the Ghor, the remaining waters running by smaller channels into the Arabah, and ultimately by the Wady el-Jeb also to the Ghor. Judging from natural features in the vagueness of authority, it is likely that the portion between and drained by these wadies is the region in question; but where it ended westward, whether at any of the above-named terraces or blending imperceptibly with that of Paran, is quite uncertain. Josephus (Ant. iv, 6) speaks of a "hill called Sin" (Зин) where Miriam, his sister, and the people had "come to the desert of Zin," was buried. This "Sin" of Josephus may recall the name Zin, and, being applied to a hill, may, perhaps, indicate the most singular and wholly isolated conical accessibility named Modera (Madura, or Madara), standing a little south of the Wady Fikre, near its outlet into the Dead Sea; this would precisely agree with the tract of country above indicated (Numb. xx, 1; see Seetzen, Reisen, iii, Hebrews to Madara; Wilton, Negeb, p. 127, 134). See KADESH.

ZIN (Heb. Zīn). N27; perhaps abundance; Sept. Ze2, Vulg. Zīn), second named of the four sons of Shimei the Gershonite (1 Chron. xxiii, 10). B.C. 1948. In ver. 11 he is called Zīnā (q. v.), and some copies of the MSS. here have Zīn (N27), like the Sept. and Vulg.

Zinzendorf, Nicholas Lewis, Count von, D.D., founder of the Herrnhuters, or Moravian Brethren, was born at Dresden, May 26, 1700. According to his own account (in his Natural Reflections on Various Subjects), he aspired to form a society of believers from his boyhood. On coming of age in 1721, he settled with this object in view, on his estate at Herrnhut in Upper Lusatia, and was there joined by several prolesyetes from Bohemia. By 1732 the numbers who had locked around him amounted to six hundred, and all these were subject to a species of ecclesiastical discipline or monastic despotism which brought them in spirit and body, or was intensified by it, under the immediate charge of their leader. From an adjacent hill called the Huthberg was derived the name of the colony, Huth des Herrn, contracted to Herrnhut, and from this the name of the sect. The appellation Moravian Brethren was assumed for his party by count Zinzendorf for the sake of connection with the separatists of Bohemia and Moravia, partly derived from Valdo, the forerunner of Luther: some of these, indeed, were among his colonists. Zinzendorf assumed various titles as the chief of the Herrnhuters, all of which really pointed to a pontificate as his function. From 1733 his missionaries began to spread, not only to the adjoining parts of East, the Beni-Kedem. Nothing further is known respecting Zimmr, but it may possibly be the same as, or derived from, ZIMBAR (q. v.).

Zin (Heb. Tein, "with hill, Toshn, "he has, Numb. xxxiv, 4; or Toshn, "he has, Josh. xv, 3), a flat plain or palm-tree); Sept. Sin v. r. Sinu, etc.; Vulc. Sinu, a wilderness (22) or open, uncultivated region on the south of Palestine and westward from Idumea, in which was situated the city of Kadesh-barnes (Numb. xiii, 22; xx, 14; xxxvii, 36; xxxiv, 3; Deut. xxxii, 51; Josh. xv, 1). It evidently was a portion of the desert near the Sea of Chinnereth, or the Arabah (possibly including the two latter, or portions of them) on the east, and the general plateau of the Th which stretches westward. The country in question consists of two or three successive terraces of mountain converging to an acute angle (like stairs where there is a turn in the flight) at the Dead Sea's southern verge, towards which also they slope. Here the drainage finds its chief vent by the Wady el-Fikre into the Ghor, the remaining waters running by smaller channels into the Arabah, and ultimately by the Wady el-Jeb also to the Ghor. Judging from natural features in the vagueness of authority, it is likely that the portion between and drained by these wadies is the region in question; but where it ended westward, whether at any of the above-named terraces or blending imperceptibly with that of Paran, is quite uncertain. Josephus (Ant. iv, 6) speaks of a "hill called Sin" (Zin) where Miriam, his sister, and the people had "come to the desert of Zin," was buried. This "Sin" of Josephus may recall the name Zin, and, being applied to a hill, may, perhaps, indicate the most singular and wholly isolated conical accessibility named Modera (Madura, or Madara), standing a little south of the Wady Fikre, near its outlet into the Dead Sea; this would precisely agree with the tract of country above indicated (Numb. xx, 1; see Seetzen, Reisen, iii, Hebrews to Madara; Wilton, Negeb, p. 127, 134). See KADESH.

ZIN (Heb. Zīn). N27; perhaps abundance; Sept. Ze2, Vulg. Zīn), second named of the four sons of Shimei the Gershonite (1 Chron. xxiii, 10). B.C. 1948. In ver. 11 he is called Zīnā (q. v.), and some copies of the MSS. here have Zīn (N27), like the Sept. and Vulg.

Zinzendorf, Nicholas Lewis, Count von, D.D., founder of the Herrnhuters, or Moravian Brethren, was born at Dresden, May 26, 1700. According to his own account (in his Natural Reflections on Various Subjects), he aspired to form a society of believers from his boyhood. On coming of age in 1721, he settled with this object in view, on his estate at Herrnhut in Upper Lusatia, and was there joined by several prolesyetes from Bohemia. By 1732 the numbers who had locked around him amounted to six hundred, and all these were subject to a species of ecclesiastical discipline or monastic despotism which brought them in spirit and body, or was intensified by it, under the immediate charge of their leader. From an adjacent hill called the Huthberg was derived the name of the colony, Huth des Herrn, contracted to Herrnhut, and from this the name of the sect. The appellation Moravian Brethren was assumed for his party by count Zinzendorf for the sake of connection with the separatists of Bohemia and Mo-
characteristics; under this head some singular details might be given. Something might be said also on the connection of a certain marriage-rite with the theory of regeneration, the efficacy of which was probably tried by the Herrnhutens in common with the Quakers. Count Zinzendorf died among his people, May 9, 1760. See Moravians. (W. F. S.)

Z'ion (Heb. *Tsion*; *Gesen.* syn. *Vulg. Sion*; A. V. "Sion" in New Test.), a prominent hill ("W") of Jerusalem, being generally regarded as the south-westernmost and the highest of those on which the city was built. It included the most ancient part of the city with the citadel, and, as first occupied for a palace, was called the city of David (2 Chron. v, 2). Being the original site of the tabernacle pitched by David for the reception of the ark, it was also called the holy hill, or hill of the sanctuary (Psa. ii, 6). By the Hebrew prophets the name is often put for Jerusalem itself (Isa. viii, 18; x, 34; xxx, 19; xxxii, 14; Psa. xlvii, 11, 12; comp. Rom. ix, 33; xi, 26; 1 Pet. ii, 6; Rev. xiv, 1); also for its inhabitants, sometimes called sons or daughters of Zion (Isa. i, 27; xii, 6; xi, 9; xiii, 14; li, 1; Psa. ix, 14; xxvii, 8; Zech. ii, 7, 10; ix, 9, 18; Zeph. iii, 14, 16; Joel ii, 28; Matt. xxii, 5; John xii, 15); and for the spiritual Zion, the church or city of the living God (Heb. xii, 22, 28; Gal. iv, 26; Rev. iii, 12; xxi, 2, 10).

There never has been any considerable doubt as to the identity of this hill. Josephus, indeed, singularly enough appears to name Zion; but he evidently calls the same hill the site of the Upper City. In modern times Fergusson has attempted to identify it with Mount Moriah (Jerusalem Revisted: the Temple, etc.), and Capt. Warren, with equal futility, has contended for its identity with Akra (The Temple or the Tomb [Lond. 1880]). The mistake of the latter has originated from not observing that Josephus uses ἄκρα, the summit, in two senses: (a) the citadel on Mount Zion (Ant. vii, 3, 1, where it is clearly distinguished from "the lower city"), and (b) the hill Akra (ibid. 2, where it is clearly distinguished from "the upper city"). See ACRA.

Of the several hills on which Jerusalem was built, Zion is the largest and, in many respects, the most interesting. It extends considerably farther south than the opposite ridge of Moriah and Ophel. The western and southern sides rise abruptly from the bed of the valley of Hinnom, and appear to have originally consisted of a series of rocky precipices rising one above another like stairs; but now they are partially, and in some places deeply, covered with loose soil and the debris of buildings. The southern brow of Zion is bold and prominent; and its position, separated from other heights and surrounded by deep valleys, makes it seem loftier than any other point in the city, though it is in reality lower than the ground at the north-west corner of the wall. The elevation of the hill above the valley of Hinnom at the point where it bends eastward is 300 feet, and above the Kidron, on its east, 500 feet. On the south-east, Zion slopes down in a series of cultivated terraces steeply, though not abruptly, to the site of the "King's Gardens," where Hinnom, the Tyropo-on, and the Kidron unite. Here and round to the south the declivities are sprinkled with olive-trees, which grow luxuriantly among narrow strips of corn. The scene cannot but recall the words of Micah, "Zion shall be ploughed like a field" (Jer. xxxvi, 18). On the east, the descent to the Tyropo-on is at first gradual, but as we proceed northward to the modern wall it becomes steeper; and about 300 yards within the wall, directly facing the south-west angle of the Haram, there is a precipice of rock from twenty to thirty feet high. The declivity is here encumbered with heaps of flint and rubbish, overgrown in places with prickly-pear. The Tyropo-on was anciently much deeper at this point than it is now; it has been filled up by the ruins of the bridge, the Temple walls, and the palaces of Zion to a depth of more than 180 feet. The best view of the eastern slopes of Zion and the southern section of the Tyropo-on is obtained from the top of the wall in descending from Zion Gate to the Dung Gate.

From the descriptions and incidental notices of Josephus the following facts may be gathered: that the "Upper City," built on Zion, was surrounded by ramparts; that it was separated from the "Lower City" (Akra) by a valley called the Tyropo-on; that upon a crest of rock thirty cubits high on the northern brow of Zion stood three great towers—Hippicus, Phasselas, and Mariamme; that the wall enclosing the Upper City on the north ran by these towers to a place called the Xystus and joined the western wall of the Temple area; that there was a gate in that western wall northward of this point of junction opening into Akra; that the Xystus was near to and commanded by the western wall of the Temple area, though not united to it, and that the royal palace adjoined and overlooked the Xystus on the west, while it was also attached to the great towers above mentioned; and, lastly, that both the Xystus and palace were connected at their southern end by a bridge with the Temple area (see Josephus, War, v, 4; vi, 6, 2; li, 16, 8; Ant. xv, 11, 5).

On the summit of Zion there is a level tract extending in length from the citadel to the Tomb of David, about 600 yards; and in breadth from the city wall to

Mount Zion as seen from the Hill of Evil Conneel. (From a photograph.)
the eastern side of the Armenian convent, about 250 yards. A much larger space, however, was available for building purposes, and was at one time occupied. Now not more than one half of this space is enclosed by the modern wall, while fully one third of that enclosed is taken up with the barrack-yards, the convent gardens, and the waste ground at the city gate. All without the wall, with the exception of the cemeteries and the cluster of houses round the Tomb of David, is now cultivated in terraces and thinly sprinkled with olive-trees.

Zion was the first spot in Jerusalem occupied by buildings. Upon it stood the stronghold of the Jebusites, which so long defied the Israelites, and was at last captured by king David (Numb. xiii, 29; Josh. xv, 63; Judg. i, 21; 2 Sam. v, 5-8). Upon it that monarch built his palace, and there for more than a thousand years the kings and princes of Israel lived and ruled (ver. 9 etc.). In Zion, too, was David buried, and fourteen of his successors on the throne were laid near him in the royal tomb (1 Kings ii, 10; xi, 40; xiv, 31, etc.). Zion was the last spot that held out when the Romans under Titus captured the city. When the rest of Jerusalem was in ruins, when the enemy occupied the courts of the Temple, the remnant of the Jews from the walls of Zion haughtily refused the terms of the conqueror, and perished in thousands around and within the palace of their princes.
The city which stood on Zion was called successively by several names. It was probably the Stilem of Mechi- zedek (comp. Gen. xiv, 18 with Pss. lxxvi, 2); then it became Jebus under the Jebesites, so called from a son of Canaan (Gen. x, 16; 1 Chron. xi, 4, 5); then the "city of David" and Jerusalem (2 Sam. v, 7). Josephus, as above stated, calls it the "Upper City," adding that it was known also in his day as the "Upper Market." See JERUSALEM.

Zî'īr (Heb. Tsi'ar, דִּיָּר, smallness; Sept. Σιαόρ v. r. Σιαοτάς; Vulg. Stior), a town in the highland district of Judah (Josh. xv, 54), where it is mentioned in the group around Hebron to the south. See JUDAH, THREE OF. Eusebius and Jerome (Onomast. s. v. Σιαορ) call it a village between Jerusalem and Eleutheropolis. It probably corresponds to the small village still called Stior on the road about six miles north-east of Hebron towards Tekoa (Robinson, Bibl. Res. i, 488), traditionally pointed out as the site of the grave of Esaau (Schwarz, Palest. p. 106).

Ziph (Heb. id. Ζήφ, Ziph, Ziph, Ziph, Ziph, or Ziph), the name of a man and of one or two places in Judah. 1. First named of the four sons of Jehaleel of the tribe of Judah (1 Chron. iv, 16). B.C. post 1618. 2. A town apparently in the south or Simeonitish part of Judah (Josh. xv, 24), where it is mentioned between Ithnan and Telema; but the enumeration and the absence of the copula require us to join it with the former, i.e. Ithnan and Ziph, and in that case it may be an apposition retaining a trace of the Ziphah (q. v.) of that region. See ITHNAN. 3. A town in the mountain district of Judah (Josh. xv, 55), where it is mentioned between Carmel and Jutah, in the south-east group. See JUDAH, THREE OF. The place is immortalized by its connection with David, some of whose greatest perils and happiest escapes took place in its neighborhood (1 Sam. xxxii, 14, 15, 24; xxvii, 2). It had been built by Mesha the son of Caleb (1 Chron. ii, 42), and was eventually fortified by Rehoboam (2 Chron. xi, 8). "Zib" is mentioned in the Onomasticon as eight miles east of Hebron; "the village," adds Jerome, "in which David hid is still shown." This can hardly be the spot above referred to, unless the distance and direction have been stated at random, or the passage is corrupt both in Eusebius and Jerome. Elsewhere (under "Zeib" and "Zib") they place it near Carmel, and connect it with Ziph the descendant of Caleb. The place in question is doubtless the Tell Zib; about three miles south of Hebron, a rounded hill of some hundred feet in height, with a spring adjacent.
ZIZ

ZNIZ

Zephora), one of the seven daughters of Reuel or Jethro, the priest of Midian, whose mother was Moses and mother of his two sons Gershom and Eliezer (Exod. ii, 21; iv, 25; xviii, 2; comp. ver. 6). The most noteworthy incident in her life is the account of the circumcision of the former, who had remained for some time after his birth uncircumcised; but an illness into which Moses fell in a khan when on his way to Pharaoh, being accounted a token of the divine displeasure, led to the circumcision of the child, when Zipporah, having, it appears, reluctantly yielded to the ceremony, exclaimed, “Surely a bloody husband thou art to me” (iv, 26; see Frischmuth, De Circumc. Zippore [Jen. 1668]; Hase, De Sponsio Sanguino [Hal. 1738]). This event seems to have caused some alienation of feeling, for Moses sent his wife back to her father, by whom she was again brought to her husband while in the desert, when a reconciliation took place, which was ratified by religious rites (Gen. xviii, 1 seq.). B.C. 1658. It has been suggested that Zipporah was the Cushite (A. V. “Ethiopian”) wife who furnished Miriam and Aaron with the pretext for their attack on Moses (Num. xii, 1, etc.). A slight confirmation for this appears to be that in a passage of Habakkuk (iii, 7) the names of Cushan and Midian are mentioned together. Another suggestion is that of Ewald (Gesch. ii, 229, note), namely, that the Cushite was a second wife, or a concubine, taken by Moses during the march through the wilderness—whether after the death of Zipporah (which is not mentioned) or from other circumstances must be uncertain. See Moses.

Ziz (Heb. with the art. hts-Tzit, ywla, the projection; Sept. Ασάθ v. r. Ασατί; Vulg. Siz), the name of a cliff (יִשָּׁמ נֹּשָּׁמַח, ascen) or pass by which the band of Moabites, Ammonites, and Moabites who attacked Zioshaphath made their way up from the shores of the Dead Sea to the wilderness of Judah near Tekoa (2 Chron. xx, 16; comp. ver. 20). There can be very little doubt that it was the pass of Ain Jidy—“the very same route,” as Robinson remarks, “which is taken by the Arabs in their marauding expeditions at the present day: along the shore as far as to Ain Jidy, and then up the pass, and so northward below Tekah” (Bibl. Res. i, 508, 530). The pass, although exceedingly precipitous, is still a great thoroughfare (Tristram, Land of Moab, p. 41). The name haz-Ziz may perhaps be still traceable in el-Hudash, which is attached to a large tract of table-land lying immediately above the pass of Ain Jidy, between it and Tekah, and bounded on the north by a wady of the same name (Bibl. Res. i, 527). Lieut. Conder remarks that there is a ruin called Kirb- at ‘Aziz south of Yutta (Quar. Statement of the “Palest. Explor. Fund,” Jan. 1875, p. 15).

Zi’sa (Heb. Zisa’, נץ, abundance [Gesen.] or shining [Furst]; Sept. Ζαζα; Zouza), the name of two men. See also Zizah.

1. Third named of the four sons of Rehoboam by Maachah the granddaughter of Abesalom (2 Chron. xi, 20). B.C. post 975.

2. Son of Shophi and one of the chiefs of the Simeonites, who in the reign of Hezekiah made a raid upon the peaceable Hamite shepherds of Gedor and smote them, “because there was pasture there for their flocks” (1 Chron. iv, 27). B.C. cir. 725.

Zizah (Heb. Zizah’, נץ, i. q. Zisa; Sept. Ζαζα; Vulg. Ziza), a Gershonite Levite, second son of Shimrit (1 Chron. xxiii, 11); elsewhere (ver. 10) called Zina (q. v.).

Zizanion. See Tana.

Zju-gwatsa (or Zju-gen), in Japanese mythology, is the New-year festival, which takes place on the first day of the first month (February).

Zlata Baba, in Slavonic mythology, was a goddess worshipped by the Poles, whose golden stature (whence her name, golden woman) is said to have stood in a temple on the Ohi River. Many sacrifices were made to her because she announced oracles to those desiring them.

Zliebog [pron. Ziebog], in Slavonic mythology, is the supreme evil deity, and at the same time a surname of all evil black deities, as the reverse of Dobrobog. Czernobog is identical with Zliebog.

Znics, in Slavonic mythology, is a deity of the Russians that was worshipped at Kiev through an etern

Ain Jidy and the Cliff of Zis. (From a photograph by the Editor. The faint line in the background to the left is the pass up the cliff.)
fire. It is thought that Zoan signifies fire. The priests of this god gave to the sick and suffering their advice in exchange for rich offerings.

Zo‘ān (Heb. Tsu‘ān, 123; Sept. Tanis; Vulg. Ta- nis), an ancient city of Lower Egypt, situated on the eastern side of the Tanitic branch of the Nile, and mentioned several times in the Old Test. (Numb. xiii, 22; Psa. lxxvi, 12, 43; Is. xiv, 11, 15; xxx, 4; Ezek. xxx, 14), its ruins have lately been carefully explored (1 Petrie, Tanis, in Mem. of Eg. Expl. Fund, Lond. 1884-8).

I. The name, preserved in the Coptic Jānē, the Arabic San (a village still on the site), and the classical Tanis; (whence the Coptic transcription Taamose), comes from the root 1234, “he moved tents” (Isa. xxx, 20). cognate with 1235, “he loaded a beast of burden,” and thus signifies “a place of departure” (like Zaananim, Josh. xiii, 38, or Zanannim, Judg. iv, 11, on a similar thoroughfare). Zoan lay near the eastern border of Lower Egypt. The sense of departure or removing, therefore, would seem not to indicate a mere rest-place of caravans, but a place of departure from a country.

The Egyptian name Ha-auer or Pu-auer (Aroui, Arvaw, Arvaw, Arwah), signifying “depot of gold” or “going out” or “departure.” Its more precise sense fixes that of the Semitic equivalent.

II. History—1. From Manetho.—At a remote period, between the age when the pyramids were built and that of the empire, Egypt was invaded, overran, and subdued by a Semitic people, the Shasu, who, or at least their first race, appear to have been Arabs cognate with the Phoenicians. How they entered Egypt does not appear. After a time they made one of themselves king, a certain Salatis, who reigned at Memphis, exacting tribute of Upper and Lower Egypt, and garrisoning the finest places with especial regard to the safety of the eastern provinces, which he foresaw the Assyrians would desire to invade. With this view, finding in the Saites (better elsewhere Sethrothe) none, on the east of the Babastite branch, a very fit city called Avaris, he rebuilt it and very strongly walled it, garrisoning it with 240,000 men. He came hither in harvest-time (about the vernal equinox), to give corn and pay to the troops, and exercise them so as to terrify foreigners.

The position of Tanis explains the case. Like the other principal cities of this tract—Pelusium, Babastis, and others—Tanis lay on the east side of the river, towards Syria. It was thus outside a great line of defense, and afforded a protection to the cultivated lands to the east and an obstacle to an invader, while to retreat from it was always possible, so long as the Egyptians held the river. But Tanis, though doubtless fortified, could never be a depot of republic for so far inland as to be the frontier fortress. It was near enough to be the place of departure for caravans, perhaps was the last town in the Shepherd period, but not near enough to command the entrance of Egypt. Pelusium lay upon the great road to Palestine—it has been until lately placed too far north [see Siv.].—and the plain was here narrow from north to south, so that no invader could safely pass the fortress; but it soon became broader, and, by turning in a south-western direction, an advancing enemy would leave Tanis far to the northward, and a bold general would detach a force to keep its upper parts and respect the importance of Pelusium and Memphis. An enormous standing militia, settled in the Boculis, as the Egyptian militia afterwards was in neighboring tracts of the delta, and with its headquarters at Tanis, would have overawed Egypt, and secured a retreat in case of disaster, besides maintaining the hostile most productive land in the country, and mainly for the former two objects we believe Avaris to have been fortified.

2. From the Egyptian Monuments.—Aphi, probably Apophis of the fifteenth dynasty, a Shepherd-king who reigned shortly before the eighteenth dynasty, built a temple here to Set, the Egyptian Baal, and worshipped no other god. According to Manetho, the Shepherds, after 511 years of rule, were expelled from all Egypt and shut up in Avaris, whence they were allowed to depart by capitulation by either Amon or Thothmosis (Ahamis or Thothmos IV). the first and seventh kings of the eighteenth dynasty. The mistake of the writer is that the honor of ridding Egypt of the Shepherds belongs to Ahamis. Ramses II embellished the great temple of Tanis, and was followed by his son Memph.

After the fall of the empire, the first dynasty is the twenty-first, called by Manetho that of Tanites. Its history is hid behind the veil of the twentieth dynasty, founded by Shi-shak. The expulsion of Set from the pantheon, under the twenty-second dynasty, must have been a blow to Tanis, and perhaps a religious war occasioned the rise of the twenty-third. The twenty-third dynasty is called Tanite, and its last king is probably Seso, the contemporary of Tirhakah, mentioned by Herodotus. See EGYPT.

3. From the Bible we learn that Zoan was one of the oldest cities in Egypt, having been built seven years after Hebron, which already existed in the time of Abraham. Gen. xii, 9. "And Zoan, also, cries to thee, "At length; it seems also to have been one of the principal capitals, or royal abodes, of the Pharaohs (Isa. xix, 11, 18); and accordingly the "field of Zoan," or the fine alluvial plain around the city, is described as the scene of the marvelous works which God wrought in the time of Moses and Aaron (Ex. xiv, 26). But the same passage represents the sacred history as a place to which came ambassadors, either of Hoesha or Ahaz, or else possibly Hezekiah: "For his princes were at Zoan, and his messengers came to Hanes" (Isa. xxx, 4). As mentioned with the frontier town Taapana, Tanis is not necessarily the capital. But the same passage points distinctly to a Tanite line when saying, in the "burden of Egypt," "The princes of Zoan are become fools; the princes of Noph are deceived" (xix, 13). The doom of Tanis is foretold by Ezekiel: "I will set fire in Zoan" (Ezek. xxx, 14), where it occurs among the cities to be taken by Nebuchadnezzar.

III. Description and Remains.—Anciently a rich plain extended due east as far as Pelusium, about thirty miles distant, gradually narrowing towards the east, so that in a south-easterly direction from Tanis it was not more than half a mile wide. But the same road, as far south and west as Tanis, was anciently known as the "Field" or "Plain," "the Marshes" (ταν Κληρον, Κριμπερια); or "the pasture-lands" (Βουθλιος). Through the subsidence of the Mediterranean coast, it is now almost covered by the great lake Menzaleh. Of old it was a rich marsh-land, watered by four of the seven branches of the Nile, the Pathmics, Mendesian, Tanitic, and Pelusiac, and swept by the cool breezes of the Mediterranean.

At present "the plain of San is very extensive, but thinly inhabited; no village exists in the immediate vicinity of the ancient Tanis; and, when looking from the mounds of this once splendid city towards the distant palms of indistinct villages, we perceive the desolation spread around it. The field of Zoan is now a barren waste; a canal passes through it without being able to fertilize the soil; fire has been set in Zoan, and one of the temples of Beltrimon. The delta is now the habitation of fishermen, the resort of wild beasts, and infested with reptiles and malignant fever. It is "remarkable for the height and extent of its mounds, which are upwards of a mile from north to south, and nearly three quarters of a mile from east to west, and rising to the greatest productive land in the country, and mainly for the former two objects we believe Avaris to have been fortified."
transcending them from Suseh shows the lavish magnificence of the Egyptian kings. The oldest name found here is that of Seerethen III of the twelfth dynasty, the latest that of Tirhakah" (Wilkinson, Handbook, p. 221, 222). Two black statues and a granite sphinx, with blocks of hewn and occasionally sculptured granite, are among the objects which engage the attention of the few travellers who visit this desolate place. The modern village of San consists of mere huts, with the exception of a ruined kasr of modern date (id. Modern Egypt, i, 449–452; Narrative of the Scottish Deputation, p. 72–76). Recently M. Mariette has made excavations on this site and discovered remains of the Shepherd period, showing a markedly characteristic style, especially in the representation of face and figure, but of Egyptian art, and therefore afterwards appropriated by the Egyptian kings. The bilingual or rather trilingual inscription of Ptolemy III (Euergetes I) is of very great interest. See Lepsius, Isis bilingue Decretum von Canopus (Bel. 1867); Rennisch und Rüster, Die zwei-sprachige Inschrift von Tunisi (Vienna, ed.); Proceedings of the Amer. Oriental Society, May, 1870, p. viii; Bibliotheca Sacra, xxxiv, 771; xxxvi, 581.

Zoár (Heb. צָוָּר, צָוָּר [fully צוֹּר, Gen. xix, 22, 23, 30]; smallness; Sept. Ζοώρος, Ζοῶιος, or Ζοῦωος; Josephus Ζωῷος, τὰ Ζωῶα or Ζωῶα; Vulg. Segoř), one of the cities of the Jordan and Dead-Sea valley, and apparently, from the way in which it is mentioned, the most distant from the western highlands of Palestine (xiii, 10). Its original name was Βελά, and it was still so called at the time of Abraham's first residence in Canaan (xiv, 2, 4). It was then in intimate connection with the cities of the "plain of Jordan"—Sodom, Gomorrah, Admah, and Zeboim (see also xiii, 10; but not x, 19)—and its king took part with the kings of those towns in the battle with the Assyrian host which ended in their defeat and the capture of Lot. The change is thus explained in the narrative of Lot's escape from Sodom. When urged by the angel to flee to the mountain, he pointed to Bela, and said, "This city is near to flee unto, and it is a little one (צָוָּר). Oh, let me escape thither (is it not a little one?) and my soul shall live." The angel consented; and the incident proved a new baptism to the place—"Therefore the name of the city was called Zoar," that is, "little" (v. 22). This incident further tends to fix its site, at least relatively to Sodom. It must have been nearer than the mountains, and yet outside the boundary of the plain or vale of Siddim, which was destroyed during the configuration. It would seem from ver. 30 that it lay at the foot of the mountain into which Lot subsequently went up, and where he dwelt. That mountain was most probably the western declivity of Moab, overlooking the Dead Sea. In Deut. xxxiv, 3 there is another slight indication of the position of Zoar. From the top of Pisgah Moses obtained his view of the Promised Land. The east, the north, and the west he viewed, and lastly "the south, and the plain of the valley of Jericho, unto Zoar." This is not quite definite; but, considering the scope of the passage, it may be safely con

his words are less definite than those of Isaiah (Jer. xlviii, 34).

In early Christian times Josephus says that it retained its name (Zoōip) to his day (Ant. i, 11, 4), that it was at the farther end of the Asphaltic Lake, in Arabia—by which he means the country lying southeast of the lake, whose capital was Petra (War, iv, 5, 4; Ant. xiv, 1, 4). The notices of Eusebius are to the same tenor; "the Dead Sea extended from Jericho to Zoar (Ζωοὺς; ὶμοναυς, a. θείας ἡ ἀλήθεια). Phæno lay between Petra and Zoar (ibid. a. την Φάους). It still retained its name (Ζωοὺς), lay close to (σαραγάλησαν) the Dead Sea, was crowded with inhabitants, and consisted of Roman soldiers; the palm and the balsam still flourished, and testified to its ancient fertility (ibid. a. την Βακέλ). To these notices of Eusebius, Jerome adds little or nothing. Paula, in her journey, beholds Seger (which Jerome gives on several occasions as the Hebrew form of the name, in opposition to Zora, or Zorã, the Syrian form) from Caphar Barucha (possibly Beni Naim, near Hebron), at the same time with Engedi, and the land where once stood the four cities; but the terms of the statement are too vague to allow of any inference as to its position (Epist. civili, § 11). In his commentary on Isa. xv, 5, Jerome says that it was "in the boundary of the Moabites, dividing them from the land of the Philistines," and thus justifies his use of the word ecscis to translate בִּנָּאָה (A. V. "his fugitives," marg. "borders;") Gesen. Flötlichinge. The terra Philistihim, unless the words are corrupt, can only mean the land of Palestine—i. e. (according to the inaccurate usage of later times) of Israel—as opposed to Moab. In his Questions Hebraicos, on Gen. xix, 30 (comp. xiv, 3), Jerome goes so far as to affirm the accuracy of the Jewish conjecture, that the later name of Zoar was Shali-shah—"Bile primum et postea Salies appellata" (comp. also his comment on Isa. xvi, 5). But this is probably grounded merely on an interpretation of shaltishiah in Isa. xvi, 5, as connected with bela, and as denoting the "third" destruction of the town by "earthquakes."

Zoar was included in the province of Palestine Tertia, which contained also Kerak and Acreopolis. It was an episcopal see, in the patriarchate of Jerusalem and archbishopric of Petra; at the Council of Chalcedon (A.D. 451) it was represented by its bishop, Musonius, and at the Synod of Constantinople (A.D. 556) by John (Le Quien, Oriens Christi, i, 145–146).

Among the statements of modern travellers there are two remarkable ones. (1) Brocardus (cir. A.D. 1290), the author of the Descriptio Terrae Sanctae, the standard "Handbook to Palestine" of the Middle Ages, the work of an able and intelligent resident in the country, states (c. vii) that "five leagues (leuces) to the south of Jericho is the city Seger, situated between the mountain of Engaddi, between which mountain and the Dead Sea is the stature of salt." True, he confesses that all his efforts to visit the spot had been frustrated by the Saracens; but the passage bears marks of the greatest desire to obtain correct information, and he must have nearly approached the place, because he saw
with his own eyes the "pyramides" which covered the "wells of bitumen," which he supposed to have been those of the vale of Siddim. This is in curious agreement with the connection between Engedi and Zoar indicated in Judges, x. 20. (2) The statement of Theitmar (A.D. 1217) is "a-daiy de-bat." It is contained in the 11th and 12th chapters of his Peregrinatio (ed. Laurent, Hamburg, 1857). After visiting Jericho and Gilgal, he arrives at the "fords of Jordan" (xi, 20), where Israel crossed and where Christ was baptized, and where the thieves were, the pilgrim bathed (22). Crossing this ford (38), he arrives at "the field and the spot where the Lord overthrew Sodom and Gomorrah." After a description of the lake come the following words: "On the shore of this lake, about a mile (al midrâ'iy) from the spot at which the Lord was baptized, is the statue of salt into which Lot's wife was turned" (47). "Hence I came from the lake of Sodom and Gomorrah, and arrived at Segor, where Lot took refuge after the overthrow of Sodom; which is now called in the Syrian tongue Zora, but in Latin the City of Palms. In the mountain fastness by this Lot signifies with his daughters (xii, 1-8). After this I passed through the vineyard of Benjamin (?) and of Engaddi. . . . Next I came into the land of Moab and to the mountain in which was the cave where David hid, . . . leaving on my left hand Sethim (Shittim), where the children of Israel tarried. . . . At last I came to the plains of Moab, where the Decapolis came into even more cognizance. I delightedly covered with herbage, but without either woods or single trees; hardly even a twig or shrub (4-15). . . . After this I came to the torrent Jabbock (xiv, 1).

Zara is very distinctively mentioned by the Crusading historians. Fulcher (Gesta Dei, p. 405, quoted by Raumer, p. 239) states that, "having encircled (gâruto) the southern part of the lake on the road from Hebron to Petra, we found there a large village which was said to be Segor, in a charming situation, and abounding with excellent wine." Here we began to enter the mountains of Arabia." The palms are mentioned also by William of Tyre (xxii, 80) as being so abundant as to cause the place to be called Villa Palmarum, and Palmer (i.e. probably Paulmar). Abulfeda (cir. A.D. 1320) does not specify its position more nearly than that it was adjacent to the mountains (xii, 3). His argument in support of its then importance by calling the lake after it—Bahr ezegog(ges), see too, Ibn-Idris, in Reldand, p. 272. The natural inference from the description of Fulcher is that Segor lay in the Wady Kerak, the ordinary road, then and now, from the south of the Dead Sea to the eastward. It has been mistakenly assigned by many to John's caves (June 1, and see May 9), that the extensive ruins which they found in the lower part of this Wady were those of Zora, is therefore probably accurate. The name Dara or Derakah, which they, Poole (Geogr. Journ. xxvi, 63), and Burchhardt (July 15), give to the valley, may even without violence be accepted as a corruption of Zora. The ruins have likewise been described by De Sauley (Journey, i, 307).

M. de Sauley himself, however, places Zora in the Wady Zueweirah, the pass leading from Hebron to the Dead Sea. But the name Zueweirah and Zora are not nearly so similar in their originals as they are in their Western forms, and there is the fatal obstacle to the proposal that it places Zora on the west of the lake, away from what appears to have been the original cradle of Moab and Ammon. If we are to look for Zora in this neighborhood, it would surely be better to place it near the eastern end of the lake. The latter position is almost literally the same as the Hebrew Zorah. The proximity of this name and that of Udum, so like Sodom, and the presence of the salt mountain—toward this day splitting off in pillars which show a rude resemblance to the human form—are certainly remarkable facts. Old Zorah in the plain at the northern end of the Dead Sea. An insuperable objection to this is that in that case Lot must have crossed the Jordan in his flight; for Sodom was on the west side of the plain, and Zorah on the east. Mr. Birch (in the Quarterly Statement of the "Palest. Explor. Fund," Jan. 1879, p. 61, note) is confident that the name and site of Zorah is absolutely correct. Thiersot, on the contrary, gives Usbâh; but his arguments lack weight. Tristram's attempt (Land of Moab, p. 348) to identify Zorah with Zura on Mount Nebo is based upon an error as to the latter name, which is properly Sinbah; the position on the mountain, moreover, is very different; but the different views held regarding the site of Zorah, see Robinson, Bibl. Reb. ii, 517; Reland, Palest. p. 1064; De Saulcy, Travels, i, 481; Tristram, Land of Israel, p. 560; Bibliotheque Sacra, 1868, p. 136 sq. See Sodom.

Zoarites. See Separatists of Zoar.

Zo'a (Heb. Tsobah, צָבָּה, 2 Sam. x, 6, 8); or Zo'bah (Heb. Tsobah'), צָבָה (briefly Tsâb, 2 Sam. xxiii, 36), station; Sept. Zosâbâ v. r. Zôzâbâ, etc.; Vulg. usually Soba), the name of a portion of Aram or Syria, which formed a separate kingdom in the time of the Jewish monarchs Saul, David, and Solomon. It is difficult to fix its exact position and limits; but there seem to be grounds for regarding it as lying chiefly eastward of Cœle-Syria, and extending thence north-east and east towards, if not even to, the Euphrates (Tristram, Land of Israel, p. 323; 1 Chron. xvii, 13; 2 Chron. xvi, 3; also, without area included the eastern flank of the mountain chain which shuts in Cœle-Syria on that side, the high land about Aleppo, and the more northern portion of the Syrian desert. The Syriac interpreters take Zobah to be Nisibis, in Mesopotamia, and they have been followed by Michaelis, Della Corte, and other commentators; see in the commentary Soc. Caleung. p. 57 sq.). Others would identify it with the classic Chelites. It was so closely connected with Hamath that this great city was sometimes distinguished as Hamath-zobah (2 Chron. viii, 8). Among the cities of Zobah there was also a place called Tithhath or Betah (2 Sam. viii, 8; 1 Chron. xviii, 8), which, as perhaps, Tarihah, between Palmyra and Aleppo; and another called Berothai, which has been supposed to be Beiruth, but with little probability, for the kingdom of Hamath must have intervened between Zobah and the coast.

See Berosliah. Zobah was a wide, and plain intersected by several ranges of bare, white mountains, but having also a few fertile valleys. The inhabitants were probably semi-nomads, and chiefly shepherds. Like the modern Bedawin of that region, they were rich in horses (Ritter, Phil. and Syr. iv, 1700; Porter, Handbook for Travellers, p. 614; and Macalister).

We first hear of Zobah in the time of Saul, when we find it mentioned as a separate country, governed apparently by a number of kings who own no common head or chief (1 Sam. xiv, 47). Saul engaged in war with these kings and "vexed them," as he did his other neighbors. Some forty years later than this we find Zobah under a single ruler, Hadadezer, son of Rehob, who seems to have been a powerful sovereign. He had wars with Toi, king of Hamath (2 Sam. vii, 10), while he lived in close relations of amity with the kings of Damascus, Beth-rehob, Ish-tob, etc., and held various petty Seryan prince Sobera, in the name of Zobah. He had even considerable influence in Mesopotamia, beyond the Euphrates, and was able on one occasion to obtain an important auxiliary force from that quarter (ver. 16; comp. title to Pæs. lx). David, having resolved to take full possession of the tract of territory that had originally belonged to Zobah, but which neither Zobah, 3; comp. Gen. xxv, 18), attacked Hadadezer in the early part of his reign, defeated his army, and took from him a thousand chariots, seven hundred (seven thousand, 1 Chron. xviii, 4) horses, and twenty thousand footmen. Hadadezer's allies, the Syrians of Damascus, having marched to his assistance, David defeated them in a great battle, in which they lost twenty-two
A thousand men. The wealth of Zobah is very apparent in the narrative of this campaign. Several of the officers of Hadadezer's army carried "shields of gold" (2 Sam. viii, 7), by which we are probably to understand iron or wooden frames overlaid with plates of the precious metal. The cities, moreover, which David took from Zobah, belong to the Hebrew, "exceeding much brass" (ver. 8). It is not clear whether the Syrians of Zobah submitted and became tributary on this occasion, or whether, although defeated, they were able to maintain their independence. At any rate, a few years later they were again in arms against David. This time the Syrian king acted on the defensive. The war was provoked by the Ammonites, who hired the services of the Syrians of Zobah among others to help them against the people of Israel, and obtained in this way auxiliary aid to the amount of thirty-three thousand men. The allies were defeated in a great battle by Joab, who engaged the Syrians in person with the sword of his troops (x, 9). Hadadezer, upon this, made a last effort. He sent across the Euphrates into Mesopotamia and "drew forth the Syrians that were beyond the river" (1 Chron. xix, 16), who had hitherto taken no part in the war. With these allies, who formed his own troops, he renewed the struggle with the Israelites, who were now commanded by David himself, the crisis being such as seemed to demand the presence of the king. A battle was fought near Helam—a place the situation of which is uncertain—where the Syrians of Zobah and their new allies were defeated. The slaughter was so great that between forty thousand and fifty thousand men. After this we hear of no more hostilities. The petty princes hitherto tributary to Hadadezer transferred their allegiance to the king of Israel, and it is probable that he himself became a vassal to David. Zobah, however, though subdued, continued to cause trouble to the Jewish kings. A man of Zobah, one of the subjects of Hadadezer—Rezon, son of Elijah—having escaped from the battle of Helam and "gathered a band" (i.e. a body of irregular marauders), marched southward, and contrived to make himself master of Damascus, where he reigned apparently for some fifty years, proving a fierce adversary to Israel all through the reign of Solomon (1 Kings xi, 23-25). Solomon also was (it would seem) engaged in a war with Zobah itself. The Hamath-zobah against which he went up (2 Chron. viii, 9) was probably a town in that country which resisted his authority, and which he accordingly attacked and subdued. This is the last that we hear of Zobah in Scripture. The name, however, is found at a later date in the inscriptions of Assyria, where the kingdom of Zobah seems to intervene between Hamath and Damascus, falling thus into the regular line of march of the Assyrian armies. Several Assyrian monarchs relate that they took tribute from Zobah, while others speak of having traversed it on their way to or from Palestine.

Zobebah (Heb. with the article, hetz-Tsebubah; נֵבְעָה הַשָּׁוְם [Genesius] or οἰσσαβή [Fürst]; Sept. Ζοβῆβα, v. r. Ζοβᾶβα; LXX, last name of the two sons (or perhaps a daughter, as Vogel is feminine) of Coz (q. v.) of the tribe of Judah (1 Chron. iv, 6). B.C. post 1618. Rabbi Schwarz regards it as the name of a town situated between Stebonah and two and a half English miles south of Jerusalem (Pielot, p. 116).

Zochar (Heb. Tzowchar, צֶּורָה, light; Sept. Ζώαρ), the name of two or three men.

1. The father of Ephron the Hittite, from which latter Abraham purchased the cave of Machpelah (Gen. xxiii, 8; xxv, 9). B.C. ante 2026.

2. Last named but one of the six sons of Simeon (Gen. xlvi, 10; Exod. vi, 15); elsewhere (1 Chron. iv, 24) called Zerah (q. v.).

3. A marginal reading in 1 Chron. iv, 7 for Zeenah (Heb. rather Tischar, תִּסְחָר, which [as usual] takes the pointing of the Keri הַשָּׁוְם, and Zohar; the A. V. of 1611 has "Zoara"), second named of the three sons of Helah of the tribe of Judah. B.C. post 1618.

Zoleheith (Heb. with the art. has-zoleheith נֵבְעָה הַשָּׁוְם, a fem. participial form; Sept. Ζολεωθή, v. r. Ζολεοθή; Vulg. Zoleheith), the name of a stone (נַחַל) which was "by (נַחַל, beside) En-rogel, and "by (נַחַל, along side) which" Adonijah offered his coronation sacrifices (1 Kings i, 9). If En-rogel be the present Bir-Eyub in the valley of the Kidron, the stone in question may be any of the boulders in that vicinity.

As to the signification of the name, the Targumists translate it "the rolling stone;" and Jarchi affirms that it was a large stone on which the young men tried their strength in attempting to roll it. Others make it "the serpent stone" (Genesiuss and Fürst), as if from the root סַלֶּה, "to creep." Jerome simply says, "Zoelot tractum sive protractum." Others connect it with running water; but there is nothing strained in making it "the stone of the conduit" (בֵּית אָבָל, Matschulath), from its proximity to the great rock conduit or conduits that poured into Siloam. Bochart's idea is that the Hebrew word zohel denotes "a slow motion" (Hieroz. I, i, 9): "The fullers here pressing out the water which dropped from the clothes that they had washed in the well called Bochath, through the conduit, in the case, as it were, of the fulling of the clothes in the ancient custom at the massive breastwork below the present Birket el-Hamara, where the donkeys wait for their load of skins from the well, and where the Arab washwomen may be seen to day beating their clothes.

The practice of placing stones, and naming them from a person or an event, is very common. Jacob did so at Bethel (Gen. xxxii, 22; xxxv, 14; see Bochart, Cautam, p. 785, 786); and he did it again when parting from Laban (Gen. xxxi, 45). Joshua set up stones in Jordan and Gilgal, at the command of God (Josh. iv, 9-20), and again in Shechem (xxiv, 22). Near Beithsemenah there was the Eben-gedolath ("great stone," 1 Sam. vi, 14), called also Abél-gedolath ("the great weeping," ver. 18). There was the Eben-Bokan, south of Jericho, in the plains of Jordan (Josh. xv, 6; xviii, 17), the "stone of Bohan the son of Beuben," the Ehrenbreitstein of the Ciccar, or "plain," of Jordan, a memorial of the son or grandson of Judah. The "twenty stones" which travelers have looked in vain, but which Felix Fabri, in the 15th century (Evagrat, ii, 82), professes to have seen. The rubbins preserve the memory of this stone in a book called Eben-Bokan, or the touchstone (Chron. of Rabbi Joseph, trans. by Ballybottayke, i, 192). The tradition of the stone set up by Samuel between Mizpeh and Shen, Eben Eser, "the stone of help" (1 Sam. vii, 11, 12). There was the Great Stone on which Samuel slew the sacrifices, after the great battle of Saul with the Philistines (xiv, 38). There was the Eben-Ezel ("lapis discensus vel abitus, a discourse Jonathanis et Davidei" [Simonia, Onomast., p. 156]), where David bid himself and, which some Talmudists identify with Zoelhelath. Large stones have always obtained for themselves peculiar names, from their shape, their position, their connection with a person or an event. In the Sinai desert may be found the Eben-Elath ("stone of the bean"), Hjirjir Musa ("stone of Moses"). The subject of stones is by no means uninteresting, and has not in any respect been exhausted. (See the Notes of De Sola and Lindenthal in their edition of Genesis, p. 175, 229; Bochart, Cautam, p. 785; Vossius, De Idolologia, lib. ii, cap. ii, 3, 4); On Expositione, on Efinos, on Efinos, on Expositione, on Efinos, on Aro mhios, on Aro mhios; also a long note of Ouzellus, in his edition of Mi-chemus Felix, p. 15; Calmet, Fragments, Nos. 166, 735, 736; Kittto, Palestine. See, besides, the works of antiquaries on stones and stone circles; and an interesting account of the curious Phoenician Hjirjir Cham in Malta,
in Talalakh's recent volume on that island, p. 115-127).

M. Clermont-Ganneau, of the French consulate at Jeru-

salem, has found what he deems a strong confirmation

of the name in question in ex-Zoheth, a rocky plateau

along the edge of the village of Silwan (Quar. Statement

of the Palestine Explor. Fund, Jan., 1971, p. 222 sqq.).

This is adopted by Triaram (Bible Places, p. 124)

and Lieut. Condor (Test Work, ii, 318). The boundary-

line of Judah passed near this. See TRUE.

Zo'het (Heb. Zoheth, מֶתֶח, strong [furst]); Sept.

Zwqjv q, v. Qwv; Vulg. Zoheth, first named of the two

sons of Iahh of the tribe of Judah (I Chron. iv, 20),

the other being called Ben-zoheth (q. v.). B. C. post

1618.

Zolliker, Georg Joachim, a famous preacher of

Leipsic, was born at Saint Gall, Aug. 5, 1780. He

attended the gymnasium of Saint Gall and Bremen,

and afterwards the University of Greifswald; giving

attention rather to literature than theology at the latter

place, and cultivating a finished discipline. He became a family

tutor at Frankfort-on-the-Main in 1749. In 1793 he re-

turned to Saint Gall, and vainly sought employment there and

in other Swiss towns; but earned, in the meantime, a reputation which obtained for him a call

to become the pastor of the Reformed congregation at

Leipsic. He served that congregation during thirty

years, and until his death, which occurred Jan. 22, 1788.

Zolliker's tendency was in some measure in harmony

with the spirit of his times. He was given to the

exaltation of virtue, and loved to discuss the dignity of

man, the ways of righteousness which alone lead to God,

and which Jesus opened by teaching and example. He

asserted that persons who have always been virtuous need no conversion, but simply a perfecting of their

characters. Christianity was to him God's own best

means for the instructing, comforting, and improving of

men, through which progress they may attain to bliss-

edness. He was not, however, an exponent of the "en-

lightenment" of that period; for Christ's resurrection,

ascension, and eternal glory were held by him as posi-

tive facts. Christ was to him the only-begotten Son of

the Highest, though the atonement was regarded as

simply an expression of God's readiness to forgive. As

a preacher, he may be ranked with Reinhard, thus

superior to him as an expositor and in the definite aim of

his discourse, as well as in the joyous fervor with which

it was usually pervaded. Leipsic regarded it as an evi-

dence of natural character and poetical art, not to present him above the contemporary preachers. He

wrote prayers which are mere reflections preceded by an

address to God; e. g. Anreden u. Gebete bei dem gemein-

schaftlichen Gottesdienste (1777) — Andachtserkennen u.

Gebete, etc. (new ed. 1804, 4 pts.). He also

prepared a hymn-book, Sammlung geistl. Lieder u.

Gesänge (1766). His sermons were repeatedly published;

in 15 vols. in 1788-1804. His personal character was

thoroughly upright and manly, and also kindly and be-

nevolent. He was self-possessed and of an equable

temperament with which he could choose the precise

word he needed made him eloquent in the pulpit, but

reticent in ordinary intercourse with men.

The sources for Zolliker's life are, Fischer, A Me-

morial Discourse; Hirsching, Hut.-lit. Handbuch (Er-

nesti's supplement, Leips. 1819), xvii, 372 sqq.; Döring,

Deutsche Kirche, d. R.; 12, 18. 19. 134, 186, 128, 18 (New

stadt an d. Oder, 1830), p. 586 sq.; Larve, Characteris-

ation (Leips. 1788); Lentz, Gesch. d. Homiletik, ii, 927 sq.

See also Herzog, Real-Encyclop. p. v.

Zwqjv v. Qwv; Vulg. Supphah and Zwqjv; Vulg. Suphah), an Asherite, first named of the four sons

of Helam or Hotham (1 Chron. viii, 85; comp. ver. 82),

and father of many sons (ver. 86). B. C. cir. 1618.

Zwqjv v. Qwv; Vulg. Supphah, a Kolchite

Levit, son of Elkann and father of Nahath (1 Chron.

vi, 26 [Heb. 11]); elsewhere (ver. 55) called simply

Zoph (q. v.).

Zo'phar (Heb. Tophar,Jon, sparrow [Gesen.], or

skarpsy [Furst]; Sept. Zwqjv; Vulg. Sophar), the last

named of Job's three friends and opponents in argument

(Job ii, 11; x, 1; xx, 1; xili, 9). B. C. cir. 2000.

He is called a Naamathite, or inhabitant of Naamah, a place

whose situation is unknown, as it could not be the Na-

amah mentioned in Josh. xv, 41. Wemys, in his Job

and his friends, pp. 278 sqq., well characterizes him

as a sort: "Zophar exceeds the other two, if possible, in se-

verity of censure; he is the most invertebrate of the ac-

cuusers, and speaks without feeling or pity. He does

little more than repeat and exaggerate the arguments of

Bildad. He unfeelingly alludes (Job xi, 15) to the effects of

Job's disease as appearing in his countenance.

This is cruel and invidious. Yet in the same discourse

how nobly does he treat of the divine attributes, show-

ing that any inquiry into them is far beyond the grasp

of the human mind! And though the hortatory part of

the first discourse bears some resemblance to that of

Eliphaz, yet it is diversified by the fine imagery which

he employs. He seems to have had a full conviction of

the providence of God as regulating and controlling

the actions of men; but he limits all his reasonings to

the present life, and makes no reference to a future world.

This circumstance alone accounts for the weakness and

fallacy of these men's judgments. In his second dis-

course there is much poetical beauty in the selection of

images, and the general doctrine is founded in truth;

its fallacy lies in its application to Job's peculiar case.

The whole indicates great warmth of temper, inflamed

by misapprehension of his object and mistaken zeal.

It is to be observed that Zophar has but two speeches,

whereas the others have three each. When Job had

replied (ch. xxi-xxxi) to the short address of Bildad

(ch. xxxv), a rejoinder might have been expected from

Zophar; but he said nothing, the three friends, by com-

mon consent, then giving up the contest in despair

(xxxii, 1). See JOB.

Zo'phim (Heb. Tophim; תופים, "briefly expensive in

Numb., watchers, as often; but first thinks, fertile"), the

name either in whole or part of two places in Pales-

tin.

1. (Sept. ἐκστασις; Vulg. sublimius.) The designation

of a field (மலம) or spot on or near the top of Pisgah,

from which Balaam had his second view of the encamp-

ment of Israel (Numb. xxiii, 14). If the word sadeh

(מַלָּם) may be taken in its usual sense, then the "field

of Zophim" was a cultivated spot high up on the top of

the range of Pisgah. But that word is the almost in-

variable term for a portion of the upper district of Moab,

and therefore may have had some local sense which has

hitherto escaped notice, and in which it is employed in

reference to the spot in question. The position of the

field of Zophim is fixed; it is confined, and it com-

manded merely a portion of the encampment of Israel.

Neither do the ancient versions afford any clue. The

Targum of Onkelos, the Sept., and the Peshito-Syrac

take Zophim in the sense of "watchers" or "bookers-

out," and translate it accordingly. But it is probably

a Hebrew version of an aboriginal name, related to

that which, in other places of the present records, ap-

pears as Mizpeh or Mispah. Mount Nebo, or Pisgah,

is now undoubtedly identified as Jebel Neba, near He-

sbam. See Nabo. De Saulcy appears to have even

heard the name given to a village near Medina (Voyage

en Terre Sainte, i, 289). Along its eastern side, and

reaching from the ruins of Maan to Heshab, is a plateaue

of arable land, still cultivated in part by the Arabs, which

appears to be the place in question (Forter, Handbook for Palestine, p. 800). In this
view Tristram at length concurs (Bible Places, p. 846). Prof. Paine, of the American Exploring Party, regards it as Wady Hula, on the south-east of Jebel Nabi. See PISGAH.

2. (Sept. Sqphim v. r. Sqph; Vulg. Sophim.) Ramathaim-zophim was Samuel's birthplace (1 Sam. i. 1). The dual form of the first term, according to some, signifies "mouths of sophim," and this is supported by the context of the prophet's speech (Lightfoot, ii, 162, ed. 1832); and the second term, according to others, means succuletores, i.e. prophets, and denoting that at this place was a school of the prophets—a hypothesis supported by the Chaldean paraphrase, which renders it "Elkana, a man of Ramathaim, a disciple of the prophets." Others find in the dual form of Ramathaim a reference to the shape of the city, which was built on the sides of two hills; and in the word Zophim see an allusion to some watch-towers, or places of observation, which the high situation of the city might favor (Clericus Operis, ii, 175). Others, again, affirm that the word Zophim is added because Ramah or Ramatha was inhabited by a clan of Levites of the family of Zuph (Calmet, a. v.). Winer asserts (Reussbert. art. "Samuel") that the first verse of the book declares Samuel to be an Ephraimite. This term, however, if the genealogy in the Chronic. remains unaltered, must not be understood as an Ephraimite by birth, but by abode. We find that the Kohathites, to whom Samuel belonged, had their lot in Mount Ephraim (Josh. xxii. 5-20), where not the hill of Ephraim is meant, but the whole hill country of Ephraim (Genesis, Theosur. a. v.). The name of Zophim, living in the hill country of Ephraim, might be termed Ephraimite, while their ancestor's name distinguished their special locality as Ramathaim-zophim. The geography of this place has been disputed. See RAMEH. Eusebius and Jerome confound it with Armathine of the New Test. (Onomat. art. "Armathine"). The Sept. render it Zuph, φυπος, Cod. A, or Cod. B, Αρμουθια Φυπ. For an account of the place now, and for long called Neby Samwil, and the impossibility of its being the ancient Ramah, see Robinson, Palestine, ii, 141; and for an interesting discussion as to the site of Ramathaim-zophim, the latter name being yet introduced in the Arabic term Soloh, the curious reader may consult the same work (p. 880), or Biblioth. Sacra (p. 46). The hilly range of Ephraim extended southward into other cantons, while it bore its original name of Mount Ephraim: and so the inhabitants of Ramathaim-zophim might be termed Ephraimites, just as Mahalon and Chilalon are called "Ephraimites of Beth-lehem-judah" (Ruth i, 2). See RAMATHAIM; ZUPH.

Zorrah (Heb. Tzorrah), נצורה, hornet; Sept. Sqphd v. r. Sqphd, Sqphd, Sqphd, etc.; Josephus, Sqphd, Ant. v, 8, 12; Vulg. Susros; A. V. "Zareah," Neh. xi, 29; "Zorrah," Joshua, xvii, 33, one of the towns near the border of the tribe of Dan (xix, 41), but really within the limits of Judah, being in the north-western corner of the "valley district" (xv, 53). It is almost always mentioned in connection with Ekron (see also Judges, ii, 23; xvi, 23, 31; xvii, 2, 8, 11; and comp. 1 Chron. ii, 50; Zorrah was the residence of Manoah and the native place of Samson. The place both of his birth and his burial is specified with a curious minuteness as "between Zorah and Eshtaol," in Mahaneh-Dan (Judges, xiii, 25) or in the place of the same name (see Judges, xiv, 19; 1 Chron. ii, 53; iv, 2) the "Zareathites and Eshtaolites" are given as descended from (i.e. colonized by) Kirjath-jearim. Zorah is mentioned among the places fortified by Rehobam (2 Chron. vi, 10), and was re-inhabited by the tribe of Judah after the return from the Captivity (Neh. xi, 29). Josephus, Ant. v, 12, in the place called "Saara" it is mentioned as lying some ten miles north of Eleutheropolis on the road to Nicopolis. By the Jewish traveller Hap-Parchi (Zanz, Benjamin of Tud. ii, 441) it is specified as three hours south-east of Lydda. These notices agree in direction—though in neither is the distance nearly sufficient—with the modern village of Surah, which has been visited by Robinson (Bibl. Res. iii, 158) and Tobler (Dritte Unde, p. 181-183). It lies just below the brow of a sharp-pointed conical hill, at the shoulder of the range which meets and forms the north side of the Wady Gharb, the northernmost of the two branches which unite just below Surah, and form the mouth of that Wady. On the south of the remains of Zorah, Bethheimeh, Timnath, and other places more or less frequently mentioned with it in the narrative, Edathol, however, has not yet been identified. The position of Surah at the entrance of the Wady, which issues out of the fortified town of the great land, explains its fortification by Rehobam. The valley is a short distance below the village, "a noble fountain"—this was at the end of April—"walled up square with large howen stones and gushing over with fine water. As we passed on," continues Robinson, with a more poetical tone than is his wont, "we overtook no less than twelve women toiling upwards to the village, each with her jar of water on her head. The village, the fountain, the fields, the mountain, the females bearing water, all transported us back to ancient times, when in all probability the mother of Samson often in like manner visited the fountain and filled homeward with her jar of water." See also Schwartz, Palestine, p. 102; Thomson, Land and Book, i, 361; Porter, Handbook for Pilgr. p. 285; Tristram, Bible Places, p. 46; Conder, Top. W. r. i, 274.

Zorathite (Heb. Tsorathi, נץורה, patronymic from Zorah; Sept. Sqphd v. r. Apa'di; Vulg. Sorathii; A. V. "Zorathites"), a designation of the inhabitants of Zorah (q. v.), mentioned in 1 Chron. iv, 2 as descended from Shoba, one of the sons of Judah, in ii, 52 is stated to have founded Kirjath-jearim, from which again "the Zareathites and the Eshtaolites" were colonized. See ZAREATHITE; ZORITE.

Zorah (Josh. xv. 38), See ZORAH.

Zorites (Heb. Tosri, נצרה, a patronymic; Sept. Sqphd v. r. Hapodi; Vulg. Susros; A. V. "Zorites"), the designation apparently of the inhabitants of Zorah (q. v.), mentioned in 1 Chron. ii, 54 as descended from Salma the brother of Shibah, and hence classed with the descendants of the latter in the "Zareathites and the Eshtaolites" (v. 55).

Zosimus, see in A.D. 417-418, successor to Innocent I, was by birth a Greek, and is noteworthy as a participant in the doctrinal controversies of his time, in which he first endorsed and then rejected doctrines regarded as heretical, and also for his assertion of authority and his energetic labors in behalf of the supremacy of the Roman see. He countermanded the condemnation of Pelagius and Celestius, denounced by Innocent and the African synods; and in a letter to bishop Aurelius of Carthage and others he censured the treatment they had received, declared them orthodox, and warned the bishops against sophistries in speculation. He also defended his see against his enemies at Rome; and, as bishop of Bari, received the consecration of Pelagius. The African bishops, however, held another synod (418), which defended their course and censured Zosimus for reopening a settled case, besides forbidding the departure of Paulinus for Rome. Zosimus endeavored to fortify his position by a reference to the ecclesiastical authority derived by his see from Peter; but when the Africans obtained a sacrum resurrectionem against the Pelagians from the emperor Honorius, he gave way, and for his part pronounced the condemnation of Pelagius and Celestius in an Epistola Tractorum. This time he was opposed by eighteen Italian bishops, whom he at once excommunicated (see Zosimus, consecrated by bishop Apriarius of Sicca, in Numidia, and his appeal to Zosimus against his bishop, Urbanus, led to fresh disputes with the Africans. Zosimus refused to recognize the deposition, and sent three delegates to a synod convened at Carthage to demand the restoration of Apriarius.
Zouch, Thomas, D.D., a learned English divine, was born at Sandal, near Wakefield, Yorkshire, in 1737. He was educated at Wakefield School and at Trinity College, Cambridge, where he graduated in 1761. He became a fellow of his college in 1763, and was appointed sub MASTER in 1770. In 1791 he lectured on the art of Writing in the North Riding of Yorkshire, where he remained until 1798. In 1791 he was appointed deputy commissary of the archdeaconry of Richmond, and in 1798 was chaplain to the Master of the Rolls and Receiver of Serberingham. By the death of his elder brother, the Rev. Henry Zouch, in 1798, he succeeded to an estate at Sandal, where he resided until his death. He became prebendary of Durham in 1805; declined the bishopric of Carlisle in 1808; and died in 1818. He was the author of *The Crucifixion* (Canterbury, 1875), a seaton prize poem.—An Inquiry into the Prophecy of the Romans as Described in Dom. Rom., vol. 22 (1792) ; Memoirs of the Life and Writings of Sir Philip Sidney (York, 1808) ; and other works. See Chalmers, Biog. Dict. s. v.; Allibone, Dict. of Brit. and Amer. Auth. s. v.

Zur (Heb. *Tsuwr*, צֶּרֶשׁ, little stone; Sept. *ζωρύς*; Vulg. *Saur*), the father of Nethaneel, which latter was the chief of the tribe of Issachar at the time of the Exode (Numb. i, 8; ii, 5; vii, 18, 28; x, 15). B.C. ante 1638.

Zubly, John Jacob, D.D., a Presbyterian divine, was born at St. Gall, Switzerland, Aug. 27, 1724. He was ordained to the ministry Aug. 19, 1744; took charge of the Independent Presbyterian Church of Savannah, Georgia, in 1760; and was a delegate from Georgia to the Constitutional Congress in 1776-78, but opposed separation from England, and returned to Savannah, which his unpopular views forced him to leave. He died July 28, 1778 (Dr. Zubly, 1779), a man of great mental power and unimpeachable piety, devoted to his call as a preacher of the Gospel, and zealous for the success of his labors. He published, *The Real Christian's Hope in Death*, etc. (Charleston, 1753; 12mo), with a Preface by the Rev. Richard Clarke.—Sermon on the Death of the Hon. John Osgood, of Midway (1773) ; The Law of Liberty (Phila. 1775, 8vo); Londo. eod. 8vo; Phila. 1778, 8vo), a sermon on American affairs. See Allibone, Dict. of Brit. and Amer. Auth., s. v.; Sprague, Annals of the Amer. Pul., iii, 219; Lounsbury's Monthly Review, Feb. 1776, p. 167; Gospel Advocate Repository, i, 49. (J. L. S.)

Zuph (Heb. *Tzaph*, צַ֖פֶּה, honeycomb [Genese.] or moist [Targ.]; Sept. *Σοῦφ* v. r. *Σοῦφ* and *Σοῦο*; but in 1 Sam. i, 3, *Σοῦφ*, apparently reading *Σοῦο*); *Tripa*; (as the text of the Heb. there does), the name of a man and of a place.

1. A Kohathite Levite, the son of Elkanah and father of Tohu, or Toah, or Nahath in the ancestry of the prophet Samuel (1 Sam. i, 1; 1 Chron. vi, 85 [Heb. 20]). B.C. cir. 1310. In the parallel passage (1 Chron. vi, 25) he is called *Zorah*.

2. A district (מָנָה) (land) at which Saul and his servant arrived after passing through those of Shalisha, of Shalim, and of the Benjamites (1 Sam. ix, 5). It evidently contained the city in which they encountered Samuel (ver. 6), and that, again, if the conditions of the narrative are to be accepted, was certainly not far from the "tomb of Rachel," probably the spot to which that name is still attached, a short distance north of Bethel.

Zuriah, the son of Jabez, was connected in a singular manner with Samuel. One of his ancestors was named Zuph (i, 1; 1 Chron. vi, 83) or Zophai (ver. 26), and his native place was called Ramathaim-zophim (1 Sam. i, 1). The name, too, in its various forms of Zophim, Mizpa, Mizpah, Zephathah, was common in the Holy Land, on both sides of the Jordan.

The only possible trace of the name of Zuph in modern Palestine, in any suitable locality, is to be found in Soba, a well-known place about seven miles due west of Jerusalem, and five miles south-west of Naby Samwil. This Dr. Robinson (Bibl. Res. i, 8, 9) once proposed as the representative of Ramathaim-zophim; and although on topographical grounds he virtually renounces the idea (see the footnote to the same pages), yet those grounds need not similarly affect its identity with Zuph, provided other considerations do not interfere. If Shalim and Shalisha were to the north-east of Jerusalem, and Soba, as they seem to be, the land of Benjamin would be south or south-west, and pursuing the same direction he would arrive at the neighborhood of Soba. But this is at the best no more than conjecture, and unless the land of Zuph extended a good distance east of Soba, the city in which the meeting with Samuel took place could hardly be situated near to Rachel's sepulchre. The signification of the name Zuph is too doubtful to be of use in identifying the place. Zophim is usually considered to signify watchmen or spotters-out, hence prophets, in which sense the author of the Targum has actually rendered "Ephraim came into the land which was a prophet of Jehovah." Rabbi Schwarz regards the name Zuph as having the same root (from פֶּסֶחְךָ, to spy out), and thinks it denotes an emplacement or look-out. He also (Palaet. p. 156) ingeniously traces Saul's route, and seeks to identify "the land of Zuph" with Ramathaim-zophim itself. Wolcott (in the Bibl. Sacra, i, 694) suggests that the city of Ziph (so the name reads in the Rachi and Exeg. gave its name to this whole region; but this town was too far south for that. It is probable that the district in question was a wide one, at least from north to south, and extended from the hills of Ephraim to the vicinity of Bethel. See Ramah.

Zur (Heb. *Tsur*, צָרֶשׁ, a rock, being substantially the same as the Heb. name of Tyre [q. v.]; Sept. *Σοῦφ* v. r. *Τσουφά*; Vulg. *Sur*), the name of two men.

1. Third named of the five princes of Miliion who were slain by the Israelites when Balaam fell (Numm. xxxii, 8). B.C. 1618. His daughter Cozi was killed by Phinehas, together with her paramour Zimri, the Simeonite chieflain (xxv, 15). He appears to have been in some way subject to Sihon king of the Amorites (Josh. vi, 28).

2. Second named of the eight sons of Jehiel (the founder of Gibon) by his wife Maachah (1 Cristh. viii, 30; ix, 56). B.C. post 1612.

Zurishad'rai (Heb. *Tzurishaddeyn*, צֻרִישָדְדֵי, my rock is the Armym of Zur'iel [comp. Ammishaddai in the context]; Sept. *Σουρισάδην*; Vulg. *Suriassadai*), the father of Shelumiel, which latter was chief of the tribe of the Kohathites at the time of the Exode (Numm. i, 5; ii, 12; vii, 36; x, 19). B.C. ante 1658.

Zuzim (Heb. only in the plur. and with the art.,
ZWICK 1111 ZWINGLI

Zwicker, Johann, preacher and reformer in the city and region of Constance, Switzerland, was born about 1496. He studied theology and jurisprudence, being made doctor of laws at Basel, and priest about 1518. He then came under the influence of Luther and Zwingli, married, and entered on a pastorate at Riedlingen in 1522; from which he was expelled, on account of his evangelical tendencies, by the Nuremberg Diet of 1525. After a time he was associated with Anabrose Blarer as preacher, and in the conduct of the Reformation at Constance, which was brought to a successful consummation in 1531. Zwicker was especially concerned with the setting of plans for the education of the young, and with the introduction of an order of discipline in the Church. After the completion of such labors, the preachers of Constance fell into a time of bereavement, and were cheerfully submitted for the dry husks of scholastic theology. In 1566 he became a pastor in Glarus, not far from his native village. Here he devoted himself especially diligently to the study of God's Word, copying with his own hand the original of Paul's Epistles, and transferring it to memory. During the same period he mingled in the strife of arms against the French. Influences which we will not stop to explain induced him to leave Glarus and become pastor in Einsiedeln, a famous spot in papish pilgrimage and superstition, where he preached doctrines which he had drawn from his study of the Holy Scripture; and where he called to the Cathedral Church of Zurich, he proclaimed the same truths which he had preached in the Church of the Virgin of the Hermitage in Einsiedeln. Multitudes flocked to hear him, attracted by the novelty of the doctrines he taught and the eloquence with which he spoke. He delivered expositions in the pulpit, and the Epistles of Paul and of Peter. The effect of his honest preaching of the Gospel soon became apparent in the city and country, and his general character and opinions produced a deep and universal sensation. While this state of transition was so marked, the crisis was reached in 1518, by which they circumvent it and continued to improve the writings of Vadian against that agitator before the public. Zwick died as the clouds of the Smolcauld war began looming in the distance. After being repeatedly unwell, he went to Bischofzell, in Thurgovia, to minis-
plague broke out, and, during its continuance, though weak himself from exhaustion, Zwingli assiduously tended the sick and dying. His zealous labors grew in number and results, the people greatly attached to him; but the friends of the popedom were enraged, and Zwingli was tried, in January, 1529, on a charge of heresy. Rome gained nothing by the trial. Zwingli presented sixty-seven propositions, and defended them from Scripture. The Reformer gathered a courage with growing difficulties and in 1529 the Council of Zurich remodelled the public worship according to the views and wishes of Zwingli. Pictures, statues, and relics were removed from the churches, and mass was abolished. Opposition to the Reformed doctrines was meanwhile gathering in the other cantons. The question arose, whether each canton was free to choose its own form of religion, or whether the Confederation should interfere; Zurich contended for its individual liberty and independence, but was opposed by the Waldstätter, or the primitive democratic cantons of Schwytz, Unterwald, Uri, and Lucerne. The triumph of the Reformation at Berne and other places threw those forest cantons into wilder commotion, and, in consonance with their views of their federal polity, they took up arms for Rome. Zurich, encouraged by Zwingli, called out its troops and put itself into a posture of defence. Efforts were made to maintain a truce, but it was of no long duration, and after various diplomatic negotiations, hostilities finally commenced. Zurich had also lost somewhat of its earlier evangelical purity, while the neighboring states were conspiring for its ruin. In the awful emergency, when the public mind was alarmed by a series of omens and prophecies, the people maintained tranquillity. The war began. Zurich was cowardly, dilatory, and far from being prepared; but the horn of the enemy echoed among their hills, and the devoted Zwingli mounted his caparisoned horse, took farewell of his wife and children, and went forth as a patriot and warrior to share in the common danger. His official position in the army, however, was that of chaplain, according to Swiss custom. The Zurichers marched to meet the Waldstätter, but were defeated at Cappel with great slaughter, Oct. 11, 1531. Zwingli was found, after the battle, lying on his back and his eyes upturned to heaven, with his hands clutched, and his head at his oxeye. He had been struck near the commencement of the engagement, and then as he fell and reeled, he was several times pierced with a lance. According to some accounts, he was wounded while stooping to combat a dray, sold by a lad. It was audible words were, "What of that? They can indeed kill the body, but they cannot kill the soul." He was living when discovered in the evening; but the infuriated fanatics soon despatched him. Next day his dead body was barbarously quartered and burned. Thus perished this heroic martyr, a plain monument in granite, erected in 1838, marks the spot where he died.

But the Protestant faith gained the victory not in Zurich alone, nor was Zwingli the only Swiss reformer. Geleamphius did a good work at Basel. In Berne also, the Reformation was successful. The Reformation being not only a religious movement but in some respects a political one, it attracted to its support many persons who were contending for the spread of more liberal opinions throughout Switzerland. Zwingli was a patriot, and those who were immediately associated with him were patriots, and he believed that there could be no independence to reach this end without the characters of his countrymen as the Gospel. There was substantial agreement between Luther and Zwingli on all the cardinal doctrines of the Protestant faith. On the doctrine of the eucharist there was, however, a radical difference of opinion. Luther held to "communisitv," declaring that there were present, in some mysterious way, the body and the blood of the Lord Jesus; and in the sacrament accorded at the Lord's supper; while Zwingli contended that more distinctly what was designed to be merely a reminder of the sufferings and death of the Saviour. The controversy was a bitter one. Neither party could convince the other. All that could be done was to lay down fourteen articles of faith which were to be received by both parties on the basis of the Augsburg Confession. But these minor controversies, for such they seem to us to be, must have lost all their interest in the presence of the grave dangers which threatened the very existence itself of the Reformation in Switzerland. Zwingli led the Reform movement in the other German cantons of Switzerland, and attended the conference at Berne in 1528, which resulted in the abolition of the mass. He was invited to a personal conference with Luther and Melanchthon at Marburg, September, 1529, to adjust the only serious doctrinal difference between them on the eucharistic presence. He counselled energetic measures for the promotion of the Reform in his native land, but was defeated by the policy of hesitation which prevailed in Berne. He also entered into bold political combinations with Philip of Hesse for the triumph of the Protestant cause in Germany, and addressed the emperor of Germany and the king of France with a confession of his faith. Zwingli was a bold Reformer, an able scholar, an eloquent preacher, a patriotic republican, and far-sighted statesman. He lacked the genius and depth of Luther and Calvin, the learning of Melanchthon and Geleamphius; but he was their equal in honesty of purpose, integrity of heart, devotion to the cause of Reformation, and surpassed them in liberality. His prominent intellectual trait was clear, strong common-sense.

Zwingli's principal works are a Commentary on the True and False Religion (1525)—a sermon On Providence (preached at Marburg, 1526)—his Confession of Faith, addressed to Charles V of Germany (1530)—a similar Exposition of Faith, addressed to Francis I of France (July, 1531), three months before his death. This last document is clear, bold, spirited, and full of hope for the triumph of the truth; warns the king against the flamboyant and distasteful "labilism" of the time, and entreats him to give free course to the Gospel, and to forgive the boldness with which he dared to approach his majesty. A few years afterwards (1536) Calvin dedicated, in a most eloquent preface, his famous Christian Institute to the king of France, with a confession of want of direct success. Zwingli represents only the first stage in the history of the Reformed Church. His work was completed after his death by his successor, Bullinger, at Zurich, and still more by Calvin at Geneva.

See H. Zwingli Opera, ed. Schuler and Schultes (Zurich, 1838-42, 8 vols.); a popular edition of his Works by Christoffel (ibid. 1944 sq., 15 vols.); Biographie de Zwingli, by Myconios (1856), Nitschel (1776), Hess (1811; transl. by Aikin, Lond., 1812), Schuler (1819), Hottinger (1848; transl. by Thomas C. Porter, Harrisburg, 1846), Robins (in Bibliotheca Sacra for 1852), Roeder (1855), Christoffel (1857; transl. by John Cochran, Edinburg, 1858), Gudèr (in Herzog's Real-Encyklop. 1864.), and especially Mörikofer (Ueüick Zwingli nach den Quellen [Leipsic, 1867-69, 2 vols.]).

THE END.
