Entered according to Act of Congress, in the year 1881, by

HARPER & BROTHERS,

In the Office of the Librarian of Congress, at Washington.
LIST OF WOOD-CUTS IN VOL. X.

Coln of Valentinian II. .......................... 668
Ancient Egyptian Vineyard, with a large tank of water. .......................... 796

Coln of Valentinian III. ......................... 668
Ancient Egyptian Death Judgement .......................... 796

Coln of Valentinian. ............................ 700
Prfectisnig Away Birds with a Sling .......................... 796

Plan of Vatican Palace at Rome. .................. 720
Ancient Egyptian Machine for Well at Beersheba. .......................... 706

Specimen of the Codex Vaticanus. .................. 720
Ancient Egyptian Charlot-wheel. .......................... 707

Cylindrical Vat. ................................. 728
Egyptian Wheat. ................................. 716

Grotted Vault .................................. 728
Habit of the Order of the Vistitation .......................... 717

Vaunt in Westminster Abbey ....................... 728
Ancient Egyptian Wheel. .......................... 719

Vaulinking-shaft, Netley Abbey ..................... 734
Ancient Egyptian Whips. .......................... 719

Coln of Vitellius ................................. 734
Whip Suspended from the Wrist. .......................... 719

Oriental Out-door Valls ........................... 737
Vittorin Scroll. ................................. 719

Oriental In-door Valls. ........................... 738
Volute. ................................. 818

Ancient Egyptian Woman Velled ....................... 738
Weeping Willow. ................................. 1068

Vousoire. ................................. 816
Branch of the Weeping Willow. .......................... 1068

A Syrian Veiled Woman ............................ 747
Ancient Head of Volcan. .......................... 1068

Figures of the Assyrian Venus .......................... 747
Oriental In-door Vells for Ladies. .......................... 1068

Temple of the Fulfilled Venus .......................... 749
Egyptian Vulture. ................................. 1068

St. Veronica. ................................. 758
Griffon Vulture. ................................. 1081

Portrait of Christ on St. Veronica's Handkerchief. .......................... 758
Ancient Assyrian Wagon. .......................... 1081

Turkish Arabah. ................................. 766
Library of the Young Man's Christian Association, New York City. .......................... 1083

Native Picture of Victory. .......................... 778
Ruins at Suralend. ................................. 1083

Walking-sticks found at Thebes. .......................... 778

Vestals of the Ely Cathedral ......................... 795
Priests and other Persons of Rank. .......................... 1083

Robbers' Cave. ................................. 885

Ancient Reclining at Table. .......................... 778
Pass of Sufa. ................................. 1084

Wall-painting, Ringedhead. .......................... 778
Ruined Town of Sebala. .......................... 1084

Vignette .................................. 781

A Watered Garden. ................................. 886

Augustinian Hospital Sister of St. Thomas of Villeneuve. .......................... 886

Cyclopaedia

of

Biblical, Theological, and Ecclesiastical Literature.

Suáda, the Roman personification of persuasion; the Greek Peitho.

Sudélâla, the diminutive of Suáda (q. v.).

Su'ā'ı (Heb. סעא, Su'ach, sweeping [Gesen.], or riches [Thurt.]; Sept. Σουά), first named of the eleven "sons" of Zophan an Asherite (1 Chron. vii. 36). B.C. apparently c. 1020.

Suárdé (or Suárezes), Joseph Marie, a French prélaté and antiquarian, was born July 5, 1599, at Avignon, and educated at his native place. Having embraced the ecclesiastical state, he became the coadjutor of his uncle Francisco Suárez (q. v.) as provost of Saint Paules in Paris, and afterwards went to Rome, where cardinal Barberini gave him charge of his library. Having received several additional honors, he was at length promoted by Urban VIII. in 1633, to the bishopric of Vaison, in which capacity he attacked Calvinism; but he finally resigned in favor of his brother Charles, and retired to Rome, where he died, Dec. 7, 1677. His antiquarian writings are enumerated in Hoefer, Nouv. Biog. Générales, s. v.

His brother Charles Joseph, born at Avignon in 1618, became priest in 1641, succeeded to the bishopric of Vaison in 1666, and died there Nov. 7, 1676.

A nephew of both the preceding, Louis Alphonse, born June 6, 1642, at Avignon, studied theology at the Seminary of St. Sulpice, succeeded his uncle as bishop of Vaison in 1671, held a synod there in 1673, and died March 13, 1685, near Sorgues, in Vaucluse.

A nephew of the last preceding, Louis Marie, was bishop of Aquis (now Dax) in 1786, and died April 17, 1788.

Suárez, Francisco, a Spanish Jesuit, born at Granada, Jan. 5, 1548, was a professor of reputation at Alcala, at Salamanca, and at Rome. He was afterwards invited to Coimbra, Portugal, where he became the principal professor of divinity. He died at Lisbon, Sept. 25, 1617. He was an author of the most voluminous kind, and the Jesuits consider him the greatest and best scholastic divine that their order has produced. See his writings in Hoefer, Nouv. Biog. Générales, s. v.

He is the principal author of the system of congruum, which is at bottom only that of Molina. Father Noll, a French Jesuit, made an abridgment of the works of this commentator (Geneva, 1782, fol.). There is a Life of him by Antony Deschamps (Perpignan, 1671, 4to).

Suayambhu, in Hindu mythology, was the son of Brahah and ancestor of the human race. His daughter Devagiri was married to Karta, one of the great progenitors, and bore nine daughters, who became the wives of the nine remaining progenitors. By Satarupa, the daughter of Brahah, Suayambhu became the father of five other children, whose offspring contributed towards the extension of the human family.—Vollmer, Wörterb. d. Mythol. s. v.

Subcanon, an inferior or minor canon (q. v.).

Subcanon, or subcanon. The notary of Italian cathedrals is the chancellor's vicar, called also registrar or matricular, and at St. Paul's, in 1280, designated as scriptor librorum. He acted as assistant secretary, librarian, lecturer in theology and law, and teacher of reading.

Subchanter, or succentor, the deputy of the precentor, the principal among the vicars in choir. The precentor sat on the right-hand side of the choir, and the succentor on the left. His office was usually the gift of the chapter; occasionally, however, he was nominated by the precentor. There were two kinds of subchanters: I. The succentor of canons, or succentor major (first mentioned in the 11th century), at York, Bayeux, Paris, Amiens, Glasgow, Cheltenham, Girgenti, Wells, and Salisbury, acted as precentor's deputy with regard to the canons; he ranks after the subdean, and the office was given by the diocesan. At Amiens he installs canons in the lower stalls; at Rouen he holds a prebend and regulates processions; he is often called prévot de la cathédrale in distinction from the grand chantre. 2. A vicar, deputy, and assistant precentor. At Seville and Placentia and in England he tabled the ministers for service; at Chichester and Hereford he chastised the boys, and ordinarily his duties were confined to ordering processions, delaying offenders, and general supervision of the lower choir; he could not correct a canon. His office appears at Chichester and St. David's in the 13th century; he corresponds to the precentor of the new foundations. At Lichfield and St. David's the subchanter is head of the Vicar's College.

Subdeacon. The ancient Christian Church had but two classes of officers, the presbyteri, patriarchi, patriarchi, patriarchi, patriarchi, patriarchi, patriarchi, patriarchi, patriarchi, patriarchi, patriarchi, patriarchi, patriarchi, patriarchi, patriarchi, patriarchi, patriarchi, patriarchi, patriarchi; and the senators, bishops, the former being charged with functions within the field of worship, while the latter were employed in administering the charities of the Church. In time, the episcopacy was developed out of the presbyterate, and the subdiaconate from the diaconate. The latter was always regarded by the Church as of human invention, and as having been introduced "utilitatis causa" (see Morinus, Comm. de S. Eccles. Ordinat. Exercit. xi. 1). Its introduction was, more-

SUBLAPSIANS

dring-night, whose office it was to render the newly
married maidens favorably disposed towards their hus-
bands.

Subintroductus (ευπρεποσθυτος) was a term applied
to females kept by persons of clerical rank. Celibacy
and chastity were regarded as identical from an early
period in the Church, and in consequence ascetics in-
vented the plan of remaining unmarried and taking into
spiritual union with themselves young virgins (διέθερα,
νορεα, sisters). The relation is already hinted at in
Hermas and there seems to have been more frequent
time when Cyprian condemns it. Its spiritual character
was speedily lost, and it soon became necessary to legislate
against the abuses to which it gave rise. The question
was discussed as the trial of Paul of Samosata, at Anti-
och, in 362 (see Eusebius). In 506 the Council of Ele-
be padre the clergy to have “sisters” living with
them; and that of Ancyra in 514, and of Nice in 525,
prohibited association with all females whose relation to
the clergyman did not obviate all suspicion (mother,
sister, etc.). Subsequent legislation on the part of both
Church and State was in the same direction; e.g. of
the third Council of Carthage in 397 (Can. 17, 37) and
Cod. de Episc. et Clericio i, 8, 10 of Honorius and Theo-
dolus, 420; Novella xciii, 29; cxxxvii, 1, in finis of
Justinian.

The practice of keeping subintroductus, or extramuris,
developed into complete concubinage, and became so gen-
eral that it was denounced by the Council of Carthage in
160, by the synods of Arles, 314 (Can. 8, 84); Episc. et

dored the subaprianitarian theory, Gomarus alone upholding supralaprianitarianism, without, however, ceasing to be considered orthodox. The synod had recognised that both views were allowable and only preferred subaprianitarianism as presenting that doctrine in a form less objectionable to other churches. This question had no connection whatever with Arminianism, for not even the slightest appearance of a concession to those views would have been tolerated. In 1635, the Swiss, following up the failure of the French, the Swiss refused expressly to endorse subaprianitarianism for fear of appearing thereby to cast blame on the supralaprianarians. The most eminent theologians, such as Beza, Piscator, Vestius, Gomarus, etc., upheld the strictest system. It is only in modern times that subaprianarianism has had to be discarded as a real denomination, the difficulties of the orthodox Reformed doctrines; but the ancients, who appreciated it more correctly, did not look upon it as such, and consequently did not oppose it. The general principles of the system were as follows: The world, and man at first, answered exactly to the divine plan: man was created in primitive purity, fell by his own voluntary act, and thus became subject to retribution, and that infallibly; and although all are bad alike, yet some are redeemed by grace and made blessed, but the others remain unredeemed, and—so far as grace is concerned—their salvation is maintained. All this happens exactly as it was originally decided in the organization of the world, and because it was thus decided. The decrees were all equally promulgated by God from all eternity without one having precedence over the other. Yet we are obliged to distinguish the different decrees according to their relation to each other, as the final decree includes necessarily the means by which its object is to be attained; and these decrees concerning the means even precede the decree on the final result, yet only in causality, not in time, since there is no time with God. The supralaprian system, on the other hand, regards that the final decree is independent of any other, is the revelation, the self-manifestation of God, and that in his two great attributes of mercy and justice—mercy on those he saves, justice on those he leaves to the punishment they deserve. All other decrees serve but as means for this great object of the creation; in the view God created men, then permitted the introduction of sin, thus making them objects of his salvation or of his condemnation, which were decided beforehand. In consequence of these views, that school asserts that in issuing the decree of election God looked on man merely as man, not as man in his own grace. Hence, also, God presented the two fundamental attributes of the decree of predestination the "creature rationables, servabiles, damnabiles, creabiles, labiles, et reparabiles," i.e. creatures considered yet as without any determined properties. The subaprianarians arranged the plan of creation in such a manner that God, from motives of his own, decreed to create man, and to allow him to sin, knowing that he would infallibly do so; and from these decrees they make the other decrees depend—whereby some are saved, though no better than the others, and the others damned, though no worse; and this manifestation of mercy to some and of justice to others constitutes the justification of the world. This is their whole difference. The two methods uphold the same doctrine of absolute predestination, only the subaprianarian present it in a stricter, more imperious manner, without, however, lessening the guilt of man or making God the originator of evil; the subaprianarian method is more intrinsically ground in God's decrees, in this predestination as firmly, and the guilt of man in the Fall; for what God allowed in his plan is not permitted because God foresees what will happen, but only because he wills it. The supralaprianarians, indeed, say that the event is not in the predestination, but mean only that it was infallibly to come about, or that those who are predestined, the subaprianarians do not in any way mean that the Fall might not have happened, that it could only be consid-
ered in the plan of creation as having occurred, or even that the entrance of sin into the world might have occurred in a different manner than in that which God freely approved in his scheme of creation. In Hutter, Dognenbach, Dognenmisch, 8th ed., p. 589; Schweizer, Ref. Dogmatik, ii, 123 sq.; the same, Gesch. d. ref. Central-Dogmen, ii, 48, 55, 181.

Subleyras, Pierre, a French painter and engraver, was born at Uzes in 1669, and was the son of Mathieu Subleyras, a painter of considerable merit. Pierre, at the age of three, went to The Hague to receive lessons from Antoine Rivaux. In 1724 he went to Paris, took the course in the Academy, and in 1726 gained the first prize. He went to Rome in 1728 as royal pensioner, and died there, May 28, 1749. He painted several sacred and ecclesiastical scenes which have been greatly admired. See Hoefer, Nouv. Biog. Générale, a. v.

Submission, Act of, an act passed in the reign of Henry VIII., in 1544, which makes royal license necessary to the validity of certain acts of convocation.

SUBMISSION to God implies an entire giving-up of our understanding, will, and affections to him; or, as Dr. Owen observes, it consists in—1. An acquiescence in his right and sovereignty; 2. An acknowledg-ment of his full right; 3. A rendering of obedience and service in the discharge of our duties, as we are able; 4. Of his love and care; 4. A diligent application of ourselves to his mind and will; 5. Keeping our souls, by faith and patience, from weariness and despondency; 6. A full resignation to his will. See RESIGNATION.

Subprebendary, a prebendary in inferior orders.

Subprecentor, an assistant to and substitute for the precentor of a church or cathedral, whose duty it is to attend to and guide the singing in the absence of the precentor.

Subprior, an official in a priory, who is the prior's deputy, and is ordinarily second in rank to the prior.

Subramanya Mahabienia, in Hindu mythology, the great leader of armies, is a surname of Kar- tikeya, the son of Siva and the sisters Gonya and Uma.

Subruncinatör, a Roman divinity who presided over the weeding and grubbing of gardens.

Subsacerdot, an assistant to, or deputy of, the ordinary sacristan of a church. They are the keepers of the vestry and sacristy, church-cleaners, bell-ringers, etc. At Lincoln they were called stallkeepers; at York, clerks of the vestibule; and at Canterbury, verasters.

Subsacerdoy. See SUBSACRIST.

Subscription, Clerical. Subscription to articles of religion is required of the clergy of every established Church, and of some churches not established. "The most stringent and elaborate subscription probably ever enforced," says Dr. Stanley, "was that in the diocess of Brunswick, when duke Julius required from all clergy, from all professors, from all magistrates, a subscription to all and everything contained in the Confession of Augsburg, in the Apology for the Confes- sion, in the Smalaldic Articles, in all the works of Luther, and in all the works of Chemnitz" (Letter on State of Subscription, p. 87). The Church of England only requires this kind of assent to the Thirty-nine Articles and the Book of Common Prayer. But it has been a matter of dispute whether it answers any valuable purpose as to religion, however necessary as a test to loyalty. All language is more or less ambiguous, so that it is difficult always to understand the exact sense, or the animus imponendus, especially when creeds have been long established. It is said that the clergy of the churches of England and Scotland seldom make them- selves as fetters by the Thirty-nine Articles or the Confession of Faith, when composing instructions for their parishes or the public at large. It is to be feared, in
deed, that many subscribe merely for the sake of a membership; and though it be professedly ex animo, it is well known that it is not so in reality; for when any one appears to entertain conscientious scruples on the subject, he is told it is a thing of no consequence, but only a matter of form.

Stanley presents the following arguments in favor of repeal: 1. The first is, that there are signs of a growing reluctance, due in some part to the stringency of present subscriptions, on the part of thoughtful young men, to enter the ministry of the Church. 2. There is some recent evidence, especially at the universities, that the abolition of subscription has not tended to the injury of the Church or to any increased disbelief of her doctrines. 3. But, more especially, there is a growing disposition to interpret adhesion to formularies more narrowly than in former times. See Paley, Mor. Phil. i. 218; Dyer, On Subscription; Doddridge, Lect. lect. 70; Conybeare, Sermon on Subscription; Free and Civil Disquisitions relating to the Church of England; The Confessional; Duncan and Miller, On Creeds; Stanley, A Letter to the Lord Bishop of London on the State of Subscription in the Church of England and in the University of Oxford.

Subsellium, a term given in the early Church to the footstool provided for persons of distinction. Upon Christian monuments God is represented as using the subsidium while receiving the offerings of Cain and Abel; our Lord, when teaching his disciples; and the Holy Virgin, in the adoration of the magi. The episcopal chairs were also provided with them, and, to show their submission to bishops, persons were accustomed to seat themselves thereupon. They were also called subsidium, subpostorium, supermedenum. Subsellium was likewise a name for the seats of the presbyters, in the ancient Church, on each side of the bishop's throne, in the upper part of the chancel, called the opus. Also the two lower steps in a sedilia, i.e. those for the deacon and subdeacon.

Subsexton. See Subsachistan.

Substance (Lat. sub, under, sub or stans, to stand) is literally that which subsists by itself. In Greek, substance is denoted by ousia, hence, that which truly is, or essence, seems to be the proper meaning of substance. It is opposed to accident; of which Aristotle has said that you can scarcely predicate of it that it is anything. Our first idea of substance is probably derived from the consciousness of self—the conviction that, while our sensations, thoughts, and purposes are changing, we continue the same. We see bodies, also, remaining the same as to quantity or extension, while their color and figure, their state of motion or of rest, may be changed. Substances are either primary, that is, singular, individual substances; or secondary, that is, genera and species of substance. Substances have also been divided into complete and incomplete, finite and infinite. But these are rather divisions of being. Substance may, however, be properly divided into matter and spirit, or that which is extended and that which thinks. Substance is essential, as it is the same in all changes, and common to all spheres of reality; the other three being form or essence, moving or efficient cause, and end. He says, further, that the individual alone has substantial existence, and defines ousia, in the sense of the individual substance, as that which cannot be predicated of anything else, but of which anything else may be predicated. Johannes Philopenus of Alexandria, by extending the Aristotelian doctrine, that substantial existence is to be predicated in the fullest sense only of individuals, to the dynam of the Trinity, thereby incurred the accusation of tritheism. John Scotus regarded the Deity as the substance of all things, and could not, therefore, regard individual, concrete things as substances, of which the general may be predicated and in which the accidental is contained. He views all things, rather, as contained in the divine substance. Berengarius of Tours (De Sacra Cena) disputes the theory of a change of substance, claimed by the advocates of transubstantiation, without a corresponding change in the accidents, i.e. a change in the bread and wine apparent to the senses. Roscelinus teaches that whatever is a substance is, as such, not a part: and the part is, as such, not a substance, but the result of that substance which is divided into parts which we make in [thought and in] discourse. Gilbertus thus speaks: The intellect collects the universal, which exists, but not as a substance (est, sed non substantia), from the particular things which not merely are (esse), but also (as subjects of accidents) have substantial existence, by considering only their substantial similarity or conformity. Descartes defines substance as follows: "By substance we can only understand that which so exists that it needs nothing else in order to its existence;" and adds, "indeed, only one substance can be conceived and can alone need nothing else in order to its existence, namely, God; for we plainly perceive that all others cannot exist without God's assistance." Spinoza understands substance to be "what which is in itself, and is to be conceived by itself. There is only one substance, and that is God. This substance has two fundamental qualities or attributes immensurable by us, namely, thought and extension; there is no extended substance as distinct from thinking substance." "There are not two substances equal to each other, since such substances would limit each other. One substance cannot produce or be produced by another substance. Every substance which is God's infinite understanding is also really in nature. In nature there are not different substances; nature is one in essence, and identical with God." Locke says, "The mind, being furnished with a great number of simple ideas, conveyed to it by sensation and reflection, remarks that a certain number of them always go together; and since we cannot imagine that which is represented by them as subsisting by itself, we accustom ourselves to suppose a substratum in which it subsists, and from which it arises; this substratum we call a substance. The idea of substance contains nothing but the supposition of an unknown substance which is to serve us as a substratum; Leibnitz gives the name monad to simple, unextended substance; that is, a substance which has the power of action; active force (like the force of the strained bow) is the essence of substance. He held that the divisibil...
SUBSTANCE

ity of matter proved that it was an aggregate of substances; there can be no smallest indivisible bodies or atoms, because these must still be extended, and would thereby be aggregates of substances; that the real substances of which bodies consist are indivisible, cannot be generated, and are indestructible, and in a certain sense similar to souls, which he likewise considers as individual substances. The individual, unextended substances were termed by Leibnitz monads. Hume remarks, "We have no clear ideas of anything but perceptions; a substance is something quite different from perceptions; hence we have no knowledge of a substance. The question whether perceptions inheres in a material or immaterial substance cannot be answered, because it has no intelligible sense." John Stuart Mill distinguishes substances as bodied and mental, and says, "Of the first, all we know is, the sensations which give us, and give the order of the occurrence of these sensations; i.e., the hidden cause of our sensations. Of the second, that it is the unknown recipient of them." See Fleming, *Vocal of Philosoph. Sciences*, s. v.; Ueberweg, *History of Philosophy* (see Index).

SUBSTANCE, a term used in technical divinity to describe nearly the same idea as essence or nature. Thus the Son is said to be the same substance with the Father; that is, truly and essentially God, as the Father is. See Christology.

Substantialists. The Lutheran heresiologist Schlisselburg gives this name as a synonym of the Manichaeans, in his *Catalogue of Heretics*, the second volume of which is entitled *De Siceta Manichaecorum seu Substantialitatumii*.

Substitution. See Vicarious Suffering.

Substrati (i.e., prostrators) were penitents of the third order, so called from the custom of preparating themselves before the bishop or priest as soon as the sermon was ended, to receive his benediction with the imposition of hands, and be made partakers of those prayers which the congregation particularly offered to God for them; after which they were obliged immediately to depart, before the communion service. They stood until this part of the service in the nave of the church, behind the ambo. This sort of penitents are mentioned in the Council of Nice, though no particular privileges were given them; but we may collect from Tertullian and Sozomen that their station was in this part of the church; for Tertullian (De Pudicit. c. 13), speaking of the Roman discipline, says pope Zephyrin brought penitents into the church in sackcloth and ashes, and prostrated them in the midst before the bishops and partakers, to implore the grace of forgiveness for their faults. They were also called Kneelers, or Genuflexentes. See Bingham, *Christ. Antiq.* bk. viii., ch. v., § 3; bk. xviii., ch. i., § 5.

Subtreasurer, the deputy-receiver of certain rents in a cathedral of the new foundation; a deputy-treasurer; the sacrist; a minor canon who had charge of the church goods, served as parish priest in the precinct, provided necessaries for divine service, and was librarian. The office is still partially preserved as an assistant in divine service and parochial cure of souls. At Hereford he ranked after the succesor, and sang the Founder's Mass. He is mentioned in 1290 at York, and at Chichester in the 14th century, being the treasurer's vicar, where he made the chirim of oil and balsam.

Subutulna (σωμοποιής), a cassock, like a rochet, worn under the alb.

Suburbicarian, an epithet applied to those provinces of Italy which composed the ancient diocese of Rome. Concerning this two questions arise: 1. What was the extent of this district? 2. Whether it was the limit of the papal or patriarchal power? Dr. Cave and others think that the notion of suburbanicary churches ought not to be extended beyond the limits of the *profectus urbis*, viz. a hundred miles about Rome; or, at most, not beyond the limits of those ten provinces which were immediately subject to the civil disposition of the vicarius urbis—viz. Campania, Tuscia and Umbria, Picenum Suburbanicarium, Valeria, Samnium, Apulia and Calabria, Lucania and Bruttii, Sicilia, Sardegna and Corsica—which Dr. Cave supposes to have been the exact and proper limits of the pope's patriarchal power, as he thinks the others were the bounds of his metropolitan jurisdiction. See Bingham, *Christ. Antiq.* bk. ix., ch. i., § 347.

Suburbs is the rendering, in the A. V., regularly of *πόλιμος*, properly a *pasture* (1 Chron. vi. 16; Ezek. xlviii. 15); hence the open country around a city used for grazing (Numb. xxvi. 2; Josh. xxi. 11; 1 Chron. vi. 40; xiii. 2, etc.), or for any other purpose (Ezek. xlvii. 28; xliv. 2; xlviii. 17). Once (2 Kings xxiii. 11) it stands for *γεωργία*, paredr, which is but a M.S. variation of *FARBAR* (q. v.);

SUBURBS, in an ecclesiastical sense, meant, in the early Church, all the towns and villages within the region or district to which the city or the diocese extended his jurisdiction, whose bounds, for the most part, were the bounds of the bishop's diocese. See Bingham, *Christ. Antiq.* bk. ix., ch. ii., § 3.

Success is said to have been the proper name of St. Patrick (q. v.).

Succession, an old term for a ceased. See THUMB.

Successor, a term used to denote: 1. A precursor's assistant in a cathedral church; 2. A singer in a collegiate church or chapel; 3. A sub-predecessor; 4. A canon.

Succession, Apostolical, a favorite term with prelates and High-Churchmen to designate what is claimed to be an unbroken line of clerical ordination from the apostles to the present time. In the Roman Church this claim is put forth in the absolute and dogmatic manner through the Tridentine canons, which excommunicate and anathematize all other branches of the Christian Church as heresies and schismatics. In the Greek, Syrian, Coptic, Armenian, and Oriental churches generally, the same exclusive principle is maintained, although it is not asserted in the same absolute and formal a manner. A similar pretense is set up by many Protestants, such as the established churches of European countries, particularly of Great Britain and Ireland, and so likewise by the Vaudois, the Moravians, and others, who assert that they can trace their clerical priesthood in a direct line to the apostles; and in like manner the Protestant Episcopal Church of the United States, and other offshoots of the English Church, pride themselves upon their ecclesiastical lineage, as being in the "regular succession." On the other hand, the denominations "unchurched" by this claim justly take exception to the clerical genealogy thus arrogated, on the following grounds:

1. The phrase "apostolic succession" is essentially absurd and self-contradictory. Strictly construed, it can only mean that the apostles have had a continuous line of successors to the present time. But the apostolic office was sui generis, and by its very constitution confined to the first incumbents. This is clear from two inherent qualifications of the order itself, not to mention others.

   a. It was necessary that an apostle should have been personally conversant with our incarnate Lord; he must have been an eyewitness of his ministry, and have received his instructions, and immediately accepted the appointment at his hands (Mark iii., 14; Acts i., 21, 22). On this ground Paul bases his claim to the apostolate (1 Cor. ix., 1), by virtue of the revelation of the Gospel to him without human intervention (xi., 28; Gal. i., 1, 12). Hence this office was in its very nature inttransmissible and incapable of succession, as soon as, least,
as all the "original eye-witnesses and ministers of the Word" had deceased. See APOSTLE.

6. The "sign" of an apostle was the power of conferring miraculous endowments upon others by the imposition of hands. This is often referred to in the Acts and Epistles as a distinguishing mark between them and ordinary Christians. All believers during the primitive Christian period had received these charismatic gifts, which were first imparted on the day of Pentecost (Acts ii, 4); but the apostles alone were empowered to communicate to the same to subsequent successors (viii, 19). Hence when the original apostles died, these miraculous manifestations soon ceased, and have never been repeated. Can we rest our claim? Indeed, a like power of miracle-working for eminent saints of later times, but it has never had the hardihood to aver that its "apostolic succession" is invariably accompanied by this peculiar gift. How preposterous, then, for sober Christians to set up a pretension that legitimately involves such impossibilities! See GIFTS, SPIRITUAL.

2. Even the claim of an uninterrupted clerical succession is incapable of proof. All the modern churches of Europe and this country, which set up this claim, trace their lineage ultimately through the Roman pontiffs. But the records of the early popes are irrecoverably lost. It is not certain that Peter (q. v.) ever was in Rome, much less that he ever acted as bishop there. All efforts to make out the asserted succession thus fail at this initial point. Many other links in the chain are historically wanting. The lineage is a myth, or at best a mere extraneous probability; as such we are dealing with a matter of forgery and late traditions. This is now candidly admitted by the best and most careful Protestant scholars. The title is indefensible. See POPES. "I am fully satisfied," says bishop Hoadly, "that till a consummate stupidity can be happily established, and universally spread over the land, I see no particular reason to dread the consequence of re-establishing the episcopal ordination in the Church. In the High-Church party of the Protestant Episcopal Church they are almost equally obvious. In fact, "a good churchman," as he is styled, is compelled by this fact to hold himself aloof from other communions, and such a rule is arduous, more or less distinctly, in the canons and regulations of all the bodies last named. This single circumstance is to-day one of the greatest scandals of Christendom. No principle can be just which leads to such unchristian lack of brotherly kindness. See CHARITY.

7. The Church is unnecessary, unwise, and base on a strong view of ecclesiastical policy. The true evidences of an evangelical Church are the conversion, sanctification, and salvation of souls; the propagation of a spiritual Gospel, and the amelioration of the state of society. But the "churchly" claim referred to turns the question of the Church to an issue of its own organization and technical order, and thus leads them away from a broad and catholic spirit, and from a wholesome personal experience, as well as from the highest forms of individual and collective usefulness. The question with them habitually inclines to be, not whether the Church has taken on the welfare of Christendom at large, and most effectually promote personal holiness but what must be done to subservive party purposes, and keep up the pretensions of a select circle. The Church is too often put in the place both of Christ and man.

This, also, is but the ideal picture; it is but the record of sad, solemn facts. Ecclesiasticism and its full formalism have ever been the greatest bane to genuine piety, and the direct foes to the real kingdom of God. Bigotry was excusable in Judaism; but sectarianism, of which the false of "apostolic succession" has been the most fruitful source, is a crime under Christianity. It is but a vain and foolish attempt to adduce a pretense or argumentation for the Church, and to posit a connection with the first source (1 John ii, 7; iii, 11). Wherever this assumption has been prevalent and active, religious bodies have held points of order and esprit du corps among their members in higher esteem than historical truth in profession or vital godliness in practice. Perpetuated superstition, exclusion, and persecution are dealt out with no more tender regard than even against heresy. Zealots for orthodoxy have gathered many a flagot for the martyr, but sticklers for legitimacy have been foremost in kindling the pyre. Even nonconformity has at times caught the passion for its own established system, and Puritans have actually maltreated others—if not burned them at the stake—for refusing the ordinances of the so-called Church. The pretalist smiles at such pseudo-ecclesiasticism, and the Romanist looks with equal contempt upon the Anglican mimicry of "the mother Church;" while the Great Head of all weep at this petty rivalry and contention as to who should hold the title, the badge, and the fraternity of saints. In this competition all that is more valuable in religion has been lost sight of. Laxity of morals has been winked at, while an infringement of canonical rules has been severely punished. It is the old story over again; making void the law of God by the woman, and committing judgment, mercy, and faith. We need ever to revere from the symbols of Christianity to its essentials, or we shall find ourselves holding its form, but denying its power. See PREAMBLE.

Literature.—This may well be exhibited in brief by citing from Eadie's Eccles. Cyclop., which shows how writers in the Episcopal Church are disagree on the main elements of the question:

1. On the Office of the Apostles, and whether they had any successors. Until Christ's death the apostles were presbyters, and Christ alone was bishop. This is affirmed by Stillings, in sermon on the office of the apostles, Pro. Theol. i, 586; in Ayton, Consolat. of the Ch. p. 15; Hamburn, Works, iv, 51, who makes them deacons; Brett, Divine Institutes, on the office of the apostles, ch. vili, p. 2; Coninx, who contradicts himself in Matt. xiii, 19 sq.; Scott, in Christian Life, iii, 388; Mann, Inquiry into the New Oligarchy, p. 91; Seeley, in Cruden's Cyclop., p. 235; archbishop of St. Alban in Ayton, Consolat. of the Ch., p. 7. Archbishop Land is very positive in his letter to the late Bishop of London, in which he made the bishops over the presbyters (Litt. and Episcop. p. 160), and bishop Beveridge is as confident that Christ chose these same twelve as presbyters, and not bishops (Works, ii, 112). Again, Land asserts very positively that Christ ordained them, since the word used by Mark is krusineth—He made them (Litt. and Episcop. p. 160). Bever- vidge, on the contrary, declares that Christ did not ordain any of them during his time, and asserts, in proof of the use of this very term, in these doxologies (Works, ii, 112). 3. Others again, affirm that the apostles were not commissioned till after Christ's ascension. Sage, in A Brief History of the Church, ed. Scott, in Christian Life, i, 117, 118, and ii, 425; see also, Parent, Luke, Acts, i, 13. Bellarmine, De Pontif. lib. iv, c. 25; Heber (Bp.), in Life of Jeremy Taylor, Works, i, 130. 2. The presence of extraordinary officers, and could have no successors. This is affirmed by Pearson, On the Curch and State, 1696, in which he presents the arguments writing: Whitley, in Commentary, Pref. to Titus; Hoadly (Bp.), Works, fol. ii, 827; Barrow, in Works, fol. i, 698; Usher, in Works, fol. i, 164; see also, in his Apologia, p. 9. By the first Canons, p. 9, hooker, Spec. of Pol. vol. iii, bk. vii, ch. iv, 1577. Herbie's edition; Chillingworth; Hinde, History of Rise and Progress of the Church, p. 70-87; On Integrity, p. 70; Lightfoot, Works, xii, 29, 27, 26, 95, etc., and in other works; Palmer, in The Ch., i, 140, 110; Bowens, Hist. of the Church, ch. xiv; On the Devil, in his History of the Church, iv, 92-94. Amer. ed.; Steele, Phil. of the Rest, of Christ, p. 105, 106, 107, 108, 109, etc., and in the former of the same work as a preface, ed. 4, p. viii, 168, 89; and Ayton; Davenant (Bp.), in Col. vol., ch. i, Brint, Div. Light of Episcop. lect. xii, p. 36, apud Ayton; Stilling-
Succinctorium, or Succintorium, an ornament peculiar to the pope, resembling a mappa (q. v.), and embroidered with the holy lamb (Agma Dev). It is worn on the left side, being fastened by a cinature, and is, according to some, a substitute for an albs-purse; or

Agma Dev on the Succintorium.

according to others it was only a resemblance of the ends of a ribbon, formerly worn by most bishops as a cinature over the alb, and which was called bullum pudicitiae, or "belt of modesty." In the East bishops wear one pendant, of a lozenge form, tasselled, and with a cross on it called epigonion.

Succinire (undersinging), a term used to describe a mode of singing in common use in the early age of the Church. A preceptor began the verse, and the people joined him in the close. It was often used for the sake of variety in the same service, with alternate psalmody. Ecclesiastical historians relate that Athanasius effected his escape from the church in which he was about to be burnt by the Arian soldiery by setting the people to this kind of psalmody: he commanded the deacon to read the psalm, and the people (Eunaxidius, respondere or succinnere) to repeat this clause after him: "For his mercy endureth forever." See Bingham, Christ. Antiq. bk. xiv, ch. i, § 12. See Acerosmus.

Succoth (Heb. Sukkoth), פַּלְגָּה or [in Gen. xxxixi, 17; Exod. xii, 97; xiiii, 20; Num. xxxixi, 6, 6] פַּלְגָּה; books [see Gen. xxviii, 14, 22]. See also Sukkot, and Sukkoth. It is tempting to see the name of at least two biblical places of early mention, the exact position of neither of which, however, has been clearly identified by modern researches. See also Succoth-bethmon [see Gen. xxxixi, 17. The name is derived from the fact of Jacob's having there put up "booths" for his cattle, as well as a house for himself; and these structures, in contrast with the "tents" of the wandering life, indicate that the Patriarch made a lengthened stay there—a fact not elsewhere alluded to. Travellers frequently see such "booths" occupied by the Bedawin of the Jordan valley. They are rude huts of reeds, sometimes covered with long grass, sometimes covered with a piece of a tent. They are much used by a semi-nomad people. This fertile spot must have reminded Jacob of the banks of the Euphrates from which he had recently come. The situation is approximately indicated by the fact that Jacob was on his way from Peniel to Shechem. Peniel was apparently on the north bank of the Jabbok (Gen. xxxixi, 22, 28); and it would seem that after his interview with Esau on the south bank, he turned back to avoid further intercourse with his dangerous brother; and instead of following him to Edom, he recrossed the Jabbok and descended to the valley of the Jordan, where he resolved to rest for a time amid its luxuriant pastures (see, however, Kalisch, ad loc.; Ritter, Hist. und Syr. ii, 447).

The next notice of Succoth is in Joshua's description of the territory of Gad. To this tribe the middle section east of the Jordan was allotted, including the valley of the Jordan up to the sea of Galilee. See Gan. Among the towns of this section is the valley of Succoth (Josh. xiii, 27). Nothing more can be inferred from this than that it lay on the east bank of the river.

In the narrative of Gideon's pursuit of Zeba and Zalmunna it is said, "And Gideon came to Jordan, passed over and said unto the men of Succoth, etc." (Judg. viii, 6). His course was eastward—the reverse of Jacob's—and he came first to Succoth, and then to Penuel, the latter being farther up the mountain than the former (ver. 8, "went up thence"). The tale there recorded of the mingled cowardice and perfidy of the inhabitants, and of Gideon's terrible vengeance, is one of the most harrowing in the Bible. At that period Succoth must have been a place of importance, when it ventured to refuse the request of Gideon. Its "prince and elders," too, are said to have numbered "threescore and seventeen men."

Though the rulers were slain, the city continued to prosper, and in the days of Solomon it was well known. The sacred historian informs us that the brazen vessels of the Temple were cast "in the circuit ( miscar) of the Jordan, in the clay ground, between Succoth and Zarthan" (1 Kings vii, 46; 2 Chron. iv, 17). Succoth gave its name to "a valley ( miscar), probably a lower section of the circuit," or "great plain of the Jordan" (comp. "the vale of Siddim," which was also called Emech in "the circuit of the Jordan," Psa. lx, 6).

Jerome observes, in his notes on Genesis: "There is to this day a city of this name (Succoth) beyond Jordan in the region of Scythopolis" (Opera, ii, 989, ed. Migne); but in the Onomasticon both Jerome and Eusebius merely state that it is the place where Jacob dwelt on his return from Mesopotamia, without indicating its site or appearing to know of its existence (a. v. "Succoth of the Jordan.")

Burckhardt, on his way from Beisan to es-Salt, forced the Jordan two hours (about six miles) below the former, and observes in a note (Travel in Syria, p. 845), "Near where we crossed, to the south, are the ruins of Sukkot." The ruins seem to have been on the east bank of the river, though he does not expressly say so, as later travellers do (see Schwarz, Palest, p. 282). This may possibly be the Succoth of Jerome; but it seems too far north to suit the requirements of the narrative in Genesis. Jacob's direct road from the Wady Zerka to Shechem would have led him by the Wady Ferrah, on the one hand, or through Yannin, on the other. If he went north as far as Sukkot, he must have ascended, by the Wady Malhe to Teyasr, and so through Tubias and the Wady Bidan. Perhaps his going north was a ruse to escape the dangerous proximity of Esau; and if he made a long stay at Succoth, as suggested in the outset of this article, the détour from the direct road to Shechem would be of little importance to him (see the Bibliotheca Sacra, Oct. 1876, p. 742 sqq.).

Robinson discovered another ruin, called Sukrit (which is radically as well as topographically different from the Sukkot of Burckhardt), situated on the west bank of the Jordan, in the north of Beisan. "Near it is a copious fountain, and the plain around it is covered with most luxuriant vegetation. The ruin is merely that of a common village, a few foundations of unhewn stones" (Bibl. Res. iii, 309; comp. Van de Velde, Travels, ii, 845). Its position on the west bank pre-
SUCCOTH-BENOTH

vents its being identified with the Succoth of the Bible, but it is just possible that the name may have been transferred to a spot on the other side (see Ritter, su sup., ii, 446), or it may have been a crusaders' site (see Conder, Tent Work in Pales., ii, 62).

Until the position of Succoth is more exactly ascertained, it is impossible to say whether it was the valley of Succoth mentioned in Ps. ix. 6 and viii. 7. The same word is employed (Jos. xiii, 27) in specifying the position of the group of towns among which Succoth occurs, in describing the allotment of Gad; so that it evidently denotes some marked feature of the country. It is most likely, however, that the main valley of the Jordan, the Gâdhr, is intended, that being always designated in the Bible by the name of "the Arabshah."

2. The first camping-place of the Israelites when they left Egypt (Exod. xii, 19; xxii, 20; Numb. xxxii, 15, 6). This place was apparently reached at the close of the first day's march. Rameses, the starting-place, we have shown was probably near the western end of the Wady et-Tumeyût. We have supposed the distance traversed in each day's journey to have been about thirty miles; and as Succoth was not in the Arabian desert, we may mark it on our Exod. chart, a little to the east of the wilderness" (Exod. xii, 20; Numb. xxxii, 6). It must have been along the present pilgrim route called Dub el-Bar, about half-way between the easternmost branch of the Nile and the castle of Ajrud. It was probably, to judge from its name, a resting-place of caravans, or a trading town, as if it were a town in one of the two. We find similar names in Scæna Mandura (Not. Ant.), Scæna Mandorum (Not. Díg.), or Σκέννα Μανδώρα (Not. Græc. Episcopatum), Scæna Veteranorum (Itin. Ant. Not. Díg.), and Scæna extra Gerasa (see: Not. Díg.). See, for all these places, Parthey, Zer Erdb. (1831), p. 148, 183; 2nd edn. p. 356, etc., moreover, it is evident that such a name would be easily lost, and, even if preserved, hard to recognise, as it might be concealed under a corresponding name of similar signification, though very different in sound, like that of the settlement of Ionian and Carian mercenaries, called Σκέπαρος (Herod. ii, 154). See EXOD.; RED SEA, PASSAGE OF.

Succoth-Benoth (Heb. Sukkoth-Benoth, "huts of the daughters of Benoth"). The name occurs in 2 Kings xxvii, 80, as the name of some deity whose worship the Babylonian settlers in Samaria are said to have set up on their arrival in that country. It has generally been supposed that this term is pure Hebrew, and as such most interpreters explain it to mean "the huts in which the daughters of Benoth dwelt," à la Naaman and his hostess thereon the honor of their idol" (i.e. Mylitta, see Herod. i, 199; Strabo, xvi, 745); others "small tabernacles in which were contained images of female deities" (comp. Calmet, Comment. Littéral, li, 867). It is in objection to both these explanations that Succoth-benoth, which in the passage in 2 Kings occurs in the same construction with Nergal and various other gods, is thus not a deity at all, nor, strictly speaking, an object of worship. It should be noted, however, that the expression "made" (יִשָּׂע) does not necessarily require such an interpretation. Sir H. Rawlinson thinks that Succoth-benoth represents the Chaldæan goddess Zir-bani, the wife of Merodach, who was especially worshipped at Babylon, in not unison with her husband. It is, he calls it, the "queen" of the place. Succoth he supposes to be either "a Hattic term equivalent to Zir," or possibly a Semitic mistranslation of the term—Zirat, "supreme," being confounded with Zart, "tents" (see the Essay of Sir H. Rawlinson in Rawlinson's Herodotus, i, 630). Genenius arbitrarily alters the reading to יִשָּׂעֵה בֶּן-וֹת, "huts of the high-places (Thespian, s. v.)" and Movers (Phœnic. i, 866) understands "metulae or secretas mulieres," having reference to phallus-worship (see Nork, Mykoli, i, 124). The rabbins (see Kingmei and Jarchi, ad loc.) falsely that it was a goddess under the form of a hen and chickens; which Kircher (Ed. Iœp., i, 854) regards as an astronomical emblem of the Babylonians. "See Selden, De Dies Syriæ, ii, 7, 808 sqq.; Voss, Theol. Gent. iii, 22; Crestius, De Succoth Benoth, in Ugofolino, Theologia, iii, 642 sqq.

Su'chathite (Heb. only in the plur. Sukkathim, סְקָכָתִים, a patronymic of unknown origin; Sept. Σκόκκαθια; Vulg. in tabernaculis commemoratis), a designation of the last-named of the three families of "scribes which dwelt at Jabez" (1 Chron. ii, 55); apparently descendants of some person named Suchah, a Judahite of the family of Caleb.

Suckow, Carl Adolf, a German theologian, was born in 1862 at Münsterberg, in Silesia. He studied theology and philosophy at Breslau, was appointed in 1884 professor of theology and director of the homiletic seminary at Breslau, and died there in 1847. He wrote, De Proteveangelio Jacobii. Para I, De Argumento ac Inde Protevegantia (Vratislavia, 1830)—Gedankentage des christ. Kirchenjahres in einer Reise von Freiburg (Breslau, 1888)—A. B. C. evangelisch-Kirchenerfassung (ibid. 1846). See Regenburger Conversations-Lexikon, s. v.; Zuchold, Bibl. Theol. ii, 1292 sqq. (B. P.)

Sud (Suid v. r. [in No. 2] Suidâ, Suideâ, etc.), the name of a stream and of a person in the Apocalypse.

1. A river in the immediate neighborhood of Babylon, on the banks of which Jewish exiles lived (Bar., No. 75). Its name is known to geography, but we may assume that the first part of the book of Baruch was written in Hebrew, the original text may have been Sur, the final n having been changed into n. In this case the name would represent, not the town of Sora, as supposed by Bochart (Phalæg, i, 8), but the river Euripus itself, which is always named by Arab geographers "the river of Sora," a corruption probably of the "Sippara" of the inscriptions (Rawlinson, Herod. i, 611, note 4).

2. A corrupt Grecian (1 Esdr. v, 29) of the name of Sta or Staia (q. v.) in the Hebrew lists (Ezra ii, 44; Neh. xvi, 47).

Sudallî, Stephen Bar, a Monophysite monk, who, according to the Candelorumb Sanctorum of Abul-faraj (q. v.), in Assesani, Bibl. Orient. ii, 291, lived about A.D. 500, and was interred in the churches and after the monks in Bethlehem. He is credited with the authorship of a work which circulated under the name of Hierotheus, the teacher and predecessor of pseudo-Dionysius, in which a limitation of the duration of hell is taught on the authority of a quotation from the interpretation of 1 Cor. xv, 28. Neander regarded the ascension of this work as resting upon a mere assumption on the part of Abul-faraj (Gesch. d. christl. Rel. u. Kirche, i, 727), but without having sufficient warrant for his view.

Particulars respecting the mystico-pantheistic theolgy of Sudallî are furnished by Xenjan or Philoxenus (q. v.) of Mahburg in a letter addressed to the presbyters Abraham and Orestes of Esseca, which earnestly warns them against the influence of that learned and subtle monk who formerly sojourned in their city (see extracts in Assesani, sup., p. 30-36). As there represented, Sudallî taught the essential unity of the Father, Son, and Spirit, of the divine and human nature of Christ, and also of God and all created existences, basing his views on 1 Cor. xv, 28, ἡ νὰ ἑαυτῆς ἀναπτύσσεται, πάντα, in παρα- σώ λοι. He had inscribed on the wall of his cell the words "Omnis natura Divinitatis consubstantialis est," and he continued to elaborate the same ideas in his letters. After public opinion had compelled the erasure of the inscription in his cell. It is also charged by Philox- enus that Sudallî taught that baptism and the eucharist are superfluous, that he denied the infliction of punishment for sin at the last judgment, and that he promised to pagans and Jews the same heavenly felicit-
tities as to Christians, to Judas and Simon Magus equal blessedness with Paul and Peter. It is evident that much of these assertions is dictated by malice and is grossly misrepresented. The same remark applies to the Chiliasm views of Sudali, who was a consequent adherent of Originianic doctrines, and must be regarded as a spiritualized, idealistic view of the world. He taught three world-periods—the present, corresponding to the sixth day of the week; the millennium, the great Sabbath or rest-day of the week; and the eternity of consummation or of the restoration of all things.

Nothing is known of the personal or literary career of Ber Sudali. The violent assault of Philoxenus upon his character as a teacher and expositor of the Scriptures appears to have succeeded so far as to cause him to be regarded by all Monophysites as a dangerous heretic. The Jacobites of Syria, e. g., admitted a special sentence of condignation against him into their formula of ordination. See Ameissani, Bibl. Orient., vol. i and ii.;—Hertzog, Real-Encyklop. a. v.

Sudari, or Sudary (meat-cloth): 1. The purificatorium (q. v.) for wiping the chalice; 2. The maniple (q. v.); 3. The veronica (q. v.) (the blessing of the priest's eyes with the sudarium was forbidden in 1549); 4. The banner of a bishop's staff, called also procesium (q. v.).

Sudbury, Simon. See Simon of Sudbury.

Suddath, William W., a Presbyterian minister, was born in McLean County, Ill., July 8, 1826. He professed religion in his nineteenth year, was received into the membership of the Lexington Presbyterian Church as a candidate for the ministry, and was licensed to preach in 1847. About this time he entered Chapel Hill College, in Lafayette County, Mo.; studied theology at the Cumberland Theological Seminary at Lebanon, Tenn.; but before graduating he was induced, by the great interest he took in the success of Chapel Hill College, to return to Missouri and accept the professorship of languages in that college. He was afterwards elected president, which position he filled until 1857, when he accepted a call to the chair of languages in the Masonic College at Lexington, Mo. In 1858 he became enlisted for the St. Louis mission, and his far-reaching mind and noble, benevolent heart conceived a plan to relieve it of its embarrassments. But his labors were too great for his physical energies. He gave up his post at the college to engage in the work of his calling. With his choice: he accepted a call from the Church in St. Joseph, but died Aug. 1, 1860, before assuming the duties of the new position. Mr. Suddath was an eloquent preacher, a scholar, and a Christian gentleman. See Wilson, Presb. Hist. Almanac, 1861, p. 286.

Sudhoff, Carl, a doctor of divinity, and prominent theologian of the Calvinistic Church of Germany, who died in the year 1855 at Frankfurt-on-the-Main, is the author of Wesentliches (4th ed. Hamm, 1865);—Der Heidelberger Katechismus sgerziert (2d ed. Keurzach, 1854);—De Conveniencia quaer intumugnura Gratia Instrumentum, Verbum Des, et Sacrum Intermedii, etc. (Ibid. 1852);—In der Stille (Frankfort, 1859, 2 pts.);

Sud'ias (Σουδίας), a corrupt Greek form (1 Esr. v, 26) of the name Ἡδοναῖα or Ἡδονη (q. v.) of the Hebrew lists (Ex. iii, 40; Neh. vii, 40).

Sudices, the Fates of the Bohemians and Moravians, supposed to resemble the Roman Parcae.

Sudra, in Hindism, is the lowest of the four castes among the Hinduś, sprung from Brahma's feet and appointed to serve the other castes. It includes all inferior laborers and servants.

Sudrā, one of the four powerful dwarfs of the Norse mythology, who support the arch of the sky at the four regions from which they derive their names. The other dwarfs are Nordri, Westri, and Austri.—Veilfin, Wörterb. d. Mythol. a. v.

Suehre, in Persian mythology, is the name of the planet Venus before it was placed in the sky. It is identical with the Arabic Anahid. Suehre was an exceedingly charming maiden, of whom two angels became enamoured, and who resisted their advances with the result that she was removed to the skies, while they were banished to the abyss. In her new abode she is served by thousands of celestial spirits, who adore her for her virtue and beauty.

Suummel Oalla, in Lamia, is a mountain of vast elevation, which is surrounded by three others, upon whose circle rests a second circle of four mountains, all of them being of gold, with the exception of the central one, which is composed of a single green stone. These mountains are the place of abode of the free spirits, Erike Barakian. The wicked spirits dwell in the caverns of the mountains, and their chief there holds a powerful castle.

Sueños, a Christian nobleman in Peru, who, refusing to deny Christ, had his wife taken from him, and given to one of the emperor's meanest slaves; and what added to his mortification was that he was ordered to wait upon his wife and the slave, which at length broke his heart.

Sueur, Eustache Le, one of the most celebrated of French painters, was born in 1617, and after studying with his father, a sculptor, was placed in the school of Simon Vouet at Paris. He soon excelled his master, and adopted a style which is noted for its simplicity and severity. He has been termed by his admirers the French Raphael; but he was far behind that great master in every respect. He died in 1655. He painted the celebrated series of St. Bruno, twenty-two large pictures on wood, in the cloister of the Carthusians at Paris, before his thirtieth year.—St. Paul Preaching at Ephesus:—The Gentes Burning their Prescribed Book (1649), engraved by Picart and Massard.—Paul Healing the Sick:—Martyrdoms of St. Lawrence and St. Protas, both engraved by Gerard Audran. He painted many other celebrated pictures, as, Christ Scourged:—Christ with Martha and Mary:—The Presentation in the Temple:—The Histories of St. Martin and St. Benedict.

Suez. See Red Sea.

Suffering-day. See Good-Friday.

Suffering-psalm, the name given to Psalm xxiii, "Deus, Deus meus;" used in the services of the Church on Good-Friday.

Suffering-week. See Passion-week.

Sufferings of Christ. See Vicarious Suffering.

Suffetum, Council of (Concilium Suffetum), was held in 628, at which St. Fulgentius was present. Bishop Quod-vult-Deus (who had disputed the point of precedence with him at the Council of Junga, in Africa), at his request, procured.

Suffragan (suffragens) is the title applied to every ecclesiastical who has to assist his superior. In this way Alcuin explains the term in a letter to Charlemagne: "Suffraganes est nomen mediei significationis; ideo neccumus quaeque fixum ei apponere debeatus, ut presbyterorum, aut abbatum, aut diaconorum, aut ce-
The term was also used to designate—1. The public worship—the united voice and consent of the people in the petitions offered. “See now, then, both learned and unlearned, how prayer and all other suffrages are in common to this spiritual Church” (*Lantern of Light*, A.D. 1400). The King was to the chief officer in the Litany. Thus, in the Order for the Consecration of Bishops we read that in the Litany as then used, after the words “that it may please thee to illuminate all bishops,” etc., “the proper suffrage shall be,” etc. 8. The remembrance after the Creed in Morning and Evening Prayer.

Süfî, a sect of mystic philosophers in Persia, which was founded in the 9th century by Abu ’l-Kair. It has contained among its members many of the most noted Mohammedan scholars and poets. Schamlul, the famous Circassian leader, is said to have belonged to this sect, and to have given to it a semi-political character, directing it especially against the aggressions of the Russians. They are to be found in every part of the empire; have their acknowledged head at Shiraz, and their chief men in all the principal cities. Mr. Martyn, missionary to that country, calls them “mystic latitudinarians.” For the tenets, see Sufism.

Sufism, or Sûfism (Arabic, sufî, pure, wise), a certain mystic system of philosophical theology within Islam. Its tenets are, that nothing exists absolutely apart from God, but God is all; that God, as he is by essence beyond the limits of time, is the source of the universe; that all beings are in his essence; that every man is an incarnation of Deity; and, though divided for a time from this heavenly source, will be finally reunited with him; that the highest possible happiness will arise from that reunion; and that the good of mankind consists in as perfect a union with the Eternal Spirit as the individual can obtain. Science and philosophy will aid; that, for this purpose, they should break all connection with extrinsic objects, and pass through life without attachments, as a swimmer in the ocean strikes freely without the impediments of clothes; that if mere earthly charms have power to influence the soul, the idea of celestial beauty must overwhelm it in ecstatic light. It maintains also that, for want of apt words to express the divine perfection and the ardor of our devotion, we must borrow such expressions as approach the nearest to our ideas, and speak of beauty and love in a transcendent and mystical sense; that, like a reded from its native bank—like wax separated from its delightful honey—the soul of man bewails its disunion with melancholy music, and sheds burning tears; like the lighted taper, waiting passionately for the moment of its extiction, as a disengagement from earthly trammels, and the soul, that is returning to its only beloved. Sufism teaches four principal degrees of heavenly fruition or sanctity. 1. Sâbirât, or the lowest; is the degree of strict obedience to all the ritual laws of Moham- medanism—such as prayer, fasting, pilgrimage, almsgiving, abstinence, etc.—and the ethical precepts of home- nity, love of truth, and the like. 2. Târikh (truth) is the elevation of those who, by continuous contemplation and inner devotion, have risen to the true perception of the nature of the visible and invisible—who, in fact, have recognized the Godhead, and through this knowledge of it have succeeded in establishing an ecstatic relation to it. 4. Maârufî (familiar) is the degree of those who, by continuous contemplation and inner devotion, are admitted into a mysterious union with him. Thus it will be seen that the highest aim of the Sufi is to attain self-annihilation by losing his humanity in Deity. This is to be accomplished by abstracting his mind from all worldly objects, and devoting himself to divine contemplation. Accordingly the Sufi neglects and despises all outward worship as useless and unneces-
SUGER

SUGER

SUGER

Sugger, abbot of St. Denis, and a leading dignitary of the Church and statesman of France in the 12th century, was born probably in the year 1081, and in the neighborhood of St. Omer, and was educated in the Monastery of St. Denis, where the crown-prince, Louis the Fat, was his companion. After completing his studies in 1108, he was employed by abbot Adam of St. Denis in the administration of distant possessions of the convent, in which his superiority of character, and his skill in the art of fortifying and defending against the attacks of predatory knights. On the accession of Louis VI to the throne (1108), Sugger became his counsellor, and contributed greatly to the subjugation of the barons, who had thrown off all responsibility, and to the establishing of the royal authority, by which the renown of Louis VI became noted in the history of France. He was also an active participant in the dispute about investiture (see the article), which at that time agitated both Church and State, taking sides with the pope, as the policy of France demanded. He was present at the Lateran Council in 1123, which annulled the concessions made by popes Paschal II to Henry V. In 1118 he met the fugitive pope Gelasius II, and, in the name of his king, placed all the resources of France at his disposal against his Italian adversaries. He subsequently negotiated a settlement of the question of investiture, in 1121, which was not satisfactory to either church and papacy. In 1122 he became the successor of the deceased Adam in the abbacy of St. Denis, and in 1124 he visited Rome to attend the great Lateran Council, and while there so ingratiated himself with the pope, Calixtus II, that the latter proposed to create him cardinal, a project which failed through the opposition of the pope. He accompanied the army in a campaign against the emperor Henry V in the same year; and he was at the same time earnestly engaged in endeavoring to induce the king to release the colons, or lower orders in the State, from many of their pressing burdens, and to concede the right to form autonomous communes as a means of undermining the feudal system.

About 1127 Sugger renounced the habits of his previous worldly life and became an ascetic; and, after having reformed himself, he undertook to enforce the Benedictine rule in all its strictness in the abbey of St. Denis. He fulfilled with his spiritual ardor the monastic convent, and built a magnificent church while himself living in a little cell. His principal merit consists, however, in an excellent administration of the convent, in the conservation of its rights, in the artistic decoration of churches, and in the dissemination of the influence of the convent throughout the surrounding wastes. His direction of the affairs of the State still continued, and, when Louis VII ascended the throne (in 1137), became even more pronounced than before. He was associated with bishop Joscelin of Soissons in the regency, and administered the government on the plan of the late king. His rise was rapid, and in his ten years in power he instituted (in 1141) by which Innocent II sought to force a prelate into the archbishopric of Bourges against the expressed will of the king. His endeavor to restrain the king from embarking in his crusade failed; but he was appointed regent of the country during the king's absence, in conjunction with the archbishop of Rheims and count Vermendous. Aided by the pope, he subdued the rebellious nobility, and so wisely administered the finances that he was able to honor the incessant demands of Louis, and to erect many edifices, and still save large sums of money to the public treasury. The height of his career was reached when he succeeded in neutralizing the endeavors of Robert of Dredeau, the brother of Louis VI, who had returned from the Holy Land in 1148, to seize upon the supreme authority. At the same time, he succeeded in resisting the desires for radical reform fostered by Abelard and Pierre de Bruys, while zealously endeavoring to arrest the abuses from which those desires had sprung. He was further successful in a conflict with the canons of St. Geneviève, in Paris, whose convent pope Eugene III had directed him to reform in accordance with the Benedictine rule. Louis VII, on his return, in 1149, publicly thanked the regent and called him the father of his country and Bernard of Clairvaux and a number of foreign princes wrote to him in token of their admiration and respect. He enjoyed his fame, however, during a brief season only, and died Jan. 12, 1151. His literary remains include only sixty miscellaneous letters (in Duchesne, Scriptores, vol. iv.), a report of his administration of St. Denis, and a biography of Louis VI which ranks among the superior historical productions of the Middle Ages (both in Duchesne, ut sup.).

SUGGER, or Suggestio (a desk), a name frequently given to the bema, or sanctuary, of a church.

SUGGESTUM LECTÓRIUM, one of several names given to the AMBO (q. v.), or reader's desk.

Suguen (סgyptian qun)، from Ἑβραϊκά סֵכָו, or пера, is a Masoretic term to denote groups of words which occur in one section several times, once in this connection and once in another connection. These instances having been noticed by the Masorites, they arranged them into סֵכָו or пар, pairs. Thus the Massora Finalis gives under the letter ה (p. 216, col. 1) "eleven pairs, each of one which pair alternately occurs with an audible ה (_swap in) and with a quiescent ה (swep in)"

Suguen (סgyptian qun) is a proper Masoretic sign in Hebrew manuscripts to denote a word which occurs several times in the same section, once in one place and once in another.

SUGRÉ, A.A., the first head of the modern Arabic periodical Al-Intikhab.
which respectively occur once with the Vav conjunctive and once without it, as הֹלֵא (Josh. xix, 7) and יִשְׁמַעְתָּ (Exod. i, 8) and יִשְׁמַעְתָּ (Gen. xxxv, 28). Without increasing the number the reader is referred to Frensdorff (Missaur Magna, p. 339 sq.), where, under the heading מְלֹא, a complete list of the above-quoted instances is given by Frensdorff in his Ochla-Ochla, p. 14, 52 sq.; p. 14, 52 sq.; p. 138, 392 sq.; p. 138, 390 sq.; and in Levi, Massorath Hummaasoroth (ed. Ginsb.), p. 178, 207, 212, 225, 229.

(B. P.)

SUCIWER, JOHANN CARPARD, the author of the Thesaurus Ecclesiasticus, was born June 26, 1820. He was educated in Zurich, Montauban, and Saumur. In 1845 he returned to Zurich, studied at the University of the Thur- gau, but was recalled in 1844 to the schools of the former city. In 1846 he became inspector of the alumnate and professor of Hebrew, ten years afterwards professor of Greek and Latin in the Collegium Humanitatis; and in 1860 professor of Greek and canon in the superior college (Carolinum). He remained in this position until 1883, and died Dec. 29, 1884.

Suciwer rendered valuable service to theology by his thorough philological labors. His earliest works were text-books for students: Sydloge Vocum Novi Test. (Tig. 1848), which were appended to the class book of Greek prose- sody; republished in 1744 by Hagenbach; — Synthetis Wacae, etc. (1861); — Κρυπτετον Ευαντετος, etc. (1868 and 1881); — Joh. Frans. Tigrinui Dict. Latinae, Germ. et Lat. (1861 sq.); — Commenti Veritabil. Scholiarum Uran. felicis Accommodatam, etc. (1865) — finally, the celebrated Thesaurus Eccles. (Amst. 1868, 2 vols.; two enlarged eds. 1728 and 1821, with supplementa) — Lexicon Graec-Lat. et Lat.-Graecum (1683) — and, after Suciwer’s death, the Symbol. Nicene-Const. et ex Antiquitate Eccles. Illustratam (Trig. ad Rh. 1718, 4to). Various other writings were left manuscript, and the Lexicon Graec. Majus et Expositio Symbol. et Apost. et Athanasianum are lost. Suciwer’s learning in these works, particularly the Thesaurus, is so evident that Charles Patin, in his Travels, observes that Suciwer understood more Greek than all the Greeks taken together.

Suciwer was deeply involved in the doctrinal controversies of his day. He regretted their existence, and assisted his friend Heidiger in securing a modification of the Formula Consensum. — Herzog, Real-Encyklop. s. v. See Hyletic Consensus.

Suiicide (Lat. sui, one’s self, and cedere, to kill) is defined as the killing of one’s self with malice aforethought. It is the most general and widely known of all forms of killing. It is known in the law as fato de se, and is considered felony.

In the early Church suicides were called Bio- Siivara (biothianati), from offering violence to themselves. Because suicide was a crime that could have no penance imposed upon it, the Church denied the suicide the honor and solemnity of Christian burial, and allowed him to lie excommunicated and deprived of all memorial in her prayers after death. In England this crime was punished not only with forfeiture of goods and chattels, like other felonies, but the body of the suicide was buried in the night at the crossings of the highways with a stake driven through the body. This ancient rule was repealed by Statute 4 George IV, c. 51, and now the burials take place in a churchyard, but between 9 and 12 P.M.

Suiicide is now generally considered a symptom of some form of insanity, permanent or temporary, in which the emotions and passions are excited or perverted. The following statistics respecting suicides are from Chamber’s Encyclopaedia. s. v. “In the kingdom of Sweden there is calculated to be 1 suicide to every 92,375 inhabitants; in Saxony, 1 to 8446; in Russia, 1 to 84,246; in the United States, 1 to 15,000; in Paris, 1 to 2700; in St. Petersburg and London, 1 to 21,000. In all England the proportion of suicides is 7.4 to every 100,000 people.” See Winslow, Anatomy of Suicide; Brière de Boismont, Du Suicide et de la Folie Suicide; Bertrand, Traité du Suicide; Radcliffe, English Suicide Fields; Medical Crisis, 1862.

Sukkah. See TAMMID.

Sukk’im [Heb. Sukkijm, סֻקָּיָמ, booth-teddlers [Gesen.] or inhabitants of Sok [first]; Sept. TepxyAo- évß; Vulg. Tegyobogyas; A. V. "Sukkiiama"], a nation mentioned (2 Chron. xii, 8) with the Libim and Cushim as one of the parts which came with Shishak out of Egypt when he invaded Judah. If the name be Hebrew, it may perhaps be better to suppose them to have been an Arab tribe like the Scenites or Ethiopians. If it is borne in mind that Zerah was apparently allied with the Arabs south of Palestine [see ZRHA], we know Shishak to have subdued [see SHISHAI], our conjecture does not seem to be improbable. The Sukkii may correspond to some one of the shepherd or wandering races mentioned on the Egyptian monuments, but we have not found any name in hieroglyphics resembling their name. On the other hand it is somewhat favorable that it is a Semitic appellation.—Smith. The Sept. and Vulg. render Tegyobogyas, apparently meaning the Ethiopians by that name, who lived on the western shore of the Arabian Gulf (Strabo, xvii, 786), who might have been employed as shepherds and light-armed auxiliaries of the Egyptians (Herod. Ero, viii, 16). Philo (c. 84) mentions a Togydotic city in this direction called Sute (see Bochart, Phaleg, iv, 29). See Ethiopia.

Sulevise, a kind of wood-goddesses among the ancient Gauls, who are known to us only from an inscription in bas-relief found near Lausanne, which includes three female figures whose hands are filled with fruit.

Sullivian, Daniel N. V., a minister of the Methodist Episcopal Church, South, was licensed as a local preacher in Alabama in 1838. In 1838 he removed to Texas, and engaged in teaching. In 1840 he was received on trial into the Texas Conference, and served the Church as pastor and presiding elder until his death, at Houston, Feb. 20, 1847. He was a minister of a high order of talents, and especially eminent for his ability in defining and defending the doctrines of the Bible. See Minutes of Annual Conferences of the M. E. Church, South, 1847, p. 96.

Sullivian, Dott Bumpus, a Congregational minister, was born at Wareham, Mass., June 27, 1790, and died at Shutesbury, Mass., March 1, 1861. He was a student at Williams College in the class of 1814. For some time after leaving college he had charge of the Academy in Wrentham, Mass., at the same time reading theology with the Rev. Otis Thompson of Rehoboth, Mass. Having completed his theological studies, he went to Ohio, and was ordained pastor of the Congregational Church in the town of Lyme in that state. Here he remained about six years. Subsequently he resided for ten years and more in Western New York as a missionary in the service of the American Home Missionary Society, and performed a most acceptable work in preaching to several churches in that State, and visiting and instructing the in sparely settled sections of New Hampshire and Ver
mont. For several years he resided at Shutesbury, Mass., preaching as opportunity presented. He died at Fall River, Mass., March 1, 1861. See the Cong. Quarterly, p. 216. (J. C. S.)

Sullivan, Samuel B., a minister of the Methodist Episcopal Church, was born Jan. 27, 1825, and was converted at the age of eleven. In 1846 he was licensed to preach, and at the next session of the Erie Conference was received on trial. His ministry, though marked with many conversions, was short, for he died April 9, 1858. He was a man of more than ordinary powers of
mind—fervent, forcible, sublime, and generally powerful in his preaching. See Minutes of Annual Conference, 1817, p. 20.

Sully, Maurice de, a French prelate, was born at Sully-sur-Loire, about the middle of the 12th century, of obscure parentage. Having acquired an education through charity, he taught letters and theology in Paris, and was at length made canon of the Cathedral of Bourges, and eventually of that of Paris, to the bishopric of which he was nominated, and of which he became the titular. He greatly enlarged the edifices, honors, and endowments of that see, and died Sept. 11, 1196, leaving Letters, Sermons, and a French translation of the New Testament (Lyons, 1511, 8vo). See Hoefer, Nouv. Biog. Gén. s. v.

Sully, Odon (or Eudes) de, a French prelate, was born about 1165 at Le Chapelle d'Angillon (Berri), being the son of Eudes Archambaud, lord of Sully. He was educated at Paris, and in 1184 became singer at the Cathedral of Bourges. In 1187 he visited Rome, and in 1196 succeeded his brother Maurice as bishop of Paris, a see which he is said by Pierre de Blois to have administered with great fidelity, but by others in a mercenary manner. He was the pope's part in the ecclesiastical quarrels of his country at the time, and was compelled to flee, leaving his property to be confiscated by the crown, but was eventually restored with additional honors. A council of Paris was held under him by the papal legate in 1201; he laid the foundation of Porrois, afterwards Port-Royal, and undertook a crusade against the Albigensans. He died at Paris, July 13, 1208. See Hoefer, Nouv. Biog. Générale, s. v.

Sulphur is designated in Heb. as זָאָז (zāz), σφίδρα (phdéra) (A.V. "brimstone"), and in Greek Σέλενος (Sélenos) (Plutarch, Sympos., iv, 2, 3). In the Scriptures it is very frequently associated with "fire": "The Lord rained upon Sodom and Gomorrah brimstone and fire out of heaven" (Gen. xlv, 24; also Ps. cvii, 13, 18; Job xlii, 6). In Job xlviii, 15, and Isa. xxx, 33 "brimstone" occurs alone, but no doubt in a sense similar to that in the foregoing passages, viz. as a synonymous expression with lightning, as has been observed by Le Clerc (Dissert. de Sodoma Subserentae, Commentario Pentateuct Auctore, § iv), Michaelis, Rosenmüller, and others. There is a peculiar sulphurous odor which is occasionally perceived to accompany a thunder-storm. The ancients drew particular attention to it: see Pliny (Hist. Nat. xxxv, 15), "Fulmina ac fulgura quoque sulphurus odor emem"; seneca (Q. Nat., ii, 50), and Persius (Sat. ii, 24, 25), describe the appearance of the same "fire storm" as a "storm of thunder and lightning." The stream of brimstone in Isa. xxx, 33 is, no doubt, as Lee (Heb. Lex. p. 129) has well expressed it, "a rushing stream of lightning." From Deut. xxix, 23, "The whole land thereof is brimstone...like the overthrow of Sodom;" it would appear that native sulphur itself is alluded to (see also Isa. xxxiv, 9). Sulphur is found at the present time in different parts of Palestine, but in the greatest abundance on the borders of the Dead Sea. "We picked up pieces," says Dr. Robinson (Bibl. Res. li, 221), "as large as a walnut near the northern shore, and the nearer they were to Feshkhab in lumps as large as a man's fist: they find it in sufficient quantities to make from it their own gunpowder." See Irby and Mangles (Travels, p. 458), Burchhardt (Travels, p. 394), who observes that the sickness among the inhabitants at Strasburg, is very much increased in the rainy season; and (in 158) there are hot sulphurous springs on the eastern coast of the ancient Caalirrhoee (Irby and Mangles, Travels, p. 467; Robinson, Bibl. Res. ii, 222). The pieces of sulphur, varying in size from a nutmeg to a small hen's egg, which travelers pick up on the shore of the Dead Sea, have, in all probability, been disseminated from the adjacent limestone or volcanic rocks and washed up on the shores. Sulphur was much used by the Greeks and Romans in their religious purifications (Juv. ii, 157; Pliny, xxxv, 15); hence the Greek word σέλενος, lit. "the divine thing," was employed to express the substance. Sulphur is found nearly pure in different parts of the world, even in definite districts. It exists in combination with metals and in various sulphates: it is very combustible, and is used in the manufacture of gunpowder, matches, etc. Pliny (loc. cit.) says one kind of sulphur was employed "ad elychnias concinenda." See Balmatons.

Sulpicians, or Priests of the Society of St. Sulpice. The foundation of this society was formed at the parish of St. Sulpice, Paris, in 1645, by Jean Jacques Olier de Verneuil. The act founding the society was dated Sept. 6, 1645, and was immediately sanctioned by the authorities. The society is specially devoted to the training of candidates for the priesthood, and is formed into two bands, one devoted to parish work and the other to teaching. Being warmly befriended by St. Vincent de Paul, the Sulpicians soon established themselves in nearly all the dioceses of France, and took the chief part in the education of the French clergy down to the Revolution of 1789. They were suppressed by Napoleon in 1812, but were restored in 1816. See Louis XVIII. In 1836 Olier formed a company for colonizing the island of Montreal, which was purchased in 1840, sent out Sieur de Maisonneuve with priests and nuns in 1841, and transferred their proprietorship to the Sulpicians in 1856. In 1667 the Sulpicians at Port-Royal went to found and settle the island of Nova Scotia, and in 1771 a band of four Sulpicians and three Seminarians, headed by Francois Charles Nagot, sailed for Baltimore, Md., where they formed for a time the clergy of the cathedral. Some of their number went to teach in the Georgetown College, and founded the St. Mary's Theological Seminary at Baltimore, with a college for preparatory school. Pope Gregory XII raised the seminary to the rank of a university. The collegiate school was removed to Ellicott City, Howard Co., in 1849, and suppressed in 1862.

Sulpicius Severus. See Syrpius, Sulpicius.

Suiter, in Norse mythology, was the knife of the wicked Hela. The word signifies devouring hunger.

Suizer, Simon, an avowed adherent and advocate of the Lutheran view of the Lord's supper in Switzerland during the period of the Reformation. He was born Sept. 29, 1508—the illegitimate child of a provost of Interlachen. After various vicissitudes, he was recommended by Berthold Hailer (q.v.) to the Council of Berne, and was enabled to pursue his studies at the expense of the public treasury, which met Basle and Strasburg. He subsequently became a teacher of ancient languages, and was employed in establishing schools throughout the canton of Berne. When Hailer died he was deputed to Strasburg to negotiate the call of a successor. He took zealous part with the Strasburg theologians in the project of the bull, and even (in 1508) visited Saxony and had an interview with Luther. Having been won over to the position of Luther, Suizer steadily persevered in defending the Lutheran view of the sacrament; at first in Berne, as professor of dialectics and rhetoric and subsequently of theology, as well as in the pulpit, and afterwards, beginning in 1548, at Basle, where he became pastor of St. Peter's, and in 1552 professor of Hebrew. In 1558 he became the successor of Myconius in the cathedral, and chief pastor of Basle, and with these dignities he
SUMERU 14 SUMMER-HOUSE SILVER

united in 1554 a professorship of theology. In 1689 he acquired the theological doctorate; and he filled, in addition, the position of superintendent of Kösten under the margrave Charles of Baden.

Sulzer entertained the bold project of inducing the Church of Basle to subscribe to the Form of Concord, and to refuse the acceptance of the second Helvetic Confession. He himself set about the reform of Marbach's Confession. He succeeded in causing the omission of explanatory notes from future publications of the first Helvetic Confession (1534), and in limiting its influence. Sulzer's views on the sacrament are given in the confession which he instigated the burgomaster of Brünn to issue in 1578 (see Hagensohn, Confessio Evang. Confessionis Marbachiae, 1842, p. 105 sq.). In 1686 he was also successful in persuading the authorities to permit the use of the organ in the churches and on holidays, and the ringing of the so-called "pope's bell" (a gift from Felix V.). He died June 22, 1686. The archives of the Church of Basle and Sulzer's family papers fell into the hands of his heirs, and were partially lost. His successor, J. J. Grynæus, promoted the Reformed theology, but Sulzer's arrangements with regard to organ and bell still continue in force.

See Herzog, Athen. Raur. p. 26, where a catalogue of Sulzer's writings may be found; Hagensohn, Confessio Evang. Confessionis Marbachiae (Berne, 1842), p. 105 sq.; Kirchhoffer, Berth. Haller (Basle, 1827); Hagensohn, Die theolog. Schule Basel's, etc. (1860); Tholuck, Gesch. d. akadem. Leb. im 17ten Jahrh. p. 321 sq.—Herrgott, Reelnekol. new York, where the churches could not contain the audiences that desired to hear him. Persons of all professions and classes of society were attracted by the fame of his eloquence, and expressed their admiration of the power with which he maintained them throughout the discourses that dropped from his lips. He continued to preach to large audiences until early in June, 1822, when his ministrations were suspended by the failure of his health. Desiring a milder climate, he was appointed delegate from the American Bible Society to the Protestant Bible Society in New York, and returned to the US, 1824, but was unable to perform regular service, and was appointed by the Missionary Board of the Philadelphia Conference to travel in Pennsylvania and New Jersey and to take up collections. He united with ministers of other denominations in forming the American Conventicle Society. His last public act was an eloquent address at its organization. He died June 18, 1825.

Mr. Summerfield was very famous as a pulpit orator; naturally eloquent, deeply devoted to the cause of God, possessed of great command of language and of a rich stock of the most useful knowledge, whenever he spoke in the name of God he poured forth from a heart overflowing with the kindliest feelings a stream of evangelical truth which melted his audiences. A "godly sincerity" was evidently the prevailing principle of his heart, and a tone of simplicity characterized his style of preaching. James Montgomery, the editor of his discourses that "the sermons are less calculated for instantaneous effect than for abiding usefulness." His only public work was A Discourse on Behalf of the New York Institution for the Instruction of the Deaf and Dumb (1822). After his death appeared, Sermons, and Sketches of Summerfield's Life and Ministry (1829, 8vo). See Holland, Memoir of Summerfield's Life and Ministry (1829, 8vo; 3d ed. 1880, 8vo; N. Y. 8vo; reviewed by L. Bacon in the Amer. Quar. Rev., iv, 141; Christ. Quar. Spec. ii, 118); his Life by Rev. William M. Willett (Boston, 1840, 8vo); Speeches and Sermons (1847), i, 359; Summerfield's Sermons (1847), ii. 359; Waterbury, Sketches of Eloquent Preachers (1864, 12mo); Allibone, Dict. of Brit. and Amer. Authors, s. v.; Bangs, Hist. of the M. E. Church, iii, 324—292; Minutes of Annual Conferences, i, 508; Simpson, Cyclop. of Biblical Literature, s. v., etc.

Summer-house Silver, a payment made in the medieval ages by certain tenants of abbeys to the abbot or prior, in lieu of providing a temporary summer habitation for him when he came from a distance to inspect the property.—Lee, Gloss. of Lib. Terms, s. v.
SUMMERS, William, a minister of the Methodist Episcopal Church, was born in Fairfax County, Va., in September, 1796. He joined the Methodist Church in Leesburg, O., and in 1823 was admitted on trial in the Pittsburgh Conference. In 1834 he was ordained deacon, and in 1848 received a supernumerary relation; but his health improving, he was made effective at the next conference. In 1850 he was again placed on the supernumerary list, and afterward ordained until his death, which came to him in Martinville, O., March 29, 1855. He was kind, courteous, and honorable in his deportment, calm and firm in his purpose, steadfast in his friendship, and faithful and successful as a minister. See Minutes of Annual Conferences, 1856, p. 668.

SUMMERSVILLE, John, a Methodist Episcopal minister, was in the County of Tyrone, Ireland, Jan. 1, 1792. He enjoyed early religious training, was received on trial in the Baltimore Conference in 1812, and filled the following appointments: Trumbull, Tuscawassa, Hinkstown, Oxford, Shenango, Letart Falls, Mansfield, Chautauqua, Ridgeway, Paint Creek, Erie, York, Franklin, Libloin, Canton, Hartfort, Butler, Mercer, Centreville, Kittanning, Elizabeth, Waynesburg, and Birmingham. In 1836 he was made a supernumerary. He died Oct. 6, 1850. See Minutes of Annual Conference, iv, 602.

SUMMIS Desiderantes Affectus is the title of the bull issued by pope Innocent VIII wherein he informed the Germans that their country was overrun by turbulent prelates, and appointing two inquisitors, Henry Krammer and Jacob Sprenger, for their destruction. See Kurtz, Church Hist., i, § 115, 2.

SUMMISTS, or SUMMISTS, a name given to those scholastic divines of the Middle Ages who propounded their dogmas in works called Summae Theologiae. This name was first adopted from the Summae Universae Theologiae of Alexander Hales, whose renown was eclipsed by that of Albertus Magnus. He was, in turn, surpassed by his disciple Thomas Aquinas, who published his famous work on divinity under the title of Summae Totius Theologiae, and thereby greatly lowered the estimation in which the Book of Sentences, written by Peter Lombard, was held. See Van Ostervelde, Christ., D. D., Beati Serva and Jean de Treur, Histoire des Ordres et des Institutions de l'Église.

SUMMUS SACERDOS (Lat. for chief priest), a name given to bishops when it had become the fashion, in the 3d century, to deduce the institution of the ecclesiastical hierarchy from the priests and services of the Temple of Jerusalem. Romish writers apply the title exclusively to the pope of Rome.

SUMNER, John Bird, an English prelate, was the eldest son of the Rev. R. Sumner, A.M., many years vicar of Kenilworth and Stoneley, in the County of Warwick, and was born at his father's parsonage house at Kenilworth in 1780. He was sent at an early age to Eton, where he was nominated to a king's scholarship, and, having spent several years on that royal foundation, he passed in the usual course to King's College, Cambridge, which he entered. He subsequently became scholar and fellow. Not long after having completed his academic course, Mr. Sumner was invited to return as assistant master to Eton, where he remained for several years. During this time he was ordained deacon and priest. He was preferred, about 1826, to the rectory of Maple-Durham, a pleasant and retired village on the banks of the Thames, a few miles above Reading. In 1826 Mr. Sumner was promoted by the ministry of the earl of Liverpool to a canonry in the Cathedral of Durham, which he held for many years, together with his rectory of Maple-Durham. In 1828 the see of Chester became vacant, and Canon Sumner, having just received his D.D. from Cambridge, was consecrated bishop in due form. The bishopric being then but poorly endowed, he was allowed to retain the canonry of Durham, but his views would not allow him to retain the rectory of Maple-Durham. While Dr. Sumner held the bishopric, Dr. Wordsworth was in Leeds, where he died, and came to a head. From the time that the war cry of Anglo-Catholicism was first sounded in 1833 down to his death, bishop Sumner has ever been among the first and the foremost to denounce the dishonesty of the Tractarian school of theology. In his charges, in addresses, he evoked the authority of the Church of England on Tractarian doctrines and ritual. In the early part of 1848 lord John Russell, who held the post of premier at the time, offered the archbishopric of Canterbury to Dr. Sumner. The offer was accepted, and, much to the satisfaction of the evangelical portion of the Established Church of England, transferred from Cambridge to Canterbury. In 1850 occurred the memorable event called the "Papal Aggression." To that measure of the pope, by which England was portioned out into Roman Catholic dioceses with prelates set over each, archbishop Sumner offered that opposition which was to have been expected, and he denounced the measure in terms of more than usual energy. His grace, as we learn from the "Peerage," was "primate of all England and metropolitan, one of the lords of her majesty's privy council, a governor of the Charterhouse, and visitor of Merston and All-Souls' colleges at Oxford, as well as of King's College, London, and Dulwich College, and of St. Augustine's College, Canterbury," and he enjoyed the patronage of no less than one hundred and sixty-nine livings. He was also most discreet and blameless in the distribution of his clerical patronage, bestowing his best livings on the most exemplary and painstaking of his clergy. He died Sept. 6, 1862. His works are, Essays on the Prophecies, etc. (Lond. 1802, 8vo)---Apostolical Preaching (1815, 8vo; 9th ed. Lond. 1850, 8vo)---Records of Creation, etc. (1816, 1817, 1818, 1825, 1828, 1888, 2 vols. 8vo; 7th ed. 1850, 8vo)---Evidences of Christianity Derived from its Nature, etc. (Lond. 1824, 8vo; N. Y. 1825), 8vo---Settlements and Discourse and Letters of Mr. Benjamin Franklin and Mr. Samuel Summer (1791)---A Thanksgiving Sermon (1799)---A Half-century Sermon (1812). See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Sprague, Annals of the Amer. Pulpit, iv, 680, note; Conv. Quarterly, 1859, p. 42.

SUPPON, Thomas, a minister of the Methodist Episcopal Church, was born in Cecil County, Md., Dec. 5, 1802. He was converted in 1819, licensed as a local preacher in 1828, and in 1838 was received on trial into the Philadelphia Conference. He received a supernumerary relation in 1874, and died in Halifax, Dauphin Co., Pa., May 9, 1874. See Minutes of Annual Conferences, 1875, p. 49.

SUMPTUARY LAWS. At an early period Christianity sought to prohibit the use of expensive dress and luxurious habits in a great variety of ways both in food and dress. Excesses were condemned. Thus Clement of Alexandria says, "Other men, like the unreasonable animals, may live to eat; we have been taught to eat that we may live. For the nourishment of the body is not the work we have to do, nor is sensual pleasure the object of our pursuit, but rather the entrance into those mansions of incorruption whether the divine wisdom is guiding us. We shall therefore eat simple food, as becomes children, and merely study to preserve life, not to obtain luxury. Great varieties of cookery are to be avoided. Antiphanes, the Delian physician, considers variety and research in cookery to be a main cause of disease; yet many have no taste for simplicity, and, in the vainglory of a fine table, make it their chief anxiety to have choice flesh-
Sun (prop. שָׁמֶשׁ, shemesh; ㅅḨaūq). In the history of the creation the sun is described as the "greater light," in contradistinction to the moon, or "lesser light," in conjunction with which it was to serve "for signs, and for seasons, and for days, and for years," while its special office was "to rule the day" (Gen. 1, 14-16). The "signs" referred to were probably such extraordinary phenomena as eclipses, which were regarded as conveying premonitions of coming events (Jer. 5, 2; Matt. xxiv, 29, with Luke xxi, 25). The joint influence of the sun and moon in regulating the "seasons," both for agricultural operations and for religious festivals, and also in regulating the length and subdivisions of the "years," correctly describes the combination of the lunar and solar year, which prevailed, at all events, subsequently to the Mo- abite system of dating (see above, p. 194). The length (330 days or 9 months) of the period of time by the subdivisions of months and weeks, while the sun was the ultimate regulator of the length of the year by means of the recurrence of the feast of Pentecost at a fixed agricultural season, viz. when the corn became ripe. The sun "ruled the day" alone, sharing the dominion of the skies with the moon, the brilliancy and utility of which for journeys and other purposes enhances its value in Eastern countries. It "ruled the day," not only in reference to its powerful influences, but also as deciding the length of the day and supplying the means of calculating its progress. Sunrise and sunset are the only defined points of time, in the absence of artificial contrivances for telling the hour of the day; and, as these points are less variable in the latitude of Palestine than in many countries, they served the purpose of marking the commencement and conclusion of the working day. Between these two points the Jews recognised three periods, viz. when the sun became hot, about 9 A.M. (1 Sam. xi, 9; Neh. vii, 3); the double light, or noon (Gen. xliii, 16; 2 Sam. iv, 5); and "the cool of the day," short- ly before sunset (Gen. iii, 8). The sun also served to mark the boundaries of the periods of the day—of the night, and of soil, which were respectively represented by the rising sun, the setting sun (Isa. xlv, 6; Ps. l, 1), the dark quarter (Gen. xiii, 14; Joel ii, 20), and the brilliant quarter (Deut. xxxii, 23; Job xxxvii, 17; Ezek. xxi, 24); or otherwise by their position relative to a person facing the rising sun—before, behind, on the left hand, and on the right hand (Job xxxiii, 8, 9). The apparent motion of the sun is frequently referred to in terms that would imply its reality (Josh. x, 13; 2 Kings xi, 11; Ps. xix, 6; Eccles. i, 5; Hab. iii, 11). The ordinary name for the sun, shemesh, is supposed to refer to the extreme brilliancy of its rays, producing stupor or astonishment in the mind of the beholder; the poetic name for it, ִךָּלְעָל (Job xx vi, 6; Isa. xxx, 26), and ַלֶךְמָיֶשׁ (Judg. xiv, 18; Job ix, 7) have reference to its heat, the beneficial effects of which are duly commemorated (Deut. xxxiii, 14; Ps. xix, 6) as well as itspanels influence when in excess (Psa. cxxi, 6; Isa. xlix, 10; Jonah iv, 8; Eccles. xliii, 3, 4). The vigor with which the sun traverses the heavens is compared to that of a "bridegroom coming out of his mother's house," and of a "giant rejoicing to run his coursing in the valley." The sun, and west, shine beams of the rainbow dark across the sky is expressed in the term צָּבָא, which are applied to them (Psa. cxxix, 9; Mal. iv, 2). The world of the sun as the most prominent and powerful of the kingdom of nature was widely diffused through the whole of the Hebrew world. The Arabians are said to have paid direct worship to it without the invocation of any statue or symbol (Job xxxi, 26); Ps. xcvii, 784); and this simple style of worship was only familiar to the ancestors of the Jews in the land of Mesopotamia. In Egypt the sun was worshipped under the title of Re, the primeval sun-disk. He was supposed by the ancient writers, under the form of Osiris (Diod. Sicil., vi, 39; see Wilkinson, Anc. Egypt, iv, 289). The name is conspicuously forward as the title of the kings—Pharaoh, or rather Pharaoh, meaning "the sun"
SUN

(Wilkinson, Anc. Egypt, iv, 287). The Hebrews must have been well acquainted with the idolatrous worship of the sun during the captivity in Egypt both from the contiguous chief seat of the worship of the sun as implied in the name itself (On = the Hebrew Bethlehemesh, "house of the sun," Jer. xliii, 13), and also from the connection between Joseph and Poti-phe-rah ("he who belongs to Ra"), the priest of On (Gen. xxi, 45). After their removal to Canaan, the Hebrews came in contact with various forms of idolatry which originated in the worship of the sun—such as the Baal of the Phoenicians (Movers, Phön., i, 180), the Molech or Milcom of the Ammonites, and the Hadad of the Syrians (Pliny, xxxvii, 71). These idols were, with the exception of the last, introduced into the Hebrew commonwealth at various periods (Judg. ii, 11; I Kings xi, 5); but it does not follow that the object symbolized by them was known to the Jews themselves. If we have any notice at all of conscious sun-worship in the early stages of their history, it exists in the doubtful term דמלום, chamamim (Lev. xxvi, 30; Isa. xvii, 8, etc.), which was itself significant of the sun, and probably described the stone pillars or statues under which the Canaanites of Baal-Hammon (Punic harakeh, scrations, Gesenius, Theodot. i, 489) was worshipped at Baal-Hammon (Cant. viii, 11) and other places. Pure sun-worship appears to have been introduced by the Assyrians, and to have become formally established by Manasseh (2 Kings xxiii, 3, 9), in contradiction of the practice of his father, Josiah, iv, 19. Whether the practice was borrowed from the Septuagint of Samaria (2 Kings xxvii, 31), whose gods Adramelech and Anammelech are supposed to represent the male and female sun, and whose original residence (the Helipolis of Berosus) was the chief seat of the worship of the sun in Babylonia (Rawlinson, Hirod., i, 311), or whether the kings of Judah drew their model of worship more immediately from the East, is uncertain. The dedication of chariots and horses to the sun (2 Kings xxviii, 11) was perhaps borrowed from the Persians (Herod. i, 189; Curt. iii, 8, 11; Xenoph. Cyrop. viii, 3, 24), who honored the sun under the form of Mithras (Strabo, xv, 732). At the same time it should be observed that the horse was connected with the worship of the sun in other countries, as among the Massagetae (Herod. i, 216) and the Armenians (Xenoph. Anab. iv, 5, 55), both of whom used it as a sacrifice. To judge from the few notices of the sun in the Old Testament, we should conclude that the Jews derived their mode of worshiping the sun from several quarters. The practice of burning incense on the house-tops (2 Kings xxvii, 5, 12; Jer. xiv, 18; Zeph. i, 5) might have been borrowed from the Arameans (Strabo, vi, 784), as also the simple act of adoration directed toward the rising sun (Ezek. vii, 16; comp. Job xxxii, 27). On the other hand, the use of the chariots and horses in the processions on festival days came, as we have observed, from Persia; and so also the custom of "putting the branch to the nose" (Ezek. vii, 17) according to the generally received view, which identifies it with the Persian practice of holding in the left hand a bundle of twigs called Besam while worshipping the sun (Strabo, xv, 733; Hyde, Rel. Pers. p. 345). This, however, is very doubtful, the expression being otherwise understood of "putting the knife to the nose," i.e. producing self-mutilation (Hitzig, On Ezek). An objection lies against the former view from the fact that the Persians are not said to have held the branch to the nose. The importance attached to the worship of the sun by the Jewish kings may be inferred from the fact that the horses were stalled within the precincts of the temple (the term ἱππεῖον, paredrē, meaning "not suburb," as in the A.V., or either a portico or an outbuilding of the sun which were removed by Josiah (2 Kings xxiii, 11). See SUN, WORSHIP OF.

In the metaphorical expression of Scripture, the sun is emblematic of the law of God (Psalm xix, 7), of the cheering presence of God (Ixxxiv, 11), of the person of the Saviour (John i, 9; Mal. iv, 2), and of the glory and purity of heavenly beings (Rev. i, 16; x, 1; xii, 1). See Meiner, Gesch. der Relig. i, 387 sq.; Nork, Ueb. d. Dommenscul tus d. alt. Völker (Heilbronn, 1840); Pococke, Spec. Hist. Arab. p. 5, 150; Jablonski, Opusc. i, 187 sq.; Douce. Antiqu. i, 189; Hyde, Rel. Vett. Persarum, p. 296 sq.; Eichhorn, De Sphæria Inscrito Mithrae, in the Comment. Soc. Gotting. iii, 138 sq.; Creuzer, Symbol. i, 738 sq.; iv, 409 sq.; Bochart, Hieroz. i, 141 sq.; Rosenmüller, Morgenl. iii, 249 sq.; Bose, De Josia Quadragesimae Solis Removente (Lips. 1741); Pocarsus, De Simulacris Solaribus Israelitarum (Jen. 1725); Genesius, Monum. Phan. ii, 349.

Sun, Children of (Armen. Arevardia), an Armenian sect which originated with Sembas, a Paulician. They were also called Throntrakians (or Throntracians), from the village of Throntrake (Throndrac), where their church was formed. Semba, who originated in the province of Ararat, having entered into some connection with a certain Mediacus, a Persian physician and astro- naut, introduced into his church a combination of Parseeism and Christianity. This sect, though it met with no mercy from the bishops, continually revived, and spread widely in Armenia. About 1002 it made the most alarming progress, when it is said to have been joined by Jacob of Harkh. He gave a more distinctive characteristic to its doctrine when, having conveyed through the country, preaching repentance and inveighing against work-righteousness; and denounced the false confidence which was placed in masses, oblations, alms, and church-prayers for the forgiveness of sins. Finally, the Catholics of the Armenian Church, having secured his person, caused him to be branded with the heretical mark (a fox on the forehead), carried from place to place attended by a public crier to proclaim him a heretic, and finally killed him. See Kurts, Church History, i, 71, 2; Neander, Church History, iii, 587.

Sun, Worship of (Heliolatry). The worship of the great orb which inspires us to light, warmth, and life is as ancient as civilization. It existed in the earliest ages among the Phoenicians, Egyptians, Persians, and Hindus, and later among the Greeks and Romans of the West, venerating its object under the different names of Helios or Sol, or of Baal, Osiris, or Mithras. Various forms of sacrifice and prayer characterized this worship among various nations, but the attention of the Greeks and Romans regards the sun as a mighty and superior deity who ruled the world with an independent authority more or less complete. The Greeks alone did not render higher honors to the sun than to the other gods regarded as of superior rank. All Eastern nations considered it as one of the supreme divinities. The Romans, too, maintained the worship of the sun after Heliogabalus had introduced it and had built a temple to Sol. See SUN.

Sunadī was a Hindū divinity, the wife of Utababān and mother of the famous Druva, a saint who ruled the kingdom of his father during 26,000 years, and was then translated by Vishnu to the pole-star.

Sundanese Version. Sundan is a dialect spoken in the west of the island of Java, near the Straits of Sundan, where the third of the island is situated. It belongs to the great Polynesian stock of languages, and the difficulties in mastering the same are best described by the Rev. G. J. Grashius, who studied the language with a view of rendering the translation of the Scriptures as idiomatic as possible. Mr. Grashius writes thus to the British and Foreign Bible Society (60th Report, 1869, p. 30):

"You will not be surprised to hear that I have as yet obtained but little insight into the Sundanese language. And this is not exactly a consequence of the difficulty and extent of the subject which is to be mastered—no, it is o-
SUNDAY 18 SUNDAY

casioned by the form in which the matter presents itself. Propose to yourself to learn a language which represents itself to you as a case in miniature, with all contemplations of motions of swelling and floating objects. At one moment you see something, the next it disappears again; at one moment you see everything, the next you are nothing but a form of conception of it, and the next you perceive that you are mistaken.

The learning of the Sundanese is, for the greatest part, made more difficult by the childishness which characterizes the language. There is no by-law in it, but yet such a proposition exists that a novice acquires a childish and artificial feeling on first making acquaintance with it—sux-

fossed with a somewhat childish and artificial way of speaking. The fear which at this point I entertained began gradually to vanish, and I was enabled to become able and clear in my understanding of the Sundanese well, if God will but bless and prosper my undertaking.

"By and by I shall master the vocabulary; but in this I by no means hurry myself, because otherwise I might easily take things for granted which, by a closer insight into the matter, might show to be things which I have not learned. To unlearn takes time, and is very unprofitable for the freshness of mind which is a first requisite for the study of the Sundanese language."

In 1870 the British and Foreign Bible Society's Report shows the publication of the Gospel of St. Luke in the Sundanese, and this seems to be the only part printed by the British and Foreign Bible Society, while the Dutch Bible Society has printed the New Test., translated by H. Coolsmas, who has also written the Old Test. From the 74th (1878) Annual Report of the British and Foreign Bible Society we see that the Netherlands Missionary Union have requested the London committee to undertake the publication of Mr. Coolsmas's translation of the Old Test, and that the committee have given their sanction of the undertaking. The translation has been sent to the publishers on receiving satisfactory reports as to the reception of Mr. Coolsmas's New-test. translation. (B. P.)

SUNDAY. I. Name and Change of Day.—Sunday is the name of the first day of the week, adopted by the first Christians from the Roman calendar (Lat. Dies Solis), Day of the Sun, so called because it was dedicated to the worship of the sun. The Christians reinterred the heathen name as implying the Sun of Righteousness with reference to his "arising" (Mal. iv, 2). It was also called Dies Pasch (Day of Bread), because it was an early custom to break bread on that day. It is also called, the Lord's day, its sacred observances being especially in his honor. The apostles them-

Tertullian (De Coron. Miles. c. 3) declaring that it was a custom to fast on the Lord's day, and other authorities were equally severe in their denuncia-

II. Ecclesiastical Observance of the Day.—The consecra-

tion of Sunday in a special manner to religious employ-

ments and the abstaining from all worldly business was established by a synodal law (canon 29, Council of Laodicea) with this restriction, that all Christians should not fast on the day, but eat a little. The religious services of Sunday we note the following:

1. The assembling in the morning, the public prayer, and the distribution of the Eucharist.

2. At the end of the mass, the preaching of the sermon.

3. The singing of the hymns, and the reading of the Psalms.

4. The conformation of the sick, or the blessing of the poor.

5. The distribution of the alms.

6. The singing of the hymns, and the reading of the Psalms.

7. The conformation of the sick, or the blessing of the poor.

8. The distribution of the alms.

9. The singing of the hymns, and the reading of the Psalms.

10. The conformation of the sick, or the blessing of the poor.

11. The distribution of the alms.

12. The singing of the hymns, and the reading of the Psalms.
heathenism who were passing through a prepara-
tory course of instruction in the doctrines and duties of Christi-
anity—thus, their true dispensation might be enlighten-
ted, their hearts receive the truth in the love of it, and
that they might be rooted and grounded in the love of
heart and life by which they might adorn the doctrine
of God their Saviour. Next, he prayed for the penitents
who were basking in the light of the Church; that they
might receive deep and permanent impressions of the
exceeding sinfulness of sin, so that they might be fil-
led with the spirit of repentance, and might receive the
appointed term of their probation, to bring forth fruits
meet for repentance. In like manner, he made appropri-
ate supplications for the communicants of the church, each
of whom left the church when the class to which he be-
longed had been commended to the God of all grace;
and the prayers were reduced by the depart-
ture to an approved company of the faithful, proceeded to
the holy service of communion.

Those who neglected ordinances were severely cens-
ered. Attendance from church for three consecutive Sun-
days was to be visited with excommunication. Ir-
regularities during attendance, such as refusing to join
in prayers or receive the communion, or leaving church
during sermon, were strongly condemned. In later
times severe measures were employed to secure Sabbath
observance, and were for the most part enforced in many cases in-
duce hypocrisy, or mere external attendance at church.
The kirk-sessions in 1574 appointed "searchers," or
"captors," to make the round of the parish and take
notice of such as were "vagging abroad." The strange
practice lasted for nigh a century and a half. Some of
it is still in vogue. See Walcott, Sacred Arch. n. v. See Lord's Day.

III. Legal Observance of the Day.—As soon as the
Christian religion came to be recognised by the State,
laws were enacted for the observance of Sunday. The
emperor Constantine made the first law (A.D. 321) to
 exempt the day from being judicial, as were the oth-
 ers. By this law and others he suspended all actions
and proceedings of the law on this day, whether ar-
rests, pleadings, executions, sentences of judges, execu-
tions, excepting only such as were of absolute neces-
sity, or as the last resort, for the preservation of life,
for the remission of taxes, the appointing of curators and guardians to or-
phans, and causes relating to matters of preservation
and damage, legacies and trusts, exhibiting of wills,
and all cases where great damage might be suffered
either by delay or by death. Valentinian prohibited
all business transacting on Sunday, and also those
who offered worship in private places on Sunday, and
Valentinian with Theodosius
the Great, appointed all Sundays in the year to be
days of vacation from all business of the law whatso-
ever. In like manner, all secular business or servile
employments were forbidden, except only such as men
were allowed to perform on Sunday, such as farming,
harvesting. By a law of Honorius the judges were
enjoined to visit the prisons every Sunday to examine
the prisoners and ascertain from them whether the
keepers of the prison denied them any office of human-
ity, and also to give orders that the prisoners, under
proper guard, should be allowed to leave the prisons to
bath themselves. Later laws forbade all husbandry
on the Lord's day, allowing only such work as was nec-
essary to secure food absolutely required. The Chris-
tian laws took care to secure the honor and dignity
of the Lord's day by forbidding public games, shows, or
udicrous recreations (Cod. Theodosii, lib. 3, tit. 12, De Ferias,
eg. 11), and the Church was no less careful to guard
the service of this day from the encroachment of all
vain pastimes and needless recreations. The Fourth
Council of Carthage made a decree (can. 88) excommunicat-
ing any person who should forsake the services of the
Church on the Lord's day.

In England Sunday laws were of early date. The
code of Ina, king of the West Saxons (about 699), pun-
slished servile work by fine. Alfred the Great (876) for-
bade work, traffic and legal proceedings; while the stat-
ete 27 Henry IV, c. 5, enacted that all fairs and markets
on Sunday, except for the religious sacrifice, be closedidental pain of
forfeit of goods. The statute 5 and 6 Edward VI,
at midnight between Saturday and Sunday and ends with the next midnight.

In France, during the Revolution, when the Christian calendar was abolished and the decade substituted for the week, every tenth day was made a rest-day, and its observance was enforced by a law (17 Thermidor, an. vi) which required the public offices, schools, workshops, stores, etc., to be closed, and prohibited sales except of etables and Marchand, and public labor except in the country during seed-time and harvest. When the Gregorian calendar was restored, Sunday was recognized in the Code Napoleon (art. 25, 260). The law of Nov. 18, 1814, prohibiting ordinary labor, traffic, etc., and declared by the courts in 1838 and 1845 to be still in force, is, practically, a prohibition of child labor. In Switzerland recent legislation has granted to railway employees and all government office-holders at least one Sunday in every three; and still further restriction of Sunday labor is being sought in some of the cantons. The question is agitated in Belgium and Germany of better protection by law of Sunday rest for operatives. See Cox, Literature of Sub. Question (Edinb. 1865); Amer. Law Rev. vol. ii; Pri, Episcopal Quar. Rev. vol. vii; Hopkins, Sabbath and Free Institutions, in doc. 29 of N. Y. Sabbath Committee; Judge W. Allen, opinion in Von Knepper v. The People, 33 Barbour, 548; Hess, Motorcycle Sunday, 1895; Schaff, Anglo-American Sabbath (1863). See Sabbath.

Sunday, John, or Shah-Wun-Dais, was a native Indian, born in New York State in 1795-6. He belonged to the Mississauga section of the Ojibway nation, and when a young man he served in the British army against the United States. He was converted in 1826, and shortly after was appointed a leader among the converted Bellevile Indians. He was the earliest evangelical pioneer to the tribes on the north waters of Lakes Huron and Superior. In 1832 he was received into the Conference and was ordained in 1836, and the same year accompanied Rev. William Lord to England to plead the cause of missions, and remained a year at that work. A large part of his ministerial labor was performed under the direction of Rev. William Case, and he had charge of Alderville, Rice and Mud Lake, and Muncietown circuits. He died Dec. 14, 1875. See Minutes of the Ontario Conference, 1876, p. 12.

Sunday-school. Among the modern developments of Christianity, Sunday-schools, and what is known as the Sunday-school enterprise, are prominent. To persons familiar with their objects and the scriptural precedent they recall, it seems strange that so long a period elapsed before they came into actual existence. That a leading duty of the Church was to teach all nations was made plain in the great commission of our Lord to his disciples. That little children were included in the scope of that commission was evident from the great Teacher's own command to "suffer little children to come unto him and forbid them not," as well as from his impressive charge to Peter, "Feed my lambs." While evidence is not lacking to indicate that the Christians of the apostolic age both comprehended the duty enjoined by our Lord and illustrated it in adaptation to their circumstances, yet there are too many proofs that in the centuries immediately following, that duty fell into abuse and neglect amid the rapidly growing corruptions of the Church. The ceremonious catechetical system of the 4th and 5th centuries was a laborious but poor apology for that neglect, and indeed it also gave it a name that of the "catechumenate," and it held that place. Hundreds of years then went by without any general effort on the part of the Church for the religious instruction of children. Following the Reformations of the 16th century catechization in the elements of Scripture doctrine was introduced by the Protestant churches, but it was rarely extended to any beyond the recognized children of the Church.

I. Origin and Early History of the Sunday-school System. It was not till near the close of the 18th century that the modern system of Sunday-school instruction took shape. Although innumerable attempts had been made, previous catechization had been practiced on the Lord's day, and in several cases individuals remote from each other in time and locality had assembled children for instruction on that day, yet nothing like a general system of teaching the young on Sundays, whether in secular or religious learning, was known prior to 1760. The system that then arose was purely philanthropic in its design, and in its origin contemplated only local results. From an early period in the 17th century, pin-making had been an important industry in the old city of Gloucester, England. This manufacture employed a great many children, not only within the city, but in several miles of the place, but gathered in from surrounding regions. Vast numbers of these children were wholly uneducated, and, being without parental restraint or moral supervision, they naturally fell into gross disorder and immoralitv, especially on Sundays, when the factories were not in operation. The first step that was taken to remedy this distressing state of things was Mr. Robert Raikes (q. v.), a printer residing in Gloucester, and a member of the Church of England. He found four persons who had been accustomed to instruct children in reading, and engaged their services to receive and instruct such children as he should select for Sunday. The children were to go soon after ten in the morning, and stay till twelve. They were then to go home, and return at one; and after reading a lesson, they were to be conducted to Church. After Church they were to be employed in repeating the catechism till half after five, and then to be dismissed with an injunction to go home without making a noise, and by no means to play in the street. This was the general outline of the regulations as stated by Mr. Raikes, in his celebrated letter of June 5, 1784, which conclusively identifies him as the originator of the Sunday-school movement.

As has often happened in other cases of great results from small beginnings, there have been various endeavors to fix the origin of Sunday-schools at earlier periods than that named above. Although it is not difficult to establish priority in several cases, yet there is no other instance of an actual Sunday-school from which continuity or serial connection can be traced down to the present time. If, therefore, mere priority were in question, it would be necessary to go back to the period of Moses, under whom the catechetical system of the Jews was appointed, culminating in the grand plan of instruction in the churches. But the true origin of catechization (q. v.) which is under consideration, but rather of that form of catechization which, in modern times, is known as the Sunday-school system, it is safe to accept the general verdict of history, according to which Robert Raikes is recognized as its founder. When once the idea of Sunday instruction for the ignorant children of Great Britain was fairly developed, it was seen to have not only great intrinsic merit, but perfect adaptation to other places. Hence the schools of Mr. Raikes soon began to be imitated in all directions, with results of the most encouraging character. A Sunday-school Society was formed in London, and, in various ways, so general an interest was awakened on the subject that in the course of a few years Sunday-schools were commenced in nearly every part of England. They did not, however, become universal, nor in the largest degree useful, until a higher idea than that of mere instruction in the catechism was put into the plan of employing hired teachers not only made it necessary to raise large amounts of money, but necessarily placed a limit upon their extension and permanence. Besides, it was not possible to secure the best quality of teachers by any appeal to mercenary motives. In discussing this matter in a companion volume of the history of Sunday-schools, the Rev. John Angell James said: "Hiring teachers can scarcely be expect-
ed to possess either the zeal or the ability of those who now engage in the work from motives of pure benevolence. On the contrary, Sunday-schools have been an important part of the religious system, and which does not appear to have entered into the views of its benevolent author.

"If we were asked," says a writer in the Sunday-school Repository, "whose name stood next to that of Robert Raikes in the annals of Sunday-schools, we should say, the person who first came forward and voluntarily proffered his exertions, his time, and his talents to the instruction of the young and the poor; since an imitation of his example has been the great cause of the present flourishing state of these institutions, and of all that future additional increase which may be reasonably anticipated." While it may not be possible to fix upon any one person as having been the first to commence gratuitous effort in the teaching of Sunday-schools, it is not difficult to determine, from the history of the times, who was probably more instrumental than any other man in establishing and diffusing the system of gratuitous and Christian instruction in those schools. It was the Rev. John Wesley, who, for more than thirty years prior to the first Sunday-school of Raikes, had been in the habit of assembling children in various parts of England for the purpose of religious instruction. It was he who, having recorded in his journal, July 18, 1744, that he found Sunday-schools springing up wherever he went, also recorded these memorable, if not prophetic, words:

"Perhaps God may have a deeper end therein than men are aware of. Who knows but some of these schools may become nurseries for Christians?" From that time forward the teaching of Sunday-schools was frequent in his journals. The following is a brief specimen: "July 27, 1787—We went on to Bolton. Here are eight hundred poor children taught in our Sunday-schools, by about eighty masters, who receive no pay but what they are to receive from their great Master. This record corresponds to the statement made in Mylne's History of the People called Methodists (Loud. 1805). Having referred to Sunday-schools as an excellent institution begun by Mr. Raikes, the author says, "Mr. Wesley no sooner heard of it than he approved of it. He published an account of it in the Arminian Magazine for January, 1786, and exhorted his societies to imitate this laudable example. They took his advice. Laboring, hard-working men and women began to instruct their neighbors' children, and to go with them to the house of God on the Lord's day." Whatever was done by others, the Methodists, from the beginning, practiced only gratuitously. It was not until they found Sunday-schools in almost the same institution and modes of instruction were simultaneously introduced into the United States of America, under bishop Asbury, who sustained to the American Methodist societies a similar relation to that of Mr. Wesley in England.

As early as the year 1784 the following paragraph was incorporated in the Discipline of the Methodist Episcopal Church:

"What shall we do for the rising generation? Who will labor for them? Let him who is zealous for God and the souls of men, stand up. Where his parents are in society, meet them at least an hour every week. 4. Talk with them every time you see any at home. 5. Pray for earnest for them. 4. Diligently instruct and vehemently exhort all parents at their own homes. 5. Preach expressly on education." In sequence of this mandatory rule, addressed primarly to the Methodists, the teaching of Sunday-schools has been extensively diffused. The majority of the churches in the country have Sunday-schools, which have become an essential part of the religious system. Sunday-schools were established in many places. One of those schools a very definite and satisfactory record was made. It was taught in 1786, in Hanover County, Va., at the house of Mr. Thomas Crenshaw, who, in 1827, forty-one years later, was a living witness of the school. Mr. Crenshaw was a minister of thirty-nine years' service in the Church, who had been converted in that school (Banga, Hist. of the M. E. Church). Further historic evidence of the early adoption of organized Sunday-school effort by the Church referred to grew out of the fact that persecution arose on Sunday-schools, because of their teaching influence, and the colored children of the South. In Charleston, S. C., the Rev. George Daughaday was severely beaten on the head, and subsequently had water pumped on him from a public cistern, for the crime of conducting a Sabbath-school for the benefit of the African children in that vicinity. Nevertheless, the Methodist Conference, which met in Charleston in February, 1790, resolved to continue the work. Its minute on the subject was in these words:

"Question. What can be done to instruct poor children, white and black, to read? Answer. The heart and soul of one man, to establish Sunday-schools in or near the place of public worship. Let persons be appointed by the bishop, elders, deacons, or preachers, to teach gratis all that will attend, and have a capacity to learn. . . . The Council shall compile a proper school-book to teach them learning and piety." At the period of the origin of Sunday-schools the Methodist Episcopal Church found one of its principal fields of action in the Southern States, being drawn thither by the great spiritual destitution of the inhabitants. But it is easy to understand that, owing to the spareness of the population and to other reasons, the conditions of that region was not favorable to the rapid development and permanent establishment of Sunday-schools. The same thing was, to some extent, true of the entire United States, owing to the general exhausation of the country following the war of the Revolution and the unsettled condition of affairs in a newly organized government. Hence nearly or quite a quarter of a century passed by before Sunday-schools became common in either the Southern or Northern States.

Meantime they had been making steady and successful progress in Great Britain, where they were promoted by two classes of agencies, the philanthropic and the religious. The religious agencies were by far the most active in that country, hundreds of thousands of children were wholly dependent upon Sunday-schools for the first elements of instruction. Hence reading and writing were universally taught in the Sunday-schools—the former as essential to the perusal of the Word of God or the Catechism, which from the first were the tezxi-books for all pupils able to use them. Although much and well-rewarded effort was put forth in behalf of Sunday-schools from purely philanthropic motives, yet the greatest progress made by them and the highest results secured through them were in sequence of the religious agencies. When, at length, this species of effort became general, Sunday-schools assumed a position of importance and of promise not before realized. About the same period they began to develop what may be called their cumulative power. This was seen when the first generation of Sunday-school scholars had grown up to become teachers, and felt themselves moved to do for others what had been done for them. In this manner the teaching force in Sunday-schools became greatly augmented. Besides, cases were not rare in which the work of the Sunday-school was important to the development of the Gospel, while others, continuing in secular life, became prominent men in business and in society. The strong and effective support rendered by such persons, as well as by many others of less prominence, gave a new impetus to the Sunday-school enterprise, which has been growing ever since.

The enlistment of the press as an auxiliary to Sunday-schools was an event of great importance. For a considerable period Sunday-school work was done at a great disadvantage for lack of suitable books of all kinds, not excepting copies of the Scriptures. The organization of the British and Foreign Bible Society, 1804, and subsequently of numerous other societies for the publication and diffusion of the Word of God, tended to a general supply of the Holy Scriptures in forms and at
prices adapted to extensive use in Sunday-schools. Besides Testaments, Bibles, and elementary instruction-books, the first publications introduced extensively into Sunday-schools were called reward-books, on account of their being presented to children as an encouragement for punctuality and regular attendance for the mental culture of the young. At first they were tract or story-books, in paper covers, of very inferior quality, no others being attainable. About 1810 the Religious Tract Society of London began issuing children's books, prepared and printed specially with reference to Sunday-school patronage. The demand for such books increased in the ratio of their production, so that other religious societies, and even miscellaneous publishers, found it to their interest to provide them. At length the idea of introducing circulating-libraries into Sunday-schools came into vogue, and with it a still greater publication of books designed for juvenile reading, and also for the instruction and aid of teachers.

There are no data for accurately tracing the numerical growth of Sunday-schools in the earlier periods of their history. Nevertheless, it is pleasing to know that some of the workers of those days were not inattentive to the subject. In 1850, for instance, a total of 1,250,000 had been engaged.

II. The Second Period of the Sunday-school Enterprise.-This enterprise, at the present writing, has had a recognised existence of about one hundred years. In considering its history, it seems proper to divide its first century into two periods of fifty years each. The first, which has been summarily sketched above, may be denominated its initial and formative period. The second, now closing, constitutes its period of adolescence. We must look to the future for its full development.

Owing to causes noticed above, it was not earlier than from 1825 to 1830 that the Sunday-school cause came generally and prominently before the American public. Between the years named two leading Sunday-school unions (q.v.) were organized—one in Philadelphia and one in New York. About that time several great public religious gatherings were held, which much aided in securing a public sentiment favorable to Sunday-school work. The Sunday-school enterprise was launched. The idea of religious instruction as the one great business of Sunday-schools had then found universal acceptance. The development of public secular instruction had by that time become so general, at least in the Northern and Central States of the American Union that Sunday-schools had little occasion to go out of their proper sphere. The movement in behalf of general education in England had begun, having been greatly stimulated by the results of Sunday-schools. The purchase and use of Sunday-school libraries had become common in both countries, and the means of supplying them with suitable books were improving. In short, the Sunday-school enterprise was fairly launched, but no more than that. All the general improvement and progress of the intervening fifty years, together with the united and consecutive efforts of the multiplied workers in Sunday-schools, have been needed to bring those schools to the position they now occupy.

There are two methods of indicating the progressive advance and the actual results of Sunday-schools. The one is by general statements, and the other by the comparative showing of such numerical statistics as may be found published. Neither of these modes is thought adequate, both will here be employed to a limited extent, in order that they may as far as possible supplement each other. Within the last fifty years Sunday-schools have come to be regarded as an essential branch of Church action, not merely in England and America, but throughout the Protestant world, whether in home or mission fields. They have also been adopted by Roman Catholics and Jews in Protestant countries. Not to speak of the influence of Sunday-schools in the last-named bodies, it is safe to say that the great majority of all the ministers, missionaries, and communicants of the last quarter of the 17th century were alumni of Sunday-schools, and, as such, their active friends and supporters. The recognised necessities of these schools have given rise to important changes in church architecture, by which nearly every church is provided with a commodious room for the instruction of the young in graded classes, ranging from infancy upwards. They have called into existence not only an extensive literature, but also a varied psalmody, contemplating the special tastes and wants of the young. While in England they have been chiefly limited to the poorer and middle classes of the people, in the United States they have claimed, and in fact assumed, a relation to public (week-day) schools corresponding to that which the Sabbath holds to the secular days of the week. In this relation they seek to supplement public and general education with the moral and religious influences derived from them. The attendance of scholars from the higher as well as lower classes of the community, and enlist for their instruction a quality of talent and an amount of effort which money could never hire.

In passing from general though significant statements like these, it is seen that much is left to be done. As much as may be done in figures, it seems necessary to explain that Sunday-school statistics, as minute and comprehensive as are now seen to be desirable, are very difficult to obtain on a large scale. Only in rare instances have governments been interested to collect them, and comparatively few of the promoters of this work have so far recognised their importance as to take the requisite steps for securing them. Consequently, up to the present time, there has not been a uniformity of method and the extent of co-operation necessary to making up comprehensive exhibits of numbers and results. The most, therefore, that has been up to this time possible in the way of such exhibits has been to form estimates based upon accurate statistics taken within certain districts or churches, and extending the pro rata outward. About the middle of the 19th century an effort was made in England, under government sanction, to ascertain the number of Sunday-schools and scholars in this fashion. It failed to make any real impression until the census of 1871, when the enumeration of the scholars was made for the first time. It has ever since been found important to make carefully taken censuses of such bodies, and the statistics have been found to be a powerful and useful means of insuring the work of the school for the public good.

In the present work, therefore, there have been introduced what are intended as careful estimates of the number of Sunday-schools, scholars, and teachers in England and the United States, and also statistics of the work of the American missionary societies, collected by the General Committee of the Foreign Missionary Society and the American Board of Commissioners for Foreign Missions. The estimates are made from careful records of the number of schools and scholars in the United States, and careful studies of the statistics of other countries. The statistics of Sunday-schools have been gathered from various sources, both in the United States and in other countries, and have been carefully checked and compared. The statistics of Sunday-schools in the United States are taken from the annual reports of the Sunday-schools of the United States, and from the report of the American Sunday-school Union. The statistics of Sunday-schools in other countries are taken from reports of the Sunday-school unions and other bodies, and also from the reports of the various missionary societies. The statistics of Sunday-schools in the United States are taken from the annual reports of the Sunday-schools of the United States, and from the report of the American Sunday-school Union. The statistics of Sunday-schools in other countries are taken from reports of the Sunday-school unions and other bodies, and also from the reports of the various missionary societies. The statistics of Sunday-schools in the United States are taken from the annual reports of the Sunday-schools of the United States, and from the report of the American Sunday-school Union. The statistics of Sunday-schools in other countries are taken from reports of the Sunday-school unions and other bodies, and also from the reports of the various missionary societies.
SUNDAY-SCHOOL 23  SUNDAY-SCHOOL

SUNDAY-SCHOOL officers and teachers, 921,442; scholars, 1,511,989; scholars over fifteen years of age, 489,704; scholars under fifteen and not in infant classes, 445,502; in infant classes, 376,553; average attendance, 962,375; volumes in Sunday-school libraries, 1,911,263; annual expenses of the schools, $316,876.96; contributions to the Sunday-school Union for establishing new and extending old schools, $755,997; teachers who were communicants in the Church, 169,998; scholars who were communicants, 302,145; conversions in connection with the Sunday-schools, 77,644. The total membership of the Church at the same period was 1,686,783, or 25,000 less than the aggregate number of teachers and scholars. A re- spective comparison of the increase of members in the same Church from year to year shows a striking correspondence to the number of reported conversions in the Sunday-schools. To the extent that the above statistics may be considered representative of the condition and work of Sunday-schools in the American churches, they render superfluous any argument to prove the magnitude of that work and its auxiliary power for the promotion of Christian influence.

It is not to be supposed that results of the importance indicated in the foregoing sketch have naturally arisen from the spontaneous growth of Sunday-schools. On the other hand they are only to be attributed to the divine blessing upon the systematic and well-directed efforts of intelligent Sunday-school workers extending through successive years. In fact, a considerable portion of the second half century of Sunday-schools had passed away before it could be said that these schools were thoroughly popular with even the most public of America; nor did they become so without great and continuous exertions on the part of enthusiastic friends of the cause. As one great agency for accomplishing that result, Sunday-school conventions were appointed and held in all the states and under a vast variety of circumstances. There were conventions for cities and towns, for counties, for districts, for conferences, and for states. Some of them were managed by single denominations and some by a union of all denominations. At first, conventions, prominent Sunday-school workers came in contact with masses of people, answering objections, diffusing information, and stimulating zeal. Such gatherings gave an opportunity for the discussion of new methods, and became a great agency for the promotion of all real improvements in the organization and conduct of Sunday-schools even in the remotest sections of the land. In proportion as the Sunday-school idea became popular, and agitation in its behalf became unnecessary, conventions of Sunday-school friends and workers began to take the form of institutes after the analogy of teachers' institutes designed to elevate the standard of secular instruction.

For a long period the most that was thought possible to be done for the higher training and special instruction of Sunday-school teachers, was sought to be accomplished through superintendents and pastors' Bible-clubs. But at length it was found practicable, with no lessening of superintendence, Bible-clubs and teachers institutes. To secure many of their benefits on a more popular scale, coupled with the enthusiasm derived from the assembly of numbers of people interested in common objects. Hence at Sunday-school conventions and institutes, lecture were given on important topics, apparatus and new publications were exhibited, and the Bible-clubs and teachers institutes were taught and trained by skilled teachers.

By these public proceedings, not only was the better classification and instruction of Sunday-schools promoted, but an esprit de corps was aroused among teachers; and in many schools normal departments were established. At the special instruction and qualification of teachers.

The success of Sunday-school institutes and normal classes reacted upon the conventional idea and caused it to expand into that of Sunday-school assemblies, designed to continue in session from one to three weeks at a time. In connection with the growing American habit of taking summer vacations and of spending vacations and holidays in more pleasant and healthful regions, Sunday-school assemblies, under wise and energetic management, have speedily grown to be influential of great good and promissory of long continuance. The Chautauqua Sunday-school Assembly, held on the grounds of the western New York, under the presidency of Dr. John H. Vincent, may be considered at once the originator and model of various similar assemblies already held, and now said to be established for regular annual sessions in different parts of the United States; e.g. at Clear Lake, Ian; Lake Bluff, Ill.; Thousand Island Park in the St. Lawrence River; and at Round Lake, near Saratoga, N. Y. These assemblies are to be, for all sections of America, what was contemplated by the London Sunday-school Union in the erection of a building at 56 Old Bailey, in the heart of London. In that building is a Sunday-school museum and a large hall in which courses of lectures are given, while in other rooms training-classes are taught and competitive examinations held. While the centre of a million-peopled city affords some peculiar advantages for the objects above indicated, and specially in the accessibility of the object of the year, yet the ample spaces and the romantic associations of a beautiful American grove adapted to such uses leave nothing to be desired in view of the objects of the assembly and during the season allotted to it. Many of the constructions are somewhat rude, but the appointments are in excellent taste and constantly improving. Everything, however, is made subservient to the grand idea of intellectual and spiritual improvement, with specific reference to the promotion of Christ's kingdom upon earth through the agency of Christian instruction. No one can properly appreciate the importance of this work of the future generation under notice without considering that each coming generation will require, in its turn, to be trained and fitted for the ever-expanding work of teaching all nations the truths of the Gospel.

It may here be remarked that Sunday-school conventions have not been limited even to large states; in fact, they have been expanded so as to enlist national and even international representation. A World's Sunday-school Convention met in London in 1862, and a German National Sunday-school Convention in Hamburg in 1874. In the United States, in 1875, twenty-one states held their first Sunday-school Assemblies, and under the guidance of Dr. James Strong drew up such a scheme, which was printed in tabular form in the Agriculturist for February, 1862, and hundreds of thousands of copies of it were distributed and used in the Sunday-schools of various denominations throughout the United States. A similar plan was published in the same manner the following year, and in 1862 the first of four consecutive question-books, entitled Lessons for Every Sunday in the Year, was prepared under the same auspices, and published in New York.
In 1868 the London system, with some modifications, was brought to the attention of the American public by Rev. J. M. M. Dyer, of the London Sunday-school Union, in Chicago. The question was soon after proposed by him in a Sunday-school institute, "Is it practicable to introduce a uniform system of lessons into all our schools?" This question was earnestly and hopefully discussed in various ways for several years following; and, at the National Convention at Indianapolis in 1872, it was answered in the affirmative by a large vote. When the project was agreed to by representatives of the leading denominations in America, it was through friendly correspondence endorsed by the London Sunday-school Union, and has since been in actual and extended use on both sides of the Atlantic. "The international use of systems of lessons, prepared by joint committees, has had a happy tendency to promote increased interest in scriptural study throughout the world. This mode of simultaneous study has been greatly popularized by the publication of notes and comments on the uniform lessons in hundreds of periodicals in various countries and in different languages. At the present time, the system of international study seems to have won general favor throughout the Protestant world, and to have the promise of a long, if not permanent, continuance." In closing this article, it seems proper to say that it is in the United States that the greatest work has been done in the preparation and publication of Sunday-school literature, although not without a great debt of obligation to English writers. Here Sunday-school circulating-libraries were first adopted as an essential auxiliary of Sunday-school effort. By this means, the influences of the Sunday-school were projected through the secular days of the week. In this country also, Sunday-school requisites and periodicals, combining both elegance and cheapness, have been published in the greatest profusion. The Sunday-school library is a necessary department of the institution, and in many cases, a numerous and important as to have challenged and secured a partial enumeration in the official census of the government. The census of 1870 reported 33,580 libraries, and 8,346,158 volumes in those libraries. This aggregate, large as it is, does not include the State of Connecticut, and for other reasons is evidently far below the facts in the case at the present time. No other libraries are so widely diffused as those of Sunday-schools; they are not only found in cities, where most great libraries are established, but in the remotest sections and neighborhoods of the land, and everywhere they are free to all who by attendance on Sunday-schools become entitled to draw their books for themselves or their friends. In so vast an aggregate of volumes, it would not be strange if there were some of an indifferent or even of a very objectionable character. But such would be only exceptions to the general rule that Sunday-school libraries furnish wholesome and attractive reading to millions of youths and children, many of whom, without them, would have no reading, or only that which is bad.

The most cursory view of the various agencies now in existence as means of the Sunday-school enterprise can hardly fail to impress any thoughtful mind with the moral grandeur of that enterprise as a whole. Especially will any true Christian that contemplates the feeble beginning of 1780, in comparison with the vast array of Sunday-school activities and agents at work in the world to-day, be struck with the beneficence through the instrumentality of those who have endeavored to obey the command "Feed my lambs!" When, moreover, he considers the glorious results of the Sunday-school efforts of the past hundred years, and the cumulative power of those that may be made in the future, it is, indeed, a problem of the world's conversion in process of solution.

(D. P. K.)

SUNDAY-SCHOOL SOCIETIES, UNIONS, ETC.

Associated Christian effort may be designated as the generic agency by which, under the divine blessing, the great results of the Sunday-school effort have been accomplished. Such effort has assumed two forms—1. local; 2. general—each correspondent and supplementary to the other. Local associations, whether in neighborhoods or churches, have from the first been necessary as a means of raising the money to found, and of enlisting the teachers to instruct, Sunday-schools. General associations were also, from an early day, seen to be important for the purpose of awakening public interest and of diffusing information both as to the necessity and the best means of instructing in religious truth. They have likewise had an important function to perform in the way of preparing and distributing a religious effort in the work of organizing and maintaining Sunday-schools, becoming at the same time an important bond of union between great numbers of schools not locally connected. General associations for these objects have assumed, somewhat interchangeably, the title of societies and unions, the latter predominating, apparently, on account of its expressiveness of their character and objects. The most important of those established in England and America will now be enumerated in chronological order.

1. English.—1. In 1785 "The Society for Promoting Sunday-schools in the British Dominions" was organized in London. It was under the leadership of William Fox, who in various ways proved himself to be a true philanthropist, but specially in his zeal, liberality, and personal efforts for the education and moral elevation of the lower classes of his countrymen. This society, during the first sixteen years of its existence, paid out £4000 for the services of hired teachers in Sunday-schools. When, however, the plan of gratuitous teaching came to be universally adopted, and Christians and churches became generally enlisted in promoting Sunday-schools from purely religious motives, the importance and influence of this society declined until it became extinct.

2. In 1805 "The London Sunday-school Union" was organized. It was composed of lay Sunday-school workers of different denominations of Christians residing within a radius of five miles from the city post-office. This limitation was adopted as a measure of convenience and unity of action, but with no design of limiting the influence of the union to the circle thus described. This union has had an honorable and prosperous career from its origin to the present time. It has never controlled a large amount of funds, nor been able to take statistical accounts of any scale of great importance; but it has steadily and consistently pursued its objects, and in so doing has been able, from its central position, to influence favorably the Sunday-school cause not only throughout Great Britain, but throughout the world. The following have been its more important functions: 1. The publication of Sunday-school requisites, lesson-papers, and periodicals. Of the latter, The Sunday-school Teachers' Magazine and several juvenile monthlies have long held a high rank. 2. The promotion of activity and improvement in the work of Sunday-school instruction. For this object the position of the union, as a fitting link between the London Union of England, has been eminently favorable. This advantage has been diligently and wisely improved by a succession of intelligent and faithful workers, who, by personal and co-operative efforts, have kept the standard of Sunday-school instruction continually advancing. As a part of the same object, they have also had the power to secure the erection of a fine building in a central location, in which they maintain courses of lectures, training and model classes, together with competitive examinations for teachers.

3. In 1810 "The Religious Tract Society" of London was founded. A society of this name did not bear the name Sunday-school in its title, or specifically naming Sunday-school objects in its constitution, has nevertheless been, from its origin to the present time, one of the
most serviceable auxiliaries to the Sunday-school enterprise. Its publications have been unrivalled for cheapness, elegance, religious character, and adaptation to Sunday-school wants. As such they have challenged and secured the patronage of all Sunday-school workers throughout the British dominions. Vast numbers of them have been reprinted in the United States.

To comprehend the trend of all existing or former Sunday-schools it is not able to assign the exact date of origin. The order of their establishment is indicated in the list, and the specific object of each is sufficiently expressed by its title. They are as follows: "The Church of England Sunday-school Institute;" "The Ragged Sunday-school Institution;" "The Wesleyan Methodist Sunday-school Union;" "The Wesleyan Methodist Church has long had a form of denominational action in behalf of both week-day and Sunday school education. It has, moreover, through its publication-office, issued many books for Sunday-schools, as well as requisites and juvenile periodicals. Between the years 1860 and 1870 it thought proper to adopt more specific measures in behalf of its Sunday-school work. Hence the institution of the union last named, and the appointment of a connectional Sunday-school secretary. In general, it may be remarked that the greater part of the churches throughout Great Britain maintain their Sunday-schools by individual Church effort, often aided by the co-operative influence of local unions.

II. American.—1. Not counting the Church action alluded to in the preceding article, the first general Sunday-school organization established in the United States dated from Jan. 1, 1781. It was formed in Philadelphia, under the title of "The First-day or Sunday School Society." It was composed of members representing different denominations of Christians, among whom were several members of the Society of Friends.

"The first article of the constitution of this society required that every child resident in the city, or established under its auspices or receiving its beneficence should "be confined to reading and writing from the Bible and such other moral and religious books as the society may from time to time direct." The teachers were paid for their services." Like its predecessor of similar design in London, this society did not have a very long or influential career. Neither did the New York Sunday-school Union, formed in 1816, nor the Philadelphia Sunday and Adult School Union formed in Philadelphia in 1817.

2. In 1824 the first named association was merged in the present "First or Sunday-school Union." This union, like that of London, is composed of laymen belonging to different denominations of Christians; but from the first it has assumed and maintained a far more prominent position and more aggressive modes of action than its English prototype. It has undertaken the double work of the publication of Sunday-school literature and the missionary enterprise of foundling Sunday-schools on the frontier and in all destitute portions of the United States. For these objects, it has appealed to its supporting churches for funds. Those appeals have been honored. The benevolence of the Church has never been less than generous. The church has found, during more than a half century, it has carried forward a grand and expanding work in many places where denominational effort could not have commanded success.

As an indication of the work it is and has been accomplishing, we subjoin its principal items of statistics for the year 1882, as reported to its annual meeting held in New York, Sept. 1: Sunday-schools organized, 1087, containing 4915 teachers and 39,769 scholars. Schools aided, 2718, containing 16,622 teachers and 152,962 scholars. Miles travelled by its agents and missionaries, 292,622. Addresses delivered, 5521. Bibles distributed, 2187. Testaments distributed, 6668. Pamphlets and tracts distributed, 50,000. Sunday-schools organized and maintaining an aggregate of $2,471,620, while the value of books and papers it has put in circulation is not less than $7,000,000. It is easy to perceive that such a system of evangelical effort, steady and energetically pursued for a long series of years, must result in an amount of good quite beyond the power of figures to enumerate or words to express. When to this grand idea is added that of the influence of a rich and abundant Sunday-school literature, diffused on business principles and through business agencies among the various Sunday-schools of the land, the mind strives in vain to weigh the moral effect of such a system of effort. From the nature of its work, the American Sunday-school Union is unable to take what may be called permanent statistics, or to follow the schools it has founded into their subsequent changes and developments. Its office is usually that of a committee of the managers or trustees of the schools, which, in the course of years—and often of a very few years—expand, subdivide, and become merged in the more permanent work of the various churches.

3. In 1827 "The Sunday-school Union of the Methodist Episcopal Church" was organized in New York, in a form which also contemplated the publication and diffusion of religious tracts and the Holy Scriptures. Although all these objects had been previously contemplated and promoted by regular Church action as taken in 1784 and subsequently, it was thought proper, in 1827, to make special efforts in their behalf by the joint and special organization referred to. In 1840 the Sunday-school Union under notice was reorganized as a separate institution, and in 1844 its interests and functions were brought into greater prominence by the appointment of an official Sunday-school editor, who was also made corresponding secretary of the union. These movements were in harmony with the original policy of the Church that instituted them, namely, to promote Sunday-school instruction as a branch of regular Church action. For such action on a large scale circumstances at the last-named period were highly favorable. The Church had then become extended throughout the country, and had reached almost any inhabited place by its regular agencies. Its plan, therefore, was to stimulate its ministers and members to universal activity, in accordance with its rules, adopted in 1784 and 1790. This plan saved the great expense of sending out and maintaining special Sunday-school missionaries, who were paid, responsible and resident agents wherever the work was undertaken. By similar agencies it was sought everywhere to promote a higher grade of Sunday-school activity and improved methods of instruction. For the production of an extensive and varied Sunday-school literature, the union, as an official organization, was able to avail itself of an organized and most effective publishing establishment, owned by the Church, with the best of facilities for diffusing its printed matter. In these circumstances, all collections for the missionary department of Sunday-school effort were applied directly and exclusively to the distribution of books, at cost price, to be used by persons engaged in founding new or maintaining poor schools. Probably no more thorough and efficient system of Church effort in behalf of Sunday-schools was ever organized, inclusive of the whole extent of the work of which the results are shown from year to year. Some of the results of the action of that system, running on in regular course, may be inferred from the statistical summaries given in the foregoing article.

4. "The Protestant Episcopal Sunday-school Union" was organized in New York at about the period when the two unions last named had their origin; but, for some reason, it never secured a strong support from the Church in whose interest it was founded and whose name it bore. It acted for a time as a publication society, being often aided by individual congregations in the issue of its publications. These, for mission purposes, rather than local existence, its interests were sold out to a private bookseller. A similar result occurred to the Evangelical Knowledge Society, an organization also projected, about 1850, by ministers and members of the
SUNDAY SERVICE 26

SUNIAS

Protestant Episcopal Church, in the idea of securing and diffusing a more evangelical literature than that furnished by the union last named.

5. It is proper to say here that neither the Presbyterian nor Baptist churches of the United States have organized Sunday-school unions. They have availed themselves to a large extent of the publications of the American Sunday-School Union, the juvenile literature issued by their respective boards of publication, as well as that of the American Tract Society.

6. In 1833 "The Massachusetts Sabbath-school Society" was founded in Boston, by representatives of the Congregational, New School, and Old School, its mode of action were denominational, and its publications were numerous and good, but after some years of independent existence the interests of the society were blended with those of the Congregational Publishing Society and the American Home Missionary Society. Neither of those societies publish Sunday-school statistics.

7. "The (Dutch) Reformed Sunday-school Union" was organized in New York about 1850, and for several years proceeded quite actively to promote the Sunday-school interests of the Church it represented. It published a small catalogue of Sunday-school books and requisites, but did not long maintain a separate existence, its interests having been merged in those of a publishing society of a more general character.

8. It is not within the scope of this article to notice the numerous local Sunday-school associations that have sprung up in the cities, towns, counties, or even states of the American Union. Many of them have had but a brief existence. Others have been maintained for continuous years, happily illustrating the principles of Christian union, but rarely engaging in the enterprise of publication. Some of them have collected statistics, but usually within limited circles.

9. The Church of England Sunday-school Association of New York and vicinity had a germinial existence as far back as 1864, but did not secure an incorporation till 1878. It is composed of practical Sunday-school workers, who, by means of correspondence, co-operation with missionary, and judicious donations, seek to promote the organization and maintenance of Sunday-schools in countries foreign to the United States and outside of the British possessions. It claims to have been the means of planting 1777 Sunday-schools in Germany, 1180 in France, 150 in Italy, 30 in Portugal, 40 in Japan, 405 in German Switzerland, besides some schools in China, Greece, New Egypt, and other countries. Its published report for 1879 contains numerous interesting facts, and authorizes the hope that in years to come grand results may ensue from beginnings which are at first necessarily feeble, so far as human agency is involved.

The fact that the Sunday-school enterprise, during the first century of its history, has, with the divine blessing, come so fully to pervade English-speaking countries, and has had a hopeful commencement in many and remote foreign nations, deserves to be taken as a promise of success during the centuries to come of inestimable value.

P. K.

Sunday Service of the Methodist Episcopal Church was an abridgment of the Prayer-book of the Church of England, prepared by Mr. Wesley. It was arranged for the use of the Methodists in America, when he recommended their organization into a Methodist Episcopal Church. It was entitled The Sunday Service of the Methodists of North America, with other Services, and was adopted by the General Conference of 1784. It was published in connection with the Discipline (Phila. 1785; Lond. 1786). This appears to have been the last really complete prayer-book. It was adopted in connection with the Discipline, and at the General Conference of 1792 all reference to the use of a Sunday Service was stricken out. It gradually dropped out of use. The M. E. Church, South, in 1866, ordered that the Prayer-

book as printed by Mr. Wesley in 1786 should be reprinted for the use of their Church, and the same service is used in many Wesleyan churches in England, though generally the churches using a service prefer the regular English Prayer-book. See Simpson, Cyclop. of Methodism, s. v.

Sundays, Special. There are a number of Sundays in the year which have received names suggested by events happening upon or near those days. We give below a classified list:

1. Advent (q. v.). The Sundays in Advent are called in the Greek Church by a certain number in connection with St. Luke's Gospel; thus, Advent Sunday is the "Tenth of Luke." The second Sunday in Advent is called Sunday of the Return from the Introit.

After Epiphany (q. v.). It is called in the Greek Church "Sunday after the Lights," in the north of Italy "Marriage Sunday," from the Gospel. The second Sunday after Epiphany is known as the "Fifteenth of Luke."

Before Christmas (q. v.), called in the Greek Church "Sunday of the Publican and Pharisee."

2. Christmas (q. v.), called in Greece "Sunday of the Prodigal," and in the West "Clove of Alleluia."

3. Epiphany (q. v.), called in Greece "Sunday of Apostles," because Jesus is not eaten beyond it. It was also called "Sunday of the Sower."

4. Quinquagesima (q. v.), called in Greek Church "Quinquagesima Persicet"; also English "Fifth Sunday in Lent," in the English Church. It is a festival much estimated by the German "Priest's Forthnight," ecclesiastics commencing their fast on this day; and in the Greek Church Tyrophagos, because no longer fasting after the fast.

5. Holy Saturday (q. v.), called in the Greek Church "Holy Day."

6. Holy Thursday, from the Introit (Ps. xxxv, 6), and in France "Transfiguration," from the Gospel in the Pará use.

7. In Lent (q. v.).

9. Maundy Thursday, from the Introit (Ps. xxxv, 6), and in France "Transfiguration," from the Gospel in the Pará use.

10. Palm Sunday (q. v.), also called "Palm Sunday.""""Dimanche Reprus," from veiling the images; "Sunday of the Quintains" in France, from the sports of the day; "Black Sunday" in Germany, from the burning of the crosses when the words "Jesus bid himself" were read.

11. Palm-Sunday (q. v.), also called "Palm Sunday ."

12. Easter (q. v.).

1. First Sunday after Easter, or Octave, has no new appellation: Dominica in Alba, persons who were baptized at Easter laying aside the white robes then received, and taking on them habits of Saints and bishops. It is called in England the "First Sunday of the Year." It was then regarded as the main cause of the Church by the Council of Nicaea, and as held in the West, it was called the "First Sunday of the Year." It was also called "First Sunday of Easter."

2. Second Sunday of Easter (q. v.), called "Second Sunday of the Year." It was called the "Second Sunday of Easter."

3. Third Sunday of Easter (q. v.), called "Third Sunday of the Year." It was called the "Third Sunday of Easter."

4. Fourth Sunday of Easter (q. v.), called "Fourth Sunday of the Year." It was called the "Fourth Sunday of Easter."

5. Fifth Sunday of Easter (q. v.), called "Fifth Sunday of the Year." It was called the "Fifth Sunday of Easter."

6. Sixth Sunday of Easter (q. v.), called "Sixth Sunday of the Year." It was called the "Sixth Sunday of Easter."

7. Seventh Sunday of Easter (q. v.), called "Seventh Sunday of the Year." It was called the "Seventh Sunday of Easter."

8. Eighth Sunday of Easter (q. v.), called "Eighth Sunday of the Year." It was called the "Eighth Sunday of Easter."

9. Ninth Sunday of Easter (q. v.), called "Ninth Sunday of the Year." It was called the "Ninth Sunday of Easter."

10. Tenth Sunday of Easter (q. v.), called "Tenth Sunday of the Year." It was called the "Tenth Sunday of Easter."

11. Eleventh Sunday of Easter (q. v.), called "Eleventh Sunday of the Year." It was called the "Eleventh Sunday of Easter."

12. Twelfth Sunday of Easter (q. v.), called "Twelfth Sunday of the Year." It was called the "Twelfth Sunday of Easter."

13. Thirteenth Sunday of Easter (q. v.), called "Thirteenth Sunday of the Year." It was called the "Thirteenth Sunday of Easter."

14. Fourteenth Sunday of Easter (q. v.), called "Fourteenth Sunday of the Year." It was called the "Fourteenth Sunday of Easter."

15. Fifteenth Sunday of Easter (q. v.), called "Fifteenth Sunday of the Year." It was called the "Fifteenth Sunday of Easter."

16. Sixteenth Sunday of Easter (q. v.), called "Sixteenth Sunday of the Year." It was called the "Sixteenth Sunday of Easter."

17. Seventeenth Sunday of Easter (q. v.), called "Seventeenth Sunday of the Year." It was called the "Seventeenth Sunday of Easter."

18. Eighteenth Sunday of Easter (q. v.), called "Eighteenth Sunday of the Year." It was called the "Eighteenth Sunday of Easter."

19. Nineteenth Sunday of Easter (q. v.), called "Nineteenth Sunday of the Year." It was called the "Nineteenth Sunday of Easter."

20. Twentieth Sunday of Easter (q. v.), called "Twentieth Sunday of the Year." It was called the "Twentieth Sunday of Easter."

21. Twenty-first Sunday of Easter (q. v.), called "Twenty-first Sunday of the Year." It was called the "Twenty-first Sunday of Easter."

22. Twenty-second Sunday of Easter (q. v.), called "Twenty-second Sunday of the Year." It was called the "Twenty-second Sunday of Easter."

23. Twenty-third Sunday of Easter (q. v.), called "Twenty-third Sunday of the Year." It was called the "Twenty-third Sunday of Easter."

24. Twenty-fourth Sunday of Easter (q. v.), called "Twenty-fourth Sunday of the Year." It was called the "Twenty-fourth Sunday of Easter."

25. Twenty-fifth Sunday of Easter (q. v.), called "Twenty-fifth Sunday of the Year." It was called the "Twenty-fifth Sunday of Easter."

26. Twenty-sixth Sunday of Easter (q. v.), called "Twenty-sixth Sunday of the Year." It was called the "Twenty-sixth Sunday of Easter."

27. Twenty-seventh Sunday of Easter (q. v.), called "Twenty-seventh Sunday of the Year." It was called the "Twenty-seventh Sunday of Easter."

28. Twenty-eighth Sunday of Easter (q. v.), called "Twenty-eighth Sunday of the Year." It was called the "Twenty-eighth Sunday of Easter."

29. Twenty-ninth Sunday of Easter (q. v.), called "Twenty-ninth Sunday of the Year." It was called the "Twenty-ninth Sunday of Easter."

30. Thirtieth Sunday of Easter (q. v.), called "Thirtieth Sunday of the Year." It was called the "Thirtieth Sunday of Easter."

31. Feast of Corpus Christi (q. v.), called "Feast of Corpus Christi." It was called the "Feast of Corpus Christi."

32. Ascension Day (q. v.), called "Ascension Day." It was called the "Ascension Day."

33. Pentecost (q. v.), called "Pentecost." It was called the "Pentecost."
Suniastanism (now occasionally introduced with), a name given to the practice by which many of the clerics evaded the rigorous laws respecting celibacy. It is sometimes called domesticism, and consisted in keeping female inmates in their dwellings, with whom they prosessed to live in chaste affection, but who were known to be concubines. Jerome and Chrysostom severely reproved the former. They allowed the licentiousness of such a crime, and accordingly kidnapped the children, afterwards placing them in charge of the sun and the moon wagons which were formed out of sparks of fire which flew from Muspelheim into the kingdom of the assas. The horses which drew the wagons were named Alsidurid and Arrarkur (the "universal scroucher") and the "early wake"). They speeded rapidly on their courses because Skoll and Hati, two mighty giants in the form of wolves, followed swiftly on their heels to devour them. It would seem that the ancient Germans also worshipped the sun under this title as a shining, light-reflecting being. See Norse Mythology.

Sunna (Arab. custom, legal usage) originally denotes among Moslems the sayings and the example of Mohammed and his community, provided they are in accordance with the Koran, the meaning of which, however, is itself explained by the Sunna. The term is therefore (though incorrectly) used for the collections of moral and legal traditions traced to the Prophet, which supplement the Koran, somewhat like the Mishna (q. v.), which supplements the laws of the Pentateuch. The Sunna not only comprises religious doctrines and practice, but also civil and criminal laws and the usages of common life—the way to eat and to drink, and to dress, and the like. This tradition is first heard of during the civil wars among the adherents of the new faith, about half a century after the Flight. The single traditions, as we now possess them, rarely exceed six lines. The diction is carefully wrought, and the form of the conversation is usually that of a dialogue. For the credibility and canonicity of a tradition it was originally necessary that it should have been heard by one trustworthy witness; but this law was much relaxed in after-time. At the end of the 8th century (H.), a countless number of individual collections (Momon), mostly of an apocryphal character, were introduced by religious bodies, but the first who sifted them critically, and without regard to any special theological system, was Bohachy (d. 256 H.). His collection contains 7278 single traditions, 4000 of which, however, occur twice in the work. Moslem, his pupil, supplemented Bohacby with another collection, containing a total of 11,400 repetitions. Besides these, there are four more "canonical" collections—by Abu Dawdí (d. 275 H.), Tirmidzi (d. 279), Náši (d. 303), and Mágga (d. 278). The Sunna, as we have it in these collections, contains, broadly speaking, more truth than it is generally supposed to contain, and, critically used, is, besides the Koran, the most authentic source of Islam. A selection from the different collections (both canonical and otherwise), called Miskat Al-Mansih, has been translated into English by Capt. Matthews (Calcutta, 1809). Fragments from Bohacby are found in the German translation, von Hammer, in the Fundgruben der Oriënt. See Sona.

Sonnites, traditionists, or believers in the Sunna (q. v.); the name of the "orthodox" Moslems, as opposed to the Shíites (q. v.). They are subdivided into four principal sects, which, though at issue on different minor points, yet are acknowledged by each other to belong to the faithful and to be capable of salvation; and they each have a special oratory at Mecca. The first of these sects are the Hanefites, founded by Abú Hanifá, who died 150 years after the Hegira. They are emphatically called "the followers of reason," while the other three are guided exclusively by tradition. They allow no power to have a principal share in their decisions on legal and other points. To this sect belong chiefly the Turks and Tartars. The second sect are the Malekites, founded by Malek Ibn-Ans, who died at Medina about 180 H. As one of the chief proofs of his real piety and humility, it is recorded that when asked how he decided on any religious question he would only decide on sixteen, freely confessing his ignorance about the others. In Barbary and other parts of Africa, the greatest part of his adherents are found. Mohammed Al-Sháfi'í, born in Palestine, 150 H., but educated in Mecca, is the founder of the third sect, the Sháfi'ites. He was a great enemy of the schismatical divines, and seems altogether to have been of an original cast of mind. He never swore by God, and always took time to consider whether he should at all answer any given question or hold his peace. The most characteristic saying recorded of him is, "Whoese proceeds to lend with the work and the Greater alms, to the time is a liar." He is accounted of such importance that, according to his contemporaries, "he was as the sun to the world, and as health to the body;" and all the relations of the traditions of Mohammed were said to have been asleep until he came and woke them. He appears to have been the first who reduced Moslem jurisprudence into a method, and thus made it, from a number of vague sayings, a science. His followers are now chiefly found in Arabia and Persia. Ahmed Ibn-Hanabal founded the fourth sect, the Hanbalites. He was born 164 H., and was a most intimate friend of Sháfi'í. Some of the traditions of the latter (which could repeat not fewer than a million) was no less famed than was his piety. He taught that the Koran was not created, but everlasting subsisted in the essence of God—a doctrine for which he was severely punished by the caliph Al-Motased. On the day of his death, no less than 20,000 unbelievers (Jews and Magians) are said to have embraced the Mohammedan faith. Once very numerous, the Hanbalites now are but very rarely met with out of Arabia. On the differences between the Sunnites and Shíites, see Shíites. See Sona.

Sunnyabadis, a sect of Hindú Atheists, or rather Nihilists, who held that all notions of God and man are fallacies, and that nothing exists. Whatever we look upon is regarded as vacuity. Theism and Atheism, Maya and Brahman, all is false, all is error.

Suovetaurilia, peculiar sacrifices among the ancient Romans, so named because they consisted of a pig, a sheep, and an ox. They were offered at the general lustration of the Roman people, which took place every five years. The Suovetaurilia, indeed, formed a part of every lustration, and the victims were carried around the thing to be purified, whether it was a city, a people, or a piece of land. The same sacrifices existed among the ancient Greeks, under the name of Trityta. A representation of the celebration of these sacrifices is found on the Triumphal Arch of Constantine at Rome. See Sacrifice.

Sup (ἡσυχία). Our information on this subject is but scanty. The early Hebrews do not seem to have given special names to their several meals, for the terms rendered "dine" and "dinner" in the A. V. (Gen. xiii, 16; Prov. xxx. 6; Prov. xxx. 18) mean the whole of a meal, which might more correctly be rendered "eat" and "portion of food." In the New Testament, we have the Greek terms ἄφαγος and ἐθρήνων, which the A. V. renders respectively "dinner" and "supper" (Luke xiv,
12; John xxi, 19), but which are more properly “breakfast” and “dinner.” There is some uncertainty as to the hours at which the meals were taken. The Egyptians undoubtedly took their principal meal at noon (Gen. xiii, 16); laborers took a light meal at that time (Ruth ii, 14; comp. ver. 17); and occasionally that early hour was devoted to excess and reveling (1 Kings xix, 16). The ancient Jews (somewhat hastily, we think) that the principal meal generally took place at noon. The Egyptians do, indeed, still make a substantial meal at that time (Lane, Mod. Egypt, i, 189), but there are indications that the Jews rather followed the custom that prevails among the modern Egyptians of having their principal meal after sunset, and a lighter meal at about 9 or 10 A.M. (Burchhardt, Notes, i, 64). For instance, Lot prepared a feast for the two angels “at even” (Gen. xix, 1-3); Boaz evidently took his meal late in the evening (Ruth iii, 7); the Israelites ate flesh in the evening, and bread only, or manna, in the morning (Exod. xvi, 12); the context seems to imply that Jethro’s feast was in the evening (Exviii, 12, 14). But, above all, the institution of the Paschal feast in the evening seems to imply that the principal meal was usually taken then: it appears highly improbable that the Jews would have been ordered to eat meat at an unusual time. In the later Biblical period we have clearer notices to the same effect. Breakfast took place in the morning (John xxi, 4, 12), on ordinary days not before 9 o’clock, which was the first hour of prayer (Acts ii, 15); and on the Sabbath not before 12, when the service of the synagogue was completed (Josephus, Life, § 54); the more prolonged and substantial meal took place in the evening (ibid. § 44; War, i, 17, 4). The general tenor of the parable of the great supper certainly implies that the feast took place in the working-hours of the day (Luke xiv, 15-24) but we may regard this, perhaps, as part of the imagery of that parable rather than as a picture of real life. See Supper.

The posture at meals varied at different periods. There is sufficient evidence that the old Hebrews were in the habit of sitting (Gen. xxvii, 19; Judg. xix, 6; 1 Sam. xx, 5, 24; 1 Kings xiii, 20), but it does not hence follow that they sat on chairs; they may have squatted on the ground, as was the occasional, though not perhaps the general, custom of the ancient Egyptians (Wilkinson, Anc. Egypt, i, 58, 181). The table was in this case but slightly elevated above the ground, as is still the case in Egypt. At the same time, the chair was not unknown to the Hebrews, but seems to have been regarded as a token of dignity. The Hebrew term is קיסא (Qēṣā; [Greek: kaisā]). There is only one instance of its being mentioned as an article of ordinary furniture, viz. in 2 Kings iv, 10, where the A. V. incorrectly renders it “stool.” Even there it seems probable that it was placed more as a mark of special honor to the prophet than for common use. As luxury increased, the practice of sitting was exchanged for that of reclining. The first intimations of this occurs in the prophecies of Amos, who reprobrates those “that lie upon beds of ivory, and stretch themselves upon their couches” (vi, 4); and it appears that the couches themselves were of a costly character—the “corners” or edgex (iii, 12: the word is פֹּלֶד, Pōlēd, which will apply to the edge as well as to the angle of a couch. That the seats and couches of the Assyrians were handsomely ornamented appears from the specimens given by Layard (Niniveh, ii, 300-302), being finished with ivory, and the seat covered with silk or damask coverlets. (The A. V. has “in Damascus in a couch;” but there can be no doubt that the name of the town was transferred to the silk stuffs manufactured there, which are still known by the name of “Damask.”)

Some doubt attends the question whether the females took their meals along with the males. The present state of society in Egypt throws no light upon this subject, as the customs of the harem date from the time of Mohammed. The cases of Ruth amid the reapers (Ruth ii, 14), of Elkanah with his wives (1 Sam. i, 4), of Job’s sons and daughters (Job i, 4), and the general intermixiture of the sexes in daily life, make it more than probable that they did so join; at the same time, as the duty of attending upon the guests devolved upon them (Luke x, 40), they probably took a somewhat irregular and briefer repast. See Dine.

Before commencing the meal, the guests washed their hands. This custom was founded on natural decorum; self-cleaning is only one of its branches (Mark vii, 2; A. V., fork, but the hands of all the guests were dipped into one and the same dish; uncleanness in such a case would be intolerable. Hence not only the Jews, but
Washing before or after a Meal. (From Lane’s Modern Egyptians.)

The Greeks (Od. i, 136), the modern Egyptians (Lane, i, 190), and many other nations have been distinguished by this practice; the Bedawin, in particular, are careful to wash their hands before, but are indifferent about doing so after their meals (Burckhardt, Notes, i, 63). The Pharisees transformed this conventional usage into a ritual observance, and overlaid it with burdensome regulations—a wilful perversion which our Lord reprobates in the strongest terms (Mark vii, 1–13). Another preliminary step was the grace or blessing, of which we have but one instance in the Old Test. (1 Sam. ix, 13), and more than one pronounced by our Lord himself in the New Test. (Matt. xv, 30; Luke ix, 16; John vi, 11); it consisted, as far as we may judge from the words applied to it, partly of a blessing upon the food, partly of thanks to the Giver of it. The Rabbinical writers have, as usual, laid down most minute regulations respecting it, which may be found in the treatise of the Mishna entitled Berachoth, ch. vi–viii. See WASH.

The mode of taking the food differed in no material point from the modern usages of the East; generally there was a single dish, into which each guest dipped his hand (Matt. xxvi, 23); occasionally separate portions were served out to each (Gen. xliii, 34; Ruth ii, 14; 1 Sam. i, 4). A piece of bread was held between the thumb and two fingers of the right hand, and was dipped either into a bowl of melted grease (in which case it was termed σιμίων, “a sop”; John xiii, 26) or into the dish of meat, whence a piece was conveyed to the mouth between the layers of bread (Lane, i, 193, 194; Burckhardt, Notes, i, 60). It is esteemed an act of politeness to hand over to a friend a delicate morsel (John xiii, 26; Lane i, 193). In allusion to the above method of eating, Solomon makes it a characteristic of the sluggard that “he biddeth his hand in his bosom and will not so much as bring it to his mouth again” (Prov. xix, 24; xxvi, 15). At the conclusion of the meal grace was again said, in conformity with Deut. viii, 10, and the hands were again washed. See MEAL.

Thus far we have described the ordinary meal. On state occasions more ceremony was used, and the meal was enlivened in various ways. Such occasions were numerous, in connection partly with public, partly with private events. In the first class we may place the great festivals of the Jews (Deut. xvi, 1; Tob. ii, 1); public sacrifices (Deut. xii, 7; xxvii, 7; 1 Sam. ix, 13, 22; 1 Kings i, 9, 18; Zech. i, 7); the distribution of the tithes (Gen. xxvi, 30; xxxi, 54); the offering of the tithes (Deut. xiv, 26), particularly at the end of each third year (xv, 28). In the second class, marriages (Gen. xxii, 12; Judg. xiv, 10; Esth. ii, 18; Tob. viii, 19; 1 Macc. xi, 2; John ii, 1); birthdays (Gen. xli, 29; Job viii, 4); Matt. iv, 4; Matt. xiv, 6, 9); burials (2 Sam. iii, 35; Jer. vi, 7; Hos. ix, 4; Tob. iv, 17); sheep-shearing (1 Sam. xxv, 2, 36; 2 Sam. xiii, 28); the vintage (Judg. ix, 27); laying the foundation-stone of a house (Prov. ix, 1–5); the reception of visitors (Gen. xviii, 6–8; xix, 3; 2 Sam. xii, 20; 2 Sam. xiii, 4; 2 Kings vi, 26; Tob. vii, 9; 1 Macc. xvi, 15; 2 Macc. ii, 26; Luke xxi, 33; John xii, 2); or any event connected with the sovereign (Hos. vii, 5).

“The day of the king,” in this passage, has been variously understood as his birthday or his coronation; it may, however, be equally applied to any other event of similar importance. On each of the above-mentioned occasions a sumptuous repast was prepared; the guests were previously invited (Esth. v, 8; Matt. xxii, 3), and on the day of the feast a second invitation was issued to those that were then invited (Esth. vi, 14; Prov. iv, 3; Matt. xxii, 5). The visitors were received with a kiss (Tob. vii, 6; Luke vii, 42); water was prepared for them to wash their feet with (Luke vii, 44); the head, the beard, the feet, and sometimes the clothes were perfumed with ointment (Ps. xxiii, 5; Amos vi, 6; Luke vii, 37); John xii, 8); on special occasions robes were provided (Matt. xxii, 11; comp. Trench, On Parables, p. 230); and the head was wreathed with victory wreaths (Is. xi, 10; W. iv, 7, 8; Josephus, Ant. x, 9, 1). This custom prevailed extensively among the Greeks and Romans. Not only were chaplets worn on the head, but festoons of flowers were hung over the neck and breast (Plutarch, Symp. iii, 5, 8; Martial, x, 19; Ovid, Fast. ii, 783). They were generally introduced in the first part of the entertain- ment was completed. They are noticed in several familiar passages of the Latin poets (Horace, Carm. ii, 7, 24; Sat. ii, 3, 256; Juven. v, 36). The regulation of the feast was under the superintendence of a special officer, named ἄρχοντας τοῦ φεστανοῦ (John ii, 8; A. V. “governor of the feast”), whose business it was to taste the food and the liquors before they were placed on the table, and to settle about the toasts and amusements; he was generally one of the guests (Eccles. xxiii, 1, 2), and might therefore take part in the conversation. The classical designation of this officer among the Greeks was ἀρχοντας τοῦ φεστανοῦ; among the Romans magister or rex convivii. He was chosen by lot out of the guests (Smith, Dict. of Antiq. p. 925). See ARCHITRICALUS.

The places of the guests were settled according to their respective rank (Gen. xliii, 33; 1 Sam. ix, 22; Mark xii, 39; Luke xiv, 8; John xiii, 29); portions of food were placed before each (1 Sam. i, 4; 2 Sam. vi, 19; 1 Chron. xvi, 3), the most honored guests receiving either larger (Gen. xliii, 34; comp. Herod. vi, 57) or more choice (1 Sam. ix, 24; comp. Il. vii, 321) portions than the rest. The importance of the feast was marked by the number of the guests (Gen. xxix, 22; 1 Sam. ix, 22; 1 Kings i, 9, 25; 2 Kings v, 21; Luke vii, 41; xiv, 16), by the splendor of the entertain- ment (Esth. i, 7), and by the profusion or the excellence of the viands (Gen. xviii, 6; xxvii, 9; Judg. vi, 19; 1 Sam. ix, 24; Isa. xxxx, 6; Amos vi, 4). The meal
was enlivened with music, singing, and dancing (2 Sam. xix, 35; Psa. ixix, 12; Isa. v, 12; Amos vi, 5; Ecclus. xix, 3; Matt. xvii, 6; Luke xvi, 25), or with riddles (Judg. xiv, 12); and amid these entertainments the festival was prolonged for several days (Esth. i, 3, 4). Entertainments designed almost exclusively for drinking were known by the special name of mishāḥēth (םישחת). This resembled the comisartio of the Romans, which took place after the supper, and was a mere drinking revel, with only so much food as served to whet the palate for wine (Smith, Dict. of Antig., p. 271).—Smith. See Bacevitz. Instances of such drinking-houts are noted by xiv, 36; 2 Sam. vii, 36; Esth. i, 7; Dan. v, 1; they are reprobated by the prophets (Isa. v, 11; Amos vi, 6). Somewhat akin to the mishāḥēth of the Hebrews was also the kōmos (κώμος) of the apostolic age, in which much licentiousness was added to drinking, and which is frequently made the subject of warning in the Epistles (Rom. xii, 13; Gal. v, 21; Eph. v, 18; 1 Pet. iv, 3). See DRINK.

Super-altar, a term given—1. To a portable altar, placed on the altar itself at the time of the celebration of the Christian eucharist, or set up separately. Hinomar (867) allowed the use of a consecrated slate, marble, or a black stone slab, probably owing to the needs of the Convent of St. Matrona at Mount Athos, which was large enough to contain the chalice and host. See ALTAR, PORTABLE. 2. Ordinarily and commonly this term is applied to the ledge behind the altar, on which relics, flowers, candles, and the altar-cross stand. It is very frequently so applied in the ancient Church of England.

Superannuated Preachers are ministers in the Methodist churches who, by reason of age, infirmity, or afflictions, are disabled from preaching, but remain members of the Annual Conferences. In the American churches they retain all the rights and privileges of active ministers except being eligible to appointments. In the English Wesleyan Church, if members of the Legal Hundred or Constitutional Conference, they cease to be members of that body. Their restoration to the effective relation depends upon the vote of the Conference.

I. Rights, etc.—When a superannuated preacher lives out of the bounds of his Conference, he is entitled to a seat in the Quarterly Conference, and the privilege of membership in the Church where he resides. He is entitled, if needy, to receive a share of the proceeds of the collection taken in the churches for Conference claimants, and of the chartered fund. Each Quarterly Conference is authorized to appoint a committee to estimate the amount needed to the support of these preachers or their widows, and forward a certificate to the Annual Conference. The case is considered by the Conference stewards, and on their report the amount to be distributed is decided by the vote of the Conference.

II. Duties, etc.—It is the duty of the superannuated preacher to forward annually to the Conference of which he is a member a certificate of his Christian and ministerial character, signed by the presiding elder of the district or the preacher in charge of the work where he resides. Without such certificate he has no claims on the Conference for support.

In 1876 there were in the Methodist Episcopal Church 1103 superannuated preachers. The Methodist Episcopalian Church, South, in 1875, reported 259. See Discipline of the M. E. Church; Simpson, Cyclop. of Methodism, s. v.

Superaddenda: The Greek word ἵστασις, episōsia, has always been retained in the Church to denote the chief minister in sacred things. It was sometimes translated by Latin writers into superaddenda, i. e., superintendent. See Bishop.

Superbia, the Roman personified pride, a daughter of Eōther and Earth.

Supererogation (opus supererogationis). The distinction between praecipita and consilia evangelica, which was once the subject of no less disputes between the fathers, and which had the moral requirements of the Gospel, which the faithful are at liberty to comply with or not, referring chiefly to 1 Cor. vii, 6, and treated in the Catechism, Romani, iii, 24, is of very ancient origin. Scholastic theology insisted most particularly on that distinction, and established it in the form in which it has since been held by all orthodox Roman Catholics. If the observance of the obligatory commandments constitutes all the duties of man, then his undertaking to accomplish the non-obligatory consilia may be looked upon as a sort of traffic, the object of which is to gain by this accomplishment a sort of merit, or meritum auctoris, with a sort of surplus, and this is what is designated as opus supererogationis. This doctrine of supererogatory merits is not symbolical, for the Council of Trent does not express itself on that point. On the other hand, the principle that the righteous may fully satisfy the divine law pro hujus earum statu by works alone in God's grace established by Conc. Trid. Sess. vi, can. 16. This is also the case with the other principle, "Si quis dixerit, hominis justificavit bonam opera, non potuit habere rem, quam fratres vestri, quibus omnes juravit, deferre," the words "omnia" and "one" and "bonam" are "secuti praecesserunt," sed Deo gratia et ab illo commendamus." If a satisfactory fulfilment of the law is possible, if good works constitute a desert, then the scholastic notion of the opera supererogativa becomes a natural consequence. This doctrine, in short, is the result of the system. It is the natural consequence of the view of the law and the justification of man. It is supported by tradition from the time of Alexander of Hales (Summa, pt. iv, qu. 23, a. 2, m. 3; Albertus Magnus, Sent. iv, dist. 20, a. 16, 17; Thomas Aquinas, Suppl. tert. part. Summa Theol. qu. 13, a. 1), and has not only never been denied, but always asserted and defended against all attacks by the most eminent theologians of the Roman Catholic Church. The assertion "ut unus posset pro alterationi," in the Catech. Rom., can only be explained in view of that doctrine. If we now inquire further into its consequences, as attempted by more modern theologians, (Möhrer, "Unterredungen," 2nd ed.; Cremer sq.), we find an inextricable confusion in the conception of the law. Möhrer starts from the admission that the moral law, as the absolute will of God, and the unity of the human will with the divine by love, which it requires, cannot be surpassed. Yet his conception of the law is erroneous and a mere abstraction, for, on the one hand, he considers it as without limits, infinite; and, on the other, as resolving itself into a number of separate commandments, each of which constitutes a duty. Thus considered, no one can do more than the law requires, though any one can do more than is required by the separate commandments taken individually. From the moment that by his entering into communion with Christ love becomes the ruling principle of a man's life, he has absolutely fulfilled the moral law. Regeneration being presupposed, there are yet different degrees in the effects of love, and these degrees are not regulated by any law. Möhrer is unaware that every one may acquire duties as if they were not duties for him, thus overstepping the common limits of duty and attaining to a higher degree of perfection. According to this argumentation, the moral law would constitute, so to speak, an imaginary quantity, consisting, on the one hand, in the complete fulfillment of the commandments in a manner different from other, in a number of imputations separate from these commandments, and very difficult to define particular-
SUPEREROGATION

ly. This, then, brings us back again to the distinction between praecedia and consilia, as the basis of the opera supererogatoriae. In praecedia, there is a work done upon the divine law as one indivisible, and being in this form the rule of all human life and action. Objectively, it is the expression of the idea of that which is good in itself, while subjectively it finds its accomplishment in love. But in order to satisfy the manifold exigencies of life, it presents itself also in the form of a plurality of commandments. These, however, are not to be considered as separate from each other, nor, when taken together, as forming an incommensurable whole; but, as it is man's duty to do in every circumstance that which is good in itself, each distinct commandment is to be looked upon as partaking of the same moral idea, as the whole divine law in its relation to the circumstance under consideration. As to which of the many commandments finds its application in a given case, this is a question entirely distinct from that which is objectively to be defined. The perception of it is given to the regenerate by the Holy Spirit through a conscience filled with love. It is evident that in this system there is no possibility of supposing a human power in those regenerated in Christ by virtue of which they could, under any circumstance, do more than is required of them, i.e., more than that which is absolutely good in itself. Thus, we must not only observe that the young woman who devotes her life to taking care of the sick, or the missionary, does not thereby attain a higher degree of moral perfection than others who contribute but a mite towards the advancement of the kingdom of God. All depends in this respect on the individual, and on the position in which God has placed him. Thus, a young woman who, having an aged mother dependent on her care, should enter an order—such, for instance, as the Sisters of Mercy—would do a bad action. Of the woman who announced him our Lord said himself, "She hath done what she could" (Mark xvi, 6). In Luke xvi, 19, he says, "It is more blessed to give than to receive." Thus things which are commanded you, say, We are unprofitable servants." Of the stewards, it is required that they should be found faithful, and nothing else. Of Christ himself it is said that he was "obedient unto death, even the death of the cross" (Phil. ii, 8), and to be more than obedient is impossible, while to be less is to be disobedient. The contrary doctrine, which ascribes merits to man aside from the grace of God, is not only immoral, but positively irrereligious. It is even illogical when looked at from the Roman Catholic standpoint, since (Möller, p. 980) no living man ever accomplishs the Aug. art. xxvi; Apol. n. 140, 163, 187, 269; Art. Smalc. iii, 322; Conf. Angl. xiv.

We should neglect one of the principal consequences of the theory of the opus supererogatorium if we forgot to consider its relation to indulgences (q.v.). While the sacrament of penance and the absolution connected with it grant exemption from sin and from eternal punishment, the Church possesses a means of lessening or even remitting the temporal punishments required by divine justice by means of indulgences. These temporal punishments are otherwise to be undergone partly on this earth, as penances and ecclesiastical expiations (penae vindicativa), partly afterwards in purgatory (Perone, ix, 2). But, whence does one the Church possess the power thus to set up as the "representative of God's mercy and justice in our time," and as such to exercise such a right of grace as is so far from being ecclesiastic? It is not at all clear to us why, in the absence of any restriction (even beyond this life? How can it defend the assumption of a potestas conferendi indulgentias a Christo concessas, mentioned in Conc. Trid. Sess. xxv? On this point they refer, as was already done by Alexander of Hales, to the thesaurus supererogatarn, four of the chapters of which are devoted to the merits of Christ and to the saints: "Est indulgentia remissio peenis temporalis adhuc post absolutionem sacramentalum peccatis debiti, in foro interno coram Deo valida, facita per applicationem thersauri Ecclesiae a superiori legitimo" (Ferrone, Conc. Trid. Sess. xvi, ix, 1). They are all to be accounted for by the fact that all the blessings of the Church, both for the living and for the dead, are considered as part of the dispensation of the Son of God as man, and of Christ in his saints (Klee, Doegm. ii, 335), is considered as fides proxima. Aside from the fact that it is implicitly established by the sanction of indulgences (Conc. Trid. Sess. xxv, can. 21), it is confirmed by the express declarations of popes Clement VI (Const. Unigenitus), Leo X, Pius V, Gregory XIII, Pius VI, and Benedict XIV. See also Alex. Ales. pt. iv, qu. 23, a. 1, m. 1; Albertus Magnus, Sent. iv, dist. 20, a. 17, 18; Thomas Aquinas, pt. iii, qu. 25, a. 1; Sent. iv, dist. 20, qu. 1, a. 5; Summa, ia, q. 154, a. 7; Tholuck, Dogm. theol. i, 20, pt. ii, qu. 1; Bellarmine, De Indul. c. iii, ii, iii; Veronius, Regula Fidei, ii, 4; Bossuet, Exposition, § 8; Ballerini [Peter], Summ. Theol. Prat. iii. Still there may remain some doubt as to whether the merita on which the system of indulgences rests is to be considered as active performances in the strict sense. It is the opus supererogatorium, or as unmetered sufferings, such as those undergone by the saints, and which were not to be considered as punishments, but which thus served to atone beforehand for the faults afterwards committed by the universality of sinners. It is only in the first case that the doctrine of the opus supererogatorium is a part of the system of indulgences, or the notion of the opus supererogatorium must also embrace the superfluous sufferings of the perfect; and on this the orthodox writers of the Roman Catholic Church do not agree. In their polemical defences of the doctrine of a fund of merits, they mostly base themselves on the second consideration. If we leave these, we find in their other works so much that is obscure and indefinite on this as well as on most other points that it is impossible for Protestant expositors to attempt to define the doctrine of the Church without being at once accused by Roman Catholics of misunderstanding their authors. The same Möller who in Neue Untersuchungen, § 68, derives the thesaurus from the excessive sufferings of some, in § 69, p. 411, considers goods works as efficient as undeserved sufferings in freeing the yet enamed members of the body of Christ. This is still more expressly asserted by Klee (Doegm. ii, 334) and Bellarmine (De Monarch. c. vii, viii). And it could not be otherwise, for the thesaurus, that basis of indulgences, the product of the "merita Christi et sanctorum, quatenus haec satisfactoria sunt," is alone "morunt theologio omnes opera bona esse meritaria, impetratoria, et satisfactoria." Thus the opera supererogatoria consist of the superabundant merits which are proximately applicable to those who need it in the form of indulgences. "Les bonnes œuvres de tous les hommes, le sang des martyrs, les sacrifices et les larmes de l'innocence s'accumulent sans relâche pour faire équilibre au mal. L'action de grâce, la prière, les satisfactions, les secours, les inspirations, la foi, l'espérance et l'amour circulent de l'un à l'autre comme des fleuves bienfaissants" (De Maistre, Soirées de St.-Pétersbourg).

This doctrine of the opus supererogatorium was attacked by Wycliffe (Dist. p. 207), and sharply criticised by John Hus (Adversus Indulg. c. iii, 8). On the other hand, Ranke (Hist. der Reformen) may quote in Melanchton (Loc. De Satisfactione) and Calvin (Inst. iii, 5). It was afterwards treated by Chemnitz (i, De Bosnip. qu. 8; ii, De Indul.); Chaminard (Panaritia Cathol. lib. ii, 24, De Satisfactionibus Alem.; and Jo. Gerhard, C. Joh. v. 2, 3), Jacob Camerarius (Prop. XLI), in 1766, took the same views in the Roman Catholic Church. If Protestant polemists have occasionally failed to observe that the vicarious satisfaction of the saints does not refer to sin itself, but to the temporal consequences of sin pardoned, this has, nevertheless, not prevented them from practising a procedure which is noticed here the evident incongruity between the Roman Catholic essays on this subject and the fundamental truth of Christ's all-sufficient merits. For, admitting
the fundamental distinction made by the Thomists between meritorium de condigno and meritorium de congruo, since the merit of Christ remains still the active principle of the supererogatory merits of the saints, the latter cannot increase the value of the merits of Christ, but only the quantity or number. "Per modum cumuli ad- dicientur satisfactionibus Christi, quin ipsis uti ratioDES derogatur." The merits of others, consequently, are reversible merely as satisfactory services, not as personal moral actions, and thus are looked upon only as means of application of the merits of Christ as manifested in supererogatory works. "Non habent nisi rationem medii, quo Christi pretium nobis applicatur" (Bellarmine, De Indulgiis, l. 4, n. 4).—Herzog, Real-Encykl. e. v. See MUNUS. 

Superfrontâla, a term applied to—1. The back wall of the altar, which received either stone-reliefs or a metal covering with embossed designs and enamelandwork. 2. The modern name for a covering for the top of the altar, which commonly hangs down over six inches all round and is fringed. It is ordinarily made of silk velvet, satin, or damask, and is placed over the three white linen cloths which customarily cover and preserve the altar slab.

Superhumeral Cloth, a term used to designate the ume (q. v.).

Superhumerâlê, a term for the archiepiscopal pall (q. v.).

Superindicta were taxes imposed by the Roman emperors, beyond the ordinary canonical taxes, upon great exigencies and extraordinary occasions. The ordinary taxes were called indictions, so those extraordinary were called superindictions. From these the clergy were universally exempted by several laws of the Christian emperors.—Bingham, Christ. Antiq. bk. v, ch. III, § 8.

Superinspector, a word by which Latin writers have translated episcopus (irisco.sco), or bishop (q. v.).

Superinstitution is, in the Anglican Church, the institution to a benefice over the head of a beneficiary supposed to be dead after prolonged absence.

Superintendent. 1. The officer of the early Church who was also called presbyter, or bishop (irisco.sco). 2. The officer in the English Wesleyan Church who has charge of a circuit; he is responsible to the Conference for the maintenance of discipline and order in all the societies of the circuit, and presides as chief pastor in all circuit courts. The superintendent or one of his colleagues must make the circuit plan, arrange for the quarterly visitation of the classes, change or re-elect the stewards—the nomination being with himself, the vote with the leaders' or quarterly meetings. All the minor details connected with the management of the circuit are in his hands. 3. A specific clerical superior in several Reformed churches where episcopacy is not admitted, particularly among the Lutherans in Germany and the Calvinists in some other places. The superintendent is similar to a bishop, only his power is some what more restrained than that of our diocesan bishops. He is the district pastor, and has the direction of all the inferior pastors within his district or diocese.

Superior, an official exercising jurisdiction; the chief of a confraternity, brotherhood, sisterhood, monastery, or convent. In most orders the "superior" or other head of a convent is elected by the members of the convent, and the superiors in a province elect the provincial.

Superiores, a female superior of a convent or nunnery.

Supernatural. This is a word which is popularly used in opposition to "natural," things and events which are not within the ordinary concrete experience and knowledge of mankind being looked upon as forming part of a separate system of things and events. "That is supernatural, whatever it be, that is either not in the chain of natural cause and effect, or which acts on the chain of cause and effect in nature from without the chain" (Bushnell, Nature and the Supernatural, p. 146). St. Aiken (On the Supernatural, p. 146) gives this definition: "We may speak of whatever is supposed to be beyond the natural as supernatural. The phrase will apply not only to the divine action, but to the agency of such beings as ghosts and demons—to all such operations as witchcraft and necromancy. We may reserve the phrase supernatural to the Supreme Being and to the works performed by him, and to the objects created by him beyond the natural sphere, such as angels and the world to come. We would confine the word miracle to those events which were wrought in our world as a sign or proof of God making a supernatural interposition or a revelation to man. We must not look upon creation as supernatural, but we do look upon it as miraculous." So far as our investigation pushes out into the world of nature, we find that law and order are maintained, and every increase of knowledge reveals to us further illustrations of the assertion that "order is Heaven's first law." Belief in the supernatural does not, therefore, require us to believe in any violation of law, since the law is the principle by which starting from the order that already exists, it leads to the conclusion that "supernatural phenomena are as much the result of law as phenomena which are called 'natural.'" See MIRACLE.

Supernaturalist, a name commonly given in Germany at the end of the last and the beginning of the present century to all who believed in supernatural agency as exerted in the inspiration of the Scriptures, in the personification of the miracles thereof, and in the like, etc. Their opponents are called Antisupernaturalists.

Supernumeryary Preacher. 1. In the Methodist Episcopal Church, a "supernumery preacher is one who, because of impaired health, is temporarily unable to perform effective work. He may receive an appointment or be left without one, according to the judgment of the Annual Conference of which he is a member; but he shall have no claim upon the funds of the Church except by vote of the Conference, and he shall be subject to all the limitations of the Discipline in respect to reappointment and continuance in the same charge that apply to effective preachers. In case he be left without an appointment, he shall have a seat in the Quarterly Conference and if he desires he may attend meetings of membership in the place where he may reside" (Discipline, xviii, 1). In 1800, on motion of Dr. Coke, super-
numery preacher, their widows and orphans, were to have the same support which was then accorded to effective preachers. The funds of the Conferences increasing, as well as the advantages of membership multiplying, great difficulties arose, and in 1860 the General Conference abolished the relation so far as the Annual Conferences were concerned. In 1864 the relation was restored with the definition at present given, with the provision that no supernumery preacher shall have a claim upon the beneficary funds of the Church without a vote of the Annual Conference. In 1876 the number of supernumery preachers was reported at 701.

2. Among the English Wesleyans, in order to secure the relation of supernumery the consent must be obtained of the May District Meeting. They receive a maintenance according to the number of years they have been in the active work. This is derived from the Annuitant Society, which is in reality their own life-assurance fund, and provides, to a certain extent, for the support and education of their children. Upon entering into business they are reckoned as local preachers, after four years as supernumaries, and if members of the legal hundred, are superseded. They are under the care of the District Meeting; and if their names are on the minutes, they are members of the Quarterly, Local Preachers', and District Meetings. See Simpson, *Cyclopaedia of Methodism*, s. v.

**Superpellie** (or *Superpellium*), a surplice (q. v.).

**Superpositio**, a word used in the ancient Church to designate a fast, which lasted not only through the day, but till the morning of the following day, or for several days together, as was usual in the Passion week. The stations, or fasts on stationary days, terminated at three o'clock in the afternoon. See FASTING; STATION.

**Superpurgation**, purgation or cleaning beyond what is needed.

**Super-slab**, or SUPER-TABLE. See ALTAR, PORTABLE.

**Superstition** (στοάσσιεν, demon-terror). Festus, governor of Judea, informed Agrippa that Paul had disputed with the Jews concerning matters of their own superstition (Acts xxv, 19), in which he spoke calculatedly to irritate the Christian religion and of the Jewish. Paul, writing to the Colossians (ii, 23), recommends to them not to regard false teachers, who would persuade them to a compliance with human wisdom in an affected humility and superstition; and, speaking to the Athenians, he says, "I perceive that in all things they are too superstitious (Acts xxi, 22). The heathen idea of religion has always been one of terror. A superstitious man looks on God as a severe and rigid master, and obays with fear and trembling. Varro says the pious man honors and loves God, the superstitious man dreads him, even to terror; and Maximus Tyrius observes that a man truly pious looks on God as a friend full of goodness, whereas the superstitious serves him with base and mean familiarity. In the New Test., however, the word "superstition" or "superstitious" is used in a less offensive sense. Festus, a governor newly arrived in his province, would hardly have paid so ill a compliment to Agrippa, a king of the Jewish religion, as to call his religion superstitious; and when Paul at Athens tells the Areopagites that they are too superstitious, he uses a word no doubt susceptible of a good as well as of a bad sense, as it would have been highly indecorous, no less unnecessary, to call the Athenians, from their various and diversified views of possessed persons (q. v.). A special instance has been found in the case of Azael (q. v.); also in the satyr (q. v.) and the night-monster (q. v.). See also *SPECTRE*.

The modern Mohammedans are given to superstitions. Those of Egypt may be found in Lane's *Modern Egyptians*, i, 392, 336, 376; ii, 283, 308, 312. In Palestine the peasantry have numerous superstitions: they believe in incantations, in charms, in divination by sand and other means, and in the evil eye, their children being left purposely dirty, or even besiddled, in order to avoid the consequences of an envious look. The belief in spirits is also general. These include, first, the Jan, or powerful demon, good or bad, the latter kind having for bodies the tall smoke-pilar of the whirlwind, so commonly seen in summer; secondly, the Aführt, who is seemingly equivalent to a ghost; thirdly, the ghoul or bag of the dead; which species of creature is haunted by one of these demons is carefully avoided, or at least never approached without the most polite salutations, intended to appease the unseen spirit; fourthly, there are Kerdil, or goblins, whose name is akin to the Arabic word for monkey; lastly, there is the Shaitan, or Satan, a term applied to human beings of an evil disposition (Condor, *Tent Work in Palest.*, ii, 283). See *DEMON*.

On the general subject, see Xavier, *De Superstitione Judaeorum*. (Hamb., 1720); Reinecus, id. (pref. to Christian's *Würker* [Leips., 1705]); Spinellos, *Deo-browsia Ebron-gentilis* (Ibad., 1698); Manzeli, *De voce Damasculaqua* (Rost, 1758); and the monographs cited by Danz, *Wörterb. s. v.* "Abergläube." See *WITCH*.

**SUPERSTITION** (Lat. *superstitio*) had for its ancient sense that of worship over and above that which was appointed by popular authorities. Hence religious systems not recognized by the Roman State were called "superstitions," Christianity itself being for centuries among the number. The word has been used so indefinitely that it is difficult to determine its precise meaning. It does not seem always to have been used in a bad sense, as in the English use, where the word "superstitious" (Acts xvii, 22), where it represents *στοάσσιεν*, a word used by the apostle as indicating that the Athenians were a God-fearing people who would not refuse to listen to his appeal about the "unknown God." Superstition must not be understood to mean an "excess of religion," as if any one could have too much of true religion, but any misdirection of religious feeling, manifested either in showing religious veneration or regard to objects which deserve none—that is, properly speaking, the worship of false gods—or in an excess of veneration for an object deserving some veneration, or the worship of God through the medium of improper rites and ceremonies (Whately, *On Bacon*, p. 155). It is generally defined to be the observance of unnecessary and uncommanded rites and practices in religion; reverence of objects not fit for worship; too great nicety, fears, or scrupulousness; or extravagant devotions; or religion wrong directed or conducted. The word may be applied to the idolatry of the heathens, the traditions of the Jews, the unscriptural rites of the Catholics; to the dependence placed by many on baptism, the Lord's supper, and other ceremonies. It may be extended to those who, without any evidence, believe that prophecies are still uttered or miracles are performed, and hold to the predestined scepticism about superstition of a far more dangerous kind than that involved in the credulity of ignorant piety, as belief in witchcraft, magic, table-turning, spirit-rapping, etc.

Superstition, says Claude, usually springs either (1) from servile fear, which makes people believe that God
SUPER TOTUS

is always wrathful, and invents means to appease him; or (2) from a natural inclination we all have to idolatry, which makes men think they see some ray of the Divinity in extraordinary creatures, and on this account worship them; or (3) from hypocristy, which makes men willing to discharge their obligations to God by grimace and by zeal for external services; or (4) from presumption, which makes men serve God after their own fancies.

SUPER TOTUS, a long garment like a modern great-coat, resembling a straight-cut cloak in some particulars, worn over the secular and religious dress in mediaval times as a protection against the weather.

Superville, Daniel Dr., a Protestant theologian, was born at Saumur, in August, 1657, of a respectable Dutch family, and, being early designated for the sacred ministry, studied theology at Saumur and Geneva, and in 1688 was called to take charge of the Church of Loulon. On the Revocation of the Edict of Nantes, he took refuge in Rotterdam, whence he could not be drawn by offers from Berlin, Loulon, and Hamburg. In 1691 the authorities of the city created for him an express pastorate, which he occupied till his death, June 9, 1728. He was of a sweet disposition, a lively imagination, and a happy delivery. He published several sermons and devotional works, which are enumerated in Hoefer, Nouv. Biog. Générale, s. v.

Supervisor Cantorum, the master of the choristers.

Supervisor Opiris, the superintendent of works, also called magister operis.

Suph (Σϕ, a sea-weed [see FLAG], Jon, ii, 6) is the characteristic epithet of the Red Sea (q. v.), which abounds in sedge (Exod. x, 19, and often). In one passage (Deut, i, 1) it has been supposed by some to designate a place, but no locality of that name has been discovered, and most interpreters (with the Sept. and Vulg.) understand it there to stand for the Red Sea (by the omission of εκ, sect.). So in Num. xxxi, 14, περι, suphâd (Sept. Zoph); Vulg. Mare Rubrum), some think a place (perhaps the same) to be indicated, but others with better reason render the word as an apppellative, storm, i.e. violence (as in Job xxxi, 18, and elsewhere).

Supper διπτόν (Mark vi, 21; Luke xiv, 12, 16; John xii, 2, etc.; sometimes rendered “feast”), a word used indifferently in the Homeric age for the early or the late dinner, with special meaning being the principal meal. In later times, however, the term was applied exclusively to the late meal—the διπτόν of the Homeric age. It was the chief meal of the Jews, and also of the Greeks and Romans, being taken towards or at evening, after the labors of the day were over (Matt. xxvi, 6; Mark xii, 39; Luke xx, 46). In the New Test, it is also specially spoken of the paschal supper (John xiii, 2; iv, 21, 20), and of the Lord’s supper (1 Cor. xi, 20); and of any meal (ver. 21); metaphorically of a marriage-feast, as figurative of the Messiah’s kingdom (Rev. xix, 5); and of heaps of the slain as a feast (2 Kings vi, 27). See Sup.

A modern Oriental supper-party is thus described by Lamartine: “Our apartments consisted of a pretty court, decorated with Arabic pilasters, and with a spout- ing fountain in the centre falling into a large marble basin; round this court were three rooms and a divan, that is to say, a chamber larger than the others, formed by an arcade, which opened on the inner court, and which had neither door nor shutters to close it. It is a place of transition between the house and the street, serving as a garden to the lazy Mussulmans, its motionless shade supplying for them that of the trees, which they have neither the industry to plant nor energy to go and seek where nature herself causes them to grow. Our rooms, even in this magnificent palace, would have appeared ruinous to the poorest hut of our peasants; the windows had no glass, an unknown luxury in the East, notwithstanding the rigor of winter in these mountains; no beds, tables, or chairs; nothing but the naked walls, mouldering and riddled with rat and lizard holes; and as a floor, the beaten clay, uneven, and mixed with chopped straw. Slaves brought mats of rush, which they stretched upon this floor, and Damascus carpets, with which they covered the mats; they afterwards brought a small table of Bethlehem manufacture, made of wood, encrustured with mother-of-pearl. These tables are not half a foot either in diameter or in height; they resemble the trunk of a broken column, and are not capable of holding more than the tray on which the Mohammedans place the five or six dishes which compose their repasts. Our dinner, which was served on this table, consisted of a plan, a dish of sour milk mixed with oil, and certain gourds like our cucumbers, stuffed with hashed mutton and boiled rice. This is, in fact, the most desirable and savoury food which one can eat in the East. No knives, spoons, or forks; they eat with the hands: but the repeated ablutions render this custom less revolting for the Mussulmans.” See EAT.-ING.

SUPPER OF THE LORD (Χειρακίων διπτόν), so called by Paul in his historical reference to the Passover supper as observed by Jesus on the night in which he was betrayed (1 Cor. xi, 20, Matt. xxvi, 20-31).

I. Scriptural Statements.—Several controverted points may perhaps be best adjusted by a connected harmony of the last Passover of the Lord, constructed from the evangelic narratives alluding to it, but filling up the various omitted circumstances from the known Passover rites. See PASSOVER.

“My son, if thou wilt receive my counsel, put thine ear unto my words” (Prov. vii, 1). We thank thee, O God, our Heavenly Father, who hast created the fruit of the vine. Considering the
peculiarity of the circumstances, and the genius of the new dispensation about to be established — that the great Teacher had already declared the superiority of spiritual gifts to those of the human body, and that his disciples alone were present on this occasion — it may be supposed that, after the blessing over the herbs, the recital of the liturgy (or ἡ γυαλ- δα) explanatory of the redemption of their ancestors from Egyptian bondage would be somewhat simplified, and perhaps accompanied with new reflections.

Then probably the second cup of wine was mingled, and with the flesh of the paschal lamb, feast-offerings, and other viands, placed before the Lord. "And he said unto them, With desire have I desired to eat this Pascha with you before I suffer; for I say unto you, I shall no more eat thereof until it be fulfilled in the kingdom of God. And he took the [second] cup, and gave thanks, and said, Take this, and divide among you, for I say unto you, I will not henceforth drink of the fruit of the vine until the kingdom of God shall come" (Luke).

When the wine distributed to each would be drunk off, one of the unleavened cakes would next be broken, the blessing said over it, and a piece distributed to each disciple, probably with the usual formula — "This is the bread of affliction which your fathers did eat in the land of Egypt," i.e. not the identical bread, transsubstantiated, but a memorial or sign of it. The company would then proceed with the proper supper, eating of the feast-offering, and, after a benediction, of the paschal lamb.

The translation of the phrase δείσιν γεωμονίν (which immediately follows) by "supper being ended" has much confused the various narratives, and led Jewish thinkers to think that Judas was present at the Lord's supper, properly so called. The true reading probably is γεωμονίν (not γεωμονίν), as understood by the Arabic and Persian translators, in the sense "while supper was about over" or "during supper-time."

"And as they were at table, the devil having now put it into the heart of Judas to betray him; Jesus, knowing that the Father had given all things into his hands, and that he was come from God, and was going to God, riseth from supper; and," after due preparation of the wine, proceeds to wash the disciples' feet (John). After this striking symbolic exhibition to humility and mutual service (John xiii, 6-20), "Jesus was troubled in spirit, and bare witness, and said, Verily, verily, I say unto you, that one of you will betray me. Then the disciples looked on one another, doubting of whom he spake" (John). "And they were very sorrowful, and began to say one unto another, Lord, is it I?" (Matt.). "One of the disciples, leaning back on Jesus' breast, saith unto him, Lord, is it I?" Jesus answered, He it is to whom I shall give a sop, when I have dipped it. And after dipping the sop he gave it to Judas Iscariot. Then Satan entered into him. Jesus saith unto him, What thou dost, do quickly. He then, on taking the sop, went immediately out; and it was night" (John).

The supper would then proceed until each had eaten sufficient of the paschal lamb and feast-offerings.

"When the Greek Church kept the Passover, the other unleavened cake left unbroken, and blessed God "bless and brake it, and gave it to the" eleven "disciples, and said, Take eat; this is my body (Matt., Mark), which is broken for you: this do in remembrance of me" (Luke, Paul, 1 Cor. xi, 24). The other house churches, the Jewish church, and the disciples were usually washed the second time, and the third cup, or "cup of blessing" (1 Cor. x, 16) prepared, over which the master gave thanks for the covenant of circumcision and for the law given to Moses. Jesus, therefore, at this juncture announced, with peculiar appropriateness, his presence as the Bridegroom, and the solemn institution of the Holy Communion.

"After the same manner, also, Jesus took the cup after supper, and, having given thanks, gave it to them, saying, Drink all of you out of it; for this is my blood of the new covenant, which is shed for many for forgiveness of sins (Matt.); this do, as oft as ye drink, in remembrance of me. For the Lord's supper shall be until he comes unto you, I shall not drink henceforth of this fruit of the vine, until that day when I drink it new (eκαύω) with you in my Father's kingdom" (Matt.).

"And when they had sung a hymn" (Matt.), probably the Hallel, our Lord discoursed long with his disciples about his approaching death and departure (John xiii, 31; xiv, 31); and when he had finished he said, "Aise, let us go hence." "And they went out on to the Mount of Olives" (Matt.).

II. Ecclesiastical Usage. — A multitude of disputes and controversies have existed in the Church, from the earliest ages, about the observance, and the nature, of the elements of the Lord's supper. On these points the reader may consult the following works: Pierce, Waterland, Cudworth, Hooalley, and Bell, On the Eucharist; Orme, Lord's Supper Illustrated (Lond, 1632); Goodman, On the Eucharist (ibid. 1841); Coleman, Christ's Antig. Halley, On the Sacraments (ibid. 1845); De Linde and Mearns, Prize Essays on the Jewish Passover and Christian Eucharist (ibid. 1845).

The early Church appears, from a vast preponderance of evidence, to have practiced communion weekly, on the Lord's day.

The custom which prevailed during the first seven centuries, of mixing the wine with water, and in the Greek Church with hot water, appears to have originated with the ancient Jews, who mingled their thick wine with water (Mishna, Terumoth, x). Maimonides (in Chomets re-Mutshah, § vii) states that the proportion of pure wine in every cup must not be less than the fourth part of a quart of a hin, besides water which must needs be mingled, that the drinking of it may be the more pleasant. The raisin-wine often employed both by the ancient and modern Jews (Arbok Turim, § 483, date 1900) contains water of course. Remnants of this custom are still traceable in the East. The Nestorian Christians, as late as the 16th century, as we find from the old travellers, celebrated the eucharist in such wine, made by steeping raisins one night in water, the juice being pressed forth (Osiourus, De Reb. Emanuel, lib. iii, De Rec. ii, &c., Oeder, Brevarium, ap. Ha- mas, i, 318; Baudissin, On the Distribution of Languages [1622], p. 147). The Christians of India (said to be converted by St. Thomas) used raisin-wine, as also do some of the Syrian churches at the present day (Ross, Panasbeia [1685], p. 492; Ainsworth, Travels in Asia Minor [1823]). The Patriarch of Braga would not permit the use of the pure "fruit of the wine," for they condemned as heretics "those who used no other wine but what they pressed out of the clusters of grapes, which were then presented at the Lord's table" (Bingham, Christ. Antig. bk. v, ch. ii). The wine used by our Lord was of course fermented, as no other could have been procured at that season of the year, and as it seems to be contrasted with the new wine of the heavenly kingdom (Matt. xxvi, 29). See WINE.

As regards the bread, many of the Eastern churches use unleavened bread in the communion. The Greek Church uses bread leavened by yeast, but the Roman Church has it unleavened; and this difference has been the cause of much controversy, though it seems easy to decide which kind was used by Jesus, the last supper having been on one of the 'days of unleavened bread,' when no other kind could be eaten in the land of Judaea.

The ancient church fathers write about the nature of the elements, but use the ordinary bread, as well as wine, of the country. It was probably from regarding in a similar way the bread and wine as mere ordinary beverage that some of the ancient sects gave up the wine altogether, and substituted other things. (See HERCULANUM, Hesperia, &c. (Hercules, 26)) mention an ancient sect of Christians in Phrygia, called Artotyrites, because they used bread
SUPPLICATIO

and cheese. Others made use of bread and water only; and the third Council of Braga (A.D. 673) condemns a custom of communicating in bread and milk. See LORD'S SUPPER.

Supplicatio, a solemn thanksgiving or supplication to the gods among the ancient Romans, on which occasion the temples were thrown open, and the statues of the gods carried on couches through the public streets that they might receive the prayers of the people. A supplicatio was appointed by the senate when a victory had been gained, or in times of public danger and distress.

Supplicatio of Beggars is a book which appeared mysteriously in London about A.D. 1027, setting forth the rapacity and licentiousness of the clergy. It eventually came into the hands of Henry VIII, who, after hearing it read, said, "If a man should pull down an old stone-wall, and begin at the lower part, the upper part might chance to fall upon his head," thus broadly intimating that the clergy were the foundations of the rotten old Church, and should be an attempt both to reform them, the whole structure would tumble down. See Burchard, Hist of Congregationalism, i, 36.

Supplication of Commons is a notable book published in 1546, with the full title of A Supplication of the Poor Commons to the King. It was a sort of counterpart to the Supplication of Beggars, and made complaints against the character and conduct of the clergy, especially of the monks. See Strype, Memoirs, i, 608-621; Burchard, Hist of Congregationalism, i, 33.

Supplicationes (Gr. ἐρωτήσεις), in its original signification, is but another name for prayers in general, of whatever kind, that either were made publicly in the church or by any private person. The term is applied both to litanies and short prayers, with brief petitions and responses. See TITANY.

Supralapsarians, persons who hold that God, without any regard to the good or evil works of men, has resolved, by an eternal decree, supra lapsum, ante-cedently to any knowledge of the fall of Adam, and independent of it, to reject some and save others; or, in other worlds, that God intended to glorify his justice in the condemnation of some, as well as his mercy in the salvation of others; and for that purpose decreed that Adam should necessarily fail. See SUBLAPSARIANS.

Supramanya, a Hindū diva, son of Siva, and sprung from the eye in the forehead of that god. He fought the giant Sura Parma, and with the most powerful weapon of his father split him in two, after seven days of battle. The festival Kandherasha is celebrated in his honor.

Supremacy, Papal. The papists claim for the See of Rome, represented in the person of the pope, "a principality of power over all others, as the mother and mistress of all Christian churches;" and all other patriarchs are required to receive their palms from the Roman pontiff. This doctrine is chiefly built on the supposed primacy of Peter, of whom the pope is the pretended successor; a primacy so far from being countenanced by Scripture that we find it there absolutely forbidden (Luke xxii, 24; Mark i, 35). The authority of the Roman See was first recognised by the fourth Lateran Council, A.D. 1215, and was first protested against by the authors of the Reformation. The title of "mother of churches," claimed by the Church of Rome, must certainly belong to the Church at Jerusalem, and was given to that Church by the second Council of Constantinople, A.D. 381. See PRIMACY.

SUPREMACY, ROYAL. In the Church of England all ecclesiastical jurisdiction is annexed to the crown; and it is ordained that no foreign potentate shall exercise any power, civil or religious, within the limits of that kingdom. Canon ii of the Church of England says:

"Whosoever shall hereafter affirm that the king's majesty hath not the same authority in causes ecclesiastical that the godly kings had among the Jews and Christian emperors of the primitive Church, or impeach any part of his regal supremacy in the said causes restored to the crown, and by the laws of this realm therein established, let him be held a schismatic and pestilent fellow, and not restored, but only by the archbishop, after his repentance and public recantation of those his wicked errors."

In the United States, of course, no supremacy or interference in spiritual affairs on the part of the civil authorities is recognized.

Súr (Heb. סֵּרוּ, removed, as in Isa. xiii. 21; Sept. סִּיחָא, סִּיחַ, Sür), the name of one of the gates of the Temple at Jerusalem (2 Kings xxiii. 6); called in the parallel passage (2 Chron. xxix. 5) "the gate of the foundation," הֵרָדָה, yerod (which is the preferable rendering), being apparently that which led across to Zion by the causeway or bridge. See TEMPLE.

Súr (Σωρή; Vulg. omits), one of the places on the sea-coast of Palestine, which are named as having been disturbed at the approach of Holofernes with the Assyrian army (Judith ii, 28). It cannot be Tyre, the modern Sür, since that is mentioned immediately before; or, as suggested Dor, otherwise Sóra, mentioned by Stephanus of Byzantium as in Phoenicia, which they would identify with Athlit; others, again, Strýfend. But none of these are satisfactory. The apocryphal character of the book itself makes us suspicious of the accuracy of the name. See JUSTRY.

Sura Deva, in Hindū mythology, is the goddess of wine, who sprang out of the milk-sea when the mountain Mandar was cast into it, in order to prepare the drink amrita.

Sura Parma, in Hindū mythology, is the giant with whom Supramanya (q. v.) fought. After he had been cut into pieces by the latter, one half changed itself into a peacock, and the other half into a cock. Siva used the first as an animal for riding, and the second served as a watcher for the house in which the wagon of Siva stood.

Surcingle is a band of black silk or stuff, fringed at the ends, and bound round the waists of the clergy so as to confine and keep the cassock in place.

Surenhusius (Surenhus), WILLEM, professor of Greek and Hebrew at Amsterdam, flourished in the end of the 17th and the beginning of the 18th century. He edited a beautifully printed edition of the Masora, sine totius Hebraorum Juris, Rituum, Antiquitatum, et Legum Oraliae Systema, cum Clarissimorum Rubrumom. Maiorniath et Bartomorum Commentarius Integralis, etc. (Amst. 1690-1705, 6 vols. fol.), which has ever since remained the best edition (see WOLF, Bibli. Hebr., ii, 880). He published also Panticopaia, sine Bibliae Kardalâygî, in quo secundum Vett. Theol. Hebr. formulâs allegendâ et modos interpretandi concinnat fama e V., in N. T. allegata (ibid. 1713, 4to), a work of unsurpassed value on the subject to which it relates.

Sureties is a name given to sponsors in virtue of the security given through them to the Church that the baptized shall be "virtuously brought up to lead a godly and a Christian life." See SPONSOR.

Surety (some form of σημαίνοντας, arab, to barter, and especially to deposit a pledge, either in money, goods, or in part payment, as security for a bargain; Greek). This Surety says that they might receive the prayers of V. is usually rendered, τοικίαν, literally in margin, "those that strike (hands)," from τοικία, to strike (Genesius, Theaur. p. 1517). The phrase τοικίαν τοικίαν, τοικίαν, yea, repeated, in Cypriotes, "depositing in the hand," i.e. giving in pledge, may be understood to apply to the act of pledging, or virtual, though not personal, suretyship (Lev. vi, 2 [Heb. v, 21]). In the entire absence of commerce,
the law laid down no rules on the subject of suretyship; but it is evident that in the time of Solomon mercantile dealings had become so multiplied that suretyship in the commercial sense was common (vv. xi, 1; xi, 15; xvi, 18; xx, 18; xxii, 26; xxvi, 13). But in older times the notion of one man becoming a surety for a service to be discharged by another was in full force (see Gen. xlv, 82), and it is probable that the same form of undertaking existed, viz. the giving the hand or striking hands, as the person to whom it was due made surety for the performance of the act of service—in the commercial sense the debtor—but the person to whom it was due, the creditor (Job xvii, 3; Prov. vi, 1; Michaelis, Laws of Moses, § 151, ii, 322, ed. Smith). The surety, of course, became liable for his client’s debts in case of his failure. In later Jewish times the system had become common, and caused much distress in many instances, yet the duty of suretyship in certain cases is recognised as valid (Eccles. viii, 13; xxix, 14, 15, 16, 19). See PLEDGE.

The earliest form of suretyship mentioned in Scripture is the pledging of person for person, as when Judah undertook with his father to be surety for Benjamin (Gen. xxxvii, 2, 3. I will exchange for him, put myself in place of him, Gen. xliii, 9); and when circumstances emerged which seemed to call for the fulfilment of the obligation, he actually offered himself in the room of Benjamin. In this sense the psalmist asks God to be surety for him for good (Psa. cxxxiv, 122), as did also, in his great distress, Hannah (I Sam. i, 11), though the sense here is a little weakened in the A. V. by the rendering “undertake for me.” More commonly, however, the kind of suretyship spoken of had reference to pecuniary obligations or debts, and forms the subject of prudential advices and warnings in the book of Proverbs (vi, 1; xi, 15, xvii, 18; xx, 16). In the first of these passages the dangerous practice of entering into sureties is put in two forms—first, “if thou be surety for thy friend,” then “if thou hast stricken thy hand with a stranger;” there being no further difference between them than that the one has respect to the thing itself, the other to the mode of going about it: the person agreeing to become surety gave his hand to his friend. Hence also, in Prov. xvii, 18, a man “who strikes hands,” that is, readily becomes a surety, is declared to be void of understanding. In the highest sense the term is applied to Christ, who, in his character as mediator, is representative of humanity, and of himself, making himself responsible for all that in this covenant was required to be accomplished for the salvation of those who were to share in its provisions. See MEDIATION.

SURETY. In the ancient Church the clergy were forbidden to be bondsmen or sureties for any other man’s appearance in court, because it was thought that such sort of encumbrances might bring detriment to the Church in distracting her ministers from constant attendance upon divine service.

Surin, Jean Joseph, a French ascetic writer, was born at Bordeaux in 1600, entered the Order of the Jesuits at fifteen years of age, and soon distinguished himself by his profound piety and knowledge of human nature. In 1634 he was sent to take charge of the Ursuline convent in London, and began a series of exercises against the evil spirits supposed to prevail there, but eventually became himself the victim of the demonic possession, and was required to return to Bordeaux. In 1661 he went to London to seek out and there with partial seasons of lucidity, for many years, but was at length removed from place to place in hopes of relief. He recovered his sanity in 1658, and died at Bordeaux, April 21, 1665, leaving several works on practical religion, which are enumerated in Hoefer, Nouv. Biog. Générale, s. v.

Surinam (Negro English) Version. Negro-English, or, as it might be designated with equal propriety, Negro-Dutch, is the language of the Dutch colony of Surinam, in Guiana, and is current among a population of at least 100,000 people. Ever since 1738 there has existed in that colony a printed Press. The language is a compound of English and Dutch, with a sprinkling of Spanish, Portuguese, French, and African or Indian words. Prior to the year 1813, the greater part of the New Test. was translated into that language. In 1828 Moravian missionaries completed a version of the New Test. in Surinam in the German tongue, and was revised by Hans Wied, who for upwards of twenty years had resided in Surinam, and who expressed the opinion that the translation was "as perfect as possible." With the aid of the British and Foreign Bible Society, an edition of 1000 copies was printed in London. This edition was soon exhausted, and, as a result of these communications, more than 12,000 copies were added to the Church. Another edition of the New Test. and Psalms was prepared by the Moravian missionary Treu, and, with the aid of the Netherlands and the British and Foreign Bible societies, 2000 copies were printed in 1846. Whether the Old Test. has been translated and printed, we are not able to say. (B. P.)

Surius, Laurentius, a Carthusian monk, was the child of Lutheran, or, as others say, of Romish parents. He was born at Lubeck in 1592, and educated at Frankfort-on-the-Oder and at Cologne. At the latter place he became acquainted with Canisius (q. v.), and joined the Carthusian Order at Frankfort. He entered the Carthusian Order and devoted himself to monastic asceticism and literary labor. He displayed both zeal for Romanism and hatred for the Reformation, whose leaders he charged with having borrowed their doctrines from Mohammed. Besides translating various mystical writings by Tauler, Ruysbroeck, Suso, etc., Surius composed a Commentarius brevis Rerum in orbe gestarum ab anno 1500 (Lov. 1566). This book was designed to oppose the famous Protestant work by Steidelan (q. v.), but was devoid of any particular value; but it was, nevertheless, carried forward by Issel and others to 1673. Additional works by Surius are, Homiliae et Conspectus Prestantissimorum Excl. Doctorum, etc. (Col. 1569-76).

- Consilia Ommia, etc. (ibid. 1567); and Vitae Sacrorum ab Alexajo Lipomanno olibus Conscripse (ibid. 1570-76, 6 vols. fol.), which was repeatedly reprinted, the best edition being that of Cologne, 1618. A seventh vol. was also published. The death of Surius by the Carthusian Jacob Mosander. Surius died May 23, 1578. See Biog. Universelle, tom. xlv (Par. 1826); and Herzog, Real-Encyclop. s. v.

Surlet (de Chokier), the name of an old French family, which dates from the year 1170, and culminated in the person of Pastré Baré de Surlet, who died about 1473. The emperor Ferdinand II ennobled the family of Surlet in 1630 with the title de Chokier. The following members deserve mention here:

1. Jean, born at Liege, Jan. 14, 1571, studied at Louvain, and took his degrees at Orleans. He became canon of St. Lambert, abbé of St. Hadelin of Vise, and vicar-general of Liege, where he died 1601. He adorned himself by his zealous charity and erudition. He died about 1655, leaving several works on ecclesiastical matters, for which see Hoefer, Nouv. Biog. Générale, s. v.

2. Jean Ehenet, nephew of the preceding, became canon of Liege and abbé of Vise. He founded the house of the Iermes, begotten that of the Filles Repenties at Liege, and died about 1658.

3. Jean Frédéric, uncle of Jean, was a learned canon of Liege, who wrote Eucharidiun Pracotionum (Liege, 1636), and died March 15, 1655.

Surname. Names were at first expressive, as those of Scripture. According to Du Cange, surnames were originally written, not after the Christian-name, but above it. After 1177, however, "appelations" were denominated names. The first or Christian name is usually given at baptism.
SURPRISE

Late superpellicem, over the pelisse, a long, loose linen garment worn by clergymen of the Church of England during the performance of divine service. Surprises are also worn by the fellows of colleges or halls, and by all the scholars and students in the universities of Oxford and Cambridge upon Sundays, holidays, and even during their attendance at the college chapels or churches. It is also worn for the service of the choir. Its use dates back to an early day. Paulinus sent a lamb's wool cloth to Severus, and Ambrose complains in the canons wear, instead of cope and mozzetta (their winter habit), a sleeved surprise raised on the shoulders. The name is first mentioned by Odo of Paris and Stephen of Tournay, in the 12th century. The origin of the surprise is thus given by Durand: "It was so called because anciently this garment was put upon leather coats made of the skins of dead animals (super tunicos pellicos de pelibus mortuorum animalium fictas), symbolically to represent that the sin of our first parents, which brought man under the necessity of wearing garments of skin, was now hid and covered by the coloured and embroidered and grace." The name and color (white) signify holiness of life joined to penitence. The use of the surprise was strongly objected to by the Calvinistic and Zwinglian reformers on the Continent, and by the Puritans in England, who regarded it as a relic of popery. The argument against surprise is to be found in Thucydides, iii, 28; and its defence in Hooker, Eccles. Polity, v, 29. Much controversy has been held of late years as to the propriety of the surprise being worn by the preacher in the pulpit, which is contrary to the more general practice of the Anglican Church. The surprise (its value (q. v.) are a slight vestige of what was originally one vestment. Foreign surprises are much shorter and those used in England. In Italy the short surprise is called a cotta. See Ornament, Ecclesiastical.

Surprise-fee is a fee paid to the clergy for occasional duties. This seems to have been unknown in the ancient Church; indeed, several laws were passed by the early Church commands the gratuitous performance of all religious offices.

Surrogate is a name (meaning one substituted, or appointed in the place of another) commonly applied in ecclesiastical usage to an officer delegated by the bishop to grant licenses for marriages, probates of wills, etc., in large towns. A surrogate is, properly speaking, the deputy or substitute of the canon to which he is subject. See Sursum Corda.

In the ancient service of the Church, it was the duty of the deacon to summon each class of worshipers separately to engage in prayer by saying, "Let us pray." Other forms for announcing the time of prayer were also used, as "Give audience," "Lift your heart" (Sursum corda). This rite is described in the seventeenth chapter of the Apocryphal Constitutions, in which it is said that the high-priest or celebrant at mass says, "Lift up your hearts," and the faithful respond, "We lift them up unto the Lord." In its English form it is found in the Communion Service of the Church of England.

Surtur, in Norse mythology, is the mighty ruler of Muspelheim, the impalpable enemy of the Aesir, who, in the conflagration of the universe, will lead the armies of the sons of Muspel, join himself with the serpent Midgard and the wolf Fenrir, assail the residences of the gods, besiege all the asas in a tremendous battle, and finally bring on the overthrow of the world. See Norse Mythology.

Surprise, in Hindu mythology, is the sun (not the sungod, for that is called Indra), which in India is an object of worship as the celestial genius. He rides in a car drawn by seven green horses, whose leader is called Arun. A thousand genii are in his train, who adore him and sing hymns to him. Surya is often removed from his car, and has impressed the earth with numerous legends of his power. He has many names, among which, however, the following twelve are chief, indicating his attributes in various relations, and also measurably the months: Varuna, Surya, Vedang, Bhanu, Indra, Ravi, Gobasta, Yama, Svarna reta, Divakara, Mitra, and Vishnu (in the permanent sense of the word). Among all nations this god is the oldest, and is one of the powers of nature and especially the heavenly bodies, adored as mighty deities. See Uranolathy.

Sus, See Cranef Horse.

Susa (Ezra. xi. 3; xvi. 18). See Shushan.

Susa-chite (Chald. only in the emphat. plur., Susakkip, סֵעָסָקִי, Sept. סֵעָסָקִי, Vulg. Susanchaei) is found once only (in Ezra vi., 9, where it occurs among the list of the nations whom the Assyrians had settled in Samaria, and whose descendants still occupied the country in the reign of the Pseudo-Smerdis). There can be no doubt that it designates the Susians, either the inhabitants of the city Susa or those of the country (Susa or Susiana) of which Susa was the capital. Perhaps as the Elamites are mentioned in the same passage, and as Daniel (viii, 2) seems to call the country Elam and the city Shushan (or Susa), the former explanation is preferable. See Shushan.

Susa'na (Susa'na v. r. Susa'na; i.e. סָעָסָנָא, Shoshannâd, a lady (q. v.), the name of two females in the Bible. The name likewise occurs in Diod. Sic. as that of a daughter of Ninus (ii, 6), and Sheshonk (1 Chron. ii. 22) is the same origin and meaning (Gesen. Thesaur. s. v.).

1. The heroine of the story of the Judgment of Daniel in the Apocrypha, otherwise called Susanna, The History of, being one of the appendices to the canonical book of Daniel. See Daniel, Apocryphal Additions to.

2. Title and Position. — This Apocryphal piece has different titles. Sometimes it is called (Susa'na) Susanna, sometimes (Δανιήλ) Daniel, and sometimes (Δανιήλ Σουσανά) The Judgment of Daniel. Equally uncertain is its position. The Vet. and Alex. MSS. and the Septuagint place it before the 42nd chapter of Daniel, while the Sept., after the Cod. Chisianus and Theodotion, ed. Compl., put it after ch. xii.

3. Design. — The object of this attractive story is to celebrate the triumph of womanly virtue over temptations and dangers, and to exalt the wisdom of Daniel in saving the life of the pious heroine. Chrysostom rightly sets forth the beautiful lesson of chastity which this story affords, when he says, "God permitted this trial, that he might publish Susanna's virtue and the others' inconstancy; and, at the same time, by her exemplary conduct, give a pattern to the sex of the like resolution and constancy in cases of temptation." (Sermon, de Susanna). The story of Susanna is therefore read in the Roman Church on the vigil of the fourth Sunday in Lent, and in the Anglican Church on Nov. 22.
SUSANNA

3. Character, Author, Date, and Original Language.

Though the form of this story, as we now have it, shows that it is greatly embellished, yet there is every reason to believe that it is not wholly fictitious, but based upon fact. The paronomasias in Daniel's examination of the elders, when he is represented as saying to the one who affirmed he saw the crime committed,  הַנָּא הָאָא קֹדֶם, under a ma'ath-tree, "the angel of God hath received sentence of God,  כֹּלָא כְּלָא שֶׁכֶּלֵּא, to cut thee in two;" and to the other, who asserted he saw it committed,  הַנָּא הָאָא קֹדֶם, under a kohen-tree, "the angel of  לְדָעָה יִתְנַחְנָל, with the sword,  כְּלָא כְּלָא שֶׁכֶּלֵּא, to cut thee in two," only prove that the Greek is an elaboration of an old Hebrew story, but not that it originated with the Alexandrine translator of Daniel. The Song of Solomon may have suggested material to the author. The opinion of Eusebius, Apolliniarius, and Jerome, that the prophet Habakkuk is the author of the History of Susanna is evidently derived from the Greek inscription of the History of Bel and the Dragon. See APOCRYPHA.

2. One of the women who ministered to our Lord's personal wants out of their private means (Luke viii, 2, 3). A.D. 28.

SUSANNA was held by the ancient Church to be a symbol of resurrection, and also a type of the persecuted Church—two elders representing the pagans and the Jews. Representations of her are frequently found in France, in cemeteries, on sarcophagi. She is sometimes standing between two old men, sometimes between two trees behind which the men are hiding. Sometimes she is represented as a lamb between a fox and a leopard. In France she still appears as the representative of the Christian Church, the persecutors being Arians, Goths, and Vandals.—Martigny, Dict. des Antiq. Chrét. a.v.

Susceptöræ (receivers), a term applied—1. To deaconesses, who assisted in undressing and dressing candidates for baptism, in anointing, and the like. 2. To sponsors, with special reference to the services rendered immediately before and after the rite of baptism.

Su'ni (Heb. סְנִי, סְנִי, horsemam; Sept. Σανι), the father of Gaddi, which latter was the commissioner from the tribe of Manasseh to explore Canaan the first time (Numb. xiii, 11). B.C. ante 1657.

Susil, Franz, a Roman Catholic divine, was born in 1801 at Neu-Rausnitz, near Austerlitz. In 1827 he received holy orders, and in 1837 was appointed professor at Brünn. He died June 1, 1868, at Brünn, in Moravia. Susil was one of the most prominent theologians and poets of Moravia. Of his works, which are all written in the Czechian language, we mention the Works of the Apostolic Fathers (1837, and often) ;—Ecclesiastical Hymns (1846; 2d ed. 1859) ;—and a Commentary on the Apocalypse (3 vols. See Literature.) Hand- weiser für das katholische Deutschland, 1868, No. 69, p. 307 sq. (B. F.)

SUSO, Heinrich, a Mystic, was born March 21, 1300, at Constance. His real name was Von Berg; but, having been greatly influenced by the tender piety of his mother, who was named Germanus, in his eighteenth year, caused him to seek satisfaction for his soul in inward peace. He had been a student at Constance and Cologne, and now was strongly influenced by Master Eckart; but imagination and feeling were more powerful with him than the speculative faculty. His mysticism required a concrete form in which to clothe the idea, and such he found in the "wisdom" of the writings of Solomon. Identifying this "eternal wisdom" now with Christ and again with the Blessed Virgin, he expounded upon it his love and the devotion of his life. He graved upon his breast, with an iron pencil, the name of Jesus. Having returned to the Convent of Constance, he gave himself to solitary mortifications, and had many visions. While there he also wrote his (German) book On the Eternal Wisdom, in 1338, which was designed to teach pious souls how to imitate Christ in his sufferings. Having reached the age of forty, he concluded his penances and became a preacher, or, as he phrased it, a "knight of God," and his labors were largely beneficial to the community. He entered into relations with other mystical teachers, especially Tauler and Heinrich von Nördlingen. He induced many noble ladies to devote themselves to a quiet and charitable life, aided in the formation of organizations of the Friends of God (q.v.), and founded a Brotherhood of the Eternal Wisdom, for which he composed a rule and a number of prayers. These labors exposed him to criticism and even dangers. He was even accused of disseminating the heretical teachings of the Brothers of the Free Spirit (q.v.), In his latter days he was chosen prior of his convent. Soon afterwards he related the history of his inner and outer life to his friend the nun Elizabeth Stüglin, and she wrote the narrative without his knowledge; but it was subsequently revised and completed by his hand, and received into the collection of his works as the first. Part second was the book of Eternal Wisdom; part third, his book of Truth, like the other in dialogue form, and intended to satisfy the inquiries of a disciple of the truth. The conclusion consists of several miscellaneous letters. Suso died Jan. 28, 1365, in the Dominican convent at Ulm. His writings evince no connection system. His matter is generally borrowed, and only the imaginative, romantic style is peculiar to him. His fundamental idea is that of Eckart, that being forma the highest conception, and that being is God. All created being is a mirror of God, and to recognize God in this mirror is its specification. No name can express the idea of God. He is equally "an eternal nothing" and the "most essential something;" he is a "ring whose centre is everywhere and whose circumference is nowhere." To gaze upon God is the highest joy. Creatures are eternal in God as their "Exemplar," and they have no distinguishing qualities until after their "out-flow" from God, when they have entered into the creature state. They all have the yearning to return into their original and restore the interrupted unity. Similar is Suso's representation of the Trinity. The Son is the Eternal Lord which proceeds from the Father and the love which reunites them in the Holy Spirit. The sustained human soul can find no other way to God than Christ, and more particularly than the imition of his sufferings. The distinction between Creator and creat-
SUSPENSION

ure never ceases, however; so that, despite his mystical spirit, Suso does not cross the line where the pantheistic blending of the created and the Eternal Spirit begins. Suso was, in brief, the representative of poetic mysticism—a real poet, who is unable to apprehend an idea without clothing it in symbolic form; and he was in no true sense a member of the Cistercian or any practical man of affairs. Suso's writings appeared at Augsburg, 1482 and 1512, fol. Diepenbrock published them in 1829 at Rat-Indian (2d ed. 1838); in Latin, by Surius (q. v.), 1553 and often. From the Latin they were rendered into French and Italian, and even into German again. A book which, according to the Rule of Saint Benedict (c. 422), which was long attributed to Suso, was written in 1392 by the Sarsburger Rulman Merwin.—Herzog, Real-Encyklop. s. v.

SUSPENSION, an ecclesiastical act of two kinds: 1. One of the several sorts of punishment inflicted upon offending members of the clergy. This relates either to the revenues of the clergyman or to his office, and hence is called suspension a beneficio and suspension a officio. Suspension from benefice deprives the offender of the whole or a part of his revenue. Suspension from office is various: a) ad ordines, where a clerk cannot exercise his ministry at all; b) ad officio, where he is forbidden to exercise it in a particular place. In all cases the incumbebt is retained his order, rank, and benefice in distinction to the penalties of solemn deposal and degradation, by which he forfeits all rights of his order and benefice. All persons who can communicare can suspend. Suspension must be preceded by a monition, and its cause must be stated in the formal act: "Forasmuch as you have been proved to have committed such and such things, therefore we suspend you from the office and execution of your orders." Every act of jurisdiction, such as absolution, is null and void during suspension, if it has been publicly announced; but the ministration of baptism or confirmation is valid. Suspension is removed by absolution, by revocation of the sentence, by expiration of its time, and by dispensation. 2. The other sort of suspension, which extends also to the laity, is suspension from entering a consecrated building, church, or chapel, or from hearing divine service, "commonly called mass," and from receiving the holy sacrament; which, therefore, may be called a temporary excommunication. See André, Du Droit Canonic, i, 943; ii, 1110; Maillane, Du Droit Canonic, v, 352; Blunt, Dict. of Doctrinal Theology, s. v.; Riddle, Christ. Antiqu. p. 342.

Suspicion consists in imagining evil of others without proof. It is sometimes opposed to charity, where there is no fear of evil. A suspicious temper causes worry in the bud every kind affection; it hardens the heart, and estranges man from man. What friendship can we expect from him who views all our conduct with distrustful eyes, and ascribes every benefit we confer to artifice and stratagem? A candid man is accustomed to view the characters of his neighbors in the most favorable light, and is like one who dwells amid those beautiful scenes of nature on which the eye rests with pleasure. On the contrary, the suspicious man, having his imagination filled with all the shocking forms of human falsehood, deceit, and treachery, resembles the traveller in the wilderness who discerns no objects around him but what are either dreary or terrible; caverns that open, serpents that hiss, and beasts of prey that howl." See Barrow, Sermons; Gisborne, Sermons; Dwight, Theology; James, On Charity.

Sustentation Fund. 1. English Wesleyan. A fund formed in the several districts which has for its object the raising of such an amount in each district as, being divided among the poorer circuits, will secure to their preachers a much larger salary than could be paid them without supplementary aid. The whole is under the supervision of Conference. 2. Free Church of Scotland.—A fund provided for the support of ministers of that Church. The idea was probably derived by Dr. Chalmers from the Wesleyans; and a scheme was devised by him and made public before the Disruption, and is now carried into operation throughout Scotland. The amount of this fund for 1873 to 1874 was £152,112.

Sutcliffe (or Soutcliffe), Matthew, an English divine, was educated at Trinity College, Cambridge. In 1886 he was installed archdeacon of Taunton, and on Oct. 22, 1886, confirmed dean of Exeter. He died in 1899. He acquired some celebrity by his College of Polenives Divines, which came to naught shortly after his death. Among his works are, A Treatise of Ecclesiastical Discipline (Lond. 1851, 4to);—De Presbyterio, eque Nova in Ecclesia Christiana Politica (ibid. 1851, 4to);—De Ecclesiis et Orthodoxa Christi Ecclesia (ibid. 1852, 2 vols.);—De Pontificis Injusta Dominations in Ecclesia, contra Bellarminum (ibid. 1859, 5 vols.);—De Turco-Papismo, or Resemblance between Mahometanism and Popery (ibid. 1859, 5to);—De Purgatorio, etc. (ibid. 1859, 4to);—De Vera Christi Ecclesia (ibid. 1860, 4to);—De Misia, aduersus Bellarminum (ibid. 1860, 4to);—De Indulgentiis et Jubilo (ibid. 1866, 2 vols. 8vo). See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Chalmers, Biog. Dict. s. v.

Sutcliffe, Robert Burns, a minister of the Methodist Episcopal Church, was born in Yorkshire, England, in 1815, and came to America in 1835, settling in Trenton, N. J. He was sent to Europe in 1854, to attend the New Jersey Conference, and was actively employed up to the time of his death, which occurred at Vincentstown, Feb. 18, 1874. See Minutes of Annual Conferences, 1874, p. 30.

Suthdure (Sax. south door), the place where canonical purgation was performed. When a fact charged against a person was unproved, the accused was brought to the south door of the parish church and, in the presence of the faithful, made oath of his innocence. This is one reason why large south porches are found in ancient churches.

Suthre Shahis, a division of the Sikhs in Hindustan whose priests may be known by particular marks. Thus they make a perpendicular black streak down the forehead, and carry two small black sticks, each about half a yard in length, with which they make marks in the presence of the faithful, made oath of his innocence.

Suthren, Joseph Walworth, a Presbyterian minister, was born at Sweden, N. Y., in 1825. He entered Hamilton College, and graduated in 1847; after which he entered the Union Theological Seminary, in 1848; from whence he graduated in 1851. He was ordained with a view of his entering the foreign field as missionary, and on Nov. 7, 1851, departed, to Mysore, in the Turkish empire. His service was brief, as he had not but scarcely begun his labors when he was called to the heavenly world.

Sutphen, Morris Crater, D.D., a Presbyterian minister, was born Dec. 1, 1837, at Bedminster, N. J. He united with the Church Aug. 16, 1855. He graduated from Princeton College in 1856. After teaching in a private school in Virginia, he entered the Theological Seminary, from whence he graduated after a three years' course. In both college and seminary he gained a high position as a scholar. He was licensed by the Presbytery of Elizabeth-town, at Railway, N. J., and on May 1, 1860, was ordained by the Presbytery of Philadelphia, and installed as collegiate pastor of the Spring Garden Church in that city, to serve as co-pastor with the venerable John McDowell, D.D., at whose death, Feb. 18, 1865, he became sole pastor. After a pastorate of great fidelity and fruitfulness, in which he became quite popular, he became collegiate pastor with
the venerable J. McElroy, D.D., of the Scotch Church in New York, and was installed April 29, 1886. He was assigned to work in 1872, on account of apophasis, which a journey to Europe failed to remedy. After his return he spent a winter in Florida, and made an effort to supply the pulpit of the Jacksonville Church, but was obliged to relinquish it. Returning to the North, his health continued to fail, and he died at Morristown, N. J., June 18, 1873. Dr. Sutphen was a talented, popular, and useful preacher, a man of genial spirit, a Christian gentleman, a laborious pastor, and a hard student, and was successful in all departments of Christian work. He was offered the presidency of three colleges, and at one time was a professor in one of the theological seminaries of the South. He was an able preacher, but his health was not considered adequate. He was engaged during the latter part of his life in preparing a Manual of Family Worship. (W. P. S.)

Sutra is the division of the sacred writings of the Buddhists, addressed to the laity. The following will show how these sacred writings are classified: 1. Dharma, divided into the Sutram and Abhidharmam, again divided literally into: 1. Vinaya, 2. Sutra, or discourses; 3. Abhidharma, or pre-eminent truths. The Sutra Plakia contains seven sections, called Sangia, and, including both text and commentary, has 396,500 stanzas. See Hardy, Eastern Monachism.

Sutra (near Rome), Council of (Concilium Sutram), was held in December, 1046, by Henry the Black, king of Germany, in Gregory VI. invited to this council came, boasting to be recognised as sole pontiff; but, finding various difficulties and obstacles in the way, he renounced the papacy, stripped himself of his ornaments, and gave back the pastoral staff, after having held the papal chair about twenty months. After the council, Henry, accompanied, by the prelates who had been present, went to Rome, and by common consent of the Romans and Germans, Suidiger was elected pope, who took the name of Clement II, and was consecrated on Christmas day. See Mansi, Concil. IX, 948; Baronius, Annal. A.D. 1046.

Sutton (Sanc. arsi, virtuous, i.e. wife), the name given in Hindostan to a woman who voluntarily sacrifices herself by burning upon the funeral pyre of her husband, and also to the rite itself. The practice has not been confined to India, where it has had effect for many centuries, but has existed in other countries. Diiodorus Siculus gives an instance which occurred in the army of Hannibal more than two thousand years ago. Its origin in India is unknown, though it is certainly of great antiquity. Although the practice is not enjoined by their sacred books, yet it is based by the orthodox Hindu on the injunction of their Shastras, and there can be no doubt that various passages in their Puranas and codes of law countenance the belief which they entertain of its merit and efficiency. Thus the Brahmana-Purana says, "No other way is known for a virtuous woman after the death of her husband; the separate cremation of her husband would be lost (to all religious intents). If her lord die in another country, let the faithful wife place his sandals on her breast, and, pure, enter the fire." The faithful widow is pronounced no suicide by the recited text of the Rig-Veda. The code of Vyasa says, "Learn the power of that widow who, learning that her husband has deceased and been burned in another region, speedily casts herself into the fire." And the Brahmana-sutra says, "That woman who, on the death of her husband, ascends the same burning pile with him is exalted to heaven, as equal in virtue to Arundhati (the wife of Vasishtha). She follows her husband to heaven, and will dwell in a region of joy for so many years as there are hairs on a human body, viz., thirty-six billion. As long as a woman (in her successive migrations) shall decline burning herself, like a faithful wife, on the same fire with her deceased lord, so long shall she not be exempted from springing again to life in the body of some female animal. When their bodies are all consumed, then a new will issue forth, no other way but entering the same fire is known for women whose virtuous conduct and whose thoughts have been devoted to their husbands, and who fear the dangers of separation."

The mode of performing sutra varies in some unimportant respects, but its principal features are the same. An oblong space, seven feet by six feet, is enclosed by bamboo stakes about eight feet long, driven into the earth, within which a pile is built of straw, boughs, and logs of wood. After certain prayers and ablations have been gone through with, the body of the deceased husband is placed within the pile, and the wife sits upon the pile; sometimes in a little arbor of wreathed bamboo, hung with flowers within and without. Then the wife appears, and is unveiled by the Brahmins, herself removing the ornaments from her person, distributing them among her friends, by whom they are highly prized. She reserves only one jewel, the turī, or amulet, placed round her neck by her deceased husband on the nuptial day. Led by the principal Brahmin, she walks three times around the pile, and then ascends to the side of her husband. Embracing the body, she sits or sits beside it, whereupon the nearest relative applies the torso of the body to the armpits of the dying woman, if she utters any, are drowned by the shouts of the spectators and the noise of drums.

Efforts to suppress this rite were made as early as the 16th century by the Mohammedan emperor Akbar, but without much effect. The practice continued to such an extent that between 1613 and 1893 there were 715 cases reported in Bengal alone. In 1829 lord Bentinck, governor-general, enacted a law declaring all aid, assistance, or participation in any act of suttee to be murder, and punishable as such. In 1847, during lord Hardinge's administration, the prohibitory edict was extended to the native states in subsidiary alliance with the government of India, and the practice may be considered as being practically extinct.

An attempt, of late years, has been made by rajah Rachhankant Deb to show that in a text belonging to a particular school of the Black Vijayar-Veda there is really a passage which would justify the practice of suttee; but the text cited by him is of doubtful canonicity; and, moreover, there is a text in the Rig-Veda which, if properly read, directs the widow, after attending to her husband's funeral ceremonies, return home and attend to her domestic duties. See Wilson, On the Supposed Text for the Burning of Hindu Widows (London, 1862), vol. ii.

Sutton, Alvah A., a minister of the Methodist Episcopal Church, was born in Vermont, June 19, 1846. He went to Minnesota in 1869, and engaged in teaching and farming. In 1873 he took work under the presiding elder, and supplied Long Prairie charge for two years. In 1875 he was ordained deacon, admitted into the Minnesota Conference, and appointed to the Berean Mission. He died Feb. 15, 1876. See Minutes of Annual Conferences, 1876, p. 126.

Sutton, Amos, an English missionary, was born at Sevenoaks, Kent, in 1798. He was ordained for the mission work at Derby in 1824, and sent to Oriissa, India. He left this field once for a visit to England and America, but took place at Cuttack, India, Aug. 17, 1854. He translated the Scriptures into Oriya, compiled an Oriya dictionary, grammar, and lesson-book, besides writing The Family Chaplain (Calcutta, 1831-32, 2 vols. 8vo) — Rise and Progress of the Mission at Oriasa (Philos. 1850) — Oriasa and its Evangelization (Derby, Eng. 8vo; Boston, 1850, 8vo) — Hymn-book for Mission Congregations: — and Guide to the Saviour.

Sutton, Charles Manners, D.D., an English prelate, was the fourth son of lord George Manners Sutton, and was born in 1755. He was educated at Emmanuel
College, Cambridge; appointed dean of Peterborough, 1751; bishop of Norwich, 1752; dean of Windsor, 1754; and archbishop of Canterbury, 1769. He died at his seat in July 21, 1828. He published, *Five British Species of Orobanche* (Transactions of the Linn. Soc. 1797, iv. 173:—Sermons (1794, 4to; 1797, 4to). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Sutton, Christopher, a learned English divine, was a native of Hampshire, and entered Hart Hall, Oxford, in 1582, aged seventeen years, but was soon transferred to Lincoln College. He was made prebendary of Westminster, 1605; prebendary of Lincoln, 1618, and died in 1629. He published, *Duce Mori* (Lond. 1600, 24mo, with several later editions, N. Y. 1845, 16mo):—*Duce Virere* (Lond. 1698, 12mo: 1825, 18mo; N. Y. 1840, 16mo):—*Godly Meditations upon the Most Holy Sacrament of the Lord's Supper* (Lond. 1622, 12mo; late editions, 1838, 1847, 1849; Ox. 1839, 1844, 18mo; N. Y. 1841, 16mo). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Sutton, Henry, a minister of the Methodist Episcopal Church, was born near Princeton, N. J., July 20, 1808. Leaving home, he resided for some time in Trenton, N. J., where he united with the Church. After preaching a year, he entered the Philadelphia Conference on trial in 1835. In 1868 he was made superintendent, and after sustaining that relation for several years, was placed on the superannuated list, and there remained until his death, in Philadelphia, Pa., March 23, 1876. He was then a member of the Wilmington Conference. See Minutes of Annual Conferences, 1877, p. 12.

Sutton, Richard, the co-founder of Brasenose College, Oxford, was the younger son of Sir William Sutton. Of the time or place of his birth we have no certain account, but we know that he practiced as a barrister of the Inner Temple. In 1490 he was created some estates in Leicestershire, and afterwards increased his landed property in different counties. In 1498 he was a member of Henry VIII's privy council, and in 1505 was one of the governors of the Inner Temple. We find him, in 1513, acting as steward of the Monastery of Siou, near Brentford, Middlesex. He died about 1524. His bequests were almost all of a religious or charitable kind. His benefactions to Brasenose College were especially liberal, he having completed the building and doubled its revenues, besides leaving to it several valuable estates in the expectation of publishing the very rare book *The Orches of Sion*.

Sutton, Stephen B., a minister of the Methodist Episcopal Church, was born in Clermont County, O., Feb. 14, 1819, and united with the Church in February, 1837. He was licensed to preach March 16, 1844, and was admitted on trial into the Indiana Conference in October, 1851. He died at Martinsville, December, 1869. Mr. Sutton was so successful in his work, having admitted about 1275 persons into the Church. See Minutes of Annual Conferences, 1864, p. 201.

Sutton, Thomas (1), founder of the Charterhouse school and hospital, was born at Knaith, Lincolnshire, in 1582. He was educated at Eton and Cambridge, but at what college is uncertain. After traveling abroad for some time, he returned home in 1562; was retained by the duke of Norfolk, and afterwards became secretary to the earl of Warwick and his brother, earl of Leicester. In 1569 he became master of ordnance at Berwick, and shortly after obtained a patent for the office of master-general of the ordnance of the North, which he retained until 1594. He entered into business, and was at the time of his death (at Jackeley, Dec. 12, 1611) the richest untitled subject in the kingdom. He endowed the Charterhouse in 1611 with the bulk of his property. See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Chalmers, Biog. Dict. s. v.

Sutton, Thomas (2), D.D., an English clergyman, was born at Bampton, Westmoreland, and entered Queen's College, Oxford, in 1592, at the age of six years. He became perpetual fellow in 1591, lecturer of St. Helen's, Abingdon, Berks, and minister of Calham, and afterwards minister of St. Mary Overies, Southwark. He was drowned at sea in 1625. He published separate *Sermons* (Lond. 1615, 8vo; 1616, 8vo; 1626, 4to; 1631, 8vo); *Principles of Revelation*, 8vo (1623); and left in MS. *Lectures on Romans*, ch. 25 (1639). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Sutton, William, a minister of the Methodist Episcopal Church, was born in Virginia about 1783, and in 1810 was licensed to preach. In 1823 he was ordained deacon by bishop M'Kendree, and in 1829 elder by bishop Roberts, and after this he gave the Church what faithful service for twenty-nine years. He died at London, Madison Co., O., Dec. 18, 1858. See Minutes of Annual Conferences of the M. E. Church, South, 1859, p. 190.

Suva, in Japanese mythology, is the god of the chase and the tutelary patron of all hunters. Large processions are annually formed in his honor.

Svadilfari, in Norse mythology, was a famous horse of the giant who built the castle of the gods. He projected a great fortress for the asas who were defending themselves against the ice-giants; and he offered himself as an enemy to the frost-giants, if they would entice him three winters to finish it, and the beautiful Freia as a wife and the sun and moon as servants. By the advice of Loke, the asas accepted the offer, on the condition that he should fulfill it in one winter, and without any other help than the horse Svadilfari. The giant agreed to this, and his horse exhibited such extraordinary strength that he easily lifted stones of the greatest weight, which would have required a hundred horses to carry; and the building was already completed, except a single gate, before the asas had thought it possible. They then brought seventy-eight horses with them, and broke up the contract. Loke thereupon assumed the form of a beautiful mare, and so engaged the stallion Svadilfari that he broke the rope by which he was held and followed Loke, who took him far enough away. From this connection sprang Odin's famous eight-footed horse Sleipner, who was fonder of the wind and never tired. The architect saw himself deserted by his helper, and sought to assume his gigantic form in order to finish the work with all his strength; but in the dilemma of the gods as to whether in that case they should abide by their word, or whether the giant should not be required to finish the work as he was, Thor suddenly appeared with his hammer and slew the giant.

Svaha, in Hindī mythology, was the spouse of the fire-god Agni.

Swainshaugi, or Swains' Hill, in Norse mythology, was a place which appears to have been originally the residence of dwarfs, inasmuch as the *Edda* mentions several of these as coming thence to Orwanga (arrow-field) and Jornval (iron or battle field).

Svaizdunoka, in Slavic mythology, was the brilliant bride of the star-god. She was worshiped by the heathen Russians as a friendly, benign goddess, who kept the stars in their courses when her husband dropped their reins in his wild chase on the moon-car through storm and cloud.

Svaitix, in Slavic mythology, was the god of the stars and of sunlight, whom the ancient Russians revered in common with the Wends and Slavs in Pomerania, etc. He was represented in exceedingly rich clothing, and an architect is said always to have a tuft of hair on the middle of his crown, which rose like a flame of fire. From old Rhettman works of art we infer, notwithstanding the inscription which calls him Belboj (i.e. bialy boj, a good deity, in opposition to Czernobog,
the evil god), that he was a malicious deity, since he appears as fierce and forbidding; but we must bear in mind that sculpture must rise to a high grade before noble and inviting forms can be represented. This art was at that time in such infancy that we can only wonder how the figures are shapely at all. Svaístix was the most benevolent deity; he illuminated the night by the glimmer of the stars, by the aurora and the snow-light, and, like the sun-god, imparted growth to seeds and warmth and fruitfulness to the soil.

Svakóns, in Lettish mythology, were soothsayers who foretold fortunes from flame and the smoke of a light.

Svalgoni, in Lettish mythology, were priests who understood mutual ceremonial examinations, examined bridegrooms and brides who were about to marry, tied the conjugal knot, and pronounced the blessing upon them in the name of Deity.

Svanevit, in Slavic mythology, was the most revered and conspicuous of the gods among the Wends. At Arkona, on the island of Rügen, stood his gigantic image, which was far and wide, for the whole southern coast of the Baltic Sea, the central point of worship. Svantevit was an enormous colossus, which on four necks bore four heads with short hair and short beards. His clothing was like that of the Wends in general: a gown extending to the knees, made of cloth or felt, with long wide sleeves; a girdle held it together; the legs were bare; on the feet he wore coarse bark shoes; an immense sword hung at his side; and in the right hand he carried a large bow resting on the ground; his left hand held a cornucopia, which was annually filled with wine. In addition to these insignia, his image, which stood in Rhétara, had also a long-bearded human head on the breast. Svantevit was both a good and an evil deity, as the cornucopia and the bow indicated—the latter for war, the former for peace. He overshadowed the whole earth with his four heads; hence his counsel was highly prized and his oracles were the most conspicuous, as his cults involved great power and authority. He was worshipped with drunken revelries, and large offerings, including, not unfrequently, human victims, were made; but, it would seem, only when he was angry. His service was attended to by one high-priest, who, on the day of the great harvest festival, personally swept the temple, and that with restrained respiration, so as not to offend the god with his breath. Wine only was poured into his great cornucopia, and from the quantity that remained over from the preceding year an augury was drawn as to the abundance or otherwise of the next year's crop. The temple and the image of the god were destroyed by Wæl- demar I, on the baptism of the people. The public worship of this god thereafter ceased, although it privately continued, so that even now many old peasants regard the spot with superstitious awe. The interpretation of the name as Holy Veit (Sanctus Vitus) is probably only an instance of the corruption or extension of language.

Svartalfheim, in Norse mythology, was the native place of all evil genii or black elves.

Svarthomde, in Norse mythology, was the original ancestor of all magicians, who learned his art from the gods themselves, and transmitted it to his descendants.

Svásndes, in Slavic mythology, was the god of summer, represented by the warm beams of spring that introduced summer. He was worshipped by the Wends and Slavs as a deity of the second rank.

Svava, in Norse mythology, was a beautiful daughter of king Eyjili, who became famous through Helgi Haddlinga, the son of Hiorward, king of Norway. The last had made a vow to call his own the fairest woman of the earth; and thus he already had three wives—Alfhild, the mother of Helin; Síreid, the mother of Humlun; and Sinriod, the mother of Hilming—when he heard that Sigurlin was the handsomest of women. He immediately wooed her through the jarl Atli, but was rejected through fear of other suitors. Thereupon he made war upon her father, and at length seized Sigurlin. She was, however, already the mother of a son, the famous Helgi, who remained quiet until the kind-hearted Svava aroused him, gave him the name of Gilgi, and allied herself to him as a godmother. Defended by the brave warrior Walkur, and armed with a never-failing sword, Helgi signally achieved the greatest of heroisms; but he was, nevertheless, slain by Atli, the son of Hrodmar. No sooner, however, was Helgi reborn as the son of Sigmund and the beautiful Borghill than Svava also reappeared in a second incarnation as the shield virgin Sigrun. Helgi was but one day old when he stood in the midst of the battle for the victory and he crept, in female attire, into the house of the powerful but wicked king Hundingar, explored it as a waiting-maid, and then attacked and slew him in a dreadful contest. Helgi next wooed the beautiful Brighid, formerly loved by Svava, now Sigrun; but had yet to undergo many a severe contest, since she was already betrothed to Hódbród, a son of king Grammar of Sweden, but not loved by her. Helgi attacked him also, overcame and slew him in a battle at Frekasten, and was approaching the goal of his wishes when a new obstacle stood in his path: his son Sigurd, whom he loved. The latter was returning home to Julaabend when he met an ugly old witch, out of the forest, riding on a wolf, which she drove with reins of twisted snakes, and she offered herself as a Walkur to the beautiful youth as a protectress; but when he disdained her, she angrily cried, "Thou shalt pay for this with thy life!" When Hedin reached his home, he wildly swore that he would possess himself of Sigrun, his brother's bride, and he accordingly went immediately to seek his brother for that purpose. The latter not only treated him kindly but, having been already mortally wounded in battle, surrendered her to his brother. When Helgi arrived in Walhalla, all the joys of heaven could not supply the place of the beautiful Sigrun; he therefore returned to his tomb, and rested there all night by the side of the lovely Sigrun till the morning light announced the end of his delight; and, mounting his steed, he returned to the halls of Valhalla. Helgi was a third time born as the second Haddlinga, while Svava, likewise, a third time appeared as Kara, daughter of Häldfan, who was king of Denmark, and, with the spouse of his daughter, ruled over land and sea.

Svarga Divi, in Hindu mythology, is a section of genii who execute the immediate commands of Indra, the Indian sun-god. They seem not to have a large form, since they often ask human help in order to defend themselves against the Assurs, or evil genii.

Svärtovit (Slavic, holy warrior), the most celebrated deity of the ancient Baltic Slavonians, whose temple and idol were at Arkona, the capital of the island of Rügen. The last stronghold of this Slavic idolatry was taken and destroyed, A.D. 1108, by Wældemar I, king of Denmark. See SLAVONIANS.
Swidor and Svipal, in Norse mythology, are sur-
names of Odin.
Svipul, in Norse mythology, was one of the beau-
tiful Walkurs, or female spirits who order the battle.

Swaddle (θυμιάμα, to bandage, οραφαίον; but δομά
to, in Lam. ii, 28, means to bear upon the palm), to
swathe an infant with cloths in order to keep its tender
limbs from injury, a practice common in the East (Ezek.
xxiii; Luke ii, 7). See BUR. 

Swaddlers, an absurd nickname given by the
Irish Roman Catholics to the early Methodists. It is
said to have originated from John Cennick preaching a
sermon on the Babe "wrapped in swaddling-clothes," the
ignorant Roman Catholics who heard it or heard of it
supposing the "swaddling-clothes" to be an invention of
the Devil. In the year 1738 a ballad-singer named Butler actually raised riots in Dublin and else-
where to the cry of "Five pounds for the head of a
swaddler!" and he and his allies called themselves
"Antiswaddlers."

Swahili Version. The Swahili, which was for-
merly described as Kiswahili (that is, "according to
Swahili"), is spoken at Zanzibar and for a considerable
distance down the East Coast of Africa, besides being
likely to become an important means of communica-
tion with inland tribes. The language is evidently an off-
shoot of the Kaffir family, but is strongly impregnated
with Arabic words, being a connecting-link between the
two opposite tendency of speech. A tentative translation
of the New Testament was made by the Rev. Dr. Krapf
when in Eastern Africa a few years ago, but he never so far
perfected his work as to render it prudent to propose its
publication. Independently of Dr. Krapf's work, the at-
tention of others had been drawn to this important sub-
ject; and when the Rev. Dr. Steere returned to England
in 1809 he brought with him a translation of St. Matthew
and the book of Psalms, which he had himself prepared
during a residence of several years at Zanzibar. In
the same year the Gospel of St. Matthew was printed;
and as this was the first time any part of the Scriptures
had been published in that language, and the circulation
must of necessity be limited, only a small edition was
issued. In 1817 the book of Psalms was printed, which
was followed in 1875 by the publication of St. John's
Gospel, and in 1877 by that of St. Luke, the latter as
translated by the late missionary Rehmam, but with the
additions made necessary by the endeavor of the bishop
Steere. From the Report for the year 1877, we see that
a proposal was made to use the Arabic characters for this
version, but the committee of the British and Foreign
Bible Society could not approve of it, insomuch as the
weight of evidence went to show that any natives who
were acquainted with the Arabic characters could read
the pure Arabic version, while for the rest the Kiswahili
in Roman characters was far simpler. Altogether the
missionaries circulated in about nine years (i.e. since
the publication of St. Matthew in 1809 to March 30,
1878) 4048 copies. Thus encouraged, bishop Steere is
preparing a translation of the other books of the Bible.
(1 P.)

Swain, John Sanford, a minister of the Meth-
odist Episcopal Church, was born at Chatham, N.J.,
May 1, 1806, and united with the Church at the age of
fourteen. He was admitted on trial in the Philadelphia
Conference in 1834, and continued actively engaged in
the pastorate until 1868. He then entered the Chris-
tian Commission and was appointed to Hilton Head.
In 1864 he was made supernumery, and appointed missionary
to Jacksonville, Fla. Finding the climate congenial to his health, he continued to reside there un-
til his death, Nov. 18, 1875. See Minutes of Annual
Conferences, 1876, p. 42.

Swaim, Samuel Budd, D.D., an able minister of the Baptists, was born at Pemberton, N.J., June 22, 1809, and was a graduate of Brown Uni-

Swallow is the rendering, in the A. V., of two
Heb. words, and possibly the truly meanin of a third.
None of them, however, are very clearly identifiable
according to modern scientific classification.

Swain, Charles W., a minister of the Methodist
Episcopal Church, was born at New Bedford, Mass., Oct.
22, 1793. He united with the Church in Richmond,
Clermont Co., O., in 1819, and in 1831 was admitted on
trial into the Ohio Conference, and in due time received
deacon's and elder's orders. He was actively engaged
under the direction of the Ohio Wesleyan University)
until the fall of 1855. In 1856 he took a superannuated
relation, and made his home in Easton until his death, April 25, 1870. Mr.
Swain assisted in organizing a temperance society in
New Richmond, O., as early as Sept. 1, 1829, the first of
the kind in the Western Alleghenies. See Minutes of
Annual Conferences, 1870, p. 166.

Swain, Nathan, a Methodist Episcopal minister,
was born in 1767, and converted when fourteen years
of age. In 1799 he was admitted on trial in the Phila-
delphia Conference, in 1801 admitted into full connec-
tion and ordained deacon, and in 1803 ordained elder.
He continued effective, with the exception of two years,
until 1818, when he took superannuatory service as an
agent of the Ohio Wesleyan University until the fall of
1855. In 1856 he took a superannuated relation, and made his
home in Easton until his death, April 25, 1870. Mr.
Swain assisted in organizing a temperance society in
New Richmond, O., as early as Sept. 1, 1829, the first of
the kind in the Western Alleghenies. See Minutes of
Annual Conferences, 1870, p. 166.

Swain, Richard, a Methodist Episcopal minister,
was a native of New Jersey. In 1789 he was admitted
on trial, in 1791 into full connection, and filled the fol-
lowing stations: Trenton, N.J., in 1791; Flanders, in
1790-91; Middletown Circiui, Conn., in 1792; New
London, in 1792; Salem, N.J., in 1794; Burlington, in
1795; Freehold, in 1796; Trenton, in 1797; Freehold,
in 1798; Salem, in 1799 and 1800; Bethel, in 1801;
Cape May, in 1802; Salem, in 1803. He became super-
numerary in 1804-7, and died Jan. 17, 1808. He was
a man of prayer and usefulness in the ministry. See
Minutes of Annual Conferences, 159; Stevens, Hist. of the
M. E. Church, iv, 290; Bangs, Hist. of the M. E. Church,
i, 252.

are known, appear all to be the same as those of Europe. The following are the most abundant: 1. Cypselus apus, the common swift or black martin, distinguished by its larger size, short legs, very long wings, forked tail, and by all the toes of the feet turning forward: these, armed with small, crooked, and very sharp claws, enable the bird to hang against the sides of walls, but it cannot rise from the ground on account of the length of its wings. The last two, but more particularly this species, we take to be the derör, on account of the name duräri, already mentioned; which was most probably applied to it because the swift martin prefers towers, minarets, and ruins to build in, and is, besides, a bird to which the epithet "free" is particularly applicable. On the European coast of the Mediterranean it bears the name of barbotta, and in several parts of France, including Paris, is known by the vulgar name of "le Juif," the Jew; and, finally, being the largest and most conspicuous bird of the species in Palestine, it is the type of the heraldic martlet, originally applied in the science of blazon as the especial distinction of Crusader pilgrims, being borrowed from Oriental nations, where the bird is likewise honored with the term haji, or pilgrim, to designate its migratory habits. The derör being mentioned as building on the altar seems to imply a greater generalization of the name than we have given it; for habits of nesting in immediate contact with man belong only to the house and window swallows; but in the present instance the expression is not meant to convey a literal sense, but must be taken as referring to the whole structure of the Temple, and in this view the swift bears that character more completely than the other. It is not necessary to dilate further on the history of a genus of birds so universally known. 2. Hirundo rustica, or domestica (var. Cukrica), the chimney swallow, with a forked tail, marked with a row of white spots, whereof Hirundo Syriaca, if at all different, is most likely only a variety. 3. Chelidon urbica, the martin, or common window swallow. 4. Cotyle riparia, sand-martin, or shore-bird, not uncommon in Northern Egypt, near the mouths of the Delta, and in Southern Palestine, about Gaza, where it nestles in holes, even on the sea-shore. Besides these, the Eastern or russet swallow (Hirundo rufula, Tem.), the nestles generally in fissures in rocks, and the crag-martin (Cotyle rupestris, Linn.), which is confined to mountain gorges and desert districts, are also common. (See Bis, i, 27; ii, 386.) The crag-martin is the only member of the genus which does not migrate from Palestine in winter. Of the genus Cypselus (swift), besides the one first noted above, the splendid alpine swift (Cypselus melba, Linn.) may be seen in all suitable localities. A third species, peculiar, so far as is yet known, to the north-east of Palestine, has recently been described under the name of Cypselus Galliarena. See Traistram, Nat. Hist. of the Bible, p. 204; Wood, Bible Animals, p. 381 sq.; LewiSohn, Zoologie des Talmuds, p. 206. See Bird.
Swan is the rendering, in the A.V., of כַּגְוֵה, tsikhənemeth, in two of the three passages where this word occurs, namely, Lev. xi, 18; Deut. xiv, 16, where it stands in the list of unclean birds (Sept. παρασπορά, ἄγος; Vulg., copiously, porphyrio, ibis; Samaritan the same). Bochart (Hieroz. ii, 288) explains it inoetum (owl), and derives the name from the Hebrew eshkham, from esha, “to astonish,” because other birds are startled at the approach of the owl. Gesenius suggests the pelican, from בְּנִי, “to breathe, to puff,” with reference to the inflation of its pouch. Whatever may have been the bird intended by Moses, these conjectures cannot be admitted as satisfactory, the owl and pelican being both distinctly expressed elsewhere in the catalogue. Giggens waved between these two; and Dr. Mason Harris, seemingly not better informed, and confounding the American red species with the white one of Africa, guessed that porphyrio must mean the flamingo. Parkhurst, deriving the word from בִּנַּי, nashāhun, “to breathe,” was inclined to render tsikhemeth by “goose;” but as this bird is not by the present Jews deemed unclean, it may be confidently assumed that no mistake in this matter can have occurred during any period, and consequently that the goose cannot have been marked unclean by the hebrews and afterwards admitted among the clean birds with its name transferred to another species. The Hebrew Dictionary by Selig Newman, it is true, renders tsikhemeth “swan;” but the Polyglotta show the great uncertainty there is in some of the names of both the chapters in question. The swan, for which some naturalists have contended, seems to have been held sacred in Egypt, does not occur, so far as has been ascertained, in any Egyptian ancient picture, and is not a bird which, in migrating to the south, even during the coldest seasons, appears to proceed farther than France or Spain, though, no doubt, individuals may be blown onward in hard gales to the African shore. Only two instances of swans have been noticed so far to the south as the sea between Cadiis and Rhodes: one where a traveller mentions his passing through a flock reposing on the sea during the night; the other recorded by Hasselquist, who saw one on the coast of Egypt. But it may be conjectured that they must peck melons for swans, particularly as the last mentioned are fresh-water birds, and do not readily take to the true salt sea. Mr. Strickland, indeed, says of the mute swan (Cygnus olor), that it visits Smyrna Bay in winter; and Mr. Yarrell, on the authority of Mr. Bennett, tells us that the hooper (C. ferus) sometimes goes as far south as Egypt and Barbary. He adds that “they visit Corfu and Sicily in very severe winters; and Mr. Drummond saw a few on the lakes of Biserta, and one in the Lake of Tunis at the end of April, 1845.” But these are very rare instances. Nor, if it had been known to the Israelites, is it easy to understand why the swan should have been classed among the unclean birds. The renderings of the Sept., porphyrio and ibis, are either of them more probable. Neither of these birds occurs elsewhere in the catalogue. The porphyrio, or purple gallinule, cannot have been unknown to the translators, as it was, no doubt, common in the Alexandrian temples, and then as it is, now seen both in Egypt and Palestine. פורפיירו, porphyrio antiquorum, Bp., the purple water-hen, is mentioned by Aristotle (Hist. Anim. viii, 8), Aristophanes (A. r. 107), Pliny (Hist. Nat. x, 63), and is more fully described by Athenaeus (Deipn. ix, 399). The circumstances of the Greek name being given to the chameleons (see below) may have arisen from both having the faculty of changing colors, or being iridescent; the first, when angry, becoming green, blue, and purple—colors which likewise play constantly on the glossy parts of the second’s plumage. The porphyrio is superior in bulk to the water-hen, or gallinule; to a hen a crimson shield on the forehead, and flesh-colored legs; the head, neck, and sides are of a beautiful turquoise blue, the upper and back parts of a dark but brilliant indigo. It is allied to the corn-crake, and is the largest and most beautiful of the family Reillidae, being larger than the domestic fowl. From the extraordinary length of its toes, it is enabled, lightly treading on the flat leaves of water-plants, to support itself without immersion, and apparently to run on the surface of the water. It frequents marshes and the sedges by the banks of rivers in all the countries bordering on the Mediterranean, and is abundant in Lower Egypt. Atheneus has correctly noted its singular habit of grasping its food with its very long toes and thus conveying it to its mouth. It is distinguished from all the other species of Reillid by its short, powerful mandibles, with which it crushes its prey, consisting often of reptiles and young birds. It will frequently seize a young duck with its long feet, and at once crunch the head of its victim with its beak. It is an omnivorous feeder, and, from the miscellaneous character of its food, might reasonably find a place in the catalogue of unclean birds. Its flesh is rank, coarse, and very dark-colored. It was anciently kept tame in the precincts of pagan temples, and therefore, perhaps, was marked unclean, as most, if not all, the sacred animals of the heathens were. When, in the decline of idolatry, the dog, peacock, ibis, the purple bird in question, and other domesticated ornaments of the temples had disappeared, Ceasar’s reformed idolatry showed how artfully the poets of the Middle Ages and of the Revival of Literature were perplexed to find again the porphyrio of the ancients, although modern naturalists have not the shadow of a doubt upon the subject, the species being, moreover, depicted upon Egyptian monuments. The Porphyrio hyacinthinus is the species most common in Europe, although there are several others in Asia and Africa; Porphyrio erythropus, abundant on the southeast coast of Africa, appears to be that which the pagan priests most cherished.

Purple Gallinule (Porphyrio hyacinthinus).

The same Heb. word tsikhemeth (תִּשְּחוֹמֶת; Sept. ἄσπαλας v. τ. σταίλας, Vulg. tulipa) in Lev. xi, 30, being found among the unclean “creeping things that creep upon the earth,” evidently no longer stands for the name of a bird, and is rendered ‘mole’ by the A.V., adopting the interpretation of the Sept., Vulg., Onkelos, and some of the Jewish doctors. Bochart has, however, shown that the Heb. chōlōh (חוכל), the Arabic khūd or khīl, denotes the “mole,” and has argued with much force in behalf of the “chameleon” being the tsikhemeth. The Syriac version and some Arabic MSS. understand “a centipede” by the original word, the Targum of Jonathan a “salamander,” some Arabic versions read sim-mū’bāris, which Golius renders “a kind of lizard.” In Lev. xi, 30, the “chameleon” is given by the A.V. as the translation of the Heb. chōaṣ (חואץ), which in all
SWAN
probability denotes some larger kind of lizard. See Chameleon. The only due to an identification of tinashemeth (Lev. xi, 30) denot
the root (נשָׁחָם, nashâm, to breathe) from which the Heb.
name of this creature is derived has reference to a vul
gar opinion among the ancients that the chameleon lived on
air (comp. Ovid, Met. xv, 411, “Id quoque quod
ventis animal nutritur et aures,” and see numerous quota-
tions from classical authors cited by Bochart, Hiero.
ii, 505). The lung of the chameleon is very large, and
when filled with air it renders the body semi-transparent;
from the creature’s power of abstinence, no doubt,
aroze the fable that it lived on air. It is probable that
the animals mentioned with the tinashemeth (Lev. xi, 30)
denot different kinds of lizards, perhaps, therefore, since
the etymology of the word is favorable to that view, the
chameleon may be the animal intended by tinashemeth in
the above passage. As to the change of color in the skin
of this animal, numerous theories have been proposed;
but, as this subject has no scriptural bearing, it will be
enough to refer to the explanation given by Milne-Ed-
wards, whose paper is published in vol. xvii of the Edin-
burgh New Philosophical Journal. The chameleon be-
longs to the tribe Dendroasura, order Squana; the family
inhabits Asia and Africa and the south of Europe. The
Chameleo vulgaris is doubtless the species mentioned in
the Bible. See Binhorn, Natural History of the Bibe,
pp. 249; Wood, Bible Animals, p. 87, 486. See Lizard.

SWAN (myth. and astr.), a beautiful constellation in
the Milky-way, which may be readily known from the
five bright stars, arranged in the form of a cross, of
which it is composed. It is situated between Cepheus
and Vulpecula, to the east of the Lyre. On bright win-
try nights the naked eye may count a hundred and fifty
stars in this large constellation. The Swan com-
memorates the orison chosen by Jupiter when he deceived
Nemesis and Leda, or possibly the singing swan, sacred
to Apollo, into which Orpheus was, at death, transformed.

Swan, Roswell Randall, a Congregational minister,
was born at Stonington, Conn., June 16, 1778; was
fitted for college by Rev. Hezekiah N. Woodruff,
of Stonington, and graduated from Yale College in 1802.
He united with the College Church Dec. 1, 1799.
His purpose to enter the ministry was not formed until
March, 1804, and shortly after he commenced the study
of theology with Rev. E. Emmerson, of the same town.
On October of the same year, after a severe illness, he con-
tinued his studies with Dr. Perkins, of West Hartford.
His license to preach was granted him by the Hartford
North Association, at Northington, Feb. 6, 1805. Owing
to ill-health, he did not immediately settle, but in
December took charge of an academy in Stonington,
and supplied the vacant Church there. He was or-
dained pastor of the Church in Norwich Jan. 14, 1807,
where he continued until his death, March 22, 1818.

Swan, Samuel, a Presbyterian minister, was born
in the island of Dominica, Nov. 30, 1798. While Sam-
uel was a student, he returned to live with his con-
trary, Scotland. Here the son received a liberal educa-
tion, completing his course at the Glasgow University.
At the age of nineteen he came with the family to Phil-
adelpbia, from whence he soon went to Princeton Sem-
nary. He was licensed to preach by the Philadelphia
Presbytery, Dec. 13, 1823, and received his degree of licen-
tiary in the Presbytery of Huntington, Pa. He received a
call from the Sinking Valley Church, which he declined
to accept, and was dismissed to the Redstone Presby-
tery. His next call was to the churches of Fairfield,
Ligonier, and Donegal, which he accepted, and was in-
stalled in 1834. He proved to be a devoted, self-
denying, and successful pastor, and for seventeen years
and a half retained the esteem and growing confidence
of his three churches. Becoming seriously crippled by
a shivered limb, he was compelled to relinquish so ex-
tensive a charge, and he accordingly resigned, and ac-
cepted the pastorate of Abington, Mont., where he was
installed in 1841. Half of his time was occupied by the
Church at Armagh. Here he continued until 1855.
In 1856 he removed to Leland, La Salle Co., Ill., where he
made an extensive purchase of land; and though he
had no pastoral charge, he continued to preach the Gos-
pel and was engaged in missionary work. From 1869 to 1871 he resided
at Aurora, Ill. For the purpose of giving his children an
education, he returned East, and, though advanced in
years, continued to preach until the end of his pilgrim-
ages, Aug. 5, 1867. (W. P. S.)

Swanger, John P., a minister of the Methodist
Episcopal Church, was born in Mifflin County, Pa., Feb.
15, 1836. He was converted and united with the Church
in 1854, and in 1859 was received on trial in the East
Baltimore Conference. His ministry, however, was of
short duration, as he died June 29, 1867, in Baltimore.
See Minutes of Annual Conferences, 1868, p. 27.

Swarm is the rendering, in the A. V., of two very
different Hebrew words.
1. יִדָּדָו, 'edâd (usually rendered "congregation" or
"assembly"), is employed to designate the swarm of
bees and honey found by Samson in the lion’s carcass
(Judg. xiii. 22); and it is by which Samson slew a dead
beetle some little time before the bees had taken up their
abode in the carcass, for it is expressly stated that "af-
after a time" Samson returned and saw the bees and honey
in the lion’s carcass, so that “if,” as Oedmann has well
observed, “any one here represents to himself a corrupt
and putrid carcass, the occurrence ceases to have any
true similitude, for it is well known that in these coun-
tries, at certain seasons of the year, the heat will, in
the course of twenty-four hours, so completely dry up
the moisture of dead camels, and that without their uncer-
going decomposition, that their bodies long remain, like
unburnt coal, pulp, and entirely without any odor.” To the foregoing quotation we may add that
very probably the ants would help to consume the car-
cass, and leave, perhaps, in a short time, little else than
a skeleton. Herodotus (v. 114) speaks of a certain One-
elsus, who had been taken prisoner by the Amathusians
and beheaded, and whose head, having been suspended over
the gates, had become occupied by a swarm of bees;
comp. also Aldrovandaus (De Insectis, i, 110). Dr. Thom-
on (Land and Book, ii, 362) mentions this occurrence of
a swarm of bees in a lion’s carcass as an extraordinary
thing, and makes an unhappy conjecture that perhaps
the horns, mentioned in the text, are intended. "If they
were known," says he, “that they manufactured honey
enough to meet the demands of the story.” It is known,
however, that these horns do not make honey, nor do any of the
family Vespidae, with the exception, so far as has been
hitherto observed, of the Brazilian Nectarita melifica.
See Bezz.

2. עָרָב, 'arab, is the term applied to the fourth
of the plagues (q. v.) of Egypt (Exod. viii. 31; “divers
sorts of flies,” Psal. lxxviii, 45; cv. 31). It is regarded
by most interpreters as a species of goety or tabanus
(Michaels, Supplem., p. 190), such as is still very trouble-
some to animals in Egypt (Forskal, Deocr. Anim. p.
85; Ritipell, Anim. p. 75). See Bochart, Hieroz. iii,
472; Werner, in the Miscell. Lips. nov., 201 sq. See Fix.

Swayze, John J., a minister of the Methodist
Episcopal Church, was born at Poughkeepse, N. Y.,
Aug. 30, 1812. He was received on trial in the Pitts-
burgh Conference in 1829, and labored with great accept-
bility, filling the office of presiding elder nine success-
ive years. He took a superannuated relation in 1852,
and died Feb. 18, 1855. See Minutes of Annual Con-
ferences, 1853, p. 242.

Swayze, William, a Methodist Episcopal min-
ister, was born in Sussex County, N. J., Nov. 18, 1784.
In his youth he was led by a pious African to hear a Methodist preacher near Baltimore, was converted, and soon after felt impressed that it was his duty to preach the Gospel, and labored as a local preacher to great advantage for several years. He was admitted into the New York Conference on trial in May, 1807, and for eight years labored successfully within the bounds of that Conference. He was dismissed to the Ohio circuit in 1813, and labored in that circuit until 1818; in 1818 to Deer Creek Circuit, including Chillicothe; in 1820 presiding elder of Ohio District, where "his labors, for almost four years, were crowned with unexampled success." In 1824, by the division made by the General Conference, he fell in the Pittsburgh Conference, and was appointed to Erie District; in 1828 to Canton District; in 1830, conference missionary; in 1832, transferred to Ohio Conference; in 1834 to Pittsburgh Conference; after which, he was superannuated until death, March 29, 1841. See Minutes of Annual Conferences, i, 258; Stevens, Hist. of the M. E. Church, iv, 389-391. (L. D. S.)

Swearing (some form of רק כז or רכ כז, דַּבְּרָה), is an appeal to God in attestation of the truth of what is said or done. "Coram Deo" is the phrase which was used in this sense. The Latin term is iurisprudentia or juramentum. Cicero (De Offic. iii. 29) correctly terms an oath a religious affirmation; that is, an affirmation with a religious sanction. This appears from the words which he proceeds to employ: "Quod autem affirmare, quasi Doce testes, promiseris, id tenendum est. Jam enim non ad iram deorum, quae nulla est, sed ad justitiam et ad fidem, quae in conjunctione dicitur, non habet effectum nisi quod est an appeal to God, as the source and the vindicator of justice and fidelity. Hence it appears that there are two essential elements in an oath—first, the human, a declared intention of speaking the truth or performing the action in a given case; secondly, the divine, an appeal to God, as a being who knows all things and will punish guilt. According to usage, however, there is a third element in the idea which "oath" commonly conveys, namely, that the oath is taken only on solemn, or, more specifically, on juridical occasions. The canon law gives all three elements when it represents judicium, petentia, et promissio: "Inbetwixt two parties, there is an appeal to God, as the source and the vindicator of justice and fidelity. The practice of taking oaths existed before the time of Moses. It is found as early as the days of Abraham, who made the oldest servant of his family swear he would select for Isaac a wife of his own kindred (Gen. xxiv, 2, 37). It is here observable that the oath is a private, not a judicial one; only that the authority of Abraham, as patriarch, must be taken into account. An oath is sometimes understood to signify the consent of the parties to be bound by the decision of another. It was the custom of the parties who took it to a certain course—a case in which it appears to have been spontaneous and voluntary: as, when, in Judges xxii., the men of Israel swore, saying, "There shall not any of us give his daughter unto Benjamin to wife" (comp. ver. 5). From I Kings xviii, 10; 2 Kings xiv, 25, we learn that on great occasions of great concern, a public oath, embracing even an entire "kingdom and nation;" but whether taken individually or by some representative we have no means of ascertaining. Such a custom, however, implying as it does a doubt of the public faith of a people, would have been looked upon with suspicion and inferiority. Oaths did not take their origin in any divine command. They were a part of that consuetudinary law which Moses found prevalent, and was bound to respect, since no small portion of the force of law lies in custom, and a legislator can neither abrogate nor institute a binding law of his own mere will. Accordingly, Moses made use of the sanction which an oath gave, but in that general manner, and apart from minute directions and express words of approval, which shows that he merely used, without intending to sanction, an instrument that he found in existence and could not safely dispense with. "Per oaths they enforced what was already a law; where an oath is ordered to be applied in the case of lost property; and here we first meet with what may strictly be called a judicial oath (Lev. vi, 3-5). An oath, making an appeal to the divine justice and power, is a recognition of the divinity of the being to whom the appeal is made. When he is not, so to speak, to be convicted of idolatry. Such an act is accordingly given in Scripture as a proof of idolatry and a reason for condign punishment. "How shall I pardon thee for this? Thy children have forsaken me, and sworn by them that are no gods" (Jer. v, 7; xii, 16; Amos viii. 14; Zechar. i, 5). This appeal to God was in frequent use among the Hebrews, as a confirmation of both statements (Matt. xxvi, 74) and promises (1 Sam. xix, 6; xx, 17; 2 Sam. xix, 23; xx, 21; 1 Mac. vii, 35). For covenant oaths, see Gen. xxviii, 15 sq.; Josh. iv, 19; 1 Mac. vii. 22; Josephus, Ant. xiv, 1.2. For oaths of allegiance see 2 Sam. xv, 21; Josephus, Ant. xv, 10, 4) in both public and private life (e.g. Judg. xxi, i; 1 Kings xviii, 10; Ezra x, 5; and Gen. xxiv, 37; l, 5; Matt. xiv, 7), as also before the Judges (Exod. xxii, 11; Lev. vi, 3; 1 Sam. xii, 5), but in all cases does not have an evil use. Perjury is forbidden (xix, 12), but on religious grounds, as a profanation of God's name. The usual oath was by Jehovah (Deut. vi, 13; comp. Gen. xiv, 22, Judg. xxii, 7; Ruth i, 17; 1 Sam. xiv, 44; 2 Sam. xix, 7; 1 Kings i, 29; ii, 23; Isa. xix, 18; xlv; 16; Jer. iv, 1; xxvi, 16; 1 Kings xix, 14; 2 Kings v, 11)."
SWEARING

49

SWEARING

vah liveth" (יִשְׂרָאֵל, יִשְׂרָאֵל, יִשְׂרָאֵל, Jer. iii, 18; Judg. viii, 19; 2 Sam. ii, 27; Jer. xxxviii, 16); at greater length, "Jehovah be a true and faithful witness between us" (יְהוָה, יְהוָה, יְהוָה, Jer. xiii, 5). Formulas of terrible import were used by the later Jews (see Josephus, Life, § 53; comp. Lyssias, Pro. Com. Aristok. 32). Of the ceremonies usually observed by those who took oaths we know but little. In a patriarchal antiquity it was usual to put the hand under the thigh (Gen. xxiv, 2; xxvii, 29). On this practice Aben-Ezra observes, "It appears probable to me that the meaning of this custom was as if the superior said, "If thou art under my power, and am not prepared to execute my commands, put thy hand, as a token, under my thigh."" Winer, however, thinks that, as it was usual to swear by the more important parts of the human frame, so this was a reference to the generative powers of man. But see on this interpretation, as well as on the general question of swearing by parts of the body, Meiner, Gesch. der Relig. ii, 286 sq. It is, however, certain that it was usual to touch that by which a person swore. Other instances may be seen in Niedek, De Popular. Adorat. p. 213 sq., and p. 218, which go immediately to confirm the idea advanced by Winer. The Targum of Jonathan (on Gen. xxiv, 2) supposes the hand to have been placed on the section of circumcision (comp. Jerome, ad loc.). Cranberg (Religionw. i, 439) most strangely connects this custom with the licentious worship of Baal and Asartor. (For other views see Dreyer, Miscel. sb. einige Gegeven. des teutsch. Rechts. 115 sq.; Mähn, in Berthold. Journ. vii, 118 sq.)

The more usual employment of the hand was to raise it toward heaven; designed, probably, to excite attention, to point out the oath-taker, and to give solemnity to the act (Gen. xiv, 22, 23). In the strongly anthropomorphic language of parts of the Scripture even God is introduced saying, "I lift up my hand to heaven, and say, I live forever" (Deut. xxii, 40). Some suppose that a similar license is employed whenever the Almighty is represented as in any way coming under the obligation of an oath (Gen. xxiii, 16; 17; Exod. vi, 8; Ezek. xx, 5; Hebr. vi, 17). Instead of the head, the phylactery was sometimes touched by the Jews on taking an oath (Maimon, Shebuthoth, c. 11). Even the Deity is sometimes introduced as swearing by phylacteries (Tanch. fol. vi, 5; Otho, Lex. p. 757). "Giving the hand" (Ezek. xxvii, 12) was a ceremony used between equals; the violation of this pledge was believed to be a most atrocious crime and hence that person who denounced vengeance on the king of Babylon, who had broken a covenant after having "given his hand." We meet with the representation of the pledge given by the joining of hands, in connection with some religious ceremony, on many ancient coins, of which the accompanying engravings are specimens. They are taken from golden coins in the British Museum. See Hand. Swearing by dipping the hands in the blood sq. Some oaths they declared invalid: "If any one swear by heaven, earth, the sun, and such things, although there may be in his mind the mere words a reference to those who created them, yet this is not an oath; or if any one swear by one of the prophets or by some book of Scripture, having reference to Him who sent the prophet and gave the book, nevertheless this is not an oath" (Maimon. Hah. Shebuthoth, c. 12). So the Mishna (Shebuthoth, c. 4): "If any one adjures another by heaven or earth, he is not held bound by this." It is easy to see that oaths of this nature, with authoritative interpretations and glosses so lax, could hardly fail to lessen moral obligation, and to lead to much practical perjury and impiety. Maimonides' statement is strange, for, when a man may swear and yet not swear, by the same formula appear to bind himself and yet be free, contract with his associates an obligation from which he may be released by religious authorities, the basis of private virtue and the grounds of public confidence are at once endangered. Besides the practice of unauthorized and spontaneous oath-taking, which seems even in the earlier periods of Jewish history to have been too common, became, about the time of our Lord, of great frequency, and must have tended to lower the religious as well as weaken the moral character. Peter's conduct is a striking case in point. He was to curse and to swear, saying, I know not the man" (Matt. xxvi, 74). An open falsehood thus asserted and maintained by oaths and imprecations shows how little regard there was at that time paid to such means of substantiating truth. The degree of guilt implied in such lamentable practices is heightened by the emphasis with which the Mosaic law guarded the sanctity of the divine name and prohibited the crime of perjury and profanation (Exod. xx, 7; Lev. xix, 12; Deut. v, 11; Matt. v, 38).

The levity of the Jewish nation in regard to oaths, though reproved by some of their doctors (Otho, Lex. p. 351: Philo, ii, 194), was notorious; and when we find it entering as an element into popular poetry (Martial, xi, 9) we cannot ascribe the imputation to the known injustice of heathen writers towards the Israelites. This national vice, doubtless, had an influence with the Esseines (q.v.) in placing the prohibition of oaths among the rules of their reformatory order. Modern Orientals habitually use the exclamation Inshallah ("in the name of God") on the most trivial occasions.

That no case has been made out by Christian commentators in favor of judicial swearing we do not affirm; but we must declare it is a very weak one, wears a casuistical appearance, and as if it were necessary in order to excuse existing usages and guard against errors imputed to unpopular sects, such as the Quakers and Menonites. It inferential and merely probable conclusions, such as the case consists of, may be allowed to prevail against the explicit language of Jesus and James, Scripture is robbed of its certainty, and prohibitions the most express lose their force. For instance, it has been alleged that our Lord himself took part in an oath when, being adjured by the high-priest, he answered, "Thou hast said" (Matt. xxvi, 65, 66). But, what has this to do with his own doctrine on the point? Placed at the bar of judgment, Jesus was a criminal, not a teacher, bound by the laws of his country—which it was a part of his plan never unnecessarily to disregard—to give an answer to the question judicially put to him, and because, not by a regard to the great interests which he had come into the world to serve. Jesus did not swear, but was sworn. The putting the oath he could not prevent. His sole question was, Should he answer the interrogatory?—a question which depended on considerations of the highest moment; but which he determined to decide in the affirmative. That question in effect was, "Art thou the Messiah?" His reply was a simple affirmative. The employment of the adjuration was the
act of the magistrate, to have objected to which would have brought on Jesus the charge of equivocation, if not of evasion, or even the denial of his "high calling."

The general tendency of this article is to show how desirable it is that the practice of oath-taking of all kinds, judicial as well as others, should at least be diminished, till, at the proper time, it is totally abolished; for whatever affhirmation contained from the Evil One, esse postmodum (Matt. v, 37), and equally lethal to eth. See Lydian Dias. de Juramento; Nicolai, De Jurum, Hebrarum, Graecorum, Romanorum, aliquorumque Populorum; Sekenii Dias. de juramento; Molembeci De Juramento per Graeciam Princps; Spenneri Dias. de Juramento per Aschidualum — all of which may be found in vol. xxvi of Ugolino's Thesaurus Antiq. Sacr. See also Hansen, De Juramento, Vet. in Graeciam, Thesaurus; Carpoao, Appar. p. 602 sqq. — Steiner, De Jurare, See. Discip. Heb. (Lips. 1788); Furmann, De Jurarum, et Mentis Hebr. (Traj. ad Rh. 1727); Lasaulx, Urb. d. Ekl bei d. Griech. (Wurzb. 1844); Ueb. d. Ekl bei d. Rom. (Ioh. 1844); Otho, Lex. Robbin. p. 347 sqq. A much shorter work may be found in Schmitz, Die schichte der Vorstellung u. v. "Eide;" see also Tyler, Oaths: their Origin, etc. See OATH.

SWEARING, PROFANE, was severely condemned in the ancient Church, and seems to have been a common practice. Swearing, or foolish or wicked adjurations by any creature or demon, by the emperor's genius, by angry gods, or by sacred persons, were placed under special penance. Profanity is also punishable by the civil law of Great Britain, and by the laws of some of the states of the United States.

Sweat (727, Gen. iii, 19; 27), Ezek. xlviii, 18; ἱδρυμα, Luke xxii, 44) was one of the physical phenomena attending our Lord's agony in the garden of Gethsemane as described by Luke (xxii, 44): "His sweat was as it were drops of blood" (literally clots, 3πιγξ/βαιν of blood falling down to the ground." The genuineness of this verse and of the preceding has been doubted, but is now generally acknowledged. They are omitted in A and B, but are found in the Codex Sinaiticus (N), Codex Beza, and others, and in the Peshito, Philoxenian, and Curetonian Syriac (see Tregelles, Greek New Test.; Scrivener, intro. to the Crit. of the New Test. p. 848), and are placed at the end of the Note on the construction and canon in ver. 42 as a trace of the existence of the verse in the Codex Alexandrinus.

Of this malady, known in medical science by the term diaphoresis, there have been examples recorded both in biblical and non-biblical times. Arius, the Christian bishop of Alexandria (De Part. Anim. iii, 6), the cause assigned is generally violent mental emotion. "Kammenjesser," quoted by Dr. Stroud (Phys. Cause of the Death of Christ, p. 86), "remarks,'Violent mental excitement, whether occasioned by uncontrollable anger or vehement joy, and in like manner sudden terror or intense force, forces out a sweat, accompanied with signs either of anxiety or hilarity.' After ascribing this sweat to the unequal constriction of some vessels and dilatation of others, he further observes: 'If the mind is seized with a sudden fear of death, the sweat, owing to the excessive degree of constriction, often becomes bloody.'" Dr. Millingen (Curiosities of Medical Experience, p. 489, 2d ed.) gives the following explanation of the phenomenon: "It is probable that this strange disorder arises from a violent commotion of the nervous system, turning the streams of blood out of their natural course, and forcing the red parts of the circulation to a more or less extreme elevation; the diminution of the fibres could not produce so powerful a re-vulsion. It may also arise in cases of extreme debility, in connection with a thinner condition of the blood."

The following are a few of the instances on record which have been collected by Calmet (Dias. sur la Sweer du Sang), Millingen, Stroud, Trusen (Die Sitten, Gebräuche und Krankheiten d. alt. Hebr. [Breislgau, 1858]), in addition to those given under bloody sweat. Scherkin (Obs. Med. iii, 458) says that in the plague of Miseino in 1534 a woman who was seized sweated blood for three days. In 1624 Conrad Lycoctonos (De Prodigis., p. 523, ed. 1653) reports, a woman in the plague sweated blood from the upper part of her body. According to De Thou (i, xi, 326, ed. 1626), the governor of Montemaro, being seized by straitegy and threatened with death, was so moved that he sweated blood and water. In the Mélanges d'histoire, 1794, iii, 179, Dr. Bouhais reports the case of a woman who sweated blood from her left arm, given to a woman who suffered so much from this malady that, after her death, no blood was found in her veins. Another case of a girl of eighteen who suffered in the same way is reported by Mesaporti, a physician at Terni, accompanied by the observations of Valerseni, professor of medicine at Palma. It occurred in 1708 (Phil. Trans. No. 808, p. 2144). There is still, however, wanted a well-authenticated instance in modern times observed with all the care and attested by all the exactness of later medical science. That given in Caspar's Wochenschrift, 1848, as having been observed by Dr. Schroeder, is a somewhat voluminous writer, chiefly on devotional subjects. He stood high in his native country, and many of his hymns are still among the favorite ones in the Swedish Lutheran service. He was the father of Emanuel Swedenborg. He was made bishop of Skara in 1702, about the time that he visited England. The Swedish Church in London and the Swedish congregations settled on the banks of the Delaware, in America, were placed by the king under his episcopal supervision; and his letters to the latter colony, still preserved in the records of the Church at Wilmington, show a warm interest in their affairs. From the information which he had obtained from this correspondence he published a work concerning America, a copy of which is in the library of Harvard College. He also published a Psalm-Book (1694), which was suppressed as pietistic; and the first Swedish Grammar (1722). Bishop Swedenborg died July 26, 1772. (W. B. H.)

Sweden, a kingdom in the northern part of Europe. In conjunction with Norway it forms the Scandinavian peninsula, springing out as the larger part of this peninsula. Its geographical position is between lat. 55° 20' and 69° N. and long. 11° 10' and 28° 10' E., and it extends not far from 1000 miles from north to south, and in its greatest breadth 500 miles from east to west. It is bounded on the north by Norwegian Lapland, east by Russia, south by the Gulf of Bothnia and the Baltic, and west by the Sound, the Cattegat, and Norway. The country has the characteristic features of all northern regions. Many parts of it, especially in the north, are barren and unproductive. Its immense forests are a source of great revenue, the wood being used not only for shipbuilding, but for the erection of the construction of the exterior as well as the interior parts of all buildings, and furnishing also a profitable article for export. All the grains peculiar to northern countries are raised in Sweden, not only in sufficient quantity for home consumption, but also for export.
In some of the metals it is very rich, and no small part of the wealth of the country comes from the working of mines of gold, silver, iron, copper, etc. The description of the natural productions of the country are concerned, will apply to Sweden, and renders any minute detail in this respect unnecessary. See Norway.

The great political divisions of Sweden are three—Gothen, Svealand, and Norriand. Gothen has thir- teen counties, and several churches, but several churches, it is true, giving a population of about 200,000 people. The largest city is Stockholm, having a population in 1874 of nearly 160,000. The only other city of considerable size in Sweden is Gothenburg, which has a population of over 80,000, but there is quite a large number of cities and towns having a population of over 12,000.

I. History.—The early history of Sweden is involved in great obscurity, nor do we find much in that history which will interest the general reader until we come down to the time of Gustavus Vasa, who, with great heroism, made an attack on Christian II, and succeeded in obtaining the throne in 1523. The next character that stands out prominently on the pages of Swedish history is Gustavus Adolphus, the great champion of the Protestant faith, and the powerful foe with whom Augustus and his son, Frederick, were constantly engaged during the Thirty Years' War. Gustavus was most fortunate in his counsellors and statesmen, especially in his chan- cellor, the wise and good Oxenstiern (q. v.), who, after the death of his sovereign at the battle of Lutzen in 1632, was instructed with the management of affairs during the minority of Christianus, the daughter of Gustavus, who succeeded to the throne. Passing over a few years, we come to the period during which the celebrated Charles XI sat on the throne, whose wonderful martial exploits form one of the most brilliant pages of modern history. He was the second son of Gustavus, and was succeeded in 1654 by his brother, Charles XII. At the beginning of the 17th century Sweden was at the height of its power and of its glory. When he closed his administration, and, by his death, Sweden came under the dominion of his sister, Ulrica Eleonora, its prospects were far from flattering. She surrendered herself to the control of her hus- band, Frederick, whose administration of the affairs of Sweden was most unfortunate and humil- itiating. In making terms of peace with the enemies with whom she had been at war for so long a time, cessions of large territories which were once within the boundaries of the kingdom had to be made. Ulrica dying without issue in 1697, passed into the hands of Adolphus Frederick, in fulfillment of one of the terms of peace prescribed by the empress of Russia in the treaty of 1743. His reign of twenty years was one of constant commotion and trouble. At his death, in 1711, his son Gustavus III succeeded to the crown and reign- ed twenty years, when he was assassinated, and his son Gustavus IV, a minor in age, came to the throne, with his uncle, the duke of Södermannland, as regent. For various reasons the young king, after a few years, was compelled to abdicate, and his uncle, the regent, under the title of Charles XIII, became king. Upon his de- cession Falck (Frederik), who had been as- elected king, taking the title of Charles XIV. During his reign of twenty-six years, Sweden enjoyed a good degree of prosperity, and recovered, in considerable measure, what she had lost under the reigns of his predecessors. At his death, in 1820, his son Oscar I succeeded to the throne, and spent the remainder of his years in developing the resources of the country and adding to its material wealth. His reign lasted fifteen years (1844-59), during the last two of which, on account of his ill-health, his son and successor had acted as regent. This son, Charles X, was king for thirteen years (1859-72). During his administration, liberal ideas gained the ascendency, and the result was the introduction into the government of many constitutional re- forms. Charles died in 1872, and was succeeded by the present king, Oscar II. II. Religion.—Christianity was first introduced into Sweden in the 9th century by Anschar, a monk of Corvey, Westphalia, although the Swedish historians assert that many of the people embraced the Gospel still earlier, and that in 818 a church was erected at Linköping by Herbert, a Saxon ecclesiastic. The labors of Anschar were followed up by his successor, Rembert, who founded six churches, but gained few converts. Several of Rembert's successors failed to prosecute the work, and Christianity became almost extinct; and it was not until 1026 that Sweden became a Christian state. The Reformation commenced in Sweden in 1524 under Gustavus I, who secretly encouraged the preaching of Lutheran doctrines, in order, when he had formed a party of sufficient strength, to seize the revenues of the dominant Church and abolish its worship. One of the most popular and able missionaries of the Reformation was Olaf Petri, who published the New Test. In the Swedish language. The bishops called upon the king to suppress the revision guilty of schism. On his death, with indifferently, and consented to a public disputation at Upsala between the Romish and Protestant parties. This controversy tended to open the eyes of the people to the errors of the Romish creed, and they welcomed the missionaries to their houses. Gustavus seized at once upon the two thirds of the national income held by the clergy; and he authorized the clergy to marry and mix with the world. He also declared himself a Lutheran, nominated Lutherans to the vacant sees, and placed Lutherans in the parish churches. In the course of two years the Rom- ish worship was solemnly and universally abolished, and the Confession of Augsburg was received as the only rule of faith. John, who succeeded to the throne in 1569, had married Catharine of Poland, a Roman Catholic, and soon displayed a decided leaning towards the old faith. In the fervor of his zeal he prepared a new liturgy, and the prayer that the king of Sweden was Conformable to the Catholic and Orthodox Church.
Sects of Christians, however, being tolerated. The king nominate his archbishop and the bishops from a list of names presented to him by the ecclesiastical authorities. The archbishop of Upsala is the head of the Swedish Church, having under him eleven bishops. All ecclesiastical matters of importance are subject to the decision of the king. A revolution in religious matters took place in Sweden, and we cannot fail in time, to make itself felt in its influence on the future destiny of the national Church. Especially prosperous have been the missionary operations of the Baptists under the labors of the Rev. Andreas Wiberg and his fellow-laborers. Thousands of converts have been gathered into Baptist churches, and this work of evangelization seems to be but in its infancy. In 1864 the Rev. O. P. Petersen was commissioned by the Missionary Society of the Methodist Episcopal Church to open missions in the Scandinavian missionary; he had, as an assistant missionary, Peter Larsen, who went to Sweden and visited several families at Calmar. A mission was begun in 1864 at Wisby, in the island of Gotland, and from that time the work has been very prosperous. The General Conference of 1876 ordered the Swedish mission to be organized into an Annual Conference, which was effected under the presidency of the bishop Andrews at Upsala, Aug. 7, 1877. The following is a summary of the statistics of the mission for 1879: Number of ministers, 54; local preachers, 69; Sunday-schools, 138; teachers and officers, 505; Sunday-school scholars, 5500; members and probationers, 6800; churches, 36; probable value of churches, $25,000.

III. Education.—To the credit of Sweden it is to be said that she has provided most liberally for the education of the young. There is a common-school system, instruction being gratuitous, and children not attending the regular government schools are obliged to furnish certificates that they are under the tuition of private teachers. The result of all this careful and systematic attention to education is that seldom is a Swede found who cannot read and write. The higher seats of learning are well patronized. The University of Upsala takes high rank among the literary institutions of Northern Europe. Its home is in the town from which it takes its name—Upsala, forty-five miles north-west of Stockholm, a place of some 12,000 inhabitants. The attendance of students is large, as high sometimes as 1500, who gather here not only to pursue the regular course of collegiate study, but to listen to lectures from the professors of theology, law, medicine, and philosophy. The university has a valuable library of over 100,000 volumes, several museums and collections, a botanical garden, and an observatory. Both the army and the navy are well represented by schools, the former having two well-conducted institutions, one at Carlberg and another at Marieberg, designed especially for the training of officers of the engineering and artillery departments, and the latter having a school for naval cadets at Stockholm. There are to be found in Sweden—as there are in all countries where the people are well educated—in all towns and villages, libraries, museums of art, etc., societies for the promotion of science and literature, publications in the form of newspapers and periodicals of many kinds, so that the diffusion of knowledge is wide-spread and healthy.

IV. Literature.—See Adlerfelt, Histoire Militaire de Charles XII (Paris, 1741, 5 vols. 12mo); Brem, Memoires of the Sovereign of Sweden and Denmark (London, 1804, 3 vols. 8vo); Arndt, Erinnerungen aus Schweden (Berlin, 1818, 8vo); Dunham, History of Denmark, Sweden, and Norway (London, 1833-34, 3 vols. 12mo); Gall, Reise durch Schweden in 1836 (Bremen, 1839, 2 vols. 12mo); Laing, Tours in Sweden and Norway, in 1850 (London, 1853, 8vo); Svanberg, Drame in Sweden and Gothland, with Etchings by the Way-side (ibid. 1847, 8vo); Thum, Beskrivning ifver Sveriges Rike (Stockholm, 1849-56, 7 vols. 8vo); Marryatt, Year in Sweden and Gothland (London, 1862, 8vo).
To observe in everything a propriety of behavior, and always to keep the connection of thought. To discourse with fidelity the functions of my employment and the duties of my office, and to render myself in all things useful to society.

He was a member of the principal scientific and philosophical societies of Northern Europe. In 1748, at the age of fifty-seven—in the full maturity of his powers, in the enjoyment of honorable station, and of an enviable reputation for piety and worth, learning, and extraordinary capacity—he ceased from his other labors and began to devote himself to theology, to the promulgation of the doctrines of the New Jerusalem Church. Having been, as he declared, called by the Lord to be the messenger of a New Dispensation of Heaven and Divine Truth, he was no longer at liberty to pursue his former courses of occupation and study, but thenceforward applied himself with all the diligence of his character, to the duties of his new office. The following are some of his own words with respect to this "call" and mission, written to Rev. Dr. Hartley, rector of Wimborne, Buckinghamshire, in 1768:

"I feel the sense of circumstances of his previous career, he continues, "But I regard all that I have mentioned as matters respectively of little moment; for, what far exceeds them, I have been called to a holy office by the Lord himself, who most graciously manifested himself in person to me during the year 1748, when he opened my sight to the view of the spiritual world, and granted me the privilege of conversing with spirits and angels, which I enjoy to this day. From that time I began to print and to publish various Arcana which have been seen by me or revealed to me as respecting heaven and hell, the state of man after death, the true knowledge of God, the spiritual sense of the Word, with many other important matters conducive to salvation and true wisdom. The only reason of my later journeys to foreign countries has been the desire of being useful, by making known the Glories of the life of the other world. At the time of my death I wrote, to the landgrave of Hesse-Darmstadt, "The Lord, our Saviour, had foretold that he would come again into the world, and that he would establish there a new Church. He has given this prediction in the Apocalypse (xxi and xxii), and also in several places in the prophets. But, as he cannot come into the world again in person, it was necessary that he should do it by means of a man, who should not only receive the doctrine of this new Church in his understanding, but also publish it by printing; and so the Lord had prepared me for this office from my infancy; he has manifested himself to me, and he has opened my sight to the view of the spiritual world, and granted me the privilege of conversing with spirits and angels, and thus introduced me into the spiritual world, and granted me to see the heavens and many of their wonders, and also the bells, and to speak with angels and spirits, and this continually for twenty-seven years. I declare, in all truth, that such is the fact. This favor of the Lord in regard to me has only taken place for the sake of the new Church which I have mentioned above, the doctrine of which is contained in my writings. Except in this chief object and in the character of his writings, by which the life and state of all life under the heavens was unfolded to him, his outward demeanor remained the same, with an increase of spiritual piety and prayerfulness, the same dignity and quiet urbanity of manner marked his intercourse with others, the same solid sense and enlightened intelligence characterized his conversation. His intercourse with the.split into this and the other world was uninterrupted. He retained his seat in the Swedish Parliament, and became more prominent in State affairs than he had ever been before.

Swedenborg's first theological publication, and his largest work, is the Arcana Coelestia, or Heavenly Mysteries, in which he revealed his visions and ideas, with a book of Genesis, with a large part of Exodus; in which, with many other observations and doctrines, the text is unfolded as to what he calls its "spiritual sense." The design seems to be to discover a Christian meaning and application in all things of the "law and the prophets;" the method is that of a poet; it appeals not so much like that of other Christian commentators, except in the extent to which the principles of symbolism are carried and the results arrived at. He maintains that such a secondary sense runs through all the books given by immediate divine dictation—Law, Former Prophets, Latter Prophets, and Psalms—and that these books are written according to a uniform law, called that of "correspondence," or the law of universal analogy between spiritual and natural things, which law it is one great object of his writings to unfold. His citations and comparison of Scripture texts are remarkably full and exhaustive.

From the time of his alleged "call," he wrote and published almost constantly until his death. The Arcana was finished in 1756. His succeeding works are, An Account of the Last Judgment, and the Destruction of Babylon; showing that all the Predictions in the Book of Daniel, and Prophecy in the New Testament, are fulfilled, and have been precisely fulfilled, as is clearly demonstrated (1758); The Divine Wisdom and its Wonders, and Concerning Hell; from Things Heard and Seen (ibid. 1758): The Four Leading Doctrines of the New Jerusalem, etc., Concerning the Lord, Sacred Scripture, Faith, and Life (Amster. 1768);—Angelic Wisdom Concerning the Divine Providence (ibid. 1768) —Angelic Wisdom Concerning the Divine Providence (ibid. 1768); The Apocalypse Revealed, wherein are Disclosed the Arcana there Foretold, which have hitherto Remained Concealed (ibid. 1768); The Apocalypse Explained according to the Spiritual Sense; in which are Revealed the Arcana which are there Predicted and have been hitherto Deeply Concealed (published after his death, in 5 vols. 8vo), a much larger and fuller work than the preceding:—The Delights of Wisdom concerning Conjugal Love; after which follow The Pleasures of Inanity concerning Scorpial Love (Amster. 1768). The True Christian Religion, containing the Universal Theology of the Church, Foretold by the Lord in Daniel vii, 13, 14, and in Revelation xxii, 1, 2 (ibid. 1771), contains his body of divinity, and is divided into fourteen chapters, under appropriate heads. There are also a number of minor tracts and tracts. All these works were written originally in Latin, and were distributed by the author to the principal universities and seats of learning.

In addition to his philosophical acquirements, Swedenborg was learned also as a Hebrew and Greek scholar. He died in London on March 29, 1772, at the age of eighty-nine, the last the truth of his alleged disclosures. He did not attempt to collect congregations, nor organize a church. For an account of the followers of his doctrines, see New Jerusalem Church. (W. B. H.)

Sweet, Eliezer, a minister of the Methodist Episcopal Church, was born at Gormah, Ontario Co., N. Y., in 1810. He was admitted into the Genesee Conference in 1847, in which conference and the East Genesee Conference he spent his ministerial life, three years of which he was supernumerary. He died Sept. 7, 1869. See Minutes of Annual Conference, 1870, p. 281.

Sweet, John Davis, a Baptist minister, was born at Kingston, Mass., Oct. 16, 1838. He was the son of a Unitarian clergyman. From his early life he developed a marked taste for literary pursuits, and in his preparatory studies took high rank as a scholar. In the fall of 1859 he entered Harvard College, and during the next year one year in advance, and distinguished himself by his application to his college tasks. Having overworked himself, he sought to recruit his health by foreign travel. Returning home, he embarked in business; but, his friends urging him to direct his attention to the ministry, he abandoned his business and entered the theological course of the Baptist Church in Billerica, Mass., in October, 1863, where he remained nearly five years—1863—88—
securing in a marked degree the affection of his Church and the respect of the people of the village in which he had his home. He was publicly recognised as pastor of the First Baptist Church in Somerville, Mass., May 4, 1888. He had commenced his work in the new field of his labor, and was prosecuting it with rare success, when he was called to the close of his service by the outbreak of a disease from which he died. The last records which he made in his diary a few days before his death was the following: "In looking over my ministry of nearly seven years, I feel I ought to drop on my knees and thank God that he ever called me to this glorious work. Some are always speaking of the time; but I can say of mine, that it has been one bright day, with few clouds to dim the brightness. I love the work." He died in August, 1869. See Warren [G. F.], Memorial Sermon. (J. C. S.)

Sweet Cane. See Canes.

Sweet Singers, a small Scottish sect, called from their founder, John Gib, the Guminers (q. v.). They forebore all worldly business, and professed to be entirely devoted to fasting and prayer in the open fields. The name "Sweet Singers" was given to them from their habit of "wailing a portion" of the more mournful psalms. They renounced and denounced the use of metrical psalms, the translation of the Bible, Longer and Shorter Catechisms, the Confession of Faith. The Covenant, names of months and days, the use of churches and churchyards, and all kinds of church custom and tribute, all sports, and, indeed, everything and everybody but themselves. They finally undertook a pilgrimage to the Pentland Hills, where they remained some days, with a resolution to sit till they saw the smoke of the desolation of Edinburgh, which their leader had predicted. They were committed to prison in Edinburgh in April, 1861, but were soon released. See Blunt, Dict. of Sects, s. v. M'Crie, Scottish Church History, ii. 195.

SWEET SINGERS, the English Rankers (q. v.) of the 17th century, so called by some contemporary writers.

Sweet Wine. See Wine.

Sweetman, Joseph, a Presbyterian minister, was born at Freehold, Monmouth Co., N. J., March 9, 1774. His mother was a granddaughter of Walter Kerr, who was banished from Scotland for his unwavering adherence to Covenantant principles and his opposition to prelacy. When Joseph was about three months old, his parents removed to Charlton, Saratoga Co., N. Y. He graduated at Union College in 1797, being one of the three students that composed the graduating class, and was the first to enter the theology school. He was privately ordained by Albany Presbytery, and installed pastor of Salem Church, Washington Co., N. Y., Sept. 17, 1800. On account of failing health, he resigned his pastoral charge Oct. 8, 1817, and was never again installed pastor of a Church, but from that time till his death devoted himself to aiding young men in preparing for the ministry. He was the founder of the "Sweetman Scholarship" in Princeton Theological Seminary, N. J. He died Dec. 10, 1863. Mr. Sweetman was vigorous in intellect and eloquent in manner. He was a very benevolent man: that he might have to give, he was industrious, economical, and prudent. See Wilson, Prep. Hist. Alumni, 1866, p. 57; also 1864, p. 198.

Sweetser, Seth, D.D., a Congregational minister, was born at Newportport, Mass., March 15, 1807. He was prepared for college in Newportport Academy, under the tuition of Leonard Withington, D.D., and graduated from Harvard College in 1827. He then taught school for two years (1827-29) in Genesee, N. Y., after which he returned to Harvard College as a tutor, remaining there until 1831, when he entered Andover Theological Seminary, where, after a full course of three years, he graduated in 1834. He was ordained Nov. 28, 1836, and was called to Gardiner, Me., where, after preaching two years, he was dismissed, Nov. 8, 1838, to the pastorate of the Calvinist Church, Worcester, Mass., was installed Dec. 19 of the same year, and remained in this office until his death, having had a colleague after 1874. Here the great work of his life was done. He was a member of the Committee of Correspondence of the American Board of Commissioners for Foreign Missions from 1854, one of the vice-presidents of the American Home Mission Society from 1864, and president of the American Education Society. From 1866 to 1873 he was overseer of Harvard College, during which time he published various Reports, Sermons, and Addresses; also several articles in the Bibliotheca Sacra. He died from the effect of a spinal injury and pulmonary disease combined March 24, 1878. (W. P. S.)

Swell, in music, a set of pipes in an organ with a separate key-board, and forming a separate department, which are capable of being increased or diminished in intensity of sound by the action of a pedal on a series of shades or shutters overlapping each other like Venetian blinds. At the close of the 17th century, in which period they were first developed, they are enclosed. On a well-constructed swell a practiced performer can imitate not only a gradual crescendo and diminuendo, but also a sforzando, a very small opening sufficient to make an immediate burst upon the ear; while, when the shutters are closed, an imitation of an echo is produced.

Swelling ("mâle, gâne, "excellency," "pride," etc.) of Jordan is a phrase occurring in the A.V. at Jer. xii. 5; xlix. 19; 1, 44, but which should be rendered "pride." See "Pride." In Zech. xi. 3, 4, the word is used of verdure and thickets along the banks, lined with willows, tamarisks, and cane, in which the lions once made their covert; but has no allusion to overwhelming billows from a rise of the waters (Reland, Palæst. p. 274). See JORDAN.

Swert (or Sweerts), Francis, a Flemish historian and antiquary, was born in Antwerp in 1567. He devoted much of his time to study and published a great many works which brought him considerable reputation: Narrationes Historiae in Deorum Gradequam Capita, etc. (Antwerp, 1602, 4to);—Lactinius in Funere Ab. Ortelio, cum Ortelio Vite (1601, 8vo);—Meditationes J. Cardinalis de Turrecuvissi in Vicum Christi, in Vina Casti, etc. (Cologne, 1607, 12mo);—Selecta Orbis Christianae Deliciae (ibid.,1608,1625, 8vo). He died in 1629.

Swift, Eliza Pope, D.D., an eminent divine of the Presbyterian Church, was born at Williamsport, Mass., Aug. 12, 1792. His paternal grandfather was the Hon. Heman Swift; his father, the Rev. Seth Swift, pastor at one time of the Congregational Church in Williamsport; and his mother was a daughter of Rev. John Eliot, well known in the annals of American history as the "Apostle to the Indians." He graduated with honor at Williams College, Sept. 1, 1818, and at the Theological Seminary, Princeton, N. J., in 1816; was licensed by New Brunswick Presbytery at Lawrenceville, N. J., April 24, 1815, and on Sept. 9 of the same year he met the American Board of Commissioners for Foreign Missions at Hartford, Conn., and was accepted as a foreign missionary, though he was informed that he could not be sent abroad for some months. On Sept. 9, 1817, he was ordained by a Congregational council as an evangelist to the heathen in China. The Rev. Lyman Beecher, D.D., preaching the ordination sermon in Park Street Church, Boston, Mass. The interval between his licensure and his entering a permanent field of labor, a period of some two and a half years,
was filled up with laborious efforts in behalf of the for-

gain missionary cause—travelling, for the most part, on

in his family in great poverty, and they were supported

in the part of the board, to relinquish his long-cherished

desire of being a foreign missionary. In October, 1818, he

by relatives. Swift, when six years old, was sent to

the royal college, and remained there until re-

moved to Trinity College, Dublin, which he entered as

a pensioner, April 24, 1682. He received his degree

of A.B. Feb. 16, 1685, but he remained in the college

until 1688, when he went to England to visit his moth-

er, and was on her recommendation admitted into the

house of Sir William Temple. In 1694 he went to Ire-

land, took orders in the Church—that of deacon Oct. 18,

1694, of priest Jan. 13, 1695—and obtained a small liv-

ing, which he threw up in two years and returned to

England. He lived as a friend with Temple until the

death of the latter, Jan. 27, 1698, and in 1699 accom-

panied lord Berkeley to Ireland as his chaplain and

private secretary. Being deprived of this office, he was

given the rectory of Agher, and the vicarages of Lar-

acor and Rathbeggan, worth altogether £200 a year. The

his family in great poverty, and they were supported

in his family in great poverty, and they were supported

by relatives. Swift, when six years old, was sent to

the school of Kilkenny, and remained there until re-

moved to Trinity College, Dublin, which he entered as

a pensioner, April 24, 1682. He received his degree

of A.B. Feb. 16, 1685, but he remained in the college

until 1688, when he went to England to visit his moth-

er, and was on her recommendation admitted into the

house of Sir William Temple. In 1694 he went to Ire-

land, took orders in the Church—that of deacon Oct. 18,

1694, of priest Jan. 13, 1695—and obtained a small liv-

ing, which he threw up in two years and returned to

England. He lived as a friend with Temple until the

death of the latter, Jan. 27, 1698, and in 1699 accom-

panied lord Berkeley to Ireland as his chaplain and

private secretary. Being deprived of this office, he was

given the rectory of Agher, and the vicarages of Lara-

acor and Rathbeggan, worth altogether £200 a year. The

hired to the board of Foreign Missions of the G enera l

Assembly of the Presbyterian Church" (a his-

tory of which is published in the Presb. Hist. Almanac

for 1861). He was also deeply interested in theological

education, and took an active part in the establish-

ment of the Allegheny Theological Seminary, Allegheny,

Pa.; and was connected with it from its inception until

his death, a period of forty years. He was one of the first

directors, also an agent to collect funds, and the first in-

structor in theology, which office he held for about two

years and for which he declined to receive any remu-

eration. In 1833 he received a unanimous call to be

come the pastor of the First Presbyterian Church in

Allegheny, and after about two years of service during

which time he made such arrangements as to secure

the continued efficiency of the Missionary Society, he

accepted the invitation, and was installed in this, his

last, longest, and most important pastorate. He died

April 3, 1865. Dr. Swift was a man of uncommon pow-

er of intellect and unusual tenderness of heart. As a

Christian he was pre-eminent for his humility and de-

votion. He took a deep interest in all educational,

eleemosynary, or Christian enterprises, and was a pat-

riot in the truest sense of the term. He was a leader

in all the various courts of the Church, made so by the

breath of his views, the wisdom of his counsels, the

integrity and loveliness of his character, and his mani-

fest freedom from all selfishness and ambition. It

was, however, as a preacher that he shone most con-

spicuously. See Wilson, Presb. Hist. Almanac, 1866,
p. 172.

Swift, Job, a Congregational minister, was born

at Sandwich, Mass., June 17 (O. S.), 1745, and removed

in early youth to Kent, Conn. He entered Yale College

in 1765, having made a profession of religion

while in college. He studied theology under Dr. Bel-
lany, was licensed to preach in 1766, and in 1767 be-

came pastor of the Church in Richmond, Mass. After

a pastorate of seven years he left Richmond, and, hav-

ing preached in different places for about a year, be-

came pastor in Amenia, N. Y. In the spring of 1788

he removed to Manchester, Vt., where he preached be-

tween two and three years. On May 31, 1786, he

was settled over the Church in Bennington, from which

he had made many missionary tours into the western and

northern sections of the state. Leaving Bennington June 7,

1801, he removed to Addison, on Lake Champlain, where

he purchased a farm. He established a Church there

and officiated as its pastor, and also continued his mis-

sionary labor. He died on a missionary tour at Enos-

burg, Oct. 20, 1804. Mr. Swift acted as a chaplain in

the army during most of the Revolutionary war. See

Sprague, Annals of the Amer. Pulpit, i, 640.

Swift, Jonathan, D.D., a prelate and satirist,

was born in Dublin, Nov. 30, 1667, and when about a year

old was carried by his nurse to Whitehaven, Cumberland,

England, where he was kept for three years. His fa-

ther, who died three months before he was born, left

Laracor Church.

The prebend of Dunlavie was bestowed upon him soon after-

wards. He still continued to reside with lord Berkeley

until 1790, when the latter returned to England and Swift

took possession of Laracor. He performed his duties as

a country clergyman with exemplary dili-

gence. His appointment to the deanery of St. Pat-

rick's was made Feb. 25, 1713, and early in June he left

England to take possession. He soon returned to Eng-

land on a political mission, and again visited England

to solicit the remission of the "first-fruits." In 1741

Swift's memory failed, his understanding was much im-

paired, and he became subject to violent fits of passion

which soon terminated in furious lunacy. In 1742 he

took into a state of quiet idleness, and died Oct. 19, 1745.
Dr. Samuel Johnson (Lives of the English Poets) gives
the following estimate of dean Swift: "He was a chu-

rchman rationally zealous; he desired the prosper-

ity and maintained the honor of the clergy; of the Dis-

senters he did not wish to infringe the toleration,

but he opposed their encroachments." To his duty as

dean he was very attentive. In his Church he restored

the practice of weekly communion, and distributed the

sacramental elements in the most solemn and devout

manner with his own hand. He came to Church every

morning, preached commonly in his turn, and attended

the evening meetings, that it might not be negligently

performed. The suspicions of his irreligion proceeded

in a great measure from his dread of hypocrisy; in-

stead of wishing to seem better, he delighted in seem-

ing worse than he was. In London he went to early

prayers lest he should be seen at Church; he read

prayers to his servants every morning with such dexter-

ous secrecy that Dr. Delany was six months in his house

before he knew it. He gave great attention to poli-

tical matters, and, indeed, it is to his political writ-

ings that he is principally indebted for his fame. In

addi-

tion to these works, some poems, etc., he published sev-

eral Sermons and Tracts upon religious and ecclesias-

tical matters. Of his works several editions have been

printed, that of Sir Walter Scott being considered the

best (Edinb. 1819, 19 vols. 8vo). See Allibone, Dict. of
SWIFT

Swift, Seth, brother of Job Swift, was a Congregational minister. He was born in Kent, Conn., Oct. 30, 1749, graduated at Yale in 1774, studied theology under Dr. Belamy, and was ordained pastor of the Church in Williamsburg, Mass., May 27, 1776, which charge he retained until his death, Feb. 13, 1807. He was greatly beloved by his people, and honored and revered by the whole community. See Sprague, Annals of the Amer. Pulpit, i, 645.

Swift Beast. See Camel.

Swinden, Thomas, an English clergyman, was rector of Cuxton, Kent, in 1688, and vicar of Shorne in 1689. He died in 1719. He published, Sermon on Luke xii, 2 (1718, 8vo) — An Enquiry into the Nature and Place of Hell, which he located in the sun (Lond. 1714, 8vo; translated into French by Bien [Amst. 1728, 8vo], and German). See Allibone, Dict. of Brit. and Amer. Authors, a. v.

Swine (_swine, chair; Sept. εἰλος, εὔος, σύρ; New Test. χοῦρος). Allusion will be found in the Bible to these animals, both in their domestic and in their wild state. See Tristram, Nat. Hist. of the Bible, p. 145; Wood, Biblical Animals, p. 292.

1. The flesh of swine was forbidden as food by the Levitical law (Lev. xi, 7; Deut. xiv, 8). The abhorrence which the Jews as a nation had of it may be inferred from Isa. lxv, 4, where some of the idolatrous people are represented as “eating swine’s flesh,” and as having the “broth of abominable things in their vessels;” see also Is. lix, 3, 17, and 2 Mach. vi, 18, 19, in which passage we read that Eleazar, an aged scribe, when compelled by Antiochus to receive in his mouth swine’s flesh, “spit it forth, choosing rather to die gloriously than to live stained with such an abomination.” The use of swine’s flesh was forbidden to the Egyptian priests, to whom, says Sir G. Wilkinson (Anc. Egypt., i, 822), “above all meats it was particularly obnoxious” (see Herodotus, ii, 47; Elian, De Nat. Anim. x, 16; Josephus, Apion, ii, 14), though it was occasionally eaten by the people. The Egyptians also disallowed the use of swine’s flesh (see Pliny, H. N., viii, 52; Koran, ii, 175), as were also the Phoenicians, Ethiopians, and other nations of the East.

1. Sows with young pigs. 2. Young pigs. 3. Boars. 4. a is a whip, knotted like some of our own. 5. a pund, or noose, often used as the emblem of a shepherd.
that our Lord sent the devils into the swine. He merely permitted them to go, as Aquinas says, "quod autem mortem in morte pretiosi sunt non fuerit operationi divina miraculi, sed operationi daemonum e permissione divina;" and if these Gadarene villages were Jews and owned the swine, they were rightly punished by the loss of that which they ought not to have had at all. See Tacit. Hist. v, 4; Juven. Sat. xiv, 98; Macrobi. Sat. ii, 4; Josephus, Ant. xiii, 8, 5; Philo, Opp. ii, 581; Mishna, Baba Kama, vii, 7; Talm. Hieros. Shekal. fol. 47, 8; Lightfoot, Hor. Heb. p. 315 sq.; Otho, Lex. Rab. p. 590 sq.

2. The wild boar of the wood (Psa. lxxx. 13) is the common Sus scrofa which is frequently met with in the forests of Palestine, especially in Mount Tabor. The allusion in the psalm to the injury the wild boar does to the vineyards is well borne out by fact. "It is astonishing what havoc a wild boar is capable of effecting during a single night; with that eating and trampling underfoot, he will destroy a vast quantity of grapes." (Harley, Researches in Greece, p. 294). See Boar.

Swinton, ASA V., a minister of the Methodist Episcopal Church, was born at Danvers, Mass., in 1802. He joined the New England Conference on trial in 1831. When the Providence Conference was formed in 1841, he continued on the district of which he was previously elder, and thus became a member of the latter Conference. He continued to labor, with the exception of one year (supernumerary), until 1863, his death taking place at Monument, Mass., Oct. 12 of that year. See Minutes of Annual Conferences, 1864, p. 51.

Swiney, SAMUEL T., a minister of the Methodist Episcopal Church, South, was born in West Feliciana Parish, La. Of the circumstances of conversion, etc., we have no particulars. He joined, probably, the Mississippi Conference in 1856, and after a number of years became supernumerary, and died Aug. 14, 1869. See Minutes of Annual Conferences of the M. E. Church, South, 1869, p. 341.

Swindon, GEORGE, an English clergyman, was vicar of Great Kyme, Bucks, from which he was ejected for nonconformity in 1662. He afterwards became pastor at Maidstone, where he died in 1678. His writings are: Heavens and Hell Epitomized (London, 1659, 8vo; 1683, 4to) ;—Christian Man's Calling (in 3 pts. 4to: i, 1682; ii, 1683; iii, 1685) ;—also Sermons. See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Darling, Cyclopaedia, s. v.

Swinton, JOHN, an English divine and antiquary, was born at Honiton, Devonshire, educated at Wadham College, Oxford, was chaplain to the factory at Leithorn, and died April 4, 1777, keeper of the university records at Oxford. He contributed vols. vi and vii (The Life of Mohammed and the History of the Arabs) to the Modern Universal History, and wrote many learned dissertations on Phoenician and other antiquities. See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Chalmers, Biog. Dict., s. v.

Swiftn, SR., an English ecclesiastical of the 9th century, was chaplain to king Ecgbert, and tutor to his son Ethelwulf, by whom he was made chancellor. He had the charge of the education of king Alfred, whom he accompanied to Rome. In 852 he was consecrated bishop of Winchester, and in the next year he recurred to him that he was "a rich treasure of all virtues, and those in which he took most delight were humility and charity to the poor." The origin of the tribute called "Pater's pence" (q. v.) has often been assigned to Swiftn, and he is said to have procured an act of the Witenagemote enforcing, for the first time, the universal obligation of paying tithes. Swiftn died July 2, 862. See Mrs. Jameson, Legends of the Monastic Orders, p. 89.

Swifth's Day. The following is said to be the origin of the old adage "If it rain on St. Swifth's Day, there will be rain more or less for forty succeeding days." Swifth is said to have been an English count or chester—to which rank he was raised by king Ethelwolf the Dane—was canonized by the then pope. He was singular for his desire to be buried in the open church-yard, and not in the chance of the minister, as was usual with other bishops, which request was complied with; but the monks, on his being canonized, taking it into their heads that it was disgraceful for the saint to lie in the open church-yard, resolved to remove his body into the choir, which was to have been done with solemn procession on July 15. It raised, however, so violently on that day, and for forty days succeeding that they had hardly ever seen rain, and made them set aside their design as heretical and blasphemous; and instead they erected a chapel over his grave, at which many miracles are said to have been wrought. The value to be placed upon the popular notion that if it rain on July 15 it will do so for forty succeeding days may be learned from the following facts from the Greenwich observations for twenty years: It appears that St. Swifth's Day was wet in 1841, and there were 23 rainy days up to Aug. 24; 1845, 26 rainy days; 1851, 18 rainy days; 1858, 18 rainy days; 1854, 16 rainy days, and in 1856, 14 rainy days. In 1842 and following years, St. Swifth's Day had 15 rainy days, and the result was, in 1842, 12 rainy days; 1843, 12 rainy days; 1844, 20 rainy days; 1846, 21 rainy days; 1847, 17 rainy days; 1848, 31 rainy days; 1849, 20 rainy days; 1850, 17 rainy days; 1852, 19 rainy days; 1854, 18 rainy days; 1857, 14 rainy days, 1858, 14 rainy days; 1860, 29 rainy days, and in 1860, 29 rainy days. These figures show the superstition to be founded on a fallacy, as the average of twenty years proves rain to have fallen upon the largest number of days when St. Swifth's day was dry.

Switzerland, the Helvetia of the Latines, is one of the smallest of the European states, lying between 45° 49' and 47° 50' N. lat., and 5° 55' and 10° 00' E. long., its extreme length from E. to W. being 210 miles, and its extreme breadth not far from 140 miles. It has an area of nearly 16,000 English miles, and is bounded north by Germany; from which it is separated by the Rhine and Lake Constance; on the east by Austria, the valley of the Rhine and the Rhetian Alps being the dividing line between the two countries; on the south by Italy and France, and on the west by France. It is the most mountainous country in Europe, being covered throughout its entire extent by the Alps, which are grouped into several ranges of varying height. The highest peaks of the Alps in Switzerland are Matterhorn, or Mont Cervin, Finster-Aarhorn, and Jungfrau. Mont Blanc was once included in the mountains of Switzerland, but at the close of the Franco-Italian war it was transferred to France. The principal lakes of Switzerland are Lake Neuchâtel, Lake of Geneva, Lake Thun, Lake Lucerne, Lake Zurich, and Lake of Constance. Its great rivers are the Rhine and the Rhone, with their many tributary streams. The glaciers are the great feeders of these streams and rivers, and are in themselves of great interest to the lover of nature. The climate of Switzerland is generally cold, as might be expected, the region of perpetual snow being more extensive than in any other mountain system in Europe. In the lowlands and valleys the temperature is warmer, and many of the productions which grow so luxuriantly on the southern Alps are raised in the culture furnishes the chief employment to the inhabitants of this country. There are some-kinds of manufactures carried on which are productive, such as cotton, embroidery, and silk stuffs of various kinds. The Swiss also pay great attention to the manufacture of watches, the annual number of which is 400,000, and very few, if any, being not far from seventeen and a half millions of dollars.

I. History.—Our earliest knowledge of Switzerland carries us back to the time when the inhabitants were
alluded to in Roman history as the Helvetii. In those early days, not far from a century before the commencement of the Christian era, they successfully resisted the attacks of the Romans. The Commentaries of Cæsar give us interesting accounts of the attempts of the legions under his command to subdue these hardy dwellers in their wild and solitary condition. After many years, by degrees, the Roman arms brought these proud-spirited foes into submission, and for several centuries the conquerors held dominion over the country. Invasions from the northern tribes of Europe laid waste many sections of the land. These barbarians of the North were long inroads had been made upon the Franks, and Christianity became the prevailing faith. Without tracing the political history of Switzerland through the various phases through which it passed during several centuries, it may suffice to say that it became a federal republic in 1548, and the people are now living under a revised constitution, which was accepted by them in the spring of 1874. This constitution guarantees to the inhabitants of the twenty-five cantons into which Switzerland is divided those rights and immunities which are found in all properly constituted republics. All citizens are equal in the eye of the law. Freedom of conscience prevails, and the liberty of conscience everywhere prevails. The press is free. The right of association is guaranteed, with the exception that the Jesuits and organizations kindred to them are forbidden. The capital of the confederated states is Berne.

II. Religion.—Christianity was first introduced into Switzerland about A.D. 610 by St. Gall, a native of Ireland and pupil of Columban. He was one of twelve Irish monks who labored to disseminate Christianity throughout Europe. They first took up their residence at the head of Lake Zurich and, burning with zeal, set fire to the pagan temples, casting the idols into the lake. Driven away by the inhabitants, they settled at Brengutz, but at the end of two years were banished from this place also, and all left for Italy except St. Gall, who was too ill to be removed. He repaired to a sequestered spot and with a few adherents built the monastery of St. Gall in the canton of the same name. After his death, several of his scholars and monks from Ireland continued his work, until paganism lost its hold and Romanism was substituted in its place.

With reference to the Reformation, D'Aubigné says: "The distinguishing feature was the Reformation, which was then entirely German, and was propagated in the eastern and northern parts of the confederation. Between 1526 and 1532 the movement was communicated from Berne; it was at once German and French, and extended to the centre of Switzerland, from the gorges of the Jura to the deepest valleys of the Alps. In 1532 Geneva became the focus of the light; and the Reformation, which was here essentially French, was established on the shores of the Leman Lake, and gained strength in every quarter." The main instrument in commencing and carrying forward the work of Reformation in Switzerland was Ulrich Zwingli (q. v.). In 1518 he commenced the study of the Greek language; and from 1516, when he began to expound the Word of God as preacher in the Abbey of Einsiedeln, Zwingli dates the Swiss Reformation. The influence of the pure faith was so extensively felt, so that, by the year 1522, we find Erasmus estimating those in the cantons "who abhorred the new of Rome" at about 200,000 persons. Gradually changes in the mode of worship were introduced. In 1523 we find the Council of Zurich requiring that "the pastors of Zurich should rest their discourses on the words of Scripture alone;" the" excommunications" of the Church were no longer visited on the sinner; in 1525 the mass was superseded by the simple ordinance of the Lord's supper. In Appenzell the Reformation began about 1521, in Schaffhausen about the same time. The sacramentarian controversy between Luther and Zwingli, and their respective followers, was detrimental to the cause of truth in both Germany and Switzerland; and in the latter, as well as in the former, the rise of the Anabaptist body was both a source of injury and reproach. In the year 1527 Berne became a Reformed canton, and for mutual security allied itself, in the year 1528, with Zwickau and Lucerne. In the year 1530, when the Council of Augsburg, when the Lutheran Confession was presented, the Swiss divines presented another drawn up by Bucer, known, from the four towns it represented—namely, Constance, Strasburg, Lindau, and Meiningen—as the Tetricopolitan Confession. The two confessions only differed as to the date in which the church was understood to be really present in the Lord's supper. At this time, also, Zwingli individually presented a confession, to which we find Eck replying. The five Romish cantons, having made ample preliminary preparations, determined by force of arms to check the further progress of Reformed principles in the confederation. The French sympathies of Zwingli, and his hostility to Charles V, deprived the Protestant cantons of German support in the approaching conflict. The Protestant cantons formed a confederacy, and by a resolution adopted at Aarau, May 12, 1531, instituted a strict blockade of the five cantons. The confederates threatened the cantons with its attendant miseries, these last determined on war, and entered the field on Oct. 6 of the same year, the first engagement, taking place at Cappel, proving most disastrous to Zurich and fatal to Zwingli. The Reformation now took possession of the city of Geneva, which was first proclaimed by William Farel about 1532. He was banished, but was succeeded by Anthony Frommenwyl, who soon shared the same fate. The following year they were recalled, and the bishops fled. In 1535 the Council of the city proclaimed their adherence to the Reformed faith. The following year witnessed the arri

---

The text is a detailed historical account of Switzerland's early history, focusing on its transition to Christianity and the Reformation. It also highlights the role of figures such as St. Gall and Zwingli. Further sections discuss the development of the Swiss Confederation and its political and religious reforms. The text concludes with a brief overview of the Reformation's impact on the region, mentioning key figures such as Erasmus and the Council of Constance.
eclesiastical government is in a certain sense under the control of the cantonal government. The hope has attempted to do certain things in the regulation of the affairs of those over whom he claims to exercise jurisdiction, but his acts have been declared illegal by the civil authorities, and they are null and void. The "Old Catholics" have obtained possession of several parish churches, and the "Protestant" churches, but the constitution of Switzerland grants complete and absolute liberty of conscience and of creed. No one can incur any penalties whatsoever on account of his religious opinions. No one is bound to contribute to the expenses of a Church to which he does not belong. Free worship is guaranteed, civil marriage is compulsory, and subsequent religious service is optional. The cantons have the right to maintain peace and order between different religious communities, and to prevent encroachments of ecclesiastical authorities upon the rights of citizens. Bishops must receive the approval of the federal government. Liberty of press, petition, and association is guaranteed; but Jesuits, and all religious orders and associations which are affiliated to them, are prohibited. Of late years much evangelizing work has been done by the Presbyterian, Baptists, and Methodists. In 1849 the Methodists Episcopal Church organized the "German and Swiss Mission," which in 1856 was constituted the German Mission Conference, with Switzerland as one of its districts. The following are its statistics for 1879: Number of preachers, 15; local preachers, 7; Church members, 3441; probationers, 673; Sunday-schools, 119; Sunday-school scholars, 7286; churches, 17; value of churches, $85,296. There is also a Methodist book establishment at Bremen and a theological school at Frankfort-on-the-Main.

See Mémoires et Documents publiés par la Société d'Histoire et d'Archéologie de Genève (Geneva, 1841-47, 5 vols.); Wilson, Hist. of Switzerland, in Landry's Cabinet Cyclopaedia (1825-36, 2 vols.); Inglish, Switzerland (London, 1840, 8vo); Shaw, History of Switzerland (N. Y. 1875).

Sword, in the A. V., is the usual rendering of מַשְׂכֶּר (from מָשָׂך, to lay waste), which was simply a large flake, as it is rendered in Josh. v, 2; Ezek. v, 1, 2. Less frequent words are לֹאֵש, retouch, Ps. xlii, 10 (11), a crushing or outbreak ("slaughter"); Ezek. xxii, 27; מַשְׂכֶּר, skilf (Job xxxii, 18; xxxvi, 12; Joel ii, 8), a dart, as elsewhere rendered; N. T. ἤποπλατύνει, a snare, or long and broad sword (Luke ii, 35; Rev. i, 16; ii, 12, 16; vi, 8; xiv, 15, 21); elsewhere ἄκρωτον, a dagger, or short sword. See ARMON.

1. The first mention of this principal offensive weapon in Bible history is in the narrative of the massacre at Shechem, when "Simeon and Levi took each man his sword, and came upon the city boldly and slew all the males" (Gen. xxxiv, 25). But there is an allusion to it shortly before in a passage undoubtedly of the earliest date (Ewald, i, 446, note) the expostulation of Laban with Jacob (Gen. xxxi, 25). After this, during the account of the conquest and occupation of the land, there is no mention of the sword is frequent, but very little can be gathered from the casual notices of the text as to its shape, size, material, or mode of use. Perhaps if anything is to be inferred it is that the chéréb was not either a heavy or a long weapon. That of Ehud was only a cubit, i.e. eighteen inches long, so as to have been concealed under his garment, and nothing is said to lead to the inference that it was shorter than usual, for the "dagger" of the A. V. is without any ground, unless it be a rendering of μαχαίρα of the Sept. But even assuming that Ehud's sword was shorter than usual, yet the description given of the chéréb, ii, 16, and xx, 8-10, and also of the case with which David used the sword of a man so much larger than himself as Goliath (1 Sam. xvii, 51; xxx, 9, 10), goes to show that the chéréb was both a lighter and a shorter weapon than the modern sword. What frightful wounds one blow of the sword of the Hebrews could inflict, if given even with the left hand of a practiced swordsman, may be gathered from a comparison of 2 Sam. xx, 8-12 with 1 Kings ii, 5. A ghastly picture is there given us of the murdered man and his murderer. The unfortunate Amasa actually disembowelled by the single stroke, and "swallowing" in his blood in the middle of the road—the treacherous Joab standing over him, be-spartered from his "girdle" to his "shoes" with the blood which had spouted from his victim!

The chéréb was carried in a sheath (כָּרָה), 1 Sam. xvii, 51; 2 Sam. xx, 8, only; תַּשְׂכֶּר, 1 Chron. xxii, 27, only) singly by a girdle (1 Sam. xxxv, 18) and resting upon the thigh (Ps. xlv, 8; Judg. iii, 16), or upon the hipline (2 Sam. xx, 8). "Girding on the sword" was a symbolical expression for commencing war, the more forcible because in times of peace even the king in state did not wear a sword (1 Kings iii, 24); and a similar expression occurs to denote those able to serve (Judg. viii, 10; 1 Chron. xxv, 5). Other phrases, derived from the chéréb, are, to smite with the edge (literally, "mouth"); comp. avage; and comp. "draws"; Isa. i, 29) of the sword" —"slain with the sword"—"men that drew sword," etc.

Swords with two edges are occasionally referred to (Judg. iii, 16; Ps. cxlix, 6), and allusions are found to "wetting" the sword (Deut. xxxxi, 42; Ps. lxxv, 5; Ezek. xxi, 8). There is no reference to the material of which it was composed (unless it be Isa. ii, 4; Joel iii, 10); doubtless it was of metal, from the allusions to its brightness and "glittering" (see the two passages quoted above, and others), and the ordinary word for blade, viz. מַשְׂכֶּר, "a flame." From the expression (Josh. v, 2, 3) "swords of rock," A. V. "sharpen knives," we may perhaps infer that in early times the material was flint.

Smith—See Knife.

Ancient Persian Swords and Daggers.

[See the sculptures at Persepolis; b. From those at Shiraz.] c. From those at Taht-i-Bozestan.

2. The Egyptian sword was straight and short, from two and a half to three feet in length, having generally a double edge, and taping to a sharp point. It was used for cut and thrust. They had also a dagger, the handle of which, hollowed in the centre, and gradually increasing in thickness at either extremity, was inlaid with costly stones. wood, or metals; and the pomell of that worn by the king in his girdle was frequently surmounted by one or two heads of a hawk, the symbol of Pharaoh, or the Sun, the title given to the monarchs of the Nile. It was much smaller than the sword; its blade was about ten or seven inches in length, tapering gradually in breadth, from one inch and a half to two thirds of an inch, towards the point; and the total length, with the handle, only completed a foot or sixteen inches. The blade was bronze, thicker in the
Ancient Egyptian Daggers.
1. Stuck in the belt; 2. Without the sheath; 3. In the sheath; 4. Back of the sheath.

Middle than at the edges, and slightly grooved in that part; and so excellently was the metal worked that some retain their pliability and spring after a period of several thousand years, and almost resemble steel in elasticity. Such is the dagger of the Berlin collection, which was discovered in a Theban tomb, together with its leather sheath. The handle is partly covered with metal, and adorned with numerous small pins and studs of gold, which are purposely shown through suitable openings in the front of the sheath; but the upper extremity consists solely of bone, neither ornamented nor covered with any metal casing. Other instances of this have been found; and a dagger in Mr. Salt's collection, now in the British Museum, measuring eleven and a half inches in length, had the handle formed in a similar manner. There was also a falchion called *shoph* or *shoph*, resembling in form and name the *pioz*, or *chopper*, of the Argives, reputed to be an Egyptian colony. It was more generally used than the sword, being borne by light- as well as heavy-armed troops; and that it was a most efficient weapon is evident as well from the size and form of the blade as from its weight, the back of this bronze or iron blade being sometimes cased with brass (Wilkinson, Anc. Egypt. i, 358).

3. Assyrian swords, like the sceptres, as seen on the monuments, were often richly decorated. The hilt was generally ornamented with several lions' heads, arranged to form both handle and cross-bar. The scabbard or sheath was elaborately embossed or engraved (Layard, Nineveh, ii, 234).

Ancient Assyrian Sword.
1. The hilt; 2. End of the sheath.

4. The Greek and Roman sword (*gladius*, *fētus*, poet. *ἀμφώ*, *φόρμανος*, a glaive, by the Latin poets called *ensis*) had generally a straight two-edged blade, rather broad, and nearly of equal width from hilt to point. The Greeks and Romans wore them on the left side, so as to draw them out of the sheath (*eopino*, *κολιτις*) by passing the right hand in front of the body to take hold of the hilt with the thumb next to the blade. The early Greeks used a very short sword. *Iphicrates*, who made various improvements in armor about B.C. 400, doubled its length. The Roman sword was larger, heavier, and more formidable than the Greek (see Smith, Dict. of Antiq. s. v. "Gladius"). The swords of the most ancient times were made of bronze or copper, hardened by some process now unknown; and this continued to be the case long subsequent to the Greeks and Romans, as well as among the Phoenicians (Kitto, Piet. Bible, note at Num. xxxi, 8).

5. The sword is the symbol of war and slaughter (Lev. xxvi, 25; Isa. xxxiv, 8; Rev. xiv, 19, 18), of divine judgment (Deut. xxxii, 41; Ps. xviii, 18; Jer. xii, 12; Rev. i, 16), and of power and authority (Rom. xiii, 4). The Word of God is called "the sword," i.e. the weapon or instrument, of the Spirit (Eph. vi, 17).

Modern Oriental Swords and Daggers.

- a. Syrian sabre; b. Syrian derwish's sabre; c. Turkish sabre; d. Dagger of the prince royal of Persia; e. Athenian dirk; f. Tamga of a domestic of the Turkish grand vizier; g. Janissary's dagger; h. Bedouin Arab's dagger and sheath.

**SWORD, BROTHERS of the**, was an order of knight sword-bearers, founded at the beginning of the 18th century in Livonia; hence the order was sometimes called Livonian Brethren of the Sword. In 1237 the Order of the Teutonic Knights amalgamated with them, and they together gradually subdued all the territories surrounding the Gulf of Riga. (See illustration on opposite page.)

**Sword dance**, in Hindūland, is a religious dance performed by Hindū bayaderes who have dedicated themselves to some deity, and involving the display of great skill. Swords are fastened, edge upward, to two long poles, which are inclined against a wall so as to form two half-ladders. The bayaderes ascend these and dance on them, assuming the most graceful attitudes, and displaying inimitable skill and grace of bodily form. While the art of dancing on such vibrating blades may be exceedingly difficult, the reward of the dancers is correspondingly great, so that they are not unfrequently enriched by the receipts from a single performance.
Sword Brother.

**Swords** and a ducal cap are blessed on Christmas eve, at the midnight mass, by the pope, in order to be sent to favored kings, as Edward IV, 1478; Henry VII, 1505; Henry VIII, 1517. The last gift of this kind was made by Leo XII to the duke d'Angoulême in 1825.

**Swormstedt, Leroy**, a prominent minister of the Methodist Episcopal Church, was born in Maryland Oct. 4, 1798. When eighteen years of age he professed conversion, and was licensed to preach Jan. 2, 1818. His entrance into the itinerant work was through the Ohio Conference in August, 1818. He was ordained deacon in 1820, and elder in 1822. In 1830 he was appointed presiding elder, and occupied that office until elected assistant agent of the Western Book Concern. After filling this position for eight years, he was elected principal agent in 1844, and continued to be such until 1860, when he took a superannuated relation. After this he declined rapidly in health, and died Aug. 27, 1863. Mr. Swormstedt was a man of vigorous health, scrupulously punctual, an energetic and methodical preacher, and a rigid disciplinarian. *See Minutes of Annual Conferences*, 1863, p. 144.

**Syagrius, Sr.,** a French prelate, was born at Autun about 520, of a Gallo-Roman family, and was raised to the episcopal see of Autun about 560, being ordained by Germain, bishop of Paris. His house was a kind of school, where many distinguished ecclesiastics were educated; and he founded likewise a hospital, and adorned the churches of the same city. He deeply sympathized with the conquered Franks. He was active in the ecclesiastical affairs of his time, and died Aug. 27, 600. See Hoefer, *Nouv. Biog. Générale*, s. v.

**Sybaris**, in Greek mythology, was a monster who occupied a cave on Parnassus and devastated the land around. By the command of the oracle a youth was to be sacrificed to him, and the task fell by lot upon Alycioneus, son of Dionysus, who, adorned with a garland, was brought to the cave; but, charmed with the beauty and youth of the victim, Eurybatus took the garland, went into the cave, fought the monster, and hurled it down a precipice.

**Sycamine** (*συκάμυμος*; Vulg. *morus*) is mentioned once only in the Bible, viz. in Luke xvii, 6, "If ye had faith as a grain of mustard-seed, ye might say to this sycamine-tree, Be thou plucked up," etc. There is no reason to doubt that the *συκάμυμος* is distinct from the *συκομυραῖα* of the same evangelist (xix, 4), although we learn from Dioscorides (i, 180) that this name was sometimes given to the *συκομυραῖα*. *See*
be questioned whether the Morus alba had found its way into those regions before the introduction of the silk-worm had made its favorite food an object of cultivation. Believed to be a native of Persia, the mulberry, commonly so called, Morus nigra, is now spread over the milder regions of Europe, and is continually mentioned by travellers in the Holy Land. As the mulberry-tree is common, as it is lofty and affords shade, it is well calculated for the illustration of the above passage of Luke. See Tristram, Nat. Hist. of the Bible, p. 396; Thomson, Land and Book, i, 296. See Mulberry.

**Sycamore** is the invariable rendering, in the A. V., of the Heb. שׁיָּכָם, shikmah (which, however, occurs in the sing. only in the Talmud, Shabath, ix, 2; the Bible employs indifferently the masc. plur. סְכָּמִים, sikkōnîm, 1 Kings x, 27; 1 Chron. xxvii, 28; 2 Chron. i, 15; ix, 27; Isa. ix, 10; Amos vii, 14; and the fem. plur. סָכָּמֶת, shikchat (Psa. lxviii, 47), and of the Greek συκοφωπαία (Luke xix, 4). The Sept. always translates the Heb. word by σκάμυνος, sycamine, meaning doubtless the Egyptian tree, the σκαμύνος Αἰγυπτίας of Theophrastus, which is really the sycamore (Dioscorides, i, 190). See Gesenius, Thesaurus, Heb. p. 1476 b; Rosenmüller, Alterthumskunde, i, 281 sq.; Celsius, Hierob, i, 310. The sycamore, or fig-mulberry (from σκαμύνος, skamo, and μοῦνος, molus), is in Egypt and Palestine a tree of great importance and very extensive use. It attains the size of a walnut-tree, has wide-spreadening branches, and affords a delightful shade. On this account it is frequently planted by the waysides. Its leaves are heart-shaped, downy on the underside, and fragrant. The fruit grows directly from the trunk itself on little sprigs, and in clusters like the grape. To make it eatable, each fruit, three or four days before gathering, must, it is said, be punctured with a sharp instrument or the finger-nail (comp. Theophrastus, De Caus. Plant, i, 17, 9; Hist. Pl. iv, 2, 1; Pliny, N. X., xii, 7; Forstl, Deeer. Plant. p. 182). This was the original employment of the prophet Amos, as he says vii, 14 ("a gatherer," סְכָּמֶה, Sept. κηρύκων, the exact term employed by Theophrastus). Hasselquist (Trac. p. 200; Loud. 1766) says, "The fruit of this tree tastes pretty well, when quite ripe it is soft, watery, somewhat sweet, with a very little portion of an aromatic taste." It appears, however, that a species of gall insect (Cynips sycamori) often spoils much of the fruit. The "tree," Hasselquist adds, "is wounded or cut by the inhabitants at the time it buds, for without this precaution, as they say, it will not bear fruit" (p. 261). In form and smell and inward structure it resembles the fig, and hence its name. The tree is always verdant, and bears fruit several times in the year without being confined to fixed seasons, and is thus, as a permanent food-bearer, invaluable to the poor.

In Lower Egypt it buds in March, and ripens early in June, and by the poor of that country as well as by Palestine enormous quantities are consumed. The wood of the tree, though very porous, is exceedingly durable. It suffers neither from moisture nor heat. The Egyptian mummy coffin, which are made of it, are still perfectly sound after an entombment of thousands of years. It was much used for doors and large furniture, such as sofas, tables, and chairs (Wilkinson, Anc. Egypt, ii, 110). So great was the value of these trees that David appointed for them in his kingdom a special overseer, as he did for the olive (1 Chron. xxvii, 28); and it is mentioned as one of the heaviest of Egypt's calamities that her sycamores were destroyed by hailstones (Psa. lxviii, 47). The modern Haipha was the city of sycamores (Sycomomum, Rieland, Pudext, p. 1024), and the remains of its grove are still recognisable (Stanley, Syria and Pal., p. 145). It was into a sycamore in the plain of Jericho that Zacheus climbed in order to get a sight of Jesus passing by (Luke xix, 4); and at the broken aqueduct of Herod's Jericho Mr. Tristram lately found "a fine old sycamore fig-tree, perhaps a lineal descendant, and nearly the last, of that into which Zacheus climbed" (Land of Israel, p. 509). That which is called sycamore in North America, the Occidental Plane or Button-wood tree, has no resemblance whatever to the sycamore of the Bible. The name is also applied to a species of maple (the Acer pseudo-platanus, or false plane), which is much used by turners and millwrights. See Mayer, De Sycamoro (Lips, 1654); Warneken, Hist. Nat. Sycamori, in the Repert. für bibli, Lit. xi, 224 sq.; xii, 81 sq.; Tristram, Nat. Hist. of the Bible, p. 397; Thomson, Land and Book, i, 22 sq. See Fig.

**Sycamorae**, in Greek mythology, was one of the Titans whom, when Jupiter pursued him, his mother, Earth, received into her womb.

**Schar** (Σάχαρ, in N, A, C, D; but rec. text Σχάρ with B; Vulg. Schar; but Codd. Am. and Fold, Sychar; Syriac Secour), a place named only in John iv, 5, as "a city of Samaria called Schar, near the ground which Jacob gave to Joseph his son; and there was the well of Jacob." Schar was either a name applied to the town of Shechem, or it was an independent place.

1. The first of these alternatives is now almost universally accepted. In the words of Dr. Robinson (Bibl. Res. ii, 290), "In consequence of the hatred which existed between the Jews and the Samaritans, and in allusion to their idolatry, the town of Shechem received, among the Jewish common people, the by-name Schar." It seems to have been a sort
SYGN 64 SYLPHS

geographer, that proves the place "to lie under the tropic, the gnomon at midday casting no shadow." But although the gnomon has been carried on considerably below the pavement, which has been turned up in search of the well it was thought to cover, no other results have been obtained than that this shrine was a very improbable site for such an observatory, even if it ever existed; and that Strabo was strangely misinformed, since the Egyptians themselves could never in this time have imagined this city to lie under the tropic; for they were by no means ignorant of astronomy, and Syene was, even in the age of Hipparchus (B.C. 140, when the obliquity of the ecliptic was about 23° 9' 20''), very far north of that line. The belief that Syene was in the tropic was propagated in every general in the Roman army, and is noticed by Seneca, Lucan, Pliny, and others. But, as Sir J. G. Wilkinson remarks, "a well would have been a bad kind of observatory if the sun had been really vertical; and if Strabo saw the meridian sun in a well, he might be sure he was not in the tropic" (Mod. Egypt and Thebes, ii. 286). The same writer adds, "Unfortunately, the observations of the ancient Greek writers on the obliquity of the ecliptic are not so satisfactory as might be wished; nor are we enabled, especially as La Grange's theory of the annual change of obliquity being variable is allowed to be correct, to ascertain the time when Aswan might have been a true observatory, a calculation or traditional fact in which, perhaps, originated the erroneous assertion of Strabo." The latitude of Aswan is fixed by Wilkinson at 24° 5' 30''; and the longitude is usually given as 32° 55'.

SYGN, in Norse mythology, was one of the female aas, goddess of justice, who takes charge of decisions and presents anyone one denying anything. She guarded the doors of the palace of Winulof, so that foreigners could not enter unaware.

Sykes, Arthur Ashley, an English divine, was born in London about 1684. He was educated at St. Paul's School, and was admitted to Corpus Christi College, Cambridge, 1701, taking his degree of A.B. in 1704 and A.M. in 1708. After leaving college he served as assistant in St. Paul's School, but was collated to the vicarage of Godmersham, Kent, in 1712-13, by archbishop Tenison. In April, 1714, he was instituted to the rectory of Dry-Drayton, Cambridgeshire, and in the August following resigned the vicarage of Godmersham. He was instituted to the rectory of Heath in the county of Oxford, November, 1718, and resigned the living of Dry-Drayton. In December following he was appointed assistant preacher of King Street Chapel, Golden Square, a chapel of ease to St. James's, Westminster. The morning preaching became vacant in 1721, Mr. Sykes was appointed, and in January, 1721-22, he was appointed to the prebend of Alton-Borealiensis, Salisbury, and three years after became precentor of the same cathedral. He also received the following appointments: assistant preacher at St. James's, Westminster, April 1, 1722; dean of St. Buriern, Cornwall, February, 1739; prebendary of Winchester, Oct. 15, 1740. He died Nov. 15, 1771. His published works number sixty-three, of which we notice, An Essay upon the Truth of the Christian Religion (Knapton, 1725, 8vo; 2d ed. 1775, 8vo); - Principles and Connection of Natural and Revealed Religion (1740, 8vo); - Credibility of Miracles and Revelation (1745, 8vo); - Essay upon the Evidence of the Redemption of Man by Jesus Christ (1755, 8vo); - Paraphrases and Notes upon the Epistle to the Hebrews (1755, 4to). See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Chalmers, Biog. Dict. s. v.

Sykes, Oliver, a minister of the Methodist Episcopal Church, was born at Suffield, Conn., 1778. He was once a prominent preacher. He was arrested for practicing medicine, and received on trial into the New York Conference. In 1810 he became supernumerary, and held that relation through most of his life. He died Feb. 11, 1853. He left property, about $2500, to the Missionary Society, for the benefit of the China Mission. See Minutes of Annual Conferences, 1855, p. 212.

Syliaen, in Greek mythology, was a daughter of Corinth and wife of Polyphemus, to whom she bore Sinus, the pine-wood-bender, a notorious tyrant.

Syleus, in Greek mythology, was a tyrant of Aulis, who compelled all foreigners who entered his dominions to labor in his garden. Hercules killed him, together with his daughter Xenodice. Another daughter was educated by her brother Dicæus; she fell in love with Hercules, and died of grief because she could not be his. He also loved her so deeply that he was with difficulty restrained from casting himself upon her funeral pyre.

Syllēphē enthroniaitōs (Συλλῆφη ένθρωνιατός), circular letters written by bishops recently installed to foreign bishops, to give them an account of their faith and orthodoxy, that they might receive letters of peace and communion from them. See Bingham, Christ. Ant., ii. ch. xii, § 10.

Syllabus, an abstract; a compendium containing the heads of a lecture or sermon.

SYLLABUS (Gr. σύλλαβος, a collection, i. e. catalogue), PAPAL, is the title given to the appendix to the encyclical letter issued by pope Pius IX, Dec. 8, 1864. It was "a list of the principal errors of the day pointed out in the and consistorial allocations, encyclical and other apostolic letters of pope Pius IX, in his extending, under ten general heads or sections, eighty of these errors. These ten sections of errors are entitled, "I. Pantheism, Naturalism, and Absolute Rationalism;" "II. Moderate Rationalism;" "III. Indiff erentism, Toleration;" "IV. Socialism, Communism, Secret Societies, Bible Societies, Clerico-liberal Societies;" "V. Errors respecting the Church and her Rights;" "VI. Errors of Civil Society, as much in themselves as considered in their relations to the Church;" "VII. Errors in Natural and Christian Morals;" "VIII. Errors as to Christian Marriage;" "IX. Errors regarding the Civil Power of the Sovereign Pontiff;" "X. Errors referring to Modern Liberalism." Some of the specifications under these general heads have respect to religious freedom, the separation of Church and State, the civil contract of marriage, education outside of the control of the Roman Catholic Church, the conflict between the civil law and the spiritual authority of the Church, the immunities of the clergy, the cessation of the pope's temporal power, etc. Much excitement was created by the appearance of this full and syllabus, especially in France; Jules Broche, minister of public worship, forbade the bishops to publish the syllabus and the doctrinal part of the bull. Elsewhere in Europe, new seminaries were opened.

For literature, see Schulte, The Power of the Romans over Princes, Countries, etc. (1871); Fessler, True and False I Justification of the Popes (Vienna, 1871; Lond. and N. Y. 1875); Gladstone, The Nineteen Decrees in their Relations to Civil Allegiance (1874), with replies by Newman, Manning, and others.

Syllia, in Greek mythology, was a nymph beloved by Apollo, and the mother by him of Xeitippus.

Syllitturgus (Συλληττοργος), a Greek term to designate the assistant during the offering of the Christian sacrifice.

Sylphs, in the fantastic system of the Paracelsists, are the elemental spirits of the air, who, like the other elemental spirits, hold an intermediate place between the immaterial and material beings. They eat, drink, speak, move about, begot children, and are subject to infirmities like men; but, on the other hand, they resemble spirits in being more nimble and swift in their motions, while their bodies are more diaphanous than those of the human race. They possess the most profound knowledge both of the present and the future, but have no soul; and when they die, nothing is left. In form they are ruder, taller, and stronger than men, but stand nearest to them of all the elemental spirits, and as a
of nickname (perhaps from "םייח", sheker, "falsehood," spoken of idols in Hab. ii, 18; or from יקק, shikkor, "drunkard," in allusion to Isa. xxviii, 1, 7), such as the Jews were fond of imposing upon places they disliked; and nothing could exceed the enmity which existed between the Samaritans and the Jews, which was described Shechem (John iv, 9). It should not be overlooked that John appears always to use the expression Ἱερούσαλημ, "called," to denote a sobriquet or title borne by place or person in addition to, or to attach it to a place remote and little known. Instances of the former practice are xi, 16; xx, 24; xix, 13, 17; of the latter, xi, 54. The son of the former is often said to dwell in Sikima" (L, 98). See Lightfoot, Opera, ii, 886; Lange, Life of Christ, ii, 387; Hengstenberg, On St. John iv, 5. Jerome, in speaking of Paul's journey, says, "She passed Siæch, not, as many erroneously call it, Siæchar, which is now Neapolis." (Epist. ad Eustoch. in Opp. i, 886, ed. Migne). In his questions on Genesis he says that, according to Greek and Latin custom, the Hebrew, Siæch, is written Sikima; but that the reading Siæch is an error: he adds that it was then called Neapolis (Opp. ii, 1004, ed. Migne). So Adamman writes to Ar- culf, who travelled in the 7th century: "He visited the town called in Hebrew Sicma, but by the Greeks and Latin Sicima, and now more usually Sychar" (Early Travels, Bohn, p. 8). In the 12th century Phocas says, "Sichar was the metropolis of the Samaritans, and was afterwards called Neapolis" (Reland, Palest., p. 1009). On the contrary, Eusebius (Onomast. s. v. Σεχαι and Σεχαια) says that Sychar was in front of the city of Neapolis; and, again, that it lay by the side of Lura, which was three miles from Neapolis. Sychem, on the other hand, he places in the suburbs of Neapolis by the tomb of Joseph. The Bordeaux Pilgrim (A.D. 338) describes Sichem as at the foot of the mountain, and as containing a great monument called cælica. He then proceeds to say that a thousand paces thence was the place called Sichar. Moreover, had such a nickname been applied to Shechem so habitually as its occurrence in John would seem to imply, there would be some trace of it in those passages of the Talmud which refer to the Samaritans, and in which every term of opprobrium and ridicule that can be quoted or invented is heaped on them. It may be affirmed, however, with certainty that neither in Targum nor Talmud is there any mention of such a thing. Lightfoot did not know of it. The numerous treaties on the Samaritans are silent about this; and recent close search has failed to discover it. See SHECHEM.

But Jerome's view soon became the prevailing one, and has continued to be so. Robinson adheres strongly to it: and in regard to one of the chief objections urged against it, that Sychar was eight miles from Shechem, he says (p. 47) that Jacob's well, which stands at the entrance into the valley where Shechem or Naeæma is situated, is about a mile and a half from the town, so that a woman would hardly have gone so far to draw water, since there was plenty of good water near at hand, he thinks that the town probably had extensive suburbs in the Gospel age which did not exist in the time of Eusebius, and might have approached quite near to the well of Jacob—just as Jerusalem anewly extended much farther north and south than at the present day (Researches, iii, 121). Porter takes the same general view, and says, in regard to the distance of the Joseph's well from Sychar, that二人 who know little of the East. The mere fact of the well having been Jacob's would have brought numbers to it had the distance been twice as great. Even independent of its history, some little superiority in the quality of the water, such as we might expect in a deep well, would have brought the Orients and pilgrims to it, and in all probability as an event, and that it has always been, epicures in this element" (Handbook for Pal. p. 342). It may be added that there is no need for supposing this well to have been the one commonly frequented by the people of Nablus. The visit of the woman to it may have been quite an occasional one, or for some specific purpose.

2. It has been thought that Sychar may be identified with the little village of Askar, on the south-eastern declivity of Mount Kedem (Van de Velde, Mémorie, p. 350; Thomson, Land and Book, ii, 206). The etymology, however, is against it, and also the topography. Our Lord appears on his way to Galilee. The great road runs past the mouth of Wady Nablus. Jacob's well is on the southern side of the opening; and Askar about half a mile distant on the northern side. The main road passes quite close to both. Our Lord sat down by the well while the disciples turned aside into the city to buy bread. Hai Ascalon, in the city, this would have been unnecessary; for by continuing their route for a short distance farther they would have been within a few paces of the city. There is, besides, a copious spring at Askar. In the Quarterly Statement of the "Pal. Explor. Fund," for July, 1877, p. 140 sq. Lieut. Conder gives a further description of the village of Askar, and some additional reasons for identifying it with Sychar; but they are not conclusive.

Sy'chec (Acts vii, 16). See SHECHEM.

Sy'checim (Judith v, 16). See SHECHEMITE.

Sy'cites, in Greek mythology, was a surname of Eucbas in Lacedaeon, as having been the first to plant the fig (συκήν). Syd'ensmen (more properly Synodomen) are Church officers, anciently appointed to assist the church-war- dens in making presentations of ecclesiastical offences at the bishop's synod or visitation. By the 9th canon, they are to be chosen yearly, in Easter week, by the parish priest and parishioners, if these can agree; otherwise they are to be appointed by the ordinary of the dioecese. Of late years this office has devolved on the church-war-dens. The old English term for syd'ensmen was "sibb condomen," or "sibb condomeni.

Sy'eden (Συδηνος v. τ. Θυατικος και θυατικος), a corrupt Greek form (1 Esdr. i, 8) for Jehiel (q. v.) of the Heb. (2 Chron. xxxv, 8).

Sy'erd (Heb. סידר, נַדְדָה, Sept. סידר, Vulg. Sydri, Syrene, a town of Egypt on the frontier of Cush, or Ethiopia. The prophet Ezekiel speaks of the desolation of Egypt "from Migdol to Seineveh, even unto the border of Cush" (xxix, 10), and of its people being slain "from Migdol to Seineveh" (xxv, 6). Migdol was on the east of the Nile (between Avaris and Memphis); and Seineveh is thus rightly identified with the town of Syene, which was always the last town of Egypt on the south, though at one time included in the nome Nubia. Its ancient Egyptian name is Sun (Brugsch, Geogr. Inscr. i, 155, tab. i, No. 55), preserved in the Coptic Sowam, Siwm, and the Arabic Assuán. The modern town is slightly to the north of the old site, which is marked by an interesting early Arab burial-ground, covered with remarkable combustions, having inscriptions in the Cufic character. Charnillon suggests the Coptic derivation as "cessitive" and "to open," "to open," as if it signifi- cated the opening or key of Egypt (U. Egypt. 161-166), and this is the meaning of the hieroglyphic name. It is the natural boundary of Egypt at the south (Ptolemy, ii, 5; Pliny, Nat. Hist. v, 10; xii, 8; Strabo, p. 878, 815), being situated at the foot of the first cataract of the Nile. It was the Egyptian: Excavations, Handbook for Egypt, p. 463). See Jour. Soc. Lit. Oct. 1851, p. 158. See EGYPT.

Syene is represented by the present Assuan or Es- Sa'da, which exhibits few remains of the ancient city, except some granite columns of a comparatively late date in the ancient temple of the goddess, and others, "to open," it may signifi- cated the opening or key of Egypt (U. Egypte, i, 161-166), and this is the meaning of the hieroglyphic name. It is the natural boundary of Egypt at the south (Ptolemy, ii, 5; Pliny, Nat. Hist. v, 10; xii, 8; Strabo, p. 878, 815), being situated at the foot of the first cataract of the Nile. It was the Egyptian: Excavations, Handbook for Egypt, p. 463). See Jour. Soc. Lit. Oct. 1851, p. 158. See EGYPT.

SYLVESTER

SYMBOLIC BOOKS

The term "symbol" is often used to refer to certain objects, actions, or ideas that stand for or represent something else. In Christianity, symbols are used to convey spiritual truths and concepts. Here are some examples of symbols used in the Christian faith:

1. The Cross: The cross is a symbol of sacrifice and redemption. It represents the crucifixion of Jesus Christ and his sacrifice for humanity.
2. The Fish: The fish is a symbol of Christianity, representing Jesus Christ. It is also known as the Ichthus symbol, which is a mnemonic device for the first Greek words for "Jesus Christ, Son of God, Savior."}

These symbols are deeply rooted in Christian tradition and are used in various forms of Christian art, music, and architecture. They serve as reminders of the Christian faith and its teachings.
The only symbol which finds universal acceptance in the Church is the Apostles' Creed. As the Church creed κατ' Ἑβραίον, it is distinguished from the Scriptures upon which it is based, but also, on the other hand, from the private writings and confessions of the teachers of the Church, however greatly the latter may be esteemed. Through this there is the difference between the symbolical formulas, which alone served the purposes of the Church before the Reformation, in being more extensive and detailed, and in constituting the confessions of particular churches only (symbola particularia), while the great creeds (Apostles', Nicene, Athanasian) have occurred to the Reformers and the Reformed Church in the Lutheran Church, and was first applied to its own confessional writings when they appeared in the Book of Concord; but its use extended, and has long been current in all the churches and sects of Christendom.

Considerable diversity of opinion has existed with reference to the importance and value of symbolical writings. The Church of Rome regards the symbol as the immovable and unchangeable rule of faith, and therefore as the binding norm of doctrine. This does not, according to Thomas Aquinas (Summa Theol. ii, 2, 1, 9), detract from the supreme authority of the Scripture, which is the only rule of faith; nor from the authority of the Church, which originally maintained the symbol in the Lutheran Church, and was first applied to its own confessional writings when they appeared in the Book of Concord; but its use extended, and has long been current in all the churches and sects of Christendom.

The Church of Rome regards the symbol as the immovable and unchangeable rule of faith, and therefore as the binding norm of doctrine. This does not, according to Thomas Aquinas (Summa Theol. ii, 2, 1, 9), detract from the supreme authority of the Scripture, which is the only rule of faith; nor from the authority of the Church, which originally maintained the symbol in the Lutheran Church, and was first applied to its own confessional writings when they appeared in the Book of Concord; but its use extended, and has long been current in all the churches and sects of Christendom.

Considerable diversity of opinion has existed with reference to the importance and value of symbolical writings. The Church of Rome regards the symbol as the immovable and unchangeable rule of faith, and therefore as the binding norm of doctrine. This does not, according to Thomas Aquinas (Summa Theol. ii, 2, 1, 9), detract from the supreme authority of the Scripture, which is the only rule of faith; nor from the authority of the Church, which originally maintained the symbol in the Lutheran Church, and was first applied to its own confessional writings when they appeared in the Book of Concord; but its use extended, and has long been current in all the churches and sects of Christendom.

The Reformed churches have produced no written symbol which has formal authority over them all; but they have cherished a very definite conviction of confessional unity among them, as may appear from the fact that the different Reformed confessions, and particularly the more important of them, the Helvetica, Galli- carboniana, Schmalkaldish, etc. contain formulas, which are considered symbolical formulas, which alone served the purposes of the Church before the Reformation, in being more extensive and detailed, and in constituting the confessions of particular churches only (symbola particularia), while the great creeds (Apostles', Nicene, Athanasian) have occurred to the Reformers and the Reformed Church in the Lutheran Church, and was first applied to its own confessional writings when they appeared in the Book of Concord; but its use extended, and has long been current in all the churches and sects of Christendom.

SYMBOLS

points from the accepted standards of a Church, and hereby, which removes the foundations and destroys the faith itself. It is none the less certain, however, that Peter's doctrine that 'righteousness might come by faith, was a doctrine of a dangerous basis of character. Every step of its progress must be in harmony with its fundamental principles, which are laid down in the confessions formulated by its founders. Those symbols attest a faith which belongs equally to our fathers and to us. The liberty of teaching, moreover, needs to be guarded, lest it degenerate into license and anarchy contrary to the Word of God and the order of the Church. Protestantism certainly has the right to protect its truth against neologizing anticchristianity, and also against un-Protestant Romanism—in a word, against manifest perversion. The subscription to symbols is not an interference of the Church, but it enables her teachers to stand without conditions. Perhaps the utmost extent to which such requirement should be pressed is a cordial acceptance of principles upon which the confessions are based, leaving particulars to be determined by the conscience of the subscriber. In any case, the symbols are entitled to respect so far as to make them the subject of earnest and loving study, and to protect them against abuse from professed adherents.

Literature.—Early Protestant writers have no separate locus for symbolic books, and but few treat of them even incidentally (see Hase, Hutterus Redivivus, p. 115, note 1). See also id. Anfänge des Symbolizems, etc. (Leips. 1847); Matthes, Verglechende Symbolik (ibid., 1843), p. 2 sq.; Schenk, Urspruengl. Verhältn. d. Kirche zum Staate, in the Stud. u. Krit. 1850, ii, 454 sq.; Hüfing, De Symbol. Natura, Necesseitate, Authoritate, et Usu (Erl. 1835); Brethneider, Unzulässigkeit d. Symbolizems, etc. (Leips. 1841); Rudolph, Einf. in d. Ausg. Confes- tion, etc. (Dresd. 1841); Sartorius, Noticks. u. Verbindung, d. kirchl. Glaubensbekenntnis (Stuttg. 1845); Schleiermacher, Einfl. Werth ... d. symb. Bücher, in Ref. Alm. (Frankf. 1819), p. 335 sq.; id. Sendzich, am Cölln u. Schule, in the Stud. u. Krit. 1831, i, 3 sq.; id. Prakt. Theol. (1822), etc. Do Weite, Lehensd. d. evan. Kirche, in the Stud. u. Krit. 1831, ii, 221 sq.; Ullmann, Amb. kirchl. Angel, etc., in the Stud. u. Krit. 1840, i; Scherr, Die Principi. u. fükt. Stellung d. schwetz.-ref. Kirche, etc., in the Verhandl. d. schwetz. Predigergesellschaft, zu St. Gallen, 1844; Die gegene. Kirche d. els. Lebem, etc., in the Studies u. Kritiken, etc. (Hanov. 1854); Erklärung der Denk.-schr. (Göt. 1854); Nitzsch, Prakt. Theol. I. Among editions of Lutherian symbolical writings, those of Rechenberg, Concordia, etc. (Lips. 1678, 8vo, and often; last ed. 1758), and of Hase, Libri Symbol. Ecc. Ex. etc. (ibid. 1897), deserve mention. The Reformed confessions have not been gathered into a single collection, the best and most complete collection being that of Niemeyer, Collector. Conf. in Eccel. Ref. Publicat. (ibid., 1840), cum Append. Other collections are by Augusti (Elberfeld, 1857), by De Weite, Lehensd. d. evan. Kirche, etc. (ibid., 1840), 2 pts.; comp. Schweizer, Ref. Glaubensb. (1829), and Heppe, Bekennm. Schrift. d. Kirche Deutschl. (Elberfeld, 1860). The Libri Symbolici Ecclesi. Roman. Catholicae were edited by Zahn (Vinar. 1886) and Streitwolf et Kleiner (Göt. 1857 sq.), but the Libri Symbol. Ecc. Confes. in Cathol. Kiren (Jena, 1845; cum Append. ibid., 1850). For the symbolic writings of particular churches and denominations, see the respective articles. Herzog, Real-Encyklop. s. v.

SYMBOLS. The meaning of this term will vary with that assigned to the original word from which it is derived: σύμβολον (from συμβάλλων) has a primary reference to joining or putting together, and has the general sense of any object, e.g. the parts of a ring or of other "tesserae hos-
ings and differences of the various symbols have been examined. This fact gives rise to the question whether the term symbolics is adequate to the thing it is intended to represent; but all attempted substitutes have been so clumsy that they failed to win their way into fashion. In the face of this experience, the term symbolics is usually included under dogmatic theology (q. v.).

**Symbolism.**

Symbolism is that system which represents moral or intellectual qualities by external signs or symbols. It is the result of the earliest and rudest stages of development, when the mind and moral nature have not yet grown to the age which takes direct cognizance of mental and moral qualities, or takes cognizance of them only through external signs that bear a real or a conventional resemblance to them. The Old Testament is full of symbolism: the Jewish Temple, like the Tabernacle, which it superseded, though no image of the Deity was permitted in it, was itself a symbol of the soul of man, in which God abides, if it be holy and ready to receive him; and all its utensils, as well as all its services, were symbolical. See *Type* and the various articles on the Old Testament in *Encyclopedia*. The literal and allegorical symbolisms that were also naturally characteristic of the Church of the Middle Ages, which undertook to carry home to the eyes, minds, and hearts of the people spiritual truths through external symbols. The origin of some of these it is now difficult to discover. Many naturally suggest the correlative truth to the mind; others make the suggestion through historical or scriptural association. The following is a partial list of some of the principal symbols in use in the Christian churches, for a fuller account of which the reader is referred to *Clements* [Mrs.], *Handbook of Legendary and Mythological Art*. The glory, aureole, and nimbus are the earliest and rudest stages, and are symbols of sanctity. The nimbus surrounds the head; the aureole the body; and the glory unites the two. The nimbus attaches in Roman Catholic art to all saints; the aureole and glory only to the persons of the Godhead and Virgin Mary. The fish is an emblem of Christ. See *Fish*. The cross, in its various forms, is also an emblem of both of Christ and his passion. See *Cross*; *Crucifix*; *Lamb* and *Lamb of God*, which take away the sin of the world* (John i, 29).* The lamb is often represented in art bearing a cross. The lion is another symbol of Christ, who in Scripture is called the *Lion of the tribe of Juda* (Rev. ii, 5). The pelican, which is said to bare open her breast to feed her young with blood, is an emblem of redemption. The dove is a symbol of the Holy Spirit (Matt. iii, 16); issuing from the mouth of the dyeing, it is an emblem of the soul. The olive-branch is an emblem of peace (Gen. viii, 11); the palm, of martyrdom (Rev. vii, 9). The lily represents chastity; the sheaf, fertility (Matt. xiii, 39); the lamp, piety (Matt. v, 15); the cup, the drinking of the cup of martyrdom; the flame, the flaming heart, fervent piety and spiritual love; the peacock, immortality; the crown, victory: on women, it signifies the bride of Christ. The sword, axe, lance, and club indicate martyrdom; the skull and scorching, penance; the chalice, faith; the ship, the Church or the Church of Rome (Leips. 1751–1800); etc. Each color also has a symbolic meaning in art, for which see article *Color*. In Roman Catholic art, also, each apostle has his own symbol, as follows: Peter, the keys, or a fish; Andrew, the transverse cross which bears his name; James the Greater, the pilgrim's staff; John, the eagle, or the chalice with the serpent; Thomas, a builder's rule; James the Less, a club; Philip, a small cross on a staff, or a cross surmounted by a cross; Bartholomew, a knife; Matthew, a purse; Simon, a saw; Thaddeus, a halberd or lance; Matthias, a lance. The various monastic orders have also each its own symbol. See articles *Pilgrim*, *Monastic* etc. See James and *Gregory*: *Our Lord as Em- plified in Works of Art* (London 1864, 2 vol.); —Didron, *Christian Iconography, or History of Christian Art in the Middle Ages* (ibid. 1851, ed. Bohn).

**Symbolum** (*Súmboló*), a Greek term for (1) the holy eucharist; (2) a creed; (3) a bell. See *Symbol*. Symê, in Greek mythology, was a nymph, daughter of Ialymus and Dosis. She was beloved of the sea-god Glaucus, who carried her off to an island near Rhodes, on the coast of Asia, which received its name from her (Atheneus, vii, 296). By Neptun she bore Chthonius, who colonized the island from Lindus.

**Symeon the Stylite.** See *Symeon*, St.

**Symmachia**, in Greek mythology, was a surname of *Venuses* at *Simaena* in *Arcadia*.

**Symmachii.** The term designates the members of a sect mentioned only by Philaster (Har. xiii). He describes them as adherents of Patricius, who taught that the human body was not created by God, but by the devil, and that it should be abused in every possible way, suicide even being regarded as allowable. The Symmachii asserted also that every vice and fleshly lust should command the obedience of mankind, and that there is no future judgment for the race. It is more probable, however, that the Symmachii were disciples of Symmachus (q. v.) of Samaria, a Jew who became a Christian and was associated with St. Jerome; Symmachus furnished a Greek version of the Old Testament, which stands before that of Theodotion in the Polyglot, but is of more recent date than the latter. Petavius (in *Notes on Ephesians*, ii, 400) endeavors to trace their origin to yet another Symmachus; and Valerius (on Euseb. vi. 17) says that a Jewish-Christian sect originated with the Ebionite Symmachus, of whom Ambrose states, in a commentary on the Epistle to the Galatians, that they descended from the Pharisees, kept the whole law, called themselves Christians, and followed Photinus in the belief that Christ was merely a man. The Manichean Faustus, the author of *Contra Faustum* (q. v.), of *Contra Faustum* (q. v.), describes the other hand, describes the Symmachii as Nazarenes, and Augustine adds (Contra Caeconium, i, 31) that they were but few in number in his time, and that they practiced both Jewish circumcision and Christian baptism. See Fabricius [Joann. Alb.], *Philistri of Heresi- bus Liber 1. pp. 300, 307*; *Notiz von Symmachus* (Hamb. 1725) p. 125.—Hertzog, *Real-Encyklop. s. v.*

**Symmachi, pope** from A.D. 498 to 514, is noted because of his conflicts with the civil power, and his endeavors to heighten the importance of the Roman see. At the time of his election by the Roman party, the imperial party had elected the archbishopvent Laur- rentius, who was pledged to sign the *Henrican* (q. v.).
The determination of the election was left with Theodoric, king of the Goths, and resulted in favor of Symmachus, because he was the first to be anointed or was supported by a majority of votes. At a synod held at Rome in 502 Symmachus revoked the enactment of King Odoacer and the imperial letters which enabled any ecclesiastic to sell the papal chair from selling any portion of the property of the Church, and at the same time he ordained that all interference in the affairs of the Church of Rome should be forbidden to the laity. This provision contributed greatly to the development of the papal power, and has always remained a cardinal principle in the administration of the Romish Church. The party of Laurentius, after a time, brought heavy charges against Symmachus, and Theodoric deposed bishop Peter of Altium to investigate the case; but, as he became a partisan of Laurentius, the king convoked a new synod at Rome in 504. By this time the influence of Symmachus was endangered by the machinations of the Laurentines, and he submitted unconditionally to the decisions of the synod, in direct contradiction of his recently promulgated ordinance against the interference of laymen in ecclesiastical matters. He was acquitted without a hearing, and subsequently, in his written defense of this synod, was the first to declare that God has reserved the judgment of the incumbent of the Roman see to himself, while other men must, according to his will, be judged by their fellows. At a synod held at Rome in 504, Symmachus promulgated detailed ordinances against all who should appropriate to themselves any of the possessions of the Church. It is worthy of note that the synods held under his pontificate addressed him, by way of eminence, the title Papa. He appointed bishop Cesarius of Arles his vicar in Gaul. He banished the remaining Manicheans from Rome and caused their books to be burned, but was himself branded as a Manichean by the emperor Anastasius. Tradition attributes to him the introduction of the Gloria in Excelsis into the Sunday and feast-day services of the Church. He died, as is reported, July 19, 514. See Cich, Christl. Kirchengesch., xvii, 190, 196-211; Gieseler, Kirchengesch. I, iii, 396-405—Herzog, Real-Encyklop. v. p. 295.

Symmachus, a translator of the Old Test. into Greek, was born in Samaria during the latter half of the 2d century. Originally a Jew, he became a Christian, but never ceased to practice the doctrine of the Egyptians.

In spite of the high reputation enjoyed by the Alexandrian version, or Septuagint (q. v.), not only among the Hellenists outside of Palestine, but also within Palestine itself, at a later time it became an object of suspicion to the stricter Jews, owing to polemical reasons, so that, against the Christians, they denied its correctness, and set up another translation in opposition to it. The first who made a version for the use of the Jews was Aquila (q. v.); not much later than Aquila, Theodotion (q. v.) prepared a second, and very soon afterwards another translation was made by Symmachus. Five Epiphanius, De Pseud. C. xvi (where accounts, however, Bleek pronounces fabulous), we learn that Symmachus was a Samaritan, Σύμ- μαχος των Σαμαριτων των παρ' αυτού σοφών... νόσσας φαλάριων... προσπελαύνει και περιμένη γείτονα. With Epiphanius agree Athenaeus (Symmach. De Pol. C. xvi) and C. xxi (where C. xxvi "Symmachus veritatem facti, qui non concupiscit se falsae ecclesiae insignire, sed hominibus dicere cruciatae vel servatatem plena... alicrae ejus editione recuperat".) Whether his second edition embraced all the books of the Old Test. cannot be decided with certainty, since only a few fragments of the second edition on some of the books are extant.
For philosophical purposes, Symmachus is just as useful as the other Greek translators. Biblical criticism may also derive some advantage from the translation, of course, by exhibiting the greatest care. Thus Fss. xxx. 18, Symmachus may be read as Χριστός, and also as the Chaldean, Jerome, Syriac, and Theodotion, against the Sept. Vulg., and Arab.; in lxvi. 13, our text has Πνεύματος, but Symmachus, the Sept., Syr., and Chald. seem to have read Πνεύμονας.

The fragments of Symmachus’s version of the Old Testament are given by Flamin. Nonilies in Vit. test. sect. LXX Lat. Reddition, etc. (Rome, 1857); Drusius, Veterum Interpretum Graecorum in Totum V. T. Fragmenta Collecta, etc. (Amsterdam, 1622); Bos, V. T. ex Versione LXX Intereditae, etc. nee non Fragmenta Versionis Aquilae, Symmacho et Theodotionis (Franck, 1709); Monfaucourn, Hexaplrorn Origines superssnt, etc. (Paris, 1713); in a later edition with notes by K. Bahrdt, Leips. and Lintbeck, 1709–70. The fragments on single books were edited by Treuelenburg, Chrestomathia Hexaplera (Luneck and Leips. 1794); Spohn, Jeremias Vetus et Versione Judoearum (Lips. 1794, 1824); Segar, Daniel sec. LXX et Tetrapolis Origines, etc. (Trier, 1775); Scharenberg, Aminadaversiones aliquas Fragmenta Versionis V. T. E. emendantur (Lips. 1767–81), spec. et ii; Schlesius, Opuscula Critica ad Versiones Graecae V. T. (Iiss. 1219).

See Greek Versions. (B. P.)

Symmachus, Quintus Aurelius, a prefect, pontiff, and augur of Rome in its declining age, remarkable for his eloquent appeal against the ruin threatened by the triumph of Christianity; he is the author of Epistulae still extant. His zeal for the ancient faith of Rome even resulted in a public life as a means of influence upon his character. He was chosen by the senate to remonstrate with Gratian on the removal of the altar of victory (A.D. 382), from their council-hall, and for curtailing the annual allowance to the Vestal Virgins. The emperor banished him from Rome, but in 384, having been appointed manager of the city, he was able to make Valentinianus the restoration of pagan deities. In this he was unsuccessful, but without personal loss, being appointed consul under Theodosius in 391.

Symmes, William, D.D., a Unitarian clergyman, was born at Charlestown, Mass., in 1731, and graduated from Harvard College in 1750, where he was a tutor from 1754 to 1758. He began to preach in the North Parish in Andover, and was appointed pastor, Nov. 1, 1758, and continued in that relation until his death, May 1807. Dr. Symmes was a good scholar, of extensive reading, and an able divine. He published, Thanksgiving Sermon (1769):—Discourse on the Duty and Advantages of Singing Praises to God (1779):—Sermon at the General Election (1785). See Sprague, Annals of the Amer. Pulpit, viii. 35.

Symmes, Zachariah, a Congregational preacher, was born at Cambridge, England, April 5, 1859. He was educated at Cambridge, and after leaving the university was employed as tutor in several distinguished families. In 1821 he was appointed lecturer at Athens, Ohio, and in September, 1829, he succeeded Dr. Clark as rector of Dunstable. Embarrassed by his Nonconformity, he emigrated to New England, where he arrived in August, 1834. He was admitted to the fellowship of the Church in Charlestown, Mass., Dec. 6, and on the 22d of the same month was elected and ordained teacher of the same church. Thomas Jefferson, who was visiting the United States about a year afterwards, succeeded to the office of pastor, which he filled until his death, Feb. 4, 1817. See Sprague, Annals of the Amer. Pulpit, i. 47.

Sympathy (συμπαθεια, fellow-feeling) is the quality of being affected by another’s affection. It was originally used, like pity and compassion, to signify our fellow-feeling with others. The term then came to be used to denote our fellow-feeling with any passion whatever. Sympathy with sorrow or suffering is compassion, with joy or prosperity congratulation.

Symphony (συμφωνία) originally signified the union of several voices in a chant, but by modern musicians it is applied to an instrumental composition. Generally used as a kind of introductory movement to anthems and other pieces. Symphonies are introduced with good effect in the interval of the voices, and are called preludes when played before the psalmody, interludes when they mark the distinction of verses, and postludes when introduced at the close of the psalm.

Symphonius, a Gallic martyr at Autun in the reign of Constantine. He was also cited by Jerome, because he had refused to honor the statue of Berezuchyia, and rejected the influence of appeals and scourgings. His mother supported him with her exhortations to fidelity. He was beheaded without the town walls and buried in a cell in the fields. His grave became so remarkable for cures and miracles that it compelled the reverence even of the heathen. The narrative in the Acta Beati Sympnhs, as here outlined, seems to involve something of fact. The worship of Berezuchyia among the Edui is a historical fact. Gregory of Tours mentions Symphonianus and the miracles wrought by his relics (De Gloria Martyr. c. 52). Later tradition says that a church was, in time, built over his grave. The story cannot, however, date further back than the days of Gregory, as is evident from the chosen and even pompous language and the legendary conclusion. The death of Symphonianus is variously fixed in A.D. 180 (the reign of Aurelian), 212, or 290 (Aurelian). He is commemorated on Aug. 22. See the Acta SS. s. v.—Hergoz, Real-Encyclop. s. v.

Symphorosa, the Christian widow of a martyred tribune. Hadrian had built a temple at Tibur (Tivoli), and was about to dedicate it with religious ceremonies when he learned that Symphorosa was a zealous Christian. He ordered, with her son, to be summoned, and sought by persuasion to induce her to offer sacrifices. On her refusal, the emperor threatened her, and had her carried to the Temple of Hercules at Tivoli, where she was beaten with fists, hung up by the hair, and afterwards taken down and drowned. Her brother Eugenius, a councillor of Tivoli, recovered the body and buried it in the suburbs. On the following day her sons were brought before the same temple and imprecated in various modes, after which their bodies were thrown into a deep pit, which subsequently became known as the pit ad septem bovinatos. The persecution then went on for about a year and a half, during which period the remains of the martyrs were interred on the Via Tiburtina and honored as they deserved. The natalities of Symphorosa and her sons are observed on July 18 (see Ruinart, Acta Primi romanorum Martyrum, p. 19). The legend exists in manuscript form among the writings falsely ascribed to Julius Africanus, and may have originated in the third century, though the contents do not harmonize well with the known ordinary conduct of Hadrian. Ruinart supposes the probable period of the occurrence to have been A.D. 120. See also the Acta SS. sub July 18.—Hergoz, Real-Encyclop. s. v.

Symposia (συμπόσια, banquet) is a word occasionally used for each annual writer, to describe the ancient agape (q. v.). These symposia were held at the
SYMPSION

S Y N A G O G U E

graves of the martyrs; and the festival was designed to be, not only a memorial of the deceased, but, according to Origen, "an odor of a sweet smell in the sight of God;" for the poor and needy, the widows and orphans, met together, and were refreshed by the charity of the rich.

Symposion, CUTHERBY, a layman and a deacon of the Congregational Church at Islington, of which he was the first minister. He was arrested Dec. 13, 1557, and tortured, being racked three times to make him divulge the names of the Protestant Church of which he was deacon. He was eventually burned at Smithfield, March 28, 1558. See Punchard, Hist. of Congregationalism, ii, 936, 947.

Synagoge (συναγωγή; other equivalent terms are συναγώγη or συναγωγικόν, i.e. chapel; Heb. דַּןעַ, or assembly of God; Aramaic וסנוגה, וסנוגה), the Jewish place of worship in post-Biblical and modern times. However obscure the origin of these establishments, they eventually became so important and characteristic as to furnish a designation of the Jewish Church itself in later literature.

It may be well to note at the outset the points of contact between the history and ritual of the synagogues of the Jews, and the facts to which the inquiries of the Biblical student are principally directed. 1. They meet us as the great characteristic institution of the later phase of Judaism. More even than the Temple and its services, in the time of which the New Test. treats, they at once represented and determined the religious life of the people. 2. We cannot separate them from the most intimate connection with our Lord’s life and ministry. In them he worshipped in his youth and in his manhood. Whatever we can learn of the ritual which then prevailed tells us of a worship which he recognised and sanctioned; which for that reason, if not for no other, though, like the statelier services of the Temple, it was destined to pass away, is worthy of our respect and honor. They were the scenes, too, of no small portion of his work. In them were wrought some of his mightiest works of healing (Matt. xii, 9; Mark i, 23; Luke xii, 11). In them were spoken some of the most glorious of his recorded words (iv, 16; John vi, 59); many more, beyond all reckoning, which are not recorded (Matt. iv, 23; xiii, 54; John xlviii, 20, etc.). 3. There are the questions, leading us back to a remoter past, in what did the worship of the synagogue originate? What type was it intended to reproduce? What was its place, alike in the thought and practice of the people, of the Synagogue in the history of Judaism (Act. ii, 42; 1 Cor. iv, 15)? The cognate question, however, συναγωγή, was formed or adopted in its place, and applied to the highest act of worship and communion for which Christians met (Suicer, Theaur. s. v.).

More definite than the Greek term synagogue is the ancient Hebrew name, וסנוגה (םשנוג; פספנוג, פספנוג בּ; פספנוג, פספנוג = house of prayer (Acts xvi, 13, for which the Syriac rightly has וסנוגה, וסנוגה: Josephus, Life, 64), which is now obsolete, or וסנוגה, וסנוגה = house of assembly, which has superseded it. This definite local signification of the term synagogue among the Jews has necessitated the use of another expression for the members constituting the assembly, which is וסנוגה or וסנוגה, to express our secondary sense of the word וסנוגה.

II. History of the Origin and Development of the Synagogue.—1. According to tradition, the patriarchs Abraham, Isaac, and Jacob instituted the prayers three times a day (Beresh. 26 b), and had places of worship (comp. the Chaldee paraphrases of Onkelos, Jonathan ben-Uzziel, and the Jerusalem Targum on Gen. xxiv, 62, 63; xxv, 27). We are informed that there were synagogues in the time of the pious king Hezekiah (Sanhedrin, 94 b) that the great house (לְדָתֶּי) was a stupendous synagogue; that many houses of Jerusalem (לְדָתֶּי) which Nebuchadnezzar burned (2 Kings xxv, 9) were the celebrated 480 synagogues of the Jews that were in Jerusalem (Jeremiah Meqillith, iii, 1), and that in Babylon the same pseudo-synagogues were seen in which Daniel used to pray (Ezra, 21 a). We have the testimony of Benjamin of Tudela, the celebrated traveller of the Middle Ages, that himself saw the synagogues built by Moses, David, Obadiah, Nahum, and Ezra (Itinerary, 1, 90, 91, 92, 106, 153, ed. Ascher [London, 1845]). It is in harmony with this tradition that James declares "Moses of old time hath
in every city that preach him, being read in the synagogues every Sabbath day” (Acts xx, 21; comp. Philo, ii, 167, 630; Josephus, Apion, ii. 18; Baba Kama, 82 a; Jerusalem Megillah, iv, 1). But these are simply traditions, which love to invest everything with the halo of the remote antiquity.

8. On the other hand, if we find no trace of meetings for worship in synagogues. On the one hand, it is probable that if new moons and Sabbaths were observed at all, they must have been attended by some celebration apart from as, well as at, the tabernacle or the Temple (1 Sam. xx, 5; 2 Kings iv. 29). On the other hand, so far as we find any traces of common worship, it seems to have fallen too readily into a fetish religion, sacrifices to ephods and teraphim (Judg. vii. 27; xvii. 5) in groves and on high-places, offering nothing but a contrast to the “reasonable service,” the prayers, psalms, instruction in the law, of the later synagogues. The special mission of the priests and Levites under Jehoshaphat (2 Chron. xxvii. 7-9) shows that there was no real provision for reading the “book of the law of the Lord” to the people, and makes it probable that even the rule which prescribed that it should be read once every seven years at the Feast of Tabernacles had fallen into disuse (Deut. xxxi. 10). With the rise of the prophetic order we trace a more distinct though still a partial approximation. Wherever there was a company of such prophets, there must have been a life analogous in many of its features to that of the later Essenes and Therapeutae. The form of the synagogues and the concomitant of Christendom. In the abnormal state of the polity of Israel under Samuel, they appear to have aimed at purifying the worship of the high-places from idolatrous associations, and met on fixed days for sacrifice and psalmody (1 Sam. i, 12; x, 5). The scene in 1 Sam. xix, 20-24 indicates us that the meetings were open to any worshipers who might choose to come, as well as to “the sons of the prophet,” the brothers of the order themselves. The only pre-exilian instance which seems to indicate that the devout in Israel were in the habit of resorting to pious leaders for blessings and instruction on stated occasions is to be found in 2 Kings iv. 23, where the Shunammite’s husband asks, “Wherefore wilt thou go to him (Elisha) to-day? It is neither new moon nor Sabbath.” Yet 2 Kings xxii, 8, etc.; 2 Chron. xxxiv, 14, etc., testify undoubtedly against the existence of places of worship under the monarchy. The date of Psa. lxxiv is too uncertain for us to draw any inference as to the nature of the “synagogues of God” (2 Tim. iii. 5). The places of worship at which the Jews were represented as destroying (ver. 8) may have belonged to the time of the Assyrian or Chaldaean invasion (Virtina, De Synag. p. 396-405). It has been referred to of the Maccabees (De Wette, Paulinm., ad loc.), or to an intermediate period when Jerusalem was taken and the land laid waste by the army of Bagosus, under Artaxerxes II (Ewald, Pont. Bkou. ii. 538). The “assembly of the elders,” in Psa. cvii, 32, leaves us in like uncertainty.

8. During the Exile, in the absence of the Temple worship, the meetings of devout Jews probably became more systematic (Virtina, De Synag. p. 413-429; Jost, Judenthum, i, 168; Bornittus, De Synagog. in Urgolino, Thesaur. xxii), and must have helped forward the change which appears so consistently at the time of the Return. The repeated mention of gatherings of the elders of Israel, sitting before the prophet Ezekiel and hearing his word (Ezek. viii, 1; xiv, 1; xx, 1; xxiii, 31), implies the transfer to the land of the Captivity of the custom that had originated in the schools of the prophets. Our reference is only capable of giving a more distinct reference to them. Those who still remained in Jerusalem taunted the prophet and his companions with their exile, as outcasts from the blessings of the sanctuary. “Get ye far from the Lord; unto us is this land given in a possession.” The prophet's answer is that it was not so. Jehovah was as truly with them in their “little sanctuary” as he had been in the Temple at Jerusalem. His presence, not the outward glory, was itself the sanctuary (xi, 15, 16). The whole history of Ezra presupposes the habit of solemn, periodic, meetings (Ezra viii, 15; Neh. viii, 3; i x; xii; Zech. vii, 6). To conclude, we may attribute the revival, if not the institution, of synagogues, or at least of the systematic meetings on fasts for devotion and instruction (Zech. viii, 19). Religious meetings were also held on Sabbaths and fasts to instruct the exiles in the divine law, and to admonish them to obey the divine ordinances (Ezra vii, 1-9; Neh. viii, 1, 3; ix, 1-3; xii, 1-3). These meetings, held near the Temple and in other localities, were the origin of the synagogue, and the place in which the people assembled was denominated פרס יהודים, the house of assembly; hence, also, the synagogue in the Temple itself. The elders of this synagogue handed the law to the high-priest (Mishna, Yoma, vii, 1; Sohot, viii, 5, 8), sided in all sacrifices (Jerusalem, 4, 5), took charge of the palms used at the Feast of Tabernacles (Sukkah, iv, 4), accompanied the pilgrims who brought their first-fruits (Toishpah Bikkurim), officiated as judges (Makkoth, iii, 12), and superintended the infant-schools (Sobaath, i, 3). Assuming Ewald's theory as to the development of Psa. lxxiv, 2, and that at some subsequent period, have been a great destruction of the buildings, and a consequent suspension of the services. It is, at any rate, striking that they are not in any way prominent in the Maccabean history, either as objects of attack or rallying-points of defence, unless we are to see in the gathering of the persecuted Jews at Maspha (Mizpah), as at a “place where they prayed aforetime in Israel” (1 Macc. iii, 46), not only a remembrance of its old glory as a holy place, but the continuance of a more recent custom. When that struggle was over, there appears to have been a freer development of what may be called the synagogue parochial system among the Jews of Palestine and other countries. The influence of John Hyrcanus, the growing power of the Pharisees, the authority of the Scribes, the example, probably, of the Jews of the “dispersion” (Virtina, De Synag. p. 428), would tend all in the same direction. Well-nigh every town or village had its one or more synagogues. Where the Jews were not in sufficient numbers to be able to erect and fill a building, there was the προσκυνημα, or place of prayer, sometimes open, sometimes covered, in commonly a running stream or on the sea-shore, in which Jews would sit together as a private synagoge, and, thereafter, as a place to rest (Acts xvi, 13; Josephus, Ant. xiv, 10, 23; Juvenal, Sat. iii, 296). Sometimes the term προσκυνημα (προσκύνημα) was applied even to an actual synagogue (Josephus, Life, § 54). Eventually we find the Jews possessing synagogues in the different cities of Syria, Asia Minor, Greece, Egypt, and wherever they resided. We hear of the apostles frequenting the synagogues in Damascus, Antioch, Thessalonica, Corinth, Ephesus, etc. (Acts ii, 20; xiii, 14; xiv, 1; xvii, 1, 10, 17; xvii, 4, 19; xix, 8). There were numerous synagogues in Palestine: in Nazareth (Matt. xiii, 54, Mark vi, 2; Luke iv, 16), Capernaum (Matt. xiii, 9; Mark i, 21; Luke vii, 11; John vi, 55), etc.; and in Jerusalem alone there were 480 (Jerusalem, i, 1; Jerusalem Kethuboth, iii) to accommodate the Jews from foreign lands who visited the Temple. There were synagogues of the Libertines, Cyrenians, Alexandrians, Cilicians, and of the Asiacs (Acts vi, 9; comp. Toishpah Megillah, ii; Babylon Megillah, 26). When it is remembered that more than 2,500,000 Jews came together to the metropolis from all countries to celebrate the Pasover (Josephus, Ant. vi, 9, 3; Pesachim, 64 a), this number of synagogues in Jerusalem will not appear at all exaggerated. An idea may be formed of the large number of Jews at the time of
SYNAGOGUE

Christ, when it is borne in mind that in Egypt alone, from the Mediterranean to the border of Ethiopia, there resided nearly a million of Jews (Philo, *Agricultura*; Lucu- cia, ii, 523); and that in Syria, especially in the metropolis, Antioch, the Jews constituted a large portion of the population (Grätz [2d ed.], iii, 282).

III. Site, Structure, Internal Arrangement, Use, and Sanctity of the Synagogue.—1. Taking the Temple as the prototype, and following the traditional explanation of the passages in Prov. 1: 21 and Ezra ix, 5, which are taken to mean that the voice of prayer is to be raised on heights (נֶאֶם לָהֶם בְּגֶפֶן), and that the sanctuary was therefore erected on a summit (נֶאֶם לָהֶם בְּגֶפֶן), the Jewish canon decreed that synagogues are to be built upon the most elevated ground in the neighborhood, and that no house is to be allowed to overshadow them (Tosita BeMegillah, iii; Maimonides, *Iad Ha-Chesed* *Hilkoth Tephilin*, xi, 2). So essential was this law deemed, and so strictly it was observed in Persia, even after the destruction of the Temple, that Rab (A.D. 165-47) prophesied a speedy ruin of any city in which houses were permitted to tower above the synagogue, while rabbi Ashi declared that the protection of Sora was owing to the elevated site of its synagogues (Subbat, 11 a.). Liet. Kitchener, however, states (Quar. Statement of the Pal. Explor. Fund, July, 1878, p. 123 sq.) that the ruins of the fourteen specimens of ancient synagogues extant in Palestine (all in Galilee) do not correspond to these Talmudical requirements as to location, nor yet to those below as to position; for they are frequently in rather a low site, and face the south if possible. Failing of a commanding site, a tall pole rose from the roof to render it conspicuous (Leyer, in Herzog's *Real-Encyklop.* a. v.).

The riverside outside the city was also deemed a suitable spot for building the synagogue, because, being removed from the noise of the city, the people could worship God without distraction; and, at the same time, have the use of pure water for immersions and other religious exercises (Acts xvi, 13; Josephus, *Ant.* xiv, 10, 23; *Jewish War*, *Ant.* *Subbat*, etc.; *see also the Chaldee versions on Gen. xxiv, 62). See Proseucha.

The building was commonly erected at the cost of the district, whether by a church-rate levied for the purpose, or by free gifts, must remain uncertain (Vitrin- gus, *De Synagog.* p. 229). Sometimes it was built by a rich Jew, or even, as in Luke vii, 5, by a friendly proselyte. In the later stages of Eastern Judaism it was often erected, like the mosques of Mohammedans, near the tombs of famous rabbis or holy men.

The building itself was generally in the form of a theatre; the door was usually on the west, so that, on entering, the worshippers might at once face the front, which was turned towards Jerusalem, since the law is that "all the worshippers in Israel are to have their faces turned to that part of the world where Jerusalem, the Temple, and the Holy of Holies are" (Berakoth, 30 a). This is deduced from the instructions given in Deut. ii, 29; *Psa. xxviii., iii*, and the allegorical interpretation of Song of Songs iv, 4, also obtained among the early Christians (Origen, *Hom.* *in Num.* *in Opp.* ii, 284) and the Mohammedans (*Koran*, cii). See *Kerah.* Hence all the windows are said to have been generally in the eastern wall, and the worshippers were to face towards the holy city, in accordance with Dan. vi, 10.

Like the Temple, the synagogue was frequently without a roof, as may be seen from the following remark of Epiphanius: "There were anciently places of prayer without the city, both among the Jews and the Samaritans . . . each of which was a place of prayer and was called a Neapolis, without the city in the fields, in the form of a theatre, open to the air, and without covering, built by the Samaritans, who in all things imitated the Jews" (Contra, *Harres*, lib. iii, hier. 80). It was this, coupled with the fact that the Jews had no images, which gave rise to the satirical remark of Juvenal—"Nil prietn nubes et celli numerum adorant." (Sat. xiv, 98.)

In some places there were temporary summer and winter synagogues; they were pulled down and re-erected at the beginning of each season, so that the style of building might be according to the period of the year (Bara Bathra, 3 b).

8. In the internal arrangement of the synagoge we trace an obvious analogy, mutatis mutandis, to the type of the tabernacle. At the wall opposite the entrance, at the eastern end, stood the ark ( Builders) containing the scrolls of the law. It stood on a raised base with several steps (Builders = *sabbathium*, *Jerusalem Megillah*, iii, 1), which the priests mounted when they pronounced the benediction (Numb. vi, 24-29) upon the congregation. Hence the phrase נֶאֶם לָהֶם בְּגֶפֶן, which was retained after the destruction of the Temple to describe the act of giving the benediction to the people by the priests (Rosh Ha-Shanah, 31 b; *Subbat*, 118 b). It is necessary to bear in mind that the ancient name for this ark is נֶאֶם (comp. Mishna, *Berakoth*, v, 3; *Talmid*, i, 2; *Megillah*, iv, 4, etc.), the name afterwards given to it (Builders) being reserved for the Ark of the Covenant. There was a canopy (Builders) spread over the ark, under which were kept the vestments used during the service (Jerusalem Megillah, iii). In some places the ark or chest had two compartments, the upper one containing the scrolls of the law, and the lower the synagogal garments of the officers of the community. The ark was not fastened to the wall, but was free, so that it might easily be taken outside the door of the synagogue in case a death occurred in the place of worship, in order that the priests should be able to attend the service; or be removed into the streets when fasts and days of humiliation were kept (Mishna, *Ta- anith*, ii, 1). See Fast. In later times, however, a recess was made in the wall, and the ark was kept there. This recess was called the Sanctuary (Builders, Builders). The same thought was sometimes
read (Yoma, 68 b; Megillah, 26 b; Jerusalem Megillah, iii). The reading-desk was covered with a cloth (טפוח), which varied in costliness according to the circumstances of the congregation (Megillah, 26 b). When the edifice was large this platform was generally in the centre, as was the case in the synagogue at Alexandria (Sukkah, 61 b).

There were also arm-chairs (גרわたし = καθήκον), or seats of honor (πρωτοκαθήκον), for the elders of the synagogue, the doctors of the law, etc. (Matt. xxiii. 2, 6; Mark xii, 39; Luke xi, 43; Sukkah, 51 b; Maimonides, Hilkoth Teshub, x, 4), to which the wealthy and honored worshippers was invited (James ii, 2, 3). They were placed in front of the ark containing the law, or at the Jerusalem end, in the uppermost part of the synagogue, and these distinguished persons sat with their faces to the people, while the congregation was standing both with these honorable ones and the ark (Tosapha Megillah, iii). In the synagogue at Alexandria there were seventy-one golden chairs, according to the number of the members of the Great Sanhedrim (Sukkah, 51 b). See SANEDRIN. In the synagogue of Bagdad the ascent to the holy ark was composed of ten marble steps, on the uppermost of which were the stalls set apart for the prince of the Captivity and the other princes of the house of David" (Benjamin of Tudela, Itinerary, i, 105, ed. Ascher, Lond, 1840).

There was, moreover, a perpetual light (רַבַּאֲבָב), which was evidently in imitation of the Temple light (Exod. xxviii, 20). This sacred light was religiously fed by the people, and in case of any special mercy vouchsafed to an individual, or of threatening danger, a certain quantity of oil was vowed for the perpetual lamp. This light was the symbol of the human soul (Prov. xxvii, 27), of the divine law (vi, 23), and of the manifestation of God (Ezek. xliii, 2). It must, however, be remarked that though the perpetual lamp forms an essential part of the synagogal furniture to the present day, and has obtained among the Indians, Greeks, Romans, and other nations of antiquity (Rosenmüller, Morley, Talmud, ii, 156), yet there is no mention made of it in the Talmud. Other lamps, brought by devout worshippers, were lighted at the beginning of the Sabbath, i. e. on Friday evening (Yirinim, p. 198).

As part of the fittings, we have also to note (1) another chest for the Haphtaroth, or rolls of the prophets; (2) Alms-boxes at or near the door, after the pattern of those at the Temple, one for the poor of Jerusalem, the other for local charities; (3) Notice-boards, on which were written the names of offenders who had been "put out of the synagogue;" (4) A chest for trumpets and other musical instruments, used at the New-Year Sabbath, and other festivals (Yirinim, Leyter, loc. cit.).

The congregation was divided, men on one side, wom-
and had the principal voice in the decision and distribution of the other offices. His two judicial colleagues aided him in the administration of the law.

See AncF 88–89.

2. The Three Almoners (יִשְׂרָאֵל).—The office of almoner was both very responsible and difficult, as the poor-taxes were of a double nature; and in periodically collecting and distributing the alms the almoner had to exercise great discretion from whom to demand them and to whom to give them. There were, first, the alms of the **προστασία (προστασία)**, which were to be collected by the officials daily, and distributed every evening, and to which every one had to contribute who resided thirty days in one place; and there were, secondly, the **αλμα τῆς θήκης (αλμα τῆς θήκης)**, consisting of money which was collected every Friday, was distributed weekly, and to which every one had to contribute who resided ninety days in one place. Two authorized persons had to collect the former and three the latter. They were obliged to keep together, and were not allowed to put it into their pockets neither money thence received, but were to throw it into the poor-box. The almoners had the power of exempting from these poor-rates such people as they believed to be unable to pay, and to enforce the tax on such as pretended not to be in a position to contribute. They also had the power to refuse alms. Their power over the money was very great. All the three almoners had to be present at the distribution of the alms. The greatest care was taken by the rulers of the synagogue and the congregation that those elected to this office should be "men of honesty, wisdom, justice, and have the confidence of the people." (Iad Ho-Chezeka Hilchot Maimonides, ed. 24; Maimonides, Iad Ho-Chezeka Hilchot Maimonides Anim, iv.).

Brothers were ineligible to this office; the almoners in the three almoners were not allowed to be near relations, and had to be elected by the unanimous voice of the people (Jerusalem, ivii).—

3. The Rector of the Congregation, or the Leader of Divine Worship (יִשְׂרָאֵל).—To give unity and harmony to the worship, as well as to enable the congregation to take part in the responses of the service, it was decided that each member of the congregation should lead the worship. Hence, as soon as the legal number required for public worship had assembled (יִשְׂרָאֵל), the ruler of the congregation (יִשְׂרָאֵל = προστασία), or, in his absence, the elders (יִשְׂרָאֵל = προστασία), delegated one of the congregation to go up before the ark to conduct divine service. The function of the apostle of the ecclesia (יִשְׂרָאֵל) was not permanently vested in any single individual ordained for this purpose, but was alternately conferred upon any lay member who was supposed to possess the qualifications necessary for offering up prayer in the name of the congregation. This is evident from the reiterated declarations both in the Mishna and the Talmud. Thus we are told that any one who is not under thirteen years of age, and whose garments are not in rags, may officiate before the ark (Mishna, ivii, 6); that if one before the ark (= ministers for the congregation), and makes a mistake [in the prayer], another one is to minister in his stead, and he is not to decline it on such an occasion" (Mishna, Berakoth, v).—

The sages have transmitted that he who is asked to conduct public worship is to delay a little at first, saying that he is unworthy, and if the desire is urged upon him, he is to go unto a dish wherein is no salt; and if he delays more than is necessary, he is like unto a dish which the salt has spoiled. How is he to do it? The first time he is asked, he is to decline; the second time, he is to stir; and the third time, he is to move his legs and ascend before the ark" (Berakoth, 34 b). Even on the most solemn occasions, when the whole congregation fasted...
SYNAGOGUE

and assembled with the president and vice-president of the Sanhedrim for national humiliation and prayer, no stated ministrations are spoken of; but it is said that one of the aged men present is to deliver a penitential address, and another is to offer up the solemn prayers (Mishna, Taanith ii, 1-4). See Fast. On ordinary occasions, however, the rabbins, who were the rulers of the synagogue, asked their disciples or those acting as officiating ministers (Berakoth, 34 a). But since the sages declared that “if the legate of the congregation (סנהדרין יושב עטיפות) declares ( karşıיםがある) a mistake while officiating, it is a bad omen for the congregation who delegated him, because a man’s deputy is like the man himself” (Mishna, Berakoth, v, 5); and, moreover, since it was felt that he who conducts public worship should both be able to sympa-

thy with the wants of the people and possess all the moral qualifications befitting so holy a mission, it was afterwards ordained that “even if an elder (בּרֵאשִׁים וּפָרָשִׁים) or sage is present in the congregation, he is not to be asked to officiate before the ark; but that man is to be delegated who is apt to officiate, who has children, whose family are free from sin, who is a person beloved, whose garments are decent, who is acceptable to the people, who has a good and amiable voice, who understands how to read the law, the prophets, and the Hagiographa, who is versed in the homiletic, legal, and traditional exegesis, and who knows all the beneficences of the office of the officiating minister” (Tosiphon, Gemara, Bava Kama, 16 b; Maimonides, Iad Ha-Chesed Haklith Tohpitha, viii, 11, 12; comp. I Tim. iii, 1-7; Tit. i, 1-9). As the legate of the people, the most sacred portions of the liturgy (e.g. מַעַסְרֵנוּ וּפָרָשִׁים), which could only be offered up in the presence of the legal number, were assigned to him (Berakoth, 21 b, and Rashi, ad loc.), and he was not only the mouthpiece of the congregation in the most solemn feasts, as on the Great Day of Atonement and New Year, but he was the surrogate of those who, by illness or otherwise, were prevented from attending the place of worship (Rashi Ha-Shanah, 38; Maimonides, Iad Ha-Chesed Haklith Tohpitha, viii, 11). The Interpreter, or Methurgeman (מק الثنائية), After the Babylonian captivity, when the Hebrew language was rapidly disappearing from among the common people, it became the custom to have an interpreter at the reading-desk (מק الثنائية) by the side of those who were alternately called up to read the several sections of the lessons from the law and the prophets. See Haphtaroth. This methurgeman had to interpret into Chaldee or into any other vernacular of the country, as occasion required, when the law was read, as the reader was obliged to pause as soon as he finished the reading of a verse in Hebrew, and was not allowed to begin the next verse till the methurgeman had translated it; while in the lesson from the prophets three verses were read and interpreted at a time (Mishna, Megillah, iv, 4). The reader and the interpreter had to read in the same tone of voice, and the one was not allowed to be louder than the other (Berakoth, 45 a). The interpreter was not allowed to look at the law while interpreting, lest it should be thought that the paraphrase was written down. The office of interpreter, like that of conducting public worship, was not permanently vested in any single individual. Any one of the congregation who was capable of interpreting was asked to do so. Even a minor, i.e. one under thirteen years of age, or one whose garments were in such a ragged condition that he was disqualified for reading the lesson from the law, or a blind man, could be asked to go up to the reading-desk and explain the lesson (Mishna, Megillah, iv, 5; Maimonides, Iad Ha-Chesed Haklith Tohpitha, xii, 10-14).

5. The Chazan, or Attendant on the Synagogue (שנין וּפָרָשִׁים), was the lowest servant, and

was more like the sexton or the beadle in our churches. He had the care of the furniture, to open the doors, to clear the synagogue, to light the lamps, to get the building ready for services, to supervise the choir, to call out (משנה וּפָרָשִׁים) the names of such persons as were selected by the ruler of the synagogue to come up to the platform to read a section from the law and the prophets, to hand the law to ordinary readers, or to the ruler of the synagogue when it had to give to the high-priest, in which case the ḥaṭatnmawvusów took the law from the chazan, gave it to the chief priest, who had the high-priest publicly read it (Mishna, Berakoth, vii, 1; Sotah, vii, 7); he had to take it back after reading (Luke iv, 17-20, etc.). Nothing, therefore, can be more clear than the position which this menial servant occupied in the synagogue in the time of Christ and a few centuries after. The Talmud distinctly declares that the chazan is the beadle or the sexton of the congregation, and not the legate or the angel of the church (בּרֵאשִׁים וּפָרָשִׁים; comp. Tobitha Yoma, 68 b; and Mishna, Berakoth, vii, 1, for the meaning of ישן). The notion that his office res-

embled that “of the Christian deacon,” as well as the assertion that “like the legatus and the elders, he was appointed by the imposition of hands,” has evidently arisen from a confusion of the chazan in the days of Christ with the chazan five centuries after Christ. Be-

sides, not only was this menial servant not appointed by the imposition of hands, but the legatus of the Jews, if we have seen, had no laying-on of hands. It was about A.D. 520, when the knowledge of the Hebrew language disappeared from among the people that large, alter-

ations had to be introduced into the synagogue service which involved a change in the office of the chazan. As the ancient practice of asking any member to step before the ark and conduct the divine service could not be continued, it was determined that the chazan, who was generally also the schoolmaster of the infant school, should be the regular reader of the liturgy, which he had to recite with intonation (Maasechod Sophronissim, v, 7, xi, 4; xv, 9, 14, Grisch, Gesch. der Juden, v, 26). 6. The Ten Batanim, or Men of Leisure (שהנים וּפָרָשִׁים).

—No place was denominated a town, and hence no syn-

agogue could legally be built in it, which had not ten in-

dependent men who could be permanently in the syn-

agogue to constitute the legal congregation whenever required (Mishna, Megillath, i, 3; Maimonides, Iad Ha-

Chesed Haklith, xi, 1). These ten men were not, as is commonly supposed, ten independent members, but we are either independent of business because they had private means, or were stipendiaries of the congregation, if the place had not ten men who could entirely devote themselves to this purpose (Rashi, On Megillath, 6 a). They had to be men of piety and integrity (Baba Batra, 28 a; Jerusalem Megillah, i, 4). By some (Lightfoot, Hor. Heb. in Matt. iv, 28, and, in part, Vitringa, p. 582) they have been identified with the above officials, with the addition of the alms-collectors. Rhenford, however (Ugolino, Theosur., vol. xxii), sees in them simply a body of men, permanently on duty, making up a congregation (ten being the minimum number), so that there might be no delay in beginning the service at the proper hours, and that no single worshipper might go away disappointed. The latter hypothesis is supported by the fact that there was a like body of men, the Sta-

tionarii or Viri Stationis of Jewish archæologists, ap-

pointed to act as permanent representatives of the con-

gregation in the services of the Temple (Jost, Gesch. des Judenth., 1, 168-172). It is of course possible that in many cases the same persons may have united both characters, and been, e.g., at once onias and alms-col-

lectors. In the Middle Ages these ten Batanim consisted of those who were engaged in the common duties of the synagogue, and were identical with the rulers of the synagogue described above. Thus Benjamin of Tudela tells us that the ten presidents of the ten colleges at
Bagdad were called the *Batlinim, the leisure men*, because their occupation consisted in the discharge of public business. During every day of the week they dispensed justice to all the Jews inhabiting the country, except on Monday, which was set aside for assemblies under the presidency of R. Samuel, master of the college denominated 'Ga'on Jacob,' who on that day dispensed justice to every applicant, and who was assisted therein by the said ten *Batlinim*, presidents of the college* (Rit. i. 101, ed. Asher, Lond. 1840).

This seems to favor the opinion of Herzfeld that the ten *Batlinim* are the same as the ten judges or rulers of the synagogue mentioned in Aboth, iii. 10, according to the reading of Bartenora (Horogoth, 3 b, etc.; comp. Gesch. des Volkes Israel, i, 392).

V. Worship.—I. Its Time.—As the Bible prescribes no special hour for worship, but simply records that the Psalmist prayed three times a day (Psa. iv, 18), and that Daniel followed the same example (Dan. vii, 11), the men of the Great Synagogue decreed that the worship of the synagogue should correspond to that of the Temple. To this end they ordained that the prayer of the day be offered three times a day: (a) in the morning (תנויה מ萬元) at the third hour (= 9 A.M., being the time when the daily morning sacrifice was offered); (b) in the afternoon or evening (תנויה בלילה) at the ninth hour and a half (= 3 P.M., when the daily evening sacrifice was offered); and (c) in the evening (תנויה בלילה), or rather, from the time that the pieces and the fat of the sacrifices, whose blood was sprinkled before sunset, began to be burned till this process of burning was finished. As this process of burning, however, sometimes lasted nearly all night, the third prayer could be offered at any time between dark and dawn (Mishna, Berakoth, iv. 1; Gemara, ibid. 26 b; Pesachim, 58 a; Jerusalem Berakoth, iv. 1; Josepbus, Ant. xiv, 4, 3). It is this fixed time of worship which accounts for the disciplemas' assembling together at the third hour of the day (v. e. 9 A.M.) for morning prayer (תנויה מراحة) on the Day of Pentecost (Acts ii, 1-15), and for Peter and John's going up to the Temple at the ninth hour (v. e. 3 P.M.) for evening prayer (Acts iii, 1), and this was called the Lesser Minchah (תנויה בלילה).

But as the daily evening sacrifice was offered on the fourteenth of Nisan (תנויה בלילה) at the sixth hour and a half (= 12.30 P.M.), when this day happened to be on a Friday (תנויה בלילה) [see Passover], it was enacted that he who offered his evening prayer after the sixth hour and a half (= 12.30 P.M.) discharges his duty properly. Hence, so soon as this hour arrives, the time of obligation has come, and it is called the Great Minchah (תנויה בלילה) Maimonides, Iad Ha-Cheschaka Hilchoth Tephila, iii, 2; Berakoth, 36 b). This mistake is all the more to be regretted, since the accuracy in such matters partakes of the sacred writers shows how great is the trustworthiness of their reports. However, the prayer was continued as prescribed by our Saviour and his disciples, and around which the new pieces were grouped in the course of time.
(1) The Hymnal Group (םַּמְרוֹרָה הַשָּׁמֶשׁ).—Just as the Temple building was the prototype for the synagogal edifice, so the Temple service was the model for the ritual of the synagogue. Hence, just as the Temple service comprised of the priests' and Levites' ceremonies and the ten commandments, pronouncing the benediction upon the people (Num. vi, 24-27), the offering of the daily morning and evening sacrifice, the Levites' chanting Psalms cxv, 1-16; 1 Chron. xvi, 8-22 (תְּנוֹחֵי) during the morning sacrifice, and Psalms cxvi; 1 Chron. xvi, 23-36 (תְּנוֹחֵי) during the evening sacrifice, so the ritual of the synagogue consisted of the same benediction, the chanting of the sacrificial psalms—as the sacrifices themselves could not be offered except in the Temple—and sundry additions made by Ezra and the men of the Great Synagogue. It is for this reason that the ritual began with the Temple psalms. These were followed by the group consisting of Psalms [xix, xxxiv, xi, cxxv, cxxvi, cxxvii, cxxviii, cxxix, cxxx, cxxxv], those enclosed in brackets being omitted on the Sabbath—1 Chron. xxix, 10-13; Neh. ix, 6-12; Exod. xiv, 30-35, 18, and sundry sentences not found in the Bible, denominated the order of the Hymnal Sentences or "musical periods." The use of this hymnal group as part of both the Temple and the synagogue service is of great antiquity, as is attested by the Sofer of the Aramaic Talmud (Mishnah, Kiddushin). It is also Sabbath, 118 b, where we are told that רָבָא was ordained by David, and רָבָא by the Sopherim, or scribes.

(2) The Shema, or Kerith Shema (שמע וְקִרְיָת שֵׁם).—This celebrated part of the service was preceded by two benedictions, respectively denominated "the Creator of Light" (הָדוּר הַשָּׁמֶשׁ) and "Graceful Love" (נָהֳרַיָּה), and followed by one called "Truth" (יִשְׂרָאֵל נָהֳרַיָּה), now expanded into יִשְׂרָאֵל נָהֳרַיָּה נָהֳרַיָּה. The two introductory benedictions were as follows: (a.) "Blessed art thou, O Lord our God, King of the universe, who created light and darkest darkness, who maketh peace and createst all things! He in mercy calleth the light to shine upon the earth and the inhabitants thereof, and in goodness reneweth every day the work of creation. Blessed art thou, the Creator of light!" (b.) "With great love hast thou loved us, O Lord our God, thou hast shown us great and abundant mercy, O our Father and King, for the sake of our forefathers who trusted in thee! Thou who didst teach us the love of life, have mercy upon us, and teach us also... to praise and to acknowledge thine unity in love. Blessed art thou, O Lord, who in love hast chosen thy people!" (Mishnah, Tamid, v. 1; Berakoth, 11 b). Thereupon the ten commandments were recited, which, however, ceased at a very early period, because the Sadducees declared that this was done to show that this was the most essential portion of the revealed law (Mishnah, Tamid, v. 1, with Berakoth, 14 b). Then came the Shema proper, consisting of Deut. vi, 4-9; xi, 13-21; Numb. xv, 37-41, which was concluded with benediction (c), entitled "True and Established" (יִשְׂרָאֵל נָהֳרַיָּה נָהֳרַיָּה נָהֳרַיָּה), as follows: "It is true and firmly established that thou art our Lord and the God of our forefathers; there is no God besides thee. Blessed art thou, O Lord, the redeemer of Israel!" (Mishnah, Berakoth, 1; Gemara, ibid. 13 a; Mishnah, Tamid, v. 1; Gemara, ibid. 82 b). There is evidently an allusion to the reading of the Shema in the reply which our Saviour gave to the lawyer who asked him, "Master, what must I do to inherit eternal life?" When the lawyer forthwith cited the first sentence of the Shema (Luke x, 36). See SHEMA.

(3) The third portion which constituted the ancient liturgy embraces the "Eighteen" Benedictions, called קָרָא הַשָּׁמֶשׁ, the Prayer (לְדָבָר). They are as follows: (a.) "Blessed art thou, O Lord our God, the God of our fathers Abraham, Isaac, and Jacob; great, omnipotent, fearful, and most high God, who bountifully bestowest mercy, who art compassionate to those pious deeds of our fathers, and sendest the Redeemer to their children's children, for his mercy's sake is love, O our King, Defender, Saviour, and Shield! Blessed art thou, O Lord, the shield of Abraham!" b. "Thou art powerful, O Lord, world without end; thou bringest the dead to life in great compassion, thou holdest up the falling, healest the sick, leasten the chained, and showest thy faithfulness to those that sleep in the dust. Who is like unto thee, Lord of might, and who resembles thee (a Sovereign killing and bringing to life again, and causing salvation to flourish)? And thou art sure to raise the dead. Blessed art thou, O Lord, who raisest the dead!" c. "Thou art holy, and thy name is holy, and the holy ones praise thee every day. Blessed art thou, O Lord, the holy God!" d. "Thou mercifully bestowest knowledge upon men and teachest the mortal prudence. Mercifully bestow upon us, from thyself, knowledge, wisdom, and understanding. Blessed art thou, O Lord, who mercifully bestowest knowledge!" e. "Our Father, lead us back to thy law; bring us near, O our King, to thy service, and cause us to return in sincere penitence into thy presence! Blessed art thou, O Lord, who delightest in repentance!" f. "Our Father, forgive us, for we have sinned; our King, pardon us, for we have transgressed; for thou art forgiving and pardoning. Blessed art thou, O Lord, merciful and plenteous in forgiveness!" g. "Look at our misery, contend our cause, and deliver us speedily, for thy name's sake, for thou art a mighty deliverer. Blessed art thou, O Lord, the deliverer of Israel!" h. "Heal us, O Lord, and we shall be healed; save us, and we shall be saved; for thou art our boast. Grant us perfect cure for all our wounds; for thou, O Lord our King, art a faithful and merciful Physician; blessed art thou, O Lord, who healest the sick of thy people Israel!" i. "Bless to us, O Lord our God, for good this year, and all its kinds of produce; send thy blessing upon the face of the earth; satisfy us with thy goodness, and bless this year as the years bygone. Blessed art thou, O Lord, who blessest the seasons!" j. "Cause the great trumpet to proclaim our liberty; raise the standard for the gathering of our captives, and bring us together from the four corners of the earth. Blessed art thou, O Lord, who gatherest together the dispersed of Israel!" k. "Reinstate our judges as of old, and our councillors as of yore; remove from us sorrow and sighing; and do thou alone, O Lord, reign over us in mercy and love, and judge us in righteousness and justice. Blessed art thou, O Lord the King, who loveth righteousness and justice!" l. "Let the apostates have no hope, and let those who pervert wickedness speedily perish; let them all be suddenly cut off; let the proud speedily be uprooted, broken, crushed, and humbled speedily in our days. Blessed art thou, O Lord, who destroyest and humiliest the proud!" m. "On the righteous, on the pious, on the elders of thy people, the house of Israel, on the remnant of the scribes, on the pious proselytes, and on us, bestow, O Lord our God, thy mercy; give ample reward to all who trust in thy name in sincerity, make our portion with them forever, and let us be speedily ennobled, for we trust in thee! Blessed art thou, O Lord, the support and rest of the righteous!" n. "To Jerusalem thy city in mercy return, and dwell in it according to thy promise; make it speedily in our day an everlasting building, and soon establish therein the throne of David. Bless-
ed art thou, O Lord, who bestowst Jerusalem!" n. (תֹּא אֲדֹנָי יִשְׂרָאֵל)  "The branch of David, thy servant, speedily cause to flourish, and exalt his horn with thy help, for we look to thy help all day. Blessed art thou, O Lord, who causest to flourish the horn of David!" o. (ְינַו אֲדֹנָי יִשְׂרָאֵל)  "Hear our voice, O Lord our God; have pity and compassion on us, and receive with mercy and accept ance our prayers, for thou art a God hearing prayer and answering supplications, do not send us empty away from thy presence, for thou hearest the prayers of thy people Israel in mercy! Blessed art thou, O Lord, who hearest prayer!" p. (לְאָדֹנָי)  "Be favorable, O Lord our God, to thy people Israel, and to their prayer; restore the worship to thy sanctuary, receive lovingly the burnt-sacrifice of Israel and their prayer, and let the service of Israel thy people be always well-pleasing to thee. May our eyes see thee return to Zion in love. Blessed art thou, O Lord, who restorost thy Shechinah to Zion!" q. (לְאָדֹנָי)  "We thankfully confess before thee that thou art the Lord our God, and the God of our fathers, world without end, and that thou art the shepherd of our life and the rock of our salvation from generation to generation; we render thanks unto thee and celebrate thy praises. Blessed art thou, O Lord, whose name is great and, whom it comes to praise!" r. (לְאָדֹנָי)  "Bestow peace, happiness, blessing, grace, mercy, and compassion upon us and upon the whole of Israel, thy people. Our Father, bless us all unitedly with the light of thy countenance, for in the light of thy countenance didst thou give to us, O Lord our God, the law of life, loving kindness, justices, blessing, compassion, life, and peace. May it please thee to bless thy people Israel at all times, and in every moment, with peace. Blessed art thou, O Lord, who bestowest thy people Israel with peace!"

These eighteen (really nineteen) benedictions are mentioned in the Mishna, Rosh Han-Shanah, iv; Berakoth, iv, 3; Tosphita Berakoth, iii; Jerusalem Berakoth, iv; Megiloth, 17 a. We are distinctly told that they were ordained by the one hundred and twenty elders of the Great Synagogue (Megillah, 17 b; Berakoth, 33 a; Siphre on Deut. xxxiii, 2), and we know that the representatives of the people (רבנן) recited them in the Temple every day (Sabbath, 24 b), that the priests pronounced three of them upon the people every morning in the Hall of Squares (עֵרֶב יָמִין) in the Temple-court, and that the high-priest prayed the sixteenth (טז) and the seventeenth (יז) sections of this litany on the Great Day of Atonement (Yoma, 68 b). There can therefore be no doubt that our Saviour and his apostles joined in these prayers when they resorted to the synagogue, and that when the apostles went on the top of the house to pray at the stated hour (Acts i, 13; x, 9) these benedictions formed part of their devotions. It must, however, be remarked that the first three and the last three benedictions are the oldest; that benedictions d to m were compiled during the Maccabean struggles and the Roman ascendancy in Palestine; and benediction n was most probably compiled after the destruction of the second Temple.

But though these three groups (viz. the hymnal group, the Sema, and the eighteen benedictions) constituted the liturgy of the Jews when engaged in public or private devotion during the period of the second Temple, yet there were other prayers which could only be recited at public worship when the legal number (21) were properly assembled.

4. The order of the public worship in the synagogue

was as follows:

a. Morning Service.—The congregation having washed their hands outside the synagogue, and being properly assembled, delegated one of their number to go before the ark and conduct public worship. This
SYNAGOGUE

members as were best qualified to aid them in the administration of the communal affairs. These constituted a local self-governing and independent college; they issued all the legal instruments, such as mortgages, contracts, letters of divorce, bills of exchange, business contracts, receipts, etc. They had the power of inflicting corporal punishment on any offender, or to put him out of the synagogue (= excommunicate) altogether (Matt. xviii, 15-17; John ix, 22; xii, 42; xvi, 9). The punishment of excommunication, however, was very seldom resorted to, as may be seen from the fact that though Christ and his apostles opposed and contradicted the heads of the synagogue, yet they were not put out of the synagogue. In some cases they exercised the right, even outside the walls of the Palestinian synagogues, of the persons accused and sending them in chains to take their trial before the Supreme Council at Jerusalem (Acts ix, 2; xii, 5, ii). 2. It is not quite so easy, however, to define the nature of the tribunal and the precise limits of its jurisdiction. In two of the passages referred to (Matt. x, 17; Mark xiii, 9) they are carefully distinguished from the συνεδρία, or councils, yet both appear as instruments by which the spirit of religious persecution might fasten on its victims. The explanation commonly given that the council sat in the synagogue, and that in later Jewish times they were not, is simply fallacious, as Herzog's Real-Encyclop. a. v. "Syndedrium". It seems more probable that the council was the larger tribunal of twenty-three, which sat in every city (see Council), identical with that of the seven, with two Levites as assessors to each, which Josephus describes as acting in the smaller provincial towns (Ant. iv, 8, 14; War, ii, 20, 5), and that under the term synagogue we are to understand a smaller court, probably that of the ten judges mentioned in the Talmud (Gem. Hecor. Sanhedr. loc. cit.), consisting either of the elders, the chazzan, and the legate, or otherwise (as Herzfeld conjectures, i, 392) of the ten judicial stores of the Jewish law. The law of war, those who fawned upon the rich was, on this view, that they were "judges of evil thoughts," carrying respect of persons into their administration of justice. The interpretation, however, though ingenious, is hardly sufficiently supported. VII. Relations of the Jewish Synagogue to the Christian Church.—It is hardly possible to overstate the influence of the system thus developed. To it we may ascribe the tenacity with which, after the Maccabean struggle, the Jews adhered to the religion of their fathers, and never again relapsed into idolatry. The people were now in no danger of forgetting the law, and the external ordinances that hedged it round. If pilgrimages were still made to Jerusalem at the great feasts, the habitural religion of the Jews in, and yet more out of, Palestine was connected much more intimately with their daily life than the Christian was. To edifying devotion, in which mind and heart could alike enter, attracted the heathen proselytes who might have been repelled by the bloody sacrifices of the Temple, or would certainly have been driven from it unless they could make up their minds to submit to circumcision (Acts xxii, 28). See Proskrynta. Here, too, as in the cognate order of the scribes, there was an influence tending to diminish and ultimately to destroy the authority of the hereditary priesthood. The services of the synagogue required no sons of Aaron; gave them nothing more than a complimentary precedence. See Parax; Scirr. The way was simply prepared for a new and higher order, which should rise in "the fulness of time" out of the decay and abolition of both the priesthood and the Temple. In another way, too, the synagogues everywhere prepared the way for that order. Not "Moses" only, but "the prophets" were read in the Synagogue (Luke iv, 21, 27). The way was opened for the Gospel; and the national hopes of Israel, the expectation of a kingdom of heaven, were universally diffused. 1. It will be seen at once how closely the organisation of the synagogue was reproduced in that of the Ecclesia. Here also there was the single presbyter-bishop, the archbishop, over all the smaller bishops under one head in large cities. The legatus of the synagogue appears in the ἄγγελος (Rev. i, 20; ii, 1), perhaps also in the ἀστρατεύος of the Christian Church. To the elders as such is given the name of Shepherd (Eph. iv, 11; Acts xi, 30), also as ἑγκυροί (Heb. xii, 7). Even the transfer to the Christian prolesytes of the once distinctively sacerdotal name of ἱερεὺς, foreign as it was to the feelings of the Christians of the apostolic age, was not without its parallel in the history of the synagogue. Seven, the exorcist Jew of Ephesus, was probably "chief priest" in this sense (Acts xix, 14). In the edicts of the later Roman emperors, the terms ἱεραρχός and ἱερεύς are repeatedly applied to the rulers of synagogues (Cod. Theodos. De Jud., quoted by Vitringa, De Decem Oecosis, in Ugelino, Thea. xxi.). Possibly, however, this may have been due to the presence of the scattered priests, after the destruction of the Temple, as the rabbins or elders of what was now left to them as their only sanctuary. To them, at any rate, a certain precedence was given in the synagogue services. They were invited first to read the lessons for the day. The benediction of Numb. vi, 22 was reserved for them alone. 2. In the magisterial functions of the synagogue also we may trace the outline of a Christian institution. The ἐκκλησία, either by itself or by appointed delegates, was to act as a court of arbitration in all disputes among its members. The elders of the Church were, however, to decide the more trivial disputes of daily life (τὰ βιωματικά). For these any men of common sense and fairness, however destitute of official honor and position (ὁ ἐκκλησιακός), would be enough (1 Cor. vi, 1-8). For the elders, as for those of the synagogue, were reserved the gravest offences against religion and morals. In such cases they had power to excommunicate, to "put out of" the Ecclesia, which had taken the place of the synagogue, sometimes by their own authority, sometimes with the consent of the whole society (v, 4). It is worth mentioning that Hammond and other commentators have seen a reference to these judicial powers in passages ii, 12, 15, 21, where those who fawned upon the rich was, on this view, that they were "judges of evil thoughts," carrying respect of persons into their administration of justice. The interpretation, however, though ingenious, is hardly sufficiently supported. 3. The ritual of the synagogue was to a large extent the reproduction (here also, as with the fabric, with many inevitable changes) of the staterelity liturgy of the Temple. It will be enough, in this place, to notice in what way the ritual, no less than the organization, was connected with the facts of the New-Test. history, and some of them, as it would seem, was to be used by the Christians, no longer, however, to deserve the disgraceful epithets of daily life (τὰ βιωματικά). For these any men of common sense and fairness, however destitute of official honor and position (ὁ ἐκκλησιακός), would be enough (1 Cor. vi, 1-8). For the elders, as for those of the synagogue, were reserved the gravest offences against religion and morals. In such cases they had power to excommunicate, to "put out of" the Ecclesia, which had taken the place of the synagogue, sometimes by their own authority, sometimes with the consent of the whole society (v, 4). It is worth mentioning that Hammond and other commentators have seen a reference to these judicial powers in passages ii, 12, 15, 21, where those who fawned upon the rich was, on this view, that they were "judges of evil thoughts," carrying respect of persons into their administration of justice. The interpretation, however, though ingenious, is hardly sufficiently supported. 1. From the synagogue came the use of fixed forms of prayer. To that the first disciples had been accustomed from their youth. They had asked their Master to give them a distinctive one, and he had complied with their request (Luke xi, 1), as the Baptist had done before for his disciples, as every rabbi did for his. The forms might be, and were, abused. The Pharisees might in synagogues, or, when the synagogues were closed, in the open street, recite aloud the devotions appointed for hours of prayer, might gaze glibly through the Shema ("Hear, O Israel," etc., from Deut. v, 4), his Kaddish, his Shema, his Psalms. They had mystical teachings, with the "vain repetition" which has reappeared in Christian worship. But for the disciplicitis this was, as yet, the true pattern of devotion, and their Master sanctioned it. To their minds there would seem nothing inconsistent with true heart-worship in the recurrence of these fixed expressions, the same prayers, hymns, doxologies, such as all liturgical study leads us to think of as existing in the apostolic
age. If the gifts of utterance which characterized the first period of that age led for a time to greater freedom, to unmeditated prayer, if that was in its turn succeeded by the renewed predominance of a formal fixed order, the alternation and the struggle which have reappeared in so many periods of the history of the Church were not without their parallel in that of Judaism. The synagogue did not become an institution, nor did its repudiation by the rabbis give to their adversary an ascendant, binding form. Eizeier of Lydda, a contemporary of the second Gamaliel (cir. A.D. 80–115), taught that the legate of the synagogue should discard even the Shemoneh Eeth, the eighteen fixed prayers and benedictions of the daily and Sabbath services, and should pray as his heart moved him. Notwithstanding this existing division, the Judaism into which Judaism stiffened was apparently too great to be forgiven. He was excommunicated (not, indeed, avowedly on this ground), and died at Cæsarea (Joseph, Gesch. des Judenth., ii, 36, 45).

(2.) The large admixture of a didactic element in Christian worship, that by which it was distinguished from all Gentile forms of adoration, was derived from the older order. "Moses" was "read in the synagogues every Sabbath day" (Acts xv, 21), the whole law being read consecutively, so as to be completed, according to one cycle, in three years, according to that which ultimately divided the existing divisions of the Hebrew text (Leyrer, loc. cit.), in the fifty-two weeks of a single year. See Bible. The writings of the prophets were read as second lessons in a corresponding order. They were followed by the Derash, the logos παραδήσεως (Acts xiii, 15), the exposition, the sermon of the synagogue. The first Christian synagogues, we must believe, followed this order with but little deviation. It remained for them before long to add "the other Scriptures" which they had learned to recognize as more precious than the law itself, the "prophetic word" of the New Testament, which, not less truly than that of the Old Testament, is included in narrative, from the same Spirit. See Scripture.

(3.) To the ritual of the synagogue we may probably trace a practice which has sometimes been a stumbling-block to the student of Christian antiquity, the subject-matter of fierce debate among Christian controversialists. Whatever account may be given of it, it is certain that Prayers for the Dead appear in the Church's worship as soon as we have any trace of it after the immediate records of the apostolic age. It has been well described by a writer whom no one can suspect of Romish tendencies as an "immemorial practice." Though "Lei ler" (ibid. c. xiii) has not without reason turned towards the light of the East (Clem. Al. Strom. loc. cit.); the responsive Amen of the congregation to the prayers and benedictions of the elders (1 Cor. xiv, 16). In one strange exceptional custom of the Church of Alexandria we trace the wilder type of Jewish, of Oriental devotion. There, in the closing responsive chorus of the worship, the worshippers not only stretched out their necks and lifted up their hands, but leaped with wild gestures (ροσάν τε πόδας ἐρευνήσας), as if they would fain rise with their prayers to heaven itself (Clem. Al. Strom. vii, 40). This, too, reproduced a custom of the synagogue. Three times did the lector, one over the whole congregation, read out the prayers. Fifty years later the scholiast of the Mosaic code quoted sees a probable reference to them in 2 Tim. i, 18 (Eillicott, Past. Epistles, ad loc.). But it is no means certain that Oneisiphorus was at that time dead.

(4.) The conformity extends, also, to the times of prayer. In the hours of service this was obviously the case. The third, sixth, and ninth hours were, in the times of the New Testament. (Acts iii, 1; x, 3, 9), and had been, probably, for some time before (Psa. iv, 17; Dan. vi, 10). The fixed times of devotion, known then, and still known, respectively as the Shacharit, the Minchah, and the Ma'ariv, were, in the first instance, an outgrowth of the authoritative tradition, but were connected respectively with the names of Abraham, Isaac, and Jacob, to whom, as to the first originators, their institution was ascribed.

(Buxtorf, De Synagoga, p. 289.) The same hours, it is well known, were prescribed, in the Church of the second century, probably also in that of the first century (Clem. Al. Strom. loc. cit.; Tertull. De Orat. c. xxv). The sacred days belonging to the two systems seem, at first, to present a contrast rather than a resemblance; but here, too, there is a symmetry which points to an original connection. The solemnity of the day and the reverence to which the Sabbath was devoted, in the early Christian society what the other days had been to the Jewish.

The following suggestion as to the mode in which this transfer was effected involves, it is believed, fewer arbitrary assumptions than any other [see SABBATH], and connects itself with another interesting custom, common to the Church and the synagogue. It was a Jewish custom to end the Sabbath with a feast, in which they did honor to it as to a parting king. The feast was held in the synagogue. A cup of wine, over which a special blessing had been spoken, was handed round (Joseph, Gesch. des Judenth. i, 186). It is obvious that, so far as the Christian Church was concerned, it continued to use the Jewish mode of reckoning—so long, i.e., as they fractionized with their brethren of the stock of Abraham—this would coincide in point of time with their εεπτομεν on the first day of the week. A supper on what we should call Sunday evening would have been on them on the second. By degrees [see Lord's Supper] the time became later, passed on to midnight, to the early dawn of the next day. So the Lord's supper ceased to be a supper really. So, as the Church rose out of Judaism, the supper gave its holiness to the coming, instead of deriving it from the parting day. The day came to be Supper or, and the Church was associated with the day. Gradually the Sabbath ceased as such to be observed at all. The practice of observing both, as in the Church of Rome up to the fifth century, gives us a trace of the transition period. See SUNDAY.

(5.) From the synagogue, lastly, came many less conspicuous practices, which meet us in the liturgical life of the first three centuries. Ablution, entire or partial, before entering the place of meeting (Heb. x, 22; John xiii, 1–15; Tertull. De Orat. c. xi); standing and not kneeling, as the attitude of prayer (Luke xviii, 11; Tertull. ibid. c. xxiii); the arms stretched out (Tertull. ibid. c. xii); the fingers turned towards the east (Clem. Al. Strom. loc. cit.); the responsive Amen of the congregation to the prayers and benedictions of the elders (1 Cor. xiv, 16). In one strange exceptional custom of the Church of Alexandria we trace the wilder type of Jewish, of Oriental devotion. There, in the closing responsive chorus of the worship, the worshippers not only stretched out their necks and lifted up their hands, but leaped with wild gestures (ροσάν τε πόδας ἐρευνήσας), as if they would fain rise with their prayers to heaven itself (Clem. Al. Strom. vii, 40). This, too, reproduced a custom of the synagogue. Three times did the lector, one over the whole congregation, read out the prayers. Fifty years later the scholiast of the Mosaic code quoted sees a probable reference to them in 2 Tim. i, 18 (Eillicott, Past. Epistles, ad loc.). But it is no means certain that Oneisiphorus was at that time dead.

SYNAGOGUE

Synagogue (Vittem, 1850); Leonicard, De Synagoga et Ecclesiâ (L. et an.); Rhenferd, De Ottois Synagoga (Francc. 1868); id. Archivsagoga Otiosus (ibid. 1868); Tsentel, De Porusceacum Samar. (Vittemb. 1869); and the dissertations cited by Darling, CYCLOP. BIBLIO., col. 1114. See WOSSNIT.

SYNAGOGUE, THE GREAT (post-Biblical Hebrew, ניַעֲגֹּה הָעֵדָה; Araeaic, מְבָּרַךְ בֶּתֶּרֶם; late Greek and Latin, δεκαετής μπέιρα, Synagogue Magna); the Greek equivalent of the Hebrew word סַנָּה הָעֵדָה, the Great Synagogue, denoting the council first appointed after the return of the Jews from the Babylonian captivity to reorganize the religious life, institutions, and literature of the people. Our information on the subject is chiefly from Rabbinical sources.

I. Name and Signification.—Though the verbs יִתְנַסֵּע, to gather, to assemble, occurs in the Old Test. (Esth. iv, 16; I Chron. xxii, 2; Ezek. xxi, 21; xxixix, 29; Ps. cxxii, 2), yet the noun יִתְנַסֵּע, assembly, synagogue, does not occur in Biblical Hebrew. In the Hebrew Scriptures the terms יִתְנַסֵּע, יִתְנַסָּה, and יִתְנַסָּה, are used for congregation, assembly [see ECCLESIASTES], and there can be but little doubt that the non-Biblical יִתְנַסֵּע is designedly employed to distinguish this assembly from all other gatherings. See SYNAGOGUE. This is also the reason why the article is prefixed to the adjective alone, and not to the noun—in Hebrew יִתְנַסָּה, the Great Synagogue—inasmuch as this single it out from the other synagogues, provincial or local, both great and small, which obtained at the same time, and which were designed for different objects. When Ewald asserts that “in the Mishnaic language the substantiv and the adjective never have the article together (Lorberb., § 293 a, note), we need only refer to Sabbath, xvii, 4; Yoma, iv, 3; Taanith, iii, 7; Ketuboth, vi, 7; Nedarim, iii, 11; Nazir, viii, 1; Baba Bathra, iv, 4, and to innumerable other passages, in refutation of this assertion. According to the most ancient tradition, this assembly or synagogue was styled great because of the great work it effected in restoring the divine law to its former greatness, and because of the great authority and reputation which it enjoyed (Jebb, i, 7; Belz, ii, 7; Megillah, 17 b; Yoma, 69 b; Erubin, 13 b; Zebachim, 102; Sanhedrin, 14 a). The enactments of the Great Synagogue are often quoted in the name of the יִתְנַסָּה, the men of the Great Assembly, or those who successively constituted its members during the long period of its existence. The abbreviated forms of these two names to be met with in Jewish literature are יִתְנַסָּה יִתְנַסָּה וַיּוֹסֵף, יִתְנַסָּה וַיּוֹסֵף, יִתְנַסָּה וַיּוֹסֵף. Sometimes this assembly is also designated the 120 elders (Ezra. 9 b, 18 b).

II. Origin, Date, and Development of the Great Synagogue.—It is supposed by many that Ezra was the founder of the Great Synagogue, and that he, in fact, was its president. Gritz, however, has adduced the following arguments to prove that Nehemiah originated it after the death of Ezra: 1. The very name of Ezra is not even mentioned in the Biblical register of the representatives (Neh. ix; Ezra v), and it is inconceivable to suppose that the representatives of the people would have been omitted; and, 2. Nehemiah, as is well known, went twice from Shushan to Jerusalem to restore order—viz. in the twelfth year of Artaxerxes's reign (B.C. 446), and considerably after the thirty-second year of his reign (B.C. cir. 410). On his second arrival he found Jerusalem in a deplorable state, the chief of the families had formed alliances with Sanballat the Horonite and Tobiah the Ammonite, enemies of the Jews; the Sabbath was desecrated, and the law of God and of the sanctuary were disregarded (Neh. xii, 34–31). Now the convention of the Great Synagogue was held expressly for the removal of these evils; and it is most likely that the representatives distinctly bound themselves by a most solemn oath to abstain from mixed marriages, to keep the Sabbath holy, and to attend so reverently to the sanctuary and its requirements, that there can be no doubt that the synod was convened by Nehemiah on his second visit to Jerusalem to devise means in order to meet these perplexing points, and that because these evils disturbed the order of the community, therefore they were made the principal and express objects of the first synod. It is the position of ch. x recording the convention of the Great Synagogue, which has caused this error. But it is well known that the book of Nehemiah is not put together in chronological order. Gritz has shown a position of the different chapters in accordance with the above view (Frankel, Monatschrift, vi, 62). See Ezra. It is obvious, however, that Nehemiah acted in perfect concert with Ezra, and hence there is no substantial error in attributing the Great Synagogue to the latter.

As to its date, the convention of this Great Synagogue was most probably one of Nehemiah's last acts, and it must have taken place after the death of Artaxerxes. Nehemiah could not come to Jerusalem, since even the second permission to visit that city was granted to him on condition that he should return to Shushan. It could not therefore have taken place before B.C. 424. The Great Synagogue was most probably held a few years after the above date of Nehemiah's second visit. Ezra was doubtless then dead, and this is the reason why his name does not occur in the register of the representatives. The whole period of the Great Synagogue embraces about 104 years (B.C. 404–300), or from the latter days of Nehemiah to the death of Simon the Just (q. v.), who was the last link of the Great Synagogue among the sages, who, after his time, then passed into the Sanhedrin, when the whole of its constitution was changed. See SANHEDRIN.

The existence of the Great Synagogue, which is attested by the unanimous voice of Jewish tradition, was first questioned by Richard Simon (HAT. CRIT. DU PIEUX TEST. LIB. I, CAP. VIII). Jacob Alting, with more boldness, rejected it altogether as one of the inventions of tradition (“Synagoga magna enim nec uno tempore nec uno loco vivit, eoque synagoga non fuit, rerum commentum est traditionariorum, qui nullum aliquo nuncum magnam reperiri potuerunt,” Opp. v, 882). He was, however, corrected by Dutens (Dictionnaire de la Bible, 2d ed., s. v. "Sanhedrin") and by Ultragre (Ultraj., p. 66, etc.) and Aurivillius (De Synag. vulgo dicta Magna [ed. J. D. Michaelis, Gottingen, 1790]). De Wette (Einleitung in das A. T. § 14) contemptuously dismisses it as “a tradition which vanishes as soon as the passages are looked at whereon it is based, and as not even being a subject for refutation.” Those who condescend to argue the matter reject this tradition because it is not mentioned in the Apocalypse, Josephus, Philo, or the Seder Olam, and because the earliest record of it is in the tract of the Mishna entitled Abod, which belongs to the 1st or 2d century of our era, but probably represents an earlier age. But surely this argument from the silence of a few writers cannot set aside the express and positive testimony of the Mishna, the Talmud, and the earliest Jewish works. In like manner, the book of Ecclesiastus, in its catalogue of Jewish heroes (ch. 1), does not mention Ezra, Josephus, or the representatives of the representatives, and the earliest patristic literature of the Jews does not breathe a syllable about the Maccabean heroes. Would it be fair to conclude from this silence that Ezra, the tribal, and the Maccabees are a myth? In confirmation of the records in the Talmudic literature about the Great Synagogue, the chief of the families, and the existence of the Samaritans became rampant after the death of Nehemiah, while of
the high-priests between Elisahib and Onias I some were insignificant men and others were reprobates. Judaisam, moreover, has no record whatever of any distinguished persons during this period. We should therefore be led to the conclusion that the religious life of the people was at the lowest ebb. But instead of declining, wen Judaisam rapidly rising. No trace is to be found in the whole of this period of the disturbances, misconceptions, and errors which prevailed in the time of Ezra, Nehe- miah, and Zerubbabel. The law and the precepts were pre-eminent revered. The ancient collection of Ben Sirach's sayings, which reflects the spirit of the people in the pre-Seconic age, breathes a fervent enthusiasm for the inspired law (comp. Eccles. ii, 16; vii, 29; ix, 15; x, 19; xv, 1; xix, 17; xxxi, 11; xxxii, 27, and especially ch. xxviii). Who, then, has kindled and sustained such an enthusiasm and religious spirit, if not an assembly similar to that convened by Nehemiah? (Grätz, in Frankel's Monatschrift, vi, 63, etc.).

III. Number of Members and Their Classification.

We are told that Nehemiah organized the Great Synagogue (comp. Neh. x, 1-10 with Midrash Ruth, c. iii;Jerusalem, Shak. 12), and that it consisted of 120 members (Jerusalem Berakoth, ii, 4; Jerusalem Megil- lah; i; Babylonian Megilla, 17 b). In looking at the register of the Great Assembly recorded in Nehemiah (x, 1-8), it will be seen that— a. Only sixteen out of the twenty-four chief priests of the priests (1 Chron. xxiv, 7-18) are enumerated, and that for the eight that are wanting four private persons are given, viz., Zidkiel, Daniel, Baruch, and Meshumallam. b. Of the six or seven chief Levites—viz., Jeshaia, Bani, Kadmiel, Hodijah, Sherebi- hashabnah— who returned with Zerubbabel and Ezra (Neh. ix, 4, 5; Ezra v, 18, 19, 24), Bani is omitted, and twelve private individuals are mentioned who were undoubtedly the doctors of the law (מֵאמָר נֵבֶר; Neh. viii, 7; ix, 9). c. Of the forty-five chief priests of the people (סְמָךְ נֶפֶשׁ) only two are known as heads of families, and the rest are again distinguished private individuals. Here the families of David and Joash (comp. Ezra xii, 2, 9) are missing. d. Of the representatives of the cities there are only two mentioned—viz. Anathoth and Nebi— which plainly shows that others are omitted, since these two places did not at all distinguish themselves to be thus singled out. Now, in looking at the peculiar positions in which the heads of the people in the register of the exiles, it will be seen that the family of Hariph (Joseb) stand first; then follow the names of thirteen cities (viz. Gibeon, Bethhemeh, Netophah, Anathoth, Beth-azmaveth, Kirjath-jearim, Chephiriah, Beeroth, Ramah, Gaba, Michmas, Bethel, and Ai). This includes the five cities of the fifth and family of Magbish follows it on Ezra ii, 18-30; Neh. vii, 24-33), which exactly corresponds with the order in the register of the Great Synagogue; Hariph begins, then come cities, i. e. Anathoth; Nebi comes last, and then again Magbish (Neh. x, 19, 20). It has been supposed, therefore, that the above-named cities are to be inserted between Hariph and Anathoth. If we add to these fifteen cities the other five specified in the register (viz. Lod, Hadid, Ono, Jericho, and Tekoa— vii, 36, 37), which were represented by synod, we have in all twenty cities. Under this view, eight divisions of the priests are wanting—the family of Bani is missing from the Levites, seven families of the heads of the people have disappeared—and thirteen of the representatives of the cities have dropped out. Now, if we supply those which seem to have been dropped, and add them up with the private individuals mentioned in the register, we obtain the number of the representatives in the Great Synagogue: twenty-eight priests, consisting of the twenty-four divisions and the four private individuals; nineteen Levites, being the seven families and the twelve private persons; fifty Israelites, twenty-nine being chiefs of the people and twenty-one private persons—making in all ninety-seven, with Nehemiah ninety-eight, while the remaining twenty-two are the deputations of the cities. We may thus obtain the 120 members of the Great Synagogue mentioned by the unanimous voice of tradition. It will also be seen from the above that these 120 members represented five classes, viz.: 1. The chief of the priestly divisions (בָּנָיָּד); 2. The chief of the Levitical families (יִשְׂרָאֵל); 3. The heads of the Israelite families (יהוֹואלאֵל); 4. Representatives of cities, or the elders (רֹאשׁ הָעָם; 5. The doctors of the law (琛יִד נַעָר); γαμμαρίους), from all grades. This number, however, if thus made up, was most probably restricted to the time of Nehemiah, as there can be no doubt that the assemblies which were afterwards held consisted of a smaller number, since, at the time when the Great Synagogue is held to have passed over into the Great Sanhedrin, the representatives consisted of seventy, which became the fixed rule for the Sanhedrin (q.v.).

IV. The Work of the Great Synagogue. At its first organization under Nehemiah, if the above be its true origin, the representatives bound themselves by a most solemn oath (םָרָבְרָב) to carry out the following six decisions, which were deemed most essential for the stability of the newly reconstructed State: 1. Not to intermarry with heathens; 2. To keep the Sabbath; 3. To observe the sabbatical year; 4. Every one to pay annually a third of a shekel to the Temple; 5. To supply wood for the altar; 6. Regularly to pay the priestly dues (Neh. x, 28-39). The foundation for the reorganization and reconstruction of the State and the Temple-service being thus laid at the first meeting of this synod, the obtaining of the necessary materials for the successful rearing-up of the superstructure and the completion of the edifice demanded that the synod should occasionally reassemble to devise and adopt such measures as should secure the accomplish- ment of the plan and the permanent maintenance of the sanctuary. To this end the members of the Great Synagogue are believed to have collected the canonical Scriptures. This was called forth by the effects of the first decision, which involved the expulsion of Manasseh, son of the high-priest Joiada, by Nehemiah and the synod for refusing compliance with that decision—i.e. to be separated from his heathen wife, the daughter of Sanballat (xiii, 23-29). In consequence of this his father-in-law, Sanballat, obtained permission to build an opposition temple on Mount Gerizim, in which Manasseh some high-power he was followed by many of the Jews who sympathized with him. This proceeding, however, compelled them to deny the prophets, because their repeated declarations about the sanctity of Jerusalem did not favor the erection of a temple out of the ancient metropolis. To erect a wall of partition between the Jews and these apostates, and to show to the people which of the ancient prophetical books were sacred, the Book of Proverbs and the men of the Great Synagogue compiled the canon of the prophets. As the early prophets and the great prophets—i.e. Isaiah, Jeremiah, and Ezekiel—like the Pentateuch, are thereby regarded as having been completely at last, remained for the Great Synagogue to complete the prophetaic canon by inserting into it the twelve minor prophets, which this synod accordingly did, as may be seen from Baba Bathra, 15; Aboth di Rabbi Nathum, c. 1; 2 Macc. xii, 15. Although some of these authori- ties are no longer extant, but the canon, we obtain the same from them to the fact that the members of the Great Synagogue were engaged in collecting the canonical books of the prophets. The He- liographers were not as yet made up, as is evident from the fact that the younger Sirach did not even know the expression יִרָבְהָרָב, but used the general term רָבָּרָב to denote them (Preface to Ecclesiastes), and that in Alex-
SYNAXARION is Greek for the Greek Collect in the Liturgy of St. Mark, resembling the ektene in that of St. James and of St. Chrysostom. It is used, also, to designate the holy communion.

Synaxarion (συναξαρίων) is a term for an abridged form of the Greek menology (record of months) that was used on the feast of the saints celebrated.

Synaxis (σύναξις), an Eastern term for a church service.

Synellus (συνέλλος), an ancient term denoting an assembly for worship and, in this case, a joint commemoration of saints.

The word Synellus is also used to describe a distinctive type of intercessory prayer in the Eastern Church, where it is employed at the beginning of the liturgy. The term is derived from the Greek words σύνελλος, meaning "to join," and signifies the act of uniting the prayers of the congregation with those of the choir. Synellus is particularly prominent in the liturgies of the Orthodox Church, where it is used to invoke the intercession of the saints on behalf of the living and the dead. In the context of the liturgy, Synellus is typically sung in a chant that is harmonized with the melody of the first stanza of the Holy Canon. The phrase "Synellus" is often used to denote the part of the liturgy where the congregation joins in prayer with the choir, expressing a collective supplication for the salvation of the church and the world. This practice is rooted in the early Christian tradition, where communal prayer was seen as a means of expressing the unity and solidarity of the body of Christ. Synellus continues to be a significant feature of Orthodox liturgy today, reflecting the church's commitment to corporate prayer and the tradition of the early Christian community. Throughout the liturgy, Synellus serves as a reminder of the church's identity as a people called out of the world and gathered in Christ.
SYNCELLUS. He is exceedingly curt, harsh, dry, jejune, and often confused. His temperament, his vocation, and his wants are those of a credulous and undigested form, and accepts without hesitation whatever he finds in his texta. Yet his work has a very high value, and largely from this total absence of critical discrimination. It is the most extensive of the Greek chronicles that have come down to us, with the exception of the Sicilian, Alexandrine, or Paschal chronicle. The latter and the chronicle of Eusebius are the only two important chronological treatises that preceded it which have been preserved. Eusebius was sadly mutilated and fragmentary, and was in part restored by the aid of various manuscripts. The restoration of Eusebius, containing a complete or partial account of the Asser, caused the abandonment of his undertaking when he despaired of obtaining the assistance of Synclerus, which he deemed indispensable. The restoration was, indeed, impracticable without such aid, till the discovery of the complete work, in recent years, in an Armenian MS, which was published at Milan, in 1818, by Mai and Zohrab. The Chronography of Synclerus has thus rendered important service. It has other sources of interest. It is throughout a compilation, but a compilation which usually retains the ipsissima verba of the authors from whom it borrows, and which records its observations, without the presence, more or less extensive, of many writers who would otherwise have perished utterly. The citations from Eusebius have already been referred to. We owe, besides, to Synclerus nearly all that survives of Julius Africanus, most of the fragments of Manetho, and much of the little that is left of Berossus, who strangely illustrates the Book of Genesis, and corroborates the remarkable discoveries of the late George Smith. Among the scattered remnants imbedded in the chronicle of Synclerus—like broken columns, ruined architraves, dismembered friezes, and mutilated statues in medieval walls and forlorn gardens of villages from various kinds, including many from partially or wholly lost Apocrypha. There are extracts from the Life of Adam, the Book of Enoch, the History of Judith, Hermes, Zosimus the sophister, etc. Some of these excerpts are very curious, and perpetuate the memory of remarkable superstitions and of quaint legends of the antique world. It would be misplaced labor to investigate here the chronological accuracy of Synclerus, or to comment upon his chronological statements. The service has been rendered laboriously, if not altogether satisfactorily, by the Dominican Goar, who added a Canon Chronographiae to the first edition of it. The MS, used by Goar is curious. It was preserved in the library of the patriarch at Constantinople. It reappeared in the Royal Library of France. A notice, in Greek, appended to the MS, states that it was purchased at Corinth, for four pieces of gold (ψυροσωλία), by John Abrami (or Abrams), in the month of November, 1507, or mundane year 7016 (of the era of Constantinople). It was probably one of the many waifs from the Ottoman capture of Constantinople. For some time it was believed to have been lost from the Royal Library. It reached Scaliger’s hands. It was, in time, restored to the royal repository, where it still remains, if it did not perish in the fires of the Commune. The supposed date of this MS is 1521. It is somewhat mutilated, and one leaf is lost; but it is the most complete MS. of this author. Dindorf regards as of much higher mark another Persian MS, which he also employed in his recent edition. It is preserved in the British Museum. Historians. This has lost many leaves in the middle, and, like Coleridge’s Christabel, has neither beginning nor end.

IV. Literature.—Georg. Syncleri Chronographia, Ed. J. Goar (Par. 1532). This edition is accompanied with a commentary, and a reproduction of the MS., with a full chronographic canon. Georg. Syncleri et Hierophoris C. P. ex recensione Guilemi

Dindorfii (Bonne, 1829, 2 vols. 8vo). Dindorf republishes the appassarit insitarians of Goar, and adds a reprint of the Portatiori de Georgii Syncleri Chronographia. (G. F. H.)

Syncretism (συνεργηματικός, union). This term is employed in Church history to designate the movement to promote union among the various evangelical parties of Germany in the 17th century. The word occurs in Plutarch (ii, 490 B; Ed. Beeston, vii, 910)—perhaps the only instance among the writers of antiquity—and is there illustrated by the idea that the Cretans, though frequently at war among themselves, were accustomed to unite their powers against the attacks of any foreign foe (εστι τούτον ἑν ὧν καλοῦμεν ἢν αἵτων συνεργηματικός). In the restoration of Eusebius, certain clauses, (chil. i, cent. 1, No. 11, p. 24), and defined it to signify the union of parties which have need of each other or who desire to make head against a common foe, though they may not be influenced to form such union because they are one at heart. Both the word and the idea came into common use soon after Zwinger. For example, in a letter to Celeolampus of the year 1525, recommends such a syncretism (Opp. ed. Schuler et Schultzii, vii, 390); Bucer employs the term frequently in connection with his efforts towards union after the publication of the Augsburg Confession (Opp. vili, 577); as, "this a union for the same business (Corps. Ref. ii, 486 sq.; i, 917; Opp. Mel. ed. Vitember, iv, 818). The apostate Staphylus (q. v.) charges the Reformers with being simply Babel-builders, and in setting forth his proofs represents the Lutherans as being Syncretizantes (Calov. Syncret. Hist. i, 2). Zach. Ursinus (q. v.) also employs the term in an unfavorable sense (Opp. Ursini [Neustadt, 1859], ii, 305, on Isa. ix, 6). Syncretism is thus shown to have been a current term with all persons of humanistic culture in the 16th century, and to have been employed, according to circumstances, with a favorable or unfavorable meaning, in the case of various parties in despite of all dissent. The twofold use of syncretism as a term of commendation or censure continued throughout the 17th century, but with a gradual predominance of the latter idea, arising from the increased importance which came to be attached to every variation of doctrinal beliefs. In 1669 the Roman theologian Windeock wrote against the Protestants a Proposicium futuri Status Eccleise, in which he advised the Romanists to cultivate greater harmony, in the words "Si saperent Catholici, et ipsis causa reipublicae Christianae salus, syncretismum colerent." The Hei- delberg, and the English, and the Dutch, of the same time, his Frenicum, sine de Unione Evangel. Conciliianda, with an appeal to both wings of the Protestant Church for an alliance against their common foe; but Leonhard Hutter rejected the idea of such an alliance as preposterous ('Epfarrouv Ekevemiptov, etc., [Witten, 1614]), and a Jesuit, Adam Contzen, followed in a polemic of eight hundred and sixty-one pages, entitled De Pace Germaniae Libri II (Mayence, 1616, 8vo), whose principal purpose was a demonstration of the impossibility of any union between the Lutheran and Reformed parties of the Protestant Church. The tendency, scarcely interrupted by the razing of the Thirty Years' War, of Lutheran and Romanist zealots to magnify existing differences of opinion and intensify their influence drew forth the protest of Calixtus (q. v.). He stigmatized it as shameful, and urged the making of distinctions between doctrines of greater and inferior importance; and, while he when this was developed into a demonst ration, as it was to be relegated to the schools, he also urged that a practical sympathy and fellowship be cultivated between the churches. This brought on him a storm of obloquy. The Wittenberg faculty issued two opinions, warning against such "syncretismus diversarum religionum," and condemned the harmful and destructive construction. The same year (1645) a Jesuit, Veit Erbmann, wrote a work entitled Epistola a Catholico, etc., that de-
serves notice as being the probable source of a new interpretation of the word syncretism, by which it came to denote, not, as aforesaid, the practical association of religious ideas holding divergent views upon some questions, but an intermixing of the religions themselves. The new rendering of the word furnished the opponents of Calixtus with additional weapons, of which they were not slow to avail themselves. See A. v. Wrede, Mystizismus, Alter. Syncretismus, etc. (Strasb. 1648), where the idea of syncretism is made to include every form of hurtful association or intermixture, e.g. of Eve with the serpent, of the chemical or mechanical intermixture of heterogeneous elements in nature, etc. With Calovius (q.v.) begins the controversy of the title syncretism: the term denoting an improper and unallowable approximation of Lutheran and Reformed Christians towards each other. This view underlies the phrase Syncretistic Controversies (q.v.) as used in ecclesiastical history. The more benevolent meaning was gradually laid aside, and even Calixtus was constrained to refuse his consent to the application of the term to his position. The version has retained its hold upon the popular usage until now, and has doubtless contributed towards the unauthorized assumption of a derivation of syncretism from συνεργείανωμα. — Herzog, Real-Encyklop. s. v. Syncretism.

The controversy reaches its climax when the Synod of Mainz applies in ordinary practice to such disputes only as originated in connection with efforts made in the second half of the 17th century to promote union and fellowship between the Protestant churches of Germany. These disputes raged less between Reformed and Lutheran theologians than between the strict Luther and the liberal wing of the Lutheran Church itself. The progress of controversy, moreover, generally resulted in the interweaving of extraneous and foreign matters with the direct question at issue; and in this way the syncretistic controversy was often with reference to the degree of freedom to be allowed theological schools and theological science, the disputants being known as Genealogi (Genealogi) and Moderatoren. The title syncretism (q.v.) is not broad enough to cover all these several disputes, but is in practice so employed by all parties. Everything pertaining to the internal Church was, throughout the year 1650, must be regarded as preliminary to the syncretistic controversies proper. From that date we may distinguish three periods to the death of Calovius and the practical end of the dispute.

1. From the Colloquy of Thorn to the Death of George Calixtus (1615–36).—Calovius had succeeded in preventing the selection of Calixtus as the delegate of Dantzic to the Colloquy of Thorn; and when the latter was appointed to serve for Königsberg instead, Calovius caused him to be deprived of all opportunity to cooperate with the Lutheran delegates. Calixtus thereupon associated and counselled with the Reformed theologians, and thereby gave opportunity for his opponents to fasten on him the charge of an unwarrantable combining of diverse religions—a charge persistently urged, though he publicly and in writing rejected the Reformed Confession of Thorn. The next measure was a union of all the Saxony theologians. See Litt. Delavay, the synod at Brunswick, in a census of the University of Helmstädt, which favored Calixtus, on the alleged ground that it had made innovations in doctrine and had departed from the generally received formulae of the Church. To this Calixtus reproached with the denial under date of Feb. 1647; but with no other result than that of increasing the eagerness with which every peculiarity in the teaching of Helmstädt was scoured for the discovery of error. In Prussia, the appointment of the Calixtines Chr. Dreier and Johann Lattmann to the faculty of Königsberg excited the opposition, the successive volumes in defence of either side; and Calovius, who had been superseded by Dreier, continued to fan the flame from a distance, even after Myslenta, its originator, had died (1653).

2. Renewed Conflicts (1661–69).—The immediate occasion of strife was found in the measures taken by the landgrave of Hesse-Cassel, William VI, to secure a religious constitution for his land which should be sufficiently broad and generous to comprehend both Lutheran and Reformed theology. The negotiations culminated in a convention which met at Cassel, consisting of two members of the (Reformed) University of Marburg and two theologians belonging to the (Lutheran) faculty of Rinteln. A declaration was drawn up which recognised existing divergencies of opinion between the parties, but at the same time agreed not to concern themselves on all essential matters, and on the ground of such consent urged the exercise of brotherly love and the recognition of both parties as belonging to one Church, sharing in a common faith and looking towards a common heaven. The appearance of this and other similar propositions gave rise to a new outcry. They issued a circular asking the support of all good Lutherans against the Cassel colloquy, and induced the faculties of Jenae and Leipsic to unite with them in admonishing the theologians of Rinteln con-
SYNESTHETIC CONTROVERSIES 87

SYNEDRIANS

cering the lapse of which they had been guilty. A
course of papers in Latin and German, aimed at both
the learned world and the public, was now kept up unti-
l after the death of William VI, in 1666, when the
zeal of Rinteln became much cooler in consequence of
benefits conferred on the Reformed at the expense of
the Lutheran party.

The Lutherans in the dispute in Hesse soon reacted
upon Brandenburg, whose duke was brother-in-law to
the landgrave, and thoroughly in sympathy with his
plans. The government issued a manifesto depreciating
the custom of discussing points of controversy in the
pulpit and before mixed audiences, and soon afterwards
(C. 1662) Mennon von Besenbruch notified the
purpose of “inaugurating a state of fraternal uni-
ty.” The Lutherans, however, proved unyielding, the
poet Paul Gerhardt (q.v.) in particular being fixed in
his opposition to any compromise, and the colloquy
ended without result. Various orders now followed in
quick succession, by which preachers were forbidden to
apply opprobrious names to their opponents in the pulp-
It, and also to attribute to them doctrines inferred
from their principles, but not avowed by them. The
Lutherans refused to sign a pledge of obedience to these
edicts, this being in their eyes tantamount to a formal
abandonment of their position. The government event-
ually compelled them to yield, though many chose de-
position from office and exile rather than submission.

A new phase of the dispute began in 1664 with the
publication of a great collection of Compendii Theologici
Wittembergen, which included a multitude of judgments
against Calixtus and the syncretists, and also the Con-
 sensus Repetitus Fidei were Lutheran. The exclusion of
the syncretists was now less aimed at than the rally-
ing of all strict Lutherans about the Consensus as a new
confession of faith. The terms of the Consensus, how-
ever, implicitly condemned Calixtus and his adherents
as Roman Catholics and heretics, and the movement
accordingly drew out the son of Calixtus, Frederick Ul-
ric, who from this time made it the object of his life to
resist the persistent attacks of Calixtus on his father’s
character and work. Both were extremists, and could
not be satisfied with the alteration they put forth; but
the party of Calixtus triumphed over Calixtus for a
time through the efforts of a new conflict which the
churches had gained to their support—the youthful Strauch,
professor of history and assessor in theology at Witten-
berg. The University of Helmstadt, on the other hand,
extended the services of Herman Contris (q.v.), a schol-
ar and student of the Latin faith, than the movement,
successfully in so presenting to view the danger to the peace
Church and to the liberty of teaching which grew out
of the attempt to force the Consensus upon the Church
as a confession of faith, that universities and princes
were alarmed, and a period of quiet was secured, 1689.

3. Final Conflict.—Calixtus reopened the war in 1676
with accustomed energy; and although the temper of
the time was changing, and disgust with the intermin-
able quarrel began to be manifested, he was able, by
1679, to compel the entire University of Jena to dis-
agree in the Lutheran and with the syncretists. He, how-
ever, proved to be his last victory. His aged patron, the
elector Johann Georg II of Saxony, died in the following
year, and the new ruler was not so fond of controversy
as the old one had been. In 1682 the Historia Synocr,
which Calixtus had made a storehouse of the details of
his life and thought and published in order to evade the
law forbidding such publications, was bought up and
prevented from circulating among the people by the
government. He died of apoplexy Feb. 21, 1686.

No considerable features in connection with the syn-
cretistic controversy appear after the death of Calixtus.
His life and work are the guide to the name of the Church.
Germany neither desired nor sought fraternity with
each other during more than another century. When
the Revocation of the Edict of Nantes occurred, in 1685,
only the Reformed population in Germany welcomed
the fugitive Protestants from France. The end of the
controversy—a peaceful separation between theology
and religion, the regulation of the boundaries inter-
vening between Church and school, between confession
and science, between that which is and that which is not,
obligatory upon all Christians—was not attained.
Calixtus held pure doctrine to be the one thing needful,
and religious peace was not fixed among them, and the
soul is required to simply accept it as the truth. Cal-
lixtus did not believe the acceptance of doctrine to be,
upon the whole, the essential thing in Christianity, nor
that all doctrine has equal importance; and he held
that the points of belief which a Christian absolutely
must receive he can receive few at a time. He was thus able to over-
look minor differences and desire fraternity among all
Protestant Christians.

The literature of the controversy is vast. See espe-
cially Calixtus, Hist. Syncret. ; Walch, Streitigkeiten d.
luth. Kirche, pt. i and iv; Tholuck, A. kirch. Leben d. 17ten
Jahrh. (1854), pt. ii; id. Leben und Gesch. d. Kirche
(Berl. 1859); id. Kirchl. Leben d. 17ten Jahrh. (ibid., 1861);
Pless, Gesch. d. prot. Dogmatik (ibid., 1867), vol. ii; and
the works mentioned s.v. “Calixtus, George.”—Herzog,
Real-Encyklop. s.v.

Syncretists (synerescripta, unionists), persons who
advocate a system of union and harmony which was
introduced by Martin Bucer into the Lutheran Church in
the 17th century. It originated with Cal-
lixtus, professor of divinity at Helmstadt, who, in ex-
amining the doctrines professed by the different bodies
of Christians, discovered that, notwithstanding there
were many things to be reprobated, there was so much
important truth held by them in common that they
ought to banish their animosities, and live together as
disciples of one common Master. His object was to heal
the divisions and terminate the contests which prevaled.
Like most men of a pacific spirit, he be-
came the butt of all parties. He was accused of Cal-
inism, Roman Catholicism, Arianism, Socinianism, Ju-
daimism, and even Atheism. His bitterest opponent
was Buescher, a Hanoverian clergyman, who published a
book against him entitled Crypto-Papismus Nova Theologia
Helmstadtiana. The subject was taken up by the Con-
ference held at Thorn in the year 1646, to which Calix-
tus had been sent by the elector of Brandenburg; and
the whole force of the Saxony clergy was turned against
him, as an apostate from the strict and pure principles
of Lutheranism. This great man continued, however,
with consummate ability, to defend his views and re-
peal the attacks of his enemies till his death, in 1686.
But the syncretic movement did not put a stop to the controversy.
It continued to rage with greater or less violence till
near the close of the century, by which time most of
those who took part in it had died. To such a length
was the opposition to Calixtus at one time carried that,
in a dramatic piece at Wittenberg, he was represented
as a fiend with horns and claws. Those acquainted with
him were called Caliztians or Syncretists. See Syn-
cretism.

Synod (synoikos), or Defnssores, were officers
whose duty it was to watch over the rights of the poor
and of the Church, to act as superintendents of the
Copitate (q.v.), and to see that all clerks attended the
celebration of morning and evening service in the
church. See Bingham, Christ. Antiq. bk. iii, ch. ii.

Syneggdoi (synoses, fellow-pilgrims), a name
given by the Paulicians in the 9th century to their
teachers, because they were all equal in rank, and were
distinguished from laymen by no rights, prerogatives,
or insignia.

Synedrians (from synodos, a sitting together), a
group of clergymen in the 3rd century, led by the Novatians to orthodox Christians, because they
themselves endeavored to make the synods to
receive episcopate and such as went to the Capitol to sacri-
fice their communion again upon their sincere re-
pentance.
Synergism (συνέργησις, to work together) is the doctrine that the human will co-operates with divine grace in the work of salvation. By Erasmus, it was his controversy with Luther, and afterwards represented by Melanchthon and his school. Luther taught that sin had absolutely ruined man, making of him a ravenous beast and of his will a slave, so that it is impossible for him to contribute in any way toward his conversion; and in the first edition of his Loci Communis Melanchthon's teaching is in entire harmony with Luther's view. Such a view necessarily resulted in the doctrine of predestination, and both Luther and Melanchthon traced everything back to God as the first cause, the sin of Judas no less than the conversion of the sinner. However, as far as was possible for Melanchthon to hold, and he receded from it into the dualistic idea that human liberty must be recognised as a factor in conversion by the side of the divine necessity. In the third edition of the Loci sin is derived from the will of the devil and of man, instead of that of God; not everything, consequently, is to be ascribed to the divine causality, and there is a realm of contingencies by the side of the realm of necessity which is founded on the freedom of the human will. A certain measure of volitional freedom to perform outward works of obedience to the divine law remains to man even after the fall. It was the end of the Reformation to bring the Holy Spirit, quantitatively and qualitatively fulfill that law, and accordingly in every good action three causes work together (συνέργησις)—the Word of God, the Holy Spirit, and the human will, which does not resist the Word of God, and is at times described directly as φύττος σεια ὀπωσδήποτε θραύσει. The doctrine of predestination fell, of course, so soon as man came to be regarded as other than a volitionless statue. This synergistic theory of Melanchthon's was admitted into the Leipsic Interim (q.v.) in the words "God does not operate on man as on a block, but draws him in such a way that he can also contribute." It is expressed in a polemical address by Johann Pfeiffer, professor and pastor at Leipsic (1555), against whom Amstorff (q.v.) contended, in 1568, that "it is presumptuous to hold that man could, in the exercise of his natural powers, prepare and fit himself to receive grace." Pfeiffer had said, however, that the Holy Spirit must first arouse the will, after which the latter is required to do its part in conversion. From this personal stage the question was lifted into the schools by Finck (q.v.). He denied all participation of the will in the work of conversion, because it is dead to all good, wanting in all created graces, and insensible to every act of grace. God, therefore, is the sole agent in conversion, and man is not only passive, but also unwilling. To the defence of such postulates Finck devoted two days in a disputation at Jena, which latter university now became the centre of strict Lutheranism as against Wittenberg, the spirit of which Melanchthon ruled. The next measure of this Lutheran champion was the publication of the Weimar Book of Constitutions, which committed the duke of Saxony to the defence of orthodoxy, and served, at the same time, to refute all the errors of the time. It likewise occasioned the overthrow of Strigel (q.v.), who had been forced to aid in making a first draft of the book, but was unwilling to admit into it any of the improvements suggested by Finck, and wrote against it in the form in which it was given to the world. He was seized and imprisoned on Easter-day, 1558, but was soon afterwards liberated in deference to a treaty which paid the ducal ransom everywhere where visited that act of violence; and a colloquy was ordered to be held at Weimar in August, 1560, with a view to settling the dispute. On this occasion Finck incommodiously asserted that original sin is not an accident, but part of the substance of man, and obstinately adhered to his views, which the imperial court now began to wane, and in exactly the same degree did the Finckian divines rage against all who re-

SYNEGIUS 88 SYNEGIUS

The avowed purpose of Concord was to give the finishing stroke to the conflict, and settled it substantially in harmony with the Flacian view. See Salig, Hist. d. Augs. Conf., i, 648; Walch, Religionsreignheiten innerhalb d. luth. Kirche, i, 60; iv, 86; Planck, Gesch. d. prot. Lehrbegriffs, iv, 553; Schlüsselberg, Catalogus Histor. v, 613; Grotius, Theol. Pol., i, 269; Schlüsselberg, d. luth. Kirche, etc., p. 119; Döllinger, Reformations, iii, 437; Schmid, in Zeitschr. f. hist. Theol. 1849, p. 13; Preger, M. Flacius Illyricus, etc., ii, 104-227.—Herzog, Real-Encyklop. s. v.

SYNEGIUS, bishop of Polaenians, was first a pagan, then a Christian, and always a rhetorician. He lived at the close of the 4th and the beginning of the 5th century of our era. He was a late representative of the rhetorical declaimers of the Hellenic schools, and of the Neo-Platonic philosophers. He was also a pagan and a Christian poet, an elegant gentleman of leisure, and a bishop of the Western Church. The history of the Synergetic sect is imbedded in the man and in his career. He lived in an age of transitions; and he is, in his writings and in his fortunes, typical of the age in which he lived. The biography and the literary remains of Synerges are much more interesting and instructive for the light which they shed upon the social, intellectual, and religious condition of provincial life in the Roman empire during the first period of its manifest dissolution than for any influence exercised by him on the literature, the philosophy, the paganism, or the Christianity of his times, or on the sentiments, convictions, or character of subse-

few have been so often quoted by the few who were acquainted with him, and been so inaccessible for many generations, even to the profess scholars. The attractions of Synerges are so special in their character that they address themselves to a very limited class of students. The period which he illustrates is so obscure, so disheartening, and so little considered, that only the frequenters of the by-ways of history are likely to turn their regards to it. More than two centuries intervened between two editions of his works. After this long interval, three complete editions have been published within the last twenty years. One is only a Latin version, another is a French translation, and the last is a modernized and expanded text and Latin rendering from the edition of 1640, with some slight corrections. The writings of Synerges, in prose or verse, inspired by pagan or by Christian influences, are much more notable for literary charm, for vigorous thought, or for philosophical reflection than as a preserv
tivated country gentleman, de provincia, under the reign of Arcadius and Honorius, when all parts of the empire were falling to pieces. They, accordingly, interpret the times for us, and require to be interpreted by them.

I. Character and Circumstances of the Age.—The life of Synesius was cast in a stormy period; and the storms were not limited to his own province, but swept over the whole of the East, and were brought on by the conflict of all the elements of political, social, intellectual, and religious; an age of usurpations and civil disorders; of crimes in the palace and treacheries in the State; of barbarian invasions; of permanent dismemberments; of strife between pagans and Christians; of controversies, heresies, and schisms in the Church, each with their vain disputations and dark forgeries; of universal disintegration, and of rapid material decline. The date of the birth of Synesius is undecided. It was born in 370, it occurred only seven years after the death of the pagan emperor and the failure of his attempt to restore paganism. When Synesius died, if he died in 431, Genseric and his Vandals had seized a large part of Africa; Britain, Gaul, and Spain had been cut off from the Roman dominion. During his lifetime usurper had sprung up after usurper; Asia Minor and Greece and Italy had been ravaged by the Goths; Constantine had been threatened and Roman triumphs were often overthrown. Europe in high life and Aerial had led his wild hosts from the Alps to Scylla and Charybdis. While Synesius was still a child in the cradle, Firmus had revolted in Egypt, and the insurrection had been revived after a lapse of a few years, to be crushed out in the Gildonic war. Strangely enough, to none of these portentous events is any distinct allusion made in the remains of this author, except to the Gothic insurrection in Phrygia. There is a possible reference to the Gildonic war (Cat. Sol. i, 1). In the early oration delivered before the emperor Arcadius there is a clear exposition of the fearful perils from the Northern hordes impending everywhere (Ep. 2298). We can understand his mind so engrossed by literary labors, by philosophical speculations, and by troubles nearer home that the great calamities of the time occurred without attracting his attention? Or was his pen arrested by despair, even in his candid communications to his friends? Yet the invasions and the mutinies of the empire in the gloomy chasm between the birth and the death of Synesius were not the most grievous calamities of those years. Even more grievous was the social condition which invited the invasions, and rendered resistance impracticable. There was no cohesion or concert between them; nothing but division, isolation, misery everywhere—as a consequence, in part at least, of imperial rule and imperial administration. The organization of the government was impotent for defence, or for that vigorous attack which is often the best means of defence. It was ingeniously devised for inflicting needless and paralyzing restraint, and for extracting revenue from penury and wide-spread distress. Lands were left uncultivated and almost without inhabitants. Wide tracts relapsed into forest or marsh. The people were ground by taxes and the ruinous modes of collecting them. Movement and traffic were restricted by the wide encroachments of Sparta, though he has blundered in his statement of the ancient legend. His family was opulent (Epist. 333). He had a city house, and country estates in which he took unceasing delight. Nevertheless, he diligently sought exemption from civic and fiscal burdens. His love of letters and philosophy must have been manifested early, for his tastes were already decided and much accomplishment attained when he proceeded to Alexandria (394) to attend the Neo-Platonic and other courses in that tumultuous city. Here he became acquainted with the beautiful, brilliant, and unfortunate Prudentia of Cyrene (Epist. 2). He afterwards visited Sparta, though he has blundered in his statement of the ancient legend. He secured her esteem and regard, and always retained the warmest admiration for her. Seven of his letters are addressed to her. On returning from Egypt, he went to Athens, to complete his education at that old centre of learning and refinement, whence he issued, in the preceding generation, the emperor Julian and many of his distinguished contemporaries, pagan and Christian. He was utterly disenchanted by his visit, and made no long stay (Epist. 6, cxxi). After deserting Athens, he paid a second visit to Alexandria, as is shown by a graphic and humorous letter (Epist. 6), describing the various attempts of attacking him, which were all repulsed. He secured his return (Drum. p. 587-589, discusses the calculations of Petavius and Tillemont, and assigns this voyage to 387.) Soon after his return, he was sent by...
his fellow-citizens to Constantinople, to present their petitions and a golden crown to the young emperor Arcadius (De Regno, c. ii). He was a youthful ambassador. He appears to have discharged his mission with ability, acceptance, and some degree of success. The emperor was still under tutelage. Everything was in confusion. The pretender to the throne, Alaric, had recently ravaged Greece and threatened Athens. During his stay the inscription of the Goths in Phrygia occurred. It was no wonder that he experienced frequent interruption and dishonouring procrastinations, and that he was at times reduced almost to destitution. These problems were of a nature to be made the subject of a brilliant and public harangue before the emperor. He gained influential friends, established a reputation for literary talent, and acquired elegant correspondents, who would display and eulogize his epistles at Constantinople, while he would pay the same compliment to theirs at Cyrene. One thing he accomplished for himself—in the immortality of his public deeds. An earthquake hastened and excused his departure from the capital of the Eastern Empire. On reaching home he found his country desolated by barbarian war, an affliction from which it had seldom been entirely free for five centuries. The nomad tribes of Libya were making frightful inroads, plundering, destroying, murdering, and meeting with little and only ineffectual resistance (Epist. civ, exii, xxiv). The governor and officials were more studious of pillaging than of repelling other pillagers. Synesius, calling to mind his Laconian descent and his love of letters, went to Lemnos, apparently some military training himself in his youth, roused his neighbors to action, and led them against the spoilers. This war with the nomads, which was renewed from time to time, is mentioned in many of his letters, and forms the subject of a special treatise. These circumstances exhibit the peculiar circumstances and wretchedness of the province—the neglect, imbecility, cowardice, and incapacity of the imperial authorities, and the disgust of Synesius at the conduct of both the people and the officials. After the war was over, or, rather, in the intervals of partial or local repose, he enjoyed an elegant and learned retreat in his country residence; inns, appearance in study, literary production, and rural pursuits, and relaxation in hunting, manly sports, and an active correspondence. Two years and more after the close of his embassy he revisited Alexandria. It was during this visit that he married. He received his wife from the hands of a rich relative; and to her and to his children he remained always tenderly attached. His marriage was his first visible contact with Christianity. It was, perhaps, decisive. It is no violent presumption to suppose that his wife was Christian, as he received her from the Christian bishop of Alexandria (Epist. cv). "The unbelieving husband may have been sanctified by the believing wife; or the wife may have been chosen with a prevenient disposition to believe. There is no evidence, no intimation of this. The Dion was written about this time. It is pagan. The treatise On Dreams was composed after his marriage. He now spends his time with a host of friends and соords with Christianity as little as Cicero's dialogue De Divinatis. After an abode at Alexandria of more than two years, and the birth of a son, he came back to Cyrene, which was shortly afterwards besieged by the barbarians. During the succeeding years he must have inclined more and more to Christianity, but without renouncing his philosophical dogmas. The date of his conversion cannot be ascertained. He must have been reputed a Christian, or 'almost a Christian,' when elected bishop of Ptolemais (409, 410). The episcopate was a very different function then from what it has been in subsequent times. He was the advisor, the guide, the advocate, the protector, the support, and often the judge of the Christian flock. His civil attributes were of the utmost importance to the daily life of his people. Character was of more immediate concern to them than doctrine. Synesius had gained and deserved the esteem and confidence of his countrymen. The metropolitan Church of Ptolemais demanded him for his bishop. He was unwilling to incur the solemn responsibilities of the position. He declined, he protested, he urged objections which might be deemed insuperable. He could not suitably and truthfully fill the function of a bishop. He had been consecrated in the Church of Constantine, and the decision to receive him was not unanimous; he was unwilling to forgo the pleasures of the chase, the other recreations of the country, and the literary and philosophical ease which had been the charm of his life. He had neither relish nor aptitude, he thought, for the multifarious and exacting business which would devolve upon him. He did not believe that he could cultivate his Platonic convictions which he had approved, expounded, and still believed; yet he recognised that they were at variance with Christian doctrine. In an elaborate letter to his brother he presents earnestly the grounds of his hesitation and reluctance. He begs him to lay his views before the patriarch Theophilus, whose decision he agrees to receive as the decree of God (Epist. cv). The patriarch must have recommended his acceptance of the sacred honor, notwithstanding his Noto episco- pari. He was consecrated at Alexandria by Theophilus. Seven months afterwards, being still in that city, and before the marriage, he declared that he would resign his see to the episcopate" (Epist. xcv). Did he separate from his wife? Druon thinks that he did. It has been more frequently supposed that the separation was not required of him. Did he yield his convictions in regard to the pre-existence of souls, the non-resurrection of the body, and the impossibility of a Christian doctrine with revealed truth? M. Druon again confidently concludes that he did. Other inquirers, ancient and modern, believe, with more probability, that he continued to entertain them, for some time at least, after his elevation. He may have acted on the convenient principle of Scaevola and Virgil, who not only married their brother, that many things in religion are allegorical, which it is expedient to inculcate upon the vulgar, who are unable to receive truth in its purity. At any rate, he discharged with energy, resolution, integrity, and skill the administrative and other external offices of the episcopate. He boldly assailed the tyranny and incapacity of the governor of the province, and succeeded in re- solving the provincials of his rule. His denunciation of Andronicus survives. Another incident of his episcopal aptitudes is preserved. He effected an amicable and satisfactory settlement between two of his suffragans for the possession of the bishoprics of their respective dioceses. There was ample occasion for the display of his sagacity and fortitude. The ravages of the nomads were renewed. The Ausrians besieged Ptolemais. The resistance of the inhabitants was sustained by the courage of their bishop, who continued zealous in seeking protection for the province, and has transmitted to our days the record of its woes. How much longer he guided his diocese we do not know. The date usually assigned for his death (430, 431) is founded on a dubious conjecture. In this date M. Druon does not concur. He considers a letter to Hypatia, written from Cyrene, and another from the bishop of Diospolis, while synesius is still bishop of the episcopal or other production (Epist. xvi) (Druon, p. 551); and believes that he escaped, by an earlier death, the affliction of knowing the tragic fate of "his teacher, mother, sister, friend." It would be strange, had he known it, that no mention of her murder occurs in letter or other treatise. A faithful friend, the leader of his order, after his death, attributed to him a miracle for the proof of the resurrection. The greatest of all miracles, in his case, was that, being, or having been, a Neo-Platonist, he became a bishop of the Christian Church without the full renunciation of his views; that, being a provincial of an African city, he was the leader of his order in philosophy, and in poetry; that, living amid the turbulences, vices, and meanesses of the 5th century, he maintained the reputation of an innocent, sincere, and gallant man.
SYNEYSI

III. Works.—The works of Synesius, usually briefly—for the Dion is one of the longest—are various and valuable. His best known work is his Confession of Faith addressed to Synesius grace of expression; we may admit the exuberance of his fancy and the propriety of his reflections; we may enjoy the freshness and simplicity of many of his letters, and the unalloyed purity of his sentiments; but these merits may easily be exaggerated, and do not constitute the anodyne and instructive quality of the letters. Synesius, was the striking portrait of the manifold phases of an unhappy period, when civilization was sinking under a mortal agony, that gives a value to his remains far transcending their literary and philosophical excellences. These excellences were, indeed, counterbalanced by very grave defects. Some of the products of Synesius are characterized by affectations, strained fancies, and a conscious craving for display. His philosophy is without originality. Yet even his philosophy merits attention, as illustrating the fine gradations by which pagan speculation mellowed into the semblance of Christianity without divesting itself of its pagan phase and spirit.

The works of Synesius which survive (for his juvenile poem, the Cynegeticus, or, On Hunting, has been lost) are, an Address to Priscus, with the Gift of an Astrolabe, invented or improved by himself, in which he encourages the study of astronomy; and an Oration on Government, delivered at Constantinople before the emperor Arcadius; it is somewhat common-place, but is remarkable for the boldness and freedom of its utterance and for its sound sense:—Dion, which is so called in honor of Dion Chrysostom, his exemplar in style and habit of thought. This treatise of the training of a philosopher, or, rather, of what had been the aim and the result of his own education in philosophy. It is, in some sort, a semi-pagan anticipation of the Religion Medici of Sir Thomas Browne. The treatise is at times transcendental, but abounds in high fancies and generous aspirations. The Encomium on Baldness is a rhetorical extravaganza, a counterpart and reply to Dion Chrysostom's Eulogy of Hair. The speculation On Dreama is simply a specimen of superstition and Neo-Platonic mysticism. It was honored or loaded with a commentary by Nicephorus Gregoras. The Catastases or Catastases—two productions of two distinct parts—is chiefly a mournful recital of the miseries of Cyrenaica, induced by chronic misgovernment and oppression, and by the repeated invasions of the nomads. It is, perhaps, the strongest testimony to the weakness, impoverishment, and disorganization of this provine of the empire in which he describes the calamities which he specially deplores to only one thousand Ausrians, and says that they were defeated and scattered by forty imperial troopers, Unnigardes. The second Catastatis is a eulogy of Anysius, the leader of these Unnigardes, and the military chief of the province. These Catastases resemble the overawed declamations of the professional rhetoricians. In the same strain, also, is the declamation Against Andronicus. A fable, entitled The Egyptian, or On Providence, is a regret for the deposition and a lament for the restoration of his friend and correspondent Aurelian, the praetorian prefect. A couple of brief Homilies are entitled to no special notice.

The most important and the most interesting of the remains of Synesius are his Letters, 157 or 159 in number, according as the Denunciation of Andronicus is excluded from or is included in the series of Epistles, and ten hymns. The letters are of diverse style, and on the most dissimilar occasions. Some are formal letters of civility; others are written to be parodied by his correspondents among their acquaintances. These are strained, rhaphsodical, and obstetrical, and are more notable for literary skill than for their contents. One of the most notable homilies is the Sermon on Expositions. They are simple, fresh, natural, earnest, and modern in their cast. His correspondence with his brother is direct and affectionate, and is rendered attractive by the revelation of his disposition, feelings, and circumstances. The family and serious letters make a valuable record. The concordance to Synesius grace of expression; we may admit the exuberance of his fancy and the propriety of his reflections; we may enjoy the freshness and simplicity of many of his letters, and the unalloyed purity of his sentiments; but these merits may easily be exaggerated, and do not constitute the anodyne and instructive quality of the letters. Synesius, was the striking portrait of the manifold phases of an unhappy period, when civilization was sinking under a mortal agony, that gives a value to his remains far transcending their literary and philosophical excellences. These excellences were, indeed, counterbalanced by very grave defects. Some of the products of Synesius are characterized by affectations, strained fancies, and a conscious craving for display. His philosophy is without originality. Yet even his philosophy merits attention, as illustrating the fine gradations by which pagan speculation mellowed into the semblance of Christianity without divesting itself of its pagan phase and spirit.

There is much variation of opinion in regard to both the character and the dates of the Hymns of Synesius. Druon has endeavored to fix their chronology, but hardly securely confidence in his conclusions. The first two were, almost certainly, the earliest. They are thoroughly Neo-Platonic, and probably pagan. The rest may be Christian, with a diminishing Neo-Platonic complexion. The only one entirely free from this philosophical characteristic is the short one numbered the tenth. Druon assigns a date of 374, though they cannot have been written in the same conversion. This conclusion is not apt to win assent. The third hymn is Neo-Platonic, but it is as Christian as the ninth. The later Neo-Platonicism apes so closely and so habitually the language and sentiments of Christianity, and the Christianity of Alexandria is often so deeply imbedded with Neoplatonic, that exact discrimination between pagan and Christian utterances is not always possible. The convictions of men were then in a transition stage in everything, and paganism and Christianity frequently lapsed into each other. There is a passage in the third hymn (ver. 210-230) which may be the hand of a Neo-Platonic, but the resemblance, in thought and expression, to parts of the Athanasian Creed. As the conversion of Synesius cannot be fixed to any certain date, and as he avowed his inability to renounce his philosophic opinions when chosen bishop, all the hymns may have been composed under Christian influences, and all but the last may retain Neo-Platonic tendencies, without being thereby rendered pagan. But these questions cannot be discussed here. The hymns of Synesius exhibit no eminent poetic merit. Their attraction lies in their philosophy, in their ease of expression and facility of versification. It was a strange adaptation of Anacreontic metre to fit it to philosophical and theological songs. Yet it may well be asked what meaning should be attached to the claim of Synesius, in the opening of the seventh hymn, to have been the first to tune his lyre in honor of Jesus.

IV. Literature.—Synesius Operum, ed. Turmebi (ed. princeps, Paris, 1538, fol.); id. ed. Morrell. (ibid. 1612, fol.; corr. et aucta, 1640, 1653); id. apud Cursum Patrologiae, etc., ed. Migne (Latin, ibid. 1859, 8vo; Greek and Latin, ibid. 1864, 8vo); Druon, Oeuvres de Synesius, trad. en Francais (ibid. 1875, 8vo); Synesii Hymni, ed. Boissoneade, apud Poet. Gr. Syll. (ibid. 1824-32); Synesii Hymni Metrice, ed. Flack (Tub. 1875); Synesii Epistolae, ed. Herscher, apud Epistolograph. Gr. (Paris, 1873); Chladni, Theologiae Synesii (Wittenberg, 1718, 4to); Boyen, Philologiae Synesi (Halle, 1714, 4to); Clausen, De Synesi Philosopho (Hafn, 1861); Krause, Obs. Crit. in Synesii Epist. Epistolatas (Ratisbon, 1869); Ellisie Dupin, Nouveau Bibliothéque des Auteurs Ecclésiastiques; Tillemont, Histoire Ecclésiastique, xii, 499-544; Cellier, Hist. des Auteurs Sacres, x, 1496-1517; Villemain, L'Éloquence Chrétienne au IVe Siecle (Paris, 1829).

Synge, Edward, an Irish prelate, was born at Inishonae, April 6, 1659, and was the second son of Edward, bishop of Cork. He was educated at the grammar-school at Cork, and at Christ Church, Oxford, finishing his studies in the University of Dublin. His first preferment was to two small parishes in the diocese of Meath, which he exchanged for the vicarage of Christ Church, Cork, where he served for over twenty years. In 1699 he was offered the deanery of Derry, but declined it for his mother's sake. He was chosen primate for the chapter in the Convocation of 1703, and soon after was presented with the crown's title to the deanery of St. Patrick's, Dublin. The title being thought defective, the chancellorship was presented to Mr. Synge, which gave him the care of St. Werburgh's, Dublin.
SYNODACTÆ 92
SYNODATICUM

1719 he was chosen proctor for the chapter of St. Patrick's, and on Dr. Sterne's promotion to the see of Dromore, the archbishop of Dublin appointed Dr. Synge his vicar-general, in which office he continued until he was appointed bishop of Raphoe, in 1714. He was made archbishop of Tuam in 1716, over which see he presided until his death, July 21, 1741. He published many sermons, resolutions, and canons, all of which a select edition, under the title of Works (London, 1740, 4 vols. 12mo; 1744, 1759), was issued. The best-known of his works is The Gentleman's Religion. His Treatise on the Holy Communion was published at Philadelphia in 1749, 32mo. See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Chalmers, Nie. Dict. s. v.

Synaxis (συναίσθεια), a Greek term for priestly concubines. See SYNTHROU̇SIA.

Synistaméni (συνισταμένω, standing together), a name given in the Eastern Church to the fourth order of penitents, called in the Latin Church consintentes. They were so called from their having liberty (after the other penitents were dismissed) to stand with the faithful at the altar, and join in the common prayers and see the oblation offered. Still they did not yet make their own oblations, nor partake of the eucharist. See Bingham, Christ. Antiq. bk. xviii, ch. ii.

Synnada, Council of (Concilium Synodaneae), was held about 230, or, according to some, in 256, upon the subject of Cataphrygian baptism. Baptism received out of the Church was declared to be null and void. See Marchetti, l. 760.

Synod (from συνόδος, a gathering), a meeting or assembly of ecclesiastical persons to consult on matters of religion. (See the monographs cited in Volbeding, Index Programmatum, p. 165.) Of these there are four kinds, viz.—1. General, where bishops, etc., meet from all nations. These were first called by the emperors; after- wards by the patriarchs; and lastly by the pope usurped to himself the greatest share in this business, and by his legates presided in them when called. See ECUMENICAL. 2. National, where those of one nation only come together to determine any point of doctrine or discipline. The first of this sort which we read of in England was that of Hereford, or Hertford, in 678; and the last was held by cardinal Pole in 1555.

See COUNCIL 3. Provincial, where those only of one province meet, now called the convocation (q. v.). 4. Diocesan, where those of but one diocese meet to enforce canons made by general councils or national and provincial synods, and agree upon rules of discipline for themselves. These were not wholly laid aside till, by the act of submission (25 Hen. VIII, art. 19), it was made unlawful for any synod to meet but by royal authority. See SYNOIDS.

Synod is also used to signify a Presbyterian Church court, composed of ministers and elders from the different presbyteries within its bounds, and is only subordinate to the General Assembly (q. v.).

SYNOD, ASSOCIATE, the highest ecclesiastical court among the united Presbyterian Dissenter in Scotland, the powers of which are, in a great measure, analogous to those of the General Assembly in the established Kirk. See SCOTLAND, CHURCHES IN.

SYNOD, HOLY, the highest court of the Russian Greek Church, established by the cazar Peter in 1723, and meeting now at St. Petersburg. Each diocese sends in a half-yearly report of its churches and schools. The members composing it are two metropolitan and as many bishops, with procurators, attorneys, and other lay officials. See RUSSIAN CHURCH.

SYNOD, HOLY GOVERNING, is the highest court of the Greek Church established in Greece after the recovery of its independence. It met first at Athens, Jan. 1833, and in 1844 was recognised by the constitution, which also enacted that the king should be a member of the established Church. The members of synod were at first appointed by the king, but are now chosen by the clergy, the bishop of Athens being perpetual president. In 1850 it was formally recognised by the patriarch of Constantinople, through the mediation of Russia, but on the condition that it should always receive the holy oil from the mother Church. See GREEK CHURCH.

SYNOD, REFORMED. See COVERANENTS; PRESBYTERIAN CHURCHES.

SYNOD, RELIEF. See SCOTLAND, CHURCHES IN.

SYNODALES TESTES were persons personally summoned out of every parish in order to appear at the episcopal synods, and there attest or make proof of the directorate of each clergy and form of his life. In after times they were a kind of enpanelled jury, consisting of two, three, or more persons in every parish, who were, upon oath, to present all heretics and other irregular persons. These, in process of time, became standing officers in several places, especially in great cities, and were called Synods (q. v.). They were also called Questems, from the nature of their office in making inquiry concerning offences. But this latter duty devolved mostly upon the church-wardens.

SYNODALS was a term applied to (1) provincial constitutions or canons read after the synods in parish churches; (2) to procurations, so called because the bishop held his synod and visitation together; (3) to the payments made a bishop by his clergy in virtue of his holding a synod. See SYNOTACTICUM.

SYNOTACTICUM, or CATHEDRATICUM, is the annual tribute paid by incumbents of benefices in the Church of Rome to the bishop of the diocese, in token of subscription to the episcopal cathedra. It is generally paid at the time of the convoking of the diocesan synod. The earliest mention of the payment of this tribute occurs in the transactions of the second Synod of Braga, A.D. 572 (sess. ii, can. 2, in c. 1, caus. x, qu. iii), where various extortions on the part of Spanish bishops are forbidden, and they are permitted only in connection with the visitations of their districts "honorem cathedræ sue id est ducem solida [...] per ecclesiasticam sortem" (Perri, Momon, Germania, iii, 357), and devoted this collection for the bishops on the archepiscopacy. Pope Alexander III commanded to bishops who should obtain a church from the hands of the laity the right to impose on it the cathedraticum (c. 9, X, De Cenabos, iii, 99); and both Innocent III (c. 20, X, De Censores) and Honorius III (c. 16, X, De Officio Judicis Ordinarii, i, 81) expressed themselves in favor of its being rendered. Other references may be found in Du Fresne, s. v. "Cathedraticum" and "Synodus;" Benedict XIV, De Synod. Diocesum, lib. v, c. vi, and 2; Richter, Kirchenrecht (5th ed.), § 233, note 4, etc.; Gudenus, Cod. Decret. cum commentatione, t. i, No. 98, p. 260. The Council of Trent discontinued the payment of many heavy impositions connected with visitations (sess. xxiv, can. 8, De Reform.) but various declarations of the Congregatio pro Interpre. Conc. Trident. have left the catedraticum in force (see Ferraris, Bibl. Canon., s. v. "Cathedraticum" and "Synodus"; Castoriano, Vetus et Nov. Eccle. Diplom. III, ii, 92, 94; Benedict XIV, ut sup. 6 and 7; Declarationes 18-26 in the edition of Trent by Richter and Schulte, loc. cit.). This impost is termed cathedraticum "in honorem cathedræ," and synodaticum as being collected during the session of the synod. It has been paid at other times as well, and is exacted even where no synod is held, unless a custom recognised in law forbids (Benedict XIV, ut sup. etc.). A tax expressive
of subordination is required in any case, amounting generally to two solidi. It must be paid by all churches and benefices and their incumbents, and also by seminaries, and the benefices are incorporated, and lay uncles having a church of their own or a greater regularity are exempt with reference to convents and convent churches in which they personally minister. The Order of St. John of Jerusalem is likewise exempt. In practice, however, it has not always been possible to collect these taxes. In Austria, it was objected to pay them under imperial re- script of 1783 and 1809, and in many other districts of Germany they were quietly discontinued. Their validity was decreed in Bavaria, on the other hand, so late as 1841 (see Perander, Handb. d. Kirchenrechts, 3d ed., p. 313, note).—Herzog, Real-Enzyklop. s. v.

**Synodice** (συνοδίκη) were letters written by a new bishop informing other bishops of his promotion, and to testify his desire to hold communion with them. A neglect to write such letters was interpreted as a refusal to hold such communion and a virtual charge of heresy upon his fellows. Circular letters summoning the bishops to a provincial synod were also called **Synodice**.

**Synodites** (from συνοδός, a community) were monks who lived in communities or convents, differing in this respect from the **Achorets**.

**Synod** formed a noticeable feature in the history of the general Church. Particular synods have served to indicate particular stages in the progress or retrogression of the life of the Church, as respects the development of knowledge and teaching, the formation of the worship and the constitution of the Church itself, and all synods, more clearly than other institutions, to reveal the ruling spirit, the measure of strength, or the type of disease, in any given period. The breadth of the field covered by this title will appear from the fact that Mani's (q. v.) collection of the acts, etc., of councils, extending only into the 15th century, embraces 31 volumes folio.

With respect to the origin of synods opinions differ. Some authors hold that they have been divinely instituted through the agency of the apostles (Acts xv, especially ver. 26, "It seemed good to the Holy Ghost, and to us"), while others concede to them a merely accidental rise. The council in Acts xv must certainly be considered a synod, though it does not appear that it was designed to introduce a permanent institution. On the other hand, the situation of the Church and the progress of events furnished the providential conditions by which ecclesiastical assemblies became necessary, so that their origin was merely human, for them cannot be accepted. The history of our subject, excluding the period since the Reformation, admits of being divided into five periods.

I. The Beginnings of the Institution of Synods as Furnished by Provincial Synods (to A.D. 325).—The earliest of such synods of which mention is made are one or two that have been held in Sicily in A.D. 125 against the gnostic Heracleon (q. v.), and one at Rome under bishop Telephorus (d. 139); but there is not the slightest evidence that either of them was held. The earliest of which we have authentic information were held in Asia Minor against the Montanists (Eusebius, Hist. Eccl. v, 16), probably not before A.D. 150. Soon afterwards various synods were held to discuss the celebration of Easter (ibid. v, 23) and other questions; so that Tertullian speaks (De Jœminis, c. 13) of the convening of such bodies as a custom among the Greeks, and Asia Minor, and time implies that such assemblies were not known in his own (African) Church. Such conferences promoted Christian unity and laid the foundation for a government of the churches by superior authority. By the middle of the 3rd century synods were regularly held in each year, and were attended by bishops and elders, so that they had already become a fixed and periodically recurring institution, in which the different churches shared in the persons of their appropriate representatives (see Firmilian's letter to Cyprian, Ep. No. 70). The earliest synods in the West were held in Africa about A.D. 215, and soon such assemblies became universal. The next step in this development of synods appears in the extension of their jurisdiction over larger areas than a single district or province, by which the inauguration of eccumenical councils was prepared for. At Iconium, in 268, representatives were present from Galatia, Cilicia, etc. Every part of Spain was represented at Elvira; and the Synod of Arles, in 314, was attended by bishops from Gaul, Britain, Germany, Spain, North Africa, and Italy.

II. A.D. 325 to 862.—The eccumenical synods of the Greek Church, beginning with that of Nicea (q. v.) and closing with the fourth Council of Constantinople (q. v.).

III. A.D. 862 to 1211.—Councils of the Western Church under the direction of the popes, including a great number of provincial and national synods whose pro- cedings indicated both the utmost devotion and the most decided opposition to the rule of the popes—ending with the general Council of Vienne in Gaul (q. v. severely).

IV. A.D. 1511 to 1517.—Councils ostensibly aiming to secure reform "in head and members"—Pisa, Constance, and Basle (q. v. severally).

V. A.D. 1551 to 1558.—The Reformation and the re-actionary Synod of Trent (q. v.).

For an enumeration and characterization of the more important synods see the article COUNCILS, to which we also refer for a list of sources. Herzog, Real-Enzyklop. s. v.

**Synódus** (συνόδος), a term applied in the early Church to the building (church) in which the synod was held. It was simply transferred from the assembly to denote the place of assembly, as was done with the word ecclesia.

**Synthronos** (σύνθρωνος), a Greek term to signify the seats of a bishop and his clergy in the bema of an Oriental Church.

**Syn'tyche** (Συντυχια, with Faye), a female member of the Church of Philippi, mentioned (Phil. iv, 2, 3) along with another named Euodia (or rather Euodia). A.D. 57. To what has been said under the latter head the following may be added: The apostle's injunction to these two women is that they should live in harmony with each other, from which we infer that they had, more or less, failed in this respect. Such harmony was doubly important if they held office as deaconesses in the Church, and as female servants of the household. In the case of Philippi other women of the same class (αἰτήται, ibid). At all events, this passage is an illustration of what the Gospel did for women, and for the Gospel, in the apostolic times; and it is the more interesting as having reference to that Church which was the first founded by Paul in Europe, and the first member of which was Lydia. Some thoughts on this subject will be found in Rilliet, Comm. sur l'Épître aux Philippi, p. 311—314.

**Synusiasææ** (συνοικία) were those who held that the incarnation of our Lord was effected by a blending or commixture of the Divine substance with the substance of the human flesh. The name is taken from the statement of the doctrine συνοικίας χειρισμένης και κρατής τῆς διάνοιας (Theod. Hier. Fab. iv, 9). Theodoret calls this sect Polemians, one of the Apollinarian sects; and Apollinaris himself, in the latter part of his life, added to his distinguishing heresy regarding the soul of our Lord, denying him a human
About B.C. 210 this city was taken and sacked by Marcellus, the Roman general, and, in storming the place, Archimedes, the great mathematician, who is esteemed the first inventor of the sphere (and who, during the siege, had sorely galled the Romans with astonishing military engines of his own invention), was slain by a common soldier while intent upon his studies. After it was thus destroyed by Marcellus, Augustus rebuilt that part of it which stood upon the island, and in time it so far recovered as to have three walls, three castles, and a marble gate, and to be able to send out twelve thousand horse soldiers and four hundred ships. In A.D. 675 the Saracens seized on it, but in 990 it was taken from them by Roger, duke of Apulia. It yet exists under its original name (Ital. Siracusa), and is still much frequented on account of its commodious harbor. Paul stayed here three days as he went prisoner to Rome (Acts xxvii, 12); here also Christianity was early planted, and still, at least in name, continues; but the city has lost its ancient splendor, though it is a bishop's see.

The magnificence which Cicero describes as still remaining in his time was no doubt greatly impaired when Paul visited it. The whole of the resources of Sicily had been exhausted in the civil wars of Caesar and Pompey, and the piratical warfare which Sextus Pompeius, the youngest son of the latter, subsequently carried on against the triumvir Octavius. Augustus

Plan of Syracuse and its Environs.
SYRACUSE

restored Syracuse, as also Catana and Centoripa, which last had contributed much to the successful issue of his struggle with Sextus Pompeius. Yet the island Ortygia and a very small portion of the mainland ad
joining sufficed for the new colonists and the remnant
of the former population. But the site of Syracuse rendered it a convenient place for the African corn-
ships to touch at, for the harbor was an excellent one, and the fountain Anthus in the island furnished an
unfailing supply of excellent water. The prevailing
wind in this part of the Mediterranean is the W.N.W.
This would carry the vessels from the corn region lay-
ing eastward of Cape Bon, round the southern point of
Sicily, Cape Pachynus, to the eastern shore of the is-
land. Creeping up under the shelter of this, they would
lie either in the harbor of Messana or at Rhgium un
til the wind changed to a southern point and enabled
them to fetch the Campanian harbor Putuoli or Gaeta,
or to proceed as far as Ostia. In crossing from Africa
to Sicily, if the wind was excessive, or varied two or
three points to the northward, they would naturally
bear up for Malta; and this had probably been the case
with the "Twins," the ship in which Paul found a pas-
sage after his shipwreck on the coast of that island.
Arrived in Malta, they watched for the opportunity of
a wind to take them westward, and with such a one they readily made Syracuse. To proceed faster while it
continued blowing would have exposed them to the
dangers of a lee-shore, and accordingly they remained
"three days." They then, the wind having probably
shifted to a westerly quarter so as to give them
smooth water, coasted the shore and made (σαμηλονύ-
μενος καταμαυρων σικ) Rhgium. After one day there,
the wind got round still more and blew from the south;
they therefore weighed, and arrived at Putuoli in the
course of the second day of the run (Acts xxviii, 12–14).

In the time of Paul's voyage, Sicily did not supply
the Romans with corn to the extent it had done in the
time of King Hiero, and in a less degree as late as the
time of Cicero. It is an error, however, to suppose that
the soil was exhausted; for Strabo expressly says that
for corn and some other productions, Sicily even sur-
passed Italy. But the country had become depopu-
lated by the long series of wars, and when it passed into
the hands of Rome, her great nobles turned vast
tracts into pasture. In the time of Augustus the whole
of the centre of the island was occupied in this manner,
and among its exports (except from the neighborhood
of the volcanic region, where excellent wine was pro-
duced), fat stock, hides, and wool appear to have been
the prominent articles. These grazing and horse-breed-
ing farms were kept up by slave labor; and this was the
reason that the whole island was in a chronic state of
disturbance, owing to the slaves continually running
away and forming bands of brigands. Sometimes these
became so formidable as to require the aid of regular
military operations to put them down; a circumstance
of which Tiberius Gracchus made use as an argument
in favor of his measure of an Agrarian law (Appian,
B. C. I, 9), which would have reconverted the sparsely
grass-lands into small arable farms cultivated by Ro-
man freemen.

In the time of Paul there were only five Roman col-
onies in Sicily, of which Syracuse was one. The oth-
ers were Catana, Taurontium, Thermae, and Tyndaris.
Messana too, although not a colony, was a town filled
with a Roman population. Probably its inhabitants were
merchants connected with the wine-trade of the neigh-
borhood, of which Messana was the shipping port. Syr-
acuse and Panormus were important as strategical points,
and a Roman force was kept up at each. Sicilians, Sica-
nians, Morgetians, and Iberians (aboriginal inhabitants
of the island, very early settlers), still existed in the
interior, in what exact political condition it is impos-
sible to say; but most likely in that of vassals. Some
few towns are mentioned by Pliny as having the Latin
franchise, and some as paying a fixed tribute; but, with
the exception of the five colonies, the owners of the soil
of the island were mainly great absentee proprietors,
and almost all its produce came to Rome (Strabo, vi,
2; Appian, B. C. iv, 84 sq.; Pllin, H. N. iii, 8). For a full account of ancient
Syracuse, see Smith's Dict. of Geog. s. v., and the liter-
ature there cited; also Gruiler, De Situ et Origenis Sy-
racusanum (Lips, 1818); for the modern city, Biederer,
Southern Italy, p. 308 sq. See Sicily.

Syria, a province and kingdom of Western Asia, the
name, extent, and boundaries of which have been subjects of no little difficulty to both sacred and clas-
sical geographers. As including Palestine, it is of in-
tense interest in Bible geography.

I. Name. — The word Syria does not occur in He-
brew; but in the A. V. it is the usual, though not the uniform, rendering of the word Aram (אראם). Thus in
Gen. x. 22, Aram, the youngest son of Shem, is men-
tioned as the founder of the Aramean nation, from
whom the whole country colonized by his descendants
took its name. The country is therefore rightly called
"Aram" in Numb. xxix, 7; but the very same Hebrew
word is rendered Mesopotamia in Judg. iii, 10, and Syria
in 1 K. 14.

Aram was a wide region. It extended from the Med-
terranean to the Tigris, and from Canaan to Mount Taurus. It was subdivided into five principalities: 1. Aram-Damascus (called in the A. V. "Syria of Damas-
cus"); 2. Aram-Maacah; 3. Aram-Beth- Rechob; 4. Aram-Zobah; and 5. Aram-Naharin (Mesopotamia in the A. V.). These have already been described. See Aram. When the kingdom of Damascus attained to great power under the warlike line of Hadad, it was
called by way of distinction Aram, which unfortunately is rendered "Syria" in the A. V. (2 Sam. viii, 5, 12; 1 Kings x, 22; 2 Kings x, 13, 22; 2 K. x, 19). This lax method of translation was borrowed from the Sept.
and Vulg. versions. The Targums retain Aram; and it would tend much to geographical accuracy and dis-
tinctness were the Hebrew proper names uniformly re-
tained in the A. V.

The region comprehended by the Hebrews under the
name Aram was not identical with that which the Greek writers and the authors of the New Test. in-
cluded under Syria. It embraced all Mesopotamia and Assyria, while it excluded Phoenicia and the whole ter-
ritory colonized by the Canaanites. See Canaan.

In the New Test. the name Syria is largely and pro-
* 

Coin of Syracuse.
SYRIA

unto the brethren of the Gentiles in Antioch, and Syria, and Cilicia;" and afterwards it is said that Paul, setting out from Antioch, "went through Syria and Cilicia" (ver. 41; comp. Gal. i. 21). A wider signification seems to be attached to the name in other passages. It is said of Paul, when going to Jerusalem, "that he sailed thence (from Greece) into Syria"—giving this general name to Palestine as well as the country north of it (Acts xviii. 18; xx. 3). In one passage taken from the Sept. the name is employed as an equivalent of the Hebrew Aram (Luke iv. 27; comp. 2 Kings v, 20).

2. The origin of the word is not quite certain. Some make it a contraction or corruption of Assyria (Syraxs, Peripl. p. 80; Dionys. Perieg. 570-575; Eustath. Coment. ad loc., etc.). Herodotus says, "The people whom the Greeks call Syriaca are called Assyriaca by the barbarians" (vii, 63); and these names were frequently confounded by the later Greek writers (Xenoph. Cyr. vi, 2, 19; viii, 3, 24); and apparently also by some of the Latins (Pliny, H. N. v, 13). A much more probable etymology is that which derives Syria from Trir (meaning), the Hebrew name of the ancient city of Tyre. The distinction between Syria and Assyria is very great in Hebrew. The Greek form of the name derived from Trir would be Tauria; but as this could not be expressed by Greek letters, it was softened down to Συρία. Assyria is in Hebrew עיריהם, and in Greek Ἀσσυρία, and sometimes Ἀρούπια. "A still greater distinction between the names is found in the Assyrian inscriptions, where Assyria is called Assur, while the

Tyrians are the Teur-ra-ya, the characters used being entirely different" (Rawlinson, Herod. i, 63, note). Tyre was the most important part of the Syrian coast. With it and its enterprise merchants the Greeks soon became familiar, and they gave to the country around it the general name Syria—that is, "region of Tyre."

It is interesting to observe that the connection between Syria and Aram is noticed by Strabo when commenting on a stanza of Pindar: "Others understand Syriaca by the Arimnai, who are now called Aramaeans" (xiii, 626, and xvi, 785); and again, "Those whom we call Syriaca (Συριακοι) are by the Syrians themselves called Armeniaca and Aramaeaca" (Ἀρμαμακοὶ; i, 2, 34).

The name Syria was thus of foreign origin. It was never adopted or acknowledged by the people themselves; nor was it ever employed by native authors except when writing in Greek for Greeks. At the present day it is unknown in the country. It has been seen that in ancient times the name Aram was specially applied to Damascus and its kingdom. There is something analogous to this in modern usage. Esb-Sham is the name now commonly given to both city and country, though in more correct language the former is styled Dimashk esh-Sham.

II. Extent and Boundaries. — 1. Ancient geographers do not agree as to the extent of Syria. Herodotus makes it reach to the Black Sea on the north (i, 6); to Paphlagonia and the Mediterranean on the west (i, 72; ii, 12, 116); to Egypt on the south (ii, 158, 159); and to Media and Persia on the east (vii, 63). He confounded Syria and Assyria, and hence arose the error into which he fell regarding the extent of the former. The same view is taken by Xenophon (Anab. i, 4, 11-19). Even Strabo states in one place that "the name Syria seems to me to extend from Babylon as far as the bay of Issus, and anciently from this bay to the Euxine. Both tribes of the Cappadocians—those near the Taurus, and those near the Pontus—are called to this day Leuo-Syrians." It is clear, however, from a subsequent sentence, that he in this place fell into the error of Herodotus; for he thus remarks, "When the historians of the Syrian empire say that the Medes were conquered by the Persians, and the Syrians by the Medes, they mean no other Syrians than those who built the royal palaces of Babylon and Nineveh; and Ninus who built Nineveh in Aturia was one of these Syrians" (xvi, 787). It is evident that for Syrians the name Asyrians should here be substituted. The great similarity of the names, no doubt, tended to create this confusion.

When writing directly of the country of Syria, Strabo is more accurate. He describes its extent, boundaries, and divisions with great minuteness. "Syria is bounded on the north by Cilicia [comp. Acts xv, 23] and Mount Amanos; on the east by the Euphrates and the Arabian Senvite, who live on this side [west] of the Euphrates; on the south by Arabia Petrae and Egipt; and on the west by the Egyptian and Syrian seas, as far as Issus" (xvi, 749). Pliny gives substantially the same boundaries. He says, however, that some geographers divide the country into four provinces—Idumaea, Judaea, Phœnicia, and the Syria (H. N. v, 13; comp. Josephus, Ant. x, 6, 1).
Polemy confines Syria within the same limits on the north, west, and east; but he marks its southern boundary by a line running from Dor, at the base of Carmel, by Scythopolis and Philadelphia, to the Iadius Mons (now Jebel Akra), between which and the border lie the ruins of Seleucia, the port from which Paul embarked on his first missionary journey (Acts xiiii, 2-4), and once so celebrated for its docks and fortifications (Polybius, bk. v).

2. Mount Semiramis. (I.) The parallel ranges of Lebanon and Antilebanon have already been noticed under their own titles. At the southern end of the former is the pass called in Scripture "the entrance of Hamath" (q. v.).

(2.) Beyond this, in a line with Lebanon, rises the range of Barrigions, which extends to Antioch. It is a rugged limestone range, rent and torn by wild ravines, thinly peopled, and sparsely covered with oaks. Its elevation is much inferior to Lebanon, and does not average more than 4000 feet. In the parallel of Antioch the chain meets the Orontes, and there sweeps round in a sharp angle to the south-west, and terminates in the lofty peak of Casius (now Jebel Akra), which rises abruptly from the sea to a height of 5700 feet, forming one of the most conspicuous landmarks along the coast of Syria. The Barrigions range has received the name Jebel en-Nusairiyeh, from the mysterious and warlike tribe of Nusairiyeh, who form the great bulk of its inhabitants.

At the northern extremity of the range, on the green bank of the rapid Orontes, stand the crumbling walls and towers of Syria's ancient capital, Antioch (q. v.), now dwindled down to a poor town of some 6000 inhabitants. A few miles west of it, in a secluded mountain glen, are the fountains and ruins of Beit el-Ma, which mark the site of the once celebrated Daphne (Murray, Handbook for Syr. and Pal. p. 602).

(3.) Beyond the valley through which the Orontes breaks narrow and wild, rises steeply another mountain-range, which runs north and south, and joins the Taurus, and has an average elevation of nearly 6000 feet. The scenery of this range is very grand—deep ravines shut in by cliffs of naked rock, conical peaks clothed with the dark foliage of the prickly oak, and foaming torrents fringed with dense copses of myrtle and oleander. High up in the west of it, from the lofty vantage-ground of el-Khanzir, which shuts in the plain of Suweidiyeh; and farther north the curve of the bay of Iskanderun sweeps so close to the rocky base of the range as to leave a pass only a few feet broad between the cliff and the sea. Here are the ruins of an ancient arch marking the site of the celebrated Syrian Gates; to the north of it is the battle-field of Issus. The southern section of this range was anciently called Pieria, and gave its distinguishing name to the city (Seleucia Pieria) at its base; the northern section was called Amanus. The whole ridge is now usually called Jawar Dagh, though the southern portion is perhaps more commonly known as Ras el-Khanzir.

(4.) On the eastern bank of the Orontes, near the ruins of Apamea, rises another but much lower range of hills, which runs northward, not in a regularly formed ridge, but rather in detached clumps, to the parallel of Aleppo. The hills are mainly calcareous, well wooded in places, and intersected at intervals by fertile plains and vales. They are interesting to the traveller and antiquarian as containing some of the most remarkable ruins in Syria (Murray, Handbook, p. 615 sq.). The southern section is called Jebel Riba, the central Jebel Al-Budrus (now Jebel el-Ala), and the northern Jebel Madhja, from its having been the home of St. Simeon Stylites.

3. The Northern Highlands.—Northern Syria, especially the district called Connagene, between Taurus and the Ephrathites, is still very insufficiently explored. It seems to be altogether an elevated tract, consisting of twisted and barren hills and山脉 between them, which open out into bare and

which stands the miserable village of Iskanderun, the only seaport of Antioch and Aleppo.
sterile plains. The valleys themselves are not very fertile. They are watered by small streams, producing often rich crops. The streams rising in the Orontes or the Euphrates. A certain number of the more central ones, however, unite and constitute the "river of Aleppo," which, unable to reach either of the oceanic streams, forms (as we have seen) a lake or marsh, wherein its waters evaporate. Along the course of the Euphrates there are rich land and abundant vegetation; but the character of the country thence to the valley of the Orontes is bare and woodland, except in the vicinity of the towns, where fruit-trees are cultivated, and orchards and gardens make an agreeable appearance. Most of this region is a mere sheep-walk, which, during the two or three harsh months which approach the south, where it gradually mingles with the desert. The highest elevation of the plateau between the two rivers is 1500 feet; and this height is reached soon after leaving the Euphrates, while towards the west the decline is gradual.

4. The Eastern Desert.—East of the inner mountain-chain, and south of the cultivable ground about Aleppo, is the great Syrian desert, an "elevated dry upland, for the most part of gypsum and marls, producing nothing but a few sparse bushes of wormwood, and the usual aromatic plants of the wilderness." Here and there bare and stony ridges of no great height cross this arid region, but fail to draw water from the sky, and have, consequently, no streams flowing from them. A few wells supply the nomad population with a brackish fluid. The region is traversed with difficulty, and has never been accurately surveyed. The most remarkable oasis is at Palmyra, where there are several small streams and abundant palm-trees. See Tadmor. Towards the more western part of the region along the foot of the mountain-range which there bounds it, is likewise a good deal of tolerably fertile country, watered by the streams which flow eastward from the range, and after a longer or shorter course, are lost in the desert. The best-known and the most productive of these tracts, which seem stolen from the desert, is the famous plain of Damascus—the el-Ghuthah and el-Merj of the Arabs—already described in the account given of that city. See DAMASCUS. No rival to this "earthly paradise" is to be found along the rest of the chain, since no other stream flows down from it at all comparable to the Barada; but wherever the eastern side of the chain has been visited, a certain amount of cultivable territory has been found at its foot, corn is grown in places, and olive-trees are abundant (Burckhardt, Travels in Syria, p. 351). From this oasis, the river el-Mukhઈ, in which the Koweik, or river of Aleppo, ends, scarcely deserves to be called a lake, since it is little better than a large marsh. The length, according to colonel Chesney, is nine miles, and the breadth two miles (Euphrat. Exp. I, 505); but the size seems to vary with the seasons, and with the extent to which irrigation is used along the course of the Barada. A recent traveller, who traced the Barada to its termination, found it divide a few miles below Damascus, and observed that each branch terminated in a marsh of its own; while a neighboring stream, the Awaj, commonly regarded as a tributary of the Barada, lost itself in a third marsh separate from the other two (Porter, in Geog. Journ. xxvi, 43-46).

7. Cities.—The principal cities and towns of Syria are the following: Damascus, pop. 150,000; Aleppo, pop. 70,000; Beirut, pop. 50,000; Hamath, pop. 30,000; Hums, pop. 20,000; Tripoli, pop. 15,000; Antioch, Sidon, and Lakedyneh. Besides these, which occupy ancient sites, there were in former times Palmyra, in the eastern desert; Abila, on the river Abana; Chalics, Heliopolis, and Lybo, in the valley of Ceele-Syria; Laodicea ad Libanum, Arichusa, and Apamea, in the valley of the Orontes; Seleucia, Arados, and Byblos [see Gebal], on the seacoast, and many others of less importance.

IV. Political Geography.—Syria has passed through many changes. Its ancient divisions were numerous, and constantly varying. The provinces of the Biblical epoch are almost unrecognizable. See ALEXANDRIA. Phocis was generally regarded as a distinct principality [see Phocis], and the warlike tribes of Lebanon appear to have remained almost in a state of independence from the earliest ages. See LEBANON. The political divisions, as enumerated by Greek and Roman geographers, are almost unrecognizable. Strabo mentions five great provinces: Cappadocia, the Levant territory in the extreme north, with Samosata for capital, situated on the Euphrates. 1. Seleucia, lying south-
of the former, was subdivided into four districts according to the number of its chief cities: (1) Antioch Epiphanie; (2) Seleucia, in Pieria; (3) Apamea; and (4) Laodicea. The territory of Laodicea, which extended south of the Euphrates, and called Cyrrhestica, from the town Cyrrhestis, which contained a celebrated temple of Diana. Southward were two subdivisions (apparently) of Apamea, called Parapatonia and Chalchidice, bordering on the Euphrates, and inhabitable by Scipio. The territory of Laodicea extended south to the river Eleutherus, where it bordered on Phoenice and Cole-Syria. 3. Cole-Syria, comprising Laodicea ad Libanum, Chalcis, Abilene, Damascus, Iurua, and others farther south, included in Palestine. 4. Phoenice. 5. Jurdea (Geogr. xvi, 748 sq.). Syria was more often mentioned in ancient works than those of Strabo. It appears that each city on rising to importance gave its name to a surrounding territory, larger and smaller, and this in time assumed the rank of a province (Pliny, H. N. v, 14-21).

Pompey mentions thirteen provinces: Commagene, Pieria, Cyrrhestica, Seleucia, Ciusotia, Chalbitonitis, Chalchis, Apamea, Laodicene, Phoenice, Cole-Syria, Palmyrene, and Bataanea, and he gives a long list of the cities contained in them. He excludes Palestine altogether (Geogr. v, 15).

Under the Romans Syria became a province of the empire, the provinces of its being permitted to remain for a time under the rule of petty princes, dependent on the imperial government. Gradually, however, all these were incorporated, and Antioch was the capital. Under Hadrian the province was divided into two parts: Syria Major on the north, and Syria-Phoenice on the south. Towards the close of the 4th century another partition of Syria was made, and formed the basis of its ecclesiastical government: 1. Syria Prima, with Antioch as capital; 2. P. Secundae, with Apamea as capital; 3. Phoenice Prima, including the greater part of ancient Phoenice—Tyre was its capital; 4. Phoenice Secunda, also called Placentia ad Libanum, with Damascus for the capital ("Car. a. St. Paul.", Geog. Sac. p. 287).

At the present time Syria forms a portion of three pashalics—Aleppo, Damascus, and Sidon.

V. Climate, Inhabitants, etc.—1. The temperature of Syria greatly resembles that of Palestine. The summer season is very hot, but considerably cooler than that of the Great desert. It is more temperate, and the annual snow, and the high altitudes along these ranges are as cool as the south of England; but, on the other hand, the low marshy plains of the interior are very hot. The seaboard, being much exposed to the sun's rays, and sheltered by the mountains behind, is generally sultry and oppressive; but the higher parts are very healthy. Sidon, Beirut, and Suweidjeh—where the soil is dry and the air pure. Rain is more abundant than in Palestine, and even during summer light showers occasionally fall in the mountains.

2. The present population of Syria is estimated at 1,800,000. Arabic is their vernacular. They consist of Mohammendans, Yezidees, Druses, Romans, Jews, and Greek Christians. The Mohammendans, who probably comprise three fourths of the whole, are seldom associated with the progress of arts or industry, and, though possessing the influence which belongs to the ruling authority, are rarely instrumental in the formation of capital or the diffusion of civilization. Most of the commercial establishments are either in the hands of the Christian or Jewish population. The agricultural produce of Syria is far less than might be expected from the extensive tracts of fertile lands and the favorable state of the climate. Regions on the highest mountains, which were formerly covered with perpetual snow, are now cultivated with the greatest propriety. The commerce of Syria is in an equally low state. Volney but faithfully depicted Syria when he described it as a "land of almost unparalleled natural resources, comprising within its limits every estimable variety of climate and of soil." Yet Syria, under the execrable Muslim rule, is almost the lowest in the scale of nations; but even in the present state of things she produces silk, cotton, and wool—three staple articles of demand. In 1678 the Turks introduced the sugar beet among the few exports of Oriental countries. To-day they have manufactured and introduced the cheaper fabrics of Europe. The issue of the recent Turkoman war has been to place Syria under the nominal protection of Great Britain, with promises of social reform, which, however, the Turks are slow in bringing about. See TURKEY.

VI. History.—1. The first occupants of Syria appear to have been of Hamitic descent. The Canaanitish races, the Hitites, Jebusites, Amorites, etc., are connected in Scripture with Egypt and Ethiopia, Cush and Mizraim (Gen. x, 6, 15-18); and, even independently of the evidence, there seems to be sufficient reason for believing that the races in question stood in close ethnic connection with the Cushitic stock (Rawlinson, Herod. iv, 243-245). These tribes occupied not Palestine only, but also Lower Syria, in very early times, as we may gather from the fact that Hamath is assigned to them in Genesis (x, 18). Afterwards they seem to have become possessed of Upper Syria also, for when the Assyrians first push their conquests beyond the Euphrates, they find the Hitites (Khatti) established in the ridge of mountains to the right of the great river. After a while the conquerors, who were at that time extirpating the nomads, received a Semitic infusion, which most probably came to them from the south-east. The family of Abraham, whose original domicile was in Lower Babylonia, may, perhaps, be best regarded as retaining the name of the Semites, while the inhabitants of the upper portion of the Euphrates, as Abimelek, Melchizedek, Eliezer, etc. The only Syrian town whose existence we find distinctly marked at this time is Damascus (Gen. xiv, 15; xv, 2), which appears to have been already a place of some importance. Indeed, in one tradition Abraham is said to have been king of Damascus for a time, and it became a city of great importance, and quite unworthy of credit. Next to Damascus must be placed Hamath, which is mentioned by Moses as a well-known place (Numb. xii, 21; xxxiv, 8), and appears in Egyptian papyri of the time of the eighteenth dynasty (Cambridge Essays, 1856, p. 288). Syria at this time, and for many centuries after, seems to have been divided up among a number of petty kingdoms. Several of these are mentioned in Scripture, as Damascus, Rehob, Maachah, Zobah, Geshur, etc. We also hear occasionally of the kings of Syria and of the Hitites (1 Kings x, 29; 2 Kings vii, 6)—an expression indicative of that extensive division of the tract among numerous petty chiefs which is exhibited to us very clearly in the early Assyrian inscriptions. At various times different states had the pre-eminence, but none was ever strong enough to establish an authority over the others.

2. The Jews first come into hostile contact with the Syrians, under that name, in the time of David. The wars of Joshua, however, must have often been with Syrian chiefs, with whom he disputed the possession of the tract about Lebanon and Hermon (Josh. xi, 2-18). After his time the Syrians were apparently undisturbed, until David began his aggressive war against them (2 Sam. viii). Claiming the dominion of the Euphrates, which God had promised to Abraham (Gen. xv, 18), David made war on Hadadezer, king of Zobah, whom he defeated in a great battle, killing 18,000 of his men, and taking from him 1000 chariots, 700 horses, and 20,000 footmen (2 Sam. viii, 5, 4, 15). The Damascus Syene, having endeavored to succor their kinsmen, were likewise de-
SYRIA

feated with great loss (ver. 5); and the blow so weak
ened them that they shortly afterwards submitted and
became David's subjects (ver. 6). Zobah, however, was
far from being subdued as yet. When, a few years
later, the Ammonites determined on engaging in a war
with him, and introduced the general submission of
Syria to the Jewish monarch. The submission thus
began continued under the reign of Solomon, who
"reigned over all the kingdoms from the river [Eu-
phrates] unto the land of the Philistines and unto the
border of Egypt; they brought presents and served Sol-
omon all the days of his life" (1 Kings iv. 21). The
only part of Syria which Solomon lost seems to have
been Damascus, where an independent kingdom was
set up by Rezon, a native of Zobah (xi. 23-25). On
the separation of the two kingdoms, soon after the ac-
cession of Rehoboam, the remainder of Syria no doubt
shone under the new authority. Damascus was the
leading state, Hamath being second to it, and the
northern Hittites, whose capital was Carchemish, near
Bambuk, third. See CARCHMISH. The wars of this
period fall mostly properly into the history of Damascus,
and have already been described in the account given
of the kings of that kingdom. This aggregation is as a
struggle to attach Syria to the great Assyrian empire, from
which it passed to the Babylonians, after a short attempt on
the part of Syria to hold possession of it, which was frus-
t rated by Nebuchadnezzar. From the Babylonians the
Syrians passed to the Persians, under whom it formed a
satrapy in connection with Lydia, Cilicia, Phoenicia, and
Syrac-

cus (Herod. iii, 91). Its resources were still great, and
probably it was his confidence in them that encour-
aged the Syrian satrap Megabazus to raise the standard
of revolt against Artaxerxes Longimanus (B.C. 447).
After this we hear little of Syria till the year of the bat-
tle of Issus (B.C. 333), when it submitted to Alexander
without a struggle.

3. Upon the death of Alexander, Syria became, for the
first time, the head of a great kingdom. On the division
of the provinces among his generals (B.C. 321), Seleucus
Nicator received Mesopotamia and Syria, and though,
in the first instance, the power of the Medes was
in danger of being swallowed up, the whole country was lost and won repeatedly, it remained
finally, with the exception of Cilicia-Syria, in the hands of the
prince to whom it was originally assigned. That
prince, whose dominions reached from the Mediterranean
to the Indus, and from the Oxus to the Southern Ocean,
having, as he believed, been exposed to great dangers
on account of the distance from Greece of his original
capital, Babylon, resolved, immediately upon his victory of
Ipsus (B.C. 301), to fix his metropolis in the West, and
settled upon Syria as the fittest place for it. Antioch
was begun in B.C. 300, and, being finished in a few
years, was made the capital of Seleucus's kingdom. The
whole nation was thenceforth ruled from this centre, and
Syria, which had long been the prey of stronger coun-
tries, and had been exhausted by their extortions, grew
rich with the wealth which now flowed into it on all
sides. The splendour and magnificence of Antioch were
extraordinary. Broad straight streets, with colonnades
from end to end, temples, statues, arches, bridges, a royal
palace, and various other public buildings dispersed throughout it made the Syrian capital by far the most
splendid of all the cities of the East. At the same time,
in the immediate vicinity of large towns were growing
up. Seleucia in Phœnicia, Apamea, and both Laodicea
were foundations of the Seleucidae, as their names suf-
sicitiously indicate. Weak and inconstant as were many
of these monarchs, it would seem that they had a heredi-
tary taste for building; and so each aimed at outdoing
his predecessors in the number, beauty, and magnificence
of his constructions. As the history of Syria under the
Seleucid princes has been already given in detail in the
articles treating of each monarch [see Antiochus;
Demetrius; Seleucus, etc.], it will be unnecessary
here to do more than sum it up generally. The most
notable event in the history of Syria during this period
was the invasion of the Greeks. The empire was then almost as large as that of the
Achaemenian Persians, for it at one time included Asia
Minor, and thus reached from the Egean to India. It
was organized into satrapies, of which the number was
seventy-two. Trade flourished greatly, old lines of
traffic being restored, and new ones opened up. The reign
of Nicator's son, Antiochus I, called Soter, was the be-
ginning of the decline, which was progressive from his
date with only one or two slight interruptions. Soter
lost territory to the kingdom of Pergamus, and failed in
an attempt to subject Bithynia. He was also unsuccess-
ful against Egypt. Under his son, Antiochus II, called Tho-
egos or "the God," who ascended the throne in B.C.
261, the disintegration of the empire proceeded more
rapidly. The revolt of Parthia in B.C. 236, followed by
that of Bactria in B.C. 254, deprived the Syrian
kingdom of some of its best provinces, and gave it a
new enemy in the Bactrians, who, shortly afterwards,
became its superior. At the same time, the war with Egypt was prosecuted without either advantage or glory. Fresh
losses were suffered in the reign of Seleucus II (Callini-
cus), Antiochus III's successor. While Callinicus was
engaged in Egypt against Ptolemy Euergetes, Eum-
enes of Cardia, having obtained the title of king of
Asia Minor (B.C. 242), and about the same time Arses
II, king of Parthia, conquered Hyrcania and annexed it to his dominions. An attempt to recover this latter province cost Callinicus his crown, as he was defeated and made prisoner by the Parthians (B.C. 220).
In the next reign (B.C. 219), Seleucus III, in a slight reaction set in. Most of Asia Minor was recovered
for Cersaus by his wife's nephew, Aebeus (B.C. 224), and he was preparing to invade Pergamus when he
died poisoned. His successor and brother, Antiochus III,
though he gained the surname of Great from the
grandeur of his expeditions and the partial success of
some of them, can scarcely be said to have really done
anything towards raising the empire from its declining
condition, since his conquests on the side of Egypt,
consisting of Cilicia-Syria, Phœnicia, and Palestine, formed
no sufficient compensation for the loss of Asia Minor,
without which he could not be considered to have
retrieved the dismemberment of the rival kingdom of Pergamus (B.C. 190).
Even had the territorial balance been kept more even,
the ill policy of making Rome an enemy of the Syrian
kingdom, with which Antiochus the Great is taxable,
would have necessitated our placing him among the
princes to whom its ultimate ruin was mainly owing.
Towards the east, indeed, he did something, if not to
thrust back the Parthians, at any rate to protect his
empire from their aggressions. But the exhaustion
consequent upon his constant wars and signal defeats—
more especially those of Raphana and Magresia —led
Syria far more feebly at his death than she had been at
any former period. The almost eventless reign of Seleuc-
cus IV (Philipator), his son and successor (B.C. 187-
175), is sufficient proof of this feebleness. It was not
till twenty years of peace that had recruited the resources of
Syria in the memory that Antiochus IV (Ephiphanes),
brother of Philipator, returned on the scene of great
war (B.C. 171)—a war for the conquest of Egypt. At
first it seemed as if the attempt would succeed. Egypt
was on the point of yielding to her foe of so many years,
when Rome, following out her traditions of hostility to
Syrian power, proclaimed the independence of the
province, and deprived Ephiphanes of all the fruits of his victories
(B.C. 168). A greater injury was about the same time
(B.C. 167) inflicted on Syria by the folly of Ephiphanes
himself. Not content with replenishing his treasury by
the plunder of the Jewish Temple, he madly ordered the
desecration of the Holy of Holies, and thus caused the
revolt of the Jews, which proved a permanent loss to the empire and an aggravation of its weakness. After the death of Epiphanes the empire rapidly verged to its fall. The regal power fell into the hands of an infant, Antiochus V (Eupator), son of Epiphanes (B.C. 164); the crown, however, still remained in the guardianship of the Romans. The crown started up in the person of Demetrius, son of Seleucus IV; Rome put in a claim to administer the government; and amid the troubles thus caused the Parthians, under Mithridates I, overran the eastern provinces (B.C. 164), conquered Media, Persia, Susiana, Babylonia, etc., and advanced their frontier to the Euphrates. It was in vain that Demetrius II (Nicator) made an attempt (B.C. 142) to recover the lost territory; his boldness cost him his liberty; while a similar attempt on the part of his successor, Antiochus VII (Sidetes), cost that monarch his life (B.C. 129). Meanwhile, in the shorn Syrian kingdom, disorders of every kind were on the increase; Commagene revolted and established her independence; civil wars, murders, mutinies of the troops, rapidly succeeded one another; the despised Jews were called in by both sides in the various struggles; and Syria, in the course of about ninety years, from B.C. 154 to B.C. 64, had no fewer than ten sovereigns. All the wealth of the country had been by this time dissipated—much had flowed romewards in the shape of bribes; more, probably, had been spent on the wars; and still more had been wasted by the kings in luxury of every kind. Under the circumstances, the Romans showed eagerness to occupy the exhausted region, which passed under the power of Tigranes, king of Armenia, in B.C. 83, and was not made a province of the Roman empire till after Pompey's complete defeat of Mithridates and his ally Tigranes in B.C. 64.

The chronology of this period has been well worked out by Clinton (Fast. Hii., iii. 308-346), from whom the following table of the kings, with the dates of their accession, is taken:

<table>
<thead>
<tr>
<th>Kings.</th>

</table>

4. As Syria holds an important place, not only in the Old Testament, but in the New, some account of its condition under the Romans must now be given. That condition was somewhat peculiar. While the country generally was formed into a Roman province, under governors who were at first proprietors or questors, then procurators, and finally legates, there were exempted from the direct rule of the governor, in the first place, a number of free cities, which retained the administration of their own affairs, subject to a tribute levied according to the Roman principles of taxation; and, secondly, a number of tracts which were assigned to petty princes, commonly natives, to be ruled at their pleasure, subject to the same obligations as those under the direct control of the governor. The free cities were Antioch, Seleucia, Apamea, EphiphanEA, Tripolis, Sidon, and Tyre; the principalities, Commagene, Chalcis ad Belum (near Baalbek), Arethusa, Afolia or Abileni, Palmyra, and Damascus. The principalities were sometimes called kingdoms, sometimes tetrarchies. They were established where it was thought that the natives were so inextricably wedded to their own customs, and so well disposed for revolt, that it was necessary to consult their feelings, to flatter the national vanity, and to give them the semblance without the substance of freedom. (a, c.) Commagene was a kingdom down to its extinction in the year 64; it had broken away during the later troubles, and become a separate state under the government of a branch of the Seleucidae, who affected the names of Antiochus and Mithridates. The Romans allowed this condition of things to continue till A.D. 17, when, upon the death of Antiochus III, they made Commagene a province of that province; and after this it continued till A.D. 38, when Caligula gave the crown to Antiochus IV (Epiphanes), the son of Antiochus III. Antiochus IV continued king till A.D. 72, when he was deposed by Vespasian, and Commagene was finally absorbed into the empire. He had a son, called also Antiochus and Epiphanes, who was betrothed to a Galatian, the sister of "king Agrrippa," and afterwards the wife of Felix, the procurator of Judea. (b.) Chalcis "ad Belum" was not the city so called near Aleppo, which gave name to the district of Chalcidice, but a town of importance near degli, or upon the river Arethusa, whence probably the suffix "ad Belum." It is more likely the town called by Strabo (xvi, 2, 10), and Josephus says that it was under Lebanon (Ant. xiv, 7, 4), so that there cannot be much doubt as to its position. It must have been in the "Hollow Syria"—the modern Bula'a—to the south of Baalbek; see the maps, Nos. 9, 2, and also the probable route to Antioch, where there are remains of ruins (Robinson, Bibl. Rd. xii, 496, 497). This, too, was generally, or perhaps always, a "kingdom." Pompey found it under a certain Potelmy, the son of Menneus, and allowed him to retain possession of it, together with certain adjacent districts. From him it passed to his son, Lysanias, who was put to death by Antony at the instigation of Cleopatra (about B.C. 34), after which we find its revenues farmed by Lysanias's steward, Zenodorus, the royalty being in abeyance (Josephus, Ant. xiv, 10, 1). In B.C. 22 Chalcis was added by Augustus to the dominions of Herod the Great, at whose death it probably passed to his son Philip (ibid. xvi, 11, 4). Philip died A.D. 34; and then we lose sight of Chalcis, until Claudius, in his first year (A.D. 41), bestowed it on a Herod, the brother of Herod Agrippa I, still as a "kingdom." From this Herod it passed (A.D. 49) to his nephew, Herod Agrippa II, who held it till A.D. 93, when he was expelled from it to a better government (ibid. xx, 7, 1). Chalcis then fell to Agrippa's cousin, Aristobulus, son of the first Herodian king, under whom it remained till A.D. 73 (Josephus, Wur, vii, 1, 7). About this time, or soon after, it ceased to be a distinct government, being finally absorbed in the Roman province of Syria (now Restum). Arethusa (now Restum) was for a time separated from Syria, and governed by phylarchs. The city lay on the right bank of the Orontes, between Hamah and Hums, rather nearer to the former. In the government were included the Emiseni, or people of Huma (Emesa), so that we may regard it as comprising the Orontes valley from the Jebel Erbayn, at least as high as the Bahr el-Kades, or Baheiret-Hums, the lake of Hums. Only two governors are known—Sampicneramus, and Jamichus, his son (Strabo, xvi, 2, 10). Probably this principality was one of the first absorbed. (d.) Abileni, so called from its capital Afolia, was a "tetrarchy." It was assigned to the east of Antilibanus, on the route between Baalbek and Damascus (Itit. Ant.). Ruins and inscriptions mark the site of the capital (Robinson, Bibl. Rd. iii, 479-482), which was at the village called el-Sik, on the river Barada, just where it breaks forth from the mountains. The limits of Antiochus Apollon, Apian, Syr. 502, are also marked by this tetrarchy of Luke's gospel (iii. 1), where it is said to have been in the possession of a certain Lysanias at the commencement of John's ministry, which was probably A.D. 25. Of this Lysanias nothing more is known; he certainly cannot be the Lysanias who once held Chal- cis, since that Lysanias died above sixty years previously.
ly. Thirteen years after the date mentioned by Luke (A.D. 38), the heir of Caligula bestowed "the tetrarchy of Lysanias," by which Abilene is no doubt intended, on the elder Agrippa (Josephus, Ant. xvi. 50, 10), and four years later Claudius confirmed the same prince in the possession of it (ibid. xvi. 51; 5:1, 11, 7). This state of things continued most likely to the settlement of the empire by Augustus, when Damascus was attached to the province of Syria. During the time of the "Abilis of Lysanias" Damascus was held by an "etharch of king Aretas." The semi-independence of Damascus is thought to have continued through the reigns of Caligula and Claudius (from A.D. 57 to A.D. 64), but to have come to an end under Nero, when the district was probably reattached to Syria.

The list of the governors of Syria, from its conquest by the Romans to the destruction of Jerusalem, has been made out with a near approach to accuracy, and is as shown in the adjoining table.

The general history of Syria during this period may be summed up in a few words. Down to the battle of Pharsalia, Syria was fairly tranquil, the only troubles being with the Arabs, who occasionally attacked the eastern frontier. The Roman governors labored hard to raise the condition of the province, taking great pains to restore the cities which had decayed during the war. After the battle of Pharsalia (B.C. 40) the troubles of Syria were renewed. Julius Caesar gave the province to his relative Sextus in B.C. 47; but Pompey's party was still so strong in the East that in the next year one of his adherents, Cicellus Bassus, paid Sextus to death, and established himself in the government so firmly that he was able to resist for three years three proconsuls appointed by the Senate to dispossess him, and only finally yielded under terms which he himself offered to his antagonists. Many of the petty princes of Syria sided with him, and some of the nomadic Arabs took his pay and fought under his banner (Strabo, xvi, 2, 10). Bassus had but just made his submission, when, upon the assassination of Caesar, Syria was disputed between Cassius and Dolabella, the friend of the latter. The battle of Brescia (B.C. 43), at Adiabene, where he was besieged by Cassius. The next year Cassius left his province and went to Philippi, where, after the first unsuccessful engagement, he too, committed suicide. Syria then fell to Antony, who appointed as his legate L. Decidius Saxa, in B.C. 41. The troubles of the empire now tempted the Parthians to seek a further extension of their dominions at the expense of Rome, and Pescadores, the crown-prince, son of Arsaces XIV, assisted by the Roman refuge Labienus, overran Syria and Asia Minor, defeating Antony's generals, and threatening Rome with the news of the loss of the Bithynian Coast (ibid. xvi. 5:1, 11, 7). Finally, in A.D. 5:1, Claudius, among other grants, conferred on the younger Agrippa "Abila, which had been the tetrarchy of Lysanias" (ibid. xvii. 1, 7). Abila was taken by Placidus, one of the generals of Vespasian, in B.C. 69 (Josephus, War. iv. 7, 6), and thenceforth was annexed to Syria. (c) Palmyra appears to have occupied a different position from the rest of the Syrian principalities. It was in no sense dependent upon Rome (Pliny, H. N. iv. 35), but, relying on its position, claimed and exercised the right of self-government from the breaking-up of the Syrian kingdom to the reign of Trajan. Antony made an attempt against it in B.C. 41, but failed. It was not till Trajan's successes against the Parthians, between A.D. 114 and A.D. 116, that Palmyra was added to the empire. (j) Damascus is the last of the principalities which it is necessary to notice here. It appears to have been left by Pompey in the hands of an Arab prince, who, according to Strabo, contributed for it, and to allow the Romans to occupy it at their pleasure (Josephus, Ant. xiv. 4, 5; 5, 1:11, 7). This state of things continued most likely to the settlement of the empire by Augustus, when Damascus was attached to the province of Syria. During the time of the "Abilis of Lysanias" Damascus, which had been held by an "etharch of king Aretas." The semi-independence of Damascus is thought to have continued through the reigns of Caligula and Claudius (from A.D. 57 to A.D. 64), but to have come to an end under Nero, when the district was probably reattached to Syria.

* Called "Vinidius" by Tacitus.
5. A little earlier Christianity had begun to spread into it, partly by means of those who were scattered at the time of Stephen's persecution (Acts xi, 19), partly by the exertions of Paul (Gal. i, 21). The Syrian Church is accused of laxity both in faith and morals (Newman, Ariana, p. 10); but, if it must admit the disgrace of having given birth to Lucian and Paul of Samosata, it can claim, on the other hand, the glory of such names as Ignatius, Theophilus, Ephraem, and Babylas. It suffered many grievous persecutions without shrinking; and it helped to make the apologetic protest against worldliness and luxuriousness of living at which monasticism, according to its original conception, must be considered to have aimed. The Syrian monks were among the most earnest and most self-denying; and the names of Hilarion and Simeon Stylites are among those which show that a most important part was played by Syria in the ascetic movement of the 4th and 5th centuries.

6. The country remained under Roman and Byzantine rule till A.D. 534, when it was overrun by the Mohammedans under Khader. Sixteen years later Damascus was declared the capital of the new Persian empire. In the 11th century the Crusaders entered it, captured its principal cities, with the exception of Damascus, and retained possession of them about a hundred years. For more than two centuries after the expulsion of the Crusaders, Syria was the theatre of fierce contests between the warlike houses of Tartary and the Mameluks of Egypt. At length, in A.D. 1517, it was captured by the Turks under Sultan Selim I, and became a part of the Ottoman empire.

In 1798 Bonaparte landed in Egypt with a powerful army, and, having subjected that country to the arms of France, marched into Syria, affecting the utmost respect for the Mohammedan doctrine and worship, and claiming a divine commission as regenerator of the East. He laid siege to Acre; but, the Turkish garrison being animated by the presence of 300 British sailors under sir Sidney Smith, at the expiration of sixty days the enemy retired with considerable loss and, after the sacrifice of a large number of his most gallant soldiers. A powerful army of Turks, who had advanced from Damascus to raise the siege of Acre, were next attacked by Napoleon at the base of Mount Tabor, and routed with great slaughter, thousands being driven into the sea by the pursuing French army, contrary to the usages of war, 1200 prisoners were shot or despatched with the bayonet. But the French campaign in Syria was of short duration. On June 15, 1799, the army under Bonaparte arrived at Cairo, having traversed the Great Desert; and after the battle of Aboukir, in the following month, when 18,000 Turks perished on the field, the general deputed the command to Kleber, and sailed for France.

Syria remained under the Turks till 1800, when Mohammed Ali, pasha of Egypt, declaring war with his sovereign, the sultan, sent an army into Palestine, under the command of his son Ibrahim, which speedily captured Acre, Tripoli, Aleppo, and Damascus, and, defeating the Turks in various battles, crossed the Taurus, and prepared to march on Constantinople itself. The sultan was obliged to invoke the aid of Russia against the conqueror of Syria; and 20,000 Russians, under command of General Gorchakov, proceeded on an encamping between Ibrahim and the Bosporus. The sultan then entered into negotiation with the Egyptian general, and solemnly confirmed to Mohammed Ali the viceregalty of the whole territory from Adana, on the frontiers of Asia Minor, to the Nile. The Syrians soon discovered that their new masters were not a whit less rapacious than the Turks, and several insurrections took place in Mount Lebanon and various districts of Syria in 1834. The presence of Mohammed Ali himself, with large reinforcements, suppressed for a moment the spirit of dissatisfaction; and in the following year the Druses and Christians of Lebanon were again put down; however, by the utmost tyranny, the Syrians again revolted in 1837; they were chastised by Ibrahim, and again reduced to subjection. In 1840, in consequence of a treaty between England, Russia, Austria, France, and Prussia, the season. On one of these in 1840, were conducted by a British squadron; and, the Egyptians being compelled to evacuate the whole of Syria, the supremacy of the Turks was once more established over the country, which they have ever since held.

Macedon. (Leips. 1854). On the history under the Romans, see Norius, Genotopiksa Painter, in Opp. iii, 424–531; Gibbon, Decline and Fall, etc. On the modern history and condition, see Castille, La Syrie sous l'Empire; Bowring, Report on Syria; Ritter, Syrien und Paläst.; Murray and Bidecker, Syria and Palestine.

SYRIA, MISSIONS IN. The origin of the Syrian mission dates back as far as 1829. When the two American missionaries, Bird and Goodell, arrived in that year, the civil and the social condition of Jerusalem and Palestine were such that these gentlemen were advised to make Beirut the centre of their operations. Soon several English missionaries were added to the Protestant force at that time, and the papal Church became thoroughly all-powerful. Matters were in a very bad condition with the different patriarchs to render, if possible, the undertaking of the missionaries ineffectual. The letters were answered by the anathemas against the "Bible men;" yet, notwithstanding all this, the missionaries took a hopeful view of their prospects, and commenced schools in 1824 at Beirut, and afterwards at other places. The Bible was a more class school of Arab children, taught daily by the wives of the missionaries. Soon an Arab teacher was engaged, and before the year ended the pupils had increased to fifty. In 1827 they had already 600 children in thirteen schools, and more than 100 of these pupils were girls. That the Roman ecclesiastics were hostile to these schools need not be mentioned. The troubles which commenced in 1826 with the invasion of the Greeks, and the constant apprehension of an approaching war, made it necessary to suspend the mission for a time, which happened in the year 1826, and thus the first period in the Syrian mission closed. The second period commences with the year 1850, when the station at Beirut was resumed. In 1834 an Arabic press was opened at Beirut, which proved a great help in the missionwork, especially in the controversy which Mr. Bird had with the papal bishop of Beirut. In 1835 a high-school was commenced at Beirut. The following year was the war of Lebanon. These troubles lasted till the year 1842. In 1842 the year 1844 the missionaries held a convention, the result of which was that it was recognized as a fact of fundamental importance that the people within the bounds of the mission were Arabs, whether called Greeks, Greek Catholics, Druses, or Maronites.
and that the divers religious sects really constituted one race. It was also agreed upon that wherever small conquests were achieved by the Christian religion, and the society was that, they were entitled to be recognised as churches, and had a right to such a native ministry as could be given them. About that time a call for preaching came from Hasbeia, a village of four or five thousand inhabitants, situated at the foot of Mount Hermon, and about fifty miles south-east of Beirut. A considerable body of Hasbeians had succeeded from the Greek Church, declared themselves Protestants, and made a formal application to the mission for religious instruction. Seventy-six of these people were added to the Church of Christ. A persecution against the Protestants now ensued, and the son of Abraham, where the school was situated under the charge of Mr. Calhoun. A chapel for public worship was fitted up, and here, as also at Beirut, there was preaching every Sabbath in the Arabic language, with an interesting Sabbath-school between the services. In the spring of the year 1846 war broke out a fresh between the Druses and Maronites, and Lebanon was again purged by fire. The consequence was that the schools in the mountains were broken up; but in the following year, when Dr. Van Dyck was ordained to the work of the Gospel ministry, there were ten schools in the charge of the station at Abeih, with 406 pupils. Connected with the Beirut station were four schools for boys and girls, and one for girls alone. In Sok el-Ghurb, a village four miles from Abeih, a Protestant secession from the Greek Church was in progress, embracing fourteen families, and religious services were held with them every Sabbath. At Bhamdun, the summer residence for the brethren of the Beirut station, there were a number of decided Protestants, and even in Zahleh, the hot-bed of fanaticism, there were men who openly argued from the Gospel against the prevailing errors. Missionary work had now so increased that in the year 1847 an earnest and eloquent appeal from Beirut for an increase of the number of natives was made to the Prudentiel Committee. The appeal was published, but it continued painfully true that the harvest was plentiful, while the laborers were few. In the same year the Protestants of Hasbeia sent one of their number to Constantinople to lay their grievances before the sultan. The appeal was successful, and the principle of tolerating and acknowledging the Protestants as a Christian sect was recognised, in spite of the bull of excommunication of the Greek patriarch. The most important event, however, in the year 1848 was the formation of a native church at Beirut, and the beginning of translating the Scriptures into Arabic, which was committed to Mr. Eli Smith, who was assisted by Butrus el-Bistany and Nasif el-Yasiji. In the same year Aleppo was made a missionary station, but it was left in 1855 to be cultivated by the Armenian mission, the language in that region being chiefly the Turkish. At that time the Gospel was preached stately at sixteen places. At four of these—Beirut, Abeih, Sidon, and Hasbeia—churches had been organized. The anathemas of the Maronite clergy, once so terrific, had lost their power, and the most influential inhabitants were now so friendly and so much in favor of education and good morals. Things had changed in the last fifteen years for the better in a most remarkable way. We have now arrived at the year 1857, which opened with the death of Dr. Eli Smith, the translator of the Bible into Arabic. He had departed at Beirut, Sidon, and Hasbeia, and returned to the work of translation by Dr. Van Dyck, who had been removed for that purpose from Sidon to Beirut. In the year 1859 the translation of the New Testament was completed and published under the care of Dr. Van Dyck, who then proceeded with the translation and publication of the Old Testament. This was finished in 1864. The British and Foreign Bible Society requested permission to adopt this version, instead of the one formerly issued by them. The result of a friendly negotiation was that the American and British and Foreign Bible Society agreed to publish the version conjoinedly from electrotype plates furnished by the former.

The civil war which broke out in Syria in 1860, and which was noted for savage massacres on Lebanon, at Hasbeia, Damascus, and elsewhere, although doubtless injurious to the missionary work in its direct effects, was yet the means of an interesting development of the missionary spirit. Not less than six different missionary societies were formed, embracing nearly all the Protestants of the various towns and villages, and a commendable degree of liberality was shown by the natives in collecting and contributing. The number of converts thus transferred to the work was multiplied and provided with native preachers and pastors, and a proposal was made for a Protestant college. The demand for the Scriptures and other religious works was so great that the press was unable to meet it. In 1862 the printing alone amounted to 8,000 volumes and 9,000 tracts, making an aggregate of 6,800,000 pages. Besides the Protestant college, which was proposed in 1861 and incorporated in 1863, in accordance with the laws of the state of New York, a theological seminary was commenced at Abeih in May, 1865, which opened with seven students. In the year 1870 the Syrian mission was transferred from the Board of Foreign Missions to the Presbyterian Board of Missions, under whose care it is still carried on.

Beirut is one of the missionary centres for the revival of Bible Christianity in Bible lands. Among the chief instrumentalities for the development of this city are the benevolent and literary institutions founded by foreign missionary zeal. First among them are the American Protestant institutions under the care of the Presbyterian Board of Foreign Missions in New York. They are manned by a noble band of Christian scholars, as Drs. H. H. Jessup, D. Bliss, C. A. Van Dyck, E. Post, and Prof. James S. Dennis, E. R. Lewis, and Hall. In the year 1877, when Dr. Philip Schaff visited Beirut, a new mission chapel, with a native pastor, had just been opened in the eastern part of the city. There are the American Female Seminary and the printing-press and Bible depository, which sent out more than 38,450 volumes (or 15,768,980 pages) of Bibles, tracts, and other books, including a series of text-books and juvenile works. There is the "Syrian Protestant College," which is independent of the mission, but grew out of it, and promotes its interest. In 1877 it numbered over 100 pupils, and had nearly 100 native and 20 foreign helpers—total force, 140; 12 churches, 716 communicants, 145 received on proficiency, 66 preaching-places, and 45 Sunday-schools with 1895 pupils. The principal stations outside of Beirut are Tripoli, Abeih, Sidon, and Zahleh. Besides these flourishing Presbyterian institutions, the schools of Mrs. M. Mott, Miss Jessie Taylor, and the deaconesses of Kaiserswerth deserve most honorable mention. The Jesuits are also very active in Beirut in the interest of the Roman Catholic Church. They are just now issuing a new Arabic translation of the Bible, evidently in opposition to Dr. E. Van Dyck. The chief native pastors are 125, with 146 licensed preachers. Other missionaries in the East. From Dr. Schaff's work, Through Bible Lands, we subjoin the following statistics concerning the
Besides Beirut, we may mention Damascus, the hotbed of Mohammedan fanaticism. A daily diligence connects this place with Beirut. "It seems a hopeless task," says Dr. Schaff, "to plant Protestant Christianity in such a place as Damascus. Nevertheless, the thing has been done, and not altogether without result." Since 1843 the United Presbyterian Church of America and the Presbyterian Church of Ireland have maintained jointly a mission, with a church for converts from Jews and Greek Christians, and with schools. The buildings were burned during the massacre of 1860, but have been substantially rebuilt. The Presbyterian community there is now upwards of 1000, and the worship is conducted twice every Sunday in Arabic, and occasionally in English. Besides this Presbyterian mission, there is an Episcopal mission, with a chapel built by the London Society for Promoting Christianity among the Jews. Adjoining the chapel are several fine schoolrooms for boys and girls. Altogether this society employs there a missionary staff of five persons. Connected with this society is also a depot, where Bibles and other books, such as the Pilgrim's Progress, are for sale. The missionary operations at Damascus are but small beginnings; but the time is not far distant when, as Abd-el-Kader prophesied, "the mosques of Damascus will be turned into Christian churches."

From the work recently published by Dr. Schaff, Through Bible Lands, we extract the following table:

In conclusion, we will mention the fact that the last mission year has been signalized by the establishment of a British protectorate over Syria, and all Asiatic Turkey, and by a new departure in the Syrian Presbyterian College, in the adoption of the English language as the common medium of instruction. See Anderson, History of the Missions of the American Board of Commissioners for Foreign Missions to the Oriental Churches (Boston, 1873); and the Report of the Foreign Missions of the American Board of Commissioners for Foreign Missions (N.Y., 1879); besides the annual reports of the different societies. Some of the publications from the Jesuits press at Beirut are mentioned in Literarischer Handweiser, 1864, p. 209 sq. (B. F.)

Among the most notable missionary efforts in Palestine are the German colonies at Haifa and Jaffa. They belong to a religious society known as "The Temple," which originated among the Pietists of Wurtemberg, who accepted the prophecy of the book of Revelation as set forth in his Gnomon of the N. T. In 1867 an expedition of twelve men, sent out from the parent society at Kirschenhardt, established themselves at Semmeh, near Nazareth, but soon died of malarial fever. On Aug. 6, 1868, another company set out, and, arriving in Palestine in October, separated into two colonies, one settling at Haifa, under the presidency of G. D. Hardegg, and the other at Jaffa, under Christopher Hoffmann. Their object was a religious one, to prepare the Holy Land for Christ's personal coming in the Millennial reign. They purchased land, built houses, and have addressed themselves first to agriculture. At Jaffa they have two settlements—one called Saroja, about two and a half miles north of the town, consisting in 1872 of ten houses; the second, near the walls of Jaffa, was bought from the surviving members of an American colony which came to grief (for this last see Ridgway, Lord's Land, p. 465); and this settlement included thirteen houses, with a school and a hotel. The Jaffa colony in all numbered in 1872 one hundred men, seventy women, and thirty-five children; two of the colonists were doctors, and some twenty were mechanics, the rest being farmers. The Haifa colony numbered 341, having been lately reinforced by new arrivals from Germany. Both colonies are well established, having neat and comfortable houses, and signs of external prosperity, being engaged in various trades and manufactures, as well as farming. They have little influence, however, over the native population and small security for permanence, although for the present fully tolerated by the Turkish authorities and highly respected by their neighbors (see Conder, Tent-Work in Palest., ii, 301 sq).

At Jaffa there has lately been likewise established an agricultural colony of Jews from Germany, who have a small but flourishing establishment just outside the city.

Besides the episcopal mission in Jerusalem [see Palestine, Missions in], the Church of England has mission stations at Nablus and various other points in Palestine, where religious services are held with more or less regularity. The church founded by the English Missionary Society in connection with the Anglo-Prussian bishopric of Jerusalem, where an ordained clergyman (formerly Rev. J. Zeller, now Rev. F. Bellamy) officiates, assisted by a native catechist. In the same town is a hospital founded by the English Medical Missionary Society, which dispenses medical aid to all applicants; and likewise an orphanage, established by the Ladies' Society for Promoting Female Education in the East, which educates and cares for about forty girls, chiefly of Christian parentage. See Turkey.

Missionary work has thus a foothold in Syria, but owing to the severe Moslem laws against proselytism, it accounts for but little direct spiritual results (see Collins, Miss. Enterprise in the East, Lond. 1873).

Syria (Dan. ii, 4), or Syrian Tongue (Ezra iv, 7) of Language (2 Kings xviii, 26). The last name of the town mentioned in the rendering in the A. V. of the Hebrew יָם רֶמֶשׁ, Aramith, which is the fem. of
SYRIAC LANGUAGE

Aramaean, used adverbially i. q. Aramaic, in Aramaic. See Aramaean.

Syriac Language. This represents the Western dialect of that branch of the Semitic or Syro-Arabian languages usually termed the Aramaean (q. v.), the Eastern being represented by the Chaldee (q. v.). The affinity between the Chaldee and Syriac is indeed so close that but for a few orthographical changes, and especially the difference in written character, they would scarcely be distinguishable. In speech they could hardly have differed more than the several dialects of the Greek (e. g. the Doric, Ionic, Attic) from each other. While the Chaldee is written in the square character, now usually called the Hebrew, the Syriac is written in a very different and more cursive hand, and exhibits (in addition to the peculiar forms for final letters, as usual in all the Semitic group) a method of combining certain letters or running them together in writing, similar to the practice in Arabic. There are also two forms of the characters (which correspond precisely to the Hebrew in number and order)—the ordinary or light-stroke form now generally used in printing, and an older form called the Estrangelo, of heavier strokes and more uncouth shape. The vowel-points also (of which there are five, corresponding in general to the modern vowels a, e, i, o, and u, as pronounced in Italian) differ entirely from the Hebrew (and Chaldee); and, moreover, vastly in these two methods of writing; with the ordinary letters they consist of modified forms of the Greek vowels (a, e, i, o, u), while in the Estrangelo they are denoted by two dots in various positions. Other orthographical peculiarities of the Syriac as compared with the Hebrew and Chaldee are chiefly of the nature of character: in Latin, in the tabulation beneath silent letters, the suppression altogether of the Sheva when silent, the disuse of the Dagesh (some writers, however, employing a dot above a Begad-Kephath letter, called Kaskos, i. e. “hardness,” to remove the aspiration, and a dot beneath it, called Zokok, i. e. "softness," to retain the aspiration), and the indication of the plural (when identical in form with the singular) by two horizontal dots placed above it, called Ribbi, i. e. "increase."

For the leading differences in the formation and construction of words in Syriac, which are throughout analogous with the Chaldee, see Aramaean Language.

The ancient or proper Syriac is believed to be now wholly a dead language, and is used only in the old liturgies and sacred books. The modern Syriac, which is used almost solely by the Nestorian Christians of Persia, and to some extent by their Kooristani neighbours, differs considerably from the old Syriac, or that of literature. The principal value of a knowledge of the latter is its use in the elucidation of rare words in the Old Test. and the comparison with the Heb. roots; and it is also of much importance from the fact that the oldest and best version of the New Test. (the Peschito) is in this language. See Syriac Versions. The principal literature of the Syriac, besides this and the inferior version of the Old Test., consists of certain historical works of the Early and Middle Ages, particularly the writings of Euphemius Syrus (q. v.), and a number of religious poems and hymns (see Select Hymns and Homilies [Loud. 1858], translated from the Syriac by Rev. H. Burgess).

General treatises on the Syriac language and literature, many of them in connection with the Hebrew, but exclusive of those that treat likewise of the Chaldee, are by the following: Lysius (Regiom. 1726), Michælia

SYRIAC LITERATURE

[J. B.] (Hal 1756), Michaelis [J. D.] (Gött 1768, etc.), Agrell (Upps. 1791; Lond. 1816), Svanberg (Upps. 1795), Lengeker (Regensburg, 1806), Lengerken (Berol. 1841). See, also, the Spec. Lit. Oct. 1852; see the article "Syro-Arabian Languages and Literature," in the Christ. Rev. xxix, 393 sq.; on Syriac Biblical Literature, in the Church Rev. xvi, 36 sq.; on Syriac Philology, in the Biblioth. Sacra, viii, 554 sq.; and the list in Uhlemann’s Syr. Gramm., p. 22 sq.

Grammarians of the Syriac, exclusively, are those of Dihler (2d ed. Hal. 1646), Opitius (Leips. 1691), Leusden (Ultraj. 1638), Beveridge (Lond. 1658), Michaelis [C. B.] (Hal. 1741), Michaelis [J. D.] (Gött 1784), Adler (Alton. 1784), Zell (Lemgo, 1788), Tychsen (Rost. 1798), Yates (Lond. 1803), Welsch (Berlin, 1803), von Hoffmann (Hal. 1782), Uhlemann (Berlin 1829; N. Y. 1855), Tullberg (Lond. 1827), Phillips (2d ed. ibid. 1845), Cowper (ibid. 1860), Merx (Halle, 1867). A Grammar of the Modern Syriac Language, by Rev. T. Stoddard, is printed in the Jour. of the Amer. Oriental Society (N. Y. 1855), vol. v, No. 1. Lexicons have been executed by Gutbirk (Hamb. 1667, new ed. by Henderson, Lond. 1836) and Schauf (Ludg. 1708); the abstract of the Syriac part of Castell’s Hikpteglot Lex. by Michaelis [J. D.] (Gött 1788); Smith, Thesaurus (Lond. 1858), p. 1. A new and extensive Syriac lexicon was under-taken by Dr. Bahr, in the Church of Christ, and the mathematics are those of Kimch (Leips. 1789, Grimm, Lemgo, 1795), Knaes (Gött 1807), Hahn and Sieffert (Leips. 1825), Oberleitner (Vian. 1825), Döpke (Gött 1829), Wenig (Innsbr. 1865), and Rödiger (2d ed. Halle, 1888). The most convenient reading-book for beginners is the Syriac New Testament published by Bagster (Lond.), and containing a brief lexicon edited by Dr. Henderson. See SHEMITIC LANGUAGES.

Syriac Literature. The Syriac literature is preeminently religious. The oldest monument is the Syriac version of the Bible, called the Pesikta or Peshto, for which see SYRIAC VERSIONS. As the Jews, the Syrians treated their Bible in Masoretic manner, which may be seen from the superscriptions added to some books. Thus we read at the end of Job, "conclusio sunt caelestis sanctum et sanctissimum et sanctissime sanctum" (Job 28), and in Daniel 12, "quidem sanctissimus et custos sanitatis et regis". "Here ends the book of the just and noble Job; it contains 2555 verses." The result of critical care for the Peshto is contained in a work speaking of the variety of single readings, of the correct reading of difficult words, and in which the pronunciation of proper names according to the Greek mode is taught. The title of this collection is אֱלֹהִים הָאָדָם מִיּוֹתֵיָה הַמֶּלֶךְ אֱלֹהִים חֶבְרָאֹת אֱלֹהִים הָאָדָם מִיּוֹתֵיָה הַמֶּלֶךְ אֱלֹהִים חֶבְרָאֹת אֱלֹהִים Hikpteglot Lexicon, p. 1. A "Book of the names and readings of the Old and New Test. according to the Karkhische reconstruirt." The latter expression denotes that the work was prepared in the Jacobitic monastery Karkhaph, which by a mistake lent the name and idea of a Karkhische or Karkhaphenische reconstruirt (see Martin, Tradition Karkaphienn, ou la Massore chi es les Syriens [Paris, 1870]), After this, all notices concerning a Karkhaphenische version which are found in the introductions to the scholae and dictionnaires of the Bible must disappear once for all. The same French writer also called attention to the fact that, like the Jews, who have an Eastern and Western, a Babylonian and Palestinian, Masorah, so likewise we must distinguish between an Eastern and Western, a Nestorian and Jacobitan, Masorah among the Syrians; and this he distinguishes in his introduction de dialecte (ibid. 1872): "Essai sur les deux principaux dialectes Arameses;" to which we may add a third essay by the same author: Histoire de la Ponctuation ou de la Massore chi es les Syriens (ibid. 1875). These three essays are of importance for the reading and understanding of the Syriac literature, which will be treated in the art. SYRIAC VERSIONS, we must state that the deuterocanonical books, which are not found in Lee’s edition of the Psalter, were already translated before the 4th century, for Ephrem the Syrian already quotes them. Thus under the form of dialogue, Ephrem, in his parables, quotes the 13 (Opp. Grac, i, 8); xi, 5 (ibid. p. 92); iv, 7 (ibid. p. 101); with καὶ οὕτως γέγραφον he quotes Wisd. iv, 7; viii, 1-17 (ibid. p. 241); iii, 1; iv, 15 (ibid. p. 256); viii, 16 (ibid. ii, 28); Eclesius, 1, he introduces with ὡς ἤ γεγραμμένον (ibid. ii, 257), etc. In 1864 Lagarde published the most interesting and valuable book of the Syriac Testament entitled the title Libri Apocryphi V. T. Syriace; Cerrani, in his Monumenta Sacra et Profana, tom. i, published the apocryphal of Baruch and the epistle of Jeremiah; in the 5th vol. the 4th book of Esaurs; and in the 7th vol. (Metzil. 1874) he published the Wisdom of Solomon and Ecclesiasticus.

The apocryphal literature of the New Test. as far as it has been published, is given by Renan, Fragments du Livre Gnostique intitulé Apostolac, d’Adam ou Penitence ou Testament d’Adam, publié d’après deux versions Syr., in the Jour. As. n. v. tom. ii, p. 427; by Lagarde, in Didascalia Apostolopelus Syriac (Lips. 1884); by Curton, in his Ancient Documents, and Lagarde’s Reliquiae Juris Eccles. Antiquissimae Syriacae, 1856; by H. Cowper, in the Apoc. Gospels and other Documents, etc. (2d ed. Lond. 1867); and by Wright, Contributions to the Apocryphal and Syriac Literature of the New Test., collected and edited from Syriac MSS. in the British Museum (ibid. 1865).

Between the translation of the Scriptures and the classic period of Syriac literature there existed a gap covering about three hundred years, which is now filled through Curton’s Ancient Syriac Documents relative to the Earliest Establishment of Christianity in Edessa (Lond. 1864). Eusebius, in his Church History, tells us that he translated the correspondence between Christ and king Abgar of Edessa, together with the narrative of the healing and conversion of that king by Thaddaeus, one of the twelve apostles, from the archives of Edessa. From this we learn that Adai, one of the seventy, converted not only the king Abgar Ukka, but also a great number of the people, and built churches in and about Edessa; and he was succeeded by Aggeus, who was murdered. Besides Aggeus, a good many others suffered martyrdom, for which comp. Acta Martyrum Orient. et Occident. (Rom. 1748, 2 tomi, ed. Assemani).

I. ORIGIN OF CHRISTIANITY.—Towards the middle of the 4th century begins the golden era of Syriac literature, and under this head we mention Jacob, bishop of Nisibis (q. v.). Although later MSS. contain something under his name, yet no genuine works are now extant. Contemporary with Jacob was Apfaart or Farhad, named the Pers. Persian," the author of homilies written between 337 and 345, and published by Antonelli in the Armenian, with a Latin paraphrase, in 1756, but of late in the original Syriac by Wright (Lond. 1869). Prof. Bickell translated eight of these homilies into German (in the Bibliothek der Kirchenväter [Kempten, 1874], No. 105, 103). On Aphraates see the recent biography of Aphraates Sapiens Persae Sermo Homileticus (Lips. 1878), and Schönfelder, in the Tubinger theolog. Quartalschift, 1878, p. 195-256.

Of greater renown was Ephrem (q. v.), who died in A.D. 373, and whose writings were translated not only into Latin, but also into the principal languages of Asia, viz., Arabic, Abyssinian, and Slavonic. Besides Ephrem, we mention Gregory, abbot in Cyprus about 390, author of epistles; Balseus, whose hymns are given by Overbeck in his S. Ephremi Syri, Rabulae, Bullarii (Oxford, 1866); by Wenig, in his Schola Syriaca (Nestorius, 1885); and by Bickell, in Ausgewählte Gedichte der syrischen Kirchenverter (Kempten, 1872). Balseus’s contemporary
was Cyrillicans, whose hymns were also translated by Bickell (loc. cit.).

Towards the end of the 4th and beginning of the 5th century we find Nicephorus, bishop of Gortyna, author of a martyrology (printed in Assemanii's Bibliotheca) and hymns. The canons of the Synod of Selucia (410) concerning Church discipline, and bearing his name and that of Isaac, bishop of Seleucia, have been published after a Paris MS. by Lamy: Consilium Seluciae et Chersonensis habiti anno 410, ed. var. illustr. (Louvain, 1869); Rabula, bishop of Edessa (died 435), author of epistles, canons, and hymns, for which comp. Overbeck (loc. cit.) and Bickell. In the year 469 died Isaac the Great (q. v.), presbyter of Antioch. His hymns are translated by Zingerle, in the Tübinger theol. Quartalschrifft, 1876, p. 62; and Bickell, in the Kempten-Stifts-Bibliothek, Tübinger Kirchenlehrer, 1872, No. 44. The latter has also published S. Isaacii Antiocheni, Doctoris Syrormus, Opera omnia, ex omnibus, quatuor extant, Codicibus Manuscriptis cum varia lectio Syriacae Arabicque primum edidit, Latinae vertit, Prolegomeni et Glossario aucte (Giessen, 1873-77, 2 vols.); see also Zingerle, Monumenta Syriaca ex Romanis Codicibus Collecta (Keni ponti, 1869), i, 13-20. Contemporary with Isaac was the monk Dada, who wrote about three hundred works on Biblical, homiletical, and hagiographical matter. About the same time lived Cosmas, the biographer of Simeon the Stylite (see Biblioth. Orient. and Acta Martyrum Oriental.). Towards the end of the 5th and beginning of the 6th century lived Joshua the Stylite of Edessa, author of a chronicle covering the years 495-507, which has been edited by Martin, Chronique de Josas le Stylite, écrite vers l'an 515. Texte et Traduction (Louvain, 1868), and, again, in the Russk Monatg 1869, q. v.). In the work by Abbeh, De Vita et Scriptis S. Jacobi Baturnarii Saragy in Mesopotamia Episcopi (Louvain, 1867), three biographies of Sarag are given. More recent is Martin's Évèque-Poète au Ve et au VIème Siècles, ou Jacques de Sararg, son Vie, son Temps, ses Œuvres, ses Croyances, in the Revue des Sciences Éclectiques, Oct. and Nov. 1876, p. 309-352, 385-419. According to Martin, Sarag was a heretic, for he says, "Jacob was born, lived, and died in heresy; he loved everything which the Church condemned, and condemned everything that the Church loved at that time." He had written a Pater Noster in order to correct the translation in the Angersville Gebet syrischer Kirchenlehrer. Of Sarag's writings, some were published in the Monumenta Syriacna, i, 21-96; ii, 52-63; 76-166; in Assemanii's Acta Martyr., ii, 239; Cureton, Ancient Documents, p. 79; Wenig, Schola Syr. p. 155; by Zingerle, in the Zeitschrift der deutschen morgenl. Gesellschaft, 1858, p. 115; 1859, p. 44; 1860, p. 679; 1864, p. 731; 1866, p. 511; by the same, six homilies were published at Bonn in 1867. Martin published in the Zeit-schrift der deutschen morgenl. Gesellschaft, 1875, p. 107-187, Discours de Jacques de Sarogy sur la Chute des Idoles; and ibid. 1876, p. 217-275, Lettres de Jacques de Sarogy aux moins du Comte de Mur Basussa et a Paul d'Edesse, relevées et traduites; Dr. R. Schröter, ibid. 1877, p. 369, the Consolatory Epitaph to the Hymnary Christians, in the original Syriac, with notes. In the 6th century also lived John the monk, a native of Nineveh, author of sermons and epistles, published in Greek (Leipa, 1779), and Isaac of Nineveh (q. v.) (see Monumenta Syriacna, i, 97-101), author of an ascetic work in seven books, and known in the Greek translation, made by Fabricius and Abraham, and given under the title Liber de Virginitate, in the Syriaca Patrum, where they are erroneously ascribed to Isaac of Antioch. With Isaac of Nineveh the list of orthodox writers is closed, and we come now to II. Heterodoxi Doctores,—I. The Nestorians. Without entering upon the history of these Christians, we will only mention that the work of the Nestorian orthodox or Arian writers was first published by Abraham Echellen- sian (Rome, 1653), and more correctly by Asseman in the 3d vol. of his Biblioth. Orient. Besides, we find many literary and historical notices in Assemanii's catalogue of the Oriental MSS. of the Vatican Library, or in the Bibliotheca Apostolica Vaticana, or in the Commentaries of S. E. et J. S. Asseman, recensuerunt Tom. II, complectens Libros Chalad, sine Syrora (ibid. 1758), and in the Appendices by Cardinal Mai, in the Catal. Cod. Bibl. Vatic. Arab. etc., sive ejus partis Hebr. et Syriaco, quam Assemanii in editione praeiternierunt (ibid. 1881). See Nestoriana.

The earliest writers among the Nestorians were Bar- susma (q. v.), bishop of Nisibis and author of epistles; Narsae (d. 496), surnamed "the Harp of the Spirit," author of commentaries on the Old Test., three hundred and sixty orations, a liturgy, a treatise on the sacrament of baptism, and a commentary on various interpreta- tions, paracletic sermons, and hymns (see Schönfelder, Hymnen, Proklamationen u. Martyrgesänge des Nestorius Breveers, in the Tübinger theol. Quartalschrifft, 1866, p. 177 sq.); Mar Abba (d. 552), who wrote a commentary on the Old Test. and a translation of the Old Test. from the Sept., the latter not extant; Abra- ham of Kashkar, author of epistles and a commentary on the dialectics of Aristotle; Paul of Nisibis, an exegetical writer; Babæus or Babi, surnamed "the Great," archimandrite of Nisibis in 583, a voluminous writer and author of On the Incarnation, an exposition of the mystical and ethical treatises of the Nestorians, hymns for worship through the circle of the year, an exposition of the sacred text, monastic rules, etc.; Iba, Kuma, and Proba, doctors of Edessa, who translated in the 5th century the commentaries of Theo- dore of Mopsuestia and the writings of Aristotle into Syriac; Hanna of Adiabene, an exegetical writer; Joseph the Huizote, a mystic; John Saba, author of epistles; John of Apsamoe, author of ascetical treatises. Famous as grammarians and lexicographers were Ho- main Ton-Ishak (d. 876), Bar-Abi (about 885), Bar-Bah- lul (about 983), and Elias bar-Shinaja (d. 1499).

Of the writers whose works were published, at least in parts, we mention Jesuabah of Adiabene, patriarch about 660, and author of Dhu-Huphok Chasubes, or On the Conversion or Change of Opinions, an exorcism to certain disciples, and a ritual; Thomas Margensis, about the middle of the 9th century, author of a history of the ascetical treatises of the Nestorian Church; George Geerinian: John bar-Abgora, patriarch about 900, and author of canons, Church questions, and decisions, in part given by Asseman; George, metropolitan of Arbel and Mosul, author of an explanation of the liturgy, by Asseman; and Timothy II, patriarch about 1316, author of a treatise on the Liturgy; John Chemnies, who also gives a more ethical work, The Book of the Bee, by Solomon, bishop of Bassora (about 1222), has lately been published with a Latin translation by Schönfelder, Salomonis Ep. Bas- sorensis Liber Apis, Syriacum Arboricumque textum Latina vertit (Bamberg, 1866); George Varda, two of whose hymns are given in an English translation by Badger, in his The Nestorians and their Rituals (Lond. 1852), ii, 51, 88, 95; Chamas bar-Kardache, whose hymn on the incarnation is also given by Badger (loc. cit. p. 39). The latest writer among the Nestorians was Ebed- Jesus (q. v.), metropolitan of Ctesiphon (1318).

After the 16th century, a great part of the Nestorians returned to the Church of Rome. From their midst a number of polemical writings in the Syriac language were published against the errors of their countrymen, as the Three Discourses on Faith, about the year 1900, by the Nestorian archbishop of Nisibis (Amida, called Timothy). These discourses are given by P. Strozza, in his De Dogmatibus Chaldeo- rum Disput. (Rom. 1817), and in Synodologia Chaldeo- rum (ibid.), where also the synodical letter of the patriarch Elias to Paul V, in a Latin translation, and the hymn of the patriarch John the first on Nestorius, are given. About 1700 the patriarch Joseph II wrote the Clear Mirror, parts of which are given by Asseman, and
in our days the Chaldæan priest Jos. Guriel published at Rome (1858) his Lectiones Dogmat. de Dvina Incarnatione. 2. The Monophysites.—Of this class of writers we mention John, bishop of Tella, whose canons were published by Lamy in De Syronum Fide in Re Eucharistica, p. 62–97 (see also Land, Anecdota Syriaca, ii, 169, and Cod. Mus. Brit. add. 12,174, fol. 122); Paul, bishop of Antioch, the first translator of Severus's writings, Xenæus or Philoxenus (q. v.), bishop of Hierapolis (Mabug), the author of a Bible translation, commentaries De Triinitate et Incarnatione et De Uno ex Triinato Incarnato et Passo (Jacob of Edessa calls Xenæus one of the four classic writers of Syria); Simeon, bishop of Luzara, who translated the Greek alphabet into Syriac; and Apollonius, martyred in the Bib. Orient., i, 346, 361; Peter of Callinicus (578–591), author of polemical works and hymns (see Cod. Mus. Brit. add. 14,591, p. 69); John of Ephesus (q. v.), an author of ecclesiastical history; Jacob of Edessa (q. v.), author of a revision of the Syro-Hexaplaric translation, fragments of which are given by Cérian in the 2d and 5th vol. of his Monumenta Sacra; besides, he wrote commentaries and scholia on the Holy Scriptures (published by Philips, Scholia in Passages of the Old Test. [Lond. 1661]), epistles (given in the Bibl. Oriental, i, 470, and by Wright, in the Jour. of State Affairs, Jan. 1827); and Jacob of Edessa, who published by Lagarde in the Dabc- 
ligues Juris Ecles. Syr. p. 117, and by Lamy, in De Syronum Fide in Re Eucharistica, p. 98); his essay on the Sham Manhemphorash was published by Nezle in the Zeitschrift der deutschen morgengesellschaft, 1878, iii, 465 sq.; he also introduced a more correct vocalization (see Martin, Jacques d'Edesse et les Vaggyles Syriennes [Paris, 1870]); George, bishop of the Arabs, in the beginning of the 8th century (see Lagarde, Analecta, p. 108–134); Dionysius, patriarch of Telmatarch, who, perusing the works of Eusebius, Socrates, and John of Ephesus, wrote annals from the Creation to A.D. 775, the date of the Consecration of the church; Dionysius Talmahres (Upalsa, 1850), lib. i; John of Mara (q. v.), author of four books on the resurrection of the body (extant), two books on the ecclesiastical and celestial hierarchies, four books on the priesthood, and a liturgy (see Zingerle, in the Thibinger theolog. Quartalschr., i, 1867, p. 193–205; 1866, p. 287–292; Monumenta Syriaca ex Rom. Collecta, i, 105 sq.; and Overbeck, loc. cit., p. 49); Moses bar-Cephass (q. v.), author of a commentary on the Paradise (published by Masius in a Latin translation at Antwerp in 1596); besides, he wrote on the hexameron, an exposition of the Old and New Testaments, a translation of Masius's Moses Barceph. 3 Libri Comment. de Paradiso ad Ignat. Lat. reed. is also found in the Bibl. Patr. Lugdun. xvii, 456; Dionysius bar-Chalib (d. 1171), commentator; of his commentaries only those on the four gospels are extant: he also wrote on the incarnation and sacraments (not extant), against certain heresies (not extant), and an oration and tracts on ordination, schism, and confession (extant); John of Marthin (d. 1165) (see the Bibl. Oriental, ii, 217 sq.); Jacob of Mai- perkin, author of a dogmatical work, The Book of Treasures, mentioned by Assemani, and an address to such as are to be ordained (given in part in a Latin translation by Denzing in his Ritus Orientalium in Administratis Sacram. [Würzburg, 1663], i, 106 sq.). The series of monophysitic writers is closed by a man who surpassed all his predecessors, namely, Gregory Abulfaraj bar-Hebræus. As the literature given under the name of the Chaldean Church which is generally attributed to Gregory has greatly increased, we give it here by way of supplement. As a historian, Bar-Hebræus proved himself in his chronicle, which is now complete in the edition by Abbelet and Lamy, Gregorii bar-Hebræi Chronicum Ecclesiasticum quod et Codices Musæi Britannici Descrip- tum. 3 vol. (Lips. 1836–38); bishop of Kapharlib, who in 1089 sent an apology of the monophysite doctrine to the patriarch of Antioch. But there is a controversy whether the patriarch of Antioch, John Maro, was a Catholic, monophysite, or a mystical person, and whether the Maronites were already orthodox before the Council of Ephesus, which was held under his name, the Metel Kukumotho, a treatise on the priesthood, and a commentary on the liturgy, are not his—a former becomes to John of Dara, the latter to Dionysius bar-Chalib. But there is no reason to deny him the authorship of the treatise on the facts of Chaldean history against Nestorians, which is preserved in a MS. dated 1392, and written in Syriac with an Arabic translation. III. Translations.—The translations made from the
Greek into Syriac are very numerous, especially of the writings of the apostolic fathers. The Syrians had both epistles of Clement of Rome to the Corinthians (see Lagarde, Clementi Epistulis Romani Recensuit, etc., [Lips. 1861?]; id. Clementina [ibid. 1865?]; Funk, Die syrische Ubersetzung der Clementbriefe, in the Theol. Quartalschrift, 1877, p. 477; and Hilgenfeld, Die Briefe des römischen Clemens und ihre syrische Uebersetzung, in the Zeitschrift für wissenschaft. Theol. 1877, xx, pt. 4). Of the works of Ignatius, who also was a martyr, as noted in the article, the controversy, the art. Ignatius of Antioch, and add Lipsius, Uber das Verhältniss der 3 syr. Briefe des Ignatius zu den übrigen Recens. der Ignat. Literatur (ibid. 1859), and Merx, Meletemata Ignatii (Breslau, 1858), are valuable.

A somewhat peculiar work is the Gnomologia mentioned by Origen, and ascribed to Sisitus I (in the beginning of the 2d century), published in Latin by Hilgenfeld in 1854 and by Siger in 1725. Lagarde has published it in the Syriac according to Nittian MSS. in his Analecta. Very important also are the contributions of the Syriac Church to the apologetic literature of the 2d century. In Cureton's Syriacum we find an oration of Melito of Sardis, written about A.D. 160 to Marc Aurel, in which he tries to show the folly of polytheism and seeks to gain him for the Christian faith. A collection of the orations of the second century was made by Wette, in the Tübinger Quartalschrift, 1862. Besides this oration, Cureton also gives some fragments from Melito's writings on the body and soul, on the cross and faith. In the same Syriacum we find another apologetic work, which is otherwise mentioned as the "oration to the Greeks" by Justin. The Syriac text ascribes it to Ambrose, a Greek. Fragments of a Syrian translation of Irenaeus are given by Pitra in the Spicilegium Solense Maneus (Paris, 1862), i, 3, 6.

The Nittian MSS. also contain much material pertaining to the works of Hippolytus, the author of the Philoegonion. But on this point there is a great difference of opinion. The "Philologus Romani que feruntur omnia Graece" [Lips. 1858], has collected the Syrian fragments in his Analecta, p. 79-91; and in his appendix ad Analecta sua Syriaca (ibid. 1858), he gives Arabic fragments of Hippolytus's commentary on the Apocalypse. As for the Syriac fragments, they contain an extract of Hippolytus's commentary on Daniel. Chapters viii and xii he refers to Persia, Alexander, and Antiochus Epiphanes; the four kingdoms (ch. ii. and xii) are the Babylonian, Persian, Macedonian, and Roman; the ten horns (ch. vii) he refers to ten kingdoms growing up. The emperor of which he speaks is evidently in Egypt, Ethiopia, and Libya—will be annihilated by the antichrist. Besides the commentary on Daniel, these fragments also contain a scholium on the authors, division, collection, and order of the Psalms, fragments of a commentary on the Song of Songs, also fragments of a treatise on the resurrection (in which the deacon Nicolaus is designated as the author of the Nicolaian) addressed to the empress Mammee, on the Passover, the four animals by Ezekiel, and the genealogy of Jesus Christ.

In Lagarde's Reliquiae Juris Eccles. Antiquissimae Syriacae (Lips. 1856), we also have the minutes of the Carthaginian Synod of 256, together with Cyprian's epistles and the Epistola Canonica of Peter of Alexandria in the Syrian version, while the Analecta by the same author contain Syriac writings and fragments of Gregory Thaumaturgus. A fragment of an epistle of Philip, Bishop of Wrestle, has been assigned to Compl. Commentarii in Lucem Evangelium (Oxford, 1858). Of the translations of Gregory of Nyssa and Chrysostom only a few fragments have been published (see Zingerle's Monumenta Syriaca, i, 111, 117). The Physiologia, erroneously ascribed to Basil, was published (1756) by Tychsen, Physiologia Syrius, seu Hist. Animalium xzzi in Sacra Scriptura Memoratorum. A part of the Paradise, an account of the acts and discourses of the most eminent Egyptian monks, erroneously ascribed to Palladius and Jerome, has been published by Dietrich, Cod. Syriacorum Spectamina, ut ad Illustrandam Doctrinam de Genere Sacrae, nec non Scripturas Syr. Historiam facient (Marburg, 1855).

After the 4th century the translations from Greek Church fathers gradually cease, because the Syrians from that time on either belong to the Nestorians or Monophysites. The Nestorians translated the writings of the Greek fathers of the 3d and 4th centuries, and the Monophysites from their writings (see Lagarde, Analecta), while Theodore's commentary on Genesis has lately been published by Sachae, Theodori Mozastreni Fragmenta Syrica, edidit atque in Lat. serm. vertit (Lips. 1869); the Monophysites translated Severus's writings, whose homilies were published by the archbishop of Constantinople, and later by Jacob of Edessa. Four visitation discourses of Severus are translated into Latin from the council, his decree against Arius, and the episcopal signatures to councils of the 4th century.

A great favorite with the Syrian translators was Eusebius, whose ecclesiastical history is preserved for the greatest part in London and St. Petersburg MSS. of the 5th and 6th centuries. Specimens of the Syriac translation were given by Cureton in the Corpus Ignatianum, in the Spicilegium and Ancient Documents, while Wight is preparing a Syriac edition. Of the Syriac Church, who also was a martyr, as noted in the article, the controversy, the art. Ignatius of Antioch, and add Lipsius, Uber das Verhältniss der 3 syr. Briefe des Ignatius zu den übrigen Recens. der Ignat. Literatur (ibid. 1859), and Merx, Meletemata Ignatii (Breslau, 1858), are valuable.

A somewhat peculiar work is the Gnomologia mentioned by Origen, and ascribed to Sisitus I (in the beginning of the 2d century), published in Latin by Hilgenfeld in 1854 and by Siger in 1725. Syriacorum Spectamina, ut ad Illustrandam Doctrinam de Genere Sacrae, nec non Scripturas Syr. Historiam facient (Marburg, 1855).

After the 4th century the translations from Greek Church fathers gradually cease, because the Syrians from that time on either belong to the Nestorians or Monophysites. The Nestorians translated the writings of the Greek fathers of the 3d and 4th centuries, and the Monophysites from their writings (see Lagarde, Analecta), while Theodore's commentary on Genesis has lately been published by Sachae, Theodori Mozastreni Fragmenta Syrica, edidit atque in Lat. serm. vertit (Lips. 1869); the Monophysites translated Severus's writings, whose homilies were published by the archbishop of Constantinople, and later by Jacob of Edessa. Four visitation discourses of Severus are translated into Latin from the
sacrament of "extreme unction" has gradually disappeared among the Nestorians, although there is no doubt that it existed at an early time, as may be seen from several allusions made to it by Ephrem (see also Cod. Vat. Syr. 119, p. 127-128)). The Jacobitic Ordo Lepadisus (as this sacrament is called by the Western Syrians), Denzinger gives after Trombetti Tractatus III de Extremitate (ibid. 1851), in the strong words of his excommunication, we may only add that the extensive Nestorian ritual for the burial of a priest is given in English by Badger (loc. cit. ii, p. 282 sq.), and in the Officiem Defuncorum, ed. Usam Morarumtor Gregorius XIII Impensa Chaldais Characteribus Impressum (Rom. 1685), we find under the rubric of each class of relics the prayer to the saint:

VI. The Breviary.—On this subject see, besides the breviaries, Badger (loc. cit. ii, 16-25), Dietrich (Commentario de Psalterii Usu Publico et Divisione in Ecclesia Syriaca [Marburg, 1862]), and the art. BREVIARY in this Cyclopaedia. The Nestorian office in its present form may be traced back to the 5th century. As early as the 5th century Theodul wrote on the mode of the recitation of the psalms in the office (q. v.). Narses wrote proclamations and hymns for the same, and Micha and Abraham of Bethraban treat of the Kathimaniata (q. v.) of the nocturn. In the 6th century, Marhas instituted the psalms (in Unum Not Chald, a psalms, while Babes arranged the hymns for the days of the saints and other festivals. In the 7th century, according to the testimony of Thomas Margensis, the Proarium de Tempore (chadra) was arranged by Jeejab of Adiabene, which occasionally was altered by the insertion of God's name in the hymns, until it received its final revision about 1250 in the monastery of Deir Eliaitha at Mosul.

For better understanding, it is necessary to know the division of the Psalter among the Nestorians, which almost corresponds to that of the Greek Church. The 150 Psalms are first divided into two halves, and the second half is added as the twenty-first the song of Exod. xvi and Deut. xxxii. The hulalas are again subdivided into fifty-seven (inclusive of Exod. xvi and Deut. xxxii, sixty) marmithas. Each marmitha is preceded by a prayer and succeeded by the Gloria Patri. The first psalm has an antiphon (canon) after the first verse, which serves very often to impress the whole with a specific Christian character. The psalms thus arranged were printed at Mosul in 1666 and twice at Rome, Psalterium Claldaisicum in Usum Nationis Chald. editum (1842), and Brevarium Chald. in Unum Not Chald. a Psalms, ed. J. Guriel, secundo editum (1865). As it is not the object of this article to give a description of the breviary, we here mention only, for such as are interested, Dietrich, Morgengebete der östlichen Kirche des Örients für die Früzelten (Leips. 1884); Tubkius de tenemeshata tantratia de jaumathak sheekime ve da star ve mithka Katha doklam vadebathar (Mosul, 1866); Schönfelder, in the Tübinger Quartalschrift, 1866, p. 179 sq.

The Western Syriac or Jacobitic office, with which the Maronite corresponds for the greater part, is distinguished not only from the Eastern Syriac, but also from all others, in not having the psalms as a main substance. The Jacobitic office is found in Breviariuq Feriale Syriacum SS. Ephraemi et Jacobi Syrorum juxta Ritum qudum Nationis, quod incipit a Feria II usque ad Sobotam inclusie; additis varios Hymnis ac Benedictioeum. Ab Athon. Sophar Episcopo Moro (Dietrich, ii. 1851). The Mass and Sunday office may be found in Officium Feriale juxta Ritum Ecclesiae Syrorum (ibid. 1851). The office for the Passion week was published by Chlodius from a Leipsic MS. in 1720, Liturgia Syriaca Septimanis Passionis Dom. N. I. Chr. excerptum e Cod. M. S. Biblioth. Lips. ed. ac notis illudatur. The Mass of the Passion is of sacred poetry. It was educated in the language and wisdom of Greece, and there can be no question that he would make his knowledge of the exquisite metrical compositions of that literature bear on the improvement of his own. This is said on

ibid. 1863), with an appendix containing the Officium Defunctorum and other prayers. An edition of the office was published on Mount Lebanon in 1855, Be shen abu va bera va vulia of Kudhaka allaha sharara tabeliin shekemetha akh ejeda de ita de Maronaje.

It may not be out of order to speak here of the Syrian Church lectionary. The MSS. of the Syriac New Test. are strange to the division of the books into chapters and verses, instead of which they divide the several books (except the Apocalypse) into reading-leasons of different lengths, but averaging about fifteen of our verses. Thus the first lesson (Matt. i, 1-17) is for the Sunday before Christmas; the second (ver. 18-25) is for Christmas; the third (ver. 1-12), vespers of Christmas; the fourth (ver. 13-18), matins of slaughter of the infants, etc. The four Gospels contain 248 lessons, of which seven are unappropriated or serve for any day, and the remaining 241 serve for 222 different occasions. The Acts and the Epistles (which are collectively called the Apostles) contain 242 lessons, of which twenty are unappropriated, and the remaining 222 serve for 241 occasions. On most of the occasions there was one lesson appointed from the Gospels, and one also from the Apostles. A tabular view of these lessons is given in the first appendix to Murdock's New Test. from the Syriac Peshito version (N. Y. 1869).

VII. Hymnology.—According to Hahn, the first hymnologist of the Syrians was the celebrated Gnostic Bardesanes, who flourished in the second half of the 2d century. In this he is in some degree supported by Ephrem in his Fifty-third Homily against Heretics (ii, 558), where, although he does not actually assert that Bardesanes was the inventor of measures, yet he speaks of him in terms which show that he not only wrote hymns, but also imply that at least he revived and brought into fashion a taste for hymnology:

For these things Bardesanes Utter in his writings,
He composed odes,
And mingled them with music;
He harmonized psalms
And introduced measures—
By measures and balances
He divided words.
He thus concealed for the simple
The bitter with the sweet.
For the ecky do not prefer
Food which is wholesome,
He sought to imitate David,
To adorn himself with his beauty
So that he might be praised by the likeness.
He therefore set in order
Psalms one hundred and fifty,
But he deserted the truth of David,
And imitated his natural
It is to be regretted that of the hymns of Bardesanes—which, it appears, in consequence of their high poetical merit, exercised an extensive influence over the religious opinions of the age in which he lived, and gave so much strength and popularity to his Gnostic errors—a very few fragments only remain. These fragments are to be found scattered through the works of Ephrem, for Bardesanes (see the excellent monograph by Hahn, Bardesanes Gnosticus Syrorum Primum Hymnologicum (Lips. 1819), who makes the following beautiful remark: “Gnosticism itself is poetry; it is not therefore wonderful that among its votaries true poets should have been found. Tertullian mentions the psalms of Valentinian, a very curious, his simple, a contemporary of Bardesanes, inculcated his Gnosticism in a song, in which he introduced the .Eos conversing” (loc. cit. p. 28).

Harmonius, the son of Bardesanes, stands next in the history of this subject, both chronologically and for his successors. He was a native of Mark, and was consecrated to the sacred poetry. He was educated in the language and wisdom of Greece, and there can be no question that he would make his knowledge of the exquisite metrical compositions of that literature bear on the improvement of his own. This is said on
in the Syriac tongue (which they identified with his own) was a necessary consequence of this adoption of the true belief: this opinion is mentioned as having been held by some of the Syrians in the 9th century. The second opinion (which does not appear to have been entertained by the translators) was that the translation was by Bar-Hebræus (or Bar-Hebraeus as some have supposed) to seem to have some connection with the formation of the Samaritan version of the Pentateuch. As that version is in an Aramean dialect, any one who supposed that it was made immediately after the mission of the priest from Assyria might say that it was then first that the Syriac translation was executed; if this might afterwards, in a sort of indefinite manner, have been connected with what the Syrians themselves used. James of Edessa (in the latter half of the 7th century) had held the third of the opinions mentioned by Bar-Hebræus, who cites him in support of it, and accords with it. It is highly improbable that any part of the Syriac version is older than the advent of our Lord, those who placed it under Abgarus, king of Edessa, seem to have argued on the theory that the Syrian people then received Christianity; and thus they supposed that a version of the Scriptures was a necessary accompaniment of such conversion. All that the account shows clearly is, then, that it was believed to belong to the earliest period of the Christian faith among them: an opinion with which all that we know on the subject accords well. Thus Ephrem, in the 4th century, not only cites the version as a current work, but gives this impression that this had even then been long the case. For in his commentaries he gives explanations of terms which were even then obscure. This might have been from age: if so, the version was made comparatively long before his day; or it might be from its having been cut off from the current from that to which he was accustomed at Edessa. In this case, then, the translation was made in some other part of Syria; which would hardly have been done unless Christianity had at such a time been more diffused there than it was at Edessa. The dialect of that city is stated to have been the purest Syriac; if so, the version was made for that place, it would no doubt have been a monument of such purer dialect. Probably the origin of the Old Syriac version is to be compared with that of the Old Latin [see Vulgate]; and it probably differed as much from the Polish as did that from the African province, from the contemporary writers of Rome, such as Tacitus. Even though the traces of the origin of this version of the Old Testament, if we but few, yet it is of importance that they should be marked; for the Old Syriac has the peculiar value of being the first version of the Bible, and, indeed, the only translation of the kind before that of Jerome which was made subsequently to the time when Ephrem wrote. This Syriac commentator may have termed it "our version" in contrast with all others then current (for the Targums were hardly versions), which were mere selections of the Greek and not of the Hebrew original.

3. Origin.—The proof that this version was made from the Hebrew is twofold: we have the direct statements of Ephrem, who compares it in places with the Hebrew, and speaks of this origin as a fact; and who, in fact, determined (as any Syriac writer prior to Bar-Hebraeus would) the thing we might expect from the internal examination of the version itself. Whatever internal change or revision it may have received, the Hebrew groundwork of the translation is unmistakable. Such indications of revision must be afterwards briefly specified.

From Ephrem having mentioned translators of this version, it has been concluded that it was the work of several: a thing probable enough in itself, but which could hardly be proved from the occurrence of a casual phrase, nor yet from variations in the rendering of the same Hebrew word; such variations being found in almost all translations, even when made by one person—that of Jerome, for instance; and which it would be almost impossible to avoid, especially before the time when concordances and lexicons were at hand. Variations in general phraseology give a far surer ground for this conclusion (see the Class. Journal, 1821, 245 sq.). From these various sources he constructed his text, with the aid of that found already in the Polyglots. Of course the corrections depended on the editor's own judgment; and the want of a specification of
SYRIAC VERSIONS

the results of collations leaves the reader in doubt as to what the evidence may be in those places in which there is a departure from the Polyglot text. But though more information might be desired, we have in the edition of Lee (Lond. 1822) a veritable Syriac text, from Syriac authorities, and free from the suspicion of having been formed in modern times by Gabriel Sioni- 
atum, which they are called the Targums. But we must here have in the MS. treasures brought from the Nitrian valleys the means of far more accurately editing this version. Even if the results should not appear to be striking, a thorough use of these MSS. would place this version on such a basis of diplomatic evidence as to compare with the Syriac and Targum or other Christian translation from the Hebrew was read in the 6th or 7th century, or possibly still earlier: we could thus use the Syriac with a fuller degree of confidence in the criticism of the Hebrew text, just as we can the more ancient versions of the New Testament for the criticism of the Greek.

In the beginning of 1849 the Rev. John Rogers, canon of Exeter, published Reasons why a New Edition of the Peshito, or Ancient Syriac Version of the Old Testament, should be published. There was a strong hope expressed soon after the issue of Canon Rogers’s appeal that the work would be formally placed in a proper manner in the hands of the Rev. Wm. Cureton, and thus be accomplished under his superintendence at the Oxford University press. Canon Rogers announced this in an Appendix to his pamphlet. This, however, has not been effected.

The only tolerable lexicon for the Old Testament, Peshito is Michaelis’s enlarged reprint of Castell (Gott. 1878, 2 pts. 8vo), for Bernstein did not live to publish more than one part of his long-expected lexicon. See Syriac Language.

5. Identity.—But, if the printed Syriac text rests on a sufficiently satisfactory basis, it may be asked, How can it be said positively that what we have is the same version substantially that was used by Ephrem in the 4th century? Happily, we have the same means of identifying the Syriac with that anciently used as we have of showing that the modern Latin Vulgate is substantially the version executed by Jerome. We admit that the common printed Latin has suffered in various ways, and yet at the bottom and in its general texture it is undoubtedly the work of Jerome: so with the Peshito of the Old Testament, whatever errors of judgment were committed by Gabriel Sionita, he at least used, and however little has been done by those who should have corrected these things on MS. authority, the identity of the version is too certain for it to be thus destroyed, or even (it may be said) materially obscured.

From the explanations of Ephrem, and the single words on which he makes remarks, we have sufficient proof of the identity of the version; even though at times he also furnishes proof that the copies as printed are not exactly as he read. (See the instances of accordance, mostly from the places given by Wiseman, Hor. Syr. p. 122, etc., in which Ephrem that it needful to compare with it, and the Peshito used in this version, or to discuss its meaning, either from its having been antiquated in his time, or from its being unused in the same sense by the Syrians of Edessa.

The proof that the version which has come down to us is substantially that used from the Latin in the 4th century is perhaps more definite from the comparison of words than it would have been from the comparison of passages of greater length; because in longer citations there always might be some ground for thinking that perhaps the MS. of Ephrem might have been contaminated later Syriac copies of the sacred text, while, with regard to peculiar words, no such suspicion can have any place, since it is on such words still found in the Peshito that the remarks of Ephrem are based. The fact that he sometimes cites it differ-ently from what we now read only shows a variation of copies, perhaps ancient, or perhaps such as is found merely in the printed text that we have.

6. Relations to other Texts.—It may be said that the Syriac in general supports the Hebrew text that we have; how far arguments may be raised upon minute coincidences or variations cannot be certainly known until the ancient Syriac versions are more accurately edited. Occasionally, however, it is clear that the Syriac translator read one consonant for another in the Hebrew, and translated accordingly; at times another vocalization of the Hebrew was followed.

A resemblance has been pointed out between the text of the Septuagint and the Targums. If the Targum is the older, it is not unlikely that the Syriac translator, using every aid in his power to obtain an accurate knowledge of what he was rendering, examined the Targums in difficult passages. This is not the place for formally discussing the date and origin of the Targums (q. v.); but if (as seems almost certain) the Targums which have come down to us are almost without exception more recent than the Syriac version, still they are probably the successors of earlier Targums, which by amplification have reached their present shape. Thus, if existing Targums are the contemporaries of the Syriac, it may happen that their coincidences arise from the use of a common source—an earlier Targum.

But there is another point of inquiry of more importance: it is, how far has this version been affected by the Sept., and to what are we to attribute this influence? It is possible that the influence of the Sept. is partly to be ascribed to copyists and revisers; while, in part, this belonged to the version as originally made. For, if a translator had access to another version while occupied in making his own, he might consult it in cases of difficulty; and thus he might unconsciously follow it in some points. Even keeping in view that a particular translation may affect the mode of rendering in another translation or revision. Thus a tinge from the Sept. may easily have existed in this version from the first, even though in whole books it may not be found at all. But when the extensive use of the Sept. is remembered, and how little it had been used before, it is superstitiously imagined to have been made by direct inspiration, so that it was deemed canonically authoritative, we cannot feel wonder that readings from the Sept. should have been, from time to time, introduced; this may have commenced probably before a Syriac version had been composed from the Hexaplar Greek text; because in such revised text of the Sept. the additions, etc., in which that version differed from the Hebrew would be marked that they would hardly seem to be the authoritative and genuine text. (See the article following.)

Some comparison with the Greek is probable even before the time of Ephrem; for, as to the apocryphal books, while he cites some of them (though not as Scripture), the apocryphal additions to Daniel and the books of Maccabees were not yet found in Syriac. Whoever translated any of these books from the Greek Eusipherous, who was contemporary with and then the places the texts previously translated from the Hebrew.

7. Recensions.—In the book of Psalms this version exhibits many peculiarities. Either the translation of the Psalms must be a work independent of the Peshito, or it has been corrupted to later Syriac copies of the sacred text, which, with regard to peculiar words, no such suspicion can have any place, since it is on such words still found in the Peshito that the remarks of Ephrem are based. The fact that he sometimes cites it differ-
SYRIAC VERSIONS

be found, if the subject could be fully investigated, that there were in the hands of different parties copies in which the ordinary accidents of transcription had introduced variations.

The Karkaphenian recension mentioned by Bar-Hebraeus was only known by name prior to the investigations of Wiseman; it is found in two MSS. in the Vatican.

In this recension Job comes before Samuel; and immediately after Isaiah the minor prophets. The Psalms succeed the minor prophets. The arrangement in the New Testament is quite as singular. It begins with the Acts of the Apostles and ends with the four Gospels; while the epistles of James, Peter, and John come before the fourteen letters of Paul. This recension proceeded from the Monophysites. According to Assemani and Wiseman, the name signifies the Monnoites, because it originated with those living about Mount Sagara, where there was a monastery of Jacobite Syrians, or simply because it was used by them. There is a peculiarity in the punctuation introduced by a leaning towards the Greek; but it is, as to its substance, the Peshito version.

The Syriac Version from the Hexaplar Greek Text.

—1. Origin and Character.—The only Syriac version of the Old Testament up to the 6th century was apparently the Peshito as above. The first definite intimation of a portion of the Old Testament translated from the Greek is through Moses Agathangelos. This Syriac writer lived in the middle of the 6th century. He made a translation of the Gospels of Cyril from Alexandria from Greek into Syriac; and, in the prefixed epistle, he speaks of the versions of the New Testament and the Peshito, "which Polycarp (rest his soul), the chorépiscopus, made in Syriac for the faithful Xuanis, the teacher of Marabba, worthy of the memory of the good" (Assemani, Bibliotheca Orientalis, ii, 88). We thus see that a Syriac version of the Psalms had a similar origin to the Philoxenian Syriac New Testament. We know that the date of the latter was A.D. 598; the Peshito was probably a contemporaneous work. It is said that the Nestorian patriarch Marabba, A.D. 592, made a version from the Greek; it does not appear to be in existence, so that, if ever it was completely executed, it was probably superseded by the Hexaplar version of Paul of Tela; indeed, it is said to have used it as the basis of its work, adding marks of reference, etc.

This version of Paul of Tela, a Monophysite, was made in the beginning of the 7th century, for its basis he used the Hexaplar Greek text—that is, the Sept., with the corrections of Origen, the asterisks, obeli, etc., and with it he made the Hexaplar version of the Greek text. The Greek text at its basis agrees, for the most part, with the Codex Alexandrinus. But it often leans to the Vatican, and not seldom to the Complutian texts. At other times it departs from all.

The Syro-Hexaplar version was made on the principle of following the Greek, word for word, as exactly as possible. It contains the marks introduced by Origen, and the references to the versions of Aquila, Symmachus, Theodotion, etc. In fact, it is from this Syriac version that we obtain our most accurate acquaintance with the results of the critical labors of Origen.

2. History.—Andreas Masius, in his editing of the book of Joshua (Antwerp, 1574), first used the results of this Syro-Hexaplar text; for, on the authority of a MS. in his possession, he revised the Greek, introducing asterisks and obeli, thus showing what Origen had done, how much he had inserted in the text, and what he had marked in the Hebrew. The Syriac MS. used by Masius has long been lost; though in this day, after the recovery of the Codex Reuchlini of the Apocrypha (from which Erasmus first edited that book) by Prof. Delitzsch, it could hardly be a cause for surprise if this Syriac Codex should again be found.

The Hexaplar version at Milan that we possess accurate means of knowing this Syriac version. The MS. in question contains the Psalms, Job, Proverbs, Ecclesiastes, Canticles, Wisdom, Ecclesiasticus, minor prophets, Jeremiah, Baruch, Daniel, Ezekiel, and Isaiah. Norberg published, at Lund in 1787, the Syriac text of the Apocrypha and the book of Daniel, the whole manuscript being transcribed from the manuscript which he had made of the MS. at Milan. In 1788 Bugati published at Milan the book of Daniel; he also edited the Psalms, the printing of which had been completed before his death in 1816; it was published in 1830. The rest of the contents of the Milan Codex (with the exception of the apocryphal books) was published at Berlin in 1835, by Middeldorpf, from the transcript made by Norberg; Middeldorpf also added the fourth (second) book of Kings from a MS. at Paris. Rördam issued Libri Judicium et Ruth secundum Versionem Syriacu-Hebraicam ex Codice Musei Bru- nense collatis (Amsterdam, 1712, 1740, 1755, 1808, 1847), and compiled Syriac-Hebraicus Illustratus (in two fasciculi, 1859, 1861, Copenhagen, 4to). A competent scholar has undertaken the task of editing the remainder—Dr. Antonio Ceriani, of Milan. In 1861 he published his Monumenta Sacra et Profana (Milan, tom. i, fascic. i, containing, among other ancient documents, the Hexaplar Baruch, Lamentations, and the Epistle of Jeremiah. In the preface the learned editor states his intention to publish, from the Ambrosian MS. and others, the entire version, even the books printed before, of whose inaccurate execution he speaks in just terms. A second part has since appeared. Besides these principal MSS., the MS. from the Nitrian monasteries now in the British Museum would add a good deal more: amongst these there are six from which much might be drawn, so that part of the Pentateuch and other books may be recovered. These MSS. are like that at Milan, in having the marks of Origen in the text, the references to readings in the margin; and occasionally the Greek word itself is thus cited in Greek. The following is the notation of these MSS., and their contents and dates:

12,138 (besides the Peshito Exodus), Joshua, defective, cent. vii. "Translated from a Greek MS. of the Hexaplas, collated with one of the Tetraplains."
12,134, Exodus. A.D. 697.
14,404, Psalms formed from two MSS. cent. viii (with the Song of the Three Children subjoined to the second). The Ruth MSS. are defective. Subscription, "According to the Sept."
14,457, Numbers and 1 Kings, defective (cent. vii or viii). The subscription to 1 Kings says that it was translated into Syriac from the Hebrew; in the Ruth the subscription is, "From the Tetraplains in the Sept."
17,108, Judges, Ruth, and 1 Samuel, defective (cent. vii or viii). Subscription to Judges, "According to the Sept.," to Ruth, "From the Tetraplains of the Sept."
Rördam published, at Copenhagen in 1699 the first portion of an edition of the MS. 17,108: another part has since been published by him in the book of Proverbs of these MSS. of the same century in which the same version was made. They may probably be depended on as giving the text with general accuracy.

C. Other Texts.—The list of versions of the Old Testament into Syriac of which appears to be very numerous; but on examination it is found that many translations, the names of which appear in a catalogue, are really either such as never had an actual existence, or else that they are either the version from the Hebrew, or else that from the Hexaplar text of the Sept., under different names, and that they all go to the same text. To enumerate the supposed versions is needless. It is only requisite to mention that Thomas of Harkel, whose work in the revision of a translation of the New Testament will have to be mentioned, seems also to have made a translation from the Greek into Syriac of some of the apocryphal books—at least, the subscriptions in certain MSS. state this. II. The Syriac New Testament Versions.—These may be conveniently enumerated under five heads, including several recensions under some of them, but treating separately the notable "Curetonian text." A. The New Testament, Curetonian text (text of Wilmswick, and Cureton's Gospels). In whatever forms the Syriac New Testament may have existed prior to the time
SYRIAC VERSIONS

of Philoxenus (the beginning of the 6th century), who caused a new translation to be made, it will be more convenient to consider all such ancient translations or revisiona together; for in this we may refer the statement of Eusebius respecting Hegesippus, that he "made quotations from the Gospel according to the Hebrews and the Syriac, τὰ τοῦ καθ᾽ Ἑβραίων ὡς εὐαγγέλιον καὶ τὸ Συριακὸν (Hist. Eccl. iv, 22). It seems equally certain that in the 4th century such a version was as well known as the Greek texts: it was published in a Latin translation in the 4th century, and was the companion of the Old Test. translation made from the Hebrew, and as such was in habitual use in the Syriac churches. To the translation in common use among the Syrians, orthodox, Monophysite, or Nestorian, from the 5th century and onward, the name of Peshito has been commonly applied in the New Test. as the Old. In the 7th century at least the version so current acquired the name of old, in contrast to that which was then formed and revised by the Monophysites.

Though we have no certain data as to the origin of this version, it is probable on every ground that a Syriac New Test. was current among the Monophysites of that of the Old; whatever therefore bears on the one, bears on the other also.

2. History.—There seem to be but few notices of the old Syriac version in early writers. Cosmas Indicopleustes, in the former half of the 6th century, incidentally informs us that the Syriac translation does not contain the Second Epistle of Peter, 2 and 3 John, and Jude. This was found to be correct when, a thousand years afterwards, this ancient translation became again known to Western scholars. In 1552, Moses of Mardin came to Rome to pope Julius III, commissioned by Ignatius, the Jacobite (Monophysite) patriarch, to state his religious opinions, to effect (it is said) a union with the Romish Church, and to get the Syriac New Test. printed. In this last object Moses failed both at Rome and Venice. At Vienna he was, however, successful. Widenmanns, the chancellor of the emperor Ferdinand I, and the Archbishops of the Syriac See, undertook the task of amending this version, to make it agree with the Greek copy extant. Others, finding in it indubitable marks of a later age, were inclined to deny that it had any claim to a very remote antiquity. Thus La Croze thought that the commonly printed Syriac New Test. is not the Peshito at all, but the Philoxenian executed in the beginning of the 6th century. The fact is, that this version as transmitted to us contains marks of antiquity, and also traces of a later age. The two things are so blended that, if either class of phenomena alone were regarded, the most opposite opinions might be formed. The opinion of Wettstein was one of the most perspicuous that could be devised; he found in this version readings which accord with the Latin; and then, acting on the strange system of criticism which he adopted in his later years, he asserted that any such accordance with the Latin was a proof of corruption from that version: so that with him the proofs of antiquity were taken for the marks of a later origin, and he thus assigned the translation to the 7th century. With him the real indications of later readings were only the marks of the very reverse. Michaelis took very opposite ground to that of Wettstein; he upheld its antiquity and authority very strenuously. The former point could be easily disposed of, by the examination of text and groundwork, but also the work of a reviser is manifest. Thus the judgment formed by Griesbach seems to be certain the correct one at to the peculiarity of the text of this version. He says (using the terms proper to his system of recensions): "Nulli harum recensionum Syriaca verae sunt, prout quiemque tuisca excusa est, similis verum tuisca simulacrum destinatum est. In multis concinnit cam Ali- alexandrina recensione, in pluribus cum Occidentali, in nonnullis etiam cum Constantinopolitanis, ita tamen ut in quacumque hanc posteriorius demum secula inuenta sunt, plerique repulsit. Diversa ergo tempora ad spectum codicis et alium tempora ad spectum etiam aliquem iter ad spectum (v. 8. 4. 1. 1. in Tex. Prolog. lxxxvii). In a note Griesbach introduced the comparison of the Codex Brixianus, "Illustrari hoc potest codicum nonnullorum Lati- norum exemplum, qui priscam quidem versionem ad Occidentalem accommodatam representant, sed passim ad juniores libros Graecos, "quod genere est Brixianus Codex Latinus, qui non raro a
SYRIAC VERSIONS

Greco-Latinis et vetustioribus Latinis omnibus solus dixit, et in Graecorum partes transit." Some proof that the text of the common printed Peshito has been re- thought will appear when it is compared with the Curetonian recension of the same passages.

4. Minor Revisions.—Whether the whole of this version proceeded from the same translator has been questioned. Not only may Michaelis be right in supposing a peculiar translator of the Epistle to the Hebrews, but also other parts may be from different hands; this opinion will become clearer the more the version is studied. The revisions to which the version was subjected may have succeeded in part, but not wholly, in effacing the indications of a plurality of translators. The Acts and Epistles seem to be either more recent than the Gospels, though far less revised; or else, if ever, far more corrected by later Greek MSS.

There is no sufficient reason for supposing that this version ever contained the four catholic epistles and the Apocalypse, now absent from it, not only in the printed editions but also in the MSS.

Some variations in copies of the Peshito have been regarded as if they might be styled Monophysite and Nestorian recensions; but the designation would be far too definite, for the differences are not sufficient to warrant the classification.

The MSS. of the Karkophanian recension (as it has been termed) of the Peshito Old Test. contain also the Nestorian Syriac translation of part of the Hebrew Bible, in the forms of words, etc., as seems to indicate that in the Peshito the phraseology had been revised and refined. But the great (it might be said characteristic) difference between the Curetonian and the Peshito gospels is in their readings; for while the latter cannot be presumed to have been uncorrected at the beginning of the 2d century, the former bears all the marks of extreme antiquity, even though in places it may have suffered from the introduction of readings current in very early times.

The following are a few of the very many cases in which the ancient reading is found in the Curetonian, and the later or transition reading in the Peshito. For the general authorities on the subject of each passage, reference must be made to the notes in critical editions of the Greek New Test.

Mett. xix, 17, τι με ἵπποι ἐπὶ τοῦ ἄγαλματος; the ancient MSS. reading, of the best and oldest copies of the Peshito, to regard all such variations as corruptions, and thus to stigmatize the Curetonian Syriac as a corrupt revision of the Peshito, barbarous in language and false in readings. This peremptory judgment is as reasonable as the statement that the Hebrew text of the Pentateuch were called ignorant version of the version of Jerome. The judgment that the Curetonian Syriac is older than the Peshito is not the peculiar opinion of Cureton, Alford, Tregelles, or Biblical scholars of the school of ancient evidence in this country, but it is also that of Continental scholars, such as Ewald, and apparently of the late Prof. Bleek.

The MSS. contain Matt. i-viii, 22; x, 31-xxii, 25; Mark, the four last verses only; John i, 1-42; iii, 6-vii, 37; xiv, 11-29; Luke ii, 48-iii, 16; vii, 33-xxx, 21; xvii, 24-xxiv, 41. It would have been a thing of much value if the ancient recension of the Peshito had come down to us; but as it is, we have reason greatly to value the discovery of Dr. Cureton, which shows how truly those critics have argued who concluded that such a version must have existed, and who regarded this as a proved fact, even when not only no portion of the version was known to be ancient, as the version of the Peshito, though the evidence was unnoticed. For there is a record showing an acquaintance with this version, to which, as well as to the version itself, attention has been directed by Dr. Cureton. Bar-Salibi, bishop of Amida in the 12th cen., in a passage translated by Dr. C. (in discussing the three kings in the genealogy in Matthew), says: "There is found occasionally a Syriac copy, made out of the Hebrew, which inserts these three kings in the genealogy; but afterwards it speaks of fourteen and not of seventeen generations, because fourteen generations has been substituted for seventeen by the Hebrew authorities, and the number of the generation of the "kings," in our MSS. (except Codices Vaticanus and Sinaiticus), and in many versions, including the Peshito, they are not in the Curetonian Syriac. Of a similar kind are Matt. xxvii, 55, 56 v.
SYRIAC VERSIONS

In Luke xxiv, the fourth verse is omitted, contrary to the Peshito and the most ancient uncial MSS. A, B, N. In Matt. xxii, 35, and John vi, the last verse is read by the Curetonian; but it is absent from the Peshito, which is supported by B and N. In vii, 29, the words "have we not eaten and drunk in thy name, and not sinned against thee?" are added without authority, but they are probably not independent, since the Curetonian text is common to both. In vii, 31, instead of the usual Greek text, it has "that shalt not be exalted in heaven, but shalt be set on the right hand of his majesty," a reading doubtless dependent on Luke xxiii, 36. In xi, 21, instead of the usual Greek text, it has "that he may be exalted in heaven, and before all names;" and in xii, 31, it has "with authority, and in the name of one all Greek with which it is not the usual practice to substitute in the form in which it was first made; we only possess a revision of it, executed by Thomas of Halkell in the following century (The Gospels, A.D. 616). Pocekke, in 1643, gives an extract from Bar-Salibi, in which the version of Thomas of Halkell is mentioned; and it seems that we do not know what version Thomas had made, he speaks of a Syriac translation of the Gospels communicated to him by some learned man whom he does not name, which, from its servility adherence to the Greek, was no doubt the Halkellian text. In the Bibliotheca Orientalia of Assemani there were further notices of the work of Thomas, and in 1730 Samuel Palmer sent from the ancient Amida (now Diarbekir) Syriac MSS. to Mr. Gloucester Ridley, in which the version is contained. Thus he had two copies of the Gospels, and one of all the rest of the New Testament, except the end of the Epistle to the Hebrews and the Apocalypse. No other MSS. appear to have yet come to light which contain any of this version beyond the Gospels. From the subscriptions we learn that the text was revised by Thomas with (some copies say two) Greek MSS. One Greek copy is similarly mentioned at the close of the Catholic epistles.

3. Hebrew Original of Matthew.—It is not needful for very great attention to be paid to the phraseology of the Curetonian Syriac in order to see that the Gospel of Matthew differs in mode of expression and various other particulars from what we find in the rest. This may lead us again to look at the testimony of Bar-Salibi; he tells us, when speaking of this version of Matthew, "there is found occasionally a Syriac copy made at the time when Bar-Salibi was alive. We know that the Syrians themselves in the 12th century was that this translation of Matthew was not made from the Greek, but from the Hebrew original of the evangelist; such, too, is the judgment of Dr. Cureton: "this Gospel of Matthew appears at least to be built upon the original Aramaic text," which was the work of the apostle himself" (Preface to Syriac Gospels, p. vi). We know from Jerome that the Hebrew Matthew had כְּשֶׁכָּנַע where the Greek has εἰπόταν. We do not find that word here, but we read for both εἰπόταν and σημύνων at the end of the verse, "constant of the day." This might have sprung from the interpretation, "morrow by morrow," given to כְָּשֶׁכָּנַע; and it may be illustrated by Old-Test. passages, e. g. Num. iv. 22, where the combination of these two words is made from Matthew's Hebrew we ought to find כְּשֶׁכָּנַע here forget that a translation is not a verbal trans- fusion. We know from Eusebius that Hegesippus cited from the gospel according to the Hebrews, and from the Syriac. Now in a fragment of Hegesippus (Routh, i, 219) there is the quotation, μακάριον οι Φαναρίων ορων ος εξ θεον ὤμοι αὐτοῦ ουδενας, words which might be a Greek rendering from Matt. xxiii, 16, as it stands in this Syriac gospel as we have it, or probably also in the Hebrew work of the apostle himself. From these and other particulars, Dr. Cureton concludes that in this version Matthew's gospel was translated from the apostle's Hebrew (Syro-Chaldaic) origin- nal, although injured since by copyists or revisers. The same view is maintained by the abbé Lebher (Etude, etc. [Par. 1859]); but it is vigorously rejected by Ewald (Jahrb. d. b. d. Wissensch., vol. ix) and many later critics.

C. The Phoenician Syriac Version, and its Revision by Thomas of Halkel.—Philo- xenus, or Xenais, bishop of Hierapolis or Mabug at the beginning of the 6th century (who was one of those Monophysites that subscribed the Henoticon of the emperor Zeno), caused Poly- carp, his choripaseph, to make a translation of the New Testament into Syriac. This was executed in A.D. 508, and it is generally termed Phoenician from its promotor. In one passage Bar-Hebræus says that it was made in the time of Phoenicus; in his Chronicon that it was done by his desire; and in another place of the same work that it was his own production. Michael Aghelaeus (Assemani, Biblioth. Oriental. ii, 83) states that its author was Polycarp, rural bishop of Phoenicus. In an Arabic MS., quoted by Assemani (ibid. ii, 23), Philemon is said by a Jacobite author to have translated the four Gospels into Syriac.

1. Hebrew Original of Matthew has not been transmitted to us in the form in which it was first made; we only possess a revision of it, executed by Thomas of Halkell in the following century (The Gospels, A.D. 616). Pocekke, in 1643, gives an extract from Bar-Salibi, in which the version of Thomas of Halkell is mentioned; and though we do not know what version Thomas had made, he speaks of a Syriac translation of the Gospels communicated to him by some learned man whom he does not name, which, from its servility adherence to the Greek, was no doubt the Halkellian text. In the Bibliotheca Orientalia of Assemani there were further notices of the work of Thomas; and in 1730 Samuel Palmer sent from the ancient Amida (now Diarbekir) Syriac MSS. to Mr. Gloucester Ridley, in which the version is contained. Thus he had two copies of the Gospels, and one of all the rest of the New Testament, except the end of the Epistle to the Hebrews and the Apocalypse. No other MSS. appear to have yet come to light which contain any of this version beyond the Gospels. From the subscriptions we learn that the text was revised by Thomas with three (some copies say two) Greek MSS. One Greek copy is similarly mentioned at the close of the Catholic epistles.
tioned whether these readings are not a comparison with the Peshito; if any of them are so, they have probably been introduced since the time of Thomas. It is all the more important, therefore, to refer to Usher's MS., and hence it has passed with the other editions of the Peshito, where it is a mere interpolation.

C. A copy of the same version (essentially) is found in Ridley's Codex Baroalii, which is attributed to Maras, 622; Adel found it also in a Paris MS. ascribed to Abba Mak, 593.

Bar-Salibi cites a different version, out of Maras, bishop of Amida, through the chronicle of Zacharias of Melitina. See Assemani (Biblioth. Orient. ii, 55 and 170), who gives the introductory words. Probably the version edited is that of Paul (as stated in the Paris MS.), and that of Maras, the one cited by Bar-Salibi, while in Ridley's MS. the two are confounded.

The Paul mentioned is apparently Paul of Tela, the translator of the Hexapla, Greek text into Syriac.

E. The Jerusalem Syriac Lecitionary.—The MS. in the Vatican containing this version was pretty fully described by S. E. Assemani in 1756 in the catalogue of the MSS. belonging to that library; but so few copies of that work escaped destruction by fire that it was virtually unpublished and its contents almost unknown. Adler, who, at Copenhagen, had the advantage of studying one of the few copies of this catalogue, drew public attention to this precious fragmentary document (Biblische und kirchliche Reise nach Rom (Altona, 1783), p. 118-127, and, still further, in 1789, in his valuable examination of the Syriac versions. The MS. was written in 1081 in peculiar Syriac writing; the portions are, of course, those for the different festivals, some parts of the MSS. not being there at all. The dialect is not common Syriac; it was termed the Jerusalem Syriac from its being supposed to resemble the Jerusalem Talmud in language and other points. The grammar is peculiar; the forms almost Chaldean rather than Syriac; two characters are used for expressing PH and F.

In Adler's opinion its date as a version would be from the 4th to the 6th century; but it can hardly be supposed that it is of so early an age, or that any Syriacs then had used so corrupt a dialect. It may rather be supposed to be translated from a more Greek lectionary never having existed as a native translation. To what age its execution should be assigned seems wholly uncertain. A further account of the MS. of this version, drawn up from a comparison of Assemani's description in the Vatican catalogue, and that of Adler's, is given in Horn's Introduct. iv, 284-287. The only complete passage published till recently was owing to Adler—viz. Matt. xxvii, 3-32; and scholars could only repeat or work upon what he gave. But the version has been published entire by Miniaschali Erizzo (Verona, 1864, 1864, 2 vols 4to; the first containing the text, with a Latin translation; the second, prolegomena and a glossary). Critical editors of the Greek Testament cannot now overlook this very valuable document, whose readings are so important. It contains the following portions of the Gospels: all Matthew except ch. xi, 23-31; Matthew chap. iii, ch. iii, 25-34; ch. iv, 15-37; ch. v, 1-29; ch. vi, 25-34; ch. viii, 15-35; ch. x, 9-15, 23-31, 34-36; xii, 16-26; xii, 29-35; xiii, 4-15, 43-58; xiv, 1-13, 35-84; xv, 1-20, 29-31; xvii, 1-12, 20-28; xviii, 20, 27; xviii, 5-9, 11, 21, 22; xix, 1, 2, 13-15; xix, 17-28; xxi, 4-46; xxii, 40-48; all Mark except i, 12-34, 40; ii, 13, 18-22; iii, 6-35; iv, v, 1-28, 30-35; v, 35-43; vi, 35-43; vii, 10-13, 24-45; vi, 1-22, 41-51; vii, 1-15, 31, 41-50; x, 1-31, 46-52; x, 21, 26-33; xii, 27; xiii, xv, 1-18; xix, 5-33; all Luke except i, 69, 75-77; iii, 23-38; iv, 1-15, 37-44; v, 12, 16-38, 39; vi, 11-16, 24-30, 37-49; vii, 17, 18, 30-35; viii, 22, 25, 40; ix, 7-25, 46-56; x, 13, 15-22, 24-24; xi, 26, 34-54; xii, 1, 13-29; xiv, 20-35; xiii, 15, 25-35; xiv, 1-10; xvi, 1, 9-16; xvii, 2, 9-20; xviii, 1, 15-17, 28-34; xix, 11-48; xx, 9-44; xxi, 5-7.
be translated as if it read יְהַדְוָשָׁתָה, like the reading of the Sam., Sam. vers., and Syr., which all followed the Sept.

99. יְאֵרָּה—Syr. יְאֵרָּה יְאֵרָּה; Syr. יְאֵרָּה יְאֵרָּה.
rect, we may go a step farther and say what holds good for the one must also be good for the other; or, in other words, the Syriac translator made use of the Sept. for the other books. And, indeed, Gesenius has produced a number of examples from the book of Isaiah to show that the Sept. was followed even in free and arbitrary interpretations (comp. his *Commentarii über den Jesaja*, I, 82 sq.); and, in like manner, Credner, who has minutely examined the minor prophets in his *De Prophetarum Marcionis Versionum Syriacam et Peshito vocant*, *Indice*, thinks that the Sept. was employed there. A similar result will be achieved in comparing the book of Jeremiah. Thus,

11. 35. *אַבּוֹת*—Sept. *αὐτρόνομα*; Syr. *βιρή*; both derive it from *אַבּוֹת*, instead of from *אַבּוֹ* (comp. also xvii. 12).

12. 34. *אַבּוֹת*—Sept. *אַבּוֹת*; Syr. *אַבּוֹ*; both probably reading *אַבּוֹ*.

14. *אַבּוֹת*—Sept. *אַבּוֹ*; Syr. *אַבּוֹ*; both regarded *אַבּוֹ* not as a proper noun, but as an Aramaic infinitive of *אַבּוֹ*.

16. *אַבּוֹת*—Sept. *אַבּוֹ*; Syr. *אַבּוֹ*; both regarded *אַבּוֹ* not as a proper noun, but as an Aramaic infinitive of *אַבּוֹ*.

17. *אַבּוֹת*—Sept. *אַבּוֹ*; Syr. *אַבּוֹ*; both regarded *אַבּוֹ* not as a proper noun, but as an Aramaic infinitive of *אַבּוֹ*.

It would be useless to adduce more examples for our supposition, since we do not write a dissertation, but for a cyclopaedia which, so far as the point in question is concerned, has treated that subject in such a full way as neither the introduction to the Old Test. nor cyclopaedias and dictionaries of the Bible have done before, if they ever touched this point fully.

There is yet another matter which we should not pass over, and to which, as it seems, little attention has been paid. We mean the titles of the Syriac psalms, which are found neither in the Hebrew nor in the editions of the Sept. The titles are partly historical, partly dogmatical; the former speak of David or the Jewish people, the latter of Christ and his Church. Now the question arises, if the Syriac translators really perused the Sept., as our supposition is, how is it that the titles found in the Syriac psalms are not to be met with in the Sept.? But the question is easily answered, when we consider the fact that these titles are not only found in the commentary of Eusebius, but also in the *Codex Alexandrinus*. From the latter they were reprinted in Walton's *Polyglott* (vol. vi, pt. vi, p. 137 sq.), and again by Grafe, in the fourth volume of his edition of the Sept. A comparison of the titles as found in the Alex. Codex with those in the Peshito shows that the dogmatical part of those titles are a later addition, otherwise we could not account for the omission in the Greek, if really the latter had copied the Peshito. Deducing these additions, the titles otherwise agree with each other. Thus the title of Ps. ii reads: *προφητεία περὶ Χρι-στοῦ καὶ λόγως ἰδεῶν*; Syr. ἀνενεχθα αὐτῷ υἱῷ θεοῦ.
We could thus go on with the other books of the Pentateuch, but our examples are sufficient to show that the priority belongs to the Chaldee of Onkelos, and not to the Peshito. Our supposition being correct, the assertions of those must fall to the ground who would put Onkelos in the 2d or 3d century. On the contrary, we believe that the Targum of Onkelos belongs to the time of Christ—provided the Syriac version of the Pentateuch belongs to the 1st century of the Christian era—and thus the notices concerning Onkelos which we find in the Talmud are confirmed anew. Our examples from the book of Genesis leaving it beyond a shadow of doubt as to the dependence of the Syriac version upon the Chaldee, the Chaldee of the book of Proverbs will prove this more fully. Thus we read:

We will not increase the quotations, but let the student examine passages like i, 6, 8, 10, 13, 15, 18, 21—23, 25, 30; ii, 1, 4, 10, 14, 17, 21; iii, 2, 4, 6—8, 12, 15, 19, 21, 25, 29; iv, 2, 8, 10, 11, 14, 18, 21—23, 25—27; v, 2, 4, 5, 7, 8, 10, 13, 16, 18, 21, 23; vi, 1, 2, 4—6, 13, 15, 17, 19, 26, 28, 34; vii, 2—4, 10, 16—18, 23—25; viii, 4, 6, 10, 12, 13, 20, 23, 25; ix, 4, 5, 11, 14; x, 5—5, 7, 9, 16, 22, 29, 31; xi, x, 7, 16, 14, 18, 21, 22, 26, 27; etc.—altogether more than 800 passages where he will find a striking similarity between these two versions.

Besides this similarity, there are a great many passages in which the Chaldee and Syriac deviate from the Hebrew, and the inner connection of both versions with each other can no longer be doubted. Thus Prov. i, 7, the Hebrew reads, "Weigh the precepts of the Lord"—i.e., "The fear of God is the beginning of wisdom," but the Chaldee reads, "Weigh the precepts of the Lord," i.e., "The beginning of wisdom is the fear of God," and so also the Syr. xxxi, 9, 16, and the Heb. reads, "The Lord has made all things for himself," the Chaldee paraphrases, "All works of God are for those who obey him;" and thus also the
SYRIAN CHURCHES

SYRIA

Syrians are the people of Syria, which is a country in Western Asia. Without increasing the number of such passages, we will adduce some in which both versions entirely give up the Masoretic text and follow another reading: thus Prov. 1:24, for the Chaldee reads יברעא יברעא, and so also the Syriac,/read יברעא יברעא, for the translation is וברעא וברעא, and so in the Syriac: ix:11, for the Chaldee reads יברעא יברעא, for the translation is וברעא וברעא, and in the Syriac יברעא יברעא. These examples, which could be increased greatly (comp. iii: 27; v: 4, 9, 19, 21; vii: 22, 23; viii: 8; ix: 11; x: 4, 26; xii: 4, 19, 21, 28; xiii: 15, 19; xiv: 14; xv: 4, 4: 19, 20; xx: 4, 30; xxi: 11, 16; xxiv: 5, 22; xxv: 20, 27; xxvi: 5, 7, 10; xxvii: 5, 11; xxix: 18, 21; xxx: 11; xxxi: 6), leave no doubt that the Chaldee and Syriac stand in a relation of dependence to each other.

But in speaking of a relation of these versions, it must not be understood as if they relate to each other as the original and copy, but this relation consists in that the author of the one version, in preparing the same passages in which the Chaldee follows the Masoretic text, while the Syriac deviates from it, as it is, 16; iii: 30; iv: 9, 10; v: 6, 7, 8, 10; vi: 9, 10; ix: 12, 18; x: 10, 12, 19, 24; xi: 55, 16, 24, 29; xii: 17, 23; xiii: 1, 10, 23; xiv: 7, 7, 14, 16, 17, 22, 30; xvi: 4, 9, 15; xvii: 1, 3, 6, 15; xvi: 1, 22, 29; xxiv: 14; xxv: 3, 19; xxvi: 2, 6, 30, 34; xxvii: 10, 26, 32, 58; xxvii: 11, 10, 18, 21, 23; xxvii: 2, 11, 13, 17, 19, 26; xxx: 15, 19; or from those passages in which the Syriac agrees with the Masoretic text against the Chaldee, as vi: 35; viii: 15; viii: 29; xx: 12; xxii: 5; xxii: 14; xxiv: 24; xxv: 30, 32; xxvi: 5, 7, 15, 16; xxvii: 9, 11, 12; xxviii: 4; xxviii: 11; xxviii: 1; xxxi: 3.

To these examples from the book of Proverbs we could also add a number of other books. Future investigations based upon these must show the tenability or otherwise of our assertion. See also Schönfelder, Onkelos and Peschito (München, 1869); Maybaum, Uber die Sprache des Targum zu den Sprüchen, und deren Verhältniss zu dem Alterthum und den Alterthümern in der christlichen, und der hebräischen Geschichte, Göttingen, 1792; Arndt, A. F.)

Syria-ma'achah (1 Chron. xix: 6). See Ma'achah.

Syrian (אֲרָמִי), Arammi, Gen. xxv: 20; xxvii: 8, 15; xxi: 20, 24; Deut. xvi: 5, 2 Kings v: 20; fem. אֲרָמִית, Arammiyáh, 1 Chron. vii: 14; "Aramites;" plur. masc. אֲרָמִר, Aramin, 2 Kings vii: 28, 39; xvi: 6; [where the text has שֵׁם אֲרָמִי, which the margin corrects to שֵׁם אֲרָמִי, Edomites:]; 2 Chron. xxii: 5; but "Syrians" is elsewhere the rendering of בָּרֵד, Arád, Αἰβαρέ, Luke iv: 27, an inhabitant either of Western Syria, i.e. on the Mediterranean (2 Kings v: 20), or of Eastern, i.e. Mesopotamia (Gen. loc. cit.). See Syria.

Syrian Churches, a general name for that portion of the Oriental Church which had its seat in Syria, and which is generally called the Church of Antioch and (after that of Jerusalem obtained a distinct jurisdiction) in the patriarchate of Jerusalem. The Syrian Church of the early centuries was exceedingly flourishing. Before the end of the 4th century it numbered 10,000,000; it had a Christian population of several millions. The first blow to the prosperity of the Syrian Church was the fatal division which arose from the controversies on the incarnation. See Eutyches; Jacobites; Monophysites; Nestorians. The Eu-

SYRTIS

the letters published from time to time by the French Society for the Propagation of the Faith, although natural and thronged with soul to her father for relief, and was
changed into a reed. Pan cut some stalks from it, joined
them together with wax, and used it, in the form known to us as Pan's-pipe, in remembrance of her
(Ovid, Metam., i, 690).

SYRNA, in Greek mythology, was a daughter of the river-god Lad, who, when pursued on account of her beauty by Pan, threw herself into a well, and was changed into a reed. Pan cut some stalks from it, joined them together with wax, and used it, in the form known to us as Pan's-pipe, in remembrance of her.

SYRNA, in Greek mythology, was a daughter of the Carian king Damasias. She fell from the roof of her house, and was restored by the art of Pothalius, who then married her, and built the city named after her in Caria.

Syro-Phoenician (Συμφοινικός, v. t. Συμφοινικός), a general name (Mark vii, 26) of a (female) inhabitant of the northern portion of Phoenicia, which was popularly called Syro-Phoenician, by reason of its proximity to Syria and its absorption by conquest into that kingdom, and the fact that a large number of people of Phoenician origin settled there. It is particularly interesting to the scriptural student on account of the woman who besought our Lord in behalf of her afflicted daughter, and the miraculous cure wrought by him on the latter. Matthew calls the woman a woman of Canaan (vii, 22), being in respect to her nationality, in contrast with the Phoenician woman of the preceding verse. Mark describes her as a Greek, a Syrophoenician by nation (vii, 26), but Rosenmüller rightly observes that the Jews called all Gentiles Greeks (Ἑλλήνες), just as the Greeks called all strangers barbarians. She was therefore a Greek, or Gentile, and a native of that part of Syria which belonged to Phoenicia. We have a curious instance of the interchange made in respect to the terms Canaanites and Phoenicians, of an earlier kind, in the case of Shaul, the son of Simeon, who is said in Genesis (xvi, 10), according to the Sept., to be the son of a Phoenician woman, and in Exodus (vi, 15), to be the son of a Canaanitish woman. The case of the Syrophoenician woman was a very singular one, both on account of the strong faith manifested on her part, and the exercise of divine grace and power in miraculous working by Christ beyond the proper sphere of his ordinary ministry. This particular text stands in a sort of affinity to the cases in Old Testament, history referred to by our Lord in Luke iv, 26, 27.

The invention of the words "Syro-Phoenicia" and "Syro-Phoenicians" seems to have been the work of the Romans, though it is difficult to say exactly what they were intended by the expressions. It has generally been supposed that they wished to distinguish the Phoenicians of Syria from those of Africa (the Carthaginians); and the term "Syrophoenician" has been regarded as the exact converse to "Libyphonician" (Alford, ad loc.). But the Libyphonicians are not the Phoenicians of Africa generally— they are a peculiar race, half-African and half-Phoenician ("mixtum Punicum Africi genus," Livy, xxxi, 22). The Syro-Phoenicians, therefore, should, on this analogy, be a mixed race, half-Phoenicians and half Syrians. This is probably the sense of the word in the narratives Lucilius (ap. Non. Marc. De Proprietat. Terr. iv, 431) and Juvenal (Sat. vii, 159), who would regard a mongrel Oriental as peculiarly contemptible. In later times a geographic sense of the terms superseded the ethnic one. The emperor Hadrian divided Syria into three parts—Syria Proper, Syria-Phoenice, and Syria-Palestina; and henceforth a Syro-Phoenician meant a native of this sub-province (Lucian, De Concord. Deor. § 4), which included Phoenicia Proper, Damascus, and Palmyrene (see Rawlinson, Herod. iv, 243 sq).

Syropolus (also Σωρόπολος, Σωρόπολος), Styvester, a writer on the history of the Council of Ferrara and Florence (1485 sq.), who himself took an active part in the discussions of the council, and was a determined opponent of the union between the churches of the East and West upon which the emperor, John Palaeologus, had set his heart. So far did he carry his opposition that he found it advisable to resign his place as one of the six delegates in the council, and came into violent antagonism with both the patriarch and the emperor. He yielded to the emperor's commands and threats, however, so far as to sign the decree of union which had been adopted, but afterwards deplored the weakness of his action. He was a legal officer (δικαίο
μάς) and a chief sacerdotum (μέγας ἱεραρχάρχης) at Constantinople, and was also one of the eyewitnesses and authorities on the patriarchs who were allowed to wear the badge of the cross upon their robes; but his want of firmness in the matter of the treaty of union with the Latin Church rendered him unpopular at home and thus caused him to retire from public life. He devoted his leisure to the composition of a "true history of the untrue union between the Greeks and the Latins," thereby excusing against himself the anger of the Latins and their friends in turn, so that Romish writers like Labbe and Alliatus class him unqualifiedly with Grecian liars and the worst sort of schismatics.

The work of Syropolus has been impressed with undiminished value as a source for the history of the Synod of Ferrara. It presents a credible view of events personally engaged in by the author, and defends a position actually represented in the council, besides revealing to view a series of connected and involved incidents which, but for its narration, could not have been known at this day. The later criticism of Alliatus may, nevertheless, have corrected some minor particulars of the narrative. The object of the book was to show that a real union was impossible, though the leaders on both sides, the pope, Bessarion, the patriarch, the emperor, etc., steadily drew nearer to each other, until the necessities of the case decided the result, which Syropolus justly characterizes as a compromise (μεσογείο) rather than a union. The final drafting of the terms of union involved extraordinary difficulties (sect. viii, 14). Book xii relates the disagreements of the Greeks while returning from the synod, and their discouraging reception at home.

The work is extant in a single edition based on a codex of the Bibliotheca Regia (N. 1247), from which Serrarius caused it to be copied in 1642 and sent to Isaac Vossius for publication; but Sir Edward Hyde, the English ambassador, caused it to be destroyed at the order of the French minister, as it was placed at the disposal of Robert Cuyghton, chaplain at the court of Charles II and, later, bishop of Bath. The latter issued the book in the original Greek and accompanied it with a Latin translation under the title Vera Hist. Uniamonum, etc. (Hague Comitis, 1669), besides prefixing to it a eulogy of Syropolus and of the Grecian theology and Church as compared with the papal, which rendered the work still more unpalatable to Romish readers. Alliatus accordingly prepared a refutation, directed more especially at Cuyghton, entitled In R. Cuygchton Apparatur, Versio
nem et Notae. (Frankfort, 1670); and Florence, (1671, pt. i). Cuyghton's edition and also the Paris codex are incomplete, as the whole of the first book is wanting; but several other manuscript copies of Syropolus exist, so that the deficiency may perhaps be met. See Cuyghton's preface, ubi sup.; Oudinii Comment. ii, 2418; Cave, Hist. Liturgica, iii, 1132; Schroth, xxxiv, 411. — Herzog, Real-Encyklop. s. v.

Syrtis (Σύρτης, "quicksands," Acts xxvii, 17). 17. There were quicksands on the coast of North Africa, between Cyrene and Carthage, whose shoals and eddies the ancient mariners greatly feared (Horace, Odys., I, 2, 99; Pliny, Nat. Hist., x, 78, 99; Strabo, ii, 4, 709); though the largest of these was named Syrtis Major, or Magna, and the lesser Syrtis Minor; and old geographers used to tell many marvels respecting them (Strabo, ii, 123;
| Syrus (Heb. Taanak) | 1 qip, sandy [Gesenius], or fortified [Fürst] | twice [Judg. xxi, 25; 1 Chron. vii, 29] more briefly Tanak, | 1 qip, A.V. “Taanah”; Sept. Θανακ or Θανακιν v. r. Θανακος, Θανακσ, etc., | an ancient Canaanitish city, whose king is enumerated among the thirty-one conquered by Joshua (Josh. xii, 21). Its exact limits or that of the half-tribe of Manasseh (xxii, 11; xxi, 25; 1 Chron. vii, 29), though it would appear to have lain within the original allotment of Issachar (Josh. xvi, 11). It was bestowed on the Kohathite Levites (xxi, 25). Taanach was one of the places in which, either from the strength of position, or from the ground itself, it being unfavorable for the mode of fighting, the aborigines succeeded in making a stand (xxvi, 12; Judg. i, 27); and in the great struggle of the Canaanites under Sisera against Deborah and Barak it appears to have formed the Headquarters of their army (Judg. v, 15). After some defeat the Canaanites of Taanach were probably made, like the rest, to pay a tribute (Josh. xviii, 18; Judg. i, 28); but in the town they appear to have remained to the last. Taanach is almost always named in company with Megiddo, and they were evidently the chief towns of that fine, rich district which forms the western portion of the great plain of Esdraelon (1 Kings iv, 12). It was known to Eusebius, who mentions it twice in the Onomasticon (Θανακιν and Θανακος) as a “very large village” standing between three and four Roman miles from Legio—the ancient Magdido. It was known to hap-Parochi, the Jewish medical traveller, and it still stands about four miles south-east of Lebbon, retaining its old name with hardly the change of a letter. Schubert, followed by Robinson, found it in the modern Ta‘annak, now a mean hamlet on the south-east side of a small hill, with a summit of table-land (Schubert, Morgenland, iii, 101; Robinson, Bibl. Res. iii, 156; Bibl. Sacra, 1845, p. 76; Schwarz, Palest., p. 149). The ancient town was planted on a large mound at the termination of a long spur or promontory, which runs out northward from the hills of Maunass into the plain, and leaves a recess or bay, subordinating to the main plain on its north side, and between it and Lebbon (Van de Velde, i, 358). Ruins of some extent, but possessing no interest, encompass it (Porter, Handbook, p. 371). The houses of the present village are mud huts, with one or two stone buildings (Ridgeway, The Lord’s Land, p. 588). Taanah. See TANANH-SHILOH.

Taanah-Shiloh. (Heb. Taanath’ Shiloh), תןנח שילה, Taanath [Gesenius; approach; Fürst, circle] of Shiloh, so called probably from its vicinity to that place; Sept. Θανακ Σελω v. r. Θυνακα and Σελωνα, a place mentioned (Josh. vi, 6) as situated near the northern border of Ephraim at its eastern end between the Jordan and the Dan. See Taanah. With this agrees the statement of Eusebius (Onomast., s. v.), who places Jananah twelve and Trench ten Roman miles east of Neapolis. It is probably the Thinea (Θυνα) mentioned by Ptolemy (Geog. v, 16, 5), one of the chief cities of Samaria, in connection with Neapolis. In the Talmud (Jerusalem Megillah, i), Taanath-Shiloh is said to be identical with Shiloh, a statement which Kurz (Gesch. des Alt. Bundes, ii, 70) understands as meaning that Taanath was the ancient Canaanitish name of the place, and Shiloh the Hebrew name, conferred on it in token of the “rest” which allowed the tabernacle to be established there after the conquest of the country had been completed. But this is evidently conjecture arising from the probable proximity of the two places. Taanah-of-Shiloh is probably the He Taana seen by Robinson north-east of Meledel (Later Res. iii, 235), and by Van de Velde (Memoir, p. 121, although erroneously marked Meraja ed-Din on his map), about a mile from the road between Acrabi and Meledel, consisting of “a small tell with a ruin, on the first lower plateau into which the Ghor descends.”

Taanith. See TALMUD.

Taba‘oth (Taba‘oth, i.e. little, rings [Gesenius], or spots [Fürst]; Sept. Taba‘oth v. r. Taba‘oth, also Taba‘oth, one of the Nethinim whose descendants or family returned from Babelon with Zerubbabel (Exra ii, 43; Neh. vii, 46). B.C. ante 536.

Tabbath (Heb. Tabbath, תבאת, perh. celebrated [Gesenius]; Sept. Tabbath v. r. Tabbath, a place mentioned in describing the flight of the Midianitish host after Gideon’s night attack; they fled to Beth-shittah, to Zererah, to the brink of Abel-meholah on (תבאת) Tabbath (Judg. vii, 22). As all these places were in or near the Ghör, Tabbath is probably the present Tubbah-filalh, i.e. “Terrace of Fahl,” a very striking natural bank, 600 feet in height, with a long horizontal and apparently flat top, which is embanked against the western face of the mountains east of the Jordan, and descends with a very steep front to the river (Robinson, Bibl. Res. iii, 295).

Tab'eil (Isa. vi, 6). See TABEL, i.

Tab'eil (Heb. Tabel, תבאל, in pause Tab'al, Tabel, Isa. vii, 6, A.V. “Tabal”), God is good: Sept. Tabbah, the name of two men. See also TABEL.

1. The father of the unnamed person on whom Rezin, king of Syria, and Pekah, king of Israel, proposed to bestow the crown of Judah in case they succeeded in detoothing Ahaz (Isa. vii, 6). B.C. ante 738. Who “Tabel’s son” was is unknown, but it is conjectured that he was some factious and powerful Ephraimite (perhaps Zichri, 2 Chron. xxviii, 7), who promoted the war in the hope of this result—Kittot. The Aramaic form of the name [see TABBAMON], however, has been thought to favor the supposition that he was a Syrian in the army of Rezin. The Targum of Jonathan renders the name as an appellativi, “and we will make king in the midst of her him who seems good to us” (טבאל טבאלא תvenile). Rashi by Gematria turns the name into הַﬠָלָה, Rima, by which apparently he would understand Remuliah.
2. An officer of the Persian government in Samaria in the reign of Artaxerxes (Ezra iv, 7). B.C. 519. It has been argued that he, too, was an Arab, from the fact that the letter which he and his companions wrote to the king was in the Syrian or Aramaic language. Geniius, (LXX, i, 290), states that he may have been a Samaritan.

Table·lius (Ταβλιεύ), a Greekized form (1 Esdr. ii, 16) of the Heb. name (Ezra iv, 7) Targel (q.v.).

Tab·erah (Heb. Taberah', תָּבְרָה, consumption; Sept. ταβεραίων), a place in the wilderness of Paran; so called from the fact that "the fire of Jehovah burned" (יִשְׁמֶש) among the Israelites there in consequence of their complaints (Num. xl, 3). It lay at the next station beyond Horeb, and must therefore be sought somewhere in Wady Saal. See EXOD. Keil argues (Comment. ad loc.) from the expression that it was "in the uttermost part of the camp," and from the omission of the name in Numbers, that he places it adjacent to the station Kibroth-hattaavah next named; but he overlooks the fact that both these are separately mentioned in Deut. ix, 22.

Taber·ing (תֹּבְרִיה; Sept. φιλόγγυρες; Vulg. murrmurantes), an obsolete word used in the A.V. of Nah. ii, 7 in the sense of drumming, or making regular sounds. The Hebrew word is derived from תֹּבְר, "a timbrel," and the image which it brings before us in this passage is that of the women of Nineveh, led away into captivity, mourning with the plaintive tones of doves, and beating on their breasts in anguish, as women beat upon their timbrels (comp. Ps. cviii, 25 [26], where the same verb is used). The Sept. and Vulg., as above, make no attempt at giving the exact meaning. The Targum of Jonathan gives a word which, like the Hebrew, has the meaning of "tymanopote". The A.V., in like manner, reproduces the original idea of the words. The "tabour" or "tabor" was a musical instrument of the drum type, which with the pipe formed the band of a country village. We retain a trace at once of the word and of the thing in the "tabourine" and "tambourine" of modern languages; in the "tabor" of the A.V. and older English writers. To "tabour," accordingly, is to beat with loud strokes as men beat upon such an instrument. The verb is found in this sense in Beaumont and Fletcher, The Tamer Tamed ("I would tabor her"), and answers with a singular felicity to the exact meaning of the Hebrew. See PLUMPTE, BIBLE EDUCATOR, iv, 210.

Tabernacle is the rendering, in the A.V. of the following Heb. and Gr. words: 1. מִשְׁכָּן, ἡ τέντα, the most frequent term, but often signifying and rendered a common "tent"; 2. כְּפֵרוֹת, mischkaná, the distinctive term, always so rendered, except ("dwelling") in 1 Chron. vi, 32; Job xvi, 21, xxvi, 28; xxxix, 6; Ps. cvii, 8; xlix, 11; lxxxv, 7; lviii, 2; Isa. xxxii, 19; Jer. ix, 19; xxx; li, 30; Ezek. cvi, 4; Heb. i, 6; ("habitation") 2 Chron. xxvii, 6; Ps. lxxixvii, 28; cxvii, 5; Isa. xxxii, 16; lvii, 2; ("tent") Cant. i, 8; 3. νάπαν (once ναπαν, Lam. ii, 6), σκέπα, σκέπασμα (Rev. xxii, 3; Deut. xvi, 13, 16; xxxvi, 10; 2 Chron. viii, 13; Ezracia iii, 4; Job xxvii, 29; Isa. iv, 6; Amos iv, 11; Zech. xiv, 16, 18, 19), or σχηματισμὸς, σχηματισμός (Amos v, 26), meaning a booth, as often rendered; 4. σκηνή, σχήνα (2 Cor. v, 1, 4), or σκηνώμα (Acts vii, 46 [rather habitation]; 2 Pet. i, 13, 14), a tent. Besides occasional use for an ordinary dwelling, the term is specially employed to designate the first sacred edifice of the Hebrews prior to the time of Solomon; fully called תֹּבְרִיה וּמִשְׁכָּן, the tent of meeting, or (especially in Neb. מַעֲרָשָׁה תֹּבְרִיה וּמִשְׁכָּן, tabernacle of the congregation (Sept. σκηνή [1 Kings xvi, 8, 26], 4, 5, σχήνα), τοῦ μαρτυρίου; Phil., Ἰνδον φαντάσμα, Opf. ii, 146; Ἰσραήλ, μεταφανάμων καὶ σχηματισμο-
EL-Kade still clings to the walls of Jerusalem. See Temple.

5. הֵקְדוֹל, temple (ya‘ag, templum), as meaning the stately building, or palace of Jehovah (1 Chron. xxix, 1, 19), is applied more commonly to the Temple (2 Kings xxiv, 18, etc.), but was used also (probably at the period when the thought of the Temple had affected the religious nomenclature of the time) of the tabernacle at Shiloh (1 Sam. i, 9; iii, 9) and Jerusalem (Psa. v, 7). In either case the thought which the word embodies is that the “tent,” the “house,” is royal, the dwelling-place of the great king. See Temple.

The first two of the above words receive a new meaning in combination with מַשֵׁר (mashër), and with מְשָׁרָה (masharāh). To understand the full meaning of the distinctive titles thus formed is to possess the key to the significance of the whole tabernacle.

(a) The primary force of מַשֵׁר is “to meet by appointment,” and the phrase מַשֵׁר לִשֵׁר (mashēr lishēr) has therefore the meaning of “a place of or for a fixed meeting.” Acting on the belief that the meeting in this case was that of the A. V. in the case the tent has uniformly rendered it by “tabernacle of the congregation” (so Sch. Schmidt, “tentorium conventūs;” and Luther, “Stiftshütte” in which Stift = Pfarrkirche), while the Sept. and Vulg., confounding it with the other epithet, have rendered both by ἡ συνεσθή τω μαρτύριον, and “tabernaculum locus testimonii.” None of these, however, ever, brings out the meaning of the word. This is to be found in what may be called the locus classicus, as the interpretation of all words connected with the tabernacle. This shall be a continual burning-offering “at the door of the tabernacle of meeting (מֵשָׁרָה) where I will meet you (מַשֵׁר לִשֵׁר) to speak there unto thee. And there will I meet (מַשְׁרָה, מְשָׁרָה) with the children of Israel. And I will sanctify (מִשָּׁרָה) the tabernacle of meeting and I will dwell (מַשְׁרָה) among the children of Israel, and will be their God. And they shall know that I am the Lord their God” (Exod. xxix, 44–46). The same central thought occurs in xxxv, 22, “There I will meet with thee” (comp. also xxx, 6, 36; Numb. xvii, 4). It is clear, therefore, that “congregation” is inadequate. Not the gathering of the worshipers, but the meeting of God with his people, to commune with them, to make himself known to them, was what the name embodied. Ewald has accordingly suggested Odenbargiust = tent of the congregation, as the best equivalent (Alterthümer, p. 190). This made the place a sanctuary. Thus it was that the tent was the dwelling, the house of God (Bähr, Symb. i, 81). See Congregation.

(b) The other compound phrase, מְשָׁרָהּ לִשֵּׁר (masharāh lishēr), as connected with מֵשֶׁר (to bear witness), is rightly rendered by ἡ συνεσθή τω μαρτύριον, tabernaculum testimonii, die Wohnung des Zeugenmess, “the tent of the testimony” (Numb. ix, 18) “the tabernacle of witness” (xxv, 8, 9). In the Greek it derives its name from that which is the centre of its holiness. The two tables of stone within the ark are emphatically the testimony (Exod. xxxv, 16, 21; xxxi, 18). They were to all Israel the abiding witness of the nature and will of God. The tent, by virtue of its relation to them, became the witness of it as being the meeting-place of God and man. The probable connection of the two distinct names, in sense as well as in sound (Bähr, Symb. i, 83; Ewald, All. p. 230), gave, of course, a force to each which no translation can represent. See Testimony.

II. History.—1. We may distinguish in the Old Testament three sacred tabernacles.

(1) The Ante-Sinaitic, which was probably the dwelling of Moses, and was placed by the camp of the Israelites in the desert, for the transaction of public business probably from the beginning of the Exodus. This was constructed by Bezaleel and Aholiah as a portable mansion-house, guildhall, and cathedral, and set up on the first day of the first month in the second year after leaving Egypt. Of this alone we have accurate descriptions. It was the type of the sacred tent, and most important, is called the tabernacle par excellence.

Moses was commanded by Jehovah to have it erected in the Arabian desert, by voluntary contributions of the Israelites, who carried about it with them in their migrations until after the conquest of Canaan, when it remained stationary and all the other sacred objects of the national religion were removed to it. (2) The Sinaitic tabernacle superseded the tent which had been the centre of the transaction of public business.

(3) The Davidic tabernacle was erected by David, in Jerusalem, for the reception of the ark (2 Sam. vi, 12); while the old tabernacle remained to the days of Solomon at Gibeon, together with the brazen altar, as the place where sacrifices were offered (1 Chron. xvi, 29; 2 Chron. i, 3).

2. Varied Fortunes of the Sinaitic Tabernacle. (1) In the Wilderness.—The outward history of the tabernacle begins with Exod. xxv. It comes after the first great group of laws (ch. xix–xxiii), after the covenant with the people, after the vision of the divine glory (ch. xxiv). For forty days and nights Moses is in the mount. Before him there lay a problem, as measured by human judgment, of gigantic difficulty. In what fit symbols was he to embody the great truths without which the nation would sink into brutality? In what way could those symbols be guarded against the evil which he had seen in Egypt, of idolatry the most degrading? He was not left to solve the problem for himself. There rose before him, not without points of contact with previous associations, yet in no degree formed out of them, the “pattern” of the tabernacle. The lower analogies of the past and the external art of the nearer eastward eye, their completed work before the work itself begins, may help us to understand how it was that the vision on the mount included all details of form, measurement, materials, the order of the ritual, the apparel of the priests. He is directed in his choice of the chief artists, Bezaleel and Oholiah, as the chief architect of the tribe of Dan (ch. xxxi). The sin of the golden calf apparently postpones the execution. For a moment it seems as if the people were to be left without the Divine Presence itself—without any recognised symbol of it (xxxiii, 3). As in a transition period, the whole future depended on the presence of the people, the intercession of their leader, a tent is pitched (probably that of Moses himself, which had hitherto been the headquarters of consultation), outside the camp, to be provisionally the tabernacle of meeting. There the mind
of the lawgiver enters into ever-closer fellowship with the mind of God (ver. 11), learns to think of him as "merciful and gracious" (xxiv, 6), in the strength of that mind, is led back to the place which had seemed likely to end, as it began, in vision. Of this provisional tabernacle it has to be noticed that there was as yet no ritual and no priesthood. The people went out to it as to an oracle (xxxiii, 7). Joshua, though of the tribe of Ephraim, had free access to it (ver. 13). Another outline law was, however, given; another period of solitude, like the first, followed. The work could now be resumed. The people offered the necessary materials in excess of what was wanted (xxxvi, 5, 6). Other workmen (ver. 2) and workwomen (xxxv, 20) placed thereunto, and the third year of Bezanah, the son of Abihail; ^ and Aholiah. The parts were completed separately, and then, on the first day of the second year from the Exodus, the tabernacle itself was erected and the ritual appointed for it begun (xi, 2).

The position of the new tent was itself significant. It stood, not, like the provisional tabernacle, at a distance from the camp, but in its very centre. The multitude of Israel, hitherto scattered with no fixed order, were now, within a mouth of its erection (Numb. ii, 2), grouped round it, as around the dwelling of the unseen Captain of the Host, in a fixed order, according to their tribes and their families. In the east, and the other three families of the Levites on the other sides, were closest in attendance, the "body-guard" of the Great King. See Levite. In the wider square, Judah, Zebulon, Issachar, were on the east; Ephraim, Manasseh, Benjamin, on the west; the less conspicuous tribes, Dan, Asher, Naphtali, on the north; Reuben, Simeon, Gad, on the south side. When the army put itself in order of march, the position of the tabernacle, carried by the Levites, was still central, the tribes of the east and south in front, those of the north and west in the rear (ch. ii). Upon it there rested the symbolic cloud, dark by day and fiery-red by night (Exod. xvi, 9). When the cloud removed, the host knew that it was the signal for them to go forward (ver. 36, 37; Numb. i, 17). As long as it remained—whether for a day, or month, or year— they continued where they were (ver. 15-23). Each march, it must be remembered, involved the breaking-up of the camp, all the parts being carried on waggons by the three Levitical families of Kohath, Gershon, and Merari, while the "sons of Aaron" prepared for the removal by covering everything in the Holy of Holies with a purple cloth (iv, 6-15). See ENCAMPMENT.

In all special facts connected with the tabernacle, the original order of the two tables isomerous men meet with God. There the Spirit "comes upon" the seventy elders, and they prophesy (Numb. xii, 24, 25). Thither Aaron and Miriam are called out when they rebel against the servant of the Lord (xii, 4). There the "glory of the Lord" appears after the unfaithfulness of the twelve spies (xvi, 10) and the rebellion of Korah and his company (xvi, 19, 42) and the sin of Meribah (xx, 6). Thither, when there is no sin to punish, but a difficulty to be met, do the daughters of Zelophehad come to bring their cause "before the Lord" (xxvii, 2). There, when the deserts of Moses draw near, is throned the "great shepherd who meets his flock" (Deut. xxxii, 14).

(2.) In Palestine.—As long as Canaan remained unconquered, and the people were still therefore an army, the tabernacle was probably moved from place to place, wherever the host of Israel was for the time encamped— at Gilgal (Josh. iv, 19), in the valley between Bethel and Gerizim (xiii, 17, 34); and, lastly, at the head-quarters of Gilgal (ix, 6; x, 15, 40); and, finally, as at "the place which the Lord had chosen," at Shiloh (ix, 27; xvii, vii, 1). The reasons of this last choice are not given. Partly, perhaps, its central position, partly its belonging to the powerful tribe of Ephraim, the tribe of the great captain of that period. The Sanhedrin deterred there. It continued during the whole period of the judges, the gathering-point for the "heads of the fathers" of the tribes (xix, 51), for councils of peace or war (xxii, 12; Judg. xxi, 13), for annual solemn dances, in which the worship of Jehovah, and, like the ἱεροδολοχια of heathen temples, concubines of his priests (1 Sam. ii, 22). It was far, however, from being what it was intended to be, the one national sanctuary, the witness against a localized and divided worship. The old religion of the high-places kept its ground. Altars were erected, at first under protest, and with reserve, as being not for sacrifice (Josh. xxii, 20), afterwards freely and without scruple (Judg. vi, 26; viii, 21). When under the one special sanctuary was known at this period, those of the "house" and the "temple" of Jehovah (1 Sam. i, 9, 24; iii, 8, 15) are most prominent.

A state of things which was rapidly assimilating the worship of Jehovah to that of Ashtaroth or Mylitta needed to be broken up. The ark of God was taken, and the sanctuary lost its glory; and the tabernacle, though it did not perish, never again recovered it (1 Sam. iv, 22).

Samuel, at once the Luther and the Alfred of Israel, who had grown up within its precincts, treats it as an abandoned shrine (so Ps. lxvi, 60), and sacrifices elsewhere (1 Sam. iii, 18). He therefore himself (ch. xi, 2; xii, 3), at Gilgal (ver. 8; xi, 15). It probably became once again a movable sanctuary; less honored, as no longer possessing the symbol of the Divine Presence, yet cherished by the priesthood, and some portions at least of its ritual kept up. For a time it seems, under Saul, to have been settled at Nob (xxi, 10), which thus became what it had not been before—a priestly city. The massacre of the priests and the flight of Abiathar must, however, have robbed it yet further of its glory. It had before lost the ark. It now lost the presence of the high-priest, and with it the oracular ephod, the Urn and Thummim (xxi, 22; xxiii, 6). What change of fortune then followed we do not know. The fact that all Israel was encamped, in the last days of Saul, at Gilboa, and that there Saul, though without success, inquired of the Lord by Urim (xxvi, 4-6), makes it probable that the tabernacle, as of old, was in the encampment, and that Abiathar had retained it. In some way or other it found its way to Gideon (1 Chron. xxi, 30). The anomalous separation of the two things which, in the original order, had been joined brought about yet greater anomalies, and while the ark remained at Kirjath-jearim, the tabernacle at Gibeon connected together as a symbol of the union of Israel (Kings iii, 4). The capture of Jerusalem, and the erection there of a new tabernacle, with the ark, of which the old had been deprived (2 Sam. vi, 17; 1 Chron. xvi, 1), left it little more than a traditional, historical sanctity. It retained only the old air of burnt-offerings (1 Chron. xxvi, 17). As such it was, however, neither king nor people could bring themselves to sweep it away. The double service went on; Zadok, as high-priest, officiated at Gideon (1 Chron. xvi, 39); the more recent, more prophetic service of psalms and hymns and music, under Asaph, gathered the solid rest of Israel (1 Chron. v, 22). The divided worship continued all the days of David. The sanctity of both places was recognised by Solomon on his accession (1 Kings iii, 10; 2 Chron. i, 3). But it was time that the anomaly should cease. As long as it was simply tent against tent, it was difficult that there should be distinct Purposes, David, fulfilled by Solomon, was that the ark and the tabernacle of both should merge in the higher glory of the Temple. Some, Abiathar probably among them, clung to the old order, in this as in other things; but the final day at last came, and the tabernacle of meeting was either taken down or left to perish as fit for forgetfulness. So a page in the religious history of Israel was turned in the catastrophe of the disaster of Shiloh led to its natural consumption.
III. Description.—The written authorities for the restoration of the tabernacle are, first, the detailed account to be found in Exod. xxvi, and repeated in xxxvi, 8–38, without any variation beyond the slightest possible abridgment; secondly, the account given of the building by Josephus (Ant. iii, 6), which is so nearly a repetition of the account found in the Bible that we may feel certain that Josephus had no real knowledge of the tabernacle before him except the one which is equally accessible to us. Indeed, we might almost put his account on one side if we were not that, being a Jew, and so much nearer the time, he may have had access to some traditional accounts which may have enabled him to realize its appearance more clearly than we can, and his knowledge of Hebrew technical terms may have assisted him to understand what we might otherwise be unable to explain.

The additional indications contained in the Talmud and in Philo are so few and indistinct, and are, besides, of such doubtful authenticity, that they practically add nothing to our knowledge, and may safely be disregarded.

For a complicated architectural building, these written authorities probably would not suffice without some remains or other indications to supplement them; but the arrangements of the tabernacle were so simple that the greater part of what was very important dimension was either five cubits or a multiple of five cubits, and all the arrangements in plan were either squares or double squares, so that there is, in fact, no difficulty in putting the whole together, and none would have ever occurred, were it not that the dimensions of the sanctuary, as obtained from the "boards" that formed its walls, appear at first sight to be one thing, while those obtained from the dimensions of the curtains which covered it appear to give another. The apparent discrepancy is, however, easily explained, as we shall presently see, and never would have occurred to any one who has only seen a canvas tent or was familiar with the exigencies of tent architecture.

The following translation of Exod. xxvi will set the subject generally before the reader. We have indicated, by the use of italic, marked variations from the A. V.:

1. And the tabernacle (תַּנֵךְ) thou shalt make—tent curtains: twisted linen, and violet and purple and crimson; and fine twined work (of artificer) thou shalt make them. (The length of the one curtain (shall be) eight and twenty by the cubit, and (the breadth) four cubits, and (the height) of the curtain: one curtain (shall be) to all the curtains. Five of the curtains shall be joined equal to one fellow, and a sixth curtain at the joint of the fellow. 2. And thou shalt make loops (תַּנֵךְ) of violet upon the edge of the one curtain from the end in the joining, and so shalt thou make in (the edge) of all the curtains. 3. And thou shalt make in the second joining: fifty loops shalt thou make in the one curtain, and fifty loops shalt thou make in the end of the curtain which is in the second joining, the loops standing opposite (תַּנֵךְ). 4. And thou shalt make curtains of goats' hair (צֶבָּה) for a tent (תַּנֵךְ) upon the tabernacle, eleven curtains shalt thou make them. (The length of the one curtain (shall be) thirty by the cubit, and (the breadth) four by the cubit, the one curtain: one measure (shall be) to (the) eleven curtains. And thou shalt join five of the curtains separately, and six of the curtains separately; and thou shalt double the sixth curtain forward (תַּנֵךְ). 5. Forefront of the tent. And thou shalt make fifty loops upon (the edge) of the one curtain—the endmost in of the curtains—fifty loops upon the edge of the curtain. 6. The second joining. And thou shalt make taches of white rams' skins put as taches in the loops, and thou shalt join the tent, and (it) shall be one. And the overplus hang in (the curtains of the tabernacle) upon the overplus, upon the tabs. 7. And the back of the tabernacle; and the curtain from this (side) and the curtain from that (side) in the overplus in (the curtain) that is (over) the back of the tabernacle. And the curtain from this (side) and from that (side), to cover it.

TABERNACLE

chahukim, rendered "fillets," i.e. ornamental chaplets in relief round the pillar (so Ewald, Altertämner, p. 335, note 5), but most probably meaning rods (so Genesius, Fürst, and others), joining one pillar to another. These rods were laid upon the hooks, and served to attach the hangings to and suspend them from. The hooks and rods were silver, though Knobel conjectures the latter must have been merely plated (Exod. p. 278). The mode of adjusting these hangings was similar to that of the doorway screens and "vail" described below.

The circumference of the enclosure thus formed was 300 cubits, and the number of pillars is said to have been 20 + 20 + 10 + 10 = 60, which would give between every two pillars a space of \(\frac{200}{60} = 5\) cubits. There has been considerable difficulty in accurately conceiving the method adopted by the writer in calculating these pillars. This difficulty arises from the corner pillars, each of which, of course, belongs both to the side and to the end. It has been supposed by many that the author calculated each one corner pillar twice; that is, considered it, though one in itself, as a pillar of the side and also as a pillar of the end. This would make in all 56 actual pillars, and, of course, as many spaces (Bihler, Knobel, etc.); that is, nineteen spaces on each side, and nine on the end. Now since the side was 100 cubits and the end 50, this would give for each side space \(\frac{100}{5} = 5\) cubits, and for each end space \(\frac{50}{5} = 10\) cubits, spaces artificial in themselves and unlike each other. It is certainly most probable that the spaces of side and end were of exactly the same size, and that each of them was some exact, and no fractional, number of cubits. The difficulty may be completely removed by assuming the distance of 6 cubits to each space, and counting as in the accompanying ground-plan. Thus, since each side was 100 cubits, this needs twenty spaces. But twenty spaces need twenty-one pillars. So that, supposing us to start from the south-east corner and go along the south side, we should have for 100 cubits twenty-one pillars and twenty spaces; but of these we should count twenty spaces and pillars for the south side, and call the south-west corner pillar, not the twenty-first pillar of the side, but the first of the end. Then going up the end, we should count ten pillars and spaces as end, but consider the north-west corner pillar not as eleventh of the end, but first of the north side; and so on. In this way we gain sixty pillars and as many spaces, and have each space exactly 5 cubits.

The hangings (נֵּפְרָא עַלְתָּם, belaltam) of the court were of twined shesh; that is, a fabric woven out of twisted yarn of the material called shesh. This word, which properly means white, is rendered by our version "fine linen," a rendering with which most concur, while some decide for cotton. At all events, the curtains were a strong fabric of this glancing white material, and were hung upon the pillars, most likely outside, though that is not known, being attached to the pillars at the top by the hooks and rods already described, while the whole was stayed by pins and cords, like a tent.

The entrance, which was situated in the centre of the east end, and was twenty cubits in extent, was formed also of a hanging (technically נִפְרַע, maedek) of "blue, purple, and scarlet, and fine twined linen, work of the כּּלָל, rokem" (A. V. "needle-work"). The last word has usually been considered to mean embroiderer with the needle, and the curtain fancied to have had figures, flowers, etc., of the mentioned colors wrought into it. But such kinds of work have always a "wrong" side, and, most probably, taking into account the meaning of the word in Arabic, and the fondness of the Arabs at this day for striped blankets, the word means "weaver of striped cloth," and the hanging is to be conceived as woven with lines or stripes of blue, purple, and scarlet

Plan of the Tabernacle and its Court. (From Riggenbach's Mosaische Stifthütte.)

Large enclosure—Court (open overhead). Small enclosure—the Tabernacle (covered). a. Ark in the Holy of Holies. b. Table of show-bread. c. Golden candlesticks. d. Altar of incense—b, e, f being in the holy place. e. Laver, or basin for washing. f. Altar of burnt-offering. g. Gate or ledge around this altar for the priests to stand upon. h. Sloping ascent from the ground to this ledge. (The last two articles are in the court.)
Planks on their Bases (according to the common view).

ter deeply into the ground, as there was no lateral strain upon them, and the whole weight of the building kept them firmly in their place. Their only object was to keep the bottom of the planks level and even. The upper ends of the planks, however, needed to be kept from separating, as they would certainly do under the traction of the stay-cords fore and aft. Hence the tenons mentioned in Exod. xxvi, 17 are carefully distinguished from those (already described) referred to in ver. 19, and they are designated (without any sockets assigned to them) by a peculiar term, נַחַלְתָּב, meshullathoth, which occurs here only. It is regarded by Gesenius as radically signifying notched, but he understands it here as meaning joined, a sense in which Furst and Mithlau emphatically concur, to the exclusion of that adopted by the Sept. (ditionurur) and the A. V. ("in an order"). Prof. Paine refers the term to the top of the planks, and renders it clasp'd, understanding a separate plate with holes corresponding to pins or tenons (probably all of copper) in the upper end of the planks likewise, as in the annexed cut.

This is an essential provision for the stability of the structure, of which no one else seems to have thought. Nevertheless, as he privately informs us, he has since abandoned this distinction between the top and bottom tenons, and in his forthcoming second edition he will dispense with the clasps. The long middle bar, if pinned to each end plank, would subserve a similar purpose. Something of this sort is perhaps intimated by the bolting (בּלַהְיֹן, בַּלְתִּיָּה) of Exod. xxvi, 28: xxxvi, 33. The roof-curtains would likewise assist in holding the planks together.

Of these boards, which, being one and a half cubit, i.e., about two and a half feet broad, must have been formed of several smaller ones jointed together, there were twenty on the north and twenty on the south side, thus making each side the length of thirty cubits. For the west end were made six boards, yielding nine cubits, and in addition two boards for the corners (Exod. xxvi, 9–22 sq.), making in all eight boards and twelve cubits; and as the end in thought (so Josephus, Ant. iii, 6, 3) to have been ten cubits (proportionate to that in Solomon's Temple, 1 Kings vi, 2, 20), this would imply that each corner plank added half a cubit to the width, but nothing to the length, the measurements being taken inside. Were the planks supposed a cubit thick, which is the usual way of describing an extra (see account of the weight), the remaining cubit of the corner plank would exactly cover the thickness of the side plank. The description given of the corners is exceedingly perplexing, and the diversity of opinion is naturally great. The difficulties all lie in Exod. xxiv, 24. It goes on, "they shall be coupled together," rather, they shall be "twins," or "twinned" (בּלַהְיֹן, תַּדְמִים). "They" evidently refers to the corner planks; and, setting aside the idea that they make twins together, which cannot

Sockets of the Tabernacle Court, and their Position under the Boards.

talent of silver. Whether these sockets were wedge-shaped or pointed, and themselves went into the ground; or whether they were mere foot-plates for the Bottom of the Corner Planks, shown as resting upon the Bases (according to Paine). Socket of the Tabernacle Court, and their Position under the Boards. Planks on their Bases (according to the common view).
be, since they are at opposite corners, the expression may mean that each corner plank of itself makes twains, which it would do if it had two legs containing the angle between them. If the corner plank be two-legged, it adds necessarily something to the length, and thus destroys the measurement. One explanation is therefore to regard the end of the corner plank, e, as twin, i.e., corresponding to the side plank a. Further, each corner plank must be "entire ("," tamthin") or on its head" (A. V., with many others, considers " tamthin the same as " todain)". Now if the "head" be not the top of the plank, but the edge or point of the corner, f, then the statement implies that the corner plank of the end wall, though prolonging the side wall outside, must not be cut away or sloped, for example, in the fashion indicated by the dotted lines e d. Once more, the words are added "unto one ring," accurately "unto the first ring." Keil (Comment. ad loc.) understands that "the two corner boards at the back were to consist of two pieces joined together at a right angle, so as to form, as double boards, one single whole from the top to the bottom," and that "one ring was placed half-way up the upright board in the corner or angle, in such a manner that the central bolt, which stretched along the entire length of the walls, might fasten into it from both the side and back." Murphy (Comment. ad loc.) suggests a form which we represent by the annexed figure. But Paine's arrangement, as in the cut below, seems to us to meet all the requirements of the case in the simplest and most effectual manner. The ring and staples at the top and bottom of the corner planks formed a hinge, so that the adjoining planks were laced or carried together as one. That the end planks went in between the last side planks (as neatness and usage in such structures dictated), making the interior width of rows of bars, the top and bottom one on each of the sides being in two pieces. Josephus's account is somewhat different: "Every one," he says (Ant. iii, 6, 3), "of the pillars or boards had a ring of gold affixed to its front upwards, into which were inserted bars gilt with gold, each of them five cubits long, and these bound together the boards; the head of one bar running into another after the manner of one tenon inserted into another. But for the wall behind there was only one bar that went through all the boards, into which one of the ends of the bars on both sides was inserted." The whole edifice was doubtless further stayed by ropes attached to tent-pins in the ground from knobs on the outside of the planks. (See below.)

3. Drapery of the Tabernacle.—The wooden structure was completed as well as adorned by four kinds of hangings, each of which served a useful and even needful purpose.

(1) The Roof.—The first question that arises here is whether the roof was flat, like that of Oriental houses, or peaked and slanting, as in Occidental buildings. The
The Tabernacle as restored by Ferguson.

old representations, such as Calmet’s, take the former view; but to this it may be forcibly objected that it would in that case be impossible to stretch the roof-covering sufficiently tight to prevent the rain and snow from collecting in the middle, and either crushing the whole by its weight or flooding the apartments. Hence most later writers assume a peaked roof, although there is no mention of a ridge-pole, nor of supports to it; but the name “tent” given to the upper part of the edifice is itself conclusive of this form, and then these accessories would necessarily follow.

The roofing material was a canvas of goats’ hair, the article still employed by the Bedawin for their tents. It consisted of eleven “curtains” (עֵגֶבּ), i.e. breadths or pieces of (this camel) cloth, each thirty cubits long and four cubits wide, which is as large, probably, as could well be woven in the loom at once. Ten of these were to be “coupled” (דּוֹעֵב), i.e. sewed together, five in one sheet, and five in another, evidently by the selvage; thus making two large canvases of thirty cubits by twenty each. But as the building was only twelve cubits wide, one of them alone would more than suffice for a roof, even with a peak. Hence most interpreters understand that the surplus width was allowed to hang down the sides. But what is to be done with the other sheet? Ferguson (in Smith’s Dict. of the Bible, s. v. “Temple”) supposes (with interpreters in general) that the two sheets were thrown side by side across the ridge-pole, the extra length (some fifteen cubits) being extended at the eaves into a kind of wings, and the surplus width (ten cubits) furled along the slope of the gable, or perhaps stretched out as a porch. But there is no authority whatever for this disposal; and if the two pieces of canvas were intended to be thus adjoined, there appears no good reason why they should not have been sewed together at the first, like the individual breadths. Hence Paine suggests that they were designed as a double roof, so as the more effectually to shed rain, somewhat in the manner of a “fly” or extra roof to a modern tent. For this the size is exactly adequate. If the angle at the peak were a right angle, as it naturally would be, the gable, of course, being an isosceles triangle, eight and a half cubits would be required for each slope of the roof (they being the two legs of which twelve is the hypotenuse); thus leaving one cubit to cover each of the eaves (as specified in ver. 13), and one cubit for seams, and perhaps hems. The seams, in order to be water-tight (especially since they ran parallel with the ridge and eaves) as well as smooth, would best be formed by overlapping the edges, in shingle style.

The sixth “curtain,” or extra single piece, was to be “doubled in the fore-front of the tabernacle” (xxvi, 9, פַּרְקֹתָן אֶל הָעִבְרָדִים), which interpreters generally have understood as meant to close the gable. This, as Paine suggests, it would neatly do if folded in two thicknesses (like the rest of the goat’s-hair cloth) across the lower part of the rear open space above the boards, as it is just long enough (twelve fifteen cubits; the surplus three cubits being employed exactly as in the case of the other sheets), and sufficiently wide (four cubits up the six of the perpendicular; leaving only a small triangle at the peak for ventilation); the gores or corners probably being tucked in between the two thicknesses of the roof-sheets. This sixth curtain, of course, was sewed endwise to one of the outer pieces of the under canvas.

These roof-curtains were joined by means of fifty “loops” (אֲבַרֹת, lōdah) of unspecified (probably the same strong) material, and as many taches (תּוֹפֵס, kerayim) of “brass.” With most interpreters, Ferguson understands these to be intended for connecting the

The Tabernacle as restored by Paine.
boards and prevent any one from looking through the cracks from without. These curtains were suspended on fifty knobs or taches of gold by means of fifty loops of the same material as the curtains themselves; these fastenings may be arranged as in the case of the roof-canvas. It thus became "one tabernacle" (ver. 6, הָעָרָבָא הָעָרָבָא, i.e. these curtains belonged to the upright [wooden] part of the structure, in distinction from the sloping [canvas] or "tent" part above it). The material of these inner curtains was similar to that of the door of the outer court (xxvii, 16), but it was also to be embroidered with cherubim, like the interior "vail" (xxvi, 31), which will be considered below.

3. A coat of "ram's" skins dyed red and tachash (A. V. "badgers," probably seal or some other fur) skins was furnished as an additional covering (xxvi, 14, רָמָּה, milledolah, from upward). This is usually regarded as a part of the roof; but to pile them there would have been sure to catch the rain, and so prove worse than useless. Paine places them on the outside of the "boards" to hide the cracks and prevent the wind and rain from driving in. Hence the number of skins is not specified; they were to form a blanket sufficiently large to cover the walls, and run up under the edge of the roof-canvas so as to catch the drip from the eaves. Doubtless the tachash fur was placed next the smooth gilding, and in its natural state, because hidden; and the rougher but more durable ram's-wool was exposed, the hair shingling downward to the weather, but dyed a brilliant color for effect. They would naturally be hung upon the copper taches, which served so many useful purposes in the "boards." They are called in ver. 14 "a covering (רָמָּה, misketh, not necessarily a roof, for it is used only of this fur robe or some similar one, Numb. iv, 8, 12) and of the screen [whatever that may have been] of Noah's ark [Gen.

---

The Inner Curtains according to Paine.

Face and Section of the "Boards" of the Tabernacle, showing their varied Attachments. (After Paine.)
ter Table, apparently as completing the canvas or tent-like part of the structure.

Salaehutza (Arch. der Hebräer, ii, 321 sq.) represents the hangings of the tabernacle as suspended in the form of a tent, but in a peculiar form. He thinks the יִנָּה יִנָּה was properly so called, was reared in the form of a peaked tent. Of this the byssus curtains, he supposes, formed the internal drapery, while the goats'-hair curtains, covered with leather and tachash skins, formed the outer covering. The whole structure would thus present the appearance externally of a peaked tent, reared within a high palisse of wood, and open at the front. This representation has the advantage of allowing the ornamental curtain, and also the gilt boards with their golden rings and silver sockets, to be fully visible. There seems, however, at least one fatal objection to it, viz. that it does not fulfill the condition that the joinings of the curtains shall be over the pillars that separate the holy from the most holy place—a condition of essential significance, as we shall see.

(4.) The doorways of the tabernacle were formed or rather closed in a manner altogether analogous to the entrance of the exterior court, namely, by a vertical screen or sheet of cloth made of heavy material, and in one case (rarely) still further stiffened by embroidery, similar to the piece of tapestry that hangs at the portal of modern cathedrals in Italy, or (to speak more Orientally) like the flap at the opening of a modern tent and the carpet or camlet partition between the male and female apartments of a Bedawin abode. Of these there were two, each of which is denoted by a distinctive term rarely varied.

(a) The front opening (םָחַת, pëkchak; A.V. "door") was closed sufficiently high to prevent a passer-by from looking in, by a "hanging" (םָחַת, musâk, a screen, or "covering") from the sun [Ps. cxxi, 17] or from observation (2 Sam. vii, 19; Isa. xxii, 8) of materials exactly like that of the entrance to the court already described, suspended upon five copper-sOCKETED and gilt pillars יִנָּה יִנָּה of acacia-wood by means of golden hooks יִנָּה יִנָּה, pegs, spoken only of these and those at the outer entrance), the whole being probably of the same height, proportions, and style in other respects as the exterior one. The number of the pillars is significant: as there were five of them, one must necessarily stand in the centre, and this one was probably carried up so as to support one end of the ridge-pole, which we have above seen is presumable. A corresponding pillar in the rear of the tent may be inferred to sustain the other end, and possibly one or more in the middle of the building.

(b) A "vail" (םָחַת, pàròketh, separatrux, used only of this particular thing, sometimes [Exod. xxxiv, 12; xxxix, 34; xl, 21] with the addition of the previous term for emphasis) divided the interior into two apartments, called respectively the "holy place" and the "most holy." This partition-cloth divided only from the exterior ones in being ornamented (parchment on both sides; comp. 1 Kings vi, 29) with figures of cherubim stitched (probably with gold thread, i.e. strips of gold-leaf rolled and twisted) upon it, apparently with the art of the embroiderer (םָחַת, הַעֲשָׂרְךָ, the work of an artist; A.V. "cunning work"). It was suspended upon four pillars precisely like those of the door "hanging," except that there were five pillars of silver itself, with the following statement of the text (Exod. xxxvi, 33), "And thou shalt hang up the veil under the taches" (םָחַת, הַעֲשָׂרְךָ), evidently meaning that the pillars to which its ends were to be attached were to be placed directly beneath the golden knobs opposed in the walls, on which likewise hung the side-curtains, shows both that these latter were thus completed by a drapery on the remaining side of each room (it will be remembered that the silver curtains were attached in continuation to that of the doorway screen), and likewise proves the character and situation of the taches themselves (not hooks in the roof, which at the eaves was at least five cubits above the top of the "vail"). As the vail, like the two outer screens, was stretched tight across the space it occupied, it was of course made exactly long enough for that purpose; thus, too, the embroidered figures (which, if of life-size, were of just the height to extend upright across the stuff—about four cubits) would show to the finest effect, not being in folds like the interior side-curtains.

It is not possible to determine with exactness the exact position of the "vail" is not otherwise prescribed than in the above requirement; nor is the length of either of the apartments which it separated given, although together they amounted to thirty cubits. On the supposition (sustained by the analogy in the Temple) that the Most Holy was an exact square, i.e. (according to our determination above) twelve cubits each way, the knob or tache opposite which it would hang must have been that which stood in the forward edge of the eighth plank from the rear of the building. Whether it was in front of or behind the pillars is not certain; but the former is probable, as it would suggest a barrier from within. The end pillars apparently stood in immediate contact with the side walls, both in order to sustain the ends of the vail, and to leave a wider space between them for ingress and egress. The vail was suspended directly upon golden pins (A.V. "hooks") inserted in the face of the pillars near their square top, and thus differed (as did likewise the screen of the door of the tabernacle) from the hangings of the outer court, which hung upon silver rods (A.V. "fillets") (doubtless by loops running on the rods) resting on similar pins or "hooks." The reason of this difference seems to have been that the greater space between the court pillars (so as to admit animals as well as men) would have caused too much sag in the hanging without intermediate support, which could only be furnished by the rods and attachments along the upper edge.

4. Supplementary Notes. Since the book of Numbers was in type we have considered a few points concerning the structure of this edifice which admit of additional elucidation.

(1.) The "corner-boards."—The fact that the dimensions of the courts and the building itself were in decimal proportions, and that in the temple subsequently the same thing was adopted, is, therefore, appropriate. When considering the proportions of these dimensions, the holy and most holy were exactly twenty cubits wide (1 Kings vi, 2), leads strongly to the presumption that in the tabernacle these rooms were ten cubits wide, that we are disposed to recall the arrangement adopted in the foregoing discussion, which gives these apartments a width of twelve cubits, leaving for the holy place the irregular dimensions of eighteen by twelve cubits. Adopting the suggestion of Keil (Commentary, ad loc.) that the corner-boards were constructed of two parts, forming a right angle with each other, we have only to take a plank on the half cubits wide and divide it lengthwise into two portions, one fourths and the other five-sixths of a cubit wide, and fasten these together in that manner, in order to obtain the needed half cubit necessary at each end of the rear, and allow one wing of the corner-board to lap around the end of the last. It is easy to judge how the corner boards were necessarily, as may be seen from the following diagram.

The statement respecting these corner-planks in
Exod. xxvi, 24, "And they shall be twined upon its top to the first (or same) ring," we may then understand to mean that they were to be in that manner jointed throughout their length, and were to use the first or end ring of the side-plank in common for the topmost bar, thus holding the corner firm in both directions, and the accompanying figure. The topmost rear bar may have been dovelled into the end of the side-bar for further security.

Corner-board, showing its "One Ring," in common with that of the Side-plank.

(2.) Position of the Curtains.—The use of these pieces of drapery will not be materially affected by this change in the width of the structure. We need only raise the peak into an acute instead of a right angle in order to dispose of the roof-canvas. The curtain across the rear gable may be wrapped a little farther along the side at each end, and it will at the same time cover the tops of the rear planks, and close the joint where the ends of the roof-curtains fall short of doing so.

On the supposition of a flat roof stretched directly across the tops of the planks, the dimensions of both sets of curtains may readily be made to correspond with the requirements of the building. The embroidered curtains may either be used around the walls, as previously, or they may be joined together into one large sheet to cover the ceiling and walls on the inside. Their length (twenty-eight cubits) would in the latter case reach to within one cubit of the ground; and their combined breadth (forty cubits) would in like manner cover the end wall (ten cubits + thirty cubits of length of building). The suture, where the two canvases are ordinarily supposed to be joined by the loops, would thus also exactly fall over the "vail," separating the holy from the most holy place.

The same would be true likewise of the goats'-hair curtains if similarly joined and spread over the roof and outside of the tabernacle, reaching to within one sixth cubit of the ground on each side and rear. The only difficulty would be as to the eleventh or extra goats'-hair curtain. If this were attached in the same manner as the other breadth, it would be wholly superfluous, unless used to close the entire front, as it might be if doubled (according to the interpretation of Exod. xxvi, 9). But it seems agreed upon by all critics that it must be employed upon the rear of the building (as explicitly stated in ver. 12). Keil understands that it was divided between the back and the front equally; but this answers to neither passage, makes part of the rear freely covered in (it brings up the own confession) the suture one cubit behind the "vail" (contrary to ver. 38). Brown reviews and confutes the explanations of other interpreters (Kalisch, Von Gerlach, and Ferguson), but frankly admits his own inability to solve the problem (p. 45). Paine's interpretation is the only one that meets the case.

This last insuperable difficulty, together with the impossibility of shedding the rain and snow, seems to us a conclusive objection against the flat-roof theory of the building. Brown ingeniously remarks (p. 47), "Admitting that snow sometimes falls on the mountains of Sinis, as it does; if ever, it falls in the valleys or plains; and if slight showers ever do occur, they must be like angels' visits, few and far between. None of the many authors I have followed across the desert of wandering seem ever to have witnessed snow, and very rarely even rain." This last circumstance is probably owing to the fact that it is almost invariably avoided in the winter or rainy season. The writer of this article was overtaken, with his party, by a snow-storm in March, 1874, which covered the ground in the plains and bottoms of the wadies of Mount Sinai ankle-deep; and every traveller must have observed the unmistakable traces of terrific floods orfreshets along the valley of the whole region. It often rains here in perfect torrents (see Palmer, Desert of the Exodus, p. 38, 177). A single thunder-storm, with a heavy shower of rain, falling on the naked granite mountains, will be sufficient to convert a dry and level valley into a roaring river in a few short hours" (ibid., p. 129). It is essential to any reconstruction of the tabernacle that the roof be made water-right, and this can only be done effectually by the true tent-form, with ridge and peak. See Tent.

5. Furniture of the Tabernacle.—The only piece of furniture within the inner holy place was the ark of the covenant; and the furniture of the outer room or holy place consisted of the altar of incense, the table of show-bread, and the "golden candlestick," the position of each of which is given in Exod. xxvi, 34, 35. They are all described in detail under their respective heads; and as Cyclopedian, we subjoin the following particulars as supplementary to the article on the last-named piece.

The candelabrum, as described in Exod. xxx, 31-37 (of which xxxvii, 17-23 is almost verbatim a copy), differs considerably from that in the account of Josephus (Ant. iii. 6, 7), and from the sculptured figure still extant upon the Ark of Titus (Roland, De Opus Islam Templo, p. 6; in which work other representations, all slightly varying, are given from Rabbinical sources and coins). Hence it is probable that the "candlestick" as constructed for the tabernacle by Moses was not exactly the same in form as that in the later models of Solomon's and Herod's temples; it would naturally be simpler and less ornamental in the earliest case, and the Herodian fabrication (if, indeed, this were other than that of the restoration from Babylon), to which all the later Jewish and profane statements apply (Solomon does not appear to have furnished his Temple with any other than the original candelabrum of the tabernacle), would of course depart most widely from the severity of the primitive type.

(1.) In the original object the following elements are clearly defined by the language (as above) employed: There was a main or central stem (גָּנוּר: yarek, thighb,
The Golden Candelabrum of the Tabernacle. (From a restoration by the Editor.)

A. V. ("shaft"), doubtless flaring or enlarged at the bottom, for a secure foot. From each side of this went off (apparently opposite each other, and at equal intervals), three arms (ךְדָּרֶים, kanim, reeds, "branches"), having each along their course three almond-shaped calyces (ךְנֹֿקְשִׁים, gebim, cups, "bowls"), one crown (ךְפָּרָךְ, kaphôr, "crown"), "knop"), and one blossom (ךְתִּיבָן, petach, "flower"): the middle stem had four such calyces, and at least three crowns, placed each immediately beneath the several junctions of the arms with the main stem, also more than one blossom. Finally, there were seven burners (ךְנֹֿקְשֵׁים, nerîm, lights, "lamps"), evidently one for the extremity of each arm, and one for the top of the central stem. Every part of the candelabrum (including the burners, only so far as applicable to them) was a continuous rounded (hammered or turned) piece of refined gold (ךְנֹֿקְשֵׁים, נֶפֶלִים, נֶפֶלִים, "one beaten work of pure gold"). It has usually been assumed that the arms were all in one plane with the main stem, and their summits all of equal height, and equidistant from each other, as is the case with the representation on the Arch of Titus.

The following are the principal points that remain uncertain: The relative position of the calyces, crowns, and blossoms on the arms; for although they are always enumerated in this order, there is nothing to show absolutely whether the enumeration begins at the intersection with the shaft or with the extremities. The former view, which is countenanced by the rest of the description (since this proceeds upward from the base), is adopted by Dr. Conant (in the Amer. ed. of Smith's Dict. of the Bible, s. v. "Candelstick"); the latter, which is favored by the difficulty (or rather impossibility) of assigning more than one blossom to the summit of the central stem (as the text would then seem to require), is adopted by Prof. Palestine (Solomon's Temple, etc., p. 10). The signification of the terms is not decisive: for the kaphôr, or "knop," may quite as well signify a little ornamental ball or globular enlargement in the necks of the arms and in the stem at their points of departure, as a capital or surmounting decoration (the three ranged along the main stem certainly were not such in strictness). The petach, or "flower," is regarded by both the above writers (who thus agree in making these, after all, the extreme points of the Chandler) as the "receptacles" of the lamps themselves; these last being regarded by Palestine as denoted by the gebim, or "bowls," having a trietal form in the case of the side arms, and a quaternal in that of the main stem.

IV. Relation of the Tabernacle to the Religious Life of Israel.—I. Whatever connection may be traced between other parts of the Hebrew national ritual and that of the tabernacle, now that with Israel had been brought into contact, the thought of the tabernacle meets us as entirely new. Spencer (De Leg. Hebr. vol. iii, 3) labors hard, but not successfully, to prove that the tabernacles of Moloch of Amos v. 26 were the prototypes of the tent of meeting. It has to be remembered, however, that the word used in Amos (סִכָּרָה) is never used of the tabernacle, and means something very different; and (2) that the Moloch-worship represented a deflection of the people subsequent to the erection of the tabernacle. The "house of God" [see BETHLEHEM] of the patriarchs had been the large "pillar of stone" (Gen. xxviii. 18, 19), bearing record of some high spiritual experience and tending to lead men upward to it (Bähr, Symbol, i. 98), or the grove which, with its dim, doubtful light, attuned the souls of men to a divine awe (Gen. xxvi, 33). The temples of Egypt were magnificent and colossal, hewn in the rock, or built of brick, or in the open air, as unlike as possible to the sacred tent of Israel. The command was one in which we can trace a special fitness. The stately temples belonged to the house of bondage which they were leaving. The sacred places of their fathers were in the land towards which they were journeying. There was no temple in the wilderness. To have set up a bethel after the old pattern would have been to make that a resting-place, the object then or afterwards of devout pilgrimage; and the multiplication of such places at the different stages of their march would have led inevitably to polytheism. It would have failed utterly to lead them to the thought which they needed most—of a Divine Presence never absent from them, protecting, ruling, judging. A sacred tent, a moving bethel, was the fit sanctuary for a people still nomadic. It was capable of being united to the land, as it actually came to be, with the "grove" of the older culture (Josh. x. 26). Analogies of like wants, met in a like way, with no ascertainable historical connection, are to be found among the Geatulians and other tribes of Northern Africa (Sil. Ital. iii, 399), and in the sacred tent of the Carthaginian encampment (Strabo, x. 65).

2. The structure of the tabernacle was obviously determined by a complex and profound symbolism, but its meaning remains one of the things at which we can but dimly guess. No interpretation is given in the law itself. The explanations of Jewish writers long afterwards are manifestly wide of the mark. That which meets us in the Epistle to the Hebrews, the application
of the types of the tabernacle to the mysteries of redemption, was latent till those mysteries were made known. Yet we cannot but believe that, as each portion of the wonderful order rose before the inward eye of faith, there must have entered into his mind truths which he apprehended himself and sought to communicate to others. It entered, indeed, into the order of a divine education for Moses and for Israel, and an education by means of symbols, no less than by means of words, presupposes an existing language. So far from shrinking, therefore, as may have timidly unwisely shrunk (Wytinck, *Egyptiaca, in Ugoine, Theaur., vol. i.), from asking what thoughts the Egyptian education of Moses would lead him to connect with the symbols he was now taught to use, we may see in it a legitimate method of inquiry—almost the only method possible. Where that fails, the way may be filled up (Bähr, *Symbol. passim*) from the analogies of other nations, indicating, where they agree, a widespread primeval symbolism. So far from laboring to prove, at the price of ignoring or distorting facts, that everything was till then unknown, we shall as little expect to find it so, as to recognize a new, even an unknown language, spoken for the first time on Sinai, written for the first time on the two tablets of the covenant.

3. The thought of a graduated sanctity, like that of the outer court, the holy place, the holy of holies had its counterpart, often the same number of stages, in the structure of Egyptian temples (Bähr, *Symbol. i. 216*). See Temple.

(1.) The interior adytum, (to proceed from the innermost recess outward) was small in proportion to the rest of the building, and commonly, as in the tabernacle (Josephus, *Ant. ii. 6, 3*) was at the western end (Spencre, *De Leg. Hebr., iii. 3*), and was but little lighted. In the adytum, often at least, was the sacred ark, the culminating point of holiness, containing the highest and most mysterious symbols—winged figures, generally like those of the carchemis (Wilkinson, *Anc. Egypt., v. 275*; Kenrick, *Egypt. i. 460*), the emblems of stability and life. Here were outward points of resemblance. Of all elements of Egyptian worship this was one which could be transferred with least hazard, with most gain. No one could think that the ark itself was the likeness of the God he worshipped. When we ask what gave the ark its holiness, we are led on to the infinite depths of the idea of holiness, the mysteries of religious systems. That of Egypt was predominantly nomothetic, starting from the productive powers of nature. The symbols of those powers, though not originally involving what we know as imagery, tended to it fatally and rapidly (Spencre, *De Leg. Hebr., iii. 3*; Warburton, *Divine Legation of Moses* ii. 4), filling up the space of Israel with the image of a kindred divinity. The nation was taught to think of God, not chiefly as revealed in nature, but as manifesting himself in and to the spirits of men. In the ark of the covenant, as the highest revelation then possible of the Divine nature, were the two tables of stone, on which were written, by the teaching of the Divine Spirit, and there by "the finger of God" (Matt. xii. 28; Luke xii., 20), see also Clement of Alexandria [Stron. vi. 183] and 1 Kings xviii. 46; 2 Kings iii. 15; Ezek. i. 3; iii. 14; 1 Chron. xxvii. 19), the great unchanging laws of human duty which had been proclaimed on Sinai. Here the lesson taught was plain enough. The highest knowledge was as the simplest, the esoteric as the exoteric. In the depths of the holy of holies, and for the high-priest as for all Israel, there was the revelation of a righteous Will requiring righteousness in man (Siahschitz, *Archdol. c. 77*). See Temple.

Over the kopirëth ("mercy-seat"), so called with a twofold reference to the root-meaning of the word. It covered the ark. It was the witness of a mercy covering sins. As the "footstool" of God, the "throne" of the Divine glory, it declared that over the law which seemed so rigid and unyielding there rested the compassion of one forgiving iniquity and transgression. Ewald, however, giving to *zgg*, the root of kopirkëth, the meaning of "to scrape," "erase," derives from that meaning the idea implied in the Sept. *aexirwma*, and denies that the word ever signified *tôstum* (Alterm. p. 128, 129). See Mercy-seat.

Over the mercy-seat were the cherubim, reproducing, in part, as it were, the symbolism of the great heathenic races, forms familiar to Moses and to Israel, needing no description for them, interpreted for us by the fuller vision of the later prophets (Ezek. i. 5-18; x. 8-15; xli. 19), or by the winged forms of the imagery of Egypt. Representing as they did the manifold powers of nature, created light, the sun's highest form (Bähr, *De Leg. Hebr., i. 341*), their "overshadowing wings," "meeting" as in token of perfect harmony, declared that nature as well as man found its highest glory in subjection to a divine law, that men might take refuge in that order, as under "the shadow of the wings" of God (Stanley, *Jewish Church*, p. 98). Placed where those and other like figures were, in the temples of Egypt, they might be hindrances and not help, might sensitize instead of purifying the worship of the people. But it was part of the wisdom which we may reverently trace in the order of the tabernacle that while Egyptian symbols are retained, as in the ark, the cherubim, the urim, and the thummim, their place is changed. They remind the high-priest, the representative of the whole nation, of the truths on which the order rests. The people cannot bow down and worship that which they never see. See Cherubim.

The material, not less than the forms, in the holy of holies was sacred property. The sacred ark, or other least liable of woods then accessible to decay, might well represent the imperishableness of divine truth, of the laws of duty (Bähr, *Symbol. i. 286*). Ark, mercy-seat, cherubim, the very walls, were all overlaid with gold, the noblest of all metals, the symbol of light and purity—symbol of light and purity which purify. The ark was the token of the incorruptible, of the glory of a great king (ibid. i. 282). It was not without meaning that all this lavish expenditure of what was most costly was placed where none might gaze on it. The gold thus offered taught man that the noblest act of beneficence and sacrifice are not those which are done that they may be seen of men, but those which are known only to him who "seeth in secret" (Matt. vi. 4).

Dimensions also had their meaning. Difficult as it may be to feel sure that we have the key to the enigma, there can be but little doubt that the other religious systems of the world did attach a mysterious significance to each separate number; that the training of Moses, as afterwards the far less complete initiation of Pythagoras in the symbolism of Egypt, must have made that transparently clear to him, which to us is almost impenetrably dark. A full discussion of the subject is obviously impossible here, but it may be useful to exhibit briefly the chief thoughts which have been connected with the numbers that are most prominent in the language of symbolism. Arbitrary as some of them may seem, a sufficient inducement to establish each will be found in Bähr's elaborate dissertation (Bähr, *i. 255-335* and other works (comp. Wilkinson, *Anc. Egypt., iv. 190-244*; Leyerer, in Herzog's *Real-Encykl. s. v. 'Stiftsfahute').

One—The Godhead, eternity, life, creative force, the sun, man.

Two—Matter, time, death, receptive capacity, the moon, woman.

Three (as a number or in the triangle)—The universe in connection with God, the absolute in itself, the unconditioned.

Four (the number, or in the square or cube)—Conditioned existence, the world as created, divine order, revelation.

Seven (as 3 + 4)—The union of the world and God, rest (as 3 + 4); constancy, balance, publication, Ten (as = 1 + 2 + 3 + 4)—Completeness or total, soul, physical, perfection.

Five—Perfection, attainment, incompleteness.

Twelve—The sigils of the zodiac, the cycles of the seasons; in Israel the ideal number of the people, of the covenant of God with them.
To those who think over the words of two great teachers, one heathen (Plutarch, *De Is. et Os.*, p. 411) and one Christian (Clem. Al. *Strom.* vi, 84-87), who had at least a sensitive, receptive, and passionate attitude toward the life of religion in Egypt, and had inherited part of the old system, the precision of the numbers in the plan of the tabernacle will no longer seem accountable. If, in a cosmical system, a right-angled triangle, with the sides three, four, five, represented the triad of Osiris, Isis, Osiris; while a cube, the four bright colors of the Egyptian sign of creation (Plutarch, *loc. cit.*), the perfect cube of the holy of holies, the constant recurrence of the numbers four and ten, may well be accepted as symbolizing order, stability, perfection (Bähr, *Symbol.* ii, 225). The symbol reappears in the most startling form in the closing visions of the Apocalypse. There the heavenly Jerusalem is described, in words which absolutely exclude the literalism that has sometimes been blindly applied to it, as a city four-square—12,000 furlongs in length and breadth and height (Rev. xxii, 16). See Numbers.

Into the inner sanctuary neither people nor the priests as a body ever entered. Silence as it may seem, that in which everything represented light and life was left in darkness and solitude. Once only in the year, on the day of atonement, might the high priest enter. The strange contrast has, however, its parallel in the spiritual life. Death and life, light and darkness, are wonderful unities. Only by passing into the "thick darkness" where God is (Exod. xx, 21; 1 Kings viii, 12) we can enter at all into the "light inaccessible" in which he dwells everlasting. The solemn annual entrance, like the withdrawal of symbolic forms from the gaze of the people, was itself a part of a wise and divine order. Intercourse with Egypt had shown how easily the symbols of truth might become common and familiar things, yet without symbols the truths themselves might be forgotten. Both dangers were met. To enter once, and only once in a year, as an offering and in the name of the people, on the day of atonement and before the law of duty, before the presence of the God who gave it, not in the stately robes that became the representative of God to man, but as representing man in his humiliation in the garb of the lower priests, barefooted and in the linen ephod—to confess his own sins and the sins of his people—this was a connecting point of the atonement-day (kippûr) with the mercy-seat (kophek-reth). To come there with blood, the symbol of life, touching with that blood the mercy-seat—with incense, the symbol of adoration (Lev. xvi, 12-14), what did that express but the truth (1) that man must draw near to the right hand of the God who offers the only true sacred worship of the heart, with the living sacrifice of body, soul, and spirit; (2) that could such a perfect sacrifice be found, it would have a mysterious power working beyond itself, in proportion to its perfection, to cover the multitude of sins?

From all others, from the high-priest at all other times, the holy of holies was shrouded by the heavy veil, bright with many colors and strange forms, even as curtains of golden tissue were to be seen hanging before the edifice of an Egyptian temple, a strange contrast often to the bestial form behind them (Clem. Al. *Prued.* iii, 4). In our man-made world it is not to be wondered that the veil was the witness of higher and deeper thoughts. On the shrine of Isis at Sais, there were to be read words which, though pointing to a pantheistic rather than an ethical religion, were yet wonderful in their loftiness, "I am all that has been (πᾶτιν γε γέγονοι·) and, is, and shall be forever (λαμπάς, ἡμέραν·) (Plutarch, *De Is. et Osir.* p. 394). Like, and yet more unlike, the truth, we find that no such words could have appeared on the veil of the tabernacle. In that identification of the word and God all idolatry was latent, as, in the faith of Israel, in the "I am all idolatry was latent; but the words, "I am all that has been," applied to the veil of any revelation of the Divine will, there were latent all the arts of an unbelieving priesthood, substituting symbols, pomp, ritual, for such a revelation. But what, then, was the meaning of the veil which met the gaze of the priests as they did service in the sanctuary? Basic colors, in the form of the numbers of the four bright colors, probably, after the fashion of that art, in parallel bands—blue, symbol of heaven, and purple of kingly glory, and crimson of life and joy, and white of light and purity (Bähr, *Symbol.* iii, 369-369)—formed in their combination no remote similarity to the mystical coloration of the Divine covenant with man, the pledge of peace and hope, the sign of the Divine Presence (Ezek. i, 28; Ewald, *Alterth.* p. 338). See Colors. Within the veil, light and truth were seen in their unity. The veil itself represented the infinite variety, the *πολυτύχες τῶν* of the divine order in creation (Eph. iii, 10). The again, were seen copied upon the veil the mysterious forms of the cherubim; how many, or in what attitude, or of what size, or in what material, we are not told. The words "cunning work" in Exod. xxxvi, 35, applied elsewhere to combinations of embroidery and metal (xxxviii, 15; xxxvi, 4), seem to justify the conjecture that here also they were of gold. In the absence of any other evidence, it would have been perhaps natural to think that they reproduced on a larger scale the number and the position of those that were over the mercy-seat. The visions of Ezekiel, however, reproducing, as they do, the forms of xxxvi, 31, which his priestly life had made him familiar, indicate not less than four (ch. i and x), and those not alike, having severally the faces of a man, a lion, an ox, and an eagle—strange symbolic words, which elsewhere we should have identified with imagery, but which here, bearing witness against it, emblem of the multifold variety of creation as once manifesting and concealing God.

(2) The outer sanctuary was one degree less awful in its holiness than the inner. Silver, the type of human purity, was used in the temple. The type represents the Divine glory (Bähr, *Symbol.* i, 284). It was to be trodden by the priests as by men who lived in the perpetual consciousness of the nearness of God, of the mystery behind the veil. Barefooted and in garments of white linen, like the priests of Isis (see Priest), they accomplished and confessed the side of the Divine Presence, not unlike in outward form to the sacred cakes which the Egyptians placed before the shrines of their gods, served as a token that, though there was no form or likeness of the Godhead, he was yet there, accepting all offerings, recognising in particular that special offering which represented the life of the nation at once in the distinctness of its tribes and in its unity as a people (Ewald, *Alterth.* p. 120). The meaning of the altar of incense was not less obvious. The cloud of fragrant smoke was the natural, almost the necessary, part of the unity of the hearth's altar. The *προσκύνειν* (Ps. cxli, 2). The incense sprinkled on the shew-bread and the lamp taught men that all other offerings needed the intermingling of that adoration. Upon that altar no "strange fire" was to be kindled. When fresh fire was needed it was to be taken from the altar of burnt-offering, as the word "sanctuary" (Lev. x, 18) and "temple" (Lev. xvi, 1) show; the sense, as compared with what is to follow, are the sublimity and the purity of these symbols. It is as if the priestly order, already leading a consecrated life, were capable of understanding a higher language which had to be translated into a lower for those that were still without God's favor. The withdrawal of the priests, the court, from the consecrated precincts, was the court, fenced in by an enclosure, yet
open to all the congregation as well as to the Levites, those only excepted who were ceremonially unclean. No one who was not of the visible (Eph. v, 1) race, the entrance, but every member of the priestly nation might thus far “draw near” to the presence of Jehovah. Here, therefore, stood the altar of burnt-offerings, at which sacrifices in all their varieties were offered by penitent or thankful worshippers (Exod. xxvii, 1–8; xxxviii, 1), the brazen laver at which those worshippers purified themselves before they sacrificed, the priests before they entered into the sanctuary (xxx, 17–21). Here the graduated scale of holiness ended. What Israel was to the world, fenced in and set apart, that the court of the tabernacle was to the surrounding world; and the sanctuary answered to that between the sons of Aaron and other Israelites; just as the idea of holiness culminated personally in the high-priest, locally in the holy of holies.

V. Theories of Later Times.—It is not probable that the elaborate symbolism of such a structure was understood by the rude and sensual multitude that came out of Egypt. In its fulness, perhaps, no mind but that of the lawgiver himself, ever entered into it, and even for him, one half, and that the highest, of its meaning must have been altogether latent. Yet it was not the less, was perhaps the more fitted, on that account, to be an instrument for the education of the people. To the most ignorant and debased it was at least a witness of the nearness of the Divine King. It met the craving of the human heart, which prompts to worship, with an order that was neither idolatrous nor impure. It taught men that their fleshly nature was the hindrance to worship; that it rendered them unclean; that only by subduing it, killing it, as they killed the bullock and the goat, could they offer up an acceptable sacrifice; that such a sacrifice was the condition of forgiveness, a higher sacrifice than any they could offer as the ground of remission. In the heavens the temple was regarded as belonging to the fleshly nature which was slain and offered, not to the true inner self of the worshipper.

More thoughtful minds were led inevitably to higher truths. They were not slow to see in the tabernacle the parable of the God’s presence manifested in creation. Darkness was as his pavilion (2 Sam. xxii, 12). He had made a tabernacle for the sun (Psa. xix, 4). The heavens were spread out like its curtains. The beams of his chambers were in the mighty waters (civ, 2, 3; Isa. xi, 22; Lowth, De Sac. Poës. viii). The majesty of God seen in the storm and tempest was as of one who rides a stormy sea (Psa. lxxv, 6). It might be said, “He that dwelleth between the cherubim” spoke on the one side of a special, localized manifestation of the Divine Presence, they spoke also on the other of that Presence as in the heaven of heavens, in the light of setting suns, in the blackness and the flashes of the thunder-clouds.

2. The thought thus uttered, essentially poetical in its nature, had its fit place in the psalms and hymns of Israel. It lost its beauty, it led men on a false track, when it was formalized into a system. At a time when Judaism and Greek philosophy were alike effect, when a feeble physical science which could read nothing but its own thoughts in the symbols of an older and deeper system was after its own fashion rationalizing the mythology of heathenism, there were found Jewish writers willing to apply the same principle of interpretation to the tabernacle and its order. In that way, it seemed to them to explain the formal ending of the Old Testament, the multiplying of letters who could not bring themselves to be proselytes. The result appears in Josephus and in Philo, also in part in Clement of Alexandria and Origen. Thus interpreted, the entire significance of the two tables of the covenant and their place within the ark disappeared, and this new system of interpretation became cosmical instead of ethical. If the special idiosyncrasy of one writer (Philo, De Profug.) led him to see in the holy of holies and the sanctuary that which answered to the Platonic distinction between the visible and the invisible, the corporeal and the spiritual, the less intelligent Josephus goes still more completely into the new system. The holy of holies is the visible firmament in which God dwells, the sanctuary is the earth and sea which men inhabit (Ant. iii, 6, 4; 7, 7). The twelve loaves of the show-bread represented the twelve months of the year, the twelve signs of the zodiac. The seven lamps were the seven planets. The four colors of the vail were the four elements {στρογγυλ}, air, fire, water, earth. Even the wings of the cherubim were, in the eyes of some, the two hemispheres of the universe, or the constellations of the greater and the lesser belts of the heavens. Alex. Comnenus even made the show-bread and the altar of incense stand on the north, because north winds were most fruitful; the lamp on the south, because the motions of the planets were southward (ibid. § 34, 35). We need not follow such a system of interpretation further. It was not unnatural that the authority which it shows it should secure for it considerable respect. We find it reappearing in some Christian writers—Chrysostom (Hom, in Journ, Eccl) and Theodoret (Quast, in Journ.; in some Jewish—Beau-Uziel, Kimchi, Abarbanel (Bahr, Symbol, i, 105 sq.). It was well for Christian thought that the Church had in the Fourth Century the Apocalypse of St. John that helped to save it from the pedantic puritilities of this physico-theology. It is curious to note how in Clement of Alexandria the two systems of interpretation cross each other, leading sometimes to extravagances like those in the text, sometimes to thoughts at once lofty and true. Some of these have already been noticed. Others, not to be passed over, are that the seven lamps set forth the varied degrees and forms {πολύμερος και πολυτρωτός} of God’s revelation, the form and the attitude of the cherubim, the union of active ministry and grateful, ceaseless adoration (St. Chrysostom, Hom. on Rev., ser. 3, ch. 15). 3. It will have been clear from all that has been said that the Epistle to the Hebrews has not been looked on as designed to limit our inquiry into the meaning of the symbolism of the tabernacle, and that there is consequently no ground for adopting the system of interpreters who can see in it nothing but an aggregate of types of Christian mysteries. Such a system has, in fact, to choose between two alternatives. Either the meaning was made clear, at least to the devout worshippers of old, and then it is no longer true that the mystery was hid “from ages and generations,” or else it was not possible to interpret the mystery aright, unless the word was voiceless and unmeaning as long as it lasted, then only beginning to be instructive when it was “ready to vanish away.” Rightly viewed, there is, it is believed, no antagonism between the interpretation which starts from the idea of symbols of great eternal truths, and that which rests on the idea of types foreshadowing Christ and his Work and his Church. If the latter were the highest manifestation of the former (and this is the keynote of the Epistle to the Hebrews), then the two systems run parallel with each other. The type may help us to understand the symbol. The symbol may guard us against misinterpreting the type. That the same things were at once symbols and types may take its place among the proofs of an insight and a foresight more than human. Not the vail of nature only, but the vail of the flesh, the humanity of Christ, at once conceals and manifests the Eternal’s glory. The types are the foreshadowing, the symbol the full statement; and hearts to believe to enter into the holy of holies, into the Divine Presence, and to see, not less clearly than the high-priest, as he looked on the ark and the mercy-seat, that righteousness and love, truth and mercy, were as one. Blood had been shed, a life had been offered; through the power of the blood of its love, was able to atone, to satisfy, to purify.
TABERNACLE

are, as might be expected, full of interest. As in a vision, which loses sight of all time limits, the temple of the tabernacle is seen in heaven (Rev. xv, 5), and yet in the heavenly Jerusalem there is no temple seen (xxi, 22). In the heavenly temple there is no longer any vail; it is open, and the ark of the covenant is clearly seen (xi, 19).

4. We must here follow out that strain of a higher mood, and it would not be profitable to enter into the speculations which later writers have engrafted on the first great thought. Those who wish to enter upon that line of inquiry may find materials enough in any of the greater commentators on the Epistle to the Hebrews (Owen's, Fisk's, Alford's), or in special treatises, such as those of Van Till (De Tabernac. in UgoLino, Theosaurus, viii.), Bede (Expositio Mystica et Moralit. Monastici Tabernaculi), Witsius (De Tabern. Levit. Mysteriorum, in the Miscell. Sacrae). Strange outlying hallucinations, like those of ancient rabbin, inferring from "the pattern showed to Moses in the Mount" the permanent existence of a heavenly tabernacle, like in form, structure, proportions to that which stood in the wilderness (Leyser, loc. cit.), or of later writers who have seen in it (not in the spiritual, but the anatomical sense of the word) a type of human society represented in the outer holy frame-work of the inner vital organs (Friederich, Symbol. der Mos. Stiftshütte, in Leyser, loc. cit., and Ewald, Alterth. p. 338), may be dismissed with a single glance. The Judaic and patriotic opinion in the main, though not in the details, was advocated by Bähr in his Symbolik (1857), in which he considered the tabernacle a symbol of the universe, the court representing earth, and the tabernacle, strictly so named, heaven, though not in a material sense, but as the place and instruments of God's revelation of himself. In his work on the temple, ten years later, Bähr retracted much of his former theory, and he was the last that maintained that the tabernacle symbolized the idea of the dwelling of God in the midst of Israel. Another view, which seems an exaggeration into unwarrantable detail of the true idea that each Christian is a temple of God, proceeds to adapt to the elements of human nature the divisions and materials of the tabernacle. Thus the court is the body, the holy place the soul, the holy of holies—true dwelling-place of God. This might do very well as a general illustration, and was so used by Luther; but the idea has been fully developed and defended against the attack of Bähr by Friederich in his Symbol. der Mos. Stifts- schaft, in Leyser, loc. cit.

5. Nevertheless, as the central point of a great symbolical and typical institute, the tabernacle necessarily possessed, both as a whole and in its contents, a symbolical and typical significance, which has been recognised by all orthodox interpreters. On this head, as we see above, much fanciful and unregulated ingenuity has been indulged; but this must not induce us to neglect those conclusions to which a just application of the principles of typological interpretation conduces.

(1.) Under the Old-Test. economy, the primary idea of the tabernacle was that of a dwelling for Jehovah in the midst of his people. This, we see, held in view in all the arrangements concerning the construction and location of the structure. "Let them," said God to Moses, "make me a sanctuary that I may dwell among them" (Exod. xxx, 8; xxix, 45); when the structure was completed it was set up in the midst of the congregation, and there it always remained, whether the people rested or were on their march (Num. ii); on it rested the cloud which indicated the Divine Presence, and which by its quiescence or removal indicated the will of the Great Sovereign of Israel as to the resting or removing of the camp (Exod. xxi, 31); and upon the tabernacle they laid their sacrifices to offer to God, or counsel to ask of him (Lev. i, 3; Num. xxvii, 2; Deut. xxxi, 14, etc.). As Judaism was strictly monothestic, it knew but one sacred place where Jehovah was to be found. The holy of holies, which the apostle calls "the second tabernacle" (Heb. ix, 7), was the appropriate residence of Jehovah as the God of Israel. In this the principal thing was the ark, in which was placed "the testimony" (תנור), and which was covered by "the mercy-seat" (תינוק). The testimony was the book of the law, and it was put into the ark as a witness against the people because of their sinfulness (Deut. xxxi, 26, 27). This symbolized the great truth that the first relation into which Jehovah comes with the sinner is that of a ruler whose law testifies against the transgressor. But this relation can only be the means for the blood of atonement to be sprinkled by the high-priest when he entered within the vail, and on which the visible emblem of Jehovah's presence—the sheenahah between the cherubim of glory—was enbronched; and in this there was an emblem of the fact that the condemning and accusing power of the law was taken away by the propitiatory covering which God had appointed. By all this was indicated the grand truth that the character in which Jehovah dwelt among his people was that of a justly offended but merciful and propitiated sovereign, who, having received atonement for their sins, had received forgiveness of their sins, and would remember them no more at all against them (comp. Philo, De Vit. Mosis, bk. iii).

In the first, or outer tabernacle, were the altar of incense, the table with the shew-bread, and the golden candlestick. The first was symbolic of the necessity and the acceptableness of prayer, of which the smoke of sweet incense that was to ascend from it morning and evening appears to be the appointed Biblical symbol (comp. Psa. cxli, 2; Luke i, 10; Rev. v, 8; viii, 3, 4). The second was emblematical of the necessity of good works to accompany our devotions, the bread being the seven lamps of the temple, representing the sevenfold light of God (Rev. xxi, 6), and consecrated to him by the offering of incense along with it as emblematical of prayer. The third was the symbol of the Church, or people of God, the gold of which it was formed denoting the excellence of the Church, the seven lamps its completeness, and the oil by which they were lighted being the appropriate symbol of the Divine Spirit dwelling in his people and causing them to shine (comp. Zech. iv, 2, 3; Matt. v, 14, 16; Rev. i, 12, 20).

In the fore-court of the tabernacle stood the altar of burnt-offering, on which were offered the sacrifices of the people of Israel, in which the priests cleansed their hands and feet before entering the holy place. The symbolical significance of these is too well known to need illustration. See Offering; Purification.

(2.) Under the new dispensation, if we view the tabernacle as a general symbol of Jehovah's dwelling in the midst of his people, then that to which it answers can be no other than the human nature of our Lord. He was "God manifest in the flesh," "Immanuel," God with us, and in him "dwelleth all the fulness of the Godhead bodily" (I Tim. iii, 16; Matt. i, 28; Col. ii, 9). Hence John (i, 14), in speaking of his incarnation, says, "The Word was made flesh, and dwelt among us," where the language evidently points to the ancient tabernacle as the symbolical residence of Jehovah; and in the book of Revelation (xxi, 5) the same apostle, in announcing the final presence of Christ in his glorified humanity with his Church, uses the expression, "The tabernacle of God is with men." From these statements of the New Test. we may hold ourselves justified in concluding that the ancient tabernacle, viewed in its general aspect as the dwelling of Jehovah, found its antitype in the human nature of Christ, in whom God really dwelt. Viewed more particularly in relation to its two inner courts, and the day it was set apart when they had become sacrifice to offer to God, or counsel to ask of him (Lev. i, 3; Num. xxvii, 2; Deut. xxxi, 14, etc.). As Judaism was strictly monothestic, it knew but one
with this, the writer of the Epistle to the Hebrews teaches (as above seen) us to regard the outer part of the tabernacle as more strictly typical of the person of Jesus Christ, and the inner heaven, into which he has now entered. Thus he speaks of him (viii, 2) as now, in the heavenly state, "a minister of the true [i. e. real, διά άλλου, as distinguished from symbolical] tabernacle, which is in heaven, where there is a "tabernacle," an allusion seems to be partly to the fact that Christ is in heaven, and partly to the fact that he ministers there in human nature. Still more explicit is the language used in ix, 11, where the writer, after speaking of the sacrificial services of the ancient economy as merely formal and imperfect, says, "For if that which is done according to the law could have contained more than a few hundred (Colenso, Pentateuch and Book of Joshua, pt. i, ch. iv, v). The number of priests was utterly inadequate for the services of the tabernacle (ibid. ch. xx). The narrative of the head-money collection, of the gifts of the people, is full of anachronisms (ibid. ch. xiv).

Some of these objections—those, e. g., as to the number of the first-born, and the disproportionate smallness of the priesthood, have been met by anticipation in remarks under Priest and Levite. Others bearing upon the general veracity of the Pentateuch history it is impossible to discuss here. See PENTATEUCH. It will be sufficient to notice such as bear immediately upon the subject of this article. (1.) It may be said that this theory, like other similar theories as to the history of Christianity, adds to instead of diminishing difficulties and anomalies. It may be possible to make out plausibly that what purports to be the first period of an institution is, with all its documents, the creation of the second; but the question then comes, How are we to explain the existence of the second? The world rests upon an elephant, and the elephant on a tortoise, but the footing of the tortoise is at least somewhat insecure. (2.) What more easy to view ever may be the right of the first-born, the alleged presence of the whole congregation at the door of the tabernacle tells with equal force against the historical existence of the Temple and the narrative of its dedication. There also, when the population numbered some seven or eight millions (2 Sam. xviii., 9), "all the men of Israel" (1 Kings, xiv., 22), "all the congregation" (ver. 5), "all the children of Israel" (ver. 63) were assembled, and the king "blessed" all the congregation (ver. 14, 55). (3.) There are, it is believed, undesigned touches indicating the nomadic life of the wilderness. The wood employed for the tabernacle is not the sycamore or the cedar; the beehives of the wilderness, as afterwards in the Temple, but the shittim of the Sinaitic peninsula. See SHITTAH-TREE; SHITTIM. The abundance of fine linen points to Egypt, the seal or dolphin skins ("badgers" in the A. V., but see Genesis, x. 26) to the shores of the Red Sea. See BADGER. The Levites are not to enter on their office till the age of thirty, as needing for their work as bearers a man's full strength (Numb. iv, 23, 30). Afterwards, when their duties are chiefly those of singers and gatekeepers, they were to begin at twenty (1 Chron. xxiii, 24). Would a later historian, having heard of the organized system from all share in the structure of the tabernacle, and left it in the hands of mythical persons belonging to Judah, and to a tribe then so little prominent as that of Dan? (4.) There remains the strong Egyptian stamp impressed upon well-nigh every part of the tabernacle and its ritual, and implied in other incidents. See BRAZEN SERPENT; LEVITE; PRIEST; Urim and Thummim. Whatever bearing this may have on our views of the things themselves, it points, beyond all doubt, to a time when the two nations had been brought into close contact, when not jewels of silver and gold only, but textiles of fine linen, were "brought and brought and brought" by one people from the other. To what other period in the history before Samuel than that of the Exodus of the Pentateuch can we refer that intercourse?
When was it likely that a wild tribe, with difficulty keeping its ground against neighboring nations, would have adopted such a complicated ritual from a system so alien to its own? The facts which, when urged by Spencer, with or without a hostile purpose, were denounced as daring and dangerous and unsettling, are now seen to be witnesses to the antiquity of the religion of Israel, and so to the substantial truth of the Mosaic history. They are used as such by theologians who in various degrees enter their protest against the more destructive criticism of our own time (Hengstenberg, *Egypt and the Books of Moses*; Stanley, *Jewish Church*, lect. 1v.).

We may, for a moment, put an imaginary case. Let us suppose that the records of the Old Test. had given us in 1 and 2 Sam. a history like that which men now seek to substitute for what is actually given, had represented Samuel as the first great preacher of the worship of Ehlonim, Gad, or some later prophet, as introducing for the first time the name and worship of Jehovah, and that the Old Test. began with this (Colenso, pt. ii, ch. xxi.). Let us then suppose that some old papyrus, freshly discovered, slowly deciphered, gave us the whole or the greater part of what we now find in Exodus and Numbers, that there was thus given an explanation both of the actual condition of the people and of the Egyptian element so largely intermingled with their ritual. Can we not imagine with what jubilant zeal the books of Samuel would then have been "critically examined," what inconsistencies would have been detected in them, how eager men would have been to prove that Samuel had had credit given him for a work which was not his; that not he, but Moses, was the founder of the polity and creed of Israel; that the tabernacle on Zion, instead of coming fresh from David's creative mind, had been preceded by the humble tabernacle in the wilderness?

The objection raised against the truthfulness of the narrative (Colenso, ibid. ch. vii.) on the ground that the entire congregation of 600,000 is said to have been convened at the door of this small structure (Lev. viii.) is readily obviated by the natural interpretation that only the principal persons stood immediately near, while the multitude saw and viewed the ceremonies from a convenient distance (Birks, *The Exodus of Israel*, p. 111).

**TABERNACLE** is a name given to certain chapels or meeting-houses in England erected by Mr. Whitefield, and to similar places of worship reared by Robert Haldane for the accommodation of a few large congregations in Scotland, out of which have chiefly been formed the present churches of Congregational dissenters in that country.

**Tabernacles** is also a term applied to certain inferior portions of churches, etc.: 1. A niche or hovel for an image. 2. An ambry on the right side of the altar, or behind it, for the reservation of the host, chrisom, and oil for the sick. 3. A throne carried like a litter on the shoulders of Spanish priests in the procession of Corpus Christi, and supporting the host. 4. A small temple over the central part of an altar for the reservation of the eucharist, contained in the pyx, and often decorated with a crown of three circles. Its earliest form was a censer of wood, or a little arched receptacle; then it became a tower of gold, or of circular shape, being a caset for the chalice and paten, in fact a ciborium. In the 15th century the tabernacle became a magnificent piece of furniture over or on the left side of the high-altar, with statues, towers, foliage, buttresses, and superb work, as at Grenoble, St. John Maurienne, Leau, Tour- nay, and Nuremberg, the latter sixty-four feet high, and of white stone. See **CHORIUM**; **DOVE**; **PYX**.

**Tabernacles, The Feast of**, the third of the three great annual festivals, the other two being the feasts of the Passover and Pentecost, on which the whole male population were required to appear before the Lord in the national sanctuary. It was a celebration of the in-gathering of all the fruits of the year, and in general import as well as time corresponded to the modern Thanksgiving season. See **Festival**.

I. Names and their Signification. — This festival is called----1. פִּסְחָה פִּסְחָה, Chag ha-Sukkoth; Sept. Πρωτός σεπηρις, the Festival of Tent; Vulg. feria tabernacul- rum; 2. V. The Feast of Tabernacles (2 Chron. viii, 13; Ezra iii, 4; Zech. xiv, 16, 18, 19); σεπηρις (John vii, 2; Josephus, Ant. viii, 4, 5); σεπηρια (Philos, De Sept. § 24); ἡ σεπηρια (Plutarch, Sympos. iv, 6, 2); because every Israelite was commanded to live in tabernacles during its continuance (comp. Lev. xxii, 43).
TABERNACLES, FEAST OF

2. The Feast of Ingathering (Exod. xxiii, 16; xxxiv, 22), because it was celebrated at the end of the agricultural year, when the ingathering of the fruits and the harvest was completed. 3. It is called &quot;Laubhüttenfeast,&quot; repeated by Keil (Archäologie, vol. i, § 85, note 3) and Baur (Symbolik, ii, 660), that the rabbins call this festival חנוכית יום,&quot; dies multiplicationis, &quot;is incorrect. The Mishna, which Winer quotes in corroboration of this assertion, does not denominate this festival as such, but simply speaks of the many sacrifices offered on the first day thereof: &quot;If any one vews wine [for the Temple] he must not give less than three logs; if oil, not less than one log.&quot; I say, if I do not know how much I have set apart, he must give as much as he can use in five days.&quot; (Menachoth, xiii, 5) --- i.e., as is used on the first day of the festival [of Tabernacles] when it happens to be on a Sabbath, for on such a day there are more libations used than on any other day in the year, inasmuch as 140 logs of wine are required for the different sacrifices.

II. The Time at which this Festival was celebrated.

The time for the celebration of this feast is from the 15th to the 22d of Tishri, when the season of the year is changing for winter (Josephus, Antiq. iii, 10, 4); i.e., in the autumn, when the whole of the chief fruits of the ground — the corn, the wine, and the oil — were gathered in (Exod. xxiii, 16; Lev. xxiii, 39; Deut. xvii, 15-15). Hence it is spoken of as occurring &quot;in the end of the year, when thou hast gathered in thy labors out of the field.&quot; There were thus only four days intervening between this festival and the Great Day of Atonement. But though its duration, strictly speaking, was only seven days (Deut. xvi, 13; Ezek. xiv, 25), yet, as it was celebrated by the Israelites as one of their national feasts, this festival is sometimes described as lasting eight days (Lev. xxiii, 39; Neh. viii, 18).

III. The Manner in which this Festival was celebrated.

As it is most essential, in describing the mode in which this feast was and still is celebrated, to distinguish between the Pentateuchal enactments and those rites, ceremonies, and practices which gradually obtained in the course of time, we shall divide our description into three periods.

1. The Period from the Institution of this Festival to the Babylonian Captivity. — The Mosaic enactments about the mode of celebration of this festival are to be found recorded as follows: The Israelites are to live in tabernacles during the seven days of this festival, &quot;that your generations may know that I made the children of Israel to dwell in tabernacles when I brought them out of the land of Egypt&quot; (Lev. xxiii, 42, 43).

This first day alone, however, is to be a holy convocation (שְנַחֲלוֹת), and a Sabbath or day of perfect cessation of business, on which no manner of secular work is to be done (ver. 39); and all the able-bodied male members of the congregation, who are not legally precluded from it, are to appear in the place of the national sanctuary, as on the Passover and Pentecost (Exod. xxiii, 14, 17; xxxiv, 20).

On this day the Israelites are to take &quot;the fruit of goodly trees, with branches of palm-trees, boughs of thick trees, and willows of the brook&quot; (Lev. xxiii, 40), most probably to symbolize the varied vegetation which grew in the different localities of their journey through the wilderness — viz., the palm-tree of the plain where the Israelites encamped, the willow of the Jordan, and the other trees from which God gave his people water to drink; and the designedly indefinite thick bush on the mountain heights over which they had to travel; while the fruits of the goodly trees represent the produce of the beautiful land which they ultimately obtained after their pilgrimages in the wilderness (Pseudo, in Herzog's Real-Encyklopädie, s. v. &quot;Laubhüttenfeast&quot;). As this festival, however, though symbolizing by the several practices thereof the pilgrimage through the wilderness, was nevertheless more especially designed to celebrate the completion of the harvest in the Promised Land, as typified by the harvest of the goodly trees, and the plants of the wilderness, the Israelites are enjoined &quot;not to appear before the Lord empty, but every one shall give as he is able, according to the blessing of the Lord thy God which he hath given thee&quot; (Exod. xxiii, 15; Deut. xvi, 16, 17). Hence they are to offer burnt-offerings, meat-offerings, drink-offerings, and other sacrifices as follows: On the first day, the burnt-offering is to consist of thirteen bullocks, two rams, fourteen lambs, and one kid of the goats for a sin-offering, with the appropriate meat- and drink-offerings; the meat-offerings being three tenths of an ephah of flour mingled with one half of a hin of oil to each bullock, one tenth of an ephah of flour mingled with one third of a hin of oil to each ram, and one tenth of an ephah of flour mingled with one quarter of a hin of oil to each lamb; the drink-offering consisting of one half of a hin of wine to each bullock, one third of a hin of wine to each ram, and one quarter of a hin of wine to each lamb (Num. xv. 2-11; xxviii, 12-14). The same number of rams and lambs, and one kid, are to be offered on the following days; the number of bullocks alone is to be reduced by one each day, so that on the seventh day only seven are to be offered (xxix, 12-30). There are accordingly to be offered during these seven days in addition to the above, fourteen rams, ninety-eight lambs, and seven goats, with thirty-three and three-fifths ephahs of flour, sixty-four and one-sixth hins of oil, and sixty-four and one-sixth hins of wine. Moreover, the law is to be read publicly in the sanctuary on the first day of the festival every Sabbathal year (Deut. xxxi, 10-13). The six following days — i.e., 15th-22d of Tishri — are to be half-festivals; they were most probably devoted to social enjoyments and friendly gatherings, when every head of the family was to enjoy the feasts from the second or festival tithi with his son, daughter, man-servant, maid-servant, the stranger, the fatherless, and the widow (xvi, 14). See Tithi.

At the conclusion of the seventh day another festival is to be celebrated, denominating the concluding day (יֵיהָדָד), the eighth concluding day (יֵיהָדָד), Sept. ištišānu). Like the first day, it is to be a holy convocation, and no manner of work is to be done on it. As it is not only the finishing of the Feast of Tabernacles, but the conclusion of the whole cycle of festivals, the dwelling in the tabernacle is to cease on the seventh day, and sacrifices to be offered thereon are to be distinct, and unlike those offered on the preceding days of Tabernacles. The burnt-sacrifice is to consist of one bullock, one ram, and seven lambs one year old, with the appropriate meat- and drink-offerings, and one goat for a sin-offering.
TABLES, FEAST OF (Numb. xxix, 36-38). The sacrifices, therefore, were to be like those of the seventh new moon and the Great Day of Atonement. Being, however, attached as an octave to the Feast of Tabernacles, the Sabbatical rest and the holy convocation, which properly belong to the seventh new moon, are transferred to it, and hence the two festivals are frequently joined together and spoken of as one composed of eight days. There is only one instance on record of this festival being celebrated between the entrance into the Promised Land and the Babylonian captivity (1 Kings viii, 2; 2 Chronicles iii, 17). As the exposition of the Pentecostal enactments with regard to this festival is to be found till we come to the post-exilian period.

2. The Period from the Return from Babylon to the Destruction of the Temple.—In the account of the first celebration of this festival after the return of the Jews from the Babylonian captivity, the concise Pentateuchal injunction is expanded. Not only are the localities specified in which these booths are to be erected, but additional plants are mentioned, and the use to be made of these plants is stated. The Jews, according to the command, made themselves booths upon the roofs of houses, in the courts of their dwellings, in the courts of the sanctuary, in the street of the watergate, and in the street of the gate of Ephrata, from the olive-branches, the pine-branches, the myrtle-branches, the palm-branches, and the branches of the thick trees, which were to be gathered, to gather them in three booths seven days (Neh. viii, 15-18). The Sadducees of old, who are followed by the Karaites, took these boughs and the fruits to be identical with those mentioned in Lev. xxiii, 39, 40, and maintained that these were to be used for the construction and adornment of the booths or sikkhb. The Pharisees and the orthodox Jewish tradition, however, as we shall hereafter, interpret this precept differently.

When the Feast of Tabernacles, like all other festivals and precepts of the Mosaic law, began to be strictly and generally kept after the Babylonian captivity, under the spiritual guidance of the Great Synagogue, the Sanhedrim, and the doctors of the law—scribes, more minute definitions and more expanded applications of the concise Pentateuchal injunction were imperatively demanded, in order to secure uniformity of practice, as well as to infuse devotion and joy into the celebration thereof, both in the Temple and in the booths. Hence it was ordained that the tabernacle or booth (םיקּחָב, sikkhb) must be a detached and temporary habitation, constructed for the sole purpose of living in it during this festival, and must not be used as a permanent dwelling. The interior of it must neither be higher than twenty cubits, nor lower than ten palms; it must not have less than three walls; it must not be completely roofed in, or covered with any solid material, but must be thatched in such a manner as to admit the view of the sky and the stars; and the part open to the rays of the sun must not exceed in extent the part shaded by the cover. It must not be under a tree; neither must it be covered with a cloth, nor with anything which contracts defilement or does not derive its growth from the ground (Mishna, Sukkah, i, 1-2, 7).

The furniture of the hut was to be of the most simple and plain description. There was to be nothing which was not fairly necessary. It would seem, however, that there was no strict rule on this point, and that there was a considerable difference according to the habits or circumstances of the occupant (Carpzov, p. 415; Buxtorf, Sepher ha-Shavua, ii, 99). The most important and charming form of the hut, and of the great lights of the Feast of Tabernacles, in Surenhusi, Mischna, vol. ii; also a lively description of some of the huts used by the Jews in modern times in La Vie Juive en Alace, p. 170, etc.)

Every Israelite is to constitute the sikkhb his regular domicile during the whole of the seven days of the festival, while his house is only to be his occasional abode, and he is only to quit the booth when it rains very heavily. Even a child, as soon as he ceases to be dependent upon his mother, must dwell in the booth; and the only persons exempt from this duty are those designated as the courts of the elders and the children of infants (Mishna, Sukkah, ii, 8, 9). The orthodox rabbins in the time of Christ would not eat any food which exceeded in quantity the size of an egg out of the booth (ibid. ii, 5).

The four species of vegetable productions to be used during this holiday (Lev. xxiii, 39, 40) are the next distinctive feature of this festival, to which the ancient doctors of the law before the time of Christ devoted much attention. These are—1. "The fruits of the good tree" (בראמש ובראמש). As the phrase goodly or splendid tree (בראמש) is too indefinite, and the fruit of such a tree may simply denote the fruit of any choice fruit-tree, thus leaving it very vague, the Hebrew canons, based upon one of the significations of (בראמש) to dwell, to rest; see Rashi on Lev. xxiii, 40, decreed that it means the fruits which permanently rest upon the tree—i.e. the citron, the paradise-apple (בראמש, etymology). Hence the rendering of Onkelos, the so-called Jerusalem Targum, and the Targum of Jonathan (etymology = etropous, Josephus, Ant. xiii, 18, 5), cireum. Josephus also says (ibid. iii, 10, 4) that it was the fruit of the persim, a tree said by Pliny to have been conveyed from Persia to Egypt (Hist. Nat. xv, 18), and which some have identified with the peach (Malus persica). The etropous must not be from an uncurriced tree (Lev. xix, 23), nor from the uncleave-offering (comp. Numb. xxviii, 11, 12); it must not have a stain on the crown, nor without the crown, peeled of its rind, perforated, or defective, else it is illegal (Mishna, Sukkah, iii, 5, 6).

2. "Branches of palm-trees" ( RaisedButton ובראמש). According to the Hebrew canons, it is the shoot of the palm-tree when budding, before the leaves are spread abroad, and while it is yet like a rod, and this is called lulab (בראמש), which is the technical expression given in the Chaldean versions and in the Jewish writings for the Biblical phrase in question (Buxtorf, Lex. Talm. coll.141; Carpzov, Ap. Crit., p. 416; Drusius, Not. Maj. in Lev. xxiii). The lulab must at least be three hands tall, and must be tied together with its own kind (Mishna, Sukkah, iii, 1, 8; Maimonides, Tad Ha-Cheschak, Hilchoth Lulah, vii, 1).

3. The bough of a thick tree (בראמש ובראמש). This ambiguous phrase is interpreted by the ancient canons to denote the myrtle-branch (בראמש) whose leaves thickly cover the wood thereof: it must have three or more shoots around the stem on the same level of the stem, but if it has two shoots opposite each other on the same level, and the third shoot is above them, it is not thick, but is called (בראמש ובבראמש) a thin myrtle (Mishna, Sukkah, 32 b; Maimonides, ibid. vii, 2). This explanation accounts for the rendering of the Chaldean paraphrases of this phrase by hadas (בראמש), myrtle-branch. If the point of this myrtle-branch is broken off, or if its leaves are torn off, or if it has more berries on it than leaves, it is illegal (Mishna, Sukkah, iii, 3).

4. The willows of the brook (בראמש ובראמש הלילה) must be of that species the distinguishing marks of which are dark wood, and long leaves with smooth margin. If any one of these four kinds has been obtained by theft, or comes from a grove devoted to idolatry, or from a town which has been enticed to idolatry (comp. Deut. xiii, 12, etc.), it is illegal (Mishna, Sukkah, iii, 3). The willow must be legal, and having been ascended, the palm, the myrtle, and the willow bound up together into one bundle, denominated lulab.

It has already been remarked that the Sadducees in and before the time of Christ maintained that the boughs and fruit here mentioned (viz. Lev. xxiii, 40) are to be used for the construction and adornment of
the booths, and that they appeal to Neh. viii, 15, 16 in support of this view. This view has not only been es-
poused by the Karaite Jews, the successors of the Sad-
ducees [see SADDUCEES], but is defended by bishop Pat-
rick, Keil, and most modern Christian interpreters. Against this, however, is to be urged that—(1) The ob-
vious sense of the injunction (leaveth the fruit and the
boughs) is that these boughs are to be carried as symbols during the rejoicing, and that we should expect something more explicit than the simple and single word הבנה, and ye shall take, had it been designed that these boughs should be employed for the construction of the booths. (2) The fruit (יהב)—as the margin of the A. V. rightly has it, and not boughs, as it is in the text with which this
injunction commences—could surely not be among the materials for the construction of the booths. (3.) The law about the booths is entirely separated from the ordering of the fruit and boughs, as may be seen from a comparison of Lev. xxiii, 40 with ver. 42. (4.) The first day of this festival, as we have seen, was a holy convoca-
tion, on which all manner of work was interdicted. It is therefore not against the sanctity of the day to sup-
pose that they intended to take the fruit and boughs on the first day meant that the Israelites are to con-
struct with these plants the booths on this holy day.
(5.) The appeal to Neh. viii is beside the mark, inasmuch as different materials are there mentioned—e.g. olive,
branches, and myrtle branches—which are not likely to be used for making the booths, while the hadar fruit and the willow specified in the Pentateuchal injunction are omitted. With the regulations about the tabernacles and the boughs or lulab before us, we can now continue the description of the mode in which this festival was celebrated in the Temple.

14th of Tishri was the Preparation Day (תִּשְׁרִי בֵּיתֵל). The pilgrims came up to Jerusa-
lem on the day previous to the commencement of the festival, when they prepared everything necessary for
its solemn observance. The priests proclaimed the ap-
proximation of the holy convocation on the eve of this day by the blasts of trumpets. As on the Feasts of the Pass-
over and Pentecost, the altar of the burnt-sacrifice was
cleaned in the first night-watch (Mishna, Tomai, i, 8), and the gates of the Temple, as well as those of the in-
ner court, were opened immediately after midnight for the convenience of the priests who resided in the city,
and for the people who filled the court before the cock crew to have the sacrifices and offerings duly exam-
ined by the priests (Tobit i, 8). When the 14th of Tabernacles happened on the Sabbath they brought their palm-branches or lulabah on the 14th of Tishri to the
synagogue on the Temple mount, where the ser-
vant of the synagogue (מזכיר) deposited them in a
gallery, while the lulabah of the elders of the synagogue (לולית) were placed in a separate chamber, as it was
against the Sabbatical laws to carry the palms on the
Sabbath from the booths of the respective pilgrims to the Temple.

15th of Tishri.—At daybreak of the first day of the festival a priest, accompanied by a jubilant procession and by a band of music, descended with a golden pitch-
er holding three logs to the pool of Siloam, and, having filled it with water from the brook, he endeavored to reach the Temple in time to join his brother priests who carried the morning sacrifice to the altar (Tosip-
hta Sukkah, c. iii). Following in their steps, he entered
from the south through the water-gate into the inner
court (Mishna, Middoth, ii, 6; Gemara, Sukkah, 48 a).
On reaching the water-gate, he was welcomed by three blasts of the trumpet. He then ascended the steps of
the altar with another priest who carried a pitcher of
wine for the drink-offering. The two priests turned
to the left of the altar where two silver basins were fix-
ed with holes at the bottom; the basin for the water
was to the west and had a narrower hole, while the one
for the wine was to the east and had a wider hole, so
that both might get empty at the same time. Into
these respective basins they simultaneously and slowly
poured the water and the wine in such a manner that
both were emptied at the same time upon the base of
the altar. To the priest who poured out the water the
people called ἀρχετός, the reason for this is that when Alexander Jannai, who officiated as priest, was charged with this duty, being a Sadducee and re-
jecting the ordinances of the scribes, he poured the
water over his feet and not into the basin, whereupon
the people pelted him with their eθρόγια, or citrons.
At this catastrophe, which nearly at the close of the
Maccabean king, Alexander Jannai called for the as-
sistance of the soldiers, when nearly six thousand Jews
perished in the Temple, and the altar was damaged, a
corner of it being broken off in the struggle which en-
sued (Josephus, Ant. xiii, 13, 5; Mishna, Sukkah, iv, 9; Gemara, ibid. 48 a: 51 a; Gräz, Geschichte der Juden [2d ed. Leips. 1856], iii, 112, 473 sq.). See SCHRINE. The ceremony of drawing the water was repeated
every morning during the seven days of the festival.
At the same time that the priests went in procession
to the pool of Siloam, another jubilant multitude of peo-
ple went to a place outside Jerusalem called Ṣeida (סידי), where a temple was in willows. These willows
they gathered with great rejoicing, carried into the
Temple amid the blasts of trumpets, and placed them
at the altar in such a manner that their tops over-
hung and formed a sort of canopy (Mishna, Sukkah, iv, 5). The decorating process of the altar being first offered, Musaph (מעסיף); then the additional or special sacrifice for this festival prescribed in Numb. xxix, 12-38, which, on the first day, consisted of a burnt-offering of thirteen bul-
locks, two rams, and fourteen lambs, with the appro-
priate meat- and drink-offering; and a goat for a sin-offer-
ing, and then the peace-offerings, the vows, and the
free-will offerings, which constituted the repast of the people (Jerusalem, Sukkah, v). While these sacrifices were offered the Levites chanted the Great Hallel, as on the feasts of the Passover and Pentecost. On this occa-
sion, however, each of the pilgrims held in his right hand the lulab, or palm, to which were tied the twigs of my-
tre and willow as described above, and the eθρόγια, or
citron, in his left, while these psalms were chanted;
and, during the chanting of Ps. cxviii, the pilgrims
shook their palms three times—viz. at the singing of
ver. 1, 26, and 29 (Mishna, Sukkah, iii, 9). When the
Musaph chanted, the pace of the procession gradually went round the altar once, exclaimed, Hosanna, O Je-
ovah; give us help, O Jehovah, give prosperity! (Psa.
cxviii, 25). Thereupon the solemn benediction was
pronounced by the priests and the people dispersed,
and the repeated Ps. cxviii, 25, 16, 9, 6. Each one of the pilgrims then betook himself to his
respective booth, there to enjoy his repast with the
Levite, the stranger, the poor, and the fatherless who
shared his bread. This priestly function is described by the evan-
gelists (Matt. xxii, 8, 9, 15; John xxi, 12, 13). It is to be remarked that on the first day of the festival every Israelite carried about his lulab, or palm, all day; he carried it into the synagogue, held it in his hand while praying; and, only laid it down when
called to the meal. As the law did not enjoin them to hold the scroll [see SYNAGOGUE]; carried it with him when
he went to visit the sick and comfort the mourners
(Mishna, Sukkah, 41 a; Maimonides, Iad Ha-Cheseg, Halchot lulab, vii, 24).

16th-20th of Tishri.—These days were holydays;
they were called the middle days of the festival (ביניים)
—μεσονός των ἡμερῶν; John vii, 14), or the lesser festival (ביניון). Any articles of food or rainment
required for immediate use were allowed to be purchased privately during these days, and work demanded by the emergencies of the public service or required for the festival, the omission of which entailed loss or injury to the country, was not allowed.

On the night of the 15th, and on the five succeeding nights, the rejoicing of the drawing of water (תַּבָּרְנָאָלָא הַכָּלָאָל תְּבָרְנָאָלָא הַכָּלָאָל) was celebrated in the court of the Temple in the following manner: The people assembled in large masses in the court of the women at night after the expiration of the first day of the festival. The women occupied the galleries, which were permanent fixtures in the court (Mishna, Middoth, ii, 15), while the men occupied the space below. Four huge golden candelabra were placed in the centre of the court; each of these candelabra had four golden bases and four ladders, on which stood four lads from the rising youths of the priests with jars of oil wherewith they fed the basins, while the cast-off garments of the priests were used as wicks. The lights of these candelabra illuminated the whole city. Around these lights pious and distinguished men danced before the people with lighted flamed flamelamps in their hands, singing hymns and songs of praise; while the Levites, who were stationed on the fifteen steps which led into the woman's court, and corresponded to the fifteen psalms of degrees=steps (Psa. cxxv-cxxxiv), accompanied the songs with harps, psaltrim, dulcimers, and cymbals (Isa. v, 13). The dancing, as well as the vocal and instrumental music, continued till daybreak. Some of these pious men performed dexterous movements with their flamelamps while dancing for the amusement of the people. Thus it is reported that R. Simon II (A.D. 30-50), son of Gamaliel I, the apostate (Psa. xcvi, 5), used to dance with eight torches in his hand, which he alternately threw up in the air and caught again without their touching each other or falling to the ground (Ṭa'at ha-Sukkah, c. iv; Jerusalem, Sukkah, v, 4; Babylon, Yoma, 49 a). The splendid light of this grand illumination which suggested the remark of our Saviour—"I am the light of the world" (John viii, 12). Towards the approach of day two priests stationed themselves, with trumpets in their hands, at the upper gate leading from the court of the women into the court of the men; and when they announced the commencement of the ceremonial, the priests went before, led by the priest who sacrificed the bullocks, two rams, and one goat were offered by sixteen orders, while the fourteen sheep were offered by the other eight. As there was no bullock less offered each of the seven days, one order of priests left each day the sixteen orders who offered these bullocks and joined those who offered the fourteen lambs. Hence, "on the first day six of these orders offered two lambs each, and the two other orders one lamb each. On the second day five of the orders offered two lambs each, and the four other orders one lamb each. On the third day four of the orders offered two lambs each, and the remaining four offered only one lamb each. On the fourth day three orders offered two lambs each, and eight orders one lamb each. On the fifth day two orders offered two lambs each, and ten orders one lamb each. On the sixth day one order offered two lambs each, and twelve orders one lamb each; and on the last day one order only, who sacrificed the bullocks had diminished to eight, fourteen orders offered one lamb each" (Mishna, Sukkah, v, 6).

21st of Tishri. — The seventh day, which was denominating the last day of the Feast of Tabernacles (תַּבָּרְנָאָל הַכָּלָאָל הַכָּלָאָל תְּבָרְנָאָל), was especially distinguished in the following manner from the other six days. After the Ma'asph, the special festival sacrifice of the day, the priests in procession made seven circuits round the altar (ibid., iv, 5), whereas on the preceding days of the festival only one circuit was made. The willows (תַּבָּרְנָאָל הַכָּלָאָל), which surrounded the altar were then so thoroughly shaken by the people that the leaves lay thickly on the ground. The people also fetched palm-branches and beat them to pieces at the side of the altar, while the priests, from the altar and the first day of the festival obtained the names of the Day of Willows (תַּבָּרְנָאָל הַכָּלָאָל הַכָּלָאָל הַכָּלָאָל), the Great Hasmaa Day (תַּבָּרְנָאָל הַכָּלָאָל הַכָּלָאָל הַכָּלָאָל הַכָּלָאָל), and the Branch-branching Day (תַּבָּרְנָאָל הַכָּלָאָל הַכָּלָאָל הַכָּלָאָל הַכָּלָאָל). Hertzfeld suggests that the thrashing of the willows and palm leaves may have been to symbolize that after the last verdure of the year had served for the adornment of the altar the trees might...
now go on to cast off their leaves (Gesch. des Volkes Is-
raels, ii, 125). As soon as the threshing process was
over, the children who were present, and who also car-
ried in the Ark of the Covenant, put their hands in the
pores and ate up their etrogim, or citrons (Mishna, Sukkah, iv, 7); while the pilgrims, "in the afternoon of the
day, began to remove the furniture from the Tabernacles in
honor of the last day of the festival" (ibid, iv, 8), as the
obligation to live or eat in the booths ceased in the af-
fernoon of the seventh day. Thus the Feast of
Tabernacles itself had now terminated. The eighth
day, as we shall presently see, was a holy convoca-
tion, wherein no manner of work was allowed to be
done. It was the day on which the public offerings of the
people, the sacrifices prescribed in Numb. xxix, 36-38 were
offered, during which the Great Hallel was chanted by the
Levites. At the sacrifices, however, the twenty-four orders of priests were no longer
present, but were cast as on other festivals, and that order upon whom the lot fell offered the sacrifices
(Mishna, Sukkah, v, 6). The Israelites dwelt no longer
in the booths on this day, the joyful procession for the
drawing of water was discontinued, the grand illumina-
tion in the court of the women ceased, and the palms and
willows were used any more.

It only remains to be added, that when the Feast of
Tabernacles fell on a Sabbatical year (q. v.) the reading
of portions of the law (Deut. xxxi, 10-18) was after-
wards confined to one book of the Pentateuch. This
arose from the multiplication of sacrifices, in which the
law was read over each day, the vast numbers of read-
necessary to read extensive portions in the Temple
during this festival, insomuch as the people had now a
ample opportunities of listening in their respective places
of worship to the reading of the law and the prophets.
Hence also the reading of the law, which in olden days
took place in the open air, was now confined to the opening of
every day of this festival, was afterwards restricted to
that day. It was at last assigned to the high-priest, and
ultimately to the king.

It is said that the altar was adorned throughout the
seven days with sprigs of willows, one of which each
Israelite who came into the court brought with him.
The great number of the sacrifices has already been
noticed. The number of public victims offered on the
first day exceeded those of any day in the year (Menach.
xiii, 5). But besides these, the Chagigah or private
peace-offerings were more abundant than at any other
time; and there was reason to believe that the whole of
the sacrifices nearly outnumbered all those offered at the
other festivals put together. It belongs to the character
of the feast that on each day the trumpets of the Temple
are said to have sounded twenty-one times. Though
all the Hebrew annual festivals were seasons of rejoic-
ing, the Feast of Tabernacles was, in this respect, distin-
guished above all. The hours of private and striking spectacle over the city
day by day, and the lamps, the flameaux, the music, and the
joyous gatherings in the court of the Temple must
give a still more festive character to the night.

Hence it was called by the rabbins מט, the festival, or' יוקין. There is a proverb in Sukkah (v, 1), "He who
has never seen the rejoicing at the pouring-out of the
water of Siloam has never seen rejoicing in his life."
Maimonides says that he who failed at the Feast of
Tabernacles to enjoy the purple and the purple robe,
and to his means incurred special guilt (Carpov, p. 419).

The feast is designated by Josephus (Ant. viii, 4, 1)
ירוגה יומראתא ומייסו, and by Philo ירוגה מייסו.

Its thoroughly festive nature is shown in the accounts of its observance in Josephus (ibid, viii, 4, 1;
xxv, 38), as well as in the accounts of its celebration by
Solomon, Ezra, and Judas Maccabeus. From this fact,
and its connection with the ingathering of the fruits of
the year, especially the vintage, it is not wonderful that
Plutarch should have likened it to the Dionysiac
festivals, calling it θυρασοφια and κρατηροφοφια (Sym-
pos. iv).

3. From the Dispersion of the Jews to the Present Time.—Excepting the ordinances which were local and
belonged to the Temple and its sacrificial service, and
tating the exposition and more rigid explanation of some of the rites so as to adapt them to the altered con-
tion of the nation, the Jews to the present day con-
tinue to celebrate the Feast of Tabernacles as in the
days of the second Temple. As soon as the Day of
Atonement is over, every orthodox Israelite, according
to the ancient canons, begins to erect his booth in which
he and his family take up their temporary abode dur-
ing this festival. There is nothing in the written law to

itself with a קהל = palm, and etrog = citron, as defined
by the ancient canons. On the eve of the 14th of Tish-
ri, or of the Preparation Day (ספירה הלול), the festival
commences. All the Jews, attired in their festive gar-
ments, resort to the synagogue, where, after the evening
prayer (ברקך קדוש) appointed in the liturgy for this occa-
sion, the hallowed nature of the festival is proclaimed
by the cantor (הלל) in the blessing pronounced over the
cup of wine (הלל). After the evening service, every
family resorts to its respective booth, which is illumina-
ted and adorned with foliage and diverse fruit, and in
which the first festive meal is taken. Before, how-
ever, anything is eaten, the head of the family pro-
nounces the sanctuary of the festival and the cup of wine.

This sanctification or Kiddush (קידוש) was ordained
by the men of the Great Synagogue (q. v.), and as there is
no doubt that our Saviour and his apostles recited it,
we shall give it in English. It is as follows: "Blessed
art thou, O Lord our God, King of the universe, who
has created the fruit of the vine! Blessed art thou, O
Lord our God, King of the universe, who has chosen
thee, and is given thee from among the nations, and
has sanctified thee, and given thee the first fruits of
the earth, and of the wine, and of the oil, and of the
tongues, and has sanctified us with thy command-
ments. In love, O Lord, thou hast given us appoint-
ted times for joy, festivals, and seasons for rejoicing;
and this Feast of Tabernacles, this time of our glad-
ness, the holy convocation, in memory of the exodus
from Egypt; for thou hast chosen us, and hast sanc-
tified us above all nations, and hast caused us to in-
erit thy holy festivals with joy and rejoicing. Bless-
ed art thou, O Lord, who hast sanctified Israel and
the seasons! Blessed art thou, O Lord our God, King of
the universe, who has sanctified us with thy command-
ments, and has enjoined us to dwell in booths! Blessed
art thou, O Lord our God, King of the universe, who
has preserved us alive, sustained us, and brought us to
the beginning of this season!" Thereupon each mem-
ber of the family washes his hands, pronouncing the
prescribed benediction while drying them, and all en-
note the joy of the occasion, the joyous con-
the following prayer: "Blessed art thou, O Lord our God, King of the universe, who hast sanctified us with thy commandments, and hast enjoined us to take the palm-branch." Thereupon each one turns his citron upside-down and waves his palm-branch three times towards the east, three times towards the west, three times towards the south, and three times towards the north. The legate of the congregation pronounces the following benediction: "Blessed art thou, O Lord our God, King of the universe, who hast sanctified us with thy commandments, and hast enjoined us to recite the Hallel!" and the Hallel is chanted; when they come to Psalms, they cut the palm-branch is repeated at the first, tenth, and twenty-fifth verses, just as it was done in the Temple. Two scrolls of the law are then taken out of the ark (ארון בּנַשְׁמַת), and brought on the platform (לִפְנוֹתָא), when the lessons for the first day of the festival are read out from the law—Lev. xxii, 26-xxiii, 44; and Numb. xxix,12-16, as Maphtar; and from the prophets, Zech. xiv, 1-21. See Haphtarah.

After this the Musaph prayer is recited, which corresponds to the Musaph or additional sacrifices in the Temple for this special festival. When the legate of the congregation in reciting the Musaph comes to the passage where the expression priest (כָּבָד) occurs, the Aron is removed and the priests arise. Afterward, the latter have washed the hands of the former, the priests, with uplifted hands, pronounce the asscentional benediction (Numb. vi, 24-27) upon the congregation, who have their faces veiled with the Talmid. See Br'ige. The ark of the Lord is then placed in the centre of the synagogue, when the elders form themselves into a procession headed by the legate, who carries the scroll of the law, and all the rest carry the palm-branches in their hands and walk round the ark once, repeating the Hosanna, and waving the palms in commemoration of the procession round the altar in the Temple (Malmonides, Yad Ha-chesakah, Hilchot Lulab, vii, 29). When the morning service is concluded, the people betake themselves to their respective booths to partake of the festive repast with the poor and the stranger. In the afternoon, about five or six o'clock, they again resort to the synagogue to recite the Minchah prayer, answering to the daily evening sacrifice in the Temple. As soon as darkness sets in or the stars appear, the second day of the festival commences, the rite having doubled the day of holy convocation. The evening prayer as well as the practices for this evening resemble those of the first evening.

The ritual for the second day in the morning, as well as the rites, with very few variations, is like that of the first day. The lesson, however, is different, for on this day 1 Kings viii, 2-21 is read. After the afternoon service of this day the middle days of the festival begin, which last four days, when the ritual is like that of ordinary days, except that a few prayers bearing on this festival are occasionally inserted in the regular formula, lessons from the law are read each day as specified in the article Haphtarah, and the above-named procession goes round the ark. The seventh day, which is called the Great Hosanna ( הגדול חסנה), is celebrated with peculiar solemnity, inasmuch as it is believed that on this day God decrees the weather, or rather the rain, for the future harvest (Mishna, Rosh ha-Shanah, ii, 2; Gemara, ibid.). On the evening preceding this day the whole congregation prepares for himself a small bunch of willows tied up with the bark of the palm; some of the pious Jews assemble either in the synagogue or in the booths to read the book of Deuteronomy, the Psalms, the Mishna, etc., all night, and are immersed before the morning prayer. When the time of morning service arrives, numerous candles are lighted in the synagogue, and after the Shachrit (🥫קר) = morning prayer, which is similar to that of the previous day, seven scrolls of the law are taken out of the ark, and from one of them the lesson is read. The Musaph or additional prayer is then recited; thereupon a procession is formed, headed by the rabbi and the legate with the palms in their hands, and followed by those who carry the seven scrolls of the law. This procession goes seven times round the temple, in the Ark niche or the reading-desk, reciting the Hosannas, in accordance with the seven circuits around the altar which were performed in the Temple on this day, and waving their palms at certain expressions. The palms are then laid down, and every one takes up his bunch of willows and beats off the leaves at a certain part of the liturgy, in accordance with the beating off the leaves from the willows around the altar in the Temple, which took place on this day. On the evening of the seventh day the festival commences which concludes the whole cycle of festival (יומם תשאו). It is a day of holy convocation, on which no manner of work is done, and is introduced by the Kaddish (קדיש = proclamation of its sanctity, given in the former part of this section. On the following morning the Jews take part in the synagogal service called the morning prayer (קר), as in the first two days of the Feast of Tabernacles, inserting, however, some prayers appropriate for this occasion. Thereupon the special lesson for the day is read, the Musaph or additional prayer is offered, and the priests pronounce the benediction in the manner already described. The people no longer take their meals in the booths on this day. On the evening of this day again another festal commences, called the Rejoicing of the Law (חג ההלומש). After the reciting of the Eighteen Benedictions, all the scrolls of the law are taken out of the ark, into which a lighted candle is placed. A procession is then formed of the distinguished members, who are headed by the legate; they hold the scrolls in their hands, and go around the reading-desk; the scrolls are then put back into the ark, and only one is placed upon the desk, out of which is read the last chapter of Deuteronomy, and to the reading of which all persons present in the synagogue are called, including children. When the evening service is over the children leave the synagogue in procession, carrying banners with sundry Hebrew inscriptions.

On the morning of the next day the people again resort to the synagogue, recite the Hallel after the Eighteen Benedictions, empty the ark of all its scrolls, put a lighted candle into it, form themselves into a procession, and with the scrolls in their hands, and amid jubilant songs, go round the reading-desk. This being over, the scrolls of the law are once more put into the ark. After the reading of the two which are retained is read Deut. xxxiii, whereunto four persons are at first called, then all the little children are called as on the previous evening, and then again several grown-up people are called. The first of these is called the Bridegroom of the Law (קר), and after the cantor who calls him up has addressed him in a somewhat lengthy Hebrew formula, the last verses of the Pentateuch are read; and when the reading of the law is finished, one of the people embraces him, in which expression is printed at the end of every book in the Hebrew Bible as well as of every non-inspired Hebrew work. After reading the last chapter of the law, the beginning of Genesis (i, 1-3) is read, to which another one is called who is denominated the Bridegroom of Genesis (קר), and to whom again the cantor delivers a somewhat lengthy Hebrew formula; the Maphtar, consisting of Numb. xxix, 35-35, i, is then read from another scroll, and with the recitation of the Musaph, or additional special prayer for the festal, the service is concluded. The rest of the day is spent in rejoicing and fasting. The design of this festival is to celebrate the annual completion of the perusal of the Pentateuch, inasmuch as on this day the last sec-
TABERNACLES, FEAST OF

IV. Origin and Import of this Festival.—Like Pentecost, the Feast of Tabernacles owes its origin to the harvest, which terminated at this time, and which the Jews used as a festival of thanksgiving. The east of the country celebrated as a season of joy and thankfulness for the kindly fruit of the earth. This is undoubtedly implied in its very name, the Feast of Ingathering, and is distinctly declared in Exod. xxiii, 16: "Thou shalt keep... the Feast of Ingathering in the end of the year when thou hast gathered in the fruit of thy land." (comp. also Lev. xxiii, 39; Deut. xvi, 13.) With this agricultural origin, however, is associated a great historical event, which the Jews are enjoined to remember during the celebration of this festival, and which imparted a second name to this feast.—viz. "Ye shall dwell in booths seven days... that your generations may know that I made the children of Israel to dwell in booths, when I brought them out of the land of Egypt" (Lev. xxvii, 42, 43), whence its name, the Feast of Booths or Tabernacles. The Feast of Tabernacles, therefore, like the Passover, has a twofold significance—viz. it has a reference both to the annual course of nature and to a great national event. As to the reason for connecting this pre-eminently joyous festival of ingathering with the homeless dwelling of the Israelites in booths in the wilderness, we prefer the one given by the ancient Jews to theories advanced by modern commentators. In the midst of their great joy of new wine, oil, and all good things, and their hearts overflowing with rejoicing—the Israelites might forget the Lord their God, and say that it is their power and the strength of their arm which have gotten them this prosperity (Deut. viii, 12, etc.). To guard against this the Hebrews were commanded to quit their permanent and sheltered home and sojourn in booths at the time of harvest and in the midst of general abundance, to be reminded thereby that they were once homeless and wanderers in the wilderness, and that they are now in the enjoyment of blessings through the goodness and faithfulness of their heavenly Father, who fulfilled the promises made to Abraham, Isaac, and Jacob. This idea was still more developed after the Babylonian captivity, when the custom of building the booths was enacted. The booths, as we have seen, were to be covered in such a manner as to admit the view of the sky and the stars, in order that the remembrance thereof might be a reminder of their Creator, and remember that, however great and prosperous the harvest, the things of earth are perishable and vanity of vanities. This is the reason why the scribes also ordained that the book of Ecclesiastes should be read on this joyous festival.

The Feast of Tabernacles is by some connected with Sukkoth, the first halting-place of the Israelites on their march out of Egypt; and the huts are taken, not to commemorate the tents in the wilderness, but the leafy booths (sukkoth) in which they lodged for the last time before they entered the desert. The Feast would thus call to mind the transition from settled to nomadic life (Stanley, Siwaí and Polarine, Appendix, § 89).

Philo saw in this feast a witness for the original equality of all the members of the chosen race. All, during the week, poor and rich, the inhabitant alike of the palace and the hovel, lived in huts which, in strictness, were to be of the plainest and most ordinary materials and construction. From this point of view the Israelite would be reminded with still greater edification of the peculiar and toilsome march of his forefathers through the desert, when the nation seemed to be more immeasurably to depend upon God for food and water than at any other time; while the completed harvest stored up for the coming winter set before him the benefits he had derived from the possession of the land flowing with milk and honey which had been of old promised to his race.

But the culminating-point of this blessing was the establishment of the central spot of the national worship in the Temple at Jerusalem. Hence it was evidently fitting that the Feast of Tabernacles should be kept with an un wonted degree of observance at the dedication of Solomon's Temple (1 Kings viii, 2, 65; Josephus, Ant. iii, ch. iv, § 5), and again in connection with the enrollment of the Extra (Neh. viii, 13, 18), and a thirteenth time by Judas Macabaeus, when he had driven out the Syrians and restored the Temple to the worship of Jehovah (2 Macc. x, 5-8).

Literature.—Maine tomes, Jod Ha-Chesek, Hilkhot Nidah: Mesorat Ha-Tehillim, Shevet Ha-Hofrim (Utrecht, 1657), p. 317, etc.; Bibhr, Symbolik des Mosaischen Cultus (Heidelberg, 1839), ii, 624 sqq., 652 sqq.; Herzfeld, Geschichte des Volkes Israel (Nordhausen, 1857), ii, 120 sqq., 177 sqq.; The Jewish Ritual, entitled Derek Ha-Chagim (Vienna, 1859), p. 214 b sqq., 295 sqq.; Keil, Handbuch der biblischen Archäologie (2d ed. Frankfort-on-the-Main, 1859), p. 412 sqq.; Carpzov, App. Chr. d. 414; Buxtorf, Syn. Jud. c. xxi; Roland, Ant. iv, 5; Lightfoot, Temple Service, xvi, and Ezverit in Joan. vii, 2, 37; Otho, Lex. Rab. 230; the treatise Sukkah, in the Mishna, with Surenhusius's Notes; Hahnfeld, De Fest. Hebr. pr. ii; comp. the monographs De LobalEMALE Qui Fuit. Tab. in. Iken (in the Symbol, etc. [Bremen, 1744], i, 160), Briel (Viitsemb, 1716), and Truesreneter (Alt. 1743), Grodeck, De Ceremonia Palmarum in Fest. Tab. (Lips. 1694-95, also in Ugolino, vol. xviii); Dachs, on Sukkah, in the Jerusalem Genura (Utrecht, 1726); Timch, De Taber- naces Fertie (Prag. s. Let an.)

Tabitha (Tabitha; Vulg. Tabitha), also called Dorcas (Δορκας), a female disciple of Joppa, "full of good works," among which that of making clothes for the poor is specifically mentioned (Acts iv, 36-42). A.D. 32. While Peter was at the neighboring town of Lydda, Tabitha died, upon which the disciples at Joppa sent an urgent message to the apostle, begging him to come to their city. It is evident from the narrative whether they looked for any exercise of miraculous power on his part, or whether they simply wished for Christian consolation under what they regarded as the common calamity of their Church; but the miracle recently performed on Eneas (ver. 34), and the expression in v. 35 (ον βηθαλα δε ἀνεστήκατο), lead to the former supposition. Upon his arrival Peter found the deceased already prepared for burial, and laid out in an upper chamber, where she was surrounded by the recipients and the tokens of her charity. After the example of our Saviour in the house of Jairus (Matt. ix, 26; Mark v, 39), Peter put them all out, and kneeled down, and called Tabitha to rise (comp. Mark v, 41; Luke viii, 54). She opened her eyes and sat up, and then, assisted by the apostle, rose from her couch. This great miracle, as we are further told, produced an extraordinary effect in Joppa, and was the occasion of many conversions there (Acts iv, 42).

See Peter.

The name of "Tabitha" (Θαβίθηα) is the Aramaic form answering to the Hebrew תביחת, the female gazelle," the gazelle being regarded in the East, among both Jews and Arabs, as a standard of beauty—indeed, the word תביחת properly means "beauty." Luke gives "Dorcas" as the Greek equivalent of the name. Similarly we find Ἐναέας as the Sept. rendering of תביחת in Deut. xii, 15, 22; 2 Sam. ii, 18; Prov. vi, 5. It has been inferred from the occurrence of the two names that Tabitha was a Hellenist (see Whitby, ad loc.). This, however, does not follow, even if we suppose that the two names were actually borne by her, as it would seem to have been the practice even of the Hebrew Jews at this period to have a Gentile name in addition to their Jewish name. But it is by no means clear from the language of Luke that Tabitha actually bore the name of Dorcas. All he tells us is that the name of Tabitha means "gazelle" (ἐναέας), and for the benefit of his
TABLE

Gentile readers he afterwards speaks of her by the Greek equivalent. At the same time it is very possible that she may have been known by both names; and we learn from Josephus (War, iv, 3, 5) that the name of Dorcas was not unknown in Palestine. Among the Greeks also, as we gather from Lucretius (iv, 1154), it was a term of endearment. Other examples of the use of the name will be found in Wettstein, Ad loc. See DORCAS.

Table is the rendering in the A.V. usually of ἡ λεπίδα, shalchah (New Test. πάπης, likewise invariably so translated, except Luke xix, 25 ["bank"]); Acta xvi, 34 ["meat"]), so called from being extended (τηλαίω); comp. Homer, Od. x, 57; and see Psa. lxxix, 20), and denoting especially a table spread with food (Judg. i, 7; 1 Sam. xx, 29, 34; 1 Kings v, 7; x, 5; Job xxxvi, 16; Neh. v, 17); but spoken likewise of the table of show-bread (see below), and likewise of the leicteritnia prepared before idols (Isa. xlv, 11; see Schumann, De Leicteritmis in Suero Cod. [Lipa, 1739]). For the "table" of stone on which the Decalogue was engraved, see below. The word קֹלֶב, meshub, a dishen (q. v.), is once rendered "at table" (Cant. i, 12). See SITTING.

Little is known as to the form of tables among the Hebrews; but, as in other Oriental nations, they were probably not high. In Exod. xxv, 23, indeed, the table for the show-bread is described as a cubit and a half in height; but the table of Herod's temple, as depicted on the arch of Titus at Rome, is only half a cubit high. Probably the table of the ancient Hebrews differed little from that of the modern Arabs, namely, a piece of skin or leather spread upon the ground (hence the figure of entanglement in it, Psa. lxxix, 20). In Palestine, at the present day, the general custom, even of the better classes, is to bring a polygonal stool (kursî), about fourteen inches high, into the common sitting-room for meals. Upon this is placed a tray (semîyeh) of basket-work or of metal, generally copper, on which the food is arranged. These two pieces of furniture together compose the table (ʔāfrîh). The bread lies upon the mat beneath the tray, and a cruse of water stands near by, from which all drink as they have need. On formal occasions, this is held in the hand by a servant, who waits upon the guests. Around this stool and tray the guests gather, sitting on the floor (Thomson, Land and Book, i, 180). See EATING.

Among the ancient Egyptians, the table was much the same as that of the present day in Egypt, a small stool, supporting a round tray, on which the dishes are placed (see Lane, Mod. Eg. i, 190); but it differed from this in having its circular summit fixed on a pillar, or leg, which was often in the form of a man, generally a captive, who supported the slab upon his head, the whole being of stone or some hard wood. On this the dishes were placed, together with loaves of bread, some of which were not unlike those of the present day in Egypt, flat and round, as our crumpets. Others had the form of rolls or cakes, sprinkled with seeds. The table was not generally covered with linen, but, like the Greek table, was washed with a sponge, or napkin, after the dishes were removed, and polished by the servants, when the company had retired; though an instance sometimes occurs of a napkin spread on it, at least on those whose bore offerings in honor of the dead. One or two guests generally sat at a table, though, from the mention of persons seated in rows according to rank, it has been supposed the tables were occasionally of a long shape; as may have been the case when the brethren of Joseph "sat before him, the first-born according to his birthright, and the youngest according to his youth," Joseph eating alone at another table where "they set on for him by himself." But even if round, they might still sit according to rank, one place being always the post of honor, even at the present day, at the round table of Egypt (Wilkinson, Anc. Egypt., i, 179). See DINING.

The tables of the ancient Assyrians, as delineated upon the monuments, were often of a highly ornamental character (Layard, Nineveh, ii, 236; Botta, Nineveh, p. 188). See BANQUET.

For the triclinium of the Roman period, see ACCUMINATION; SUP.

Other Greek words than τράπεζα above (which likewise denotes occasionally a broker's counter [see MONEY-CHANGER]), not to mention ἰδρομασία, etc., often rendered "sit at table, which are translated "table" in Ancient Assyrian the A.V. in a different sense, are:

εἰσίν (Mark vii, 4), a bed (as elsewhere rendered), or couch used for eating, i.e., the triclinium above noticed; and παρεκκλήσις (2 Cor. iii, 8; Heb. ix, 4), a table for inscription; more fully παρεκκλήσιον, a writing-table (Luke i, 63).

See Table of the Law.

Table (יוֹם, ḥēbakh, a tablet, whether of stone [as below], wood ("board," Exod. xxvii, 8, etc.), or for writing on [Isa. xxx, 8; Hab. viii, 9; Prov. iii, 3]) or the Law (only plus in the phrases "table of stone" (יָדוֹן נַדְרָן, Exod. xxiv, 12; xxxii, 18; or יַנְדָרָן בְּ, xxxiv, 1, 2), and "tables of the covenant" [Deut. ix, 9, 15] or "of the testimony" [Exod. xxxxi, 18], such as those that were given to Moses upon Mount Sinai, being written by the finger of God, and containing the Decalogue, or Ten Commandments of the law, as they are rehearsed in Exod. xx. Many idle questions have been started about these tables; about their matter, their form, their number, who wrote them, and what they contained. The words which intimate that the tables were written by the finger of God, some understand simply and literally: others, of the ministry of an angel; and others explain merely to signify an order of God to Moses to write them. The expression, however, in Scripture always signifies the immediate Divine agency. See Wall-
De Duabus Tabelis Lapideis (Regiom. 1679); Michaelis, De Tab. Fac. Priorius (Vitember 1719).

**TABLE**

**CREDENCE.** A small side-table, commonly placed on the south side of the altar, for the altar breads, cruets of wine and water, unction dish, service-books, lilies, and other things necessary for the solemn or low celebration of the holy Eucharist. See CREDENCE-TABLE.

**TABLE, HOLY.** 1. The Lord's table or altar. 2. A frontal to an altar; e.g. one given to Glastonbury in 1671, made of gold, silver, and ivory, and one at St. Alban's in the 12th century. 3. The mensa, the upper stone or slab of the table containing the names of benefactors, registers of miracles, a list of indulgences, and the course of officiants, officiating clergy at the hours, and celebrants of masses.

**TABLE OF COMMANDMENTS.** A representation of the two tables of stone on which the Commandments were graven, ordered by a post-Reformation canon to be placed on the east wall of the church or chapel.

**TABLE OF DEGREES.** A formal list of relationships both within the Church of England, and between the Church and other bodies, which degrees the Church of England authoritatively prohibits marriage. This table, usually printed at the end of the Anglican Prayer-book, is ordered to be hung up in a prominent place in the nave of every church or chapel, by the authority of various visitation articles, especially those of archbishop Parker in 1653. See AFFIRMITY.

**TABLE OF MOVABLE FEASTS.** A list of movable festivals prefixed to the Book of Common Prayer for the guidance and instruction of both clergy and laity.

**TABLE OF LESSONS.** A tabular arrangement of Scripture lections for matins and evensong, daily arranged throughout the year. This table was first drawn up in 1549, altered in the revision of 1661, and again amended by Convocation in 1870.

**TABLE OF THE LORD, A phrase taken from Scripture, used to designate the holy table, or altar, of the Christian Church (1 Cor. x. 21). In the Old Test. the words table and altar appear to have been applied indifferently to the same thing (Ezek. xii. 22). Among other terms which have been used to designate the Lord's table, it is obvious to mention the word "altar" as having been so employed: it is a term, however, which, though it may easily be borrowed in a figurative sense from the ancient Scriptures, is neither found in the New Test. in the sense now referred to, nor has it the sanction of the Church. In the first Prayer-book of King Edward VI, published in 1549, which may be considered as a connecting link between the Missal and our present Prayer-book, the word "altar" occurs in the Communion Service at least three times: but in the service of 1552 (the second Prayer-book of Edward VI) it is in every instance struck out; and if another expression is used in its place, that expression is The Lord's Table. This circumstance is the more worthy of remark, because whereas in the older of these books the phrase "God's Board" was adopted as descriptive of "the Lord's Table" it was allowed to remain. See ALTAR.

**TABLE OF PROPHETIES.** See CREDENCE-TABLE.

**TABLE OF SECRETS.** A piece of paper placed at the foot of the cross on the altar, and containing the part of the service the priest is to say while turned to the altar, so that he cannot turn to look at it. This is placed upon pasteboard or thin wood, and richly framed. —Migne, Encyclop. Théologique, &c.

**TABLE OF SHEW-BREAD (עֵשֶׁב, עֵשֶׁב), table of the faces, Numb. iv. 7; הָעֵשֶׁב, הָעֵשֶׁב, table of the arrangement, 1 Chron. xxviii. 16; הָעֵשֶׁב, הָעֵשֶׁב, the pure table, Lev. xxiv. 6; 2 Chron. xiii. 11; Sept. ἥ τραπεζα.
TABLE 154

TABLE

1. Traditionally form according to Kiepert; 2. According to Paine; 3. According to Neumann; 4. According to Riggenbach. 5. Various Restorations of the Table of Shew-bread.

1. Traditionally form according to Kiepert; 2. According to Paine; 3. According to Neumann; 4. According to Riggenbach. 5. Various Restorations of the Table of Shew-bread.

TABLE OF SUCCESSION. A list of the successors of St. Peter made by Eusebius. He acknowledged that there was great difficulty in procuring information, and his account appears to have been compiled chiefly from reports or traditions. Of his fidelity he has given proof, by leaving vacancies in his conjectural list, when he had no light to guide him. These vacancies were subsequently filled up by Nicephorus, Callistus, and Simon the Metaphrast (see Elliott, Delineation of Romanism, p. 498). See Succession.

Table-tomb, a tomb shaped like a table or altar, erected over a grave or place of interment. See Tomb.

Table-turning. See Spiritualism.

Tablet is the inaccurate rendering in the A.V. of two Heb. words designating some kind of female ornament: 1. לֶדֶת, לֶדֶת (so called, according to Geisen, from the globular form); but, according to First, a locket or clasp; Sept. εὐφαλαία καὶ προαιδία, Vulg. dextralia, in Exod. xxxvi, 22; εὐφαλοί, manusaeae, in Numb. xxxvi, 50, probably drops hung like beads in a string around the neck or arm, as described by ancient authors on Arabia (Diod. Sic. iii, 44, 50; Strabo, xvi, 277). 2. βατόος, βατόος, batóoos, hand-arrings, houses of the soul (Isa. iii, 20; Sept. εἰκονιάς, Vulg. of factoriola), i.e. perfume-bottles of essences or smelling-salts kept in lockets suspended about the person. See Ornament.

TABLET, MEMORIAL. A tablet placed on the floor of a church or cloister, inscribed with a legend in memory of some person deceased.

TABLET, MURAL. A tablet on which an inscription has been placed, affixed to the wall of a church or cloister.

Tā'bor (Heb. Tabor, תַּבְוָר, a mound), the name of three spots in Palestine, all closely related to each other, if not indeed actually identical. See also AEONOTH-TABOR; CHISLOTH-TABOR.

1. MOUNT TABOR (Sept. Πάραβορος [v. τ. Τάφωρ], ἄρα Θαβώρ, Θαβωρ, but τὸ Ιραβώρον in Jer. and Hosea, and in Josephus [Ant. v, 5, 3; War, iv, 1, 1, etc.], who has also Ἰραβῶρον, as in Polybius, v, 70, 6; Vulg. Thabor), a mountain (77, Judg. iv, 6, 12, 14, elsewhere without this epithet, Josh. xix, 22, Judg. viii, 18; Psa. lxxxix, 12; Jer. xlvi, 18, Hos. v. 1), one of the most interesting and remarkable of the single mountains in Palestine. It was a Rabbinic saying (and shows the Jewish estimate of the attractions of the locality) that the Temple ought of right to have been built here, but was required by an express revelation to be erected on Mount Moriah.
1. Description.—Mount Tabor rises abruptly from the north-eastern arm of the plain of Esdraelon, and stands entirely insulated, except on the west, where a narrow ridge connects it with the hills of Nazareth. It presents to the eye, as seen from a distance, a beautiful appearance, being so symmetrical in its proportions, and rounded off like a hemisphere or the segment of a circle, yet varying somewhat as viewed from different directions, being more conical when seen from the east or west. The body of the mountain consists of the peculiar limestone of the country. It is studded with a comparatively dense forest of oaks, pistacias, and other trees and bushes, with the exception of an occasional opening on the sides and a small uneven tract on the summit. The coverts afford at present a shelter for wolves, wild bears, lynxes, and various reptiles. Its height is estimated at 1300 feet from the base, and 1865 from the sea-level (Tristram, Land of Israel, p. 498). Its ancient name, as already suggested, indicates its elevation, though it does not rise much, if at all, above some of the other summits in the vicinity. It is now called Jebel et-Tur, a name which some have tried to identify with Tabor, as if it were a contraction. But Jebel et-Tur means simply the “fort-hill,” and is used to designate the Mount of Olives and Gerizim, as well as Tabor. It lies about six or eight miles almost due east from Nazareth. The ascent is usually made on the west side, near the little village of Deb'rich, probably the ancient Daberath (Josh. xix, 12), though it can be made with entire ease in other places. It requires three quarters of an hour or an hour to reach the top. The path is circuitous and at times steep, but not so much so as to render it difficult to ride the entire way. The trees and bushes are generally so thick as to intercept the prospect; but now and then the traveller as he ascends comes to an open spot which reveals to him a magnificent view of the plain. One of the most pleasing aspects of the landscape, as seen from such points, in the season of the early harvest, is that presented in the diversified appearance of the fields. The different plots of ground exhibit various colors, according to the state of cultivation at the time. Some of them are red, where the land has been newly ploughed up, owing to the natural properties of the soil; others yellow or white, distant, are seen glittering through the clear atmosphere in the deep bed where they repose so quietly. Though but a small portion of the surface of the lake can be distinguished, the entire outline of its basin can be traced from a distance in a line of half an hour’s walk and commanding wide views of the subjacent plain from end to end. A copious dew falls here during the warm months. Travellers who have spent the night there have found their tents as wet in the morning as if they had been drenched with rain.

It is the universal judgment of those who have stood on the spot, that the panorama spread before them as they look from Tabor includes as great a variety of objects of natural beauty and of sacred and historic interest as any one to be seen from any position in the Holy Land. On the east the waters of the Sea of Tiberias, not less than fifteen miles distant, are seen glittering through the clear atmosphere in the deep bed where they repose so quietly. Though but a small portion of the surface of the lake can be distinguished, the entire outline of its basin can be traced from a distance in a line of half an hour’s walk and commanding wide views of the subjacent plain from end to end. A copious dew falls here during the warm months. Travellers who have spent the night there have found their tents as wet in the morning as if they had been drenched with rain.
tion, and appropriates as his own the language of the
psalmist (xxxix, 11, 12) —
"The heavens are thine, the earth also is thine; The
world and the fulness thereof, thou hast founded them. The
north and the south thou hast created them; Tabor and
Hermon shall rejoice in thy name."

2. History.—Tabor is not expressly mentioned in the
New Test., but makes a prominent figure in the Old. The
book of Joshua (xiv, 22) names it as the boundary
between Issachar and Zebulon (see ver. 12). Barak, at
the command of Deborah, assembled his forces on Ta-
bor, and, on the arrival of the opportunity moment, de-
sended thence with "ten thousand men after him" into the
plain, and conquered Sisera on the banks of the
Kishon (Judg. iv, 6-15). The brothers of Gideon, each
of whom "resembled the children of a king," were mur-
dered here by Zebah and Zalmunna (viii, 18, 19). Some
writers, after Herder and others, think that Tabor is in-
tended when it is said of Issachar and Zebulon in Deut.,
xxxiii, 19, that: "they shall call the people unto the
mountain; there they shall offer sacrifices of righteous-
ness." Stanley, who holds this view (Sinai and Pales-
tine, p. 351), remarks that he was struck with the as-
pearance of the place "as if it had been made especially
fitted for the convection of festive assemblies, and could
well believe that in some remote age it may have been a
sanctuary of the northern tribes, if not of the whole na-
tion. The prophet in Hos. v, 1 reproaches the priests
and royal family with having "been a snare on Mizpah
and a staff for the assembly of the aged." By an older
people probably is that they had set up idols and prac-
ticed heathenish rites on the high places which were
usually selected for such worship. The comparison in
Jer. xlvii, 18, "As Tabor is among the mountains and
Carmel by the sea," imports apparently that those
high places were "sanctuaries for their conspicuousness, beau-
ty, and strength."

After the close of Old-Test. history, Tabor continued
to be a strong fortress. In the year B.C. 218, Antiochus
the Great got possession of it by stratagem and strength-
ened its fortifications. The town existed on the sum-
mit in New-Test. times, but the defences had fallen into
decay, and Josephus caused them to be rebuilt (War,
iv, 1, 8).

3. Present Condition.—Dr. Robinson (Bibl. Res., ii, 353)
has thus described the ruins which are to be seen at present
on the summit of Tabor: "All around the top are the
ruins of the summit wall, which is about 260 yards in
some of which are bevelled, showing that the entire wall
was perhaps originally of that character. In sev-
eral parts are the remains of towers and bastions. The
chief remains are upon the ledge of rocks on the south
of the little basin, and especially towards its eastern
end; there are, in indiscriminate conflation, walls and
arches and foundations, apparently of dwelling-houses,
as well as other buildings, some of hewn, and some of
large bevelled stones. The walls and traces of a fortress
are seen here, and farther west along the southern brow,
of which one tall pointed arch of a Saracenic gateway is
still standing, and bears the name of Bibi el-Hawa, "Gate of
the Wind." Connected with it are loopholes, and others are seen near by. These latter fortifications
belong to the era of the Crusades; but the large bevel-
led stones we refer to a style of architecture not later
than the times of the Romans, before the Christian peri-
od, in-deed, a town and fortress already existed on Mount Ta-
bor. In the days of the Crusaders, too, and earlier, there
were here churches and monasteries. The summit has
many cisterns, now mostly dry." The same writer found
the thermometer here, 10 A.M. (June 18), at 38° Fahr.,
at 1 P.M. (June 19), and at 11 P.M. (June 18), at 36° Fahr.;
or, in an altar here, at which their priests from Nazareth perform an annual mass. The
Greeks also have a chapel, where, on certain festivals, they assemble for the celebration of religious rites.
Stanley, in his Notices of Localities Visited with the
Prince of Wales, remarks, "The fortress, of which the
ruins crown the summit, had evidently four gateways,
like those by which the great Roman camps of our own
country were entered. By one of these gateways my
attention was called to an Arabic inscription, said to be
the only one on the mountain." It records the build-
ing or rebuilding of the fortress by a certain Ishaq, son
of the sultan Abu Bekr on his return from the East
A.H. 607. In 1873 the monks began the construction of
a convent on the north-east brow of the mountain.

4. Traditional Importance.—In the monastic ages,
Tabor, in consequence partly of a belief that it was the
scene of the temptation of the Lord, was revered as a
hermita. It was one of the shrines from the earliest
period which pilgrims to the Holy Land regarded as
a sacred duty to honor with their presence and their
prayers. Jerome, in his Itinerary of Asia, writes,
"Scandebat montem Tabor, in quo transfiguratus est
Dominus; aspiciebat procul Hermon et Hermonim et
campos latisissimos Galileae (Jesreel), in quibus Sisara
prostratus est. Torrens Cisum qui mediam planitiam
dividebat, et oppidum juxta, Naim, monstrabantur." This
idea that our Saviour was transfigured on Tabor prevailed
extensively among the early Christians (see Eusebius,
Church History, iii, 358; Jerome, Itinerary, 40). It is, in
this nature, and often reappears still in popular religious
works. If one might choose a place which he would
decem pueriliter fitting for so sublime a transaction,
there is certainly none which would so entirely satisfy
our feelings in this respect as the lofty, majestic, beauti-
ful Tabor of to-day. "As long as there is a world, there
will be the same," said the poet. But let this not deter
us from acquiescing in the correctness of this opinion. The
summit of Tabor appears to have been occupied by a town
as early as the time when the Israelites took possession
of the country (Josh. xix, 22). Indeed, such a strong
position would scarcely be left unoccupied in those stormy times of Syria's history. As we have seen,
it is susceptible of proof from the Old Test., and from
later history, that a fortress or town existed on
Tabor from very early times down to B.C. 50 or 53;
and, as Josephus says that he strengthened the fortifica-
tions of a city there, about A.D. 60, it is certain that
Tabor must have been inhabited during the intervening
period, that is, in the days of Christ (comp. Polybius, v,
70, 6; Josephus, Ant. xiv, 6, 3; War, ii, 20, 1; iv, 1, 8;
Lyf., § 37). But as in the account of the transfigura-
tion it is said that Jesus took his disciples "up into a
high mountain apart and was transfigured before them"
(Matt. xvii, 1), so in the time of the New Test. the
summit of the mountain is spoken of as brought to them by
surroundings (Matt. vii, 27: "the mountain was brought
to them the summit of the mountain, where they were
alone by themselves (kai róioi). Yet it is not prob-
able that the whole mountain was occupied by edifices,
and it is quite possible that a solitary spot might have
been found amid its groves, where the scene could
have taken place unobserved. The event has, indeed,
been referred by many to Mount Hermon, on the ground
that our Lord's miracle immediately preceding was at
Caesarea-Philippi; but the interval of a whole week
("six days," Matt. xvii, 1, Mark ix, 2, "eight days,"
Luke ix, 26) decidedly favors the idea of a considerable
journey. See Tabor, Eth. See Tabor, Eth.

Some Church traditions have given also to Tabor
the honor of being Melchizedek's hill, from which he came
forth to greet Abraham, so that here is another king's
dale, which at Gerizim, if tradition is to be fol-
lowed. There was begun the building of the temple in
Athenasius (Opp. v, 7 [Colon, 1686]). That author
tells us that Salem, the mother of Melchizedek, ordered
him to go to Tabor. He went, and remained seven
years in the wood naked, till his back became like a
snail's shell.

The mountain has been visited and described by mul-
titudes of travellers, especially (in addition to those
named above) Russegger (Reise, iii, 258), Hassequist
(Voyage, p. 179), Volney (Voyage, ii, 272), Schubert
(Morgen, iii, 175), Burchhardt (Syria, p. 832), Stephens
(Travels, iii, 317), Nugent [lord] (Lands, etc., ii, 198);
TABORITES

2. The Plain (or rather Oak) of Tabor (טַ בר; Sept. τόπος Θαβωρ; Vulg. Quercus Tabor) is mentioned only in 1 Sam. x, 3 as one of the points in the homeward journey of Saul after his anointing by Samuel. It was the next stage in the journey after "Rachel's sepulchre at Zelzah." But, unfortunately, like so many of the other spots named in this interesting passage, the position of the Oak of Tabor has not yet been fixed. See Saul. Ewald seems to consider it certain (see above) that Tabor and Debahic are merely different modes of pronouncing the same name, and he accordingly identifies the oak of Tabor with the tree under which Deborah, Rachel's nurse, was buried (Gen. xxxvii, 8), and that again with the palm under which Deborah the prophetess delivered her oracles (Gen. xxv, 30; xlii, 488; iii, 29), and this again with the Oak of the old Prophet near Bethel (ibid. iii, 444). But this, though most ingenious, can only be received as a conjecture, and the position on which it would land us—"between Ramah and Bethel" (Judg. iv, 5)—is too far from Rachel's sepulchre to fall in with the conditions of the narrative of Saul's journey, so long as we hold that to be the traditional sepulchre near Bethel. We can only determine that it lay somewhere between Bethel and Bethel, but why it received the epithet "Tabor" it is impossible to discover. Yet we see from the names Chiiloth-Tabor and Aznuth-Tabor that the mountain gave adjunct titles to places at a considerable distance. See Zelzah.

3. The City of Tabor (Sept. Θαβωρ v. r. Θαβωρία; Vulg. Thabor) is mentioned in the lists of 1 Chron. vii, 23 as a city in "the Merarite Levites, in the tribe of Zebulun" (ver. 27). The catalogue of Levitical cities in Josh. xxii does not contain any name answering to this (comp. ver. 34, 35). But the list of the towns of Zebulon (ch. xix) contains the name of Chiiloth-Tabor (ver. 12). It is therefore possible either that this last name is abbreviated into Tabor by the chronicler, or (which is less likely) that by the time these later lists were compiled the Merarites had established themselves on the sacred mountain, and that the place in question is Mount Tabor.

Taborites, a section of the Husites, the other being known as the Calixtines. The Taborites were so called from the fortified city of Tabor, erected on a mountain, in the circle of Bethin, in Bohemia, which had been consecrated by the field-preaching of Huss. The gentle and pious mind of that martyr never could have anticipated, far less approved, the terrible revenge which his Bohemian adherents took upon the emperor, the empire, and the clergy, in one of the most dreadful and bloody wars ever known. The Hussites commenced their vengeance after the death of King Wenceslaus, Aug. 16, 1419, by the destruction of the convents and churches, on which occasions many of the priests and monks were murdered. John Ziska, a Bohemian knight, formed a numerous, well-mounted, and disciplined army, which built Tabor, as above described, and rendered it an impregnable depot and place of defense. He was called Ziska of the Cup, because one great point for which the Husites contended was the use of the cup by the laity in the sacrament. At his death, in 1429, the immense mass of people whom he had collected fell to pieces; but under Procopius, who succeeded him, the Hussites came again to the attack, and gained decisive victories over the imperial armies in 1427 and 1431. After this, as all parties were desirous of coming to terms of peace, the Council of Basle interposed, and a compromise was made; but hostilities again broke out in 1434, when the Taborites gained a complete victory. Owing, however, to the treachery of Sigismund, whom they had aided in ascending the throne, they were much weakened; and from this time they abstained from warfare, and maintained their disputes with the Catholics only in the deliberations of the diet and in theological controversial writings, by means of which their creed acquired a purity and completeness that made it similar in many respects to the Protestant confessions of the 16th century. Encroachments were gradually made on their religious freedom, and they continued to suffer until they gradually merged into the Bohemian Brethren (q. v.). See Besseyna, in Ludwig, Relig. Miss. vi, 142, 186; Zatzas Sylvius, Hist. Bohem. epist. 130.

Tabret (a contraction of taboret, for "taboring" [see Taber]) is the rendering in the A. V. of the two kindred words הַדָּר, tōph (Gen. xxxi, 27; 1 Sam. x, 5; xviii, 6; Isa. v, 12; xxiv, 8; xxx, 32; Jer. xxxi, 4; Ezr. xxviii, 13; elsewhere "timbrel") and דָּרִים, tōpheth (Job xvii, 6), which both mean a musical instrument of the drum kind (from דָּרִים, to beat). This sort of music has always been in great request, both in classical and sacred scenes, especially on festive occasions. See Musical Instruments. Especially has that form of the drum known as the tambourine been in vogue, particularly for female performers. See Timbre.

Ezek. xxviii, 13; elsewhere "timbrel") and דָּרִים, tōpheth (Job xvii, 6), which both mean a musical instrument of the drum kind (from דָּרִים, to beat). This sort of music has always been in great request, both in classical and sacred scenes, especially on festive occasions. See Musical Instruments. Especially has that form of the drum known as the tambourine been in vogue, particularly for female performers. See Timbre.

Modern Oriental Instruments of the Drum kind.

Ezek. xxviii, 13; elsewhere "timbrel") and דָּרִים, tōpheth (Job xvii, 6), which both mean a musical instrument of the drum kind (from דָּרִים, to beat). This sort of music has always been in great request, both in classical and sacred scenes, especially on festive occasions. See Musical Instruments. Especially has that form of the drum known as the tambourine been in vogue, particularly for female performers. See Timbre.
There are other and still graver difficulties in the ordinary plan of connecting these sheets, which would immediately be revealed in the actual case of recent construction, and will be anticipated by any one familiar with tent architecture.

(a) The “vail” hung exactly under the “taches” (Exod. xxvi, 33). But as the colored sheets (of course must have been innermost) were each twenty cubits wide and twenty-eight cubits long, if they were spread thus combined over the ridge-pole, the outer sheets between them which these “hooks” formed could in no case have well satisfied with this position: had they been stretched lengthwise of the building (as their close correspondence in length would indicate), the joint also would have been in the same direction, i.e., at right angles with the line of the vail; if crosswise of the building (as both Riggenbach and Ferguson suppose), then the line of the suture and that of the “vail” could only have coincided on the supposition that the entire extra ten cubits’ breadth of the embroidered “curtains” was to be laid aside outside the sides of the edifice, where it would be utterly useless and exposed to the weather. Nor could the requirements of the text cited be met by using these colored sheets singly in this manner: not longitudinally for the same reason as before; not transversely, for then their breadth would not cover both the apartments.

(b) The goats’-hair sheets, if combined by such a contrivance as an S hook, would be equally impracticable: placed longitudinally on the ridge (as their length would emphatically indicate by this second repetition of the thirty cubits), they would certainly leak intolerably at the joint, unless this were brought exactly at the peak, which the odd number of the “curtains” in this set (11) prevents; placed transversely, even in the most favorable manner (Fergusson’s), so as to break joints with the suture in the sheets under them, they must (as a corollary from the above combination of the latter) have had their extra width (fourteen cubits) project wholly beyond the rear of the building, leaving nothing for a porch (which Ferguson imagines).

(c) In any case it would have been a bad arrangement to make the suture in either set of roof canvas come exactly over so choice a piece of drapery as the “vail” was, for some drip must have been apprehended, or an embroidered lining (a delicate article with which to stop a leak) would not have been provided—to say nothing of Ferguson’s idea that the sheep-skin and fur robes may have been for the purpose of covering the joint! In short, the bare fact of leaving such a crack in the roof would have been an irredeemable blunder, which it is strange that a professional architect should make. On Riggenbach’s theory of a flat roof, all the rain would inevitably have poured through this crevice directly upon the vail. Jehovah planned better than this, we may be sure. See TABERNACLE.

Tachmas. See Night-hawk.

Tachmonite (Heb. [without the art.] Tachkemoni, תַּכְּמֹנִי; Sept. τάκαμωνι, v. τύχος θεοπαρά; Vulg. sapiuntissimus). The Tachmonite that sat in the seat, chief among David’s captains (2 Sam. xxiii, 8), is in 1 Chron. xi, 11 called “Jashobeam a Hachmonite; or, as the margin gives it, ‘son of Hachmoni.’ The Genevan version has in 2 Sam. xxiii, 8, ‘He that sat in the seat of wisedom, being chief of the princes, was Adino of Ezni,” regarding “Tachmonite” as an adjective derived from תַּכְּשָׁם, chokān, “wise,” and in this derivation following Kimchi. Kennicott has shown,
with much appearance of probability, that the words יסanh hاشeh hאשeh, "he that sat in the seat," are a corruption of Jashobeam, the true name of the hero, and that the mistake arose from an error of the transcriber, who carelessly inserted ינה from the previous verse where it occurs. He further considers "Tachmoni" a corruption of the septuagint in Chronicles, "son of Hachmoni," which was the family or local name of Jashobeam. "The name here in Samuel was at first וייאמוניא, the article מ at the beginning having been corrupted into מ; for the word מ in Chronicles is regularly supplied in Samuel by that article" (Disser. p. 82). Therefore he concludes "Jashobeam the Hachmonite" to have been the true reading. Josephus (Ant. vii, 12, 4) calls him Ζησαμων τος Αραμιαος, which favors Kennicott's emendation. In these corrections Keil (Comment. ad loc.) concurs. See Hachmoni; Jashobeam.

Tackling is the rendering in the A. V. of εξωθυ, which occurs only in Acts xxiv, 19, meaning the spars, ropes, chains, etc., of a vessel's furniture (as in Diod. Sic. iv, 79; so of household movables, Polyb. ii, 6, 67; equipes). Note also in Diod. Sic. iv, 7, 27; warlike apparatus in Diod. Sic. xi, 71). See Strut.

Taqquet, Andrew, a Jesuit of Antwerp, known for his skill in the mathematical sciences, died in 1660. He published, among other things, a good treatise on astronomy, an edition of Euclid, etc. The prejudices of the times seem to have prevented him from more effectually defending the system of Copernicus. His collected works were published at Antwerp (1669, 1707, fol.).

Tadmor (Heb. Tadmor), יתדמור, prov. city of Palmyra [see below]; Sept. Θεόμωρ ν. Θεομωρία; Vulg. Palmaria, a city "in the wilderness" which Solomon is said to have built (1 Chron. viii, 4). In the nearly parallel passage (1 Kings ix, 18), where the phrase "in the land" is added to the description, indicating that this, like the associated cities, was within Solomon's legitimate jurisdiction, the reading "Tadmor" is adopted in the A. V. from the Keri, or margin; the Kethib, or text, has רְמִית, Tamdr (Sept. Θεομώρος ν. Θαομωρία; Vulg. Palmaria), which should probably be pointed רְמִית, by contraction for רְמִית, or in imitation of the original רְמִית, the palm-tree (see Keil, Comment. ad loc.). See Palm. The name would seem to indicate an abundance of date-palms anciently in that vicinity, although they are scarce in its present situation.

1. Classical Identification. — There is no reasonable doubt that this city is the same as the one known to the Greeks and Romans and to modern Europe by the name, in some form or other, of Palmyra (Παλμύρα, Πάμυρος, Palmyra). The identity of the two cities results from the following circumstances: (1) The same city is specially mentioned by Josephus (Ant. viii, 6, 1) as bearing in his time the name of Tadmor among the Syrians, and Palmyra among the Greeks, and Jerome, in his Latin translation of the Old Test., translates Tadmor by Palmyra (2 Chron. viii, 4). (2) The modern Arab name of the city signifies the same, the Hebrew word, being Tadmor, or Tamasr. (3) The word Tadmor has nearly the same meaning as Palmira, signifying probably the "City of Palms," from Tamar, a palm; and this is confirmed by the Arabic word for Palms, a Spanish town on the Guadalquivir, which is said to be called Tamos. (4) The name Tadmor, or Tadmör, actually occurs as the name of the city in Aramaic and Greek inscriptions which have been found there. (5) In the Chronicles, the city is mentioned as having been built by Solomon after his conquest of Hamath-Zobah, and is called Tadmor (see the stor-city, which he built in Hamath). This accords fully with the situation of Palmira [see Hamath]; and there is no other known city, either in the desert or not in the desert, which can lay claim to the name of Tadmor.

2. History. — As above stated, Tadmor was built by Solomon, according to the view of the transcriber of the Septuagint in Chronicles, "son of Hachmoni," which was the family or local name of Jashobeam. The name here in Samuel was at first וייאמוניא, the article מ at the beginning having been corrupted into מ; for the word מ in Chronicles is regularly supplied in Samuel by that article (Disser. p. 82). Therefore he concludes "Jashobeam the Hachmonite" to have been the true reading. Josephus (Ant. vii, 12, 4) calls him Ζησαμων τος Αραμιαος, which favors Kennicott's emendation. In these corrections Keil (Comment. ad loc.) concurs. See Hachmoni; Jashobeam.

Tackling is the rendering in the A. V. of εξωθυ, which occurs only in Acts xxiv, 19, meaning the spars, ropes, chains, etc., of a vessel's furniture (as in Diod. Sic. iv, 79; so of household movables, Polyb. ii, 6, 67; equipes). Note also in Diod. Sic. iv, 7, 27; warlike apparatus in Diod. Sic. xi, 71). See Strut.

In these corrections Keil (Comment. ad loc.) concurs. See Hachmoni; Jashobeam.
the northern barbarians, who now began their incursions into the Roman empire, felt the force of his arms. Odenathus bequeathed his power to a worthy successor—Zenobia, his widow; and the names of Zenobia and Palmyra will always be associated so long as history remains. The virtue, the wisdom, and the heroic spirit of this extraordinary woman have seldom been equalled. At first she was content with the title of regent during the minority of her son Vaballatus, but unfortunately ambition prompted her to adopt the high-sounding title of “Queen of the East.” She soon added Egypt to her possessions in Syria, Asia Minor, and Mesopotamia, and ruled over it during a period of five years. In A.D. 271 the emperor Aurelian turned his arms against her, and having defeated her in a pitched battle near Antioch and in another at Emesa, he drove her back upon her desert home. He then marched his veterans across the parched plain and invested Palmyra, which capitulated after a brief struggle. Zenobia attempted to escape, but was captured on the banks of the Euphrates, and brought back to the presence of the conqueror. She was taken to Rome, and there, covered with her jewels and bound by fetters of gold, she was led along in front of the triumphant Aurelian. Zenobia deserved a better fate. If common humanity did not prevent the Roman citizens from exulting over an honorable, though fallen, foe, the memory of her husband's victories and of his services rendered to the State might have saved her from the indignity of appearing before a mob in chains.

Aurelian took Palmyra in A.D. 272, and left in it a small garrison, but soon after his departure the people rose and massacred them. On hearing of this the emperor returned, pillaged the city, and put the inhabitants to the sword. It was soon repaired by the orders of the conqueror, and the Temple of the Sun rebuilt; but it never recovered its former opulence. Twenty years later, under the reign of Diocletian, the walls of the city were rebuilt. It appears from an inscription to have assisted the emperor Alexander Severus in his wars against the Persians; and there are proofs of its having continued to be inhabited until the downfall of the Roman empire. There is a fragment of a building with a Latin inscription bearing the name of Diocletian; and there are existing walls of the city of the age of the emperor Justinian, together with the remains of a costly aqueduct which he built. It eventually became the seat of a bishop, but never recovered any importance. When the successors of Mohammed extended their conquests beyond the confines of Arabia, Palmyra was one of the first places which became subject to the caliphs. In the year 659 a battle was here fought between the caliphs Ali and Moawiya, and won by the former. In 744 it was still so strongly fortified that it took the caliph Merwan seven months to reduce it, the rebel Solyma having shut himself up in it.

From this period Palmyra seems to have gradually fallen into decay. Benjamin of Tudela, who was there towards the end of the 12th century, speaks of it as “Thadmor in the desert, built by Solomon of equally large stones [with Baalbec]. This city is surrounded by a wall, and stands in the desert, far from any inhabited place. It is four days' journey from Baalath [Baalbec], and contains 2000 warlike Jews, who are at war with the Christians and with the Arabic subjects of Nourreddin, and aid their neighbors the Mohammedans.” In connection with this statement, it may be remarked that the existing inscriptions of Palmyra attest the presence of Jews there in its most flourishing period, and that they, in common with its other citizens, shared in the general trade, and were even objects of public honor. One inscription intimates the erection of a statue to Julius Schalmalat, a Jew, for having at his own expense conducted a caravan to Palmyra. This was in A.D. 298, not long before the time of Zenobia, who, according to some writers, was of Jewish extraction. Irry and Mangles (Travels, p. 275) also noticed a Hebrew inscription on the architrave of the great colonnade, but give no copy of it, nor say what it expressed. The latest historical notice of Tadmor which we have been able to find is, that it was plundered in 1400 by the army of Timur Beg (Tamerlane), when 200,000 sheep

Plan of the Ruins of Palmyra.
were taken (Rankin, Wars of the Mongols). Abulafia, at the beginning of the 14th century (Descript. Arab. p. 98), speaks of Tadmor as merely a village, but celebrated for its ruins of old and magnificent edifices. These relics of ancient art and magnificence were scarcely known in Europe till towards the close of the 17th century. In the year 1678 some English merchants at Aleppo resolved to verify by actual inspection the reports concerning these ruins which existed in that place. The expedition was unsuccessful, for they were plundered of everything by the Arabs, and returned with their object unaccomplished. A second expedition, in 1691, had better success; but the accounts which were brought back received little credit, as it seemed unlikely that a city which, according to their report, must have been so magnificent, should have been erected in the midst of deserts. When, however, in the year 1758, Robert Wood published the views and plans which had been taken with great accuracy on the spot two years before by Dawkins, the truth of the earlier accounts could no longer be doubted; and it appeared that neither Greece nor Italy could exhibit antiquities which, in point of splendor, could rival those of Palmyra. From that time it has frequently been visited by travellers, and it is now readily accessible by an excursion on camels from Damascus. Its ruins have often been described and delineated.

3. Present Remains.—Tadmor was situated between the Euphrates and the Hamath, to the south-east of that city, in a fertile tract or oasis of the desert. Palm-trees are still found in the gardens around the town, but not in such numbers as would warrant, as they once did, the imposition of the name. The present Tadmor consists of numbers of peasants’ mud-huts, clustered together around the relics of the great Temple of the Sun. The ruins cover a sandy plain stretching along the bases of a range of mountains called Jebel Belaes, running nearly north and south, dividing the great desert from the desert plains extending westward towards Damascus and the north of Syria. The lower eminences of these mountains, bordering the ruins, are covered with numerous solitary square towers, the tombs of the ancient Palmyrenes, in which are found memorials similar to those of Egypt. They are seen to a great distance, and have a striking effect in this desert solitude. Beyond the valley which leads through these hills the ruined city first opens upon the view. The thousands of Corinthian columns of white marble, erect and fallen, and covering an extent of about a mile and a half, present an appearance which travellers compare to that of a forest. The site on which the city stands is slightly elevated above the level of the surrounding desert for a circumference of about ten miles, which the Arabs believe to coincide with the extent of the ancient city, as they find ancient remains whenever they dig within this space. There are, indeed, traces of an old wall, not more than three miles in circumference; but this was probably built by Justinian, at a time when Palmyra had lost its ancient importance and become a desolate place, and when it was consequently desirable to contract its bounds, so as to include only the more valuable portion. Volney well describes the general aspect which these ruins present: “In the space covered by these ruins we sometimes find a palace of which nothing remains but the court and walls; sometimes a temple whose peristyle is half thrown down; and now a portico, a gallery, or triumphal arch. Here stand groups of columns, whose symmetry is destroyed by the fall of many of them; there we see them ranged in rows of such length that, similar to rows of trees, they deceive the sight, and assume the appearance of continued walls. If from this striking scene we cast our eyes upon the ground, another, almost as varied, presents itself—on all sides we behold nothing but subverted shafts; some wholly, others shattered to pieces or dislocated in their joints; and on which side soever we look, the earth is strewn with vast stones, half buried; with broken entablatures, mutilated friezes, disfigured reliefs, effaced sculptures, violated tombs, and altars defiled by dust.” The colonnade and individual temples are inferior in beauty and majesty to those which may be seen elsewhere—such, for example, as the Parthenon and the remains of the temple of Jupiter at Athens; and there is evidently no one temple equal to the Temple of the Sun at Baalbec, which, as built both at about the same period of time and in the same order of architecture, suggests itself most naturally as an object of comparison. But the long lines of Corinthian columns at Palmyra, seen at a distance, are particularly imposing; and in their general effect and apparent vastness, they

General View of the Ruins of Palmyra.
seem to surpass all other ruins of the same kind. The examinations of travellers show that the ruins are of two kinds. The one class must have originated in very remote times, and consists of rude, unsightly hillocks of ruin and rubbish, covered with soil and herbs, such as now alone mark the site of the most ancient cities of Mesopotamia and Babylonia, and among which it would be reasonable to seek some traces of the more ancient city of Solomon. The other, to which the most gorgeous monuments belong, bears the impress of later ages. It is clear from the style of architecture that the later buildings belong to the three centuries preceding Diocletian, in which the Corinthian order of pillars was preferred to any other. All the buildings to which these columns belonged were probably erected in the 2d and 3d centuries of our era. Many inscriptions are of later date; but no inscription earlier than the 2d century seems yet to have been discovered.

The Temple of the Sun is the most remarkable and magnificent ruin of Palmyra. The court by which it was enclosed was 179 feet square, within which a double row of columns was continued all round. They were 390 in number, of which about sixty still remain standing. In the middle of the court stood the temple, an oblong quadrangular building surrounded with columns, of which about twenty still exist, though without capitals, of which they have been plundered, probably because they were composed of metal. In the interior, at the south end, is now the humble mosque of the village. A little beyond the temple begins the great colonnade, which runs nearly from east to west; it is of great length, and very beautiful. The columns are in good proportion and excellent preservation; each shaft consisting of three courses of stone admirably jointed, with a bracket for a bust or statue interposed between the second and third. In their present naked condition, these brackets are unsightly; yet when they were surmounted by statues the effect must have been extremely grand.

The necropolis of Palmyra lies half an hour north-west of the Temple of the Sun, in the Wady el-Kehdr, the ravine through which we made our approach to the city. The tombs, which are very numerous and extremely interesting, are almost all of them towers, two, three, four, and in one instance five stories high. The tomb of Jamblichus, mentioned by Wood, is now dreadfully dilapidated, its stairs crumbled away, and the floor of the fourth story entirely gone. It is five stories high, and was built in the third year of the Christian era. That of Manius is peculiarly interesting, and in some respects, indeed, the most curious building at Palmyra. It is in wonderful preservation, and its description will afford some idea of the others, as they are almost all built on the same plan, though far less beautiful. It is a lofty square tower, about fifteen feet in the side, the three corners of the steps at about a third of its height. An inscription in honor of the deceased is engraved on a tablet over the doorway. The principal apartment is lined with four Corinthian pilasters on each side, with recesses between them for mummies; each recess divided into five tiers of shelves on which lay bones of monkeys, and some ancient Palmyrenes buried their dead in the Egyptian manner, and Wood found in one of the tombs a mummy in all respects similar to those in the land of the Pharaohs.

4. Authorities.—The original sources for the history of Palmyra may be seen in the Scriptores Historiarum Augustae, Triginta Tyranni, vol. xiv.; Deus Aurelianus, vol. xxvi.; Eutropius, ix, 10, 11, 12. In A.D. 1696 Abraham Seller published a most instructive work, entitled The Antiquities of Palmyra, containing the History of the City and its Emperors, which contains several Greek inscriptions, with translations and explanations. Gesenius published an account of the Palmyrene inscriptions at Rome and Oxford in his Monumenta Scripturae Latinae Pheniceae, § 53. The best work on the ruins of Palmyra is still Robert Wood's splendid folio, entitled The Ruins of Palmyra, etc. (Lond. 1768). Very good are also the papers of M. de Mangles, Travels; Richter, Wallfahrten; Addison, Damascus and Palmyra. The last work contains a good history of the place; for which, see also Rosenmüller's Bibl. Geogr., translated by the Rev. N. Morren; and, in particular, Cellarius, Dissert. de Imp. Palmyrenae (1683). Gibson, in ch. iii. of his Decline and Fall, has given an account of Palmyra with his usual vigor and acuteness. For an interesting account of the present state of the ruins, see Porter, Handbook for Syria and Palestine, p. 543—549; Beaufort, Egyptian Sepulchres, etc., vol. i.; and Bideker, Syrie, p. 523. Besides Wood's great work, excellent views of the place have been published by Cassas in his Voyage Pittoresque de la Syrie; and later by Laborde in his Voyage en Orient. Recently photographs have been taken by various artists, and an accurate knowledge of the remains of this renowned and remarkable place is thus made accessible to the whole world.

Taft. GEORGE, D.D., an Episcopal minister, was born at Mendon, Mass., Aug. 37, 1791, and was licensed to the state of Diocese in the class of 1815. He pursued his theological studies under the direction of the Rev. Dr. Crocker, rector of St. John's Church, Providence, R. I., and was ordained a deacon by bishop Griswold, March 7, 1816, and a presbyter, Sept. 2, 1819. He became rector of St. Paul's Church in Pawtucket, R. I., in October, 1829, continuing for a time to teach in a school in Providence with which he had been connected for several years. Such double service not being altogether satisfactory to his bishop, he gave a gentle hint to the parish of St. Paul's that "he had not ordained their minister to keep school," and he devoted himself with great zeal and success to his work as a minister of the Gospel until his death, which occurred at Pawtucket, Dec. 11, 1869. His ministry was a little over fifty years in duration. (J. C. S.)

Taggart, SAMUEL, a Presbyterian minister, was born at Londonderry, N. H., March 24, 1754. He graduated at Dartmouth College in 1774, was licensed to preach by the Presbytery of Boston June 1, 1776, and was ordained to the pastoral charge of a small congregation at Cole- raine, Hampshire Co., Mass., Feb. 19, 1777. He was a member of Congress from 1803 to 1817. He died April 25, 1825. Mr. Taggart possessed a mind of great strength and vigor. He published several theological treatises, sermons, orations, political speeches, etc. (1800-19). See Sprague, Annals of the Amer. Pulpit, iii, 377; Allibone,
Tahpanhes (Heb. Taphpan'ehes, תַּפַּחְפָּהֶשׁ, Jer. ii, 16 [marg.]; xiliii, 7, 8, 9; xliv, 1, xlv, 14), or Tahpanhes (Heb. Taphpan'es, תַּפַּחְפָּהֶס, Jer. ii, 16 [text]), or Tahpanhes (Heb. Techaphpan'ehes, תַּפַּחְפָּהֶשׁ, Ezek. xxx, 18, all of Egyptian origin [see below]; Sept. Taphana or Taphna; Vulg. Taphane or Taphnhes), a city of Egypt, of importance in the time of the prophets Jeremiah and Ezekiel. The name is clearly Egyptian, and closely resembles that of the Egyptian queen Taphpanehes (q. v.), which, however, throws no light upon it. The Coptic name of this place, Tafhman (Quatemere, Mém. Géogr. et Hist. i, 297, 298), is obviously derived from the Sept. form: the Gr. and Lat. forms, Δαφινα, Herod., Δαφύνα, Stephan. Byz., Dafno, Ioh. Ant., are perhaps nearer to the Egyptian original (see Parthey, Zur Erdbunde des alten Aegypten, p. 528). Can the name be of Greek origin? If the Hanes mentioned by Isaiah (xxxiv, 4) be the same as Tahpanhes, as we have suggested (s. v.), this conjecture must be dismissed. No satisfactory Egyptian etymology of this name has been suggested, A. H. Sayce's Tahpanthes, "an answer beginning of the age" (Opusc. i, 348), being quite untenable; nor has any Egyptian name resembling it been discovered. Dr. Brugsch (Geogr. inachri, i, 300, 301, Taf. Ivi, No. 1728), following Mr. Heath (Exod. i, p. 174), identifies the fort Tellameh with Tahpanhes; but it is doubtless the present Tell Defnnem (described in the 4th Report of Egyptian Expl. Fund, Lond. 1888).

Tahpanhes was evidently a town of Lower Egypt near or on the eastern border. When Joahan and the other captains went into Egypt "they came to Tahpanhes" (Jer. xiii, 7). Here Jeremiah prophesies the conquest of Egypt by Nebuchadnezzar (ver. 8-13). Ezekiel foretells a battle to be there fought, apparently by the king of Babylon just mentioned (xxx, 18). The Jews in Jeremiah's time remained here (Jer. xlv, 1). It was an important town, being twice mentioned by the prophet with Noph or Memphis (xxvii, 14; xlv, 14), as well as in the passages last cited. Here stood a house of Pharaoh Hophra before which Jeremiah hid great stones, where the throne of Nebuchadnezzar would afterwards be set, and his pavement spread (xliii, 8-10). It is mentioned with "Ramesses and all the land of Gesar" in Judith i, 9. Herodotus calls this place Daphne of Pelusium (Δαφνας αἱ Ηναχώματα), and relates that Psammetichus I had here a garrison against the Arabians and Syrians, as at Elephanta against the Ethiopians, and at Marea against Libya, adding that in his own time the Persians had garrisoned it. The king of Persia, Darius, having identified the site of Daphne was therefore a very important post under the twenty-sixth dynasty. According to Stephanus, it was near Pelusium (s. v.). In the Itinerary of Antoninus this town, called Daphno, is placed sixteen Roman miles to the south-west of Pelusium (ap. Parthey, Map vi, where observe the site of Pelnepho near the Nile), its position seems to agree with that of Tel-Defennem, which Sir Gardner Wilkinson supposes to mark the site of Daphne (Modern Egypt and Thebes, i, 447, 448). This identification favors the inland position of the site of Pelusium, if we may trust to the distance stated in the Itinerary. Sir Sidney Smith. Sir Gardner Wilkinson (loc. cit.) thinks it was an outpost of Pelusium.
TAHENES

It may be observed that the Camps, τὰ Σπαραγιστέα, the fixed garrison of Ionians and Carians established by Psammetichus I, may possibly have been at Daphne.

TAHENES (Heb. Ṭaḥpenes', תֶּפֶנֶּשׁ, evidently of Egyptian origin, but uncertain in its signification [see TAHARNES]; Sept. Σαφένης v. ῥ. Σαφένια; Vulg. Taphena), a proper name of an Egyptian queen. She was one of the daughters of Pharaoh Nebuchadnezzar, and married to, and became the wife of, the king of Edomite, and who gave him her sister in marriage (1 Kings xi, 18-20). B.C. cir. 1000. In the Sept. the latter is called the elder sister of Thekemina, and in the addition to ch. xii Shishak (Susamk) is said to have given Ano, the elder sister of Thekemina, to Jeroboam. It is obvious that this or the later statement is irreconcilable, even if the evidence from the probable repetition of an elder sister be set aside, and it is scarcely necessary to add that the name of Shishak's chief or only wife, Karasamat, does not support the Sept. addition. See SHISHAK.

There is therefore but one Tahpenes or Thekemina. At the time to which the narrative refers there were probably two, if not three, lines ruling in Egypt—the Tanites of the twenty-first dynasty in the lower country; the high-priest kings at Thebes, but possibly they were of the same line; and perhaps one of the last faustini of the Ramesse family. The Tanitic line, as apparently the most powerful and as holding the territory nearest Palestine, the Pharaoh in question, as well as the father-in-law of Solomon, probably belonged. If Manetho's list be correct, he may be conjectured to have been Puseennes.

See PHARAON, 9. No name that has any near resemblance to either Tahpenes or Thekemina has yet been found among those of the period (see Lepsius, Königs-buch).

TAHRE'A (Heb. Tachhre'a, תַּחַרְאָה, cumming [Geænusis], or flight [Fœrus]; Sept. Τάχαρα v. r. Τάχαρα; Vulg. Tahræa), third name of the four sons of Micah, Jonathan's grandson (1 Chron. ix, 41); called in the parallel passage (viii, 55) Tarea (q. v.). B.C. post 1037.

TAHTIM-HODISHI (Heb. Tachtim 'Chodishi, תַּחֲטִים חוֹדִישִּי, lit. lovelands my month; Sept. Θατάθηων ή ετών Nasaiai v. Θατάθηων ή ετών Nasaiai; Vulg. inferiors Hodis), a region (γῆς, "land") mentioned as one of the places visited by Josb during his census of the land of Israel, between Gilead and Dan-jaan (2 Sam. xxiv, 6). Fürst (Handwörterb. i, 380) proposes to separate the "Land of the Tachtim" from "Hodish," and to read the latter as Harsh—a the people of Harosheth (comp. Judg. iv, 2). Thenius restores the text of the Sept. to read "the Land of Bashan, which is Edrei." This it itself is feasible, although it is certainly very difficult to connect it with the Hebrew. Ewald (Gesch, iii, 207) proposes to read Hermon for Hodish; and Geænusis (Theesaer, p. 450 a) dismisses the passage with a viv pro smo habendum. There is a district called the Ard et-Tahhta, to the east-northeast of Damascus, which recalls the old name. There is, however, nothing to show that the Tachtim of Israel was living so far from the Holy Land in the time of David. It seems probable from the connection that the whole is a proper name, descriptive, however, of the physical aspect of the region to which it was given. The route taken by the king's messengers was first eastward to Moab; then northward through Hiel; then from Gilead to "the land of Tahtrim-Hodashi," to Dan-jaan and Zidon. "The land of Tahtrim-Hodashi" was thus manifestly a section of the upper valley of the Jordan, probably that now called Ard-el-Hileh, lying deep down at the western base of Hermon.

TAITAZAK or TAYTASAK, Joseph, a Spanish Jew, belonged to those 300,000 exiles who had left to leave their country. With his father he went to Madrid, where he settled at Salonicca, where he wrote ציר וירק, "the fruitful bough of Joseph" (after Gen. xlix, 22), a commentary on Ecclesiastes, in a homiletico-philosophical style (Venice, 1599) — יוהי והלך לארץ פלשת, i. e. excerpts from his commentary on the Psalms, published with Penitii's work, הבשא וה מאשר, "the tongues of gold" (ibid. 1599). The MS. of his complete commentary on the Psalms is to be found in the libraries of Paris and Oxford — יוהי והלך לארץ פלשת, "the bread of sacredness," in allusion to Prov. ix, 17; a commentary on Daniel and the five Megillot, viz. the Song of Songs, Ruth, Lamentations, Ecclesiastes, and Esther (ibid. 1608). In its present form this work only contains fragments of Charles of Tal- tazak's commentaries on three books, and MSS. of the entire commentaries are still extant — יוהי והלך לארץ פלשת, a commentary on Job, extant — יוהי והלך לארץ פלשת, i.e. questions and decisions (ibid. 1622). See Furst, Bibl. Jud. iii, 412; De Rossi, Dizionario Storico, p. 314 (Germ. transl.); Steinacher, Catalogo Libr. Hebr. in Bibl. Bodl. coll. 1538; Kitto, Cyclop. s. v.; Fink, Sephardim, p. 413. (B. F.)

TAJUS, Samuel, bishop of Saragossa, lived in the 7th century. In the year 646 he went to Rome at the command of king Chindaswinth, and with the sanction of the pope, with the firm purpose of settling there, and bringing back the long-missed Expositio in Hobum s. Moravit, lib. xxxv, of Gregory I. According to tradition, he was shown in a vision the place where it was hidden. Tajus was also present at the eighth and ninth councils of Toledo. Besides an Epistula ad Eugenium Toletanum episcopum, he also wrote Sententiæ libri (Migne, Patrol. vol. lxx), containing extracts from Gregory's work on (a) God, creation, creature, government of the world; (b) incarnation, Church, Church government; (c) moral life, virtues; (d) sins and vices; (e) sinners, prince of this world, Antichrist; judgment, condemnation. Wherever Gregory failed him, he supplied his work from Augustine's writings. The work is preceded by a Prefacio ad Quiricum Banonemensem Episcopum, to whom the work is dedicated, together with the Responsio Quirici. See Renegadur Conversations-Lexikon, s. v.; Theologisches Universals-Lexikon, s. v. (B. F.)

TALAPOLIS, priests or friars of the Siamese and other Indian nations. They reside in monasteries under the superintendence of a superior, whom they call a Sanerat. Celibacy is obligatory upon them, and a breach of chastity in the case of any one of them is punished with death. They perform penance for such of the people as pay the tax; they are very learned, and strict in their rules of chastity. There are also female Talapolis, who live according to rules similar to those of the men. The residences of the Talapolis are much superior to those of the priests in Ceylon and Burmah, having richly carved entrances and ornamental roofs.

TALBOT, Peter, a Roman Catholic divine, was the son of sir William Talbot, and was born in the county of Dublin in 1620. He entered the society of Jesuits in Portugal in 1635; and after studying philosophy and divinity, went into holy orders at Rome, whence he returned to Portugal, and afterwards to Antwerp, where he read lectures on moral theology. He is supposed to be the person who, in 1666, reconquered Charles I; then at Cologne, to the popish religion; and Charles is reported to have sent him to Madrid to inform the court of Spain of his conversion. Sent to England in the interest of the Roman Church, he paid court to Cromwell, whose funeral he attended as a mourner. In 1669 pope Clement IX dispensed with his vows as desir'd, and advanced him to the titular archbishopric of Dublin. He immediately began to persecute those of his order who had signified their loyalty to the king, quarrelled with Plunket, the titular primas; and when the popish plot was discovered in England in 1678, he was imprisoned in Dublin Castle on suspicion of being
concerned in it, and died there in 1680. He was a man of ability and learning, but vain, ambitious, and turbulent. Among his publications are, De Naturali Fidei et Heresiv. Tractatus de Religione.—A Treatise of Religion and Government, and a Letter to the Roman Catholics in Ireland (Paris, 1674, 4to). See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Chalmers, Biog. Dict. s. v.

Talbot, Robert, D.D., an English divine and antiquarian, was born at Thorp, Northamptonshire, and was admitted to New College, Oxford, in 1529. He left the university of Oxford and was admitted to the benefice of Walce; and treasurer of the cathedral church of Norwich, April 9, 1547, which position he retained until his death, Aug. 27, 1558. He was a diligent searcher into the antiquities of his country, and his collections proved of great service to Leland, Bale, Cajus, Camden, and others. He also furnished archbishop Parker with many Saxon books. He was the first Englishman who illustrated Antoninus's Itinerary with various readings and notes, but his notes reach only to the sixth journey.

Talbot, Samson, D.D., a Baptist minister, was born near Urbana, O., June 28, 1828, and was a graduate of Granville College, now Denison University, O., in 1852, and of Andover Theological Seminary in 1859. He was ordained in 1856, and was pastor of the Baptist Church in Dayton, O., eight years, 1856-64, and was then appointed president of Denison University, which position he held until his death, which occurred at Newton Centre, Mass., June 29, 1875. President Talbot was an able and successful scholar, a profound thinker, and bade fair to stand in the very front rank of scholars in this country. (J.C.S.)

Talbot, William, D.D., an English prelate, was born at Stuarton Castle in 1639, and in 1674 entered as a gentleman commoneer of Oriel College, Oxford. After graduation he entered holy orders, and in the reign of James II. preached and acted with great zeal against popery. In April, 1691, he was nominated to the deanship of Worcester, and Sept. 24, 1699, was advanced to the bishopric of Oxford. He was translated to the bishopric of Sarum, April 23, 1715; and in September, 1722, was translated to that of Durham, of which county he was made lord-lieutenant and custos rotulorum. He died Oct. 10, 1730. There are in print two speeches of his in the House of Lords, and a volume of Sermons (8vo).

Talent, representing the Greek ταλαντον, Lat. talantum, is the rendering of the Heb. and Chald. קָבָר, a circle, the coin being no doubt of that form. It was the largest weight among the Hebrews, being used for metals, whether gold (1 Kings ix, 14; x, 10, etc.), silver (2 Kings v, 22), lead (Zech. v, 7), bronze (Exod. xxxviii, 29), or iron (1 Chron. xxiii, 7). A bill sufficient for the site of a city was sold for two talents of silver (1 Kings xvi, 24); and for 1000 talents of silver the friendship of the Aysian king was purchased (2 Kings xv, 19); another Assyrian king laid the kingdom of Judah under a tribute of 300 talents of silver and 30 of gold (xxi, 14); a similar tribute imposed by an Egyptian Egyptian (2 Kings xvii, 26). One talent of gold (xxiii, 33); the crown of an Ammonite king weighed one talent of gold (2 Sam. xii, 30). The sacred utensils of the Tabernacle and the Temple amounted to many talents of silver and gold (Exod. xxv, 39; xxxviii, 24, 25, 27; 1 Kings ix, 14, etc.). But there must have been many talents of gold in the treasury of Pharaoh (Chap. xxvii, see Kitto, Pict. Bible, note ad loc.). See Nummer. In the post-exilian period, likewise, talents were a mode of estimation (1 Macc. xi, 28; xiii, 16, 19; xv, 31; 2 Macc. iii, 4, etc.). In the New Testament, the talent only occurs in a parable (Matt. xxv, 15 sq.), and as an estimation (Matt. ii, 21); Luke (viii, 1 sq.). But in Exod. xxxviii, 25, 26, it appears that one talent as equivalent to 3000 shekels of the sanctuary (Schmidt, Bibl. Mathem. p. 183; Böckh, Metrol. Unters. p. 55). See Shekel. As the mina (q. v.) consisted of 50 sacred shekels, it follows that the talent was equal to 60 minas; just as the Attic talent had 60 minas. See Met- rology.

Talent figuratively signifies any gift or opportunity God gives to men for the promotion of his glory. "Everything almost," says Mr. Scott, "that we are, or possess, or meet with, may be considered as a talent; for a good or a bad use may be made of every natural endowment, spiritual or temporal. If they may remain unoccupied through inactivity and selfishness, Time, health, vigor of body, and the power of exertion and enduring fatigue—the natural and acquired abilities of the mind, skill in any lawful art or science, and the capacity for close mental application—the gift of speech, and that of speaking with fluency and propriety, and in a convincing, attractive, or persuasive manner—wealth, influence, or authority—a man's situation in the Church, the community, or relative life—and the various occurrences which make way for him to attempt anything of a beneficial tendency; these, and many others that might be enumerated, are potentially in every one of us. If the consistent Christian will improve to the glory of God and the benefit of mankind. Nay, this improvement procures an increase of talents, and gives a man an accession of influence and an accumulating power of doing good; because it tends to establish his reputation for prudence, integrity, honesty, and diligence. From an indifferent and disinterested benevolence it gradually forms him to an habitual readiness to engage in beneficent designs, and to conduct them in a gentle, unobtrusive, and unassuming manner: it disposes others to regard him with increasing confidence and affection, and to approach him with satisfaction; and it procures for him the countenance of many persons whose assistance he can employ in accomplishing his own salutary purposes."

Talulons, Lex (law of retaliation). This was a Roman law to the effect "That if any one called another man's credit, or fortune, or life, or blood into question in judgment, and could not make out the crime alleged against him, he should suffer the same penalty that he intended to bring upon the other." Although the ecclesiastical law could not inflict the punishment of retaliation for false witness against any man's life, yet such false testimony was early denounced by the Church as the highest species both of calumny and murder, and consequently brought such witnesses under all the ecclesiastical penalties due to those crimes.—Bingham, Christ. Antq. b. xxvi, ch. x, § 9.

Talith. See FRINGE.

Tallitha Cu'mi (tallitha koymi; Aram. נלָלֶתַה קְוָמִי, telithâ kiemi), two Syriac words (Mark v, 41) signifying "Dame, arise." The word נלָלֶתַה occurs in the Chald. paraphrase of Prov. ix, 3, where it signifies a γυνη; and Lightfoot (Horæ Heb. Mark v, 41) gives an instance of its use in the same sense by a rabbinical writer. Gesenius (Theatr. p. 540) derives it from the Hebrew נלע, a lamb. The word נלע occurs both Hebrew and Syriac (2 p. fem. imperative, Kal, and Peal), signifying stand, arise. As might be expected, this clause of the verse, after Cumi, is not found in the Syriac version. Jerome (Ep. liii ad Pammachium, Opp. ii, 308 [ed. Vallarsi] records that Mark was blamed for a false translation on account of the insertion of the words I say unto thee; but Jerome points to this as an instance of the superiority of a free over a literal translation, inasmuch as the words inserted serve to show the emphasis of our Lord's manner in giving this command on his own personal authority.

Talents, Francis, an eminent Nonconformist divine, was born at Pleyben, near Chesterfield, England, November, 1619, and was educated at the public-schools.
of Mansfield and Newark. He entered Peterhouse, Cambridge, but being chosen sub-tutor to the sons of the earl of Suffolk, removed to Magdalen College, of which he acted as junior and senior preacher. In 1648 he was ordained at London in the Presbyterian form, and in 1652 became minister of St. Mary's, Shrewsbury. At the Restoration, not wishing to be re-ordained, he was ejected, and in 1673 returned to Shrewsbury, and became pastor of a Dissenting congregation there. He died April 11, 1708, and was buried in St. Mary's, Shrewsbury. He published, *View of Universal History* to 1700 (Lond. 1700, fol.); *Short History of Schisms* (1705, 8vo); *Considerations on S. Garvonne's Answer* (See Chalmers, *Biblic. Dict. s. v. Allibone, *Dict. of Brit. and Amer. Authors, s. v.*

**Talleyrand (de Périgord), Alexandre Angélique**, a noted French prelate, was born in Paris, Oct. 16, 1756, and after a course of education at the Collège de la Flèche, the Seminary of St. Sulpice, and under the direction of abbé Bourlier, became one of the almoners of the king, later vicar-general of Verdun, and (in 1762) abbot of Gard (diocese of Amiens). Having been chosen canon of the archdiocese of Rheims, he was consecrated at Rome, Sept. 26, 1766, under the title of archbishop of Troyes in perpetuity. He succeeded to the archbishopric of Rheims Oct. 27, 1777, and was very active in improving his diocese, as well as in public and ecclesiastical functions, sharing the varied fortunes of the monarchy during the first phase of the French Revolution. After having been a refugee at Aix-la-Chapelle, Brussels, and other places, he was recalled in 1803, and on July 28 was made cardinal, and on Aug. 8 following bishop of Paris, where he died, Oct. 20, 1821. (See Hoefer, *Nouv. Bibl. Générale*, s. v.)

**Talleyrand (de Périgord), Élie**, a French prelate, was born at Perigueux in 1601, and was educated for the priesthood at the college and school of St. Sulpice in the city of that name. He became successively archdeacon of Perigueux, dean of Richmond (diocese of York), abbot of Chancelas, and (Oct. 10, 1243) bishop of Limoges, although he was not consecrated because of his youth; and in 1238 he was translated to the see of Auxerre, although he continued to reside at Oudan, engaged in literary studies. He was created cardinal May 22, 1231, and thenceforth became active in public affairs, in which he experienced many remarkable adventures. He died at Avignon, Jan. 17, 1364, leaving a vast fortune. (See Hoefer, *Nouv. Bibl. Générale*, s. v.)

**Tallis, Thomas**, a celebrated English musician, flourished about the middle of the 16th century. Under the patronage of which he became gentleman of the royal chapel and organist. Although he was a diligent collector of musical antiquities, and a careful preserver of the works of other men, his compositions are so truly original that he may justly be said to be the father of the cathedral style. Notwithstanding his supposed attachment to the Roman religion, it seems that Tallis accommodated himself and his studies to the alterations introduced at the Reformation. With this view, he set to music those parts of the English liturgy which at that time were deemed most proper to be sung; viz., the tenebrae service, the morning and evening compline service, the Venite Exultate, Te Deum, and Benedictus; and the other, which is part of the communion office, consisting of the Kyrie Eleison, Nicene Creed, and Sanctus; as also the evening service, consisting of the Magnificat and Nunc Dimittis. He also set many motets to the masses and responsories, and composed that litany which for its excellence is sung on solemn services in all places where the choral service is performed. The services of Tallis contain also chants for the Venite Exultateus and the Creed of St. Athanasius, two of which are published in Dr. Beveridge's *Cathedral Church*, vol. 1. St. Paul's the three above mentioned, constituting what are now termed the morning, communion, and evening services, in four parts, with the preces, responses, and litany, Tallis composed many anthems. He died Nov. 23, 1586, and was buried in the parish church of Greenw. which, in 1826, is the presbytery where he had been ordained in 1648. He published, *View of Universal History* to 1700 (Lond. 1700, fol.); *Short History of Schisms* (1705, 8vo); *Considerations on S. Garmonne's Answer* (See Chalmers, *Bibl. Dict. s. v.* Allibone, *Dict. of Brit. and Amer. Authors, s. v.*

**Talmage, Samuel Kennedy, D.D., a Presbyterian divine, was born at Somerville, N. J., Dec. 11, 1798. He graduated at the College of New Jersey in 1820; taught in an academy for two years; was tutor in the College of New Jersey for three years, employing his leisure hours in studying theology privately; was licensed and ordained to the ministry in 1825 by the Newton Presbytery; labored as a missionary at Hamburg and other points in Edgefield District, S. C., for one year; in 1827 was a college both with the Rev. S. S. Davis, D.D., in supplying the First Presbyterian Church at Augusta, Ga.; in 1828 became pastor of the Augusta Church; in 1829 was elected professor of languages in Oglethorpe University, which chair he held until 1840, when he was elected president of the institution, where he continued to labor until 1862, when his health failed. He died Sept. 2, 1865. Dr. Talmage was an able minister, a fine scholar, and a successful instructor. (See Wilson, *Presb. Hist. Almanac*, 1856, p. 362.)

**Talmai (Heb. Talmai)**, *תָּלָּמָי, furrowed [Genesi- us] or bold [Furst, who comp. θαλαμιός, Josephus, Ant. xiv, 8, 1; Bar-θολομαῖος, Matt. x, 33]; Sept. θαλά- μαι, θαλάμοι, θαλάμων, etc.; Vulg. Θαλμαί or Θολμαῖ], the name of two men.

1. Last name of the three gigantic "sons of Anak" in Hebron (Num. xiii, 22), who were expelled by Caleb (Josh. xv, 14) and slain by the Judahites (Judg. i, 10). B.C.1618. It has been thought that these people are depicted on the Egyptian monuments as a tall, light-complexioned race. In the hieroglyphic inscription they are named *Talmak*, which may be the Egyptian rendering of the Hebrew word *Talmai*, allowing for the interchange of the liquid l for s, so constant in all languages. The figure is from a picture on a wall of the tomb of Ainepnekthi, supposed to represent a man of the tribe of Talmui, one of the sons of Anak (Burton, *Excerpta Hieroglyphica*).

2. Son of Ammihud and king of Gesher (2 Samm, iii; xiii, 37; 1 Chron. iii, 2), B.C. 1045. His daughter Maachah was one of the wives of David and mother of Absalom. He was probably a petty chieftain dependent on David, and his wild retreat in Bashan afforded a shelter to his grandson after the assassination of Amon. (See David.)

**Talmon (Heb. Talmon), *תַּלְמֹן, oppressor; Sept. Ταλμών καὶ Ταλμών, v. r. Ταλμών, Ταλμών; Vulg. Telmon*, the head of a family of doorkeepers in the Temple, "the porters for the camps of the sons of Levi" (1 Chron. ix, 17; Neh. vii, 31). B.C.1013. Some of his descendants returned with Zerubbabel (Ezra ii, 42; Neh. vii, 45), and were employed in their hereditary office in the days of Nehemiah and Ezra (Neh. xii, 25), for the proper names in this passage must be considered as the names of families.

**Talmud** (*תַּלְמָד, talmud; doctrine; from הָלַם, to teach*). The Talmud, "that wonderful monument of human industry, human wisdom, and human folly. (Milton, *Paradise Lost*, p. 289). The words :..." would contain the canonical and civil laws of the Jews. It consists of a Mishna (q. v.) as text, and a voluminous collection of commen-
Akbah, who was slain in the Hadrianic war, is said to have composed Mishnic regulations. The school of R. Simon ben Gamaliel (q.v.), A.D. 166, who was a descendent of Shallai, collected and sifted the materials of the oral law. The present Mishna proceeded from the hands of R. Judah the Holy (q.v.), son and successor of R. Simon ben Gamaliel. The title of Judah's work is simply Mishnâh, מיסנה, Qeivripov (from ניסנה, "to repeat"), "repetition," like the Arabic Mathâni (Koran, xxv, 87; xxxix, 34), that is, either (considering the divine law as twofold, written and traditional) the second branch of the twofold law, or else the law given in a second form, as an explicative and practical development of it (comp. Grätz, Gesch. d. Juden, iv, 419).

The work itself is composed of the following elements:

1. Pure Mishnâh, מיסנה, the elucidation of the fundamental text of the Mosaic laws, and their application to an endless variety of particular cases and circumstances not mentioned in them.

2. Halakah, הלכה, the usages and customs of Judaism, as sanctioned and confirmed by time and general acclamation.

3. Dibbur Chakhâmîn (דברי חכמים), law principles of the wise men or sages, i.e. the ancient, and at that time the more esteemed, rabbis, to whom the people's respect for them gave a greater or less weight.

4. Maasêuqûth (마다עון), practical facts, conclusions arrived at by the course of events.

5. Gezîrîm (גזרים), extemporaneous decisions demanded by emergencies.

6. Tekauerî ( Bakan), modifications of usages to meet existing circumstances; and

7. Kelaim (קהלים), universal principles, under which a multitude of particular cases may be provided for.

According to Maimonides, there were five classes into which the traditional law is divided, viz.:

1. Pirahmîn (פרחים), "interpretations" given to Moses by God, the authority of which has never been disputed (ספרים על התורה).

2. Halakah le-Monkhâh mis-Sînay (הלכה מהתנין), "precepts delivered to Moses on Mount Sinai," a distinction which gained the applause of all the classical rabbins, because it belongs to the class of undisputed decisions.

3. Those which have admitted of discussion, and the value and weight of which have been mainly determined by an extensive consent among the authorities.

4. Gâzîrîm (גזרים), "decisions" which have been made by the wise men regarding some of the written laws, and which decisions are designed to insure more fully the observance of such laws (or to make a fence about the law).

5. Tekauerî ( Bakan), "experimental suggestions," referring to things recommended or enjoined by particular masters, which though they may not possess the stringent force of laws, nevertheless exert a great influence in the formation of social and religious habits and usages.

In constructing his work, Jehudah, or Judah, arranged these manifold materials under six general classes, called Sederim (סדרים), or orders. The first is called Zeraîm (זרמים), or "seeds," and treats of agricultural laws; the second, Môcî (מקים), or "festivals," or "solemnity," treats of the Sabbath and the annual festivals and holydays, the duties of their observance, and the various enactments and prohibitions therunto pertaining; the third, Nâshîm (נשים), or "women," treats of the intercourse between the sexes, of husband and wife, the duties of a brother-in-law towards his widowed and childless sister-in-law, and of buying and selling of the bride (Deut, xxv, 5), of dowry and marriage settlements, of espouses, divorces, and of all the laws to these subjects respectively appertaining; the fourth, Nettîn (מסכת נטנ 잴),

---

The text is a page from a book titled "Talmud," discussing the history and composition of the Mishna and the role of Halakah in Jewish law. It highlights the work of R. Simon ben Gamaliel and the title of Judah's work. The text also outlines the different classes of the traditional law, including interpretations, usages, decisions, and experimental suggestions. It concludes with a discussion on the organization of these materials under six general classes, known as Sederim.
or "injuries," treats of the laws of property (moveable as well as immovable) and of commerce; the fifth, Kodsha, or "consecrations," treats of sacrifices and their laws; the sixth, Taharoth, or rather Tuhari (זmouseenter), or "purifications," treats of the laws of impurity, legal cleanness, and that both positively and negatively. The initial letters of these titles combined, for the sake of memory, give the technical word Zemden neketi (Zend neketi), "a time accepted."

The regulations thus generally classified are further arranged under a multitude of subsidiary topics, each Seder, or order, being divided into a number of tracts or treatises, called Masachot (מ.statusCode, and these were again subdivided into Perakim (퍼akest), chapters. The latter again are divided or broken up into paragraphs. Altogether there are 68 Masachot, with 525 chapters and 4187 paragraphs, in the Mishnah. The whole is called Shas, or, after the initials of הוהי נסיי, i.e., the six orders. Since a general analysis of the contents of the Mishnah has already been given under the art. Mishnah (q. v.), we must refer the reader to it, while a more minute analysis will be given farther on.

R. Judah's Mishnah, however, did not contain all Midrashim. Many others existed, which are contained in parts of the Leviticus, Numbers, and Deuteronomy, Mechilta on Exodus (see the art. Midrash), the Mishnahs made by individual teachers for the use of their pupils, with the addition to the official Mishnah collected by R. Chiyah and his contemporaries. All the Halakoth of this sort, which were extra-Mishnahic, were called Jerashfallot (เยירשפלות), or "other traditions." As has been stated, R. Judah the Holy collected the great mass of traditions in the work called Mishnah; but even this copious work could not satisfy, for the length of time, the zeal of the rabbis for the law, for all casuistry is endless in its details. There were a great multitude of all kinds of possibilities which were treated in the Mishnah, and yet again, each sentence left open divergent possibilities, divergent doubts, and considerations not yet finished. Thus it was an inner necessity of the matter that the text of the Mishnah should again become the point of learned discussion. Partly by means of logic (that is, Rabbinical), partly with the help of the traditional master, R. Judah's Mishnah has been enriched in the Mishnah, all open questions were now discussed. This task was carried out by the Amoraim, or Gemarical doctors, whose very singular illustrations, opinions, and doctrines were subsequently to form the Gemaras, i.e., the Palestinian and Babylonian: a body of men charged with being the most learned and elaborate triflers that ever brought discredit upon the republic of letters—

"For mystic learning, wondrous able
In magic, taleman, and cabal—
Deep-sighted in intelligences,
Ideas, atoms, influences."

With unexampled aspidity did they seek after or invent obscurities and ambiguities, which continually furnished pretexts for new expositions and illustrations, the art of clouding texts in themselves clear having proved ever less difficult than that of elucidating passages that were in the sense of which might be really involved in obscurity.

"Hence comment after comment, spun as fine
As blotted spiders draw the binary line!"

The two main schools where this casuistic treatment of the Mishnic text was exercised were that at Tiberias, in Palestine, and that at Sora (q. v.), in Babylonia, whither Abba Areka, called "Kab" (ק.ב), a pupil of R. Judah, had brought the Mishnah. In these and other schools (as Nahardea, Sipporos, Pumbeditha [q. v.], and Jabne or Jamnia), the thread of casuistry was twisted over and over again, and the matter of traditions of the law thus took greater and greater dimensions. Abandoning the Scripture text, to illustrate and to explain which the doctors and wise men of the schools had hitherto labored, successive generations of Gemarici now devoted their whole attention to the exposition of the text of the Mishnah; and the industry and casuallation were such that expositions, illustrations, and commentaries multiplied with amazing rapidity and to so portentous a degree that the whole system finally swelled into a chaotic mass, which was dignified by the name of Gemara, נ"ג (supplement or complement), and this, together with the Mishnah, was called "Talmud." Notwithstanding the uncertain paternity of this incongruous body of opinions, there were not wanting those who gave a preference to the Gemara over the Mishnah, and even over the "written law." It was said by some that the "written law" was like water, the Mishnah like wine, and the Gemara like hippocram, or spiced wine. The "words of the scribes," said those supporters of the Gemara, are lovely above the "words of the law," for the "words of the law" are weighty and light, but the "words of the scribes" are all weighty.

It was the Rabbinical rector of the Academy of Tiberias, that the minor chaos of comments and facetiae began to be collected; and these, being added to the Mishnah, were termed the Palestinian Talmud, or Talmud Jerusalem, i.e. Jerusalem Talmud. This Talmud, which was completed at Tiberias about A.D. 530, only contains the tractate Berakoth, Zevachim, Middoth, Nedarim, Nezikin, together with the treatise Niddah and some other fragmentary portions. From the schools of Babylonians also, a similar collection was in after-times made; but, as, upon the desolation of Palestine, the study of the law was chiefly prosecuted in Babylonia, the colleges there were more numerous, and far more ingenious and prolific were the imaginations of the Babylonian professors. To collect and methodize all the disputations, interpretations, elucidations, commentaries, and conceits of the Babylonian Gemarici was consequently a labor of many men nor of a single age. The first attempt was made (A.D. 367) by R. Ashê, elected at the age of fourteen to be rector of the school of Sora (q. v.), a teacher described as eminently pious and learned. R. Ashê labored during sixty years upon the rank, unwieldy work, and, after arranging thirty-five books, died in 430, leaving the completion to his successors. For 100 years longer did rabbi after rabbi, with undiminished zeal, successively continue this unprofitable application, until at length, after the lapse of 123 years (about A.D. 550), rabbi Abina, the sixth in succession to Ashê, gave the finishing stroke to this second Talmud. More than a generation, from the name of the province in which it was first compiled, the Babylonian Talmud, this second Talmud is as unmanageable to the student on account of its style and composition as on account of its prodigious bulk. Composed in a dialect neither Chaldaic nor Hebrew, but a barbarous commixture of both of these and of other dialects, jumbled together in defiance of all the rules of composition or of grammar, it affords a second specimen of a Babylonian confusion of languages.

"It was a parti-colored dress
Of patched and plebeian languages,
Which made some think, when in glib gabble,
They'd heard three laborers of Babel,
Or Cerebros himself pronounce
A latest unknown casuistry at once."

Abounding, moreover, in fantastic trifles and Rabbinical reveries, it must appear almost incredible that any sane man could exhibit such acumen and such ardor in the invention of those unintelligible comments, in those nice scrupulosity, and those ludicrous chimeras which the rabbis have solemnly published to the world, and of which there was never a school to stand the test.

II. Form and Style.—In general, the Gemara takes the shape of scholastic discussions, more or less prolonged, on the consecutive portions of the Mishnah. On a cursory view, it is true, these discussions have the air of a
desultory and confused wrangle: but, when studied more carefully, they resolve themselves into a system govern

4. The explication, or ἐρμή, which is introduced by the formula μάνα, "What is this?" ἐρμίνει, "What does he say?" ἐπιστατοῦσί, "How is this to be understood?" ὁ ποιὸς ἐστι καί ὅστις ἔστι, "Who could think of such a thing?" ὅστις ἦν, "How have we to interpret this?"

5. The question, or ἡ σύνθεσις. If a question is offered by one school to another, it is introduced by the formula ἢ ἠτίκτητο, "They propose to them:" If from several persons to one, the formula ἢ πρὸς ὑμᾶς ὁ διδάσκαλος ὁ διδάσκαλος, "They ask of him:" If or the demand is made of one person to another, it is ἢ πρὸς ὑμᾶς ὁ διδάσκαλος, "I ask of you." If the response, or ἔρρημα, which may consist either in strong reasons (προφανείας or ἐφημερίας) or in strong objections (ἀντίστασις or ἀντιβολήν), is introduced by the formula ἢ ἠτίκτητο, "Whence have you this?" ἢ πρὸς ὑμᾶς ὁ διδάσκαλος, "It is taught hereupon," prefixed to the statement.

6. Borritha, or ἑρήμων, another kind of supplement to the Mishnah. Such are the books Sippa, Sippa, and Mechitha, mentioned above. When a citation is adduced from a Boraitha in the Talmud, it is introduced by one of these forms: Tanna rabba, ἐν ἄλλων ἀποθετά, "Our rabbis have taught:" Tanna chada, ἀπὸ ἄλλου ἀποθέτηται, "A certain rabbi has taught," etc.

7. The objection, or ἐνέργεια πρῶτον, a question not of a fixed Halakah, which is irrefragable, but of some position of the Amoraim or perhaps Tanaim, which is lawfully debatable, and is introduced by the formula ἤ καί ἢ καί, "Come and hear:" ἤ ἄλλως, "Hear of this:" ἤ ἀρχιά, "If so:" ἤ ἀρχιάν, "Therefore:" ἤ ἐπιστατοῦσί, "There is a controversy in this case:" ἢ ἄλλως ἢ καί, "What is the ground of the controversy?" ἢ καί, "Thou

8. The refutation, or ἔρρημα ἀναφορίας, is used in order to uphold the authority of the Bible (τὸ κύριον τοῦ Θεοῦ) against a Tanaitic, and to oppose the authority of the Tanaitic against that of one of the Amoraim, and is introduced by the formula ἢ καί ἢ καί, "This objection is truly of great weight.

9. The contradiction, or ἀναφορία ἐπιταχύνουσα, an objection thrown against a sentiment or opinion by the allegation of a contrary authority, and is introduced by the formula ἢ πρῶτον ἢ καί, "But I oppose this.

10. The argumentation, or ἀναφορία ἐπιταχύνουσα, an assailing or seizing upon, is a kind of objection in use only among the later Amoraim, and is introduced by the ἢ πρῶτον ἢ καί, "Rabbi X objects to this." If this objection is not refuted, it takes the value of Halakah.

11. The solution, or ἀποφασίζω, is the explanatory answer to the objection (see supra 7).

12. The information, or ἐνημέρωσις, "disabling or shifting off," when a sage, sorely pressed in debate, shifts off his thesis upon another, introducing this by the formula ἢ πρῶτον ἢ καί, "But whose is this sentence.

13. The appui, or ἀποκάλυψις, "support," is a corroborative evidence for a doctrine or principle, introduced by the formula ἢ πρῶτον ἢ καί, "It can be said," "There is support for this.

14. The necessity, or ἀπαντήσεως. This term is used in order to justify a sentence or a word, or even a single letter, which seems superfluous in the Bible or in the Mishnah, and is introduced by the formula ἢ πρῶτον ἢ καί, "What is this for?" To which is answered, ἢ πρῶτον ἢ καί, "It is absolutely necessary.

15. The accord, or ἀπαντήσεως, "series," a catena or line of Talmudic teachers, cited against a given proposition.

16. Sugya, ἀποκάλυψις, means the proper nature of a thing. By this word the Gemara refers to itself with regard to its own properties and characteristics.

17. Hikatba, ἀποκάλυψις, is the ultimate conclusion on a matter debated, henceforth constituting a rule of conduct. Much of the Talmud consists of discussions by which they are verified, confirmed, and designated. When the advocates of two opposing theses have brought the debate to an issue, they say, "The Halacta is with such a one," ἢ πρῶτον ἢ καί.
III. Literary and Moral Character of the Book—

Since the Gemara is in general only a more complete development of the Mishna, it also comprehends all the primary elements of the Mishna mentioned above, which are, however, intermixed with an endless variety of Hagadot, i.e. anecdotes and illustrations, historical and legendary, poetical allegories, charming parables, with ephephalimais, etc., and thus making the Talmud contain content even entertaining, or, as Buxtorf (in Fugitiv. Leg. Chald. et Talmud.) says:

In order to illustrate this, we will give a few specimens of such Hagadot for the benefit of the reader:

God is represented as praying.

R. Johanan says, in the name of R. Jose, how it is proved that God is blessed and praised by the prayer from Isa. lvi, 1, “I will bring them to my holy mountain, and make them joyful in my house of prayer.” Marz. it is proved that he is praised. But this is conclusively proved that he prays. And what does he pray for? R. Zutra, in the name of R. Tobi, says, in the name of Rav, the following is the divine prayer: “May it please me that my mercies shall prevail over mine anger, that the mercies of the Lord, may as it were, be poured out upon me,” which may mercifully deal with my children and keep justice in abeyance.” In corroboration of this, the following story is given. It is taught R. Levi ben the son of Eleiars. Once I went into the Holy of Holles for the purpose of burning incense, and I saw Acathielah Jah, the Lord, sitting upon the high and exalted throne. He said to me, Imman, my son, bless me! and I addressed him to the above prayer, and he shook his head (Berakoth, p. 7, col. 1).

But if God prays, then he must also put on phylacteries. Even upon this point the rabbins do not leave us in igno.

In Isa. lxi, 8, where we read, “The Lord hath sworn by his right hand, and by the arm of his strength.” By the term of arm in the sense of law, as in “For his right hand went a stay for them” (Deut. xxiii, 22); and by the term of arm of strength is meant phylacteries, as stated in “From his shoulders, and from his people,” etc. (Berakoth, p. 6, col. 1). Moreover, God has actually shown himself to own phylacteries, which he wrote: “I will take away mine hands, and thou shalt see my back parts” (Exod. xxiii, 22). R. Chana, the son of Biann, says, in the name of R. Shimone Chastia, “From this passage we learn that the Holy One, blessed be he, has shown to Moses the tie of the phylacteries, which lies on the back part of his head” (Berakoth, p. 7, col. 1).

If God prays, then, in the language of the rabbins, he is conscious of some personal feeling. They are not silent on this point. For example, the school of Ishmael have taught that peace is a very important matter, and that for its sake God has sworn by his right hand in Gen. xviii, first that Sarah said, “My Lord is old;” but after- wards it is written she said, “And I am old” (Yebamoth, p. 10, col. 1).

God is represented as needing a sacrifice to atone for himself. R. Shimone, the son of Pazi, asked, It is written, “And God said unto Moses, Say unto Aaron, come near to the Lord” (Num. xviii, 22). He said to him, “What must I do?” To this he said, “What if I were to use a candle in the middle of the day?” He replied, “As for the candle, she should be reckoned after him only, for it is written, ‘Let them be for eyes, and for seasons, and for days and years?’” He said to him, “And now, what must I do with the name? such as Jacob the little, Samuel the little, David

The little, etc. But when God saw that the moon was not completely dark, he promised, because of humanity, to sacrifice to atone for me, for Isee the size of the moon. And God was pleased with the saying of R. Shimone, the son of Pazi. Why is the moon distinguished from the others, inasmuch as it is written concerning it, “This is the moon of the Lord?” (Num. xxvii, 15). Because God said, This kid shall be an atonement for that I have lessened the size of the moon. (The moon, the moon, the moon, p. 5, col. 2.) In telling a story, says I heard a Bath-kol crying, Woe to me that have sworn! And now since I have sworn, who will absolve me? (E situ, b. 174, p. 4, col. 1).

Occupation of God—

On one occasion Abyathnon found Elijah, and asked him, What does the Holy One, blessed be he, do? He answered, He is studying the case of the concubine of Gibea. We do not give this the same importance as the other, about it? He says that Abyathnon, my son, is right; and Jonathan, my son, is right. Then, there, I doubt in heavens about it. No, not in the least, said Elijah; but both opinions are the words of the living God (Gittin, p. 4, col. 4).

Rabbas, the son of Shila, met Elijah, and asked him, What does the Holy One, blessed be he, do? Elijah re- plied so did all and they give him the hands of the rabbins, with the exception of rabb Meir. But why does he not want to learn from rabb Meir? Elijah an- swered, Rabb Meir found a pomegranate in the garden inside the house; then he said, Rabb Meir, what is the name of Acher. Rabb Meir said, Then rabb Meir found a pomegranate in the garden inside the house; then he said, Rabb Meir, what is the name of Acher, and rabb Meir, in the house (Avoda Zarah, p. 2, col. 1).

R. Abu says, If there had not been a passage of Scripture for it, it would be impossible to make such a state- ment; but it is written, in the same sense as the moon, to raise a raven with a razor that is hired, namely, by them beyond the river, by the king of Assyria, the head, and the hair of the man, and the foot of the beast; therefore did God appear to Sennacherib in the form of an old man. Sennacherib said to him, If thou shouldst go to the kings of the east, who does this old man say to thee, did they slay thee and killed, what wouldst thou say to them? He an- swered, I would say to thee, if this be the case, Rabb Meir, sirs also in fear. Sennacherib said, What shall I do? God said, Go and disguise thyself, that they shall not see thee. And God said, Go and bring me a razor, and I will shave thee. Sennacherib replied, From where shall I bring thee a razor? God said, Go to that house, and bring it me. He went there and found one. Then angels came, and appeared to him in the form of men, and were grudging olive-seeds. He said to them, Give me a razor. They replied, Crush one measure of olive-seeds, and we will give the razor. God said to them, Go and pluck to him, and he will go to God it became dark. God said to him, Bring a light. And he brought coals of fire to make a light; and while he was blowing the coals, God showed his head and beard (Sanhedrin, p. 96, col. 1).

The schools of Hillel and of Shammuel were disputing for three years; and there was certain a certain man who was maintained that it was infallibly right. At last a Bath- koli came down from heaven and said, The opinions of both are right; and the world is in confusion. The school of Hillel (Kurbin, p. 13, col. 2).

R. Joseph, the son of Hiya, said, When Moses came down from the presence of God, Satan appeared before him and said, Lord of the universe, where is the law? God replied, I have given it to the earth. He went to the earth and asked, Where is the law? The earth answered, God understandeth the way thereof (Job xxiii, 23). He went to the sea and asked, Where is the law? The sea said, It is not in me. He went to the depth and asked the same question. The depth said, It is not in me. Drowned and dead’s said, We have hid it there, because of our ears (ibid.). So he returned to God and said, Lord of the universe, I have searched where the law is. The earth, and have not found it. God said to him, Go to the son of Amram. He came to Moses, and said to him, The law which I gave to the earth, where is it? The earth said, Lord of Satan, Who am I, that God should give me a law? Thereupon God said to Moses, Art thou a liar? Moses answered, Lord of the universe, it is not from thee, but it is from thee, it is thy daily delight, and should I claim it for my own advan- tage? God said to him, Because thou didst think little of thyself, the law shall be called after thy name. As it is written, “Remember ye the law of Moses my servant” (Mal iv, 4). Rabb Meir asked, If the moon is to be reckoned to the people, up to heaven, he found God occupied in twining wreaths for the letters of the law. And he called, Moses! Is there no peace for this people? And God answered, Rabb Meir, Moses! Moses answered, Is it customary that a servant should salute his master? God said, Thou ought- est to have learned from the generality of mankind. If I succeeded in my work. Immediately Moses said to him, “And now, I beseech thee, let the power of my Lord be great, second, I know not what hast spoken” (Num. xiv, 17) (Sanibath, p. 89, col. 1).
TALMUD

These are only a few of the many examples which crowd the pages of the Talmud. That these stories are extravagant, and that they are a-pedagogically, even pha-
sord, no one can deny. But they must be merely regarded as to their meaning and intention. Much has been said against the Talmud on account of the preposterior character of some of these legends. But we should give the Hebrew literati the benefit of their own explanations. They tell us that in the Talmud the Hagadah has no absolute authority, nor any value except in the way of elucidation. It often—but not always—enwraps a philosophic meaning under the veil of allegory, mythic folklore, ethical story, Oriental romance, parable, and spurious and false. They deny that the reader of any picture is to add to the law of God or to detract from it by them, but only to explain and enforce it in terms best suited to the popular capacity. They caution us against receiving these things according to the letter, and admonish us to understand them according to their spiritual or moral import. "Beware," says Maimonides, "that you not the words of the wise men literally, for this would be degrading to the sacred doctrine, and sometimes contradict it. Seek rather the hidden sense; and if you cannot find the kernel, let the shell alone, and confess, 'I cannot understand this.' But the impossible is possible, and at once admit that the suggestions are merely the after-thoughts of tender apologists, for some of these stories have no hidden sense at all, but must be taken literally, because meant so, as the following will prove. In the treatise Gittin, fol. 69, col. 1, we read the following prescription: "For the bleeding at the nose, let a man be brought who is a priest, and whose name is Levi, and let him write the word Levi backwards. If this cannot be done, get a layman, and let him write the following words backwards: 'Ana pipi Shila Bar Sumki;' or let him write these words: 'Taam dili bemi kepaeh, taam bemi pagaan.' Or let him take a wool and twist two threads, and let him dip them in vinegar, and then roll them in the ashes and put them into his nose. Or let him look out for a small stream of water that flows from east to west, and let him go and stand with one leg on each side of it, and let him take with his right hand some mud from under his left foot, and with his left hand from under his right foot, and let him twist two threads of wool, and dip them in the mud, and put them into his nostrils. Or let him write the word Levi, let it be inserted, and poured upon him, and let them say, 'As this water ceases to flow, so let the blood of M., the son of the woman N., also cease.' A commentary on this wisdom or folly is superfluous. That this direction to stop a bleeding at the nose is not a rare case in the Talmud, the following mode of treatment for the scratch or bite of a mad dog will prove. In the treatise Yoma, fol. 68, col. 1, we read: 'The rabbins have handed down the tradition that there are five things to be observed of a mad dog; his mouth is open, his saliva flows, his ears hang down, his tail is between his legs, and he goes by the sides of the ways. Some say, also, that he barks, but his voice is not heard. What is the cause of his madness? Rav says it proceeds from this, that the witches are making sport with him. Samuel says it is an evil spirit that rests upon him. What is the difference? The difference is this, that in the latter case it causes the dog to perform these signs; in the former it is an additional protection. The same tradition agrees with Samuel, for it says in killing him no other mode is to be used but the casting of some missile weapon. If a mad dog scratch any one, he is in danger; but if he bite him he will die. In case of scratch there is danger; what then, is the remedy? Let him take the blood of Huna, the son of Rab Joshua, who was once scratched in the street by one of them; he immediately cast off his clothes and ran away. He also says, I fulfilled in myself these words: 'Wisdom gives life to them that have her; I have seen the fruit of the wise die; what, then, is the remedy? Abai says he must take the skin of a male adder and write upon it these words: 'I, M., the son of the woman N., upon the skin of a male adder, I write against thee,' Kanti, Kanti, K'lara.' Some say, 'Kanti, Kanti, K'lara, Tah, Tah, Lord of hosts.' Let him also cast off his clothes and bury them in the graveyard for twelve months of the year; then let him take them up and burn them in an oven, and let him scatter the ashes at the parting of the roads. But during these twelve months of the year, when he drinks water, let him drink it in a large cup, lest the phantom-form of the demon and be endangered. This was tried by Abba the son of Martha, who is the same as Abba the son of Manjumi. His mother made a gold- en tumb for him.' In the face of such extravagancies, we are not surprised at the following statement of a modern Jewish writer, H. Hurwitz, in an essay preceding his Hebrew Tales (Lond., 1826), p. 34 sq.: "The Talmud contains many things which every enlightened Jew must sincerely wish had either never appeared in it or had suffered changes from its pages. Some of these sayings are objectionable per se; others are, indeed, susceptible of explanation; but when they are found in the Talmud, they are often false and erroneous impressions. Of the former description are all those extravagances relating to the extent of their Parables. The declaration of Gehinnom in Leviticus 20: 26, and the shor habor, the freaks of Ashmudah, etc., idle tales borrowed most probably from the Parthians and Arabians, and after which the Essenes, and sect of the Nazarenes, indulged in the Talmud. How these objectionable passages came at all to be inserted, can only be accounted for from the great reverence with which the Israelites of those days used to regard their wise men, and which made them insert every word that dropped from the mouth of their instructors as so many precious sayings well worthy of being preserved. These they were naturally induced to keep in the bed, safe from the intrusion of with more important matters, and when, in aftertimes, these writings were collected in order to be embodied in one entire work, the collectors, either from want of proper discrimination or from some plious motive, suffered them to remain, and thus they were handed down to posterity. That the wiser portion of the nation never approved of them is well known. Nay, some of the Talmudists themselves regard them with no favorable eye is plain from the bitter terms in which they spoke against them [for example, Jehoshua ben Levi, who explains: the rabbins permit them down to the end of the world to come; he who explains them will be scourged]. . . . I admit, also, that there are many and various topics which have escaped us in the Talmud, and which would be a miracle if there were none. For the work contains many errors, and is brought together in the same society, under precisely similar circumstances, but of hundreds, nay, thousands, of learned men of various sects, in a long series of years, in different countries, and under the most diversified conditions. . . . To believe that its multiform contents are all dictates of unerring wisdom is as extravagant as to suppose that all it contains is founded in error. Like all other productions of undue humanity, it is not free from mistakes and principles, to remind us that the writers were fallible men, and that unqualified admiration must be reserved for the works of divine inspiration, which we ought to study, the better to adore and obey the all-perfect Author. But while we should be among the first to protest against the diffusion of this material, and the ever-flowing stream of Holy Writ, I do not hesitate to avow my doubts whether there exists any uninspired work of which the contents contain more various and valuable information than that of the still-existing remains of the ancient Hebrew sages. But while we admire the canon of this Jewish writer, we must confess that not all of his corrigenda act on us quite to the same effect. The following article which appeared in the Quarterly Review for October, 1867, with the heading "What is the Talmud?" has taken the world by surprise. Such a panegyric the Talmud most likely never had. Written so learnedly, and in a style so attractive, about a subject utterly unknown to the world at large, has the work. But the more so because this article contained sentences which could not have emanated from a Jew. But the
writer was a Jew, Mr. E. Deutsch (since deceased), and what Isaac said to Jacob, "The voice is Jacob's voice, but the hands of Esau." What is further applied to the author of "What is the Talmud?" We cannot pass over this article by merely alluding to it; it deserves our full attention, on account of the mischief it has already wrought, and must work, in the minds of those who are not able to correct the erroneous statements contained in it.

The writer accuses (p. 4 of the American reprint, contained in the Literary Remains [N. Y. 1874]) the investigators of the Talmud of mistaking the grumpy stone caricatures over our cathedrals for the gleaming statues of the saints within. But, entering into the cathedrals of the Talmud and beholding these saints, we bear, in the treatise Aboda Zara, fol. 17, col. 1, of Rabbi Eliezer, יַעֲנֵי הַבָּשָׂר יִתְרוֹנָה לְכָל הַנָּאָרִים מִשְׁרַע מָלֵא לְצֵחַ (we dare not translate this sentence into English, but we give it in Latin): Non erat meretrix in terris quacum non fornicatus esse". When Rabbi Nachman (we read Tr. Yoma, fol. 12, col. 2) went to Shushan, he proclaimed דָּרֶךְ מעֲלָה מִפְּרָאָרִים מִכְּרָא הַיְּשֵׁם אֲלֵיהוּ מִכְּרָת (this also we dare not translate into English, but we give it in Latin: Rabbi qumam intratirem proclamamus quam vellet [uxorom] in dieum). Of Rabbi Abba we read in the same treatise, fol. 44, col. 1, that he was so strong a eater that a field could not rest upon his forehead; and (ibid.) of Rabbi Ami and Rabbi Assi that they ate so much that the hair from their heads; and of Rabbi Simeon, the son of Lakehs, that he ate so much that he lost his senses. In Tr. Baba Mezia, fol. 84, col. 1, we read that Rabbi Ismael, the son of Rabbi Jose, and Rabbi Eleazar, the son of Rabbi Simeon, were so corpulent that when they stood face to face a pair of oxen could pass under them without touching them. Of the honesty of Rabbi Samuel and Rabbi Cahunna we read a nice story in Tr. Baba Kamma, fol. 115, col. 2, which narrates that the latter was able to command you. In any new edition of such books, let the places relating to Jesus the Nazarene be left in blank, and fill up the space with a chapter showing the influence and power of the Holy Scriptures, and let the Protestant Bible. Why should the Talmud have escaped? Besides, ignorance and fanaticism, in all ages and countries, have burned the books which they supposed were against their system. This was especially the case with the Talmud, A.D. 1240, when a conference was held in Paris between Nicolaus Donin and some Jewish rabbins concerning certain blasphemies contained in the Talmud and written against Jesus and Mary. R. Jehiel, the most prominent of the Jewish rabbins at that conference, would not admit that the passages for far enough has been said of some of the Talmudical saints.

The writer in the Quarterly is astonished at the fact that the Talmud has so often been burned. But it is an old saying, "Habent sua fata libelli." The followers of the Arabian prophet burned the great library at Alexandria, and they still do the same with every book which they believe is written against their religion. The Jews have burned and excommunicated the books of their own great Maimonides (q. v.), and considered him a heretic. They have burned, and still burn, the Hebrew Old Testament, because of the Latin headings and corrections, to say nothing of the use of the Talmud. The Jews of Nazareth, but another Jesus, a discovery which was copied by later writers. But modern Jews acknowledge the failure of this argument, for, says Dr. Levin, in his prize-essay Die Religionsdisputation des R. Jehiel von Paris, etc., published in Grimm's Miscellanea (1873, p. 103), "I am not aware of the attempt of R. Jehiel to prove that there were two by the name of Jesus as unfortunate, original as the idea may be." The result of this conference was that the Talmud in wagon-loads was burned at Paris in 1242. This was the first attack. However, the writer in the Quarterly states that Justinian in A.D. 538 carrying the Talmud ready honored the Talmud by a special interdictory novella (146 511' 513'514), we must regard such a statement as erroneous and superficial, for, as Dr. Grütz, in his Gesch. der Juden, v. 392, shows, this novella has no reference to the Talmud at all (comp. also vol. vii [1873], p. 100). It was another reason why the Jews themselves, as the following document or circular letter, addressed by a council of elders, convened in Poland in the year 1832 (i.e., the year in which the Talmud was published to coreligionists, which at the same time contains the clue why in later editions of the Talmud the certain passages are wanting, will show. The circular runs thus in the translation of Ch. Leslie (in A Short and Easy Method with the Jews, p. 2 sq. [Lon. 1812], where the original Hebrew is also found):

Great peace to our beloved brethren of the house of Israel.

Hearing received information that many Christians have applied themselves with great care to acquire the knowledge of the language in which our books are written, we therefore enjoins you, under the penalty of the great ban, to be inflected upon such of you as shall transgress this solemnity, that you do not, in our new edition of either of the Mishnah or Gemara, publish anything relative to Jesus, whether you take upon you the task of writing anything concerning him, either good or bad, so that neither ourselves nor our religion may be exposed to any injury. And, after what they had done to us, the Murnheim, have done to us, when they became Christians, and how their representations against us have obtained credit. To make you understand this, we should not pay strict attention to this letter, but act contrary thereto, and continue to publish our books in the same manner as before you may see. Christians and yourselves, greater afflictions than we have hitherto experienced, and be the means of our being compelled to embrace the Christian religion, as we were formerly: and thus our latter troubles might be worse than the former. For these reasons, we desire you to be warned you, and that any new edition of such books, let the places relating to Jesus the Nazarene be left in blank, and fill up the space with a chapter showing the influence and power of the Holy Scriptures, and let the Protestant Bible. Then Christians will no longer have anything to show against us upon this subject; and we, in delivering the affection we have formerly labored under, and reasonably hope to live in peace.

The writer in the Quarterly, while loudly praising the humane spirit which, as he tells us, pervades the "system and institutions set forth in the Talmud," endeavors at the same time to apologize for those parts of the Talmud which contain, as he admits (p. 12), "gross offences against modern taste," by telling us that, when compared with other ancient systems of jurisprudence, "the Talmud will then stand out rather favorably than otherwise." It is not necessary to say much on this subject. It is large and patriotic, but we will say this, that it is one thing to point to the existence of mire, that we may warn the unawary, and another to wallow with delight in it. We heartily wish that some of the rabbins who wrote the Talmud had been content with discharging that which may be considered a duty, and not laid themselves open to the charge unjustly brought against them, of doing injury to the morals and minds of those who study their writings, by their unnecessary and improper improprieties and details, of which the treatise Niddah, which we have here especially in view, the Talmud and the Talmud, is so full. When, in 1843, Messrs. De Sola and Raphall published a translation of a portion of the Mishnah, they excused the omission of this treatise by saying, in the preface to their work, "The treatise Niddah, not being suited to the refined notions of the English reader, has not been translated. This is the reason why it is not put in the list of portions selected for translation. It may be said, But this treatise, bad as it is, is only a commentary on some portions of the laws of Moses. To this we may reply, it was manifestly necessary that Infinite Wisdom should solemnly prohibit many atrocities then prevalent among the heathen nations, and prohibit them, they must of necessity be mentioned. No doubt, the proper feeling which leads us to turn with disgust from the very thought of the crimes thus forbidden is
very much owing to those very laws which were given so that the children of Israel should be distinguished from other nations, and thus, being ceremonially clean, should be a nation of priests, and thus of the land of the Lord. This law is of inexpressible importance. It is impossible to dwell too largely on the enormity of this crime, or to speak too earnestly of the necessity of watching against anger, hatred, cruelty, and every possible form in which we can in any way participate in the guilt of this dreadful sin. Just so we cannot say too much about the sanctity of personal purity and holiness, for God will be "sanctified in them that draw near him." But what would we say of a man who should write a large volume merely to describe all the various modes in which a murder can be carried out, and the symptoms of decay and dissolution which would follow the deed?

On page 26 of the article alluded to we are told: "There are many more vital points of contact between the New Testament and the Talmud than divines yet seem fully to realize, for such terms as 'redemption,' 'baptism,' 'grace,' 'faith,' 'salvation,' 'regeneration,' 'Son of man,' 'Son of God,' 'kingdom of heaven,' were not, as we are apt to think, invented by Christianity, but were household words of Talmudical Judaism, to which Christianity gave a higher and purer meaning." It requires, however, a very slender acquaintance with the Bible to enable any one to reply to this statement that many of these terms were familiar to the Jews long before the Talmud was in existence, for they are found in the Old Testament. And not only so, but the New Testament itself is a much older book than the Talmud. Our author tells us that the Mishna was compiled about A.D. 200. The Gemara is of still later date. It seems strange, indeed, that it did not occur to the learned author that it is impossible to suppose that the New Testament had no influence upon the rabbins, who rejected its authority. Unquestionably the reasonings of Paul and the writings of the other apostles greatly affected the whole tone of thought and manner of expression which prevailed among those who never read, nor ever acknowledged their own Messiah. This is a common mistake among even learned Jews. Because some parts of the Talmud are unquestionably very ancient, they speak of the whole as a work of very great antiquity. They cannot altogether divest themselves of the fiction that God gave the oral law as well as the written law to Moses himself. Thus they habitually claim for the Talmud, as to antiquity, a degree of respect to which it is by no means entitled.

The most serious error, however, and that against which we must most distinctly protest, is this. We are told that "the Pentateuch remains in all cases the background and latent source of the Mishna" (p. 17). And again, "Either the scriptural verse forms the terminus a quo, or the terminus ad quem. It is either the starting-point for a discussion which ends in the production of some new enactment, or one never before investigated. We need to turn to the divines and back of the teaching of Moses, why do they almost entirely ignore the teaching of the other prophets? It is astonishing to see how very little mention is made in the Jerusalem Talmud and in the 5894 pages of the Babylonian Talmud of a great part of the Old Testament; and a perusal of the book called the Peshitto Ainur, compiled by R. Aaron Pissurensis, or Pesaro (q.v.), which contains an index of all the passages of Holy Writ quoted in the Talmud, will make good our assertion. Passing over Talmudical discussions of law or mathematics or the science of interpretation of dreams (a filthy specimen of the latter is especially given in Tr. Berakoth, fol. 57, col. 1), we will only touch another point, the Talmudical praise of women. Thus, we read on p. 56, among other moral sayings, "Love your wife like yourself, honor her more than yourself." Without arguing the question from what we know of the position of Jewish females in the countries where the Talmud is studied and its precepts obeyed—a position which proves the very contrary to the saying aluded to—it is well known to every student of the Talmud that the doctors of the Talmud in general do not hold in high estimation the female sex. They put them in the category with slaves and children. Again and again we read, "Women, slaves, and children are exempted." "You shall teach the law to your sons, and not to your daughters." He who teaches his daughter the law is like as if he teaches her to sin. The mind of woman is weak." "The world cannot exist without males and females, but blessed is he whose children are sons; woe to him whose children are daughters." We also remember the teaching of the Talmudical sages, that a man may consider his wife like a piece of butcher's flesh. We also remember the praying the husband thanks God that "he hath not made him a woman." As to the precept which the writer in the Quarterly Review quotes as one of the moral sayings of the Talmud, we must believe him on his word, or search over the 2947 pages of that stupendous work, since the writer has thought proper to conceal the treatise and the page of the Talmud from which he has translated the above sentence. We are inclined to believe that the reviewer had the following passage (Tr. Sanhedrin, fol. 75, col. 2) before him: "Rabbi Judah has said that Rab has said, Who marries his daughter to an old man, and who gives a wife to his son when too young, and he who returns to the Goi (Gentile) the things the Gentile has lost, concerning him the Scripture says, 'In order to add drunkenness to thirst, the Lord will not forgive him' (Deut. xxxiii, 18, 19). They replied, He who loves his wife like himself, and he who directs his sons and daughters in the right way, and gives them into marriage at the proper ages, concerning him the Scripture says, 'And thou shalt know that thy tabernacle shall be in peace; and thou shalt visit thy tabernacle, and shalt not sin.'" It is not, however, a command, but only according to the Talmud and the following, as given in Tr. Yebamoth, fol. 62, col. 2: "Rabbi Tanchuma said that rabbi Haninai had said, Every man who is without a wife is without joy, without blessing, without goodness. Without joy because it is written, 'Thou shalt love the one, thou shalt love thy household' (Deut. xlv, 8); without a blessing, for it is written, 'That he may cause the blessing to rest in thine house' (Exek. xlv, 8); without goodness, for it is written, 'It is not good that the man should be alone.' In the west they add that it is without a law and without a wall. Without a law, for it is written 'I am not thy helper, and wisdom is driven quire from me?' (Job vi, 10); without a wall, because it is written 'A woman shall compass a man' (Jer. xxxii, 29). Rabba, the son of God, said, also without peace, as it is written, 'And thou shalt know that thy tabernacle shall be in peace, and shalt visit thy tabernacle, and shalt not sin.' He then said, His wife, like himself, he honors her more than himself, and he who directs his sons and daughters in the right way, and gives them to marriage, concerning him the Scripture says, 'And thou shalt know that thy tabernacle shall be in peace, and thou shalt visit thy tabernacle, and shalt not sin.'"

We venture to think that these are the passages of the Talmud which the reviewer has picked out. We must, however, be allowed to observe that it is not the imperative, "Love your wife," but the participle with
the article, "He who loves." It will be seen that we have not translated the whole paragraph; we dare not. We will leave that to the reviewer and his admirers, for what we have left out, and much of the following, belongs to the area of speculative philosophy and the Talmud is so rich. From another such foot page (Sanhedrin, fol. 22, col. 1) the reviewer has copied, "He who forsakes the love of his youth, God's altar weeps for him." "He who sees his wife die before him has, as it were, been present at the destruction of the sanctuary itself. His very soul is as it were seen going out of his body. Such travesties are badly rendered; and, even if they were not, seeing in what connection they stand and through what a quagmire the reviewer was obliged to wade to fish them out, they are worthless. Another such moral saying runs thus: "When the thief has no opportunity for stealth, he incurs the risk of meeting his own boss master." Who of the Talmudical ages has said this? The Talmud relates that when Abihag the Shummutatte was brought to king David she said to him, "Marry me;" the king replied, "It is not lawful for me to marry you." As a reproach to the king, the Talmud makes the Shummutatte say, סימיה תלבש בלב אמה סימיה (Sanhedrin, ibid.), translated as above. After all, it would be strange, indeed, if we could not gather from a work of 2947 pages some good sayings and sentences. But, unless the whole work be translated, it will never be known what the Talmud really is. For instance, in one of the treatises of the Talmud called CHIDUSHEH RABBI, in the 6th chapter, in Matt. v. 28; and yet that portion of the Talmud is written in language so obscure and immoral that it would be difficult to meet its equal among the most licentious publications of ancient or modern times. We challenge any admirer of the Talmud to translate the treatise and then every one will be able to give the right reply to the query so often raised by the reviewer, "What is the Talmud?"
The article in question thus concludes:

"When the masters of the law entered and left the academy, they used to offer up a short but fervent prayer: a prayer of thanks that they had been able to carry out their task thus far, and a prayer, further, that no evil might arise at their hands, that they might not have fallen into error, that they might not declare pure that which was impure, and impure that which was pure." (p. 58).

Against this we object the following:

"The wise men have informed us that when the teacher entered the house of learning, he said, "May it please the Teacher of Israel to accept the sacrifices of our lips, and to hear our prayer, that we may be delivered from all evil, and be spared from the hand of the enemy, and from the hand of the evildoer."

What is the purpose of this prayer? To begin with, the rabbis are not saying that our prayers are accepted by God, nor that his ear is open to them; nor that he will hear our prayers. They are simply saying that the prayer should be offered, and that it should be a prayer that is heard. This is the purpose of the prayer. And it is a prayer that is heard, for it is offered in the name of the whole community.

It is not this prayer that is the basis of the Pharisee in the gospel (Luke xvii, 11).

To conclude the review, we would like to suggest several improvements to the Talmud. First, we would like to see a more careful translation of the Talmud. This would involve a careful study of the text, and a careful consideration of its context. Second, we would like to see more study of the Talmud's place in Jewish history. This would involve a careful study of the development of Jewish thought, and a careful consideration of the role that the Talmud played in that development.

Dr. Isaac Da Costa, in his Israel and the Gentiles (N.Y., 1861), says:

"The Talmud is a most curious monument, raised with astonishing labor, yet made up of purerelics. Like the present position of the Jew, away from his country, for from his Messiah, and in disobedience to his God, the Talmud itself is a chaos in which the most opposite elements are found in juxtaposition. It is a book which seems in some respects to contradict common-sense, and in others filled with deep meaning, abounding with absurd subtleties and legal finesses, full of foolish tales and bold imaginations, and containing whole books of parables which, except in their lack of the simple and sublime character of the Talmud itself, would make them parables and sentences of the New Testament.

The Talmud is an immense heap of rubbish, at the bottom of which a few trifling fragments of truth are found. No book has ever expressed more faithfully the spirit of its author. This we notice the more when comparing the Talmud with the Bible—the Bible, that Book of books, given to, and by means of, the Israel of God; the Talmud, the book composed by Israel without their God, in the time of their dispersion, their misery, and their degeneracy."

Dr. Milman, in his History of the Jews (ii, 18), says:

"The reader, at each successive extract from this extraordinary compilation (i.e., the Talmud), hesitates whether to admire or to abhor. On the one hand, the pleasing moral apologue, to smile at the monstrous extravagance and excess to which the disciples, through the influence of the Talmud on European superstitions, submit, and even literature remains to be traced. To the Jew the Talmud is the Bible, the fountainhead of all his literature; to the national mind patiently labored for ages in performing the bidding of the ancient and mighty envoys who drew from it, once once before, it might not venture to pass."

Mr. Farrar, in his Life of Christ (ii, 485), says:

"Anything more utterly unhistorical than the Talmud cannot be conceived. It is probable that no human writings ever cover a similar stretch of ages and dates, without absolute indifference. The genius of the Jews is the reverse of these; in what, in these days, we should call historical..."
TALMUD

matter which every one can now verify for himself—that these ancient, venerable, and authoritative works of our traditional literature from which they are drawn. And, after all, who shall prove to us that these sayings were always niqqudus, as well as most of the other opinions to which the Talmud is attributed. Who will supply us with the faintest approach to a proof that (when not founded on the Old Testament) they were not directly or indirectly due to Christian influence or Christian thought?

Prof. Delitzsch, in his lectures on Jüdisches Handwerkerein Leben zur Zeit Jesu (3d ed. Erlangen, 1879, p. 35), says:

"Those who have not in some degree accomplished the exterior difficulty of reading this work for themselves will hardly be able to form a clear idea of this polyvalent colossus. It is a vast debating club, in which the leading topics of discussion and the methods of discussing them have remained almost the same as in the first centuries. As we know by experience, a law, though very superficially and very generally defined, may at times be of considerable practical occurrence arising out of them. Suppose that these fine evanescent threads of these legal definitions frequently lose themselves, and lose their significance, and are washed away through a long tract of this sandy desert, one lights here and there, on some green oasis consisting of stories and sayings of real interest. In such a case will still have some tolerable idea of this enormous and, in its way, unique code of laws, in comparison with which, in point of comprehensiveness, the law-books of all other nations are but hilliputian, and, when compared with the hum of its klasiskopische Babel, they resemble, indeed, calm and studious retreats."

Mr. Alexander, in his book on The Jews: their Past, Present, and Future (Lond. 1870), p. 80 sq., says:

"The Talmud, as it now stands, is almost the whole literature of the Jews during a thousand years. Commerce and expertness in the technical points of law last the whole became an immense bulk, the original Babylonian Talmud alone consisting of 1894 folio pages. Out of such a literature it is easy to make quotations which may throw an odium over the whole. But, fauce, if the productions of a thousand years of English literature, say from the History of the Venerable Bede to Milton's Paradise Lost, were thrown together into a number of uniform folios, and judged in like manner; if, because some repetitions might be avoided here, such a work, as the works of John Bunyan should also be considered worthless, and as the productions of a whole age of letters are, as a rule, a word. Such, however, is the continual treatment the Talmud receives, both at the hands of its friends and of its enemies, that it is easy to lead the unpremeditated mind away from the true, to the false; and the student will rather假 that the miséricorde, the miséricorde, the good Lord, who can find even in the Talmud, reject what will not stand the test of God's Word."

In conclusion, while we acknowledge the fact that this great encyclopedia of Hebrew wisdom teems with error, and that in almost every department in science, in natural history, in chronology, genealogy, logic, and morals, falsehood and mistake are mixed up with truth upon its pages, we nevertheless confess that, notwithstanding, with all its imperfections, it is a useful book, an attestation of the past, a criterion of progress already attained, and a prophet of the future. It is a witness, too, of the length of man's life to which the word may have marched, when he disdains the wisdom of God as revealed in the Gospel; and in these respects it will always have a claim on the attention of the wise. When Talmudism, as a religious system, shall, in a generation or two, have passed away, the Talmud itself will still be resorted to as a treasury of lore, and none will boast of antiquity, where he who carries the necessary torch will not fail to find, amid whole labyrinth of the rubbish of times gone by, those inestimable lessons that will be true for all time to come, and gems of ethical and poetical beauty, which retain their brightness forever (Eberh. Introduction, A History of Literature)."

IV. Contents.—The six Sedarin, or orders, of which the Mishna is composed are also found in the Talmud, and the following is an analysis of the contents of each tractate of the six orders:

1. נֶרֶךְ, Bechoroth, or the treatise of blessings, and speaks in nine chapters of the daily prayers and thanksgivings, etc. a. נֶרֶךְ, (so called from the first word of the chapter) treats of the time when the Sheva is to be said in the morning or evening, or on any other occasion when the body at prayers, and the benedictions to be said respectively (9 sections). b. נֶרֶךְ הָאָרֶץ speaks of the sections and order of the Shebra, of how the voice is to be used in saying the prayer, and of the occasions which exempt the person from praying. c. נֶרֶךְ הַיָּמִים are exempted from prayer (9 sections). d. נֶרֶךְ הַיָּמִים, treats of the time during which prayers may be said, whether the Shemoneh Ereh (q. v.) are to be said in an abbreviated manner, of prayer as an opus operans, of praying in dangerous places, and of the addition of prayer (7 sections). e. נֶרֶךְ הָאָרֶץ refers to the outer and inner position at prayer: of prayer for rain; of the prayer on Sabbath evening; of the minister of the congregation: and mistakes in prayer (9 sections). f. נֶרֶךְ הָאָרֶץ recites the different blessings to be said for fruits of the tree and the earth, and the eating of meals; of the sitting and lying at the table; of blessings for the main meals and water (8 sections). g. נֶרֶךְ הָאָרֶץ expatiates on blessings pronounced conjointly; with whom a union for such a purpose may be entered upon; the form of prayer and the observance of the laws relating to these union of different companies (8 sections). h. נֶרֶךְ הָאָרֶץ shows the differences between the schools of Hillel and Shamai concerning the washing of hands and the blessing at meals (8 sections). i. נֶרֶךְ הָאָרֶץ names the prayer to be said at beholding signs and wonders, at the building of a new house; and treats of prayers offered in vain, of prayers at the leaving and going into a city: of the raising of God for the good as well as for the evil; how to approach the Temple mountain; of the usage of the name of God at salutations (8 sections). j. נֶרֶךְ הָאָרֶץ, Peak, or the corner of the field, treats, in eight chapters, of the field corners, gleanings, etc., to be left to the poor, etc. a. נֶרֶךְ הָאָרֶץ, of the measure of the Peak, where, of what, and how large it must be given, and how long the fruit is exempted from tithe (6 sections). b. נֶרֶךְ הָאָרֶץ, how fields and trees as to the Peak may be separated; how natural and artificial bodies are to be considered as Peak (8 sections). c. נֶרֶךְ הָאָרֶץ, how large a field must be of which Peak must be given (8 sections). d. נֶרֶךְ הָאָרֶץ, how the Peak must be given (11 sections). e. נֶרֶךְ הָאָרֶץ, what belongs to the poor, and on the bunch left through forgetfulness (8 sections). f. נֶרֶךְ הָאָרֶץ, what may be regarded as a bunch left through forgetfulness, and what not (11 sections). g. נֶרֶךְ הָאָרֶץ, the same concerning olive-trees; on the right of the poor in the vineyard (8 sections). h. נֶרֶךְ הָאָרֶץ, how long the right of the poor lasts; what constitutes the poor, and who is not entitled to the right of the poor (9 sections). i. נֶרֶךְ הָאָרֶץ, Demai, or doubtful, treats, in seven chapters, of fruits about which some doubts may be raised whether tithes should be paid for them or not, viz. a. נֶרֶךְ הָאָרֶץ, which fruits are exempted from the rights of Demai; how the Demai right differs from other tithes, and after the Demai fruits (4 sections). b. נֶרֶךְ הָאָרֶץ, which may be regarded a strict Israellite, and to whom the performance of the Demai law belongs at buying and selling. c. נֶרֶךְ הָאָרֶץ, who may receive Demai for eating, and that nothing should be given away untithed (6 sections). d. נֶרֶךְ הָאָרֶץ, how the tithes are to be paid (7 sections). e. נֶרֶךְ הָאָרֶץ, how the tithes are to be given from Demai (11 sections). f. נֶרֶךְ הָאָרֶץ, what to do at the renting of a field, at the pressing in company, and of the fruits in Syria (12 sections). g. נֶרֶךְ הָאָרֶץ, how to set with such as are not believing concerning the tithes; how to separate the tithes and what must be taken into account when tithed and untithed fruits are mixed up (8 sections).
...
16. **Shelakim, or shekels**, in eight chapters, contains laws relating to the half-shekel which was paid for the support of public worship: a. קרייתא, how the money-changers take their seat at the money-tables, on the 15th of Sivan, b. קרייתא, of the day, c. קרייתא, of changing and of coins used in former times; of the remaining money (8 sections).

17. **Sukkah, or the Feast of Tabernacles**, in five chapters: a. דעווה, of the size and covering of the Sukkah (11 sections).

18. **Yoma, or the Day of Atonement**, in eight chapters: a. בטון, of the preparations of the high-priest (8 sections).

19. **Tosach, or the Feast of the Sanctuary**, in six chapters: a. כסף, of the palm-branches, myrtle-boughs, willows, citrons; what constitutes their fitness, and what it is lawful to tie and stave them (15 sections).

20. **Yom Tov, i.e. good day**, or, as it generally called, **Betash, i.e. the egg**, from the word with which it commences, mountains and holy days; whether an egg laid on the festival may be eaten thereafter. On this question the scholars of Shammai and Hillel are divided; the former decide in the affirmative, the latter in the negative (10 sections).
veneering or preparation of food on the festival for the following week has, however, prohibited it even for the Sabbath immediately following. They have ordered, however, that some article of food should be prepared on the day before the festival, to which more may be cooked, in addition to the usual meal, which is provided with the intention of reminding the general mass that it is not lawful to prepare any food on the festival which is not eaten thereon. It is called בְּנֵין, or mixture, because it mixes or combines the preparation of food necessary for the festival with that required for the family's use on the Sabbath. (Hilchot Yom Tov, p. 263, vi.)

(c) דִּבְרֵי, of carrying, especially wood not required for burning (7 sections).

(d) תֵּינוּלֵי, enumeration and precise definition of classes of things which cannot be done on a fast-day, still less on a Sabbath day (7 sections).

19. דִּבְרֵי מֵלוֹת, Rosh Hashanah, or New-year, in four chapters: a. דִּבְרֵי מְלֹאכָה, of the four New-years (9 sections).

(b) דִּבְרֵי נַעַר, of examining witnesses who witnessed the new moon, and of announcing it on the top of the mountain at the fire (8 sections), of announcing the new moon and new year with cornets (8 sections).

c. דִּבְרֵי לֵבָנָה, what to do in case the New-year falls on the Sabbath, and of the order of service on the New-year (8 sections).

20. דִּבְרֵי תָּמִית, or fasting, in four chapters: a. דִּבְרֵי נַוָּה, of prayer for rain, and proclamations of fasting in case the rain does not come in due season (7 sections).

b. דִּבְרֵי נַעֲדָה, of the ceremonies and prayers on the greatest fast-days (10 sections).

c. דִּבְרֵי עֵנְזָנָה, of other occasions of fasting; of not blowing alarms; when to cease fasting, in case it rains (9 sections).

d. דִּבְרֵי רָאָה, of the twenty-four stations or delegates; their fasting, lessons; of bringing wood for the altar; of the 17th of Tammuz and of the 9th and 16th of Ab (9 sections).

The Mishna tells us the following concerning these dates: "On the 17th of Tammuz the stone tablets were broken and the daily offering ceased, and the city was broken up, and Aposhtomus [i.e., Antiochus Epiphanes] burned the law, and he set up an image in the Temple. On the 9th of Ab it was proclaimed to our fathers that they should not enter the land, and the house was ruined for the first and second time, and Bither was taken, and the city was plunged up." Rabban Simon, the son of Gamaliel, said, "There were people in Israel as many as like the 15th of Ab, or like the Day of Atonement, because in them the daughters of Jerusalem promenaded in white garments, borrowed, that no one might be ashamed of them. All the property must be parted, and the daughters must be baptized. And the daughters of Jerusalem promenaded and danced in the vineyards. And what did they say? 'Look here, young man, and see whom you choose; look out for beauty, look for family.' "Favor is deceitful, and beauty is vain; but a woman that feareth the Lord, she shall be praised;" and it is said, 'Give her of the fruit of her hands, and let her own works praise her in the gates' (Prov.xxxi. 29, 31). And it is also said: 'Go forth, O daughter of Zion, and behold king Solomon with the crown wherewith he his mother crowned him in the day of his espousals, and in the day of the gladness of his heart' (Song of Solomon, iii, 11).

31. רבサーヹ, Megillah, for the roll of the book of Esther, in four chapters: a. רבサーヹ, of the days on which the Megillah is read (11 sections).

The Gemara, on the fourth section of this Mishna (fol. 7, col. 3), tells us that the Jews are directed to get so drunk on the Feast of Purim that they cannot discern the difference between 'Blessed be Mordecai' and 'Cursed be Haman.' On the same page we read, "Rabba and rabbi Zira made their Purim entertainment together. When Rabba got drunk, he arose and killed rabbi Zira. On the following day, however, which had been restored to him, he again again to make their Purim entertainment together; but he answered, 'Miracles don't happen every day.'" Andrabサーヹ, how to read the Megillah; what can only be done by day, and what can be done by night (6 sections).

d. רבסサーヹ, of the sale of holy things; of the lessening for the Sabbath during the month of Adar, and for other festivals (6 sections).

e. רבסサーベ, of the persons required for the lessees; how many verses each person may read; who must be silenced in public prayer; of the passages which at the public reading are to be omitted; the rules for holy things are more numerous (10 sections).

For these passages, see the following article, Talmud, this in the time of the Old Testament.

32. רבサーヹ, Moad Katon, or small holoday, in three chapters, treats of the half-holidays between the first and the last day of the Passover, and of the Feast of Tabernacles: a. רבサーベ, of working in the field; of graves, and of making coffins; and what pertains to a building (10 sections).

b. רבサーベ, of the work done on fruits; what may be carried and bought (6 sections).
c. רבサーベ, of shaving, washing, writing, and mourning (9 sections).

d. רבサーベ, Chagigah, or feastings, in three chapters, speaks of the voluntary sacrifices—other than the paschal lamb—offered by individual Jews on the great feasts: a. רבサーベ, of the persons who are obliged to appear at the feasts (8 sections).

b. רבサーベ, of sundry ordinances having no direct connection with the subject indicated by the title of the treatise; thus the first section of this second chapter speaks of the regulation that no Megillah must not be read in the synagogue before three persons, nor on matters of the creation before two, nor on the chariot before one, unless he be wise and intelligent by his own knowledge, etc.; of laying-on of hands (7 sections).

c. רבサーベ, of the manner in which the laws for holy things are to be explained, rather than for the sheave-offering; in how far certain persons may be credited; how the vessels of the sanctuary were cleaned again after the fast (5 sections).

III. שֵׁם, Seder Nashim (Women).

This Seder is composed of seven treatises, viz.:

34. רבサーヒ, Yebamoth, enters into the minutest details as to the peculiar Jewish precept of yibbom, or the obligation of marrying the childless widow of a brother, with the alternative disgrace of the performance of the chalalah, or removal of the shoe of the recalcitrant, referred to in the book of Ruth. It contains sixteen chapters, in 126 sections. a. The opening section of this treatise will give a good idea of the subject treated there. "Fifteen women free their rival wives and their rival's rivals from the chalalah and yibbom ad infinitum, viz., his daughter (the dead brother's wife being the daughter of a surviving brother), son's daughter, or daughter's daughter of a surviving brother; son's daughter, or daughter's daughter of a deceased brother; son's daughter, or daughter's daughter of his wife's daughter's son's daughter's son's daughter; woman's daughter's son's daughter's son's daughter; his mother-in-law, the mother of his father-in-law, the mother of his paternal mother-in-law, the mother of his maternal mother-in-law, the mother of his paternal mother's sister, or brother's sister, or his wife's (or his brother's) daughter's daughter's son's daughter; his mother's brother's son, the brother who was not alive at the same time with him, and his daughter-in-law. All these free their rival wives and their rival's rivals from the chalalah and yibbom. If, however, any of these had died, or refused her consent, or had been divorced, or in any other way abstained from their rivals may be married by yibbom; yet refusal of consent or unfitness to procreate cannot be applied in respect to his mother-in-law, or the mother of his father-in-law. This mother-in-law is called his (a sister-in-law) (4 sections).

b. רבサーヒ, of cases where a brother was born after the married brother's death; of cases where a brother is to be freed either according to the command or for the sacredness of the person; of the equal right of a brother's children and of the children of the marriage, of the right of the marriage contract and divorce (6 sections). c. רבサーヒ, of hypothetical cases, e. g., when brothers married sisters, etc. (10 sections).

d. רבサーヒ, of the sister-in-law who was found to be pregnant; when she gets the heritage; of her marriage contract and divorce; of her relatives; of a person who substitutes a manner, i.e., an illegitimate child; that the sister of the deceased wife may be married (13 sections).

e. רבサーヒ, of the rights of a marriage contract and divorce (6 sections).
f. רבサーヒ, whom the high-priest cannot marry; what constitutes a barren
woman, or a prostitute; of the duty of begetting children (6 sections). g. דֹּקֵנָה, who is entitled, under these circumstances, to eat of the beast-offering (3 sections). h. לֹעֵד, of one that is wounded in the stones, and of one that has his privy member cut off; of the Ammonites and Moabites; of the hermaphrodite, etc. (6 sections). i. נַפְלֵיהָ, of women, or brothers-in-law, who, on account of their relationship, can neither marry nor be married, and of the prohibited degrees (6 sections). j. מוֹעֵדָּה, of false news that one or the other is dying, and of the carnal intercourse of one who is not yet marriageable (9 sections). k. לוֹעֵדָּה, of violated women, proserpines, and interchanged children (7 sections). l. יַרְבָּג, of the ceremonies of the chalitseh (6 sections). m. נַפְלֵיהָ, of the refusal of one who is not of age to marry a man; of the right of deaf persons (13 and 4 sections). n. שֵׁם, of the calling of a woman, and p. וֹאֶם, of the name of the woman, which are either printed in Hebrew or represented by asterisks alone.

22. קֵשׁוֹבֵה, in thirteen chapters, contains the laws relating to marriage contracts: a. קֵשׁוֹבֵה, as such are regarded as virgins, and of the sum promised by the bridegroom to the bride (10 sections). b. קֵשׁוֹבֵה, who cedes her virginal estate to her husband; the right of the husband to sell her, and the capacity of the witnesses (10 sections). c. קֵשׁוֹבֵה, of the penalty for violating a virgin (9 sections). d. קֵשׁוֹבֵה, to whom the fine belongs; of the rights of a father over his daughter; of a husband over his wife; what the husband owes the wife; of the heritage of sons and daughters (12 sections). e. קֵשׁוֹבֵה, of the addition to the ketubah (or the sum stipulated in the marriage contract); of the declaration of marriage, and of conjugal duties; to how much a woman is entitled for her living (9 sections). f. קֵשׁוֹבֵה, what the wife owes to her husband, and what belongs to him; of assigning against the sum which the wife has brought in, and of the dowry of a daughter (7 sections). g. דֹּקֵנָה, of the vows of a woman, and of the defects which cause a divorce (10 sections). h. דֹּקֵנָה, of the rights of the husband to property which fell to his wife during her marriage, and vice versa (5 sections). i. דֹּקֵנָה, of the privileges at the meeting of creditors, and before whom the wife has to swear that she has received nothing of her ketubah (9 sections). j. דֹּקֵנָה, of cases where a man has more than one wife (6 sections). k. דֹּקֵנָה, of the rights of widows, and of the son's share; of the law which is in regard to movables in property (6 sections). l. דֹּקֵנָה, of the right of a daughter of a former husband, and of the right of a widow to remain in her husband's house (4 sections). m. דֹּקֵנָה, different opinions of two judges of Jerusalem; how a wife may not be taken from one place to another; of the privileges in living in the land of Israel and at Jerusalem; as to the money in which the ketubah must be paid (11 sections).

23. נָדַרְזָמ, or vows, in eleven chapters: a. נָדַרְזָמ, of the expressions for vows, since a person is obliged to keep them, even if the words were wrongly and not correctly pronounced (4 sections). b. נָדַרְזָמ, what words do not constitute a vow; how they are to be distinguished from an oath; what restrictions and ambiguities may occur (5 sections). c. דֹּקֵנָה, various kinds of vows, and of the mode of making oaths and promises (6 and 8 sections). d. נָדַרְזָמ, how vows can make something prohibited to the other (8 and 6 sections). e. נָדַרְזָמ, of the case where a person has consented to derive no advantage from a vow, and of his right of revocation; and how a vow can make something prohibited to the other (9 and 9 sections). f. נָדַרְזָמ, of different kinds of estables, in case they have been renounced, etc. (10 and 9 sections). g. נָדַרְזָמ, concerning the time over which the vow extends (7 sections). h. נָדַרְזָמ, of divers causes for which a vow may be made (9 sections). i. נָדַרְזָמ, who has the right of making the vow of a wife or a daughter void (6 sections). j. נָדַרְזָמ, what vows can be made void by the husband or father, and what in case of ignorance or error (18 sections).

27. נֶזֶר, Nazir, in nine chapters, relating to vows of abstinence: a. נֶזֶר, of the form in which such a vow can be made; of the difference of Samson's vow of abstinence from others (7 sections). b. נֶזֶר, what vows are binding and what not (10 sections). c. נֶזֶר, of the time of shaving (7 sections). d. נֶזֶר, of the remission and removing the same (7 sections). e. נֶזֶר, what is to be done in case of error and other dubious cases (7 sections). f. נֶזֶר, of things prohibited to a Nazirite (11 sections). g. נֶזֶר, for what uncleanness he must shave himself (4 sections). h. נֶזֶר, of some doubtful cases (9 sections). i. נֶזֶר, of the power which, in diverse cases, leads to the supposition that he is unclean; whether Samuel was a Nazirite (6 sections).

28. סַלָּח, Sotah, or the erring woman, in nine chapters: a. סַלָּח, what constitutes an erring woman; who must drink the bitter water; how she is to be presented in public, etc. (9 sections). b. סַלָּח, of writing the curses, and the ceremonies connected with it (6 sections). c. סַלָּח, of the penalty for her erring; of the fate of the woman found guilty (8 sections). d. סַלָּח, where the bitter water is not to be used (5 sections). e. סַלָּח, that the bitter water should also be taken by the adulterer (6 sections). f. סַלָּח, of the required testimony (4 sections). g. סַלָּח, of formulas to be spoken in the holy tongue, and of such not to be spoken in that tongue (8 sections). h. סַלָּח, of the address of the priest to the woman (7 sections). i. סַלָּח, of killing the heifer for expiation of an uncertain matter; of different things which have been abolished, and what will be at the time of the Messiah (11 sections). The last sections of this Mishnah are very interesting because they forecast the signs of the approaching Messiah, and wind up with the following remarkable words: “In the time of the Messiah the people will be impudent and be given to drinking; public-houses will flourish and the vine will be dear. None will care for punishment, and the learned will be driven from one place to another, and no one will have compassion on them; the wisdom of the scribes will be stinking; fear of God will be despised; truth will be oppressed, and the wise will become fools. The young men will despise the old; the old will rise against the young; the son will despise the father; the daughter will rise against the mother, the daughter-in-law against the mother-in-law, and a man's foes shall be they of his own household. The face of that generation is as the face of a dog; the son shall not reverence the father!”

29. בֵּיתָן, Gittin, or divorce bills, in nine chapters, treats of divorce, and the writing given to the wife on that occasion; how it must be written, etc. a. בֵּיתָן, of sending a divorce, and what must be observed in case the husband sends one to his wife (6 sections). b. בֵּיתָן, when, how, and on what it must be written (7 sections). c. בֵּיתָן, that it must be written in the name of the wife (8 sections). d. בֵּיתָן, sundry enactments, made for the better existence of the world (9 sections). e. בֵּיתָן, enactments for the sake of peace (9 sections). f. בֵּיתָן, sundry cases of the bill of divorce (7 sections). g. דֹּקֵנָה, of additional conditions (9 sections). h. דֹּקֵנָה, of throwing the divorce bill, its different effects; what constitutes a bald bill of divorce (i.e. one which according to the Mishna has more folds than a rolled bill), and of the old bill; of the signature of witnesses, and of the cause that constitutes a divorce, of which the school of Shamai says, “No man may divorce his wife, unless he find
in her scandalous behavior, for it is said (Deut. xxvi, 11), ‘Because he found her in some uncleanliness;’ but the school of Hillel says, ‘Even if she spoiled his food, because it is said some uncleanliness.’ R. Akiba says, ‘Even if he found one handsome than she, for it is said, if it happen that she found no favor in his eyes.’”

30. "Kiddushin, or betrothals, in four chapters: a. of the different ways in which a wife is acquired, and how she regains her liberty; of the difference of prayers which are incumbent upon the man and wife, in and outside of the land of Israel (10 sections). b. Ḥullin, of valid and invalid betrothals (16 sections). c. of betrothals made under certain conditions; of children of different marriages (13 sections). d. of betrothals which may intermarry and which cannot; of the evidence of a known or unknown lineage; rules according to which a man ought not to be in a sequested place alone with women; counsels as to the trade or profession in which an Israelite should bring up his son; occupations which an unmarried man should not follow, on account of the great facilities they offer for unchaste practices. It also states that all ass-drivers are wicked, camel-drivers are honest, sailors are pious, physicians are destined for hell, and butchers are company for Amalek (14 sections)."

IV. "Kiddushin, Seder Nezikin (Damages)."

This Seder contains ten tracts:

31. Ḥullin, Baba Kamma, or the first gate, so called because it is often and ministered in the gateway of a city. It treats, in ten chapters, of damages: a. Ḥullin, of four kinds of damages, restitution and its amount (4 sections). b. Yevamot, how an animal can damage, and of the owner who is obliged to make restitution (6 sections). c. Gittin, of damage caused by men; of goods, oxen (6 sections). d. Shabbat, of damage caused by an open pit (9 and 7 sections). e. Sotah, of damage caused by negligent feeding of cattle and by fire (6 sections). f. Gittin, of restitution, when it is double, twofold or fivefold (7 sections). g. Ḥullin, of restitution for hurting or wounding (7 sections). h. Ḥullin, what to do, in case some change happens with something robbed; of the fifth part above the usual restitution, in case of perjury (18 sections). j. Ḥullin, of sandry cases, applicable to the restitution of stolen goods (10 sections).

32. Ḥullin, Baba Metziah, or the middle gate, in ten chapters, treats of claim resulting from trusts: a. Ḥullin, and b. Gittin, what to do with goods which were found (8 and 11 sections). c. eretin, of deposits (12 sections). d. Gittin, of buying, and different kinds of cheating (9 sections). e. Shabbat, of different kinds of injury and overtaxing (11 sections). f. Ḥullin, of the rights of hiring (8 sections). g. Ḥullin, of the rights of laborers concerning their eating, and what they may eat of the eatables they work on; of the kinds of keeping, and what is meant by "bones, etc. causas fortuitas" (11 sections). h. Ḥullin, continuation, and again of hiring (9 sections). i. Ḥullin, of the rights among farmers; of wages, and taking a pledge (13 sections). j. Ḥullin, of divers cases when something belonging to two has fallen in; of the rights of public places (8 sections).

33. Ḥullin, Baba Batra, or the last gate, in ten chapters, treats of the partition of immovables, laws of tenantry, joint occupation, and rights of common: a. Ḥullin, partition of such things as are in common; what each has to contribute, and how one can be obliged to make a partition (6 sections). b. Ḥullin, of divers kinds of servitude; what and how far something must be removed from the neighbor’s premises for different causes (14 sections). c. Ḥullin, of superannuation of things in right of land (8 sections). d. Ḥullin, what is sold along with the sale (9 sections). e. Ḥullin, continuation, and how a sale may be made void (11 sections). f. Ḥullin, for what a person must be good; of the required size of different places and the right of passing through (8 sections). g. Ḥullin, of becoming security for a sold acre and of other things pertaining to it (4 sections). h. Ḥullin, of inheritances (8 sections). i. Ḥullin, of the division of property (10 sections). j. Ḥullin, of what is required in order to make a contract legal (8 sections).

34. Ḥullin, Shebath, or courts of justice, in eleven chapters: a. Ḥullin, of the difference of the three tribunals of, at least three persons; b. Ḥullin, the small Sanhedrin of twenty-three persons; and, c. the great Sanhedrin of seventy-one persons (6 sections). b. Ḥullin, of the privileges of the high-priest and king (5 sections). c. Ḥullin, of appointing judges; unfitness for being judge and witness; of hearing the witnesses and publishing the sentence in a special place; d. Ḥullin, of judgments in money and judgments in souls; a description how they sat in judgment (5 sections). e. Shebath, again, of examining witnesses, and what must be observed in capital punishments (6 sections). f. Ḥullin, of stoning in special cases (6 sections). g. Ḥullin, of the other capital punishments; those that were to be stoned (11 sections). i. Ḥullin, of stubborn sons and their punishments, with so many restrictions, however, that this case hardly could ever have any practical application (11 sections). j. Ḥullin, of men who were burned or beheaded (6 sections). j. Ḥullin, of those who have part in the world to come, viz., “all Israel” (6 sections). But the following have no share: he who says that the resurrection of the dead is not found in the law, or that there are no revealed laws from heaven and the Epicurean. Besides, there are excluded from the world to come, Jeroboam, Ahah, Manasseh, Balsam, Doeg, Ahitophel, and Gehazi. So, likewise, the generation of the Deluge; the men of Sodom, the spies, the generation of the wilderness, the congregation of Korah, and the men of a city given to idolatry. In the Gemara a good deal is spoken of the Messiah. ii. Ḥullin, of those that are rebelliously rebellious elders and their punishment (6 sections).

35. Ḥullin, Makkoth, or stripes, in three chapters, treats of corporal punishments: a. Ḥullin, in what cases false witnesses are inflicted with the stripes, and of the mode of procedure against false witnesses in general (10 sections). b. Ḥullin, of intestines, and of unintentional murders, and the cities of refuge (8 sections). c. Ḥullin, of criminals deserving the stripes; how they should be inflicted; why forty save one (?); of stopping in case the delinquent is regarded as too weak; that such as have suffered this penalty for a crime are to be punished (Gen. xi, 8); the men of Sodom, the spies, the generation of the wilderness, the congregation of Korah, and the men of a city given to idolatry. In the Gemara a good deal is spoken of the Messiah. iii. Ḥullin, of that, of those that are rebelliously rebellious elders and their punishment (6 sections).

36. Ḥullin, Shebath, or oaths, in eight chapters: a. Ḥullin, of different kinds wherein a person is conscious or unconscious of having touched anything unclean (because it is treated under the head of lev. v, 2): of the atonement through sacrifices; what sins were atoned by the different kinds of sacrifices (7 sections). b. Ḥullin, how far the sanctity of the court of the Temple reaches (5 sections). c. Ḥullin, of forswearing, its kinds and degrees (11 sections). d. Ḥullin, of the oath of witnesses; of blasphemy and cursing (13 sections). e. Ḥullin, of the oath mentioned in Lev. vi, 5, and of the perjuror (6 sections). f. Ḥullin, of the oaths demanded by the court, when it must be taken or not, and what ought to be testified (7 sections). g. Ḥullin, of such oaths as are for the benefit of him that swears (6 sections). h. Ḥullin, of the difference of oaths; of the oath entered into at different times; of the security for good; how far it goes; in what cases they must replace or annul; what in case they lied (6 sections).

37. Ḥullin, Redagoth, or testimonies, in eight chapters. It is so called because it consists of laws which tried and trustworthy teachers attested to have been adopted by the elder teachers, in Sanhedrin assembled: a. Ḥullin, exact-
ments in which the other sages deviate from the laws of Shammai and Hillel, or wherein the school of Hillel is followed, or wherein the school of Hillel has given way to that of Shammai (14 sections). b. אוסרי Büro, enactments of different rabbinas, especially of R. Iahmaei and R. Akiba, on mostly unimportant things (10 sections). c. דחי בלא סיוע, enactments of R. Dosa on diverse deliberations (12 sections). d. ליא אוסרי Büro, laws which the school of Shammai is more lenient than that of Hillel (14 sections). e. דחי Büro, laws which R. Akiba would not take back (7 sections). f. "דחי Büro", of different kinds of delen-tment on which disputes have taken place with R. Elk-ezer (9 sections). g. ג. חלוכי Büro, of some minor points wherein the magistrate cannot be brought under one common nomenclature; at least it is clear that the Halakhah will finally determine all disputed points of the sages and will bring peace (9 and 7 sections).

38. ד LAW, Abodah Zarah, or Idolatry, in five chapters, in which the want of the Basile edition of 1815, because severe reflections upon Jesus Christ and the lower classes were found therein by the censor: a. חדウォ תור טע, what must be observed concerning idolatrous feasts, and of things not to be sold to idolaters (9 sections). b. לעי אוסרי Büro, of different forbidden occasions which tend towards a connection with idolaters; of the use that can be made of their vessels, especially of their drinking-vessels (9 sections). c. דחי Büro, of idols, temples, altars, and graves (10 sections). d. דחי Büro, of what belongs to an idol, and of desecrating an idol; prohibition of wine of libation, and of every wine which was only touched by an heathen, even the slightest libation could have made it sacrificial wine (15 sections). e. דחי Büro, continuation of things with which wine cups have been mixed up; how to cleanse utensils bought of a heathen for eating purposes (12 sections).

39. ד LAW, Abot, or פָּרֵי אב, Pitray Abot, contains the ethical maxims of the fathers of the Mishna. It is impossible to make an analysis of the six chapters, because they all contain maxims without any chronological order. This treatise deals with the oral law, its transmission, names of the "receivers," and contains maxims, aphorisms, and the wisdom of the wise. The first chapter has 18, the second 16, the third 18, the fourth 22, the fifth 28, and the sixth 10 sections. A more detailed account of it has been given in the art. פָּרֵי אב (q. v.).

40. מahn, Horagath, or decisions, in three chapters, treats of the moments of pronouncing the halakhah on other matters relating to judges and their functions, but which, though erroneous, still were observed, and for which a sin-offering was to be brought according to Lev. 19: 13: a. דחי Büro, or of the cases and under what circumstances such offerings were to be brought by the congregation or not (6 sections). b. דחי Büro, of the sin-offering of the anointed priest and prince (7 sections). c. דחי Büro, who is meant by an anointed priest and prince; of the difference between an anointed priest and one only invested with the priesthood through the prerogatives of a high-priest before a common priest; of the male sex before the female; finally, of the order of precedence among those who profess the Jewish religion, that a learned preceoses an unlearned (8 sections).

5. ד LAW, Seder Kadashim (Consecrations). This Seder contains eleven tractates:

41. ד LAW, Zebachim, or sacrifices, in nineteen chapters:

a. דחי Büro, in how far every sacrifice must be regarded with the intention that it shall be such a sacrifice (4 sections). b. דחי Büro, of the place of the altar where every sacrifice has to be offered (7 sections). c. דחי Büro, or of the difference between the most holy sacrifices and those of less holiness (8 sections). d. דחי Büro, of sprinkling the blood (6 sections). e. דחי Büro, of the sacrifice of birds (6 sections). f. דחי Büro, of the sacrifice of a burnt-offering in cases where something of the sanctified has been changed with the other parts (12 sections). how the altar sanctifies the offered part (7 sections). j. דחי Büro, of the order in which sacrifices must be brought; which precedes the other (6 sections). k. דחי Büro, the dress, etc., of the blood of a sin-offering has come (8 sections). l. דחי Büro, to whom the skins belong and where they go (6 sections). m. דחי Büro, of divers trespasses, when trespass has been committed unconsciously during the sacrificial service (5 sections). n. דחי Büro, of the different places of sacrificial service during different periods (Gil-gal, Shiloh, Nobh, Gilboa, Jerusalem), and of the difference between the altar and the heights (10 sections). 42. ד LAW, Menachoth, or meat-offerings, in eighteen chapters:

a. דחי Büro, or of taking a handful; what corresponds in sacrifices to the act of sacrificing, when it becomes unfit or an abomination (4 sections). b. דחי Büro, of the difference and of תוהמ, according to the different kinds of meat-offerings (5, 7, and 5 sections). c. דחי Büro, of sacrifices, and f. דחי Büro, of their different kinds and their treatment (9 sections). g. דחי Büro, of the thank-offering and of the Nazarite's offering (6 sections).

43. ד LAW, Cholid, or unaccompanied things, in seventeen chapters:

a. דחי Büro, who may slaughter; whereby and where it can be slaughtered (7 sections). b. דחי Büro, of cutting through the windpipe and esoph- age. In from the stalk, and how the slaughtering becomes unfit (16 sections). c. דחי Büro, of what animals are no more kasbeer, i.e. lawful, but trepakh, f. e. i. e. unlawful; the signs of clean fowls, grasshoppers, and fishes (1 sections). d. דחי Büro, enactments concerning an animal founds (7 sections). e. דחי Büro, of the prohibition against slaughtering an animal and the young on the same day (6 sections). f. דחי Büro, the precept of covering the blood of wild animals and fowl (7 sections). g. דחי Büro, the precept concerning the prohibition of eating the sinew which shrank (6 sections).

44. ד LAW, Bekoroth, or First-born, in nine chapters:

a. דחי Büro, of the redemption of the first-born of an ass; how to redeem it (7 sections). b. דחי Büro, when the first-born of an animal is not to be given; of some details of the sanctified animal; of sundry dubious cases as to what constitutes the first-born (8 sections). c. דחי Büro, of the sign of the birth of the first-born; of the wool of a first-born (4 sections). d. דחי Büro, how long the first-born must be raised up before it is given to the priest; what must be paid for the inspection (10 sections). e. דחי Büro, of the rights of the first-born concerning a heritage; in what cases he forfeits such a right or the priest forfeits the right on the first-born, and of what property he has to receive his heritage (10 sections). f. דחי Büro, of the right of the first-born concerning a heritage; in what cases he forfeits such a right or the priest forfeits the right on the first-born, and of what property he has to receive his heritage (10 sections). g. דחי Büro, of the right of the first-born concerning a heritage; in what cases he forfeits such a right or the priest forfeits the right on the first-born, and of what property he has to receive his heritage (10 sections). h. דחי Büro, of the right of the first-born concerning a heritage; in what cases he forfeits such a right or the priest forfeits the right on the first-born, and of what property he has to receive his heritage (10 sections). i. דחי Büro, of the right of the first-born concerning a heritage; in what cases he forfeits such a right or the priest forfeits the right on the first-born, and of what property he has to receive his heritage (10 sections). j. דחי Büro, of the right of the first-born concerning a heritage; in what cases he forfeits such a right or the priest forfeits the right on the first-born, and of what property he has to receive his heritage (10 sections). k. דחי Büro, of the right of the first-born concerning a heritage; in what cases he forfeits such a right or the priest forfeits the right on the first-born, and of what property he has to receive his heritage (10 sections). l. דחי Büro, of the right of the first-born concerning a heritage; in what cases he forfeits such a right or the priest forfeits the right on the first-born, and of what property he has to receive his heritage (10 sections).
TALMUD

who has to make this estimate and on what (4 sections).

b. ד"ה יד הillegal to make such an estimate (5 sections).

c. ד"ה יד ה, what constitutes herein the minimum and maximum (6 sections).

d. ד"ה יד ה, how such a valuation may be more difficult to the one than to the other (6 sections).

e. ד"ה יד ה, how the valuation has to be made according to the means, age, etc. (4 sections).

f. ד"ה יד ה, valuation according to weight, and any other guarantor takes a forfeit (6 sections).

g. ד"ה יד ה, of proclaiming and redeeming (6 sections).

h. ד"ה יד ה, and a, of the banished (6 to 7 sections).

i. ד"ה יד ה, of redeeming a sold field; of houses in a city surrounded with a wall (Lev. xx, 59); of the privilege of the houses and cities of the Levites (8 sections).

46. ד"ה יד ה, Terumah, or exchanges (Lev. xxvii, 10, 38).

In seven chapters, treats of the way exchanges are to be effected between sacred things: a. ד"ה יד ה, to what persons and things this right may be applied or not (6 sections).

b. ד"ה יד ה, of the difference between the sacrifice of an individual and a congregation (3 sections).

c. ד"ה יד ה, of the exchange of the young of a sacred animal (5 sections).

d. ד"ה יד ה, of sin-offerings which were starved, or which were lost and found again (6 sections).

e. ד"ה יד ה, of the means to cleanse the priest out of the first-born; how young cattle can be sanctified: these are treated separately (6 sections).

f. ד"ה יד ה, what is prohibited to be brought upon the altar (5 sections).

g. ד"ה יד ה, of the different rights of things sanctified for the altar and for the Temple; what may be buried or burned of the sanctified (6 sections).

47. ד"ה יד ה, Kerithoth, or cutting off. In seven chapters, treats of offenders being cut off from the Lord, provided the offenders were wontonly committed; but if inadvertently committed, entailed the obligation to bring sin-offerings: a. ד"ה יד ה, of the sacrifice of a woman in childbed, after the birth is certain or near (4 sections).

b. ד"ה יד ה, of cases where one or more sin-offerings were to be brought (6 and 10 sections).

c. ד"ה יד ה, of a double sin-offering (3 sections).

d. ד"ה יד ה, of eating blood and divers doubtful eatings, and what they cause (8 sections).

f. ד"ה יד ה, of cases wherein the secret sin became known; of the efficacy of the day of expiation; of shekels which were used separately and for other purposes (10 sections).

48. ד"ה יד ה, Molailah, or trespass (Numb. v, 6, 8). In six chapters, treats of things partaking of the name of sacrifice: a. ד"ה יד ה, what sacrifice causes a trespass (4 sections).

b. ד"ה יד ה, from what time it is possible according to the nature of the sanctified (9 sections).

c. ד"ה יד ה, of things which were given from such trespass (8 sections).

d. ד"ה יד ה, how far the addition of different things takes place (6 sections).

e. ד"ה יד ה, in how far the wear and tear, by spoiling something of it, or the use thereof, is to be considered (5 sections).

f. ד"ה יד ה, in how far a man may trespass by means of a third person (6 sections).

49. ד"ה יד ה, Tammid, or daily sacrifices. In seven chapters, treats of the morning and evening offerings: a. ד"ה יד ה, of the night-vigil and of the arrival of the capital of the altar, when they were opened and the priests went in (4 sections).

b. ד"ה יד ה, of the first work, how the altar was cleared from the ashes, the fagots were brought and the great and the small fire were arranged; the former for the members and the cals of the sacrifices, the latter for the coals of the incense (5 sections).

c. ד"ה יד ה, allotting services for the offerings of the lamb; of finding out whether it "brightens"; of fetching the lamb and the vessels; of the lamb-chamber, opening the Temple and cleansing the inner altar and candlestick (9 sections).

d. ד"ה יד ה, of slaughtering and sprinkling the blood; of skinning, cutting, and dividing the parts (8 sections).

e. ד"ה יד ה, of the morning prayer of the priests; of offering the incense (6 sections).

f. ד"ה יד ה, again of cleansing the inner altar and the candlestick; of putting on the coals and of lighting the incense (8 sections).

g. ד"ה יד ה, of the entering of the high-priest and of the other priests; of the blessing of the priests; when the high-priest offered the sacrifices: of the chalice which the laves intoned in the sanctuary (4 sections).

50. ד"ה יד ה, Middoth, or measurements, in five chapters, treats of the measurements of the Temple, its different parts and courts: a. ד"ה יד ה, of the opening of the outer gates and chambers (9 sections).

b. ד"ה יד ה, of the mountain of the Temple, its walls and courts (6 sections).

c. ד"ה יד ה, of the altar and the other space of the inner court to the hall of the Temple (8 sections).

d. ד"ה יד ה, of computation of the measures of the Temple (7 sections).

e. ד"ה יד ה, of the measure of the court and its chambers (4 sections).

This tractate has no Gemara or commentary.

51. ד"ה יד ה, Kinnim, or bird's-nests. In three chapters, treats of the mistakes about doves and beasts brought into the Temple for sacrifice: a. ד"ה יד ה, how the blood of these birds was sprinkled in different manners—what of the sacrifice above the altar, what of the altar which stretched around the altar (4 sections).

b. ד"ה יד ה, of the so-called indefinite nest (5 sections).

c. ד"ה יד ה, of possible mistakes of the priests and the offering women (6 sections).

VI. ד"ה יד ה, Seder Taharoth (Purifications).

This order has twelve tracts:

52. ד"ה יד ה, Keilim, or vessels, in thirty chapters, treats of those convey uncleanliness (Lev. xi, 33): a. ד"ה יד ה, of the main kinds of uncleanliness according to their ten degrees, as well as of other ten degrees of uncleanliness as well as of holiness (9 sections).

b. ד"ה יד ה, of metals, of earthen vessels, which are the least capable of uncleanness, but which become clean as soon as they break wholly or partly (6, 8, and 4 sections).

c. ד"ה יד ה, of metal vessels which become unclean, and how they get clean (9, 8, and 8 sections).

d. ד"ה יד ה, of vessels of wood, of bone, glass, and the size of the hole whereby they become clean: also of the size of things used as a measure (6, 8 and 17 sections).

f. ד"ה יד ה, of beds (9 and 10 sections).

g. ד"ה יד ה, of things which become unclean by sitting thereon (7 sections).

h. ד"ה יד ה, of things fastened to a floor, plough, etc. (3 sections).

i. ד"ה יד ה, of tables and chairs (16 sections).

j. ד"ה יד ה, of things which become unclean by riding thereon (9 sections).

k. ד"ה יד ה, of a great many things by which three modes of uncleanness take place (17 sections).

l. ד"ה יד ה, of the outside and inside of vessels, the handle and the different duties belonging to them (9 sections).

m. ד"ה יד ה, of vessels which have straps (9 sections).

n. ד"ה יד ה, and bb. ד"ה יד ה, how large something must be in order to become unclean; also, that something which is three inches long and wide may be called a dere (17 and 10 sections).

o. ד"ה יד ה, of cords on different things (8 sections).

p. ד"ה יד ה, of vessels of glass which are flat or a receptacle (4 sections).

53. ד"ה יד ה, Ohaloth, or tents (Numb. xix, 14), in twenty-two chapters, treats of tents and houses retaining uncleanliness, etc.: a. ד"ה יד ה, of the different modes and degrees of uncleanness over a dead body; of the difference of uncleanness in men and vessels; of the measure of the limbs of a dead body, or carcass, and of the number of the members of man (8 sections).

b. ד"ה יד ה, what be-
comes unclean in a tent through a corpse, and what only by touching and carrying (7 sections).

c. מִינָיָן מִסְלָלִים, of adding together divers kinds of uncleanness; what is not unclean in a dead body (teeth, hair, and nails, provided they are not mingled with the flesh of the body) are not mingled. In the measure of openings, whereby uncleanness can be propagated (7 sections); d. נַפְעַל, of vessels into which uncleanness does not penetrate (3 sections).

e. רָעָה, when the upper story may be regarded as separated from the lower part (1 section).

f. קָשָׁה, how men and vessels form a cover over carcasses; of the uncleanness in the wall of a house (7 sections).

g. מַגְּרָה, of a woman giving birth to a dead child (6 sections).

h. רַדְּכֶה רַדְּכֶה עִלָּה, of things conveying and separating uncleanness, and of others which do not (6 sections).

i. יָרָדָה, how far a large basket separated (16 sections).

j. בְּרֵי, and בֶּרְלָא, of openings in a house and cracks on a roof (7 and 9 sections).

k. יָרָדָה, or uncleanness in parts of the house and roof (9 sections).

l. יָרָדָה, of the measure of a hole or window which may propagate uncleanness (6 sections).

n. יָרָדָה, or בֶּרְלָא, of cornices and partitions in a house.

o. בֶּרְלָא נִפְנוֹת וְבְרֵי, of graves (7 and 10 sections).

p. נִפְנוֹת וְבְרֵי, continuation of graveyards (5 sections).

q. רָעָה וְרָעָה רָעָה רָעָה רָעָה, of the bet haph-pras (field in which a grave has been detected, or must be presumed, etc.;) how far the houses of the heathen must be regarded as unclean (6 and 10 sections).

54. נְגָמִים, or plagues of leprosy, in seventeen chapters, treats of leprosy of men, garments, or dwellings:

a. מִנָיָן מִסְלָלִים, of the four indications of leprosy and their kinds (6 sections).

b. גֶּרֶשֶׁב, of the inspection of leprosy (5 sections).

c. מִנָיָן מִסְלָלִים, of the time and signs when uncleanness is pronounced (8 sections).

d. רַדְּכֶה רַדְּכֶה עִלָּה, of the difference between the different signs of leprosy (11 sections).

e. נַפְעַל, of dubious cases when uncleanness is pronounced (5 sections).

f. רָעָה רָעָה, of the size of the white spot, and the places where no leprosy occurs (8 sections).

g. רָעָה רָעָה, of the changes of the spots of leprosy, and when they were rooted out (6 sections).

h. רָעָה רָעָה, of the growing of the spots (10 sections).

i. יָרָדָה, of the difference between a boil and a burning (3 sections).

j. יָרָדָה, of scalds (10 sections).

k. יָרָדָה וְרָעָה רָעָה רָעָה, of leprosy in houses and garments (12, 7, and 12 sections).

l. יָרָדָה, of cleaning a leper (18 sections).

55. פַּרְעָה, or the red heifer, in sixteen chapters, directs how she is to be burned, etc.: a. דְּרֵי מְרָבָּה, of the heifer's age, and ages of other offerings (4 sections).

b. דְּרֵי מְרָבָּה, biemisheh which make her unfit (4 sections).

c. יָרָדָה וְרָעָה רָעָה, separation of the priest for burning the red heifer, procession of heifer and attendants; pilie for burning; gathering the ashes (11 sections).

d. יָרָדָה וְרָעָה, how the sacrifices may become unclean under these rites (4 sections).

e. נַפְעַל, of the vessels for the sprinkling-water (9 sections).

f. יָרָדָה וְרָעָה רָעָה, of cases where the ashes or the water becomes unclean (5 sections).

g. יָרָדָה וְרָעָה, how this rite cannot be interrupted by any kind of labor (12 sections).

h. יָרָדָה וְרָעָה רָעָה רָעָה, of keeping the water: of the sea and other waters with regard to the sprinkling-water (11 sections). i. יָרָדָה וְרָעָה רָעָה רָעָה, confirmation (9 sections).

j. יָרָדָה וְרָעָה, how clean persons and vessels may become unclean (6 sections).

k. יָרָדָה וְרָעָה, of the hysops for sprinkling (9 sections).

l. יָרָדָה וְרָעָה, of the persons fit for sprinkling (11 sections).

56. תָּוָהָר, Tahorah (prop. Toborath), or purifications, in fifteen chapters, teaches how purifications are to be effected: a. יָרָדָה וְרָעָה רָעָה, of the carriage of a clean and uncleanness of the person who has eaten something unclean; of the effect of the different degrees of uncleanness (8 sections).

c. יָרָדָה וְרָעָה, of beverages; of the estimation of an uncleanness after the time of its detection (8 sections).

d. יָרָדָה וְרָעָה, of doubtful cases of uncleanness (13, 9, and 10 sections).

g. יָרָדָה וְרָעָה, how a layman makes something unclean; of the care to be taken in preserving the cleanness of dresses and vessels (9 sections).

h. יָרָדָה וְרָעָה, how to keep vessels clean; of the use of the hand to eating the olives (9 sections).

j. יָרָדָה וְרָעָה, of the same in the treatment of wine (8 sections).
clean through the touch of a tibbāl yōm (5 sections).

62. יַבָּד, Yadim, or hands, in four chapters, treat of
the washing of hands before eating bread, though dry
fruits are allowed to be eaten without such washing: a.
בִּרְיָס, how much water is required for ablation of
the hands; what kind of water; of the vessels for the
same; who may pour it out (6 sections). b. בָּדָל, of
the two ablutions whereby the unclean first water is wash-
ed away; how the ablution must take place (4 sections).
c. בְּכֵרָס, whether and how the hands become unclean
in the first degree, and in the second; whether and
how far the touching of straws of phylicteries and of holy
writings defiles (5 sections). d. בְּרִיָּס, of some special
discussions; of the defilement by the Chaldee in the
Bible; and of the Assyrian; disputes between the Pharisites
and Sadducees (1 sections).

63. עַקַּטָּר, Ukaten, or stalks of fruit which convey un-
cleanliness, in three chapters: a. עַקַּט לֹא, of the
difference between the stalks and hocks of fruits (6 sections).
b. עַקַּט הַנָּפַת, what is added to the whole from stones,
hues, leaves, etc. (10 sections). c. עַקַּט זְרָאַה, of dif-
cient classes of things, how and when they are apt to ab-
sorb an uncleanness (12 sections).

In addition to the treatises which compose the Ge-
mosa, there are certain minor ones which are connected
with it as a kind of Apocrypha or appendix, under the
title of Mesikoth Ketemoth (משיקות קטעות), or smaller
tracts: These are:

1. ספר בראשית, Sophurim, concerning the scribe and reader
of the law (21 chapters). This tract is important for the
Maseorah. A separate edition, with notes, was pub-
lished by J. Müller (Leips. 1875). See also the art. So-
pherim.

2. תקף, Kallah, relates to marriages (1 chapter).

3. ספר רבбит אֵלֶּל, Ebel Rabbath, or Sem-
chith, concerning the ordinances for funeral solemnities
(14 chapters).

4. ספר תרצה, Derek Erets, on social duties (11 chapters).

5. ספר הדיל, Derek Erets Sota, rules for the learned
(10 chapters).

6. ספר הנדיל, Derek ha-Shalom, on the love of peace
(1 chapter).

7. ספר גיריס, Gerim, concerning proselytes (4 chapters).

8. ספר קיתימ, Kuthim, concerning Samaritans (2 chapters).

9. ספר בבד, Abadim, concerning slaves (3 chapters).

10. ספר טיטסיט, Tesseth, concerning fringes (1 chapter).

11. ספר תטפיה, Tephilin, concerning phylacteries (1 chapter).

12. ספר כתיא, Mezuchah, concerning the writing on the
doorpost (2 chapters). See art. Mezuchah.

13. ספר תורה,opher Torahah, concerning the writing of the
law (5 chapters). Nos. 7-13 were published together by R. Kirchhelm,
under the title Septem Libri Talmudici Parisienses (Frankf.-on-the-
Main, 1851).

To these treatises are sometimes added:

14. ספר להקת איל, Hilchot Erets Parashah, relating to
the ways of slaughtering animals for food after the
Jewish ideas, a treatise which is much later than the Tal-
mud.

15. עַ 호출 בָּא, Aboth de-Rabbi Nathan, a com-
mentary on or amplification of the treatise Aboth (21 chapters).
For the author of this treatise, see the art. Nathan-
ba-Baali.

ALPHABETICAL LIST OF THE DIFFERENT TREATISES AS
FOUND IN THE BABYLONIAN TALMUD.
The first column gives the name of the treatise; the second
indicates the volume or division in which the treatise may be found; the third
shows the Seder or division under which they are given; and the fourth
the numerical order in which they stand in the Mishna.

</table>

Having given an analysis of the contents of the Tal-
mud, we will now give a specimen of its text, which
will present to the reader a faint idea of the mode
of procedure as we find it in that wonderful work.

We open the very first page of the Talmud, the trea-
tise Berakoth, on blessings, commencing יְהֵי יְשָׁמֵר.

Mishehu...—At what time in the evening should one say
the Shema? From the time that the priests go in to eat
their oblations till the end of the treatise may be found; this
are the words of the rabbi Eiliezer; but the wise men say
until midnight. Rabban Gamaliel says till the morning
dawn arises. It came to pass that some were returned
from a feast; they said unto him, 'We have not yet re-
cited the Shema.' He answered and said unto them, 'If
the morning dawn has not yet arisen, let us pray the obla-
tion to recite it.' And not alone have they said, but everywhere where the wise
have said 'until midnight,' there is the binding for the morning
dawn ariseth; and the steaming of the fat and of the joints is
lawful until the morning dawn arise, and so everything which may be eaten on the same day it is allowed to eat until the morning dawn arise. Do they not do this? In order that men may be held far away from sin.

Geted the Thanna (I. e. rabbi Judah the Holy), what is his authority that he teaches, from what time onward? And, besides that, why does he teach on the evening before, and not the morning? When does he teach on the morning first? The Thanna rests on the Scripture, for it is written, 'When thou liest down and when thou risest up,' and so he teaches the time of reciting the Shema, when thou liest down, when is it? From the time when the priests go in to eat of their obligation. But Vav will not say, I believe, but hath taken it only from the tradition of the world, for it is said it was evening and it was morning one day. If this is so, it is not required in the mishna which rabbi Judah who is teaching are said two blessings before and one after, and in the evening two before and two after, and yet they teach in the one thing the whole rabbinic and in the other they do not. The Thanna rests on the Scripture, so as he teaches the morning, as he teaches the evening, he explains the things of the morning, and then he explains the things of the evening.

This is less than one fourth part of the comment in the Gemara on that passage in the Mishna, and the remainder is equally lucid and interesting.

2. The Talmud, both in the margin of the pages or at the end of the treatises, are (1) the Tosaphoth, exegetical additions by later authors; (2) Masorah ha-shesh she Darbinim, being marginal Masoretic indices to the six orders of the Mishnah; (3) Ain or En-Mukpat, i. e. index of places on the routes and inns of the Talmud; (4) Midrashot, a collection of decisions according to the digest of Maimonides; and (5) Perushim, or commentators by different authors.

IV. Literary Uses.—The Talmud has been applied to the criticism and interpretation of the Old Test. Most of its citations, however, agree with the present Masoretic text. It has probably been conformed to the Masoretic standard by the rabbis, at least in the later editions. For variations, see the art QUOTATIONS OF THE OLD TESTAMENT IN THE TALMUD; for the interpretation, see the art Scripture Interpretation Among the Jews.

The Talmud has also been used in the illustration of the New Test. by Lightfoot, Schöttgen, Meusschen, Wettstein, Gfrörer, Robertson, Nork, Delitzsch, Wünsche. But in this department also, its utility has been over- estimated, and by none more than by Lightfoot himself, who says, in the dedication prefixed to his Talmudical edition, 'The Talmudical exegesis by the rabbis themselves will obviously not render them (the Talmudic writings) most usefully serviceable to their students, and most eminently tending to the interpretations of the New Test.' But not so Isaac Vossius, who said Lightfoot would have sinned less by illustrating the Evangelists from the Kabbalistic writings, than by illustrating the Talmud, since the rabbis had in mind the rabbis, and had begun the same, that is, the rabbis and the rabbis of the rabbis, and the rabbis of the rabbis of the rabbis, and so on.

For the Old Test. as it was in the time of the Talmud, see the next article.

V. Apparatus for Study of the Talmud.—I. Manuscripts.—Like the text of the Old Test., the Talmud was preserved with the greatest care during the Middle Ages; but, like a great many other works, these MSS. have become the prey of time, and only a few of them are extant. All that is known is (1) the first division of the Jerusalem Talmud in possession of the Jewish congregation at Constantinople; (2) a complete copy of the Babylonian Talmud from the year 1483 in the Royal Library at Munich; (3) a fragment of the same, evidently older than No. 2, in the same place; (4) a fragment of the same from the year 1194 in the Hamburg City Library; (5) the treatise Sanhedrin according to the Babylonian redaction, and belonging to the 13th century, in the collection of Ms. Cardini, with variations, preserved at the University Library of Breslau. There is no doubt in that some libraries fragments may yet be found, if the covers of old books should be properly examined, for which they have been used by ignorant binders. That such was the case we need not know from the fragments at the Breslau University, but from a more recent discovery of W. H. Lowe, who published the Fragment of the Talmud Babli Pesachim of the 9th or 10th century, in the University Library at Cambridge, with Notes and a Fac-simile (London 1879).

2. Editions.—Like the Old Test., at first only parts of the Talmud were published, on which see De Rossi, Annals Hebraico-Septuaginta Sac. XV (Parma, 1795). The first part of the Talmud, the treatise Berakoth, was published at Soncino in 1484; but the first complete edition (the larger later ones) was published by Bomberg (Venice, 1520-23, 12 vol. fol.); a complete copy of which is in the libraries of Cassel and Leipsic. Since that time editions have been published at different places, which are enumerated by R. N. Rabinowicz, in his Pikiel ha-Midot Le-Hebraicim, or Kritische Übersicht der Gesammt- und Einzelausgaben des babylonischen Talmuds seit 1484 (Munich, 1877) (with the exception of the German title-page, the rest is in Hebrew). The Jerusalem Talmud was first published by D. Bombargar (Venice, 1528); then with brief glosses (Cracow 1609, Egypt, 1609, Dessau, 1743; Berlin, 1727; Schotttmir, 1860-67, 4 vol. fol.; Krotoschin, 1866, fol.). A new edition of Bomberg's, with commentaries, was commenced by the late Dr. Z. Frankel, of which, however, only the first division was published (Vienna, 1875-76).

3. Translations.—There exists as yet no complete translation of either of the Talmuds in any language. The Arabic translation, said to have been prepared in A. D. 1000, at the will of king Hashem of Spain, is no longer extant. A large portion of the Jerusalem Talmud is found in a Latin translation in Ugoino, Theonn. Antiq. Sacra, v. i. Pesachim (vol. xvii), Shabbath, Toma, Sukkah, Peah, Demai, Ki L'yun, Shebu, Terumoth, Maaseroth, Beshah, Moed Katan (vol. xviii), Maaserot, Challah, Oblah, Bikkurim (vol. xx), Sanhedrin, Makkoth (vol. xxv), Kiddushin, Sotah, Ketuboth (vol. xxx). In the same work we also find three treatises of the Babylonian Talmud, viz., Zebachim, Menachoth (vol. xix), and Sanhedrin (vol. xxvi). Into French, the treatises Berakoth, Peah, Demai, Kl'yun, Shebu, Terumoth, Maaseroth, Master Sheni, Challah, Oblah, Bikkurim of the Jerusalem Talmud were translated by M. Schwab (Paris, 1872-79). The treatise Berakoth according to the Jerusalem and Babylonian Talmuds was also translated into French by L. Chirini (Leips. 1831) and into German by Rabbe (Halle, 1777). Of the Babylonian Talmud we have German translations of Berakoth by Pinner (Berlin, 1842); of Baba Metzia by A. Sammter (Ibid. 1876-79); of Aboda Zarah by F. Ch. Ewald (Nuremberg 1868). These are all the translations which are known to us.

4. Monographs.—Since the Talmud is the greatest storehouse of all and everything, different branches of science and religion have been treated in monographs. Thus on—

a. Botany: by Duschak, Zur Botanik des Talmud (Leips. 1856);

b. Civil and criminal law by Frankel, Der gerichtliche Beweis nach mos.-talmudischem Rechte, Ein Beitrag zur Kenntnis des mos.-talmudischen Criminal- u. Civilechts (Berlin, 1846); Duschak, Das mosaisch-talmudische Eherecht, etc. (Vienna, 1864); Thomason, La Peine de Mort dans le Talmud (Brussels, 1869); Bleich, Das mosaisch-talmudische Polizeirecht (Leips. 1879);
as, for instance, the books of Ben-Sira and Ben-Togat, brings confusion into his house.” Accordingly, Ecclesiasticus is not included in the canon of Melito, Origen, Cyril, Laodicea, Hilary, Rufinus, etc.; and though Augustine, like the Talmud and the Midrashim, constantly quotes it, yet he, as well as the ancient Jewish authorities, distinctly says that it is not in the Hebrew canon (De Civit. Dei, xvi. 20). Comp. also Jerome, *Proli. in Libr. Solom.*, where he says that Ecclesiasticus should be read “for the instruction of the people (*ploia*), not to support the authority of the ecclesiastical doctrines.”

2. The Alphabet.—It is difficult to determine with precision the time at which the square character was perfected. Origen and Jerome ascribe the invention to Ezra, and so does Josè ben-Chalafat, who flourished between A.D. 138 and 164. In the Talmud we find descriptions and allusions to the form of Hebrew letters which precisely suit the square alphabet; and even in the Mishna, which was completed in the 3d century of our era, traces occur of the same. In our own days the existence of the Hebrew square alphabet before the Talmudic era has been proved by the discovery of some tombstones in the Crèmes, a few of which even bear the date A.D. 6 and 30 (comp. Geiger, *Jüdische Zeitschrift*, liii, 123-138, 237; iv, 214 sq.). But these stones cannot

Besides these twenty-four books, the Talmud also quotes from the apocryphal book *Jussa ben-Sira*, better known under the name of *Ecclesiasticus*, as the passages given in the art. *Ecclesiasticus* indicate. But, in spite of this book being quoted so often, we are distinctly told that it is not canonical. Thus *Yadaim*, ch. ii, says, “The book of Ben-Sira, and all the other books written after its time, are not canonical” (*אֲנִיָּא הַמִּשְׁכָּר הַסְּרָא הַמִּשְׁכָּר הַמִּשְׁכָּר הַמִּשְׁכָּר*).

Again, the declaration made by R. Akiba, that he who studies uncanonical books will have no portion in the world to come (Mishna, *Sanhedrin*, x, 1), is explained by the *Jerusalem Talmud* to mean “the books of Ben-Sira and Ben-Lasanah”; and the *Midrash on Cokelet*, xii, 12 remarks, “Whosoever introduces into his house more than the twenty-four books (i.e. the Sacred Scriptures), be relied upon, and the forgery has been made manifest by Dr. H. Strack, A. Firkowsich u. seine Entdeckungen (Leips. 1876). In the Talmud, however, we are distinctly told not to change *א* and *ב*, and *ג* and *ד*, and *ה* and *ו*, and *ז* and *ח*, and *ט* and *י*, and *ך* and *ל*, and *מ* and *נ*, and *ס* and *ע* and *ר* and *ל* (*Shabbath*, fol. 103b, col. 2). The Talmud also knows the five final letters *ת, ט, ט, ט, ט* (ibid. fol. 104b, col. 1), which were probably used to render reading more easy by distinguishing one word from another (thus, *רְשֵׁי קֶסֶב, רְשֵׁי קֶסֶב, רְשֵׁי קֶסֶב* [the third and fourth words of the Heb. Bible] might be read *יְהָבָר הָבָר הָבָר*, “God is dead”). The Talmud, again, not only mentions the so-called *toggia* (טוּנָה, טוּנָה, טוּנָה), or calligraphic ornaments on the letters *ת, ט, ט, ט, ט* (*Menachoth*, fol. 29b, col. 1 sq.; *Shabbath*, fol. 69b, col. 1);
that Ayin in הָעֵת (Ps. lxxxv, 14) is the middle letter in the Psalms, and lxxvi, 38 the middle verse. In the same passage we also read that “the Pentateuch contains 5888 verses, the Psalms eight more, and Chronicles eight less.” Now if we compare this number with that given by the Masorites, we shall find that the Talmud counts forty-three verses more than the Masorites in the Pentateuch which differs. This difference can only be explained from the statement made by the Talmud (Joha Bithroth, fol. 14, col. 2), that Joshua wrote his book and eight verses of the law (Deut. xxxiv, 5–12); and the Occidentals, as we read in Kiddushin, loc. cit., divided Exod. xxxi, 9 into three verses. Thus much is certain, that in the Talmud there is a division according to verses; but what this mark of division was, if there were any at all—at least Tr. Sopherim, ch. iii, § 5, is against it—is difficult to point out.

6. Stichoi (εριγον).—The poetical passages in Exod. xv; Deut. xxxii; Judg. v; 2 Sam. xxii, were in the time of the Talmud already written εριγον (comp. Shabb., fol. 102, col. 2). In fine: Sopherim, ch. xi). The same may be said of the poetical books, פסוקים, i.e. Job, Proverbs, Psalms. The Decalogue was also originally written in ten series (ἐριγον, στίχοι), as is intimated in the Targum on the Song of Songs, v. 13: “The two tables of stone which he gave to his people were written in ten rows (στίχοι), resembling the rows or beds (στίχοι) in the garden of balsam.” See also Shitta.

7. The Smaller Sections of the Pentateuch.—In our Hebrew Bible, which follows the Masoretic text, the Pentateuch is divided into 669 parashot, or sections (פרשׁות), of which 290 are open (פרושות, and distinguished in our Bibles by the initial letter ב) and 379 are closed (פרושות, marked by the initial letter ג). Of these parashot mention is made in the Talmud, viz.

1. Tsedēth, ch. iv, § 8, the history of creation is divided into seven sections, viz. Gen. i, 5–6, 8–9, 14–19, 20–25, 28–31; ii, 1–3.
2. Berakoth, ch. ii, § 2; Tamid, ch. v, § 1; Menachoth, ch. xi, § 7, the sections of the prayer and phylacteries (Exod. xiii, 1–13; Deut. vi, 4–9; ix, 18–21; Num. xv, 37–41) are mentioned.

6. Matzoth, ch. iv, § 4, the following sections are also noted: Festivals, ch. viii, § 1; Deut. xxxi, 9–12; Exod. xxvii, 26–29; Deut. xxi, 12–14; Lev. xxvii, 36–38 (for the first of the seven, at the Passover; Deut. xxviii, 1–14, for the seven, at the Festival); Lev. xxvii, 28–29 (for New Year); Lev. xxi, 3–4; xxii, 28–29 (for the Day of Atonement); Num. xi, 16–18 (for the Day of Dedication); Exod. xvii, 8–18 (for Purim); Num. xxvii, 11–15 (for the new moon); Lev. xxvii, 5 sq.; Deut. xxvii, 9 (for Fast-days).

8. Shabbath, ch. viii, § 1, Deut. xvii, 12–14; Num. xvi, 1–9; xxv, 1–11; xxxiv, 5–12.

The Gemara forbids the leaving of the synagogue before the ending of such a section (Berakoth, fol. 8, col. 1), introduces the injunction of Ezra (Neh. viii, 8; Megillah, fol. 3, col. 1; Nedarim, fol. 37, col. 2), and prescribes, in reference to the prophets, how many sections are to be read on week-days (Haba Kamma, fol. 82, col. 1).

b. The study of the law, the instruction and school-teaching of the same produced such sense-divisions. These were distinguished from the former, which were merely called בתי קבורה, by the names בתי קבורה, clauses, sententiae, or also בתי קבורה, clause sections.

To instruct in the dividing of clauses (בֵּית קְבּוֹרָה) was a special part of the rabbinical teaching (Nedarim, fol. 37, col. 1); in Berakoth, fol. 62, the teacher is said to point it out to his scholars with his right hand; and according to it disputed points of the law were settled (Chagigah, fol. 6, col. 2). As to the sign of this division which is now found in the Hebrew Bible (א), it is not seen on the synagogue-roll, nor is it mentioned in the Talmud, but is of later origin; and we must conclude it as highly probable that this verse was not externally designated, but were merely transmitted by oral tradition, as may be seen from the following quotation. In Kiddushin, fol. 30, col. 1, we read: “Therefore are the ancients called Sopherim because they counted all letters in Holy Writ. Thus it was said that the Vav in מִי (Lev. xvi, 4) was the half of all the letters in the Pentateuch; מִי (x, 15) is the middle word; מִי (xiii, 33), the middle verse.

the points, viz. ḳeḇe, 'where is Abraham.'
The meaning is that the points over these three letters intend to indicate that the three angels did not ask 'where is Sarai, ḳeḇe, ḳeḇe, ḳeḇe,' but 'where is Abraham, ṭeḇe, ṭeḇe, ṭeḇe.' (comp. Baba Metziah, fol. 97, col. 1.)

Gen. xix, 33. In the Talmud, Nazir, fol. 23, col. 1, we read: "Why is there a point over the Vav, 4, of the word הִשַּׁבֵּר To indicate that when she lays down he did not perceive it, but when she arose he perceived it"(comp. also Horkoseth, fol. 16, col. 1; and Jerusha in Geans. "A prompter of super quasi incredible et quod rerum natura non capiat corre quemquam nescientem'."

Numb. iii, 19, Temple. Ba-midbar Rabhab, loc. cit., says, that the points over Aaron indicate that he was not one of that number (comp. also Berakoth, fol. 4, col. 1).

Ix, 10, הָיְתִת. In Mishna, Pesachim, ix, 1, we read: "What is a distant journey? R. Akiba says from Modim and beyond, and from all places around Jerusalem situated at the same distance. R. Eleazar says 'any distance beyond the outside of the threshold of the court of the Temple.' R. Jose says the reason for the point over the Vav (In our word) is to denote that it is not necessary to be actually on a distant road, but only beyond the threshold of the court of the Temple.'

Deut. xxix, 29, בּוַי הָתַּנְתָּ שֵׁלָם, בּוַי הָתַּנְתָּ שֵׁלָם. Ba-midbar Rabhab, loc. cit., "You have made manifest, hence I will also manifest unto you hidden things (comp. Sanhedrin, fol. 45, col. 5, in jow).

Psa. xxvii, 15, בּוַי הָתַּנְתָּ שֵׁלָם. Berakoth, fol. 4, col. 1, says, "Lord of the universe, I am aware that thou greatly rewardest the just in future ages, but I know not whether I shall partake of it with them on account of my sin." Buxtorf remarks on this passage,रן בְּנֵל דַּת לֶב, i.e. a sense without any sense. The meaning probably is בְּנֵל דַּת, without the points, means 'if not, like the Latin nisi, but with the points signifies 'a doubt.'

As to the origin and signification of these points, nothing certain can be said. According to the rabbins, Ezrā is said to have been the author of them (comp. Ba-midbar Rabhab on Numb. iii, 39, sect. iii, fol. 215, col. 4; Abod ah-De-Rabbah Nathan, ch. xxxiii). This much may be taken for granted, that these points were known long before the Talmud.

14. Inverted Vav, c.—Before Numb. x, 35, and after ver. 36, we find in our Hebrew text the letter Nun, א, inverted (ג). In the Talmud, Shabbath, fol. 115, col. 2; fol. 116, col. 1, we are told that "the section commencing וַיַּנְתָּ הָתַּנְתָּ שֵׁלָם (Numb. x, 35) was made by God with signs below and above, to indicate that it is not in its proper place. But Rabbi said this is not so, but that this book was counted by itself. How do you know it?" R. Samuel bar-Nachman said, R. Jonathan saith (it is written) 'She hath hewn out her seven pillars' (Prov. ix, 1): this means the seven books of the law." On the inverted Nun found in Psa. evii, mention is made in Josh Hash-schanah, fol. 17, col. 2.

15. The Vav Ketia in Numb. xxv, 12.—Of this וַיַּנְתָּ הָתַּנְתָּ שֵׁלָם, or Vav cut-off, which is found in our Hebrew Bible, א, we read in the Talmud, Kiddushin, fol. 66, col. 2: "Whence do we have it that a person having some defect is unfit for the sacred ministry? R. Jehudah said that the presidents taught that this is because the Scripture says, 'Wherefore say, Behold I give unto him my government of peace—a perfect peace, and not an imperfect one. But, said one, it is written דֹּבֶר בְּנֵיהוֹד, i.e. peace; but answered R. Nachman, the Vav in בְּנֵיהוֹד is cut off'."(ךֶּלֶב בְּנֵיהוֹד רָבָא)

16. The Closed or Final Mem (ג) in the middle of the word Isa. ix, 6, יֶשֶׁבֶר. In the Talmud, Sanhedrin, fol. 94, col. 2, we find the following:

"Why is it that all the Mem in the middle of a word are open (i.e. ב) and this one closed (i.e. ג)? The Holy One (blessed be he) wanted to make Hezekiah the Messiah, and Sennacherb Gog and Magog, whereupon Jus- tice pleased before the presence of the Holy One, Lord of the world, 'What! David, the king of Israel, who sang so many hymns before thee, wilt thou not make him the Messiah? But Hezekiah, for whom thou hast performed all the miracles, and who has not uttered one song before thee, wilt thou make him the Messiah? Therefore has the Mem been closed.'

17. Suspended Letters.—The suspended Nun we find in דַּת, Judges, xviii, 30. The Talmud, Baba Bathra, fol. 109, col. 2, states the following:

"Was he (i.e. Gershom) the son of Manasseh while the Scripture says the sons of Moses were Eleazar and Gershom. But because he did the deeds of Manasseh (2 Kings xvi, 12) the Scripture append to him (the family) of Manasseh." The meaning of the prophet did not like to call Gershom the son of Moses, because it would be ignominious that Moses should have had an impious son; hence he called him the son of Manasseh, with the suspended letter, which may mean the son of Manasseh or Moses.

The suspended Ayin is found in יֶשֶׁבֶר, Job xxxviii, 15. In the Talmud, Sanhedrin, fol. 105, col. 2, we read, the following: "Why is the ג in יֶשֶׁבֶר suspended? It is to teach that when a man is ג poor, in this world, he will also be ג in the world to come; or, literally, poor below, he will also be poor above."

Of the suspended Ayin in דַּת, Psa. lxxx, 14, we read, Kiddushin, fol. 30, col. 2, that this letter is the middle letter in the Psalms.

18. Majuscular and Minuscular Letters.—Of words written with large and small letters in our Hebrew Bible we find nothing in the Talmud, but some of these instances are mentioned in the Sopherim, ch. ix. That this mode of writing must have been very ancient cannot be doubted, for there is a dispute in the Talmud, Maqolah, fol. 16, col. 2, whether the ג in יֶשֶׁבֶר (Esth. ix, 9) should be written as a majuscular or minuscular letter; and the word לַיְיָי (Lev. xiii, 33), which is now written with a majuscular ג, is mentioned in Kiddushin, fol. 30, col. 2, as being the middle of the verses of the Pentateuch.

19. Mode of Quotations. See Quotations of the Old Testament in the Talmud. (B. P.)

Talmudists. Under this head we include all those rabbins whose opinions are regarded as authoritative in the Talmud. The period of these men comprises the time from about B.C. 180 to A.D. 500; e.g. from Simon the Just to the completion of the Talmud. This period is again subdivided into that of the Tannaim and that of the Amoraim—the former representing the time from about B.C. 180 to A.D. 219, the latter from A.D. 219 to A.D. 500.

1. Tannaim.—The first recognised, after Simon's death, as the head of the Sanhedrin was Antigonus of Soho, about B.C. 180. His contemporary was Eliezer ben-Charsum, celebrated for his opulence, learning, and zeal in the promotion of religious knowledge. After Antigonus, always two (or zugoth) stand at the head of the community—the first being the president, the second the vice-president. As the first of these zugoth, or pairs, are mentioned Jose ben-Joewer and Joseph
ben-Jochanan, about B.C. 70. They were followed by Joshua ben-Sera-ja and Nithai of Arela (q.v.). Their successors were Jehuda ben-Tahal and Simon ben-Shetach (q.v.). The fourth pair is represented in She-

maja and Abtalon, about B.C. 47. The fifth and last pair are Hillel (q.v.) and Shammay (q.v.). Under their presidency lived Baba ben-Bata, Chazina ben-Dose, Jehudah ben-Ha-Kana (q.v.), and Hillel ben-Ha-Kana (q.v.). Hillel was followed by his son Simon (ben-

Hillel) (q.v.). His successor was Gamaliel I (q.v.), who was followed by his son Simon (ben-Gamaliel) (q.v.). With Simon closes the period of the so-called Tanaim. The later Tannaim first figure in history when the Temple was in ashes and in the hands of ruins. At this period, verging upon decay, when Ju-

daism was without any centre and support, appeared Jochanan ben-Zachai, the last among Hillel's eighty
disciples. Jochanan established a school at Jamnia, or Jabneh, whose president he became. His successor was Gamaliel bar-Simon (q.v.), and his fellow-laborers were Akiba ben-Joseph (q.v.), Eliezer ben-Aasar, Eliezer ben-Aarak, Eliezer ben-Hyrkanos (q.v.), Ismael ben-Elias (q.v.), Joshua ben-Hananja (q.v.), Nechunjah ben-Ha-Kana (q.v.), and Tarphon (q.v.). Gamaliel was succeeded by his son Simon (ben-Gamaliel II) (q.v.), who transferred the school from Jabneh to Babia. To his college belonged Nathaniel ben-Babbil (q.v.), Jose ben-Halephita, Jehudah ben-Ilai, Rabbi Meir (q.v.), and Simon ben-Jochai (q.v.). Simon ben-Gamaliel was succeeded by his son Judah the Holy (q.v.).

II. Amoraim.—With the life and labors of rabbi Judah ended the succession of the Tanaim, who were now followed by a new order, the Amoraim (עמוראים), i.e. the

expositors of the law, at length no longer oral, but reduced to a written text. Some of the most distin-
guished of their number were rabbi Chijia, Channa bar-Channa, Abba Areka, or Rab (q.v.), Bar-Kappara, Jochanan bar-Napacha (q.v.), and Simon ben-Lakish (q.v.). Of the scholastic labors of these men we have the monumental result in the Talmud Gemara, commonly called Talmud Jerusalemi (תלמוד ילוד קדמת), i.e.

After the death of Judah, not only learning, but also the patriarchal dignity, was more and more in the de-

cline; for with Judah's death the star of Judas's learning had set, never to rise again in Palestine. Rabban Gamaliel III, Judah's son, and Judah II, son of Gamaliel III, his successor, were weak in character, mediocre in learning; and deficient in theological acumen. The

later Tannaim could not bear to face the fact that the great Temple was no more, and that the

Jews were no longer the custodians of the Holy Land. Hence the fanaticism which they displayed. The

most famous schools, however, were those at

3. Pumbeditha and Sora, where the Amoraim at-
gained great renown. The teachers of these schools having already been mentioned in the texts. Pumbeditha and Sora, we need only to refer to them. Of the names of the teachers, we have no certainty as to the prominent, which, in part, are already given under the respective letter, or will be treated, so far as omitted, in the supplement volume.

IV. Literature.—Luzzatto, Joseph Heinreich, ed. Filopowski (Lond. 1687); Frankel, Hodegetica in Maimon (Lips. 1859 [Heb.]); Weiss, Zur Geschichte der juedischen Tradition (Vienna, 1872-77, 2 vols. [Heb.]); Chajjir, Le Talmud de Babylone (Leips. 1881), i, 105 sq.; Bacher, Die Agada der babylonischen Amorav (Strasburg, 1878). The Talmudists whose names are mentioned in the treatise Baba Metzia are given by Sammert in the appendix to his German translation of Baba Metzia (Berlin, 1879), p. 190 sq. See SCRINE. (B. F.)

Talchon, Marie Vincent, better known by his clerical name Pierre René, was a French surgeon, born in January, 1758, at Thorigny, and reared among the Brothers of Charity at Paris, whose order he entered Jan., 1764. He was engaged in various public and benevolent enterprises, and died in Paris Nov. 27, 1817. See Hoefer, Nouv. Bio', Générale, s. v.

Tal'sas (Σαλας τ. Σάλα τ.), Valdey, Vulg. Thalasso, a corrupt Graeco (1 Esdr. 15. 32) and the name Elasah (q.v.) of the Hebrew list (Ezra 2. 22).

Tam, Jacob ben-Meir, better known in Jewish li-

TALMUDISTS 191

theology. The names given to these schools were Aramaic forms for the Hebrew ones of the Palestinian schools. The "house of learning" was called Beth Ulpana (בֵית עֲלֵפָנָה; Bish Midrash) (ברש מדרש), the "house of doctrine," Beth Ha-Va'ad (בֵית חה-וָאָד; Heb. בֵית חֵוָה-וָאָד), the "house of assembly," Beth Meti'deka (בֵית מֶטִּדְקַה; Heb. בֵית מִטִּדְקַה), the "house of the masters," Beth Sidra (בֵית סִידְרָה; Heb. בֵית סִידְרָה), the "house of order." The principal or rector of the school was entitled Rab Beth Ulpana (רַב בֵּית עֲלֵפָנָה; Bish Rabban) (ברש רבּאָן), the "head of ruins." So, too, the academical degree of Mar (מר) was equivalent to the Palestinian title of rabbi (רבי), and was conferred after the same course of study by the semikah (סְמִיקָה; semike), or "imposition of hands." III. Schools.—The earliest school of which we have any specific information is that which was situated at

1. Nahardea.—With this school we first become ac-

quainted towards the close of the 24th century. Nahar-
dea was situated on the Ephruses, and for a time she

was the Babylonian Jerusalem. While the Temple was yet in existence, this place had the treasury of the Baby-

lonian congregations for the Temple-offerings which were brought to Jerusalem (Jos. War, ii. 14). The first rector at Nahardea was R. Shila, who was succeed-
ed by Mar-Samuel, the astronomer (also called Arioch and Jarchina), in A.D. 190-247. His disciples were

Nachman ben-Jacob, Sheshet, Rabba ben-Abbuha, and Joseph ben-Chama. When Nahardea was sacked in 259 and the academy broken up, they migrated to

2. Machusa, a town on the Tigris, about four hours from Ctesiphon, where a new academy was founded. Rabba ben-Abbuha promoted this school of learning by his lectures, and Machusa attained some celebrity. Ten years (A.D. 935) after Rabba's death, the city was de-

molished by the Romans in the war under Julian.

The most famous schools, however, were those at

Pumbeditha and Sora, where the Amoraim at-

tained great renown. The teachers of these schools having already been mentioned in the arts. Pumbeditha and Sora, we need only to refer to them. Of the names of the teachers, we have no certainty as to the prominent, which, in part, are already given under the respective letter, or will be treated, so far as omitted, in the supplement volume.
TAMAR

ist, grammatian, and commentator, but also for his piety, for which he obtained the appellation Tam (תַּמּ), in allusion to Gen. xxxv. 27, where his namesake Jacob is denominated Tāmām (תָּמָם). Under the title of רֵעֶה הַרְחֵבָה, "the book of the righteous," he wrote additions on thirty treatises of the Talmud, published at Vienna in 1811. Supplements are given by Luzzatto from an old MS. in the Kerem Chemed (Prague, 1843), vii, 19 sq.; ten Talmudic decisions, also given by Luzzatto (loc. cit.); i.e. a poem on the Hebrew accents, consisting of forty-five stanzas, five of which were first published by Luzzatto (loc. cit.), and the whole poem of which appears in the following work: הַרְחֵבָה הַמְּדַקָּה, or grammatical and lexical amidavations, designed to reconcile the differences of Danub Han-Labral and Menchen ben-Sarak on points of grammar and exegesis (first published by Filipowski, Lond. 1855); or רְאוֹרֵעֲבָה, or רְאוֹרֵעֲבָה, a guide for transcribing MSS. of the Bible, in MS. extant; דִּיסְמוּרָא, or a grammatical commentary on the book, which has not yet come to life, but is quoted after the haphtarah for the second day of Pentecost. See Firk, Bibl. Jud. iii, 406 sq.; De Brey, Di-

smeurte Storici (Ger. trans.), p. 306; Klyne, Cycli, s. v.; Grätz, Gesch. d. Juden, vi, 196 sq.; Braunschei-
gier, Gesch. d. Juden in den romanischen Staaten (Wurz-
burg, 1865), p. 85; Geiger, Parshandahta (Leipa, 1855),
p. 24 sq.; Kalish, Hebrew Grammar (Lond. 1863), ii, 27; Lanz, Synagoge Poetise (Berlin, 1865), p. 249; id. Libri de Testamento, Synagogae, traduciendo (Leipa, 1867), p. 265-267; id. Zur Literatur und Geschichte, p. 129; Rapaport, in Kerem Chemed (Prague, 1843), vii, 1-3; Luzzatto, Ibid. p. 19-34, 53-58; Landshut [H.], Amude Haabadot (Bhedinim), (Berlin, 1867), i, 106 sq. (F. P.)

Tama (Kethib in 1 Kings ix, 8). See TADMOR.

T'amah (Heb. תַּמָּח, תַּמָּח; in pause, תַּמָּח; maach, laughter [Gesen.], or combat [First]; Sept. Ὠμᾶ, Ὠμᾶ; Vulg. Thama), the name of a man whose de-
sendants (or rather a place whose inhabitants) returned among the Nethinim from the captivity with Zerub-
bali (Ezra ii, 53; "Thamath," Neh. vii, 55).

T'amah (Heb. תַּמָּר, Tamar), a palm-tree, as often; Sept. Ὠμᾶς [v. Ὠμᾶς], but Ὠμᾶς in Ezek.; Jo-

sephus, Θάμαρα, Ant. vii, 5, 8; 8, i; 10, 3; Vulg. Tha-

mar), the name of one place and of three remarkable women in Old-Test. history. See also PALM.

1. A spot on the southeastern frontier of Judah, named in Ezek. xlv. 19; xlviii, 28 only, evidently called from a palm-tree. We naturally think of θα-

zon-tamar, the old name of Engedi; but this is not quite appropriate for location. Eusebius and Jerome mention a Thamara, a place lying between Hebron and Allah (Onomast. s. v. "Hazezon-tamar"); and Ptolemy (v. 16, 8) mentions a Θαμαρα, as do also the Feinterg Tables (Reland, Ptolet. p. 462). Robinson identifies it with Kurruah, a place containing the ruins of an old fortress about an ordinary day's journey from el-Milh towards the pass es-Sufah (Bibl. Res. ii, 198, 201). This, however, depends on a conjectural emendation of the Onomasticon, where, in the clause κόμην έπιστέρων Μανίθ (v. τ. μάνθ, μανίθ, ήρας δέων, Robinson would read Μανίθ, whereby he makes Thamara a day's journey from Malatha, which he identifies with el-Milh. Besides, as Van de Velde observes, the distance of Kurruh from el-Milh is not a day's journey, but only four hours; nor is Kurruh to the south-west of the Dead Sea, where the Feinterg Tables place Thamara; nor are the ruins ancient (Van de Velde, Syria, ii, 130). First (Heb. Iex. s. v. regards it as identical with the Tamar of the Kethib, or text, in 1 Kings ix, 8; but that is generally thought to mean Tadmor (q. v.). Schwarz (Palest. p. 21, note) thinks that Zechariah refers to the strengthening of the musical notices. De Sauley (Narr. i, 7) endeavors to establish a connection between Tamar and the Kulaat Um-Baghek, at the mouth of the ravine of that name on the south-west side of the Dead Sea, on the ground (among others) that the names are similar. But this, he says, is more than doubtful. For his wife to be sought at the extreme south end of the Dead Sea, where the line as run by Ezekiel evidently begins (see Keil, ad loc.); perhaps at some clump of palms anciently existing at Ain al-Arus, near the mouth of Wady Fi-

kreh.

2. The wife successively of Er and Onan, the two sons of Judah (Gen. xxxviii, 6-30). Her importance in the sacred narrative depends on the great anxiety to keep up the lineage of Judah. It seemed as if the family were on the point of extinction. Er and Onan (q. v.) respectively had each in turn perished suddenly. Ju-

dah's wife was in great distress; and God sent her a child, Shelah, whom Judah was unwilling to trust to the dangerous union, as it appeared, with Tamar, lest he should meet with the same fate as his brothers. That he should however, marry her seems to have been regarded as part of the fixed law of the tribe, whence its incorporation into the Mosaic law in after-times (Deut. xxxv. 5; Matt. xxii, 24); and, as such, Tamar was determined not to let the opportunity escape through Judah's parental anxiety. Accordingly, she resorted to the desperate expedient of entrapping the father himself into the union which he feared for his son. He, on the first emergency, more than doubtless, went to one of the festivals often mentioned in Jewish history as attendant on sheep-shearing. He wore on his finger the ring of his chieftainship; he carried his staff in his hand; he wore a collar or necklace round his neck. He was encountered by a veiled woman on the road leading to Timna, the future birthplace of Samson, among the hills of Dan. He took her for one of the unfortunate women who were consecrated to the impure rites of the Canaanitish worship. See HARP.

He promised her, as the price of his intercourse, a kid from the flocks which he was going, and left as his pledge his ornaments and his staff. The kid he sent back by his shepherd (Sept.), Hirah of Adullam. The woman could nowhere be found. Montha after-

wards it was discovered to be his own daughter-in-law, Tamar, who had thus concealed herself under the veil or mantle, which she cast off on her return home, where she resumed the seclusion and dress of a widow. She was sentenced to be burned alive, and was only saved by the discovery, through the pledges which Judah had left, that her seducer was no less than the chieftain of the tribe. He had the magnanimity to recognise that she had been driven into this crime by his own neglect and that his promise to give from his mouton to his wife was the bone of contention. "She hath been more righteous than I... and he knew her again no more" (Gen. xxxviii. 26). The fruit of this intercourse was twins, Pharez and Zarah, and through Pharez the sacred line was continued. B.C. 1886. Hence the prominence given to Tamar in the nuptial benediction of Jacob to his tribe (Num. xiv, 12) and in the genealogy of our Lord (Matt. i, 3). See JUDAH.

3. Daughter of David and Maacah the Gezurite princess, and thus sister of Absalom (2 Sam. xxii, 1-32; 1 Chronic. iii, 9; Josephus, Ant. vii, 8, 1). She and her brother were both remarkable for their great beauty. Her name ("palm-tree") may have been giv-

en on this account (comp. Cant. vii, 7). This fatal beauty inspired a frantic passion in her half-brother Amnon, the eldest son of David by Ahinoam. He
TAMAR

beautiful aunt, and inheriting the beauty of both aunt and father (2 Sam. xiv, 7). She was the sole survivor of the house of Absalom; and ultimately, by her marriage with Uriah of Gibeon, became the mother of Maa-

chab, the future king of Judah, whose wife of Abijah (1 Kings xv, 2), Maachah being called after her great-grandmother, as Tamara her aunt. B.C. 1025. See ABSALOM.

Tambourine. See TIMBREL.

Tamburini, a name common to several Roman ecclesiastics, of whom we mention the following:

1. Michael Anglulus, of Modena, was made general of the Jesuits Jan. 01, 1766, and died Feb. 28, 1780.

2. Praxitius, who in 1787 at Padua, received his theological and philosophical training at the seminary of his native place, where he afterwards acted as the head of the lyceum founded by him. He was also head of the Collegium Germanicum at Rome, and was promoted by Maria Theresa to a professorship of theology, and in 1779 to the chair of natural law and moral phil-

osophy at Pavia. He resigned his professorship in 1786, but was compelled by the French authorities in Lombardy to fill the chair of ethics and international law in 1797. For three years, 1798–1801, this chair was suppressed, but, being restored in the latter year, was called by la Francia, 1818, when he was made the successor of the late dean of the faculty of law. He died at Pavia, March 14, 1827. He was made a chevalier of the Iron Crown by the emperor of Austria, and received other distinc-

TAMIL VERSION

wasted away, from the feeling that it was impossible to gratify his desire, "for she was a virgin" — the narra-

tive leaves it uncertain whether from a scruple on his part, or from the seclusion in which, in her unmarried state, she was kept, or both — for him as the eldest son of Sam. xiii, 5, 21; Sept., came to visit him; and Amnon entreated the presence of Tamar on the pretext that she alone could give him the food that he would eat. What follows is curious, as showing the simplicity of the royal life. It would almost seem that Tamar was supposed to have a peculiar art of baking palatable cakes. She came to his house (for each prince appears to have had a separate establishment), took the dough and kneaded it, and then in his presence (for this was to be a part of his fancy, as if there were something exquisite in the manner of her performing the work) kneaded it to a cream and turned it into the form of cakes. The name given to these cakes (lebbad), "heart-cakes," has been variously explained: "hollow cakes," "cakes with some stimulating spices" (like our word cordial), cakes in the shape of a heart (like the Moravian ge-rührte Herzen, Theinus, ad loc.), cakes the "delight of the heart" (like the former), it is inexplicable as special and peculiar. She then took the pan in which they had been baked and poured them all out in a heap before the prince. This operation seems to have gone on in an outer room, on which Amnon's bedchamber opened. He caused his attendants to retire, called her to the inner room, and there accomplished his design. In her touching remonstrance two points are remarka-

ble. First, the expression of the infamy of such a crime "in Israel," implying the lofiter standard of morals that prevailed as compared with other countries at that time; and, secondly, the belief that even this standard might be overthrown lawfully by royal authority — "Speak to the king, for he will not withdraw me from thee." This expression has led to much needless explanation from its contradiction to Lev. xviii, 9; xx, 17; Deut. xxvii, 22: as, e.g., that her mother, Maachah, not being a Jew-

ess, there was no proper legal relationship between her and Amnon; and that she was illegitimate. But w; that the Mosaic laws were not then in existence (The-

nus, ad loc.). It is enough to suppose, what evidently her whole speech implies, that the king had a dispensing power which was conceived to cover even extreme cases. The brutal hatred of Amnon succeeding to his brutal passion, led to the indignation of Tamar at his bar-

bourous insult, even surpassing her indignation at his shameful outrage, are pathetically and graphically told, and in the narrative another glimpse is given us of the manners of the royal household. The unnamed prin-

cesses, it seems, were distinguished by robes or gowns with sleeves (so the Sept., Josephus, etc., take the word translated in the A. V. "divers colors"). Such was the dress worn by Tamar on the present occasion, and when the guard at Amnon's door had thrust her out and closed the door after her to prevent her return, she, in her agony, snatched handfuls of ashes from the ground and threw them on her hair, tore off her royal sleeves, and clasped her bare hands upon her head, and rushed to and fro through the streets screaming aloud. In this state she encountered her brother Absalom, who took her to his house, where she remained as if in a state of widowhood. The king was afraid or unwilling to question her on the occasion: and she remained at the house of her brother. The seller of Absalom was avenged by Absalom, as Dinah had been by Simeon and Levi, and out of that vengeance grew the series of calamities which darkened the close of David's reign (see Stanley, Jewish Church, i, 128). Tamil. See TALMUD.

Tamil Version. Tamil, or Tamil, the language of the ancient kingdom of Dravira, is spoken in the ex-

tensive country now called the Carnatic, and in the ver-

vacular language from the town of Pulicat in the north to Cape Comorin in the south, and from the shores of the Indian Ocean on the east to the Ghaouts on the west. It also obtains along the whole northern coast of Cey-

lon, including the populous district of Jaffna, where it is spoken by a race of people sometimes called the Mal-

abars. Tamil is likewise the vernacular language of the Moormen of Ceylon.

A Tamil version of the New Test. was executed by Ziegenbalg, the first Protestant missionary to India, with the help of other missionaries associated with him, at Tranquebar. He commenced the translation in 1798, and completed it in 1711. The printing of this version was delayed in order that it might receive the benefit of a thorough revisal; and this important task was com-

mitted to John Ernest Grunder, a German missionary, who had arrived in India soon after the commencement of the translation. Under his care the work was printed,

bearing the title Novum Testamentum D. N. Jesu
in Jaffna, Ceylon, undertook in 1849 a new version, known as the "Tentative Version," which has proved to be a very valuable contribution to the work of Tamil Biblical revision.

The Romanists, who had managed to evade the necessity of publishing any portion of the Holy Scriptures in Tamil during the 300 years in which they had been laboring in the Tamil country, were induced in 1857 to publish at Pondicherry a translation of their own of the Gospels and the Acts of the Apostles. This translation has been made from the Latin Vulgate, not from the original Greek, and, where it is a good translation, may be regarded as a reproduction of Fabricius, with a still more modern text of Giessner. It was published in 1857 from Fabricius, though occasionally it succeeds in giving a happy turn to the expression, it more often presents so curious a mixture of high and low Tamil, and the general character of the composition is so rugged and uncouth, that even the heads of the Tamil community themselves need have very little fear that this long-delayed, reluctantly published translation of a portion of the Scriptures should be too generally read by their people.

Taking all these circumstances into account, and considering the evils arising from the existence and use among Tamil Christians of a variety of versions of the Tamil New Test, it was felt that another effort was in the highest degree desirable to secure to the Tamil people a version which should be worthy of being accepted by all religious communities in the Tamil country, however they might differ in various other particulars. Accordingly delegates were selected from the various missionary bodies in the Tamil-speaking district. The first meeting was held at Palamcottta. It commenced on April 29, 1861, and closed on June 18, during which period the delegates worked nine hours a day. In 1863 the revision of the Tamil New Test, under the editorial superintendence of the Rev. H. Bower, was completed.

In the report for 1865 we read, "The attention of the Madras Auxiliary is now directed to a version of the Tamil Old Test., on the same principles as have led to the successful completion of the New Test. under the editorial superintendence of the Rev. H. Bower." The completion of this version was announced in 1869. In 1873 we read that Mr. Bower has been appointed to prepare the marginal references and alternative renderings for the Tamil Bible. Up to March 31, 1879, the British and Foreign Bible Society had disposed of 1,876,990 copies of the Tamil Bible, while of the Tamil with English in parallel columns, 1,824 in parallel columns, 179 sq.; the Bible of Every Land; and the Annual Reports of the British and Foreign Bible Society.

(T.B.)

Tam'muß (Heb. with the article hat-Tammuß', תָּמֹמּוּס, the Tammuß, as if originally an appellative; Sept. ἦ ταμμοῦς, a name of great beauty, which occurs but once in the Scriptures. In the sixth year of the captivity of Jehoiachin, in the sixth month and on the fifth day of the month, the prophet Ezekiel, as he sat in his house by the wall, where he was transported in spirit to the far-distant Temple at Jerusalem. The hand of the Lord God was upon him, and led him "to the door of the gate of the house of Jeho- vah, which was towards the north; and behold there the women sitting, weeping for the Tammuß" (Ezek. viii. 14). Some have supposed the root of the word (תָּמֹמּוּס) "causing the Tammuß to weep," and the inference is drawn that this rendering has upon the interpretation will be seen hereafter.

1. Eymologial Signification of the Word.—If תָּמֹמּוּס be a regularly formed Hebrew word, it must be derived from a root תָּמֹמּוּס or תָּמֹמּוּס (comp. the forms תָּמֹמּוּס, תָּמֹמּוּס), which is not known to exist. To remedy this defect, Furst (Handeb. s. v.) invents a root, to which he gives the signification "to be strong, mighty, victorious," and, transitively, "to overpower, annihilate." It is to be regretted that this lexicon, to which cannot be conceded to confess his ignorance of what is unknown, Rödiger (in Genesiis, Theosaur. s. v.) suggests the derivation from the root תָּמֹמּוּס, according to which תָּמֹמּוּס is a contraction of תָּמֹמּוּס, וּתָּמֹמּוּס, and signifies a melting-away, dissolution, departure, and so the ἀφαίρεσις τῶν ἀνθρώπων, or disappearance of Adam, which was mourned by the Phoenician women, and, after them, by the Greeks. But the etymology is unsound, and is evidently contrived so as to connect the name Tammuß with the general tradition regarding it. Mühlaus (new edition, Genesiis, Theosaur. s. v.) refers the name of Tammuß to the Pharaoh whom they call "the more beautiful" (Stud. z. semit. Religionsgesch. i, 55, 300 sqq.) from the Babylonian-Assyrian form דָּשׁוrawn (for Dummuiz), signifying "sprouting of life.

2. Old Interpretations.—The ancient versions supply us with no help. The Sept., the Targum of Jonathan ben-Uzziel, the Phishto-Syrac, and the Arabic in Walton's Polyglot merely reproduce the Hebrew word. In the Targum of Jonathan on Gen. viii. 5, "the tenth month" is translated "the month Tammuß." According to Castell (Lez. Hept.), tamus is used in Arabic to denote "the heat of summer;" and Tammuiz is the name given to the Pharaoh whom they call the "more beautiful." The Vulg. alone gives Adonis as a modern equivalent, and this rendering has been eagerly adopted by subsequent commentators with but few exceptions. It is as least as old, therefore, as Jerome, and the fact of his having adopted it shows that it must have embodied the most creditable tradition. In his note upon the passage he adds that since, according to the Gentile fable, Adonis had been slain in the month of June, the Syrians give the name of Tammuß to this month, when they celebrate to him an anniversary solemnity, in which he is lamented by the women as dead, and, after a sojourn in the underworld, comes forth greeted with songs and praises. In another passage (ad Paulinum, in Opp. i, 102, ed. Basili. 1565) he laments that Bethlehem was overshadowed by a grove of Tammuß, that is, of Adonis, and that in "the cave where the infant Christ once cried, the lover of Venus was bewailed." Cyril of Alexandria (in Orac. in Opp. iii, 73, ed. Paris, 1868) and Theodoret (in Ezech.) give the same explanation, and are followed by the author of the Chronicon Paschale. The only exception to this uniformity is in the Syriac translation of Melito's Apology, edited by Dr. Cureton in his Spicilegium Syriacum. The date of the translation is unknown; the fragment of Syriac dates from the 2d century. The following is a literal rendering of the Syriac: "The sons of Phoenicia worshipped Balthi, the queen of Cyprus. For she loved Tamuço, the son of Cuthar, the king of the Phoenicians, and forsook her kingdom and came and dwelt in Gebal, a fortress of the Phoenicians. And at that time she made all the villages (not Cyprians, as Dr. Cureton translates) subject to Cuthar the king. For, before Tamuço, she had loved Ares and committed adultery with him, and Hephæstus, her husband, caught her and was jealous of her. And he (i.e. Ares) came and shot Tamuço with his arrow while he made a life among the wild beasts. And from that time Balthi remained in Gebal, and died in the city of Aphaca, where Tamuço was buried" (p. 25 of the Syriac text). We have here very clearly the Greek legend of Adonis reproduced with a single change of names: the place of refuge of the dying hero is not shown, as is not improbable, or whether he found "Tammuß" in the original of Melito, it is impossible to say. Be this as it may, the tradition embodied in the passage quoted is probably as valuable as that in the same author which regards Serapis as the deification of Joseph, The Syrian Pseudepigrapha says that Melito, in interpreting the name, gives the legend of Adonis; it had come down to his time. "Tamuço was, as they say, a hunter, shepherd, and chaser of wild beasts; who, when Belatho loved him, took her away from her husband. And when her hus-
band went forth to seek her, Tomuz slew him. And with regard to Tomuz also, there met him in the desert a wild boar and slew him. And his father made for him a great lamentation and weeping in the month Tomuz: and Belathi, his wife, she, too, made a lamentation and mourning over him. And this tradition was handed down among the people during his lifetime and after his death, which same tradition the Jews received with the rest of the evil festivals of the people, and in that month Tomuz used to make for him a great feast. Tomuz also is the name of one of the months of the Syrians."

The legend assumes, for the first time, a different form in the hands of a Rabbinical commentator. Rabbi Solomon Isakai (Rashi) has the following note on the passage in Ezekiel: "An image which the women made hot in the inside, and its eyes were of lead, and they melted by reason of the heat of the burning, and it seemed as if it wept; and they (the women) said, He asketh for offerings. Tammuz is a word signifying burning, as in דנה נון יבש (Dan., iii, 19), and יבש יבש יבש (ver. 23)." Instead of rendering "weeping" for the Tammuz, he gives what appears to be the equivalent in French, "faute de poisson," i.e., because he had failed to catch fish. It is clear, therefore, that Rashi regards Tammuz as an appellative derived from the Chaldean root רם, וד, to make hot. It is equally clear that his etymology cannot be defended for an instant. In the 12th century (1161) Solomon ben-Abraham Par- chon, in his Lexicon, compiled at Salerno from the works of Jehuda Chayug and Abulwalid Merwan ben-Gan nach, has the following observations upon Tammuz: "It is the likeness of a reptile which they make upon the water, and the water is collected in it and flows through its holes, and it seems as if it were the midst of the month called Tammuz is Persian, and so are all our months; none of them is from the sacred tongue. Though they are written in the Scripture, they are Persian; but in the sacred tongue the first month, the second month, etc.

At the close of this century we meet for the first time with an entirely new tradition repeated by R. David Kimchi, both in his Lexicon and in his Commentary, from the Moreh Nebuchim of Maimonides: "In the month Tammuz they made a feast of an idol, and the women came to gladden him; and some say that by crafty means they caused the water to come into the eyes of the idol which is called Tammuz, and it was wept, as if it asked them to worship it. And some interpret Tammuz 'the burned one,' as if from Dan., iii, 19 (see above), i.e., they wept over him because he was burned; for they used to burn their sons and their daughters in the fire, and the women used to weep over them. . . . But the Bab, the wise, the great, our Rabbi Moše bar-Maimon, of blessed memory, has written that it is found written in one of the ancient idolatrous books that there was a man of the idolatrous prophets, and his name was Tammuz. And he called to a certain king and commanded him to send the seven planets and to offer them to this god. And that king put him to a silent death; and on the night of his death there were gathered together all the images from the ends of the earth to the Temple of Babel, to the golden image which was the image of the sun. Now this image was suspended in the midst of the temple, and the images likewise (fell down) round about it, and it told them what had befallen Tammuz the prophet. And the images all of them wept and lamented all the night; and, as it came to pass, in the morning all the images flew away to their own temples in the ends of the earth. And this was for an everlasting statute: at the beginning of the first day of the month Tammuz each year they lamented and wept over Tammuz. And some interpret Tammuz as the name of an animal, for they used to worship an image which they had, and the Targum of the passage (Isa. xxxiii, 14) is הָ֥בִישׁ הָאֱלֹהִים אִשָּׁ֖יִם ('He causes the gods to be hot')."" But in most copies of the book is written with two Vav's." The book of the ancient idolaters from which Maimonides quotes is the now celebrated work on the agriculture of the Nabataeans. The Theban historian Herodotus, and the Ben-Melech gives no help, and Abendana merely quotes the explanations given by Rashi and Kimchi.

3. Modern Opinions.—The tradition recorded by Jerome, which identifies Tammuz with Adonis, has been followed by most subsequent commentators; among others, by Petavius, Scaliger, Cornutus, Maimonides, Caspar Sanctorius, Lavater, Villalpinand, Selden, Simonis, Calmet, and, in later times, by J. D. Michaelis, Gennadius, Ben-Zeb, Rosenmuller, Maurer, Ewald, Harnack, Hitzig, and Mover. Luther and others regarded Tammuz as a name of Bacchus. That Tammuz was the Egyptian Osiris, and that his worship was introduced into Jerusalem from Egypt, was held by Calvin, Picator, Junius, Leusden, and Pfeiffer. This view depends chiefly upon a false etymology proposed by Kircher, which connects the word Tammuz with the Coptic tamu, to hide, and so makes it signify the hidden or concealed one, as the Egyptian Isis was a name of the false god Typho, whose loss was commanded by Isis to be yearly lamented in Egypt. The women weeping for Tammuz are in this case, according to Junius, the priestesses of Isis. The Egyptian origin of the name Tammuz has also been defended by a reference to the god Amun, mentioned by Plutarch and the Egyptian king who is identical with Osiris. There is good reason, however, to believe that Amun is a mistake for Ammon. That something corresponding to Tammuz is found in Egyptian proper names as they appear in Greek cannot be denied. Tapan, an Egyptian, appears in Thucydides (vii, 31) as a pupil of the poet Terpander. He is also an officer of the Egyptian king Ptolemy I (Ptol. De Cive, 4, 2) as an admiral. The Egyptian pilot who heard the mysterious voice bidding him proclaim "Great Pan is dead" was called Gaupos (Plutarch, De Defect. Orat. 17). The names of the Egyptian kings, Ṣosamonu, Ṣamounu, Ṣamounu and Ṣamounu, mentioned by Manetho (Josephus, Cont. Ap., i, 14, 18), have in turn been compared with Tammuz; but, unless some more certain evidence be brought forward than is found in these apparent resemblances, there is little reason to conclude that the worship of Tammuz was of Egyptian origin.

The identification of Tammuz with an idolatrous prophet in Mesopotamia, and the quotation from Maimonides, who himself quotes from the Agriculture of the Nabataeans, has been recently revived by Prof. Chwolson, of St. Petersburg (Ueber Tammuz, etc. [St. Petersburg, 1860]). An Arabic writer of the 10th century, En-Nedim, in his book called Fatrit et-t'lamim, says (quoting from Abû Said' Wâb ibn-Ibrahim) that in the middle of the month Tammuz a feast is held in honor of the god Tûz. The women bewailed him because his lord slew him and ground his bones in a mill, and scattered them to the winds. In consequence of this the women ate nothing during the feast, which had been arranged to be held (Chwolson, Die Säker, etc., ii, 27).

Prof. Chwolson regards Tûz as a corruption of Tammuz; but the most important passage, in his eyes, is from the old Babylonian book called the Agriculture of the Nabataeans, to which he attributes a fabulous antiquity. It so happens that a number of the chapters, all dealing with the agricultural year, end near the end of the 14th B.C., and were translated into Arabic by a descendant of the ancient Chaldeans, whose name was Ibl-Washiyah. As Prof. Chwolson's theory has been strongly attacked, and as the chief materials upon which it is founded are not yet before the public, it is premature to take the theory seriously, or to promote positively against his hypothesis, though, judging from present evidence, we are inclined to be more than sceptical as to its truth. Qâitât then, in that dim antiquity from which he speaks to us, tells the same story of the
prophet Tammuz as has already been given in the quotation from Kimchi. It was read in the temples after prayers to an audience who wept and wailed; and so great was the magic influence of the tale that Qit'am itself, though incredulous of its truth, was unable to restrain its tears. A part, he thought, might be true, but it was not right to go so far removed from the facts, in which he lived, as it was in the poem to be sceptical on many points. His translator, Ibn-Washiyah, adds that Tammuz belonged neither to the Chaldeans nor to the Canaanites, nor to the Hebrews nor to the Assyrians, but to the ancient people of Janin. This last, Chwolson conjectures, may be the Semitic name given to the gigantic Cushite aborigines of Chaldea, whom the Semitic Nabataeans found when they first came into the country, and from whom they adopted certain elements of their worship. Thus Tammuz, or Tammulzi, belongs to a religious epoch in Babylonia which preceded the Semitic (see Uhervreste, etc. Alba- 
byl. Lit., p. 18). Ibn-Washiyah says, moreover, that all the Sabians of his time, both those of Babylonia and of Harran, wept and waited for Tammuz in the month which was named after him, but that none of them preserved any tradition of the origin of the worship. This fact alone appears to militate strongly against the truth of Ibn-Washiyah's story as to the manner in which he discovered the works he professed to translate. It has been due to Prof. Chwolson's reputation to give in brief the substance of his explanation of Tammuz; but it must be confessed that he throws little light upon the obscurity of the subject.

It seems perfectly clear from what has been said that the name Tammuz affords no clue to the identification of the deity whom it designates. The slight hint given by the prophet of the nature of the worship and worshippers of Tammuz has been sufficient to connect them with the story of Adonis; but, as Adonis is the hero of the Syrians, and Tammuz is the hero of the Chaldeans, it is impossible that Tammuz may be a name of Adonis, the sun-god, but that there is nothing to prove it. It is true, however, that the name of Adonis does occur in Phoenician inscriptions ("Adonis" see George Long, ii, 404, note), and the coincidences of the ancient notices above and the mode of worship detailed below with the language of Ezekiel afford the most plausible interpretation hitherto offered.

4. Ceremonies of the Cultus.—There was a temple at Amathus, in Cyprus, shared by Adonis and Aphrodite (Pausan. ix, 41, 1); and the worship of Adonis is said to have come from Cyprus to Athens in the time of the Persian war (Apollod. iii, 14, 4; Pausan. ii, 20, 5; Ovid, Metam. x, 725; Philist. Apoll. poll. vii, 32; Plutarch, Aeth. c. 18; Athen. xxy, 672; Aristoph. Par. 429). But the town of Byblos, in Phoenicia, was the headquarters of the Adonis-worship (Hamaker, Missell. Phil. p. 125). The feast in his honor was celebrated each year in the temple of Aphrodite (said to have been founded by Ky- nyras, the reputed father of Adonis) on the Lebanon (Lucian, De Dea Syr., § 6) with rites partly sorrowful, partly joyful. The emperor Julian was present at Antioch when the same festival was held (Amm. Marc. xxiii, 9, 13). It lasted seven days (xx, 1); the period of mourning among the Jews (Eccles. xxi, 12; Gen. i, 10; 1 Sam. xxxi, 13; Judith xvi, 24), the Egyptians (Heliodor. Eth. vii, 11), and the Syrians (Lucian, De Dea Syr., § 92) and began with the disappearance (θάφτας) of Adonis. Then followed the search (ζή- μα) in the women after his body. His body was represented by a wooden image placed in the so-called "gardens of Adonis" (Ἀδάνωνος ἱπταμένος), which were earthenware vessels filled with mould, and planted with wheat, barley, lettuce, and fennel. They were exposed by the women to the heat of the sun at the house-doors or in the "Porches of Adonis," and the withering of the plants was regarded as symbolic of the death of the youth by the fire-god Mars. In one of these gar- dens Adonis was found again, whence the fable says he was slain by the boar in the lettuce (ἀδάνωνος ἔπαθα), and was there found by Aphrodite. The finding again (ἐρεύνη) is the commencement of a wake, accompanied by all the songs in which it is sung to the gods in the funeral ceremony—prostitution, cutting off the hair (comp. Lev. xix, 28, 29; xxi, 5; Deut. xiv, 1), cutting the breast with knives (Jer. xvi, 6), and playing on pipes (comp. Matt. ix, 28). The image of Adonis was then washed, anointed, and anointed, and the wound made by the boar was shown on the figure. The people sat on the ground round the bier, with their clothes rent (comp. Ερ. Jer. 31, 32), and the women howled and cried aloud. The whole terminated with a sacrifice for the dead, and the burial of the figure of Adonis (see Movers, Phönizier, i, vii). According to Lucian, some of the inhabitants of Byblos maintained that the Egyptian Osiris was buried among them, and that the mourning and orgies were in honor of him, and not of Adonis (De Dea Syr., § 7). This is in accord- ance with the legend of Osiris as told by Plutarch (De Fts. et Os.) Lucian further tells us that on a certain day on which the women of Byblos every year mourned for Adonis, the inhabitants of Alexandria sent them a letter, enclosed in a vessel which was wrapped in rushes or poppy's, announcing that Adonis was found. The vessel was cast into the sea, and carried by the current to Byblos (Procopius on Is. xxviii). It is called by Lucian βεβαιάρινε κεφαλήν, and is said to have traversed the distance between Alexandria and Byblos in seven days. Another marvel related by the same narrator is that of the River Adonis (Nahr Ibrahim), which flows down from the Lebanon, and once a year was tinged with blood, which, according to the legend, came from the wounds of Adonis (comp. Milton, Par. Lost, i, 460); but a rationalist of Byblos gave him a different ex- planation, how that the soil of the Lebanon was naturally very red-colored, and was carried down into the river by violent winds, and so gave a bloody tinge to the water; and to this day, says Porter (Handbook, p. 185): "after every storm that breaks upon the brow of Lebanon the Adonis still 'runs purple to the sea.'" The rushing waters tear from the banks red soil enough to give them a ruby tinge, which poetical fancy, aided by popular credulity, converted into the blood of Tammuz. The time at which the river is said to be colored is a subject of much dispute. It is not so important with regard to the passage in Ezekiel, for there does not appear to be any reason for supposing that the time of the prophet's vision was coincident with the time at which Tammuz was worshipped. Movers, who maintained the contrary, endeavored to prove that the celebration was in the late autumn, the end of the Syrian year, and corresponded with the time of the autumnal equinox. He relies chiefly for his conclusion on the account given by Ammianus Marcellinus (xxvi, 5, 19) of the Feast of Adonis, which was held at Antioch with all the splendor of a Roman festival. This is clear, from a letter of the emperor's (Ep. Jul. 52), that he was in Antioch before Aug. 1, and his entry may therefore have taken place in July, the Tammuz of the Syrian year. This time agrees, moreover, with the explanation of the symbolic meaning of the rites given by Ammianus Marcellinus (xxxi, 5, 15) that they were a token of the fruits cut down in their prime. Now at Aleppo (Russell, Aleppo, i, 72) the harvest is all over before the end of June, and we may fairly conclude that the same was the case at Antioch. Add to this that in Hebrew astronomical works ṭeḇaḥ ẓīmā, tekā- phath Tammuz, is the "summer solstice;" and it seems more reasonable to conclude that the Adonis feast of the Phoenicians and Syrians was celebrated rather as the summer solstice than as the autumnal equinox. At
this time the sun begins to descend among the wintry signs (Kenrick, Phæacia, p. 310).

Tanchelm (Tanchelin, Tanquelin), a fanatic who lived in the 11th century, and was identified with the opposition current in that age against the ecclesiasticism then prevailing. We are told that he despised the Church and the clergy, from the pope downward, and claimed that the true Church inhered in him and his followers; that the priestly station has no influence upon the sacrament of the eucharist, worth and sanctity being the only efficient qualifications of the minister. He declared himself to be possessed of the Holy Ghost, and even to be God, as Christ is God; and he anathematized himself with the Virgin Mary, whose image he presented to the vision of the assembled multitude, demanding sponiasis, which were readily contributed. Water in which he had bathed was distributed for drinking purposes, with the assurance that its use formed a sacred and powerful sacrament to the good of the body as well as the soul. Tanchelm's followers were chiefly drawn from the lower classes of society, and were mostly women. His operations were carried on along the coast of the Netherlands, and particularly in Utrecht, where disturbances were occasioned which called forth the successful interference of archbishop Frederick of Cologne. Tanchelm then removed to Bruges and Antwerp, where he caused still greater tumults than at Utrecht, and was killed on boardship by a priest in A.D. 1124 or 1125. His sect continued to exist somewhat longer, but was ultimately scattered or reclaimed to the Church of Hain, Gisbeke, Ketel in Middelburg (Stuttg. 1845), i, 459 sq.; Okken, Diss. de Priva Rel. Chr. Med. Éco inter Nederlandos, etc. (Groning, 1846), p. 43 sq.; Ep. Traj. Eccl. ad Fridericum, Archipiscopum Colon., in Tenguangel, Coll. Vet. Monum. contra Schismatiques (Ingolst. 1612), p. 368 sq.; Du Flessas d'Argent. Epist. ad Erasursum, etc. (Paris, 1728), i, 11 sq.—Hertz, Real-Encyklop. s. v.

Tanchelmias. See Tanchelm.

Tanchum (of Jezu'akle) ben-Joseph, also called "R. Tanchum Jerusalmi" of Haleb, flourished about A.D. 1250-80. The first who made Tanchum's name known to the learned world was the famous scholar Schnurier, who in 1791 published c. i-xii of Tanchum's Arabic commentary on Judges; R. Tanchum Hierosolymitani ad Libros V. T. Commentarii Arabici Specimina una cum Amntationibus ad aliquot Loca Libri Judaeiim (Tubingen, 1791). Since that time his exegetical works have been brought to light, though nothing of his life is known except that he must have lived shortly after the devastation of Palestine by the Mongolians, A.D. 1260. His commentary in the whole Old Testament, entitled הַדָּאָהָה הָעָבָה הָזֶּה הָעָבָה הָזֶּה, i.e. The Book of Exposition, of which the following are still extant in MS. at the Bodleian Library: a. the commentary on the earlier prophets, i.e. Joshua, Judges, Samuel, and Kings (Cod. Pocock 314); b. commentaries on Jeremiah, Ezekiel and the minor prophets (Cod. Pocock 344); c. commentaries on the five Megilloth (i.e. Song of Songs, Ruth, Lamentations, Ecclesiastes, and Esther) and Daniel (Cod. Pocock 520); d. הַדָּאָהָה הָעָבָה הָזֶּה הָעָבָה הָזֶּה, i.e. The Haphtaroth, or Lessons from the Prophets, translated into Arabic (Cod. Hunt. 607). These commentaries are preceded by elaborate introductions treating on the general import of Holy Writ. Besides the commentary, which has been edited by W. Cureton, Tanchum Hierosolymitani Comm. Arabicissim in Lamentationes et Codice unico Bodleiano Libr. Hebraicos extrauti. Descriptus Chaorae Arabicae et Latinæ Lond., 1844; iv. the following portions have been published: i. Commentary on Joshua, edited by Haarbrucker, in the Wissenschaftliche Blätter aus der Welt-Heine-Ephrasm'schen Lehrentanstalt (Berlin, 1862); ii. on Judges, in part by Schmurrer, c. i-xii, and ch. xii—xxi by Haarbrucker (Halle, 1847); iii. on Samuel and Kings, by Haarbrucker (Leipsic, 1844); iv. on Habakkuk, with a French translation by Dr. Munk (Paris, 1843, in Cahen's Bible, vol. xiii). "R. Tanchum's contributions to Biblical exegesis," says Dr. Ginsburg, "are very important to its history. His commentaries are based upon the literal and grammatical meaning of the text. He frequently avails himself of the labors of Hai Gaon, Danash ibn-Libnat, Ibn-Chajug, Ibn-Ganach, Ibn-Ezra, Maimonides, etc.; rejects the traditional interpretations (comp. comm. on Judg. xii, 7; xx, 28); transposes sundry portions of the sacred narratives, so as to point out their chronological order (comp. Judg. xvii, i, xx, 28); and, like Maimonides, distinguishes different degrees and kinds of prophecy (comp. vi, 34; xlii, i, xx, 28)." He also wrote an Arabic Lexicon to the Mishnah, entitled מַעֲבַרְבָּא יָדַגְרָה יָדַגְרָה יָדַגְרָה, i.e. A Sufficient Guide, treating on the relation of the language of the Mishnah and of Maimonides' Yad ha-Chazakah.

Tancred, Christopher, an English benefactor, was the son of Sir Richard Tancred, and died unmarried in 1754, leaving his house and estate at Whixley for the maintenance of twelve decayed gentlemen who had borne arms in the service of their country. He also founded four medical exhibitions at Caius College; four scholarships at Christ's College, Cambridge; and four law scholarships at Lincoln's Inn.

Tancred of Bologna was a most celebrated canonist of the 13th century (who must not be confounded with another Tancred of Corneto; comp. De Savigny, Gesch. d. röm. Rechts im Mittelalter [2d ed.], v, 135, and p. 115, 116). His preceptor was Azo in Roman and Law, at the University of Bologna. In 1210 he became a teacher (decretorum magister) at Bologna, and intrusted with the management of important affairs by both

Tapers, Early Use Of. It became customary at an early period to burn tapers in churches on various occasions. This was done during the reading of the gospel, and is partly excused by Jerome. He says to Vigilantius, "We do not light candles in open day, therefore you slander us without reason." He confesses, however, that some untaught laymen and simple religious women, "of whom we may certainly say that they have a zeal of God without knowledge," do such a thing in honor of martyrs; but he asks, "What is the harm? And then he refers to a custom prevalent in the East: "In all churches of the East they light tapers, without any respect to the relics of martyrs, when the gospel is to be read, even when the sun shines brightly; which is done, not for the sake of giving light, but as an expression of joy. Hence the virgins in the Gospel had their lamps lighted; and the apostles were warned to 'let their loins be girded about, and their lights burning.' Hence it is said of John also, 'He was a burning and a shining light.' Also under the figure of a mate

rial light is represented that light of which we read in the Psalter, 'Thy word is a lamp unto my feet, and a light unto my path.'

But the superstition spread, and during the ceremony of baptism ta
pers were placed in the hands of the baptized; if adults, if they were infants, in the hands of the sponsors. These ta
pers were said to be em
blematical of the illu
minating power of the sacrament. Also at the eucharist we find the same custom. Tapers were also used at marri
ages; and in funeral processions before and behind the coffin. - Farrar, Eccles. Dict. s. v.

The altar tapers were used in those candlesticks which are placed on or about the altar; and in the church the two were lighted during the office of the Christian sacrifice. Custom in

The West expects that at least two be lighted, even at low celebrations; at high celebrations, in the Latin Church, as also in some English churches, six tapers are ordinarily lighted. They symbolize (1) the fact that our Saviour, "God of God, Light of Light, very God of very God," is the true Light of the world. They are also (2) symbols of joy and gladness on the part of the faithful that Christ is born into the world (a) naturally, (b) sacramentally, i.e. in the eucharistic mysteries. A seventh taper is added if the bishop of the diocese celebrates a solemn pontifical mass; even twelve or twenty-one are sometimes used.

Taphath (Heb. Tapath', ταφαθ', ornament; Sept. טפחָד v. ταθάρα; Vulg. Tapeth). Solomon's daughter, and wife of Abinadab, his commissariat in the dis

trict of Dor (1 Kings iv, 11). B.C. cir. 1000.

Taphnes (Ταφνῆ), a Grecized form (Judith i, 9) of the Egyptian city TAPHANES (q. v.).

Taphon (τὰ θησ). Josephus, Θησωρ or Θησιαν; Vulg. Thesos or Thesos, one of the cities in Judaea fortified by Bacchides (1 Macc. ix, 50). It is probably the Beth-Taphphon (q. v.) of the Old Test., which lay near Hebron. The form given by Josephus suggests Tekaos, but Grimm (Exeg. Handb.) has pointed out that his equivalent for that name is Θησωρ; and there is, besides, too much unanimity among the versions to allow of this being said.

Tappan, Benjamin, D.D., a Congregational minister, the son of the Rev. David Tappan, professor of divinity in Harvard College, and grandson of Benjamin Tappan, pastor in Manchester, Mass., was born at West Newbury, Mass., Nov. 7, 1788. He graduated at Har

vard College in 1805, spent some time teaching at Wo

burn and Salem, and in 1809 became tutor at Bowdoin College, Me., which position he held for two years. In 1811 he was ordained over the Church in Augusta, Me., and continued pastor until he assumed the secretarship of the Maine Missionary Society in 1849. His death took place Dec. 22, 1865. His ministry was eminently useful, and few men occupy a more prominent place in the history of Congregationalism in Maine. He was vice-president of the board of Bowdoin College until his death, secretary of the Maine Missionary Society from 1849 to 1863, and trustee of Bangor Theological Seminary from 1826, of which he was a most liberal and broad-minded benefactor, and a professorship in that institution declined in 1829. Dr. Tappan was an immense worker, was noted for his hospitality and generosity, and his Christian character was one of beauty and strength. He was an effective preacher, and had a remarkable gift in prayer. Dr. Tappan was one of the pioneers in the temperance movement, preaching a sermon on the sub

ject in 1813. Waterville College (now Colby University) conferred upon him the degree of D.D. in 1836, and Bowdoin in 1845. See Cong. Quarterly (art. by his son Benjamin), 1865, p. 131-139.

Tappan, David, D.D., a Congregational minister, was born at Manchester, Mass., in 1768, graduated at Harvard College in 1771, and was ordained in April, 1774, pastor at Newbury, Mass., where he remained until inaugurated professor of divinity at Harvard College, Dec. 26, 1792, which position he retained until his death, Aug. 27, 1803. He published, Two Friendly Letters to Philalethes (1786). - An Address to the Students of An
dover Academy (1791). - An Address to Another Students (1794). - and a large number of occasional Ser
mons. After his death were published Lectures on Jesu

Tappan, William Bingham, an American di
vine, was born at Beverly, Mass., in 1794, entered the service of the American Society for the propagation of the gospel in foreign parts, and continued this connection until his death, at West Needham, Mass., in 1849. He published, among other poetical works, Poetry of the Heart (Worcester, 1845,
TAPPUAH

12mo:—Sacred and Miscellaneous Poems (Boston, 1846, 16mo):—Poetry of Life (ibid. 1847, 16mo): The Sunday-school and other Poems (ibid. 1848, 16mo). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Tap'puah [some Tappe'ah] (Heb. Tappu'ah, תַּפּוּעַ, a noun in 1 Chron. ii, 43, תַּפּוּעַ), an apple, as often; Sept. Taphou, Taphou, Ostepou, Θαφου, etc., and twice [Jos. xv. 34; xvi. 18] omits Vulg. Taphous, the name of a man and also of two places in Palestine. See Apple.

1. Second named of the four sons of Hebron of the lineage of Caleb (1 Chron. ii, 48); not to be confounded with either of the following (see Keil, ad loc.). B.C. ante 1618.

2. A town in the lowland district of Judah, mentioned between En-gannim and Enam (Jos. xv. 34), in the group situated in the N.W. corner (see Keil, ad loc.); differs from the Beth-tappuah (q. v.) of ver. 59, but probably the same with the royal city of the Canaanites (Jos. xiii, 17), conquered by the Israelites (see Keil, ad loc.). It is perhaps the present Beit-'Atâb, an important place on a conspicuous hillock, about half-way from Jerusalem to Beit-Jibrin. It contains about 650 to 700 inhabitants, is built of stone, and has a ruined tower or castle (Robinson, Res. ii, 18). This is apparently the place meant by Schwarz (Pales. p. 102) by "the village Beth-Tapua, five English miles N.W. [ten N.E.] of Beit-Jibrin."

3. A town in the tribe of Ephraim, near the border of Manasseh, in which latter the adjacent territory ("land of Tappuah") lay (Jos. xvi. 8; xvii. 8), probably near Manasseh, and hence called (ver. 7) En-tappuah (q. v.). It is no doubt, as suggested by Van de Velde (Memoir, p. 351), although this is disputed by Keil (Comment. ad loc.), the same as the present "Tafet" a desert village about four hours N.E. by E. of Nablus, with traces of antiquity and ancient wells of excellent water. Schwarz says: "at the present day the Arabs call the country between Nablus and the Jordan Balad-tappuach, as probably the town of this name was formerly in it" (Pales. p. 89). See Tribe.

Tar'ah (Heb. Ter'ach, תֶּרַח) [in pause Ter'ach, תֶּרַח, wandering or delay; Sept. Tapot'as v. Θαποτας; Vulg. Tharae), a station of the Israelites in the desert, situated between Tahath and Mithkah (Num. xxxii. 27); perhaps in the great Wady el-Jerafeh, opposite Mount Hor. See EXOD.

Tar'alal (some Tarlavah) (Heb. Tar'alah, תָּרָלָה, reeling; Sept. Θαραλά v. Θαραλά; Vulg. Tarlahar), a town in the western section of the tribe of Benjamin, mentioned between Irpeel and Zelah (Jos. xvi. 27). Schwarz suggests (Pales. p. 128) that it is "perhaps the village Thanel-Thariel, in the neighborhood of Lod," probably meaning Nebi Damyal, two miles south of Lod; but the name has little resemblance, and the territory of Benjamin did not reach so far west. It is possibly represented by the modern village Beit-Tirza, in Wady Ahmed, just north of Beit-Jala, with a well adjacent and several ruined sites in the vicinity.

Tarassius, patriarch of Constantinople, was a zealous and active supporter of image-worship in the time of the empress Irene. See ICONOCLASM. He first held the secular position of secretary of state, but was chosen, though a layman, to fill the patriarchal office by both the court and the people (A.D. 784). His election gave great offence to Rome, but he was eventually recognized on the ground of his avowed intention to restore the worship of images in the Greek Church. A synod to promote the unifying of the Church of Constantinople with other churches, which he had suggested as a condition of his acceptance of the patriarchate, met in 785, but was compelled by a mob to adjourn to Nicaea, where it reconvened in 787. In this body the papal legates were accorded the first place and

the patriarch of Constantinople the second, and the latter heartily endorsed the new creed, which determined that worship, in the exercises of kissing, bowing the knee, illuminations, and burning of incense, should be rendered to the images of the human person of Christ and of Mary, the angels, apostles, prophets, and all saints; but not such worship as is due to the Divine Being only (τῶν ἐμφαστῶν προσκυνήσεως—οὐ μὴν τὸν ἀληθινὸν κτησίαν, ἀλλ'r τὸν την θεόν φιλον). All laws directed against the worship of images were annulled.

In his own person, Tarassius was also especially active in the work of converting the opponents of image-worship. In the matrimonial affairs of Constantine, the son of Irene, Tarassius played an unworthy part. He protested at first against the rejection of his sister Maria and the substitution for her of Theodora, but soon gave way to the wishes of the court, and thereby came into collision with the monks, who regarded the emperor as excommunicated. Tarassius died in 806, and ranks among the saints of both the Greek and the Romish Church. His literary remains consist of letters and homilies (see, Walch, Entwurf einer vollst. Hist. d. Ketzereyen, Spaltungen u. Religionsstreitigkeiten [Leips. 1782], x, 419—511).—Herzog, Real-Encyklop. s. v.

Ta'rea [some Tare'ah] (Heb. Tare'ã, תָּרָא, by interchange of gutturals for Tahrebra; Sept. Θαρείς v. Θαραί; Vulg. Tharaea), son of Micah in the lineage of king Saul (1 Chron. viii. 35); elsewhere (ix, 41) called Tahrea (q. v.).

Tares (Σάραως; Vulg. saraeum). There can be little doubt that the Σάραως of the parable (Matt. xiii, 25) denote the weed called "darnel" (Lotium temulentum), a widely distributed grass, and the only species of the order that has deleterious properties. The word used by the evangelist is an Oriental, and not a Greek term (the native Greek word seems to be αἶπα, Dioscor. ii, 31). It is the Arabic zuzal, the Syriac zizal, and the zonis (צזון) of the Talmud (Mishna, i, 109; see Buxtorf, Lex. Talm. s. v.). The derivation of the Arabic word from zan, "nasea," is well suited to the character of the plant, the grains of which produce vomiting and

Bearded Darnel (Lotium temulentum).
purgings, convulsions, and even death. Volney (Tavn., ii, 306) experienced the ill effects of eating its seeds; and "the whole of the inmates of the Sheffield workhouse were attacked some years ago with symptoms supposed to be produced by their oatmeal having been accidentally adulterated with loliwm" (Engil. Cyclop. s. v.; "Loliwm"). The darnel before it comes into ear is very similar to the oat, and both are fallacious and second rate crops. But that the zizanias should be left to the harvest, lest while men plucked up the tares "they should root up also the wheat with them." Prof. Stanley, however (Siinari and Palest. p. 426), speaks of women and children picking out from the wheat in the cornfields of Samaria the tall grasses, among which the bitter darnels are mingled by the Arab cultivators. These grasses, he continues, "if sown designately throughout the fields, would be inseparable from the wheat, from which, even when growing naturally and by chance, they are at first sight hardly distinguishable." See also Thomson (Land and Book, ii, 111): "The grain is just in the proper stage to illustrate the parable. In those parts where the grain has headed out, the tares have done the same, and then a child cannot mistake them for wheat or barley; but where both are less developed, the closest scrutiny will often fail to detect them. Even the farmers, who in this country plough their fields to a depth of two or three feet, do not attempt to separate the one from the other." The grain-growers in Palestine believe that the zwdn is merely a degenerate wheat; that in wet seasons the wheat turns to tares. Dr. Thomson asserts that this is their fixed opinion. It is curious to observe the retention of the fallacy through many ages, for "wheat and suma," says Lightfoot (Hor. Heb. on Matt. xxi, 35), quoting from the Targum, "are not seeds of different kinds." See also Buxtorf (Lez. Talm. s. v., "Zizanias, species tritici degeneri, sic dicti, quod scordando cwn bona tritico, in psejorn naturam degenerant.") The Roman writers (comp. "Infelix loliwm," Virgil, Georg. i, 154) appear to have entertained a similar opinion with respect to some of the cereals. Thus Pliny (Hist. Nat. xviii, 17), borrowing probably from Theophrastus, asserts that "wheat will degenerate into oat." The notion that the zizanias of the parable are merely diseased or degenerate wheat has been defended by Brederol (see his letter to Schultetus in Exercit. Exeg. ii, 65), and blandly adopted by Trench, who (Notes on the Parables, p. 91, 4th ed.) regards the distinction of these two plants as an indication of the species, and briefly states that "the manner of the parable denote the darnel, and there cannot be any reasonable doubt about it, the plants are certainly distinct, and the L. temulentum has as much right to specific distinction as any other kind of grass. On the route from Beirut to Akka (1852), Dr. Robinson describes fields of wheat "of the most luxuriant growth, finer than which I had not before seen in this or any other country. Among these splendid fields of grain are still found the tares spoken of in the New Test. As described to me, they are not to be distinguished from the wheat until the ear appears. The seed resembles wheat in form, but a worker who has to pick out the wheat for broth or poultry is fed upon this seed, and it is kept for sale for that purpose. When not separated from the wheat, bread made from the flour often causes dizziness to those who eat it of" (Bib. Res. iii, 55). The bearded darnel has the bad reputation of yielding the only deleterious grain among the countless grasses. We are not aware that any injurious quality has been detected in the seeds of its own congeners, Loliwm arvense, L. perenne, the rye-grasses so familiar to British husbandry; but if mixed with bread, L. temulentum occasions giddiness, nausea, difficulty of articulation, and other symptoms, analogous to those of Jane and other instances are on record where mortification of the extremities, or even death, has ensued (see Burnett, Plantar Utiliores, vol. iii). Hence the French have named it trvree, or "tippy-grass," a word from which the English have dropped the first syllable, and bestowed on it that unoffending "ray" or "rye grasses" by which the darnel is represented in our hay-fields. Thus understood, "how well do these 'tares' represent those who make a false profession; who appear among God's people; who draw near with their mouth, and honor God with their lips, but their heart is far from him (Isa. xxix. 15; Matt. xxi. 8). But that the 'sorcerer' (Matt. xv. 22) at first may seem alike. Man cannot accurately distinguish between the true and the false; but at the great harvest-day the Lord will separate them. He will gather the wheat into his garner, while the tares shall be consumed." (Balfoir, Bot. et Relig. p. 261). See Kitzer, Piet. Biblic. s. v., "Daram." (3), p. 130; Calcett [Lady]. Script. Herb. p. 475 sq.; Tristram, Nat. Hist. of the Bible, p. 486; Bochelius, De Zizanias in Ecles. Dissermumam (Ars. 1661).

Taramg (תֶּרֶם, also kídim, 1 Sam. xvii, 6, a spear, as usually rendered; הָרְמָה, 1 Kings x, 16; 2 Chron. ix, 15; xiv, 8, a large shield, as usually rendered). See SHIELD.

Targum (תָּרָעִם), i.e. translation, interpretation) is the name given to a Chaldee version or paraphrase of the Old Test., of which there are several extant. 1. Origin of the Targum.—The origin of the Chaldee paraphrase may be traced back to the time of Ezra. After the exile it became the practice to read the law in public assemblies, with the assistance of a paraphrase in the Chaldee dialect. Thus we read in Neh. viii, 8, 9, 10, "And Ezra opened the book in the sight of all the people, and gave thanks unto the God of heaven." The whole book was read, with appropriate expositions, which were inserted at intervals. In this way the Targum was formed. It was not only a paraphrase, but also a commentary. The Targum is therefore also called a translation, or "Râma," an abbreviation of Ramah, "a translation." The Targum was used in the synagogues and public schools. It became the standard text of the Hebrew Bible, and was used by the rabbis in their discussions. The Targum contains many explanations and comments, which were added to the text by the translators. These explanations were often based on the Targum of the Septuagint, and were used to interpret the Hebrew text.
(Judg. xix.). These are to be read and translated, or קאריאס תרבורי, are the deed of Reuben with his father's concubine (Gen. xxxv. 22); the latter portion of the story of the golden calf (Exod. xxx. xxii.); and the deed of David and Bathsheba (2 Sam. xi, xii).

At what time these paraphrases were written down we cannot state; but it must certainly have been at an early date in the mind of the Hellenistic Jews had for a long time been in possession of the law translated into their language, and that in the 2d century not only had the Jews themselves issued Greek versions in opposition to the Alexandrian version, which were received with decided approbation even by the Talmudists, as the repeated and honored mention of Aquila in the Talmud proves, but that also the Syrians had been prompt to translate the Holy Scriptures, it would indeed be strange not the Jews familiar with the Aramean dialect also followed the practice at that time universally prevalent, and sought to profit by it. We have, in point of fact, certain traces of written Targums extant at least in the time of Christ. For even the Mishna seems to imply this in Yadatia, iv, 5, where the subject treated is the language and style of character to be used in writing the Targums. Further, the Talmud, Shabbath, fol. 115, c. 1, mentions a written Targum of Job of the middle of the 1st century (in the time of Gamaliel I), which incurred the disapprobation of Gamaliel. Zunz here justly remarks, "Since it is not likely that a beginning should have been made with Job, a still higher antiquity as absolutely belonging to the first tenderness of the law may be assumed" (loc. cit. p. 62). Grätz, in his Monatschrift, 1877, p. 84, believes that this Targum of Job, mentioned four times in the Talmud, can only refer to a Greek translation of that book; and Deirénbourg, in his Essai sur l'Histoire et la Géographie de la Palestine, 1879, p. 129, on the subject of Gamaliel, because it was written with des caractères non-hébraïques. But as Delitzsch, in Hora Heb. et Talmud, (Zeitschrift für die luth. Theologie u. Kirche [Leips. 1878], p. 211), remarks, "םירחוב תרגם means in Targum, i.e. written in the Aramean, and refers not to the characters with which, but to the language in which, it was written. Gamaliel acted according to old principle, יִכְּבַּד יָבַּד, i.e., 'all that belongs to oral tradition was not to appear in written form.' This principle included also the Targum, but it was not strictly observed, and, like the Mishna, so far as the Targums are concerned, it is represented in single copies. That this was the case we see from the fact that Gamaliel of Jabneh, the grandson of Gamaliel I or elder, having been found reading the Targum on Job, was reminded of the procedure of his grandfather, who had the copy of the Job Targum, which was brought to him while standing on the mountain of the Temple, immersed in order to prevent its further use. Dr. Frankl, in Die Zusätze in der Sept. zu Hio (in Grätz, Monatschrift, 1872, p. 318), says, 'There is no doubt that the additions in the Sept. were made according to an old Aramean Targum,' and in corroboration of his statement he quotes Tosepta Shabbath, c. 14; Shabbath, fol. 115, col. 1; Jerus. Shabbath, 16, 1; Sopherim, v. 15. We are thus obliged to assume an early origin for the Targums, a fact which will be corroborated further on, in spite of the many objections raised, the chief of which, adduced by Eichhorn, being the question whether an ancient father, even Epiphanius or Jerome, mentions the subject. But this silence is of little weight, because the fathers generally were ignorant of Hebrew and of Hebrew literature. Nor was any importance attached to them in comparison with Greek translations. Besides, in truth, we saw the question is not even supported by the facts of the case; for Ephebram Syrus, e.g., made use of the Targums (comp. Lengerke, De Ephraemi S. Arts Hermeneuti, p. 14 sq.; Assemani, Bibli. Orient., ii, 66). 11. The Targum of Onkelos.—There is a Targum of Onkelos, the Proseylete, which has always been highly valued by the Jews. 1. Authorship.—In regard to the author, the notices of him are meagre and uncertain. We now approach one of the most mooted questions as to the identity of Onkelos with Akila or Aquila; but before solving it we must look at the different witnesses. The first mention of Onkelos is found in the Tosiphta, a work drawn up shortly after the Mishna. From this we learn: a. That Onkelos the Proseylete (אֶנֶּקְלוֹס הַפּוֹרָסִי) was so serious in his adherence to the newly adopted (Jewish) faith that he threw his share of his paternal inheritance into the Dead Sea (Tos. Demai, vi, 9). b. At the funeral of Gamaliel the elder he burned more than seventy minah worth of spices in his honor (Tos. Shabbath, c. 8); the same story is repeated with variations Semachoth, c. 8, and Talm. Aboda Zarah, fol. 11, col. 1). c. He is finally mentioned, by way of corroboration to different Halachas, in connection with Gamaliel in three more places, viz. Chagigah, iii, 1; Mekiboth, vi, 1; Keilim, iii, 2, 2. In the Babylonian Talmud, Onkelos is mentioned in the following passages: 1. Gittin, fol. 56, col. 2; fol. 57, col. 1, where we read, 'Onkelos the Proseylete, the son of Kalonomios (Callinicus or Cleinicus); and Kalonomios; Titus's servant and a Greek by birth, became a convert, conjured up the ghosts of Titus, Baal, and Jesus (the latter name is omitted in later editions). 2. Aboda Zarah, fol. 11, col. 1, here called the son of Kalonymos (Cleonymus); and we also read in this place that the latter three Roman cohorts are to appear in the story of Ezra, and, in the copy before us, is subjoined, but not in Bomberger's and the Cracow editions, in order to ask them what nation was considered the first in the world. Their answer shows that Israel was the first, and was decided by THEIR SONS. 3. Baba Bathra, fol. 99, col. 1, where Onkelos the Proseylete is quoted as an authority on the question of the form of the cherubim (comp. 2 Chron. iii, 10). 4. Megillah, fol. 3, col. 1, where we read, 'L. Jeremiah, or, according to others, R. Chia bar-Abba, said the Targum on the Pentateuch was made by the proseylete Onkelos, from the mouth of Eleazer the son of Jehoshua; the Targum on the prophets was made by Jonathan ben-Uzziel from the mouth of Haggai, Zechariah, and Malachi. But have we not been taught that the Targum exists from the time of Ezra? Only it was forgotten and Onkelos restored it.' In the Midrash Tanchuma, section יב רַּב (Gen. xxviii, 20), we read, 'Onkelos the Proseylete asked an old man whether that was all the love God bore towards his people; he said it was a proselyte. What did he mean by garment? The old man replied that this was all for which the patriarch Jacob prayed.' In the book of Zohar, section וַסָּתַם (Lev. xviii, 4), Onkelos is represented as a disciple of Hillel and Shammai. Finally a MS. in the library of the Leipsic Senate (B. H. 17) relates that Onkelos, the nephew of the wicked Titus (Titus הַפּוֹרָסִי), asked the emperor's advice as to what merchandise he thought it was profitable to sell. The emperor told him to sell copper, which was cheap in the market, since it was sure to rise in price. Onkelos went to Jerusalem and studied the law under R. Eleazer and R. Jehoshua, and his face became וַהֲזַנְתָּא דְלְוָה (םירחוב תרגם). When he returned to Titus, one of the courtiers observed the pallor of his countenance, and said to Titus, 'Onkelos appears to have studied the law.' Interrogated by Titus, he admitted that Onkelos had told him nothing, that he had bought which was cheap in the market, since it was sure to rise in price. Onkelos went to Jerusalem and studied the law under R. Eleazer and R. Jehoshua, and his face became וַהֲזַנְתָּא דְלְוָה (םירחוב תרגם). When he returned to Titus, one of the courtiers observed the pallor of his countenance, and said to Titus, 'Onkelos appears to have studied the law.' Interrogated by Titus, he admitted that Onkelos had told him nothing, that he had bought which was cheap in the market, since it was sure to rise in price. Onkelos went to Jerusalem and studied the law under R. Eleazer and R. Jehoshua, and his face became וַהֲזַנְתָּא דְלְוָה (םירחוב תרגם).
which the well-known Greek translator of the Old Testament, we need hardly add. He was a native of Pontus (Iren. Adv. Hes., 3, 24; Jerome, De Vir. Ill. 64; Philostr. De Haer. § 90). He lived under Hadrian (Epiph. De Pont. et Men. § 12). He is called the περιήγητος (Chron. Alex. pεριήγητος) of the emperor (ibid. § 14), becomes a convert to Judaism (§ 10), and is called, in the Pseudo-Philostr. loc. cit., Jerome to Jer. viii. 14, etc.), and receives instruction from Aquila (Jerome, loc. cit.). He translated the Old Testament, and his version was considered the highest import and authority among the Jews, especially those acquainted with the Hebrew language (Euseb. Prep. Evang. loc. cit.; Augustin. De Civ. Duc. xvi, 6; Philostr. De Haer. § 90; Justin, Novell. 146). Thirteen distinct quotations from this version are preserved in the Talmud and Midrash; and we may classify the whole as follows:

Greek Quotations.—Gen. xvii. 1, in Bereah. Rab. 51 b; Lev. xxiii. 40, Jerus. Sukkah 3, 5, fol. 53 d (comp. Vaj. Rab. 200 a); Isaa. iii. 30, Jerus. Shabb. 6, 4, fol. 8 b; Ezek. xvi. 10, Midr. Tan. 58 c; Ezek. xxiii. 43, Vaj. Rab. 288 a; Pes. xxiii. 18 (Masor. text xvii, according to the Sept.), Jerus. Meg. 3, 5, fol. 73 b; Proph. xviii. 21, Vaj. Rab. fol. 286 b; Ezech. i. 6, Midr. Esth. 120 a; Dan. v. 6, Jerus. Yoma 3, 8, fol. 41 a.

Hebrew Quotations (retranslated from the Greek).—Lev. xxix. 20, Jerus. Kidd. i. 1, fol. 59 a; Dan. viii. 13, Bereah. Rab. 104 b; Isa. vi. 6, Midr. Coh. 113 c, d.

All these quotations are treated at length by Anger, De Onkelo, i. 13 sq., and the variations added there show how carefully they have been perused, and the more so since we have as yet no critical edition of the Talmud.

The identity of Akilas and Aquila having been ascertained, it was also argued, according to the parallel accounts of Onkelos and Aquila, Onkelos and Aquila must be one and the same person, since it was unlikely that the circumstances and facts narrated could have belonged to two different individuals. But who was it that the scribes wrote the Targums? There are chronological differences which cannot be reconciled, unless we have recourse to such means as the Jewish historian Dr. Grätz, who renders יֵלָדָן כּנָא (i. e. R. Gamaliel I, or elder) "Gamaliel II." Is it not surprising that on one and the same page Onkelos is once spoken of as "Onkelos the Proseleyte," and "Onkelos the son of Jerome became a convert" (Aboda Zarah, fol. 11, col. 1)? It has also been stated that Onkelos was neither the author of the Targum nor a historical person, but that Targum Onkelos means simply a version made after the manner of Akilas, the Greek translator. Aquila's translation was a special favorite with Jerome, because it was both literal and model or type after which the new Chaldee on was named, in commendation, perhaps, of itslike excellences. This view is very ingenuous, but it is hardly probable. Now the question arises, how is it that there is only a version of these two Targums, while Aquila translated the whole Old Testament? If Onkelos's Targum was really made after the manner of Aquila, how is it that the latter is so slavishly literal, translating even the וַיָּשָׂר, sign of the accusative, or, as Jerome states (De Opt. Gen. Interpret.), "Non solum verba sed et etymologias verborum transittere consuetus est . . . Quod Hebrai non solum habent נֶאָרָם sed et prædica, ille καθαρός est . . . dictaque . . . τῶν οὐρανῶν καὶ σύν τινι γὰρ τῶν γεωργίων Graeca et Latina lingua non recipit," while Onkelos is freer, adding sometimes here and there a word or phrase for the better understanding?

But that the Targum Onkelos cannot mean a Targum after the manner of Aquila is also evident from the fact that while Aquila made a recension of the then existing Sept., nothing of the kind can be said of Onkelos. The latter wrote for the people in a language which it understood better than the original Hebrew; he forestook for polemical purposes, to counterbalance the arguments of the Chaldean writers, the text of the Alexandrian version against the Jews. That the author of the Chaldee paraphrase was not a proselyte, but a native Jew, is sufficiently proved from the excellence and accuracy of his work; for without having been bred up from his birth in the Jewish religion and learning, and long exercised in all the rites and doctrines thereof, and being also thoroughly skilled in both the Hebrew and Chaldee languages, as far as a native Jew could be, he could scarcely be thought thoroughly adequate to that work which he performed. The representation of Onkelos as having been a proselyte seems to have proceeded from the error of taking him to have been the same with Aquila of Pontus, who was indeed a Jewish proselyte. A comparison of both versions must show the superiority of Onkelos's over that of Aquila. The latter, on account of his literal adherence to the original, makes his version often nonsensical and unintelligible, and less useful than the former, as the following will show:

Genesis.

II, 5. יָדָן—Aq. יָדָנָן; Onk. מְאַת. 7. וַיָּשָׂר—Aq. וַיָּשָּׂר; Onk. וַיָּשָּׂר. vi, 4. וַיָּשָּׂר—Aq. וַיָּשָּׂר וַיָּשָּׂר; Onk. וַיָּשָּׂר וַיָּשָּׂר.

16. יָדָן—Aq. וַיָּשָּׂר וַיָּשָּׂר; Onk. רָדָן. viii. 1. יָדָן—Aq. וַיָּשָּׂר וַיָּשָּׂר; Onk. נִנְטָן. xv, 8. יָדָן—Aq. וַיָּשָּׂר וַיָּשָּׂר; Onk. נִנְטָן.

xviii. 12. יָדָן—Aq. יָדָן; Onk. מְאַת. 20. יָדָן—Aq. מְאַת; Onk. יָדָן. 21. יָדָן—Aq. מְאַת; Onk. יָדָן. xxxvi. 33. יָדָן—Aq. מְאַת; Onk. מְאַת.
the high esteem in which Onkelos's Targum stood. And as to the quotations of Aquila, almost all which are cited are on the prophets and Hagographa, while Onkelos's Targum is on the law. A close examination of the sources themselves shows that what is said there has reference only to the Greek version, which is fully expressed in the praise of R. Elijzer and R. Jehoshua when saying רבי יזרעאל ברא לו ד"ה ת"א רוטים, "Thou art fairer than the sons of men," thereby alluding to Gen. ix, 27, where it is said that Japheth (i.e. the Greek language) should one day dwell in the tents of Shem (i.e. Israel). (Megillah, l, 11, 71 b and c; Bereshith Rabba, 40 b). There is another very important point, which has been overlooked by all favoring the identity of Akilas with Onkelos, and thus putting the origin of the Targum of Onkelos at a late date, viz. the use of the word נבון by Onkelos; and this peculiarity of the Targum shows that its origin belongs to the time of Philo and the New-Test. period. It is not unlikely that, in this respect, Onkelos was followed by the other Targumists, and that his intention was to reconcile Alexandrian with Palestinian theology. John's doctrine of the Logos would without any foundation or point of departure if we could not suppose that at the time of Jesus a similar doctrine concerning the Word of God, as it can be deduced from the Targum, was known among the Palestinian Jews. That later Judaism has put aside this important moment of older theology must be regarded as a development of the Jewish opposition to Christianity.

In the Targum of Onkelos we find not the least indication that it was made after the destruction of Jerusalem; we find neither the least trace of hostility to the Romans nor of opposition to Christianity. The Temple is regarded as still standing; the festive days are still celebrated; the Jews are still a nation which never ceases to resist its enemies. This may be seen from the prophetic passages, as Gen. xliv, Num. xxiv, Deut. xxxiii, the explanation of which, as given by Onkelos, could have hardly originated after A.D. 70. Onkelos uses for Argob (Deut. iii, 4; so also Jonathan, 1 Kings iv, 13) the name Trachona (נחלת תרחוב); Trachonitis (Luke iii, 1); Josephus writes Τραχωνη, sometimes Τριχων. (Ant. xv, 10, 1 and 3; xvii, 4, 6; xx, 7, 1). The Peshito of the Pentateuch did not follow this explanation (Luke iii, 1, נ strtol) probably because the division of Palestine at the time of Jesus did not exist in the Syrian translator's days, or it was unintelligible to him (among the rabbis נстраל is used in the sense of "palace," בֵּית כְּפָרַת [Buxtorf, Lex. p. 918 sq.]). All this indicates, or rather confirms, the supposition that this Targum belongs to the time of Jesus. There is a similar indication in Onkelos's rendering of Bashan by נضرورة (Syn. נضرورة), Batania (see Genesius, Comm. zu Jes. ii, 18); see נ بصورة, ב, by Gennesaret, "The place." This reminds one of the language of the New Test. and so also נضرورة (Mammon), "the injustice with the Mammon" (רבד נضرورة; it is said in Gen. xiii, 13, of the Sodomites). When Paul speaks of that "spiritual rock" which followed the children of Israel in the wilderness (1 Cor. x, 3), he undoubtedly refers to the tradition preserved by Onkelos (also by Pseudo-Jonathan), "The well which the princes dugged, the chiefs of the people cut it, the scribes with their staves; it was given to them in the wilderness in the time that it was given to them it descended with them to the rivers, and from the rivers it went up with them to the height, and from the height to the vale which is in the field of Moab" (Numb. xxii, 18 sq.). Hence the expression of the apostle, "spiritual, following rock." The Syriac proper names of the Hebrew kind. After what has been said, we believe the Targum of Onkelos originated about the time of Philo— an opinion
which is also held by Zunz (Gottesd. Vorträge, p. 62). This being true, Onkelos and Akilas (or Aquila) are not one and the same person—a view also expressed by Frankel (Zur dem Targum der Propheten [Breslau, 1872], p. 6) and the Talmudic notices concerning Onkelos, the disciple of Gamaliel I (or elder), the teacher of the apostle Paul, are corroborated by our argument, minus the notice that Onkelos was a proselyte, as we have already stated above. For with the identity of Onkelos with Akilas (or Aquila), it is hardly conceivable that a man like Aquila, who, from a Christian, became a Jew, and such a zealous one that he prepared another Greek version for polemical purposes against the Christians, should have spent so much money at the death of Gamaliel I, whose liberal and friendly attitude towards Christianity was known, and who is even said to have become a Christian, as a tombstone covering his remains in a church at Piss indicates:

"Hoc in sarcophago requiescient corpora sacra Sanctom. . . . Sanctus Gamaliel . . .
Gamaliel divi Pauli didascalus olim, Doctor et excellens Israelita fuit.
Conscili magni fideleque omnia culta.

We now come to the work itself.

2. Style, etc.—The language of Onkelos greatly approaches the Biblical Chaldees, i.e. it has still much of Hebrew coloring, though in a less degree than the other. It also avoids many Aramaisms (such as the contraction of nouns, which are at a large part in this case replaced by nominative, and comprises a comparatively small number of Greek words, and of Latin words none whatever. Of Greek words we mention, Exod. xxviii, 25, κελς = הלוע; ver. 11, יד = שומש; Gen. xxviii, 17, נפרדים = משאלות; Lev. xi, 30, נפרדים = מתקדמים; Exod. xxviii, 19, אפרים = פרעון (Pliny, xxvii, 68); xxix, 11, אפרים = אר tietenו; Deut. xx, 20, שומש = שמשתים; Exod. xxviii, 20, שמש = שמש; Num. xv, 38, Deut. xxi, 12, אפרים = שמשתים; Exod. xxviii, 34, נפרדים = שומש; Gen. xxvii, 28, נפרדים = הלוע; Exod. xxiv, 16, נפרדים = פרחים; Exod. xxviii, 26, נפרדים = הפרחים; Gen. vi, 14, נפרדים = פרחים; Exod. xxviii, 16, נפרדים = הפרחים (Pliny, xxvii, 14).

There are, besides, some obscure expressions which were partly unintelligible to the Talmudists, as מָנָה, מֵאָדָם, for אדם, etc., in Exod. xxxv, 23; xxviii, 4, נִשְׁבָּר for נִשְׁבָּר; ver. 17, מֶרֶח for מֶרֶח; ver. 18, מֶרֶח for מֶרֶח; Lev. xxii, 20, מֶרֶח for מֶרֶח, etc.

The translation of Onkelos is, on the whole, very simple and exact. It is obvious from the character of the work that the author was in possession of a rich exegetical tradition; hence we never find him omitting any passage of the original. His elucidations of difficult and obscure passages and expressions, perhaps less satisfactory, are commonly those most accredited by internal evidence, and in this particular he is worthy of more careful examination and attention than have usually fallen to his lot. Gen. iii, 15 translatespiel mizman yareich lamed mif'a lamed keshon v'zar, מים מַעְיָה, i.e. "he shall remember thee what thou hast done to him from the beginning, and thou shalt watch him unto the end." iv, 7 translatespiel mizman yareich lamed mif'a lamed keshon v'zar, מים מַעְיָה, i.e. "shall not pardon to be given to thee if thou dost well; but if thou dost not well, thy sin shall be preserved till the day of judgment, when it will be exacted of thee," etc. Here, and from nis, in the sense of tollere peccata, i.e. "taking-away of sin," and not in the sense of "lifting-up of the countenance," Onkelos did not understand the meaning of the verse, but (says Winer) "sensus hujus loci prudentialissimos etiam interpretes mirificavit." Gen. vi, 3, Onkelos, like the Sept., Syr., Saad., and many recent commentators, gives the sense notices of the וְיָתֵר, וְיָתִיר, i.e. "he armed his young men," but xv, 2, קָרֹא לָהּ מְנִשָּׁה = בָּרָץ, "governor," is contrary to the true sense of the words; xx, 16, he did not rightly understand הדעת, for he translates pelos ma ha mizman eser ma ha mizman, which the Sept. correctly translates יַעֲדוּד וַאֲרָא, Vulg. saltum desem dies, Onkelos, in accordance with all Jewish interpreters, explains by כֵּן כֵּן, i.e. "a season of times, or ten months." xxiv, 63, מָעְיָה is translated by מָעְיָה, "to pray," xxvii, 42, מָעְיָה is translated, by way of explanation, כֵּן כֵּן הַר נַעֲדוּד, i.e. "plotteth against thee, to kill thee." The difficult מַעְיָה, in xii, 48, is explained by מַעְיָה מַעְיָה, "a father to the king," and the מַעְיָה by מַעְיָה יְבַשָּׂר, "the man to whom mysteries are revealed." The Sept. renders מָעְיָה מַעְיָה, "he revealed not the secret," in xlviii, 22, is correctly given by מַעְיָה מַעְיָה כֵּן כֵּן הַר נַעֲדוּד, "and I give thee one part;" and.xxxii, 20, מַעְיָה מַעְיָה כֵּן כֵּן הַר נַעֲדוּד, "I shall have been carried away by thine anger.

Explanatory additions, which evidently belong to Onkelos, are found in Gen. vi, 3 ( '('ם וְיָתֵר), "if they may be converted," and Job, 5 ( "I will rejoice in thee, and will make thee glory in the brother of his brother") xiv, 22 (where יְבַשָּׂר, in "prayer," is added to יִבּשָּׂר יִבּשָּׂר; xlii, 32 (where we have יִבּשָּׂר יִבּשָּׂר יִבּשָּׂר יִבּשָּׂר), "because the Hebrews eat the animals which are sacred to the Egyptians"). (comp. Winer, De Onkelos, p. 41). Larger additions and deviations from the original text are found mostly in the poetical parts of the Pentateuch (Gen. xlix, Numb. xxiv, Deut. xxvii, xxviii), in the multiplicity of words which is here employed, the original text almost disappears. Thus Gen. xlix, 11, 12, which is referred to the Messiah (the parallel being Numb. xxiv, 17), is rendered, "Israel shall dwell in the circuit of his city: the people shall build his temple; and there shall be the righteous in his circuit, and the makers of the law in his doctrine; the best pure shall be his clothing; his covering shall be silk dyed with purple and with various colors. His mountains shall be redder in their vineyards; his hills shall drop wine; his fields shall be white with his grain and with flocks of sheep.

In passages relative to the Divine Being, we perceive the effect of a doctrinal bias in certain deviations from the Hebrew text. Anthropomorphic and anthropopathic expressions are avoided, lest human attributes should be assigned to the Deity. Thus, עַלְמָה and עַלְמָה are rendered יְבַשָּׂר יְבַשָּׂר, the Word of God; or יְבַשָּׂר יְבַשָּׂר, the splendor of God; or יְבַשָּׂר יְבַשָּׂר, the Shechinah of God. Akin to this peculiarity is the avoidance of יַעֲדוּד, when it is applied to men or idols, and the employment of יְבַשָּׂר, יְבַשָּׂר, יְבַשָּׂר, יְבַשָּׂר, יְבַשָּׂר, יְבַשָּׂר, יְבַשָּׂר, יְבַשָּׂר, יְבַשָּׂר. In cases where divine qualities or ornaments appear to be assigned to men, Onkelos modifies and smooths the meaning, and substitutes a different idea. Thus, יְבַשָּׂר יְבַשָּׂר, i.e. "ye shall be as princes," is substituted for יַעֲדוּד יַעֲדוּד, in Gen. iii, 5; or יַעֲדוּד יַעֲדוּד, in Gen. iii, 5; or יַעֲדוּד יַעֲדוּד, in Gen. iii, 5; or יַעֲדוּד יַעֲדוּד, in Gen. iii, 5.
In ver. 22, is translated by behold Adam is the only one in the world of himself.

Onkelos shows an apparent desire to present the great men of his nation in as favorable a light as possible (comp. Gen. xvi, 12; xxxv, 27; xlv, 27). Difficult words are often without reference to the Semitic text. In Gen. 1, 12; Exod. ii, 7; Deut. xix, 20; and Deut. xxvi, 12. Names of people, cities, and mountains are given as they were common in his time. Thus, in Gen. viii, 4, instead of אר מרי, he has.ADAM מרי, as in Syr. and Arab.; in Exod. xi, 10, becomes נין אל; in Lev. iii, 34, in xvi, 25, becomes 림, etc. (see Winer, op. cit. p. 39). In perusing Onkelos as a source of emending the Hebrew text, great caution is necessary, and the more so because we have not as yet a critical edition of this Tar-gum. The only safe rule in emending the Hebrew text is when the same variety of readings which the Chaldee presents is found in several Hebrew MSS. Thus, e.g. in Exod. ix, 7, we read in the Hebrew הַיַּעַר כְּלֵי יֶעָר, *which is found in several MSS. of Kennicott and De Rossi, and is peculiar of the ancient versions.* The Targum of Onkelos has always been held in high regard among the Jews, who also composed a Masarah upon it. Such a Masarah has lately been published, from a very ancient codex, by Dr. Berlinger, Die Massorah zum Targum Onkelos, etc. (Leips. 1877).

3. Manuscripts of Onkelos are extant in great numbers.

On Oxford has five, London (British Museum) two, Venice six, Augsburg one, Nuremberg two, Altdorf one, Carlsruhe three, Stuttgart twoto, Erfurt three, Dresden one, Leipzig one, Jena one, Dessau one, Helmstad two, Berlin four, Breslau one, Braug one, Ratibon one, Hamburg seven, Copenhagen two, Upsala one, Amsterdam one, Paris eight, Molsheim one, Venice six, Turin two, Milan four, Lemborn one, Siena one, Geneva one, Florence five, Bologna two, Padua one, Trieste two, Parma about forty, Rome eighteen, more or less complete, from the Targum of Onkelos. For the verification of these MSS., see Winer, De Onkeloso, p. 13 sq.

4. Editions.—The Targum of Onkelos was first published with Rashi's commentary on the Pentateuch (Bologna, 1482, fol.). It was subsequently reprinted quite frequently, and may be found in the Rabbinic and Learned parts of the world, as a noted authority as well as a very good vowel-pointers to the Targum. As yet, we have no critical edition of this Targum. Dr. Berlinger purposes to publish a new and critical edition according to that of Sabionetta (1567). This Targum has been translated into Latin by Alphonsus de Zamora in the Complutensian Polyglot, by Paul Fagius, and by John Mercier (1568). That of Fagius is the best. It was rendered into English by Etheridge (Lond. 1862-65).

5. Literature.—J. Berlin (Fik), notes critical, or glosses and comments upon the Targum of Onkelos (Breslau, 1827); Luzzato, י רצון, Philozenes, sive de Onkelosi Chaldeica Pentateuchi Versumae Dissertatio, etc. (Vienna, 1860), distributes the deviations from the Hebrew into thirty-two classes, and endeavors to emend the Targum as much as he can. The modern Targums, however, are not well described in it (the writer of the art. *Targum* in Smith's *Dict. of the Bible*, besides a great deal of useless ballast, thought it necessary to copy Luzzato); Berkowitz, י רצון, on the hermeneutics of Onkelos (Wilna, 1848); id. דינון חוברה הולות (ibid. 1874); Levy, in Geiger's *Zeitschrift*, 1844, v, 175-198; Fürst, *Literaturblatt*, 1845, p. 357 sq., Smith, *Dictionary of Chal. Paraphrasis*, etc. *Prope Versum* (Oxf. 1662); Winer, *De Onkeloso* ejusque Paraphrasis Chal.

dicia (Lips. 1820); Maybaum, *Die Anthropomorphien* and Anthropopathien bei Onkelos, etc. (Breslau, 1870); Geiger, *Jüdische Zeitschrift*, 1871, p. 85-104; *ilai* (1874), or a commentary on Onkelos by Dr. Adler in the edition of the Pentateuch with ten commentaries (Wilna, 1874); and the literature given in the art. *Onkelos* in this *Cyclopedia*.

III. Jonathan ben-Uziel on the Prophets, i.e. Joshua, Judges, Samuel, Kings, Isaiah, Jeremiah, Ezekiel, and the twelve minor prophets, stands next in time and importance to Onkelos.

1. Authorship and Sources.—As to Jonathan himself, we read in the Talmud—(1) *Eighty disciples had Hilil the son of Rabbi Eleazar ben-Num. All of them were taught by the Slichonah [Divine Majesty] should rest upon them, as it did upon Moses our Lord; peace be upon him. Thirty of them were worthy that the sun should stand still at their bidding, as it did at that of Joshua ben-Num. Twenty were of intermediate worth. The greatest of them all was Jonathan ben-Uziel, the last R. Jochanan ben-Zadok; and it is said of R. Jose ha-Kohen, that he left not [uninvestigated] the Bible, the Mishna, the Genesis, the Halachah, the Haggadah, the subtleties of the law, and the subtleties of the Sopherim—* the easy things and the difficult things [from the most awful divine mysteries to the commonest popular proverbs]. . . . If this is so of the least of them, what is to be said of the greatest, i.e. Jonathan ben-Uziel?* (Baba Bathra, 134 a; comp. Sukkah, 28 a). (2) A second passage, referring more especially to our present subject, reads as follows: *The Targum of Onkelos was made by Onkelos the Proselete from the mouth of R. Eliezer and R. Jehoshua, and that of the prophets by Jonathan ben-Uziel from the mouth of Haggai, Zechariah, and Malachi.* And in that hour was the land of Israel shaken three hundred paragons. . . . And a voice was heard, saying, *Who is this who has revealed my secrets to Jonathan ben-Uziel?* (Baba Bathra, 135 a). It is said of Jonathan ben-Uziel, *It is I who have revealed thy secrets to the sons of man. . . . But it is known and revealed before thee that not for my honor have I done it, nor for the honor of my father's house, but for thine honor, that the disputes may cease in Israel. . . . And he further declared that the Targum to this name to the Prophet, when a voice was heard, *Enough.* And why? Because the day of the Messiah is revealed therein* (Megillah, 3 a).

There is some exaggeration in this description of Jonathan's paraphrase, but it only shows the high esteem in which it stood. Fabulous as the whole may appear, yet it seems to be the most acceptable account of the origin of this paraphrase. Many doubts were raised as to the authorship of this Targum. Some, who would not deny the existence of Jonathan, hesitate to believe that he had any share in the Targum commonly ascribed to him. It has also been suggested by Luzzato and Geiger that *Jonathan is the same with the Greek Theodotion, and that the Jews gave this name to the paraphrase—especially as they were acquainted with that of Jonathan ben-Uziel—to indicate that the Targum was after the manner of Theodotion, like the reputed origin of the name Onkelos in connection with the Greek Akolas or Aquila.* But this more ingenious than true suggestion has no support, and needs no refutation. It has also been suggested that the modern critics that because this Targum is never once quoted as the Targum of Jonathan, but is invariably introduced with the formula ἡ σύνταξις τοῦ διαλεκτικοῦ, "as R. Joseph interprets," that not Jonathan, but R. Joseph, is the author of this Targum; and this supposition is based upon the fact that the Talmud relates that this R. Joseph, in his latter years, occupied himself chiefly with the Targum when he had become blind. This relation of the Talmud, and perhaps the fact that Jonathan's Targum, which was called, by way of abbrevia-
tion, ḫo, i. e. עְרֵבִים מִזְרַח, made Joseph the author of this Targum, since ḫo may also mean מַעְרֵבָּה מִזְרַח, or something else, and the real Targum is now quoted under Joseph's name. That Jonathan's Targum was really extant before the time of R. Joseph we see from Megillah, 3 a, where on Zech. xii, 12 R. Joseph remarks in this version the Targum was made, which he could not understand it;" but when the writer of the art. "Targum" in Smith's Dict. of the Bible remarks, "Twice even it is quoted in Joseph's name, and with the addition, 'Without the Targum to this verse (due to him), we could not understand it,'" he only betrays his carelessness as to the Talmudic sentence. After all, the Targum was always known as a separate Talmudic notice concerning Jonathan equally as much as upon that concerning R. Joseph. The language concerning the former, we admit, is a little hyperbolical, but this does not exclude the truth of the matter. Besides, there is nothing to militate against Jonathan having written a Targum on the prophets; and even the expression that this Targum was made "from the mouth of Haggai, Zechariah, and Malachi" is not so absurd as the writer of the art. "Targum" in Kittro's Cyclopædia would suppose, for if it means anything, it means this, that the explanation of Jonathan contains the transmitted exposition in the spirit of Israel, and as Zunz remarks (Gottted. Vorträge, p. 393), "Jonathan's Targum on the prophets, as a result of studies which were instrumental in forming fixed national opinions, proves that a considerable time before it was customary to explain the contents of the prophetic books, by means of Talmudical prelections or otherwise, to the public. Nay, he commends the teachers for—even in evil times—teaching the law in the synagogues at the head of the congregations (Targ. on Judg. v, 2, 9). From the New Test. we know that Moses and the prophets were read in the synagogues, and, deducting all hyperbolical language, there is no reason for doubting the high antiquity of this Targum. The text is rendered, in the same manner as by Onkelos, free from all one-sided and polemical considerations, which the Jews since the 2d century followed. Many passages are referred to the Messiah, even such as do not rightly belong to him, so that no polemical tendency against Christians appears in the version. The following is a list of them: 1 Sam. ii, 10; 2 Sam. xxviii, 3; 1 Kings iv, 33; Isa. iv, 2; ix, 6; x, 27; xi, 1, 6; xv, 2; xvii, 1-5; xxviii, 5; xlii, 1; xliii, 10; xlv, 1; li, 13; lii, 10; Jer. xxvi, 5; xxx, 21; xxxii, 13, 15; Hos. iii, 6; iv, 8; Mic. iv, 6; v, 1; 18; Zech. iii, 8; iv, 7; v, 12; x, 4.

2. Character, etc.—In the historical books the exegesis is simple and tolerably literal. A few words are added occasionally, which have no representatives in the original, but they are not many. The interpretation is good, giving the sense fully and fairly; but in the prophetic books the text is more freely handled, for as Zunz justly remarks (op. cit. p. 63), "The prophetic writings, not containing anything of the nature of legal enactment, admitted of a greater latitude in handling them, because there was less reason even for the more obscure language and the predictions concerning Israel's future by which they are characterized. Even in the case of the historical books, Jonathan often acts the part of an expositor. In the case of the prophets themselves, this course of exposition—in reality becoming the prophetic poet's pædagogical art—is more pronounced. This pervading, often misunderstood, characteristic," says Havernick, "constitutes the chief proof, confirmed also by external evidence, of the oneness of the authorship of this Targum; for not only do parallel passages (such as Isa. xxxvi-xviii; comp. 2 Kings xviii, 15 sq.; Isa. lii, 12 sq.) usually have also the habit of furnishing, particularly the poetical portions of the historical books (Judg. v; 1 Sam. ii; 2 Sam. xxii), with profuse additions. These additions often very much resemble each other (comp. Judg. v, with Isa. x, 4; 2 Sam. xxiii, 4 with Isa. xxx, 26).

Another peculiarity of this Targum are the Jewish dogmatical opinions of that day with which the work is interwoven, and the theological representations, in introducing which a special preference was given to the book of Daniel. Examples of this are the interpreting of the phrase "stars of God" by "people of God" (Isa. xiv, 13; comp. Dan. viii, 10; 2 Macc. ix, 10); the application of the passage in Dan. xii, 1 to that in Isa. iv, 2. In Isa. x, 32 the author introduces a legend framed in imitation of the narrative in Dan. iii, which is repeated by later Targumists (comp. Targ. Jerus.: Gen. xi, 29; xxi, 33). Also, in the Targum of Zunz he gives the Talmudic notice concerning Jonathan equally as much as upon that concerning R. Joseph. The language concerning the former, we admit, is a little hyperbolical, but this does not exclude the truth of the matter. Besides, there is nothing to militate against Jonathan having written a Targum on the prophets; and even the expression that this Targum was made "from the mouth of Haggai, Zechariah, and Malachi" is not so absurd as the writer of the art. "Targum" in Kittro's Cyclopædia would suppose, for if it means anything, it means this, that the explanation of Jonathan contains the transmitted exposition in the spirit of Israel, and as Zunz remarks (Gottted. Vorträge, p. 393), "Jonathan's Targum on the prophets, as a result of studies which were instrumental in forming fixed national opinions, proves that a considerable time before it was customary to explain the contents of the prophetic books, by means of Talmudical prelections or otherwise, to the public. Nay, he commends the teachers for—even in evil times—teaching the law in the synagogues at the head of the congregations (Targ. on Judg. v, 2, 9). From the New Test. we know that Moses and the prophets were read in the synagogues, and, deducting all hyperbolical language, there is no reason for doubting the high antiquity of this Targum. The text is rendered, in the same manner as by Onkelos, free from all one-sided and polemical considerations, which the Jews since the 2d century followed. Many passages are referred to the Messiah, even such as do not rightly belong to him, so that no polemical tendency against Christians appears in the version. The following is a list of them: 1 Sam. ii, 10; 2 Sam. xxviii, 3; 1 Kings iv, 33; Isa. iv, 2; ix, 6; x, 27; xi, 1, 6; xv, 2; xvii, 1-5; xxviii, 5; xlii, 1; xliii, 10; xlv, 1; li, 13; lii, 10; Jer. xxvi, 5; xxx, 21; xxxii, 13, 15; Hos. iii, 6; iv, 8; Mic. iv, 6; v, 1; 18; Zech. iii, 8; iv, 7; v, 12; x, 4.

There is little doubt that the text has received several interpolations. To this head Zunz (op. cit. p. 63, 282) refers all that is hostile to Rome, e. g. Exod. xxxix, 10; 1 Sam. ii, 5; Isa. xxxix, 9. So, too, Arniliius, in Isa. xi, 14. To these may be added perhaps Germundus, from the Paræn. in Ezek. xxviii, 6; the superstitious legend inserted in Isa. xxx, 32 relative to the army and camp of Sennacherib; and the peculiar story about Sisera (Judg. v, 8). Even Rashi speaks of interpolations in the text of Jonathan (Ezek. xiv, 19); and Wolf says (Bibl. Hebr. i, 1165), "Quae vero, vel quod ad vox barbara vel ad res state eis inferiores, aututilia nonnulla, quamvis paucis triplicis hujus generis existent, ibi occurrunt, ea merito falsarii cujusdam ingenii adscripturant. The printed text of the Anwerp Polyglot confirms this supposition of interpolations, since several of them are wanting in it. So long as we have no critical edition of this Targum, we must be careful to draw the inference, as did Morinus and Voss, in favor of a very late origin of the Targum; for a perusal of the recently published edition of this Targum by Lagarde, from the Codex Reuchlin, and its comparison with our present editions, which only show the corrupt state in which the text at present is.

The style of Jonathan is, upon the whole, the same as that of Onkelos. Ellichorn and Bethold asserted that this Targum teems with "exotic words." Yet, notwithstanding their assertion, we believe that Carpen. in Exeget. xxxviii, 8; the text of the Targum because of the more obscure language and the predictions concerning Israel's future by which they are characterized. Even in the case of the historical books, Jonathan often acts the part of an expositor. In the case of the prophets themselves, this course of exposition—in reality becoming the prophetic poet's pædagogical art—is more pronounced. This pervading, often misunderstood, characteristic," says Havernick, "constitutes the chief proof, confirmed also by external evidence, of the oneness of the authorship of this Targum; for not only do parallel passages (such as Isa. xxxvi-xviii; comp. 2 Kings xviii, 15 sq.; Isa. lii, 12 sq.) usually have also the habit of furnishing, particularly the poetical portions of the historical books (Judg. v; 1 Sam. ii; 2 Sam. xxiii), with profuse additions. These
IV. The Targum of Pseudo-Jonathan and Jerusalem on the Pentateuch.—The greater simplicity which characterized the older Targums soon ceased to satisfy the progressively degenerating taste of the Jews, especially the Ashkenazim. Hence Targums marked by greater laxity soon began to be written which embraced more the opinions peculiar to the age, and furnished the text with richer traditional addenda. Of these latitudinarian Targums we possess one on the Pentateuch—the one known by the name of Pseudo-Jonathan. In later centuries several later period ascribe it to the author of the Targum on the Prophets; and the commonly so-called Targum Hirscholymitanum, or Jerusalem.

1. Pseudo-Jonathan.—This paraphrase is falsely ascribed to Jonathan ben-Uziel. It extends from the first verse of Genesis to the last of Deuteronomy. The way in which it came to be so ascribed is most curious, and is supposed to have been the mistake of a copist, who made out שָׁם, i.e. Targum Jerusalem—שָׁםִּים, Targum Jonathan. Proof is not needed at the present day to show that the Jonathan of the prophets is not the Jonathan of the Pentateuch, for he could have little to do with a Targum which speaks of Constantinople (Numb. xxxiv. 19, 24), describes very plainly the breaking-up of the West-Roman empire (vers. 19-24), mentions the Turks (Gen. x. 2), and even Mohammed's two wives, Chadija and Fatima (xxi. 21), and which not only exhibits the fullest acquaintance with the edited body of the Babylonian Talmud, by quoting entire passages from it, but adopts its popular phraseology: not to mention the complete disparity between the style, language, and general manner of the Jonathasian Targum on the Prophets, and those of this one on the Pentateuch, strikingly palpable at first sight. This was recognised by early investigators (Morinus, Pfeiffer, Walton, etc.), who soon overthrew the old belief in Jonathan ben-Uziel's authorship, as upheld by Menahem Rekanati, Asariah de Resei, came to be Giacomo, Pagius, etc. The work of the Pseudo-Jonathan is not a version. It is rather a paraphrase, though by no means exclusively so. Neither is it a Haggadic commentary. Version and paraphrase are interwoven throughout, the author seldom confining himself to simple explanation, but proceeding with a large amount of Haggadah, which are richly imbedded in the work, the latter especially. His legends are rich and copious. His Haggadah is not historical; it is ethical, religious, metaphysical, lyrical, and parabolic. It has been well observed that he is only the interpreter of the ideas prevailing in his time—the narrator of traditions, religious and national, not their inventor, because most of them are found in preceding literature, or, as Zunz states it, "almost all his explanations and embellishments coinciding with the Haggadah we find occurring in the other Haggadic writings; the few which are peculiar to him he has not devised, any more than Jonathan has devised his interpretation of the prophets. In both the culture of the age and the potency of traditional ideas are manifest" (Gottsch. Vorträge, p. 72). To these embellishments belongs the manner in which events and characters are dressed out hyperbolically in Jonathan's Midrashim; not only the Biblical heroes, as was natural, but even the enemies of the Jewish nation. Thus Og carries on his head a piece of rock sufficient to bury all the camp of Israel beneath its weight (Numb. xxvi. 35). A mountain possessed of divine virtues is suspended in the air over the children of Israel (Exod. xix. 17), etc. Many examples may be cited. In the case of the men of Cloyne, against Winer and Petermann, that all these stories were not invented by Pseudo-Jonathan, but borrowed from traditional usage. The ethical Haggadah is perhaps the best part of the work, for here the exegete becomes didactic. Thus we are told in Gen. xlii that Joseph suffered two additional years of imprisonment because he built on man's rather than God's help, a view also espoused by Rashi. The region of the supernatural is treated very freely by Jonathan. His angelology is marvellous. He has the names of many angels only revealed to the children of Israel. Thus, for example, one has Uriel, Ariel, Samaüel, etc. We find rhetorical or poetical digressions in Gen. xxxii. 14 (the prayer of Abraham on Mount Moriah), Deut. xxxiv. 6 (the hymn on Moses' death); Gen. xlif. 4; Numb. xxx. 94; Deut. xxxii. 50 (parables). Like Onkelos and others, he avoids anthropomorphism and anthropophagy, and is more inclined to human attributes to heathen gods. The Halachah is also brought within the circle of his paraphrase, and its results employed in the exposition. This part of Jonathan's version has of late been treated by Dr. S. Gronheim, in his Die Jonathasianen—Uebersetzung in ihrem Verhältniss zur Halacha (Leipsig, 1879).

The language of this Targum shows it to be of Palestinian origin, as it is in what is called the Jerusalem dialect. But the language is, at the same time, very enriched, bearing with it many peculiarities. It is far from being pure, because the Syriac had deeply affected it. Foreign elements enter into it largely, such as, Gen. i, 7, יִבְרֵא לֵב, יִבְרֵא לֵבָא, לָיְמֵיכָא, בֵּרֵא לְבָא, דַּיָּשְׁאֵל; ii, 6, נָעֲמַת וְלִבְרֵא לֵב, נָעֲמַת וְלִבְרֵא לֵבָא; iii, 4, נָעֲמַת וְלִבְרֵא לֵב; iv, 6, נָעֲמַת וְלִבְרֵא לֵב; vi, 2, דַּקָּפָא, דַּקָּפָא, דַּקָּפָא; iv, 2, מָגַנְתָא, מָגַנְתָא, מָגַנְתָא; v, 9, מָגַנְתָא, מָגַנְתָא, מָגַנְתָא; vi, 9, מָגַנְתָא, מָגַנְתָא, מָגַנְתָא; etc., comp. Petermann, "De Dubius Pentateuchis Paraphrasis Chaldaica," particula i, p. 66 sq., where a collection of these foreign words is given.

The names of Constantinople and Lombardy, and even of two of Mohammed's wives, which occur in this paraphrase, besides the many foreign words, prove the Targum to have originated in the second half of the 7th century. That Jonathan had Onkelos before him, a very slight comparison of both will show. Many places attach themselves almost verbatim to Onkelos, as Gen. xx, 1-15. Indeed, one object which the Pseudo-Jonathan had in view was to give a criticism upon Onkelos. He corrects and alters him more or less. Where Onkelos paraphrases, Jonathan enlarges the paraphrase. The same attention to the work of his predecessor is shown in his Halachic as in his Haggadic interpretation; as also in the avoidance of anthropomorphisms and anthropopathecisms. Sometimes the divergences from Onkelos are slight, sometimes important; and they are often superior to Onkelos, but sometimes the reverse. As his object was different, his production presents a great contrast on the whole, because he intended to interpret, not to translate. Besides, this divergence from Onkelos must be accounted for in another way: he did not base his work primarily on the latter, but upon another paraphrase; or, in other words, he worked upon Onkelos indirectly in the first instance because his whole production rests on the basis of the Jerusalem, or Jerusalem, Targum. But, before proceeding with our observation on the Pseudo-Jonathan, let us speak of

2. The Jerusalem, or Jerusalem, Targum.—The Jerusalem Targum, written in the same dialect substantially as that of the Pseudo-Jonathan, and interpreting the single verses, often single words only, is extant in the following proportions: a third on Genesis, a fourth on Deuteronomy, a fifth on Numbers, three twentieths on Exodus, and about one fourteenth on Leviticus. Judging from the rounded and complete form in which the different parts are given, we may infer that it is now in its prime stage. If it is to be inferred from the recension of Jonathan. Yet their similarity is striking. The Haggadah of the one regularly appears in the other, and has usually a more concise form in the Jerusalem.
Targum. Indeed, there is often a verbal agreement, or nearly so, between them, so that one might at first be inclined to assume that the Aramaic is their original. But, on the other hand, it is not that they are necessarily the same work—the Jerusalem Targum containing variations from the other, or being a fragmentary recension of it. The latter opinion is held by Zunz. But against this there are many arguments, especially the fact that the work is complete and rounded off in its parts. And though the similarity of the Joseph and Jerusalem Targums is considerable, there is so much divergence as to prove diversity of authorship. Thus Jerusalmi knows very little of angels: Michael is the only one ever occurring. In Jonathan, on the other hand, angelology flourishes with great vigour. To this we may add: Gabriel, Uriel, Raphael, the Angel of Death, Samuel, Samael, Sarchassai, Shachassai, Usiel; seventy angels descend with God to the building of the Babylonian tower; nine hundred millions of uprising angels go through Egypt during the night of the Exode, etc. Jerusalmi makes use but rarely of Haalacha and Haggada, while Jonathan sees the text as it were only through the medium of Haggada: to him the chief end. Hence Jonathan has many Midrashim not found in Jerusalmi, while he does not omit a single one contained in the latter. There are no direct historical dates in Jerusalmi, but many are alluded to in the former. This is indicative of the fact that a short space of time intervenes between the two; the early origin of either is to a great extent made manifest by these dates. The most striking difference between them is, however, and the one which is most characteristic of either, is this, that while Jerusalmi adheres more closely to the language of the Mishna, Jonathan has greater affinity to that of the Gemara. It is also perceptible that the reverence of Onkelos for the name of God, shown in substituting the Memra, or something intermediate, is not so excessive in Jonathan as in the Jerusalem Targum. If such be the diversity of Jonathan and the Jerusalem Targum, they are not one work fundamentally; nor is the one a recension, now in fragments, of the other. But how is their resemblance to be explained? Only by the fact that both have relation to Onkelos. The author of the Jerusalem Targum worked upon that of Onkelos, his object being to adapt it, according to certain principles, and to insert in it a selection of Haggadic current among the people. Pseudo-Jonathan afterwards resumed the same office, and completed what his predecessor had begun. The Jerusalem Targum formed the basis of Jonathan, and its own basis was that of Onkelos. Jonathan used the Jerusalem Targum as the author of the Jerusalem Targum of that of Onkelos alone. There is no doubt that the small glossarial passages of the Jerusalem Targum are intended as a critical commentary upon Onkelos, and from his standpoint the author proceeds freely in using his predecessor. Thus he rejects his acceptations of words, and gives closer acceptations for his freer ones. In many places where Onkelos's scrupulosity about removing anthropomorphisms from the text had obscured the sense, the Jerusalem Targum restores the original meaning by some addition or change. Thus in Gen. vi, 6, where Onkelos omits the name Jehovah and paraphrases, the Jerusalem Targum comes near the original text. Sometimes, where Onkelos Aramazies a Hebrew word, the Jerusalem Targum substitutes a genuine Aramaean one, as in viii, 22, where the עָנָב of Onkelos is displaced for פַּלְנֵס. So in xxxiv, 12, where Onkelos has עֲנַבְיִי, the Jerusalem Targum puts עֲנַבְיִי. vice versa, the Jerusalem Targum often prefers a Hebrew word to Onkelos's Aramaean one, perhaps because the latter was better known in Palestine, as in xxii, 24. There is, indeed, no uniformity between Onkelos and Jerusalem in the use of Aramaean words, while consistent divergencies may be readily traced. After all that has been said there can be no doubt that the general object of the author of the Jerusalem Targum has been to improve and adapt it to a later time and different country by enriching it with the Haggadic lore which had accumulated, so that its deficiencies might be removed. From being a version, he wished to supplement it in various parts, so that it should be a paraphrase there. That he has made many mistakes, and departed in not a few cases from Onkelos for the worse, we need not remark, nor enumerate his errors, since Petermann has collated them (op. cit. p. 60 sq.). It is this fragmentary Jerusalem Targum to which Jonathan had regard in the first instance. He uses the larger paraphrases and Haggadic parts, as well as those already added by Onkelos, but always with discretion. More commonly the Haggadah of the Jerusalem Targum is simplified and abridged. Nor does Jonathan follow Onkelos implicitly, but often diverges. If he does not adhere consistently to the Jerusalem Targum, we need not expect to see him copying Onkelos. Thus in Gen. vii, 11; xxii, 24, he leaves Onkelos for the Jerusalem Targum. It should also be observed that Jonathan relies upon Onkelos much more than the Jerusalem Targum, which is freer and more independent. Thus the former follows Onkelos, and the latter departs from him in Gen. vi, 30; xiii, 6, 15; vi, 10, 11; xvi, 7, 12; xix, 81; xx, 18. The interval of time between the Jerusalem Targum and Jonathan cannot be determined exactly, but it must have been a century. From these observations it will no longer be uncertain whether the Targum of Jerusalem hath been a continued Targum, or only the notes of some learned Jew upon the margins of the Pentateuch, or an abridgment of Onkelos" (Allix, Judgment of the Ancient Jewish Church, etc., p. 88). All the guesses are incorrect. The only objection to this hypothesis is the statement of Zunz that because many citations made by older authors from the two Targums are in question, that the author of the Jerusalem Targum must have existed, which is now lost. But when we consider the probable chances of passages being lost in the course of transcription, and of others being interpolated, as also the fact of variations in the editions, it need not be assumed, in the face of internal evidence, that they are very different now from what they were at first. Many of the passages cited by authors and now wanting, which Zunz has brought together, need a great deal of sifting and correction, as has been ably shown by Seligsohn in Frankel's Monatschrift, 1867, p. 113. The view of the relation now given is confirmed by the language and manner, and Pseudo-Jonathan was briefly advocated by Frankel (op. cit. 1846, p. 111 sq.) with ability and success. His view has again been taken up by Seligsohn and Traub, and satisfactorily established by them in a prize-essay, published in Frankel's Monatschrift, 1857.

3. Editions and Commentaries. — The Pseudo-Jonathan Targum was first published at Venice in 1591; then at Hanau, 1618; Amsterdam, 1640; Prague, 1646; Amsterdam, 1671 and 1703; Berlin, 1705; Wilna, 1852; Vienna, 1858, etc.—all these, as well as the editio princeps, having Onkelos and the Jerusalem Targum. It is also in the London Polyglot, vol. iv, together with a Latin translation made by Antony Chevalier. It was translated into English by Etheridge (Lond. 1862-65). The Jerusalem Targum was first printed by Bomberg (Venice, 1518) in his Rabbinical Bible, and reprinted in the subsequent editions of the Biblia Hebraica, as well as in the great Polyglots. Since its publication by Walckon in 1657, it has also appeared at Wilna (1852), Vienna (1859), and Warsaw (1875). Francis Taylor made a Latin version of this Targum (Lond. 1649); but the more correct one is that of Antony Chevalier above noticed.

A commentary was written upon the Pseudo-Jonathan and Jerusalem Targums by David ben-Jacob Ze—
The extraneous insertions are very numerous, uncertain, fabulous, and incorrect. Thus at ii, 1 we read, "And the three friends of Job heard of all the evil that had come upon him when they had seen the face of his garden turning up, and the bread of his food changed into living flesh, and the wine of his drink into blood; and they came each one from his place, and for this service they were delivered from the place appointed them in Gehenna." In i, 15 the words of the original אַבְרָהָם אֶת בֵּית הַשָּׁרוֹן are rendered כֶּלִּים בַּשָּׁרוֹן rendered כֶּלִּים בַּשָּׁרוֹן... the queen of Samarkand (7) suddenly rushed in. If Samarkand be really
In two cases the variation is to be accounted for by hearing amiss, viz. xxix, 22, where, instead of מַעַרְאָה, מַעַרְאָה (מַעַרְאָה) is read. The number is greater where the vowel-points differ from those of the Masorah. Variations of this kind may amount to about thirty.

The Targum on Job was published by John Terentius (Franeck. 1663) [the text being that of Buxtorf, and the Latin translation that of Aries Montanus], with notes, consisting of various readings and explanations of Chaldee words. The Latin version of Alphono de Zamora was published with notes by John Mercier (1614). The Latin version of the Sacred Text in the Holy Bible was published by the Latin (Rome, 1618). This Targum has been treated by Bacher, in Gritz's Monatschrift, 1871, p. 208-225, and by De Libri Jobi Paraphrasi Chaldaicae (Vratil. 1873).

2. The Targum on the Psalms.—This Targum is not so Haggadic or diffuse as that of Job. Sometimes it follows the original with a tolerable degree of closeness, as in i, iii, vi, etc. In more cases, however, it indulges in prolix digressions, absurd fables, and commonplace remarks. Two or three different versions of the same text occasionally follow one another without remark, though the introductory notice מַעַרְאָה, i. e. מַעַרְאָה, sometimes precedes (comp. cx, 1). The additions to the text are often inappropriate, the sense distorted, the titles wrongly translated, the phrases twisted, and the sounds transposed. Thus in cx, 1 the paraphrase has, "The Lord said in his word that he would appoint me lord of all Israel; but he said to me again, Wait for Saul, who is of the tribe of Benjamin, till he die, because he does not agree in the kingdom with an associate: and afterwards I will make thine enemies thy footstool," to which is subjoined מַעַרְאָה, thus, "The Lord said in his word that he would give me the dominion because I was intent upon the doctrine of the law of his right hand: wait till I make thine enemy the footstool of thy feet." Deviations from the Masoretic text are numerous. On the whole, the linguistic character of this Targum corresponds with that on Job, and resembles that of the Jerusalem Targum. It abounds in Greek words; thus besides the γῆγηγ, occurring also in Job, we meet with δρομος, xx, 4; παλαιος, xlvi, 3; κυνος, lii, 1, and xcvi, 10; υπνος, lxxii, 10; παλαιος, lxxii, 12; κυνος, lxxii, 13; οδος, lxxix, 7; συνινος, liv, 32; γιλαμα, xviii, 54, etc. According to Bacher, Das Targum zu den Psalmen, in Gritz's Monatschrift, 1872, p. 408-416; 468-473, the author of this Targum is the same as that on Job. Davidson, in Kitto's Cyclop., s. v. "Targum," thinks that, "like the Targum on Job, this one is an accumulation of expositions extending over centuries." The Targum on the Psalms was printed in Justiniani's Polyglott Psalter (Genoa, 1516), and in the Hexaglot edition of the Psalter, published at Rostock, 1614. It is also printed in the latest Rabbinical Bible (Waraw, 1873). The Antwerp and following Polyglots (1572, 1645, 1657) contain the Latin version of Aries Montanus. From the Codex Reuchlin it was published by Lagerlof in his Hagiographa Chaldaica (Leips. 1875), and republished by Nestle in his Psaltermium Tetratriglotum (Tub. 1877-79).

3. The Targum on Proverbs.—This Targum is not Haggadic, and adheres more closely to the original text. Its remarkable agreement with the Syriac version has often been noticed—an agreement which extends even to the choice and position of words, comp. i, 6-8, 10, 12, 13; ii, 9, 10, 13-15; iii, 2-9; iv, 1-3, 6-8; v, 1, 2, 4, 5; vii, 27; x, 3-5; xxxi, 1; xxvii, 2, 5, 8; xxix, 5, 6; xxxi, 31. Dathe, in his De Ratione Hebraica et Orientalis Scripturae (Leips. 1796), in his Proverbiae Solomoniae (Lips. 1764), was the first who gave special attention to this fact, and came to the conclusion that the Chaldee interpreter was dependent on the Syriac. He endeavors to prove his position by many pertinent arguments, such as that the Syriac explains Aramaean derivations correctly from the Hebrew, and that many Syriacisms in words, forms, and orthography appear in the version which are otherwise unknown to Chaldee, or at least are very rare. Eichhorn and Voelck take the same view. Haverbach denies the use of the one by the other, endeavoring to account for their similarity by the cognate dialects in which they are written, the identity of country in which they had their origin, and their literality. Davidson, in Kitto's Cyclopoda, is inclined to believe that, the Targum having been made in Syria, the Syriac as well as the Hebrew was consulted, or rather the Greek through the medium of the Syriac, while the Hebrew was the original. While the Syriac was freely used. Different entirely is the opinion of Maybaum, who takes the opposite ground to that of Dathe, Eichhorn, and others. He believes that the Syriac interpreter was dependent on the Chaldee. The statements in the art. SYRIAC VERSION, its REVISION, and its KINDRED VERSIONS, in the CHALDEISCH, confirm this view. The greatest obstacle in all these disquisitions is the want of a critical text, and Maybaum, who compared the different readings together with an ancient codex preserved at Breslau, has come to the conclusion that Dathe's evidence is based upon corrupt readings. As to the original language of this Targum, Dathe (op. cit. p. 125) expresses it as his opinion that it was originally written in Syriac, the Chaldaism which we find at present having been interpolated by Jews: "Nempe Judei utebbautur versionibus Syriacis, quasi legere atque intelligere omnes usum utrasque linguam consensumentem patenter.

Ser mutabant eas passim, partim ad simile dialecti proprietatem, partim ad lectionem textus Hebræi inter eos receptam." His hypothesis is based upon the fact that the Chaldee in xviii, 22 agrees with the Hebrew מַעַרְאָה מַעַרְאָה, while the other versions read מַעַרְאָה after מַעַרְאָה, the Chaldee agrees with the Hebrew. But it is evident that because the word is wanting in one MS., this inference cannot be drawn concerning all others. The fact in this particular is that only in the ten MS. that agrees with the Hebrew does the Chaldee agree with the Hebrew text; while others, as Dathe himself admits, have the word מַעַרְאָה. And, after all, is it that the Chaldee so often deviates from the Masoretic text? Whence is it that so many Chaldaisms are found even in those codices which, in the passage quoted above, do not agree with the Masoretic text? The answer is that, as the Chaldaism in our Targum are as original as the Syriaca, we have here evidently to do with a mixed dialect; and from the analysis given on the linguistic peculiarities, Maybaum comes to the conclusion that the language of the Targum on Proverbs is Syro-Chaldeic, and the original language of the author. The relation of the Chaldee to the Syriac version, having already been treated at some length in the art. SYRIAC VERSION, its RELATION TO THE SEPTUAGINT AND CHALDEE, we can only refer to it. If the hypothesis of Maybaum, which we have adopted, be true, viz. that the Syriac depended upon the Chaldee, not vice versa—for even Davidson acknowledges that a uniform derivation of Aramaean upon the Syriac cannot be sustained"—the Targum on Proverbs must have existed at a very early period; at any rate, Davidson acknowledges that the Targum on Proverbs is older than those on Job and Psalms, in this respect following Zunz. This being so, we do not err in assuming that the Targum on Proverbs
4. The Targum on the Five Megilloth, i.e. on Ruth, Esther, Ecclesiastes, Canticles, and the Lamentations, is, according to Zuns, a Midrashic paraphrase, exceedingly loose and free, and contains many additions and annotations, fables, allusions to Jewish history, and many fanciful additions. The whole bears the impress of a date considerably posterior to the Talmudic time, and is written in an intermediate dialect between the West Aramaic of Job, Psalms, and Proverbs, and the East Aramaic of the Babylonian Talmud. The least Haggadic is Ruth, the most rhetorical that of Canticles. Delitzsch (Geisch. d. jiid. Verste, p. 135) thinks that "The Targums on the five Megilloth are the most beautiful national works of art, through which there runs the golden thread of Scripture, and which are held together only by the general tone of a Midrash. The Targums are the work of one or different persons cannot be well decided. The former is the opinion of Zuns, Volk, and Deutsch, the latter that of Davidson.

(1.) The Targum on Ruth was published separately with a Latin translation and scholia by John Mercer (1795), and the following specimen of a paraphrase will give a fine idea of the same: Ruth ii, 10, 11. ‘Why have I found pity in thine eyes to know me, and I, of a strange people, of the daughters of Moab, and of a people who are not clean to enter into the Church of the Lord? And Boaz answered and said to her, in telling him it has been told me by the sibyls of the land when the Lord decreed he did not decree respecting women, but men; and it was said to me in prophecy that kings and prophets are about to spring from thee on account of the good thou hast done,' etc.

(2.) The paraphrase on Lamentations is more Midrashic than that on Ruth, but of the same type, being copiously interwoven with pieces of history, allegory, fables, reflections, etc.

(3.) The paraphrase on Ecclesiastes is more Midrashic than the former, the author having given a fresh turn to his imagination and made copious insertions. The Targum best illustrates the character of this paraphrase. In ii, 1, we read: ‘When Solomon was sitting upon the throne of his kingdom, his heart became very proud of his riches, and he transgressed the Word of God, and he gathered many horses and chariots and riders, and he amassed much gold and silver, and he married from foreign nations, whereupon the anger of the Lord was kindled against him, and he sent among him the angel of death, who drove from the throne of his kingdom, and caused to appear from the ring of fire that he should woe and wunber about in the world to prove it; and he went through in the provincial towns, and the cities of the land of Israel, weeping and lamenting, and saying, I am Coheleth, whose name was formerly called Solomon, who was king over Israel in Jerusalem; and I gave my heart to ask whether and how the difference between godliness and evil, and knowledge of whatsoever was done under the sun, and there was no profit in it; and I heard a rumbling from above among the children of men—a sad business which God gave to the children of men to be afflicted by it.'

As this Targum has been translated into English by Ginsburg, in his Commentary on Ecclesiastes (London, 1861), the reader, perusing the same, will be enabled to judge for himself better than by any extract.

(4.) The Targum on Canticles is the most Haggadic of all, and hardly deserves the name of a paraphrase, because the words of the original are completely covered by extravagant and inflated expressions (‘nuque atque frivolitates’) which refer to another subject. ‘The par- rabolous and digressions in the third song of the Targum are left to his imagination to run riot in a multiplicity of ways.' He has composed a panegyric on his people, describing prophetically the history of the Jewish nation, beginning with their exode from Egypt, and detailing their doings and sufferings down to the coming of the Mes- siah and the glory of the throne of David. According to this allegory, i, 3 relates Jehovah’s fame which went abroad in consequence of the wonders he wrought when bringing the Israelites out of Egypt; ver. 12 describes the departure of Moses to receive the two tables of stone, and how the Israelites in the mean- time made the golden calf; ver. 14-16 retells the pardon of that sin and the erection of the tabernacle; iii, 6-11 refers to the passage of the Israelites, under the leadership of Joshua, over the Jordan, their attacking and conquering the Canaanites, and the building of Solomon’s Temple; v, 2 describes the Babylonian captivity; vi, 2 reproduces the account of the bells of the Temple, and the building of the second Temple; ver. 7, etc., names the battles of the Maccabees; vii, 11, 12 represents the present dispersion of the Jews, and their future anxi- ety to learn the time of their restoration; vii, 5, 6, etc., describes the resurrection of the dead, the final ingath- ering of Israel, and the building of the Temple of the Lord. The very first verse of this Targum reads thus:

‘The songs and praises which Solomon the prophet, king of Israel, sang by the spirit of prophecy, before God, the Lord of the whole world. Ten songs were sung in this world, but this song is the most celebrated of them all. The first song Adam sang when his eyes were opened in the Garden of Eden. After he had seen death he opened his mouth and said, ‘A song for the Sabbath-day,’ etc. (Ps. xcii.) The second song Moses and the children of Israel sang when the Lord divided the Red Sea for them. They all opened their mouths and sang as one man the song as it is written, ‘Then sang Moses and the children of Israel, when they had sung this song, before the Lord, and had sung it, saying,--The third song the children of Israel sang when the well of water was given to them, as it is written, ‘Then sang the song Israel’ (Num. xx, 17). The fourth song Moses the prophet sang when his time came to depart from this world, in which he reproved the people of the house of Israel, as it is written, ‘Give ear, O heavens, and I will speak’ (Deut. xxxii, 1). The fifth song Joshua the son of Nun wrote down when the wagons and the camp, the moon and the stars stood still for them thirty-six hours: and when they left off singing their song, he himself opened his mouth and said, ‘As it is written, as it is written,--The song Joshua before the Lord’ (Josh. x, 12). The sixth song Barak and Deborah sang in the Lord’s name when He delivered them out of the hands of the children of Israel, as it is written, ‘Then sang Deborah, etc.’ (Judg. v, 11). The seventh song Hannah sang when she was given her by the Lord, as it is written, ‘And Hannah prayed prophetically and said’ (1 Sam. i, 11, and the Targum, ed loc.). The eighth song the prophet sang for all the wonders which the Lord did for him. He opened his mouth and sang a hymn, as it is written, ‘And David sang in prophecy before the Lord’ (2 Sam. xxii, 1, and the Targum, ad loc.). The ninth song Solomon the king of Israel sang to the Holy Spirit before God, the Lord of the whole world. And the tenth song the children of the captivity shall sing when they shall be delivered from bondage, as it is written, ‘That which the prophet Isaiah the prophet, ‘This song shall be unto you for joy, as in the night in which the feast of the Passover is celebrated; and your heart shall sing as with a loud voice, even before the Lord three times in the year, with all kinds of music, and with the sound of the timbrel, to go up to the mountain of the Lord, and to the house of the Lord, the mighty one of Israel’ (Isa. xxx, 29)."

From this specimen it will be seen how far the learned Broughton was correct in saying that the paraphrase "is worth our study, both for delight and profit." This Targum has been translated into Latin, and is also accessible to English readers in the translation of Gill, at the end of his Commentaria on the Song of Solomon (Lond. 1751), p. 535 sq.

(5.) The Targum, or rather Targums, on Esther.

The book of Esther, enjoying, both through its story- like form and the early injunction of its being read or
heard by every one on the Feast of Purim, a great circu-
lation and popularity, has been targumized many times.
One translation of concise form, and adhering closely to
the text, occurs in the Antwerp Polyglot (vol. iii): it was
issued enlarged with glosses by Teller in Targumim Pseu-
dotestes in Esther, and forms the Targum Pries is which is contained
in the London Polyglot. Much more prolix, and ampli-
fiying still more the legends of this Targum (comp.
i, 2; 11; ii, 5, 7; iii, 1; v, 14, etc.) is the Targum Poste-
rior in Esther, in which all the full-blown romance
of the text is developed. In this Targum we are
informed as to the name and appearance of all the
characters; it gives an extensive view of all the
operations of good and evil spirits, and describes
their operations in detail. It is evident that we are
being furnished with an extended and elaborated
version of the legend, as well as with the ancient
Targum. The latter, however, is a very imperfect
version, and the former is a more perfect and
elaborated version of the same legend.

The targum of Esther is a very interesting and
instructive work, and is a valuable addition to our
knowledge of the history of the Jewish people. It
is a valuable work, and is a valuable addition to our
knowledge of the history of the Jewish people.
TARGUM

over Jerusalem (Notices sur Sabaïc [Par. 1888], p. 82). According to the description here given, there can be no doubt that it is the same which Zonnenburg published some years ago, in Persian, with a German translation, in Merx's Archiv, i, 385 sq., and beginning thus: "History of Daniel (peace be upon him). I am Daniel, the children of Jconiah, king of the house of Judah, and I have written to you, my children, about such a Chaldean paraphrase on Daniel, in the absence of all proof that the Persian was made from the Chaldean; for a few Chaldean words at the beginning are no argument in favor of it. All that Munk communicates is, partly as a paper, that he can find no warrant of the fact. Yet Steinschneider has referred to a Targum on Daniel, simply on the authority of Munk's notice (Catalogus Librorum Hebræorum in Bibliotheca Bodleiana). No Targum upon Daniel is extant, as far as we yet know, and it is very doubtful whether one was ever made. The reason assigned in the Talmud for not rendering the book into Chaldean is that it reveals the precise time of the Messiah's advent. A good part of the book is already in Chaldean. To this it may be answered that, at the time when Davidson wrote, this Targum was not yet published, otherwise he would have extended the references given in Judges, the particle that in the original Chaldean was the basis of it. A number of Hebrew words occur in it, and it closes with quoting Ps. cxlviii. 7.

2. There is not any Targum, so far as is known, upon Ezra and Nehemiah. Part of Ezra is already Chaldean, and the same interpretation is found in a work of the fourth, or even fifth century. From a work of the Septuagint.

8. To the Roman edition of the Sept. of Daniel, published in 1772, a Chaldean version is added of the Apocryphal pieces in Esther. This has been printed by De Rossi, accompanied by a Latin version, remarks, and dissertations (Specimen Variorum Lectioium Sacri Textus at Chaldaico Estehri et Septuaginta versiones, etc. [Thib. 1788, 4to]). An edition of the Chaldean Haggiographa was published by Lagarde (Leips. 1878).

VI. Fragmentary Targums on the Other Books. According to Zunz, the Jerusalem Targum—or rather, as it should be called, the Palestinian one—extended to the prophetic books also, and he justifies his opinion by the following particulars, which we give in his order: Abudrahma cures a Jerusalem Targum on 1 Sam. ix, 13, and Kimchi has preserved several passages from it on Judges (xi, 1, consisting of 47 words), on Samuel (i, 17, 18: 106 words), and Kings (i, 22, 21: 68 words; ii, 4, 1: 174 words; iii, 5: 67 words; iv, 7: 29 words; vi, 17, 13: 9 words), under the simple name of Toespehak, i.e. Additional, or Additional Targum. Luzatto has also lately found fragments of the same, under the names "Targum of Palestine," "Targum of Jerusalem," "Another Reading," etc., in an African codex written A.M. 5247 = A.D. 1497, viz., on 1 Sam. xviii, 19; 2 Sam. xii, 12; 1 Kings vi, 9, 11, 13; x, 18, 26; xiv, 13; on Hos. i, 1; Obad. i, 1. On Isaiah (ch. lvii), Rashi, Abudraham (liv, 11), and Farissol (lvxii) quote it, agreeing in part with a fragment of the Targum on this prophet extant in Cod. Urbin. Vatican. No. 1, containing about 190 words, and beginning, "Here in the name of Zerubbabel, he has exalted the prophecy at the end of his prophecy in the days of Manasseh the son of Hezekiah, the king of the tribe of the house of Judah, on the 17th of Tamuz, in the hour when Manasseh set up an idol in the Temple," etc. Isaiah predicts in this his own violent death. Parts of this Targum are also found in Hebrew, in Pesedath Rabbath, 6 a, and Yalkut Isa. 58 d. A Jerusalem Targum on Jeremiah is mentioned by Kimchi; on Ezekiel by R. Simon, Nathan (Aruch), and likewise by Kimchi, who also speaks of a further additional Targum on Jonathan for this book. A Targum Jerusalem on Micah is known to have been extant in MS., written at first with vowels. Butzendorf endeavored to correct the punctuation and bring it as near as possible to the standard of that in Daniel and Ezra, for which some censured him, though, we believe, unjustly. It is no reproach to his memory to say that he did not perfect their vocalization. As the comments are of no critical text of the Targums, they can only be carefully employed in the criticism of the Hebrew original, although they show the substantial integrity of the Masoretic text. They may be advantageously used in suggesting readings of some importance and value. Perhaps they are more useful in their criticism than in their exposition. On the whole, Richard Simon's view of the Targums deserves to be noted here. In his Hist. Crit. Vet. Test. lib. ii, c. 18, he says, "Omnes ista paraphrases, præter illam Onkelos et Jonathanis, non magna mihi utilitis.
pointed from the members of the Society of Jesus. See the Literarischer Bandezeiter, 1863, p. 182; 1874, p. 176. (B. P.)

Tarragona, Councils of. These two councils were so called because they were held in the city of that name in Spain. This city (anciently Tarraconae, capital of the province of the same name, is situated at the mouth of the Francoli, has a population of about 18,000, is the seat of an archbishop, and, besides other schools of learning, has an ecclesiastical seminary.

I. The first council of Tarragona was held in 561, during the pontificate of Theodore. The king of Italy, and greatest of Amalric, king of Spain. Ten bishops were present, and thirteen canons published.

3. Forbids usury among clerks.
4. Forbids bishops, priests, and clerks to judge any cause on Sundays; allows them to do so on other days, provided they do not interfere in criminal cases.
5. Directs that the priest or deacon appointed to any country parish shall remain there during his week (i.e., that the priest shall remain there one week, and then the deacon shall succeed him and keep his week) in order to celebrate divine service with the clerks; and that on Saturday all the clergy shall attend in order to begin the Sunday office. It also orders that munus and vesper shall be daily.
6. Forbids monks to leave their convent in order to perform any clerical function without leave from their superiors.

II. The second council was held in 1242, by Peter the elder, archbishop against the Waldenses in Aragon. Part only of the acts remain. See Mansi, Conc. xi, 592.

Tarshish (Heb. תַּרְשִׁישׁ, Tarshish, subst. [Ge- sen.] or established [Furst]; Sept. Θώρας [but Kar- χύδας in Isa. xxiii; Karkhûdôn in Ezek.; Ἱλίασα in Isa. ii, 16]; Vulg. usually Tharsis; A.V. "Tarshish,") 1 Kings x, 22; xxii, 48; 1 Chron. vii, 10; once Heb. ᴽ, 22, 11, 13, 26, "Tharsis," 1 Chron. i, 7, the name of three men, Possibly of a gens.

1. Second-name of the four sons of Javan, the son of Japheth (Gen. x, 4; 1 Chron. i, 7). B.C. post 2514. He may have been the founder of the city noticed below. See ETHNOLOGY.

2. Sixth-name of the sons of Bilhan, the grandson of Benjamin (1 Chron. vii, 10). B.C. post 1875.

3. Fourth-name of the seven "princes of Persia in the time of Artaxerxes (Esth. i, 14). B.C. 488. As a Persian name the word stands in relation with Tereesh (ii, 21; vi, 2), and with Tarshath; all probably from the root Tare, meaning "an anchor," or Tare (Gesenius, Thes. ii, 188)." A famous port or region the location of which has been much disputed. Josephus (Ant. i, 6, 1) confounds it with Tarus in Cilicia; and in the Sept. version of Isa. xxiii, 10-14, it is rendered Kar- χύδας, Carthage. A similar rendering is found in Ezek. xxvi, 12; xxxvii, 13, Karkhûdôn, Cartagena, an identification urged by Davis (Cardthys, ch. 1). As the Vulg. translates it by "sea" in the passage quoted above, so the Sept. in Isa. ii, 16 renders it Ἰλίασας, a translation followed by Saadia and Luther. The Targums adopt the same translation in some places, and Jerome apologizes for the blunder by saying that "the Hebrews thought Tharsis was their original term for sea; the noun in common use among them, "im, being a Syriac one." In other places, as 1 Kings xxii, 48, and Jer. x, 9, the Targum gives the peculiar rendering of Ναρθής, Africa. Most interpreters, however, agree that (with the possible exception of the passage in Chronicles) the allusion is to Tarraconae in Spain. It seems most likely the source of the precious stone called by the same name.

In the great genealogical table (Gen. x, 4, 5) it is placed among the sons of Javan; "Elishah and Tarshish, Kittim and Dodanim. By these were the islands of the Gentiles divided." This refers the mind to once to the north-western parts of the Mediterranean.
only concur with other parts of Scripture in showing that the name is to be taken in a wide acception, as denoting, besides modern Andalusia, those parts of Af-rica which lie near and opposite to Spain. Nor is it impossible that a part of the trade of Tarshish lay in these and in other animals; for we certainly know that Saba, the capital of the ancient Sheba, was a great place. Boecus informs us that the lions may have been caught in Africa and convey- ed in ships of Tarshish to Tyre. Sheba and Dedan, however, are mentioned here in connection with Tar- shish, and they were certainly Eastern countries, lying probably on the western side of the Persian Gulf in Asia. But the object of the writer here seems to be to mention the countries placed at the extremities of the then known world—Tarshish on the west, Sheba and Dedan on the east. In Isa. xxxii, 1-14 we read, as a part of the burden of Tyre, that the ships of Tarshish are called on to howl at her destruction, because Tyre afforded them no longer a commercial port and a ha- ven: words which entirely agree with the hypothesis that makes Tarshish a city on the seaboard of Spain, trading up the Mediterranean to Tyre. Nor are the words found in ver. 6 discordant—"Pass ye over to Tarshish; howl, ye inhabitants of the isles." Let us now turn to the book of Jonah (i. 3-4; iv. 2). The prophet was commanded to go and prophesy against Nineveh on the Tigris. For this he should, on quitting Jerusalem, have gone in an easterly direction; but he shunned the duty and fled. Of course he naturally fled in a direction the opposite of that in which the author of the former prophecy directed him. Therefore, when he came to Tarshish, then, must have been to the west, and not to the east, of Jerusalem. In order to reach Tarshish, he went to Joppa and took ship for the place of his desti- nation, thus still keeping in a westerly course and show- ing that Tarshish lay to the west. In Tarshish, in- deed, the water, in the extreme north sea, he might well expect to be distant enough from Nineveh. It is also worthy of notice that, when he arrived at Joppa, on the coast of Palestine, "he found a ship going to Tarshish," which fact we can well understand if Tarshish lay to the west, but by no means if it lay on the Red Sea. See OPHIR.

Thus far all the passages cited agree, with more or less evidence, in fixing Tarshish somewhere in or near Spain. But in 2 Chron. xx, 36 it is recorded that Je- hoshaphat, king of Judah, joined himself with Ahazi- ah, king of Israel; to make ships to go to Tarshish, and they hewed out vessels of Elat in the desert, on the Elanitic gulf on the eastern arm of the Red Sea. If, then, these vessels built at Ezion-geber were to go to Tarshish, that place must lie on the eastern side of Palestine, instead of the western; for we cannot sup- pose they circumnavigated Africa; not because such a voyage was impossible, but because it was long and tedious and not likely to be taken when a nearer and safer way to Tarshish lay from the ports of the Pales- tinian coast. But in the parallel passage, found in 1 Kings xxxii, 49, these vessels are described as "ships of Tarshish" (merchants ed. Jewish); which were intended ed. to go to Ophir, not to Tarshish. This removes the diffi- culty at once, for Ophir was in the East, and accounts for the fact that the fleet was built on the Red Sea, since it was an eastern, not a western, voyage which was intended. The reference appears to be to the same eastern seaport of which mention is made in x. 22, where we find Hiram and Solomon importing from the East in ships of Tarshish, or merchantmen, gold and silver, ivory, apes and peacocks. We have not space to en- ter into the critical questions which this contrariety between the books of Kings and Chronicles suggests for consideration. To this remark, however, it is the case, which a diversity appears in the statements of these two authorities, no competently informed theologian could hesitate to give the preference to the former. The alternative of two places by the name of Tarshish, one in Spain and the other in India, was adopted by
TARSHISH

3. It does much to confirm our view that all the articles reported in Jeremiah and Ezekiel to have been brought by the Tarshish merchant ships have come from South-western Spain. Here there were mines of gold and silver, and Tartessus is expressly named as affording the latter mineral (Strabo, iii, 1, 2; Diod. Sic. v, 35). Tin was brought by the Phoenicians from Britain into Spain, and thence carried to the Oriental markets. According to Diodorus Siculus (v, 39), tin was procured in Spain also, as well as lead, according to Pliny (Hist. Nat. iii, 4). Pliny's words are forcible: "Nearly all Spain abounds in the metals—lead, iron, copper, silver, gold." We add one or two corroboration of the above identification. Heeren (Ideas, ii, 64) translates Ezek. xxviii, 12, "whence ships were the chief object of thy merchandise; thou (Tyre) wast a full city, and was honored on the seas." The Phoenicians were as eager in their quest of gold and gold countries as were the alchemists and the Europeans of the 16th century. The lust for gold urged them over the deserts of Arabia and the cliffs of the Red Sea as far as Yemen and Ethiopia; and the same passion carried them westwardly to the coasts of Spain and the Pillars of Hercules. "Spain," says Heeren, "was once the richest land in the world for silver; gold was found there in great abundance, and the baser metals as well. The silver mountains were in those parts which the Phoenicians comprised under the general name of Tartessos, or Tarshish. The immeasurable influence of precious metals which, on their first arrival, they found here so astounded them, and the sight thereof so wrought on the imagination of the people, that fact called fable to its aid, and the story gained currency that the first Phoenician colonists not only filled their ships with gold, but made thereof their various implements, anchors not excepted." See Commerce.

In the absence of positive proof, we may acquiesce in the statement of Strabo (iii, 148) that the river Betis (now the Guadalquivir) was formerly called Tartessos, that the city Tartessus was situated between the two arms by which the river flowed into the sea, and that the adjoining country was called Tartessia. But there were two other cities which some deem to have been Tartessos: one, Gadir, or Gadira (Caldea) (Sallust, Frugam. iii, ii; Pliny, Hist. Nat. iv, 96; and Avienus, Descript. Orb. Terr. p. 614); and the other, Carticia, in the Bay of Gibraltar (Strabo, iii, 151; Ptolemy, ii, 4; Pliny, iii, 5; Melia, ii, 6). Of the three, Carticia, which has found a learned supporter at the present day (Erach and Gruber, Encyclop. s. v.), seems to have the weakest claims, for, as best I can gather, neither name was extant, Tartessus is placed beyond the Columns of Hercules (Herodotus, iv, 152); and in a still earlier fragment of Stesichorus (Strabo, iii, 148) mention is made of the river Tartessus, whereas there is no stream near Carticia (= El Roccadillo) which deserves to be called more than a rivulet. Strictly speaking, the same objection would apply to Gadir; but, for poetical uses, the Guadalquivir, which is only twenty miles distant, would be sufficiently near. It was, perhaps, in reference to the claim of Gadir that Cicero, in a letter to Atticus (vii, 8), jocosely calls Balbus a native of that town, "Tartessium istum tuum." But Tartessus was likewise used by poets to express the extreme west where the sun set (Ov. Metam. xiv, 416; Silius Italicus, x, 338; comp. id. iii, 399). See Smith, Dict. of Class. Geog. s. v. "Tartessus." See, in addition to the works cited by Bochart and Winer, *sup. sup.* the Journal of Soc. lit. Oct. 1851, p. 226 sq.

5. (A. V. "beryl"). A precious stone, so called as brought from Tarshish, as Ophir is also put for the gold brought thence (Exod. xxviii, 20; xxix, 18; Ezek. i, 16; x, 9; xxviii, 13; Cant. v, 14; Dan. x, 6). The Sept., followed by Josephus, makes it the "chrysolite," i.e. the topaz of the moderns, which is still found in Spain: so Braun, De Vestitu Sacror. ii, 17. Others suppose it to be "amber," but this does not agree with the passages in Exodus, which make the Tarshish to have been one of the engraved stones of the high-priest's breastplate. See Beril.

TARSUS (Τάρσος), the chief town of Cilicia, "no mean city" in other respects, but illustrious to all time as the birthplace and early residence of the apostle Paul (Acts ix, 11; xii, 39; xxi, 3). The only other passages in which the name occurs are Acts ix, 30 and xi, 25, which give the limits of that residence in his native town which succeeded the first visit to Jerusalem after his conversion, and preceded his active ministerial work at Antioch and elsewhere (comp. xxi, 21 and Gal. i, 21). It was during this period, no doubt, that he planted the Gospel there, and it has never since entirely died out. There is little doubt that Paul was there also at the beginning of his second and third missionary journeys (xxiv, 41; xviii, 23). See PAUL.

Tarsus was situated in a wide and fertile plain on the banks of the Cydnus, the waters of which are famous for the dangerous fever caught by Alexander when bathing, and for the meeting of Antony and Cleopatra. The river flowed through it and divided it into two parts. Hence it is sometimes by Greek writers called Tauroi in the plural, perhaps not without some reference to a fancied resemblance in the form of the two divisions of the city to the wings of a bird. This part of Cilicia was intersected in Roman times by good roads, especially one crossing the Taurus northward by the "Cilician Gates" to the neighborhood of Lystra and Iconium, the other joining Tarsus with Antioch and passing eastward by the "Amanian" and "Syrian Gates." Tarsus was founded by Sardanaapalus, king of Assyria. The Greeks, however, claimed a share in its colonization; and Strabo (xiv, 673) has preserved an ancient legend of certain Argives having arrived there with Tripodemus in search of Io. It appears first in authenti
city history in Xenophon's time, when it was a city of some considerable consequence (Anab. i, 2, 28). It was occupied by Cyrus and his troops for twenty days and given up to plunder. After Alexander's conquests had swept this way (Q. Curt. iii, 5) and the Seleucid kingdom was established at Antioch, Tarsus usually belonged to that kingdom, though for a time it was under the Ptolemies. In the civil wars of Rome it took Cesar's side, and on the occasion of a visit from him it had its name changed to Julipolis (Cesar, Bell. Alex. 66; Dion
TARSUS

CAS. XLVII, 26). Augustus made Tarsus free (Appian, Bell. Civ. v, 7). This seems to have implied the privilege of being governed by its own laws and magistrates, with freedom from tribute; but did not confer the jus coloniarum nor the jus civitatis; and it was not, therefore, as usually supposed, on this account that Paul enjoyed the privilege of Roman citizenship. Tarsus, indeed, eventually did become a Roman colony, which gave to the inhabitants this privilege; but this was not till long after the time of Paul (Deyling, Observat. Sacr. iii, 391 sq.). See Citizenship; Colony. We thus find that the Roman tribune at Jerusalem ordered Paul to be scourged, though he knew that he was a native of Tarsus, but desisted on learning that he was a Roman citizen (Acts ix, 11; xxii, 89; xxiii, 24, 27). We ought to note, on the other hand, the circumstances in the social state of Tarsus, which had, or may be conceived to have had, an influence on the apostle's training and character. It was renowned as a place of education under the early Roman emperors. Strabo compares it in this respect to Athens and Alexandria, giving, as regards the zeal for learning shown by the residents, the preference to Tarsus (xiv, 673). Some distinguished names adorn its annals; among others, Athenodorus, the tutor of Augustus, and Nestor, the tutor of Marcellus, the nephew of Augustus; Artemidorus and Diodorus, celebrated grammarians, and Dionysides, a tragic writer. Tarsus, also, was a place of much commerce, and Basil describes it as a point of union for Syrians, Cilicians, Isaurians, and Cappadocians (Ep. Euseb. Samos. Episc.). Owing to its commercial advantages, Tarsus continued to flourish under the Roman emperors, until it fell into the hands of the Saracens. It was taken from them after a memorable siege by the emperor Nicephorus, but soon afterwards restored to them. In the time of Abulfeda, that is, towards the end of the 13th and beginning of the 14th century, Tarsus was still large and surrounded by a double wall, and in the occupation of Armenian Christians (Tab. Syriac, p. 153). It still survives, though greatly reduced, under the modern name Terni. Kinneir, who spent a week in Tarsus, states (Travels, p. 121) that hardly a vestige of the former magnificence of Tarsus remains; nor does, perhaps, the modern town occupy one fourth part of the area of the ancient city. He observed a few ancient ruins, but not a single inscription or any monument of beauty or art. The houses are intersected by gardens and orchards; they seldom exceed one story in height, are flat-roofed, and the greater part of them are constructed of hewn stone, to furnish which the more ancient edifices have been levelled with the ground. The inhabitants amount to about thirty thousand souls, mostly Turks and Turcomans. The adjoining villages are chiefly inhabited by Greeks, who prefer agricultural pursuits to a town life. The sea is not visible from the town. The Cydnus is there about forty yards wide, and small canals are cut from it for irrigation.

See Heumann, De Claris Tarsensatis. (Göttingen. 1748); Altmann, Exerc. de Tarso (Bern. 1731); Zeichich, Syu-muera Antig. Tarsena. (Viteb. 1760); Mannert, ii, 97 sq.; Rosenmüller, Bibl. Geogr. iii, 38; Beaufort, Karavanà. p. 275; Irby and Mangles, Travels, p. 502-506; Belsey,
Tartak (Heb. Tartak, תַּרְתָּק; Sept. Θαρτάκ; Vulg. Tharthac), one of the gods of the Avite, or Avvite, colonists who were planted in the cities of Samaria after the removal of the tribes by Shalmaneser (2 Kings xviii, 31). According to the Jewish tradition, Tartak is said to have been worshipped under the form of an ass (Talm. Babyl. Sanhedrin, fol. 63 b). From this it has been concluded that this idol was the Egyptian Typho; but, though in the hieroglyphics the ass is the symbol of Typhon, it was from being regarded as an object of worship that it was considered absolutely unclean (Plutarch, Is. et Or. c. 14). A Persian or Pehlevi origin has been suggested for Tartak, according to which it signifies either "intense darkness," or "hero of darkness," or the underworld, and so, perhaps, some planet of ill-luck, as Saturn or Mars (Gesenius, Thesaurus Hebr. et Chaldæ. s. v.). Tartak is represented in the Persian Gulf as a warlike race on the Persian Gulf, worshipped Mars alone of all the gods, and sacrificed an ass in his honor (Strabo, xv, 727). Perhaps some trace of this worship may have given rise to the Jewish tradition.

Tan-tan (Heb. Tartan, תַּרטָן; Sept. Θαράς; Vulg. Tharthan), which occurs only in 2 Kings xviii, 17 and Isa. xx, 1, has been generally regarded as a proper name (Gesenius, Lex. Heb. s. v.). Winer assumes, on account of the identity of the name, that the same person is intended in the two passages (Realen, s. v.). Recent discoveries make it probable that in Tartan, as in Rabbais and Rabshakeh, we have not a proper name at all, but a title or official designation, like Pharaoh among the Egyptians, or Surenas among the Parthians (Tacit. Ann. vi. 42). The Assyrian Tartan is a "general," or rather, a chief. It seems as if the Greek translator of 2 Kings had an inkling of the truth, and therefore prefixed the article to all three names, which he very rarely prefixes to the names of persons where they are first mentioned. If this be the true account of the term Tartan, we must understand the thing xviii, 17, and the第七xviiii, 17, the latter sent "a general," together with his "chief eunuch" and "chief cup-bearer," on an embassy to Hezekiah, and in Isa. xx, 1 that "a general"—probably a different person—was employed by Sargon against Ashdod, and succeeded in taking the city. See TAMBURE.

Tascookricutes (Τασκοκρύγυτα, Τασκοκρύγυτον), from the wooden mallet or club and ήδους, nose, in Ephesians, Har. 48, n. 14), a heretical sect of Galatia (Hieron. Comm. in Ep. ad Gal.) belonging probably to the 4th century, are by some included among the Gnostic of the school of Mark [see MARCUS THE HERESIARCH], e. g. by Theodoret, Heret. Fug. 1. 5, 10, and by others among the Montanists, e. g. by Epiphanius, ut sup. The term is unquestionably a nickname, applied to these heretics because they were accustomed during prayer to place a finger to the nose or mouth like a pole, at the same time observing the profoundest silence. See Augustine, De Heres. 65; Philastri. Heres. 76; and Epiphanius. Theodoret says that they ridiculed the sacraments, rejected the creeds, repudiated all revelation; and others charge them on a denial of the incarnation. Their assemblies were legally prohibiting after the 4th century, but traces of them are seen in Theodore Studita in the 9th. They are by some supposed to be identical with the Passaquichyphites—Herzog, Real-Encyklop. s. v.

Tasmania, formerly Van Diemen's Land, is a considerable island in the South Pacific Ocean, lying between 40° 40' and 43° 40' south lat., and 144° 30' and 148° 30' east long., at the south of, and separated from Australia by Bass's Strait. Its greatest length from Cape Grim on the north-west to Cape Pillar on the south-east is 240 miles, and its greatest breadth from east to west 200 miles. Its area, including the adjacent islands, is about 26,000 square miles. Its capital is Hobart-Town, with a population of 19,000. In 1870 the total population of Tasmania was 93,829.

I. History. — Tasmania was first discovered by Tasman, Dec. 1, 1642, and named by him Van Diemen's Land in honor of his patron, the then governor of the Dutch West Indies. In 1608 Lieut. Bowen was despatched from Sydney with a few soldiers and convicts to form a settlement in the south of the island, which was finally abandoned, 1798, by the capture of the settlement by the French.

From 1817 commenced a rapid increase in the number of free settlers; and in 1825 Tasmania was declared independent of New South Wales. The transportation of convicts ceased in 1855, and on Jan. 4, 1866, on petition of the Legislative Council to the home government, the name of the colony was officially changed to Tasmania. Of the 3000 aborigines found in the country the number rapidly decreased, until now not one remains.

II. Climate, Soil, etc. — The climate of Tasmania is fine and salubrious; the mean temperature of the hottest month (January) is 68° 57', of the coldest (July) 45° 82', and of the whole year 54° 92'. The agricultural lands may be divided into three classes—alluvial deposits, tertiary clays, and loamy soils. In their virgin state some of the lands are marvellously productive; but in many cases, through improvident management, the soil has deteriorated.

III. Administration. — Since the passing of the Constitution Act in 1854, the governing authority has been vested in a Parliament, consisting of the governor, as the queen's representative, and two elective Houses—the Legislative Council of fifteen, and the Assembly of thirty, members. The qualification of voters is, for the former, a freehold of the annual value of fifty pounds, and, for the latter, a freehold valued at one hundred pounds or a ten pounds rental.

IV. Religion and Education. — By the Constitution Act, fifteen thousand pounds is annually reserved for the support of religion, and is at present divided among various religious denominations according to their respective numbers at the census. They were, in 1870: Church of England, 53,047; Roman Catholic, 22,091; Presbyterians, 9064; Wesleyans, 7187; Independents, 3581; Baptists, 501; Jews, 292. For the support of elementary education five thousand two hundred pounds is appropriated by Parliament, the disbursement of which is intrusted to a Central Board holding its sittings at Hobart-Town. The teachers are appointed by the board, and are under the supervision of the inspector of the schools. There were, in 1873, 141 public schools; 10,883 pupils, with an average attendance of 1047; 105 male teachers, 108 female teachers, and 32 pupil teachers. There are four superior schools—Horton College, High-school, Hutchins's School, and the Church Grammar-school.

The sports of the Wesleyan missionaries in Tasmania have been directed mainly to the English population. The mission was begun in 1820 by the Rev. Mr. Horton, who was on his way to New South Wales. The mission was approved by the governor of the colony; and another missionary was soon sent out, who was followed by two more in 1827, and by a fifth in 1828. The following is the report of the mission for 1875: Chapels and other preaching places, 95; missionaries and assistants, 16; local preachers, 70; full members, 1286; persons on trial, 202; Sunday-schools, 47; teachers, 401; scholars, 3076; attendants on worship, 9176. The United Methodist Free Church mission for 1875: Principal stations, 4; ministers, 4; members, 223.

The United Methodist Free Churches had, in the same year, 3 lay agents and 38 members. See TASSCHEMACHER (Dutch, Tassenmaeker),
Tassel

Perrins, one of the earliest ministers of the Reformed (Dutch) Church in the United States, was born in Holland, and educated at the University of Utrecht. He was settled in the United States first at Kingston, N.Y., in 1676–77, then went to Dutch Guiana, S.A., 1677–78, and in 1679–80 he finds him at New Amstel, now New Castle, Del. Here difficulties arose which induced him to leave this place, and he supplied the Church on Staten Island occasionally, 1682–83. In 1684 he took charge of the Church at Schenectady, N.Y., which he retained until his death. Meantime, in 1684, as the records show, he organized the Church at Hackensack, N.J., with thirty-three communicants. He was never there long enough to make these occasional visits, to preach and receive members and dispense the Lord's supper, until 1789. This service must have cost him then much time and labor; but in this apostolic method of journeys and visitations many of the old churches were planted and sustained in their primitive worship. At Schenectady Mr. Tasschemacher was the first pastor, although the Church was probably organized before he went to them. He was the most prominent victim of the Indian massacre and burning of that city, Feb. 8, 1690. "The French, in order to control the Indian trade, had planned the capture of Albany. . . . The project was not wholly carried out; but a party of French and Indians left Montreal, and, proceeding by way of Lake Champlain, intended attacking Albany. But, the Indians not consenting, they turned off towards Schenectady. They gave orders that Tasschemacher's life should be saved on account of the information they could obtain from him; but his house was not known, and before he could be personally recognized he was slain and his house and papers burned. His head was cloven open and his body burned to the shoulder-blades. Sixty persons lost their lives on that fatal Sabbath night; people there believed that their Church on themselves from their stealthy and cruel foes. The remnant that escaped kept the Church of Schenectady alive. Without a pastor to instruct them, they met for worship amid the ruins of the city, chose their elders and deacons from year to year, who were ordained by the Rev. Godfriedus Dellius, of Albany, and his successor, Rev. Petrus Van Dresseden, until, in 1702, the little flock thus kept alive, and having gained in numbers and strength, called the Rev. Bernardus Freeman and received him as their pastor. Little more is known of Mr. Tasschemacher's history. He died a martyr among his people, and left a desolate Church amid the perils amid which the Gospel was preached and churches were established in their early days upon the frontier. See Corwin, Manual of the Ref. Church, p. 486. (W.J. R.T.)

Tassell. In mediaval times the sacred vestments of the ministers of the Church were adorned with tassels, to which, in the case of Balmaci and tunicus, balls of crystal were attached. The word also denotes a thin plate of gold or silver worn on the back of the cope and episcopal gowns.

Tate, Nahum, a well-known psalmist, was born in Dublin, Ireland, in 1652, and at the age of sixteen was admitted to Dublin College, but does not appear to have followed any profession. He succeeded Sheppard as a poet and song-writer about 1671, and died at the time of the tilting of death, which happened Aug. 12, 1715, in the Mint, where he resided as a place of refuge from his creditors. He was the author of nine dramatic performances and a large number of poems; but is at present better known for his Psalms, in which he was joined by Dr. Brady. For a complete list of his works see Libride, Dict. of Brit. and Amer. Authors, s. v.; Chalmers, Biog. Dict. s. v. See Psalmody.

Tatian, a notable Christian writer of the 2d century, was a native of Assyria, though Clemens Alexandrinus and later fathers term him a Syrian. He had mastered the Graeco-Roman culture of his day, largely through extended travels; and his reading was very wide, no fewer than ninety-three classic authors being referred to in his works. In the course of his wanderings as a scolding rhetorician he came to Rome, at that time the great centre for all intellectual interests and tendencies, and there turned his attention to Christianity. To justify this new religion, he wrote a work in which he confuses himself a convert to the barbarian philosophy of the despised sect, and invites his contemporaries to examine it, that they too might observe the astonishing contrasts it presents, with its simplicity and its clearness, to the darkness of the heathenism of the others that are so much more associated with Justin, perhaps as a pupil; but he soon became himself a teacher of Christianity. His attitude was apologetic, and necessarily involved the most marked antagonism to paganism. Stern and even harsh in his morality, he could realise no truth in heathen philosophy, and feel no sympathy, even though but of a scientific or aesthetic nature, with heathen life and culture. To him, as to his contemporary Christians, the belief in one God was of the highest moral significance. The loss of this faith, he taught, had exposed the soul of man to the rule of the dark powers of material nature. This plan did not wholly carry out; but a party of French and Indians left Montreal, and. proceeding by way of Lake Champlain, intended attacking Albany. But, the Indians not consenting, they turned off towards Schenectady. They gave orders that Tasschemacher's life should be saved on account of the information they could obtain from him; but his house was not known, and before he could be personally recognized he was slain and his house and papers burned. His head was cloven open and his body burned to the shoulder-blades. Sixty persons lost their lives on that fatal Sabbath night; people there believed that their Church on themselves from their stealthy and cruel foes. The remnant that escaped kept the Church of Schenectady alive. Without a pastor to instruct them, they met for worship amid the ruins of the city, chose their elders and deacons from year to year, who were ordained by the Rev. Godfriedus Dellius, of Albany, and his successor, Rev. Petrus Van Dresseden, until, in 1702, the little flock thus kept alive, and having gained in numbers and strength, called the Rev. Bernardus Freeman and received him as their pastor. Little more is known of Mr. Tasschemacher's history. He died a martyr among his people, and left a desolate Church amid the perils amid which the Gospel was preached and churches were established in their early days upon the frontier. See Corwin, Manual of the Ref. Church, p. 486. (W.J. R.T.)
TATIANI EVANGELIUM

Tauler

Tauf, Johann, the famous Dominican preacher and mystic, was born at Strasbourg in A.D. 1290—though authorities differ with respect to both time and place. He was of honorable family and early devoted to the priestly office. In (about) 1308 he became a monk and went to Paris, to the College of St. James, to study theology. He found greater pleasure in the study of the writings of the Areopagite St. Bernard, and the two Victors, and especially of Augustine, than in the popular philosophy; his attention was also given to the Neo-Platonists, and, among schoolmen, to Aquinas with respect to ethics. On his return to Strasbourg, Tauler came under the influence of Master Eckart, and also of a more simple and practical company of mystical thinkers among the monks, including Nicholas of Strasburg and others. He became a preacher, and associated himself with the friends of God—a monk formed to tears, and comfort the people upon whom rested the ban of the Church imposed by pope John XXII; and in this society he labored all his life. His sermons were clear and adapted to the popular needs, but not, it would seem, at this time pervaded by the power of a personal union of the preacher with God. In 1340 occurred an event of decisive importance to Tauler. He was then visited by Nicholas of Basle (q. v.), and by him led to realize his need of a personal conversion to God. During two years, in which he refrained from preaching and became an object of ridicule to his fellow-monks, who were unable to understand the reason for such struggles as he was passing through, did he wrestle with his sense of sin and his need of pardon. Finding peace at length, he passed through further discipline by reason of a disgraceful failure in an attempt to preach; but from that time he preached persistently, and with a power not previously possessed. Wicked clergymen were unable to endure the faithful rebukes with which he visited their sins, and they professed him from preaching; but the magistracy prevented the enforcement of their order. Under the preaching of the first sermon after his conversion a number of persons fell down as dead, and he was besought to continue the sermon. He was one of the few who refused to cease from preaching to the people in obedience to the papal interdict, and bravely the anger of his immediate superiors in the execution of that duty. In 1348 the "black death" swept over Strasburg, carrying off sixteen thousand victims, and Tauler, adding to his own itinerancy, went to Paris and two other monks had pity upon the people, and they appealed in writings (whose circulation was at once prohibited) to the other clergy to do what they
could that the "poor ignorant populace should not thus die under the ban." Charles IV soon afterwards came to Strasbourg and caused the three monks to be brought before him. He committed to the care of that friar who had dismissed them with the admonition not to "offend against the Church and its interdict again." Tauler retired to Cologne, and became preacher in the nunnery of St. Gertrude, but after a few years returned to Strasbourg, where he had last a visit with Nicholas of Basle. He committed to the care of that friar two of the writings he wished to have given to the world, and died June 16, 1361. He was buried in his convent, and the stone which covered his grave is preserved in the "New Church" of Strasbourg.

Tauler's works consist of sermons, homilies, and an *Imitation of the Life of Christ in Its Poverty*. The sermons are extant in manuscript in several libraries, the oldest MS. being a parchment at Strasbourg. In printed form the first ed. appeared at Leipzig, 1498, in 4to, and others at Augsburg (1506, fol.) and Basle (1521 and 1522, fol.), the latter being superior to the former. Of modernized editions that of Frankfort (1826, 3 pts. 8vo) is best. The *Imitation of Christ* also exists in different MSS. and editions, the best ed. being that of Schlosser (Frankf. 1838, 8vo). A number of other writings are attributed to Tauler, but without authority.

The teachings of Tauler are not presented in his works in systematic form. His aim was practical, and the edifying element predominates over the speculative in his theology. As with Eckart, the speculative ideas may be traced back to the concept *Becoming*—the absolute, simple, uncreated entity, which involves neither distinctions nor relations, and which no name is adequate to express. It is the hidden Deity, whose nature requires, however, revelation and operation. Revelation is the process of the Trinity; operation, with the Deity, is begetting. Hence the Deity in operation becomes Father, as he knows himself, and in that act of knowledge expresses himself, the word which he speaks being the Son. Between them exist reciprocal approval and love, and this love is the Holy Spirit, proceeding from both the Father and the Son. This conception of the Trinity evidently involves a distinction of relations rather than of *hypostases* in the Godhead. The Son is eternal. With reference to the creation, Tauler comes very near to the teachings of pantheistic monotheism, but nevertheless preserves the distinction between the Creator and the creature, and was constantly opposed to the teachings of the Beghards and Brethren of the Free Spirit. The human soul came forth from God, and contains a divine spark, in which the Trinity is reflected, and which does not, however, return to God until the sensual part of man yearns for the creature world. Sin consists in giving way to the latter impulse. It cannot wholly deprive the soul, which is at bottom noble and in harmony with the good, of its yearning for reunion with God; but man possesses in himself no power to return to God. Righteousness can be recovered only through faith in the merits of Christ. Meditation on the work and imitation of the life, especially the sufferings, of Christ form the way by which to return to God. This imitation should be outward, but also inward, transforming him, and, after ingrafting them into their principles, superior to all creature control; God enters in with all his blessing, and supplies the place of grace with his immediate operation. As the soul becomes, in this way, "free from grace," so it also becomes "free from virtue," i.e. it no longer practices an isolated virtue, but, with a burning desire, seeks to interweave all of them and with love, he seeks to love, he knows how to love, he won him all virtues as the outflow of that love. No idle contemplation or passive asceticism finds the approval of Tauler, but a life of active love and pity, of patience and meekness—a life in the imitation of Christ. Tauler did not contradict the doctrines of his Church, but he sought to interpret them in an exalted manner. A mysticism displayed a free, practical, evangelical tendency which has given it historical importance; and we may appropriately retain for him the title, early bestowed, of *Doctor Illuminatus*.

**Tausan** (or *Tagesen*), Johann, a Danish Reformer, was born at Birkinde, island of Fünen, in 1494; and was educated at Aarhus. Appointed as *Domesman* to a monastery, he entered the convent of the Order of St. John of Jerusalem at Antworskow, where he became acquainted with the writings of Luther. He visited Wittenberg, and formed the acquaintance of Melancthon. Returning to his native country, he delivered lectures on theology in the University of Copenhagen, and in 1524 avowed himself a disciple of Luther. After being expelled from one convent and imprisoned in another, he was, in 1526, appointed chaplain to Frederick I, king of Denmark; and in 1529 was appointed to the Church of St. Nicholas at Copenhagen, where he remained till 1537. He was then appointed to the bishopric of Haldeskil, and in 1542 was made bishop of Ripen, and died in 1561. He published several theological treatises, some Danish hymns, and a Danish translation of the Psalms. See *Hook, Eccles. Biog. s. v.*; Jücher, *Geschichte der litur. u. d. v. 1030.

**Tav.** See *Alpharet*.

**Tavern.** See *Three Taverns*.

**Taverner, Richard,** a learned and pious layman, was born at Brilsley, England, in 1505. He is said to have studied at Corpus Christi College, Cambridge, and afterwards at Oxford, and then law in the Inner Temple. Having been appointed one of the keepers of the signet in 1537, he held that office until the reign of Queen Mary. He was a friend of the Reformation, and, in order to promote it, undertook a new translation or edition of the English Bible (Lond. 1539, fol.). It was dedicated to the king and allowed to be read in the churches; but in 1545 the Romish bishops committed him to the Tower. He was, however, soon released, restored to the king's favor, and elected a member of Parliament in 1545. Taverner's edition of the Bible is a correction of what is called Matthew's Bible, many of whose marginal notes are adopted, many omitted, and others inserted by the editor. In 1543 Edward, king Edward, Taverner, although a layman, received a special license in 1532 to preach throughout the king's dominions, from which he was obliged to desist upon the accession of Queen Mary. He resumed his preaching when Elizabeth came to the throne, and, besides receiving other commissions, was made high sheriff of Oxford County in 1569. He died July 14, 1575. Besides his Bible, we have the following list of his publications: *The Sum and Fith of C.L. Psalms of Daved*, etc. (Lond. 1589, 8vo).—*The Epistles and Gospels, with a Brief Postill*, etc. (ibid. 1546, 2 pts. 4to).—*A Key of Faith*, etc. (ibid. 1589, 12mo).—*The Garden of Wine*, etc. (ibid. 1589, 2 bks.).—*Flores aliquot Sententiarum ex Varia Scriptoribus* (translatus from Erasmus):—*Catonia Disticha Moralia* (ibid. 1558, 8vo; 1555, 4to).—*In Minum Publicum Lib. I* (ibid. 1562).—*Catechismus Peditum*;—*Proverbs, or Aages* (ibid. 1546, etc.). See *Matthew Henry's Corpus Christi College; Ward, Graham Professors; Newcome, English Biblical Translations; Chalmers, Biog. Dict. s. v.* See Authorized Version.

**Tavthie,** the Babylonian name for "the mother of the gods," thought to be the same as *Tatamutu or Tatha*, "the sea."

**Tawala,** in Slavonic mythology, was a god of the fields, bestower of blessings, worshipped by the Poles.

**Tawbutte,** a talbot (i.e. a hunting dog), frequently used in medieval heraldic devices. In an inventory of church goods at Easington, Oxford, is the follow-
ing: "Item, a vestment powdered with stars and taw-
buttes."

Tawdry, a name given to the necklace worn of old by English peasant girls, in memory and honor of St. Etheldreda, or Awdry, patroness of the diocese of Ely, who, after she had become religious, mourned for the vanity in which she had indulged by wearing gold necklaces.

Tax Hebrew (some form of חֲזָאָה, to arrange). Taxes of some kind must have been coeval with the origin of civilized society. The idea of the one is involved in that of the other. The whole, society, as every organization, implies expense, which must be raised by the abstraction of property from the individuals of which it consists, either by occasional or periodical, by self-imposed or compulsory, exactions. In the history of Is-
rael, as of other nations, the student who desires to form a just estimate of the social condition of the people must take into account the taxes which they had to pay. According as these are light or heavy may vary the happiness and prosperity of a nation. To them, though lying in the background of history, may often be traced, as to the true motive power, many political revolutions. We find the name of Tawdry among the names of Assyria, the commercial com-
merce of the Mosaic polity. Taxes, like all other things in that polity, had a religious origin and import. While the people were in the migratory stage during their marches through the desert, only such incidental taxes were levied, or rather such voluntary contribu-
tions, as were received, as the exigencies of the time de-
manded. It was not till their establishment in Canaan that taxation assumed a regular and organized form. We propose, therefore, in the following article (which treats only of public and private imposts) to consider the subject chronologically from that point. See As-
sumption.

I. Under the judges. According to the theocratic govern-
ment contemplated by the law, the only payments obligatory upon the people as of permanent obligation were the tithes (q.v.), the first-fruits (q.v.), the redemption-
money of the first-born (q.v.), and other offerings as belonging to special occasions. See Purim. The payment by each Israelite of the half-shekel as "a tone-
ment-money" for the service of the tabernacle, on taking the census of the people (Exod. xxx, 13), does not ap-
pear to have had the character of a recurring tax, but to have been supplementary to the free-will offerings of Exod. xxv, 2, 4, 19, 23, the expense of (se con-
struction of the sacred tent. In later times, indeed, af-
fter the return from Babylon, there was an annual pay-
ment for maintaining the fabric and services of the Temple; but the fact that this begins by the voluntary com-
 pact to pay one third of a shekel (Neh. x, 30) shows that still then there was no such payment recognised as necessary. A little later the third became a half, and under the name of the dirachma (Matt. xvii, 24) was paid by every Jew, in whatever part of the world he might be living (Josephus, Ant. xviii, 9, 1). From the Talmudic tract Shekalim (Mishn. ii, 4), the time of payment appears to have been between the 15th and the 25th of the month Adar, that is, in March. After the destruction of the Temple, this dirachma was ordered by Vespasian to be paid into the Capitol, "as," says Josephus, "they used to pay the same to the Temple at Jerusalem" (War, vii, 6, 6). During the prosperity of Palestine, large sums were thus collected in Babylonia and other Eastern cities, and were sent to Jerusalem un-
der a special escort (Josephus, Ant. loc. cit.; Cicero, Pro Flacco, c. 28). We have no trace of any further taxa-
tion than this during the period of the judges. It was not in itself heavy: it was lightened by the feeling that it was paid in the service of a holy temple. In such act, the people secured the celebration of their worship, and the presence among them of a body of men acting more or less efficiently as priests, judges, teachers, perhaps also as physicians. We cannot wonder that the people should afterwards look back to the good old days when they had been so lightly burdened.

II. Under the monarchy, its centralized government and greater magnificence involved, of course, a larger expenditure, and therefore a heavier taxation. This may have come, during the long history of the king-

...
The influence of Ezra secured for the whole ecclesiastical order, from the priests down to the Nethinim, an immunit
ized from all taxation and, less than 70 years later, these burdens and corvée were pressed heavily on the great body of the people, and they complained bitterly both of this and of the Ḥaggah, or forced service, to which they and their cattle were liable (Neh. ix. 37). They were compelled to mortgage their vineyards and fields, borrowing money at twelve per cent, the interest being payable apparently either in money or in kind (v. 1-11). Failing payment, the creditors exercised the power (with or without the mitigation of the year of jubilee) of seizing the persons of the debtors and treating them as slaves (ver. 5; comp. 2 Kings iv. 1). Taxation was levied also on such property as was in use these same regions, the settled policy of whose government has ever been to grind the people by the utmost extent of extortion, peculation, and espionage, in all the grades of official administration.

IV. Under the Egyptian and Syriac kings the taxes paid by the Jews became yet heavier. The "farming" system of finance was adopted in its worst form. The Persian governors had been obliged to pay a fixed sum into the treasury. Now the taxes were put up to auction. The contract sum for those of Phoenicia, Judea, and Samaria had been estimated at about 9000 talents. An unscrupulous adventurer (e.g. Joseph, under Ptolemy Euergetes) would bid double that sum, and would then go down to the province, and by violence and cruelty, like that of Turkish or Hindū collectors, squeeze out a large margin of profit for himself (Josephus, Ant. xii. 1-5).

Under the Syrian kings we meet with an ingenious variety of taxation. Direct tribute (πιθος), an excise duty on salt, crown-taxes (πιθος), golden crowns, or their value, sent yearly to the king), one half the produce of fruit-trees, one third that of corn land, a tax of some kind on cattle: these, as the heaviest burdens, are mentioned last in the decree of the king. In these respects remissions were made (1 Macc. x. 29, 30; xi. 36). Even after this, however, the golden crown and scarlet robe continue to be sent (xiii. 39). The proposal of the apostate Jason to farm the revenues at a rate above the average (400 talents, while Jonathan [xi. 28] pays 800 only), and to pay 150 talents more for a license to open a circus (2 Macc. iv. 9), gives us a glimpse of another source of revenue. The exemption given by Antiochus to the priests and other ministers, with the deduction of one third for all the residents in Jerusalem, was apparently only temporary (Josephus, Ant. xii. 5, 3).

V. Roman taxation, in its pressure, if not absolutely heavier, was probably more galling, as being more thorough and systematic, and more distinctly a mark of bondage. The capture of Jerusalem by Pompey was followed immediately by the imposition of a tribute, and within a short time the sum thus taken from the resources of the country amounted to 10,000 talents (Josephus, Ant. xiv. 4, 4, 5). The decrees of Julius Caesar showed a characteristic desire to lighten the burdens that pressed upon the subjects of the republic. The tribute was not to be farmed. It was not to be levied at all in the sabbatic and festival years, and following the same years that followed (ibid. xiv. 10, 5. The people, still under the government of Hyrcanus, were thus protected against their own rulers. The struggle of the republican party after the death of the dictator brought fresh burdens upon the whole of Syria, and Cassius levied not less than 70 talents of gold. The burden was already heavy as might be expected from his lavish expenditure, in public buildings, the taxation became heavier. Even in years of famine a portion of the produce of the soil was seized for the royal revenue (ibid. xv. 9, 11), and it was not till the discontent of the people became formi
dable that he ostentatiously diminished this by one third (ibid. xv. 10, 4). It was no wonder that when Herod wished to found a new city in Trachonitis, and to attract a population of residents, he found that the most effective bait was to promise immunity from taxes (ibid. xvii. 2, 1) or that on his death the people should be so loud in their lamentations that he should release them from their burdens, complaining specially of the duty levied on all sales (ibid. xvii. 8, 4).

When Judea became formally a Roman province, the whole financial system of the empire came as a natural consequence. The taxes were systematically farmed, and the publicans appeared as a new curse to the country. See PUBLICAN. The portoria were levied at harbors, piers, and the gates of cities. These were the τελαθ of Matt. xviii, 24; Rom. xiii, 7. In addition to this, there was the κυρος, or poll-tax (Cod. D gives ἐπαράδονος in Mark xii, 10), paid by every Jew, and looked upon, not in any righteous manner, as the payment of a delinquent debt.

It was about the lawfulness of this payment that the rabbins disputed, while they were content to acquiesce in the payment of the customs (Matt. xxii, 17; Mark xii, 18; Luke xx, 20). It was against this apparently that the struggles of Judas of Galilee and his followers were chiefly directed (Josephus, Ant. xviii, 1, 6; War, ii, 8, 1). United with this, as part of the same system, there was also, in all probability, a property
tax of some kind. Quirinus, after the deposition of Archelaus, was sent to Syria to complete the work— begun, probably, at the time of our Lord's birth—of valuing and registering property, and this would hardly have been necessary for a mere poll-tax. See Cai
dinius. The influence of Joazar, the high-priest, led the people generally (the followers of Judas and the Pharisee Sadduc were the only marked exceptions) to ac
quiesce in this measure, and to make the required returns (Ant. xviii, 1, 13), but their resistance continued, and, under Tiberius, they applied for some alleviation (Tacitus, Ann. ii, 42). In addition to these general taxes, the inhabitants of Jerusalem were subject to a special house-duty about this period; Agrippa, in his desire to reward the good-will of the people, remitted it (Josephus, Ant. xvi, 6, 9).

It can hardly be doubted that in this, as in most other cases, an oppressive taxation tended greatly to de
domize the people. Many of the most glaring faults of the Jewish character are distinctly traceable to it. The fierce, vindictive cruelty of the Galileans, the Zealots, the Sicarii, was natural fruit. It was not the least striking proof that the teaching of our Lord and his disciples was more than the natural outbreak of popular feeling—that it sought to raise men to the higher and better region in which all such matters were regarded as things indifferent, and, instead of being so much in the popular impatience of taxation, gave, as the true counsel, the precept "Render unto Caesar the things that are Caesar's;" "To Whom to whom is due, custom to whom custom." See TRIBUTE.

TAX, Clerical. See Taxes.

Taxatio Ecclesiastica. Anciently the first-fruits of all ecclesiastical benefices were paid to the pope. In
ternov, in 1253, gave the same for three years to Henry III, which occasioned a taxation made by Wal
ter, bishop of Norwich, who was delegated to the task by the pope, and under the name of the Two-pence, or the Norwich Taxation, and sometimes Pae Innocentiae Valoris. In 1288 Nicholas IV granted the tenth
TAXES

TAXING

to Edward I for six years towards defraying the expense of an expedition to the Holy Land; and in order to the province of York was made in 1318 by virtue of a mandate directed by Edward II to the bishop of Carlisle, principally because the Scottish invasion had rendered the border clergy unable to pay the tax. Pope Nicholas's taxation is an important record, because all taxes were regulated by it until the valor beneficiorum of Henry VIII. The evidence is collected and the statutes of colleges founded antecedently to the Reformation were interpreted by this criterion, according to which its benefits under a certain value were exempted from the restriction respecting pluralities in the 21st Henry, c. 18. It was published in 1602 by the Record Commission, and the original rolls for many dioceses are still preserved in the Exchequer. In pursuance of an act of Parliament of Henry VIII, commissioners were appointed to inquire "of and for the true and just whole and yearly values of all the manors, lands, tenements, hereditaments, rents, tithe, offerings, emoluments, and other profits appertaining to any archbishopric, bishopric," etc. The result of their inquiries was the Valor Ecclesiasticus, sometimes called the King's Book. It has been published by the Record Commission. In 1647 Parliament issued commissions for surveying all the Crown and Church lands in England, and copies of the surveys returned were deposited in most of the cathedrals, but the originals were destroyed in the great fire of London. In 1835 a report of the ecclesiastical commissioners for England and Wales was laid on the table of both houses of Parliament, which contained the results of their inquiry into the revenues of the Church of England. TAXES, CLERGY EXEMPTED FROM. By the favor of Christian emperors, the clergy were exempt from some of the taxes which were laid upon the rest of the Roman empire. They did not, however, claim this exemption as a divine right, but freely acknowledged it to be owing to the pious munificence and favor of the Christian princes. Baronius does the clergy great injustice in pretending that they claimed a freedom from tribute by the law of Christ; and that no emperor ever imposed any tax upon them except only Julian the Apostate, Valens the Arian, and the younger Valens the Donatist. The case is really under the care of his mother, Justina, an Arian empress (An. 378, iv, 538). Bellarmine asserts (De Clericis, i, 28) that the exemption of the clergy in political matters, whether relating to their persons or their goods, was introduced by human right only, and not by divine. The following is a table of the taxes levied in the empire showing the exemptions of the clergy:

1. Census Capitum (or personal tribute). Clergy exempted.
2. Jugatio, Juga, Capitatio, etc. (tax on lands, etc.). Clergy exempted in all cases.
3. Agraria Tironicum, etc. (soldiers and horses furnished to the emperors). Clergy (probably exempted) in special cases.
5. Matutinum (entertaining emperor or relinue). Clergy exempted.
6. Superindecita et Extraordinaria (or special taxes). Clergy exempted.
7. Road and Bridge Tax. Clergy sometimes exempted.
8. Angaria et Parangaria (conveying corn for the army). Clergy exempted in special cases.
9. Denariusme, or Unciae, and Descriptio Lucraturn (tax paid to the curia of every city). Clergy exempted under Justina.

The clergy were also exempted from all civil personal offices; from all sordid offices (e.g. building and repairing roads, etc.), both predial and personal; and from all curial or municipal offices. In order to check the practice of rich men seeking to avoid taxes by taking orders, Constantine made a law that no rich plebeian who was not a senator was quite. His successor, Constantius, increased the exemptions. By the 12th century, civil offices in any city should become an ecclesiastic. The laws respecting exemption of the clergy were frequently changed, but the above is their general tenor. See Bingham, Christ. Antiq. bk. v, ch. iii.

TAXING is the rendering, in the A. V., of a Greek word, which occurs in two passages, ἀπογραφῶ (Vulg. descriptio, Luke ii, 2; professio, Acts v, 37). The cognate verb ἀπογραφάω in like manner is rendered by "to be taxed" in the A. V., while the Vulg. employs "ut describeretur universus orbis" in Luke ii, 1, and "ut proferenteret singuli" in ver. 3. In Heb. xiii, 29, the word is rendered "taxation"; and the idea is that of the registration of the first-born as citizens of the heavenly Jerusalem, the A. V. has simply "written," the Vulg. "qui conscripti sunt." Both the Latin words used in the two passages first cited above are found in classical writers with the meaning of a registration or a general return of population or property (Cicer. Verr. ii, 8, 47; De Off. ii, 7; Sueton. Ciber. 30). The English word conveys to us more distinctly the notion of a tax or tribute actually levied, but it appears to have been used in the 16th century for the simple assessment of a subsidy upon the property of a community or of the value of the property of the people for the purpose of a poll-tax (Camden, Hist. of Elizabeth). This may account for the choice of the word by Tyndale in lieu of "description" and "profession," which Wycliffe, following the Vulg., had given. Since then "taxing" has kept its ground in most English versions with the exception of "tribute" in the Geneva, and "enrolment" in the Rheims of Acts v, 37. The word ἀπογραφή by itself leaves the question undetermined whether the returns made were of population or property. Josephus, using the words ἀπογραφή τῶν οἰκίασ (Ant. xviii, i, 1) as an equivalent for "registration" till the time the translation speaks included both. That connected with the Nativity, the first step towards the complete statistical returns, was probably limited to the former (Greswell, Harmony, i, 542). In either case "census" would have seemed the most natural Latin equivalent; but in the Greek of the New Test, and therefore probably in the familiar Latin of the period, as afterwards in the Vulg., that word slides off into the sense of the tribute actually paid (Mat. xxiii, 17; xvii, 24). See Census.

Two distinct registrations, or taxings, are mentioned in the New Test., both of them by Luke. The first is said to have been the result of an edict of the emperor Augustus that "all the world (i.e. the Roman empire) should be taxed." (ἀπογραφάς ἔπαιναν τὴν οἰκουμένην) (Luke ii, 1), and is connected by the evangelist with the name of Cyrenius, or Quirinus. The second, and more important (ἀπογραφή, Acts v, 37), is referred to in the report of Gamaliel's speech, and is there distinctly associated, in point of time, with the revolt of Judas of Galilee. The account of Josephus (Ant. xviii, i, 1; War, ii, 8, 1) brings together the two names which Luke keeps distinct, with an interval of several years between them. Cyrenius comes as governor of Syria after the deposition of Archelaus, accompanied by Coponius as procurator of Judea. He is sent to make an assessment of the value of property in Syria (no intimation being given of its extension to the οἰκουμένη), and it is this which rouses Judas and his followers. The name of Cyrenius corresponds to the census and taxings presented by these apparent discrepancies have been discussed, so far as they are connected with the name of the governor of Syria, under CYRENIUS. An account of the tumults caused by the taxing will be found under JUDAS OF GALLEL.
tioned by Strauss (Leben Jesu, i, 28) and De Wette (Comment. ad loc.), and others, who conclude, from var-
ious objections, that this statement belongs not to
not to history; that it was a contrivance, more or less
ingenious, to account for the birth at Bethlehem (that
belief with some reconned necessity for the Messiah)
of one of whose kindred lived, and who himself had grown up at Nazareth; that the
whole narrative of the infancy of our Lord, in
Luke's Gospel, is to be looked upon as mythical.
We summarize these objections, and under each we pre-
sent, within brief limits, what appears to us a sufficient
answer.
1. The foremost ground of objection is that neither
Josephus nor any other contemporary writer mentions
a census extending over the whole empire at this period
(A.U.C. 750). An edict like this, causing a general
movement from the cities to the countries to those in
which, for some reason or other, they were to be
registered, must, it is said, have been a conspicuous
fact, such as no historian would pass over.
On the other hand, it must be remembered that our
history of this portion of the reign of Augustus is de-
ficent and barren. There is no comparability with the
death. Suetonius is gossiping, inaccurate, and ill-ar-
ranged. Dion Cassius leaves a gap from A.U.C. 748
to 756, with hardly any incidents. Josephus does not
profess to give a history of the empire. It might eas-
sily be that a general census, cir. A.U.C. 749-750, should
remain unmentioned. If the census was of
foquent occurrence, it would be the more likely to
be passed over. The testimony of a writer like
Luke, obviously educated and well informed, giving
many casual indications of a study of chronological data
(Luke i, 5; iii; Acts xxiv; 27), and of acquaintance with the
family connection (Acts xi, 26; xxii, 8; Acts xx, 20;
xiii, 1) and other official people (ch. xxiii-xxvi),
recognising distinctly the latter and more conspicuous
ἀπογραφή, must be admitted as fair presumptive evi-
dence, hardly to be set aside in the absence of any evi-
dence from the ancients. How hazardous such an infer-
ce from the silence of historians would be, we may
judge from the fact that there was undoubtedly a geo-
metrical survey of the empire at some period in the
reign of Augustus, of which none of the above writers
take any notice (comp. the extracts from the Res Agra-
Rianus, Sueton. Octar. c. 29; Gessweil. Harm. i, 555).
It has been argued further that the whole province of Augustus
rested on a perpetual communication to the central
government of the statistics of all parts of the empire.
The inscription on the monument of Ancyras (Gruver,
Corpus Inscription. i, 290) names three general censuses in
A.U.C. 727, 746, 767. (comp. Sueton. Octar. c. 28;
Gessweil. Harm. i, 555). Dion Cass. (iv, 13) mentions
another in Italy in A.U.C. 757. Others in Gaul are as-
signed to A.U.C. 727. 741, 767. Strabo (vi, 4, 2) writing
early in the reign of Tiberius, speaks of μια των καθ
ήμερ νυμφην, as if they were common things. In
A.U.C. 726, when Augustus offered to resign his power,
he laid before the senate a "rationarium imperii" (Sue-
ton. Octar. c. 28). After his death, in like manner, a
"breviarium totius imperii" was produced, containing
full returns of the population, wealth, resources of all
parts of the empire, a careful digest apparently of facts
collated during popular tribunals as a rule (ibid. 101;
Dion Cass. iv; Tacitus, Am. i, 11). It will hardly escape
strange that one of the routine official steps in this
process should only be mentioned by a writer who, like
Luke, had a special reason for noticing it. A census,
involving property - returns, and the direct taxation
collected thereupon in popular tribes as a rule, would
not be anticipated by Luke, and the mention of the
sequence of such steps would not be mentioned by
Josephus. The census would have little in it to disturb
men's minds, or force itself upon a writer of history.
There is, however, some evidence, more or less cir-
1. The inference drawn from the silence of historians may
be legitimately met by an inference drawn from the
silence of objectors. It never occurred to Celsus or Lu-
cian or Porphyry, each questioning all that he could in
the Gospel history, to question this. (2) A remarkable
passage in Suidas (s. v. ἄπογραφη) mentions a census,
obviously differing from the three of the Ancestrum
monument, by its reference to the Messiah, with that of
Luke. It was made by Augustus, not as censor, but by
his own imperial authority (δῶξαν αὐτῷ; comp. ἡδύδε
δόγμα, Luke ii, 1). The returns were collected by
twenty commissioners of high rank. They included
property as well as population, and extended over the
whole empire. (3) Tertullian, incidentally, writing
controversially, not against a heathen, but against Marc
ion, appeals to the returns of the census for Syria un-
der Senius Saturninus as accessible to all who cared to
search them, and proving the birth of Jesus in the city
of David (Tertul. Ad. Marc. iv, 19). Whatever difficult
the difference of names may present [see Cruspus],
here is, at any rate, a strong indication of the fact of a
census of population, cir. A.U.C. 749, and therefore in
i, 470; iv, 6) has pointed to some circumstances men-
tioned by Josephus in the last year of Herod's life, and
therefore not with that of Augustus, which imply some special action of the Roman govern-
ment in Syria, the nature of which the historian care-
lessly or deliberately suppresses. When Herod attends the
conclave at Beryus there are mentioned as present,
besides Saturninus and the procurator, οἱ ἐπὶ Περσίας
προεισαγόμενοι, of the officer the name had come, ac-
companied by other commissioners, for some purpose
which gave him for the time almost co-ordinate influ-
ence with the governor of Syria himself (War, i, 27, 2).
Just after this again, Herod, for some unexplained rea-
son, found it necessary to administer to the whole peo-
ple an oath, not of allegiance to himself but of good-will
to the emperor; and this oath six thousand of the
Pharisees refused to take (Josephus, Ant. xvii, 2, 4;
War, i, 29, 2). This statement implies, it is urged,
some disturbing cause affecting the public tranquillity,
a formal appearance of all citizens before the king's
officers, and lastly, some measure specially distasteful to
the Pharisees. The narrative of Luke offers an unde-
signed explanation of these phenomena.
2. As a further objection, it is urged that Palestine
was, at this time, an independent kingdom under Herod,
and therefore would not have come under the operation of an imperial census.
This objection admits of as satisfactory an answer as the foregoing. The statistical document already re-
ferred to include subject kingdoms and allies, no less than
the provinces (Sueton. Octar. c. 28). If Augustus had
any desire to know the resources of Judea, the position of
Herod made him neither willing nor able to resist.
From first to last we meet with repeated instances of
subservience. He does not dare to try or punish his
sons, but refers their cause to the emperor's cognizance
(Josephus, Ant. xvi, 4, 1; xvii, 5, 8). He holds his
kingdom on condition of paying a fixed tribute. Per-
mise is obtained from him to dispose of this
succession to his throne as he likes best (ibid. xvi, 4, 5).
He binds his people, as we have seen, by an oath of
allegiance to the emperor (ibid. xvii, 2, 4). The threat
of Augustus that he would treat Herod no longer as an
ally, but as a subject (ibid. xvi, 5, 9), would be followed
naturally enough by the desirous desire of Herod to regain his favor would lead him to ac-
inquise in it.
3. Another objection alleged is that if such a meas-
ure, involving the recognition of Roman sovereignty,
had been attempted under Herod, it would have roused
the same opposition as the usurption of the undisputed
right of Quirinus at a later period.
In reply to this, we may say that we need not won-
der that the measure should have been carried into ef-
flect without any popular outbreak. It was a return of
the population only, not a valuation of property; there
was no immediate taxation as the consequence. It might offend a party like the Phariscees; it was not likely to excite the multitude. Even if it seemed to some the prognosis of a coming change, and of direct government by the Roman emperor, we know there was a large and influential party ready to welcome that change as the best thing that could happen for its country (Josephus, Ant. xvi. 11, 2).

4. The statement of Luke that “all went to be taxed, every one into his own city,” is said to be inconsistent with the rules of the Roman census, which took cognizance of the place of residence only, not of the place of birth.

On the other hand, this apparent inconsistency of what Luke narrates is precisely what might be expected under the known circumstances of the case. The census, though Roman in origin, was effected by Jewish instrumental, and was in harmony, therefore, with Jewish customs. The alleged practice is, however, doubtful; and it has been maintained (Huschke, Uber den Census, etc., in Winer, s.v. "Schatzung") that the inhabitants of the provinces were, as far as possible, registered in their forum origines—not in the place in which they were only resident, but in the place of their own domicile. It is supposed that the journey from Nazareth to Bethlehem belongs to a time when Galilee and Judea were under the same ruler, and would therefore have been out of the question (as the subject of one prince would certainly not be registered as belonging to another) after the death of Herod the Great. The circumstances of the case and the nature of the census, if they do not prove, that Joseph went there only for personal enrolment, not because he was the possessor of house or land.

5. It is asserted that neither in the Jewish nor the Roman census would it have been necessary for the wife to travel with her husband in order to appear personally before the registrars (censores).

This objection is, perhaps, the most frivolous and vexations of all. If Mary were herself the house and lineage of David, there may have been special reasons for her appearance at Bethlehem. In any case, the Scripture narrative is consistent with itself. Nothing could be more natural, looking to the unsettled state of Palestine at this period, than that Joseph should keep his wife under his own protection instead of leaving her by herself, in an obscure village, exposed to danger and reproach. In proportion to the hopes he had been taught to entertain as the Son of David; in proportion, also, to his acceptance of the popular belief that the Christ was to be born in the city of David (Matt. ii. 5; John vii. 42), would be his desire to guard against the accident of birth in the despised Nazareth out of which “no good thing” could come (Is. xlvi).

The literature connected with this subject is, as might be expected, very extensive. Every commentary contains something on it. Meyer, Wordsworth, and Alford may be consulted as giving the latest summaries. A very full and exhaustive discussion of all points connected with the subject is given by Spanheim, Dubia Evangel. ii. 9-59; and Richardson, Ann. de Censu Augusti, in Mtenches, Theol. ii. 428; comp. also Ellioct, Hal. Lect. on 57.

Taygete, in Greek mythology, was a daughter of Atlas and Pleione, mother of Lacedæmon and Eriotus by Jupiter. She became one of the Pleiades after death.

Others affirm that she was transformed into a cow by Diana, in order to escape the embraces of Jupiter. The mountain Taygetus was named after her. See Smith, Dict. of Chri. Hist., Myths, and Myth. s. v.

Taylor, Charles C., a clergyman of the Protestant Episcopal Church, died Feb. 5, 1855, at Kalamazoo, Mich. In 1844 he went to Michigan and took charge of St. Andrew's Church, Ann Arbor; and in July, 1853, became rector of St. Luke's Church, Kalamazoo, where he labored until the last. He had frequently represented his diocese in the General Convention, and had for a long time been a member of the standing committee. He was a faithful and eloquent preacher. See Amer. Quar. Church Review, 1855, p. 161.

Taylor, Chauncey, a Congregational minister, was born in Williamstown, Vt., Feb. 17, 1805. After preliminary study at Hinesburgh, he entered the University of Vermont, from which he graduated in 1831, and then studied theology with Rev. Ira Ingraham, of Brandon. Jan. 21, 1835, was the date of his ordination, when he was installed pastor at Chittenend, and remained until 1887. One year, from 1838, he preached at James's Island, near Charleston, S. C.; from 1839 to 1841 he was acting pastor at Chittenend, Vt. The two years following he was without church charge, living at one time in Winoski and at another in Milton. From 1843 to 1846 he was acting pastor at Alburch. In the latter year he was reinstalled at Chittenend, where he remained until August, 1854, when he went to Langdon, N. H., and served there as acting pastor for two years. Then he became a home missionary at Algona, Kossuth Co., Ia., beginning his ministry there in 1856, gathering a church of the second order, and being installed in 1867. After serving this congregation until July, 1873, he was dismissed, and never resumed the care of a parish. He died there Feb. 29, 1876. See Cong. Quar. Rev. 1877, p. 436.

Taylor, Cornelius H. D.D., a Presbyterian minister, was born in 1821. Soon after the completion of his theological studies he became pastor of the Church of Huron, O. From thence he removed to Illinois, and was installed pastor of the Church of the Alton, where he labored ten years. In 1868 he received a call from the Third Presbyterian Church at Cincinnati to be one of the leading men of the Church in all places where he labored. He died at Cincinnati, Feb. 25, 1875. See Presbyterian, March 13, 1875. (W. P. S.)

Taylor, David, one of Wesley's early helpers, began to preach the Gospel in Cheshire and Derbyshire about the time that Wesley began his public labors. Many were saved through his instrumentality, among whom was John Bennett. He lived for a time in the family of lady Huntington (q. v.). On one occasion he was waylaid, with Charles Wesley, and severely wounded. He eventually erred with respect to marriage, not submitting to the mode prescribed by law, and his usefulness became neutralized thereby. He afterwards invited the Methodists to attend the meetings of the Quakers. He afterwards returned to his old friends the Methodists, and attempted to preach once more; “but alas!” says Atmore, “his gifts were gone.” He died, in obscurity, about 1780. See Atmore, Meth. Memorial, s. v.; Smith, Hist. West. Methodism, i, 182, 191-196, 201.

Taylor, Edward, a Congregational minister, was born (according to president Still) at Coventry, England, in 1642, and received an excellent education in his native country. Upon the restoration of Charles, he resolved not to conform, and sailed for the United States April 22, 1668, arriving at Boston July 5. On July 23 he entered Cambridge University, from which he graduated in 1671. He was invited to preach at Westfield, he consented, and arrived there Dec. 8, 1671. The paucity of population and the insecurity of person and property delayed for a long time the formation of a church; but this was done Aug. 27, 1679, O. S., and Mr. Taylor was ordained as his pastor. He continued to labor here until his death, June 29, 1716. He left a manuscript, A Commentary on the Four Gospels, theological treatises, sermons, and poems, none of which have been published. See Sprague, Annals of the Amer. Pulpit, i, 177.

Taylor, Elliston, a Methodist Episcopal minister, was born in South Carolina, Feb. 19, 1768. He first received license to exhort, and afterwards, April 12, 1816, to preach. Soon after this he joined the travelling con-
nection, and in due time was made deacon and elder. He died in 1826. Mr. Taylor possessed excellent talents, was uniformly acceptable, and greatly beloved by the friends of true religion. See Minutes of Annual Conferences, i. 541.

**Taylor, Ebenezer Dunton**, a Congregational minister, was born in Bristol, Vt., June 2, 1817—the youngest of five brothers, all ministers. His early education was received at St. Lawrence Academy, Potsdam, N. Y., and Western Reserve Teacher's Seminary. After leaving the latter institution he became principal of Shaw Academy, Euclid, O., and remained in that position until he was called to the study of theology, which he proceeded with under the direction of the Grand River Presbyterian and with his brother Chauncey. From Jan. 1, 1845, to 1847, he was acting pastor at De Ruyter, N. Y.; and after one year's labor was ordained at West Stockholm, Dec. 29, 1847, where he remained three years, until 1850, at which time he was dismissed. His next field was at Heuelton and De Peyster as acting pastor, at which place he preached one year (from 1850 to 1851); then at Chagrin Falls, O., four years, until 1855. At Clarendon he preached eighteen years, until 1873, from which time successively, until his death, he served at South Norwich, Vt., and Troy. He died at his home in Troy, Dec. 19, 1878. (W. P. S.)

**Taylor, Fitch W.,** a clergyman of the Protestant Episcopal Church, died in Brooklyn, N. Y., July 24, 1865, aged sixty-two years. He was the oldest clairvin in the United States Navy, and served under Commodore Reed in his expedition against the Malays; was in the Mexican War; and was chaplain of the flag-ship "H. S. S." He commanded the famous frigate "Parragut," during the Rebellion. See Amer. Quar. Church Review, Oct. 1865, p. 499.

**Taylor, Henry,** an English Baptist and Methodist minister, was born at Rosendale, Lancashire, and began to preach, in a local capacity, in the Methodist connection at an early period of his life. He soon after united with the Close-communion Baptists, and was for several years a respectable minister in that Church, and a pastor of a congregation in Birmingham. In 1788 he offered himself to the Methodist Conference, was accepted, and appointed to Liverpool. He was a popular preacher, especially in Sheffield, in 1796, where several persons were converted. Some circumstances coming to light, in 1797, which affected his character, and upon which he was suspended by the district meeting until the next Conference. He retired to Liverpool, and was sent, before the Conference met, by an owner of possesses in the West Indies to teach school on his plantations. Taylor died on the passage across, in 1798. See Atmore, Meth. Memorial, s. v.; Smith, Hist. of West. Meth. ii. 294.

**Taylor, Isaac (1),** a Dissenting minister, known as "Taylor of Ongar," was born in London in 1758, and was for a time a successful engraver in that city. He removed to Lavenham, Suffolk, in 1766. He was minister of an Independent Church at Colchester, Essex, in 1796-1810, and of another at Ongar, Essex, from 1811 until his death, Dec. 11, 1829. Besides other works, he published, Book of Martyrs for the Young (12mo) — *Stanton Explained to a Child* (3 vols. 12mo) — *Child's Life of Christ* (12mo) — Self-cultivation Recommended (12mo: Boston, 1820, 12mo) — The Glory of Zion — and other single Sermons. For a fuller list of publications, see Allibone, Dict. of Brit. and Amer. Authors, s. v.

**Taylor, Isaac (2),** LL.D., a Christian philosopher, was born at Lavenham, Suffolk, Aug. 17, 1879. He was dismissed from study and early became a Dissenting minister, but became a member of the Established Church and settled down at Stanford Rivers as a literary recluse. In 1862 he received a civil-service pension of one hundred pounds for his services to literature in the departments of history and philosophy. He died at his home, Stanford Rivers, June 9, 1865. He published, among other works, *Elements of Thought* (Lond. 1823, 8vo; N. Y. 1851, 12mo; 11th ed. 1867, 8vo) — *The Process of Historical Proof Exemplified and Explained* (ibid. 1828, 8vo; 1853, 8vo) — *Balance of Criminality, or Mental Error Compared with Immoral Conduct* (ibid. 1836, 8vo) — *Natural and Supernatual Theology* (ibid. 1829, 8vo; Boston, 1880, 12mo; 10th ed. Lond. 1845, 8vo) — *New Model of Christian Missions* (ibid. 1829, 8vo; new ed. 1866, 8vo) — *Panicaism* (ibid. 1838, 8vo; N. Y. 1834, 12mo; 1866, 8vo) — *Spiritual Despotism* (ibid. 1835, 8vo; 2d ed. 1855, 8vo; N. Y. 1835, 12mo) — *Physical Fairness in Life* (ibid. 1836, 8vo) — *Psyche* (ibid. 1836, 1852, 1853, 1866, 12mo) — *Home Education* (ibid. 1838, 8vo; 7th ed. 1867, 8vo; 2d Am. ed. N. Y. 1888, 16mo) — *Ancient Christianity, and the Doctrines of the Oxford Tracts for the Times* (ibid. 1839-40, in eight 8vo parts; 4th ed. with supp. and indexes, 1844, 2 vols. 8vo) — *Man Responsible for his Dispositions, etc., a lecture* (ibid. 1840, 8vo) — *Loyola and Jesuism in its Rudiments* (Lond. 1849, 1850, 1863, 8vo; N. Y. 1849, 1851, 12mo) — *Weley and Methodism* (Lond. 1851, 1863, 8vo, 1855, 12mo) — *The Restoration of Belief* (Lond. 1855, 8vo; Phila. 1855, 12mo; Camb. 1864, 8vo) — *Logic in Theology, and other essays* (ibid. 1855, 12mo) — *This is the Sketch of a Writer's life and catalogue of his writings, N. Y. 1860, 12mo) — *The Liturgy and the Dissenters* (Lond. 1860, 8vo) — *The Spirit of the Hebrew Poetry* (ibid. 1861; N. Y. 1861, 8vo; 1862, 8vo) — *Considerations on the Penta- teuch, etc.* (ibid. 1862, 8vo) — *See Above, Brit. and Amer. Authors, s. v.; Chamber's Edinburgh, s. v.*

**Taylor, James A.,** a Methodist Episcopal minister, was received on trial in the Ohio Conference in 1847, and appointed to Goshen Circuit; in 1848, to Madisonville; in 1850, to Gallipolis Circuit; and in 1851, to Jackson, which was his last appointment. He died Aug. 10, 1851. He was a young man of undoubted piety, goodness, and remarkable zeal. See Minutes of Annual Conferences, iv. 665.

**Taylor, James Brainerd,** a young Congregational minister of ardent piety and great promise, was born at Middle Haddam, Conn., April 15, 1801. His parents being members of the Protestant Episcopal Church, he was trained up in religious associations, and while clerk in a store in New York city was converted, and joined the Church of Dr. Romeyn. He early became useful in all Christian activities. The departure of Dr. Scudder for India turned his attention to the ministry, and after a preparatory course of two years at Lawrenceville Academy, N. J., he went to Princeton College as a sophomore in 1822. On his graduation in 1826, he was awarded the Yale Theological degree. He had always been very healthy, but in his third year had symptoms of lung-disease, which compelled him to seek relief in a tour through the South. He was licensed to preach by the Middlesex Convocation at East Haddam, Oct. 8, 1826, but the state of his health was such that he resolved to spend the winter at the Theological Seminary in Richmond, Va. He died there March 29, 1829, leaving a bright example of the power of divine grace and the triumph of Christian hope. See his *Memoir* by Dr. Rice (N. Y. 1833).

**Taylor, Jane,** daughter of the Rev. Isaac Taylor of Ongar, and as a writer for youth the worthy rival of Mrs. Barbauld, was born Sept. 25, 1785, in London, where her father then resided in the practice of his profession as an artist. Even from her third and fourth year, in connection with her sister Anne, who was two years older, she is said to have composed little tales and songs, which they would sing together; and Jane especially seemed to live in a fairy-land of her own imagination. Her father took her to study music, but her mind, in her fifteenth year, gave decided indications of personal piety. She was also one of a select society of young friends for the reading of original essays and the promotion of intellectual improvement. A visit to London in 1802 first brought her before the public. Her first contribution, *The Boggy's Boy*, appeared in the
plained upon Scripture Principles (1754)—The Covenant of Grace in Defence of Infant Baptism (1755)—A Sketch of Moral Philosophy (1760). His greatest work is his Hebrew Concordance, adapted to the English Bible, in which every word in the Hebrew Bible, with all its forms and significations, is to be found. His Scripture Doctrine of Original Sin called forth the celebrated answer of Edwards, in his treatise on Original Sin, which, whatever else may be said, it was not in the power of Taylor of Norwich to answer. In his Paraphrase on the Romans, with notes, he also found opportunity to broach freely his Arian sentiments, although the work also contains many valuable illustrations and comments on the Epistle.

Taylor, John (3), an English divine, was born at Shrewsbury, and baptized at St. Alkmund's Church, June 22, 1704, and was educated at the expense of Mr. Owen, of Conderoff, at St. John's College, Cambridge, where he took his A.B. in 1727. He afterwards became both fellow and tutor of this college, and in March, 1732, was appointed librarian, which office he held but a short time, being, in 1734, appointed registrar of the university. He was made deacon of the church of the Diocese of Lincoln, and in April, 1731, was preferred to the rectory of Lawford, in Essex; while in January, 1735, he became archdeacon of Buckingham. He was made canon residuary of St. Paul's in July, 1757, and removed to London, where he resided until his death on April 14, 1766.

Taylor, John (4), a Revolutionary patriot and professor of natural philosophy and mathematics in Queen's College. He was elected by the trustees at their first meeting in 1771, and Rev. Dr. Jacobus Rutsen Hardenbergh was chosen as president. The college went into operation at once, and before the war several students were graduated. When the war broke out, these two illustrious men threw themselves ardentlly into the cause of independence. Professor Taylor drilled the students as a military company, and they were quite expert in the use of arms. The irritation of the British troops who occupied New Brunswick broke up the college. An advertisement is still extant that the exercises of the college would be continued at a private house at the head of the Raritan during one of these years. Subsequently professor Taylor became colonel of the New Jersey State regiment; but he continued to discharge his professional duties for a time. In a letter to Governor Livingston, Sept. 29, 1776, he declared, "In view of the necessity of attending the examination of the students; and as the trustees insist upon my fulfilling my engagements, I hope I shall be discharged from the regiment as soon as possible." Of his subsequent life there is no public record accessible to the writer; but his name and relationship to the college are important and interesting as showing the patriotism of both officers and students of the infant college, and the close connection between enlightened academic education and the spirit of independence in that period of New Jersey history. Among those whom Prof. Taylor drilled in the company of students was the most eminent of the first graduate of the college, Simeon De Witt, who was Washington's chief "geographer to the army," or topographical engineer, as the office is now termed. See Revolutionary Correspondence of N. J. p. 177; Hist. of Rutgers College. (W. J. R. T.)

Taylor, John (5), a Methodist Episcopal minister, was born in Delaware County, Pa., Aug. 29, 1795; converted March 10, 1827; admitted on trial in the Philadelphia Conference in 1833, and appointed to Milford Circuit; in 1835, to Cambridge Circuit; in 1836-37, to Acornac Circuit; in 1838, to Northampton Circuit; in 1839-40, to Snow Hill Circuit; in 1841-42, to Dorchester Circuit; in 1843-44, to Marthleni Bethel, Philadelphia; in 1849, superannuated. He died Aug. 21, 1849. See Minutes of Annual Conferences, iv, 428.

Taylor, Jonathan, a minister of the Society of Friends, was a resident of Mount Pleasant, in the State of Ohio. He was much esteemed by the society of which he was a member. He was sent as a delegate to the society of the newly formed Indian lands. During his journey he was attacked with inflammation of the lungs, and died at Kilncool, near Carlow, Ireland, June 11, 1831. See Annual Monitor, 1833, p. 57.

Taylor, Joseph, a Congregational missionary to India, was born in 1786; commenced his labors in India in 1812, laboring some time in the Bellary Mission, and removing thence to Belgaum, where he continued until 1852, when he retired to Bombay. Here he died, Nov. 19, 1859. See (London) Cong. Year-book, 1861, p. 242.

Taylor, Joshua, a minister of the Methodist Episcopal Church, was born at Princeton, N. J., Feb. 5, 1768. At the age of seventeen he was apprenticed to a cabinetmaker, and continued in his employ three years, when the death of his mother awakened his mind to his spiritual condition. After a severe struggle against scepticism, he entered fully into communion with the Church in 1791; became an itinerant preacher, and was appointed to Flanders Circuit, N. J. The next year he went to New England, and labored in the circuits of Fairfield, Middletown, Granville, and Trenton, in Connecticut. In 1797 he was transferred to Maine, and appointed pre- sideding elder of the newly formed district. In 1798 he united with his duties as presiding elder the care of Readfield Circuit. In 1801 Mr. Taylor was appointed to the Boston District; in 1803 he was returned to the "District of Maine." and in 1804 was stationed at Portland, Me. He located in 1806, continuing to preach in Portland and Eecosity, and teaching a private school. In 1824 he was chosen one of the presidential electors of Maine, and cast his vote for John Q. Adams. From 1826 to 1848 he confined his labors principally to Cumber- land. In the latter year he re-entered the Conference, was entered as superannuated, and was appointed chaplain to the almshouse, where he attended to the duties of his office till June, 1852, when he was disabled by paralysis. He died at his home in Portland, March 20, 1861. About 1802 he was engaged in a pamphlet controversy with a Rev. Mr. Ward, a Congregational minister who attacked Methodist doctrines. The Methodist party was entirely satisfied with the result of the controversy. See Zion's Herald, April 3, 1861.

Taylor, Michael B., a Methodist Episcopal minister, was born in Scott County, Ky., Oct. 28, 1798; licensed to preach September, 1824, and some time afterwards received on trial in the Kentucky Conference. He travelled about four years in the Kentucky Conference; was then transferred to the Illinois Conference, and thence to the Indiana Conference; was appointed to the Wabash District, and transferred to the Illinois Conference, and appointed presiding elder in the Wabash District, where he continued his labors for four years. In 1836 he was appointed presiding elder of the Quincy District. He died July 20, 1866. In all the relations of life he was irreproachable. See Minutes of Annual Conferences, 1859, p. 661.

Taylor, Nathaniel (1), an English clergymen, was assistant minister in Westminster in 1668, and appointed pastor of a congregation at Salter's Hall in 1695. He died in 1702, at the age of about forty. He published, Sermons (Lond. 1688, 4to.);—Funeral Sermon (1691, 4to.);—Preservative against Deism (1698, 4to.);—Funeral Sermon to the late Lord Craven (1710, 4to.);—Discourses on the Spiritual Life (1701, 4to.);—Discourses on the Christian Church, etc. (1700, 4to.);—Dr. William Sherlock's Cases and Letter of Church Communion, etc., Considered (1702 8vo.);—Practical Discourses (1703, 8vo.). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Taylor, Nathaniel (2), a Congregational minister, was born at Danbury, Conn., Aug. 27, 1722 (O. S.). He graduated at Yale College in 1743, and was ordained pastor, June 29, 1748, at New Milford, Conn., where he remained until his death, Dec. 9, 1800. For twenty-six
years he was one of the Yale College board of trustees. His only publications were two occasional Sermons. In 1759 he was chaplain, under Col. N. Whiting, at and around Crown Point, Thiemoroga. See Sprague, Amer. Pulpit, iii, 467.

Taylor, Nathaniel William, D.D., an eminent Congregational preacher and divine, and the grandson of the preceding, was born at New Milford, Conn., June 23, 1786. He spent his early years on a farm, was prepared for college by Rev. Dr. Azel Buckas, and graduated at Yale College in 1807, having had twice to relinquish his studies on account of disease of the eyes. He was private tutor for a year in Albany and Montreal, studied theology four years with Dr. Dwight, and in 1812 succeeded Moses Stuart in the pastorate of the First Church, New Haven, where he labored with great success for ten years. Of his preaching, Dr. Dutton thus speaks: "The intellectual qualities of his preaching were thorough and profound, yet lucid and scriptural: exposition and discussion of weighty themes; a marshalling of comprehensive forces of luminous and kindled logick, to bear, with compacted and converging unity and clarificatory power, on the one question in hand; a full and frank meeting of difficulties; bold, defiant, and powerful grappling with objections; fearless reference, in defence of scriptural doctrine and precept, to reason and common-sense; close and pungent applications to conscience, and earnest and tender appeals to the heart. When Dr. Taylor was considered one of the ablest preachers of his time, and in certain aspects was thought to have had no equal. After he became theological instructor, especially in times of revival, his labors were widely sought by the Church and freely given. In 1829, upon the formation of the theological department in Yale College, he was chosen Dwight professor of didactic theology, which position he held until March 10, 1858, when he quietly and peacefully passed away from earth. It was as a teacher of theology that his influence has been most widely felt. In this field, he was an original figure, whose doctrine produced a deeper impress upon American divinity. In several important respects he diverged from the traditional theology of New England. He held that the mind, however affected by sin in intellect, sensibility, or will, is yet a free agent, capable by intellect to perceive and understand the will of God, and by sensibility to feel their influence, and capable by will to choose or refuse any one of them; and that the power of will, by which it makes a given choice, is a power that could in the time and circumstances have chosen differently and oppositely. He repudiated the proclivity and destining scheme of determination to the will of God, and substituted the word "purposed." While depravity is universal to the race, it is not to be ascribed to any property, propensity, or disposition of the soul, prior to actual transgression, as sinful in itself, or as the necessary cause of sin, nor to a sinful nature corrupted in or derived from Adam, sin being traced to the constitutional propensity of man for natural good, as perverted by his own moral agency. "Sin comes in as an unavoidable result, so far as divine prevention is concerned, of such materials as God uses, and must use, in a moral universe—to wit, free agents." God, having created man moral and responsible, cannot prevent the entrance of sin without contradicting himself. He admitted and taught that sin is among the things which are according to the counsel of God's will, yet only in an indirect and remote sense, God preferring a moral system in which sin is necessarily incidental to the non-existence of the system. A system of original sin, fatal and soundness of Dr. Taylor's views concerning sin, much difference of opinion has prevailed. Some of his followers have claimed that they are original with him; others quote Whately, Woodward, and Dr. John Young as having enounced views in consonance with his. Dr. Dutton regrets him as having "the old Arminian deistical hypothesis," while Dr. Dutton claims, on the contrary, that "time has fully proved that his mode was altogether best for the refutation of Arminianism." Dr. Whedon says that while Dr. Taylor "vindicated the divine government in introducing into its system the Arminian view of sin, he labored in his own work by admitting the principle of preordination." At all events, the enunciation of Dr. Taylor's views gave rise to a prolonged and exciting controversy, which was carried on with unusual persistency and ability between himself and his colleagues, on the one hand, and Drs. Tyler, Woods, and others, prominent Congregational divines, on the other. Dr. Taylor never admitted that his opinions were heretical, judged by the standard theologians of New England, but labored hard to prove their substantial conformity to the latter. Defended and enforced his views by intense earnestness and eloquence, and by his powerful logic, his theology has won the admiration of many adherents, and—so it has been claimed—has silently modified, and in a true sense rationalized, the Calvinistic theology. Dr. Taylor attached much importance to the truths of natural religion, and he also laid much stress upon true theories of mind. A correct mental philosophy he deemed fundamental, and elaborated with much care a system of his own. With Dwight and Edwards, he held that all motives find their ultimate ground of appeal in the desire of personal happiness, and that the idea of right in its last analysis is resolved into a tendency to the highest happiness. "The highest happiness," Dr. Taylor won the admiration and affection of his pupils, nearly seven hundred being under his training, and inspired them with enthusiasm and pleasure in the pursuit of their studies. In his social and domestic relations, he was peculiarly attractive and lovely, and peculiarly beloved. As an author, Dr. Taylor is known principally by posthumous works. His controversial articles were contributed principally to the Monthly and Quarterly Christian Spectator and to the Spirit of the Pilgrims. Since his death there have appeared the following, edited by Noah Porter, D.D.: Practical Sermons (N. Y. 1858, 8vo)—Lectures on the Moral Government of God (ibid. 1859, 2 vols. 8vo), his greatest and most celebrated performance:—Essays, Lectures, etc., upon Select Topics in Revealed Theology (ibid. 1859, 8vo). See the Congregational Quarterly, 1860, p. 245 sq. (by Dr. Dutton); Allibone, Dict. of Brit. and Amer. Authors, s. v. Taylor, N. W., and by several lives in the Christian, Quatr. Spec. vols. ii, iv, v; Spirit of the Pilgrims, vols. v, vi; New-Englandr. Nov. 1859 (by Prof. Martin); Amer. Theol. Rec., 1859, p. 391 sq. (by Dr. Pond); Math. Quar. Rev., 1859, p. 317, 367; 1860, p. 146, 666—669 (by Dr. Whedon); Memorial of Nathaniel W. Tay- ler, D.D. (ibid. 1859, 8vo), by his son, edited by Drs. Bacon, Dutton, and Fisher. See Theology; Tyler, Bennet.

Taylor, Oliver Alden, a Congregational minister, was born at Yarmouth, Mass., Aug. 18, 1801. He graduated at Union College, 1825; entered the ministry November, 1828; and, spending the next eleven years in study and teaching, he became pastor at Manchester, Sept. 18, 1839, and died Dec. 18, 1851. He published, Catalogue of the Andover Theological Seminary (1838):—Piety in Humble Life (1844, by the Mass. S. S. Society):—and numerous articles, original and translated, and some poems, in various periodicals. A memoir of his life by Rev. T. A. Taylor, his brother, was published in 1853, a second edition of which appeared in 1856. See Sprague, Annals of the Amer. Pulpit, ii, 275.

Taylor, Richard Cowling, an eminent English antiquary, was born at Hinton, Suffolk, Jan. 26, 1789, and emigrated to the United States in July, 1830, settling in Philadelphia. He was a surveyor and geologist, and was greatly useful in developing the mineral resources of various parts of the country. He died Oct. 26, 1851. In addition to scientific works, he published Index Mo- numentalium, 1811; and lists Priories, Friariest, Colleges, Collegiate Churches, Hospitals,
Taylor, Rowland, L.L.D., an English clergyman and martyr, is supposed to have been a Yorkshireman; and after being educated at Cambridge, became the head of Border Hostile, near Caius College. He was presented by archbishop Cranmer to the rectory of Hadleigh, where he lived in the spirit and deeds of his predecessors. In 1538 he was summoned before Gardiner for resisting the popish mass at Hadleigh. He defended his cause with firmness, but was committed to the King's Bench Prison, where he remained till Jan. 22, 1555, when he was sentenced to be burned. The execution took place Feb. 8, 1555. He was interred at Aldeham Church, Hadleigh. See Fox, Book of Martyrs; Hook, Eccl. Biog. s. v.

Martyr's Stone at Hadleigh.

Taylor, Samuel, a Presbyterian minister, was born in Nova Scotia, Sept. 14, 1730; graduated at the Princeton Theological Seminary in 1825; was licensed to preach the same year, and shortly after was ordained and installed pastor of the Millsburg and Stoner Mouth churches of Bourbon County, Ky. In 1831 became pastor of the Nicholasville and Cedar Creek churches, Ky.; in 1836, at Frankfort, Ind.; in 1845, Warelnd, Ind.; in 1862, Washington, Ind.; in 1854, Waco, Texas. He died June 9, 1835. Mr. Taylor was a close student and a man of literary tastes. As a theologian he was acute, prolific, and systematic. He was for a number of years an active member of the Board of Trustees of Hanover College, Ind., and of the New Albany Theological Seminary, Ind. See Wilson, Prob. Hist. Almanac, 1867, p. 206.

Taylor, Stephen, D.D., a Presbyterian minister, was born at Tyringham, Berkshire Co., Mass., Feb. 26, 1736. He pursued his preparatory studies at Lenox Academy; graduated at Williams College, with the highest honor, in 1814; was preacher of the academy at Westfield, Mass., for one year, and tutor in Williams College 1817-19; studied theology in Andover Theological Seminary, and afterwards privately; was licensed to preach in 1824, and shortly after was ordained pastor of a church in Halifax Co., Va. In 1826 he became pastor of the Shockey Hill Church, Richmond, Va.; in 1835 was appointed professor of ecclesiastical history in the Union Theological Seminary in Prince Edward Co.; in 1838 resigned, and shortly after became pastor of a church in Abingdon, Va.; in 1843, of the High Street Church in Petersburg, Va.; in 1847 returned to Richmond, and engaged in teaching; in 1850 became pastor of the Duval Street Church, Richmond, and continued in charge of it until his death, March 4, 1853. Mr. Taylor was an instructive preacher, an excellent pastor, and a learned tutor. See Spurgeon, Annals of the Amer. Pilgrims, iv, 673.

Taylor, Thomas (1), a learned Puritan divine, was born at Richmond, Yorkshire, in 1573; and was educated at Christ's College, Cambridge, of which he became fellow, and afterwards Hebrew lecturer. On leaving the university, he settled first at Watford, Hertfordshire; then at Reading, Berkshire; and in 1625 he obtained the living of St. Mary Aldermansanbury, London, which he retained during the remainder of his life. He died early in 1632. His contemporaries unite in giving him a high character for learning, piety, and usefulness. Among his works are, Commentary on the Epistle of St. Paul written to Titus (Camb. 1612, 4to; 1616, 1619, best ed. 1638, fol.);—Treatise of Christian Religion (1611, 4to);—Reflections upon Parable of the Souer, etc. (Lond. 1621, 4to, 1681, 1684);—Christ's Victory over the Dragon (1633, 4to);—Christ Reveal'd, or the Old Testament Explained, etc. (1655, sm. 4to). Other works, with Life, appeared (Lond. 1658, fol.). See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Chalmers, Biog. Dict.

Taylor, Thomas (2), the "Platonist," was born in London, May 15, 1758. He studied for three years at St. Paul's school, with the design of becoming a Dissenting minister, but afterwards entered Lubbock's banking-house. Later he received the appointment of assistant secretary to the Society for the Encouragement of Arts, Manufactures, and Commerce, which post he held several years. During the last forty years of his life he resided at Walworth (partially supported by an income of £100 from his friend W. Meredith). He died Nov. 1, 1855. His works comprise sixty-three volumes, of which twenty-three are large quarto. Besides treatises on arithmetic and geometry, and a few minor essays, etc., his chief works were the translations of Plato, Aristotle, and other Greek and Latin authors. The Works of Plato, viz. his Fifty-Five Dialogues and Twelve Epistles; Nine of the Dialogues by the late Fyler Seldenham, and the Remainder by Thomas Taylor, etc. (1804, 5 vols. 4to), and the explanation of the Epistles of S. Paul and the Epistles of S. John and S. Jude, of Norfolk, who locked up nearly the whole edition in his house, where it remained till 1848, when it was sold. Of his translation of Aristotle (1806-12, 10 vols. 4to) only fifty complete copies were struck off, the expense being defrayed by W. Meredith. His latest works were translations of Proclus, On Providence and Evil (1833, 8vo; 1841, 8vo); and Plotinus, On Suicide (1834, 8vo). His translations have been commended by some, but by others very severely criticised. For full catalogue of Taylor's works, see Allibone, Dict. of Brit. and Amer. Authors, s. v.

Taylor, Thomas House, D.D., a clergyman of the Protestant Episcopal Church, was born of English parents in Georgetown, S. C., Oct. 18, 1799. His early education was acquired at Guilford, Conn.; he graduated from South Carolina College, Columbia, as valetudinarian of his class; studied theology under bishop White; was ordained deacon in 1821, and priest in 1826. For nine years he was rector of St. John's Church, Colleton, S. C. In April, 1844, he became rector of Grace Church, New York city, where he remained until the close of his life. He died at West Park, on the Hudson, Sept. 9, 1857. Dr. Taylor was a fine scholar, a man of marked character, and retained the respect and affection of his people. He held several positions of honor and trust. See American Quar. Church Rev. Jan. 1868, p. 605.

Taylor, Timothy, an English clergyman, was born at Hempstead, Hertfordshire, in 1609, and entered Queen's College, Oxford, in 1626. He became vicar of Almeley, Hertfordshire; subsequently a Presbyte- rian, and in 1664 was sent by John Wilks, Bishop of Dublin, and became assistant to Samuel Mather, and afterwards to Nathaniel Mather, and died there in 1681. He wrote Defence of Sundry Positions and Scriptures alleged to Justify the Congregational Way (Lond. 2 pts. 4to: pt. i, 1645; pt. ii, 1647). They were answered by Richard Hullahworth in his Certifie Que- ries (1646, 4to). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Taylor, Timothy Alden, a Congregational minister and author, was born at Hawley, Mass., Sept. 7, 1808. He graduated at Amherst College in 1835, and at the Andover Theological Seminary in 1838. He was ordained at Storrsville, R. L., 1839, where he preached until his death—cut off suddenly in the midst of his
usefulness, March 2, 1858. Mr. Taylor was honest and unflinching in his attachment to his principles, earnest and faithful. He was a diligent student, and wrote much for the periodical press. He also published a Memoir of his father, Jehu Allen Taylor (Boston, 12mo, 1853; 2d ed. 1856) — The Solace (32mo) — The Two Mothers (32mo) — Zion's Pathway (12mo) — Bible View of the Death Penalty (8vo). See Cong. Quarterly, 1856, p. 96; Allibone, Dict. of Brit. and Amer. Authors, s. v.

Taylor, Veron D., a Presbyterian minister, was born at Hinesburg, Vt., in 1798; received an academical education; studied theology privately; was licensed by the Addison Congregational Association, Vt., and ordained by a Congregational council in 1826. His fields of labor were as follows: Elizabethtown, N. Y.; Litchfield, South Farms, Conn.; Amenia, N. Y.; Galesburg, Mich.; Huntsvill and Dover, Ohio; and was Seaman's chaplain at Buffalo, N. Y., and Cleveland, Ohio. He died Sept. 6, 1864. See Wilson, Pres. Hist. Almanac, 1866, p. 228.

Taylor, William Cooke, LL.D., an Irish author, was born at Youghal in 1800, and was educated at Trinity College, Dublin. He went to London in 1822, where he remained until 1847, when he returned to Ireland, to serve the viceregal household in the capacity of statista, and was Chaplain in Dublin, Sept. 1847. In addition to many works on secular subjects, he wrote, Catechism of the Christian Religion (Lond. 1828, 12mo) — History of Mohammedanism and its Sects (1888, 12mo) — History of Poper (new ed. 1837, 8vo) — Illustrations of the Bible and Confirmation of Sacred History from the Monuments of Egypt (1838, 12mo) — History of Christianity, from its Foundation to its Legal Establishment in the Roman Empire (1844, 8vo). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Tchu-chor, the prayer-mill used by the Buddhist priests in Chinese Tartary. It is constructed in two forms. (1.) One is a small wheel with flies, which move either by wind or water. On these flies are written prayers, and it is supposed that all the merit of their recitation is conferred upon him that sets the wheel in motion. (2.) The other is a huge egg-shaped barrel, as large as a hoghead, upon an upright spindle, composed of endless sheets of paper pasted one over the other, and on each sheet is written a different prayer. At the bottom is a bamboos paddle bar, a cord, which gives to it a rotary motion. The lamases make this spin rapidly, and thus acquire the merit of the repetition of all the prayers written on all the papers at every rotation of the barrel. The lamases spend much of their time in plying the tchou-chor by way of interceding for the people. In return they receive from each person a small compensation for their trouble.

Teach (Heb. prop. תַּעַץ, but also many other words; Gr. prop. διδάσκω, but often other terms). Teaching is an important branch of the commission which Christ gave to his apostles before he left the earth. "Go," said he, "teach all nations," or, as we have it recorded by another of the evangelists, "Preach the Gospel to every creature." In this way they were to make disciples, as the word μαθητεύονται imports. It is one of the precious promises of the new covenant that all its subjects shall be "taught of the Lord" (Isa. liv. 13). The Lord Jesus quoted these words in the days of his public ministry (John vi, 45), and describes the effect of the potency of this preaching: "Every man, therefore, that hath heard, and hath learned of the Father, cometh unto me," which he afterwards explains to mean neither more nor less than believing on him. See PREACHING.

Teachers, or "doctors" (v. r.), are mentioned among divine gifts in Ephes. iv, 11, and it is possible that the apostle does not mean such ordinary teachers (or pastors) as the Church now enjoys; but as he seems to reckon them among the extraordinary donations of God, and uses no mark of distinction or separation between apostles, with which he begins, and doctors, with which he ends, it may be that he refers to the nature of the other, and speaks of such well-informed persons, to whom inquiring Christian converts might have recourse for removing their doubts and difficulties concerning Christian observances, the sacraments, and other rituals, and for receiving from Scripture the demonstration that "this is the very Christ;" and that the thing pertaining to the faith is accomplished in Jesus. Such a gift could not but be very serviceable in that infant state of the Church, which, indeed, without it, would have seemed, in this particular, inferior to the Jewish institutions. With this agrees the distinction (Rom. xii, 7) between doctors (τῆς διδασκαλίας ἐκπαιδευτικοὶ, ἐκπαιδευτικοὶ, ἔχοντες, q. d. he also gives advice privately, and resolves doubts, etc., let him attend to that duty; he who exults with a loud voice (παρακαλώντες, ἐκπαιδευτικοὶ), let him exhort with proper piety. The same appears in 1 Cor. xii, 28, where the apostle ranges, 1st, apostles, public instructors; 2d, prophets, occasional instructors (σοφοὶ ἔχοντες, ἐκπαιδευτικοὶ, ἐκπαιδευτικοὶ, ἔχοντες, q. d. doctors or teachers, private instructors. See GIFTS.

For monographs on our Lord as the Great Teacher, see Hase, Leben Jesu, p. 130 sq. See JESUS CHRIST.

Tears (תַּאָרְס, דָאָרְס) are the well-known emblem and usual accompaniment of grief; and as grief is generally most violent when it is indulged for the dead, so in the two following passages the wiping away of tears is connected with the abolition of death: Isa. xxv, 8, "And the Lord Jehovah shall wipe away the tears from off all faces;" Rev. vii, 17, "And God shall wipe away all tears from their eyes." Tears are wont to be poured out on occasions of mortality: thus in Jer. xxxi, 15, "A voice was heard in Ramah, lamentation and bitter weeping, Rachel weeping for her children refused to be comforted for her children, because they were not;" again in xxii, 10, "Weep ye not for the dead, neither bemoan him, but weep sore for him that goeth away, for he shall return no more, nor see his native country." Tears are sometimes shed for national calamities: thus in Lam. i, 2, "She weepeth sore in the night, and her tears are on her cheeks;" again in Numb. xiv, 1, "And all the congregation lifted up their voice, and wept;" and the people called upon the Lord. In Gen. xxv, 15, 16, Hagar's pitiable case is thus described, "And the water was spent in the bottle, and she cast the child under one of the shrubs. And she went and sat down over against him a good way off, as it were a bow-shot; for she said, Let me not see the death of the child. And she sat over against him, and lifted up her voice and wept." Tears are often the symbol of divine judgments, as they are sometimes also of human oppressions. (See Eccles. iv, 1; Acts xx, 19; Jer. xiv, 17.) They are sometimes the fruit of repentance and contrition. (See Hebr. xi, 7; Matt. xxvi, 15.) But commonly they are the result of natural affection deploring a beloved object, of which the examples are too obvious and numerous to cite. But whatever the causes of tears to the righteous, all these shall be abolished, which is what is meant by "God's wiping away all tears from their eyes." For death, oppression, calamity, repentance, shall have no place in his heavenly region. Weeping may endure for a night, but joy cometh in the morning. Those who sow in tears shall reap in joy. See GRIEF.

For the valley of tears (Psal. xxxiv, 6), see BACA.

For more particular on the tears of Christ over Jerusalem (Luke xii, 46), see Vobeling, De Lacrimita- tum, p. 53. Comp. Kiesling, De Lacrimis Vatumin (Lips. 1747). See JESUS CHRIST.

The so-called lacrymatory, or "tear-bottles," supposed by some to have been used for collecting the tears of the mourners at the graves of the ancients (Thomson, Land and Book, i, 147), were rather ven...
sels for perfumery or flowers (see the Penny Cyclop.

a. v.).

Teāshur. See Box-tree.

Teb'ah (Heb. Te'bah, תֶּבַח, slaughter, as often; Sept. Tab'ê; Josephus, Tabaioc, Am. ii, 6, 5; Vulg. Tabæ), the oldest of the four sons of Nahor by his con-
cubine Reumah (Gen. xxii, 24). B.C. cir. 2050.

Tebali'ah (Heb. only in the prolonged form Te-
ba'lah, תֶּבַלָּה, purify’d [Furst, protected] by Jeho-
jah; Sept. Tabal; Tabal, v. e. Tabol; Vulg. Tabelas),
third of the four sons of Hosah "of the children of Me-
ra’i" (1 Chron. xxvi, 11). B.C. 1014.

Te'beth (Heb. Tebeth, תֶּבֶת, apparently of As-
syrian origin, Tithino), the tenth month (Esth. ii, 16)
of the sacred year of the Hebrews, corresponding in the
main to January. Jerome has the following comment
upon Ezek. xxix, 1: "Decimus mensis, qui Hebreois
appellatur Tabeth, et apud Egyptians [with whom it
was the fifth month] Tōth [or Toth, Copite Todos],
apud Romans Januarium." In Arabic it is called
Tabah, in Greek Tothi or Tōth, and in Sanscrit Troupas.
See Calendar, Jewish.

Tebul Yom. See Talmud.

To Deum LAUDâMUS (i. e. "We praise thee, O God!). This hymn, which is written in homonous Sacra-
nita Penitentialis, commonly called Hymnus SS, Amb-
rosius et Augustinus, and known as the Ambrosian Hymn,
is erroneously attributed to Ambrose. It has been
chronicled at Milan, and erroneously ascribed to
Decius (d. 553), bishop of Milan, we are told that
at the baptism of Augustine, which Ambrose performed
in the year 387, both the baptist and the candidate
spontaneously, as if inspired by the Holy Ghost, inton-
ted this hymn. As a tradition would seem to have
been corroborated by a passage of a spurious (the 92d)
sermon of Ambrose which treats of the baptism of Au-
gustine. But, in truth, the tradition owes its origin
to this passage. Augustine himself, who speaks, in his
Confessions, of his conversion and baptism, does not
mention anything of this kind. Some have ascribed
this hymn to Athanasius, bishop of Alexandria; others
to Nicetius, about the year 535; and a third class to
Hilary of Poitiers. The whole tenor of this hymn
proves its Eastern origin, and at a very early time.
Indeed, the Codex Alexandrinus contains a morning
hymn commencing Καὶ τελεσθε ἡμῖν ἁμαρτίαν
καὶ αἰώνια τὸ δώμα σου εἰς τὸν αἰώνα; and this cir-
cumstance, together with the fact of its great resem-
bance with the Te Deum, induced Daniel (Theosur.
Hymnol. ii, 289 sq.) to say, "The Te Deum is based upon
an ancient Greek hymn which, extensively known in
the East, has found many translators, which fact not
only accounts for the variety of readings, but also for
the various authors to whom it is ascribed. Of these
versions, the one which Ambrose made for the service
of the Milan Church met with the most approval and
was finally adopted, and this explains why it was com-
monly known as the Ambrosian Hymn.

Even before the time of Charlemagne, this hymn
was sung on special occasions in both churches of the
East. The Roman Breviary uses it as one of the
morning hymns to be sung throughout the year, with the
exception of the Sundays in Advent, Lent, and the Feast
of the Holy Innocents. Long before the Reforma-
tion, it was known in a German translation. In 1533
it was translated by Luther, "Herr Gott, dich loben wir," and
since that time it has been translated into German
and English by different authors. We subjoin a few
lines of the original:

"Te Deum laudamus, Te Dominum confitemur.
Te benedictum, sanctum, unum, sempiternum.
Te omnis angelorum, te semper et universae potestates.
Te Chirubim et Seraphim incensabiles voces proclamant:
Sanctus, Sanctus, Sanctus Dominus Deus Sabaoth.
Pleni sunt colli et terrae majestatis gloriae tuae."
"Tekoa" in 2 Sam. xiv, a town in the tribe of Judah (2 Chron. xi, 6, as the associated places show; and inserted in its place in Josh. xv, 59, 60 in the Sept. [see Keil, ad loc.]), on the range of hills which rise near Hebron, and stretch eastward towards the Dead Sea. These hills bound the view of the spectator as he looks to the south from the summit of the Mount of Olives. Jer- ron, a town of Judah, is six Roman miles from Tekoa, and four from Bethlehem, and that as he wrote (in Jer. vi, 1) he had that village daily before his eyes ("Thekoam quotidie oculis cernimus"). In his Onomasticon (s. v. Echeth, Ezechew) he represents Tekoa as nine miles only from Jerusalem; but elsewhere he agrees with Eusebius in making the distance twelve miles. In the latter case he reckons by the way of Bethlehem, the usual course in going from the one place to the other; but there may have been also another and shorter way, to which he has reference in the other computation. Some suggest (Bachiens, P扩张on, ii, 60) that an error may have crept into Jerome's text, and that we should read twelwe there instead of nine. In 2 Chron. xx, 20 (see also 1 Macc. ix, 33) mention is made of "the wilderness of Tekoa," which must be understood of the adjacent region on the east of the town (see infra), which in its physical character answers so entirely to that designation, that the expression (from בֶּטַה, "to strike," said of driving the stakes or pins into the ground for securing the tent), as well as from the manifest adaptation of the region to pastoral pursuits, that the people who lived here must have been occupied mainly as shepherds, and that Tekoa in its best days could have been little more than a cluster of tents, to which the men returned at intervals from the neighboring pastures, and in which their families dwelt during their absence.

The Biblical interest of Tekoa arises, not so much from any events which are related as having occurred there as from its connection with various persons who are mentioned in Scripture. It is not enumerated in the Hebrew catalogue of towns in Judah (Josh. xv, 49), but is inserted in that passage by the Sept. The "wise woman" whom Job employed to effect a reconciliation between David and Absalom was obtained from this place (2 Sam. xiv, 2). Here, also, Ira, the son of Ikesh, one of David's thirty "mighty men" (הִגְוָי מֵי), was born, and was called on that account "the Tekoite" (2 Sam. xxiii, 26). It was one of the places which Rehoboam fortified, at the beginning of his reign, as a defense against invasion from the south (2 Chron. xi, 6). Some of the people from Tekoa took part in building the walls of Jerusalem after the return from the Captivity (Neh. iii, 5, 27). In Jer. vi, 1, the prophet exclaims, "Blow the trumpet in Tekoa and set up a sign of fire in Beth-haccerem"—the latter probably the "Frank Mountain," the cone-shaped hill so conspicuous from Bethlehem. It is the sound of the trumpet as a warning of the approach of enemies, and a signal-fire kindled at night for the same purpose, which are described here as so appropriately heard and seen, in the house of danger, among the mountains of Judah. Tekoa is chiefly memorable as the birthplace of the prophet Amos, who was here called by a special voice from heaven to leave his occupation as "a herdsman" and "a puncturer of wild figs," and was sent thence hence to testify against the sins of the kingdom of Israel (Amos vii, 14). Accustomed to such pursuits, he must have been familiar with the solitude of the desert, and with the dangers there incident to a shepherd's life. Some effect of his peculiar training amid such scenes may be traced, as critics think (De Wette, Einl. ins A.t. T. p. 356), in the contents and style of his prophecy. Jeroboam II, according to the context, is in the contin- tan qui pastor de pastoribus fuit et pastor non in locis cultis et arboribus ac vineis consitis, aut certe inter sylvas et prata virenita, sed in lata eremi vastitate, in qua usuram leonum fertis et interficet pecorum, artis

sae usum case sermonis." Comp. Amos ii, 13; iii, 4, 12; iv, 1; vi, 12; vii, 1; and see the striking remarks of Dr. Pusey, Introd. to Amos.

In the genealogies of Judah (1 Chron. ii, 24, and iv, 5), Ashur, a posthumous son of Hezron and a brother of Caleb, is mentioned as the father of Tekoa, which appears to mean that he was the founder of Tekoa, or at least the chief of the place. See Rödiger in Gen- sen. Thesaur., iii, 1518.

The common people among the Tekoites displayed great activity in the repairs of the wall of Jerusalem under Nehemiah. They undertook two lengths of the rebuilding (Neh. iii, 5, 27). It is, however, specially mentioned that their "lords" (הָרָעְשָה) took no part in the work.

Tekoa is known still as Tekba'a, and, though it lies somewhat aside from the ordinary route, has been visited and described by several recent travellers. Its distance from Beit-Lahum agrees precisely with that assigned by the early writers as the distance between Tekoa and Bethlehem. It is within sight also of the "Frank Mountain," beyond question the famous Herodium, or site of Herod's Castle, which Josephus (War, iv, 2, 2) represents as near the ancient Tekoa. It lies on an elevated hill, which spreads itself out into an irregular plain of moderate extent. Its "high position" (Robinson, Bib. Res. i, 486) "gives it a wide prospect. Towards the north-east the land slopes down towards Wady Khureitit; on the other sides the hill is surrounded by a belt of cultivated land, beyond which are valleys, and then other higher hills. On the south and west, a good distance, another deep valley runs off south-east towards the Dead Sea. The view in this direction is bounded only by the level mountains of Moab, with frequent bursts of the Dead Sea, seen through openings among the rugged and desolate intervening mountains.

In the spring there are often encampments of shepherds there, consisting of tents covered with the black goat-skins so commonly used for that purpose; they are supported on poles and turned up in part on one side, so as to enable a person without to look into the interior. Flock pasture near the tents and on the heights that rise in every direction. There are horses and cattle and camels also, though these are not so numerous as the sheep and goats. A well of living water, on the outskirts of the village, is a centre of great interest and activity, the women coming and going with their pitchers, and men filling the troughs to water the animals which they have driven thither for that purpose. The general aspect of the region is sterile and unattractive; though here and there are patches of verdure, and some of the fields, which have yielded an early crop, may be seen recently ploughed up, as if for some new species of cultivation. Fleecy clouds, white as the driven snow, float towards the Dead Sea, and their shadows, as they chase each other over the landscape, seem to be fit emblems of the changes in the destiny of men and nations, of which there is so much to remind one at such a time and in such a place. Various ruins exist at Tekoa, such as the walls of houses, cisterns, broken columns, and heaps of building-stones. Some of these stones have the so-called "bevelled" edges which are supposed to show a Hebrew origin. There was a convent here at the beginning of the 6th century, established by St. Tabus, and a Christian settlement in the time of the Crusaders; and undoubtedly from some of these remains belong to modern times rather than ancient. Among these should be mentioned a baptismal font, sculptured out of a limestone block, three feet nine inches deep, with an internal diameter at the top of four feet, and designed evidently for baptism as administered in the Greek Church. An OUULAM is the holy place, the principal one at Jufna, near Beitin, the ancient Bethel. See more fully in the Christian Review (N. Y.), 1855, p. 519.

Near Tekba'a, among the same mountains, on the brink of a frightful precipice, are the ruins of Khureitit, pos-
ably a corruption of Kerioth (Josh. xv, 25), and in that case perhaps the birthplace of Judas the traitor, who was then called Iscariot, i.e. "man of Kerioth." It is impossible to survey the scenery of the place and not to feel that a dark spirit would find itself in its own element amid the seclusion and wildness of such a spot. High up from the bottom of the ravine is an opening in the rocks which leads into a true Canaanite terranean labyrinth, which many suppose may have been the Cave of Adullam, in which David and his followers sought refuge from the pursuit of Saul. It is large enough to contain hundreds of men, and is capable of defence against almost any attack that could be made. While the French fell upon Tekoa and sacked it, A.D. 1136, most of the inhabitants, anticipating the danger, fled to this cavern, and thus saved their lives. It may be questioned (Robinson, 1, 481) whether this was the actual place of David's retreat; but it illustrates, at all events, that peculiar geographical formation of the country which accounts for such frequent allusions to "dens and caves" in the narrations of the Bible. It is a common opinion of the natives that some of the passages of this particular exca- vation extend as far as to Hebron, several miles distant, and that all the cord at Jerusalem would not be sufficient to serve as clew for traversing its windings. See ODOLLAM.

One of the gates of Jerusalem in Christian times seems to have borne the name of Tekoa. Arculf, at any rate, mentions the "gate called Tescuits" in his enumeration of the gates of the city (A.D. 700). It appears to have led down into the valley of the Kidron, probably near the southern end of the east wall. But his description is not very clear. Possibly this Jerome alludes in the singular expression in the Epit. Paulæa (§ 12), "... revertar Jerosolymam et per Theccum et Antonianum montis Oliveti cruscem apud Thamali." The Church of the Piscina de Thamali on the summit of Olivet would just be opposite a gate in the east wall, and the "glittering cross" would be particularly conspicuous if seen from beneath its shadow. There is no more prima facie improbability in a Tekoa gate than in a Bethlem, Jaffa, or Damascus gate, all of which still exist at Jerusalem. But it is strange that the allusions to it should be so rare, and that the circumstances which made Tekoa prominent enough at that period to cause a gate to be named after it should have escaped preservation. See, in addition to the above authorities, Reland, p. 1028; Senecio, p. 24; Raumer, Palladina, p. 219; Turner, Tour ii, 240; Ibry and MangLes, p. 344; Tristram, Land of Israel, p. 402; Schwarz, Palest., p. 114; Thomson, Land and Book, ii, 424; Porter in Murray's Handbook, p. 251; Bidecker, Palestine, p. 232.

Teko'ite (Heb. with the art. hat-Tekokit), תְּכֹוֹיִּים [in 2 Sam. xxii, 26; Neh. iii, 27; יְּכֹוֹיִּים], patria from Tekoa; Sept. ἰθωκών and ἰθωκ, v. r. ἰθωκών and ἰθωκ; Vulg. Teccotes, Thecotes, and de Thcoes), an inhabitant of Tekoa (v. q.), an epithet of the son of Ikkeh, one of David's warriors (2 Sam. xxiii, 20; 1 Chron. xi, 28; xxvii, 9). The name survived the Captivity (Neh. iii, 5, 27).

Tel' Stragul'a, a term used to designate the upper covering for the holy table when not being used for the sacrifice. It is commonly called the altar pro- tector.

Tel-ah'ab [many Tel-abah] (Chald. Tel Ahab, תֶּל-אָבָּה, corh-hill; Sept. Μιλαπός; Vulg. Ad acrem novumare frugum), was probably a city of Chaldea or Babylonia (Exx. iii, 15), not of Upper Mesopotamia, as generally imagined (Calmet, ad loc.; Winer, ad loc.). The whole scene of Ezekiel's preaching and visions seems to have been Chaldaea proper; and the river Chebar, as already observed (see Chbbar), was not the Khabur, but a branch of the Euphrates. Tolema mem in this region a Telo-bencana and a Tel-ahaha (Geop. v, 20); but neither name can be identified with Tel-abib, unless we suppose a serious corruption. Tolema and Thelephatha of Ammian. Mar. (xxiv, 2; xxv, 8) have likewise been compared; but they are equally uncertain. The element "Tel," in Tel-abib, is undoubtedly "hill." It is applied in modern times by the Arabs especially to the hills which lie on the site of ruined cities all over the Mesopotamian plain, an application not very remote from the Hebrew use, according to which "Tel" is "especially a heap of stones" (Genesius, ad loc.). It thus forms the first syllable in many modern as in many ancient names throughout Babylonia, Assyria, and Syria (see Assen- mer, Bibl. Orient. iii, 784).

Tel'ah (Heb. Te'akah, תֶּל-אָוָה, breach [Genesius] or מָחָר [Furrus]; Sept. Θολάν v. r. Θολίκα; Vulg. Thale), son of Resheph and father of Tahar, in the lineage between Ephraim and Joshua (1 Chron. vii, 25). B.C. ante 1658.

Tel'aim [some Tela'tim] (Heb. with the art. hat-Telaim, תְּלַאִים, the young lambs [in Isa. xi, 11]; Sept. iv Ταλκούν; Vulg. quasui agnos), a place where Saul collected and numbered his forces before his campaign against the Amalekites (1 Sam. vi, 4). It is strange that both Bezek and Jotham are intersected by a road 6Galgal, which was in the valley of the Jordan, near Jericho, and certainly not a fitting place to marshal an army to war with the Amalekites, seeing it would have to march through the wild passes of the wilderness of Judah (Ewald, Geik. iii, 60). The Targum renders it "lamps of the Passover," according to a curious fancy, mentioned elsewhere in the Jewish books (Yal- kûn on 1 Sam. iv, 4, etc.), that the army met at the Passover, and that the census was taken by counting the lambs. This is partly endorsed by Jerome in the Vulg. A similar fancy is found in the Midrash in reference to the same Bezek (1 Sam. vi, 8), which is literally as meaning "broken pieces of pottery," whereby, by as counters, the numbering was effected. Bezek and Telaim are considered by the Talmudists as two of the ten numberings of Israel, past and future. It is probably identical with Telm (q. v.), the southern position of which (Josh. xv, 24) would be suitable for an expedition against Amalek; and a certain support is given to this by the mention of the name (Thalam or Thelam) in the Sept. of 2 Sam. iii, 12.

Tel'as'sar (Heb. Tel'asser, תְּלָאָסָר [in Isa.], fully יְשָׁרָה [in Kings], Assyrian hill; Sept. Θεωδησίων, Θα- μᾶς v. r. Θαλασσαί, Θαμᾶω; Vulg. Telcasser, Thalas- sar) is mentioned in 2 Kings xix, 12 (A. V., "Thelas- sar") and in Isa. xxxvii, 12 as a city inhabited by the "children of Eden," which had been conquered and was held in the time of Sennacherib by the Assyrians. In both passages it is connected with Gozan (Gauzanitis), Haran (Carrha, now Harran), and Rezeph (the Razapya of the Assyrian inscriptions), all of which belong to the hill country above the Upper Mesopotamian plain, the district which Japhet is said to have crossed the rivers. See GOZAN; HARAN; MESOPOTAMIA. It is quite in accordance with the indications of locality which arise from this connection to find Eden joined in another passage (Ezek. xxvii, 29) with Haran and Assur. Telassar, the chief city of a tribe known as the Beni-Eden, must have been in Western Mesopotamia, in the neighborhood of Haran and Orfa. The name is one which might have been given by the Assyrians to any place where they had built a temple to Assur, and hence perhaps its application by the Targums to the Besen of Gen. x, 12, which must have been on the Tigris, near Nineveh, and within Mesopotamia. See RUSEN. Ewald (Geik. iii, 301, Note 8) identifies it with a heap of ruins called Teledan, south-west from Racs, the Theleda of the Pst. Tab. (Xi, c), not far from Palmyra. It is in favor of this that in that
case the places mentioned along with it in the pass-
ages cited stand in the order in which they would
naturally be attacked by a force invading the territory
from the east, as would the Assyrians (Thenius, Erzeg.
Thucyd. II, 37), ad loc.). Hävernick's identification (Esch.
p. 476) with the Thalatha (Thalathvs) of Tolemy (v, 20,
4) would place it too far south. The Jerusalem Targum
of Judges (v, 2) identifies it with Elath, or Elasa in
the territory of Artemisia (Ptolemy, vi, 176; Strabo,
vii, p. 744). Layard thinks (Nineveh, i, 257) that
it may be the present Tel Afer, or perhaps Aristan
(Nish and Bab. p. 268), although no name like it is found
there now.

**Tel Eli** (תליאו or תליאולא, the perfect), a name which appears in the sacred mysteries, and denoted such as had been initiated. Baptism was denominated teləy; to join the Church was styled ɫiصلا ɫi in təl ɫkən, to attain to perfection; the participation of the eucharist, which followed immediately on baptism, was called teləy ɬələw, perfection of perfections; and the absolution granted in the eucharist was called təl ikən, the perfection of a Christian. The word is, however, used frequently in the New Testament, not indeed in this sense, but in relation to Christian perfection.

**Teles.** See **Telesio**

**Telesiōtério** (τελεσιώτηρο, more perfect), one of the different classes of catechumens among the ancients; the perfect ones, or the prolicists, who were the immediate candidates for baptism.

**Telem** (Heb. ɫi, ᵔק, oppression [Genesius; but
First, place of tempest]), the name of a town and also of
a man.

1. (Sept. ɬlum v. r. næmū; Vulg. Telem.)
One of the cities which are described as “the uttermost of the tribe of Judah towards the coast of Edom south-
ward” (Josh. xv, 24, where it is mentioned between the southern Ziph and Bealoth). It is not again mentioned except we regard it as identical with Telaim (q. v.)—a theory which seems highly probable (Roland, Palest. p. 1029). Telem is mentioned by Eusebius and Jerome as a city of Judah, but they appear to have been igno-
rant of its site (Onomast. s. v. “Telem”). The Sept. (Vat.) in Josh. xix, 7 adds the name ɬlal in between, as if near to, the town of Tema. This is
said by Eusebius (Onomast.) and Jerome to have been
then existing as a very large village called ɬlula, six-
teen miles south of Eleutheropolis. The Sept. of 2 Sam. iii, 12, in both MSS., exhibits a singular variation from
the Hebrew text. Instead of “on the spot” (Naghêl: A.
V. incorrectly “on his behalf”), they read “to Thai-
laym (or Telaim) where he was.” If this variation
should be substantiated, there is some probability that
Telem or Telaim is intended. David was at the time
king, and quartered in Hebron, but there is no reason
to suppose that he had relinquished his marauding hab-
bits; and the south country, where Telem lay, had for-
merly been a favorite field for his expeditions (1 Sam.
xxi, 11). The latter of these points, however, is a trace
of the ancient Telem is found in the Arab tribe Dhuljam, which gives its name to a district lying south-east of Beersheba, is not altogether improbable, especially as the Arabic and Hebrew words are cognate (The Noye, p. 87; comp. Robinson, Bibl. Res. ii, 102). Rabbi Simeon (b. 100) thinks it differs from Telaim, and he states that there is still “a district south of Madera called Tulum,” doubtless referring to the above Dhuiljam. He also cites a reference from the Midrash (Koheleth, v. 10) to a certain Menahem Talmia, as if a resident of Telem. If a more precise location of the town be sought, it may perhaps be found in the “small site with foundations, called Sudeid,” men-
tioned by Dr. Robinson as lying in the above region
(Bibl. Res. i, 102), six miles south-east of Tel Arad. See TOCHEN.

2. (Sept. ɬlum v. r. Telam and Telamâ; Vulg.
Telem). One of the Temple porters who denounced his
Gentile wife after the Captivity (Ezra x, 24). B.C. 458.

**Telemachus**, an Asiatic monk and martyr who is
justly renowned for the act of daring self-devotion by
which he caused the gladiatorial combats at Rome
to be abolished. In the year 404, in the midst of the
spectacles of the amphitheatre, Telemachus rushed into
the arena and tried to separate the gladiators. The
spectators stoned him to death, but the emperor Honorius
proclaimed a martyr, and soon after abolished the
gladiatorial combats. Some doubt has been thrown
upon the story on account of the absence from the Theo-
nic reports of any mention of the saint, and the silence of
the Syrian fathers, and no evidence can be produced to show that there were any gladiatorial fights after this period, although
we know that the combats of wild beasts continued till
the fall of the Western Empire. See Smith, Dict. of
Bibl. and Mythol. s. v.

**Telesology** (τέλεσολογία, an end, and λέγος, discourse) is
the doctrine or general philosophical discussion of the
subject of causes. It may be ultimate, reaching to God,
or proximate, contemplating the more immediate
purpose. The word teleology is applied to the argument
from design in proof of the Deity. Also, when a na-
ture philosopher assigns the purpose or end of any natural
arrangement, as the offensive or defensive weapons
of an animal, he is said to give a teleological explica-
tion. “Existentia must be considered as standing in relation,
not merely to cause efficientes (to their im-
diate causes), but also to cause finales; indeed, the
cause efficientes themselves must be conceived as moved
by the cause finales, or, in other words, by the eternal
rational ends meant to be subserved by created objects,
which ends, although in one respect yet awaiting real-
ization in the future, must in another respect be sup-
posed to be already operative. We cannot fully under-
stand realities unless we look forward to the results inten-
tended finally to be attained. Present actualities thus
acquire a double significance and receive a double ex-
planation. The whole of modern speculation has a
teleological character” (Martenisen, Christ. Dogmat. p. 78 sq).

**Telepta** (or Tella), Council of, properly Zella
(q. v.).

**Telesphorus**, pope, is said to have been of Grecian
family, and to have occupied the see of Rome from A.D.
126 to 135. Our knowledge of him is also rather segre-
gated. An interpolated passage in the Chronicon of E-
sebius and a discourse smuggled into the works of Am-
brose make the statement that Telesphorus had made
the regulations of fasting more strict, that he had ex-
tended the fast before Easter to cover seven weeks, and
that he directed three masses to be said and the Gloria
in Excelsis to be sung in the night before Christmas.
He is reputed to have energetically contended against
the heretical teachings of Martin and Valentine, and
to have died a martyr's death. See Herzog, Real-En-

**Telearches** (τελαρχής), a Greek term for a
consecrator.

**Telearchkias** (τελαρχιας), a Greek term sign-
ifying consecrating.

**Teleto** (or Telites), a term in the Latin Church for
the holy eucharist. See **Telesio**

**Tel-hare'sha** (Heb. nih. 61). See **Tel-Hara**.

**Tel-la'sha** (Heb. [for Chald.] Tel-charsha; תהלש, hill of the artificer [Genesius, of the wood; Furst, of the Magus]; Sept. Θαλασθα v. r. Θαλασσα; Vulg. Theltharesa), one of the Babylonian towns, or vil-
lages, from which some Jews, who "could not show their father's house, nor their seed, whether they were of Israel," returned to Judaea with Zerubbabel (Ezra ii,
TELINGA VERSION 241 TELLER

69; Neh. vii, 61 [A.V. "Tel-haresha"]). It probably
was in the low country near the sea, in the neigh-
borhood of Tel-melah and Cherub, places which are asso-
ciated with it. Herzfeld's conjecture (Gesch. Isr. i, 452)
that the name is connected with the river Harus, in Susiana (Ammian. Marc. xxii, p. 323, Bp.) is very pre-
paratory.

**Telinga (or Telogooog) Version.** The Telinga
language is spoken within twenty-three miles of Ma-
dras, and prevails for about five hundred miles along
the coast, from the vicinity of Pulicat to the borders of
Orissa. The superficial extent of the entire region in
which this language prevails is about 65,000 square miles.
About 116,800 square miles. The nates are Hindūs and
number about 10,000,000. The Telinga language is also
diffused to a greater or less extent through various
countries of Southern India, in which the Tamil and
Canares are the proper vernacular languages. This
diffusion in part arises from the early conquests, dating
from the 14th century, achieved by the people of Telin-
ga in the South. Like the Romans, they endeavored
to secure their conquests and to keep the natives in
subjection by the establishment of military colonies;
and the Telinga language is still spoken by the descend-
ants of the Telogooog family who were deputed by the
kings of Vidianagar to found these colonies. The
rocaming tendencies of the Telinga people also serve to
account, in part, for the diffusion of the language. On
this subject the missionaries have remarked that "in
intelligence, migratory habits, secular prosperity, and
infrequency of return to their native land this people
are in relation to other parts of India what the Scotch
are in relation to England and the world." Benjamin
Schultze, the laborious Danish missionary, was the first
who engaged in a Telinga version of the Bible. He
commenced his translation in 1725, immediately after his
completion of the Telogooog Version, and the result of
his labors, written out of the Greek and Hebrew texts,
and finished the Telinga version of the New Test., in 1727,
and of the Old Test. in 1732, the whole bearing the title
Biblia Teluguca ex Hebraico et Graeco Textu, adhibris
multis alius Versionibus, in Linguam Telugicam Trans-
lata et Beniamino Schultzi Missionario ad Indias Ori-
entalias A. o. 1732. From some cause hitherto unex-
plained, this work was never printed; and Marsch, in the
Bibliotheca Sacra, ii, 202, says: "Quo vero tempore
in publicum prodituri sint Biblia Telugica impressa, di-
vine providentiae reservatum manebit." Schultze died in
1741, and the work was never finished. The bishop of
Telinga MSS. may be still preserved in that city. In
1805 the Serampore missionaries commenced another
version of the Scriptures in this language, and in 1809
they had translated the whole of the New Test., and
part of the Old. Owing to various causes of delay, the
New Test. was not printed till 1818, and in 1820 the
Pentateuch was published.

While the Serampore version was in progress, the
Rev. Augustus Desgranges, of the London Missionary
Society, had commenced another version and carried it
on to the end. The First Epistle to the Corinthians.
Mr. Desgranges, who had been at the mission in Tel-
gam since 1805, had the assistance of the Rev. George
Cran, also stationed there, and of Anunderay, a Telin-
ga Brahmin of high caste who had been converted to
Christianity. In 1808 Mr. Cran died, and, two years
later, in 1810, on consideration it was found that
the first three gospels were the only portions of
the translation that were in a state of readiness for the
press. Of these one thousand copies were printed at
Serampore in 1812, under the care of Anunderay.

In the meantime another version of the Telinga New
Test., a translation of the Madras Pritchett and Lee,
agents of the London Missionary Society, on the river
Vizagapatam a short time prior to the decease of
Mr. Desgranges. Mr. Lee undertook a translation of the
book of Genesis, but the preparation of the version
afterwards devolved almost exclusively on Mr. Prit-
chett, who betook himself, in the first place, to the trans-
lation of the New Test. In 1819 Mr. Pritchett's New
Test. was issued by the Madras Bible Society. He now
commenced the translation of the Old Test., but in 1820
he was stopped, in the midst of his work, by death.

In 1823 another version of the Scriptures was offered
to the Christian and Missionary Society by the Mission
also of the London Missionary Society. It was very
difficult to decide upon the relative merits of Mr. Prit-
chett's and Mr. Gordon's translation; but finally Mr.
Gordon's prevailed, and the committee of the Madras
Society resolved upon adopting his version, requesting
him to correct it to the best of the general mistake
fully with Mr. Pritchett's translation. Mr. Gordon's
important labors were closed by death in 1827. After
his decease, it was found that Mr. Pritchett's version
was, after all, more correct than had been expected,
and, after introducing certain emendations, an edition
of two thousand copies of the New Test. was printed
in 1828, accompanied by two thousand copies of Mr. Gor-
copies of the Old Test., based upon the versions of
Pritchett and Gordon, was issued from the Madras press in
1835, together with large editions of particular portions
of the Telogooog version of the New Testament. From the
different reports we learn the following facts. The report for 1856 states that "an
entire new translation of the whole Bible, executed by C. P. Brown, Esq., has been deposited by that
gentleman with this auxiliary with a view to future publication; and extracts from Genesis, Proverbs, Psalms, Malachi,
Mark, and Ephesians are in press, and will be circulated
for the opinions and criticism of the Telegooog scholars." That for the year 1858 states that the Te-
logooog revision committee appointed in 1857 had com-
pleted a new translation of Paul's epistles to the Ro-
mans, Colossians, and Philemon. It is understood that
the MSS. of James, John, and Jude, together with the four
gospels and Acts, all of which were ready for the press.
In 1868 we read: "The Old Test. has been published for
the first time, the New Test. newly translated and a
revised edition recently published." In 1866 the report
states that the "Madras auxiliary has taken upon the
question of a revision of the Telogooog Old Test., and
has appointed a committee for that purpose, on the
same plan as that of the Tamil revision committee.
The version of the Telogooog New Test. now in use was
adopted in 1856, and, after revision by a committee ap-
pointed for the purpose of a revision of the Telogooog
Test., was published in 1858. See The Bible in Every Land, and the Annual Re-
ports of the British and Foreign Bible Society. (B. P.)

Tellor, Romanus, a Lutheran divine, was born
Feb. 21, 1703, at Leipzig, where he also died, April 5,
1756, as doctor and professor of theology and pastor
of St. Thomas's. He wrote, Dissertation, Sacrarum
Causarum Herememit. Spectantium Decem (Lips. 1745):—
D. Hollas: Examen Theol. Acroam. denuo edito et An-
imadversera, aucti; Demonstratio. Homilet.-theologica (Ibid. 1728); new edition, Institut. Theologiae Homilet.
Method. Scientiae Sacrae Deponent, et Homileticae (Ibid. 1741). In connection with his associate. Brecker, and Dietzschel,
he published, Bibel, d. i. vollständige Erklärung der heili-
gen Schrift aus dem Engliche (Ibid. 1748, 19 vols.). See
Winer, Handbuch der theol. Literatur, i, 107, 186, 297;
ii, 99, 798; Fürst, Bibl. Jud. iii, 413. (B. P.)
TELLER

Tellier, Wilhelm Abraham, a leading theologian of the "enlightenment" party in the last quarter of the 18th century, was born in 1734 at Leipsic, where his father was then professor and pastor. In 1755 he was made catechist and bachelor of theology, and began with his earliest literary production to display his sympathy with the liberal school of theologians. He turned his attention to the translation of the text of the Old Testament after the manner of Michaelis. In 1756 he published a Latin translation of Kennicott's dissertation on Hebrew text-criticism. In 1761 he was made general superintendent and professor at Helmstedt. In 1764 he issued his Lehrbuch des christlichen Lehrens, which contained the advanced theological views to which he had attained, and alarmed the faculties and consistories. His position was that of the first stage of rationalistic "enlightenment," and its most noticeable trait a revulsion against the authority of traditional beliefs. The excitement occasioned by its appearance was such that the whole edition was confiscated in Electoral Saxony, and that he retained his position at Helmstedt with serious difficulty. From this unpleasant situation he was extricated by an appointment to Cologne on the Spree as provost and member of the high consistory, where was the very heart of the party of progress, and where he felt free to publish to the world his views. He did this in a Wörterbuch d. Neuen Testaments (1772), and afterwards in six editions, whose preface contained an appeal to preachers that they should expound not only the words, but also, and much more, the ideas, of Scripture, because the latter contains not only Hebrew and Greek forms of expression, but also the Hebrew and Greek forms of thought. A further opportunity of showing his independence occurred in 1792 in connection with the trial of a preacher named Schulz, of Gielsdorf, for departure from the standards of the Lutheran Church. The opinion of the high consistory having been that certain articles of the Lutheran form of Church government every person is constituted his own judge in matters pertaining to the faith, and that all such matters must be determined by Scripture. Schulz was acquitted, but the members of the chamber were afterwards fined and provoked Teller was suspended for three months because of this action. The latter nevertheless proceeded, in the same year, to publish a more complete statement of his views in the work Die Religion der Volkkommenen, whose theme was the perfectibility of Christianity. In 1798 he received an address from Jews requesting admission into the Christian Church without the imposition on them of a Christian creed; but the high consistory negatived the request, though with regret, and with a promise to impose on the petitioners no new disabilities. Teller died Dec. 9, 1804. His more important works have been mentioned above. He was not popular as a preacher, but his sermons were printed in a third edition as early as 1792. He published the Neues Magazin für Prediger, whose tenth volume appeared in 1801, which was also well received, even among Roman Catholic clergyman. In addition to the volumes devoted to the Torreed (Scriptur-Interpretation; and he was an important contributor to the Allgemeine deutsche Bibliothek. See Nicolai, Gedächtnisschrift auf Teller (1807); Summarische Lebensnachr., appended to Trocheel's memorial discourse; Herzog, Real-Encyklop. s. v.; Hagenbach, Hist. der Churtheologie, i. 457, 458; 1806.

Tellier, Michael, E. a Jesuit and father confessor to Louis XIV, was born at Vire, in Normandy, in 1643. He entered the Order of Jesuits in his eighteenth year, and at first devoted himself to historical studies, whose fruit was an edition of Quintus Curtius in 1678; but he eventually engaged in particularly one of the most violent opponents of the Jansenists. In 1672, 1675, and 1684 he published fulminations against the Mons (properly Amsterdam) version of the Bible by De Sacy and other Port-Royalists. He co-operated with Father Bouhours in his translation of the Scriptures, however, and zealously defended the Jesuit missionaries to China against the well-founded complaints raised against them. In 1699 he issued a Histoire des Cinq Propositions de Jansenius under the name of Dumas, and in 1700 he assoiled Quenel (q. v.) as a rebel and heretic. He was named provincial of his order, and in 1709 confessor to the king. In the latter capacity he succeeded in inducing the king to procure from pope Clement XI the condemnation of the New Test with Quenel's notes. The bull Unigenitus, which occasioned so much controversy in France, and was forcibly accepted by the king, is justified primarily upon Tellier. His domicile ended, however, in 1710, on the death of Louis, and he was removed first to Amiens and afterwards to La Fleche. He died at the latter place in 1719. —Hertzog, Real-Encyklop. s. v.

Tell-me'lah (Heb. Tel-me'alah, טֵל מֵאָלָה, tell-mé'lah, salt hill; Sept. Θεομιλχι and Θεομιλβι, v. r. Θεομιλχι and Θεομιλβι; Vulg. Thelmalia) is joined with Tel-harsa and Chehi as the name of a place where a returned who had lost their pedagogue after the Captivity (Ezra ii, 59; Neh. iii, 61). It is perhaps the Thelme of Polomy (v, 20), which some wrongly read as Theame (Θεάμη) for Θεάμη (Θεάμη), the low salt tract near the Persian Gulf, whence probably the name (Gesen, Lex, Heb. s. v.). CHERUH (Vulg. Chireh) may be pretty surely identified with Polomy (Thelme, Chireh) in the north of the region. Herzfeld (Geach. Isr. i, 492) insists that it designates the province of Melitene according to Polomy (vi, 3), adjoining Susiana west of the Tigris; but Polomy (v, 7, 5) and Phiny (v, 5) know only a Melitene on the border of Cappadocia and Armenian Major. 'Te'ma (Heb. 'Te'ma, תֵּמָא [Job vi, 19 more concisely 'Tem'ma, תֵּמְמָה] in the Arab. tem'ma, a desert) [but Geach. Tem'ma, i.e. South; Sept. Ταμ'μα, Vulg. Temma in [but in Isa. 110], the name of a person and of a tribe or district. 1. The ninth son of Ishmael (Gen. xxv. 15; 1 Chron. i, 50). B.C. post 2020. 2. The tribe descended from him mentioned in Job vi, 19, "The troops of Tema looked, the companies of Sheba waited for them," and by Jeremiah (xxx. 20), "Desan, Tema, and Buzz;" and also the land occupied by this tribe: "The burden upon Arabia. In the forest in Arabia shall ye lodge, O ye travelling companies of Dedanim. The inhabitants of the land of Tema brought water to him that was thirsty, they presented with their bread that he fled" (Isa. xxxi, 15, 14). The name and the tribe appear to have been known to classic writers. Polomy cites the name of Tem'me (Θιμὺς) among those of Arabia Deserta, and apparently in the centre of the country (Geogr. v, 19). Pliny states that "to the Nabataei the ancients joined the Thimanes" (Hist. Nat. vi, 92). It may be questioned, however, whether he refers to the Biblical Teman or Tema.

There can be little doubt that the Thimme of Potlomy is identical with the modern Teman, an Arab town of some five hundred houses. It is situated on the western border of the province of Najd. Wallin, who visited it in 1848, thus describes it: "Temán stands on a mass of crystalline limestone, very slightly raised above the surrounding level. Patches of sand, which have encroached upon the rock, are the only spots which can be made culturable, but there are considerable date plantations, which yield a great variety of the fruit, of which one kind is esteemed the best flavored in all Arabia. Grain is also cultivated, especially oats of a remarkably good quality, but the produce is never sufficient for the wants of the inhabitants. The great-
through Mesopotamia as well as in Nadj, viz. a bucket of camel-skin hung to the end of a long lever moving upon an upright pole fixed in the ground" (Journal R. G. S. xx, 352). Arab writer states of Teman that "it is a name of the Syrian desert, which is commanded by the castle called El-Ablik [or El-Ablik el-Fard], of Essemawal [Samue] Ibn-Adiyyah the Jew, a contemporary of Irak-el-Kays" (A.D. cir. 550); but according to a tradition it was built by Solomon, which points at any rate to its antiquity (comp. El-Bekri, in Marâid, iv, 339). But as the remains of the castle now exist, nor does even the name "live in the memory of the present inhabitants. A small ruined building, constructed of hewn stone, and half buried in sand and rubbish, appeared to me to be too incalculable to admit of its being identified with the celebrated old castle" (ut sup. p. 539). This fortress seems, like that of Dura-el-jebel, to be one of the strongholds that must have protected the caravan route along the northern frontier of Arabia; and they recall the passage following the enumeration of the sons of Ismael: "These [are] the sons of Ismael, and these [are] their names, by their towns, and by their castles; twelve princes according to their nations" (Gen. xxv, 16).

It seems probable that the ancient Arab tribe of Beni-Temim, of whom Abudefda speaks (Hist. Anteislam, ed. Fleischer, p. 198), were connected with this place, and were the more recent representatives of the children of Temim. Forster would further identify the tribe of Temim with the Beni-Temim, who had their chief stations on the shores of the Persian Gulf; but his proof does not seem satisfactory (Geog. of Arabia, i, 289 sq.).

It is interesting to find memorials of the nation founded by this son of Ismael, not only among the most ancient to classic and Arab geographers, but existing to the present day, in the very region where we naturally look for them (see D'Aville, Geog. Ancienne, ii, 250; Abudefda, Descript. Arab. p. 6 sq.; Seetzen, in Zach. Monat. Corresp. xviii, 374). Like other Arab tribes, the children of Temim had probably a nucleus of a few of them, who, under the name of Temim, while their pasture-grounds extended westward to the borders of Edom, and eastward to the Euphrates, just as those of the Beni Shummar do at the present time.

Teman (Heb. Te'myan, יִדְם, the right, also the south, as often; Sept. Θαμανιαν v. r. Θαμανιαν and Θαμανιας; Vulg. Theman v. r. Merides, Auster), the name of a man, a tribe, and a country.

1. The oldest son of Eliphaz the son of Esau (Gen. xxxvi, 11). B.C. cir. 1960. It would appear that Teman was the first dace or prince (מִשְׁמַרְיָה) of the Edomites (v. 15); and that, having founded a tribe, he gave his name to the region in which it settled (v. 34).

2. The country of the Temanites, which formed in after-ages the chief stronghold of Idumean power. Hence, when the Lord by the mouth of Ezekiel pronounced the doom of Edom, he said, "I will make it desolate from Teman" (xxx, 13). The Temanites were celebrated for their courage; hence the force and point of Obadiah's judgment: "Thy mighty men, O Teman, shall be disdained" (ver. 9). They were also famous for wisdom, as is shewn by their knowledge of which characteristic, and perhaps with special reference to Job's friend Eliphaz the Temanite, Jeremiah mournfully asks, "Is wisdom no more in Teman? is counsel perished from the prudent? is their wisdom vanished?" (Jer. xlix, 7; Job ii, 11; comp. Baruch iii, 22; See Pusey, On Obadiah, ver. 8).

The geographical position of "the land of Teman," or more literally, the "land of the Temanite," as it is called in Gen. xxxvi, 34 (יעד ת אמנ; ידנה; Sept. εἰς τὴν γῆν Θαμανιαν), A. V. "Temanii," is nowhere defined in Scripture; but there are several incidental notices which tend to fix it with considerable certainty. 1. It is intimately connected with Edom, and manifestly either formed a province of it, or lay upon its border (Jer. xlix, 7, 30). In one passage it is included in the same curse with Bozrah, the capital of Edom: "I will send a fire upon Teman, which shall devour the palaces of Bozrah" (Amos i, 12). 2. Habaškuk joins Teman in parallelism with Mount Paran (iii, 9); and this might probably indicate that it lay between them, and therefore on the south and south-east of the former (Ezek. xxxv, 13). See Dedan. On the whole, it would appear that Teman was the name given by Esaus distinguished grandson to his possessions in the southern part of the mountains of Edom. As the tribe increased in strength and wealth, they spread out over the region extending southward along the shore of the Gulf of Akabah, and eastward into Arabia. This view is confirmed by a passage in the book of Joshua, hitherto considered obscure and difficult, but which the advances recently made in Biblical geography tend to elucidate. The sacred writer commences his description of the territory of Judah in these words: "This then, was the lot of the children of Judah; even to the border of Edom the wilderness of Zin southward was the uttermost part of the south coast" (xxv, 1). Besides being unintelligible, this is not a literal translation of the Hebrew; and the renderings of the Sept. and Vulg. have been generally rejected. The reading of the latter is: "And this land was appointed for the habitation of Edom, the wilderness of Zin to the Negeb (נגב) from the extremity of Teman" (לְנֶבֶךְ לְנֶבֶךְ), the writer is describing the south-eastern section of the territory. It extended along the border of Edom, including the wilderness of Zin from the extreme (north-western) corner of Teman to the Negeb. Teman is unquestionably a proper name, as is shown by the word ידנה being placed before it. So also is Negeb. The wilderness of Zin extended up as far as Kadesh, and a part of it was thus allotted to Judah. Teman included the mountains of Edom as far north as Mount Hor, opposite Kadesh; and thus the territory of Judah reached its extreme north-western corner. The Negeb included the downs along the southern base of the Judean hills, and lay between them and the wilderness of Zin. The above translation is found in part in the Arabic version, and is adopted here as the best.

The accounts given by Eusebius and Jerome of Teman are not consistent. They describe it as a region of the rulers of Edom in the land of Gebalitis; and they further state that there is a village of that name fifteen (Jerome has five) miles from Petra. But in another place they describe the country which distinguishes this Teman from one in Arabia (Onomast. s. v. "Teman"). On the map in Burckhardt's Travels in Syria, Teman is identified with the modern village of Maim, east of Petra; but for this there seems to be no authority (Winer, Biblischen Realwörterb. s. v. "Theman.") See Porter, Handbook for Spr. and Pal. and Sanhedrin. The occupation of the land by the Nabathseans seems to have obliterated almost all of the traces (always obscure) of the migratory tribes of the desert. See Edom.

Teman (Heb. Beni Teman, יִדְם; Sept. Θαμανιαν or Θαμανιας) is the title (1 Chron. i, 45; Job ii, 11 sq.) of a descendant of Teman or an inhabitant of that land. See Teman. Temeni [some Tel may be Temene] (Heb. Te'măn, יִדְם, Temâni, גנִּיס, Temânî, [Gen.] or fortuna [Furst]; Sept. Θαμανιας, Vulg. Themanii), second-named of the four sons of Ashur (q. v.), the "father" of Tekoa by his wife Naarah (1 Chron. iv, 6). B.C. cir. 1618.

Tennim or Timneh. Version. Temneh is the language spoken in the British colony, near Sierra Leone, in West Africa. At present there exists a transla-
tion of the New Test., Genesis, and Psalms. The Gospel of St. Matthew, translated by the Rev. C. F. Schlenker, was printed only in 1866, the other parts now published having been added since that time. Comp. Reports of the British and Foreign Bible Society. (R.P.)

**Temper**, the disposition of the mind, the sum of our habits, tendencies, whether natural or acquired. The word is seldom used by good writers without an epithet, as a **good** or a **bad** temper. Temper must be distinguished from passion. The passions are quick and strong emotions, which by degrees subside. **Temper** is the disposition which remains after these emotions are past, and which forms the habitual propensity of the soul. See Evans, Practical Discourses on the Christian Temper; and the various articles Fortitude, Humility, Love, Patience, etc.

**Temperance**, (σέβασμα, self-restraint), that virtue which a man is said to possess who moderates and restrains his sensual appetite. It is often, however, used in a much more general sense, as synonymous with moderation, and is then applied indiscriminately to all the passions. "Temperance," says Addison, "has those particular advantages above all other means of health, that it may be practiced by all ranks and conditions at any season or in any place. It is a kind of regimen into which everybody may put himself. It is not incommensurate to business, expense of money, or loss of time. Physick, for the most part, is nothing else but the substitute of exercise or temperance." In order to obtain and practice this virtue, we should consider it, 1. As a divine command (Phil. iv, 5; Luke xxi, 34; Prov. xxiii, 1-5); 2. As conducive to health; 3. As advantageous to the powers of the mind; 4. As a defence against injustice, lust, imprudence, detraction, poverty, etc.; 5. The example of Christ should be a most powerful stimulus to it.

**Temperance Reform.** As an organized movement, the temperance reformation is of very modern origin. For ages, indeed, wise men have deplored the miseries of the habit to whose extinction it aims; yet it is but recently that the enormous magnitude of those evils seems to have been fully apprehended, the true basis of reform recognised, and united and persistent effort made for the suppression of the gigantic monster.

I. The Habit of Drunkenness.—An interesting fact lies at the foundation of the habit of indulgence in intoxicants. Man discovered, long ago, that his mental state is affected by the action of certain drugs, and that they have power, not only to lend increased enjoyment to society, but to act as a wolf for the corresponding, and, for a brief period, lift even the despairing out of the depths. Thus Homer describes the effects of nepenthe (Odyssey, bk. iv):

"Meantime, with genial joy to warm the soul,
Bright Helen mirth a mirth-inspiring bowl,
Tempered with drugs of sovereign use, to assuage
The boiling bosom of tumultuous rage:
To clear the cloudy front of wrinkled Care,
And wash away the surges of Despair.
Charmed with that potent draught, the exalted mind
All sense of woe delivers to the wind.
Through the blazing pile he flies rapidly,
Or a loved brother grasped his life away;
Or darling son, oppressed by ruffian force,
Fell breathless at his feet, a mangled corpse:
From morn to eve, impassive and serene,
The man, entranced, would view the deathless scene."

This is a true portrait, and its own times as accurately as it did those of Homer. This state, which we have been discussing as characteristic of the term intoxication, or drunkenness, is in reality a combination of two effects, narcosis and exalination. Not only when the victim has become visibly drunk, but from the moment when the dose begins its impression, the circulation loses force, the blood cools, physical strength declines, the nerves are less sensitive, mental acumen is dulled, and every power of mind and body is lessened.

But at the very time when the drug is working this result, there is a mental exhalation, a delusive lifting-up of the spirits, which cheats the victim with a false consciousness of augmented powers. He never before felt so strong, so powerful, so intellectual, so wise, so witty; he never before had so much confidence in his own powers, or contemplated himself generally with so much satisfaction. This delusion continues, and even increases, while he is sinking rapidly into utter imbecility, mental and physical. There are some substances which have less or more of this strange potency. Those chiefly used for the deliberate purpose of producing these effects are alcohol, opium, the hemp poison (Cannabis indica), tobacco, the coca-leaf, the betel-nut, and the thorn-apple. While the general effect of these substances is the same, there is some variety in their action. Alcohol benumbs the body more rapidly than opium and Indian hemp, and tends more to noise and violence at first, and a paralytic stagger afterwards. The thorn-apple produces temporary delirium as the final symptom. The coca-leaf, tobacco, and the betel-nut are milder forms of the intoxicating principle, and seem to be used chiefly to allay mental and physical disquiet, and superinduce a feeling of ease and comfort.

But continued indulgence tends to the formation of a tyrannical habit, whose force grows out of the fact that repeated draffings produce an alteration of condition of the brain and whole nervous system. The novice experiences his dreamy joys for a brief space, and then comes out of them in a condition more or less morbid, according to the power of the dose. He generally recovers his usual condition in a day or two, and perhaps has no desire to repeat the experience; but if he repeats it again, it will not be long before he finds himself in the clutches of a new appetite, and baulked by a new and pressing want. Now, when the force of the last dose of the drug has been spent, he is in a condition of unrest, mental and physical, which may be only a slight degree of uneasiness, or amount to direct agony, according to the stage which he has reached in his downward road. From this disquiet, or distress, he knows of only one method of quick relief, and that is another dose of the same drug. And so the drug becomes the tyrant and he the slave. As the coils of the noose close, his spirit sinks, and so his body socially. At last he cares only for his drug, or rather is driven to it by the lash of remorse and horror, which come upon him whenever he is not under the spell. He cares not for poverty, rage, and dirt, for cold and hunger. He cares less for his wife and children than a tiger does for its prey or a wolf for its food. And yet, the fear of the good, the scorn of the brutal, the prayers and tears of those who love him, the wrath of the living God, have no power to move him, and in passive and hopeless shame and despair, alternating with brief seasons of attempted reform, he goes down to his doom.

II. Extent and Results of the Opium Abuses in the Asiatic peoples bear the burden of evil caused by indulgence in opium and the hemp intoxicant. Thus Europe and America groan under the woes inflicted by alcohol. During the fiscal year ending June 30, 1873, there were 105,122 retail dealers in ardent spirits in the various states and the Districts of the Union, and the total receipts from the taxes levied on distilled liquors were over $52,000,000. This is an increase over the previous year of 1082 in the number of dealers, and $2,000,000 in the receipts. The same year, 32,000,000 gallons of malt liquors paid into the Treasury over $10,000,000, making a total revenue of $63,000,000. The increased consumption of malt liquors the same year was 25,000,000 gallons. The total annual outlay in the United States for distilled and malt liquors cannot be less than $700,000,000. In England, during the year ending Sept. 30, 1878, there were 15,000 licensed vendes in London and elsewhere, and, as the result of the committee of the House of
TEMPERANCE REFORM

In 1651 the people of East Hampton, on Long Island, resolved, at a town meeting, that no one should retail liquor but such as were regularly authorized to engage in the business, and even then not to furnish "above half a pint at a time among four men." Something like a prohibitory law is said to have been passed by the town of Wethersfield, in 1766, but the nature of its provision is not sufficient to show that the word of the prohibition amounted to cannot now be ascertained. The practice of providing liquor on funeral occasions generally prevailed; and it was not until about the year 1760 that an earnest combined effort was made by the various churches to abolish it, and even this small reform was not accomplished in many situations for years.

On Feb. 28, 1777, the Continental Congress, then in session in Philadelphia, passed unanimously the following resolution:

"Resolved, That it be recommended to the several legislatures of the United States immediately to pass laws the most effective for putting an immediate stop to the pernicious practice of distilling grain, by which the most exalted and useful arts are likely to be derived if not quickly prevented."

This, however, seems to have been a war measure rather than an attempt at reform. It makes no mention of present effects, but is prompted by the fear of some future scarcity of grain, caused by the gathering of farm laborers into the army, and the consequent lessened production.

In 1789 two hundred farmers of Litchfield, Conn., united in a pledge not to use distilled liquors in their farm-work the ensuing season. In 1790 a volume of sermons, the authorship of which has been attributed to Dr. Benjamin Rush, an eminent patriot and philanthropist of Philadelphia, and a signer of the Declaration of Independence, made a powerful impression in regard to the evils of the alcoholic vice, and the physicians of the city united in a memorial to Congress, in which they recommended the prohibition of grain upon life to those of "plague and pestilence," only "more certain and extensive," and pray the Congress "to impose such heavy duties upon all distilled spirits as shall be effectual to restrain their intemperate use."

In 1794 Dr. Rush published an essay entitled A Medical Inquiry into the Effects of Intoxicating Spirits upon the Body and Mind, in which he argues that the habitual use of distilled liquors is useless, pernicious, and universally dangerous, and that their use as a beverage ought to be wholly abandoned. Still the blow was aimed at distilled spirits only, and the true ground of the reform was not yet reached.

In 1808 a society was formed in Saratoga County, N.Y., which seems to have been the first permanent organization founded for the purpose of promoting temperance. It was called "The Union Temperate Society of Moreau and Northumberland." The members pledged themselves not to drink any spirituous liquors or wine, nor offer them to others, under a penalty of twenty-five cents. The penalty for being intoxicated was fifty cents. All this looks ridiculous now; but it was a bold movement for those days, and the projectors of it were, no doubt, duly abused as madmen and maniacs.

Still, the dawn was dawning. Religious bodies began to awake. In 1812 the General Assembly of the Presbyterian Church adopted a report which urged all the ministers of that denomination to preach on the subject, and warn their hearers "not only against actual intemperance, but against all those habits and indulgences which may have a tendency to produce it."

The General Association of Connecticut, the same year, adopted a report prepared by Rev. Lyman Beecher, which recommended entire abstinence from all distilled liquors.

Thus they reached, in 1812, the position which John Wesley occupied and inculcated in his "General Rules" in 1748. And in 1818 a temperance society was formed in Fairfield County, Conn., published an appeal which goes one step further. It says, "The remedy we would suggest, particularly to those whose appetite for drink is strong and increasing, is a total abstinence from the
use of all intoxicating liquors." This, they admit, "may be deemed a harsh remedy," but they apologize for it on the ground that "the nature of the disease absolutely requires it." The convocation, at the same time, made a practical beginning of reform by excluding all spirituous liquors from their meetings.

In 1827, the American Temperance Society for the Suppression of Intemperance was formed in Boston. The society, however, aimed only to suppress "the too free use of ardent spirits and its kindred vices," and therefore accomplished little. Still, all these movements called public attention to the evil, and kept men thinking. The temperance Society for the Suppression of Intemperance, began to come more earnest and thorough, and appeals, sermons, and pamphlets began to issue from the press. Foremost among these writers was Rev. Justin Edwards, pastor of the Church at Andover, Mass., who afterwards occupied a still more prominent place in the reform movement. In 1829 Dr. Eliphalet Pratt, president of Union College, published a volume of Sermons on the Evils of Intemperance, which greatly aided the reform. In January, 1826, Rev. Calvin Chapin published in the Connecticut Observer a series of articles in which he took the ground that the only real and effective reforms depended not only on distilling laws, but from all intoxicating beverages. His position, however, was generally regarded as extreme, and he had few immediate converts to his opinions.

In February, 1826, chiefly through the instrumentality of the Maids of Temperance, a reform movement met in the city of Boston, and organized the American Temperance Society. The pledge was still the old one—abstinence from ardent spirits—but the movement was nevertheless an advance, inasmuch as the object of the society was to inaugurate a vigorous campaign throughout the country. As April, Rev. William Collier estab-
lished in Boston the first newspaper devoted to the cause. It was called The National Philanthropist, and was published weekly. This same year (1826), Lyman Beecher published his famous Six Sermons on Temperance, which in burning eloquence and powerful con-
ductions of the vice not only bore down all opposition, but set the trend of the movement. The highest character and position were identified with the reform, such as Dr. Justin Edwards, Dr. Day (president of Yale College), Gen. Lewis Cass, Edward C. Delavan, and eminent physicians, such as Drs. Massey, Hosack, and Sewell. About this time L. M. Sargent published his Temperance Tales, thus bringing into the battle a new and powerful weapon.

The reform made rapid progress. In 1831 there were state societies in all but five states, while the local organizations numbered 2200. In 1832 Gen. Cass, the secretary of war, abolished the spirit ration in the army, and issued an order prohibiting the distillation of liquors by sutlers. This action, however, seems to have been reversed by some one of his successors in office, as we find Gen. McClellan, thirty years afterwards, issuing an equivalent order in reference to the Army of the Po-
tomac.

The secretary of the navy also issued, in 1832, an order offering the men extra pay and rations of coffee and sugar instead of the spirit ration. In 1833 there were 5000 local societies, with more than a million of members, of whom it was estimated that 10,000 had been intertemperate, 4000 distilleries had been closed, and 1000 American vessels sailed without.

This year (1833) is notable for another advanced step. Experience was daily demonstrating the insufficiency of a reform which interdicted distilled liquors only. Not a few drunkards signed the pledge against such beverages and kept it, and were drunkards still. Public opinion was steadily moving towards the true ground—total abstinence from all intoxicating drinks. Mr. Luther Jackson, of the city of New York, prepared a pledge of this character, and secured a thousand signa-
tures. To him belongs the honor of inaugurating a new era in the history of the reform.

In May, 1833, the first National Temperance Convention was held in the city of Philadelphia. Four hundred and forty delegates, representing nineteen states and one territory, counselled together three days. Two important conclusions were embodied in their resolutions—first, that the traffic in distilled liquors as a beverage is morally wrong; second, that it is expedient that the laws should be so reformed as to make the total, or total-abstinence pledge acceptable. A permanent society was formed, which, under the name of the American Temperance Union, accomplished much for the cause.

The contest from this time assumed a twofold direction—one line of argument and effort aiming to dissuade the people from all use of intoxicants, and the other to-
shaping the shape of an attack upon the traffic and the laws which sanction it. Public sentiment was fast approaching the conclusion that instead of being protected by law, under the pretense of regulating it, the traffic should be prohibited by law. The Grand Jury of the city and county of Philadelphia, in 1835, in its report on the relief of pauperism, made the judgment that three fourths of the crime and pauperism are caused by the drinking habits of the people, and added, "It is our solemn impression that the time has now ar-

In 1834 Rev. Albert Barnes, of Philadelphia, published two sermons on the iniquities of the traffic; and Samuel Chipman made a personal inspection of the almshouses and jails in the state of New York, and published a report, showing how largely the alcoholic vice was responsible for crowding them with inmates. In 1835 Rev. George B. Cheever, then the youthful pastor of a church in Salem, Mass., published, under the title of Deacon Giles's Distillery, what purported to be the dream of the man. Demons were represented as working in the deacon's distillery, and manufacturing "liquid damnation,""murder," "suicide," etc., for the human employer. The stinging satire took effect. Mr. Cheever was assaulted in the streets of Salem, and was also prosecuted for slander. By a certain rum-distiller, deacon, who thought he recognised his own portrait in the deacon Giles of the dream. Mr. Cheever was convicted and imprisoned for a few days, but on his release returned at once to the attack in another dream concerning Deacon Jones's Brewery, in which devils are described as making beer, and, as they dance about the caldron, chanting the spell of the witches in Shakespeare's Macbeth—

"Round about the caldron go; In the poisoned entrails throw; Drugs that in the coldest veins Stun the senseless daemons; Herbs that, brought from hell's black door, Do double, double toil and trouble; Fire, burn; and caldron, bubble.

The assault and the prosecution called universal attention to the affair; the dreams were published everywhere, and had a great effect. In the same year, another local excitement aided the general cause. Mr. Delavan exposed the methods of the Albany brewers, whom he charged with procuring water for their business from a foul pond covered with green scum and de-
filed with the putrid remains of dead cats and dogs. Eight brewers brought suits against him, claiming damages to the amount of three hundred thousand dol-

In 1836 a second National Temperance Convention, attended by four hundred delegates, and presided over by Chancellor Walworth, was held at Saratoga, N. Y. The most important business done was the passing of a
resolution that henceforth the pledge should be total abstinence from all that intoxicates. This resolution, though offered by Dr. Edwards, supported by Lyman Beecher, and adopted unanimously by the convention, was not approved by all who claimed to be friends of the cause. Some believed the agitation was running in an ardent desire to reform other people from rum and brandy, while they themselves drank wine without scruple, fell out of the ranks of the reform, and were seen no more. Societies disbanded in every direction, prominent workers under the old pledge became silent when the new halls were opened, and once more the cry of "fanaticism" filled the air, this time with some new voices in the chorus. Still, not until this hour had the reform planted itself on the right ground and grasped the true weapons of its warfare. The people rallied around the new banner, and the work went on with more efficiency than ever before. In January, 1837, the Journal of the American Temperance Union, edited by Rev. John Marsh, was established, and did valiant service till 1865, when it was superseded by the National Temperance Advocate.

In 1838 began the legislative war against the traffic as it was seen in many cities and defeats, and will probably see many more before the final victory. In response to growing public sentiment, the license laws of several states were made more stringent. Massachusetts passed a law prohibiting the sale of alcoholic liquors in less quantity than fifteen gallons. In 1839 Illinois passed a law with a limit of thirty gallons. Illinois adopted what would now be termed "local option." The universal agitation on the subject created general alarm among those interested in the manufacture and sale of alcoholic drinks, and they, too, began to organize and collect funds to be used at the polls and in legislative halls to stunt the reform. So far cause advanced. Temperance organizations, temperance journals, lectures, and labors of every kind were multiplying. Good news of progress came from England, and from father Mathew, a Catholic priest in Ireland, who had given himself to reform work and had achieved marvellous successes.

In 1840 the "Washingtonian" movement began in Baltimore. Six hard drinkers, who had met for a night's carousal, suddenly resolved to reform, signed a total-abstinence pledge, and formed a society for active labor. They held meetings, recited the simple story of their former habits, and they were of the most hopeless victims of the vice to join them. Wonderful results followed, the work spread, and in the space of two or three years it is estimated that one hundred and fifty thousand inebriates had signed the pledge. Immense good was done, and yet the movement soon began to wane. The demand for reformed drunks as lecturers became so great as to bring into the field a crowd of irresponsible men; some without sufficient intelligence for their position, others lacking in principle. These made a trade of the business; they sneered at all workers who had no drunken experiences to relate, abusive language to assault the reformer. Still other in extravagant descriptions of their past lives. Soon that which began as an agonizing struggle for life became a merry popular amusement; the funniest lecturer got the most invitations and the best pay; and the movement, powerful as it was at one time, broke down under the load of the ignorant, unprincipled, and foolish operators who, for their own profit, piled their weight upon it. Still, bitterly as the friends of temperance were disappointed by the collapse of the Washingtonian episode, the general cause continued to advance. In the ten years ending in 1846, while the population of the United States increased from 20,000,000 to 27,000,000, the consumption of distilled liquors had fallen from 70,000,000 to 43,000,000 gallons. In thirty years the number of distilleries had fallen from 40,000 to 10,300.

In 1842 the order of the Sons of Temperance was founded in the city of New York. This order is the oldest of the compact organizations which not only pledge their members to total abstinence, but unite them on a plan of mutual systematic relief in times of sickness. During the thirty-eight years of its existence the order has varied greatly in numerical strength. In 1850 it was estimated to consist of 150,000 members. During the late war, the "Sons" in 1866 numbered only 54,765. Since that date they are again making progress, and now number about 100,000 members. The Independent Order of Rechabites, a society of similar character, established in England in 1835, was introduced into the United States in 1849. The growth of both organizations has been considerable rapidity. In 1845 another order, the Templars of Honor and Temperance, was established in New York city. This fraternity was originally designed to be a branch of the Sons of Temperance, whose members should pass through various degrees, and be known to each other everywhere by signs and passwords; but it was organized as an independent society. They number about 17,000 members. The discussion in regard to the morality of the license system went on with vigor. In 1846 the matter was by law submitted to the people of Connecticut and Michigan. In 1847 the debate having spread across the country, in 1846 the question was submitted to the people of the state of New York (the city of New York being excepted); several whole counties voted "no license," and five sixths of the towns and cities gave large majorities in the same direction. In 1846 Maine passed a prohibitory law, which was followed by a law in Pennsylvania. The time to render it more stringent and effective, has remained for thirty-four years the will of the people and the policy of the state, and it is to-day in full and successful operation, the glory of the commonwealth and the strong defence of its citizens.

For the twenty years (1846 to 1856) the question of license or no license was agitated in almost every part of the Union, but to give the history of the struggle in the several states would require a volume. Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, Delaware, Michigan, Indiana, Iowa, Minnesota, Kansas, and Nebraska passed prohibitory laws—some of them more than once. In most of these states, if not all, the question was submitted in some form to the popular vote, and the prohibitory principle received emphatic endorsement. In New Jersey, also, the popular voice was strongly in its favor, but the legislature, by an act in 1852, gave a license to liquor dealers in return for a tax on the profits of the business. In several states the law was declared unconstitutional by the courts. In New York it was set aside in 1856 on the ground that it destroyed the value of property, to wit, of the liquors already in the hands of the dealers. In several of the states the law was passed, submitted to the people, repealed by the people, declared unconstitutional by the courts, and then declared unconstitutional by the courts, because thus submitted to the people. An attempt was made in 1846 by the liquor interest to settle the question once for all for the whole country. With Daniel Webster and Rufus Choate as their counsel, the dealers assembled in Albany to work an amendment to the United States; but the unanimous decision of the court was that each state has a constitutional right to regulate or even totally suppress the liquor traffic.

In 1849 the first Civil Damage Law, as it has been called, was passed in Wisconsin, prohibiting the retail
trade in intoxicating liquors, unless the vendor first gave bond to support all poor persons, widows, and orphans, and pay the expenses of all civil and criminal prosecutions, growing out of or justly attributable to such traffic. Several other states followed the example of Wisconsin, and these laws have been found to be of considerable practical value.

In 1859, the cause received a new impulse from the presence and labors of father Mathew, the Irish apostle of temperance, who came to America in June, and spent sixteen months of hard work, chiefly among the Irish Catholics. Crowds greeted him everywhere, and large numbers took the pledge at his hands. It was a sublimating influence; it was a winning of a heart to whalebone.

Many pledged themselves by a sudden impulse, moved thereto by the enthusiasm of assembled multitudes, with little, clear, intelligent, fixed conviction of the evils inseparable from the habits which they were renouncing. The pope, their infallible teacher both in regard to faith and morals, had never pronounced moderate drinking a sin, either mortal or venial; and even occasional drunkenness had been treated in the confessional as a trivial offence. The retail traffic, especially in the cities, was more largely in the hands of Irish Catholics than any other class of people. Moreover, the Catholic Church wanted donations of land from city authorities, and subsidies from the public treasury for the support of its sectarian institutions, and it could obtain what it wanted only by a political alliance with the liquor interest. For these reasons the Catholic clergy, as a body, seem to have made no vigorous effort to hold the ground which the venerable father Mathew won; and the laity, of course, have felt no obligation to be wiser than their teachers.

During the period named, while the battle was raging in reference to the legalizing of the traffic, and year after year went on as fiercely as ever, the liquor interest received many helpful reinforcements from an unexpected quarter. During the twenty years previous to 1840 the immigration from Germany numbered 155,000 persons. During the twenty years between 1840 and 1860 the German immigration numbered 1,300,000. This vast multitude brought with them their predilection for beer and Sunday holidays. Under their auspices the manufacture of beer became a great business interest, and, especially in the towns and cities, saloons sprang up without number, until, in some places, there was a saloon for every score of legal voters. The distillers, brewers, and dealers of all sorts, uniting their forces, became a powerful political faction, and dared to leave out of its calculations, and before which every mean and mercenary demagogue hastened to fall on his knees.

The temperance cause is so pure, its logic so complete, so utterly unanswerable, that it might have routed all its enemies had the contest gone on without interruption. But while the line of battle, notwithstanding local repulses and temporary defeats, was steadily advancing, its progress was stayed by another overmastering appeal to the patriotism of the people. The series of events which preceded the late civil war were connected in the English newspapers with the spread of popular enthusiasm into its mighty current. The same principles and convictions which made men the foes of the alcoholic curse made them feel keenly the national peril; while those who were coining their ill-gotten gains out of the blood of their neighbors could be expected to care little for the life of the nation. Thus, while the true patriot laid aside all else to save his country from the awful peril of the hour, the selfish and traitorous liquor interest had the better chance to plot for the accomplishment of its own sordid ends.

Still, while the popular demand for better laws in regard to the traffic was being felt in current politics, the moral reform made some progress. In 1856 the American Juvenile Temperance Society was founded in the city of New York, and the next year a monthly paper for children, called the Juvenile Temperance Banner, was established. In January, 1859, four young men, who had met one Sunday evening in a liquor saloon in San Francisco, suddenly resolved to change their evil course, formed a society which they called the "Dashaways," and inaugurated an extensive movement on the Pacific coast much like the campaign of Father Mathew in the North. In the fall of 1859 a similar reform organization, originating in Chicago, spread through the state under the name of the Temperance Flying Artillery. In 1862 the spirit roused in the United States navy, which was made optional in 1852, totally ceased by order of Congress; and coffee instead of tea became the article of choice in the navy. The friends of the cause were everywhere active in their benevolent labors among the soldiers and sailors during the war.

The fifth National Convention, held at Saratoga in August, 1865, organized the National Temperance Society and Publication House, whose headquarters are at 56 Reade Street, New York, and which, by its two periodicals, the National Temperance Advocate and the Youth's Temperance Banner, and its numerous volumes and tracts, has been an efficient instrument in enlightening and stirring the public mind. In April, 1866, Congress voted the right of شركة to form a Capitol and the public grounds at Washington, and the next winter a Congressional Temperance Society, Hon. Henry Wilson president, was organized. In 1868 the "Friends of Temperance" and the "Vanguard of Freedom," the one a society of white people and the other of the freedmen, were organized in the South. In July, 1868, the sixth National Convention met in Cleveland, Ohio. Its most important resolution declares that the temperance cause "demands the persistent use of the ballot for its promotion." In 1869 women began to form associations for the suppression of the traffic. The first were in Boston, Philadelphia, and Jonesville and Adrian, Mich. This was the beginning of a tidal-wave of enthusiasm which culminated in the Ohio crusades, and crystallized in the establishment of the Woman's National Christian Temperance Union. The churches were actively at work. "Bands of Hope" were formed among the children of the West, and the principles of the license system, and the wisdom of separate political action on the part of temperance men, were everywhere discussed; and the liquor-dealers, in alarm, were busy organizing leagues and collecting funds, because, as they confessed, of the damage being done to the liquor business."

In January, 1873, the Hon. Henry Wilson introduced in the United States Senate a bill providing for a Commission of Inquiry, whose aim was to secure a thorough investigation of the evils of the alcoholic habit, and ascertain what measures are most efficient in removing or lessening these evils. This bill has been repeatedly brought forward in Congress, backed by memorials from all parts of the country, but has been defeated every time by the influence of the liquor interest. The guilty alone fear the light. In August, 1873, the seventh National Convention was held at Saratoga. It declared once again that the complete suppression of the traffic is the only effective policy, and that the time had arrived "fully to introduce the temperance issue into state and national politics," but counselled the friends of the cause to cooperate with existing political parties "where such will endorse the policy of prohibition."

In the winter of 1873-74 a novel movement began, which, under the name of the Woman's Crusade, attracted universal attention. In the town of Hillsborough, Highland Co., O., the liquor trade was doing its deadly work, and at the same time the enemies of that traffic were earnest in their labors to lessen its ravages. At a public meeting of the ladies of the town, Rev. Albert G. Leland, of a drunkard's wife, forty years ago, after long and fervent prayer, gathered a band of Christian women and waited upon the liquor-dealer, imploring him to give up his
dreadful business, and how their prayers were answered. The next day seventy-five Christian women, led by Mrs. E. J. Thompson, a daughter of ex-governor Trimble, from their homes, restaurants, hotels, and saloons of Hillsborough, and continued it till victory crowned their efforts. In eight days all the saloons were closed. The work spread from town to town and from city to city, in not a few encountering fierce opposition, but moving on in triumph, and accomplishing great and permanent good. This wonderful movement spread into other states, reclaiming thousands of inebriates, closing thousands of saloons, and giving a mighty impulse to all forms of temperance work.

At this present time (January, 1880) the reform seems to be even more prominently before the public mind than it was a few years ago. The iniquities of the traffic have been urged upon the attention of the legislatures of the states, and the laws are constantly changing, generally for the better, occasionally for the worse, as Israel or Amalek prevails, so that it is almost impossible to classify them. Maine, Vermont, New Hampshire, Ohio, and North Carolina prohibit the traffic in all intoxicating liquors. Iowa prohibits the traffic in distilled liquors, but not in wine and beer. Rhode Island, Connecticut, Illinois, Kentucky, Minnesota, Missouri, Arkansas, Texas, and the District of Columbia are under local option laws. The people of Kansas are to vote on whether to prohibit at the next election. The counties of the state, if adopted, will prohibit both the manufacture and the sale of alcoholic intoxicants. Some of the states, as New York, Ohio, and Illinois, have Civil Damages laws, which make the dealers responsible before the courts for mischief done by means of their wares. Nevada has no law on the subject. In many of the states special laws give particular counties or towns the power to prohibit, by popular vote, the trade in alcohol. Experience has given ample demonstration that where prohibitory legislation is fully sustained by public sentiment the liquor traffic can be stamped out as thoroughly as any other form of crime. All through the land the active friends of temperance, with scarcely an exception, are fixed in the conviction that the common traffic in alcoholic drinks is a crime against society, and that to license it is to commit another crime against the public welfare. This conviction grows more in weight and force every year, and in this position it may be safely predicted that there will be no retreat.

During the last decade the field of battle has become as broad as the national domain, and new and powerful forces have come into the contest. Previous to 1860, there were not more than two temperance societies among our Catholic population. Now there are probably a thousand, with an aggregate of 200,000 members. The Woman's National Christian Temperance Union, which grew out of the Ohio crusade movement, and was organized in 1864, has spread its network of societies over more than half the United States, and, by its conventions, publications, and earnest labors, is wieldling a powerful influence. The Independent Order of Good Templars, which originated in Central New York in 1851, leads all the other compact temperance organizations in numbers and continued success. It now has about 400,000 members in the United States, and perhaps 300,000 more chiefly in England and her colonies. The friends of temperance are organized, more or less thoroughly, in every state of the Union. Forty-one newspapers, the organs of the various temperance bodies, are disseminating information on all sides.

All the great religious denominations among us have given emphatic utterance to their sentiments, not only endorsing fully the principle of total abstinence, but some of them declaring, as did the General Conference of the Methodist Episcopal Church in 1873, that they "deny the right of men to use intoxicating drinks morally wrong;" recommend the use of unfermented wine on sacramental occasions; and record their conviction that the traffic in alcoholic beverages should be suppressed by the strong arm of the law. There probably is not in Christian circles any other body of people so large, and so free from the use of intoxicants, as the evangelical Protestants of the United States. The agitation among us cannot cease till the right is victorious.

IV. The Temperance Cause in Foreign Countries.

The first temperance society in the British isles was formed in New Ross, Ireland, in August, 1829. A society was formed at Greenock, Scotland, in October of the same year. Early in 1830 a society was organized at Bradford, England. The reform began, as in America, in opposition to the use of distilled spirits only; but in 1833 a society was formed at Edinburgh on the principle of total abstinence from all intoxicating drinks. The British Association for the Promotion of Temperance was formed at Manchester in September, 1835, on this basis; and the new pledge in a few years wholly superseded the old. This organization afterwards changed its name to that of "The British Temperance League." It is still laboring, with accumulating power. The United Kingdom Alliance was formed in 1835, and is still in vigorous operation and doing excellent service. Its specific aim is the "total legislative suppression of the traffic in intoxicating beverages."

The form of the Alliance, with the aim of the Reform League, is one giving "the rate-payers of each parish and township a power of local veto over the issue of licenses." A bill, drawn up by Sir Wilfred Lawrence, in accordance with this aim, has been offered in Parliament every year since 1853 without success, but not without encouraging gains. The Alliance, meanwhile, is spending a hundred thousand dollars annually in advocating the measure. The Scottish Temperance League, formed in 1844, combines both branches of the work—the reform of the victim and the legal suppression of the traffic. The temperance sentiment of the Scottish people found expression in 1854, in what is called the "Forbes McKenzie Act," a law which closes all public-houses in Scotland during the whole of the Sabbath, and on other days of the week from 11 P.M. to 8 A.M. The League has an income of about $53,000, maintains a vigorous Publication House, and keeps eight or ten lecturers constantly in the field. The Irish Temperance League was organized in Belfast in 1859, for "the suppression of drunkenness by moral suasion, legislative prohibition, and all other lawful means." It has an income of about $10,000, publishes a journal, and employs agents to labor throughout the island. The women of Great Britain and Ireland have also organized a Christian Temperance Association, meeting for that purpose at Newcastle-on-Tyne in April, 1876, and they are engaging heartily in the good work.

In Sweden a temperance society was formed in Stockholm in 1861, and some five hundred more in various parts of the kingdom during the next year. King Oscar himself became a member, and also caused tracts and papers to be regularly distributed in the army and the navy. Great benefits have followed among the people, and the reform is still progressing.

In Australia, Madagascar, India, and China the reform has begun its work, which, we trust, will never cease, in all its broad field, till the enormous vice and crime at whose extinction it aims shall be found no more among men.

V. Literature.

Many valuable works have been published which treat of the matters that form the basis of the temperance cause, amounting to thousands of pages. Among the most noteworthy: Beecher [Lyman], Six Sermons on Temperance (1823); Nott, Lectures on Temperance (1857); Permanent Temperance Documents (1857-42); Bacchus (London); Anti-Bacchus (ibid.); Carpenter, Physiology of Intemperance; Wilson, Pathology of Drunkenness; Fitman, Alcohol and the Temperance Lesson Book; Farrar, Talks on Temperance;
Lee, Text-book of Temperance; Crane, Arts of Intoxication; Hargreaves, Our Wasted Resources; Lizar, Alcohol and Tobacco; The Prohibitionist's Text-book; Bacchus Dethroned; Hunt, Alcohol as a Food and Medicine; Patton, Bible Wines, or Laws of Fermentation; Richardson, Action of Alcohol on the Body and on the Mind; Edmunds, Medical Use of Alcohol; Richardson, Medical Profession and Alcohol, and Moderate Drinking; Storey, Alcohol, its Nature and Effects; The Centennial Temperance Volume. (J. T. C.)

TEMPLE, a word used to designate a building dedicated to the worship of a deity. In this article we treat of the temple forms of edifices projected for that purpose at Jerusalem, and in doing so we present the reconstructions hitherto the latest and most approved, with strictures, however, upon their defects. See PALACE.

I. Names.—The usual and appropriate Heb. term for this structure is בֵּית יְהוָה, bēṭôt yēhôwâh, which properly denotes a royal residence, and hence the sacred name גִּבֹּרָה, gibbôrâh, is frequently added; occasionally it is also qualified by the epithet בֵּית יְהוָה, bēṭôt yēhôwâh, sanctuary, to designate in more specific terms the sanctuary within the phrase בֵּית יְהוָה, bēṭôt yēhôwâh, house of Jehovah, is employed; and in lieu of the latter other names of the Deity, especially אֱלֹהִים, 'elôhîm, God, are employed. The usual Greek word ἱερόν, hêrôn, which, however, strictly denotes the temple building or itself alone; while the more general term ἱερός includes all the associated structures, i.e. the surrounding courts, etc.

The above leading word בֵּית יְהוָה is a participial noun from the root בָּיָה, bāyah, to hold or receive, and reminds us strongly of the Roman templum, from τιμων, τιμων, locus liberatus et essestas. When an augur had defined a space in which he intended to make his observations, he enclosed it with a fence (τεμπερικός) and placed altars and curtains. In the arx this was not necessary, because there was a permanent auguraculum. The Septuagint usually renders בֵּית יְהוָה, "temple," by οἶκος or ναός, but in the Apocrypha and the New Test. it is generally called τὸ ἱερόν. Rabbinical appellations are שֵׁם הַבֵּית, 'šem bē'ôt, be'thy kam - Mikdash, the house of the sanctuary, יִרְאֶה הַבֵּית, yir'â'oth bêt, the house of ages, because the ark was not transferred from it, as it was from Gilgal after 24, from Shiloh after 369, from Nob after 13, and from Gibeon after 50 years. It is also called יִדוּת עיוּר וָאָדָם, yîdot 'ôow va-'ádâm, a dwelling, i.e. of God.

In imitation of this nomenclature, the word temple elsewhere in Scripture, in a figurative sense, denotes sometimes the Church of Christ (Rev. iii. 12): "Him that overcometh will I make a pillar in the temple of my God." Paul says (2 Thess. ii. 4) that Antichrist "as God sitteth in the temple of God, showing himself that he is God." Sometimes it imports heaven (Ps. xli. 4): "The Lord is in his holy temple; the Lord's throne is in heaven." The matters in heaven are said to be "before the throne of God, and to serve him day and night in his temple" (Rev. xvi. 7). The soul of a righteous man is the temple of God, because it is inhabited by the Holy Spirit (1 Cor. iii. 16; vi. 19; 2 Cor. vi. 16).

II. History of the Temple and its Several Successors.

1. The First Temple. — After the Israelites had exchanged their nomadic life for a life in permanent habitations, it was becoming that they should exchange also their movable sanctuary or tabernacle for a temple. There elapsed, however, after the conquest of Palestine, several centuries during which the sanctuary continued movable, although the nation became more and more stationary. It appears that the first who planned the erection of a stone-built sanctuary was David, who, when he was inhabiting his house of cedar, and God had given him rest from all his enemies, meditated the design of building a temple in which the ark of God might be placed, instead of being deposited "within curtains," or in a tent, as hitherto. This design was at first encouraged by the prophet Nathan; but he was afterwards instructed to tell David that such a work was less for the Lord of Heaven than for the son of David, from his youth, and had shed much blood, than for his son, who should enjoy in prosperity and peace the rewards of his father's victories. Nevertheless, the design itself was highly approved as a token of proper feelings towards the Divine King (2 Sam. vii, 1-12; 1 Chron. xxvii, 1-14). See also II Sam. vii. xxiv. Moreover, from 1 Kings v. and 1 Chron. xxii. David had collected materials which were afterwards employed in the erection of the Temple, which was commenced four years after his death, in the second month (comp. 1 Kings vi. 1; 2 Chron. iii, 2). This corresponds to May, B.C. 1010. We thus learn that the Jerusalem sanctuary had remained movable more than four centuries subsequent to the conquest of Canaan. "In the fourth year of Solomon's reign was the foundation of the house of the Lord laid, in the month Siv; and in the eleventh year, in the month Bul, which is the eighth, was the house finished." The foundation stone was laid in the presence of the people, and according to all the fashion of it. So was he seven years in building it." See SOLOMON.

The workmen and the materials employed in the erection of the Temple were chiefly procured by Solomon from Hiram, king of Tyre, who was rewarded by a liberal export of the products of his kingdom. Josephus adds that Hiram also supplied duplicates of the letters which passed between Solomon and king Hiram were still extant in his time, both at Jerusalem and among the Tyrian records. He informs us that the persons employed in collecting and arranging the materials for the Temple were ordered to search out the largest stones for the foundation, and to prepare them for use on the mountains where they were procured, and then convey them to Jerusalem. In this part of the business Hiram's men were ordered to assist. Josephus adds that the foundation was sunk to an astonishing depth, and composed of stones of singular magnitude, and very durable. Being closely mortised into the rock with great ingenuity, they formed a basis adequate to the support of the intended structure. Josephus gives to the Temple the same length and breadth as are given in 1 Kings, but mentions sixty cubits as the height. He says that the walls were composed entirely of large pieces of stone, so that the walls were wainscoted with cedar, which was covered with the purest gold; that the stones were put together with such ingenuity that the smallest interstices were not perceptible, and that the timbers were joined with iron clamps. It is remarkable that after the Temple was finished and consecrated, it was not dedicated by Solomon himself, but by a layman, by the king in person, by means of extemporaneous prayers and sacrifices. See SHECHEMONAH.

The Temple remained the centre of public worship for all the Israelites only till the death of Solomon, after which ten tribes forsook this sanctuary. But even in the kingdom of Judah it was from time to time decorated by altars erected to idols. For instance, "Manasseh built altars for all the host of heaven in the two courts of the house of the Lord. And he caused his son to pass through the fire, and observed times, and used enchantments, and dealt with familiar spirits and wizards: he wrought much wickedness in the sight of the Lord to provoke him to anger. And he set a graven image of the grove that he had made in the house," etc. Thus we find also that king Josiah commanded Hilkiah, the high-priest, and the priests of the second order to remove the idols of Baal and Asherah from the house of the Lord; and to destroy all the houses of the high places that were on the top of the upper chamber of Ahaz which the kings of Judah had made, and the altars which Manasseh had made in the two courts of the house of the Lord, did the king beat down, and brake them down from thence, and cast the dust of them into the brook Kidron." In fact, we are informed that, in
spite of the better means of public devotion which the sanctuary undoubtedly afforded, the national morals declined so much that the chosen nation became worse than the idolaters whom the Lord destroyed before the children of Israel (xxi. 9) — a clear proof that the possession of external means is not a guarantee for their right use. A day came, however, when the times were ripe for a change; when the fashion at court to worship Baal stood anathema, and that its repairs were neglected (xxii. 6, 7). We further learn that the cost of the repairs was defrayed chiefly by voluntary contribution, by offerings, and by redemption money (ver. 4, 5). The completion of the repairs has been attributed to Nebuchadnezzar by some, and it has been ascribed to Shishak by others. We do not know which view is correct, but the temple was most certainly restored and enriched by royal bounty, and in great measure by treasures collected by David for that purpose. There was a treasury in the Temple in which much precious metal was collected for the maintenance of public worship. The gold and silver of the Temple were, however, frequently applied to political purposes (1 Kings xv, 18 sq. ; 2 Kings xii, 18 ; xvi, 8 ; xviii, 15). The treasury of the Temple was repeatedly plundered by foreign invaders: for instance, by Shishak (1 Kings xiv, 26) ; by Jehoshaphat, king of Israel (2 Kings xiv, 14) ; by Nebuchadnezzar (xxiv, 13) ; and, lastly, again by Nebuchadnezzar, who, having removed the valuable contents, caused the Temple to be burned down (xxv, 9 sq.)

The first colony which returned under Zerubbabel and Joshua having collected the necessary means, and having also obtained the assistance of Phoenician workmen, commenced in the second year after their return the rebuilding of the Temple, spring, B.C. 535. The Sidonians brought rafts of cedar-trees from Lebanon to Joppa. The Jews refused the co-operation of the Samaritans, who, being thereby offended, induced the king Artaxerxes (probably Smerdis) to prohibit the building. It was only in the second year of Darius Hystaspis (summer, B.C. 520) that the work was really commenced. It was burnt down on the sixty-sixth year of this king, winter, B.C. 516 (comp. Ezra v and vi; Hagg. i, 15). According to Josephus (Ant. xi, 4, 7), the Temple was completed in the ninth year of the reign of Darius. The old men who had seen the first Temple were moved to tears on beholding the second, which appeared like nothing in comparison with the first (Ezra iii, 12; Hagg. ii, 3 sq.). It seems, however, that it was not so much in dimensions that the second Temple was inferior to the first as in splendor, and in being deprived of the ark of the covenant, which had burned with the Temple of Solomon. See Captivity. After the establishment of the Seleucid in the kingdom of Syria, Antiochus Epiphanes invaded Egypt several times. During his first expedition, B.C. 171, the renegade Menelaus (q. v.) procured the death of the religious refugees and the Temple, and substituted and plundered Jerusalem, June, B.C. 168. He also ordered the discontinuance of the dedication, and put a half-crown on the altar for sacrifice to Jupiter Olympus to be placed on the altar of Jehovah in the Temple (ii, 2, 5). This was "the abomination that maketh desolate." At the same time, he devoted the temple on Mount Gerizim, in allusion to the foreign origin of its worshippers, to Jupiter Zevug. The Temple at Jerusalem became so desolate that it was overgrown with vegetation (1 Macc. iv, 38; 2 Macc. vi, 4). Three years after this profanation (Dec. 25, B.C. 165) Judas Maccabeus, having defeated the Syrian armies in Palestine, cleansed the Temple, and again commenced sacrificing to Jehovah upon the altar there. He repaired the building, furnishing new utensils, and erected fortifications against future attacks (1 Macc. iv, 48-60; vi, 7; xii, 53; 2 Macc. i, 18; x, 8). Forty-five days after cleansing the sanctuary, Antiochus died. Thus were fulfilled the predictions of Daniel: "from the casting down some of the holy place (the host sanctuary), and the desolating thereof for a tempo- rem royal bounty, and in great measure by treasures collected by David for that purpose. There was a treasury in the Temple in which much precious metal was collected for the maintenance of public worship. The gold and silver of the Temple were, however, frequently applied to political purposes (1 Kings xv, 18 sq. ; 2 Kings xii, 18 ; xvi, 8 ; xviii, 15). The treasury of the Temple was repeatedly plundered by foreign invaders: for instance, by Shishak (1 Kings xiv, 26) ; by Jehoshaphat, king of Israel (2 Kings xiv, 14) ; by Nebuchadnezzar (xxiv, 13) ; and, lastly, again by Nebuchadnezzar, who, having removed the valuable contents, caused the Temple to be burned down (xxv, 9 sq.)

The first colony which returned under Zerubbabel and Joshua having collected the necessary means, and having also obtained the assistance of Phoenician workmen, commenced in the second year after their return the rebuilding of the Temple, spring, B.C. 535. The Sidonians brought rafts of cedar-trees from Lebanon to Joppa. The Jews refused the co-operation of the Samaritans, who, being thereby offended, induced the king Artaxerxes (probably Smerdis) to prohibit the building. It was only in the second year of Darius Hystaspis (summer, B.C. 520) that the work was really commenced. It was burnt down on the sixty-sixth year of this king, winter, B.C. 516 (comp. Ezra v and vi; Hagg. i, 15). According to Josephus (Ant. xi, 4, 7), the Temple was completed in the ninth year of the reign of Darius. The old men who had seen the first Temple were moved to tears on beholding the second, which appeared like nothing in comparison with the first (Ezra iii, 12; Hagg. ii, 3 sq.). It seems, however, that it was not so much in dimensions that the second Temple was inferior to the first as in splendor, and in being deprived of the ark of the covenant, which had burned with the Temple of Solomon. See Captivity. After the establishment of the Seleucid in the kingdom of Syria, Antiochus Epiphanes invaded Egypt several times. During his first expedition, B.C. 171, the renegade Menelaus (q. v.) procured the death of the religious refugees and the Temple, and substituted and plundered Jerusalem, June, B.C. 168. He also ordered the discontinuance of the dedication, and put a half-crown on the altar for sacrifice to Jupiter Olympus to be placed on the altar of Jehovah in the Temple (ii, 2, 5). This was "the abomination that maketh desolate." At the same time, he devoted the temple on Mount Gerizim, in allusion to the foreign origin of its worshippers, to Jupiter Zevug. The Temple at Jerusalem became so desolate that it was overgrown with vegetation (1 Macc. iv, 38; 2 Macc. vi, 4). Three years after this profanation (Dec. 25, B.C. 165) Judas Maccabeus, having defeated the Syrian armies in Palestine, cleansed the Temple, and again commenced sacrificing to Jehovah upon the altar there. He repaired the building, furnishing new utensils, and erected fortifications against future attacks (1 Macc. iv, 48-60; vi, 7; xii, 53; 2 Macc. i, 18; x, 8). Forty-five days after cleansing the sanctuary, Antiochus died. Thus were fulfilled the predictions of Daniel: "from the casting down some of the holy place (the host sanctuary), and the desolating thereof for a tempo-
iah war in which the Temple was again destroyed. It is in reference also to these protracted building operations that the Jews said to Jesus, “Fifty and six years was this Temple in building” (John ii, 20). See HAN-

Under the sons of Herod the Temple remained apparently in good order, and Herod Agrippa, who was appointed by the emperor Claudius its guardian, even planned the repair of the eastern part, which had probably been destroyed during one of the conflicts between the Jews and Romans of which the Temple was repeatedly the scene (Josephus, Ant. xvii, 10). During the final struggle of the Jews against the Romans, A.D. 70, the Temple was the last scene of the tug of war. The Romans rushed from the Tower of Antonia into the sac
crements of the Temple, and put to the flames all that the Jews themselves. It was against the will of Titus that a Roman soldier threw a firebrand into the north-
ern out-buildings of the Temple, which caused the con
tagions of the whole structure, although Titus him-
self endeavored to extinguish the fire (War, vi, 4). Josephus remarks, “One cannot but wonder at the accu-
racy of this period thereto relating; for the same month and day were now observed, as I said before, wherein the holy house was burned formerly by the Babylonians. Now the number of years that passed from its first foundation, which was laid by king Solomon, till this its destruction was nineteen periods, or thirty years in the reign of Vespasian, are collected to be one thousand one hundred and thirty, besides seven months and fif-
teen days; and from the second building of it, which was done by Haggai in the second year of Cyrus the king, till its destruction under Vespasian there were six hundred and thirty-nine years and forty-five days.”

The sacred utensils, the golden table of the shew-
bread, the book of the law, and the golden candlestick were displayed in the triumph at Rome. Representa-
tions of them are still to be seen sculptured in relief on the triumphal arch of Titus (see Fleck, Wissenschaft-
lische Reise, 1, plate i-iv; and Reland, De ipsa Templi Hierosolymitani in Arcu Titiano, ed. E. A. Schulze [Traj. ad Rh. 1775]). The place where the Temple had stood seemed to be a dangerous centre for the rebellious population, until, in A.D. 136, the emperor Hadrian founded a Roman colony under the name Flavia Capitolina in the room of the Temple. After some time the name was changed to Jupiter Capitolinus on the ruins of the Temple of Jehovah. Henceforth no Jew was permitted to ap-

The emperor Julian undertook, in 363, to rebuild the Temple, and, after considerable preparation and much expense, he was compelled to desist by flames which burst forth from the foundations (see Ammianus Mar-
cellinus, xxiii, 1; Socrates, Hist. Eccles. iii, 20; Sozomen, v, 22; Theodoret, iii, 13; Schrock, Kirchengeschichte, vi, 395 sq.). Repeated attempts have been made to account for these igneous explosions by natural causes; for instance, by the ignition of gases which had long been pent up in subterraneous vaults (see Michaelis, Zerst. kl. Schrift. iii, 453 sq.). A similar event is men-
tioned by Josephus (Ant. xvi, 7, 1), where we are in
fured life of the building, and the hope of the Romans that David and Solomon, was suddenly frightened by flames which burst out and killed two of his soldiers. Bishop Warburton contends for the miraculousness of the event in his discourse Concerning the Earthquake and Fiery Eruption which Defeated Julian’s Attempt to Rebuild the Temple of Jerusalem, 1730, 4to. See also De st. aulatramus Templi Hierosolymitani sub Juliano (Lips.}

1728, 4to); Michaelis (F. Holzfluss), Diss. de Templo Hier-
osolymitani Judaeis Mandato per Judeos frustra Ten-
tutae Restitutione (Hali. 1751, 4to); Lardner, Collection of Anecdotes of Abusive Temples, iv, 57 sq.; Ernest, Theol. Bibl. ix, 604 sq. R. Toury’s French translation of the works of Julian (Paris, 1821), ii, 435 sq., contains an examination of the evidence concerning this remarkable event. See also Jost, Geschichte der Israeliten, iv, 211, 254 sq.; and id., Allgemeine Ge-
schichte der jüdischen Volker, ii, 136. See TEMPLE.

A splendid mosque now stands on the site of the Temple. This mosque was erected by the caliph Omar after the conquest of Jerusalem by the Saracens in 636. Some think that Omar changed a Christian church which stood on the ground of the Temple into the mosque, but this is not so. The temple, the outer, or northern, because it is the third of the most celebrated mosques, two of which, namely, those of Mecca and Me-
dina, are in a more southern latitude. See MOSQUE.

III. Situation and Accessories of the Temple. I. The site of the Temple is clearly stated in 2 Chron. iii, 1: “Then Solomon began to build the house of the Lord at Jerusalem in Mount Moriah, where the Lord appeared unto David, his father, in the place that David had prepared in the threshing-floor of Orn (or Araunah) the Jebusite.” In south-eastern countries the site of the threshing-floors is selected according to the same principle, and we find them in the same manner on the site of windmills. We find them usually on the top of hills which are on all sides exposed to the winds, the current of which is required in order to separate the grain from the chaff. It seems that the summit of Mor-
iah, although large enough for the agricultural pur-
pates of Araunah, had not been sufficient for the plans of Solomon. According to Josephus (War, v, 6), the foundations of the Temple were laid on a steep eminence, the summit of which was at first insufficient for the Temple and altar. As it was surrounded by precipices, it became necessary to build up walls and buttresses in order to gain more ground by filling up the interval with earth. The hill was also fortified by a threefold wall, the lowest tier of which was in some places more than three hundred cubits high; and the depth of the foundation was not visible, because it had been necessary in some parts to dig deep into the ground in order to reach the solid rock. The dimensions of the stones of which the walls were composed were enormous; Josephus mentions a length of forty cubits. It is, however, likely that some parts of the fortifica-
tions of Moriah were added at a later period.

As we shall eventually see, the position and dimen

sions of the Temple seem to correspond to the requirements of the several ancient ac-
tonts of the Temple. There can be little doubt, look-

ing at the natural conformation of the rocky hill itself, that the central building always occupied the summit where the Mosque of Omar now stands. The theory of Fergusson (in Smith’s Dict. of the Bible, and elsewhere) that it was situated in the extreme south-west corner of the present platform has not met with acceptance among archaeologists. See MORIAH.

The Temple was in ancient warfare almost impregnable, from the ravines at the precipitous edge of which it stood; but it required more artificial fortifications on its western and northern sides, which were surrounded by the city of Jerusalem; for this reason there was erected at its north-western corner the Tower of Anto-

nias, which, although standing on a lower level than the Temple itself, was so high as to overlook the sacred building, and even the temple of David and Solomon, was suddenly frightened by flames which burst out and killed two of his soldiers. Bishop Warburton contends for the miraculousness of the event in his discourse Concerning the Earthquake and Fiery Eruption which Defeated Julian’s Attempt to Rebuild the Temple of Jerusalem, 1730, 4to. See also De st. aulatramus Templi Hierosolymitani sub Juliano (Lips.}
2. Many savants have adopted a style as if they possessed much information about the archives of the Temple; there are a few indications from which we learn that important documents were deposited in the Tabernacle. The fact that, after the destruction of the Temple, the book of the law was deposited in the ark of the covenant; and according to 2 Kings xxii, 8, Hilkiah discovered the book of the law in the house of Jehovah. In 2 Macc. ii, 13 we find a βιβλιασμος mentioned, apparently consisting chiefly of the canonical books, and probably deposited in the Temple. In Josephus (Wars, v, 5) it is mentioned that a book of the law was found in the Temple. It appears that the sacred writings were kept in the Temple (Ant. vi, 17). Copies of political documents seem to have been deposited in the treasury of the Temple (1 Macc. xiv, 49). This treasury, however, was plundered, was afterwards occupied by an ileot-town γαλατικος, Ναζαρης, and it contained the great sums which were annually paid in by the Israelites, each of whom paid a half-shekel, and many of whom sent donations in money and precious vessels, αναστυμάτα. Such costly presents were especially transmitted by rich proselytes, and even sometimes by pagan princes (2 Macc. iii, 3; Josephus, Ant. xiv, 16, 4; xviii, 3, 5; xix, 6, 1; War, iii, 17, 6; 13, 17, 2; Ap. ii, 26; Cont. Apion. ii, 25; xii, 659). It is said especially that Polycemy Philadephus was very liberal to the Temple, in order to prove his gratitude for having been permitted to procure the Sept. translation (Aristeas, De Translat. LXX., p. 197 sq.). The gifts exhibited in the Temple are mentioned in Luke xxi, 5, and it is said that the royal town of Polemais was given to the Temple (1 Macc. xiii, 39). There were also preserved historical curiosities (2 Kings xi, 10), especially the arms of celebrated heroes (Josephus, Ant. xix, 6, 1): this was also the case in the Tabernacle. The Temple was of so much political importance that it had its own guards (φίλακες τού ἵπτων), which were commanded by a στρατηγός. Twenty men were required for opening and shutting the eastern gate (Josephus, War, vi, 5, 3; Cont. Apion. ii, 9; Ant. vii, 5, 3; xvii, 2, 2). The στρατηγός had his own secretary (Ant. xx, 6, 2; 9, 3), and had to maintain the police in the courts (comp. Acts xiv, 1 and v, 24). He appears to have been of sufficient dignity to be mentioned together with the chief priests. It seems that his Hebrew title was שְׁמוֹר הַרְכוֹן, the man of the mountain of the house (Middoth, i, 2). The priests themselves kept watch on three different posts, and the Levites on twenty-one posts. It was the duty of the police of the Temple to prevent women from entering the inner court, and to take care that the Levites, Levitically unclean should enter within the sacred precincts. Gentiles were permitted to pass the first enclosure, which was therefore called the Court of the Gentiles; but persons who were on any account Levitically unclean were not permitted to advance even thus far. Some sorts of uncleanness, for instance that arising from the touch of a corpse, excluded only from the court of the men. If an unclean person had entered by mistake, he was required to offer sacrifices of purification. The high-priest himself was forbidden to enter the holy of holies under penalty of death on any other day than the Day of Atonement (Philo, Op. ii, 591). Nobody was admitted within the precincts of the Temple who carried a stick or a basket, and who wanted to pass merely to shorten his way, or who had dusty shoes (Middoth, ii, 2).

IV. General Types of the Temple. There is perhaps no building of the ancient world which has excited so much attention since the time of its destruction as the Temple which Solomon built at Jerusalem, and its successor as rebuilt by Herod. Its spoils were considered worthy of forming the principal illustration of one of the most beautiful of Roman triumphal arches, and Justinian's highest architectural ambition was that he might surpass it. Throughout the Middle Ages it influenced to a considerable degree the forms of Christian churches, and its peculiarities were the watchwords and rallying-points of all associations of builders. Since the revival of learning in the 16th century its arrangements have employed the imagination of Solomonic architects, and architects of every country have wasted their science in trying to reproduce its forms.

But it is not only to Christians that the Temple of Solomon is so interesting; the whole Mohammedan world looks to it as the foundation of all architectural knowledge, and the Jews still exclaim its glories and sigh over their loss with a constant tenacity, unmatched by that of any other people to any other building of the ancient world.

With all this interest and attention, it might fairly be assumed that there was nothing more to be said on such a subject—that every source of information had been ransacked, and every form of restoration long ago exhausted, and some settlement of the disputed points arrived at which had been generally accepted. This is, however, far from being the case, and few things would be more curious than a collection of the various restorations that have been proposed, as showing what different meanings may be applied to the same set of simple architectural terms.

When the French expedition to Egypt, in the first years of this century, had made the world familiar with the wonderful architectural remains of that country, every one of the conclusions which the Egyptian Temple must have been designed after an Egyptian model, forgetting entirely how hateful that land of bondage was to the Israelites, and how completely all the ordinances of their religion were opposed to the idolatries they had escaped from—forgetting, too, the centuries which had elapsed since the Exodus before the Temple was erected, and how little communication of any sort there had been between the two countries in the interval. Nevertheless, as we shall presently see, the Egyptian monuments remarkably confirm, in many respects, the ancient accounts of the Temple at Jerusalem.

The Assyrian discoveries of Botta and Layard have within the last twenty years given an entirely new direction to the researches of the restorers, and this time with a very considerable prospect of success, for the analogies are now true, and whatever can be brought to bear on the subject is in the right direction. The original seats of the Assyrian empires were in Mesopotamia. Their language was practically the same as that spoken on the banks of the Tigris. Their historical traditions were consistent, and, so far as we can judge, almost all the outward symbolism of their religion was the same, or nearly so. Unfortunately, however, it cannot be assumed that they had a nature to throw much light on this subject, and we are still forced to have recourse to the later buildings at Persepolis, or to general deductions from the style of the nearly contemporary secular buildings at Nineveh and elsewhere, for such illustrations as are available. These, although in a general way illustrative, yet by no means, in our opinion, suffice for all that is required for Solomon's Temple. For some architectural features of that erected by Herod we must doubtless look to Rome. Of the intermediate Temple erected by Zerubbabel we know very little, but, from the circumstance of its having been erected under Persian influence contemporaneously with the buildings at Persepolis, it is perhaps the one of which it would be most easy to restore the details with anything like certainty. Yet we must remember that both these later temples were essentially Jewish, i.e. Phoenician, in their style; and we may therefore presume that the copy of the ground-plan in plan, was likewise imitated in details to a very great degree. There are, however, two sources of illustration with which the Temple was historically connected in a very direct manner, and to these we therefore devote a brief attention before considering the several edifices in detail.
1. The Tabernacle erected by Moses in the desert was unquestionably the pattern, in all its essential features, of its Solomonick successor. In the gradually increasing sanctity of the several divisions, as well as in their strikingly proportionate dimensions, we find the Temple little more than the Tabernacle on an enlarged scale, and of more substantial materials. This is so obvious that we need not dwell upon it. See Tabernacle.

2. The Egyptian Temples, in their conventional style, revine, notwithstanding their idolatrous uses, a wonderful relation to both the Tabernacle and the Temple. As will be seen from the accompanying plan of the Temple of Denderah, which is one of the simplest and most symmetrical as well as the best preserved of its class, there is a striking agreement in the points of the compass, in the extra width of the porch, in the anterior holy place, in the interior shrine, in the side-rooms, in the columnar halls; and in the grandier Egyptian temples, such as the earlier portions of those at Luxor and that the height of the whole structure was 120 cubits." It is difficult to reconcile this statement with that given in 1 Kings, unless we suppose that the words λεγος τοις μεταξους equal in measures, do not signify an equality in all dimensions, but only as much as equal in the number of cubits; so that the porch formed a kind of steeple, which projected much at the front of the Temple as the roof itself was elevated above its foundations. As the Chronicles agree with Josephus in asserting that the summit of the porch was 120 cubits high, there remains still another apparent contradiction to be solved, namely, how Josephus could assert that the Temple itself was 120 cubits high, while we are told that its height was only 30 cubits. We suppose that in the book of Kings the internal elevation of the sanctuary is stated, and that Josephus describes its external elevation, which, including the basement and an upper story (which may have existed, consisting of rooms for the accommodation of priests, containing also vestries and treasuries), might be double the internal height of the sanctuary. The internal dimension of the "holy," which was called in preference ἱερός, was 40 cubits long, 20 cubits wide, and 30 cubits high. The holy was separated from the "holy of holies" (θυρεός) by a partition, a large opening in which was closed by a suspended curtain. The holy of holies was on the western extremity of the entire building, and its internal dimensions formed a cube of 20 cubits. On the eastern extremity of the building stood the porch, ἐγκαταστάσεως. At the entrance of this porch stood the two columns called Jachin and Boaz, which were 35 cubits high.

The Temple was also surrounded by a triple στάδιον, story of chambers, each of which stories was five cubits high, so that there remained above ample space for introducing the windows, somewhat in the manner of a clear-story to the sanctuary. Now the statement of Josephus shows that the stories of chambers (τὸ ἕδεσμον) was 20 cubits high, cannot, be reconciled with the Biblical statements, and may prove that he was no very close reader of his authorities. Perhaps he had a vague kind of information that the chambers reached half-way up the height of the building, and, taking the maximum height of 120 cubits instead of the internal height of the holy, he made each story four times too high. The windows which are mentioned in 1 Kings vi, 4 consisted probably of lattice-work. The lowest story of the chambers was five cubits, the middle six, and the third seven cubits wide. This difference of the width arose from the circumstance that the external walls of the Temple were so thick that they were made to recede one cubit after an elevation of five feet, so that the scarment in the wall of the Temple gave a firm support to the beams which supported the second story, without being inserted into the wall of the sanctuary; this insertion being perhaps avoided not merely for architectural reasons, but also because it appeared to be irreverent. The third story was supported likewise by a similar scarment, which afforded a still wider space for the chamber of the third story. These observations will render intelligible the following Biblical statements: "And against the wall of the house he built stories round about, both of the Temple and of the court; and he made chambers round about. The nethermost story was five cubits broad, and the middle was six cubits broad, and the third was seven cubits broad; for without in the wall of the house he made narrowed nests (τῷ ἐντόσῳ, narrowings or re-
the middle into the third. So he built the house, and finished it; and covered the house with beams and boards of cedar. And it was seven cubits broad; and the length thereof was thirty cubits. And he made curtains of ram’s skins for the house, and dyed goats’ hair. And he covered the house with precious stones for ornamentation, both the inner and outer doors. And the window posts of the house were square, three cubits; and the posts was four cubits. And he made a mast for the house of the Lord, as the manner was, with overlaying of gold. So Solomon overlaid the house with gold, both the inside of the House, and all that came within unto him; thus he overlaid it with gold. All the vessels that King Solomon made for the house of the Lord are written of it. Then came and blessed the house of the Lord. And all the people of Israel assembled to bring golden vessels, and silver vessels, of gold by weight, and of silver by weight. And king Solomon gave to the priests and Levites a quantity of gold, and silver, for the service of the house of the Lord, according to the ordinance of David his father. So Solomon made all that the entrance to the house of the Lord was richly furnished. And all the vessels that Solomon made after this kind of work in the house of the Lord are written of it. And king Solomon gave to the queen mother six hundred pound weights of gold; and twelve hundred pound weights of gold did she give him yearly: six hundred pound weights in the brazen sea, and ten brazen vases; and it seems that the sanctuary did not stand in the centre of the inner court, but more towards the west. From these descriptions we learn that the Temple of Solomon was not distinguished by magnitude, but by good architectural proportions, beauty of workmanship, and choice of materials. Many of our churches have an external form not unlike that of the Temple of Solomon. In fact, this Temple seems to have been the pattern of our church buildings, to which the chief addition has been the Gothic arch. Among others, the Roman Catholic church at Aosta is supposed to bear much resemblance to the Temple of Solomon.

2. Modern Reconstructions. — It thus appears that as regards the building itself we have little more than a few fragmentary notices, which are quite insufficient to enable us to make out a correct architectural representation of it, or even to arrive at a very definite idea of many things belonging to its complicated structure and arrangements. All attempts that have been made in this direction have utterly failed, and, for the most part, have proceeded on entirely wrong principles. Such was remarkably the case with the first great work upon this subject, the subject, the Supplement to Oudin’s Histoire de l’architec- ture, written by a suspended curtain — a contrivance still seen at the church-doors in Italy, where the church-doors usually stand open; but the doorways can be passed only by moving aside a heavy curtain. From 2 Chron. iii, 5, it appears that the greater house was also celled with fir. It is stated in ver. 2 that the weight of the nails employed in the Temple was fifty shekels of gold; and also that Solomon overlaid the upper chambers with gold.

The lintel and side posts of the oracles seem to have cresaccred a space which contained one fifth of the whole area of the platform; but the诗歌 of the door of the Temple one fourth of the area of the wall in which they were placed. Thus we understand the passage 1 Kings vi, 31-35, which also states that the door was covered with carved work overlaid with gold. Within the holy of holies stood only the ark of the covenant, but in the holy of holies stood the golden candlesticks and the altar of incense. See ALTAR; CANDLESTICK.

The Temple was surrounded by an inner court, which in Chronicles is called the court of the priests, and in Jeremiah the higher court. This, again, was surrounded by a wall consisting of cedar beams placed on a stone foundation (1 Kings vi, 36): "And he built the inner court with three rows of hewed stone, and a row of ce-
Lightfoot's, as Bähr admits, is the best of the whole, being more clear, learned, and solidly grounded in its representations. But it has chiefly to do, as its title indicates (The Temple, especially as it stood in the of the times, made little account of anything but the outward material structure, this being regarded as a sort of copy—though usually in a very inferior style of art—of some of the temples of heathen antiquity. It is only during the present century that any serious efforts have been made to construct an idea of Solomon's Temple on right principles; that is, on the ground simply of the representations made concerning it in Scripture, and with a due regard to the purposes for which it was erected, and the differences as well as the resemblances between it and heathen temples of the same area. A succession of works or treatises with this view has appeared, almost exclusively in Germany, several of them by architects and antiquarians, with special reference to the history of the building art. They differ very much in merit; and in one of the latest, as perhaps also the ablest, of the whole, the treatise of Bähr

Days of Our Saviour, with the Temple of Herod, and but very briefly refers to the Temple of Solomon. An essentially different class of writings on the Temple sprang up after the middle of the last century, introduced by J. D. Michaelis, which, in the spirit

---

Plan of the Whole Enclosure of Solomon's Temple according to Theophilus.
Entirely different from the foregoing is Prof. Paine’s idea of the Temple, arising from his interpretation of the “enlarging and winding about still upward” of Ezek. xli, 7 to mean an overjutting of the upper chambers by galleries (Temple of Solomon, p. 88). A serious objection to such an arrangement is the insecurity of a building thus widening at the top.

VI. Zerubbabel’s Temple.—We have very few particulars regarding the Temple which the Jews erected after their return from the Captivity, and no description that would enable us to realize its appearance. But there are some dimensions given in the Bible and elsewhere which are extremely interesting as affording points of comparison between it and the temples which preceded it or were erected after it.

The first and most authentic are those given in the book of Ezra (vi, 3) when quoting the decree of Cyrus, wherein it is said, “Let the house be builded, the place where they offered sacrifices, and let the foundations thereof be strongly laid; the height thereof three score cubits; and the breadth thereof three score cubits; with three rows of great stones, and a row of new timber.” Josephus quotes this passage almost literally (Ant. xi, 4, 6), but in doing so enables us to translate “row” (Chaldean, τόπος, layer) as story (βάσις, so also the Sept.)—as, indeed, the sense would lead us to infer—for it could only apply to the three stories of chambers that surrounded Solomon’s, and afterwards Herod’s, Temple; and with this again we come to the wooden structure which surmounted the Temple and formed a fourth story. It may be remarked, in passing, that this dimension of sixty cubits in height accords perfectly with the words which Josephus puts into the mouth of Herod (ibid. xv. 11, 1) when he makes him say that the Temple built after the Captivity wanted sixty cubits of the height of that of Solomon. For, as he had adopted, as we have seen above, the height of one hundred and twenty cubits, as written in the Chronicles, for that Temple, this one remained only sixty.

The other dimension of sixty cubits in breadth is twenty cubits in excess of that of Solomon’s Temple; but there is no reason to doubt its correctness, for we find, both from Josephus and the Talmud, that it was the dimension adopted for the Temple when rebuilt, or rather repaired, by Herod. At the same time, we have no authority for assuming that any increase was made in the dimensions of either the holy place or the holy of holies, since we find that these were retained in Ezekiel’s description of an ideal Temple, and were afterwards those of Herod’s. As this Temple of Zerubbabel was still standing in Herod’s time, and was, more strictly speaking, repaired rather than rebuilt by him, we cannot conceive that any of its dimensions were then diminished.

We are left, therefore, with the alternative of assuming that the porch and the chambers all round were twenty cubits in width, including the thickness of the walls, instead of ten cubits, as in the earlier building. This may, perhaps, to some extent, be accounted for by the introduction of a passage between the Temple and the rooms of the priest’s lodgings, instead of each being a thoroughfare, as must certainly have been the case in Solomon’s Temple. This alteration in the width of the Pteromata made the Temple one hundred cubits in length by sixty in breadth, with a height, it is said, of sixty cubits, including the upper room, or Talar, though we cannot help
suspecting that this last dimension is somewhat in excess of the truth.

The only other description of this Temple is found in Hecataeus the Abderite, who wrote shortly after the death of Alexander the Great. As quoted by Josephus (Cont. Ap. i, 28), he says that it in Jerusalem, towards the middle of the city, is a stone-walled enclosure about five hundred feet in length (ὁ ἔδαφος ἐκεῖ 500) and one hundred cubits in width, with double gates, in which he describes the Temple as being situated. It may be that at this age it was found necessary to add a court for the women or the Gentiles, a sort of Martius or Galilee for those who could not enter the Temple. If this, or these together, were one hundred cubits square, it would make up the "nearly five plethra" of our author. Hecataeus also mentions that the altar was twenty cubits square and ten high. Although he mentions the Temple itself, he unfortunately does not supply us with any dimensions.

The Temple of Zerubbabel had several courts (περίτοιχοι) and cloisters or cells (προσκύπτονα). Josephus distinguishes an internal and external προσκύπτονα, and mentions cloisters in the courts. This Temple was connected with the town by means of a bridge (Ant. xiv, 4).

VII. Ezekiel's Temple.—The vision of a temple which the prophet Ezekiel saw while residing on the banks of the Chebar in Babylonia, in the twenty-fifth year of the Captivity, does not add much to our knowledge of the subject. It is not a description of a temple that ever was built, or ever could be erected at Jerusalem, and can consequently only be considered as the beau ideal of what a Semitic temple ought to be. As such it would certainly be interesting if it could be correctly restored; but, unfortunately, the difficulties of making out a complicated plan from a mere verbal description are very great indeed, and are enhanced in this instance by our imperfect knowledge of the exact meaning of the Hebrew architectural terms, and it may also be from the prophet describing not what he actually knew, but only what he saw in a vision.

Be this as it may, we find that the Temple itself was of the exact dimensions of that built by Solomon, viz., an adytum (Ezek. xii, 1-4) twenty cubits square, a naos twenty by forty, and surrounded by cells of ten cubits' width, including the thickness of the walls; the whole, with the porch, making up forty cubits by eighty. The height, unfortunately, is not given. Beyond this were various courts and residences for the priests, and places for sacrifice and other ceremonies of the Temple, till he comes to the outer court, which measured five hundred reeds on each of its sides; each reed (ver. 5) was six Babylonian cubits long, viz. of cubits each of one ordinary cubit and a handbreadth, or at the lowest estimate, twenty-one inches. The reed was therefore at least ten feet six inches, and the side consequently five thousand two hundred and fifty Greek feet, or within a few feet of an English mile, considerably more than the whole area of the city of Jerusalem, Temple included.

It has been attempted to get over this difficulty by saying that the prophet meant cubits, not reeds; but this is quite untenable. Nothing can be more clear than the specification of the length of the reed, and nothing more careful than the mode in which reeds are distinguished from cubits throughout; as, for instance, in the next two verses (6 and 7), where a chamber and a gateway are mentioned, each of one reed. If "cubit" were substituted, it would be nonsense. Nevertheless, Prof. Paine has given a reconstruction of this as well as the actual Temple, for the description and dimensions in the vision are consistent with themselves and capable of being plotted down.

Notwithstanding its ideal character, the whole is extremely curious, as showing what were the aspirations of the Jews in this direction, and how different they were from those of other nations; and it is interesting here, inasmuch as there can be little doubt but that the arrangements of Herod's Temple were in some measure influenced by the description here given. The outer court, for instance, with its porticos measuring five hundred cubits each way, is an exact counterpart, on a smaller scale, of the outer court of Ezekiel's Temple, and is not found in either Solomon's or Zerubbabel's; and so too, evidently, are several of the internal arrangements. See Ezechkiri.

VIII. Herod's Temple.—The most full, explicit, and trustworthy information on this subject is contained in that tract of the Jewish Talmud entitled Middoth (i.e. "measure"), which is almost as minute in its descriptions and dimensions (no doubt by parties who had seen, and as priests been familiar with, the edifice) as a modern architect's specifications. Besides this, the two descriptions of the Temple incidentally given by Josephus (at supra.) are the only consecutive accounts of the ancient structure. Our principal attempt will therefore be to follow these where they agree, and to reconcile their seeming discrepancies, noting at the same time all important allusions in the Bible and uninspired historians of antiquity, and constantly comparing the whole with the indications on the modern site. Occasional use, for verification, may be made of the measures in the spiritual temple of Ezek. xi-xiii, but with great caution, as but few of them seem to have been borrowed from the actual type, which, moreover, was Solomon's Temple, and not Herod's.

(1) The Outer Circuit of the Temple.

We assume that the present enclosure of the Haram corresponds to the areas of the Temple and of the Tower of Antonia taken together; and the most convenient mode of considering the general contour of the outer wall will be after presenting the following arguments:

1. Remains of cyclopean masonry are still found at intervals on all the sides of the present enclosure of the peculiar bevelled character which marks their antiquity. The English engineers engaged in the late Ordnance survey traced these all along the southern end, and found them resting on the native rock, some of them still retaining the marks of the original Tyrian workmen (see Recovery of Jerusalem, p. 106). Now Josephus informs us (Ant. xvi, 11, 3; War, v, 5, 1) that the area of Moriah was enlarged by building up enormous walls from the valleys.

Perspective of Herod's Temple, with all its Courts (according to Paine), as seen from the East.
and filling them in with earth. The lower courses of these seem to have been buried under the rubbish that fell upon them from the demolition of the upper part of the walls, and have thus escaped. It is difficult to suppose that such masonry could have been the work of later times, or that the area would have been altered after such prodigious bounds had been set to it. Particular coincidences of line in the eastern, southern, and western sides will point back at least as far as the third of the reign of Solomon. The "Jews' Walling-place" along the western wall is agreed upon all hands to be a veritable mark of antiquity, although this is not established at least as far as the third of the reign of Solomon.

3. The enormous vaulted substructions found under the southern end of the Haram are evidently the same which would be left between these embankments and the native rock; and it was apparently among these that the tyrants of Jerusalem laid their hands. The stones of the foundations of the city (Josephus, War, vii. 2, 4). But especially does Malouide speak expressly of the arches supporting the ground on this part in order to prevent a dividing and other pollution beneath (Lightfoot, Prospects of the Temple, ch. 1).

3. That the platform (not the mere building) of the Tower Antonia occupied the whole northern end of this enclosure we think is nearly certain from the following facts:

a. The scarped rock and wall on this side can be no other than the prison, rendered more inaccessible by art, above which Josephus states that this tower, as well as those at the other corners of its courts, was reared (War, vi. 5, 8); and which ridge can be found to the north of this enclosure.

b. The presence of the fosse (found in the modern "Pool of Bethesda") on this part makes it a possibility. This ditch is not only referred to in the several notices of Antonia by Josephus above cited, but in 4 Macc. xvi. 14, 15, we have the same as being "broad and deep," of immense depth; so that it could hardly have failed to remain as a landmark in all ages.

c. The projecting bastions on the north-west and north-east angles appear to be the relics of the towers at these corners, and the projection at the Golden Gate may have been connected with the tower at the south-east corner.

d. The present barricades of the Turkish troops are on the traditional site of the Tower of Antonia at the north-west corner of the Haram.

4. The actual size of the present enclosure agrees remarkably with the dimensions of the Temple and Antonia's areas. According to the Talmud (Midrash, b. l.), the outer court of the Temple was 500 cubits square, which, taking the most approved estimate of the Jewish or Egyptian cubit at 1.854 feet (see Cursory), would give 912 feet as the length of each side. Now the total length of the southern wall of the Haram is 922 feet, which will allow 8 feet for the thickness (at the surface) of each wall, a coincidence that can hardly be accidental. Again, Josephus gives the distance around the whole enclosure of the Temple and Antonia together as being six stadia (War, v. 5, 2); and if we subtract from this his estimate of four stadia for the circuit of the Temple (Ant. xxv, 11, 3), we have one stadia or about 600 feet, for the additional length of the court of Antonia northward on each side. Now this added to the square whose base has just been found will give about 1251 feet for the sides of the entire enclosure on the east and west; and it is a remarkable fact that the length of the Haram in this direction, according to the Ordinance Survey, averages 1450 feet, leaving again 5 feet for the thickness of each of the three walls. We are not sure, however, but that a somewhat greater thickness should be allowed the outer wall, which (on the western side) Josephus says was "broad" (War, vi. 3, 1), and on all sides "very strong" (Ant. xxv, 11, 3).

On this point, however, there are some considerations that at first seem to be powerful:

(a) Josephus, in the passage last referred to, makes the Temple area only a little smaller in square. But this is evidently nothing more than a round number, and not a mere recollection on the part of Josephus that can be little relied on. The 900 yards in the measurement of the spiritual temple by Ezekiel (xlii, 16-20) seem to have been taken from these 500 cubits.

(b) The modern area is not rectangular, but is its opposite sides parallel or of equal length; the south-west corner is the only one that has been positively settled as being a right angle, and the north side is certainly longer than that on the south. We do not conceive, therefore, that the term "square" in the Mishna and Josephus need be so strictly applied, but only the area and that the former is nearly equal.

Having thus settled the general line of the outer wall of the Temple, it remains to trace the objects of interest lying along it, both on the inner and outer sides, in which endeavor we will begin.

1. On the south-west corner. Here was the famous brim of which Josephus so often speaks (Ant. iv. 4, 2 twice; Wars, i. 7, ii. 16, 3; vi. 6, 2; x. 8). Accordingly, in the foundation-stones on the western side of the present wall, 39 feet from the south corner, may still be seen a quadrilateral, apparently rectangular to the eye, and of equal dimensions on the east, south, and west sides, which are exposed to view. This mode of recognition, we think, is better than to suppose the line on either of these sides to have been shifted, in the face of every possible evidence of identity. By running the dividing line between the Temple and the court of Antonia immediately south of the Golden Gate (so as to make this latter, which is evidently ancient, the entrance to Antonia, and not to the Temple, which had but one eastern gate), we obtain another right angle, and make the four sides of the Temple area nearly equal.

Having thus settled the general line of the outer wall of the Temple, it remains to trace the objects of interest lying along it, both on the inner and outer sides, in which endeavor we will begin.

2. The first gate (from the south) on the western side of the Temple, called the "king's palace" on Zion (Josephus, loc. cit., xii. 3). This phrase seems to have been originally built by Solomon (1 Kings, v. 17; 2 Chron. xxvii. 16; comp. ver. 18); although Lightfoot places them both at the northern end of the Temple wall,
TEMPLE)

reading Josephus's four gates in a southward order (Works, ix, 229). There exists still, in fact, a sort of embelishment in Josephus's text which is known as the "upper level" aqueduct from Bethlehem is probably carried to Moriah. This is apparently the same thing with the gate of the Temple: it is also called in the Gate of the Foundation (3 Chron. xxviii, 5). The reason of the name "Sur" (literally, "removed") is quite uncertain. One ancient writer may be cited as referring to the wall supporting the bridge adjoining. It seems to have been this passage between the abode of the accusing and the palace of the king. If this was a Temple proper that was specially guarded: the guards were stationed there, but also on a higher level. As one section was at the Horse Gate (at "the king's house"), another at the other end of the bridge (at this "foundation of the third gate of the inner enclosure" ("the doors" generally), "the gate behind (the former) guard"); so that if any enemy invaded this area at any time, the doors of the outer courts. be should still be intercepted by the last before reaching the prince. Lightfoot interprets differently (Works, ix, 229). In the Talmud it is explicitly said that there was (apparently but) one gate in the western Temple wall, and in the same connection the gates are repeatedly referred to as being five in number, of which four are assigned to the other sides (Midrash, i, 8). This single western gate is called Kippen (ibid, 1, 3). That this was the same with the gate in question, we think to be probable, from the consideration that this being the palace well, if not only by the shift, but also from its position and the points connected, but also from the slight manner in which the rest are referred to and that the -real Whur-ghost of the gate alone remains in the Talmud respecting the others. From the name it seems to be, as Lightfoot states, in form of the gate (Works, ix, 229). Each of the gates in the outer wall of the Temple (as those in the inner wall, vs. 27, 28) is thus called Josephus, apparently including side and cap ornaments, extends (in the case of the inner, and therefore probably also of the outer, wall) to 30 cubits high and 36 wide (War, v, 5, 3).

3. The second gate northward seems to have been that assigned to the Romans, a conclusion from the following facts:

a. In 1 Chron. xxvi, 18, it is mentioned in connection with the causeway, if not next to Shaileieth. In 2 Kings xxiii, 11, it is mentioned of a gate leading into the Temple (Talmud, Ber. 6, 5). The word "parbar" (which only occurs in these two Biblical passages, and in Ezek, xxvii, 28) is used by the rabbinists as meaning "suburb," although its radical sense would appear to be an open building or space (see Gesenius and Buxtorf, Lex. i, 349).

b. The distance 266 feet north of the south-west corner of the Haram there still exists a gate (Bab el-Mughairibeh, "White Tower Gate"), which is named the "suburb gate," and is the only one remaining from the ancient structure, which is not far from the palace, and this precisely agrees with the southern one of the two middle gates which Josephus stated to be the suburb gates (cf. xvi, 11, 5). The word "parbar" (which only occurs in these two Biblical passages, and in Ezek, xxvii, 28) is used by the rabbinists as meaning "suburb," although its radical sense would appear to be an open building or space (see Gesenius and Buxtorf, Lex. i, 349).

c. In 1 Chron. xxvi, 18, it is mentioned in connection with the causeway, if not next to Shaileieth. In 2 Kings xxiii, 11, it is mentioned of a gate leading into the Temple (Talmud, Ber. 6, 5). The word "parbar" (which only occurs in these two Biblical passages, and in Ezek, xxvii, 28) is used by the rabbinists as meaning "suburb," although its radical sense would appear to be an open building or space (see Gesenius and Buxtorf, Lex. i, 349).

d. These views are confirmed by the following point:

4. Josephus mentions (War, v, 3, 2) as lying along this wall "John's Tower," which he built in the war he made against Simon, over the gates that led to the Yehud, "by which our enemies understand this of Jerusalem, but Josephus's tower was constructed over an enlargement of its gate by lying opposite Simon's or the Lying-out Tower. Both the crusaders and the interest in the Committee-house image by Josephus as the termination of the old wall at the Temple (War, v, 4, 5), which implies that it existed already in the time of the Temple, though not in the same place, and immediately joined them both. This building we think the interpretation of the voice from the temple, which adjured the termination of the present Street of David, for the reasons following:

a. Of old foundation-stones forming the "Jews' Wall-placing" show that there was not structure anciently adjoining them, and therefore the Council-house and the "Court of the Gentiles" mentioned by Josephus as the termination of the old wall at the Temple (War, v, 4, 5), which implies that it existed already in the time of the Temple, though not in the same place, and immediately joined them both. This building we think the interpretation of the voice from the temple, which adjured the termination of the present Street of David, for the reasons following:

b. The space here unappropriated (about 100 feet, between the Jews' Wall-placing and David Street) would be a convenient place to build the court and connected offices.

c. The "Took-by-ball," on the modern city is exactly on this spot, and "some of it has more the appearance of being in situ than many of the other remains in the city" (Ordinance Survey, p. 26).

d. Just north of the Zion wall thus located, we would place one of the gates of Aseump, referred to in 1 Chron. xxvi, 17, 20, "which is connected with Josephus's other gate leading to the suburbs, at a convenient place, and uniformly situated with respect to the Temple, and called a "Gate of the Foundation," or "Gate the Chain," at the head of the modern "Street of David," which is the principal entrance to the East Gate of the City of Jerusalem (Acts, x, 2). This is apparently that "northern edifice which was between the two gates" mentioned by Josephus (War, vi, 2, 5), and for the same reason the gates of Aseump are evidently from several considerations:

a. The Romans, although then assaulting the outer Temple, were not yet near enough to the Temple to need these gates, where the Temple proper was nearest to them, and therefore would not have reared their engines south of the junction of the Zion wall with the Temple, which last, but these two gates for the sphere of their operations on the west.

b. That this building was on the west side of the Temple is clear from the fact that of the four engines the first was opposite the north-west angle of the inner court (from a northerly point of attack), and the last one farther along the north side: If, then, this second one be opposite the angles of the outer wall of the Temple, as we shall see, in a westerly direction, the third will be farther south on the west side, between the south gate of Aseump and the old gate of the Roman garrison. The exact place of Antonia proper prevented any being reared nearer the extreme north-west corner of the outer wall.

The gates of Aseump may have no other place at a corresponding distance northward, opposite where a gate exists, which is in the same line with the middle gate of the inner wall (as called Bab el-Kattalain). Lightfoot asserts that this gate (which, however, he calls Shalleieth) was diametrically opposite Josephus's "Jews' Wall-placing," and was consequently without any authority. This is evidently also Josephus's "last [gate on this side that led to the other city," i, 9, 5.

In this last passage, also, Josephus states that on passing out of this gate "the road descended down into the vale of the Kedron" (by a precipice) and passed through a walled city, and thence up again by the ascent," which agrees with the fact that the Excavation of this wall leading out of the inner wall is barely 75 feet deep (Ordinance Survey, p. 26).

We next arrive at the north-west corner of the Temple enclosure, about 1000 feet from the east wall, and the north side. This corner was private passages for the Roman garrison from Antonia to the galleries within the wall (Josephus, Ant. xvi, 2, 7). The north and south walls of the Haram there still exists a gate (Bab el-Mughairibeh, "White Tower Gate"), which is named the "suburb gate," and is the only one remaining from the ancient structure, which is not far from the palace, and this precisely agrees with the southern one of the two middle gates which Josephus stated to be the suburb gates (cf. xvi, 11, 5). The word "parbar" (which only occurs in these two Biblical passages, and in Ezek, xxvii, 28) is used by the rabbinists as meaning "suburb," although its radical sense would appear to be an open building or space (see Gesenius and Buxtorf, Lex. i, 349).

11. On the north side there was but one gate (the "two gates" of Josephus [War, vi, 2, 7] have been shown above not to be one gate, but two, each side, at the two points, Tirti Middoth, i, 3), a word of uncertain significance, but having the same meaning as "mound" or "spot," and therefore used, and therefore less ornamented, than the other gates (so Lightfoot from the Talmud), which the obstruction of which could not be overlooked, occurred in the middle of the wall, nearly opposite both the Gate of Song and the present "Gate el-Hittam," on the north side of the Haram. Lightfoot, who, however, he calls Shalleieth) was diametrically opposite Josephus's "Jews' Wall-placing," and was consequently without any authority. This is evidently also Josephus's "last [gate on this side that led to the other city," i, 9, 5.

12. The north-east corner of the square would thus fall just south of the Golden Gate, considered as representing the tower at that angle of the enclosure of Antonia, possibly the old tower of Mesh (Neh. iii, 1, 39).

13. On the east side there was but one gate, that of Shishan (Middoth, i, 3), so called from a representation of that city on the walls of one of the chambers. It was opposite the entrance of the porch of the Temple, in order that the priest, who burned the red heifer on the Mount of Olives, might be able to pass on the Mount of Olives, upon which the temple the tower over the gate was lower than those surrounding the other gates, so as not to intercept his view. The gateway leading out of the city is also called the Gate of Bethsaa (Works, x, 219, 219); which location, however, Mr. Williams finds it necessary to dispute (Holy City, ii, 120, note 5). This position shows that this gate and the altar were in a range with the other gates between them. By the same signification of the word "hills," the measurement of the land on the map, it will appear that at a certain height on the Mount of Olives the fire on the altar might be seen through the gate without gazing upwards. We find no traces of this gate mentioned by travellers.

14. At the south-east corner Josephus says there was a "pinnacle of the Temple" on which the temple placed Christ (Luke iv, 9), still to be recognised in the steep descent at the back of the Temple, and the "interior courts, and is more profound by the vaulted substructions beneath the present surface of the ground outside from Josephus's language
in War, vi, 3, 5, it is evident that the precipice at the north-east angle was also very considerable. 18. To the south of the Tadmor, they were two gates, both named Huldah (Middoth, i, 5), perhaps from the prophetess of that name. These are evidently the "two north gates" referred to by Josephus (Ant. xvi, 11, 5). We conclude that they lay very near the senior city temple, Dr. Robinson (Travels in the land of the Bible) and others from within the double gateway still found in the south wall of the Haram wall at the point where the modern city wall follows it. Its entire entrance was "set apart" (Josephus, Ant. xvi, 11, 5) and it is reached by a sloping passage from the platform of the Haram, as the embankment here could never have otherwise been made. Lightfoot, however, makes these gates divide the wall into three equal parts (Works, i, 244), apparently meaning the two gates in New York's very worthy of note that in 1 Chron. xxvi, 14-18 but one set of gates is mentioned (Josephus, Ant, i, 11, 5), in like terms as to the single gate on the north and east, whereas as four sets are, in both enumerations, assigned to the west side. The other modern vestiges of portals on this side are of inferior size and antiquity.

16. On the several sides of the Court of the Gentiles that within the outer wall (called also the Outer Court, Lower Court, and by the rabbis usually "Mountain of the Lord's House") there were several objects worthy of note.

(1.) On the north and west sides were double interior porticos of which 136 cubits wide, supported by columns and containing a road along the Haram (Josephus, War, v, 5, 2).

(2.) On the east side was Solomon's Porch (John x, 22; Acts iii, 11), of the same size and style with those on the north and west (Josephus, Ant. xvi, 11, 5; xxvi, 7).

(3.) On the south side of the Royal Portico opposite to the Temple area is opposed to all ancient authority; so much so that even his conductor Prof. Willis is constrained to dissent from him (ibid. i, 108).

(4.) These cloisters were adorned with Corinthian columns of solid marble, 162 in number (of such size that three men could just span them with their outstretched arms, making about a diameter of six feet), which separated the aisles, besides another row half imbedded in the outer wall (Josephus, Ant. xvi, 11, 5). We understand this roof to have been the "umbrella" (the "umbrella") and the roof only and a half as broad (Ant. xvi, 11, 6). Lightfoot has strangely set these down as being respectively 150 and 45 cubits broad, with one of his own maps agrees; the English folio edition, i, 1061, has the same number, but the Latin edition in Lugduni, Theatrum, i, 596, has for the middle aisle forty-one cubits, in which we suspect some oversight (perhaps from thickness). The extremely low columns of the porch, as edifices of Josephus here read alike, and the Middoth does not particularize on this point. The hypothesis of Dr. Robinson (Travels) that the pillars here were as in the Temple is still less possible (ibid. i, 108).

(5.) These cloisters were adorned with Corinthian columns of solid marble, 162 in number (of such size that three men could just span them with their outstretched arms, making about a diameter of six feet), which separated the aisles, besides another row half imbedded in the outer wall (Josephus, Ant. xvi, 11, 5). We understand this roof to have been the "umbrella" (the "umbrella") and the roof only and a half as broad (Ant. xvi, 11, 6). Lightfoot has strangely set these down as being respectively 150 and 45 cubits broad, with one of his own maps agrees; the English folio edition, i, 1061, has the same number, but the Latin edition in Lugduni, Theatrum, i, 596, has for the middle aisle forty-one cubits, in which we suspect some oversight (perhaps from thickness). The extremely low columns of the porch, as edifices of Josephus here read alike, and the Middoth does not particularize on this point. The hypothesis of Dr. Robinson (Travels) that the pillars here were as in the Temple is still less possible (ibid. i, 108). 16. On the several sides of the Court of the Gentiles that within the outer wall (called also the Outer Court, Lower Court, and by the rabbis usually "Mountain of the Lord's House") there were several objects worthy of note.

(1.) On the north and west sides were double interior porticos of which 136 cubits wide, supported by columns and containing a road along the Haram (Josephus, War, v, 5, 2).

(2.) On the east side was Solomon's Porch (John x, 22; Acts iii, 11), of the same size and style with those on the north and west (Josephus, Ant. xvi, 11, 5; xxvi, 7).

(3.) On the south side of the Royal Portico opposite to the Temple area is opposed to all ancient authority; so much so that even his conductor Prof. Willis is constrained to dissent from him (ibid. i, 108).

(4.) These cloisters were adorned with Corinthian columns of solid marble, 162 in number (of such size that three men could just span them with their outstretched arms, making about a diameter of six feet), which separated the aisles, besides another row half imbedded in the outer wall (Josephus, Ant. xvi, 11, 5). We understand this roof to have been the "umbrella" (the "umbrella") and the roof only and a half as broad (Ant. xvi, 11, 6). Lightfoot has strangely set these down as being respectively 150 and 45 cubits broad, with one of his own maps agrees; the English folio edition, i, 1061, has the same number, but the Latin edition in Lugduni, Theatrum, i, 596, has for the middle aisle forty-one cubits, in which we suspect some oversight (perhaps from thickness). The extremely low columns of the porch, as edifices of Josephus here read alike, and the Middoth does not particularize on this point. The hypothesis of Dr. Robinson (Travels) that the pillars here were as in the Temple is still less possible (ibid. i, 108).

(5.) These cloisters were adorned with Corinthian columns of solid marble, 162 in number (of such size that three men could just span them with their outstretched arms, making about a diameter of six feet), which separated the aisles, besides another row half imbedded in the outer wall (Josephus, Ant. xvi, 11, 5). The hypothesis of Dr. Robinson (Travels) that the pillars here were as in the Temple is still less possible (ibid. i, 108).
PASTRY-MAINE's Chamber, for baking the salt cakes burned with the meal. (11.) On the north side of the same gate, the Priest's Wardrobe, for the pot-hal clothes.

(12.) The camber corner, the Easthuare-room, for the sacred pottery.

(13.) A Gate-room, adjoining on the east.

(14.) A Guard-room, for the store of sacred vessels. (15.) A Guard-room, for the store of sacred vessels.

(15.) Adjoining this, a Wash-room for cleansing the entrails, etc., of sacred animals.

(16.) A Room for Hides of Victims, and (17.) The Salt-room, for the salts used in preserving them, which was called the House of Burnt Offerings, and was divided into three equal parts. This building projected inwardly into the Court of the Children of Levi, and was surrounded by a wall.

(18.) The Gate of Women. Adjoining this, a Room for the more permanent deposit of the sacred vessels.

(19.) An Office-room, next.

(20.) The other Room for the same purpose as the first.

(21.) The Gate of Burning, the last of the six.

(22.) The intermediate steps of the western gate were called the House of Sacrifices, and were divided into three equal parts. This building projected inwardly into the Court of the Children of Levi, and was surrounded by walls.

(1.) Adjoining the gate, the House of the Consecrated Stones of the former altar (removed after the reedification under Josaphat), which was called the House of the Priests of Asaphin.

(2.) A Guard-room, and next.

(3.) The other Room, for the same purpose as the first.

1. The Position of the Great Altar.—Its distance from the northern gate was 25 cubits wide, as the slope of the ascent of the altar [i.e. the whole length of the altar including its inclined ascent] was 62 cubits (i.e. horizontal measure), for the altar was 40 cubits square, and the length of the slope of the ascent as another 22 cubits, which would give 64 cubits, or measured superficially (see Lightfoot, Works, iv, 413), for the columns 4, from the columns to the wall of the court 8 cubits [making thus 110 cubits]; the rest [30 cubits] were in the space between the base and the columns of the altar (Midoth, v, 1). This last clause is somewhat ambiguous, but is generally understood as meaning that there was a space of 110 cubits between the south wall and the foot of the “ascent,” which contained some extra space, which would give 122 cubits in all.

2. The steps of the altar, which led up to the base of the altar, and were of stone, were of such height as to render the altar inaccessible, except by the aid of ladders. The steps were six in number, and were as follows: depth, 4 cubits, with a slope of 1 cubit; the height of the steps was 7 cubits, and the length was 10 cubits.

3. The width of the steps varied from 1 cubit to 1 cubit and a half, with a slope of 1 cubit; the height of the steps was 7 cubits, and the length was 10 cubits.

4. The steps of the altar were of stone, and were of such height as to render the altar inaccessible, except by the aid of ladders. The steps were six in number, and were as follows: depth, 4 cubits, with a slope of 1 cubit; the height of the steps was 7 cubits, and the length was 10 cubits.

5. The width of the steps varied from 1 cubit to 1 cubit and a half, with a slope of 1 cubit; the height of the steps was 7 cubits, and the length was 10 cubits.

6. The steps of the altar were of stone, and were of such height as to render the altar inaccessible, except by the aid of ladders. The steps were six in number, and were as follows: depth, 4 cubits, with a slope of 1 cubit; the height of the steps was 7 cubits, and the length was 10 cubits.

7. The width of the steps varied from 1 cubit to 1 cubit and a half, with a slope of 1 cubit; the height of the steps was 7 cubits, and the length was 10 cubits.

These are treated of in the Mishna in the fullest detail, and the minutest points—to the thickness of the walls and pillars, to the number, size, and position of the doors, the dimensions, order, and situation of the rooms and passages, with all their peculiarities and contents—are given with the greatest elaboration of specification, thus forming the author's contract; so that as to everything, great or small, contained within these bounds there is such full and truly truthful authority that all one has to do is to collect and plot them down on the plan. This the reader will find fully explained in the volumes of Lightfoot, in his Prospects of the Temple, so often referred to, that to detail it here would be but to repeat his state-ments: we have examined his authorities and conclusions in detail, and found them to be accurate and correct, but much more than follow his digest on this subject. We have embodied the results in our map accompanying this volume, on which we believe that our plan of the altar is accurate and correct, but which we do not believe that the few points that have not been determined above; and to this we make the same reservation as we do in our maps and woodcuts: a sufficiently definite idea of the main edifice.

1. The Position of the Great Altar.—Its distance from the northern gate was 25 cubits wide, as the slope of the ascent of the altar [i.e. the whole length of the altar including its inclined ascent] was 62 cubits (i.e. horizontal measure), for the altar was 40 cubits square, and the length of the slope of the ascent as another 22 cubits, which would give 64 cubits, or measured superficially (see Lightfoot, Works, iv, 413), for the columns 4, from the columns to the wall of the court 8 cubits [making thus 110 cubits]; the rest [30 cubits] were in the space between the base and the columns of the altar (Midoth, v, 1). This last clause is somewhat ambiguous, but is generally understood as meaning that there was a space of 110 cubits between the south wall and the foot of the “ascent,” which contained some extra space, which would give 122 cubits in all.

2. The steps of the altar, which led up to the base of the altar, and were of stone, were of such height as to render the altar inaccessible, except by the aid of ladders. The steps were six in number, and were as follows: depth, 4 cubits, with a slope of 1 cubit; the height of the steps was 7 cubits, and the length was 10 cubits.

3. The width of the steps varied from 1 cubit to 1 cubit and a half, with a slope of 1 cubit; the height of the steps was 7 cubits, and the length was 10 cubits.

4. The steps of the altar were of stone, and were of such height as to render the altar inaccessible, except by the aid of ladders. The steps were six in number, and were as follows: depth, 4 cubits, with a slope of 1 cubit; the height of the steps was 7 cubits, and the length was 10 cubits.

5. The width of the steps varied from 1 cubit to 1 cubit and a half, with a slope of 1 cubit; the height of the steps was 7 cubits, and the length was 10 cubits.

6. The steps of the altar were of stone, and were of such height as to render the altar inaccessible, except by the aid of ladders. The steps were six in number, and were as follows: depth, 4 cubits, with a slope of 1 cubit; the height of the steps was 7 cubits, and the length was 10 cubits.

7. The width of the steps varied from 1 cubit to 1 cubit and a half, with a slope of 1 cubit; the height of the steps was 7 cubits, and the length was 10 cubits.

These are treated of in the Mishna in the fullest detail, and the minutest points—to the thickness of the walls and pillars, to the number, size, and position of the doors, the dimensions, order, and situation of the rooms and passages, with all their peculiarities and contents—are given with the greatest elaboration of specification, thus forming the author's contract; so that as to everything, great or small, contained within these bounds there is such full and truly truthful authority that all one has to do is to collect and plot them down on the plan. This the reader will find fully explained in the volumes of Lightfoot, in his Prospects of the Temple, so often referred to, that to detail it here would be but to repeat his state-
TEMPLE

263

TEMPLE

24: 1 Chron. xxxii, 35) as the site of his altar, and eventu-
ally obtained the whole temple from the Hasmoneans (the
latter, however, although a priest by birth, and
therefore entitled to admission to the building, so con-
stantly mixed the description of Herod's with that of Sol-
omen's Temple that we must often distrust his details).

This edifice was constructed upon new foundations
(Josephus, Ant. xv, 11, 8), and of white marble, the blocks
being in some instances 46 cubic long, 6 broad, and 6
high (War, v, 5, 6; comp. Ant. xv, 11, 3). The entire width
(from north to south) of the porch was (externally) 100 cub-
its; but the remainder (rear part) of the building was only
60 cubits (according to the Talmudists 70, including the
side chamber of 5 cubits, the wall of 6 cubits, etc.), so that
the porch projected 20 (or 10) cubits on each side
beyond the rest of the structure. Its length was also 100
cubits, and its height the same; but Josephus says (Ant.
v, 11, 3) that eventually it sank 20 cubits (the original
height being 120), a statement which Hirt (p. 16) regards
(probably with justice) as a mere legend. The interior
space was, according to Josephus, so divided that
the porch had a length (from north to south) of 50 cubits, a
breadth of 20, and a height of 50 (comp. War, v, 5, 6); the
holiest place a length of 40 cubits, a breadth of 20, and a
height of 50; and the most holy place a length and breadth
of 20 cubits, and a height of 60; but the Talmud (Middoth,
v, 4) makes the height of both the latter rooms to have
been 60 cubits (2 Chron. iii, 1), does not seem to have
the extra height above the ceiling of the most holy place,
since this last was a perfect cube. The entire building
and all its parts are in Josephus the same in size and
description as in the Talmud (ibid. iv, 7), according to
which the porch was (from east to west) of the
length 11 cubits, that of the sanctuary 40 cubits, and
that of the holy of holies 50 cubits; while on the west, below
the holy of holies, was a space (for a chamber) of 6 cubits
breadth by 60 cubits long, beginning from the west side of
the walls and partitions. If, as Josephus and the
Talmud both state, the porch was 100 cubits high, but (as
the latter states) only 20 high on the inside, the difference
of 80 cubits may have been that of the peaked roof, if a ga-
hle; but the difference in their numbers as to the height
of the rear portion of the building gives probability to the
statement of the Talmud (ibid. iv, 6) that there was an
upper room over the holy and most holy place,
containing trap-doors in the floor, through which work-
men were let down into the most holy place to make re-
pairs (ibid. iv, 5). Josephus calls this part of the building
הָרָאשׁ הַגְּנוֹת, and the Talmud gives it a height of 40
cubits, which apparently refers only to the intermediate
space left by the difference between the holy and the most
holy place. As to the style of the roof (whether flat or
peaked) Josephus says nothing; he only remarks (War,
v, 5, 6) that it was surmounted (קַדָּא קַדָּא) by golden
spikes (םְדִינֵה), probably of gilded iron, fastened with lead,
for securing the birds; the same are mentioned in the
Talmud (יִלְיַד לַיְלֵי, Middoth, iv, 6), where they are
said to have been one cubit in height. The roof itself ap-
pears, according to the Mishna, to have been a low gable
(see L'Empereur, en Middoth, iv, 6), with a balustrade
(גרְבִיס) three cubits high. The space above the הָרָאשׁ
is thus divided (Middoth, iv, 6): 1 cubit רַבָּא (7 cellings):
2 cubits רַבָּא רַבָּא (place of rain-water); 1 cubit רַבָּא
(temper); 1 cubit רַבָּא נָרָן (founding); 3 cubits raking: 1
cubit scaracrown. On both sides of the interior apart-
ments was a space of 20 cubits devoted to a suite of rooms
(מעי וְרָשָׁא יָרָשָׁא), which, however, extended only 60 cubits
high (Josephus, Ant. xv, 11, 8; War, v, 5, 6). According
to the Talmud (Middoth, iv, 3), these (קרית) were all in 38:
namely, 15 on the north and south side each, and 8 on the
west or rear (comp. the "many mansions," יומִיא הָרָאשׁ, of
John xiv, 2). The shoulder or projecting space (north
and south) on each side of the porch (40 cubits in Jose-
phus, 50 in the Talmud) was used as a repository of the
sacrificial implements (כֹּל הָרָאשׁ כֹּל הָרָאשׁ, loc. sequenti-
runa, Middoth, iv, 7).

The most holy place, which was entirely empty (אָצֶרֶת
כֹּל הָרָאשׁ לְאָצֶרֶת, Josephus, War, v, 5, 6), except the stone
הָרָאשׁ יִדְאֵרְשָׁא אָצֶרֶתוֹ which occupied the place of the ark (Mish-
na, Yoma, v, 2), and on which the high-priest set the cen-
cer (the rabbis relate many marvels concerning it), was
separated at the doorway from the holy place (Josephus,
War, v, 5, 6) by a veil (מַעְטָרָשָׁא), which was torn by the
earthquake at Jesus' death (Matt. xxvii, 51). The rab-
bits speak of a double veil; according to the Talmud
there occupied a space of 1 cubit between the apartments
(קרית קרית). The holy place had an entrance with two gold-plated door-leaves, which, according to

Restoration of Herod's Temple (oblique view of the front of the central building), according to Fergusson.
The Celestial City (after Paine).

X. Sacred Observances Connected with the Temple.—

1. The Daily Service.—The following is an outline of the regular duties of the priesthood:

(i.) The morning service. After having enjoyed their repose, the priests betook themselves to the rooms provided for that purpose and waited the arrival of the president of the lots. This officer having arrived, they divided themselves into two companies, each of which was provided with lamps or torches, and made a circuit of the Temple, going in different directions, and meeting at the psalmist's chamber on the south side of the gate Nica
dor. Having summoned him to prepare the cakes for the high-priest's meal-offering, they repaired with the president to the south-east corner of the court and cast lots for the duties connected with the altar. The priest being chosen to remove the ashes from the altar, he again washed his feet at the laver, and then with the silver shovel proceeded to his work. As soon as he had removed one shovelful of the ashes, the other priests, instead of washing their hands and feet, and then joined him in cleansing the altar and renewing the fire. The next act was to cast lots for the thirteen particular duties connected with offering the sacrifice; which being settled, the president ordered one of them to fetch the hewn sacrifice. While the priests on this duty were engaged in fetching and examining the victim, those who carried the keys were opening the seven gates of the Court of Israel and the two doors that separated between the porch and the holy place. When the last of the seven gates was opened, the silver trumpets gave a flourish to call the levi
tes to their desks for the music, and the stationary men to their places, and the people, in a manner unprecedented, the opening of the folding-doors of the Temple was the es
cablished signal for killing the sacrifice, which was cut up in pieces and then set on the altar, a large brazier, and left while the priests once more retired to the room Gomith to join in prayer. While the sacrifice was slain in the court of the priests, the two priests, the two-armed, and the two-armed servant, having trimmed the lamps and cleansed the altar of incense were attending the duties in the holy place. After the conclusion of their prayer and a rehearsal connected with the sacrifice, the president commanded the priests to offer incense; the two-armed servant, the laver, and anoint the pieces of the sacrifice with oil, and also to lay the pieces of the sacrifice on the fire of the brazen altar. The lot being determined, the two who were to offer the incense, the two who were to render their duty, the time for which was between the sprinkling of the blood and the laying the pieces upon the altar, in the morning, and the time for which the other was to perform the same, the pieces upon the altar and the drink-offering. As they proceeded to the Temple they rang the megaspilia, or great bell, to warn the absent priests to come to wor-
TEMPLE was either "bending of the knees," "bowing the head," or "falling prostrate on the ground." (14) Having performed the service, and being about to retire, "they turned their backs upon the altar." They therefore went backwards till they were out of the court.

Concerning the high veneration which the Jews cherished for the temple, the rabbinical books abound in some interesting particulars from Philo, Josephus, and the writings of Luke. Their reverence for the sacred edifice was such that rather than witness its desolation they would cheerfully submit to death. They could not bear the least disrespectful or dishonorable thing to be said of it, and one of the most injurious and sacrilegious apprehended, instantly awakened all the choler of a Jew, and was an affront never to be forgiven. Our Saviour, in the course of his public instructions, happened to say, "Destroy this temple, and in three days I will raise it up again" (John ii, 19)—it was construed into a contemptuous disrespect, designingly thrown out against the temple—his words instantly descended into the heart of a Jew and kept rankling there for several years; for, upon his trial, this declaration, which it was impossible for a Jew ever to forget or to forgive, was alleged against him as big with the most atrocious aspersion and iniquity, and was pronounced a capital offense (Numb. vi, 24—26). After this benediction, the daily meat-offering was offered, then the morning and the evening; and last of all the drink-offering: at the conclusion of which the Levites began the song of praise, and at every pause in the music the trumpets sounded and the people worshipped. This was the termination of the morning service. It should be stated that the morning service of the priests began with the dawn of day, except in the great festivals, when it began much earlier; the sacrifice was offered immediately after sunrise.

(3) The evening service varied in a very trifling measure from that of the morning; and the same priests ministered, except that there was one priest of the house of the Father who had never burned incense, in which case that office was assigned to him, or, if there were more than one, to the last who should be employed. See Daily Offering.

2. Holiness of the Place.—The injunction of Lev. xix, 3, "Ye shall reverence my sanctuary," laid the people under an obligation to maintain a solemn and holy behavior when they came to worship the Lord. With the temple we find, that such as were ceremonially unclean were forbidden to enter the sacred court on pain of death; but in the course of time there were several prohibitions enforced by the Sanhedrim which the law had not named. The following have been collected by Lightfoot out of the Rabbinical writings (Temple Service, ch. x.):

(1.) "No man might enter the mountain of the house with his staff." (2.) "None might enter in hisphere with his shoes on his feet," though he might with his sandals. (3.) "Nor might any man enter the mountain of the house under the shadow of his arm." (4.) "Nor might he come in with the dust on his feet," but he must wash or wipe them, "and look to his feet whether there be any sore or breach in the house of his feet; and if there be, perhaps, that he should then shake off all worldly thoughts and affections." (5.) "Nor with money in his purse." He might bring it in his hand, however; and in this way it was brought in for various purposes. If this had not been the case, it would seem strange that the cripple should have been placed at the gate of the temple to ask alms of those who entered therein (see Acts iii, 5). (6.) "None might spit in the temple; if he were necessitated to spit, it must be done in some corner of his garment." (7.) "He might not use any irrevocent gesture, especially before the gate of Nicanor," that being exactly in front of the temple gate. (8.) "He might not make the mountain of the house a thoroughfare," for the purpose of reaching the porch, nearer the temple, which was devoted to the purposes of religious devotion. (9.) "He that went into the court must go leisurely and gravely into his place; and there he must demean himself, as in the presence of the Lord God, in all reverence and for his whole person." (10.) "He must worship standing, with his feet close to each other, his eyes directed to the ground, his hands upon his breast, with the right hand on the heart" (Luke xviii, 13). (11.) "No one, however weary, might sit down in the court." (12.) "They might not pray with his head uncovered. And the wise men taught their scholars never prayed without a veil." This custom is alluded to in 1 Cor. xii, 4, where the apostle directs the men to reverse the practice adopted in the Jewish temple. (13.) Their bodily gesture in bowing before the Lord...
TEMPLE

(Lips. 1752); Grulick, De Divino in Templo Ezekiel. Consilio (Vittem 1775). Monographs on the Temple in English are those on the celebrated De Templo Hierod. (London 1724); J. M. Altasulch (ibid. 1752), W. Altschul (Skow 1794; Warsaw, 1814), Leon (Amst. 1660; Middelburg, 1842; in Latin by Saubert [Helinst 1665]), Heller (Prague, 1802; F. ad M. 1714), Chezez (Ven. 1696), Wilna (Skow, 1802; Sniitzler (Lond. 1825). The principal later works on the subject are those on the celebrated Der Tempel Hielodros (from the Arabic by Reynolds, Lond. 1805); Der Tempel Salomon (Berlin, 1809, 4to); Stieglitz, Gesch. der Baukunst in der Heilige Welt (Nuremb. 1827), p. 125 sq.; Less, Beiträge zur Geschich. der Ausbaul. Baukunst (Leips. 1834), i, 63 sq.; Meyer, Der Tempel Salomons (Berlin, 1860; inserted also in Blätter für historische Wissenschaft, i); Gruseme, in the Kunsthblatt z. Morgenb. 1831, No. 73-75, 77-80. Other works are mentioned by Meusel, Bibl. Hist. i, ii, 113 sq.; and Winer, REALWörtereb. s. v., "Temple." See also Bennett, The Temple of Ezekiel (Lond. 1842); Isles, Ezekiel's Temple (ibid. 1827); Kirchner, Der Tempel zu Jerusalem (Leips. 1884); Elstner, Der Tempel Salomonis, (from the Arabic by Reynolds, Lond. 1805); Mark, Der Tempel Salomons (Dorp. 1839); Kopp, id. (Stuttg., 1839); the Stud. u. Krit. 1844, ii, 320, 361; Thenius, Erklär. d. Könige, in the Kurzgez. exeg. Handb. iii: Anhang, p. 25 sq.; Bühler, Der Tempel (Carlsb. 1848); der Tempel in Grundriss. (Leips. 1858), ii, 361 sq. The latest works are those of Bannister, The Temples of the Hebrews (Lond. 1861); Pain, Solomon's Temple, etc. (Bost. 1861); Unruh, D. alte Jerus. u. die Bauwesen (Lageisitz 1861); Rosen, Der Tempel-Platz des Moria (Gotth. 1866); Fergusson, The Temples of the Assyrians and Babylonians (Lond. 1878). This last and most pretentious effort at reconstructing the Jewish Temple is thoroughly vitiated by two false preconceptions of the author—namely, a false location of the structure at the south-west angle of the Haram, and an overweening estimate of modern architectural taste as a guide on so ancient a subject. Thus he slippantly dismisses the explicit and repeated Rabbinical statement of the dimensions of the Court of the Women as "absurd" (p. 98) and "impossible" (p. 117), because it cannot be got within his imaginary "rectangle 600 feet square" (Josephus's round number for the entire Temple) into the area that any archaeological and historical account "is borrowed awfully, but unintelligently, from Ezekiel" (p. 117), ignoring the fact that the Mishna, which contains these measurements, has come down, traditionally if not in writing, from contemporaries of Herod's Temple itself. What a pity that these authorities, or even Herod himself, did not have the benefit of such learned criticism on their work!

TEMPLE. This name was scarcely ever used in the first three ages by any Christian writer for a church, but only for the heathen temples; but when idolatry was destroyed, and temples were purged and consecrated as Christian churches, then it uses the following ages freely gave them the name of temples. At first no idol temples were made use of as churches, but were generally tolerated until the twenty-fifth year of Constantine, A.D. 335. In that year he published his laws commanding the destruction of temples, altars, and images. This policy was continued until the reign of Theodosius, when another method was adopted, and we find the emperor turning the famous temple of Helios, called Balanius, into a Christian church. Noloria (A.D. 408) published two laws forbidding the destruction of temples in the cities, because, being purged, they were not unbecoming to use. Bede (lib. ii, c. 30) tells us "that Gregory the Great gave Austin the monastic instructions about the temples among the Saxons in Britain, that if they were well built they should not be destroyed, but only converted to the service of the true God." Sometimes the temples were pulled down, and the materials were given to the Church, out of which new edifices were erected for the service of religion. Sometimes additions were made to the emoluments of the clergy by the donation of heathen temples and the revenues that were settled upon them, although the plan of the Church was determined by the emperors themselves. See Bingham, Christ. Antiq. bk. v, ch. iv, § 10; bk. viii, ch. i, § 6; ch. ii, § 4.

TEMPLE, Daniel, a Congregational minister, was born at Reading, Mass., Dec. 23, 1789. He was employed in mechanical labors until he was twenty-one years old. In 1810 he was converted, and joined the church. He was called to the missionary field by reading Buchanan's Reminiscences, and he commenced the work of preparation by entering Phillips Academy at Andover. He subsequently entered Dartmouth College, from which he graduated in 1817. His influence for good in college was great. He spent three years at the Andover Theological Seminary, and was licensed to preach in the First Baptist Church by the Andover association in August, 1820. After being employed one year in Massachusetts by the American board, he was ordained at the same time with the Rev. Isaac Bird at North Bridgewater, Oct. 3, 1821. After his marriage with Miss Rachel Bigelow, he served from Boston for Malta, Jan. 2, 1822, carrying with him the Massachusetts printing-press, which has since proved such a blessing to the people of the Orient. His wife died in Malta in 1827. Two of his four children survive, and are now preaching the Gospel. He returned to America in 1830, and after remaining a short time, during which he married again, he went back to Malta, where he remained until 1833, when he left for Smyrna, taking with him the whole printing establishment. Though he first set up the press in Malta, its productions were for regions beyond. The authorities ordered the press away from Smyrne, but he kept it secret. He established schools there among the Greeks, but whoever would see what he accomplished must go to Constantinople, Aintab, and elsewhere in that land. He continued his connection with the press until he left the mission, in 1844, and returned to America. After his return he commenced preaching at Phelps, Crawford Co., N. Y., where his labors were greatly blessed. His acquaintance with the Scriptures was wonderful, being familiar with every part of them. For some time before his end he was not able to preach; but in sickness and in health, in suffering as in labors, he glorified his Master. He died in Philadelphia, which took place at Reading, Mass., Aug. 11, 1851. See Sprague, Annals of the Amer. Pulpit, ii, 677 sq. (W. P. S.)

TEMPORAL, a term often used for secular, in a distinction from spiritual or ecclesiastical; likewise for anything belonging to time in contrast with eternity.

TEMPORAL POWER of the Pope is a phrase susceptible of two meanings, which are very distinct from each other, and the confusion of which has led to frequent and serious misunderstanding. L. In the first place, the term means the actual sovereignty possessed by the pope as ruler of the Papal States, or States of the Church (q. v.), where the history of its origin, progress, and downfall is briefly detailed. The question as to the necessity or utility of such a power vested in the hands of a spiritual ruler, and even its laws and institutions, has been warmly debated. This controversy is not of entirely recent origin, many of the medieval sectaries urged the incompatibility of the spiritual with the temporal power in the same person, not only in relation to the pope, but also to the baronial bishops. Such were the doctrines of the Vaudois, of Pierre de Bruns, and especially of Arnold of Brescia. In the centuries following, the antipapal controversies turned so entirely upon doctrine that there was little attention paid to this question. It did not enter in any way into the conflict of Gallican and Ultramontane principles. Even Bossuet
not only admitted the lawfulness of the pope’s temporal sovereignty, but contended that it was in some sense necessary to the free exercise of his spiritual power. The controversy only assumed any practical interest during the conflict between Pius VII and Napoleon I., the design of the latter of annexing papal territory to France, or, more properly speaking, the union of the temporal and spiritual jurisdictions by the temporal sovereigns and the others in every part of Catholic Christendom. They profess that the possession of temporal power is no essential part of the privileges of the successor of Peter, but they regard it as the means providentially established for the protection of the spiritual independence of the pope and the free exercise of his functions as spiritual ruler of the Church.

II. By the second signification of the phrase “temporal power of the pope” is understood what would more properly be called the claim of the pope, in virtue of his office, to a power over the temporalities of other kings and states. This power may be of two kinds: 1. Direct, or the power, as supreme moral teacher, to instruct all members of his Church, whether subjects or sovereigns, in the moral duties of their several states. 2. Coercive. If the power be regarded as coercive, it is necessary to distinguish the nature of the coercion which may be exercised. Coercion may be considered in the form or infliction of purely spiritual censure, or it may involve temporal consequences, such as suspension or deprivation from office, forfeiture of the allegiance of subjects, and even liability to the punishment of death. In the former sense it may be regarded as the natural consequence of the spiritual jurisdiction of the Church, which is acknowledged by all Catholics. But the claim to authority over the temporalities of kings has gone far beyond these limits. From the 10th century popes have claimed and repeatedly exercised a power of coercing kings, and have punished them when refractory by suspension, by deprivation, and by the transfer of the allegiance of their subjects. This claim has been a subject of controversy between the Gallican and Ultramontane schools, and in the latter two theories have been devised for its explanation. The first and most extreme supposes that this power was given directly by Christ to Peter and his successors; that the two powers are foreshewn by the “two swords” (Luke xxii. 38); and that the temporal power is a privilege of the primacy by divine law equally with the spiritual sovereignty itself. The second, or indirect, theory holds that the temporal power is not directly of divine institution but is an indirect though necessary consequence of the spiritual supremacy, and is only given as a means of completing and, in a corrupt and disorganized state, rendering more efficacious the work which the spiritual supremacy is directly instituted to accomplish. In this latter form the theory was developed by Bellarmine, and the celebrated declaration of the Gallican clergy in 1862 was directed against it.

A third view of the temporal power was propounded by Fénelon, and is generally described as the “historical theory of the temporal power,” according to which the pope does not possess, whether by direct divine appointment or in virtue of the necessities of his spiritual office, any temporal power whatsoever; but he possesses the preeminence of spiritual power which is required for the government of the Church, and is empowered to enforce it by spiritual penalties, and especially by excommunication. Although these penalties are purely spiritual, yet the religious sentiment and awe with which the Church is regarded by many invest them with certain temporal effects. In several countries, as England (A.D. 859), France, Spain (A.D. 638), and Germany, the forfeiture of certain civil rights was attached, in the case of private persons, to the spiritual censure of excommunication. The same spirit of the age is seen in the form of the oath taken at the coronation of the sovereign in many countries, by which the monarch swore to be the protector and defender of the sovereign pontiff and the holy Catholic Church—thus making their king’s coronations dependent on the crowning of the pope. Not without similar indications of the public feeling of the mediaval time, the advocates of this theory of the temporal power infer that orthodoxy and obedience to the pope were accepted as a condition of the tenure of supreme power, and in the other hand that it was not impossible, to reconcile this theory with the language used by the popes in enforcing their claims to temporal authority, and with the fact that such power continued to be claimed and exercised until very recent times.

See Barnum, Romanism As It Is; Elliott, Delegation of Romanism; and the articles Papacy and States of the Church.

Temporalities of Bishops, in law, are the lay revenues, lands, tenements, and fees belonging to the sees of bishops or archbishops, as they are barons and lords of Parliament, including their baronies. They are defined as all things which a bishop hath by livery from the king, by gift, or by the gift and tenure of lands, tithe, and feat. When Edward I. to the Reformation, it was customary, when bishops received their temporalities from the king, to renounce in writing all right to the same by virtue of any provision from the pope, and to admit that they received them from the king alone. The custody of these temporalities is said by Blackstone to form part of the king’s ordinary revenue, and thus, a vacancy in the bishopric occurring, is a right of the crown, originating in its prerogative in Church matters, the king being, in intention of law, preserver of all episcopal sees. For the same reason, before the dissolution of religious houses, the crown had the custody of the temporalities of all such abbies and priories as were of royal foundation. There is another reason in virtue of which the king possesses this right, which is, that as the successor is not known, the property of the see would be liable to spoil and devastation. The law, therefore, has wisely given to the king the custody of these temporalities until a new election, with power to take to himself all intermediate profits, and to present to all preferments falling vacant during the vacancy of the see. This revenue cannot be granted to a subject: but the 14 Edward III. stat. iv. ch. v. empowers the king, on a vacancy occurring, to lease the temporalities to the dean of the chapter, with a reservation of all advowsons, escheats, and the like. To remedy the wrongs to the Church perpetrated by former sovereigns, who sometimes kept bishoprics vacant in order to enjoy the possession of their temporalities, and when they did supply the vacancy compelled the new bishop to purchase back his temporalities at an exorbitant price, Henry I., by charter, agreed neither to sell, let to farm, nor take anything from the domains of the Church until the successor was installed. By Magna Charta provision was made that no waste should be committed in the temporalities of the bishoprics, and that neither should the custody of them be sold. At present this revenue of the crown is of very small account; for as soon as the new bishop is consecrated and confirmed, he usually receives restitution of his temporalities entire and untouched from his sovereign, to whom he at the time of his consecration surrendered them, and then possesses, which he did not before, a fee simple in his bishopric, and may maintain an action for the profits.

Tempt is used in the Bible in the Latin sense of prove, as a rendering especially of τεστω, teštō, and τρέπω, both which signify to test or try. It is applied to various beings in different senses, not always involving an evil purpose wherein the temptation is presented to the mind as an inducement to sin. See Temptation.
TEMPATION

1. God is said to have tempted Abraham by commanding him to offer up his son Isaac (Gen. xxii, 1), intending to prove his obedience and faith, to confirm and strengthen him by this trial, and to furnish in his person an example and pattern of perfect obedience for all succeeding ages. God does not tempt or try men in order to test them and afterwards pass sentence upon them as if he were ignorant of them, but to exercise their virtue, to purify it, to render it consociable to others, to give them an opportunity of receiving favors from his hands. When we read in Scripture that God proved his people, whether they would walk in his law or not (Exod. xvii, 4), we pray God to render them and dispositions as if he were tempted with evil, neither tempteth he any man. But every man is tempted when he is drawn away by his own lust and enticed.

2. The devil tempts us to evil of every kind, and lures us to sin for us, even in our best actions. Satan, having access to the sensorium, lutes inducements before the minds of men to solicit them to sin (1 Cor. xii, 1; 1 Thess. iii., 5; James i, 13, 14). Hence Satan is called that old serpent, and the “devil” (Rev. xii, 9; Matt. iv, 8), and the temptation of our first parents to sin is expressly recognized as the work of the devil (Gen. iii, 1-15; John viii, 44; 2 Cor. xvi, 9; 1 John iii, 8). Deceiving in their ministrations, and endeavoring to infuse into him sentiments of pride, ambition, and distrust (Matt. iv, 1; Mark i, 13; Luke iv, 2), He tempted Ananias and Sapphira to lie to the Holy Ghost (Acts v, 3). In the prayer that Christ himself has taught us to address to God “to lead us not into temptation” (Matt. vii, 13), and a little before his death, our Saviour exhorted his disciples to “watch and pray, that they might not enter into temptation” (xxvi, 41). Paul says, “God will not suffer us to be tempted above what we are able to bear” (1 Cor. x, 13).

3. Men are led to the temptation of the Lord when they unseasonably require proofs of the divine presence, power, or goodness. Without doubt, we are allowed to seek the Lord for his assistance, and to pray him to give us what we need; but it is not allowed us to tempt him, nor to expose ourselves to dangers from which we cannot escape unless we have asked and obtained our salvation beforehand. God is not obliged to work miracles in our favor; he requires of us only the performance of such actions as are within the ordinary means of our strength. The Israelites in the desert repeatedly tempted the Lord, as if they had reason to doubt his presence among them, or his goodness, or his power, after all his appearances in their favor (Exod. xvi, 2, 7, 17; Numb. xx, 12; Psa. lxviii, 18, 41, etc.).

4. Men tempt or try one another when they would know whether things are really what they seem to be, whether men are such as they are thought or desired to be. The queen of Sheba came to King Solomon by proposing riddles for him to explain (1 Kings xi, 1; 2 Chron. i, 19). Daniel desired of him who had the care of feeding him and his companions to prove them for some days whether abstinence from food of certain kinds would make them leaner (Dan. i, 12, 14). The persecutors and Pharisees often tempted our Saviour, and endeavored to decoy him into their snares (Matt. xvi, 1; xix, 3; xxii, 18).

TEMPATION (πεπεπαθαί, πιπεπαθαί, both meaning tri- al), in the modern usage of the term, is the enticement of a person to commit sin by offering some seeming advantage. There are four things, says one, in temptation—(1) deception, (2) infection, (3) seduction, (4) perdition. The sources of temptation are Satan, the world, and the flesh. We are exposed to them in every state, in every place, and in every time of life. They may be wisely permitted to show us our weakness, to try our faith, to promote our humility, and to teach us to place our dependence on a superior Power; yet we must not run into them, but watch and pray; avoid sinful company; consider the love, sufferings, and constancy of Christ, and the awful consequences of falling a victim to temptation. A temptation is a false persuasion or delusion by which we may in some measure know when a temptation comes from Satan: 1. When the temptation is unnatural, or contrary to the general bias or temper of our minds; 2. When it is opposite to the present frame of the mind; 3. When the temptation itself is an instance of bad conscience contrary to whatever we could imagine our own minds would suggest to us; 4. When a temptation is detected in its first rising and appearance; 5. Lastly, when it is violent. See Brooks, Owen, Gilpin, Capel, and Gillespie on Temptation; South, Sermons on Temptation, in vol. vi of his Sermons; Pike and Hayward, Cases of Conscience; and Bishop Porteus, Sermons, vol. i, ser. 3 and 4.

TEMPATION OF CHRIST. Immediately after the inauguration of his ministry, Jesus was led up of the Spirit into the wilderness to be tempted of the devil; and after enduring for forty days the general assault of Satan, he suffered three special solicitations, which are recited in detail (Matt. iv, 1-11; Mark i, 12, 13; Luke iv, 1-20). See Jesus Christ.

J. F. H. DIRKX. The Desert of the Trial. — In the first temptation the Redeemer is shaguered, and when the devil bids him, if he be the Son of God, command that the stones may be made bread, there would seem to be no great sin in this use of divine power to overcome the pressing human want. Our Lord’s answer is required to show us where the temptation lies. He takes the words of Moses to the children of Israel (Deut. vii, 2), which mean, not that men must dispense with bread and feed only on the study of the Divine Word, but that our meat and drink, our food and raiment, are all the work of the creating hand of God, and that a sense of dependence on God is the true manna. He tells the tempter that as the sons of Israel standing in the wilderness were forced to humble themselves and to wait upon the hand of God for the bread from heaven which he gave them, so the Son of man, fasting in the wilderness from hunger, will be humble and will wait upon his Father in heaven for the Word that shall bring him food, and will not be hasty to deliver himself from that dependent state, but will wait patiently for the gifts of his goodness.

In the second temptation, it is not probable that they left the wilderness, but that Satan was allowed to suggest to our Lord’s mind the place and the marvelous thing that could be wrought there. They stood, it has been suggested, on the lofty porch that overhung the valley of Kedron, where the steep side of the valley was added to the height of the Temple (Josephus, Ant. xv, 11, 5), and made a depth beneath where the eye could scarcely have been to cast thyself down upon a "Cast thyself down" — perform in the holy city, in a public place, a wonder that will at once make all men confess that none but the Son of God could perform it. A passage from Psalm xciii is quoted to give a color to the argument. Our Lord replies by an answer that is both firm and strong; "Cast thyself down" — perform in the holy city, in a public place, a wonder that will at once make all men confess that none but the Son of God could perform it. "Ye shall not tempt the Lord your God, as ye tempted him in Massah" (Deut. vi, 16). Their conduct is more fully described by the psalmist as a tempting of God: "They tempted God in their heart by asking meat for their lust; yea, they spoke against God: they said, Can God furnish a table in the wilderness? Behold he smote the rock that the waters gushed out and the streams overflowed. Can he give bread also? Can he provide flesh for his people?" (Psa. lxxviii). Just parallel was the temptation here. God has protected thee so far, brought thee up, put his seal upon thee by
manifest proofs of his favor. Can he do this also? Can he send the angels to buoy thee up in thy descent? Can he make the mental vision of One Who knew all things—thy cross, thy precious blood, thy sins, all to receive thee? The appropriate answer is, "Thou shalt not tempt the Lord thy God." In the third temptation it is not asserted that there is any mountain from which the eyes of common men can see the world and its kingdoms at once displayed; it was with the mental vision of One who knew all things that these kingdoms and their glory were seen. Satan has now begun to discover, if he knew not from the beginning, that One is here who can become the King over them all. He says, "All these things will I give thee, and the glory of them, for that is delivered unto me, and to whomesoever I will, I give it;" but these words are the lie of the tempter, which he uses to mislead. "Thou art come to be great—to be a King on the earth; but I am strong, and will resist thee. Thy followers shall be imprisoned and slain; some of them shall fall away through fear; others shall forsake thy cause, loving this present world. Cast in thy lot with me; let thy kingdom be an earthly kingdom, only the greatest of all—a kingdom such as the Jews seek to see established on the throne of David. Worship me by living as the children of this world live, and so honor me in thy life: then all shall be thine." The Lord knows that the tempter is right in foretelling such trials to him; but though clouds and darkness hang over the path of his ministry he must work the work of him that sent him, and not another work: be must worship God, and name none other. "Get thee hence, Satan; for it is written, Thou shalt worship the Lord thy God, and him only shalt thou serve." As regards the order of the temptations, there are internal marks that the account of Matthew assigns them their historical order. Luke transposes the last two, for which various reasons are suggested by commentators (Matt. iv. 1-11; Mark i. 12; Luke iv. 1-13).

The three temptations are addressed to the three forms in which the disease of sin makes its appearance on the soul—to the solace of sense, and the love of praise, and the desire of gain (1 John ii. 16). But there is one element common to them all—they are attempts to call up a wilful and wayward spirit in contrast to a patient self-denying one. See TEMPT.

The author of Ecce Homo, although he takes too subjective a view of the last temptation scene, has admirably developed the thought, so lying at the foundation of Christ's whole public demonstration that he was constantly on his guard against the prevailing notion of an establishment of the Messiah's kingdom by force instead of the influence of love; and he well observes that the temptation to this course was one that must have presented itself at some time to the Redeemer's mind.

II. Credibility and Design of the Narrative.—That when our Lord retired to the interior part of the wilderness the enemy of mankind should present the most plausible temptation to our Redeemer, under these trying circumstances, is proof of consistent with the meekness and mildness of his character. The grand question is, Why was Satan suffered thus to insult the Son of God? Wherefore did the Redeemer suffer his state of retirement to be thus disturbed with the malicious suggestions of the fiend? It may be answered that herein (1) he had already proved the thought of his unworthiness, humiliation, (2) he hereby proved his power over the tempter, (3) he set an example of firmness and virtue to his followers, and (4) he here affords consolation to his suffering people by showing not only that he himself was tempted, but is able to succor those who are tempted.

III. Historical Character of the Scene.—As the baptism of our Lord cannot have been for him the token of repentance and intended reformation which it was for sinful men, so does our Lord's sinlessness affect the nature of his temptation, for it was the trial of one who could not discern the moral from the spiritual. The only conception of the temptation impossible for minds where-in temptation is always associated with the possibility of sin. But while we must be content with an incomplete conception, we must avoid the wrong conceptions that are often substituted for it. The popular view of this undesired portion of our Saviour's history is that it is a narrative of outward transactions; that our Saviour, immediately after his baptism, was conducted by the Spirit into the wilderness—either the desolate and mountainous region now called Quaranatania by the people of Palestine (Kitto, Phys. Hist. p. 38, 40), or the great desert of Arabia, the vast expanse of sand and stony waste, comprised in Numbers xxxiiii, 10; Hos. xiii, 5; Jer. ii, 6, etc.—where the devil tempted him in person, appeared to him in a visible form, spoke to him in an audible voice, removed him to the summit of an exceeding high mountain, and to the top of a pinnacle of the Temple at Jerusalem; whereas the view taken by many learned commentators, ancient and modern, is that it is the narrative of a vision, which was designed to supply that ideal experience of temptation, or trial, which it was provided in the divine counsels for our Lord to receive previously to entering upon the actual trials and difficulties of his ministry. (Bishop Melville's "Life of Christ," London, 1825, ii. 276.) Farmer also considers it a "divine vision," and endeavors with much learning and ingenuity to illustrate the wise and benevolent intention of its various scenes as symbolic predictions and representations of the principal trials attending Christ's public ministry. ("Inquiry into the Nature and Design of Christ's Temptation" [London. 1776, 8vo], preface.)

On behalf of the popular interpretation, it is urged that the accounts given by the evangelists convey no intimation that they refer to a vision; that the feeling of hunger could not have been merely ideal; that a vision of forty days' continuance is incredible; that Moses, who was a type of Christ, saw no "visions," and that hence it may be concluded Christ did not; that it is highly probable there would be a personal conflict between Christ and Satan when the former entered on his ministry. Satan had ruined the first Adam, and might hope to prevail with the second (Tremble, *Analecta* [London. 1880], i. 46). Why, too, says others, was our Lord taken up into a mountain to see a vision? As reasonably might Paul have taken the Corinthians into a mountain to "show them the more excellent way of charity" (1 Cor. xii, 1). On the other side it is rejoined that the evangelists do really describe the temptation as a vision. Matthew says, ἀνέβη δὲ ὁ Χριστὸς ἐκ τῆς ομίχλης ὑπὸ τοῦ πνεύματος τὸ πνεύμα τοῦ αὐτοῦ ἐξάλλεις; and Luke, ἦγετο ὑπὸ τοῦ πνεύματος. Do these phrases mean no more than that Jesus went by the guidance or impulse of the Spirit to a particular locality? Do they not rather import that Christ was brought into the wilderness under the full influence of the prophetic spirit making suitable revelations to his mind? With regard to the hunger, the prophets are represented as experiencing bodily sensations in their visions. In Ezekiel the Vision of the Valley of Graftless Bones, derived from an unauthorized application of types, are precursory—that the first Adam really had no personal encounter with Satan; that all the purposes of our Lord's temptation might be answered by a vision, for, whatever might be the mode, the effect was intended to be the same. This effect of the temptations, like Peter's vision concerning Cornelius, etc. (Acts x, 11-17); that commentators less given to speculate allow that the temptation during the first forty days was carried on by mental suggestion only, and that the visible part of the temptation began "when the tempter came to him" (Luke iv. 3). Lo, it is said, "in all things tempted that with regard to Christ's being "taken up into an exceeding high mountain," Ezekiel says (xii, 2), "in the visions of God brought he me into the land of Is-
temptation of Christ

rael, and set me upon a very high mountain," etc.; and that says, "he carried me away in the spirit to a great and high mountain; and, behold, there appeared unto me the city, the holy Jerusalem" (Rev. xxi. 10). But certain direct arguments are also urged on the same side. Thus, it is consistent with the sagacity and policy of the evil spirit to suppose that he appeared in his own proper person to entice the Lord uttering solemnities or evil? Was not this the most direct and efficacious evidence of evan- cations? Archbishop Secker says, "certainly he did not appear what he was, for that would have entirely frus- trated his intent" (Sermons, ii. 114). Chandler says, "The devil appeared not as himself, for that would have frustrated all the effect of his temptation" (Serem. iii. 178). Secker supposes that "Satan transported himself into an angel of light;" but was it likely that he would put on this form in order to tempt our Lord to idolatry? (Matt. iv. 9). Chandler thinks he appeared as "a good man;" but would it have served his purpose to appear as a good man promising universal dominion? The supposition that the devil disguised himself in any form might indeed constitute the temptation a trial of our Lord's understanding, but not of his heart. Besides, Christ is represented as addressing him as "Satan" (ver. 10). It is further urged that the literal interpretation does not suppose the reader to be deceived in his representation of the facts of his temptation, nor of the conduct of the devil, as carried or conducted "by the devil at his will," and therefore as accessory to his own temptation and dan- ger; nor does it promote the consolation of his follow- ers, none of whom could ever be similarly tempted. Our Lord indeed submitted to all the liabilities of the human condition; but do these involve the dominion of Satan over the body to the extent thus represent- ed? The literal interpretation also attributes miracu- lous powers to the devil, who, though a spiritual being, is represented as becoming visible at pleasure, speaking in an audible voice, and conveying mankind where he pleases — powers not inferior to what our Lord's preser- vation would have been had he cast himself headlong from the Temple. Suppose we even give up the old notion that "the devil hurried Christ through the air, and carried him from the wilderness to the temple" (Benson, Life of Christ, p. 85), and say, with Doddridge and oth- ers, that "the devil took our Lord about with him as one person takes another to different places," yet how without a miracle shall we account for our Saviour's admission to the exterior of the Temple, unless he first, indeed, obtained permission of the authorities, which is not recorded (Comp. Josephus, Ant. xv. 11; iii. 8; War, v. 9); nor supposed that great Dodridge resort to the supposition of an "illusive show;" but it may be asked, if one of the temptations was conducted by such means, why not the other two? Macknight endeavors to explain "all the kingdoms of the world and the glory of them" as relating only to them as a mere peradventure ofthe human mind (Low, q.v.). But all this is a mere parable, unless we assume that Matthew and Luke have wholly misunderstood their Master's meaning. The story is that of a fact, hard indeed to be understood, but not to be made easier by explana- tions such as would invalidate the only testimony on which rests (Heuber, Friend's Commentary on Matthew). (Edinb. ed.), i, 129.

TEMPUS CLAUSUM (Feriatum, Sacratum), a closed time, is the period during which noisy festivities are prohibited in the Church of Rome, particularly such as are common in connection with the celebration of a marriage. The origin of such prohibitions is to be found in the ideas which exercised, in some degree at least, a determining influence over the regulation of feasts. See Fasting. Prayer and continence were employed as a preparation for the worthy observance of feasts among the Israelites (Exod. xix. 14 sq.; 1 Sam. xxii. 4), and the custom is endorsed by Paul in 1 Cor. viii. 9. The most ancient ecclesiastical regulations upon this subject date back to the middle of the 4th century (e.g. Conc. Laodicens. c. 51, 52). The civil authorities confirmed the prohibitions imposed by the Church (e.g. Col. De Feria, c. 11, iii, 12 of Leo, and Anonymus 469), and thereupon the Tempus Clausum was generally made to apply to the days which follow rather than to the Advent and other festal periods recommended. No general and inflexible rule for the dies observabiles existed during the Middle Ages, and none has since been established. The usual time is contained between the first Sunday in Advent and the octave of Epiphany, the Ember days and Easter, Rogation and Trinity Sundays. Quiet weddings, as they are termed, are permitted to be celebrated during those periods, but never without a dispensation from the local bishop.

The tempus clausum was adopted by the Protestant church in the ideas which exercised, Doctr. de temp. non, ex Ordinat. Ecc. Ewing, etc. (Halifax, 1848, 4to.), p. 38, 39; art. 133-140), and the subject received careful consideration so late as 1857 in the conference of Eisenach (see Moser, Aligem. Kirchenbl. f. d. evangel. Deutschl. 1857, p. 325 sqq., 343; 1858, p. 197 sqq.). The Tempus Clausum as a closed time in the Catholic church commonly extends over the period between Ash-Wednesday and Easter-Sunday, though it includes only the Passion week in some regions, and in others is not recognised at all. Its observance also varies greatly. Public amusements are prohibited, and marriages are sometimes wholly forbidden or are compelled to be quietly celebrated. Where such legal prohibitions are in force, dispensations from their operation may usually be obtained, except in Altenburg and the principality of Lubeck and Reuss. On the subject, see Hartzheim, Concilia Germaniae, iii, 56; Conc. Trident. sess. xxiv, 10, De Reforma. Matriarci, etc. (Bohmer, Jas Eccles. Prav. lib. iii, tit. xvi, § 45; lib. iv, tit. xvi, § 2 sqq.; Kliesloft, Liturgische Abhandlungen, i, 55 sq.—Hertzog, Real-Enzyklop. der v. s. See LENT.

Ten. (τένες, πάντα, "a part;" Vulg. decime), plainly derived from τένειν, "ten," which also (in the form τένος) means "to be rich;" hence ten is the rich number, perhaps because including all the units under it. The same idea seems to have been retained in the conception of being age, and in the Greek; thus, δίκαιος, δυναμάς, "to receive," "hold," etc., δίκας, "ten," because the ten fingers hold everything; and in the Latin, tenes; French, contain: English, contain, ten. Pythagoras speaks of the Decade, which is the sum of all the preceding numbers 1+2+3+4, as comprehending all quality and articulate speech. For a view of his doctrine of numbers and the probability of its Egyptian origin, see Wilkinson, Manners and Customs of the Ancient Egyptians, iv, 198-200. For Aristotle's similar ideas of the number ten, see Probl. iii, 15. This number seems significant of completeness or abundance in many passages of Scripture. Jacob said unto Laban, "Thou hast changed my wages these ten times" (Gen. xxxi, 41): "Am not I better to thee than ten sons?" (1 Sam. ix. 8); "These ten times have ye reproached me" (Job xxx, 3); "Thy pound hath gained ten pounds" (Luke x, 15), etc. This number, as the end of less numbers and beginning of greater, and as thus signifying perfection, sufficiency, etc., may have been selected for its suitability to those eucharistic donations to religion, etc., which mankind were required to make, probably, in primitive times. Abraham gave to Melchisedec, "priest of the Most High God," a tenth of all the spoil he had taken from the king of Sodom; the Levitical tithe, Numbers xiv, 20; Heb. vii, 4. The incidental way in which this fact is stated seems to indicate an established custom. Why should Abraham give tithes of the spoils of war and not of other things? For instances of the heathen deducing to the gods the tenth of warlike spoils, see Wettstein, On Heb. vi, 4. Jacob's vow (Gen. xxxvii, 22) seems simply to relate to compliance with an established custom; his words are, literally, "And all that thou shalt give me I will assuredly tithe it unto thee." וויכך פֹּלַע פּוּלַע וּכְתָבָן פּוּלַע. On the practice of the heathen, in various and distant countries, to dedicate tithes to their gods, see Spelman, On Tithes, ch. xxvii; Selden, ch. iii; Lesley, Divine Right of Tithes, § 7; Wettstein, On Heb. vii, 2. The Mosaic law, therefore, in this respect, as well as in others, was simply a reconstitution of the patriarchal custom, and that Hebraic sanctity of the military spoils commandment (Numm. xxx, 31). For the observance of tithing generally, see Lev. xxvii, 30, etc., where they are first spoken of as things already known. These tithes consisted of a tenth of all that remained after payment of the first-fruits of seeds and fruits, and of the firstborn. This custom included the tithe, and belonged to God as the sovereign. See Tithe.

Ten Articles. In the year 1556 convocation under Henry VIII gave sanction to the "Ten Articles," entitled "Articles devised by the king's highness majesty to establish Christian quietness and unity among us." These were probably compiled by Cranmer, though ostensibly emanating from the crown. Five of the articles related to doctrines and five to ceremonies. The former were: 1. That the Holy Scriptures and the Three Creeds are the basis and summary of a true Christian faith. 2. That baptism conveys remission of sins and the regenerated grace of the Holy Spirit, and is absolutely necessary as well for children as adults. 3. That penance consists of contrition, confession, and reformation, and is necessary to salvation. 4. This body and blood of Christ are really present in the elements of the eucharist. 5. That justification is remission of sin and reconciliation to God by the merits of Christ; but good works are necessary. The latter were: 1. That images are useful as remembrances, but are not objects of worship. 2. That the church should be honored as examples of life, and as furthering our prayers. 3. That saints may be invoked as intercessors, and their holydays observed. 4. That ceremonies are...
to be observed for the sake of their mystical significance, and as conducive to devotion. 5. That prayers for the dead are good and useful, but the efficacy of papal pardons, and of soul-masses offered at certain localities, is negatived. Upon these articles was founded the work entitled Instigation of a Christian Man (q.v.), commonly known as "The Bishop's Book" (q.v.). See AMERICA.

Ten Commandments, Thm, the common designation of the Decalogue, or that portion of the law of Moses which contains the moral law. See Law of Moses.

I. Title.—The popular name in this, as in so many instances, is not that of Scripture. There we have the "ten words" (ה’ א’dות מְנַצְּחָנָה לְךָ, asethet haddebarim, the decade of the words; Sept. τα ἑξα ἑπτά βίβλα; Vulg. verba decem), not the ten commandments (Exod. xxxix, 28; Deut. iv, 13; x, 4, Heb.). The difference is not altogether an unmeaning one. The word of God, the "word of the Lord," the constantly recurring term for the fullest revelation, was higher than any phrase expressing merely a command, and carried with it more the idea of a self-fulfilling power. If, on the one side, there was the special contrast to which our Lord refers in the parable of the vineyard (Mark xiv, 6), in which the Israelites yielded their vineyard to the care of the newcomers; to the other, in placing the words of the scribes on the same level as the words of God. See SCRIBE. Nowhere in the later books of the Old Test. is any direct reference made to their number. The treatise of Philo, however, who, μικρά ἡ έκκλησία και γενέθλιον, shows that it had fixed itself on the Jewish mind, and, later still, it gave occasion to the formation of a new word (the "Decalogue," ἡ ἔκκλησία, first in Clem. Al. Ped. iii, 12), which has perpetuated itself in modern languages. Other names are even more significant. These, and these alone, are "the words," "the testament," the immortal ground of the union between Jehovah and his people, all else being as a superstructure, accessory and subordinate (Exod. xxxiv, 28). They are also the tables of testimony, sometimes simply "the testimony," the witness to men of the divine will, righteous itself, demanding righteousness of man (xxv, 16; xxxi, 18, etc.). It is by virtue of their presence in it that the ark becomes, in its turn, the ark of the covenant (Num. x, 33, etc.), that the sacred tent became the tabernacle of witness, of testimony (Exod. xxxviii, 21, etc.). See TABERNACLES. They remain there, throughout the glory of the kingdom, the principal relics of a holy equity (1 Kings vi, 9), their material, the writing on them, the sharp incisive character of the laws themselves, presenting a striking contrast to the more expanded teaching of a later time. Not less did the commandments themselves speak of the earlier age when not the silver and the gold, but the ox and the ass, were the great representatives of wealth (comp. 1 Sam. xii, 8).

Ewald is disposed to think that even in the form in which we have the commandments there are some additions made at a later period, and that the second and the fourth commandment were originally as briefly importuned in the third or seventh. The difference between the reason given in Exod. xx, 11 for the fourth commandment and that stated to have been given in Deut. v, 15 makes, perhaps, such a conjecture possible. Scholia, which modern annotators put into the margin, are, in the existing state of the Old Test., incorporated into the text. Obviously both forms could not have appeared written on the two tables of stone, yet Deut. v, 15, 22 not only states a different reason, but affirms that "all these words" were thus written. Keil (Comment, on Exod. xx) seems on this point disposed to agree with Ewald.

The Decalogue is found in two passages, first in Exod. xx, 2-17, again in Deut. v, 6-21; and there are certain differences between the two forms, which have been taken advantage of by rationalistic interpreters, sometimes for the purpose of disparaging the historical correctness of either form, and sometimes as a conclusive argument against the doctrine of inspiration. The differences are of three kinds: (1.) Simply verbal, consisting in the insertion or omission of the Hebrew γ, which signifies and; in Exod. it is only omitted once where it is found in Deut., namely, between грaven image and any likeness, in the second commandment; but in Deut. it occurs altogether six times where it is wanting in Exod.; and of these, four are at the commencement of the last four commandments, which are severally introduced with and, and when that precedent is followed in form, while still the sense remains essentially the same: under the fourth commandment, it is in Exod. "nor thy cattle," while in Deut. it is "nor thine ox, nor thine ass, nor any of thy cattle"—a mere amplification of the former by one or two leading particulars; and in the tenth commandment, as given in Exod., "thy neighbor's house" comes first, while in Deut. it is "thy neighbor's wife;" and here also after "thy neighbor's house," it is added "his field"—another slight amplification. (2.) Differences in respect to matter: these are altogether four. The fourth commandment is introduced with and, which may be the reason assigned for its observance in Exod. is derived from God's original act and procedure at creation, while in Deut. this is omitted, and the deliverance of Israel from the land of Egypt is put in its stead; in Deut. the fifth commandment runs, "Honour thy father and thy mother, as the Lord thy God commanded thee," the latter words having no place in Exod.; and in the tenth commandment, instead of "Thou shalt not covet thy neighbor's wife," it stands in Deut. "Thou shalt not desire thy neighbor's wife," differing only, however, in this, that the one (covet) fixes attention more upon the act of desire to possess, and the other upon the improper desire itself. It is obvious that these differences leave the main body or substance of the Decalogue, as a revelation of law, entirely untouched; not one of them affects the import and bearing of a single precept; nor, if viewed in their historical relation, can they be regarded as involving in any doubt or uncertainty the verbal accuracy of the form presented in Exod. We have no reason to doubt that the words there recorded are precisely those which were uttered from Sinai, and written upon the tables of stone. In Deut. Moses gives a revised account of the precepts; he states the restraints upon the life of the people often, as speaking in a hortative manner, and from a more distant point of view; and, while he repeats the commandments as those which the Lord had spoken from the midst of the fire and written on tables of stone (Deut. v, 22), he yet shows in his very mode of doing it that he did not aim at an exact reproduction of the past, but wished to preserve to some extent the form of a free rehearsal. This especially appears in the addition to the fifth commandment, "as the Lord thy God commanded thee," which distinctly pointed back to a prior original, and even recognised as that the perma-

nent institution (Exod. xxi, 15, 16; Deut. v, 12, 17); and the introduction of the latter commands with the copulative and tends to the same result; as it is precisely what would be natural in a rehearsal, though not in the original announcements, and came from combining with the legislative something of the narrative style. Such being plainly the character of this later edition, its other and more noticeable deviations—the occasional amplifications admittad into it, the substitution of desire for covet, with respect to a neighbor's wife, in the tenth commandment, and of the deliverance of Israel from Egypt, for the divine order of procedure at the creation, in the fourth commandment—are explained as slight, and incident, as planetary statements, which it was perfectly competent for the authorized mediator of the covenant to introduce, and which, in nature and design, do not materially differ from the alterations sometimes made by inspired
TEN COMMANDMENTS
writers of the New Test, on the passages they quote from the Old (see Fairbairn, Herem. Manual, p. 354 sq.). They are not without use in an exegetical respect; and in the present case have also a distinct historical value, from the important evidence they yield in favor of the Mosaic authorship of Deut.; since it is impossible that any later reformer, imitating a character personating Moses, would have ventured on making such alterations on what had been so expressly ascribed by Moses to God himself, and which seemed to bear on it such peculiar marks of sacredness and inviolability (Hervieriek, Introduction to the Pentateuch, p. 308).

III. Source.—The circumstances in which the ten great words were first given to the people surrounded them with an awe which attached to no other precept. In the midst of the cloud, and the darkness, and the flashing lightning, and the fiery smoke, and the thunder,like the voice of a trumpet, Moses was called to receive the law without which the people would cease to be a holy nation. Here, as elsewhere, Scripture unites two facts which men separate. God, and not man, was speaking to the Israelites in those terrors, and yet in the language of later inspired teachers, other instrumentalities and agents of the divine word and power, for instance, Jewish interpreters, with hardly an exception, maintain that "Deus verba Descaloi per se immediate locutus est" (Diss. de Decal.). The language of Josephus, however (Ant. xv, 5, 8), not less than that of the New Test., shows that at one time the traditions of the Jewish schools pointed to the opposite conclusion. The law was "ordained by angels" (Gal. iii, 9), "spoken by angels" (Heb. ii, 2), received as the ordinance of angels (Acts vii, 53). The agency of those whom the thoughts of the Psalmist connected with the lights and the flaming fire (Ps. civ, 4; Heb. i, 7) was present also on Sinai. The predicament of the Israelites was described by Paul (Gal. iii, 19) affirms, that of "a mediator." He stood "between" the people and the Lord "to show them the word of the Lord" (Deut. v, 5), while they stood afar off to give form and distinctness to what would else have been terrible and overwhelming. The "voice of the Lord" which they heard in the thunders and the sound of the trumpet, "full of majesty," "dividing the flames of fire" (Ps. xxxix, 9-3), was for him a divine word, the testimony of an eternal will, just as in the parallel instance of John xii, 29, a like testimony led some to say "it thundered," while others receive the testimony of the world in the same manner. The people shrank even from this nearness to the awful presence, even from the very echoes of the divine voice. The record was as exceptional as the original revelation. Of no other words could it be said that they were written as these were written, engraved on the tables of stone, not as originating in man's contrivance or sagacity, but by the power of the Eternal Spirit, by the "finger of God" (Exod. xxxii, 18; xxxii, 16). See Barth-Kol.

IV. The number ten was, we can hardly doubt, itself significant to Moses and the Israelites. The received synecdoche for it is "the commandments" (Fromm, Symbolik, i, 176-183), it taught the people that the law of Jehovah was perfect (Ps. xix, 7). The fact that they were written not on one, but on two tables, probably in two groups of five each (infra), taught men (though with some variations from the classification of later ethics) the great division of duties towards God and duties towards our neighbor, which we recognize as the groundwork of every true moral system. It taught them also, five being the symbol of perfection (Bähr, i, 183-187, how incomplete each set of duties would be when divorced from its companion. The recurrence of these five in the ten is an accent and a striking. Ewald (Gesch. Isr. ii, 212-217) has shown by a large induction how continually laws and precepts meet us in groups of five or ten. The numbers, it will be remembered, meet us again as the basis of all the pro-

portions of the tabernacle (q. v.) and temple. It would show an ignorance of all modes of Hebrew thought to exclude this symbolic aspect. We need not, however, shut out altogether that which some writers (e. g. Grothus, De Decal. p. 36) have substituted for it, the connection of the ten words with a decimal system of numeration through the finger of God, in the form of the count. Words which were to be the rule of life for the poor as well as the learned, the groundwork of education for all children, might well be connected with the simplest facts and processes in men's mental growth, and thus stamped more indelibly on the memory. Bähr, absorbed in his calculations of how many nothing has nothing, has nothing to say to the question of the numberiation but two notes of admiration (!). The analogy of ten great commandments in the moral law of Judaism might have shown him how naturally men crave a number that thus helps them. A true system was as little likely to ignore the natural craving as a false (see note in Ewald, Gesch. Isr. ii, 207). See Tabs.

V. Tables.—In what way the ten commandments were to be divided has, however, been a matter of much controversy. At least four distinct arrangements present themselves.

1. In the received teaching of the Latin Church rests that of Augustine (Qu. in Ex. 71, Ep. ad Januar. c. 11; De Decal. etc.), the first table contained three commandments, the second the other seven. Partly on mystical grounds, because the tables thus symbolized the trinity of divine persons and the eternal Sabbath, partly as seeing in it a true ethical division, he adopted this classification. It involved, however, and in part proceeded from, an alteration in the received arrangement. What we know as the first and second were united, and consequently the Sabbath law appeared at the close of the first table as the third, not as the fourth, commandment. The completeness of the number was restored in the second table. The ninth commandment (the tenth) of the precept, "Thou shalt not covet thy neighbor's wife," which with us forms part of the tenth. It is an almost fatal objection to this order that in the first table it confounds, where it ought to distinguish, the two sins of polytheism and idolatry; and that in the second it introduces an arbitrary and meaningless division. The later theology of the Church of Rome apparently adopted it as seeming to prohibit image-worship only so far as it accompanied the acknowledgment of another God (Catech. Trident. iii, 2, 20).

2. The familiar division—referring the first four to our duty towards God, and the rest, our duty towards man—is, on ethical grounds, simple and natural enough. If it is not altogether satisfying, it is because it fails to recognise the symmetry which gives to the number five so great a prominence: and perhaps, also, because it looks on the duty of the fifth commandment from the point of view of modern ethics rather than from that of the ancient Israelites and the first disciples of Christ (infra).

3. A modification of 1 has been adopted by later Jewish writers (Jonathan ben-Uziel, Aben-Erra, Moses ben-Nachman, in Suicer, Thesaur. s. v. Δακταλογος). Retaining the division of the first table, they, instead of the elements of the common order, have made a new "word" of the opening declaration, "I am the Lord thy God which brought thee out of the land of Egypt, out of the house of bondage," and so have avoided the necessity of the subdivision of the tenth. The objection to this division is (1), that it rests on no adequate authority, and (2) that it turns into a single precept what is evidently given as the groundwork of the whole body of laws.

4. Rejacting these three, there remains that which recognized by the older Jewish writers—Josephus (Ant. iii, 6, 6) and Flaccus (ib. 130, 3). It is explained thoughtfully by Ewald (Gesch. Isr. ii, 208), which places five commandments in each table, and thus preserves the pentad and decad grouping which pervades the whole code. A modern jurist would perhaps object that...
this places the fifth commandment in a wrong position; that a duty to parents is a duty towards our neighbor. From the Jewish point of view, it is believed, the place thus given to that commandment was essentially the right of the head. The duty of honor, and duty towards our neighbors, we must think of the first table as containing all that belonged to the Elohim of the Greeks, to the Platus of the Romans—duties, i.e., with no corresponding rights; while the second deals with duties which involve rights, and come, therefore, under the head of justice. On the J. T. view of this commandment, i.e., supporting, parents came under the former head. As soon as the son was capable of it, and the parents required it, it was an absolute, unconditional duty. His right to any maintenance from them had ceased. He owed them reverence as he owed it to his Father in heaven (Heb. xii. 9). He was to show piety (devêçi) to them (1 Tim. v. 4). What made the "Cobban" casuistry of the Scribes so specially evil was that it was, in this way, a sin against the piety of the first table, not merely against the lower obligations of the second (Mark vii. 11). It at least harmonizes with this, this second, third, fourth, and fifth commandments all stand on the same footing as having special sanctions attaching to them, while the others that follow are left in their simplicity by themselves, as if the parity of rights were in itself a sufficient ground for obedience. A further confirmation of this is found in the division itself. Rom. xiii. 8, Paul, summing up the duties "briefly comprehended" in the one great law, "Thou shalt love thy neighbor as thyself," enumerates the last five commandments, but makes no mention of the fifth.

VI. Addition.—To these ten commandments, as we find in the Samaritan Pentateuch an eleventh added:

"But when the Lord thy God shall have brought thee into the land of Canaan, whither thou goest to possess it, thou shalt set thee up two great stones, and shalt plaster them with plaster; and thou shalt build there an altar unto the Lord thy God, an altar of stones: thou shalt not lift up any iron thereon. Of unhewn stones shalt thou build that altar to the Lord thy God, and thou shalt offer on it burnt-offerings to the Lord thy God, and thou shalt sacrifice peace-offerings, and shall eat thereof in the place which the Lord thy God shall choose. But thou shalt not offer burnt-offerings thereon of young oxen, or of fat cattle, or of fat sheep: for if thou dost offer any such of the children of Israel before the Lord thy God, he will be wroth with thee. Thou shalt rather go thither unto the place which the Lord thy God shall choose; and thou shalt offer burnt-offerings thereon to the Lord thy God, and thou shalt sacrifice peace-offerings, and shalt eat thereof. And thou shalt not do after all things thus: for thou hast not known the ways of the Lord thy God." (Walton, Bib. Polyglotts.) See Targum.

VIII. The absence of any distinct reference to the ten commandments as such in the Pirkê Aboth (= Maxims of the Fathers) is both strange and significant. One chapter (ch. v) is expressly given to an enumeration of all the scriptural facts which may be grouped in decades—the ten words of Creation, the ten generations from Adam to Noah and from Noah to Abraham, the ten trials of Abraham, the ten plagues of Egypt, and the like; but the ten divine words find no place in the list. With all their ostentation of profound reverence for the law, the teaching of the rabbis turned on other points than the great laws of duty. In this way, the commandments which we have learned that they might keep their own traditions. Comp. Stanley, Jewish Church, lect. vii, in illustration of many of the points here noticed. See Talmud.

IX. Economical Importance.—The giving of the ten

commandments marks an era in the history of God's dispensations. Of the whole law this was both the first portion to be communicated, and the last that followed. Various things attested this superiority. It was spoken directly by the Lord himself—not communicated, like other parts of the old economy, through the ministration of Moses—and spoken amid the most impressive signs of his glorious presence and majesty. Not only was it given in a manner by building a temple on the Hill of Curses. They would claim the inheritance of the blessings; they would set the authority of their text against that of the scribes of the Great Synagogue. One was as likely to be accepted as the other. The "Hebrew verity" was not then acknowledged as it has been since. (4.) In other repetitions or transfers in the Samaritan Pentateuch we may perhaps admit the plea which Walton makes in its behalf (loc. cit.) that, in the first formation of the Pentateuch as a Codex, the transcribers had a large number of separate documents to copy, and that consequently much was left to the discretion of the individual writer. Here, however, the case is different. The later Samaritans might easily come to look on their text as the true one: on that of the Jews as corrupted by a fraudulent omission. It is to the credit of the Jewish scribes that they were not tempted to retaliate, and that their reverence for the sacred record prevented them from suppressing the history which connected the real sanctuary with the blessings of Gerizim. See SAMARITAN PENTATEUCH.
there they were engraved undoubtedly imaged an abiding validity and importance. It was an emblem of relative perpetuity. The very number of words, or utterances, in which they were comprised, ten, bespoke the same thing; for in the significance that in ancient times was ascribed to certain numbers, ten was universally regarded as a symbol of completeness (Spencer, De Leg. Heb., i, ii.; Bähr, Symbolik, i, 175.). See EAGLE.

Tenebrae (darkness), an office for the Wednesday, Thursday, and Friday of Holy Week, commemorating the sufferings and death of our Blessed Saviour. The name of the office has been traced to the fact that it was formerly celebrated at midnight, as an allusion to Christ walking no more openly with the Jews, as Cranmer says. Others suggest that it is derived from the gradual extinction of lights, which originally were just put out one by one as the morning began to grow clear; or in symbol of grief and mourning; or, as Belch suggests, of the eclipse of three hours at the Passion. The number of lights varied. In some churches there was a candle corresponding to each psalm and lesson of the office. Thus we find seven, nine, twelve, fifteen, twenty-four, twenty-five at York, thirty, seventy-two, or even as many as each person thought fit to bring. These were extinguished sometimes at once, or at two or three intervals. In some places they were quenched with a moist sponge, and in others with a hand of wax to represent the left hand of St. Gregory the Great that on the night of Good-Friday the watchings were kept in darkness until the third hour, when a small light appeared above the altar. Cranmer explains that the Laments of Jeremiah were read in memory of the Jews seeking our Lord's life at this time. The Reproaches and Triumgraph were not sung until the 18th century on Good-Friday.

Tenson, Thomas, a learned English prelate, was born at Cottenham, Cambridgeshire, Sept. 29, 1636; and receiving his primary education at the free school at Norwich, entered Corpus Christi College, Cambridge, where he graduated in Lent term, 1656-7. He began to study medicine, but on the eve of the Restoration decided upon the theological profession, and was ordained privately at Richmond in Surrey by the bishop of Salisbury. Being admitted fellow of his college March 24, 1662, he became tutor, and in 1665 was chosen one of the university preachers, and about the same time was presented to the cure of St. Andrew the Great in Cambridge. In 1667 he received the rectory of Holywell and Nendingen, Huntingdonshire, from the earl of Manchester, and in 1674 was chosen principal minister to the Church of St. Peter's Mancroft, Norwich. In 1680 he took the degree of D.D., and in October of the same year was presented by Charles II, being then a royal chaplain, to the vicarage of St. Martin's-in-the-Fields, London. Immediately after the Revolutions he was promoted to be archdeacon of London; was consecrated bishop of Lincoln, Jan. 10, 1692; and was raised to the archbishopric of Canterbury in 1694. In 1700 he was appointed one of a committee to recommend and nominate to the king proper persons and religious preferments in his gift above the value of £20 per annum. He attended his majesty during his last illness, and crowned queen Anne. He was, in April, 1706, made first commissioner in the treaty of union between England and Scotland; and afterwards crowned George L. His death occurred at Lambeth Palace Dec. 14, 1715. By his will he bequeathed large sums to charitable purposes, and proved a liberal benefactor to Benedict College, Cambridge, the library of St. Paul's Cathedral, the Society for the Promotion of the Gospel, Bromley College, etc. He published, The Creed of Mr. (Thomas) Boston, Master of Arts, Oxford; his Disputations in a book of course (1678, 4to.); — Bacometia; or Certain Genuine Remains of Lord Bacon (1679, 8vo; 1674, 4to). See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Chalmers, Bong. Dict. s. v.

Tennent, Gilbert, an eloquent Presbyterian divine, and eldest son of the Rev. William Tennent, Sen., was born in the County of Armagh, Ireland, Feb. 5, 1708; emigrated with his father to America in 1718; received his education under the paternal roof; had the honorary degree of master of arts conferred upon him by Yale College in 1726; and in theology professed to preach in May, 1725; and was ordained and installed minister of a Presbyterian congregation at New Brunswick, N. J., in 1726. In 1740 he was prevailed on by Whitefield to accompany him on a preaching tour to Boston; and this tour constituted one of the great events of his life. The scope of his pietistic labors is thus described by the Rev. Mr. Prince, minister of the Old South Church: "It was both terrible and searching. . . . By his arousing and spiritual preaching, deep and pungent convictions were wrought in the minds of many hundreds of persons in that town; and the same effect was produced on several scores in the neighboring congregations. And now was such a time as we never knew. The Rev. Mr. Cooper was wont to say that more came to him in one week in deep concern than in the whole twenty-four years of his preceding ministry. I can say also the same as to the numbers who repaired to me." Tennent went on to do in Bristol what he had done in Boston in the dispersion of the Presbyterian Church in 1741; indeed, it was owing, in a great measure, to one sermon called the "Nottingham Sermon," which Dr. Alexander declares to be one of the most severely abusive sermons that were ever penned, that that schism occurred. It is to his honor, however, that, seventeen years after, he was a principal instrument in a reunion of the two parties. In 1743 he became pastor of a Presbyterian congregation (disciples of Whitefield) in Philadelphia, where he continued the residue of his ministry and life, which was about twenty years. He died July 23, 1764. Mr. Tennent was a teacher, and had few equals in his vigorous days. His reasoning powers were strong; his thoughts nervous and often sublime; his style flowery and diffusive; his manner of address warm and pathetic—such as must convince his audience that he was in earnest." Henry B. Smith, D.D., says of him, "Gilbert Tennent, that soul of fire." He had a powerful and public spirit, needing no other motive to exert himself than only to be persuaded that the matter in question was an important public good. He published Sermons (Philadelphia, 1744, 8vo):—Discourses (1745, 12mo):—Sermons (1758, 12mo). He also published many occasional sermons, especially one, "Sermon on the New Year's Day, 1748, which is entitled, "The American Pulpit," iii, 35-41; Sermon on His Death, by S. Finley, D.D. (1764, 8vo); Alexander, Hist. of the Log College, p. 91-94; Sermons and Essays by the Tennents and their Contemporaries (1855, 12mo); Allibone, Dict. of Brit. and Amer. Authors, s. v.; Gillies, Hist. Coll. (J. L. S.)

Tennent, John, a Presbyterian minister and third son of the Rev. William Tennent, Sen., was born in the County of Antrim, Ireland, Nov. 12, 1705. His parents emigrated to America when he was twelve years old. He was educated at the Log College, and licensed to preach Sept. 18, 1729. On Nov. 19, 1730, he was installed pastor of the Presbyterian Church of Freehold, Monmouth Co., N. J. He had but a brief ministry, his death occurring April 23, 1732. He was distinguished for a clear, discriminating mind and earnest manner. One of his sermons, on regeneration, was published, with a short memoir of his life, by his brother Gilbert Tennent. See Sprague, Annuals of the Amer. Pulpit, iii, 41.

Tennent, William, 1, a Presbyterian minister and educator, and the father of Gilbert, John, and William Tennent, was born in Ireland in 1673. He received a liberal education; was admitted to a degree a Bachelor of Divinity at the University of Dublin; and was licensed ably a graduate of Trinity College, Dublin. He entered the ministry originally in the Episcopal Church, and was ordained deacon by the bishop of Down, July 1, 1704; and priest, Sept. 22, 1706. He emigrated to Amer-
Tennent in 1718, and immediately changed his ecclesiastical relations, being received into the Presbyterian Church September 17 of the same year. He supplied East Chester and Bedford, N.Y.; Benson and Smithfield, Bucks Co., Pa.; and in 1726 accepted a call from the Presbytery of the same county, where he spent the remainder of his life. He was but fully settled when he was impressed with the conviction that there were other duties than those of a pastor demanding his attention. The country was in a forming state, and he felt that it was all-important that it should have a right direction. His four sons followed in the footsteps of their godly father, and were consistent Christians. His attention was early directed to the young men who were growing up around him, and he who saw must be educated to become useful members of society. As there were no schools or colleges in that region, he determined to erect a building for educational purposes. His means were limited, and consequently the building must correspond with them. In process of time a log house was erected of humble proportions about a mile from Neshaminy Creek, near to the church. This house was afterwards designated the "College," and was the first literary and theological institution of the Presbyterian Church in this country. It was the immediate parent of Princeton College and Theological Seminary, and of all other institutions of a similar character in the Church. The site of the log college was in every desirable, convenient, and economical respect superior, and it did an extensive prospect of level, fertile country, bounded by distant hills. The distinguished Whitefield, who visited it in 1739, says of it: "The place wherein the young men study is a log house about twenty feet long and nearly as many broad, and me it seemed to resemble the school of the old prophets, for their habitations were mean; and that they sought not great show, but lived in a manner of those passages of Scripture wherein we are told 'each of them took a beam to build them a house;' and that at a feast of tabernacles prophets set up booths on the roof, while others went to fetch some herbs out of the field. All we can say of most of our universities is, that they are glorious without. From this despised place seven or eight worthy ministers of Jesus have lately been sent forth; more are almost ready to be sent, and the foundation is now laying for the instruction of many others."

Of Mr. Tennent, the founder of this college, but little is known outside of his connection with the institution. Whitefield's journal refers to him thus: "At my return home was much comforted by the company of one Mr. Tennent, an old grey-headed disciple and soldier of Jesus Christ. He keeps an academy about twenty miles from Philadelphia, and has distinguished himself with four gracious sons, three of which have been, and still continue to be, useful to the Church. He is a great friend of Mr. Erskine of Scotland, and he and his sons are secretly desired by the synod generally, as Mr. Erskine's friends are hated by the judicators of Scotland, and as the Methodist preachers are by the brethren in England."

Whitefield further says: "Set out for Neshaminy, where old Mr. Tennent lives, and where I was to preach to-day according to appointment. Arrived there, met a great company of the Presbytery, with the people assembled in the meeting-house yard. Mr. Whiteness, Jr., as we stayed beyond the time, was preaching to the people all day and then he stopped, gave out a psalm, which was sung, and then I began to preach to the Lord gave me utterance. At first the people seemed uneaf, but in the midst of my discourse they were pleased. Two of the Lord Jesus came upon me, and I felt such a struggling within myself for the soul of man. After the service was finished, Mr. Gilbert Tennent gave me a word of exhortation to confirm what had been delivered. After our exercises were over, we went to old Mr. Tennent's, and the smoke of this house I like as well as the most pleasant parochial. His wife to me seemed like Elizabeth, and he like Zachary. Both, as far as seen, had a command of the people; through God was pleased to humbly my soul so that I was obliged to retire for a while, yet we had sweet communion with each other. After the evening in concerting what measures had best be taken for promoting our dear Lord's kingdom. It happened very providentially that Mr. Tennent was borne quickly, and we are appointed to be a presbytery by the synod, so that they intend bringing up gracious youth and sending them out from time to time into the world with zeal and energy of good."

Among the ministers sent out from Log College to preach the gospel, were his four sons, Gilbert, William, John, and Charles; Rev. Messrs. Samuel Blair, Samuel J. Finley (afterwards D.D. and president of Princeton College), W. Robinson, John Rowland, and Charles Beatty. In 1742 this venerable man became unable to perform his duties as pastor of his people, it was supplied by the presbytery. In 1748 Mr. Beatty was ordained as his successor. His work was nearly done, and of him it may be said, in the language of Dr. Alexander, "The Presbyterian Church is probably not more indebted for her prosperity, and for the evangelical spirit which has generally pervaded her body, to any individual than to the elder Tennent." He died at his loved home in Neshaminy, May 6, 1746. His published works consist mostly of sermons, twenty-three of which appear in one volume, 8vo. Two other discourses were also published. Many occasional sermons and pamphlets were published in Philadelphia by Rev. Samuel Finlay, D.D., his former pupil, preached his funeral discourse, which was also published. See Sprague, *Annals of the Amer. Pulpit*, iii, 23; *Gen. Assmb. Miss. Mag. or Evang. Intell.* ii; *Alexander, Hist. of Log Col.; Tennent's Family Record.*

Tennent, William (2), a Presbyterian minister, and brother of John, Tennent, a minister of the Church of Ireland, Jan. 3, 1705. He emigrated with his father, the Rev. William Tennent, Sen., to America in 1718, where he received his education under the instruction of his father, and studied theology by the aid of his brother. He was licensed by the Philadelphia Presbytery, and ordained pastor of the Presbyterian Church at Freehold, N.J., Oct. 25, 1733, where he remained until his death, March 8, 1777. About the time that Mr. Tennent completed his theological course, he was the subject of a remarkable trance, which has perhaps given him his greatest celebrity. A full account of this extraordinary incident was published by Elias Boudinot. Mr. Tennent contributed sermons to *Sermons on Sacramental Occasions* (1739), and a *Sermon upon Matt. v, 23-24* (1769). See Sprague, *Annals of the Amer. Pulpit*, iii, 52; *Allibone, Dict. of Brit. and Amer. Authors, s.v.; Steel, Burning and Shining Lights* (1864-78); *Tenn. Mag.* vol. ii, 1733; *Hist. Log College; Prince, Christ, Hist.; Life of William Tennent, with an Account of his being Three Days in a Trance* (N. Y. 1847, 18mo); *Sermons and Essays by the Tennents and their Contemporaries* (1855, 12mo); *Blackwood's Mag.* iv, 695; *Story, Constitution of the Human Soul* (1857), p. 317. (J. L. S.)

Tennent, William (5), a Presbyterian minister, and son of the Rev. William Tennent (2), was born in Freehold, N. J., in 1740. He graduated at the College of New Jersey in 1758, was licensed to preach by the presbytery of New Brunswick in 1762, ordained by the same presbytery in 1763, and installed as junior pastor of the Presbyterian Church in Hightstown. In 1772 he became pastor of an Independent Church in Charleston, S. C. He died Aug. 11, 1777. Mr. Tennent was an eloquent preacher. Elegance of style, majesty of thought, and clearness of judgment characterized all his discourses. See Sprague, *Annals of the Amer. Pulpit*, iii, 243; *Hall, Hist. of Norwalk; Ramsey, Hist. of South Carolina*, vol. ii; *Hist. of the Church of Charleston*; *Alison, Funeral Sermon.*

Tennyson, Asa Peaslee, a Congregational minister, was born in Corinth, Vt., Feb. 14, 1801. He worked at an inn in Haverhill, N. H.; studied theology with Rev. Grant Powers and President Tyler of Dartmouth College. He was ordained first servant of the pastor's meeting-house in Norwich, Vt.; and when twenty-sev en years old took a five years' commission under the
New Hampshire Missionary Society, laboring in Hebron and Groton. In March, 1833, he became first pastor of the Congregational Church in Concord (West), N. H., where he died, March 1, 1867. Mr. Tenney was original, eloquent, and a mighty revivalist. He had won wide fame for the Bible and human nature, and was a prodigious worker, his sermons for over thirty-four years averaging more than four a week. See A Blacksmith in the Pulpit and in the Parish, in the Congregational Quarterly, 1867, p. 359 sqq., 380.

Tenney, Caleb Jewett, D.D., a Congregational minister, was born at Hollis, N. H., May 3, 1780. He graduated at Dartmouth College in 1801, entered the ministry in 1826, and was ordained as an elder in 1829, and as an associate pastor at Newport, R. I., where he remained until May, 1814, when he resigned and became co-pastor in Wethersfield, March 27, 1816, but, on account of his voice failing, was dismissed in 1840, and removed to Northampton, Mass., where he died, Sept. 28, 1847. He acted as agent for both the American and the Massachusetts Colonization Society. His publications were Two Discourses on Baptism (1816) and a few Occasional Sermons. See Sprague, Annals of the Amer. Pulpit, ii, 472.

Tenney, Ephraim, a Presbyterian minister, was born in Dummerston, Vt., Nov. 12, 1815. He graduated at Westminster College, Ill., in 1844, and entered the Western Theological Seminary the same year, and in the year following he died in Brooklyn, N. Y., March 8. (W. P. S.)

Tenney, Roswell, a Presbyterian minister, was born in Hanover, N. H., in 1796. He was educated at Dartmouth College, studied theology in the Union Theological Seminary, Prince Edward Co., Va., was licensed by the Hanover Presbytery April 25, 1828, and ordained by the same Nov. 28, 1829. His first preaching was as a home missionary; after that he preached successively at Salem, Unity, Somerset, and New Lexington, Va.; three points in Perry County, O.—Logan, Belpre, and Warren; two points in Washington County, O.; Dover, Mass.; Hanover Centre, N. H.; again in Salem and Fearing, O.; and finally at Ameeville, in Athens County. He died Aug. 6, 1866. See Wilson, Preb. Hist. Almanac, 1867, p. 821.

Tenney, Samuel Gilman, a Congregational minister, was born at Rowley, Mass., April 12, 1798. He sought an education with a view of entering the ministry, being impressed that it was his duty to preach. He was educated for college and for N. H., after which he entered Dartmouth College, from which he graduated in 1823. He studied theology under the Rev. Dr. Chapin at Woodstock, Vt. He was ordained June 29, 1825, and installed pastor of the Lyndon Church, Vt. Here he labored for six years with success. He was subsequently pastor in the following places: Bakersville, Vt., four years; Waitsfield, Vt., two years; Hillsborough, N. H., five years; Woodborough, Vt., seven years; and Alstead, N. H., seven years, when he retired, after an unbroken ministry of forty-nine years, in the sixty-fourth year of his age. His labors were blessed in many places by special and powerful revivals. He died in Springfield, Vt., Dec. 5, 1874. (W. P. S.)

Tent (usually and properly טֵנֶטֶט, את, so called from gliterring [Geneseus] or being round [Firstt], sqwy) both occasionally "tabernacle," elsewhere חַּסֶּכֶנ הַּסֶּכֶנ, a dwelling [Cant. i, 8], the regular term for "tabernacle;" רַבֶּכֶנ, sukkaḥ; [2 Sam. xi, 11]; a "booth" or רַבֶּכֶנ, kubbaḥ, a dome-like pavilion, only in Numb. ii, 8); a movable habitation, made of curtains extended upon poles. See Tabernacle.

Among the leading characteristics of the nomad races, those two have always been numbered whose origin has been ascribed to Jabal the son of Lamech (Gen. iv. 20), viz. to be tent-dwellers (תֵנֶטֶט תֵנֶט comp. xxv, 27; sqwy sqwy Pluyn, vi, 32, 35) and keepers of cattle. Accordingly the patriarchal fathers of the Israelites were dwellers in tents, and their descendants proceeded at once from tents to houses. We therefore read but little of "huts among them, and never as the fixed habitations of any people with whom they were conversant. By huts we understand small dwellings, made of the green or dry branches of trees interwined, and sometimes plastered with mud. In Scripture they are called both succoth and tabernacles, as were made by Jacob in Egypt for his cattle during the first winter of his return from Mesopotamia (Gen. xxxiii, 17). In after-times we more frequently read of them as being erected in vineyards and orchards to shelter the man who guarded the ripened produce (Josh. xviii, 19; Isa. i, 8; xxiv, 20). It was one of the Moscal institutions, that during the Feast of Tabernacles the people should live for a week in huts made of green boughs (Lev. xxiii, 42). In observing the directions of the law respecting the Feast of Tabernacles, the Rabbinical writers laid down as a necessary point, that the ordinary Jewish tent, or סֻּכֶּכֶא, Sukkah, that the latter must in no case be covered by a cloth, but be restricted to boughs of trees as its shelter (Sukkah, i, 3). In hot weather the Arabs of Mesopotamia often strike their tents and betake themselves to sheds of reeds and grass on the bank of the river (Layard, Nineveh and Babylon, iii, 10). See Parowick, Notes on Bed. i, 37, 46; Volney, Travels, i, 398).

In Egypt the Hebrews, for the most part, left off tent life, and lived in houses during their bondage; but on their deliverance, and during their protracted sojourn in the wilderness, tent life was again resumed by the nation (Exod. xvi, 16; Josh. vii, 24), and continued for some time even after their settlement in the Holy Land (xxiii, 8). Hence the phraseology of tent life remained among the people long after it had ceased to be their normal condition (1 Kings xii, 16). Here we may observe that tent life is not peculiar to nomads only, for we find settled clans, occupied in agricultural pursuits, still dwell in tents, and such, probably, was the case in Palestine in all ages. The family of Heber the Kenite was apparently of this class (Judg. iv, 11-22), and even the patriarchs seem partly to have adopted that mode of life. Isaac not only "had possession of flocks and possession of herds", but he "dwell in the tents of his father's servants in the same year a hundredfold" (Gen. xxvi, 12). It was not until the return into Canaan from Egypt that the Hebrews became inhabitants of cities, and it may be remarked that the tradition of tent-usage survived for many years later in the tabernacle of Shiloh, which consisted, as we now see, of Arab tents still consist of a wall enclosure covered with curtains (Mishna, Zebachim, xiv, 6; Stanley, Sinaii and Palaest, p. 283).

The Midianites, the Philistines, the Syrians, the descendants of Ham, the Hagarites, and Cushanites are mentioned in Scripture as living in tents. But the people most remarkable for this unsettled and wandering mode of life are the Arabs, who, from the time of Ishmael to the present day, have continued the custom of dwelling in tents. Amid the revolutions which have transferred kingdoms from one possessor to another, these wandering tribes still dwell, unsubdued and wild as was their progenitor. This kind of dwelling is not, however, confined to the Arabs, but is used throughout the continent of Asia. In one of the tents shown in Assyrian sculptures a man is represented arranging a couch for sleeping on, in another persons are sitting conversing, and in others cooking utensils and the process of cooking are shown. In another one (on the reverse of a watch) a caldron on what appears to be a fire between some stones. Among tent-dwellers of the present day must be reckoned (1) the great Mongol and Tartar hordes of Central Asia, whose tent-dwellings are sometimes of gigantic dimensions, and who exhibit more contrivance both in the dwellings themselves and in
fastened to short sticks or pins, called *wed* or *waled*, which are driven into the ground with a *chakuj* or mallet. Of the same kind was the *nub*, *nool* (q. v.), and the *ham* *hammer* (q. v.), which Jaal used (Judg. iv, 21). Round the back and sides of the tents runs a piece of stuff removable at pleasure to admit air. The tent is divided into two apartments, separated by a carpet partition drawn across the middle of the tent and fastened to the three middle posts. The men's apartment is usually on the right side on entering, and the women's on the left; but this usage varies in different tribes, and in the Mesopotamian tribes the contrary is the rule. Of the three side posts on the men's side, the first and third are called *gad* (hand), and the one in the middle is rather higher than the other two. Hooks are attached to these posts for hanging various articles (Gen. xviii, 10; Judg. xii, 6; Niebuhr, Voyage, i, 187; Layard, Nin. and Bab, p. 261). See PILLAR. In the men's apartment the ground is usually covered with carpets or mats, and the wheat sacks and camel bags are heaped up in it around the middle post like a pyramid, at the base of which, or towards the back of the tent, are arranged the camel pack-saddles, against which the men recline as they sit on the ground. The women's apartment is less neat, being encumbered with all the lumber of the tent, the water and butter skins, and the culinary utensils. The part of the tent appropriated to the women is called *harem*; and no stranger is permitted to enter it, unless introduced. Hence, perhaps, Sisera's hope of greater security in the harem of Jaal. See HOSPITALITY. "The tents are arranged in a sort of square; they are made of black hair-cloth, not large; and are mostly open at one end and on the sides, the latter being turned up. The tents form the common rendezvous of men, women, children, calves, lambs, and kids" (Robinson, Researches, i, 485). Few Arabs have more than one tent, unless the family be augmented by the families of a son or a deceased brother, or in case the wives disagree, when the master pitches a tent for one of them adjoining his own. An encampment is generally arranged in the form of an enclosure, within which the cattle are driven at night, and the centre of which is occupied by the tent or tents of the emir or sheik. If he is a person of much consequence, he may have three or four tents, for himself, his wives, his servants, and strangers, respectively. The first two are of the most importance, and we know that Abraham's wife had a separate tent (Gen. xxiv, 67). It is more usual, however, for one very large tent to be divided into two or more apartments by curtains. The
holy tabernacle was on this model (Exod. xxvii. 31-57). The individual tents of Leah, Rachel, Zilpah, and Bilhah may thus have been either separate tents or apartments in the principal tent in each case (Gen. xxxii. 35). When the pasture near an encampment is exhausted, the tents are taken down, packed on camels, and removed (Isa. xxxviii. 12; Gen. xxvi. 17, 22, 25). The beauty of an Arab encampment is noticed by Shaw (Travels, p. 221; see Numb. xxviii. 5). In choosing places for encampment, Arabs prefer the neighborhood of trees, for the shade of the tree and coolness which they afford (Gen. xviii. 4, 8; Niebuhr, loc. cit.). Some tribes have their tents constructed so as to house their flocks at night. Grant describes such a one among the Hauran tribes. "Our tent was about twenty rods long and eighteen or twenty wide, one side left quite open while a wall of reeds formed the other sides. The am- ple roof of black hair-cloth was supported by a number of small poles, and secured with cords and wooden pins driven into the earth. About one fourth of the tent was fenced off with aicker trellis for the lambs of the flock, which are kept there during the night" (Nerto- rians, p. 93).

The manufacture of tents formed a regular and lucrative trade (εμπορίοι), at which Paul occasionally labored, especially in connection with Aquila, at Corinth (Acts xviii. 3). See Paul.

A feature of Oriental life so characteristic as the tent could not fail to suggest many striking metaphors to the Biblical writers, and accordingly the Hebrew has special terms for pitching (טְנַחַה and לַעֲחָה) and striking (טָנַךְ) a tent. The tent erected and its cords stretched out are often figuratively alluded to in the Scriptures. Thus Isaiah represents God as the one "that stretcheth out the heavens as a curtain, and spreadeth them out as a tent to dwell in" (xli, 22). He also says, in speaking of the glorious prosperity of the Church and the need of enlargement, "Enlarge the place of thy tent, and let them stretch forth the curtains of thine habitations; spare not, lengthen thy cords, and strengthen thy stakes" (liv, 2; see also xxxiii, 20). It is a work of some effort to pitch a tent properly, especially a large one, requiring the united efforts of willing hands. Hence the pathetic language of Jeremiah in mourning over the desolations of God's people: "My tabernacle is spoiled, and all my cords are broken; my children are gone forth of me, and they are not; there is none to stretch forth my tent any more and to set up my curtains" (x, 20). These tents are rather compact, so much so as to prevent the eye which to-day rests on a large encampment active with life may to-morrow behold nothing but a wilderness. Thus Isaiah says, "Mine age is departed, and is removed from me as a shepherd's tent" (xxxviii. 12, 13). The facility with which tents are taken down and the frailty of their material are beautifully alluded to by Paul in 2 Cor. v, 1 (see also 2 Pet. i, 13, 14). See Hackett, Illustr. of Script. p. 33-40; Van Lennep, Bible Lands, ch. iii; Rhodes, Tent-life from the Earliest Times (London, 1888); Conder, Tent-work in Palestine, ii, 276 sq.

Tent Deal (טַנַךְ,שָׁם), isurim, a tent: Sept. ἐκείνον, the tent part, a measure of things dry, especially for grain and meal (Exod. xxiii, 40; Lev. xiv, Numb. xxvii.18, etc.); more fully the tent of the ephah (as the Sept. and Vulg. explain at xx, 4), i.e. an ephah, or about three and a half quarts (comp. Lev. v, 13; vi, 13; Numb. v, 15). See METROPOLY.

Tenths, in English law, are the tent part of the yearly value of every spiritual benefice as it is valued in the Liber Regis. This was an impost formerly paid to the pope, and was annexed to the crown by the 26 Henry VIII. (1540) (Eccles. Reg. ii, 2). A gift of 2 two Annes, c. 11, was granted, together with the first-fruits, towards the augmentation of poor clergymen. A tax on the temporality, and also certain rents reserved by the king out of the monastic possessions he granted to his subjects, were also called tenths. Tenth in ecclesiastical benefices and lands were first paid in 1189 towards Henry II's crusade. See TAXATION ECCLESIASTICAL; TEMPORALITIES OF BISHOPS; TITHES.

Tentzel, Wilhelm Ernst, a German theologian, was born July 11, 1659, at Greussen, in Thuringia. He became lecturer at the gymnasium at Gotha in 1685, and was appointed in 1686 historiographer there, and died at Dresden, Nov. 24, 1767. In the theological department he is especially known by his controversy with the Jesuit Schulsetra on the arcani disciplinae (q. v.): Discursio de Disciplina Arcom (Wittenberg, 1683; also in his Exercitaciones Selecta (Leips. and Frankft. 1692), written against the Antiquus Illustrata. Tentzel also published Exercitaciones X de Hygme Te Deum Lou- damus (ibid. 1692). Of great interest is also his historical narrative of the beginning and first progress of Luther's Reformation, thus explaining Seckendorf's history of Lutheranism, edited by Cyprian (ibid. 1718, 3 vols.): De Provechas Samaritarum (Wittenberg 1682); Discursus de Lectorum Secretis (Wittenberg, 1689). See Thol. Universal-Lexikon, v. v.; Wines, Handbuch der theolog. Literatur, i, 609, 628, 738, 849, 854; ii, 799; Fa- bricius, Biblioth. Ecclesiast. (Hamburg, 1718), vol. 1; Re- gensburger Real-Encyklop. s. v. (B. P.)

Teo. See ANTELOPE.

Teocalli (Aztec, teotl, "god," and colli, "house"), a name given to the aboriginal temples, many remains of which are still in existence. Recent investigations have rendered it probable that many structures which, on Spanish authority, have been received as temples and palaces were in reality multiple houses.

Teotl, the name for God among the ancient Mex- ican peoples. He is called "the Cause of causes" and "god of all things." He was identified with the sun-god, which, on this account, was designated the Teotl.

Tephillin. See PHYLACTERY.

Te'rah (Heb. ῦτερα, τέρα, station [see also TARA- RAJ]; Sept. Θέρα, Θέρα; Josephus, Θεραξ, Ant. i, 6, 5; Vulg. Thare), the father of Abram, Nahor, and Haran, and through them the ancestor of the great families of the Israelites, Ishmaelites, Midianites, Moabites, and Ammonites (Gen. xi, 24-32). B.C. 2258-2088. The account given of him in the Old-Test. narrative is very brief. We are told that he was a Teraphim worshiper; that he dwelt in the land of Canaan, and that he died in Haran (Josh. xxiv, 2); that he dwelt beyond the Eu- phrates in Ur of the Chaldees (Gen. xi, 28); that in the westerly migration which he undertook in his old age he went with his son Abram, his daughter-in- law Sarai, and his grandson Lot, "to go into the land of Canaan, and they came unto Haran and dwelt there" (ver. 31); and, finally, that "the days of Terah were two hundred and five years; and Terah died in Haran" (ver. 32). Taking the language of Abraham about Sa- rah being the daughter of his father but not of his mother (xx, 12) in its natural sense, Terah must have had children by more wives than one; but we have no particular account of his domestic relations in this re- spect.

In connection with this migration a chronological difficulty has arisen which may be noticed here. In the speech of Stephen (Acts vii, 4) it is said that the further journey of Abraham from Haran to the land of Canaan did not take place till after his father's death. Now as Terah was two hundred and five years old (the Samar. text and version make him one hundred and forty-five, and so avoid this difficulty) when he died, and Abram was seventy-five when he left Haran (Gen. xii, 4), it follows that the migration of Stephen (Gen. xii, 5) at Abram's birth Terah must have been one hundred and thirty years old; and therefore that the order of
his sons—Abram, Nahor, Haran—given in Gen. xi, 26, 27 is not their order in point of age. Lord Arthur Hervey (H. S., p. 82, 83), "The difficulty is easily got over by supposing that Abram, though named first on account of his dignity, was not the eldest son, but probably the youngest of the three, born when his father was one hundred and thirty years old—a supposition with which the marriage of Nahor with his elder brother Haran's daughter, Milcah, and the apparent nearness of age between Abram and Lot, and the three generations from Nahor to Rebekah corresponding to only two, from Abraham to Isaac, are in perfect harmony." See Abraham.

From Acts vii, 2-4 it appears that the first call which prompted the family to leave Ur was addressed to Abraham, not to Terah, as well as the second, which, after the death of his father, induced him to proceed from Haran to Canaan. The order to Abraham to proceed to Canaan immediately after Terah's death seems to indicate that the cause at Haran was on his account. Whether he declined to proceed any farther, or his advanced age rendered him unequal to the fatigues of the journey, can only be conjectured. It appears, however, from Josh. xxiv, 2, 14 that Terah was given to idolatry, or rather, perhaps, to certain idolatrous superstitions, retained together with the acknowledgment and worship of Jehovah, such as existed in the family in the time of his great-grandson Laban (Gen. xxxi, 30). This may suggest that it was not in the divine wisdom deemed proper that one who had grown old in such practices should enter the land in which his descendants were destined to exemplify a pure faith.

From the simple facts of Terah's life recorded in the Old Testament, it has been constructed the entire legend of Abram which is current in Jewish and Arabian traditions. Terah the idolater is turned into a maker of images, and "Ur of the Chaldees" is the original of the "furnace" into which Abram was cast (comp. Ezek. v, 5). Several notices on Gen. xi, 28 as follows: "In the presence of Terah his father in the lifetime of his father. And the Midrash Haggadah says that he died beside his father, for Terah had complained of Abram his son before Nimrod that he had broken his images, and he cast him into a furnace of fire. And Haran was sitting and saying in his heart, If Abram overcome, I am on his side; and if Nimrod overcome, I am on his side. And when Abram was saved, they said to Haran, On whose side art thou? He said to them, I am on Abram's side. So they cast him into the furnace of fire whom Abram had burned; and this is (what is meant by) Ur Cukin (Ur of the Chaldees)." In Bereshith Rabba (par. 17) the story is told of Abraham being left to call idols in his father's stead, which is repeated in well, Biblical Legends, p. 49. The whole legend depends upon the ambiguity of the word וָּנַּחֲ, which signifies "to make" and "to serve or worship;" so that Terah, who in the Biblical narrative is only a worshipper of idols, is in the Jewish tradition an image-maker; and about this single point the whole story has grown. It certainly was unknown to Josephus, who tells nothing of Terah's death, that it was given to his son Haran that he induced him to quit Ur of the Chaldees (Jnt. i, 6, 6).

In the Jewish traditions Terah is a prince and a great man in the palace of Nimrod (Jellinek, Bet ha-midrash, p. 27), the captain of his army (Sefer Haggadot), his name is now the name of the Arabs (Herberg, Leben Abraham, p. 97). His wife is called in the Talmut (Baba Bathra, fol. 91 a) Amtelai, or Amtelai, the daughter of Cananeo. In the book of the Jubilees she is called Edna, the daughter of Arem, or Aram; and by the Arabs Adna (D'Herbelot, Bibliotheque orientale, n. v. "Abram"). According to the Arabs (Herberg, Leben Abraham, p. 97), the name of Abraham's father was Azar in the Arabic traditions, and Terah was his grandfather. Elmakin, quoted by Hottinger (Sumeria Orientale, p. 281), says that, after the death of Yuna, Abraham's mother, Terah took another wife, who bare him Sarah. He adds that in the story of Terah the king of Babylon made war upon the country in which he dwelt, and that Haran, the brother of Terah, went out against him and slew him; and the kingdom of Babylon was transferred to Nineveh and Mosul. For all these traditions, see the book of Jasher and the works of Hottinger, D'Herbelot, D'Hervey, Alver, and Beare above quoted. Philo (De somnibus) indulges in some strange speculations with regard to Terah's name and his migration.

Teraphim (Heb. teraphim, תֶּרָפֵּים; only thus in the masc. plur. in the Bible; but in the fem. plur. תֶּרָפָה, תֶּרָפָה, in rabbinical writers) seems to denote tutelar household images, by whom families expected, for reverence bestowed, to be rewarded with domestic prosperity, such as plenty of food, health, and various necessaries of domestic life. This word is in the A. V. always rendered either by "teraphim," or by "images" with "teraphim" in the marginal title in 1 Sam. xvi, 23; Zech. x, 2, where it is represented by "idolatry," "idols." The singular of the word does not occur, though in 1 Sam. xix, 18, 16 it appears that only one image is referred to. Possibly, as in the case of the Roman Penates (which word, also, has no singular), these representative images were always two or three in number, about which we are not in the text they are represented by a different rendering in nearly every book where the word occurs: in Gen. xxi by וַיָּוָא; in Judg. xvii, xviii by שֶׁפֶרִים or שֶּׁפֶרִים; in 1 Sam. xix by קְנֵי תּוֹרָה; in Ezek. xxii, 21 by גַלְוַת; in Hos. iii, 4 by יָלָדָה; and in Zech. x, 2 by אֲדַסְפּוֹרִים. In the Vulg. we find nearly the same variations between teraphim, statua, idol, simulacra, figura idolorum, idololatria. For other translations, which we find to be equally vague and various, see below.

I. Description of the Term.—The etymology and meaning of this word may be inferred from the various modes in which it is represented by the Greek translators, such as θῆρας, τὸ θῆρας, οὗ τὸ θηραῖον, reminding us of the etymological connection of thems, to nourish, with γραφήν. Its remote derivatives in modern languages, viz. the Italian taritja, French tarjé, and even the English trippe, throw a little light upon our subject. According to its etymology, the word teraphim has been literally translated nutriem, nourishers. It seems that the plural thrice-repeated in the text had a collective meaning, signifying a compounded or combined nourishment of the gods, or the nourishment of the gods in one superior power to be revered with reverential awe are combined (comp. the classical epithets of gods—Sos, Phoebus, Ceres, Venus, Cybele. Fales, Trivia, Fides, Silvia, etc., diana, μορφεύς, βραχωμοί). The word teraphim signified an object or objects of idolatry, as we may learn from some of the above renderings of the Sept., וַיָּוָא, קְנֵי תּוֹרָה; and that it was in meaning similar to the Penates is indicated by קְנֵי תּוֹרָה. Aquila renders it μορφοῖ, πράγμα, ἀνθρωπομορφῶς, ἱεροσόλυμα, ἱδωραῖον; Symmachus also translates it ιδωραίον.

The book Zohar derives the name teraphim from תֶּרָפֵּים, terpita, but mentions also that rabbi Jehuda derives it from טָרֵךְ, to slacken, because they slackened the hands of men in well-doing. The rabbi adds that they uttered a הָעָמְדַּת, prophecia lexar, inanim, rana, a loose sort of prediction. Hence rabbi Bechai says that טָרְפֵּים are the same as טָרִיך, feline, objects not to be depended upon. But in Tanchuma the former etymology is produced, since the teraphim were הָעָמְדַּת, opus terpitiudinis sui, futilitas (see Buxtorff loc. Talmud, et Rabh. s. v. תַּרְפִּים, which root occurs in the Lat. turrpis). Onkelos renders teraphin in Gen. xxxi by הָעָמְדַּת, and Jonathan in Judg. xvii and xviii by הָעָמְדַּת, images. The Targum on Hos. iii, 4 has הָעָמְדַּת,
TERAPHIM, exponent of oracles, where the Greek has ἐνθάτων; and the Targum on 1 Sam. xxv, 23 הַמֶּרֶם, idols. Gossseius, under מֵרֶם, goes so far as to assert that the word מֵרֶם is formed from יָהִין. Lud. de Dieu, and after him Spener, in Leg. Rit. Hebr. Dissert. (vii, l. 3, c. 3, § 7), urges the frequent interchange of the sounds t and š, in order to show that teraphim and šeraphim are etymologically the same. Houbinger, in his SMegma, and Kircher, in the first volume of his Εἰδώλια Αἰγύπτια, exhibit the etymological progression thus: Σωρὰς (Σωρὰ), ark of the ox, Σαρὰς, Seraph, Teraphis, Teraphim. The Arabic author Aben Nephi also asserts the identity of Teraphim and Seraphides. Others appeal to Σωράπιος, Σωραπίων, to head (comp. Wichmannsamt. Dissertatio de Teraphim, Wicchan. Serapha, Teraphis, I, 8; Eirolino, Theol. xii, 786). Cölin, in his Bibliotheca Theologica, derives teraphim from the Syriac arap, paracensērī. Gesenius (Thesaur. p. 1519) refers it to the Arabic root taraph, "to live in comfort," and compares it with the Sanscrit trīpy, "to delight," and the Greek ἠγορασμός. First (Hebr. Lex.) returns to the root מְרֶם, in the sense of nourishing.

II. Biblical References.—1. Teraphim are first mentioned in Gen. xxxi, 19, where we are told that Rachel stole the teraphim from her husband Sareb Laban, and successfully concealed them from his search under the hvran, or coarse carpet which is used to cover the wicker-work pack-saddle of the camel. Aben-Ezra says that she stole them in order that her father might not, by means of their oracles, discover the direction of Jacob's flight (and we note that Laban adopted or this some other mode of augury from his use of the word níchăhăthi, "I have augured" [xxx, 27]); but Josephus says that she carried off these τῶν τῶν ἢραὶ that they might serve as a material protection to her if overthrown, although she herself disbelieved in them (κατορθώσας μὲν τῶν τῶν ἢραίων τῶν τῶν ἢραίων τῶν τῶν ἢραίων [Ath. i, 19, 8]); and, lastly, some suppose that she was tempted by the precious metals of which they were made. It is far more probable that, like her father, Rachel, whose mind was evidently tainted with superstition (Gen. xxx, 14), regarded the teraphim as tutelary "gods" (xxxi, 30), Laban's eagerness to recover them shows the importance in which they were held; and it is important to observe that, although a believer in Elohim (ver. 58), he openly paid to these teraphim, which were probably ancestral divinities of his family (ibid.), an idolatrous worship. Jastrow (Hist. des Sem. i, 190), says, "Laban's behavior, in entering into the question, thinks that they may have been images of Shim and Noah. From this Biblical notice it would seem that they were usually somewhat large figures, which could not very easily be secreted.

2. It is extremely probable that these household deities were among the "strange gods" and tasselmanner earrings which Jacob required his family to give up, and which were buried by him under the boughs of Alom-Momenim, "the sorcerers' oak" (Judg. xix, 87). But an isolated act would naturally be ineffectual to abolish a cult which had probably existed for centuries in the Aramean home of the Shemite nation, and consequently, in the time of the Judges we find the worship of teraphim existing in full vigor. The 17th and 18th chapters of Judges are entirely occupied with the story of Micah, an Ephrahite, who in those wild and ignorant times had fancied that he could honor Jehovah (Judg. xxi, 32) by establishing a worship in his own house. To the epoh and teraphim which he already possessed (ver.5) his mother added a Pesel und Muskech (possibly "a graven and a molten image") made out of the gold which she had consecrated to Jehovah and which he had hid away. When Jonathan, the grandson of Moses, arrived at the house of his maternal uncle, his younger brother Judah engaged him as a regular priest, and anticipated, in consequence, the special blessing of Jehovah. The five Danites spied consulted these oracular Penates of Micah through the intervention of Jonathan (xviii, 5), and informed them before they left the house how the Canaanites inhabited the city in which the house contained. The Danite warriors, with the most unscrupulous indifference, violently carried off the whole apparatus of this private cult, including the priest himself, to their new city; and we are informed that it continued to be celebrated till "the day of the captivity of the land," which, as we see from the next verse, may perhaps mean till the capture of Shiloh by the Philistines. What is most remarkable in this narrative is the fact that both Micah, who was a worshipper of Jehovah, and the Danites, who acknowledged Elohim (ver. 5, 10), and Jonathan, the grandson of Moses himself, and in spite of the well-founded opposition of the law, have regarded the adoration of teraphim and other images as harmless, if not as laudable; and that this form of idolatry, without any political motive to palliate it as in the case of Jeroboam, should have been adopted and maintained without surprise or hesitation, even with eager enthusiasm, by an entire tribe of Israel. This is very much as at present some forms of image-adoration are blended with the practice of God. That such will-worship, however, was only comparatively innocent, and originated in an obstinate pruritus of improving rather than obeying God's revelation, Samuel clearly expressed. In improving Saul (1 Sam. xxv, 23): "Stubbornness is as inquity and idolatry" (literally teraphim). We do not read that the stubbornness of Saul led him actually to worship teraphim. However, his daughter possessed teraphim, as we shall see presently.

3. The next notice of teraphim which we find is in 1 Sam. xix, 13-16, where Michal, to give David more time to escape, deceives the messengers of Saul by putting "the teraphim" in his bed, "with a pillow of goats' hair for his bolster." The use of the article shows that "the teraphim" was something perfectly well known (Theniua, ad loc., and the fact that we thus find it (or them) in the house of a man so pinous as David entirely confirms our inference as to the prevalence of these images. The suggestions of Michaelis that Michal may have worshipped them unknown to David, and that barren women were especially devoted to them, are wholly without foundation. The article τῶν τῶν αἰτταμῶν explodes the argument of Michaelis (De spiritibus, Soc. Gott. 1789), Bochart (Hieroz. i, 623, etc.), that the teraphim in this instance was a mere hastily made doll of rage; in fact, a sort of malin. We may legitimately infer from the passage that they had some rude resemblance to the human shape, being, perhaps, something like the horse's head, hence the Vulgate renders the word by seraphum. The Sept. rendering κηραφός very probably points to the belief that the teraphim were images of deceased ancestors (κηραφός τινα ἧμαν ἔλασμον αὐτῶν ὡς τέρας νερό. Said. vid. Bochart, Hieroz. i, ii, 51); and the rendering of "a pillow of goats' hair for his bolster" by κατ ἑραμαρα αὐτοῦ, πέπληκτος αὐτοῦ, "milked the goats' laiter at his head," shows that they read τῆς, "liver," for τῆς, "mattress." Now if this ancient reading were correct, it brings the passage into remarkable parallel with Ezek. xxi, 21, where Nebuchadnezzar is said to have decided his course by belomantia, together with consultation of teraphim and looking into the liver (εἰσρηκτικόν). It is possible that Micah may have been divining by means of a sacrifice to the teraphim when Saul's messengers arrived, and that they were put to shame as they sat, the pytopratating liver on the bed with the image, which in a small, dark, narrow recess might well enough pass for a human being. Josephus, with his usual want of honesty, omits all mention of the teraphim, and only says that she put the liver under the bedclothes, hoping that it would be consulted. We must believe that David was gaging! (Ant. vi, 11, 4).
odoret (Quest. 49, in 1 Reg.) repeats this preposterous notion.

4. The present revival of the knowledge of the written revelation of God the teraphim were swept away; together with the worse forms of idolatry (2 Kings xxiii, 24): "The workers with familiar spirits, and the wizards, and the images (teraphim), and the idols, and all the abominations that were spied in the land of Judah and in Jerusalem, did Josiah put away, that he might perform the words of the law which were written in the book that Hilkiah the priest found in the house of the Lord."

4. The next passage in historical order about the teraphim is Hos. iii, 4, which is encompassed by difficulties. The phrase "the teraphim of the heathen" is an analogy of some kind to himself, but whether he chaste for many days, "for the children of Israel shall abide many days without a king, and without a sacrifice, and without an image (mattatehok), and without an ephod, and without teraphim." Here it would certainly be the primary. The impression of every unbiased reader that the mattatehok and the teraphim are mentioned without blame as ordinary parts of religious worship. Without, however, entering into the question (which, perhaps, cannot be decided) whether Hosea did or did not mean to commend or tolerate these material adjuncts to a monothestic worship, it is certainly not surprising that the reverence paid to the teraphim should have continued in Israel side by side with that paid to the calves, which beyond all doubt were intended to be mere Elohistic symbols; and this is the less surprising when we remember that one of these cherubim images was set up in the very city (Dan) to which the teraphim of Micah had been carried; and probably, indeed, of the existence there of the irregular worship established by Moses' grandson. But here, again, the Sept. version is curious and perplexing, for it uses the word ἔριδος (See, Elisha, bright gems), a word which, like ἔρις, it is elsewhere of the Urim and Thummim (Numb. xxvii, 21; 1 Sam. xxviii, 6); and Aquila seems to have had the same notion in adopting the word πρωτηρίας, and it is even countenanced by Jerome, who in this passage includes the teraphim among the "instrumenta sacerdotalia habituas." This is one starting-point for the theory, supported with a mass of splendid but unconvincing learning by Spencer (De Legg. Heb. lib. iii, dissert. vii, p. 920—1098), that the teraphim and urim were identical. He argues not only from this rendering ἔριδος, but also (1) from the frequent union of ephod with teraphim; (2) from the supposition that the teraphim means "trees," and that teraphim means the same as the Arabic equivalent for teraphim, "the burning ones;" (3) from the constant use of teraphim for oracular purposes. He concludes, therefore, that they were small images, permitted as a kind of necessary consecration to deeply rooted idolatry, placed in the folds of the ephod and believed to emit predictions of the divine will. How ill the theory accords with the data before us will be obvious at once. This passage seems to indicate that as the use of teraphim, like that of the Penates and Lares among the Romans, was connected with nationality, it necessarily perished with the nation's decay.

5. The teraphim were consulted even after the Captivity by persons upon whom true religion had no firm hold, in order to elicit some supernatural omniscience, similar to the auguria of the Romans. Thus (Zech. x, 2): "For the idols (teraphim) have spoken vanity." etc. In this connection which, in connection with the karasapicata instituted by the king of Babylon, we read (Ezek. xxii, 21, 26) that he consulted images (teraphim).

The main and certain results of this review are that the teraphim were rude human images; that the use of the teraphim by the Israelites was not an innovation; that there is no reason to suppose them to have been images of deceased ancestors; that they were consulted oracularly; that they were not confined to Jews; that their use continued down to the latest period of Jewish history; and lastly, that, although the more enlightened prophets and priests were much less averse to such images, and their cult was not considered in any way repugnant to the pious worship of Elythia; nay, even to the worship of him "under the awful title of Jehovah," as in the case of Aaron, Jonathan, Uria, etc. (See some acute remarks on this subject in Nicolas, Études Crit., sur le Bible, p. 129—135.) In fact, they involved a monothestic idolatry, very different indeed from polytheism; and the tolerance of them by priests as compared with the denunciation of them by the keener insight and more vivid inspiration of the prophets offers a close parallel to the views of the polytheistic nations. The pictures and images as compared with the views of Protestants. It was against this use of idolatrous symbols and emblems in a monothestic worship that the second commandment was directed, whereas the first is aimed against the graver sin of direct polytheism. But the whole history of Israel shows how early and how utterly the law must have fallen into desuetude. The worship of the golden calf and of the calves at Dan and Bethel, against which, so far as we know, neither Elijah nor Elisha said a single word; the tolerance of high- places, teraphim, and bettytiki; the offering of incense to centuries to the brazen serpent; the occasional glimpses of the most startling irregularities sanctioned, apparently, even in the Temple worship itself, prove most decisively that a pure monotheism and an independence of symbols were the result of a slow and painful course of God's disciplinary dealings among the noblest branch of a single nation, and not, as is so constantly and erroneously urged, the instinct of the whole Shemitic race; in other words, one single branch of the Shemites was, under God's providence, educated into pure monotheism only by centuries of misfortune and series of inspired men. In fact, we have most remarkable proofs that the use of teraphim existed with the worship of Jehovah even in comparatively pious families; and we have more than one instance of the wives of worshippers of Jehovah not finding full contentment and satisfaction in the stern moral truth of spiritual worship, and for no carrying on some private symbol of foisting on the teraphim. It seems, however, that this swerving from truth was comparatively innocent. It was never denounced and suppressed with the same rigor as the worship of Moloch. There is, in fine, no positive evidence that the teraphim ever were actually worshipped. The term opheth has been much cherished as ταλαμαί which, as idols. See MAGIC.

III. Opinions of Later Scholars.—Besides Spencer's theory, to which we have already alluded, we may mention others, utterly valueless indeed, yet curious as bearing on the history of the subject. 1. Robbins.—According to the great rabbi Eliezer, who was the son of Hycanus and the brother-in-law of Gamaliel II, who seems to have been the tutor of Paul (in Pirke Aboth, and the Targum of Jonathan on Gen. xxxi, 19), the worship of teraphim was connected with atrocities. "The makers of teraphim slaughtered children who were a firstborn, cut their hair off, and salted it, and cured it with spices and oil. After this, they wrote the name of an impure spirit and sentences of divination on a golden plate, which they placed under the tongue of the head, which was fastened to the wall, and lighted lamps before it, and kneel down in adoration upon the ground, and utter diversions." Rabbi Salomo, or Rashi (2 Kings xxiii, 24), says, "The teraphim uttered diversions by magical and horoscopical arts." On 1 Sam. xix, 18 sq., he adduces the opinion that the teraphim were horoscopical and astronomical instruments made of brass; but he confines himself to this opinion, and is not much inclined, is not consistent with the account of Michael, from which it is evident that the teraphim had the shape of man. On Gen. xxxi, Aben-Ezra ad-
duces the opinion that the teraphim were automata, made by astrologers so as to show the hours and to utter divinations. Hence the Persians Tawas in Gen. xxxiii translates astrologabut. Aben- Ezra also adds the opinion that Rachel stole the teraphim of Laban in order to prevent him from idolatry, and from asking the teraphim whither his children had fled. Rabbi Levi ben-Gerson (on Genesis) states that the teraphim were human figures, by which the imagination of diviners was so excited that they supposed they heard a low voice speaking about future events with which their own thoughts were filled, although the image did not speak, an operation which can only be performed by such natural organs as God has provided for that purpose.

2. Moderna.—Michaelis, in Commentationes Societatis Gottingenae oblatae (Brem. 1768), p. 5 sq., compares the teraphim to the Syriac and Slav, referring to the statement of Pausanias (vi, 24, 6), that there were graves of Sileni in the country of the Hebrews; and alluding to the hairy ones ("devils," σωρομενοι) of Lev. xxvii, 7. Creuer asserts that the teraphim had something of assas in them (Commentationes Hercul. i, 377; Symb. iii, 208 sq.) and refers to the old calumny that the Jews worshipped the head of an ass (Tact. Hist. v, 4; Rutilius, i, 367). Creuer appeals also (Symb. iii, 340) to Gen. xxxi, in order to prove the fertilizing, or rather fecondizing, power of the בֵּתְחַנָּה, which scarcely can be proved from ver. 19 (comp. here Rosenmüller Scholia; Jahn, iii, 506 sq.).

IV. Recent Illustrations.—M. Botta found in cavities under the pavement of the porch of the palace at Khorsabad several small images of baked clay of frightful aspect, sometimes with lynx head and human body, and sometimes with human head and lion's or bull's body. Some have a mitre encircled at the bottom with a double hair of horns, and others have their hair rolled in large curls. In front of several doors he saw the same cavities, of the size of one of the bricks, and about fourteen inches in depth, lined with tiles, and having a ledge round the inside, so that they might be covered by one of the bricks of the pavement, without betraying the existence of the cavity. It has been suggested that these images are the teraphim, or household gods, of the ancient Assyrians, which, being secreted under the pavement near the doors, were intended to protect the entrances of the palace from the admission of evil. See Bonomi, Nineveh, p. 156.

Figures somewhat similar but less hideous have been found among the Egyptian ruins and elsewhere, which seem to have been employed with a like significance. See Thomson, Land and Book, ii, 25.

V. Literature.—The principal authorities concerning the teraphim are Michaelis, De Teraphis, in the Comment. Soc. Gott. (Brem. 1768), p. 5; De Teraphis (Viteb. 1665); Wackmannhausen, De Teraphim (ibid. 1705); also in Ugelino, Theaur. xxiii, 7; Antast, De Diis Familiae Jacobi (Lips. 1744); Buxtorf, Lex. Talm. p. 2660-64; Pfeiffer, Exerc. Bibl. p. 1-28; Hottinger, Hist. Orient. p. 296; Seilern, De Diis Syriae Sympos. i, 2; Spencer, De Leg. p. 200-195; Bochart, Hieroz. i, 623; Carpzov, Appar. Crit. p. 537-546; Juriu, Hist. Crit. des Dogmes, ii, 3; Genesius, Terebinth, a majestic Oriental tree, which has been made by many a rival of the oak, as a representative of the Heb. הַרְבִּינָת, הַרְבִּינָה, or יֵלְלָה. See PLAIN. So Celsius (Hieroc. ii, 34-58), and naturalists generally since. Travellers frequently confound the two trees. They are, however, quite different in many particulars. The bark, shape, and general character are remarkably alike, but the wood, the leaf, and the blossom differ very obviously. See TOPOGRAPHICAL TERMS.

The terebinth is the Pistacia terebinthus of botanists, called by the Arabs the beitna or buit, and well known in the Greek islands as the turpentine-tree. See Tee. In Chios especially a considerable quantity of turpentine is extracted from it by tapping the trunk; but this is not practiced in Palestine, where the inhabitants seem to be ignorant of its commercial value. It is a very common tree in the southern and eastern parts of the country, being generally found in situations too warm for the oak, whose place it there supplies, although they are occasionally found immediately adjoining, as at Tell el-Kady (Tristram, Land of Israel, p. 84). It is seldom seen in cliffs or groves, never in forests, but stands isolated and weird-like in some bare ravine or on a hillside, where nothing else towers above the lower brushwood. The buitna is not an evergreen, as is often represented, but its small feathered lance-shaped leaves fall in the autumn and are renewed in the spring. They are pinnate, the leaflets larger than those of the lentisk, and their hue is a very dark reddish-green, not quite so sombre as the locust-tree. The flowers are in clusters like those of a vine, inconspicuous, and are followed by small oval berries, hanging in clusters from two to five inches in length, resembling much the clusters of the vine when the grapes are just set. They are of a reddish purple and remarkably juicy. Another fruit, or rather excrecence, is found on the tree, scattered among the leaves, of the size of a chestnut, of a purple color variegated with green and white. The people of Cyprus believe that it is produced by the puncture of a fly: when opened it appears full of worms (Marini, i, 209; ii, 114). From incisions in the trunk there
Many terebinths remain to this day objects of reverence in their neighborhood, and the favorite burying-place of a Bedawin sheik is under a solitary tree. Eastern travelers will recall the "Mother of Rags" on the outskirts of the desert—a terebinth covered with the votive offerings of superstition or affection. The "oak of Mamre," near Hebron, was said to be a terebinth, which remained till the 4th century (Jerome, De Loc. Heb. 87; Sozomen, Eccles. Hist. ii, 4; comp. Josephus, War, iv, 5, 7), and on its site Constantine erected a church, the ruins of which still remain. It is said that the tree dried up in the reign of Theodosius the Younger; but that the trunk produced a new tree, from which Brocard (vi, 64), Salignac (x, 5), and other old travelers declare that they brought slips of the new and old wood to their own country (Zuaillart, Histoire de Jerusalem, iv, 1). The tree was accidentally destroyed by fire in A.D. 1646 (Mariti, p. 520). Its modern representative, however, is a true oak, as is proved both by its leaves and actual acorns. The tree on which Judas hanged himself is said to have been a terebinth, and its descendant is yet shown to the credulous, overlooking the valley of Hinnom. Towards the north of Palestine the tree becomes more scarce; but in ancient Moab and Ammon, and in the region around Hebron, it is the only one that relieves the monotony of the rolling downs and boundless sheepwalks; and in the flat areas south of the Jordan, many trees of a larger size than others which remain west of the Jordan (Tristram, Nat. Hist. of the Bible, p. 401). In Turkey the burial-grounds of Christians, particularly the Armenians, are planted with terebinth-trees, the cypress being reserved for the Mohammedans (Calvino, [Lady], Script. Herbal, p. 564). See TURPENTINE-TREE.

Τῇρεσ (Heb. id., Ugarit, prob. Pera. strictissima; Sept. [in some copies only] ῥαγγας or ῥαγγας; Vulg. Thare), the second-named of the two eunuchs who kept the door of the palace of Ahasuerus, and who were hanged, their plot to assassinate the king being discovered by Mordecai (Esth. ii, 21; vi, 2). B.C. 479, Josephus calls him Theodetes (Überlieferung, Ant. xi, 6, 4 and 10), and says that the conspiracy having been detected by Barnabas, a servant of one of the eunuchs, who was a Jew by birth, and who revealed it to Mordecai, the conspirators were crucified.

Termism and the Terministic Controversy.

The word Termism has reference to the terminus of the period of grace accorded to man as an individual or in the race. The term in dispute was a question of the exact date upon which this period of grace was to end. Here the Middle-Age, Augustinian, theory that the end of this earthly life is in every instance the end of gracious opportunity, so that even unbaptized children become at death the prey of hell. The Reformation led the consciousness of Christians back to the dynamic conditions of salvation, namely, on the one hand, to the free grace of God, and, on the other, to the internal, religious, and moral state of repentance. In the light of the former condition it was possible to suppose that the terminus gratiae might be extended beyond the terminus vitalis under the latter it could be contracted to even narrower limits than the duration of earthly life. A recognition of the possibility of widening the period of grace led to the development of the doctrine of the Apocatastasis (q.v.), while its contrary gave rise to Termism.

The leading promulgators of Termism were the Friends, who taught that every person has a special day of visitation, which is but transient and may end before the close of the life of earth (see Winer, Comp. Darstellung, p. 87). The Pietists also contributed towards the growth of that idea by their depreciation of the worth of repentance late in life. The controversy upon this point was fairly opened by the study of a work by J. G. Risse, deacon at Sorau (died 1700), entitled Termius Perevertorius Salutis Humanae, etc.
(1688). A number of responses were written, the more important of them by Neumann, professor at Wittenberg, Dis. de Tern. Salut. etc. (Viteb. 1700), and Dis. de Tempore Gratia, etc. (1701); also Itig, professor at Leipsic, Vorträge lib. d. prophet., apologist, etc. (1702). With other publications thereon, the son-in-law of Spener, came to the assistance of Böse with his Dis. de Grat. Revocatricia Termino (Lips. 1700). The dispute was dropped on the death of Itig, in 1710, and the advance of rationalism deprived the question of interest. For the theology of our time, the only importance of the discussion lies in its possible influence in occasioning profounder determinations with regard to the possibility of becoming hardened against grace in this life, and the infinite consequences depending upon the hour of death and the free sovereignty of God.

**Terms, in law, are the periods in England when the courts of law hold their sittings at Westminster for the discharge of their judicial functions. There are four in every year, namely, Hilary term, Easter term, Trinity term, and Michaelmas term; but the last of these is usually at the commencement of the legal year. They were supposed by Selden to have been established by William the Conqueror; but Spelman has shown that they originated in the observances of the Church, and were no more than those leisure periods when there was neither fast nor festival nor rural avocation to withhold the sutor from attending the court. At first these terms were extended to the days of the whole year round, but the Church interposed. The sacred season of Advent and Christmas originated the winter vacation; the time of Lent and Easter gave rise to that of the spring; the third we owe to Pentecost; and the requisitions of agricultural pursuits account for the long space that intervenes between Midsummer and Michaelmas. Sundays and other holydays were included in the prohibition which, in 517, was established by a canon of the Church, and, says Blackstone, fortified by an imperial constitution of the younger Theodosius, comprised in the Theodosian Code. In the commencement and early history of these terms, and the duration of these Church were kept in view. Edward the Confessor, in one of his laws, says that from Advent to the octave of Epiphany, from Septuagesima to the octave of Easter, from the Ascension to the octave of Pentecost, and from four in the afternoon of every Saturday until the end of the succeeding Monday, the peace of God and holy Church should be kept throughout the realm (Ancient Laws and Institutions of England, p. 190). We learn from Britton that in the reign of Edward I no secular plea could be held, nor any man sworn on the evangelists during Advent, Lent, Pentecost, or the times of thanksgiving, and all those days were exempt from grand liturgies and all solemn festivals. The bishops, however, he adds, granted dispensations that assizes and juries might be taken at these seasons; and afterwards, by statute Westminster 1, 3 Edward 1, c. 51, it was enacted that assizes of novel dissein mort d'ancetre and of criminal inquests should be held on the Tuesday of Septuagesima, and Lent. The portions not included in the prohibitions became what are called terms, and were denounced according to the saint to whose feast they occurred most nearly.

**Terms of Communion**, those conditions on which the members of a particular Church are agreed, and which are the basis of their fellowship. Terms of communion are not to be identified with terms of salvation; nor should terms of lay communion be as comprehensive and theological as those of clerical fellowship.

**Terra** (τῆρα), meššêd, 2 Chron. ix, 11; Sept. δαίμονι; a hikwym, as elsewhere usually rendered), a staircase, constructed by Solomon for his edifices out of the algum-trees imported from the East Indies. See **Palace; Temple**.

**Terrasson, André**, a French clergyman, and first of a literary family of considerable note in France, was born at Lyons in 1669. Became a priest of the Oratory, preacher to the king, and afterwards preacher to the court of Lorraine. His pupil services were much applauded, and attended by crowded congregations. His exertions during Lent in the metropolitan church at Paris threw him into an illness from which he died, April 5th, 1723. His sermons were printed in 1726 (4 vols. 12mo) and 1736. See Chaliers, Biog. Dict. a. v.; Hoefer, Nouv. Biog. Générale, a. v.

**Terrasson, Gaspard**, brother of the preceding, was born at Lyons, Oct. 5, 1680, and was sent, at the age of eighteen, to the house of the Oratory at Paris. He resided afterwards in different houses of his order, chiefly at Troyes, where he delivered a funeral oration for the dauphin, son of Louis XIV. For some time he employed himself in delivering exhortations in the seminaries; but after Andre's death he accepted solicitation to preach, and soon acquired a reputation superior to that of his brother. He preached in Paris during five years; but various circumstances, particularly his attachment to the Jansenists, obliged him to leave both the Congregation of the Oratory and the pulpit at the same time. He was appointed curate of Treigny in 1735; but, persecution still following him, he was sent to the Bastile, which he left in 1744 to be confined with the Minims at Argenteuil. He was at length set at liberty, and died at Lyons, Jan. 2, 1750. His sermons are printed in 1728 (3 vols. 12mo), and an anonymous book, Lettres sur la Justice Chrétienne, which was censured by the Sorbonne.

**Terrasson, Jean**, brother of the two preceding, was born at Lyons in 1670, where he also studied, and entered the Oratory. In 1707 he was admitted into the Academy of Sciences, and he entered into the literary discussions of the day. In 1721 he became professor of philosophy in the College of France, and in 1732 he was made a member of the French Academy. Towards the end of his life he lost his memory. He died in Paris, Sept. 15, 1756. He published a number of books; and Hoefer, in his Biog. Universelle, writes of him: "... He was one of the greatest philosophers who have lived in our century."

**Terrier**, a formal survey and plan or schedule of Church property, ordered by English canon law to be made and preserved in the bishop's registry. A terrier of glebe lands made under queen Elizabeth is preserved in the British Exchequer.

**Territorial System**. This title is applied to that theory of Church government which assumes that the ruler of a country possesses, by virtue of his sovereignty, the power of governing the Church and Protestants, which has been established within his realm. The Middle Ages had witnessed a constant association of the Church with the State, which was at times carried so far as to include the one under the other as one of its parts. When the principles of the Jewish theocracy could be asserted, the Church would seek to subject the State to its authority; but when a relapse into heathen principles took place, the State was ready to enforce the authority of the civil power over the religion of the land. When the reformatory movements of the 16th century had failed, the renewed agitation, of which Zwingli, Luther, and other reformers, representatives, addressed itself to the princes and estates of the land. The sovereign powers of either party assumed the right to dictate the creed of their subjects. The Roman Catholic prince who became a Protestant sought to carry his country with him over to Protas...
TERRY 286  TERSTEEGEN

tantism; the Lutheran who passed over into the Reformed Church assumed to transfer his subjects also. The belief of the prince was to determine the creed of the land. The Peace of Westphalia ended this anomalous practice, but expressly recognised the sovereignty of the prince as the source of the religious system in his dominions.

The dangerous character of the principle which derived all the rights belonging to an evangelical Church from the head of the State was soon recognised, and led to the development of the theory which is usually known as the episcopal system. The ecclesiastical system was formulated at the close of the 17th century as a foil to that theory, finding its leading advocates in Christian Thomasius (q. v.) and his pupil Brenneisen (De Jure Principis circa Adiaphora [Halle, 1675], in Thomasius, Auserlesene deutsche Schriften, 1866, p. 76 sq.), and its principal opponent in Johann Benedict Carpzov (q. v.). As formulated by Thomasius, the reigning prince possesses, as a natural right, the authority to regulate the ecclesiastical affairs of his country, and of banishing persons who disturb the peace of the Church. He may dismiss a preacher who dispenses false teachings, and may forbid the subscription to new confessions, etc., but he cannot impose his own creed upon his subjects, nor finally determine in matters of religion. The theory found many supporters, jurists as well as theologians, among them J. H. Böhmer and Joh. Jac. Moser (q. v.). It has been defended in quite recent times, in connection with the discussion of the non-conformist disputes by Müller, Marheinecke, Augusti, and others. The collegial system deprived the territorial theory of every support; and the present tendency towards an entire separation between State and Church is wholly antagonistic to its prevalence. Both legislation and praxis have suffered from its influence to the present day.

On the entire subject, see Stahl, Kirchenverfassung nach Lehre u. Recht d. Protestanten, p. 22 sq.; Richter, Gesch. d. evang. Kirchenverfassung in Deutschland, in 212 sq.; Friedberg, De Finibus inter Ecclesiam et Civitatem, etc. (Lips. 1861); Lehmann, De Pace Religiosa, i. 28; Nettelbladt, Observat. Juris Ecclesiastici (Halle, 1758, 8vo); the works of Thomasius, Carpzov, etc.; Böhmer, Consilia et Decisiones, tom. i, pars i, respons. xv.—Herzog, Real-Encyclop. s. v. See CHURCH AND STATE; COLLEGIAL SYSTEM.

Terry, Parshali, a Presbyterian minister, was born at Aquebogue, Long Island, N. Y., Nov. 3, 1806; was licensed to preach by the Methodist Protestant Church of New York, and ordained at Aquebogue for two years. He was ordained by the Congregational Convention of Long Island in 1831, and labored for a number of years at Patchogue; but, feeling the need of a more thorough course of study, studied in the seminary attached to Yale College, graduated in 1840, and became a member of New York Presbytery. In 1843 he was editor of the Religious Recorder at Syracuse, N. Y.; in 1848 removed to Marathon, N. Y., and was received by Cortland Presbytery; thence, in 1853, to Painesville, Ohio, where he ministered three years. He subsequently labored, in 1857, at Unionville, Ohio; 1860, Thompson; 1861, Hudson; 1862, Marion; 1863, Milford; 1863, Troy. He died Oct. 20, 1865. He was a man of more than usual talents, which he improved by culture. See Wilson, Preb. Hist. Almanack, 1867, p. 322.

Tert Sanctus is the triumphal hymn of the ancient liturgies, "Holy, holy, holy, Lord God of hosts, heaven and earth are full of thy glory," etc., and is based on the three holies (Isa. vi. 3; Rev. iv. 8). In all ancient churches this was the service closing the prayer of consecration, and is sung by the choir and the people. "The pontiff who is to celebrate approaches the altar and praises the works of God, and, giving thanks for all, associates himself with the angels, and vociferates with them the triumphal hymn Holy, holy, holy; and the people also recite it, typifying the equality of peace which we shall hereafter enjoy with the angels, and our union with them" (Simeon of Thessalonica, Comm. on Lit. of St. Chrysostom). This hymn formerly concluded with the words "Hosanna in the highest, blessed is He that cometh in the name of the Lord, Hosanna in the highest." This is the case in the liturgies of St. James, St. Chrysostom, St. Basil, the Malabar, Mozarabic, and Sarum. In that of St. Clement the Sanctus and Hosanna are separate, and the Mozarabic has the further addition "Hagios, hagios, hagios, Kyrie ho Theos." The prefices of Tert Sanctus are very various, being adapted to different festivals and seasons. But they invariably end with the doxological form represented by the "Therefore with angels and archangels," etc., of the Prayer-book. In all liturgies the preface is sung or said by the celebrant alone, the choir and people joining in at the hymn itself. Hence in the Sarum Missal, followed by the Pryor- books of 1549 and 1552, the Sanctus is printed as a separate paragraph. The hymn is also called Triasge- on (q. v.).

Tersteegen, Gerhard, the mystic and sacred poet, was born at Meurs, on Nov. 25, 1657. He early acquired a thorough knowledge of the Greek and Hebrew, and friends advised his preparation for a learned career; but, his father having died, his mother was induced, from domestic considerations, to choose a mercantile life for him instead. He was apprenticed to his brother-in-law at Mülheim in 1713, and in the following year, on becoming a merchant in the city of Duisburg, which decided that he must refrain from holding them in future, and induced the Synod of Cleves to take similar action. Nothing has been found, however, to show that Hoffmann was guilty of heresy, or that the convocation served any other purpose than that of leading many souls to Christ. In spite of these inquisitorial measures, the convocations were obstinately continued at Mülheim, and Tersteegen, for his part, was alienated from the Church to such a degree as to refrain from participating in the public worship, and particularly in the sacrament of the Lord's Supper, which he evidently ceased to partake. He finished his apprenticeship, but two years afterwards, in 1719, under the impulse of religious sentiment, renounced his business for one of a more retired character. He now became a ribbon-weaver and an ascetic. He had no companion save the girl who wound his silk. His clothing was poor, his food simple; but his charities, whatever might be his income, were numerous. He considered this ascetical, hermit life the ideal condition of a Christian on earth, and for a time endured its trials and privations with unwavering constancy in the presence of his heavenly Father; but gradually he became the prey of internal anxieties which tortured him during five years with but occasional and transient interventions of hope. But in 1724 that period of suffering came to its close. He celebrated the return of his Saviour's smile in the hymn Wie bist du, Herr, auf der Welt geblieben, and entered into a covenant with his Lord which he signed with his own blood—probably in imitation of the marquis de Renty, whose life he had treated with great pleasure in his book Leben heidiger Selenen, i. 3.

With the conclusion of this period of spiritual darkness he recommenced life, but became again forward, though much against his will, thrown among men and obliged to take an active part in the affairs of religion. He resided with his brother, and while employed in the tuition of that brother's children was led to undertake a work which initiated his career as a mystical writer—the Unparteiischer Abrias christlicher
no willingness to receive the doctrine of the necessity for thorough-going self-denial and persistent watchfulness and prayer, which they denounced as legalism. His position hindered the Moravians from securing an establishment of their own, and he died having been pure, and the succeeding ages, from Constantine to the 15th century, as a period of great apostacy. The light broke through with power in the Reformation, but afterwards again declined. Christianity exists more generally in name than in fact. Upon this work followed a number of arrangements and confusions, in the preparation of which Tersteegen was accustomed to spend the time after six o'clock in the evening. The list includes Labadie, Manuel de Pádi (with preface dated Mülheim, May 21, 1726); Jean de Bernières Louviguy's works (Das verborgene Leben mit Christo in Golg etc., with preface dated Dec. 18, 1726); Thomas a Kempis, Initium Christi; Gerlach Petersen, Soliloquie (1727). In 1733 he began the publication of the work entitled Auseinandersetzungen über das Leben Jesu, the third (final) volume of which appeared in 1738, followed by a second edition of the whole work in the next year. The saints so commemorated belong altogether to the Roman Catholic communion—a fact which Tersteegen excused on the ground that others had rendered a similar service to Protestantism; but there is satisfactory proof that he possessed an especial fondness for the peculiar piety cultivated by the mystical ascetics of the 17th century. The translation of a poetical composition by Madame Guyon illustrated of the inner life, and with this work completed the series of his mystical writings. In them all he takes Poinet—sometimes Godfrey Arnold (q. v.) also—for his master. His mystical tenacity is sometimes exaggerated into that of a Quaker, but v. W. and others, so that he can speak in glowing terms of approval of a state of perfect rest for the soul which begins and continues through the direct operation of God on the soul without any mediation whatever, even though it be that of Scripture or of Christ.

Tersteegen yielded to the persuasions of Hoffmann and others, and began to address public assemblies at about the time when his first literary efforts were put forth. In 1728 he renounced his handicraft and gave himself wholly to the care of souls. His wants were supplied by the contributions of friends and by several legacies. When he died, he left no biography, either collaborative or of his own invention. His advice was desired by great numbers of people living everywhere in the territories of Clevens and Berg. Otterbeck, a farm between Mülheim and Elberfeld, became a station where a number of his adherents lived together in this way of life. His renunciation of self-representation is a piety. He furnished them with twelve rules of conduct (given at the close of vol. iii. of his letters), and watched over them with jealous care. A work written in their behalf in 1727 became a bulwark against Antinomianism (q. v.), and saved them from the excesses into which other, but kindred, associations were drawn. A second centre of his influence was Elberfeld, and subsequently Barmen. This region was troubled with the fanatical influence of Eliner (q. v.) and his supporters. To counteract that influence, Tersteegen wrote an effectual admonition (comp. Weg der Wahrheit, 1728). Solingen was a third station, and it was there that Tersteegen delivered the only sermon ever preach'd by him. At Crefeld extraordinary manifestations accompanied a work of grace, which were controlled through his judicious counsel. He was also brought into relations with the Moravian Brotherhood, and was solicited by its chief, C. B. Dober, to come to London, to live in his lor with theirs; but he steadily refused, less on the ground of their unusual methods than because he believed their teachings to be erroneous. He charged them with identifying sanctification with justification and with misrepresenting the legal and the evangelical elements of religion. He found in the church's error, as it were, the last vestiges of the asceticism, and

Tertiaria, the term applied to the third part of all Church revenues in the Isle of Man, which third part was received by the bishops of that island. See Bingham, Christ. Antig. bk. xxi. ch. ix. § 11.

Tertiarii (Tertiius Ordo de Pontentia; Tertiiarii Fratres Convers; also Sorores Tertii Or- dinis) is a term given to the members of a confraternity organized primarily in connection with the mendicant

orders, but subsequently connected also with other orders. They are not required to live in the convent or undergo the three principal vows, and were designed to retain their place in the world and represent the order in public, and to do so in its own name. Their origin is traced back to Norbert, the founder of the Order of Premonstratensians. The Templars, too, had a similar institution connected with their organization. The actual introduction of the Order of Tertiaries was due, however, to Francis of Assisi, and dates back to 1219. His object was to overcome the effect produced by his preaching at Carnario, where men and women in great numbers dissolved the matrimonial relation in order to give themselves to repentance. All virtuous and orthodox persons were received into the order. The rule forbade participation in festivities, dispensing, and offensive wars, and required works of charity, diligent religious exercises, an annual convocation for penance, and masses for the souls of the Tertiaries, living or dead. The order was governed by superiors periodically chosen. Its costume was to be of inferior stuff, neither wholly white nor black, and without ornament—an ash-colored coat and rope being finally chosen, over which ordinary secular clothing is permitted to be worn. The female tertiaries adopted a similar rule and costume, with the occasional addition of a white veil. The rule was confirmed by popes Hilarius III, Gregory IX, and Nicholas IV. The order grew rapidly, founding houses in many parts of the world, having numbered among its members the emperor Charles IV, kings Louis of France, Bela of Hungary, and Philip of Spain, queen Blanche of castle, princess Anna of Austria, etc.

Towards the close of the 13th century a branch order was established among the male, and a century later among the female, Tertiaries, to satisfy the craving of some for a stricter rule—the Regulated Order of Tertiaries (Tertiarii Regulares). After a rapid extension, this secondary order separated into different congregations, which, in substance, followed the Franciscan rule. The latter, in turn, gave rise to a series of congregations of Hospital Brothers and Sisters. They take the simple vows, and an additional one which binds them to care for the sick, and to live in hospitals or unions known as "familles" and amenable to the bishops.

 Tradition credits Dominic with the founding of an order of men and women (male and female). An association of nobles and knights was formed by him, after the conversion of the Albigenians, to recover the alienated property of the Church and convents. They were accordingly styled Milites de Militia Christi. Their vow bound them to chat devoutly, to diligent attendance on public worship, etc., and to the wearing of a garb of ashly hue. Their wives were pledged to promote the objects of the order, and were not allowed to marry again after becoming widows. In the middle of the 13th century this association became an order of penitents, assumed the Dominican rule, and was placed under the Dominican general, receiving the title of "Brothers and Sisters of the Penance of St. Dominic." Other orders, e.g. the Augustines, Minims, Servites, Trappists, etc., successively organized associations of Tertiaries. See Musson, Progymat, Gach. d. vornehmst. Minhsorde-der, etc., quoted above, p. 94, and Cels., s. v. Territiae. 

Tertius (Tertio, Graced from the Lat. tertius, third; Vulg. Tertius) was the amanuensis of Paul in writing the Epistle to the Romans (xvi, 22). A.D. 55. He was at Corinth, therefore, and Cenchreae, the port of Corinth, at the time when the apostle wrote to the Corinthians. It is noticed by Paul in the Epistle that he received the message which Paul sent to the Roman Christians, and inserts a greeting of his own in the first person singular (ἀλλὰ δὲ γράφει ἡ Εὐαγγελία). Both that circumstance and the frequency of the name among the Romans may indicate that Tertius was a Roman, and was known to the writer of the letter. Tertius (Acts xx, 4) is another instance of the familiar usage of the Latin ordinaires, as proper names. The idle pedantry (indulged in by Burmann, Exercit. Theol. ii, 161 sq.) which would make him and Silas the same person because tertius and silvester mean the same in Latin and Hebrew, hardly deserves to be considered (see Ward, 21, 182, iii, 295); and equally idle is Rolof's conjecture (De Trib. Nomin. Pauli [Jen. 1731]) and Storck's (Exercit. de Tertio, in the Fortige, WITH. Samm. p. 23) that Tertius is but a pseudonym for Paul himself. In regard to the ancient practice of writing letters from dictation, see Benson, A.D. 180. No earlier than the 4th century do writers who speak of him as bishop of Icounium (see Fabricius, Luz Evangelica, p. 117).—Smith. See also Briegleb, De Tertio (Jen. 1754); Eckhard, De Signo Pauli (Viteb. 1687); Hertzog, De Subscriptionibus Pauli (Lips. 1708); see also Paul.

Tertre, Jacques (as a priest JEAN BAPTISTE DE), a French missionary, was born at Calais in September, 1610. After traveling for some time returned to France, and entered the Dominican order at Paris in 1615. Five years after he was sent as a missionary to the American islands, returned to France in 1638, and died at Paris in 1687. He published Histoire Générale des Avantures Habitées par les Français (1687-71, 4 vols. 4to). A.D. 1652, and Histoire, etc., etc., 1682. His natural endowments were great, and they were supplemented by a comprehensive course of studies whose fruit appears in the wealth of historical, legal, philosophical, physical, and antiquarian elements contained in his writings. He was destined for the civil service in the empire, and was accordingly trained in Roman jurisprudence and the art of forensic eloquence (comp. Eusebius, H. E. ii, 2, where Tertullian is described as one of the most highly esteemed Romans—not as Rufinus renders it, "one of the most distinguished writers of the Latin Church:"—"inter nostros scriptores admodum claros." His mode of argumentation and terminology everywhere reveal the legal turn of his mind, and his writings in many places throw light on disputed points of the Roman civil law.

Tertullian was converted to Christianity when between thirty and forty years of age, and he immediately became a formidable adversary of paganism and heresies, especially Gnostics. He was the first religious teacher after the apostles who attained to a clear recognition of the mighty contrast between sin and grace, and who presented it in all its force to the mind of the Church. He was married (see his tract Ad Uzures), but he never forsaken the ranks of the clergy. Jerome says that he was first a presbyter of the Catholic Church, but his own writings do not determine whether he was a member of the spiritual order prior to his lapse into Montanism or not. It is certain, however, that he sojournered for a time in Rome (see De Cult. Fem., c. 7; Eusebius, H. E. i, 2).

The transition to Montanism occurred a few years after Tertullian's conversion, and about A.D. 202. The act doubtless had its origin in his eccentric disposition and rigorous moral views, which predisposed him to regard that heresy with favor and to dislike the Roman Church, which he regarded as corrupted by the practices and motives excited by the jealousy and envy of the Roman clergy, and modern writers have ascribed it to disappointed ambition. We know, however, that the penitential discipline of the Church was administered at Rome with exceeding laxity, and that such indulgence was an abomination in the eyes of Tertullian. Philemon [ed. Miller, Oxon, 1851], i. 290. Assuredly he
TERTULLIAN

289

TERTULLIAN

did not regard Montanus as the Paraclete. He recognized in the latter simply an inspired organ of the Spirit. He, rather than Montanus, became the head of the Montanists. Tertullian, however, views a theological character and a concealed influence over the life of the Church, and establishing it on foundations sufficiently firm to enable it to protrude its being down to the 5th century. He died in old age, between A.D. 220 and 240. The assertion that he returned to the Catholic Church before he died is sometimes made, but cannot be substantiated, and the continued existence of the sect of Tertullianists would seem to contradict the assumption (see Neander, Tertull., [2d ed., p. 462; August. De Hcrr, H. 86]. It is a significant fact, and an argument in behalf of the liberal interpretation of the history for which Protestants contend, that it was precisely this great defender of Catholic orthodoxy against Gnostic heresy who was a schismatic to such a degree that he has never been included by the Church of Rome among the number of her saints, or among that of the patres as distinguished from the mere scriptores ecclesiasticis.

As a writer, Tertullian was exceedingly fresh and vigorous, but also angular, abrupt, and impetuous. He possessed a lively imagination, a fund of wit and satire, as well as of acquired knowledge, and considerable depth and keenness; but he was deficient in point of logical clearness and self-possession, as well as of moderation, and of a thorough and harmonious culture. He was a speculative thinker, though the bitter opponent of philosophy. His aspiring mind sought in vain for adequate language in which to express itself, and struggled constantly to force the ideas of Christianity within the forms of the Latin tongue. His style thus became exceedingly forcible, nervous, vivid, concise, and pregnant. His adversaries were assaulted without mercy and with all the weapons of truth and of art, and nearly always appear in his writings in ridiculous plight. He was the direct opposite to Origen, holding the extreme position of realism on the borders of materialism. He was, furthermore, the pioneer of orthodox anthropology and soteriology, the teacher of Cyprian, and forerunner of Augustine, in the latter of whom his spirit was reproduced in twofold measure, though without its eccentricities and angularities. It is possible, also, to trace resemblance between him and Luther, as his contending spirit of native vigor of mind, profound earnestness, unregulated passion, polemical relentlessness, &c.; but the father lacked the childlike amiability of the Reformer, who was both a lion and a lamb.

Tertullian's writings are usually of brief extent, but they cover virtually all fields of the religious life, and they constitute the most prolific source for the history of the Church and of doctrines in his time. No satisfactory classification of them can be executed, because but few of them afford the necessary data on which to base a scheme. The classification here presented rests upon the nature of the several writings as being either Catholic or Anticatholic, in which light the former are considerably more numerous than the latter.

(1.) Catholic Writings, or such as Defend Orthodox Christianity against Valerianee and Heretics.—Most of these works date from the Montanist era of the author's life.

1. Apologies against Pagans and Jews.—First of all, the Apologiætsiis, addressed to the Roman magistracy, A.D. 198 (Möhrer) or 204 (Kaye), and forming one of the best rebuttals of the charges raised by the heathen of the Christian doctrine. The most famous, perhaps, are the Ad Nationes Libri II. In De Testimonia Anima the author develops an argument for the unity of God and the reality of a future state from the innate perceptions and feelings of the soul. In the work Ad Scapul. he demonstrates with the African governor of that name the rightness of the Christian sacrificial system. The Adversus Judasæus Libri draws from the Old-Test. prophesies the proof that the Messiah has appeared in the person of Jesus of Nazareth (comp. Hefele, Tertull., als Apologet, in the Tüb. Quart. Theol., 1838, p. 30-82).

2. Doctrinal and Dogmatic Writings Aimed against Heretics, such as De Principiis, or rules to be observed by Christians in dealing with heretics. The argument involves, as its fundamental principle, the idea that heretics, as innovators, are under the necessity of proving their positions, while the Catholic Church is assured in its sole right to the allegiance of Christendom by the uninterupted current of apostolic tradition and an unimpaired succession, so that it need not enter into controversy with heretics.

After the defection to Montanism, Tertullian wrote against various individual heretics, e. g. in the fifteenth year of Septimius Severus (A.D. 201 or 208), Adversus Marcionem Libri III. His work Paraphrasis Propheticæ theological and dogmatical work, and a principal source for the study of Gnosticism:—Adversus Hermaeum, a painter at Carthage, who had adopted the dualistic theory of the eternity of matter:—Adversus Valentinianos, a tragic and comic presentation of the Valentinian Gnostics:—and Scorpiones, an antidote against the scorpion-poison of such heretics.

Particular Gnostic doctrines are assailed in De Hagismo, a defence of water-baptism against the Cynites and their peculiar theory of a mystical spiritual baptism:—De Anima, an inquiry into the nature, etc. of the soul:—De Carne Christi, an attempt to demonstrate the divinity of Christ:—and De Resurrectione Carnis, a consolation of the heresy which denied the resurrection of the body.

The tract Adversus Praxeum assails the Phrygian Anti- montanist Praxeas, and confutes his patristic error in the interest of the orthodox view of the Trinity.

3. Ethical and Theological Writings. This category is composed of works of small size, but of considerable value to the regulation of practical life and the administration of ecclesiastical discipline. The list includes, De Orat.] an exposition of the Lord's Prayer and rules for prayer and fasting:—De Spectacula, a warning against theatrical exhibitions:—De Idololatria:—Ad Eusebium Libri II, advice to his wife to govern her action in case she should outlive him:—De Peneiimata, a Catholic and Antimontanist presentation of the doctrine of repentance, dating from the earlier period of his Christian life:—De Paternia, a commendation of the virtue of patience, accompanied with a lamentation because of his own lack of that virtue:—Ad Martyrus, an exhortation addressed to the confessors who in the time of Septimius Severus awaited in prison the martyr's death.

(II.) Anticatholic Writings, in which Montanistic Discrepancies from the Catholic Writings are Explicitly Defined.

1. De Philothis, a retraction of the precipice traveled in the earlier work De Peneimata, and violent advocacy of the rigoristic view on which deadly sins, like murder, adultery, and flight from persecution, should never be condemned:—De Monomonia, an emphatic denunciation of two marriages (comp. Hauber, in Studia et. Kr., 1845, No. 3):—De Exhortationes Castitatis, in which three degrees of chastity are distinguished—the first, absolute and lifelong restraint; the second, continence from the time of baptism; the third, refraining from contracting a second marriage:—De Virginitas Velanda, denouncing the habit of unmarried women appearing to be veiled as being contrary to nature, the will of God, and the discipline of the Church generally:—De Habitu Mutabilis et Cultu Femininarum condemns the adorning of the person by females with ornaments, etc.:—De Jejunis adversus Psychiocrata (Catholic) is a defence of the monastic life against the heretical doctrine of abstinence:—De Mariage et de la Fuite de Persecution:—De Corona Militis commends a Christian soldier who refused to wear the festive chaplet on a great occasion and suffered punishment for his act:—De Pellaio is a witty exposition of his conduct in wearing the pallium instead of the ordinary Roman toga, differing from the underoath of the vestments, to test its numerous allusions to obscure customs of the time.

The earliest edition of the collected works of Tertul-
liam this was that of Beatus Rheumin (Basle, 1591). It
was followed by that of Pamelius (Antw, 1579), Riga-
tius (Paris, 1634; Venice, 1744), Semler (Halle, 1770-
8, 73 vols., Leopold in Gersdorf, Bibl. Patr. Eccl. Lat-
ina, Selecta (Lips. 1839-41), parts iv-vii, and Migne (Paris, 
Vol. iii was issued later by Pamelius. The most noted
Alfii, Nic. de Nourry, Mosheim, Nissel, Semler, and
Kay. The life of Tertullian has been written by Neander,

chengeb. (3d ed.), 1, 307; Hauck, Tertullian's Leben
und Werke (Erlang, 1877); Herzog, Real-Encyclop., s. v.; Smith, Dict. of Gr. and Rom. Biog., s. v.
Tertullian (Tryphoas), a diminutive from the Ro-
nian name Tertius, analogous to Lucullus from Lucius,
Fulumus from Flowius, etc., "a certain orator" (Acts 
xxiv, 21), was a close and warm friend of St. Paul and San-
hedrin to accuse the apostle Paul at Cæsarea before the
Roman procurator Antonius Felix. A.D. 55. See
Paul. He evidently belonged to the class of profes-
sional orators, multitudes of whose were to be found not
only in Rome, but in other parts of the empire, to which
they had betaken themselves by the hope of finding oc-
cupation at the tribunals of the provincial magistrates.
Both from his name, and from the great probability
that the proceedings were conducted in Latin (see es-
specially Millan, Bampton Lectures for 1827, p. 185,
note), we may infer that Tertullian was of Roman, or at
all events, Hellenic origin. The Athenaeus (ch. 19) would
naturally desire to secure his services on account of their
own ignorance both of the Latin language and of the
ordinary procedure of a Roman law-court; for the Jews,
as well as the other peoples subject to the Romans, in
their communications and, no doubt, before the Roman
magis-
trates, were obliged to follow the forms of the Roman
law, of which they knew little. The different prov-
cinces, and particularly the cities, consequently
abounded with persons who, at the same time advo-
cated oracles and oracles, were equally ready to plead in
civil actions or to harangue on public affairs. This they did,
either in Greek or Latin, as the place or occasion re-
quired. The exordium of his speech is designed to conciliate
the good will of the procurator, and is accordingly over-
charged with floridity. There is a strange contrast be-
tween the opening clause—_windows, γυναικος, γυναικο
rheia oπιν— and the brief summary of the procurator's
administration given by Tacticus (Hist. v, 9): "Anto-
nius Felix per omnem saevitiam ac libidinem, jussum
servill ingenio exercuit" ( comp. Tact. Ann. xii, 54).
But the commendations of Tertullian were not altogether
unfounded, as Felix had really succeeded in putting in
place, down several seditious movements. See Felix.
It is not very easy to determine whether Luke has preserved
the oration of Tertullian entire. On the one hand, we
have the elaborate and artificial opening, which can
hardly be other than an accurate report of that part of
the speech; and, on the other hand, there are a narra-
tive which is so very dry and concise that, if there were
nothing more, it is not easy to see why the orator should
have been called in at all. The difficulty is increased
if, in accordance with the greatly preponderating weight of
external authority, we omit the words in Acts xxiv, 
6-21, which are read by some. Origen (Hom. vi. 2, 5
of the whole, it seems most natural to conclude that the
historian, who was almost certainly an eye-witness,
merely gives an abstract of the speech, giving, how-
ever, in full the most salient points, and those which had
the most forcibly impressed themselves upon him, such
as the exordium and the character ascribed to Paul (ver. 5).
The doubtful reading in vers. 6-8, to which reference
has already been made, seems likely to remain an un-
solved difficulty. Against the external evidence there
would be nothing to urge in favor of the disputed pas-
sage were it not that the statement which remains af-
after its removal is not merely extremely brief (its brevity
may be accounted for in the manner already suggested),
but abrupt and awkward in point of construction. It
may be added that it is easier to refer σαμo όυ (ver. 8)
to the tribune Lyssias than to Paul. For arguments
on the words σαμο και ἀναράξ (ver. 6)- arguments which are dependent on the genuineness of the
disputed words—see Lardner, Credibility of the Gosp-
el History, bk. i, ch ii.; Bisce, On the Acts, vi, 16.
We ought not to pass over without noticing a strange
tyrology for the name Tertullian proposed by Calmet,
in the place of which another has been suggested by his
English editor (ed. 1830), who takes credit for having
rejected "fanciful and improbable" etymologies,
and substituted improvements of his own. Whether
the suggestion is an improvement in this case the reader
will judge: "Tertullian, Tryphoas, huius, impostor, from
"Trypho," a name of Cappadocia. The word is a true
appellation Ter-Tullius, 'thrice Tullus,' that is, ex-
travagant, varied by Jewish wit into Tertul-
lo?"}

Teschenmacher, Werner, a minister of the Re-
formed Church in Juliers-Cleves-Berg, and a writer
of some prominence in ecclesiastical and political literature,
was born at Elberfeld in September, 1598. He was ed-
ucated at Heidelberg and Heidelberg, and afterwards
entered the Church from 1610 or 1611 until 1683 in her pulpits,
where he gained the reputation of an eloquent and able
preacher of the Word. His services were much in re-
quest by the churches, Elberfeld, Cleves, and Emmerich,
at that time the seat of the Brandenburg government,
being his principal fields of labor. He was also very
esteemed for his fine tact and skill in diplomacy, qual-
ties that led to his selection for the conduct of many
affairs in which the preservation and welfare of the
Protestant churches of the duchy were at stake during
that stormy period of religious wars. He was, however,
of bashy temperament and exceedingly self-willed, so
that he frequently came into conflict with other clergy-
men, and occasioned the government, which wished him
well, considerable trouble in the effort to sustain him.
His retirement from the pulpit was the result of a col-
fusion with Stöver, a newly appointed colleague to his
charge, who was desirous to set and end to certain
affairs until his death, on Good-Friday, April 2, 1698.
Teschenmacher's writings are chiefly historical in
character, and of brief extent. They are, Repetitio
Brevis Cathol. et Orthodox. Rel., qua Singularis De Be-
neficium ante Sacrum a Populo Reform. in Civili, Julia.
Montium Ducatibus et aliter (Essen, 1685, 43 pp.); An-
nales Eccles. Reformations Ecclesiarum Civit. etc.,
(1633); Annales Civit. (1638); 2d ed, by Dithmar,
Frankf.-on-the-Oder, 1721, a political work which is
still valuable. Works in MS.: Sermones: A Commentary
on the Epistles to the Corinthians, in Latin: Annalium
Ecl. Epistolae in quatuor praemine Gratissimae queso
explication de Successiones et Statum Ecl. Civit. etc. An
autobiography in extenso, and an autobiography by P.
Teschenmacher, are both lost.—Herzog, Real-Encyclop.,
S. v.
Test, the imposition of an oath, or any other act by which the religious principles of any individual are put to proof. Tests and disabilities are distinct from penalities properly so called: it would be absurd to talk of punishing any one for being a woman, a minor, a person of low moral capacity, unopposed to the law, without education, etc., on the ground that they are excluded as unfit for certain offices and privileges. Yet test laws do operate as a punishment; not because they are cause of pain, but inasmuch as they tend to produce that change of conduct which punishment is designed to produce.

Test Acts, also called Corporation Acts, the popular name given to two English statutes imposing certain oaths on the holders of public offices. Act 13 Charles II, c. 2, directs that all magistrates shall take the oaths of allegiance and supremacy, as well as an oath renouncing the doctrine that it is lawful to take arms against the king; and provides that they must receive the communion according to the rites of the Church of England within a year before election. Act 25 Charles II, c. 1, imposed the like conditions on the holders of all public offices, civil and military, and obliged them, in addition, to abjure all belief in the doctrine of transubstantiation. These acts, which were practically evaded to a large extent by means of an act of indemnity passed every year, were repealed by 9 George IV, c. 17, in so far as regarded the administration of the sacrament, for which a declaration set forth in that act was substituted. A statute of William IV substituted a declaration for an oath in most government offices. A new form of oath has been substituted for the oaths of supremacy, allegiance, and abjuration by 21 and 22 Victoria, c. 48.—Chamber's Encyclop. s. v.; see Skeats, Hist. of Free Churches of England (see Index).

Testament is the frequent rendering, in the New Test., of the Greek διαθήκη (literally a disposal), and both are used for two distinct senses (see Cremer, Lex. of N.-T. Greek, p. 576 sq.).

1. The natural, and in classical Greek, as in ordinary English, the only signification is a disposal by will or legacy (Plutarch, De Adulat. 28; Plato, Legg. 923; Demosth. 1106, 12), and in this sense the word occurs in Heb. ix. 15, 17. See Testament.

2. But the more common signification in the New Test. is one that has come over from the Sept., which often uses διαθήκη as a rendering of the Heb. בְּרֵאשִׁית, or covenant; and in this sense "testament" is the rendering in the A. V. of the Greek word in Heb. vii. 22; ix. 20; Rev. xi. 19; and especially in the phrase the new testament (Matt. xxvii. 20; Mark xiv. 24; Luke xxii. 20; 1 Cor. iii. 6; Heb. ix. 15 [i.e. new covenant], as in Heb. viii. 8; xii. 24)], which has gained currency as the title of the Christian Scriptures as a whole. See New-Englander, May, 1857, Lond. (Wesleyan) Quar. Rev., July, 1857. See Covenant.

TESTAMENT, OLD AND NEW. When the books written by the apostles of Jesus Christ, or by apostolic men, were first added along with the books of the Hebrews, as comprising the entire scriptural canon, it became necessary to distinguish the two divisions by appropriate designations. A usage which already prevailed furnished the designations required. The gracious engagements into which God was pleased to enter with individuals and communities both in the Old Test. the name of the Testament, or covenant (q. v.), and to this corresponds the Greek διαθήκη in the Sept. and New Test. Of these covenants two stand out from all the rest as of pre-eminent importance—God's covenant with Israel mediated by Moses, and that covenant which he promised to establish through the Messiah. In the Jewish Scriptures this latter is designated בְּרוֹאֶשׁ הָעָם, בְּרֵאשִׁית, or κανών διαθήκη (Jer. xxxi. 31), and this, adopted by our Lord (Matt. xxvii. 28), and familiarly used by the apostles (2 Cor. iii. 6; Heb. ix. 15, etc.), would naturally suggest the application of the phrase ἡ παλαιά διαθήκη to the former. Among the Jewish such expressions as בְּרֵאשִׁית, בְּרֵאשִׁית διαθήκη, for the tablets on which the law was inscribed (Deut. ix. 9), בְּרֵאשִׁית בְּרֵאשִׁית διαθήκη (Exod. xxiv. 7; 2 Kings xxiii. 21; 1 Macc. i. 57), βηθνος διαθήκη (Eccles. xxiv. 23), were in common use. From these it is an easy transition to such an expression as that of the apostle (2 Cor. iii. 14), ἡ κανών διαθήκη, where the name appropriate to the Mosaic covenant is retained in the title which it contains. There thus arose in the Greek Church the usage of the phrases ἡ παλαιά διαθήκη and ἡ κανών διαθήκη as designations of the Jewish and Christian sacred writings respectively. In the Latin Church the usage prevailed of calling these Vetus et Novum Testamentum. Why the word Testament was selected and not κανών rather than Φασις or Pactum may be explained by the fact that the former rather than the latter is the proper equivalent of the Greek word. Hence in the old Itala made from the Sept. it is always used where the Greek has διαθήκη; and in the Vulgate it is used where the Sept. uses those books which the former had in his old version, whereas in those in which Jerome translated from the Hebrew בְּרֵאשִׁית is represented byactus or pactum. That this usage was an early one in the Latin Church is evident from the words of Tertullian (Adv. Marc. iv. 1): "Duos Deos dividens (Marcion) alterius alterius Instrumenti vel, quod magis usui est dicere, Testamenti." The use of Testamentum, however, does not seem to have been universally accepted till a much later period. In the passage quoted Tertullian evidently gives the preference to the word instrumentum, a term used technically to denote a writing by which anything is to be attested or proved (comp. Quintil. Inst. Oral. xiii. 8, 12); and this is the word he generally uses (comp. Adv. Marc. iv. 2; De Paide. c. 12, etc.). Rufinus also used in a similar sense. Later Lactantius, however, freely uses testamentum as a well-accredited term when he wrote (Inst. Div. iv. 20).

From the Vulgate and the usage of the Latin fathers, Testamentum has naturally passed into the title of the two divisions of the Scriptures in the English and most of the European versions. See New Testament; Old Testament.

Testaments of the Twelve Patriarchs, the, is one of the seventy-two Apocryphal books of the Old Test. which were at one time in circulation, and, according to Epiphanius (Lib. de Menipris et Ponderibus, § 10), it formed one of the twenty-two canonical books sent by the Jews to Tnl, the king of Egypt. See APOCRYPHA.

I. Author of the Work and its Object.—There can be no dispute that the writer's main object and purpose was the conversion of the Jewish nation to the Christian faith. To gain this object his appeal is based not on the authority of the Mosaic law, but on the law of nature, transferred back to the earlier period of the patriarchs, where, underlying the simple covenant between God and man, were latent the first germs of Christianity. From this it has been inferred that the writer himself was a Jew. Grabe, the first who treated at length of the Testaments, thought that the writing was in question that of a Jew shortly before the Christian æra; and to account for the presence of passages which no Jew could possibly have written, he had recourse to the theory of interpolation. This opinion, however, has found but little favor, and it is generally agreed to the conclusions of Nitzsch, who definitely attributed the work to a Judæo-Christian writer, an opinion adopted now even by Ritschl, who in 1850 maintained that author was a Christian of Pauline tendencies. Without entering upon the different views advanced on this point, we pass on to the
II. Time of Composition.—That it was not composed before A.D. 70 we may infer from the author's allusion to the destruction of Jerusalem, which assigns to the Testament a date subsequent to this event. On the other hand, it is already quoted by Tertullian (Adv. Marc. v. 1, § 17, ed. Bezae, c. 6); and thus we may safely infer, without quoting the different opinions, that the most probable date for its composition is 80-110 or 120 of our era.

III. Language in which the Work was Written.—The Testament, as we have it now, was no doubt written in Hebrew; for, in its original form, it was written in its own tongue, and was read in the synagogues. Grabe maintained that it was originally written in Hebrew and was translated into Greek with the canonical books of the Old Testament. But against this view it has been argued that already the title of the book, αἱ διάδοχαι τῶν Ἱσαακὶ, indicates its Greek original, because the Hebrew בֵּית רְשָׁעָה or בֵּית רְשָׁעָה would have been presented by the Greek εὐλογία, ἱντελλοί, or παράτυπα. We also find a number of instances of paronomasia, hardly possible on the hypothesis of a Hebrew original. Such are δέσμινι... νοοθετεῖν, ἀδιάκριτος... πᾶν... λαβεῖν, στρατήγαι... τριάντα μελέτης (ibid.); in τάξιν... ὁρισμένοι (Naph. note 2), τάξις... ἀταξία (ibid. 8). We find various expressions pertaining to the Greek philosophy, as διάλεκτος, ἀδιάκριτος, φίλος τῆς φύσεως, διάβολοι, σημείωσις τούτων. Taking all in all, we are led to the supposition that it was originally written in Greek. De Wette, Nitzsch, De Test. XII Patriarch. [Wittemb. 1810], p. 16; Vorstman, Disquis. de Testament. XII Patriarch. p. 8 sq.

IV. Contents of the Testaments.—The work professes to be, as its name implies, the utterances of the dying patriarchs, the sons of Jacob, to their children. In these are given, in a brief and brief, the narrative of their lives, with some particulars not to be found in the scriptural account, and there are built thereon various moral precepts for the guidance of their descendants, who may thereby be preserved from the snares into which their fathers fell. “Still,” says Vorstman, “all the patriarchs are convinced that their children will deal wickedly, falling away from God, defiling themselves with the sins of every nation. They therefore prophesy what is to come; they foretell the troubles impending on their children. But they venture to raise more joyous strains than these. For God is to put an end to their troubles; he will visit his people; he will break the power of sin. Prophecies of a Messiah are brought forward by the patriarchs. With such hopes they die. Their discourses, therefore, may justly be called Testaments, when at the point of death they speak to their children their last words. They leave them nothing save injunctions and prophecies. The words of Benjamin (c. 10) will apply equally to all: τὰ ἀντὶ ὁμοίως ἐγγυω στὸς ἐρωτηματικός ἦμας διδάσκων.”

V. Messianic Ideas of the Book.—The Messianic views are strongly tinged with national feeling. The Messiah, combining in himself the functions of high-priest and of king, is to arise from the tribe of Levi as well as from the tribe of Judah. Still there is a tendency throughout which aims at teaching that his high-priestly office is greater than his kingly one. The Messianic passages having reference to the promised Messiah of Israel may be divided into two classes—the one being that in which he is to come into the world in the likeness of man—and into such as refer to him as man alone. Of the latter we read in Test. Levi. c. 16, “And the man (ἀνάφωρα) who reneweth the law by the power of the Most High shall ye call a deceiver: and at last, as ye suppose, ye will say, ‘he shall come in the midst of his adversaries, wickedly taking the innocent blood upon your own heads. And because of him shall your holy places be desolate.’” And after these things a star shall arise to you out of Jacob in peace, and a man (ἀνάφωρος) shall rise up of my seed, as a sun of righteousness, walking with the sons of men in meekness and righteousness, and no sin shall be found in him.” Naph. says (c. 4), “Until the compassion (σπλαγχνίας) of the Lord shall come, a man (ἀνάφωρος) working righteousness and showing mercy to all that are afar off and to those that are near.”

Such views the Messiah is described in Jos. as arising merely on the human nature of the Messiah. Let us look at those which refer to his divine nature. Thus the patriarch Dan (c. 6) bids his children “draw near to God and to the angel that intercedeth for you (τῷ Θεῷ καὶ τῷ ἠγίῳ τῷ παραγωγῷ ιμάς). He is called “the mediator between God and man” (μεσιάτης καὶ ἀνάφωρος). “His name shall be in every place in Israel, and among the Gentiles, Saviour” (τῷ δὲ ὄνομα αὐτοῦ ισταί ἐν παντὶ τῷ Ἰσραήλ καὶ ἐν τοῖς ἔθεσις ἱερεῖς). Levi (c. 4) speaks of the Messiah as υἱὸς Καριὼν. Simeon (c. 6) speaks “of the Lord, the Great God of Israel, who shall appear upon the earth as man and who shall save all the Gentiles and the race of Israel.” Judah (c. 6) tells his children, “Among the Gentiles shall my kingdom be consummated, until the salvation shall have come to Israel; until the appearance of the God of righteousness to give quietness in peace to Jacob and to Israel.” The author commands them that they should be dispersed throughout the world until “the Most High should visit the earth, himself coming as a man (ἀνάφωρος), eating and drinking with men. . . he shall save Israel and all the Gentiles; God speaking in the person of man” (Θεὸς γὰρ ἐστιν ὁ ἐρωτηματικὸς τῆς Ἰουδαίας). Josiah (c. 12) says to his children, “And I saw that from Judah was born a virgin wearing a linen garment, and from her went forth a lamb without spot” (εὐλογία ἢμῶν). That reference is here made to the sinlessness of the Messiah there can be no doubt. Hagenbach (in his Dogmengeschichte, p. 145, ed. 1841) refers to the “Messiah of the text not the product of the application of the word “spotless” to our Lord, but we have here an earlier example. Thus Benjamin (c. 3) speaks of “the Lamb of God and the Saviour of the world,” that “spotless he shall be delivered up for the wicked, and sinless shall he die for the ungodly.” Levi tells his children that they shall slay the Messiah and “wickedly take the innocent (ἀνάφωρος) blood upon their heads.” Judah (c. 24) says, “No sin shall be found in him.”

As to the office of the Messiah, he is continually spoken of as the one who “shall come in the midst of his adversaries, wickedly taking the innocent blood upon your own heads.” (Dan. c. 5; Jos. c. 19). As king springing from the tribe of Judah (Sim. c. 7), he is to wage war and to triumph over Beliar, the personification of the kingdom of evil (Lever. c. 18; Dan. c. 5; Benj. c. 5). As high-priest he was to have no successor (Lever. c. 16), i.e., with him the offering of sacrifices was to come to an end. The Messiah is a Saviour; Levi is bidden to “proclaim concerning him who shall redeem Israel” (c. 2; Dan. c. 5; Jos. c. 19; Benj. c. 3); and another patriarch adds, “He that believes in him shall reign in truth in the heavens” (Dan. c. 5). The Messiah was to suffer: “Thy sons shall lay hands upon him to crucify him” (Lever. c. 4); “and he shall enter into the front of the Temple (τοῦ πρώτου ναοῦ), and there shall the Lord be treated with outrage and he shall be lifted up upon a tree” (Benj. c. 9; see also Lever. c. 10, 14, 16). The rending of the Temple veil is alluded to as the act in which the Spirit of God came to the children of Israel to comfort them—“as the power of sacrifice was to be rent,” says Benjamin (c. 9), “and the Spirit of God shall be removed unto the Gentiles as fire poured forth,” Levi (c. 10) says, “The vail of the Temple shall be rent, that it shall not cover your shame.” As to the Messiah’s ascension and triumphal reception into heaven, see Lever. c. 6, 8, 11; Josephus speaks of the change of plan to return to future judgment, comp. Lever. c. 13.

VI. Dogmatical and Ethical Ideas.—The salvation of the Messiah is to be obtained by faith as the means of justification with God: The kingdom of evil is to come to an end “on the day on which Israel shall believe” (Dan. c. 6). “As many as have believed in him on earth shall
rejoice with him when all shall rise again, some to glory and some to shame" (Beni. c. 10). Allusion is made to the importance of baptism for this end. Thus Levi (c. 16) tells his children the punishment that shall befall their bretheren: "The Messiah shall be curse among the Gentiles and shall be scattered abroad until he shall again visit you and in pity shall take you to himself in pietas et clementia." The same patriarch (c. 18) again says of the Messiah, "In water shall he himself give the glory of the Lord of his sons in truth forever with the righteous and the wicked shall rise again; the former to rejoice with the Messiah, the latter to weep and lament, and to be destroyed forever" (comp. Judah. c. 25; Sim. c. 6; Levi. c. 18; Zeb. c. 10). Benjamin declares (c. 10), "Then shall ye be behold Enoch, Noah, Shem, and Abraham and Isaac and Jacob, arising on the right hand in joy; then shall we also arise, each one in our tribe, and worship the king of heaven. And as many as believed on him upon earth shall rejoice with him when all shall rise, some to glory and some to contempt. And the Lord shall judge Israel first, even for the wrong they did to him; for when he came as a deliverer, God in the flesh, they believed him not. And then shall he judge all the nations, as many as believed him not when he appeared upon earth." Man, who has been formed in the image of God (Naph. c. 2), is composed of two parts, body and spirit, if possible to each other. To man seven spirits were given at his creation by God, in themselves seven; not as the seven days were created by God or that they do, mainly to external sensations. These spirits were ζῷω (i.e. the ζωή, the mere animal life), ἀμαρτία, ἐκοίνωνία, ἀπρόβατος, λόγος, γείωσις, καιρός, of which, as ζῷω, refer exclusively to the mere animal life of man, as does also a supplementary eighth spirit, that of ἄνθρωπος. Superadded to these are seven other spirits, given to man by Beliar, representing seven principal evil tendencies (Rebuk. c. 2, 3). The latter, which are spoken of generically as τὰ πνεύματα τῆς πλάνης, are wholly bad, and represent different evil tendencies of humanity. They are the spirits of πορνεία, ἀπλοπία, μάθα, ἀμαρτίαν, κακομαθία, ιστόφορος, φίλος, and Δίκη. Within man war is waged by his two selves. Judah speaks of the two spirits that "attend (γελοῖοι) upon man, the spirit of truth and the spirit of error; and in the midst of the two the mind, which may turn to either side it will" (c. 20). The spirit of truth seems to be almost equivalent to conscience, for it is added "The spirit of truth testifieth all things, and believeth all." Reuben, too, speaks of his conscience (σοφίας) troubling him all his life long (c. 19). Man has his two under-selves, which he must guard in the battle that has to be fought between the two ways that God has given to him. He can choose either "the darkness or the light, either the law of the Lord or the works of Beliar" (Ler. c. 19); and, though man is weak and ever prone to error, yet if he prefers in his attempt to do right, "Every spirit of Beliar will fly" (Sim. c. 5, 4; Judah. c. 18, 19, 21; Isach. c. 7; Zeb. c. 9; Gad. c. 4) from him. Sin, therefore, being especially regarded as proceeding from τὰ πνεύματα τῆς πλάνης, is constantly spoken of as ἁγία, ἀνάρχης, and the like, for which pardon is readily granted by God. Ignorance, however, though affording a plea for pardon, cannot of itself be accounted an excuse for the sin; the appeal is still to be made to the mercy of God. But as from sins ignorantly committed man passes on to those done against light and knowledge, so is there a deeper cast of sin than ἁγία. The seven spirits are a part of the six (c. 1; comp. Dan. c. 1; Gad. c. 2) not to reveal to him the public brethren's crime of selling Joseph; that crime, however, was ἁμαρτία on their part. And this is alike true for a sin actually committed and for one as yet in embryo in the thoughts of the heart; for Simon (c. 2), whose hatred for Joseph had led him to contemplate the sin of murder, is accounted in God's sight guilty of that crime, and therefore punished. We see here the doctrine of the apostle endorsed: "He that hateth his brother is a murderer." The doctrine of God's retributive justice is fully believed and vindicated in its own punishment in this work (comp. Rebuk. c. 1; Sim. c. 2; Gad. c. 5), therefore man should follow God's laws (comp. Rebuk. c. 4; Sim. c. 4; Ler. c. 13; Beni. c. 3; Zeb. c. 8). The fear of God appears as the chief motive for the fulfillment of righteousness (comp. Rebuk. c. 4, παρακολουθήσω αὐτῷ Πάτρας διοικήσας), for God is σώματος τοῦ θεοῦ. But when, and as soon as God shall have given the kingdom to his Son, "and his enemies shall be made subjects to him, and all his enemies shall serve him" (c. 22, 18). VIII. Sources.—Having given, in the main, an outline of the most important points contained in the Testament, the question as to the sources for the work cannot be superstitious. From the work itself we infer that the book was probably a copy from which the apostle quoted. Thus seven Testaments out of twelve allude to it as γραφή ἐν Ποτσιλίῳ (Ποτσιλίῳ, Ποτσιλίῳ, λόγος) ἐν Ποτσιλίῳ (πυήνῳ, πυήνῳ, ἐν Ποτσιλίῳ (see Sim. c. 5; Ler. c. 9, 10, 14, 16; Naph. c. 9; Judah. c. 18; Dan. c. 5; Beni. c. 9), and other similar expressions. Zebulon refers to the γραφή πατρίωτος (c. 6), and Asher (c. 6) to the γράφα και οἴκοις τῶν οἰκονόμων, "heavenly tabernacles." As to the latter, whether they were a book containing what is foreknown and foreordained in heaven as to the course of the future, and were appealed to when some oracular declaration of weighty import was needed, or whether they were something else, we are at a loss to state, although they are often quoted in the book of Enoch and Jubilees. Besides the works mentioned, there can be no doubt that the author of the Testament knew the book of Jubilees, as the amount of coincidence between the two writings is very great (comp. e.g. Rebuk. c. 8 with Jubilees, c. 38; Dan. c. 11 with 34; Zeb. c. 31; c. 11 with 34; Judah. c. 7 with 34, 38, 39; c. 9 with 37; c. 10 with 41; c. 19 with 41; Rebuk. c. 7, Sim. c. 8, Ler. c. 19, Judah. c. 26, Zeb. c. 10, Dan. c. 7, Naph. c. 9, Gad. c. 8, Asher. c. 8, Beni. c. 12 with Jubilees, c. 66, etc.). He also made use of the Targums, Josephus, and Philo, and the like. Of greater importance is it to know that the author also made use of the New Testament, and for the latter fact we refer to the elaborative article of Warrild, The Apological Value of the Testaments of the XII Patriarchs, in the (N.Y.) Presbyterian Review, 1899, p. 57. VIII. History of the Work.—"Habent sua fata libelli." It is remarkable that this work, which was known to Tertullian (Ad. Marcionem, v. 1; Scorpiones, c. 13) and Origen (Hom. in Josuam, x. 6), became first known to the world at large through the Latin version of Robert Grosseteste, or Greathead, bishop of Lincoln, of the 13th century. This version soon appeared in German and in the course of time, translations into a large number of languages were made from it—into English, French, German, Dutch, Flemish, Danish, Bohemian, and Armenian. More than four centuries had passed since Grosseteste's Latin version, when at last the Greek text was restored to us by the labor of the Spanish Jesuit Eusebius Spalatinus Putum et Hereticonem (Oxford, 1698), from a MS. in the university library of Cambridge, collated with one at Oxford. In 1719 Fabricius published the Greek text in his Codex Pseudo-Josephii V. T. (Hamburg), adding but slightly to the criticism of the text. In 1714 Trabe published a second edition, re-
TESTAMENTI, PATRIARCHAL 294 TESTIMONY OF DISOWNMENT

aining the true text in several passages, but in many places altering Groesetstein's Latin version, which witnessed to the true reading, to suit Grabe's incorrect text. Fabrius first translated the second edition 1722, on the whole less accurate than his first. Afterwards the text and notes as given in Grabe's second edition were reprinted, with but few additions, by Galland, in his Bibliotheca Veterrn Patrum (Venice, 1765), i. 193 sq. In 1869 Robert Siniker published an accurate transcript of this second edition, complete with all the paraphernalia, to which he added, in 1879, a collation made from two other MSS., viz. a Roman MS. in the Vatican Library (Cod. Græc. 781), and a Patmos MS. in the library of the Monastery of St. John the Evangelist (Cod. 411).

IX. Versions.—As already indicated, there existed versions in different languages before the Greek text was published. The editions of the Latin version are numerous. That which is presumably the editio princeps bears neither date, printer's name, nor place of printing. The title is Testamenta duodecim | Patriarchali Fulorum Jacob, | et Greco in Latinam | versi Roberto Lincont. | Ephes. | Irenaei. From this was taken the edition printed at Hagenau in 1582 by John Sercius, at the instance of Menrad Molther. The work of Julianus Pomerius Contra Judæos is published in the same volume. Besides the separate editions, the Testamenta are included in the Bibliotheca Patrum.

In English there exist at least three independent translations—one from the Latin, the others from the Greek. The translation from the Latin first appeared in 1577, and was often reprinted, especially in the 17th century. The first edition is of great rarity, and there exists no copy of it even in the British Museum. The second edition, of 1581, of which there is a copy in the British Museum, has the following title-page:

"The Testaments of the Twelve | Patriarchs, the Siones of Jacob: tran-lated out of Greeke into Latine | by Robert | Grostedt, sometime Bishop of Lincoln, | and others. | Printed at the剜arche and Dunkirk: | Now | englishted by A. G. | To the credit whereof an auspicious Greeke copy | written in parchment, is kept in the University Library of Cambridge. | At London | Printed by John Daye, dwelling over Aldersgate. 1581. | Cum privilegio Regni | Maiestatis."

There are about forty other English editions printed after the year 1601. A translation was made directly from the Greek (of Grabe and Fabricius) by Whiston in his Collection of Authentic Records belonging to the Old and New Testament (Lond. 1727), i. 294 sq. In Clark's Ante-Nicene Christian Library (vol. xliii), Mr. Siniker published a translation from his edition of the Greek text, with introductions to the book of Maccabeanism (q. v.). In England receive the Testaments of the XII Patriarchs as inspired, together with the Old and New Tests, the book of Enoch, and the works of Reeve and Muggleton. From the English a Welsh version was published in Carnarvon (1822), Testament y ddwydeg Patriarchel, ef Melbwn Jacob, etc.

There are at least two translations in French, both taken from the Latin. One was published in 1548 at Paris, another in 1713. The latter was also republished in Migne's Encyclopédie Théologique, vol. xlix (Dict. des Apocryphes, vol. i), coll. 894 sq.

In fact, whereas the Testaments have evidently been very popular, as may be inferred from the number of editions that have appeared. The oldest German translation is the one published in 1599 at Basel: Das Testament der zwolf Patriarchen der Süden Jacobs; the latest, the one published at Tübingen in 1857, Archiv apocryphische Denkmaler der Heiligen Schrift. (ii) Das T. d. zwolf Patriarchen.

The Dutch and Flemish editions are also very numerous. There are two editions without any date, but which must have appeared before 1544, since an edition was published in that same year. Altogether there are about forty editions in Dutch and Flemish, the last published in 1679.

The Testaments was translated into Danish by Hans Mogensøn, and four editions of his translation were published, the first in 1580, the last in 1701.

In the Icelandic there exist some MS. translations; but whether one or the other has ever been printed we are at a loss to state.

The Bohemian version can claim to be the first of the translations from the Latin, having been made long before the invention of printing. It is referred to by Thomas Stirny about the year 1576. There exists a manuscript at the National Library in Prague, written in a very copyist style, to which he added, in 1581, a collation made from two other MSS., viz. a Roman MS. in the Vatican Library (Cod. Græc. 781), and a Patmos MS. in the library of the Monastery of St. John the Evangelist (Cod. 411).

An Armenian version exists in MS., dated 887, i.e. A.D. 1388, in the library of the Mechitarists at Vienna, which appears not to have been published.

X. Literature.—Besides Grabe, see Vorstman, Disquisitio de Testamentorum XII Patriarchorum Origine et Pretio (Rotterdam, 1857); Nitzsch, Commentarium Criticum de Testamentis XII Patriarcharum, Libro V. T. Pseudepigrapho (Wittenberg, 1810); Ritschl, Die Entstehung der alkatholischen Kirche (Bonn, 1850); Kayser, in Reuss and Comité's Beiträge zu den theolog. Wissenschaften (Jena, 1870); and Tischendorf, Die 63 Jahresthren des Propheten Daniel (Göttingen, 1839); Langen, Das Judenthum in Palästina zur Zeit Christi (Freiburg, 1866), p. 140 sq.; Geiger, Jüdische Zeitschrift für Wissenschaft und Leben (Bresl. 1869), p. 116 sq.; Warfield, The Apologetical Value of the Testaments of the XII Patriarchs, in the (N. Y. Presbyterian Review, Jan. 1880, p. 57 sq.; but, above all, Siniker, Testamenta XII Patriarcharum (Camb. and Lond. 1869); and his Appendix (ibid. 1879). (B. P.)

Testes Synodales, persons chosen to help the church-wardens in fulfilling their duties, and in promoting order, quiet, and decorum at visitations, synods, and clerical meetings. They were also called Sidermen, synodolmen, or Questmen (q. v.).

Testimonial. Every candidate for admission to holy orders in the Church of England is required to present to the bishop a testimonial of good conduct from his college, or from three benefited clergymen. The usual form of this document is as follows:

"Whereas our well-beloved in Christ, A. B., hath declared his willingness to offer himself for the sacred office of [a deacon], and for that end hath requested of us letters testimonial of his learning and moral course, we hereby subscrib'd, do testify that the said A. B., having been previously for a long time in the space of years past, hath, during that time, lived piously, soberly, and honestly, and diligently applied himself to his studies: nor hath he at any time, so far as we know and believe, held, written, or taught any contrary to the doctrine or discipline of the united Church of England and Ireland; and, moreover, we believe him in our consciences to be a person worthy to be admitted to the sacred order of Deacons. In witness whereof," etc.

A similar testimonial is required from candidates by the Protestant Episcopal Church of the United States. As this is in that connectionwards which a historical rule has established to preserve the purity of its ministers, it would be a fatal error to allow it to become a mere matter of form. No conscientious man can safely sign such a document unless fully assured of the facts to which he bears such solemn testimony.

Testimony of Disownment, an official document issued by the meeting of the Society of Friends against an obstinate and impudent member. The testimony of disownment is a paper reciting the offence, and sometimes the steps which have led to it; next, the means vainly using to reclaim the offender; after that a clause disowning him, to which is usually added an expression of desire for reconciliation, and for his restoration to membership. In case the expelled member repents, he is bound to send in a wri-
ten acknowledgment of his offence, his penitence, and his desire for restoration to the membership of the society.

Te'ta (Τέτα v. r. Ἀρτιά: Vulg. Topa), a corrupt Graecized form (1 Esdr. v, 28) of the name Ἡράτα (q. v.) of the Herodian list of Temple doorkeepers (Ezra ii, 42; Neh. vii. 45).

Tetragrammaton (τετράγραμμα, from τετράς, four, and γράμμα, letter), a term to designate the sacred name of the Deity, Jehovah, in four letters, יהוה. By the possession of this name the early Jewish opponents of Christianity declared that the miracles of Christ were performed. The mystical word Om of the Buddhists of India and Tibet is supposed to possess similar virtues to the present day.

Tetrapla, a Greek term used to designate a certain edition of the Holy Scriptures, being four independent and separate Greek versions, ranged side by side, viz., those of Aquila, Symmachus, the Seventy-two, and Theodotion.

Tetapolitana Confessio (also Servica and Argentinesius) is the title by which the confession of faith submitted to the Diet of Augsburg in 1530 by the four cities of Strasburg, Constance, Memmingen, and Lindau is known.

The former to construct a confession which should fairly represent the views of all the sections of the evangelical party failed through the stubborn refusal of the Saxons to unite in any way with the Zwinglians of the cities, and the Strasburg deputies consequently invited Bucer and Capito to prepare a separate symbol for the use of the latter. Capito had previously prepared a sketch of the Reformed faith by order of the Council of Strasburg, and this paper became the basis of the new confession. The latter was completed by July 11, 1530, and, after having been submitted to the confederated cities and received their signatures (with the single exception of Ulm), was placed in the hands of the imperial vice-chancellor, Merkel, for transmission to the emperor.

The confession contains twenty-three articles, and is characterized by great clearness and moderation of statement, completeness, and thoroughness of elaboration. Its first article asserts the chief formal principle of Protestantism, wholly wanting in the Augustine, that the Bible is the only source and rule of doctrine. It teaches that the disciples of Christ partake of his body and blood in the sacrament in a spiritual sense only. The form of expression, however, is everywhere conformed to the Augustinian Confessio feature which reveals the hand of Bucer (q. v.), who was already at this time upon plans for the promotion of union among Protestants.

A reply to this confession, written by Eck, Faber, and Cochlaeus, was retained Oct. 24. This Confutation was filled with perverisions and insults, and was read before deputes and theologians of the four cities. A copy of this reply was denied them, but they succeeded in obtaining one, which was appended to the first edition of the Tetapolitana, published in German by Bucer at Strasburg in 1531. A Latin edition followed a month later, in September. Bucer was compelled to publish the confession in order to put an end to false representations of its character; but his own persistent efforts in behalf of union between the Protestant churches contributed to subordinate it to the Saxon confession. In 1532 the Strasburgers consented to subscribe the Augustine, though with the express understanding that the Tetapolitana should be considered as being in syllables.

Finally, when Bucer was dead and Martyr (q. v.) was gone from Strasburg, a rigid Lutheranism took possession of the city. An attempted reprint of the first edition of the Tetapolitana by Sturm in 1580 was prevented by a decree of the council. The last edition, which was not so well written as the former, appeared, so far as is known, at Zweibrücken in 1604.

Tetrarch (τέτραρχη, from τετράς, four, and ἀρχή, government) properly denotes the governor of a province or district which was regarded as the fourth part of a larger province or kingdom, while the district itself was called a tetrarchy (τέτραρχία or τετραρχία). The earliest use of the word which seems to have been discovered is in connection with the division of Thessaly as originally constituted (Eurip. Acest. 1154; Strabo, ix, 5) and as reconstructed in the time of Philip of Macedon (Demosth. Phil. iii, 26), and of Galatia before its conquest by the Romans, B.C. 189. The first of these conquests, which then divided it into four parts, each of which was named a tetrarchy, and its ruler a tetrarch, subordinate to the tetrarch (a tetrarch, Hist. of Greece, vi, 13 sqq.). The second was divided into three sections, each of which was again subdivided into four smaller ones, to which and to their governors the same terms were applied (Fischer, Prologen p. 429, note); and these were ultimately fused into one τέτραρχη under Deiotarus, cir. B.C. 54 (Strabo, 666; Flutarch, De V. M. [ed. Wytte], vol. ii). In the later days of the Roman republic, and during the empire, the etymological meaning was almost entirely lost sight of, and it was applied, like "etharch", as a kind of "provincial" title. The petty tributaries, "the creatures of a proconsul's breath, and the puppets of his caprice" (Merviale, Hist. of the Rom. iv, 167), whose importance did not warrant their receiving the title of "king" (see Sallust, Catil. xx, 7; Cicero, Milo, xxviii, 76; Varro, xii, 29; Horace, Sat. i, 6, 12; Vell. Pat. ii, 54; Tacitus, Ann. xv, 20). It is in the secondary sense that in all probability the word is used in the New Test. of the tetrarchs of Syria, the heirs and successors of Herod the Great. Niebuhr (Hist. of Rome, i, 185) compares them to the zemadaros of Bengal after their recognition by lord Cornwallis (1791-98) as proprietors of the soil, and enjoying some amount of sovereign rights within the limits of their zemindary. The title of tetrarch was certainly given by Antony to Herod the Great in the early part of his career (B.C. 41) and his brother Phasael (Josephus, Ant. xiv, 38, 1), without reference to territorial limits; and it appears that the tetrarch spirit which Philip did actually receive a fourth part of their father's dominions, while Archelaus as "etharch" inherited half (ibid. xvii, 11, 4; War, ii, 6, 3), this correspondence of the name and the share may be considered accidental, or, at the furthest, the exact use of the tetrarch in the New Test. must be confined to Antipas and Philip.

In the New Test. we meet with the designation, either actually or in the form of its derivative τετραρχία, applied to three persons:

1. Herod Antipas (Matt. xiv, 1; Luke iii, 19, ix, 7; Acts xiii, 1), who is commonly distinguished as "Herod the tetrarch," although the title of "king" is also assigned to him both by Matthew (xiv, 9) and by Mark (vi, 14, 22 sq.). Luke, as might be expected, invariably adheres to the formal title which would be recognised by Genteel readers. This Herod is described by the last-mentioned evangelist (iii, 1) as "tetrarch of Galilee;" but his dominions, which were bequeathed to him by his father, Herod the Great, embraced the district of Perea beyond the Jordan (Josephus, Ant. xvii, 8, 1): this bequest was confirmed by Augustus (War, ii, 6, 3). After the disgrace and banishment of Antipas, his title was assumed by Aelius Gallus, the Roman governor of the kingdom of Herod Antipas (i Ant., xvii, 8, 1). See Herod Antipas.

2. Herod Philip (the son of Herod the Great and Cleopatra, not the husband of Herodias, who is said by Luke (iii, 1) to have been "tetrarch of Ituraea and of Philip, a region of the Decapolis," Josephus (Ant. xvii, 8, 1) says that his father bequeathed to him Gaulonitis, Trachonitis, and Panas (Ant. xvii, 8, 1), and that his father's bequest
was confirmed by Augustus, who assigned to him Bata-
nea, Trachonitis, and Auranitis, with certain parts about
Jannia belonging to the "house of Zeonodorus" (War-
i, ii, 6, 3). Accordingly, the territories of Philip extended
eastward from the Jordan to the wilderness, and from
the borders of Perea northward to Lebanon and the
neighborhood of Damascus. After the death of Philip
his tetarchcy was added to the province of Syria by Ti-
berius (Ant. xvii, 4, 6), and subsequently conferred by
Caligula on Herod Agrippa I, with the title of king (Ibid.
xviii, 6, 10). See HEROD AGRIPPA I; HEROD PHILIP I.

3. Lysanias, who is said (Luke iii, 1) to have been
"tetrarch of Abilene," a small district surrounding
the town of Abila, in the fertile valley of the Barada or
Chermon, east of Damascus and the mountain range of
Antilibanus. See ABILENE. There is some difficulty in
fixing the limits of this tetrarchy, and in
identifying the person of the tetrarch. See LYSANIAS.
We learn, however, from Josephus (Ant. xvii, 6, 10;
xiii, 5, 1) that a Lysanias had been tetrarch of Abila be-
fore the time of Caligula, who added this tetrarchy to
the dominions of Herod Agrippa I—an addition which
was confirmed by the emperor Claudius.

Tetralogy (τετραδίσταλον), a name given to the
periphery of the area or court bet-
ween the porch and the church
building ancient times.
This court was with-
out a doorway except that
each side had porticos or clo-
sisters, built upon columns. In the
porch or in the porticus
stood the first class of penitents to
beg the prayers of the faithful as they went into the church.

Tetzel, Johann, the no-
torious Dominican monk whose
abuses the Council of Con-
stance impelled Luther to take the first step
towards the Reformation, was
born and reared at Leip-
sic, where his father, Johann Tetz-
le, pursued the business of
goldsmith. In 1457 Tetzel received the degree of
bachelor of philosophy, having distinguished himself in the
examination above all the other competitors. He pos-
essed an imposing figure, a sonorous voice, and consid-
erable skill in dialectics and oratory, and was accord-
ingly selected to preach the indulgence connected with the
debt he had associated himself with the
Dominican fraternity in his native town, and had
displayed great zeal in his monastic duties. He en-
tered on the traffic in indulgences in 1502, and pro-
secuted it to his own great pecuniary advantage and
equal notoriety, making use of even blasphemies and
obscenities to enforce his appeals for money. Nor was
he more circumspect with regard to his conduct.
The drinking-rooms of taverns were favorite places of resort
in which to plea his trade; he permitted himself to com-
mit crimes of violence; and an adulterous connection
with the wife of a citizen led to his being sentenced to
death by drowning at Innsbruck. Having been par-
doned, and, after a time, liberated from imprisonment,
he resumed his traffic, and became, if possible, more bold
and shameless than before.

When pope Leo X appointed commissaries for the
sale of indulgences for the alleged purpose of obtaining
full indulgence for the faithful, he began to complain to St. Peter's
at Rome, Tetzel was made an under-commissary. He
held a special concession from the emperor for the pro-
secution of his business, and after a time obtained a papal
brief permitting him to sell indulgences everywhere in
Germany. To these advantages he added that of being
made in the emperor's favor, and thus was able to
issue letters of indulgence in his own name, having previously acted
as the agent of archbishop Albert of Mayence. He pro-
nounced absolitions for money, from the most heinous
crimes, without regard to repentance and with the as-
surance that the sinner might go directly to parad-
ey. His peculiarly impudent and frivolous bearing
shocked all who possessed intelligence, without at all
restraining his conduct, until he arrived on the borders of
Saxony. At this point of Tetzel's progress Luther
was made aware of the hurtful consequences of his op-
erations through the confessional, and at once demanded
the Dominican's business from the pulpit.
Tetzel replied, and Luther drew up the famous Ninety-five Theses,
which Tetzel, for his part, burned in the market-place of
Jitterbock. He then obtained the degree of licentiate
and doctor of theology from Frankfort-on-the-Oder, in or-
der to contrast Luther's new position, and also to enlist
the services of Wimpina, rector of that univer-
sity, in his cause. The latter drew up 106 theses
antagonistic to those of Luther, which were in turn
burned by the students at Wittenberg, and afterwards
fiilly additional theses, upon which Tetzel disputed in
January, 1518.

The dispute had in the meantime excited attention in
Rome, and aroused the conviction that more positive
measures must be employed to preserve the authority of the Church. The negotiations of Cajetan with Lu-
ther had failed, and the legate Miltitz was sent to Sax-
ony to negotiate the affair. Having arrived at Alten-
berg, the legate cited Tetzel to appear before him; but
the latter declined to obey, on the ground that the jour-
ney would involve his life in danger at the hands of
Luther's adherents. He appeared, however, on the re-
petted summons of the legate, after the latter had
reached Leipzig; and, having been found guilty of
immoralities and shameless conduct, was harshly repri-
manded and threatened with the anger of the pope and
expulsion from his order. He wished to flee to the
country in order to avoid the dangers which he now
saw to be threatening his peace, but sickened before he
could execute his purpose, and died in the Dominican
convent at Leipsic in July, 1519. Luther praised the
man in his wretchedness, and forwarded him a letter of
consolation. The statement that Tetzel died of the
plague is without support.

Text. The application of the word text to the
Word of God is derived from the Latin. From the sim-
ilarity between spinning and weaving, and the art of
composition, both in prose and verse, the Latin authors
applied to the latter several expressions proper to the
former. Horace says, "Text es deducere formam fili," and
Cicero: "Textus est animum te cere recte ornare et
contexere currere." Among later Roman writers, textus occurs in
the sense of a piece or composition: and, by ex-
cellence, came to denote the Word of God, just as the word
The meaning of the words text and gloss may be ascertained from the method of writing the Scriptures before the art of printing was invented. The following may be taken as a specimen:  

(Matt. vii, 23.)

Et tunc contebit illis quia non novit lux benedicta, non sapientia quae non sapienter, sed sapienter, sed no non esset. 

non novit lux benedicta, non sapientia quae non sapienter, sed sapienter, sed no non esset. 

non novit lux benedicta, non sapientia quae non sapienter, sed sapienter, sed no non esset. 

The sentences at the sides are the gloss; the middle, which is in larger type, is the text; and between the lines of that is put the *interlinear* gloss, in which place a translation, or version, in some ancient manuscripts in the Cottonian and other libraries, is sometimes inserted. The text here means the Word of God, as opposed to the gloss; and because the text was usually written in a large and strong hand, hence such writing was called *text-hand*. By gloss was generally meant a commentary or exposition taken out of the Latin fathers; but afterwards it came to signify any exposition or larger commentary. Hence our English phrase, *to put a gloss on anything*, that is, a favorable construction; *gloss*, a shining outside; and *to gloss*, to flatter.

**TEXT OF SCRIPTURE.** This term is used to signify a portion of the text; i.e., a short sentence of Scripture, used either as the groundwork of a discourse from the pulpit, or brought forward to support an argument or in proof of a position. The custom of taking a text for a sermon is probably coeval with that of preaching set discourses; and the use of texts as authority in doctrinal points is of the very essence of true theology, and was ever the custom even of those who, professing the name of Christians, denied the truth of Christ. One must therefore be on his guard against receiving everything for which a text is quoted, not accepting it as proof until its true sense is known; "otherwise, so many sentences, so many authorized falsehoods." In the application of a text we should always consider its meaning in the passage with which it is connected, else we may be putting forward as truth what is in fact but an authorized falsehood; we should also guard against the practice of taking a text from Scripture in a sense which, however fair and true, is not in the passage itself, as, for instance, "Hear the Church," employed as if it were a precept, in the imperative mood. The non-observance of the latter caution has a tendency to lead others to the neglect of the former.

**Textus** is a technical term for the book of the Gospels as used at the Christian sacrifice. Copies of the Gospels, richly illuminated, and bound in gold and silver, are often exposed on the high-altars of Continental churches. Sometimes they are kept in shrines, and only brought out for use in the mass at the highest and most important festivals. References to such exist in large numbers in early writers, and many remarkable examples are preserved in the sanctuaries on the Continent, two of which, at Aix-la-Chapelle and Mayence, are known to antiquaries. Numerous rich examples are reckoned up among the treasures of old St. Paul's in London, Lincoln Minster, and Salisbury Cathedral. That in the wood-cut at head of next column is from an early Flemish specimen.

**Textus Receptus** (i.e. the *received text*), a phrase generally employed by critics to denote the currently accepted text of the Greek Testament. This is usually considered to be that of the Elzevirs, especially the edition of 1638, the preface of which contains the expression "Editionem omnis accepit denuo doctorum oculis subjiciens," referring to the edition of which that was the common printed text, however, that of Stevens, usually Mace's edition.

Sometimes the phrase *textus receptus* is in like manner extended to the Masoretic text of the Hebrew Bible, especially Van der Hooght's edition, which has been reprinted by Hahn. See CRITICISM, BIBLICAL.

**Tescatilpoca** (Shining Mirror), the chief of the thirteen greater gods of the ancient Mexicans. On the monuments and in the paintings he is often represented as encircled by the disk of the sun. Lord Kingsborough (Antiquities of Mexico) states that "all the attributes and powers which were assigned to Jehovah by the Hebrews were also bestowed upon Tescatilpoca by the Mexicans." Mr. Hardwick, however, inclines to the belief that this deity was merely the deified impersonation of the generative powers of nature, and as such his highest type was the sun. A festival in his honor was held annually in May, when a young and beautiful person was sacrificed, and the heart of the victim, still warm and pulsating, was held up towards the sun, then thrown down before the image of the god, while the people bowed in adoration.

**Thaborium** (Ѳаβωριον or Μεραρθως, Festum Transfigurationis, s. Pateticum Christi), the Feast of the Transfiguration of Christ. It was exalted to a feast of universal observance by pope Calixtus III in 1457, the day assigned to it being August 6. The ancient Church had not altogether ignored, but none the less greatly neglected, its observance. The purpose of its modern revival was the commemoration, first, of the transfiguration of Christ, and, second, of the defeat of the Turaks at the siege of Belgrade in 1456. See Augusti, Christi, Archologie (Leips. 1820), iii, 292 sq.; Herzog, Real-Encyklop. a. v.

**Thacher, George, D.D., a Congregational minister, was born in Hartford, Conn., July 25, 1817. His early education was received at Hopkins Grammar School, Hartford. He was graduated from Yale College in 1840, and in the same year entered Yale Theological Seminary, where, after a full three years' course of study, he was regularly graduated in 1843. His first pastorate was at Derby, Conn., where he went in June, 1843; on Jan. 4, 1844, he was ordained, preaching until Oct. 10, 1848, when he was dismissed. He next received and accepted a call to Nantucket, Mass., where he was installed Nov. 14, 1848, and remained until May 14, 1859, when he was dismissed to the pastorate of the Alien Street Presbyterian Church, New York city, where he was installed May 28, 1859, and dismissed Oct. 9, 1854. He was then successively in-
Thacher, Peter (1), a Congregational minister, was born at Salem, Mass., in 1651, and was the son of Rev. Thomas Thacher, first pastor of the Old South Church, Boston. He graduated at Harvard College in 1671, and was tutor there for several years following. He then went to England to prepare himself more fully for his profession, but his friend Samuel Danforth dying shortly afterward, Mr. Thacher returned to America. He refused several tempting offers to enter the Established Church, and in September, in solemn ordination, was ordained pastor of the Church in Milton, Mass. He here labored effectively until a week before his death, which occurred Dec. 17, 1727. "He was a person of eminent sanctity, of a most courteous and complaisant behavior, cheerful, affable, humble, and free of speech to the meanest he met." He published several theological treatises and single sermons (1708-23), for a list of which see Sprague, Annals of the Amer. Pulpit, i, 196.

Thacher, Peter (2), a Congregational minister, the son of Thomas Thacher Jun., and grandson of Thomas Thacher, the first minister of the Old South Church, was born in Boston in 1677. He graduated at Harvard in 1696, and immediately after his graduation began to teach at Hatfield, and is supposed to have studied divinity under the Rev. William Williams of that place. On Nov. 26, 1707, he was ordained pastor of the Church at Weymouth, where he remained between eleven and twelve years. In January, 1720, he returned to Boston and was chosen pastor of the New North Church as colleague with Mr. Webb. Here he labored until his death, Feb. 26, 1738. Mr. Thacher published an Election Sermon (1726), and a Sermon on the Death of Mrs. Gre (1730). See Sprague, Annals of the Amer. Pulpit, i, 266.

Thacher, Peter (3), a Congregational minister, was born in 1688, and graduated at Harvard College in 1706. He was ordained pastor of the Church in Middle-ebrook, Mass., in 1709, and died there April 22, 1744. He published an account of the revival of religion in Middleborough, in Prince's Christian History. See Allibone, Dict. of Brit. and Amer. Authors, s.v.

Thacher, Peter (4), D.D., an eminent Congregational minister, was born at Milton, Mass., March 21, 1752. He graduated at Harvard College in 1769, and was ordained pastor Sept. 19, 1770, at Malden, Mass., from which charge he was dismissed to allow his acceptance of a call from Brattle Street Church, Boston, Dec. 8, 1784. He entered upon his new charge Jan. 12, 1785, serving until his death in Savannah Dec. 16, 1802. He was an active member of the convention which met in Boston in 1780 to frame a state constitution, and opposed the retention of the governor's office. The University of Edin-burgh made him D.D. in 1791. He published, An Oration against Standing Armies (1776);—Three Sermons in Proof of the Eternity of Future Punishments (1782);—Observations on the State of the Clergy in New England, with Sermons upon the Power of Dismissing them Unsurpassed by some Churches (1785);—A Reply to Strictures upon Dr. Rockey (1798);—Memoirs of Dr. Boggs (1789);—An essay on several occasions. See Sprague, Annals of the Amer. Pulpit, i, 718.

Thacher, Samuel Cooper, a Unitarian preacher and son of Peter (4), was born in Boston, Mass., in 1785. He graduated at Harvard College in 1804, and immediately after his graduation commenced his theological studies under the direction of Rev. William E. Channing. In the year 1806 Mr. Thacher took charge of the Boston Latin Grammar School, and in the summer of 1806 was chosen to be the travelling companion of Rev. Mr. Buckminster. Returning in September, 1807, he was shortly after appointed librarian of Harvard College, and entered on his duties in 1808. He prosecuted his theological studies at Cambridge, and succeeded Dr. Kirkland as pastor of the New South Church, May 15, 1811, retaining this connection until his death, at Moulins, France, Jan. 2, 1818. His principal publications were, Apology for Rational and Evangelical Christianity, a discourse (Bost. 1815, 8vo);—Unity of God, a sermon (Liverpool, 1816, 8vo);—2d Amer. ed. Worcester, 1817, 8vo;—Reasons, with an Address to Rev. F. W. P. Greenwood (Bost. 1824, 8vo);—Evidence Neces-sary to Establish the Doctrine of the Trinity (1828, 12mo). See Allibone, Dict. of Brit. and Amer. Authors, s.v.; Sprague, Annals of the Amer. Pulpit, vili, 485 sq.

Thacher, Thomas, a Congregational minister, was born at Salisbury, England, May 1, 1620. He declined his father's offer to send him to an English university, preferring to emigrate to America. On June 4, 1635, he arrived at Boston, Mass., and soon after entered the family of the Rev. Charles Chauntry, of Scituate. He was ordained pastor of the Weymouth Church, Jan. 2, 1644, where he labored for more than twenty years. He then removed to Boston, where he preached occasionally, but was principally engaged in the practice of medicine, till he was chosen first pastor of the Third (Old South) Church. His installation took place Feb. 16, 1669, and after a happy ministry he died Oct. 15, 1678. He wrote, A Brief Rule to Guide the Common People of New England how to Order Themselves and Theirs in the Small Pocks or Measles (Bost. 1677; 2d ed. 1709), said to be the first medical tract published in New England.—A Fast of God's Chasing a sermon (1674, 4to; 1678). See Sprague, Annals of the Amer. Pulpit, i, 126.

Thacher, Tyler, a Congregational minister, was born at Princeton, Mass., Sept. 11, 1758. His ancestors for several generations, both on his father's and mother's side, in England, had been Puritan ministers, some of them of high distinction. Among them were Rev. Peter Thacher, of Salisbury, England; Rev. Thomas Thacher, of Boston, Mass.; Rev. Peter Thacher, of Milton, Mass.; and Rev. Peter Thacher, of Attleborough, Mass. In all not less than nine generations of the family have had representatives in the Christian ministry either in England or in America. The subject of this sketch was a graduate of Brown University in the class of 1824, and was licensed to preach April 26, 1825, and ordained as a pastor in Wrentham, Waltham, Mass., Dec. 4, 1827. He did not permanently settle in the ministry until May 14, 1834, when he became colleague pastor with Rev. Jonathan Grant over the Congregational Church at Hawley, Mass., where he remained about nine years (1834-43) and then returned to Wrentham. For several years he was editor of the Wrentham Miscellany, until he moved to California in 1851. Here he remained the rest of his life, teaching and preaching, and engaged in such employments as suited his tastes. "He was distinguished among his brethren for his theological and literary attainments, and even in the wilderness where he made his home he kept up his studies in the Hebrew and Greek languages and in philosophy. He was a man of quiet, scholarly, and devout habits, and much given to the study of nature and the prob-
Thachers, Washington, a Presbyterian minister, was born at Attleborough, Mass., Feb. 25, 1794. He received his classical education under Dr. Lyman Richardson; studied theology under the Rev. John Truair; was licensed to preach by the Otego Presbytery in 1821; was ordained in 1822; officiated as stated supply at Morrisville, N.Y., 1822-26; was pastor of the Church in Jordan, N. Y., 1826-42; resigned his charge on account of ill-health; afterwards a stated supply at Eaton, N. Y., three years; was appointed secretary and agent of the Central Agency of the American Home Missionary Society in July, 1847; and died June 29, 1860. He was an eminently devout man and an earnest and effective preacher.

Thaddei Acta. The mission of Thaddeus to king Abgar of Edessa, the correspondence between Christ and Abgar, and the picture of Christ which purports to have been taken for Abgar are very old traditions, first mentioned by Eusebius, Hist. Eccles. i, 13. Whether these Acta formed the basis for these traditions cannot be decided. Tischendorf has published the Greek text of the Thaddeus Apocrypha in his Apokryphorum Apocryphal (Lips. 1851), p. 261-265. (B. P.)

Thaddei Evangelium, mentioned in the Decret. Galasii de Libris Apocryphis (in Jus Canonicum, xv, 3). Unless there is an erroneous reading, it is for Matthew, it would either belong to the apostle Judas Thaddaeus or to a Judas belonging to the seventy whom Thomas sent to Edessa to king Abgar (Eusebius, Hist. Eccles. i, 18; see Fabricius, Codex Apocryphus, 1, 396, 379). But tradition does not determine whether Thaddeus who was sent to Abgar belonged to the twelve or the seventy, on which point Eusebius and Jerome disagree. See Eusebius, Hist. Eccles. (ed. Reading), p. 38, note 12.

On the correspondence between Abgar and Jesus, see especially Hofmann, Leben Jesu nach den Apokryphen (Leips. 1851), p. 307 sq. (B. P.)

Thaddeos (Θαδεός; Vulg. Thaddeus), a name in Mark's catalogue of the twelve apostles (i, 18) in the great majority of MSS. In Matthew's catalogue (x, 5) the corresponding place is assigned to Thaddaeus by the Vulgate (B), the Vat. (X), and to Θαδαθίαος by the Codex Bezae (D); with the received text, following the first correction of the Codex Ephaeremi (C) — where the original reading is doubtful — as well as many fragmentary uncials and several cursive MSS., reads Θαδαθίαος ἐκ Ἰωσηφίου Θαδαθίαος. We are probably to infer that Θαδαθίαος alone is the original reading; for both Matt. x, 3, and Θαδαθίαος of Mark iii, 18 (so Tischendorf; but Tregelles has Θαδαθίαος in both passages). By these two evangelists the tenth place among the apostles is given to Lebbaeus or Thaddeus, the eleventh place being given to Simon the Cananaite. Luke, in both his catalogues (vi, 15; Acts i, 13), places Simon Zelotes tenth among the apostles, and assigns the eleventh place to 'Ἰωσηφίων Θαδαθίαος. As the other names recorded by Luke are identical with those which appear (though in a different order) in the first two gospels, it seems scarcely possible to doubt that the names of Judas, Lebbaeus, and Thaddeus were borne by one and the same person. See Lebbaeus; Thaddei Acta et Evangelium.

Tham'nah (Heb. Te'manah, תמנת, in pause Ta'mach, תמאכ, laurel [Genesis], or combat [Firsts]); Sept. ësìq; Vulg. Themata, one of the Nethinim whose "children" returned from Babylon with Zerubbabel (Ezra ii, 53; "Tamah," Neh. vii, 55). B.C. ante 538.

Tham'zar (Matt. i, 3). See TAMAR.

Thamer, Theobald, a theological agitator in the time of the Reformation in Germany. He was a native of Rosheim, in Alsace, and studied at Wittenberg under Luther and Melanchthon, taking the degree of master in 1539. He had been supported while a student by the landgrave Philip of Hesse, who wished to train the youth for service in his employment; and after a time spent as professor of theology at Frankfort-on-the-Oder, Thamer responded to the landgrave's call and became professor and preacher at Marburg. To the chagrin of his father, he showed himself to be a great Lutheranism, whose influence was directly opposed to the compromises which Philip hoped to bring about between the contending evangelical factions. In the Smalcald war Thamer served in the field as a chaplain. He there saw reason to lose faith in the cause of the Reformation, and discover the world from the troubles of the situation in the Lutheran doctrine of justification; and on his return to Marburg he assailed that doctrine in the pulpit and the lecture-room. He emphasized the ethical side of Christianity, and separated the doctrinal side, thus gradually coming to occupy rationalistic ground. The government dealt with him mildly, at first transferring him to Cassel, and
THAMNATHA 300  THANKSGIVING-DAY

then entering into extended negotiations with him; but as he persisted in disturbing the peace of the Church, he was dismissed from all his offices Aug. 15, 1549. He secured a position as preacher at Frankfort-on-the-Main, whence he continued to asperse the Lutheran doctrines, until he exhausted the patience of his new patrons. He then turned to the landgrave with the request of a private audience, and he actually visited Melanthon, Gresser, Schneipf, and Bollinger. No settlement was reached in their discussions, however, and Thamer was dismissed from the dominions of Hesse. He went to Italy and in 1557 entered the Romish Church. In time he was made papal legate and bishop of Freiburg in 1569. See Neander, Theolcal Theism, etc. (Berl. 1842); id., Hist. of Doctr. p. 681; Pestalozzi, Bollinger, p. 461 sq.; Schenkel, Wessal.Protctaetismus, l, 144 sq.; Hochhuth, De Th. Thamm. Vita et Scripta (Mart. 1868), and the article in Niedere Zeitschrift, etc., Theodore, 1861, No. 2—Hermeng., Encycl. k. v.  

Tham'natha (tôm'ávav'dl; Vulg. Thomameth), one of the cities of Judah fortified by Baccachus after he had driven the Maccabees over the Jordan (1 Macc. ix. 50); no doubt an ancient Timmatis, possibly the present Tibneh, half-way between Jerusalem and the Mediterranean. Whether the name should be joined to Pharamthom, which follows it, or whether it should be independent, is a matter of doubt. See Pharamathom.  

Thane, Daniel, a Presbyterian minister, was born in Scotland, and received his classical education at Aberdeen. After coming to America, he entered the Princeton Theological Seminary, from which he graduated in 1748. He was ordained by the New York Presbytery and installed pastor at Connecticut Farms, N. J., Aug. 29, 1756. In 1754 he was sent by the Synod of New York to the Anglican and Presbyterian ministers, and he also received the appointment as a missionary to the Virginia and Carolina Indians. Royse, in his History of South Carolina, says that he preached on the fork of Broad and Saluda rivers, where there were only six families. These were driven away by the Indians between the years 1756 and 1763, but they returned and set up congregations, served in after-times by Dr. Joseph Alexander and others. In 1800 there was a flourishing congregation, with a meeting-house on the spot where Thane preached, in 1754, under a tree. He was dismissed in 1757, and left at liberty to join the Presbytery of New Castle or Lewes. He was settled in the united congregations of New Castle and Christina Bridge, where he remained until 1768, when the pastoral relation was dissolved. He died soon after. Dr. Hosaick, in his Memoir of Dr. Wet Clinton, says that this eminent man was under Thane's tuition, and that he was minister of New Windsor, N. Y. (W. P. S.)  

Thank-offering  

Thank-offering (תַּחַן עֹלָה, Lev. xxii, 29; or briefly, תַּחַן, 2 Chron. xxxix, 3; Ps. lvi, 13; Jer. xxvi, 26; literally praise or thanksgiving, as often rendered), a variety of the peace-offering (hence the full expression תַּחַן עֹלָה וְגָבֹהַת, etc.), Lev. vii, 18, 15), the other two being the voluntary and the customary offering (תַּחַן עֹלָה וְקָדָשָׁה), and the ordinary frank-offering (תַּחַן עֹלָה). As its name implies, it was a bloody or animal sacrifice, and its specific character was the praise which it embodied towards God. Like all the other divisions of the peace-offering, it was entirely voluntary, being placed in the light of a privilege rather than a duty. It is intimately associated with the "meat-offering" (q. v.).  

The nature of the victim was left to the sacrificer; it might be male or female, of the flock or of the herd; provided that it was unblemished; the hand of the sacrificer was laid on its head, the fat burned, and the blood sprinkled as in the burning-offering; of the flesh, the breast and right shoulder (the former of which the offerer was to have and the latter to wear) were given to the priest; the rest belonged to the sacrifice as a sacrificial feast (1 Cor. x. 18); to be eaten on the day of sacrifice or on the next day (Lev. vii, 11-18, 29-34), except in the case of the firstlings, which belonged to the priest alone (xxii, 20). The eating of the flesh of the meat-offering was considered a partaking of the "table of the Lord;" and on solemn occasions, as at the dedication of the Tabernacle, at the Passover at Jerusalem, on an enormous scale, and became a great national feast, especially at periods of unusual solemnity or rejoicing; as at the first inauguration of the covenant (Exod. xxiv, 5), at the first consecration of Aaron and of the tabernacle (Lev. ix, 18), at the solemn reading of the Mosaic Law in the Temple (Josh. viii, 31), at the accession of Saul (1 Sam. xi, 15), at the bringing of the ark to Mount Zion by David (2 Sam. vi, 17), at the consecration of the Temple, and thence every year afterwards, by Solomon (1 Kings viii, 62; ix, 25), and at the great Passover of Hezekiah (2 Chron. xxxv, 22). In two cases only (Judg. xx, 26; 2 Sam. xxiv, 26) are these or any other kind of peace-offering mentioned as offered with burnt-offerings at a time of national sorrow and fasting. Here their force seems to have been prerogatory rather than eucharistic. The key to the understanding of this is furnished by Hengstenberg: "To give thanks for grace already received is a refined way of begging for more." As prayer is founded on the divine promise, it "may be expressed in the way of anticipated thanks."  

Among thank-offerings, in the most extensive sense, might be reckoned the presentation of the first-born (Exod. xiii, 12, 19); the first-fruits, including the fruit of all manner of trees, honey, oil, and new wine (Exod. xxii, 10-13; Num. xxi, 12; 1 Chron. ix, 29; Neh. x, 37; 2 Chron. xxxii, 5); the second tithe (Deut. xii, 17; xiv, 23); and the lamb of the Passover (Exod. xii, 3-17). Leaven and honey were excluded from all offerings made by fire (Lev. ii, 11); and salt was required in all offerings (Lev. ii, 13; Col. i, 2; 2 Pet. ii, 1). The Hebrews were forbidden to offer anything vile and contemptible (Deut. xxii, 18; Mal. i, 7, 8). See PEACE-OFFERING.  

Thanksgiving, the act of giving thanks or expressing gratitude for favors or mercy received. It implies, according to Dr. Barrow (Sermons, i, ser. 8, 9), (1) a right apprehension of the benefits conferred; (2) a faithful return of benefits in the memory and in the acts of election upon them; (3) a due esteem and valuation of benefits; (4) a reception of those benefits with a willing mind, a vehement affection; (5) due acknowledgment of our obligations; (6) endeavors of real compensation, or, as it respects the Divine Being, a willingness to serve and exalt him; (7) esteem, veneration, and love of the benefactor.  

The blessings for which we should be thankful are: (1) temporal, such as health, food, raiment, rest, etc.; (2) spiritual, such as the Bible, ordinances, the Gospel and its blessings, as free grace, adoption, pardon, justification, calling, etc.; (3) eternal, the redemption and the imputation of God in a future state; (4) also for all that is past, what we now enjoy, and what is promised; for private and public, for ordinary and extraordinary blessings; for prosperity, and even adversity, so far as rendered subservient to our good.  

The obligation to this duty arises: (1) from the relation we stand in to God; (2) the divine command; (3) the promises God has made; (4) the example of all good men; (5) our unworthiness of the blessings we receive; (6) the prospect of eternal glory. Whoever possesses any good without giving thanks for it deprives him who bequests that good of his glory, sets a bad example before others, and prepares a recolection severely painful for himself when he comes in his turn to experience ingratitude. See Chalmers, Sermons; Hall, Sermons; Dwight, Theology.  

Thanksgiving-day, an annual religious festival observed in the United States. It owes its origin to
THANKSGIVING SERVICE

THAYER

The desire of the Puritans for greater simplicity in the forms of worship of the Established Church, and a purpose not to celebrate any of the numerous festival-days observed by that Church. An occasional day of thanksgiving has been recommended by the civil authorities of the Colonies. In England, a day was observed in 1571, by order of Queen Elizabeth, in Holland, Oct. 3, 1575, the first anniversary of the deliverance of that city from siege. Before the adoption of an annual thanksgiving-day, we find mention of several appointed for special reasons. After the first harvest at Plymouth, in 1621, Gov. Bradford sent four men out forty miles to look for the Indians, who had “afterward made an unexpected rejoicing together.” In July, 1623, the governor appointed a day of thanksgiving for rain, after a long drought, and the records show a similar appointment in 1632 because of the arrival of supplies from Ireland. There is also record of the appointment of days of thanksgiving in Massachusetts in 1623, 1633, 1634, 1637, 1638, and 1639, and in Plymouth in 1651, 1668, 1680 (when the form of the recommendation indicates that it had become an annual custom), 1689, and 1690. The Dutch governors of New Netherland in 1644, 1645, 1655, and 1684, and the English governors of New York in 1720, 1726, and 1746, appointed days of thanksgiving. During the Revolution, Thanksgiving-day was observed by the nation, being annually recommended by Congress; but there was no national appointment between the general thanksgiving for peace in 1784 and 1789, when President Washington recommended a day of thanksgiving for the adoption of the constitution. Since that time, special days have been set apart both by presidents and governors until 1864, when the present practice was adopted of a national annual thanksgiving. The president issues an annual proclamation, followed by the governors of the several states and mayors of the principal cities. Congress has fixed the time for the last Thursday in November.

Thanksgiving Service. There are various modes under the Old Test. of offering thanksgiving. Sometimes it was public, sometimes in the family. It was frequently accompanied by sacrifices (2 Chron. xxix, 31) and peace-offerings, or offerings of pure devotion, arising from the sentiments of gratitude in the offerer’s own mind (Lev. vii. 12, 13; Ps. civii. 23; cxvi. 7). It is usually connected with praise, joy, gladness, and the voice of melody (Isa. ii. 3), or (as Neh. xi. 17) with singing and with honor (Rev. vii. 12); but occasionally, if not generally, with supplication (Phil. iv. 6) and prayer (1 Tim. ii. 3; Neh. xi. 17).

In the Commonwealth Prayer Book, there are various forms of thanksgiving, particular and general, as especially the “General Thanksgiving,” which was added at the last revision, and appointed for daily use, and more particularly the “Office for the Holy Communion.” But there are, besides, particular thanksgivings appointed for deliverance from drought, rain, famine, war, tumult, and pestilence; and there is an entire service of thanksgiving for women after childbirth; and certain days on which are commemorated great deliverances of the Church and nation are marked also with a solemn service of thanksgiving.

Thanner, Ignaz, a Roman Catholic divine, was born Feb. 9, 1770, at Neumarkt, in Bavaria. In 1802 he was appointed professor of catechetics at Salzburg; in 1805 professor of philosophy at Ingolstadt; in 1808 he was called to Innspruck, and in 1810 to Salzburg again, where he died, May 28, 1856. At first he belonged to the Kauthian philosophical school, but soon became converted to that of Schelling. He wrote, Der Transcendentaleismus, v. d. kathol. Steigerung (Munich, 1803)—Die Idee des Organismus (1803). Handbuch der Vorbereitung zum selbständigen wissenschaftlichen Studium (ibid. 1807, 2 vols.):—Darstellung der absoluten Identität der Lehre (ibid. 1810):—Logische Aphorismen (Salzburg, 1811):—Lehr- und Handbuch der theoretischen und praktischen Philosophie (ibid. 1811, 2 rolls).—Wissenschaftliche Aphorismen der kathol. Dogmatik (ibid. 1816). See Winer, Handb. der theolog. Literatur, i. 306; ii. 800; Regensburger Real-Encyklop. s. v. (B. P.)

Thara (Vulg. Thara, for the Greek Thaia), a corrupt form found in the Apocryphal addition to the book of Esther (xii. 1) for Teras (qv. v.)

Thasarib, a less exact form of Anglicizing the word piathas (qv.), applied in the A. V. to (a) the place (1 Kings x. 22; xxii. 48) and (b) the man (1 Chron. vi. 10).

Thasai (Thasai, Thassai; Vulg. Thasi, Thassii), the surname of Simon the son of Mattathias (1 Macc. ii. 8). The derivation of the word is uncertain. Michaelis suggests Θασός (Chal.}, “the fresh grass springs up,” i.e. “the spring is come,” in reference to the tranquillity first secured during the supremacy of Simon (1 Macc., Comment, ad loc.). The surnames of persons living in Thasos (Realeb. s. v. “Simon”) suggests a connection with Θασός, or Thassos (ad loc.) seems to have done before him. In Josephus (Ant. xii. 6, 1) the surname is written Θασι, v. r. Θασί, Θασίς. See MACCABEES.

Thaumatopoai (Σαυματοποιοι), a term applied by the early Greek writers to those who pretended to work miracles by the power of magic, such as James the son of Jambres, and Joses the Just, who are mentioned in the New Testament. See Bingham, Christ. Antiq. bk. xvi, ch. v, § 7.

Thaumaturgy. See MIRACLES, ECCLESIASTICAL.

Thaxter, Joseph, a Unitarian minister, was born at Hingham, Mass., April 23, 1742. He graduated at Harvard College in 1768, expecting to enter the medical profession, but, deciding upon the ministry, he studied theology under Dr. Gray, and began to preach in 1771. On Jan. 20, 1776, he married Williamwoman of the church (Realeb. s. v. “Simon”) suggests a connection with Θασός, or Thassos (ad loc.) seems to have done before him. In Josephus (Ant. xii. 6, 1) the surname is written Θασι, v. r. Θασί, Θασίς. See MACCABEES.

Thayer, Elihu, D.D., a Congregational preacher, was born at Braintree, Mass., March 29, 1747. He was, at a child, a member of his study, and read the Bible through three times at the age of seven years. He entered Princeton College, one year in advance, in 1766, and graduated in 1769. His theological studies were prosecuted partly under Rev. John Searle, Stoneham, and partly under Rev. Mr. Weld, Braintree. Licensed for preaching, he supplied for nearly a year the church in Newburyport. He was then (Dec. 18, 1776) set apart to take the pastoral care of the Church in Kingston, N. H. He was chosen president of the New Hampshire Missionary Society in 1801, and continued to hold the office till 1811. He died April 3, 1812. A volume of his Sermons was published after his death (1813, 8vo). See Sprague, Annals of the Amer. Pulpit. vi, 88.

Thayer, Nathaniel, D.D., a Unitarian minister, was born at Hampton, N. H., July 11, 1769, studied at the Phillips Academy, Exeter, and graduated from Harvard College in 1789. He immediately took charge of the grammar-school in Meiford, and at the same time commenced the study of theology under Dr. Ogsood. At the end of a year he returned to Cambridge, and continued to study under Dr. Tappan, divinity professor in the college. He held the position of tutor in college for about a year, and, being licensed to preach, spent the greater part of a year at Wilkesbarre, Pa., supplying a congregation there. On his return to Mas-
Theandric Operation (Θεανδρική ινάρισμα), a theological term first used in the 7th century, and intended to express that unity of operation in the two natures and the two wills of our Lord Jesus Christ by which they act as the nature and will of one invisible Person, God and man. It was called a novel term by the Council of Lateran (A.D. 649), and discouraged as such in its 16th canon, which speaks of the "heretics" who had introduced it (τινὶ ἐπὶ ἀιώνι Ἐθανδρικῆς καταγγείλειας), which makes it seem likely that it has been used by some of the Monothelite sect in justification of their principles. John Damascene (De Orthodox. Fide, ch. lvii) thus explains the term: "The Theandric operation, then, signifies this, that when God became man both his human operation was divine, that is, deified, and not void of participation in his divine operation, and his divine operation was not void of participation in his human operation, but either is contemplated in connection with the other. And this manner is styled 'periphrasis' when a person embraces any two things by one expression; for as we call the divided cauterizing and the inflamed incision of a heated knife the same thing, but call the incision one operation and the cauterizing another—calling them operations of different natures, the cauterizing of fire and the incision of iron—so, also, speaking of one Theandric operation of Christ, we understand of the two natures to be two—the divine that of his divinity, and the human that of his humanity."

Theatines, an order of regular clergy in the Church of Rome, which was founded in the beginning of the 16th century for the purpose of defeating the efforts towards a reformation outside the Church by reorganizing the clergy, enforcing discipline in the convents, restoring an apostolical simplicity of life, and infusing a religious spirit into the Church by means of the public worship and the sermon. The order was founded by Cajetan of Thiene (thence called Order of the Cajetans), bishop John Peter Caraffa of Theate, subsequently pope Paul IV, who was usually called Chieti (hence Chietines and Paulines) and Boniface of Colle. It was confirmed by Clement VII in 1524 (June 24). Caraffa was its first superior, and his bishopric gave the order its name. The members renounced all worldly possessions, and refused either to labor or beg, depending, instead, on gifts which Providence should confer on them. Their number was never very considerable; but as they were chiefly composed of laymen and used the habit, their reputation of piety was great, and they acquired houses in many cities of Italy, Spain, Poland, and Bavaria. Mazarin conferred on it, in 1644, the only establishment it has been able to secure in France. It attempted missions in Tartary, Georgia, and Circassia, which have been unproductive of results. The church in Rome is the usual church of the order of the regular clergy, with the addition of white stockings. See

Caracciolo, De Vita Pauli IV; id. Cajetani Thienei, Bonfacii a Colle...cum Paulo IV...Ord. Clericorum Regul., Fundament Bus (Col. Ubiorem, 1612); Mirei Reguli et Constitutionem Clericorum in Cong. Viennenses (inedit. 1688).

Two congregations of Sisters are attached to the Order of Theatines, both of which were founded by the hermit-virgin Ursula Benincasa. She was aided by the Spanish priest Gregory of Navarre, and recommended by Philip Neri, founder of the Oratorians (q.v.). The rule given to the congregation founded by her in 1583 bound the nuns by the three simple vows (to a common life of poverty, afeccion, and humility), permitted secular employments, etc., and enforced mortifications of the body. Their number was fixed at sixty-six, because the Virgin Mary was said to have attained the age of so many years. Ursula prophesied a world-wide extension of her order, but it was able to obtain only a single house in Palermo. It was attached to the Theatines by pope Gregory XV.

The second congregation was founded in 1610 at Naples. Its members were to be thirty-six in number in each convent, and they were governed by a more rigid rule than the former class. Complete separation from the world and its affairs was enforced, severe penances and mortifications imposed, and stringent vows exacted. A novitiate of two years was required before entering the order. This congregation secured but one additional house, also in Palermo. Clement IX united the sisterhood with the Theatines. Its garb consists of a white robe, black girdle, blue scapulary and mantle, and black veil for the head and neck (see Helyot, Ausfahrts. Gesch. aller geistl. u. weltl. Kloster- u. Ritter-Ordens [Leips. 1758-56], iv, 103 sq.);—Herzog, Real-Encykl. s. v.

Theatre (Στάδων). The Greek term, like the corresponding English one, denotes the place where dramatic performances are exhibited, and also the scene itself, or spectacle, which is witnessed there. 1. It occurs in the first or local sense in Acts xix, 29, where it is said that the multitude at Ephesus rushed to the theatre, at the occasion of the excitement stirred up against Paul and his associates by Demetrius, in order to consider
what should be done in reference to the charges against them. It may be remarked also (although the word does not occur in the original text or in our English version) that it was in the theatre at Cæsarea that Herod Agrippa I gave audience to the Tyrian deputies, and was himself struck with death, because he heard so gladly the impassioned acclamations of the people (Acts xii, 21–23). See the remarkable confirmatory account of this event in Josephus (Ant. xix, 8, 2). Such a use of the theatre for public assemblies and the transaction of public business, though it was hardly known among the Romans, was a common practice among the Greeks. Thus Valer. Max. ii, 2, "Legati in theatrum, ut est consuetudo Graecie, introducti?" Justin, xxii, 2, "Veluti reipublicae statum formatur in theatrum ad continentem vocari jussit;" Corn. Nep. Timol. 4, § 2, "Venibat in theatrum, cum ibi concilium plebis habeatur." 2. The other sense of the term "theatre" occurs in 1 Cor. iv, 9, where the Common Version renders, "God hath set forth us the apostles last, as it were appointed to death; for we are made (rather, were made, diátpoiv εγνώσαμεν) a spectacle unto the world, and to angels, and to men." Instead of "spectacle" (so also Wycliffe and the Rhemish translators after the Vulgate), some might prefer the more energetic Saxon "gazing-stock," as in Tyndale, Cranmer, and the Geneva version. But the latter would be now inappropriate, if it includes the idea of scorn or exultation, since the angels look down upon the sufferings of the martyrs with a very different interest. Whether "theatre" denotes more here than to be an object of earnest attention (σταματον), or refers at the same time to the theatre as the place where criminals were sometimes brought forward for punishment, is not agreed among interpreters. In Heb. xii, 1, where the writer speaks of our having around us "so great a cloud of witnesses" (τοσοὶτων ἡμῶν παρακολουθεῖν ταῖς κατοικίας ἡμῶν), he has in mind, no doubt, the agonistic scene, in which Christians are viewed as running a race, and not the theatre or stage where the eyes of the spectators are fixed on them.

Among the Greeks and the states of Greek origin, the theatre—the proper appropriation of which was for the celebration of the public games—was also used as the place of assembly for every kind of public business; and served for town-hall, senate-house, forum, etc., and harangues to the people were there delivered. Indeed, all important public business was transacted in these places—war was declared, peace proclaimed, and criminals were executed. Antiochus Epiphanes introduced public shows and games in Syria (2 Macc. iv, 10–16); and in a later age theatres and amphitheatres were erected by the Herods in Jerusalem and other towns of Syria (Josephus, Ant. xxv, 8, 1; xvi, 6, 1; xix, 7, 9; Warr. i, 21, 8), in which magnificent spectacles were exhibited, principally in honor of the Roman emperors. The remains of one of these near Cæsarea are still clearly traceable (Thomson, Land and Book ii, 237). For the history and construction of such buildings in that day, see Smith, Dict. of Class. Antiq. s. v. Wettstein well observes that the very situation of the theatre at Ephesus would not a little promote and increase the tumult in the case of Paul, since, as we find from the accounts of those who have surveyed the situation of the Temple of Diana, it was within view of the theatre. See Ephes. The shell of this theatre remains unmistakably to be recognised on Mount Piatr, though the marble seats have been removed. Its ruins are described by Fellows (Asia Minor, p. 274) as "a wreck of immense grandeur," and it is said to be the largest of any that have come down to us from ancient days. See Lewin, St. Paul, ii, 328; Wood, Discoveries in Ephesus (Lond. 1877), ch. iv.

THEATRE AND THE CHURCH. The writers of the early Church were very severe in their invectives against all frequencers of the theatre and public stage-plays, and such frequencers were excluded from the

Ruins of the Theatre at Ephesus.
THEATRE AND THE CHURCH 304

THEBES (THEBES, or DIOCEPS MAGNA) was the Greek name of a city of Egypt, and its capital during the empire, called in the Bible No-amon ( נע אמון; Sept. μυρίς Αμών; Nabh. iii, 8) or No (Νό; Sept. Διοίκησις; Jer. xvi, 29; Ezek. xxxi, 14, 15, 16), famous in all ancient history.

I. Name.—The ancient Egyptian names of Thebes are, as usual, two. The civil name, perhaps the more ancient of the two, is Ap-set, Ap-setu (Brugnach, Geographische Inscriften, i, 177, pl. xxxvii, No. 781-784). Hence the Copite text, which shows that the fem. article τει was in this case transferred in pronunciation, and explains the origin of the classical forms, Ἰσραήλ, Ἰσραήλ, Theba, Thèbes (see Wilkinson, Modern Egypt and Thebes, i, 136, 137). The religious name of the town, perhaps Pur-Amen (Brugnach, Geographische Inscriften, i, 177, No. 780), the "house of Amen," or Jupiter-Ammon, preserved in the Copite ptolemae, and Xu-Amen, the "city of Amen," the sound of the first part of which has been discovered by M. Chaubas, who reads No-Amen (Recherches sur le Noue Egypte, de Thèbes, p. 8). The latter form of the sacred name is transcribed in the Hebrew No-Amon, and it is easy to understand the use of its first part Xu, "the city," instead of the whole, at a time when Thebes was still the most important city of Egypt. This sacred name of Thebes, "the abode of Amen," the Greeks would express, perhaps, especially with the addition the Great (ἡ μεγάλη), denoting that this was the chief seat of Jupiter-Ammon, and distinguishing it from Diodopis the Less (ἡ μικρή). Of the twenty nomes, or districts, into which Upper Egypt was divided, the fourth in order, proceeding northward from Naga, was designated in the hieroglyphics as Zām—the Pharaohite of the Greeks—and Thebes appears as the "Zām-city," the principal city or metropolis of the Zām nome. In later times the name Zām was applied in common speech to a particular locality on the western side of Thebes.

II. Position. The situation of Thebes, with reference to the rest of Egypt well suited it to be the capital of the country. Though farther from the Mediterranean and Syria than Memphis, it was more secure from invasion; and if it was far from the northern trade, it commanded the chief line of commerce from the Red Sea. The actual site itself, perhaps, too, was the best of those on the road to the delta, and yet not far from the lake and the Nile. The situation of Thebes lends itself naturally to a church, a three-tiered hill rising to a fine peak about 1200 feet high, unlike the level cliff-like form of the opposite range, a form seldom varied on either bank throughout the whole valley. The plain between is about two miles long, and has an extreme breadth of about four miles, no large space for a great capital except in Egypt. Throughout the centre of this plain flows the river Nile, usually at this point about half a mile in width, but at the inundation overflowing the plain, especially upon the western bank, for a breadth of two or more miles.

The monuments do not arrest the attention of the traveller as he sails up the river as do the pyramids of Memphis. On the east the massive fort-like winged portal of El-Karnak and the colonnade of El-Ukser (Lexus), and on the west the hills honeycombed with sepulchral grottos, are the most remarkable objects to be seen, but, being far apart, they are singly seen from the river. If viewed from the western mountain, the many monuments and monuments of the ancient city, the greatest in the world for magnificence.

III. History. 1. Classical.—The origin of the city is lost in antiquity. Niebuhr is of opinion that Thebes was much older than Memphis, and that after the centre of Egypt was transplanted to Egypt, Memphis acquired its greatness through the ruin of
THEBES (Lectures on Ancient History, lect. vii). Other authorities assign priority to Memphis. But both cities date from the earliest period of Egyptian history. The first allusion to Thebes in classical literature is the familiar passage of the **Iliad** (ix, 381-385):  
"Egyptian Thebes, where are vast treasures laid up in the houses; where are a hundred gates, and from each two hundred men go forth with horses and chariots." Homer—speaking with a poet's license, and not with the accuracy of a statistician—no doubt incorporated into his verse the glowing accounts of the Egyptian capital current in his time. Wilkinson thinks it conclusively against a literal understanding of Homer that no traces of an ancient city-wall can be found at Thebes, and accepts in bulk the suggestion of Diodorus Siculus that the "gates" of Homer may have been the propylae of the temples: "Non centum portas habuisse urbeem, sed multa et ingentia templorum vestibula." (i, 45, 7).

In the time of Diodorus, the city-wall, if any there was, had already disappeared, and the question of its existence in Homer's time has been in dispute. But, on the other hand, to regard the "gates" of Homer as temple-porches is to make these the barracks of the army, since from these gates the horsemen and chariots issue forth to war. The almost universal custom of wailing the cities of antiquity, and the poet's reference to the gates as pouring forth troops, point strongly to the supposition that the vast area of Thebes was surrounded with a wall having many gates. Homer's allusion to the treasures of the city, and to the size of its standing army, numbering 20,000 chariots, shows the early repute of Thebes for wealth and power. Its fame as a great capital had crossed the sea when Greece was yet in its infancy as a nation. It has been questioned whether Herodotus visited Upper Egypt, but he says, "I went to Heliopolis and to Thebes, expressly to try whether the priests of those places would agree in their accounts with the priests at Memphis" (i, 8, 8). As Strabo says, he describes the features of the Nile valley, and the chief points and distances upon the river, as only an eye-witness would be likely to record them. He informs us that "from Heliopolis to Thebes there are nine days' sail up the river, the distance being 4800 stadia (or, 400 miles)," which is the distance from the sea inland to Thebes 6120 stadia" (ii, 8, 9). In ch. xxix of the same book he states that he ascended the Nile as high as Elephantine. Herodotus, however, gives no particular account of the city, which in his time had lost much of its ancient grandeur. He alludes to the Temple of Jupiter there, with its ram-headed image, and to the fact that goats, never sheep, were offered in sacrifice. In the 1st century before Christ, Diodorus visited Thebes, and he devotes several sections of his general work to its history and appearance. Though he saw the city when it had sunk to quite secondary importance, he preserves the tradition of its early grandeur—its circuit of 140 stadia, the size of its public edifices, the magnificence of its temples, the number of its monuments, the dimensions of its private houses, some of them four or five stories high—all giving it an air of grandeur and beauty surpassing not only later cities. Of Thebes itself, but Diodorus deplores the spoiling of its buildings and monuments by Cambyses (i, 45, 46). Strabo, who visited Egypt a little later—at about the beginning of the Christian era—thus describes (xvii, 816) the city under the name Diospolis: "Vestiges of its magnitude still exist which extend eighty stadia in length. In the state there are a great number of temples, many of which Cambyses mutilated. The spot is at present occupied by villages. One part of it, in which the city lies, is called in Arabic; another is in the country on the other side of the river, where is the Memnonium." Strabo here makes the estimate of 800 years, and that of the 12th dynasty; it is only precise in the 12th dynasty. The temples of El-Karnak and El-Eksur (Luxor) are on the eastern side of the river, where was probably the main part of the city.

Strabo gives the following description of the twin colossi still standing upon the western plain: "Here are two colossal figures near each other, each of them 80 feet high. The upper parts of the other, from the chair, are fallen down—the effect, it is said, of an earthquake. It is believed that once a day a noise, as of a slight blow, issues from the part of the statue which remains in the seat, and on its base. When I was at those places, with Elius Galus, and numerous friends and soldiers about him, I heard a noise at the first hour of the day, but whether proceeding from the base or from the colossus, or produced on purpose by some of those standing around the base, I cannot confidently assert. For, from the uncertainty of the cause, I am inclined to believe anything rather than that which will not pass in this manner could send forth sound." (xvii, 46). Simple, honest, sceptical Strabo! Eighteen centuries later some travellers have interrogated these same stones as to the ancient mystery of sound; and not at sunrise, but in the glaring noon, the statue has emitted a sharp, clear sound like the ringing of a disk of brass under a sudden concussion. This was produced by a raggedurchin, who, for a few piastres, clambered up the knees of the "vocal Memnon," and, there effectually concealing himself from observation, struck with a hammer a sonorous stone in the lap of the statue. Wilkinson conjectures that the priests of Thebes had a secret chamber in the temple, from which they could strike it unobserved at the instant of sunrise, thus producing in the credulous multitude the notion of a supernatural phenomenon. It is difficult to conceive, however, that such a trick, performed in open day, could have escaped detection, and we are therefore left to share the mingled wonder and scepticism of Strabo (see Thompson, Photographic Views of Egypt, Post and Present, p. 156).

Pliny speaks of Thebes in Egypt as known to fame as "a hanging city," i.e., built upon arches, so that an army could be led forth from beneath the city while the inhabitants above were wholly unconscious of the move. He mentions also that the river flows through the middle of the city. But he questions the story of the arches, because, "if this had really been the case, there is no doubt that Homer would have mentioned it, seeing that he has celebrated the hundred gates of which, from the two stories possibly explain each other? May there not have been near the river-line arched buildings used as barracks, from whose gateways issued forth 20,000 chariots of war?"

2. **Monumental.** The oldest royal names found at Thebes are those of kings of the Middle Kingdom, who are known to have been there buried, and who are variously assigned to the 9th and the 11th dynasty, but undoubtedly reigned not long before the 12th. The 11th dynasty, which probably ruled about half a century, began about 2000 years B.C.; and the 12th was, like it, of Theban kings, according to Manetho, the Egyptian historian. The rise of the city to importance may therefore be dated with the beginning of the first Theban dynasty. With the 12th dynasty it became the capital of Egypt, and continued so for the 200 years of the rule of that line. Of this powerful dynasty the chief monuments are the temple to Amun, the god of the city, and the tombs of the kings. The city of Thebes was the capital, and of an empire of which the northern limit was Mesopotamia, and the
Thebes is a territory upon the Upper Nile; and then, especially by the kings of the 18th and 19th dynasties, those great monuments which make Thebes the most wonderful site in Egypt were founded or excavated. The kings who have left the finest works are Thothmes III and Amenophis III of the 18th dynasty, Sethos I and Rameses II of the 19th, and Rameses III of the 20th (19th); but throughout the period of the empire the capital was constantly beautified. During the 20th dynasty the high-priests of Amen-ra gained the sovereign power, perhaps corresponding to Manetho’s 21st dynasty, which he calls Tanites, and which must in this case be considered as of Thebans. They continued to add to the monuments of the capital, though, like the later kings of the empire, their constructions were not of remarkable size. The 22d dynasty, headed by Shepenk I, the Shishak of the Bible, seems still to have treated Thebes as the capital, although they embellished their native city, Bubastis, in the Delta. Under them and the kings of the 23d, who were evidently of the same line, some additions were made to its temples, but no great independent structures seem to have been raised. The most interesting of these additions is Shishak’s list of the countries, cities, and tribes conquered or ruled by him, including the names of those captured from Rehoboam, sculptured in the great temple of Es-Karnak. Under the 23d dynasty a capital was again begun, and lasted for some years until the Ethiopian conquest, and establishment of an Ethiopian dynasty, the 25th, about B.C. 714 (see De Rouge’s interesting paper, *Inscr. Hist. du ROi Pianchi-Meriamou*, in the *Rev. Arch.*, *N.S.* viii., 94 sq.). At this time the importance of Thebes must have greatly fallen, but it is probable that the Ethiopians made it their Egyptian capital, for their sculptures found there show that they were careful to add their records to those of the long series of sovereigns who reigned at Thebes. It is at the time of the 25th dynasty, to which we may reasonably assign a duration of fifty years, that Thebes is first mentioned in Scripture, and from this period to that of the capture of Jerusalem by Nebuchadnezzar it is spoken of as one of the chief cities of Egypt, or as No, “the city.” Under the Ethiopians it was no more than a provincial capital; immediately after their rule it was taken twice at least by the Assyrians. Ashur-bani-pal, son and successor of Esar-haddon (Ashur-akh-idanna), who came to the throne about B.C. 667–666, in a first expedition defeated the troops of Tirhakah, and captured the city of Nīa; a second time he invaded the country, which had revolted, and again captured Nīa. The exact time of these events has not been fixed, but it is evident that they occurred either at the close of the rule of the Ethiopian dynasty, or early in that of the Salite 20th, when Egypt was governed by the Dodecarchy. Tirhakah and Nīku, evidently Necho I, the father of Psammuetichus I, are mentioned almost as late as the time of the second expedition. Psammuetichus I came to the throne B.C. 664, and therefore it is probable that these events took place not long before, and about the time of, or a little after, his accession. These dates are especially important, as it is probable that the prophet Nahum refers to the first capture when warning Nineveh by the fate of her great rival. But this reference may be to a still earlier capture by the Assyrians, for Esar-haddon conquered Egypt and Ethiopia, though it is not distinctly stated that he captured Thebes (see Rawlinson, *Illustrations of Egyptian History, etc.*, from the *Cuneiform Inscriptions*, in the *Transactions of the R. S. Lit.*, 2d ser. vii., 137 sq.). The Salite kings of the 25th dynasty continued to embellish Thebes, which does not seem to have suffered in its monuments from the Assyrians; but when their rule came to an end with the Persian conquest by Cambyses, it evidently endured a far more severe blow. Later Egyptian kings still added to its edifices, and the earlier Greek sovereigns followed their example. The revolt against Ptolemy X. Lathyrus, in which Thebes stood a siege of three years, was the final blow to its prosperity.

Map of the Plain of Thebes.

In subsequent times its population dwelt in small villages, and Thebes no longer existed as a city, and this has been the case ever since; no one of these villages, or those that have succeeded them—for the same sites do not appear in all cases to have been occupied—having risen to the importance of a city. At the present time there are two villages on the eastern bank, El-Karnak and El-Uksur (Luxor); the former, which is inconsiderable, near the oldest part of ancient Thebes; the latter, which is large and the most important place on the site, so as to deserve to be called a small town, lying some distance to the south on the river’s bank. Opposite El-Karnak is the ruined village of El-Kurneh, of which the population mainly inhabits sepulchral grottos; and opposite El-Uksur is the village of El-Bairat, which, indeed, is almost beyond the circuit of the monuments of Thebes.

IV. Description. The plan of the city, as indicated by the principal monuments, was nearly quadrangular, measuring two miles from north to south, and four from east to west. Its four great landmarks still are El-Karnak and El-Uksur upon the eastern or Arabian side, and El-Kurneh and Medinet-Habû upon the western or Libyan side. There are indications that each of these temples may have been connected with those facing it upon two sides by grand dromoi, lined with sphinxes and other colossal figures. Upon the western bank there was almost a continuous line of temples and public edifices for a distance of two miles, from El-Kurneh to Medinet-Habû; and Wilkinson's conjecture that the approach to the pylon near the latter, perhaps in the line of the colossi, was called the "Royal Street" ran down to the river, which was crossed by a ferry terminating at El-Uksur on the eastern side.

As Memphis is remarkable for its vast necropolis, Thebes surpasses the other cities of Egypt in its temples. The primeval kings of Egypt who ruled at the northern capital were tomb-builders, those who preferred the southern capital were rather temple-builders; and as the works of the former give us the best insight into the characteristics of the national mind, those of the latter tell us the history of the country under its most powerful kings. Thebes is the most thoroughly historical site in Egypt. The temples are not only covered with the sculptured representations and histories of the chief campaigns of the conquering kings and the similar records of their presence to the shrines, and many other details of historical interest, but they have the advantage of showing, in the case of the most important temple, or rather collection of temples, what was added under each dynasty, almost each reign, from the 18th century B.C. to the Roman dominion; and thus they indicate the wealth, the power, and the state of art during the chief part of the period for which Thebes was either the capital or an important city of Egypt. The following is the plan of an Egyptian temple (q.v.) of the age of the empire: An avenue of sphinxes, with, at intervals, pairs of colossal statues of a king, usually seated, led up to its entrance. The gate was flanked by lofty and broad wings, extending along the whole front of the temple, the long horizontal lines of which were relieved by tapering obelisks. The first hall was usually hypaethral, unless perhaps it had a wooden roof and was surrounded by colonnades. The second, but sometimes the third, was filled with columns in avenues, the central avenue being loftier than the rest, and supporting a raised portion of the roof. Beyond were the naos and various chambers, all smaller than the court or courts and the hall. This plan was not greatly varied in the Theban temples of which the remains are sufficient for us to form an opinion. The great temple of El-Karnak, dedicated to Amen-ra, the chief god of Thebes, was founded at least as early as the time of the 12th dynasty, but is mainly of the age of the 18th and 19th. The first winged portal, which is more than 360 feet wide, forms the front of a court 529 feet wide, and 278 long. Outside the eastern portion of the south wall of this court is sculptured the famous list of the dominions and conquests of Sheshenî I, the Shishak of Scripture, which has already been mentioned. See SHISHAK. The great hall of columns is immediately beyond the court, and is of the same width, but 170 feet long: it was supported by 134 columns, the loftiest of which, forming the central avenue, are nearly seventy feet high, and about twelve in diameter; the rest more than forty feet high, and about nine in diameter. This forest of columns produces a singularly grand effect. The external sculptures commemorate the wars of Sethos I and his son Rameses II, mainly in Syria. Beyond the great hall are many ruined chambers, and two great obelisks standing in their places amidst a heap of ruins. More than a mile to the south-west of the temple of El-Karnak is that of El-Uksur (Luxor), a smaller but still gigantic edifice of the same character and age, on the bank of the Nile, and having within and partly around it the houses of the modern village. On the western bank are three temples of importance, a small one of Sethos I, the beautiful Ramessûm of Rameses II, commonly called the Memnonium, and the statley temple of Rameses
III, the Rameseum of Medinet-Habu, extending in this order towards the south. Between the Rameseum of Rameses II and that of Rameses III was a temple raised by Amenoph III, of which scarcely any remains are now standing, except the two great colossi, the Vocal Memnon and its fellow, monoliths about forty-seven feet high, exclusive of the pedestals, which have a height of about twelve feet. They represented Amenoph, and were part of the dromos which led to his temple.—Besides these temples of Western Thebes, the desert tract beneath the mountain bordering the cultivable land and the lower elevations of the mountain, in addition to almost countless mummy-pits, are covered with built tombs, and honey-combed with sepulchral grottoes, which, in their beautiful paintings, tell us the lives of the former occupants, or represent the mystical subjects of the soul's existence after death. The latter are almost exclusively the decorations of the Tombs of the Kings, which are excavated in two remote valleys behind the mountain. These tombs are generally very deep galleries, and are remarkable for the extreme delicacy of their paintings, which, like most of the historical records of Thebes, have suffered more at the hands of civilized barbarians in this century than from the effects of time. For fuller descriptions, see the numerous histories and books of travel on Egypt. The ruins have been copiously depicted photographically. See Egypt.

V. Biblical Notices.—The most remarkable of the notices of Thebes in the Bible is that in Nahum, where the prophet warns Nineveh by her rival's overthrow. "Art thou better than No-Amon, that is situate among the rivers, [that had] the waters round about it, whose rampart [was] the sea, [and] her wall [was] from the sea?" Notwithstanding her natural as well as political strength, Thebes had been sacked and the people carried captive (iii, 8-10). The description of the
THEBES, SEVEN HEROES OF 309
THECLA

Thebes (Heb. 'Babha', γυγη, conspicious; Sept. βασιλικός [v. r. βασιλικός] and βαδανος; Vulg. Thebes), a place mentioned in the Bible only as the scene of the death of the usurper Abimelech (Judg. ix. 50). After succouring a thousand of the Shechemites in the hold of Baal-berith by the smoke of green wood, he went off alone with his band to a whither, and, in the absence of his inhumanity had preceded him. The town was soon taken, all but one tower, into which the people of the place crowded, and which was strong enough to hold out. To this he forced his way, and was about to repeat the barbarous stratagem which had succeeded so well at Shechem, when a fragment of a fresco was found, and it was descended and put an end to his turbulent career. The story was well known in Israel, and gave the point to a familiar phrase: 'He is a backslider, and an unfaithful servant, and a reproach to his house.' (2 Sam. xi. 21). The geographical position of Thebes is not stated; but the narrative leaves the impression that it was not far distant from Shechem. Eusebius defines its position with usual minuteness. He says, "It is in the borders of Neapolis . . . at the thirteenth mile on the road to Scythopolis" (Onomast., s. v. "Thebes"). Just about the distance indicated, on the line of the old Roman highway, is the place of Stobi, or the village of Thebe, where it is not difficult to recognise the Thebes of Scripture. It was known to Hap-Parcii in the 13th century (Zahn, Benjam., ii. 426), and is mentioned occasionally by later travellers (Schwarz, Palest., p. 192). It stands on a hillside at the northern end of a plain surrounded by rocky mountains. The hill is skirted by a wall, the town below by a wall, the whole enormous the marks of industry and prosperity. It is defective, however, in water; so that the inhabitants are dependent on the rain-water they keep in cisterns, and when this supply fails, they must get it from a stream, Fari, an hour distant (Robinson, Bibl. Res. iii. 308). Some large hewn stones in the walls of the modern houses, and a number of deep wells and cisterns in and around the village, are the only traces of antiquity now remaining (Van de Velde, Travels, ii, 356; Porter, Handbook, p. 349).

Thebutes, or Thebuthis. All that is known of this person is the statement that Eusebius (Hist. Eccles. iv. 22) quotes from Hesychius to the effect that Thebutes made a beginning secretly to corrupt the Church of Jerusalem, because Simon the son of Cleophas was appointed to be bishop of the Christians of that city instead of himself.

Thecla (Σέγνη, a case), or Bubba (bubba, a "purse"), a case-cover containing the corporals, and presented to the priest of the Church at Easter, composed of square pieces of silk, 

Thecla, the name of several saints of the Roman Church.

1. The daughter of people living at Iconium, who is occasionally mentioned by Epiphanius, Ambrose, Augustine, and other Church fathers, and of whom tradition relates that she was converted through the preaching of Paul in the house of Onesiphorus, and that she thereupon renounced all worldly possessions and separated from her betrothed, a wealthy man named Thamyrias. No arguments or appeals could change her course.

2. Both she and Paul were imprisoned; and she was condemned to death by fire, while the apostle was banished. A cloud, however, extinguished the fire, and Thela, along with her lover, escaped unhurt, and the animals croaking at her feet, or being killed by thunder-bolts. She now assumed male clothing and followed Paul to Myra, where she received
'Blessed are they that have wives as though they had none, for they shall have God as their portion.'

"Blessed are they who retain the holiness of God, for they shall become as the angels of God.'

"Blessed are they that take the baptism, for they shall have rest with the Father and the Son.'

"Blessed are the merciful, for they shall obtain mercy, and shall have their reward of rest in the latter day of their days.'

"Blessed are the bodies of the virgins, for they shall be well pleasing unto God, and they shall not lose the reward of their work.'

"Blessed are they that tremble at the words of God, for they shall have rest.'

"Blessed are they that are partakers of the wisdom of Jesus Christ, for they shall be called the sons of the Most High God.'

"Blessed are they who, for the love of Christ, are departed from conformity to this world, for they shall judge the angels, and shall have their portion with the Father and the Son.'

White Paul was thus speaking, there was a certain virgin, called Thecla, in the city of Lystra, who was not in a bed, but she was sitting on the edge of the window, holding attentively to Paul's discourse concerning virginity and prayer; and she gave earnest heed to the things which were spoken, rejoicing in her heart, and Shall we see how she began coming in to hear Paul, she, also, had an eager desire that she might be deemed worthy to stand in his presence and hear the word of God.'

For three days and three nights Thecla listened to the apostle, till her mother sent for Thamyris to see whether her daughter's life could continue. The young woman, who was in vain, for Thecla only listened to the things which were spoken in the temple, and Thamyris and the temple could not fortify into the street of the city, watching those that went in and came out of the house of Onesiphorus. And she was one of the first one who was visited by the young woman, and she said, 'Tell me, I pray you, who is this that leadeth astray the souls of young men, and deceiveth virgins, so that they do not marry? And if you shall have done only one thing the Lord has heard it, that you are at the mouth of your money, for I am one of the chief men of this city.'

The women, who were Demas and Hermogenes, said unto him, 'Who know us, lord? for we are good fellows. We know your father, and that he deprives young men of wives, and maidens of husbands, and we know that in no time shall you have a resurrection than by not polluting the flesh, and by keeping it chaste.' At the supper which Thamyris gave them in his house, he advised them to advising them before the governor, charging him with perusing the multitudes to embrace this new doctrine of the Christians. The governor, who had determined to destroy them, sent for Thecla to have Thela to thy wife; and we will teach thee that the resurrection which this man speaks of has taken place already, for we rose again in our corsets, and rose again when we came to the knowledge of the true God.'

Thecla was brought to the house of Thamyris, or by Thamyris, who acted in accordance with the words of his advisers. The governor said to Paul, 'Who art thou, and what hast thou taught that for thee I shall be ex- scutination against thee.' But Paul, lifting up his voice, said, 'Forasmuch as I am this day examined concerning what I teach, I require of thee, why is it that all these men are gathered together at Jerusalem, for the purpose of retractions, he who is a jealous God, a God who is in need of nothing (theos agapetos), a God who taketh thought for the naked, a God who helpeth not the man that lieth still from uncleanness and corruption, from all pleasure, and from death? I say not that I am righteous, for I may not speak of myself;' God sent his own Son, whom I preach unto you, teaching men that they should rest their hope on him, who alone hath compassed upon a world that was estranged, that men may no longer be under condemnation, but that they may have faith, and the fear of God, and the know- ledge of holiness, and the love of the truth. If therefore I teach that which has been revealed to me by God, wherein do I go astray F'? When the governor had heard this, he ordered Paul to be bound and be put in ward, saying, 'When I shall be at leisure, I will bear him more atten- tively.'

'Thecla, having hiried the keeper of the door, was ad- mitted by night to the imprisoned apostle, and sitting at his feet, he began to talk with her about his condition. Paul was found there, she was brought before the governor to- gether with Paul; the latter was scourged and cast out of the city as a thousand men. There was a little temple, a pile was erected, and after she had made sign of the cross she threw herself upon it, and the wood was kindled. When the fire was burning, a voice was heard from heaven, and thus Thecla was saved.

Now when Paul was with Onesiphorus steering with his wife and children, in a new tomb, on the way from Iconium to Japhne. After several days, when the children were being abenaged of them, they suffered that they might eat the children, saying, 'Go, my child, and buy bread.' On the way the boy met Thecla, who was looking for Paul. When she was asked if she knew him, she rejoiced, and went to the village. Thecla said to Paul, 'I will cut my hair, and will follow thee where thou goest.' Paul answered, 'This is a shameless age, as thou art very fair. I fear lest another temptation come upon thee worse than
The fact is that churches were built in honor of the "beata virgo martyr Thecla"; in prose and rhyme the deeds of our heroines were celebrated; and Sept. 24 is commemorated in her honor.

II. Dramatic Tradition.—We have a long line of Greek and Latin fathers by whom Thecla is mentioned in such a manner as to lead to the supposition that whatever is said of her is the same as we find it in the Acta Pauli et Theclae. As one writer has followed the other, our examination will be confined to the earliest testimony.—To Paul Tertullian. In his treatise De Baptismo, ch. xvii, we read: "But if any defend those things which have been rashly ascribed to Paul, under the example of Thecla, so as to give license to women to teach and baptize, let them know that the presbyter in Asia, who compiled the account, as it were, under the title of Paul, accumulating of his own store, being conscious of what he had done, and confessing that he had done it out of love to Paul, was removed from his place. For how could it seem probable that he who would not give any firm permission to a woman to learn should grant to a female power to teach and baptize?" It has been taken for granted that the writer of the work was a presbyter somewhere towards the end of the 1st century, compiled a history of Paul and Thecla, and, instead of publishing it as a true narrative, either in his own name or with any name at all, but in good faith, published it falsely, and therefore wickedly, under the name of Paul, as though he were the writer himself, and was actuated by the spirit of his office to inveigh against his own so-called victim of his forgery, and deposed from the priesthood. This account has been marvellously dressed up, and some of its advocates have ventured to say that a Montanist writer of the name of Leucius was the real author of these Acts (Tillemont, Mémoires, ii, 446). Jerome (Catalognus Script., Epist. iv, 17), commenting on Tertullian's passage of Tertullian, says that the presbyter who wrote the history of Paul and Thecla was a presbyter of Asia, who had done by John (apud Johannem) the apostle. That Jerome relied upon Tertullian is evident from his statement; but his conduct in fathering the story of the deposition by John upon Tertullian is inexusable, because no such statement was made by Tertullian. On the other hand, we must bear in mind that, according to tradition, alleged or real events which occurred in Asia Minor and touched upon the life of the Church have been brought in connection with John. Thus he is said to have been the father of Tertullian: he was a disciple of Basiliades. Even miracles which were first narrated by disciples of the apostles or by bishops of Asia Minor were afterwards referred to him (comp. Patr. Apost. Opp. ed. Gebhardt, Harnack, Zahn, i [ed. i], 194). Our passage is a proof of this. Tertullian speaks of an Asiatic presbyter, the name of whom is not preserved; the writer instead of "apud Johannem," says "apud Johannes." Now, putting aside Jerome's commentary and the other patristic testimonies, which will be found collect- ed at great length in Baronius, Tillemont, and Schlaf, we see that the external evidence contained in Tertullian's passage that the Acts of Paul and Thecla must have existed in his time. To this external evidence of antiquity we have the internal, furnished by the Acts themselves. This will determine nothing as to who was their author, but will be valuable in helping us to ascertain the date at which the early origin of a Christian document is the absence of quotations from the New Test. True, this is only a negative evidence; but when found in connection with sayings attributed to Christ or the apostles which are not found in the canonical Scriptures, it tends to establish antiquity. There is nothing of this kind from the New Test.; and when Paul preaches upon the Beatitudes, words are boldly put into his mouth which are not in Scripture. This was becoming enough in a contemporary of the apostle, or in a writer of the 2d century who had received them through a not far-distant tradition, he would have been unable to be the writer of the 3d century, and, speaking, in general terms,
THEOCA AND PAUL

it was what writers of the 3rd century seldom did. Thus we could quote Clement of Rome, Igitius of Antioch, Justin Martyr, Polycarp, besides referring to the art. Savings, Traditional, of Christ, that such had been the case, in the 2nd century, for they shall have met with the Father and the Son." A further indication of the comparatively early date of this composition is its teaching the salvi-

ability of departed heathens. All early Christendom believed in the efficacy of prayers for those who had fallen asleep in the faith of Christ. But it was only the first two centuries which taught that prayer was of avail for such as had died without baptism and without the knowledge of Christ on earth. Thus we have a parallel case to the prayer of Thecla for Falconilla in the Passio Perpetuæ et Felicitæ, where we read that Perpetua, through her prayers, saved her brother Dionysius, who had died without baptism, "from the place of sufferings he comes to the place full of light." Augustine, commenting upon this (De Origine Animæ, i, 10; iii, 9), says that Dionysius must have been baptized, and that he was suffering in consequence of some childish fault committed after baptism. But Augustine also says that the latter must have been tanta-

trary, because best suited to his own theory. But is it in the least likely that Dionysius had been baptized, when Perpetua herself was unbaptized, and only received baptism shortly before her martyrdom? Now in the 2nd century it was not an uncommon thing to pray for non-

Christians; but after the 2nd century, we only do lose all trace of prayer for non-Christians who had departed this life, but we find the contrary opinion firmly main-

tained. So entirely was this the case that, as we have seen, Augustine, in order to get rid of the plain infer-
cence, says that the act of the holy man, "if we must, or, were driven to invent the ingenious but scarcely amia-

ble explanation that a little child who had died at the ear-
y old age of seven years was suffering purgatorial torments for some infantile fault committed after his baptism."

Another indication of an early date is the fact that the name Thecla is not uncommon in the ancient world, and is only used by the two companions of Paul, who call the attention of Thamyris to this fact as a point for ac-

clamation. This would place the compilation of the Acts at a time when the "Christian" was sufficient to condemn any one, i.e. at about the time of Tra-

jan, before the persecution. In the second century, evi-
dence, then, that, whether the legend of Thecla be true or false, it was composed at least before A.D. 200, perhaps somewhere between 165 and 195, and most probably within a few years of the middle of that period.

III. Object of the Author.—Whoever may have been the author of the Acts, the question has been asked, What was his object? It has been said that he inten-
ed to defend and maintain the Montanist theory, and the most important evidence in favor of the Montanist authorship of the Acts was taken from the concluding words, "She illuminated many by the word of God;" by which is meant—illumination being taken as a synonym for baptism—she also baptized those whom she conversed with. Now, leaving aside the statement of Jerome that "Thecla baptized a lion," a statement which he himself calls a fabula, and which he did not find in Tertullian, whom he follows, and who would have undoubtedly stripped the story of its more fantastic features if he had given it with any other writer, investigating how he came to make such a statement, or whether it was originally meant that Thecla baptized a person of the name of Leo (which means, in Latin, "lion"), we know that Thecla baptized none except herself. The only point in the argument now are the words, "she illuminated many by the word of God," which, as Basil of Seleucia (whether he is the author of the Acts or merely their editor) says, mean that "Thecla baptized those whom she conversed to Christ." Now it is true that ἔλευσις has been used by Gregory of Nazianzun, by Gregory of Nyssa, and by Methodius (Con. Deoct. Virg.) in the sense of baptism, and ἑλευσίμως for baptism, and by Clemens Alexandrinus, Athenæus, Chrysostom, Justin Martyr (I. 1, 61; comp. 65); but this is not the only meaning, for, as Justin himself says, κολεϊται τοίνυν το λεατον φωτισμὸς ὡς ὕπολυτος ἡ ἐλευσίμως (I. 1, 63), and thus deriving the new signification of the word from the old; and Dionysius Areopagita, Clemens Alexandrinus, Chrysostom, and Cyril of Alexandria use the word ἑλευσί-

μως for illumination, "instruction," which signification is required here by the addition τῷ λόγῳ τοῦ Θεοῦ. We have here the same usu usus lorum as we find in Eph. iii, 9; Heb. vi, 4; x, 22; and so also in the Sept., where it is used for γνώσιν. For examples, comp. Stephanus, Thea. Græc. Ling. u. v. φωτισθαν. We are not told that she instructed in public, which is the main point; and if she had preached at all, it probably was no sermon in the strict sense of the word, but a missionary discourse. This inference we make from the Acts themselves, according to which she lived among heathen; there was not as yet a congregation, consequently also no office. If that woman was the same, she was a most uncom-

mon, for of Aquila and Priscilla we are told (Acts xviii, 26) that they took Apollo and aekabatiston ainläng ling yōn tōn ouz bōn tōu Θεοῦ; and in Rom. xvi, 3 sq. Paul calls them tōn teutu synēchryon μον ἐν Ἰησοῦ. After all, we cannot perceive any Montanist tendency in the author of the Acts, for his Thecla does not remind us of the Montanist prophetesses, who even performed ecclesiastical functions. That Thecla baptized others we are not told: and when Basil of Seleucia states this of her, he does it because of his interpretation of ἔλευσις, and indicates that in the beginning of Christianity in Asia Minor such things had happened. We need only refer to the letter of Firmilian, bishop of Cesarea, ad-
cressed to Cyprian against pope Stephen (the 57th of Cyprian's Letters), and to the Apostolic Constitutions (iii, 9). The latter expressly forbid women to baptize and teach, it being ἵσταται, μᾶλλον ἐπὶ παράνομον καὶ ἀπατητικόν, as well as against the Scriptures. We can very well perceive how, in the face of such tendencies, which in the 3rd century could have been only of a very rare occurrence, a book must have been welcomed out of which the authority of an apostle could be quoted in favor of female prerogatives in the Church. Being dis-

posed to treat the case more cautiously, the time and persons was overlooked, and this special case was applied erroneously to different cases. For what we know of Thecla's baptism is, that she asked the apostle for that rite, but he exhorted her to be patient and wait. At Antioch, when in the arena, and believing that she would surely die without having received the baptism, she throws herself into the trench. After her deliverance she remains eight days with Tryphena, and instructs her in the word of God. We are not told that she baptized some, but that most of the maid-servants believed, and that there was great joy in the house. Then they were permitted to sing and to celebrate Mass as is described in the Acts xxvi, 19, 20) is entirely different from the one which Paul gives to Thecla.

Thecla's case is exceptional on account of her two-

to-fold martyrdom; being left by Paul and the adherents to his teaching, and being in periculo mortis, she bap-
tizes herself, using the Christian formula. According to the Acts she is converted to the whole truth of the faith, because God has made himself known in delivering her,

THEINNER

That the author of the _Acts_ was acquainted with the second epistle to Timothy is unquestionable, because there are many striking parallels between that epistle and the _Acts_, which need not be mentioned.

_Thécoë_ (Θεκοα), the Greek form (1 Macc. xx, 32) of the Heb. name (2 Chron. xx, 20) _Tekoa_ (בּקֶּד). 

_Théodose_ (Θεόδος), the Greek form (1 Macc. x, 32) of the Heb. name (2 Chron. xx, 20) _Tekoa_ (בּקֶּד).

_Théophane_ (θεοφανής), θεοφανία or θεοφάνη is treated in the Mosaic code in its widest bearings (Exod. xxxii, 1 sq.), especially when accompanied by burglary or the abetment of animals (Josephus, _Ant. xvi, 1, 1, 1; Philo, Opp. ii, 336). If the stolen property had already been sold or rendered useless, the thief was required to make fivefold restitution for cases of homicide and fourfold for cases of theft.

_Théodose_ (Θεόδος), the Greek form (1 Macc. xx, 32) of the Heb. name (2 Chron. xx, 20) _Tekoa_ (בּקֶּד). 

_Théophane_ (θεοφανής), θεοφανία or θεοφάνη is treated in the Mosaic code in its widest bearings (Exod. xxxii, 1 sq.), especially when accompanied by burglary or the abetment of animals (Josephus, _Ant. xvi, 1, 1, 1; Philo, Opp. ii, 336). If the stolen property had already been sold or rendered useless, the thief was required to make fivefold restitution for cases of homicide and fourfold for cases of theft.
Theism.

The obsolete opposition of theeism can only be atheism, since the word designates a conception of the universe according to which a Deity rules over nature and men, and the atheistic view denies the existence of the Deity and divine powers. Various specific contrasts are, however, contained under this general meaning of the term, as monothelism and polytheism, or deism and pantheism.

The dispute between monothelm and polytheism is no longer open. Philosophy and theology have long agreed that the Deity can be but one, and that the idea of a multiplicity of gods involves a contradiction in terms. Where there can be but one supreme, perfect, absolute Being, and such a Being is required even if the superior orders generally of supernatural beings be included under the idea of the Deity. This doctrine has, moreover, the support of human experience, since history shows that there is no nation where a thorough development of polytheism has been possible. The Deity is presented in monothelism to the extent of subordinating the many gods to one who is supreme, or of regarding them as simple modes of conceiving of his nature, powers, or manifestations. It may be added that the converse may be true, on the origin of polytheism is found in pantheistic identification of the Deity with nature and its forces, affords the most satisfactory explanation possible of the beginnings and growth of this error.

The monothelistic conception once received, however, opens the way to discussions respecting the nature of the Deity, the relation of the Deity to the universe, and complete recognition of the issue between deism and pantheism.

For the conceptions which underlie the terms, we refer to the articles PANTHEISM and DEISM, and in this place note merely that the term deism designates that conception of the world on which God is not only different, but also distinct, from the universe, and which therefore denies the immateriality of God in the world under any form, and constitutes the direct contradiction to pantheism. It is evident that this deism harmonizes with Christianity as little as does pantheism itself. It is to be noted, however, that the Scriptures return no answer to the question of the direct and absolute relation of God to the universe to be conceived? and speculation is accordingly compelled to attempt the solution of the problem after its own fashion. Theology has attempted the solution — with what degree of success it does not belong to this article to determine, since theology is not a theological, but a philosophical, term.

The modern literature of philosophy apprehends the idea of theism in a more limited meaning than that indicated above, and understands by the term that tendency and those systems which attempt to mediate between pantheism and deism, and seek to solve the theological problem in question by the method of philosophical inquiry. Such endeavors grew directly out of the development of the modern philosophy of Germany, beginning with Kant and passing through Fichte, Schelling, Hegel, Herbart, etc., until deism and pantheism came to be direct contradictions within the domain of philosophy; and at the removal of the differentiation evident demanded by the state of philosophy; by the considerations that pantheism inevitably leads to atheism or anthropotheism by including the world of nature and mankind in the essence of the Deity, and that it contradicts the indestructible and undeniable facts of human existence; while deism is in itself and absolute Being impossible by its denial of any substantial bond which connects God and the world, and its consequent assertion of the limitation of the Deity.

The object of theistic speculation, it may be assumed, was correctly stated by the younger Fichte in his essay Über den Unterschied zwischen abstraktem und naturlichen Theismus, in the Zeitschr. für Philosophie u. philosophische Kritik (Halle, 1856), p. 229, in these words: "Theism denotes for us the altogether general idea that the absolute world-principle, whatever differences of opinion respecting the limits within which it may be objectively apprehended may obtain, can yet in no case be conceived of as blind and unconscious power under the category either of a universal substance or of an abstract impersonal reason, and must be apprehended as a being having existence in and for itself, to whose fundamental attribute human thought can find no other analogical expression than the expression of self-consciousness. Connected with this conception of the Absolute Spirit, and necessarily leading up to it, is the equally general idea that the universal fact of the interconnection of the world indicates a beginning in accident and blind chance no more than it affords room for the necessary and unalterable necessity which is not otherwise. The only appropriate thought, in
view of the conditions of the world, is the intermediate idea of adaptation to an end, which, on the one hand, implies the possibility of a differently conditioned world-order, but, on the other, asserts that the existing order is most perfect, and projected in harmony with the ideas of the world. This development has been the partial goal of the empirical observation of the world, which may infinitely enlarge itself by the study of particulars in all the departments of nature, and may advance to a steadily increasing degree of certainty, compels metaphysical thought to ascend to the idea of an absolute original reason, which the world and subject; the idea attributes, it is demonstrated in the universe, human language is once more unable to find other designations than perfect thought and a will which requires the good." It will be observed that the leading idea in this definition is the existence of God in and for himself, or of his absolute self-conscious being. The prevalence of this idea determined the general current of speculation to disagree with the Hegelian doctrine of the Absolute, according to which God is impersonal and unconscious reason, and attains to consciousness of itself only in man. The distinction between ethical and naturalistic theism is therefore not a question of fact, but a question of thought, and the notice to the extent of observing that it grew out of Schelling's advance towards theistic views, in which he attained to the recognition of God as an independent Being, and as the "Lord of Being," but as he persisted in regarding the world as a necessity, it is not a "real" and "derivable" the first world out of the absolute, but the essence of God, he really conceived of God simply as a cosmical principle, as the younger Fichte observes. Other philosophers followed in his track, e.g. the Roman Catholic Baader (q. v.); but the representatives of the theistic tendency belonged rather to the school of Hegel than that of Schelling, as a rule, though they "passed beyond" the master and differed widely among themselves, as they adhered more or less closely to his views. The principal names in this class are J. H. Fichte (Eberhard, Gottingen, Frankfort, Berlin, 1834; vol. iii 1835).

Thesia'sar (2 Kings xix, 12). See THALASSA.

Theleia (θελείας v. θελεία), a Greek term (1 Esdr. v, 36) of the name Hebraized (Ezra ii, 59) TELHARA (q. v.).

The man of Theman (Omav), the Greek form (Baruch iii, 22, 23) of the Heb. name TEMAN (q. v.).

Themistians, an early school of theologers which took its name from a deacon, Themistias. An answer given him by Origen (Contra Cyprian. Time. 20) includes that the body of Christ was corruptible (subject, that is, to the decay arising from the wear and tear of life), then he must also have been so far subject to the defects of human nature that his very knowledge of the present and the future was imperfect, and there were, therefore, some things of which he was ignorant. The patriarch himself repudiated this conclusion, but a school of theologers grew up under the leadership of Themistius, and became known as AEGONETER (q. v.).

Thenius, Otto, doctor of theology and philosophy, was born in 1801 at Dresden, where he also died, Aug. 13, 1876. Although Thenius occupied the pulpit for more than twenty years, yet his main renown was as an exegete, and as such he will always hold an honorable position among scholars. He published, Erklärung der Bücher Samuels (Leips. 1842; 2d ed. 1864) — Erklärung der Bücher der Könige (ibid. 1849; 2d ed. 1878), with an Appendix, which was also published separately in "Das vorchristliche Jerusalem und dessen Tempel" — Erklärung der Kinglorder Jeremias (ibid. 1855) — De loco Joh. xxi. 21-28 Dissertatituncula (Dresden 1837); — Quis Ps. li Auctor fuisse videatur (ibid. 1889); — Die Gräber der Könige von Juda, in Ilgen's Zeit-schrift für die historische Theologie, 1844; — Über die Stufenprofile, in Studien und Kritiken, 1854, vol. iii, coming the matter of the creation. Dogmatik oder Philosophie d. Christentum (Leips. 1855). A review of the progress of theistic speculation reveals the fact that the demands of pantheism (monism) have been followed in the partial endeavors to establish the theistic conception of the world on a philosophical basis. The world is represented as having emanated from the being—the nature, essentiality, substance—of the Deity, as the realizing, renunciation, viewing, completing, of himself; his self-consciousness he is the deus ex machina of the world, his superhumanity, not independent, but a property of the world. But no similar justice has been done to the claims of deism; for the leading and fundamental demand of the deistic conception of the world is the idea of God as the Absolute Spirit who is eternally complete in himself through his absolute power and goodness, as contrasted with the world, which is bound by conditions and constantly engaged in the process of becoming and developing. This idea is contradicted by every view which makes the world to be in any way a part of the essence of God himself, since such a view transfers the becoming and developing condition of the world into the nature of God. The absolute is necessarily complete and perfect.

THEISM 316

THENIUS

...
THEOCANUS

His first edition appeared at Amsterdam in 1710. It designates the attempt to justify God with reference to the imperfections, the evil, and especially the sin, which exist in the world, or, in other words, any attempt to show that God is not the creator of the best possible arrangement of the world as the highest wisdom and goodness, despite sin, evil, and apparent imperfections.

Leibnitz preceded such evidence with a Discours de la Conformité de la Foi avec la Raison, because a theodicy must evidently proceed on the assumption that reason and revelation do not contradict each other, and that the former has the ability to recognize the facts presented by the latter, whether in nature or in history. As the aim of theodicy is to refute by reason the objections of supercilious reasoners against the wisdom and goodness of God, the work necessarily demands agreement between faith and reason. It is this primary object of Leibnitz to show that such agreement exists, or that it must be presupposed to exist so soon as a correct view of the idea and nature of reason is entertained.

Reason is the "rightful combination of truths which we recognize, either directly or by means of revelation, and there can be no conflict between it and the truth which God reveals. There are two classes of truths, and, so to speak, two forms of reason. In a narrow meaning of the word, reason has to do only with such truths as it derives from itself or recognizes without assistance from without; and in this character it is not contrary to faith. As far as the latter is based on authority and forms a sort of empirical certainty, its truths are "eternal and necessary truths," in no wise dependent on sense-perception, and, a priori, such as reason alone can apprehend and formulate, because they are founded on logical, metaphysical, or geometrical necessities. Leibnitz’s truths presents to view definite facts, e.g., the laws of nature (véritates de fato), such as come immediately within the province of experience and faith. This class of truths likewise involves necessity, and is so far set forth as necessary of itself. This, therefore, is "physical, instead of logical or metaphysical. The contrary to such truths is not logically impossible and unthinkable, but cannot be because its existence would be an imperfection, a fault. This physical necessity is thus shown to be at the bottom a moral necessity, founded in the nature of God, the true essence of God, the goodness, and as moral necessity it appertains also to the doctrines of the faith, being ascertainable by reason, and forming ground on which to comprehend and accept such doctrines.

With respect to the creation of the world, Leibnitz teaches that God "created the free act of God, performed that he "might most effectually, and in a manner most worthy of his wisdom and goodness, reveal and impart his perfection." He could create only a relative perfection, however; the creation of absolutely perfect beings, i.e., gods, was not possible, and the world and its inhabitants were accordingly created relatively imperfect. This condition of things may be denominated metaphysical evil, whose existence was directly conditioned in the will of God by which was determined the creation of limited and imperfect beings. Physical evil, or suffering, and moral evil, or sin, on the other hand, are not directly willed by God, but only indirectly, as serving to promote the good and secure the attainment of a higher perfection of the "whole," though themselves evil as respects the individual. The ground of metaphysical evil was, therefore, the good which God willed to secure in the creation of limited beings, while that of physical and moral evil is "the better" which could only thus be secured.

To the objection that God might have created a world in which physical and moral should have no place, or that he might have altogether refrained from the world-making, Leibnitz replies that physical evil may serve to help the world to achieve its degree of good; and that moral evil, which is possible because
God has endowed man with powers of volition, is likewise so wonderfully controlled as to increase the beauty of his universe as a whole. To the further objection that God thus becomes the author of sin, he replies that sin is not the consequence of the imperfections of the creature, but only a causa deficient, which, moreover, does not work sin directly and of its own motion, but only per accidens by reason of the existence of a higher good than sense can recognise or desire. The final objection, that as God foreknoweth all things, he is therefore able to prevent sin, is answered by the fact that in the case of the fall of man, a causation contrary to the nature and will of man is necessitated, and consequently no causation but the latter is unavoidable and its punishment unjust, is met by Leibniz by formulating a distinction between predestination and necessity. No volitional act need be performed by man unless he will. Forere- diction is not compulsion; and the intervention of forereconded events serves only to influence the will with motives, and not at all to constrain the will with force.

The review of Leibniz's work shows that it is far from satisfying the demands of the problem with which it deals. The reason for its failure lies in the philosophical views which that author laid at the basis of his scheme—his ideas of the monads, of God as the primitive monad, of the relations between reason and the will, of freedom and necessity, respecting which see the text of the question. In the present place, we cannot attempt to give an independent solution of the problem of theodicy, which necessarily must involve the development of an entire system of philosophy. Suffice it to say that the general method of Leibniz must ever be regulative to those inquirers who approach this problem from the standpoint of Christian theism, and that it naturally must be to separate more clearly between the conceptions of physical and moral evil, and connect the former more intimately with morality and the moral consummation of the world—show more clearly the profound reason for the necessity by which the possibility of sin is included in the concept of human freedom, and the existence of the latter is involved in the idea of the good—and, finally, to tone down certain theological exaggeations of the power of evil, and present freedom and morality in their gradual development out of the natural life and human naturalness, as well as in decision, with new means.

Most of the philosophers of more recent times who have treated this subject have approximated more or less closely to Leibniz, and have endeavored by criticism or modification, either avowedly or silently, to correct the faults of his system. We can only name a few of the older writers, e. g. Balguy, Divine Benevolence Vindicated (2d ed. Lond. 1805, 12mo); Werdermann, Versuch zur Theodicee, etc. (Dessau and Leipzig, 1784-98); Benedict, Theodici (Annaburg, 1822); Blasche, Das Böse, etc. (Leips. 1827); Wagner, Theodicee (Bamberg, 1810); Erasmo, Verkennings, des Theod. zur synnolat. Kosmologie (Greifswald, 1856); Sigwart, Problem des Bösen, etc. (Tülb. 1840); Von Schaden, Theodicee (Carlsruhe, 1842); Maret, Theodicee (Paris, 1857); Young, Evil and God, a Mystery (2d ed. Lond. 1861).—Herzog, Real-Encyklop. s. v.

Theodora (2), wife of the emperor Theophilus, who succeeded his father, Michael II, on the throne in A.D. 829. She was regarded as the regent of the empire during the death of her husband, in 842, and her name is associated with the worship of images, which had until then been savagely repressed. She banished John Grammaticus, the patriarch of Constantinople, and gave his place to Methodius, who was in sympathy with her plans, and then, as the work of such a step was not yet complete, she called a synod to remove the errors of the heresy of the worship throughout the empire. To commemorate this event she ordained an annual "festival of orthodoxy." Not content with having thus ended a dispute which had agitated the empire during 150 years, she inaugurated a persecution of the Paulicians (q. v.), and thereby occasioned a succession of wars in which entire provinces were devastated and depopulated by the allied Paulicians and Saracens (see Cedrenus, p. 541 sq.; Zonaras, Chron. xvi, 1; Petr. Siculi Hist. Manich. p. 70 sq.; Photius, Contra Manich. i. 23; Constantin. Porphyrog. Continuatus, iv, 16, 23-28).

A more creditable work was the conversion of the Bulgarians, which was accomplished by the Thessalo-

nian monks Cyril and Methodius in 862. The emperor, however, was not permitted to see this success. Her son Michael III compelled her to resign the regency, and incarcerated her in a convent, where she died of grief in A.D. 877 (see Tyron, De Imaginibus, p. 154; Lactant. De Imaginibus, p. 1642); Spanheim, Hist. Imaginum Restituta [ibid., 1686]; id., Opp. vol. ii; Schlosser, Gesch. der bildersturm. Kaiser, etc. [1812]; Marx, Bilderstreit der byzant. Kaiser [1839]; Walch, Ketsgeesch. p. 5; xi; Schröck, Christl. Kirchengeesch. vol. xx; Gieseler, Kirchen- gesch. [4th ed.], i. 1, 95. — Herzog, Real-Encyklop. s. v.
Theodore (Theodorus), St., of the 4th century, was a Syrian or Armenian, or of Amaesia as some more definitely state. Gregory of Nyssa relates that Theo-
dre's face that Jesus Christ was called to him. When Maximin and Galerius were persecuting the Christians, but was himself denounced. His youthful appearance won for him three days' respite, at the end of which he was to die unless he should recant. While engaged in earnest prayer, a Christian disguised as a soldier, named Demetrios, had crept in, and Theodore, at which he did. Didymus thereupon seized as a Christian and condemned to decapitation. Theodore returned and steadfastly endured horrible tortures un-
til he died by fire. His body was rescued by Chris-
tians, and is reported to have been brought to Brindisi in the 13th century, while his head is said to be still preserved at Gaeta. Gregory pronounced a eulogy in his memory. The Greek Church dedicates to him Feb-
17, the Latin, Nov. 9. See Greg. Nyssae Opp. (Par.
1615), ii. 1002 sq.; Herzog, Real-Encyclop. s.v.

Theodore, archbishop of Canterbury, succeeded Deudeslet, who died in the year 664. When the elect
ed Anglo-Saxon presbyter Wighard died in Rochester, where he had gone to receive ordination, pope Vitalian declared that he intended to send a worthy substitute. The Roman abbott Hadrian, a native of Africa, refused to be elected, and called attention to Theodore of Tar-
sus as a man well qualified in every respect for that po
stition. When he arrived in St Peter's at York, he left a new pontifical and a collection of canons (reprinted in the collection of Latin pontifical books of the Anglo-Saxons by Kunstmann [Mayvene, 1844]). See the Introduction to Kunstmann's collection; Bax-
mann, Politik der Päpste, i, 180, 184; Theologisches Uni-
versal-Lehrbuch, s.v. (B. P.)

Theodore, a member of the Graftus, a monk of St. Sabia, who is somewhat prominent among the monkish mar-
tyrs of iconoclasy. He was born at Jerusalem, attained to the rank of presbyter, and was sent by the patriarch Thomas of Jerusalem to Constantinople about 816 to labor in defence of the images. In the execution of this purpose he renounced so vehemently to the em-
peror's judgment that the Armenian emperor had him to be scourged and transported to the island of Pontus. Three years later he was pardoned, but again imprisoned and banished, this time by Michael the Stammerer. The next emperor, Theophilus, caused him to be scourged and carried to the island of Aephusa. Having returned-ed after several years and renewed his passionate advoc-
cacy of image-worship, he was threatened and tortured, and finally banished as incorrigible to Aepheas. But few writings are ascribed to him; among them are a disputation of the patriarch Nicephorus, given in Combe-
flas, Orig. Constantinop. p. 169; a letter of St. Cyril on the sufferings endured under Theoph-
illus, also in Combeflas—a manuscript, De Fide Ortho-
doxa contra Iconomouchus, from which a fragment is giv-
en in Combeflas, p. 221. See Vita Theod. Gr. in Combe-
flas, p. 191, by Surius, Dec. 26; and comp. the no-
tices in Ribbeck and Valeh, Gesch. d. Ketzererei, x, 677; 717.—Herzog, Real-Encyclop. s.v.

Theodore Lector (the Reader), a Church his-
torian in the East, was reader in the Constantinopolitan Church in or about the year 550. He furnished an ab-
stract of the history from the twelfth year of Con-
tantine to the accession of Julian, taken from the works of Socrates, Sozomen, and Theodore, which is known as the Historia Constantiniana and is extant in manuscript form. Valesius published so much of its contents as was found to vary from Theodore's sources. A second and more important work begins an indepedent record at the point where the history of Socrates ends, and carries it forward to the year 498. Neither work has been lost; but extended fragments have been preserved in John of Damascius, Nilus, and, especially Nicephorus Callistus, and published by Robert Pontius. The compendia and synopses which are based on the history of Theodore contained much important matter in relation to politics and the progress of the Church. Comp. the literary notices in Cave, Fabricius, Hamber-
ger, and Studolín-Hemens, Gesch. u. Lit. d. Kirchen-
gesch. p. 76. Editions: Stephanus, Ex iic legepou-
turgicis interprete: Theodorea diaryvarum Inexsic, cum

Theodore of Moposuea, bishop, and leader in the so-called theological school of Antioch, was born at Antioch about the year 850. He studied philosophy and rhetoric, the latter in company with John Chrysos-
tom at the school of the famous Libanius. Stimulated by Chrysostom to a fervor of Christian enthusiasm, he renounced his proposed secular career in order to devote himself to his studies and to himself. And though affection for a lady named Hermione inter-
rupted his course, he was recalled to it by the zealous efforts of his friend, and, through the influence of his teacher, Diodorus of Tarsus, who introduced him to the study of sacred literature, was confirmed in it for life. Two of Chrysostom's letters to Theodore in relation to this subject are yet extant. He became a presbyter at Antioch and rapidly acquired reputation, but soon re-
moved to Tarsus, and thence to Moposuea, in Cilicia Secundula, as bishop. In 394 he attended a council at Constantinople, and in 419 the Council of Ephesus. When Chrysostom was overthrown by his adverse fortunes, Theodore sought to aid his cause, but without suc-
cess. Theodore himself enjoyed a notable reputation throughout the Church, especially in the Eastern branch. Even Cyril of Alexandria deemed him worthy of praise and esteem. He was accused, indeed, of favoring the heresy of Pelagius, but died in peace in 428 or 429, before the Christological quarrel began between the schools of Antioch and Alexandria, in which his char-
acter for orthodoxy was so seriously impaired. After his death, the Nestorians appealed to his writings in support of their views, and at the Fifth Ecumenical Council Theodore and his writings were condemned. His memory was revered among the Nestorians, and his works were held in repute in the churches of Syria.

The theological importance of this father grows chief-
ly out of his relation to the Christological controversies of his time, and, in a lower degree, out of his exegeti-
cal labors. He was an uncommonly prolific writer, and
expanded much effort on the exposition of the Script-
ures; but of his exegetical works only a commentary on the minor prophets in Greek has been preserved in-
tact to the present time. Other expositions of minor books, e.g., the Pauline epistles, which had been com-
pleted in Latin by Hilary of Poitiers, have lately been recognised as the property of Theodore. Frag-
ments of still other exegetical labors by this father are scattered through the compilations of W嫩ger, Mai, and Fritzsche (see below). Theodore's method was that of other Greek expositors; his labors are not always satisfactory; and to this he added inde-
pendent criticism of the canon. He distinguished the
books of the Bible into prophetic, historical, and dia-
tactic writings, the latter class including the books of
Solomon, Job, etc., whose inspiration he denied. In our present day, where a spirit of rationalistic,
and thus naturally approximated to Pelagianism, though his position was intermediate. Adam was
THEODORE

THEODORET

created mortal. The human will, in its earthly envi-
ronment, would necessarily be drawn into sin. Adam's
sin was not transmitted, and Christ's work had for its
object the enabling of a created and imperfect nature
to realize the true end of its being rather than the res-
toration of a ruined nature. All intelligent beings were
included in this purpose, and it would consequently ap-
ppear that Theodore taught the impossibility of eternal
punishment.

The works of this author which are still extant are,
A Commentary on the Minor Prophets (Wegner [Berol.
1834]; Mai, Script. Vet. Non. Cod. [Rom. 1832], vol. vi),
and Fragments, in Mai, No. 35, Petrucci, vol. vii. The
Greek text is more completely given in Fritzsche,
Theod. Mops. in N. Test. Comm. (Turici, 1847), Pitra,
in Spicil. Solem. (Par. 1854), vol. i, has Latin versions of
Theodore's commentaries on Philippians, Colossians, and
Thessalonians. See also Mercator, Opp. ed. Baluz.,
on the councils growing out of the controversy of the
Three Chapters, etc.

Theodore I, pope, was a Greek by birth, and reign-
ied from 462 to 465. He excommunicated Paul, the pa-
triarch of Constantinople, in 464, for holding Monothel-
iet views, and denounced in his stead the banished pa-
triarch Pyrrhus, who had recanted his Monothelite
errors while at Rome. Pyrrhus, however, returned to his
heretical opinions, and Theodore thereupon pronounced
the ban against him. Shortly before his death, in 465,
this pope conveyed a synod at Rome which rejected the
Typos promulgated by the emperor Constantius II; and
he also sent a vicar, in the person of the bishop of Dore,
to Palestine in order to dismiss all bishops who should be
found to hold the Monothelite heresy, and thus stamp out
the sect's adherents. He wrote Epistola Synodica ad
Patriarcham Constantinopolitanum, and De Synode et
Episcop. Typos, Constantinop. Transmissae ad
Pyrrhus.

Theodore II, pope, a native Roman, reigned only
twenty days in 897.

Theodoret (Θεόδορος; also Theodoritus) was
one of the most eminent ecclesiastics of the 5th cen-
ty. He was born of reputable, wealthy, and pious peo-
ples at Antioch in 386 (Garnier) or 393 (Tillemont,
Memoire, xx, 869). His mother was especially devout,
and susceptible to the influence of a number of her
monks, one of whom had relieved her of an apparently
incurable affection of the eyes, and another of whom
announced to her, after thirteen years of sterile wed-
lock, that she should give birth to a son. In obedience
to their directions, Theodoret was dedicated to the ser-
vice of God. When the age of seven years he entered the
monastery presided over by St. Euprepis, near Anti-
oc; and there he remained for twenty years engaged
in theological study. The works of Diodorus of Tar-
sus, Chrysostom, and Theodoret of Mopsuestia formed
his mind, and it appears that the latter was the chief
of his monastic teachers. In time he was appointed lector
in Antioch, and afterwards deacon; and in the latter of-
fice he acquired such a reputation that he was, against his
will (Ep. 81), consecrated to the bishopric, 420 or 423.

The diocese intrusted to his care had for its seat the
improvident town of Cyprus, or Cyrrhus, the capital of
the Syrian district of Cyrrhetia, two days' journey
to the westward of Antioch, and it included eight hundred
parishes. His life as bishop was exemplary, and char-
acterized by charity, public spirit, thorough unselfish-
ness, successful guidance of his clergy, and great zeal
for the faith. Though great numbers of Arians, Mac-
donians, and especially Marcionites were found in his
diocese, he persecuted in 449 in respect to those who
turned to the Church. He reports the baptism of no less than
ten thousand Marcionites alone. These labors he pros-
cuted often at imminent risk to his life, and always
without invoking the aid of the temporal power.

The quiet of the times was disturbed by the advent of
the Nestorian controversy, whose progress and re-
sults imighted his latter career. Garnier states (in Life
of Theodoret, v, 350) that Nestorius had been The-
doret's fellow-pupil in the monastery of St. Euprepis,
and charges the latter with holding, in fact, the views
which caused the ruin of the former representative of
the Antiochian school. It appears, however, that The-
odore was concerned rather to resist the intolerance
of Cyril of Alexandria and combat his errors, opposite
to those of Nestorius, than to advocate the views of
the latter. With his school, he opposed the unionization
of the two churches in Christ, and taught that the Logos
had assumed, but had not become, flesh. He denied
that God had been crucified, and thereby implied that
God had not been born, and that the term άνθρωπος
could not, in any proper sense, be applied to Mary.
It was, of course, impossible that while holding such views
he should be retained as a presbyter, or a bishop. In
430 Theodoret addressed a letter to the monks of
Syria and surrounding countries in which he charges
Cyril with having promulgated Apollinarianism, Arianism,
and other similar errors in the twelve Capitula. In
431, at the Synod of Ephesus, he urged delay in the
transaction of the business until the Eastern bishops
might arrive; and when that advice was disregarded, he unit-
et with those bishops in a synod which condemned the
proceedings of the council and deposed Cyril. He also
heeded, with John of Antioch, the delegation which the
Orientalists sent to the emperor with their confession of
faith, whose rejection closed the series of incidents con-
ected with the Ephesian synod. After his return from
that mission, Theodoret wrote five books on the incor-
nation (Περί των Εναξιακῶν άνθρωπων) with the intent
of setting forth his views and exposing the heretical
tendency of Cyril's tenets and the unjust conduct of his
party in the transactions at Ephesus. Of this work
only a few fragments remain, which are derived from
the Latin version of Marius Mercator, a bigoted adher-
ent of Cyrilian views. He also wrote a work in de-
ference of the memory of his master, Theodore of Mop-
suestia, against the charge of having originated Nesto-
rarianism (see Hardouin, Act. Conc. iii, 108 sq.). He
was, however, induced to yield to the pressure brought
to bear by John of Antioch on the opponents of the policy
of the emperor, and to acknowledge the orthodoxy of
Cyril. He also submitted, under protest, to the deposi-
tion of Nestorius. But when the Nestorians were recei-
ved with extreme severity in 435, he renounced the idea
of peace, and once more stood forth the decided oppo-
nent of Cyril.

With the accession of Dioscorus as the successor of
Cyril, Theodoret's position became more unfavorable.
He opposed the business of that council, and was care-
to be called, with inexpressible joy; and the new patri-
arch, in 448, procured an order which forbade him, as
a mischief-maker, to pass beyond his diocese. Theodoret
defended himself in several letters addressed to promi-
nent personages (EP. 79-82), and wrote repeatedly also
against Dioscorus. The latter, after the latter a ppeared
by anathematizing the troublesome bishop, and finally
with causing him to be deposed, in 449, by a decree of the
"Robber Synod" of Ephesus. Theodoret now invoked
the protection of the see of Rome, which was readily
granted by Leo I; and he also applied to other Occi-
THEODORET

dental bishops (Ep. 119). In the meantime he had been sent to the monastery of Amapea, where he was subjected to rigorous treatment until the emperor Theodosius I, when he was attended by his son Theodosius, ascended the throne. The imperial policy now changed, and the deposed bishops were set at liberty. Theodoret appeared before the ecumenical synod of Chalcedon in 451 as the accuser of Dioscorus and as a petitioner for the restoration of his bishopric. In this synod he defended himself chiefly against the charges of a heretic, a Nestorian, and was prevented from making any explanation of his views until he consented to pronounce an anathema on Nestorius. He was thereupon unanimously restored (Hardouin, Conc. ii. 496). This action has been very generally condemned by students of history as the one shot upon an otherwise stupid people, who themselves were not wanting apologists to defend even this (see Smith, Dict. of Biog. and Mythol. s. v. "Theodoret"). It would undoubtedly have been more creditable to him to have resisted the clamor of his enemies at that time. He left the synod with a crusty "farewell," and returned to his bishopric, where he died in 457. The Euchologii anathematized his memory at their synods of 499 and 512, and his name was involved in the controversy of the Three Chapters. See Chapters, the Three.

Theodoret was the author of many works in exegesis, history, polemics, and dogmatics, the exegetical being by far the most important. He was one of the first to use the disposition to allegorize, and had a taste for simple and literal exposition. His method is partly expository, partly apologetic and controversial. On the historical books of the Old Testament, he rather discusses difficult passages than presents a continuous commentary. He treated the first eight books, and the Kings and Chronicles, on the plan of simply stating and meeting the difficulties they present to the thoughtful mind, without entering into a consecutive commentary of the several books; but upon other books he wrote expositions in the form of commentaries on Psalms, Canticles, Isaiah, and Lamentations; and his books on the Lamentations, and Isaiah exist no longer save in fragmentary extracts. He wrote also on the remaining prophets, the Apocalypse book of Baruch, and the Pauline epistles; and Schröder preferred Theodoret's commentary on the latter to all others, though it is very defective as regards composition. The contentions of the several books. The apologetical work "Εἰς τὴν Ἀθηναίων ἑτεροπράξους ἤchos, etc., was intended to exhibit the confirmation of Christian truth contained in Grecian philosophy, and affords evidence of the author's varied learning, as do also his ten discourses on Providence. His dogmatical works: a commentary on 2 Corinthians; in the form of a defense of Christianity against the heretics. The twelve heads of anathematization: Eumeniates, etc. Polymorpha, containing three treatises in defense of the Antiochian Christology, and directed against Eutyches, in 447, one year before the condemnation of that heretic at Constantinople—a compendium of heretical falsehoods, whose statements are evidently inexact and very superficial; this work contains so harsh a judgment of Nestorius as to lead Garnier to deny its authenticity: twenty-seven books against Eutychianism, an abstrat of which is supplied by Photius (Bibl. Cod. 46). The historical works are two in number—A History of the Church, in five books, extending from 255 to 429, which serves to complement Socrates and Sozomen; and a very much inferior Πολήμων of three books, which contains the lives of thirty celebrated heretics, and is rather the work of a credulous ascetic than of a learned theologian. The Greek translations of the Old Testament are given by Conze, Bibl. Cod. 46. The other books are the works of St. Gregory of Nyssa, Celestine, and others. Schröder has given an account of the four complete editions of Theodoret's works, the first by the Jesuits Simond and Garnier (Paris, 1642-84), in five volumes. The last volume was added after Garnier's death by Hardouin. The other edition, by Schulze and Nösselt (Halle, 1769-74, 5 vols. in 10 pts. 8vo), is based on the former, and contains all the works not contained in the former, excepting the Controversia, the IV. and the Euchologii. For an account of editions of separate works, see Hoffmann, Lex. Bibl. Script. Græc. X.–X

THEODOSIUS

Theodorus. See THEODORUS; THEODULUS.

Theodosians, a sect of dissenters from the Russo-Greek Church, who separated some years since from the Pomoryans, partly because they neglected to purify by public the churches which they had built, and to extirpate among unbelievers. They are noted for their honesty and strict observance of the Sabbath. An early Protestant sect bearing this name was formed in Russia in 1552 by Theodosius, one of three monks who came from the interior of Moravia to Vitebsk, a town in Lithuania. These monks conducted idolatrous rites, and cast out the images from houses and churches, breaking them in pieces, and exhorting the people, by their addresses and writings, to worship God alone, through our Lord Jesus Christ. The inhabitants denounced the act, and built a church, which was served by Protestant ministers from Lithuania and Poland.

Theodosius I, Roman emperor, whose services to the State and the Church earned for him the title of "the Great," was descended from an ancient family, and born about A.D. 346 at Caucia or at Italic, in Spain. His father was Comes Theodosius, the soldier who restored Britain to the empire. He was trained in the camp of his father, and entered on a military career, approving his talents in a campaign in Russia in 374, where he defeated the Saratians; but he renounced his brilliant prospects when the emperor Gratian caused the elder Theodosius to be disgracefully killed at Carthage in 376, and retired to his estates, where he engaged in agricultural pursuits. The incursions of the Goths soon rendered his services necessary in the field. Gratian called him to fill the place of his colleague Valens, who had fallen at Hadrianople, and he was proclaimed Augustus Jan. 19, 379. He received the government of the East. His conduct of the war was distinguished by the prudence with which he handled the dispirited troops, so that victory was gained without the fighting of pitched battles. On his return he passed through a severe sickness, and, in the belief that his end was near, he received baptism in the church of the orthodox bishop of Thessalonica. His baptism was followed, Feb. 28, 380, by an edict which imposed the Nicene Creed on his subjects as the faith of the land. Other laws, having regard to the improvement of morals and the welfare of the State, followed on his restoration to health. The Goths were subdued in successive campaigns, and admitted into the empire as allies.

At the time of the accession of Theodosius, Constantinople was the principal seat of Arianism. Demophilus, the Arian prelate, preferred to resign his dignities rather than subscribe the Nicene Creed, and Gregory of Nazianzum was invited to become his successor. He declined the place, but induced the emperor to deprive the Arians of the possession of all churches and other property, and to expel them from the metropolis. The Eunomians experienced similar treatment. The Manichean heresy was made punishable with death after the Senate and the Ecumenical Council had, in 381, confirmed the Nicene Creed and condemned all heretics. Theodosius also exempted bishops from obedience to the civil tribunals; and to his reign belongs the infamy of first establishing inquisitors of the faith. Measures were also taken to prevent the sacrifice of bloody offerings and to extirpate the worship of the sun and the heathenism, which induced such votaries to retire from the cities to more distant and unimportant places. This
Theodosius, a name given to the Monarchians (q. v.), from their founder, Theodotus (q. v.).

Theodotion is the name of one of the Greek translators of the Old Testament, after the time of the Septuagint (q. v.). According to Eusebius (Church History, c. 17, 19), he was a native of Sinope, in Pontus, and for a time sided with the Marcionites, but left them afterwards and became a Jew. Ireneus, however, calls him Ephesius, i.e. a native of Ephesus; while Jerome and Eusebius call him an Ebionite, or semi-Christian. Bleek thinks it most probable that Theodotion was a Judaizing heretic, a semi-Christian and Ebionite, according to Jerome's prevailing description of him. His reasons for thinking it probable that he professed to belong to the Christian Church are these two: a. "We find no trace of the Jews ever making use of his translation, and still less of its having been held in esteem by them: much more was this the case in the Christian Church, which accepted his translation of Daniel for ecclesiastical use.

b. He has translated a clause in Isa. xxvii, 2, Καταρσὴν ἢ Ἐστάσας τὸν θεοῦ, precisely as in 1 Cor. xxi, 54, but thoroughly deviating from the Sept. . . .

This concurrence is probably not purely accidental, but is to be explained by Theodotion having appropriated to himself the Pauline translation of the passage; and this, again, makes it extremely probable that he was a Christian at the time of making the translation."

As to the time when this translation was made, according to the generally received opinion, it was published under the emperor Commodus (A.D. 180-182), which, as Keil remarks, "is not impossible, and can perfectly well be reconciled with the mention of him by Ireneus; yet it is by no means certain. In any case, his translation is not so ancient as that of Aquila, but more ancient than that of Symmachus (q. v.)."

As to the character of the translation, if we receive the testimony of those who had the version in their hands, it approached the Sept. very nearly in sense and phraseology. The mode of translation adopted by Theodotion holds an intermediate place between the scrupulous literality of Aquila and the free interpretation of Symmachus. The translator appears, indeed, to have made the Alexandrian version the basis of his own, and to have abided by it as long as it represents the Hebrew faithfully; departing from it and freely translating for himself only where it inadequately expresses the sense of the original, his object was rather to supply the defects of that version than to give a new and independent one; hence the additions found only in the former reappear in his work. From the remaining fragments, it may be inferred that his knowledge of Hebrew was not great. He has retained Hebrew words not very difficult, expressing them in Greek without losing sight of the significance of the names from ignorance of their meaning: "Prater alia minus docti interpretis signa quod erutio lectori exploranda reminitum, perspe ilia verba Hebraica, quorum interpretatio non ita difficilis erat ut vertendi molestiam declinaret, Grecis litteris expressi" (Monafonov, Prooemium, VII, iii, 129, ed. Bahr). Thus, Isa. iii, 24, ἕλπις = ἐλπίς; xix, 15, εὐφραίνω = εὐφραίνω; xili, 20, ἤλπις = ἤλπις; Joel ii, 17, ἐλπίζω = ἐλπίζω; Job viii, 11, ἐποίησε = ἐποίησε. But Jahn (Einleitung, i, 178 sq.) conjectures that they were used among the Ebonites, and therefore retained by him—a supposition as improbable as that of Owen, that they were left so for particular reasons, such as the honor of the Jewish nation (Query into the Present State of the Sept. Version, p.108). Among Christians the version of Theodotion was held in higher estimation than that of Aquila and Symmachus; and Origen, in his Hexapla, supplied the omissions of the Sept. chiefly from it. At a later period his version of the book of Daniel was universally adopted into the Greek Bible among Christians, instead of the Alexandrian version.

According to Bleek, this change occurred some time between the age of Origen and that of Jerome.
The latter says, in his Prof. in Daniel, "Danielem justa LXX interpretes Domini Salvatoris ecclesia non legunt, utentes Theodotionis editione, et cur hoc acciderit nescio. Sive enim quia sermo Chaldaicus est, et quibusdam pro- pretatibus a nostro eloquentia discrepant, noluerunt Septuaginta ab eis sive ab aliquo alio Chaldaicarum linguae scriptoribus edere, sive adiu- vare causae exspectati ignorant; hoc unum affirmare pos- sum, quod multum a veritate discordet, et recto judicio repudiatur etsi." Dilichsz (De Habacuc Prophecie Viva et Antiqua Currente Commento Quatuor Pagi [Grummi, 1844], p. 28) says, "Quapropter ego (dome profer- turum argumenta contrarii) versionem Danielis Theol- oditionianam ab ecclesia non prius adoptatam esse censeo, quam ab Origenis tanquam castigata Alexandrino editio in Hexapla recepta et ab Eusebio et Ephilomio, cum ex eorum textum septuagintaemis edentem, septuagintaem- rali substituta est." Credner thinks that the Christians were so long under the pressure of contradictions, as- saults, and mockerys, from Jews and heathens combined that, finally (though, to be sure, not in general before the end of the 3d century) they gave up their Greek texts of the Septuagint, and set that of Theodotion in its place. From a passage by Jerome on Jer. xxix, 17, "Theodotio interpretatur est sed vivi; secunda passuam; Symmachi in opposito, it has been conjectured that there also existed a second edition of Theodotion’s ver- sion; but Hody (De Bibliotheca Textibus, p. 804) thinks that the text of Jerome here is corrupt, and that after vivi we should insert Aquila prima editione. Besides the literature given in First, Bibl. Jud. iii, 420 sq., see also Davidson, Biblical Criticism, i, 217 sq.; Keil, Introduction to the Old Test. ii, 232 sq.; Geiger, Nachchristen. Schriften (Berlin, 1857), iv, 87; Kaulen, Einleitung in die heil. Schriften (Freiberg, 1876), p. 78; Dilichsz, op. cit., p. 28 sq.; Ginsburg, Commentary on Ecclesiastes (London, 1861), p. 497 sq. See Greek Vers. (B. F.)

Theodotus (Θεόδωτος, God-given = Ioanan) was the author, or one of the three persons, who sent the噩or Nicanor to Judea to make peace (2 Macc. xiv, 19). B.C. C1r. 142.

Theodotus the fuller (ὁ σκίτσας) was a heretic, who wrote from Damascus to Rome about the end of the 2d century, and who taught Ebonistische doctrines; but the Jewish church of the Roman bishop Victor is said to have excommunicated him from the church. Theodotus maintained that Jesus, although born of the Virgin accor- ding to the Gospel, was distinct from the Father of whom he spoke, and that at his baptism the higher Christ descended upon him. But this higher Christ Theodotus conceived as the Son of him who was at once the supreme God and Creator of the world, and not (with Cerinthus and other Gnostics) as the son of a deity superior to the God of the Jews. Epiphanius (Heres. 51) associates him with the Alloi. He must not be confounded with another heretical Theodotus (ὁ πρασιτίγχνος ὁ ἀγαμαμελός) who was connected with a party of the Gnostics, the Melchisedekites. See Macedonia, Hist. of Christ. Church, i, 980; Ueberweg, Hist. of Philosophy, i, 809.

Theodromi (Θεόδρομος) is a term applied to cour- tesans in the church. It was the duty of a private notice to every member where and when the Church assembled to be held (Baronius, Annot. 58, n. 108). See Bingham, Christ. Antiq. bk. viii, ch. vii, § 15.
